Disclosure of Personal Information to Statistics Canada

Statistics Canada is the national statistical agency. As such, Statistics Canada carries out hundreds of surveys each year on a wide range of matters, including education.

It is essential to follow students across time and institutions to understand, for example, the factors affecting enrolment demand at post-secondary institutions. The increased emphasis on accountability for public investment means that it is also important to understand 'outcomes'. In order to carry out such studies, Statistics Canada asks all colleges and universities to provide data on students and graduates. Institutions collect and provide to Statistics Canada student identification information (student's name, student ID number, Social Insurance Number), student contact information (address and telephone number), student demographic characteristics, enrolment information, previous education, and labour force activity.

Under the Federal *Privacy Act*, individuals can request access to their own, individual information held in federal information banks, including those held by Statistics Canada.

The Federal *Statistics Act* provides the legal authority for Statistics Canada to obtain access to personal information held by educational institutions. The information may be used only for statistical purposes, and the confidentiality provisions of the *Statistics Act* prevent the information from being released in any way that would identify the student.

Students who do not wish to have their information used are able to ask Statistics Canada to remove their identifying information from the national database.

Further information on the use of this information can be obtained from Statistics Canada's web site: <http://www.statcan.ca> or by writing to the Post-Secondary Section, Centre for Education Statistics, 17th Floor, R.H. Coats Building, Tunney's Pasture, Ottawa, Canada, K1A 0T6.

The University of Manitoba

Building on a long tradition of excellence, innovation and global influence, the University of Manitoba is the province's premier university. Since 1877, the University of Manitoba has been shaping leaders, supporting our community and conducting important research which continues to have a profound impact here at home and around the world. As the province's only medical-doctoral university, the University of Manitoba plays a vital role in educating the majority of doctors, nurses, teachers, lawyers, engineers, pharmacists and political and business leaders who serve our province. Each year, more than 27,000 students take advantage of the over 100 programs offered to establish their career path and forge their futures.

The University of Manitoba has a physical presence across the province. The main Fort Garry campus is located on the banks of the Red River in south Winnipeg. Our downtown presence includes the Bannatyne campus which is located adjacent to the Health Sciences Centre in central Winnipeg. Here, students in a variety of health care related programs like Dentistry, Medicine, Pharmacy and Medical Rehabilitation, study, learn and hone their skills in a collaborative way alongside some of the best practitioners in the country. An inner-city Social Work facility offers students the chance to learn while supporting disadvantaged populations at the same time. The University of Manitoba also operates agricultural field stations and education centres in Glenlea, Carman, Delta Marsh, Star Lake and Wallace Lake. Northern and distance education programs, such as the Northern Medical Unit and Northern Social Work programs allow residents of more remote communities to pursue their education closer to home.

The first university to be established in western Canada, the University of Manitoba has thrived and grown from its early days with a staff of only six professors. Today, the Fort Garry campus occupies over 233 hectares where more than 60 major buildings support teaching and research activities. And we're not finished growing. The Fort Garry campus continues to be revitalized through a number of initiatives – a new 10,000 square foot Welcome Centre, a new Pedestrian Mall and a multi-year, multi-million dollar project to retrofit buildings and facilities called Project Domino are all underway. When all of the dominos have fallen into place, 13 faculties or units will be relocated and a stunning new 360-bed residence will have been added to the campus. Included in the project is a complete transformation of the historic Taché Hall (1912), one of the iconic buildings on campus. This current residence will be redeveloped into an exciting study, rehearsal and performance space for the Marcel A. Desautels Faculty of Music.

Since its inception over 130 years ago, the University of Manitoba has been a vital contributor to the success and development of the province. Today, the University of Manitoba contributes \$1.8 billion annually to the provincial economy and supports over 19,000 jobs around Manitoba.

The Mission and Vision of the University of Manitoba

Universities serve society by contributing to: the development of an educated and enlightened population, capable of informed judgment and responsible citizenship; the availability of persons who have the knowledge, skills and adaptability required by public and private enterprise, or by individuals seeking professional service; and the advancement of knowledge, skill and human creativity. It is within this context that the University of Manitoba has articulated the following statement concerning its mission, goals, distinctive role and accountability.

Mission

The mission of the University of Manitoba is to create, preserve and communicate knowledge and, thereby, contribute to the cultural, social and economic well-being of the people of Manitoba, Canada and the world.

Goals

In fulfilling its mission, the University of Manitoba seeks to:

- Provide the highest possible quality of undergraduate and graduate university teaching in the humanities, social sciences, natural and applied sciences, the fine and performing arts and the professions;
- Enhance student success by fostering an environment conducive to intellectual and personal growth;
- Conduct original scholarship and basic and applied research, and produce creative works of highest quality as judged by international standards;
- Serve the community directly by making its expertise available to individuals and institutions, and by providing as much access to the university's intellectual, cultural, artistic and physical resources as its primary teaching and research responsibilities permit;
- Preserve and protect academic freedom and intellectual independence, and provide a forum for critical inquiry and debate; and,
- Promote equity in access and employment and in the conduct of the university's affairs.

Role

The University of Manitoba as the largest and most comprehensive institution of higher learning in Manitoba plays a distinctive role within the province. In addition to offering undergraduate liberal education in arts, science and education, the University of Manitoba provides programs in a broad range of professional studies, applied sciences and fine and performing arts and is responsible for the vast majority of graduate education and research in Manitoba. The University of Manitoba serves all parts of the province, including inner city and suburban areas, rural and northern regions and attracts students from all population groups and from all walks of life.

It manages and delivers a comprehensive array of both degree and non-degree credit courses not only on its campuses but also by correspondence and other distance education modalities both throughout the province and beyond the province, thereby significantly increasing accessibility to university education.

The University of Manitoba is also distinctive among post-secondary institutions in the province by virtue of the multi-disciplinary activity within the university and through its participation in multi-institutional consortia and networks. It seeks to advance its traditional role in teaching and learning, research and community service through the establishment of new linkages with business, industry, arts organizations, social agencies, non-profit organizations and governments designed to contribute directly to the economic life of Manitobans and to provide lifelong learning opportunities for them. Through residential educational programs for seniors, Mini-Universities

for youngsters, the summer ballet school, the music preparatory program, public lectures, concerts, recitals, theatrical productions, art exhibits, library and archival services, athletic and recreational programs and in many other ways, the university seeks to reinforce its role as an important part of the culture and heritage of Manitoba.

The university is an active contributor to national and international development by conducting educational programs and research under contract. It also contributes to international development through the opportunities provided to students and visiting scholars from other countries to study at the University of Manitoba. Recognizing that many of the intellectual and practical challenges facing society require an integrated disciplinary approach, the university has established a variety of centres, institutes and specialized research groups designed to tackle important problems in a number of areas.

Accountability

In recognition of its mission, goals and role, the University of Manitoba is accountable for:

- Facilitating access to its programs for as many students as meet its admission requirements and as can be accommodated and effectively educated within the available resources;
- Providing programs that meet accepted and appropriate standards for admission, evaluation and graduation of students and for curriculum content and teaching effectiveness;
- Facilitating research, scholarship and creative works that are of high quality as judged by international standards;
- Providing an exemplary environment for work and study with particular attention to policies and procedures designed to foster equity; and,
- Exhibiting responsible management of physical and human resources.

Vision

The following vision statement was articulated in Building on Strengths, the report of the Task Force on strategic planning in 1998:

We believe that the University of Manitoba will be a leader among Canadian universities as it becomes known for meeting challenges while it advances knowledge and understanding. We will not only be the oldest of western Canada's universities we will also be among the best of Canada's universities. We will be respected for our knowledge of the world and for our understanding of the complexities of our Prairie region in its cultural, socioeconomic and scientific dimensions, which we will articulate according to international standards of science and scholarship. We will be recognized for our centrality in the development of Manitoba's knowledge-based society in a knowledge-based global economy.

We will attain our vision by:

- Providing outstanding education in undergraduate and selected professional and graduate areas;
- Producing research, scholarship and creative work that is recognized internationally, nationally, and locally;
- Providing an equitable environment focused on learning; and
- Enhancing a strong tradition of community and professional service.

PART ONE:

SECTION 1: Policy on the Responsibilities of Academic Staff with Regard to Students

I. Objectives

The objectives of this policy are to identify the responsibilities of academic staff with regard to students; to promote harmonious relations between academic staff and students; and to promote fair and equitable treatment of students.

II Definitions

For purposes of this document, the following terms shall be defined as provided by this article:

1. Academic staff shall include all individuals holding full- or part-time appointments at the rank of Instructor I, Instructor II, senior instructor, lecturer, assistant professor, associate professor or professor. The term shall include also academic administrators, academic librarians, counsellors, adjunct professors, professional associates, research associates, research assistants, student research assistants, and student teaching assistants, insofar as such persons perform duties within the ambit of the policy.

2. Student shall mean any person who is registered as a student in the university.

III Statement of Responsibilities

Some of the responsibilities of academic staff with regard to students rest with the individual staff member, while others are collective responsibilities, to be exercised through the actions of department and faculty/school administrators and councils.

A. Individual Responsibilities

The individual responsibilities of academic staff members with regard to students are primarily instructional and scholarly, and secondarily administrative. They may include:

1. Undergraduate, graduate, and continuing education instruction, including the organization, preparation and delivery of course material, the evaluation of student academic progress, the reporting of such evaluation in accordance with approved policies and schedules, consultation with students out of class or laboratory hours, and supervision of student research and thesis preparation;

2. Scholarly attainment through personal study and research, including study for purposes of academic self-improvement or course improvement, keeping abreast of new developments, and research that leads to a useful or original contribution toward the advancement of knowledge and understanding; and,

3. Administrative work as required for instructional and scholarly activities, including committee work at various levels - departmental, faculty, university - as it pertains directly or indirectly to students.

