

# Justice, Access, Anti-oppression, Decolonization, Diversity, and Equity (JAADDE) Speaker Series

**Title:** Social and Ecological Justice in Science Education: Exploring Critical Issues

**Presenters:** Dr. Latika Raisinghani (Assistant Professor, University of Winnipeg; Adjunct Professor, University of Manitoba) with Pawanjot Kaur, Ayesha Shekh, Merine Sultana, and Lori Miller (Students of University of Manitoba and University of Winnipeg)

**About:** In this dialogical conversation, Dr. Latika Raisinghani and her students will inquire into their experiences of engaging with/in learning and teaching science in multiple cultural contexts. Our focus will be on interrogating the critical issues that are perpetuated through the dominant practices of science teaching and learning. We will share the specific moments that have transformed our understandings of education and science and discuss some of the ways we have attempted to invite socially and ecologically just science into our teaching and learning engagements.

**12:00-1:00pm on Wednesday November 20, 2024**
