MMSF ALLEN ROUSE BASIC SCIENCE CAREER DEVELOPMENT RESEARCH AWARD

Guidelines

1. The award is given for a period of 3 years during which the MMSF will contribute $50,000 per year towards the salary (including benefits) of the awardee. A one-year term grant-in-aid to the appointee of up to $20,000 may be made during the first year of the appointment.

2. Candidates must have a faculty appointment at the University of Manitoba and must be engaged in basic research related to the health field. During the tenure of the award, the awardee must guarantee a 75% time commitment to research.

3. To be successful, a candidate must be judged to be in the early stages of a successful research career. This judgment will be based on qualifications and experience. The candidate should have been engaged in independent research for not more than 7 years, should have received one or more grants from a national granting agency, such as the Canadian Institute of Health Research, and should have a satisfactory publication record in peer reviewed journals.

4. The intent of the award is to support the awardee to become a strong candidate for a senior national personnel research award, such as a Medical Research Council Scientist Award. Individuals who have previously held, or currently hold, such an award will not be eligible for the MMSF award.

5. An awardee is not eligible for the MMSF Allen Rouse Basic Science Career Development Research Award for a second 3-year term.

6. The award cannot be held concurrently with another personal career award.

7. An awardee who receives the MMSF Allen Rouse Basic Science Career Development Research Award is not eligible for other MMSF Salary awards.
