

Elective: General Surgery - B Service

OVERVIEW

B-Service General Surgery involves a multidisciplinary team approach in the elective management of patients with a wide variety of general surgical problems. The activities on the B-Service General Surgery rotation involve several focus areas, including colorectal and minimal access surgery. The student is exposed to all aspects of patient management during ward rounds, in the operating room and at the service rounds and scheduled teaching sessions.

INTRODUCTION

Location(s):

St. Boniface General Hospital

Preceptors:

Attending Surgeons

Dr. Benson Yip, Assistant Professor

Colorectal Surgery

Dr. John Bracken, Assistant Professor

General Surgery

Dr. David Hochman, Assistant Professor

Colorectal Surgery

Dr. Jason Park, Assistant Professor

Colorectal Surgery

Dr. Richard Silverman, Assistant Professor

Colorectal Surgery

Contact Person:

Melissa Franzmann, Program Administrator

Phone: 204-787-8823

mfranzmann@hsc.mb.ca

LEARNING OBJECTIVES (CanMEDS)

At the completion of the B-Service General Surgery rotation, the Clinical Clerk is required to attain sufficient knowledge as follows:

Medical Expert

As Medical Experts, physicians integrate all of the CanMEDS Roles, applying medical knowledge, clinical skills and professional attitudes in their provision of patient-centered care.

Elective: General Surgery - B Service

BASIC/GENERAL AREA

Preoperative assessment, including:

- Risk assessment
- Pulmonary assessment
- Cardiovascular assessment
- Renal assessment
- Metabolic assessment

Perioperative assessment, including:

- Components of informed consent
- Components/formulation of operative/procedure note; postoperative orders; postoperative note
- Indications/efficacy of monitoring techniques
- Fluid/electrolyte management
- Hemostasis/use of blood products
- Risk factors for alcohol withdrawal syndromes

Postoperative assessment, including:

- Pharmacologic action/side effects of analgesics
- Epidural/nerve blocks
- Time to recovery of digestive function
- Characteristics of a healing wound
- Postoperative nutritional/fluid/electrolyte requirements

Postoperative complications, including:

- Differential diagnosis and appropriate diagnostic work-up and management of postoperative fever
- Wound infection
- Fascial dehiscence/incisional hernia

Causes/work-up/treatment of respiratory complications, including:

- Atelectasis
- Pneumonia
- Aspiration
- Pulmonary edema
- ARDS
- Pulmonary embolism (including DVT)
- Fat embolism

Diagnostic work-up/treatment of oliguria, including:

- Pre-renal causes
- Renal causes
- Post-renal causes

Pathophysiology/causes/treatment of postoperative hypotension, including:

- Hypovolemia
- Sepsis

Elective: General Surgery - B Service

- Cardiogenic shock secondary to myocardial infarction; fluid overload; arrhythmias; pericardial tamponade
- Medication effects

Management of postoperative chest pain and arrhythmias

Management of abnormal bleeding postoperatively, including:

- Inherited and acquired factor deficiencies
- DIC
- Transfusion reactions

Diagnosis and management of postoperative gastrointestinal disorders, including:

- Stress gastritis/ulceration
- Paralytic ileus
- Acute gastric dilatation
- Intestinal obstruction
- Fecal impaction
- External gastrointestinal fistulas

Diagnosis and management of postoperative metabolic disorders, including:

- Hyperglycemia
- Adrenal insufficiency
- Thyroid storm

Evaluation and management of disorders causing alteration of cognitive function postoperatively, including:

- Hypoxia
- Perioperative stroke
- Medication effects
- Metabolic/electrolyte abnormalities
- Functional delirium
- Convulsions

Shock, including definition and pathophysiology, resuscitation, investigation and management of the following:

- Hemorrhagic shock
- Septic shock
- Cardiogenic shock
- Neurogenic shock
- Anaphylactic shock

SPECIFIC SURGICAL PROBLEMS

Abdominal masses, including etiologies, assessment and management of the following:

