University of Manitoba Department of Psychiatry Research Report

This year's departmental research report is the 4th annual research report since its re-introduction in 1998. Our department has witnessed a steady growth in research productivity over these four years. As this document demonstrates, numerous and diverse topics of psychiatric research are being pursued by members of the department. Examples include end of life care, psychiatric epidemiology, psychological and social risk factors for mental disorders, studies of pharmacologic and psychotherapeutic treatment and functional neuro-imaging. A total of 43 peer reviewed papers (published or in press), a prestigious Canada Research Chair in Mood and Anxiety Disorders awarded to Dr. Brian Cox, and numerous sources of research funding including national and regional peer reviewed grants and industry sponsored clinical trials are among the highlights of the present report.

Special thanks are due to Brenda Doerksen for administrative assistance in preparing this document.

Murray W. Enns, MD, FRCPC.
Director of Research and
Associate Professor of Psychiatry

Brian Cox, Ph.D., C. Psych
Canada Research Chair
Associate Director of Research and
Associate Professor of Psychiatry
