Undergraduate Medical Student Research Education Committee (UMSREC)

Governance

The UMSREC committee, chaired by the B.Sc. (Med) Program Director, has members drawn from the various departments of the Faculty. Its task is two-fold. Firstly to evaluate the research proposals and select students for admission and as well to evaluate student applications and educational submissions for award for all undergraduate medical research programs within the Office of the Associate Dean, Research. The Committee will be called upon at various times of the year to hear issues and make suggestions for resolution. Committee membership will consist of Faculty and non-faculty experts. Invitation to join the Committee is at the discretion of the Program Director (Chair).

Each year the committee membership is renewed. A call for membership is sent to the University Faculty as well as non-faculty.

All committee decisions will be considered unanimous.

Note: The former BScMed Program Selection Committee, MED II Summer Research Program Selection Committee as well as the BScMed Awards Selection Committees will now be known as the Undergraduate Medical Student Research Education Committee. The acronym of UMSREC will be commonly used in place of the complete title.
