Math Skills

Prepare for university math. Refresh or strengthen your skills or build some new ones. Get ready for your math studies at the University of Manitoba.

MSKL 0050 Basic Skills in Mathematics

This course provides an overview of basic computational, algebra and geometric concepts, the mastery of which will be essential for success in a pre-calculus course. Students will learn the basic concepts of calculations involving integers and fractions, algebraic computations such as factoring and solving equations, as well as some geometry such as coordinator geometry and right angle trigonometry. It's also a tool to prepare for Math Skills 0100.

MSKL 0100 Mathematical Skills

This course provides an overview of mathematical concepts, the mastery of which will be essential for success in an undergraduate setting. You will learn how to apply mathematical skills to both elementary and computationally complicated situations, consistently and with confidence. Upon successful completion of this course, you will receive a letter grade, acceptable to the Department of Mathematics as evidence of preparation for entry into selected University of Manitoba mathematics courses.
