PGME RESIDENTS AND FELLOWS
WRHA Immunization and Tuberculin Testing Policy Compliance

All newly hired WRHA staff (including medical staff) are required to meet the requirements of the WRHA Immunization and Tuberculin Testing Policy # 20.40.200. This includes:

- Completion of the Immunization and Communicable Disease Record form (attached). Page 2 of this form outlines the required immunization and testing.
- Completion of the Confidential Personal, Work and Health Questionnaire (attached).

Medical residents and fellows must submit their documentation and arrange an appointment with the OESH prior to commencing their postgraduate medical education training program. We do understand that many trainees will be arriving from out of town, so it is important that the paperwork has been submitted and that you have contacted one of the Occupational Health Units by May 8, 2015 to schedule an appointment to attend prior to the commencement of training.

In order to complete this process, please call and arrange an appointment with any Occupational Health Unit within the WRHA (locations, hours and contact numbers can be found on the attached). If you haven’t already submitted your paperwork, please bring this with you to your appointment. For convenience, you may also forward the completed paperwork directly to the OESH Office by e-mail @ mmedina3@wrha.mb.ca.

Note: Completion of the Immunization and Communicable Disease Record may indicate that you require further immunization or testing as required by the policy. The Occupational Health Nurse will advise you if this is necessary.

The Resident Employment Administration Office of the Joint Operating Division (representing the WRHA and Faculty of Medicine) will be notified of all medical residents/fellows who are non-compliant with this policy prior to the start of their postgraduate medical education training. Please note that this is a requirement of registration. Failure to comply will result in a delay in your start date.

Your records will be maintained in a confidential central database and can be accessed at any site by the Occupational Health Nurse should you require them.

If you have questions related to immunization appointments/documentation, please contact one of the WRHA Occupational Health Units.

Dr. Brock Wright
Senior VP Clinical Services and Chief Medical Officer
Winnipeg Regional Health Authority

Dr. Cliff Yaffe
Associate Dean
Postgraduate Medical Education
Faculty of Medicine, University of Manitoba
Occupational Health Units of WRHA Occupational and Environmental Safety & Health