B. Collective Responsibilities

The collective responsibilities of the academic staff belonging to an academic unit are to provide an effective learning environment and to endeavour to ensure fair and consistent treatment of students. They include:

1. Periodically reviewing and updating all courses and programs;

2. Ensuring that academic regulations and policies provide for fair and consistent treatment of students; and,

3. Providing for convenient student access to information on policies, regulations and procedures that may affect their academic progress, including the provision of names of instructors assigned to teach particular courses and sections at the earliest possible opportunity.

IV Discharge of Responsibilities

A. Individual Responsibilities

1. Academic staff members shall discharge their instructional responsibilities with academic integrity, scholarly competence, and pedagogic effectiveness.

2. Academic staff members shall maintain their familiarity with current university faculty/school and/or department policies regarding plagiarism and cheating, examination impersonations, student access to final examination scripts, student discipline, grade appeals, and the University policy regarding sexual harassment.

3. In discharging their instructional responsibilities, academic staff members shall adhere to regulations pertaining to the format, content and con-

duct of courses and laboratories, including regulations pertaining to examinations, term work, grades, and related matters.

4. A course outline or syllabus shall be provided in each course section, within the first week of classes:

- a) The academic staff member responsible for that section shall provide in writing to every member of the class:
 - name of instructor;
 - office number and telephone number;
 - a list of textbooks, materials and readings that the student is required to obtain including the appropriate referencing style guide(s) acceptable to the instructor and/or discipline in courses where it is relevant;
 - an outline of the topics to be covered;
 - a description of the evaluation procedure to be used, including the weighting of the components that will contribute to the final grade and whether evaluative feedback will be given to the student prior to the voluntary withdrawal date (see note);
 - an indication of instructor availability for individual student consultation;
 - a tentative schedule of term assignments and tests; and
 - a statement of the practice to be following regarding late submission of assignments.

NOTE: It is understood by Senate that the provision of this information is not intended to affect the question of equity in multi-sectioned courses in any way.

b) The academic staff member shall provide in writing to every member of the class information regarding academic integrity which shall include:

a reference to statements on academic dishonesty including “plagiarism and cheating” and “examination personation” found in the *University General Calendar*; and,

where appropriate, a reference to specific course requirements for individual work and group work. Students should be made aware that group projects are subject to the rules of academic dishonesty and that group members must ensure that a group project adheres to the principles of academic integrity. Students should also be made aware of any specific instructions concerning study groups and individual assignments. The limits of collaboration on assignments should be defined as explicitly as possible.

5. Academic staff members shall teach their courses with due regard to calendar descriptions.

6. It is the responsibility of academic staff members to specify textbooks and materials in accordance with announced purchasing deadlines.

7. In their dealings with students, academic staff shall:

- a) not deny registration for instruction in those courses for which the permission of the instructor is required, except where the student lacks appropriate qualifications or where an approved policy on limited enrolment is in effect;
- b) comply with existing human rights legislation, and refrain from differential treatment of individual students on the basis of their actual or presumed membership in, or association with, some class or group of persons;
- c) not accept money or other goods or services from students for assistance with any course offered by the University. This clause, however, shall not prevent student teaching assistants or other part-time instructors from accepting payment for tutoring in courses/sections which do not fall within the scope of their University employment;
- d) be available for a reasonable amount of time, on a known and posted basis, for individual consultation with students registered in their courses or laboratories;
- e) evaluate student academic performance in a fair and reasonable manner, and by means of appropriate academic criteria only;
- f) where appropriate, provide written evaluative feedback prior to the voluntary withdrawal deadlines specified in the *General Calendar*;
- g) foster a free exchange of ideas between themselves and their students in the classroom and allow students the freedom to take legitimate exception to the data, views, or methods presented;
- h) respect the confidentiality of documentary information about students;
- i) keep confidential any information about the academic performance of a student, unless release is authorized by the student, required by his/her instructional team, or requested by an administrative officer in accordance with the University policy on the release of information;
- j) explicitly acknowledge in written or oral presentations any indebtedness to student research or assistance;

k) not obtain any improper personal advantage from a student or student work; and,

l) academic staff members shall not retaliate against a student who has filed a complaint, whether the complaint was substantiated or unsubstantiated.

8. Academic staff members shall not cancel, miss, terminate or shorten scheduled instruction except for good reason. Whenever a scheduled period of instruction is cancelled, the academic staff member shall:

- a) inform the class at the earliest possible time;
- b) inform the administrative head of his/her academic unit; and,
- c) where possible, ensure that appropriate substitution or make-up instruction is provided.

9. Academic staff members who provide instruction shall comply with the schedules and formats for reporting student grades, as established by departments and the Registrar’s Office. Where such grades are reviewed by departmental committees, instructors should be available for the duration of the committees’ work. An instructor who learns of an error, which if corrected would raise an assigned grade, should correct it without requiring the student affected to appeal his/her grade.

10. Academic staff members shall adhere to the relevant University, faculty/ school, and/or departmental policy regarding professor-course evaluation.

B. Collective Responsibilities

1. Through their faculty/school and department councils, academic staff members should review program and course descriptions periodically to ensure that the material to be presented is current and appropriate and that the calendar information is clear and accurate.

2. The following material must be kept on file in faculty/school or departmental general offices and made available to students:

- a) University, faculty/school or departmental regulations regarding class attendance and penalties, if any, for non-compliance;
- b) The information described in Section 4 under “Discharge of Responsibilities, A – Individual Responsibilities”, that is provided in writing to the class by the academic staff member for each course section;
- c) University, faculty/school, and/or departmental regulations and procedures, if any, regarding the evaluation of professors and courses by students;
- d) University, faculty/school, and/or departmental policy regarding student access to final examination scripts;
- e) University policy on student discipline;
- f) University, faculty/school, and departmental procedures regarding grade appeals;
- g) University policy on the responsibilities of academic staff with regard to students; and,
- h) University policy regarding sexual harassment.

3. Where necessitated by large class sizes or other circumstances, academic units shall ensure that course instructors and/or designated substitutes are available for individual consultation with students for a reasonable amount of time on a known and posted basis.

V. Cautionary Notice

Students are reminded that the initiation of a frivolous or vexatious complaint may result in disciplinary action being taken against them by the University.

This Policy is available online at: http://www.umanitoba.ca/admin/governance/governing_documents/students/280.htm

SECTION 2: Policy on Respectful Work and Learning Environment

1.0 Reason for Policy

- a) To support a climate of respect in the workplace and in the learning environment where individuals or groups of individuals are free from harassment and discrimination.
- b) The issue of workplace safety and health with respect to a workplace harassment prevention policy is governed by provincial legislation and more specifically Manitoba Workplace Safety and Health Regulation #217. This Regulation identifies certain responsibilities for employers and employees in this regard. A policy on workplace harassment is required.

2.0 Policy Statement

2.1 The University of Manitoba supports equity, diversity and the dignity of all people. The University promotes equity in our learning programs and employment and in the conduct of the University's affairs.

2.2 The University recognizes the following:

- (a) a richly diverse society in Manitoba, as well as beyond;
- (b) a duty to act in a manner consistent with existing legislation regarding human rights;
- (c) a commitment to academic freedom and freedom of thought, inquiry, and expression among its members which may result in respectful disagreements regarding beliefs or principles.

2.3 Each individual has the right to participate, learn, and work in an environment that promotes equal opportunities and prohibits discriminatory practices.

2.4 The University of Manitoba does not condone behaviour that is likely to undermine the dignity, self-esteem or productivity of any of its members and prohibits any form of discrimination or harassment whether it occurs on University property or in conjunction with University-related activities. Therefore, the University of Manitoba is committed to an inclusive and respectful work and learning environment, free from:

- (a) discrimination or harassment as prohibited in the Manitoba Human Rights Code;
- (b) sexual harassment; and
- (c) personal harassment.

2.5 These types of discrimination or harassment are defined in the Procedures document which relates to this Policy.

2.6 The University of Manitoba and all members of the University community, particularly those in leadership roles, share the responsibility of establishing and maintaining a climate of respect within this community and to address any situations in which respect is lacking.

2.7 Harassment and discrimination violate an individual's human rights and run contrary to the University's fundamental values. The University of Manitoba will act promptly and efficiently to deal with these behaviours. It will endeavour to ensure that individuals who believe that they have been subjected to harassment or discrimination are able to express concerns and register complaints without fear of retaliation or reprisal. The University will exercise care to protect and respect the rights of both the complainant and the respondent.

2.8 The University of Manitoba will establish mechanisms to give effect to this Policy including:

- (a) the appointment of an equity services advisor whose duties shall include the investigation of informal complaints and the provision of advice and assistance to staff members, students and administrative officers in connection with concerns and complaints;
- (b) the appointment of one or more investigation officer(s) whose duties shall include the investigation of formal complaints and the provision of advice and assistance to staff members, students and administrative officers in connection with concerns and complaints;
- (c) training for staff related to harassment and discrimination;
- (d) the University of Manitoba will establish and implement educational programs designed to enhance awareness of the Respectful Work and Learning Environment Policy and procedures relating to it.

2.9 Each year a report will be prepared by Equity Services and made available to the University community concerning the number, type and disposition of cases and on educational and other activities related to the Policy.

2.10 While the University of Manitoba supports the informal resolution of problems associated with such behaviour, it considers harassment and discrimination in all its forms to be serious offences. Normally the President shall delegate authority to the Vice-President (Administration) to take disciplinary action, where appropriate, against individuals who have violated this Policy.

2.11 Discipline may range from a reprimand to dismissal or expulsion. Where Collective Agreement provisions require that the President obtain the approval of the Board of Governors for a suspension or dismissal, the finding of the Vice-President (Administration) shall be referred to the President in the form of a recommendation for action.

