

## How to Download and Configure Cisco Jabber

**Please Note:** If you are offsite, you will need to be connected to the U of M VPN to use Jabber with the instructions below.

1. Download and install Jabber from here:

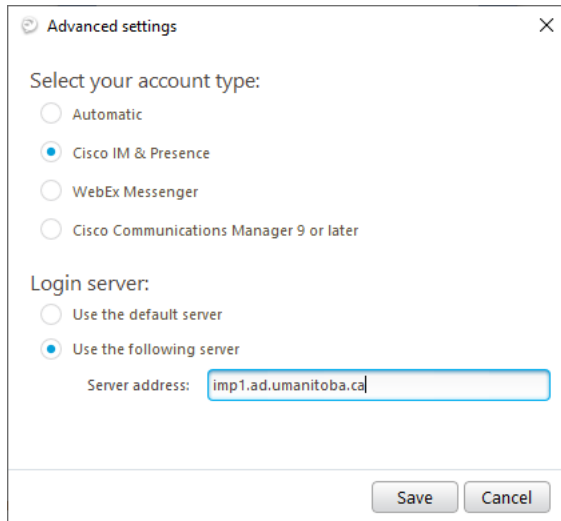

<http://www.umanitoba.ca/computing/ist/help/media/CiscoJabberSetup.msi>

2. When the installation is complete, launch the application. The Cisco Jabber splash page will appear.

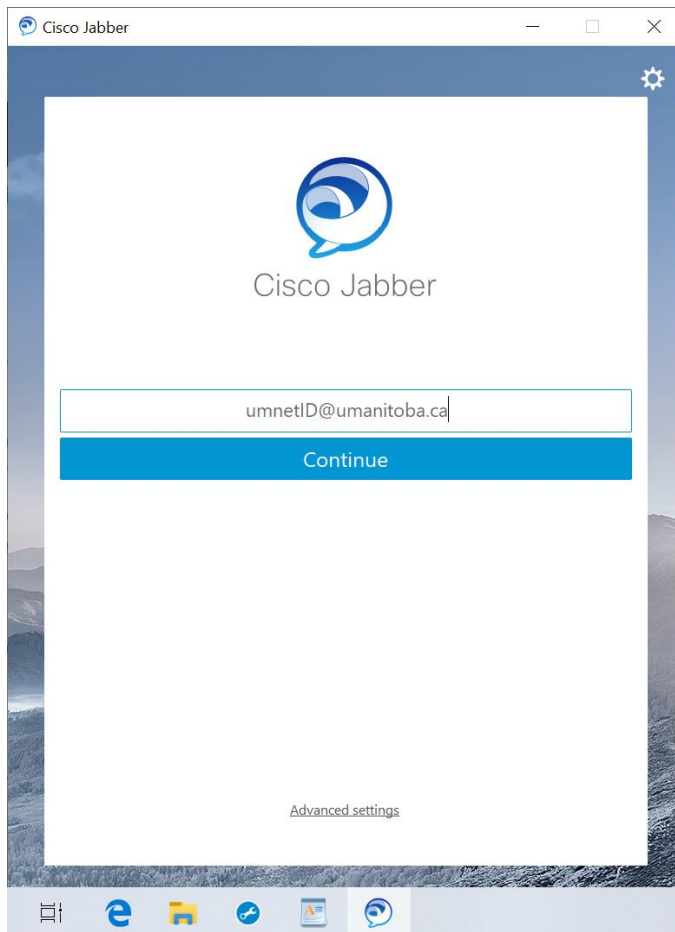

3. Click on the **Advanced Settings** link. The Advanced Settings page will appear.

4. Select the **Cisco IM & Presence** radio button and then select the **Use the following server** radio button.

4. In the **Server address** field, type **imp1.ad.umanitoba.ca** and then click on the **Save** button.
5. The **Cisco Jabber** splash page will appear.
6. In the username field, enter your UMNet ID (same one used to login to JUMP) in the following format: **UMNetID@ad.umanitoba.ca** and then click on the **Continue** button.

7. You will be prompted to enter your password (use your corresponding JUMP password), do so and then click on the **Sign In** button.