- Hepatomegaly
- Splenomegaly
- Pancreatic mass

Elective: General Surgery - B Service

- Retroperitoneal mass/abdominal aortic aneurysm
- Carcinomatosis

Presentation, diagnostic strategy and initial treatment of patients presenting with the following common or catastrophic abdominal conditions:

- Acute appendicitis
- Cholecystitis
- Biliary colic
- Cholangitis
- Pancreatitis
- Peptic ulcer disease with or without perforation
- Gastroesophageal reflux
- Gastritis/duodenitis
- Inflammatory bowel disease
- Enterocolitis
- Small bowel obstruction
- Incarcerated hernia
- Colonic obstruction
- Cecal/sigmoid volvulus
- Splenomegaly/splenic rupture
- Mesenteric ischemia
- Leaking abdominal aortic aneurysm
- Postoperative abdominal pain

Groin masses, including:

- Differential diagnosis of inguinal pain/mass
- Anatomic difference between direct and indirect hernias
- Indications, surgical options and normal postoperative course for:
 - Inguinal hernia repair
 - Femoral hernia repair
- Definition and significance of:
 - Incarcerated hernia
 - Strangulated hernia
 - Richter's hernia
 - Sliding hernia

Presentation, diagnostic strategy and management of abdominal wall masses, including:

- Desmoid tumours
- Rectus sheath hematoma
- Hernia, including:
 - Umbilical hernia
 - Spigelian hernia
 - Incisional hernia
 - Epigastric hernia

Elective: General Surgery - B Service

Breast problems, including:

- Differential diagnosis, diagnostic strategy/imaging and management of a breast mass, including:
- Fibrocystic change/cyst
- Abscess
- Fibroadenoma
- Breast cancer
- Diagnosis and management of the patient with an abnormal mammogram
- Diagnosis and management of the patient with nipple discharge
- Management of breast cancer/DCIS, including:
 - Clinical staging
 - Pathology considerations such as hormone receptor analysis/tumour DNA analysis
 - Therapeutic options, including:
 - Role of surgery/when to consult a surgeon
 - Role of radiotherapy
 - Role of chemotherapy
 - Role of hormonal therapy
 - Surgical options including reconstruction

Gastrointestinal hemorrhage, including:

- Initial resuscitation/management
- Indications for blood transfusion
- Presentation, assessment, diagnostic strategy and management of the following causes of upper GI hemorrhage:
 - Peptic ulcer
 - Variceal hemorrhage
 - Mallory-Weiss tear
 - AV malformation
 - Dieulafoy's lesion
 - Stress gastritis
- Presentation, assessment, diagnostic strategy and management of the following causes of lower GI hemorrhage:
 - Diverticulosis
 - Angiodysplasia/AV malformation
 - Meckel's diverticulum
 - Ulcerative colitis
 - Colorectal cancer
 - Hemorrhoids

Jaundice, including:

- Differential diagnosis of prehepatic, hepatic and posthepatic jaundice
- Presentation, pathophysiology, diagnostic strategy and management principles/options of the following:
 - Choledocholithiasis

Elective: General Surgery - B Service

- Cholangitis
- Cholangiocarcinoma
- Pancreatic carcinoma
- Periampullary carcinoma
- Hepatocellular carcinoma
- Hepatic abscess
- Autoimmune hemolysis
- Hepatitis

Colorectal problems, including:

- Colorectal cancer, including:
- Presentation Diagnostic work-up Genetic considerations Clinical/pathologic staging Treatment principles, including:
 - Surgical principles/complications
 - Adjuvant/neoadjuvant therapy
 - Surveillance
 - Screening strategies
- Diverticular disease, including:
 - Presentation
 - Diagnostic work-up
 - Management of the following:
 - Diverticulitis/ abscess/perforation
 - Colonic fistula
 - Obstruction/stricture
- Inflammatory bowel disease/colitis, including presentation, pathophysiology, diagnostic work-up and management principles for the following:
 - Ulcerative colitis
 - Crohn's disease
 - Pseudomembranous colitis
 - Ischemic colitis
 -
- Perianal problems, including:
 - Anal fissure
 - Fistula
 - Perianal/ischiorectal abscess
 - Hemorrhoids

