

INSTRUCTORS: CONNECTING YOUR ICLICKER COURSE TO UM LEARN GRADEBOOK

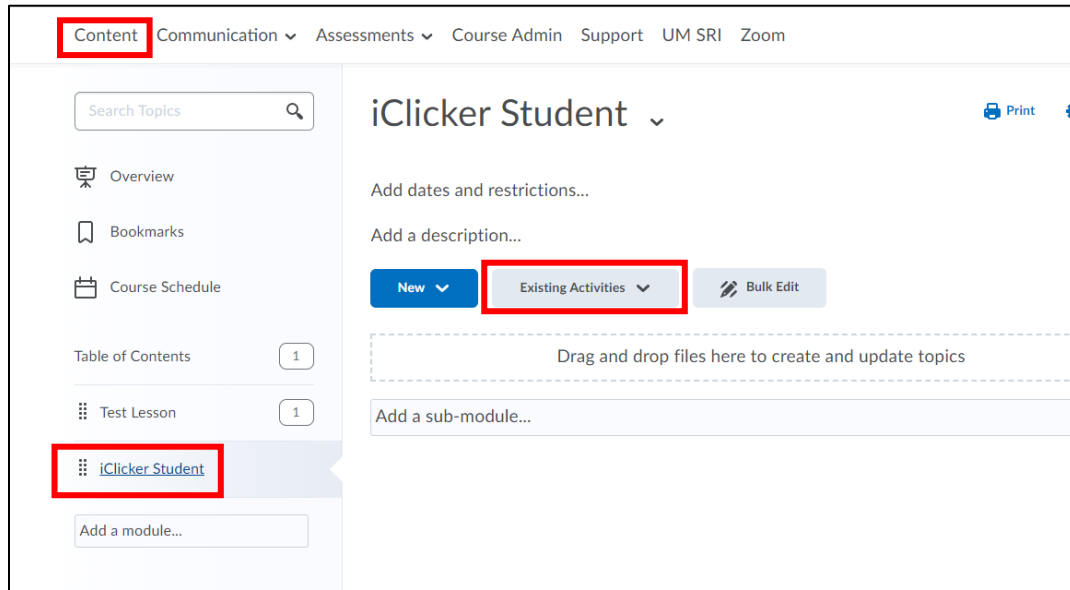

CONNECTING YOUR ICLICKER COURSE TO UM LEARN GRADEBOOK

The iClicker-UM Learn connection allows you to push grades from iClicker to a single column in your UM Learn course for simple grade management. It requires a one-time action on your students' parts, where they will click on the activity and log into their iClicker Student accounts (or create them if they do not have one). This action connects their iClicker account to UM Learn.

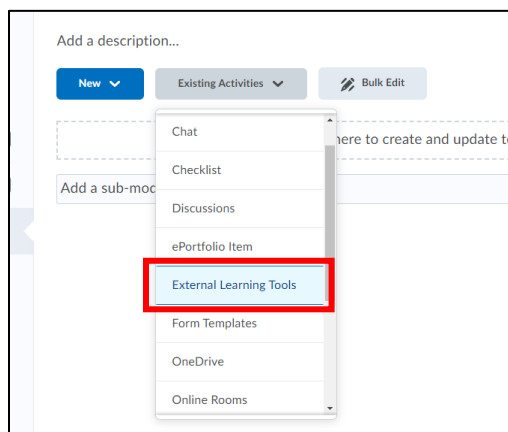

Before you begin, you will need to adjust one setting in your iClicker Cloud course. Please navigate to iClicker Cloud **settings**, and then click **Integrations**. From here, select **Brightspace by D2L** and the Simple LTI 1.1 Grade Sync option will appear. Copy the provided link for later, and then **save** your settings.

The image consists of two side-by-side screenshots from the iClicker interface. The left screenshot shows the 'Courses' page with a dropdown menu open for 'Computer Applications Test'. The 'Settings...' option is highlighted with a red box. The right screenshot shows the 'Integrations' page. The 'Integrations' tab is highlighted with a red box. The 'Grade Sync Integration' toggle is turned on and highlighted with a red box. The dropdown menu is set to 'Brightspace by D2L' and is highlighted with a red box. The 'Simple LTI 1.1 Grade Sync' section is visible, with instructions to follow. The 'Course-specific LTI link' is displayed as 'https://gateway.mnv-tech.com/v1/launch/LTI11/REEF/Launch?...' and the 'Copy Link' button is highlighted with a red box. The 'Email a reminder to unregistered students when I sync grades' checkbox is checked. The 'Save' button is highlighted with a red box.

