

Instructions

All hazardous materials at the University of Manitoba are required to be labelled. Where a chemical is decanted from its original container, the supplier label is missing or no longer legible, or a new material is synthesized, a workplace label can be used.

The following workplace label templates have been formatted to fit on Avery labels or can be printed on printer paper. Use the hazardous material's safety data sheet (SDS) to obtain the relevant information and choose the largest label that can fit on the container.

Large Labels (3½ x 5, Avery 60503 or 5168; and 2 x 4, Avery 60505)

- Product Name – match what is listed in Section 1 of the SDS.
- Hazard(s) – the classification(s) as listed in Section 2 of the SDS, select all that apply.
- Safe Handling Precautions – use the Safe Handling Precautions from Section 7 of the SDS.
- PPE – use the personal protective equipment (PPE) listed in Section 8 of the SDS, select all that apply.

Small Labels (2 x 2, Avery 60506)

- Product Name – match what is listed in Section 1 of the SDS.
- Safe Handling Precautions – use the Safe Handling Precautions from Section 7 of the SDS.

For volumes less than 100 ml or temporarily decanted products that will be used immediately or will remain under the control of the person who decanted it within one shift, workplace labels are not required but still highly recommended. For volumes less than 100 ml, the product name must still be clearly indicated on the container.

If the provided templates do not provide sufficient space for the information required or do not fit on the container, contact the Environmental Health and Safety Office (ehso@umanitoba.ca) for further assistance.

WORKPLACE LABEL

Product:

Hazard(s):

Check all that apply.

- | | |
|-------------------------|---------------------------|
| Flammable | Carcinogenicity |
| Oxidizing | Germ Cell Mutagenicity |
| Organic Peroxide | Reproductive Toxicity |
| Corrosive (pH: _____) | Respiratory Sensitization |
| Self-Reactive/Explosive | Target Organ Toxicity |
| Irritant (Skin & Eye) | Aspiration Toxicity |
| Acute Toxicity | Biohazardous |
| | Other: _____ |

Safe Handling Precautions:

PPE:

- | | |
|-----------------|--------------------------|
| Glasses/Goggles | N-95 respirator |
| Face Shield | Organic vapor respirator |
| Gloves | Other: _____ |

Refer to the Safety Data Sheet for more information.