At the completion of the B-Service General Surgery rotation, the Clinical Clerk will be able to:

- Perform an appropriate assessment of the general surgical patient
- Elicit a history that is relevant and accurate
- Perform a focused physical examination that is relevant and accurate
- Select medically appropriate investigations

Elective: General Surgery - B Service

- Demonstrate skills in formulating a differential diagnosis and in organizing an effective management plan
- Demonstrate proficient use of procedural skills as follows:
 - Venipuncture
 - Intravenous insertion
 - Nasogastric intubation
 - Urinary catheterization
 - Skin suturing
 - Removal of skin/subcutaneous lesions

Communicator

Physicians effectively facilitate the doctor-patient relationship and the dynamic exchanges that occur before, during, and after the medical encounter.

- Establish rapport, trust and a therapeutic relationship with patients and families.
- Listen effectively.
- Elicit relevant information and perspectives of patients, families, and the health care team.
- Convey relevant information and explanations to patients, families and the health care team.
- Convey effective oral and written information about a medical encounter.
- Maintain clear, accurate, appropriate, and timely records of clinical encounters and operative procedures
- Address challenging communication issues effectively
 - Obtain informed consent
 - Deliver bad news
 - Disclose adverse events
 - Discuss end-of-life care
 - Discuss organ donation
- Address anger, confusion and misunderstanding using a patient centred approach

Collaborator

Physicians effectively work within a healthcare team to achieve optimal patient care.

- Demonstrate a team approach to health care
- Participate effectively in an interprofessional and interdisciplinary health care team.
- Recognize and respect the diversity of roles, responsibilities, and competences of other health professionals in the management of the surgical patient.
- Work with others to assess, plan, provide, and integrate care of the surgical patient

Leader

Physicians engage with others to contribute to a vision of a high-quality health care system and take responsibility for the delivery of excellent patient care through their activities as clinicians, administrators, scholars, or teachers.

Elective: General Surgery - B Service

- Employ information technology appropriately for patient care.
- Allocate finite health care resources appropriately

Health Advocate

Physicians responsibly use their expertise and influence to advance the health and well-being of individual patients, communities and populations.

- Concern for the best interest of patients
- Identifying health needs of individual patients and advocate for the patient in cases where appropriate
- Promote and participate in patient safety

Scholar

Physicians demonstrate a lifelong commitment to reflective learning, as well as the creation, dissemination, application and translation of medical knowledge.

- Demonstrate the ability for continuing self-learning
- Discuss the principles of surgery and the application of basic sciences to surgical treatment.
- Demonstrate appropriate presentation skills, including formal and informal presentations.
- Critically evaluate medical information and its sources and apply this appropriately to clinical decisions.
- Critically appraise the evidence in order to address a clinical question.
- Integrate critical appraisal conclusions into clinical care.

Professional

As Professionals, physicians are committed to the health and well-being of individuals and society through ethical practice, profession-led regulation, and high personal standards of behaviour.

- Exhibit professional behaviors in practice, including honesty, integrity, commitment, compassion, respect and altruism.
- Demonstrate a commitment to delivering the highest quality care.
- Recognize and respond appropriately to ethical issues encountered in practice.
- Recognize and respect patient confidentiality, privacy and autonomy.
- Participation in peer review
- Manage conflicts of interest
- Maintain appropriate relations with patients.
- Demonstrate awareness of industry influence on medical training and practice
- Recognition of personal and clinical limitations

INFORMATION

Required Reading

Lawrence Essentials of General Surgery, 3rd ed

Elective: General Surgery - B Service

Teaching Unit

The majority of admitted patients on B-Service General Surgery are managed on 7A South. Occasionally there are patients located “off-service” on other wards and in the Intensive Care Unit. Computerized patient lists are available at the main desk on 7A South.

Evaluations

The student is evaluated by the entire B-Service General Surgery faculty. Input is also elicited from residents and from the nursing staff. A written evaluation is submitted to the appropriate authority for review and signing by the student.

