

COMP 4380 – Database Implementation

Calendar Description Implementation of modern database systems including query modification/optimization, recovery, concurrency, integrity, and distribution.

Prerequisite: COMP 3010 and COMP 3380 and COMP 3430.

Outline

- 1) Review: Database concepts and usage (1 week)
- 2) File structures (3 weeks)
 - Basic file organizations, Files indexes and hashing
- 3) Query processing and optimization (4 weeks)
 - Relational query evaluation and optimization
- 4) Transaction management (3 weeks)
 - Recovery, Concurrency control
- 5) Topics selected from the following (2 weeks):
 - Database security, integrity, and authorization, Parallel and distributed databases, Object-oriented databases, Data mining, Data warehousing and OLAP, XML and Web data
- 6) Other advanced topics (if time permits)
