Students should refer to information in the Academic Calendar. This flow chart is intended as a guide, and only applies for the current academic year. It should not be used as a guide for subsequent years. Errors may be present in this document.

- Technical electives may be taken at anytime, subject to prerequisites.
- At most two (2) of these electives may be selected from the list of approved Electrical Engineering courses.
- The two (2) remaining electives shall be selected from the list of technical electives in the Computer Engineering Standard Program.

Five (5) technical electives and two (2) Natural Science electives are required to complete the program. Five (5) of those seven (7) electives form the Biomedical Focus Area, with BIOL 1410 and PHYS 2600 satisfying the Natural Science elective requirement.

The two (2) remaining electives shall be selected from the list of approved Electrical Engineering courses.

- Technical electives may be taken at anytime, subject to prerequisites.

Additional required elective courses which may be completed in any term.

Pre-requisite → Pre-/Co-requisite

1. The written English requirement is satisfied by completing three (3) credit hours from the list of approved Written English Courses for Engineering Students listed in the Academic Calendar (see Price Faculty of Engineering, Faculty Academic Regulations).

2. Students must take either of:
   - ENG 2040 Engineering Communication: Strategies for the Profession
   - ENG 2030 Engineering Communication: Strategies for the Profession

3. Students must take one of:
   - ECE 4630 Real-time Embedded Systems
   - COMP 3430 Operating Systems

4. Students must take one of:
   - ECE 4530 Parallel Processing
   - ECE 3790 Systems Engineering Principles 1

5. Additional required elective courses which may be completed in any term.

Complementary Studies Elective

1 April 2024, v.1
Computer Engineering Focus Areas

Students wishing to pursue more focused studies in a Computer Engineering subject/research area have the choice of doing so through a recognized Focus Area. Courses taken towards a Focus Area take the place of some of the Technical Electives required in the Computer Engineering program.

**Biomedical Focus Area**

**Requirements:**
To complete the Biomedical Focus the three (3) prescribed courses must be taken. In addition, one (1) of the three Biomedical Group A Elective courses must be taken, and a further course from either the Biomedical Group A or Biomedical Group B Elective courses must be taken. To complete the program requirements, two (2) additional courses must be selected from the elective courses listed in the Computer Engineering Standard Program.

**Prescribed Biomedical Courses** (All are required)
- ECE 4610 Biomedical Instrumentation and Signal Processing
- BIOL 1410 Anatomy of the Human Body *
- PHYS 2600 Electromagnetic Field Theory *
  * These two courses satisfy the Natural Science Elective requirement.

**Biomedical Group A Elective Courses** **(1 required)**
- ECE 4860 Biomedical Optics
- PHYS 3220 Medical Physics and Physiological Measurement
- PHYS 4300 Microfluidics for Biology

**Biomedical Group B Elective Courses** **
- BIOL 1412 Physiology of the Human Body
- MBIO 1220 Essentials of Microbiology
- BIOE 3320 Engineering Properties of Biological Materials
- BIOE 4610 Design of Assistive Technology Devices

**One course must be selected from Group A, with a second course selected from either Group A or Group B.**
