---

## **Summer Early Exposure Program:**

Registration through: Eliya Ichihashi  
Electives Administrator, UGME  
260 Brodie - 727 McDermot Ave.  
Ph: 789-3291 E-Mail: [electivesUGME@umanitoba.ca](mailto:electivesUGME@umanitoba.ca)

### Application & Info:

<http://umanitoba.ca/faculties/medicine/education/undergraduate/summerearlyexposure.html>

### Key Components:

- Registration fee covers required liability/malpractice insurance (Approx. \$140.00 fee covers the entire summer no matter how many exposures you do)
- Pay fees through:
  - Aurora Student online;
  - Telephone banking;
- Student must:
  - Secure a Supervisor;
  - Arrange dates (minimum 80 hours) with Admin personnel in department of experience
- Submit application forms for pre-approval (minimum two weeks prior to clinical experience start date) to Electives Administrator, UGME Office
- Clinical exposure in a variety of fields (all)
- Supervisor and student evaluation form submission required
- Appears as a Summer Session course on your transcript
- Appears on your MSPR (Medical Student Performance Record) for each Exposure length/type as designated on your application

### Additional Features:

- Variety of locations: rural; Northern; urban; other (includes overseas)
- Multiple Clinical experiences can be completed during the summer
- Many B.Sc. Med students combined their Clinical experiences and met requirements for the Summer Early Exposure program
- Overall feedback positive from students and supervisors alike

---

## B.Sc. Med Program (Degree Program):

Contact Person: Allison Birch  
Program Administrator  
B.Sc. Med Program  
202 Chown. – 753 McDermot Ave  
Phone: 789-3558 E-mail: Allison.Birch@umanitoba.ca

### Key Components:

- Two summer terms (each term between 12 – 13 weeks long)
- Students review posted (web) abstracts from prospective supervisors or may choose to find a project/supervisor on their own
- Research application must be submitted (online process, joint application student and supervisor) by December 3, 2018
- Term dates June 4<sup>th</sup> – August 24<sup>th</sup>, 2018/ June 3<sup>rd</sup>- August 23<sup>rd</sup>, 2019
- \$7500 stipend over each summer term (2 week vacation period included)
- Travel awards, prizes and scholarships available for top BSc(Med) students and top BSc(Med) projects addressing certain research topics/focus
- Appears as B.Sc. Med on your transcript
- Appears on your MSPR (Medical Student Performance Record)
- B.Sc. Med degree granted upon graduation from Medical School

### Additional Features:

- May be combined for credit with the Early Exposure program when:
  - Registered through the Early Exposure program (UGME) in addition to the B.Sc. Med program (No additional fees required. Student pays B.Sc. Med fees only.)

**ONGOMIIZWIN – HEALTH SERVICES**  
(formerly J.A. Hildes Northern Medical Unit)  
**INDIGENOUS INSTITUTE OF HEALTH & HEALING**  
**Rady Faculty of Health Sciences**  
**University of Manitoba**

**SUMMER STUDENT WORK EXPERIENCE 2020**  
**APPLICATION DEADLINE: FRIDAY, MARCH 31, 2020**

**Program Description:**

Ongomiizwin – Health Services, Indigenous Institute of Health and Healing, Rady Faculty of Health Sciences, University of Manitoba in conjunction with Health Canada, FNIHB, Manitoba Region, offers summer work experience placements in First Nations communities in Northern Manitoba. This program has a history spanning over 40+ years and has introduced many physicians to the strengths of indigenous communities and has stimulated an enduring interest in northern and remote medicine in many of the participants.

First and second year medical students from the University of Manitoba are placed in First Nations communities which have health care facilities consisting of Nursing Stations, Health Centers, and/or Hospitals. The student will have the opportunity to contribute, learn and become involved in comprehensive health care in a northern First Nation community, and to learn about health care issues from a cross cultural and community perspective.

**Key Priorities:**

- 1) Community Engagement/Outreach
- 2) Interdisciplinary Collaboration
- 3) Clinical Exposure & Health Education

---

## Program Parameters

- Up to 8 first and second year medical students are eligible
  
- **Program Overview:**
  - 9.5 weeks in the community, 1 day spent in pre-departure orientation & travel preparation;
  - Typically starts the week after Rural Week;
  - **2020 dates are June 1-July 31, 2020;**
  - Students are expected to be available for program activities 40 hours per week in their respective communities;
  - Students are expected to live in the community. They may leave the community for 1 weekend at their own expense;
  - Students are provided with a small accountable advance to purchase food prior to departure for their community;
  - Accommodations are provided for the students in each community at no cost to the student
  - Flights to/from the community are arranged and paid for by OHS
  
- **Placement Sites:**

All federally funded health centres are potential placement sites. Availability of accommodations and stable summer staffing levels are the 2 main factors which reduce availability of potential sites.

Sites for student placements for 2020 have not been confirmed yet.

---

## Goals & Objectives\*:

The objectives that the students are expected to work towards achieving through their experience are taken from the First Nations, Métis and Inuit Health Core Competencies-a curriculum framework for undergraduate medical education.

### 1) To live in and become familiar with a First Nation community.

- Identify the diversity amongst First Nations and/or Métis (in the placement) communit(y) in terms of their various perspectives, attitudes, beliefs & behaviours.
- Cultural safety as it pertains to First Nations, Inuit and Métis patients.
- Identify ways to respectfully engage with and give back to First Nations, Inuit and Métis communities as a medical learner.
- Demonstrate authentic, supportive and inclusive behaviour in all exchanges with First Nations, Inuit and Métis individuals, health care workers and communities

### 2) To observe and participate in all facets of community-based health care delivery.

- Observe the various health care services that are delivered to First Nations, Inuit, Métis peoples, and the historical basis for the systems as they pertain to these communities.
- Observe Indigenous healers/traditional medicine people and health care professionals working in local First Nations, Inuit and/or Métis communities, and how they are viewed in the community.
- Discern the concepts of community development, ownership, consultation, empowerment, capacity-building, reciprocity and respect in relation to health care delivery in and by First Nations, Inuit and Métis communities.

### 3) To obtain an overview of the health status of a First Nation community and the interrelationships of health and health care to other aspects of community life.

- Discern the connection between historical and current government practices towards First Nations, Inuit, Métis peoples (including, but not limited to colonization, residential schools, treaties and land claims), and the resultant intergenerational health outcomes.
- Perceive how the medical, social and spiritual determinants of health and well-being for First Nations, Inuit, Métis peoples impact their health.
- Identify the range of healing and wellness practices (traditional and non-traditional) present in local First Nations, Inuit and Métis communities.
