

Course Outline

Instructor

- Prof. Faouzi Bellili
SP-329 Stanley Pauley Eng. Bldg.
(204) 474-8241
Faouzi.Bellili@umanitoba.ca

Office Hours

- By appointment

Teaching Assistant

- Chathura Illangakoon
umillang@myumanitoba.ca

Contact Hours

- 4 credit hours
- Lectures:
3 hours x 13 weeks = 39 hours
- Laboratories:
3 hours x 5 weeks = 15 hours

Prerequisites:

- ECE 3780 Signal Processing 1
- ECE 4260 Communication Systems

Course Website:

<http://umanitoba.ca/umlearn>

Important Dates

- **Term Test**
Monday, March 15th, 2021
6:00PM – 8:00PM
- **Voluntary Withdrawal Deadline**
March 31st, 2021
- **Louis Riel Day**
February 15th, 2021
No classes or examinations
- **Spring Break**
February 16th – 19th, 2021
No classes or examinations
- **Good Friday**
April 2nd, 2021
No classes or examinations

ECE 4250 – Digital Communications

Winter 2021

IMPORTANT NOTICE – Mandatory Requirement to Report

This course will be conducted using remote instruction. Students who are accessing the course from outside of Canada or the USA **must notify the instructor** and indicate in which country they are located. Access to software may be restricted from some countries and failure to comply with these restrictions may result in criminal prosecution.

Course Objectives

To introduce the principles of digital communication, methods and tools for analysis and design of digital communication systems, including simulation in Simulink.

Course Content

The following topics will be covered:

- A/D conversion and source coding
- Digital modulation and geometric representations
- Digital receiver design
- Inter-symbol interference
- Error control coding
- Synchronization (time-permitting)

Textbook

Fundamentals of Communication Systems, J.G. Proakis and M. Salehi, 2nd edition, Pearson-Prentice Hall, 2014.

Other Resources

Principles of Digital Communication, R. G. Gallager, vol. 1, Cambridge University Press, 2008.

(<https://www.cambridge.org/core/books/principles-of-digital-communication/8EC09E974B567D5A045A4438759DE077>)

Learning Outcomes

1. Design and analyze quantizers.
2. Analyze digital modulation techniques using signal processing tools.
3. Design optimum digital receivers.
4. Understand and apply basic error control coding methods.
5. Simulation and implementation of digital communication systems using Simulink and software-defined radio.

Expected Competency Levels

Outcome	KB	PA	IN	DE	ET	IT	CS	PR	IE	EE	EP	LL
1	3											
2	3	3	3	3	3							
3	3	3	3	3	3							
4	3	3	3	2	3							
5	2	6	6	3	6							

CEAB Graduate Attributes Assessed

PA.3 – Analyzes and solves complex engineering problems.

IN.3 – Interprets results and reaches appropriate conclusions.

Accreditation Details

Accreditation Units

- Mathematics: 0%
- Natural Science: 0%
- Complementary Studies: 0%
- Engineering Science: 60%
- Engineering Design: 40%

Attributes

KB: A knowledge base for engineering
PA: Problem analysis
IN: Investigation
DE: Design
ET: Use of engineering tools
IT: Individual and team work
CS: Communication skills
PR: Professionalism
IE: Impact of engineering on society/
environment
EE: Ethics and equity
EP: Economics and project
management
LL: Life-long learning

Competency Levels

- 1 - Knowledge (Able to recall information)
- 2 - Comprehension (Ability rephrase information)
- 3 - Application (Ability to apply knowledge in a new situation)
- 4 - Analysis (Able to break problem into its components and establish relationships.)
- 5 - Synthesis (Able to combine separate elements into a whole)
- 6 - Evaluation (Able to judge the worth of something)

Grading Scale

Letter	Mark
A+	95–100
A	85–94
B+	80–84
B	70–79
C+	65–69
C	55–64
D	45–54
F	< 45

Note: These boundaries represent a guide for the instructor and class alike. Provided that no individual student is disadvantaged, the instructor may vary any of these boundaries to ensure consistency of grading from year-to-year.

Evaluation

The final course grade is determined by the student's performance on assignments, in laboratories, and on examinations. Students must complete all the laboratories in order to be eligible to receive a passing grade.

Component	Value (%)	Method of Feedback	Learning Outcomes Evaluated
Assignments	20	F, S	1, 2, 3, 4, 5
Laboratories	15	F, S	1, 2, 3, 4, 5
Term Test	25	F, S	1, 2, 3
Final Examination	40	S	1, 2, 3, 4, 5

* Method of Feedback: F - Formative (written comments and/or oral discussion), S - summative (numerical grade)

Academic Integrity

Students are expected to conduct themselves in accordance with the highest ethical standards of the Profession of Engineering and evince academic integrity in all their pursuits and activities at the university. As such, in accordance with the *General Academic Regulations on Academic Integrity*, students are reminded that plagiarism or any other form of cheating in examinations, term tests, assignments, projects, or laboratory reports is subject to serious academic penalty (e.g. suspension or expulsion from the faculty or university). A student found guilty of contributing to cheating by another student is also subject to serious academic penalty.

Requirements and Regulations

- Attendance at lectures and laboratories is essential for successful completion of this course. Students must satisfy each evaluation component in the course to receive a passing final grade.
- It is the responsibility of each student to contact the instructor in a timely manner if he or she is uncertain about his or her standing in the course and about his or her potential for receiving a failing grade. Students should also familiarize themselves with the University's *General Academic Regulations*, as well as Section 3 of the Faculty of Engineering *Academic Regulations* dealing with incomplete term work, deferred examinations, attendance and withdrawal.
- No programmable devices or systems (such as calculators, PDAs, iPods, iPads, cell phones, smart watches, wireless communication or data storage devices) are allowed in examinations unless approved by the course instructor.
- Students should be aware that they have access to an extensive range of resources and support organizations. These include Academic Resources, Counselling, Advocacy and Accessibility Offices as well as documentation of key University policies e.g. Academic Integrity, Respectful Behaviour, Examinations and related matters.

All materials provided in this course are copyright and are provided under the fair dealing provision of the Canadian Copyright Act. This material may not be redistributed in any manner without the express written permission of the relevant copyright holder.

Retention of Student Work

Students are advised that copies of their work submitted in completing course requirements (i.e. assignments, laboratory reports, project reports, test papers, examination papers, etc.) may be retained by the instructor and/or the department for the purpose of student assessment and grading, and to support the ongoing accreditation of each Engineering program. This material shall be handled in accordance with the University's *Intellectual Property Policy* and the protection of privacy provisions of *The Freedom of Information and Protection of Privacy Act (Manitoba)*. Students who do not wish to have their work retained must inform the Head of Department, in writing, at their earliest opportunity.