2.12 The Workplace Safety and Health Regulation #217 requires that every harassment prevention policy contain the following statements:

- (a) every employee is entitled to work free of harassment;

- (b) the employer must ensure, so far as it is reasonably practicable, that no worker is subject to harassment in the workplace;

- (c) the employer will take corrective action respecting any person under the employer's direction who subjects a worker to harassment;

- (d) the employer will not disclose the name of the complainant or an alleged harasser or the circumstances related to the complainant to any person except where disclosure is:

- i) necessary to investigate the complaint or take corrective action with respect to the complaint; or
- ii) required by law;

- (e) a worker has the right to file a complaint with the Manitoba Human Rights Commission;

- (f) the employer's harassment prevention policy is not intended to discourage or prevent the complainant from exercising any other legal rights pursuant to any other law.

2.13 Workplace Safety and Health Regulation #217 defines "harassment" as "any objectionable conduct, comment or display by a person that

- (a) is directed at a worker in a workplace;

- (b) is made on the basis of race, creed, religion, colour, sex, sexual orientation, gender-determined characteristics, political belief, political association or political activity, marital status, family status, source of income, disability, physical size or weight, age, nationality, ancestry or place of origin, and

- (c) creates a risk to the health of the worker.

SECTION 3: Accessibility Policy for Students with Disabilities

Reason for Policy

1.1 The University of Manitoba strives to ensure an accessible learning and working environment and is thereby committed to providing reasonable accommodation of the needs of persons with documented disabilities.

1.2 The purpose of this policy is to support an accessible learning environment where students with disabilities, who are admitted to the University of Manitoba, can gain access to all programs for which they are academically qualified.

2.0 Policy Statement

2.1 General

The University shall endeavour to foster, create, and maintain an accessible campus and provide other supports and services to students with disabilities.

2.1.1 The University of Manitoba will use reasonable efforts to ensure that students with disabilities are considered for admission to programs for which they are academically qualified; and have full and safe access to the educational process and learning environment (including but not limited to classes, laboratories, and workshops), the University campus, and University facilities and services.

2.1.2 The University will use reasonable efforts to offer reasonable accommodations in the delivery of academic programs and services to students with disabilities.

2.2 The Disability Services (DS) office is the centralized service for the University of Manitoba community. DS provides a focus for activity and expertise regarding disability-related accommodations within the University, and for liaison with outside organizations regarding accessibility issues, and programs and services for students with disabilities at the University of Manitoba. In providing accommodations, the DS office will:

2.2.1 request and evaluate appropriate medical documentation from students requesting assistance from DS and assign appropriate services to meet the needs of each student by adapting services, courses, and programs as feasible;

2.2.2 ensure that the University's criteria for academic excellence will not be compromised; and

2.2.3 inform the University community about the services available to students with disabilities through the DS office, and seek to ensure that such services are delivered in ways that promote equity, recognizing that performance is not inferior merely because it is different.

2.3 The University is responsible for maintaining the confidentiality of disability related information under The Freedom of Information and Protection of Privacy Act (Manitoba) and The Personal Health Information Act (Manitoba), including limiting the distribution of that information to only those parties that require the information to determine appropriate accommodation.

- 2.4 The University expects that student, instructors and support staff will share the responsibility for the delivery of reasonable accommodation.
- 2.5 The University will foster a supportive University community by working to inform and educate community members about issues related to disabilities.
- 2.6 Students requesting accommodations are responsible to initiate contact with the DS office and make the nature of their disability and/or their needs known in a timely fashion. Where possible, students are requested to declare their needs to DS staff before or at the time they register for, or are admitted into, a program.

This Policy is available online at: http://umanitoba.ca/admin/governance/governing_documents/students/281.htm .

SECTION 4: Disclosure and Security of Student Academic Records

The University and its constituent units have a clear obligation to the student and to society concerning the disclosure and security of information about a student's academic record. All student records will be handled in accordance with *The Freedom of Information and Protection of Privacy Act (Manitoba) (FIPPA)* and the *Personal Health Information Act (Manitoba) (PHIA)* as appropriate. Students who have questions on this matter should contact the Registrar's Office or the FIPPA Office.

SECTION 5: Language Usage Guidelines

The University of Manitoba, as an institution of higher learning, has a commitment to high standards in all communications, both written and oral as well as a prominent role in promoting desirable social change. As an employer, it is especially sensitive to the fair treatment of individuals and groups. The University of Manitoba therefore follows guidelines which are designed to avoid communicating in a manner that reinforces questionable attitudes and assumptions about people and sex roles. Often the problem is one of word choices which may be interpreted as biased, discriminatory, or demeaning, even though they were not intended to be. These guidelines will assist administrators in choosing words which are accurate, clear, and free from bias.

Guidelines

Sexism in communications may be divided into two conceptually different categories:

1. Problems of designation, and
2. Problems of evaluation.

I. Problems of Designation

In the case of sexism, long-established cultural practice can exert a powerful, insidious influence over even the most conscientious person. Nouns, pronouns, and adjectives that designate persons can be chosen to eliminate, or at least to minimize, the possibility of ambiguity in sex identity or sex role. In the following examples, problems of designation are divided into two sub-categories: ambiguity of referent, where it is unclear whether the communicator means one or both sexes, and stereotyping, where the communication conveys unsupported or biased connotations about sex roles and identity.

Problems of Evaluation

By definition, communications should be free of implied or irrelevant evaluation of the sexes.

Difficulties may derive from the habitual use of clichés or familiar expressions such as "man and wife." The use of "man and wife" together implies differences in the freedom and activities of each. "Husband and wife" are parallel, "man and wife" are not. In the examples that follow, problems of evaluation, like problems of designation, are divided into ambiguity of referent and stereotyping.

Problems of Designation

Ambiguity of Referent:

The **student** is usually the best judge of the value of his counselling.

Choices might include deleting the referent "his," changing to a plural subject (Students are...value of the counselling service **they** receive), or rephrase (The best judge of the value of counselling is usually the student).

Man or **mankind** (people, human beings, etc.) the average **man** (average person, people in general), **manpower** (workforce, personnel, human resources).

Stereotyping:

Research scientists often neglect their **wives** and **children**.

a) Acknowledge that women as well as men are research scientists (Research scientists often...neglect their **families**).

b) Mothering (noun substitute - parenting, nurturing).

c) **Woman** doctor, **male** nurse, **lady** lawyer. (delete sex description unless necessary to the discussion, then use **female** doctor, **female** lawyer).

II. Problems of Evaluation

A. Ambiguity of Referent:

1. The authors acknowledge the assistance of **Mrs. John Smith**. (Use given names in acknowledgements, e.g., Ms., Miss or Mrs. Jane Smith).

B. Stereotyping

1. men and **girls**. (Use parallel terms - men and women, girls and boys, unless specifically wishing to denote adult and child relationship).

2. **woman** driver. (Specify only if necessary and then use female driver).

3. Staff members and their **wives**. (Staff members and their **spouses/friends/guests**).

4. The **girls** in the office. (noun substituted - secretaries, staff, office assistants).

NOTE: A more detailed list of examples of the sexist use of language can be obtained by contacting the Office of the President.

This Policy is available online at: http://www.umanitoba.ca/admin/governance/governing_documents/staff/312.htm

SECTION 6: Conflict of Interest Between Evaluators and Students Due to Close Personal Relationships

1.0 Reason for Policy

The purpose of this policy is to ensure that the relationship between an evaluator and the person being evaluated is and is seen to be impartial.

2.0 Policy Statement

2.1 Definitions

2.1.1 An evaluator includes any person who participates, whether at first instance or on appeal, in the process of admitting or selecting a student to a course or program, determination of a student's progress or academic standing, or the receipt by a student of a prize, award or university financial support.

2.1.2 A conflict of interest means a close personal relationship between an evaluator and a student or applicant, or between evaluators, that gives rise to a reasonable apprehension of bias and, in any event, such relationships shall include that of:

- a) parent/child;
- b) spouses;
- c) grandparent/grandchild;
- d) siblings;
- e) in-laws; or
- f) persons living in the same dwelling unit.

2.2 Procedures

2.2.1 Responsibility for avoiding the conflict of interest rests with the evaluator. In cases of uncertainty, the evaluator shall and the student may refer the matter for determination to the department head (or dean/director, as appropriate). The decision of the department head is subject to review by the dean/director of the academic unit.

2.2.2 Where there is a conflict of interest, the evaluator shall immediately withdraw from participation and shall inform the student concerned and the head or dean/director, as appropriate.

- a) Where alternative sections or electives exist, the alternative must be taken, unless the dean/director concerned determines that this will create an undue hardship for the student.
- b) Where the dean/director has exercised discretion under 2.2.2(a) or where no alternatives exist to compulsory courses, the dean/director shall ensure fair evaluation by having another suitably qualified evaluator review the submitted material or hear the oral presentations. Where practicable, the evaluator shall not participate in setting the examination or other evaluation method.

2.2.3 Where the dean or director has a conflict of interest, the president shall name a replacement to act in the matter.

2.2.4 In the case of failure to observe these regulations, staff members will be subject to the discipline procedures provided by the appropriate collective agreement or personnel policy of the University.

This Policy is available online at: http://umanitoba.ca/admin/governance/governing_documents/students/277.htm .

SECTION 7: Other Policies of Interest to Students

Campus Alcohol Policy

1.0 Reason for Policy

This policy is a general statement and guideline, setting out the University's requirement for strict compliance with the Liquor Control Act (Manitoba), as well as any rules and regulations, and any successor or replacement rules and regulations, at all events and facilities at which alcohol is available. This policy is further to the Liquor Control Act (Manitoba), as well as any rules and regulations and directives issues pursuant to the Act (The "MLCC rules and regulations").

