Infection Prevention and Control

DURATION OF TRAINING

1 Year

NUMBER OF POSITIONS AVAILABLE

1

DESCRIPTION/OVERVIEW OF PROGRAM *(maximum 250 words)*

One year program to supplement adult ID subspecialty training. Trainee must have completed ID training and come with funding as there is no funding attached to this fellowship. The trainee will spend the year involved in infection control activities at both community and tertiary centres, participating in weekly meetings with IPC's, monthly infection control committees. Elective rotations include public health, reprocessing and sterilization. Fellows will also be expected to complete a research/QI project during their training.
