OUR DESIGN JOURNEY

SYNOPSIS |

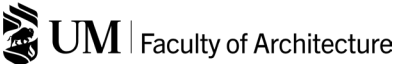

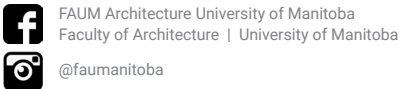

Two young Canadian design entrepreneurs who left the big firms behind to carve their own path in the world of design.

BIO | Candice Wei co-founded Wei Sanchez Design Studio Inc. with her business partner Mark Sanchez in 2017. The design firm provides full-scope interior design services for clients in both the public and private sectors.

Candice is the creative driving force behind the firm. Her visual arts background and international experience in the design field enriches her role as Co-Founder and Director. After completing

her degree in Interior Design, Candice advanced her career in Africa and the Middle East where she broadened her perspective in the context of international design. Her strength in client communications and passion for pushing creative boundaries results in well-articulated design concepts that challenge the status quo. Outside of the studio, Candice actively contributes to the local art community through her involvement in artist promotion and commissioned works throughout the city.
