

POPULATION PROJECTIONS OF THE UNIVERSITY AGE GROUP IN MANITOBA
The population of youth aged 18-24 in Manitoba is projected to increase from 2022 to 2038, after which it is expected to decline.

Based on Statistics Canada population projections (Cat. 91-520-X). M4 is the most favorable of the Medium Growth scenarios for Manitoba, while M6 is the least favorable. See the IS Book Definitions or Cat. 91-520-X for more detail on the scenarios.
