

Pediatrics / Pediatrics / Cardiology

Available in all periods

By the end of the elective period the student shall:

- Be introduced to the clinical aspects of congenital and acquired heart disease in children

This elective will also provide the applicant with the capacity to:

- To develop a practical approach to pediatric cardiology through patient contact in both the outpatient clinics and the inpatient hospital services.
- Have an opportunity to interpret pediatric electrocardiograms and will have exposure to echocardiographic, electrophysiologic and cardiocatheterization procedures.

Call Responsibility - TBD.