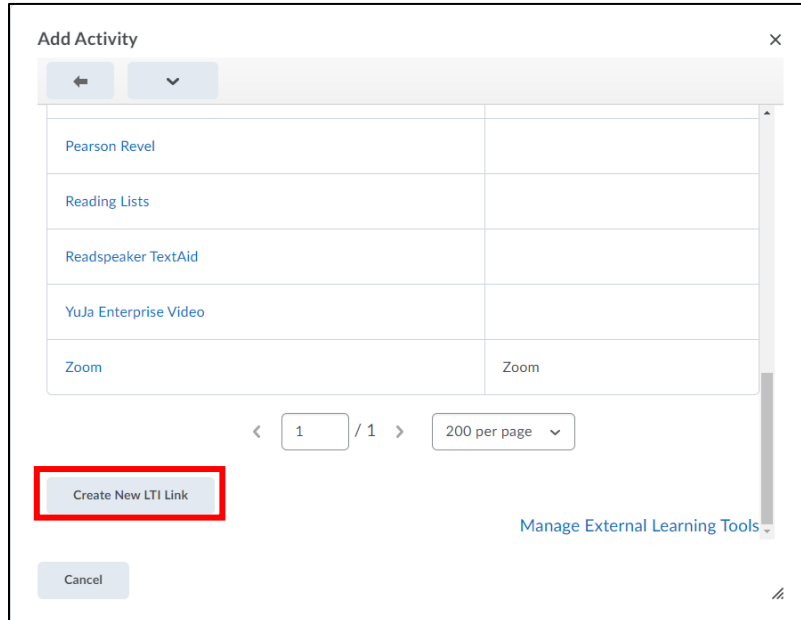

Navigate to your UM Learn course and open the Content area. From here, you can decide where you want your iClicker activity to be located. Navigate to the location or module you'd like to place the activity, or create a new module for iClicker, and select the **Existing Activities** option:

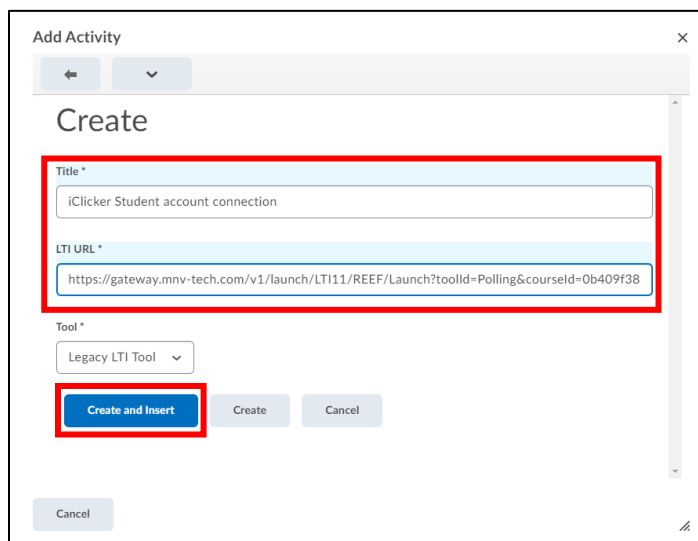

From the drop-down menu, select **External Learning Tools**.

On this list, scroll to the bottom and locate the **Create New LTI Link** button.

From here, you will be prompted to enter a name for your activity - we recommend "iClicker Student Account Connection" or something similar. Then, you'll enter your custom URL (that was copied earlier) into the URL box. Choose **Create and Insert** to place the link in your module.

This activity will automatically be added to your module. Be sure to click the drop-down arrow to **Edit Properties In-Place** and check the box to **Open as an External Resource**.

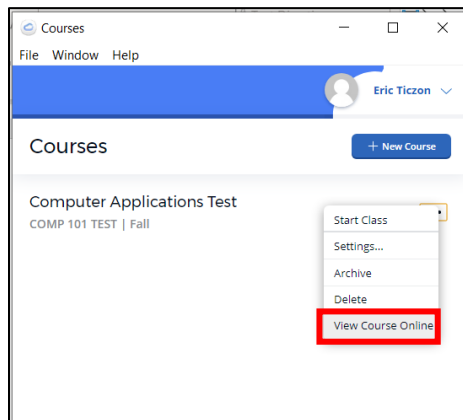

The image consists of two side-by-side screenshots of the iClicker Student interface. The left screenshot shows a dropdown menu for an activity titled 'iClicker Student'. The menu options are: 'View Topic', 'Edit Properties In-place' (highlighted with a red box), 'Hide from Users', 'Submit Feedback', 'Move To', 'Edit Metadata', and 'Delete Topic'. The right screenshot shows the 'iClicker Student' activity page. At the bottom right, there is a checkbox labeled 'Open as External Resource' which is checked and highlighted with a red box. Below this checkbox, it says 'User progress is not tracked for external resources'.

There is no further action required on your part for the connection.

Instruct your students to do a one-time action in the UM Learn course, where they will click on the iClicker activity and log into their iClicker Student accounts (or create them if they do not have one). This action connects their iClicker accounts to UM Learn.

UPLOADING GRADES

Grades upload is a single-click feature - navigate to your iClicker Cloud gradebook (either by logging into iClicker.com and selecting your course or by logging into you iClicker Cloud software and clicking the **View Course Online** link).

From the iClicker website, click **Gradebook**. You can click **Sync Grades** to upload all grades for all connected students.

 A screenshot of the iClicker Cloud Gradebook interface for the course 'Computer Applications Test'. The interface includes a sidebar with navigation options like 'Start Class', 'Class History', 'Assignments', 'People', 'Gradebook', 'Attendance', and 'Settings'. The main area shows a table of student grades with columns for Student Name, Grade Sync, Total, Performance, and Participation. A 'Sync Grades' button is visible in the top right of the table area.

Student Name	Grade Sync	Total	Performance	Participation
Class Average		4.67 / 8.00	3.33 / 6.00	1.33 / 2.00
Elaine Lim, Elaine	●	6.00	4.00	2.00
Ticzon, Eric	●	0.00	0.00	0.00
Student, Eric	●	8.00	6.00	2.00

Students with a green dot have completed the registration process, and their grades will upload to UM Learn. **Students who have not completed the registration process will not have this dot, and their grades will not be uploaded until they have done so.**

The first time that the **Sync Grades** button is clicked, it creates a new grade item in your UM Learn course. The instructor can edit this grade item and add the grade weight that composes the final grade.

SUPPORT FOR ICLICKER