2.0 Policy Statement

2.1 Alcohol abuse is a serious health problem and can lead to conduct that may endanger the safety of individuals and result in damage to property

PART TWO:

Students are expected to conduct themselves responsibly with due regard for the rights of others and to maintain a high level of personal and academic integrity. Students who transgress these standards, whether expressed in policy or implied in generally accepted codes of conduct, can expect disciplinary action. Penalties arising from disciplinary actions may include fines, withholding of student privileges, suspension or expulsion from programs, or some other action specific to the situation. Penalties may also affect student eligibility to continue in their programs or to graduate.

The following are some of the policies and regulations relating to student discipline and behaviour.

SECTION 1: Student Discipline Bylaw

1.0 Reason for Bylaw

The Student Discipline Bylaw and related Procedures provide guidance to those individuals charged with administering disciplinary action ("Disciplinary Authority") while, at the same time, outlining the prohibited conduct and the right of appeal.

2.0 Rule/Principle

2.1 As members of the University Community, students have an obligation to act with academic integrity and in a fair and reasonable manner towards their peers, faculty, staff, administration and the physical property of the University. Academic integrity and personal conduct, both on-campus and off-campus in university-sanctioned activities, are critical elements in achieving these obligations.

2.2 Students will be subject to disciplinary action under this bylaw, for the following matters regardless of whether such behaviour is covered by other

both on and off the University of Manitoba Fort Garry and Bannatyne Campuses (the "Campuses"). This in turn may result in legal claims involving the University and others. The purpose of this policy is to explicitly establish the general means by which alcohol abuse on the Campuses can be reduced, and to the extent possible, eliminated.

2.2 The University shall meet the policy's objective by:

2.2.1 Offering an alcohol education and awareness program within the scope of programs offered by or through Student Affairs;

2.2.2 Maintaining University guidelines with respect to the serving and consumption of alcohol on the Campuses;

2.2.3 Requiring that events and facilities at which alcohol is served on the Campuses (the "events and facilities") be managed effectively, and in accordance with the University's policy and procedures and Manitoba Liquor Control Commission rules and regulations; and this policy applies broadly, and covers all events and facilities on the Campuses.

This policy is available online at: http://www.umanitoba.ca/admin/governance/governing_documents/community/253.htm .

Parking Regulations

All members of the University community and persons attending on property, owned and occupied or under the charge or control of the University, including roadways (the "University property") are required to familiarize themselves and comply with the Regulations.

The Regulations are in addition to any by-laws of the City of Winnipeg and any legislation and regulations of the Province of Manitoba regulating the operation or use of motor vehicles or regulating the crossing of or walking upon roadways by pedestrians.

A complete copy of the University Parking Regulations is available online at:

http://umanitoba.ca/admin/governance/governing_documents/community/255.htm . and

http://umanitoba.ca/admin/governance/governing_documents/community/256.htm

University governing documents; (bylaws, policies, procedures and regulations).

2.2.1 Academic dishonestly including, but not limited to:

- (a) academic/scientific fraud;
- (b) cheating on exams or tests;
- (c) contravention of academic regulations;
- (d) re-submitting own previous course work as new work;
- (e) examination personation;
- (f) inappropriate collaboration; and
- (g) plagiarism (i.e., passing off the thoughts, writings and work of another person as one's own).

2.2.2 Inappropriate behaviour including, but not limited to:

- (a) abuse of computer privileges;
- (b) alcohol and substance abuse;
- (c) breach of residence hall regulations;
- (d) disorderly, violent or threatening behaviour;
- (e) false or misleading information made for any purpose including information in connection with:
 - i) application for admission;
 - ii) application for awards;
 - iii) medical certificates;
 - iv) letters of permission;
 - v) transfer of credits; and
 - vi) transcript/student records matters;
- (f) harassment and unlawful discrimination;
- (g) indecent exposure;
- (h) theft;
- (i) unprofessional conduct; and

(j) vandalism.

2.3 The specific jurisdiction for each of the Disciplinary Authorities is set out in "Table 1: Jurisdiction of Disciplinary Authorities" ("Table 1"). For the purposes of this document and the related Procedures document, references to Faculty/School will include University 1 and Dean/Director will include the Director of University 1.

2.4 The specific disciplinary actions available for each Disciplinary Authority are set out in "Table 2: Disciplinary Actions Available to Disciplinary Authorities" ("Table 2").

2.5 Disciplinary Authorities having the closest connection with the particular alleged disciplinary matter are encouraged whenever possible and appropriate to resolve student disciplinary matters informally in the first instance.

2.6 Students who make complaints or appeals which are found by the Disciplinary Authority to be frivolous or made for an improper purpose, may be subject to disciplinary action.

2.7 If the disciplinary matter relates to a criminal offence, the Disciplinary Authority shall provide relevant information to Campus Security Services for potential follow-up by the appropriate policing authority.

2.8 Students have a right to appeal disciplinary actions made by a Disciplinary Authority excluding the decisions of the University Discipline Committee ("UDC") which are final decisions.

2.9 Students are advised that the Disciplinary Authority to whom an appeal has been made may impose a more severe disciplinary action than previously recommended by a lower disciplinary body should the hearing panel, after reviewing the disciplinary evidence presented by all parties, consider the original disciplinary action insufficient.

2.10 Student are afforded the right to representation when dealing with disciplinary matters in the first instance and with respect to appeals; and both are subject to the limitations set out in the related Procedures.

2.11 No disciplinary action shall be implemented until the time for appeal has elapsed or until the Student has waived in writing the right to appeal, whichever occurs first. The only exceptions to this rule shall be:

- (a) where the disciplinary action would be entered on the academic records of the Student, the Registrar shall be notified by the Disciplinary Authority implementing such disciplinary action, and shall not issue any academic transcripts until the appeal has been disposed of;
- (b) where the disciplinary action relating to academic dishonesty or academic fraud may result in a change to the Student's transcript, the Registrar shall be notified by the Disciplinary Authority implementing such disciplinary action, and shall not issue any transcripts until the appeal has been disposed of;
- (c) where changes in the Student's courses and/or program are directly related to the matter under disciplinary consideration, such changes shall not be permitted; and
- (d) where the disciplinary action if not implemented, the safety of members of the University Community would be compromised.

Students may request information from their faculty or school offices, the Office of Student Advocacy, or the Office of the University Secretary.

The bylaw is available online at: http://umanitoba.ca/admin/governance/governing_documents/students/868.htm

SECTION 2: Inappropriate or Disruptive Student Behaviour

1.0 Reason for Policy

In the event of a student or students exhibiting inappropriate or disruptive behaviour, the following policy can be implemented.

2.0 Policy Statement

2.1 General

Although this policy is directed to dealing with students who exhibit inappropriate or disruptive behaviour, there are some general statements which should be made:

2.1.1 The vast majority of students will complete their academic life at the University acting appropriately and without causing disruptions to their fel-

low students or to the University. This policy is not directed towards individual students who have a mental illness, provided their behaviour is neither inappropriate nor disruptive.

A staff member may notice that an individual student is exhibiting debilitating stress, even though he/she is not acting disruptively. In that case, the observation should be addressed with the student and, if appropriate, the student should be referred for voluntary counselling.

2.1.2 "In appropriate or disruptive behaviour is behaviour which persistently interferes with the academic or administrative activities of the University (and/or) which inhibits the ability of other students to learn and of instructors to teach." – Amanda, G. "Dealing with the Disruptive College Student: Some Theoretical and Practical Consideration", *College Health*, April 1986.

Such behaviours would include but would not be limited to the following:

- a) threats to the physical safety of the individuals or others;
- b) verbal threats to or abuse of students or University personnel;
- c) recurring and wilful damage of University property;
- d) inappropriate or disruptive behaviour as a result of misuse of drugs or alcohol on University property; and
- e) actions which habitually interfere with the learning environment or requires the inordinate time and attention of faculty and staff.

2.1.3 Where the individual students act inappropriately or disruptively:

- a) The majority of such students will accept personal responsibility for their inappropriate or disruptive behaviour, and will accept appropriate referral for voluntary counselling. For the most part, staff members need only use the "Normal Procedure for Dealing with Inappropriate or Disruptive Behaviour" set out below.
- b) Information and input received from professionals in the mental health field and professional practitioners at the University would suggest that the numbers of such students who do not accept personal responsibility or appropriate voluntary counselling are small. Where a student to whom this policy should apply identified by a staff member, he/she will use part 2 of the "Normal Procedure"; and if appropriate in more extreme cases involving physical or mental harm, he/she should use the "Procedure for More Extreme Behaviour".
- c) Where an officer(s) of the University believes that a student is inappropriately involving more than one of the various service and administration offices of the University, he/she shall request the Vice-Provost (Student Affairs) to initiate a staff conference to facilitate communication and problem resolution.
- d) Information regarding an acute problem of inappropriate or disruptive behaviour which is disclosed during the student application process, should be referred to the Director of Admissions or the Dean of Graduate Studies as appropriate. If the information is of serious concern to the respective Director of Admissions or the Dean of Graduate Studies, he/she may seek the advice of the University Legal Counsel and may initiate a student conference.

2.2. Normal Procedure for Dealing with Inappropriate Behaviour

When a student acts inappropriately or disruptively, staff members should, where appropriate:

2.2.1 Make timely voluntary counselling referrals through existing support services at the University. Such services include:

Counselling Service
Psychological Service Centre,
University Health Services
Faculty (of Medicine) Counselling Services.

2.2.2 Use the existing Student Discipline Bylaw and other policies, rules and regulations where additional action is necessary to deal with inappropriate or disruptive behaviour or students.

2.3 Procedure for More Extreme Behaviour

2.3.1 If a staff member is of the opinion that a student is exhibiting a behaviour of a nature of quality that likely will result in:

- a) Serious harm to student,
 - b) Serious harm to another person, or
 - c) Substantial deterioration of the student's health;
- The staff member shall, in addition to using the "Normal Procedure", immediately refer the matter to his/her respective Dean, Director, or Administrative Unit Head.