The Service encourages feedback from the students. Therefore, the Service evaluation form should be completed and returned to the Surgical Education Office.

Call Responsibilities

An on-call room is provided.

First Day Instructions

The student is to page the B service senior resident the day before the start of the rotation through hospital paging at 237-2053.

Expectations

- At the start of his/her rotation on B-Service General Surgery, the student should arrange to meet Dr. B. Yip, who is the mentor for the medical students, to discuss objectives and expectations while on the Service.
 - The written learning objectives should be reviewed by the student at the beginning of the rotation.
 - The student is encouraged to discuss his/her progress with Dr. Yip or any of the other surgical faculty on the Service. This must be initiated and arranged by the student.
 - The ward rounds usually begin at 0700 hours on weekdays, unless otherwise specified by the resident team leader. Weekend rounds usually begin at 0800 hours. The student functions as a member of the surgical team and participates in ward rounds with the residents.
 - The student functions under the direct guidance of the resident, closely “backed” by the attending faculty. The resident allocates cases to the student and supervises and scrutinizes the patient assessments performed by the student. In this manner, the student is exposed to interesting cases for assessment and study.
 - The student is encouraged to undertake all practical ward procedures (e.g. intravenous lines/nasogastric tube insertion), initially under the supervision of the resident until proficiency allows “solo” performance by the student.
 - The student is encouraged to attend the operations of the patients that he/she has assessed or admitted. Understanding of the operative procedure and the surgical anatomy are best attained in the operating room.
-

Elective: General Surgery - B Service

WARD ACTIVITIES

Operating Room Schedule

Monday, 0745-1530

Dr. R. Silverman, Room 7

Tuesday, 0745-1530

Dr. B. Yip, Room 7

Wednesday, 0900-1530

Dr. J. Bracken, Room 7

CAPD catheters

Thursdays, 1130-1530

Dr. J. Bracken, Room 7

Friday, 0745-1530, Weeks 1-3

Dr. D. Hochman, Room 7

Friday, 0745-1530, Week 4

Dr. J. Bracken, Room 7

Friday, 0745-1130

Dr. R. Silverman, Room 6

SANA slate

Ambulatory Care Experience

The student should make an effort to attend the ambulatory clinics as they expose the student to common non-emergency surgical problems.

Clinic Schedule

Dr. R. Silverman

ACF Surgery

Alternate Mondays, 1000-1200

Alternate Mondays, 1300-1530

Alternate Fridays, 0900-1200

Teaching Sessions

There are many opportunities for the student to learn while on the B-Service General Surgery rotation. These include informal teaching on the ward and in the operating room. In addition, there are scheduled formal teaching activities, including:

Service Rounds

- These rounds take place on Mondays (excluding holidays) at 1600 hours in Z3016. Patient management strategies, complications and deaths are discussed in a peer-review fashion.
- The student is encouraged to participate in the discussions and with a prepared topic for formal presentation.
- The student is encouraged to attend Wednesday Morning Rounds, including:
 - o Surgical Grand Rounds
 - o GI Rounds

Academic Schedule

Monday

1600-1730 B-Service Rounds, Z-3016

Wednesday

0745-0900 Surgery Grand Rounds

1130-1230 GI Rounds

Thursday

1200-1300 Combined GI Rounds, alternate weeks

Content

- Ward rounds daily with housestaff and attending surgeons
- An out-patient clinic once a week
- Opportunity to assess patients in the Emergency Department
- Opportunity to follow patients from pre-operative assessment through their operation to post-operative care

- Patient care responsibility according to level of experience

Call Responsibilities

- Students are on-call in-hospital, to a maximum of 1-in-4.
- Students on B-Surgery will be on call for the Acute Care Surgical Service (ACSS) consult call.
- It will be the responsibility of individual students to contact the chief resident responsible for the call

Elective: General Surgery - B Service

schedule with their requests no later than two weeks prior to the start of the rotation or selective.

- Clerks scheduled for call on Wednesday nights are expected to stop taking call at 22:00, so that they will be available for teaching the next day.
- Clerks scheduled for call on Thursdays will start taking call after teaching.
