Course Overview
This course surveys the history of the People’s Republic of China from its founding in 1949 through the present day. The course will focus on a number of key themes related to the political, economic, social, cultural, and intellectual history of socialist China. The themes include: one, the relationship between state and people; two, the ideological and political structures of socialism and their changing configurations; three, gender and class relations in socialist and post-socialist China; and, four, China’s understanding of and engagement with the rest of the world. In our consideration of these themes we will be paying particular attention to historical changes and continuities across different periods of PRC history. We will also be assessing who benefits from and who bears the costs for various state projects and uses of socialism since the founding of the PRC in 1949.

Class Format
This class includes lectures, class discussion, and group presentations. Regular class attendance is mandatory. Students are encouraged to actively participate in the class by asking questions, discussing readings and viewing assignments, as well as working with classmates on group projects.