2.3.2 If the respective Dean, Director, or Administrative Unit Head is of the same opinion, he/she shall:

- a) Advise the student to seek professional help; and
- b) Contact the Director of University Health Services if the student refuses to voluntarily seek professional help. The Director of University Health Services or designate shall follow mental health legislation and regulations when determining whether or not involuntary psychiatric assessment is advisable.
- c) In addition to the foregoing procedure, the Campus Police should be contacted immediately if it is deemed necessary for the protection of the student, other persons, or property. It should also be noted that, subject to the Student Discipline Bylaw, the President may at any time make an order restricting or prohibiting access by a student to any University property.

This policy is available online at: http://www.umanitoba.ca/admin/governance/governing_documents/students/279.htm .

VIOLENT OR THREATENING BEHAVIOUR

1.0 Reason for Policy

The purpose of this Policy is to state clearly the University's refusal to tolerate violence in the workplace and on the University campus and to describe possible consequences of such action. It is believed that the Policy and the supporting Procedures represent a significant move towards the prevention of violence, as well as the management of a violent episode.

The issue of safety and health in the workplace with respect to violence is governed by provincial legislation and more specifically The Workplace Safety and Health Act (Manitoba) – Regulation #217/2006 (the Regulation). The Regulation identifies certain responsibilities for employers and employees in this regard. A policy on violence in the workplace is required.

2.0 Policy Statement

The University of Manitoba is committed to creating and maintaining a safe, positive and productive learning and working environment. Therefore, the University will not tolerate violent or threatening behaviour. Individuals who are found to have engaged in activities prohibited under this Policy will be subject to disciplinary action which may result in termination of employment, expulsion from educational programs, a ban from university property, and any other remedies the University may be entitled to at law or otherwise.

2.1 Definitions and Interpretations

- (a) Intimidation is defined as conduct or harassment that disrupts the work or learning environment and/or results in a reasonable fear for personal safety;
- (b) External Parties includes contractors providing services to the University, visitors to the University or other external organizations operating within the University community;
- (c) Student is defined as any person registered as a student with the University of Manitoba;
- (d) Threats include verbal and/or physical actions that create fear or apprehension of bodily harm;
- (e) Violence is defined as the attempted or actual exercise of physical force against a person and any threatening statement or behaviour that gives a person reasonable cause to believe that physical force will be used against the person;

(f) Violent or Threatening Behaviour is behaviour that includes a combination of, or all of, the behaviour defined above as "Intimidation, Threats and Violence".

(g) Worker(s) includes:

- i) any person who is employed by the University, to perform a service whether for gain or reward, or hope of gain or reward or not;
- ii) any person who works or performs services in a Workplace which is owned or operated by the University;
- iii) any person undergoing training or serving an apprenticeship at the University; and
- iv) any individual described in the Procedure entitled "Employee Organizations and Employment Groups".

(h) Workplace means any building, site, workshop, structure, mobile vehicle, or any other premises or location whether indoors or outdoors in which one or more Worker(s) or self employed persons are engaged in work or have worked for the University;

(i) Any references to legislation, committees or units within the University in this Policy shall be deemed to include successor or substitute legislation, committees or units, in their place thereof.

2.2 The following statements must be included in this Policy as a requirement of Regulation #217. The University, as an employer,

- (a) must ensure, so far as it is practicable, that no worker is subjected to violence in the Workplace;
- (b) will take corrective action respecting any person under the employer's direction who subjects a Worker to Violence;
- (c) will not disclose the name of a complainant to any person except where disclosure is
 - i) necessary in order to investigate the complaint;
 - ii) required in order to take corrective action in response to the complaint, or
 - iii) required by law.
- (d) By approving this Policy, does not intend to discourage or prevent the complainant from exercising any other legal rights pursuant to any other law.

This policy is available online at: http://umanitoba.ca/admin/governance/governing_documents/community/669.htm

SECTION 3: Hold Status

Students will be placed on "Hold Status" if they incur any type of outstanding obligation (either financial or otherwise) to the university or its associated faculties, schools, colleges or administrative units.

Some typical reasons for holds are:

- Outstanding fees or other unpaid university fees
 - Outstanding library books and/or fines
 - Parking fines
 - Outstanding transcripts or documents required from other institutions
 - Students records pending disciplinary action.
- No administrative or academic services will be provided to students on Hold Status until the specific obligations have been met.

Students who have not cleared their Hold Status from previous registrations will not be permitted to register again until the hold has been cleared or permission to register has been obtained from the Office of the Vice-President (Administration).

SECTION 1: Introduction

This chapter contains the regulations and requirements that apply to all students, regardless of their faculty or school.

Each faculty and school has its own supplementary regulations and requirements. These are published in the faculty or school chapters of this

Calendar. Some faculties and schools also have additional regulations and requirements governing their programs; these are available from their general offices.

It is the responsibility of each student to be familiar with the academic regulations and requirements of the University of Manitoba in general and of the specific academic regulations and requirements of their faculty or school of registration. Accordingly, students are asked to seek the advice of advisors in faculty and school general offices whenever there is any question concerning how specific regulations apply to their situations.

SECTION 2: Residence and Written English and Mathematics Requirements

2.1 Residence Requirements for Graduation

Each faculty and school recommends to the Senate the number of credit hours each student must complete in order to graduate from its programs. Senate also requires each student to complete a minimum number of credit hours at the University of Manitoba – this is called the “residence requirement.”

Unless otherwise stated in faculty and school chapters, the minimum residence requirement of the University of Manitoba is the work normally associated with one year in the case of programs of three years’ duration, and two years for programs of four years’ duration. Some faculties and schools may have additional residence requirements specified in their program regulations. However, in all cases, the residence requirement is assessed following an appraisal of the educational record of the student applying to transfer credits from another institution or applying to earn credits elsewhere on a letter of permission. The residence requirement is not reduced for students whose “challenge for credit” results in a passing grade.

2.2 University Written English and Mathematics Requirement for Undergraduate Students

All students are required to complete, within the first 60 credit hours of their programs, a minimum of one three credit hour course with significant content in written English, and a minimum of one three credit hour course with significant content in mathematics. Some degree programs have designated specific Written English and mathematics courses to fulfil this requirement. See the program descriptions in the faculty and school chapters of this *Calendar* for details.

Exemptions to the Written English and Mathematics Requirement:

- All students with completed baccalaureate degrees and who transfer into any program to which these requirements apply.
- Registered Nurses entering the Bachelor of Nursing Program for Registered Nurses.
- Students admitted before the 1997-98 Regular Session.
- Written English exemption only: Students transferring from Collège universitaire de Saint-Boniface who have completed a written French requirement (at the college before transferring to the University of Manitoba will be deemed to have met the written English requirement.

2.3 List of Approved Written English and Mathematics Courses

A complete list of all courses which satisfy the university written English and mathematics requirement is provided below. (On the web, students may search Course Attributes for courses that satisfy the written English and Mathematics requirements).

SECTION 3: Course Identification

3.1 Credit Hours (Cr.Hrs.)

Each faculty and school develops courses for its degree credit programs, subject to Senate approval, and assigns a credit hour value to each course.

The credit hours for a course are expressed as a number associated with the course which indicates its relative weight. There is a correlation between class hours and credit hours (i.e., 6 credit hours = 3 hours a week, two terms; and 3 credit hours = 3 hours a week, one term).

For the purposes of registration, courses taught over two terms have been divided into two parts. Students registering for term spanning courses will receive one grade for the course and only when the second part is completed. Check the *Registration Guide* for registration instructions.

3.2 Prerequisite and Corequisite Courses

Prerequisite: If a course is prerequisite for a second course, the prerequisite must be met in order to begin the second course. To determine whether or not a course has a prerequisite, see the course descriptions in this *Calendar*. Normally, a minimum grade of "C" is required in all courses listed as prerequisites, except as otherwise noted in the course descriptions.

For some courses, the prerequisite may be completed before registering for the second course or may be taken concurrently with the second course. To determine if a course may be taken concurrently, see the course descriptions in this *Calendar*.

Corequisite: If a first course is a corequisite for a second course, the first course **must** be completed in the same term as the second course. To determine if a course has a corequisite, see the course descriptions in this *Calendar*.

Where the sequence in which courses are taken is important, one course is stipulated as being prerequisite to another (e.g., Mathematics 1 may be prerequisite to Mathematics 2). Unless otherwise specified in the regulations of any faculty or school, the prerequisite requirement is met if at least a passing grade (D) is earned in the course. If the course is failed, permission *may* be granted to repeat it concurrently with the course for which it

is prerequisite. Some prerequisite courses may be taken concurrently. Check the course description for specific information.

Where a course is specified as a corequisite course, it must be taken at the same time as (or prior) to the course requiring it as a corequisite.

3.3 Course Numbers

First Two to Four Characters

The two, three or four characters in every course number are a shortened version of the subject of the course.

Last Four Digits

At the University of Manitoba the last four digits of the course number reflect the level of contact with the subject.

For example:

ECON 1200 Principles of Economics Cr.Hrs. 6

ECON is the code for Economics.

1200 indicates that it is an introductory or entry level course.

If the course requires a laboratory, this will be shown following the credit hours immediately following the title.

For example:

BIOL 3242 Biodiversity: Vascular Flora of Manitoba Cr.Hrs. 3 (Lab Required)

The 2000, 3000, 4000 course numbers indicate the second, third, and fourth levels of university contact with a subject.

Numbers in the 5000 range are normally associated with pre-Master's work or courses in the Post Baccalaureate Diploma and the Post-Graduate Medical Education programs.

Courses numbered 6000-8000 are graduate courses of the Faculty of Graduate Studies.

Course numbers in the 9000 series are used to identify courses taken at the University of Winnipeg by students in the University of Manitoba/University of Winnipeg Joint Master's Programs. The 9000 numbers do not indicate the level of the course taken (see *Graduate Calendar* or *University of Winnipeg Calendar*).

