

Post Exposure Protocol

HUMAN BLOOD AND BODILY FLUIDS

IMMEDIATE RESPONSE TO EXPOSURE:

- > If immediate danger exists, remove yourself from the area
- > Alert other potentially affected workers
- > If skin is punctured or lacerated, wash the affected area with soap and warm water, do not force bleeding
- > Dress the wound using a sterile bandage if possible or limit further bleeding by applying pressure to the wound with a sterile compress
- > If on skin or in eyes, flush affected area for 15 minutes
- > Report the incident to your supervisor
- > Immediately seek medical attention as per below
- > The worker or the supervisor must report the incident to EHSO on or before the next working day