In most cases, some correlation exists between the course number and a student's year of study; that is, students in the third year of a program will generally carry course loads comprised primarily of 3000-level courses.

3.4 Other Course Information

Courses with numbers that end in 0 or an even number are taught in English usually on the Fort Garry or Bannatyne campuses.

Courses with numbers that end in odd numbers are taught in French at College Universitaire de Saint-Boniface.

SECTION 4: Grades and Grade Point Average Calculation

Final grades in most courses are expressed as letters, ranging from D, the lowest passing grade, to A+ the highest. Each letter grade has an assigned numerical value which is used to calculate grade point averages.

Some courses are graded on a pass/fail basis and because no numerical value is assigned to these courses, they do not affect grade point averages. Courses graded in this way are clearly identified in course descriptions and program outlines.

4.1 The Letter Grade System

Letter Grade	Grade Point Value	
A+	4.5	Exceptional
A	4.0	Excellent
B+	3.5	Very Good
B	3.0	Good
C+	2.5	Satisfactory
C	2.0	Adequate
D	1.0	Marginal
F	0	Failure
P		Pass
S		Standing

The grade of "D" is regarded as marginal in most courses by all faculties and schools. It contributes to decreasing a term, degree or cumulative Grade Point Average to less than 2.0. The course in which "D" standing is obtained need not be repeated except by probationary students in certain faculties or where a minimum grade of "C" is required in a prerequisite subject or to meet degree requirements. Courses graded "D" may be repeated for the purpose of improving a GPA. Students in doubt as to the status of their record should consult an advisor in their faculty or school.

For minimum grade levels, especially as they affect progression requirements, see the faculty or school regulations or consult an advisor.

4.2 Calculation of Grade Point Average

Quality Points

The quality points for a course are the product of the credit hours for the course and the grade point obtained by the student; e.g., 3 credit hours with a grade of "B" (3.0 points) = 3 credit hours x 3.0 = 9.0 quality points.

Quality Point Total

The quality point total is the sum of quality points accumulated as students proceed through their program of studies.

Grade Point Average (GPA)

The grade point average (GPA) is the quality point total divided by the total number of credit hours.

Cumulative Grade Point Average

The Cumulative GPA is the quality point total divided by the total number of credit hours attempted at the University of Manitoba and courses transferred from other institutions.

Degree Grade Point Average

The Degree grade point average is the Quality Point total divided by the total number of credit hours attempted at the University of Manitoba and courses transferred from other institutions for courses that are acceptable for credit in the current faculty or school.

Term Grade Point Average

The Term GPA is calculated on the basis of all final grades received in the term (eg. Fall, Winter, or Summer terms).

Repeated Courses

When a course has been repeated, the last grade achieved is that which will be used in the calculation of the GPA. (Students are normally permitted to repeat the same or equivalent course once). Admissions criteria and eligibility rules may vary by faculty with respect to inclusion and calculation of grades for repeated courses.

NOTE: Information on credit hours, courses, prerequisites and corequisites, is found in Appendix B of this chapter, entitled Course Identification.

4.3 Academic Honours

Students qualify for the Dean's Honour List when they achieve qualifying grade point averages as specified in the faculty and school chapters of this *Calendar* or in program regulations.

In addition, outstanding academic achievement will qualify students for other honours and awards. These include the University Gold Medal which is awarded at graduation in each faculty or school to the student with the most outstanding academic record; program medals which are awarded by faculties and schools to the best student graduating from a specific program; graduation "with distinction," which is recorded on the transcripts of all students who attain a qualifying grade point average; and other medals and prizes that are specific to programs or disciplines.

SECTION 5: Academic Evaluation

5.1 Methods of Evaluation

Within the first week of lectures, instructors must inform the class of the method of evaluation to be used in each course. See the Responsibilities of Academic Staff to Students Policy, in the chapter University Policies. In departments where a course is offered in more than one section, the department offering the course endeavours to provide instruction so that all sections cover similar topics and that all students achieve a similar level of competency in the topic. However, there will be differences in evaluation as well as in teaching style, readings and assignments from one section to another. Students may contact the department for additional information before registration.

5.1.1 Credit for Term Work

In subjects involving written examinations, laboratories, and term assignments, a student may be required to pass each component separately. If no final examination is scheduled in a course, the student's final grade will be determined on the basis of the method of evaluation as announced in the first week of lectures.

If credit is not given for term work, the student's final grade will be determined entirely by the results of the final written examination. Where the final grade is determined from the results of both term work and final examinations, the method of computing the final grade will be as announced within the first week of classes. Should a student write a deferred examination, term grades earned will normally be taken into account as set out in the immediately preceding paragraph.

5.1.2 Incomplete term work

A student who is unable to complete the term work prescribed in a course may apply to the instructor prior to the end of lectures for an incomplete grade and time extension for work completion. It is understood that the student is to write the final examination if one is scheduled for the course.

Taking into account the results of the final examination, the value of the term work completed, and the extent of the incomplete term work, the instructor shall calculate the temporary grade using a zero value for incomplete work. In no case will the satisfaction of the incomplete requirements cause a grade to be lowered.

The following maximum time extensions are allowed: August 1, for courses terminated in April; December 1, for courses terminated between May and August; April 1, for courses terminated in December. If a final grade is not reported within one month of the extension deadline, the letter "I" will be dropped, and the grade will remain as awarded. The student's opportunity to improve the grade will have lapsed.

5.1.3 Repeating a Course

Subject to faculty or school regulations, required courses graded "F" or "D" must be repeated, usually at the next opportunity. Elective courses graded "F" may either be repeated or another elective substituted. All electives in a program must be approved by the faculty or school.

When a course has been repeated, the last grade achieved is that which will be calculated in the GPA.

5.1.4 Probation and Academic Suspension

Failure to meet minimum levels of performance as specified in the regulations of the faculty or school will result in a student being placed either on probation or academic suspension in accordance with the faculty or school regulations.

A student's status is determined, following final examinations, at the end of each term (Fall, Winter or Summer terms) or at the end of an academic session as specified in faculty regulations. A student placed on probation is advised to discuss his/her program prior to the next registration with a representative of the dean or director to determine which courses, if any, should be repeated.

A student placed on academic suspension will normally be permitted to apply for re-entry to the faculty or school after one year has elapsed, but reinstatement is not automatic and individual faculty or school regulations must always be consulted.

While on suspension, students are not normally admissible to another faculty or school.

5.1.5 Release of Grades

Grades will be posted on the Aurora Student website when received. This may be a few days after classes for some courses and up to a few weeks after final examinations for others.

Students may access their grades through Aurora Student. Click on [Enrolment and Academic Records](#), [Student Records](#), [Final Grades](#).

5.2 Examinations

5.2.1 Examination Schedules

For most faculties/schools, final examinations are conducted in December for Fall Term courses; and in April/May for Winter Term and Fall/Winter Term courses. The Academic Schedule of the University, located at the front of this book, should be consulted for the exact time periods. A Preliminary Examination Timetable is posted approximately one month after the beginning of the term. The Final Examination Timetable, which contains the exact times and locations for each course and section, is posted by the Registrar's Office approximately six to eight weeks prior to each examination period. The examination timetable is available on the Registrar's Office Website (umanitoba.ca/registrar). **Students must remain available until all examination and test obligations have been fulfilled.**

5.2.2 Examination General Regulations

Any test(s) which have an aggregate value of more than 20% of the total value of the course may not be scheduled to take place during the 14 calendar days ending with the last day of classes in the term during the Fall/Winter Sessions as defined in the *Calendar*, or during the last two classes of Summer Evening and the last three classes of Summer terms.

No project or assignment may be announced during the periods outlined above, unless contained in the information required to be provided to all students during the first week of classes (See the Responsibilities of Academic Staff to Students in the chapter on Policies and Guidelines of the University).

5.2.3 Final Examinations

No final examinations or term or take home examinations shall be scheduled to occur prior to the examination periods as described in the *Calendar* except with the expressed consent of the deans and directors involved.

The weight of each question shall be clearly indicated on the examination paper.

The name of the instructor or the examination committee shall be clearly indicated on the examination paper

Students (with the exception of students auditing courses) are required to write all final examinations. Those who absent themselves without an acceptable reason will receive a grade classification of "NP" accompanied by a letter grade based on term work completed for the course using a zero value for incomplete term work and for the final examination. If no credit for term work is involved, a grade of "F" will be assigned. Under certain conditions a student may apply for a deferred examination; see Deferred Examinations.

Examinations are scheduled at the end of each term of registration.

Students are not permitted to leave an examination within the first 30 minutes and any student arriving more than 30 minutes after the commencement, but before the end, of a final examination scheduled by the Registrar's Office, might not be permitted to write that examination on the authority of the chief invigilator of the examination room.

Provided fairness is guaranteed beforehand, miniature electronic calculators shall be allowed during examinations, with the consent of the department.

Students are not permitted to bring in any unauthorized materials to an examination. This includes, but is not limited to, calculators, books, notes, or any electronic device capable of wireless communication and/or storing information (e.g. translator, cell phone, pager, PDA, MP3 units, etc.). However, students may bring in such material or devices when permission has been given by the instructor and/or the department or faculty.

The use of audio visual supports (including, but not limited to overhead or slide projectors, and audio/visual tape players) to display examination or test questions shall be prohibited except where arrangements have been made to display all questions simultaneously for the entire examination/

test period or in courses where time limited identification is a legitimate and specified part of the examination/test process.

Answers to examination questions shall not be posted prior to the conclusion of the examination.

Final grades must be posted by faculties and schools (identifying students by student number only) as soon as the grades have been approved by the faculty/school/department (as appropriate) and have been submitted to the Registrar's Office. (This policy is under review).

5.2.4 Student Access to Final Examinations

In order to allow proper feedback, students shall have an opportunity to read their own final examination script and any comments written on it prior to the deadline for a formal grade appeal, but only in the presence of the instructor or a department-appointed staff member.

5.2.5 Special Examination - Religious Reasons

A student who, because of religious obligations, is unable to write a final examination when scheduled, shall be given an opportunity to write a special examination. The student is required to give reasonable notice (approximately three weeks) to the head of the department concerned prior to the examination series and to present evidence concerning the religious obligations involved.

5.2.6 Deferred Examinations

Policies and procedures with respect to deferred examinations are currently under review. Pending approval of Senate, revised policies will be published on the university website. Check the Registrar's Office website (umanitoba.ca/registrar) or the online Calendar after July 2010. Students who miss a final examination and wish to apply for a deferred writing must apply to advising office of their faculty or school. University 1 students must contact the U1 Student Help Centre.

5.2.7 Supplemental Examinations

A limited number of faculties and schools permit a supplemental examination when a student has failed a course or failed to achieve a satisfactory result. Please refer to the section of the Calendar for your faculty or school for its policy on supplemental examinations. Where a faculty's or school's regulations permit supplemental examinations, students are normally notified of this privilege on their grade statements or by their faculty or school following publication of the grades. Students who are granted supplemental privileges are normally required to sit the examination within 30 working days from the end of the examination series in which the supplemental grade was received unless the progression rules of a faculty or school require the successful completion of an entire academic year before a student is eligible to proceed into the next. In this case, students are obliged to sit the examination at the next ensuing examination period.

The passing grade in a supplemental examination must be at least "C." Students are normally required to carry a full-time program in order to be eligible. Accordingly, students who are granted incomplete or deferred status may not be eligible. A student may only write a supplemental once in any course; otherwise the course must be repeated.

Students are advised to check with faculty or school offices or consult an advisor as to specific regulations that may apply.

To write a supplemental examination an application must be made to the office of the dean or director and the appropriate fee paid. The application form will be forwarded to the Registrar's Office and the supplemental grade will be submitted following completion of the examination.

5.2.8 Special Supervision of Off-Campus Examinations

Students who have been given permission to write deferred or supplemental examinations off-campus may apply to the Registrar's Office to write at an approved centre outside of Winnipeg.

5.2.9 Examinations: Personations

A student who arranges for another individual to undertake or write any nature of examination for and on his/her behalf, as well as the individual who undertakes or writes the examination, will be subject to discipline under the university's Student Discipline Bylaw, which could lead to suspension or expulsion from the university. In addition, the Canadian Criminal Code treats the personation of a candidate at a competitive or qualifying examination held at a university as an offence punishable by summary conviction. Section 362 of the code provides:

Personation at Examination

362. Every one who falsely, with intent to gain advantage for him/herself or some other person, personates a candidate at a competitive or qualifying examination held under the authority of law or in connection with a university, college or school or who knowingly avails him/herself of the results of such personation is guilty of an offence punishable on summary conviction. 1953- 54,c.51, s.347.

Both the personator and the individual who avails him/herself of the personation could be found guilty. Summary conviction could result in a fine being levied or up to two years of imprisonment.

5.3 Other Forms of Earning Degree Credit

5.3.1 Letter of Permission for Transfer of Credit

Students in degree programs at this university may take courses at other recognized colleges or universities for transfer of credit provided such courses are approved at least one month prior to the commencement of classes at the other institution by the faculty or school in which they are currently registered. The approval is subject to individual faculty/school regulations and is granted in the form of a Letter of Permission. The student must obtain a Letter of Permission whether or not the course/s being taken are for transfer of credit to the University of Manitoba. Failure to obtain a Letter of Permission may have serious academic implications.

To obtain a Letter of Permission, application must be made to the Registrar's Office as early as possible and at least one month prior to when required at the other institution.

Each application must be accompanied by the appropriate fee. The fees are for each application and a separate application is required for each session and institution regardless of the number of courses being considered. Students planning to seek permission to take courses elsewhere for transfer of credit to the University of Manitoba are cautioned to check the current *Calendar* for the residence and degree requirements of the degree programs in which they are enrolled.

Transferred courses will be given assigned credit hour values and grades. The transferred grade will be included in the student's degree and cumulative GPA.

5.3.2 Challenge for Credit

The purpose of Challenge for Credit is to provide students of the university with some means of obtaining academic credit in University of Manitoba courses (not otherwise obtainable as a transfer of credit from other institutions) for practical training and experience, or reading and study previously completed. Students who have registered to challenge would normally not attend classes or laboratories. Courses which have previously been taken at the University of Manitoba may not be challenged for credit.

To be eligible to challenge for credit a student must first be admitted to a faculty or school of the University of Manitoba. Eligible students will be required to demonstrate their competence in the courses which they are challenging for credit. Where formal, written examinations are required, these will be generally scheduled during the regular examination sessions in April/May, June, August, or December.

For information regarding requirements, procedures, applications and fees a student should contact the office of the faculty or school in which the student is enrolled, or in the case of new students, the faculty or school to which the new student has been admitted.

5.3.3 Transfer of Credit Between Programs within the University of Manitoba

When students transfer credits into their programs from another faculty or school within the University of Manitoba, the credit hour value used by the faculty or school offering the course is used. That is, there can only be one credit weight designated for a course with a particular course number.

SECTION 6: Appeals of Grades

6.1 Appeals of Grades Received for Term Work

The appeal of term work returned or made available to students before the last day of classes shall be subject to the policies and procedures established by faculty or school councils.

Students may formally appeal a grade received for term work provided that the matter has been discussed with the instructor in the first instance in an attempt to resolve the issue without the need of formal appeal. Term work grades normally may be appealed up to ten working days after the grades for the term work have been made available to the student.

Students may obtain the form "Application for Appealing a Grade Given for Term Work" from the general office of the department which offered the course. The fee which is charged for each appealed term work grade will be refunded for any grade which is changed as a result of the appeal.

6.2 Appeal of Final Grades

If a student has good reason to believe a mistake has been made in the assessment of the original grade, an appeal of the assigned grade may be made. A student may enter an appeal, through the Registrar's Office, for assessment of one or more grades following the posting of grades by the faculty/school/department. Grades are released by the Registrar's Office as they are received from faculties and schools. A student wishing to make a final grade appeal on a first term course grade must do so within 15 working days of the first day of classes for second term. For second term courses and full courses, the appeal must be made 15 working days following the Victoria Day Holiday.

Students wishing to appeal grades should contact the Registrar's Office to make application. The deadlines for grade appeals fall 15 working days from the first day of second term courses and 15 working days from the Victoria Day Holiday. For 2010-2011, these dates are as follows:

Appeal of Fall Term Courses: on or before January 26, 2011

Appeal of Winter Term and Full Courses: on or before June 14, 2011

For more information, including fees, please consult umanitoba.ca/registrar.

The fee which is charged for each appealed grade will be refunded for any grade which is changed. It should be noted that an appealed grade may not be lowered. Appeal forms may be obtained from the Registrar's Office. Students should note that the deadline for appeal of assigned grades will not be extended for students who are on "hold status" nor will official grades be released by the Registrar's Office until the "hold" has been cleared. (This policy is under review).

6.3 Academic Appeals

With the exception of decisions on admissions or disciplinary matters, all academic appeals from decisions of faculty or school appeals committees at the University of Manitoba or by the Comité d'appels at Collège universitaire de Saint-Boniface shall be heard by the Senate Appeals Committee regardless of the institute of registration of the student concerned.

The complete terms of reference for the Senate Committee on Appeals as well as an Appeal Form may be obtained from the Office of the University Secretary, 312 Administration Building or Student Advocacy/Student Resource Services, 519 University Centre.

SECTION 7: Attendance and Withdrawal

7.1 Attendance at Class and Debarment

Regular attendance is expected of all students in all courses.

An instructor may initiate procedures to debar a student from attending classes and from final examinations and/or from receiving credit where unexcused absences exceed those permitted by the faculty or school regulations.

A student may be debarred from class, laboratories, and examinations by action of the dean/director for persistent non-attendance, failure to produce assignments to the satisfaction of the instructor, and/or unsafe clinical practice or practicum. Students so debarred will have failed that course.

7.2 Withdrawal from Courses and Programs

7.2.1 Voluntary Withdrawal

The registration revision period extends two weeks from the first day of classes in both Fall and Winter terms. Courses dropped during this period shall not be regarded as withdrawals and shall not be recorded on official

transcripts or student histories. The revision period is prorated for Summer terms and for parts of term.

After the registration revision period ends, voluntary withdrawals (VWs) will be recorded on official transcripts and student histories.

The following dates are deadlines for voluntary withdrawals:

- The Voluntary Withdrawal deadline shall be the 48th teaching day in both Fall and Winter term for those half-courses taught over the whole of each term;
- The Voluntary Withdrawal deadline for full-courses taught over both Fall and Winter term shall be the 48th teaching day of the Winter term; and
- The Voluntary Withdrawal deadline for full-and-half courses taught during Summer terms or during some other special schedule shall be calculated in a similar manner using a pro-rated number of teaching days.

The exact Voluntary Withdrawal dates that apply to courses offered in the current academic session are published in the Academic Schedule at the front of this *Calendar*.

7.2.2 Authorized Withdrawal

Subject to the provision of satisfactory documentation to the faculty of registration, Authorized Withdrawals (AWs) may be permitted on medical or compassionate grounds.

7.2.3 Required Withdrawal from Professional Programs

Senate, at the request of some faculties and schools, has approved bylaws granting them the authority to require a student to withdraw on the basis of unsuitability for the practice of the profession to which the program of study leads.

This right may be exercised at any time throughout the academic year or following the results of examinations at the end of every year.

This right to require a student to withdraw prevails notwithstanding any other provisions in the academic regulations of the particular faculty or school regarding eligibility to proceed or repeat.

Where Senate has approved such a bylaw, that fact is indicated in the *Calendar* chapter for that faculty or school. A copy of the professional unsuitability bylaw may be obtained from the general office of the faculty or school.

SECTION 8: Academic Integrity

8.1 Plagiarism and Cheating

Plagiarism or any other form of cheating in examinations, term tests or academic work is subject to serious academic penalty (e.g. suspension or expulsion from the faculty or university). Cheating in examinations or tests may take the form of copying from another student or bringing unauthorized materials into the exam room (e.g., crib notes, pagers or cell phones). Exam cheating can also include exam impersonation. (Please see Section 4.2.8 on Exam Personation). A student found guilty of contributing to cheating in examinations or term assignments is also subject to serious academic penalty.

To plagiarize is to take ideas or words of another person and pass them off as one's own. In short, it is stealing something intangible rather than an object. Plagiarism applies to any written work, in traditional or electronic format, as well as orally or verbally presented work. Obviously it is not necessary to state the source of well known or easily verifiable facts, but students are expected to appropriately acknowledge the sources of ideas and expressions they use in their written work, whether quoted directly or paraphrased. This applies to diagrams, statistical tables and the like, as well as to written material, and materials or information from Internet sources.

To provide adequate and correct documentation is not only an indication of academic honesty but is also a courtesy which enables the reader to consult these sources with ease. Failure to provide appropriate citations constitutes plagiarism. It will also be considered plagiarism and/or cheating if a student submits a term paper written in whole or in part by someone other than him/herself, or copies the answer or answers of another student in any test, examination, or take-home assignment.

Working with other students on assignments, laboratory work, take-home tests, or on-line tests, when this is not permitted by the instructor, can con-

stitute Inappropriate Collaboration and may be subject to penalty under the Student Discipline By-Law.

An assignment which is prepared and submitted for one course should not be used for a different course. This is called “duplicate submission” and represents a form of cheating because course requirements are expected to be fulfilled through original work for each course.

When in doubt about any practice, ask your professor or instructor.

The Student Advocacy Office, 519 University Centre, 474-7423, is a resource available to students dealing with Academic Integrity matters.

SECTION 9: Graduation and Convocation

9.1 Graduation

Students may graduate from the University of Manitoba in May, October, and February of each year. (Convocation ceremonies are held in May and October only).

Students are eligible to graduate when they have completed all of the requirements for their degree program in accordance with the regulations described in the *Undergraduate Calendar* and the regulations available from the general offices of their faculties and schools.

It is the responsibility of each student to be familiar with the graduation requirements of the program in which they are enrolled. Consultation with academic advisors is advised to ensure that graduation requirements are met.

Please refer to the Registrar’s Office website (umanitoba.ca/registrar; click on Graduation and Convocation for answers to frequently asked questions about Graduation).

9.2 Application for Graduation

Every candidate for a degree, diploma or certificate must make formal application at the beginning of the session in which he/she expects to complete graduation requirements.

Application is to be made through Aurora Student. (Log into [Aurora Student](#); click [Enrolment and Academic Records](#), then [Declarations](#), then [Declare Graduation Date](#)).

Deadline to Apply for Fall 2010 Graduation: July 29, 2010

Deadline to Apply for February 2011 Graduation: September 22, 2010

Deadline to Apply for Spring 2011 Graduation: January 18, 2011

9.3 Changing a Graduation Date

If you need to change your graduation date after you have made your declaration, you must contact the general office of your faculty or school as soon as possible.

9.4 Receipt of Information about Graduation

After you have declared your graduation, you will be sent a series of e-mails requesting you to verify your full legal name, asking you about your attendance at convocation, providing convocation information, and so on. **It is imperative that you activate your University of Manitoba e-mail account and check it regularly.**

9.5 Convocation

Convocation ceremonies are held in May and October of each year. Correspondence with students who declare intention to graduate will be by email. Please be sure you have claimed your University of Manitoba computer account.

February graduates are included in the May ceremonies.

Graduating students are encouraged to attend with their families and friends because it is the one ceremonial occasion that marks the successful conclusion of their program of studies.

All prospective graduating students who apply for graduation will be asked to confirm by email their intention to attend Convocation.

Complete details of the time, location, and ceremony arrangements will be included in the material sent by email from the Convocation Office in the Office of Registrar.

Students who, for any reason, do not attend Convocation will receive their degrees in absentia.

The Registrar’s Office will hold unclaimed parchments for a maximum of twelve months after graduation when any unclaimed parchments will be destroyed. These will include those not given at Convocation, those that were to be picked up in person but not claimed, those that were mailed but returned to the Registrar’s Office by the postal outlet or courier depot, those that were not issued due to a financial hold on a student’s records, and those that were reprinted immediately after convocation due to corrections.

It is critical that you update your address, phone number and email through Aurora whenever changes occur. Note that any changes made with the Alumni Association are not reflected in your University of Manitoba student records.

If you do not receive your parchment, it is your responsibility to follow up with the Registrar’s Office within a twelve-month period. Any requests for parchments after this time will be processed as replacements; there is a fee charged for replacement parchments.

9.5.1 Academic Dress

Academic gowns, hoods, and caps are provided by the university as part of the Convocation arrangements.

9.5.2 Convocation Information

Information on Convocation may be obtained from the Registrar’s Office, 400 University Centre.

SECTION 10: Personal Information

You may make changes to your personal information by accessing Aurora Student and then selecting [Personal Information](#).

10.1 Mailing Address

In order to receive University mail, it is essential that you to provide the Registrar’s Office with your current address. All mail will be directed to the address you provide.

10.2 Change of Name

If you have changed your name since you first registered, official evidence of the name change (such as a marriage certificate) must be submitted to the Registrar’s Office. If you are unable to submit your name change documentation before registration, register under your former name, and then submit your name change information to the Registrar’s Office after registration.

The University of Manitoba uses your full legal name on its records, transcripts, and on graduation documents. Abbreviated or anglicized names should not be used unless they have been legalized with documentation.

SECTION 1: University 1

First Year Study in University 1

University 1 is the first 30 credit hours of most University of Manitoba programs, and depending on choice of target faculty, may be completed through either full-time or part-time study. High school graduates, mature students, and transfer students with less than 24 credit hours of post-secondary education are normally admitted to University 1. Please refer to the Admissions Chapter of this *Calendar* for exceptions.

The courses taken in University 1 are introductory university level courses that are intended to qualify students to enter the target faculty of their choice. When students have completed 30 credit hours in University 1 and have a minimum cumulative Grade Point Average (GPA) of 2.0, they must transit to the Faculty of Arts or the Faculty of Science or apply to another faculty or school where they complete its program requirements in order to graduate.

As outlined in the following sections the main pillars of University 1 are academic advising, academic support and academic orientation. For a more detailed description of University 1 please see the University 1 website at umanitoba.ca/u1.

1.2 The University 1 Student Help Centre

The University 1 Student Help Centre is home to registration assistants and professionally trained Academic Advisors. Should difficulties arise in any area that would affect academic success the staff members of the University 1 Student Help Centre are available to help.

Academic Advisors typically assist students with program planning, registration difficulties, personal issues or concerns, and connecting students to other campus resources. Newly admitted students should complete Start@U1 (see Section 4.1 in this chapter) prior to consulting with a University 1 Academic Advisor.

Please refer to the University 1 website: at umanitoba.ca/u1 for hours of operation and contact information.

1.3 The Learning Assistance Centre

The Learning Assistance Centre (LAC) offers academic support to University of Manitoba students to facilitate learning and improve writing skills. Areas of support include academic writing, time management, goal setting, textbook reading, note taking, preparing for multiple choice and essay exams, motivation, memory and concentration.

See the Learning Assistance Centre website at umanitoba.ca/u1/lac for contact information and further information on the programs and services offered.

1.4 ARTS 1110: Introduction to University

ARTS 1110, Introduction to University is a three credit hour course offered by University 1. It is designed to help students make the transition from high school, college or work-place to university, and is normally only available to students who have completed fewer than 12 credit hours of university level courses. ARTS 1110 may help students adjust to university life more quickly, offering a unique combination of educational principles, practical skills, regular assignments, and the support of a group of fellow students. Features of ARTS 1110 include: strategies for academic success; introduction to libraries and research methods; instruction and extensive practice in effective writing, from first draft to finished work; and exercises in critical thinking. ARTS 1110 satisfies the university's written English requirement.

1.5 University 1 Academic Orientation

University 1 Academic Orientation is designed to help students get off to a good start at university. It is an excellent way to become acquainted with the university community and to make some new friends. University 1 Academic Orientation is the first two official days of classes in September; therefore all new University 1 students are required to attend. Information about University 1 Academic Orientation will be mailed to new students in August. (Students beginning their studies in the Winter Term will have the opportunity to attend University 1 Academic Orientation in January. Information will be mailed accordingly.)

SECTION 2: Admission Requirements

Please see the Admissions chapter of this *Calendar* or the Admissions website at umanitoba.ca/admissions for a full description of the specific admission requirements to University 1.

2.1 Limited Admission

Canadian high school graduates who do not meet the specific academic requirements for admission to University 1 may be admitted under a special Limited Admission category. Students in this category will have their registration restricted (see section 3.1) and will be provided with additional academic supports and services. For a full description of the Limited Admission program and requirements, please refer to umanitoba.ca/student/u1/advising/limited_admission.htm.

SECTION 3: University 1 Academic Regulations

Academic regulations which apply to all students are described in the chapters in this *Calendar* titled 'General Academic Regulations and Requirements', and 'University Policies'. In addition, University 1 and the faculties and schools offering University 1 courses have regulations and requirements that apply specifically to its students. The University 1 Academic Regulations are described below. Please see the specific Faculty or School chapter(s) for the academic regulations that may apply to courses in which you are registered.

3.1 Maximum Course Load

University 1 students are normally restricted to a maximum of 30 credit hours during the Fall/Winter terms, with a maximum of five courses in each term. Students admitted under the Limited Admission category will be restricted to a maximum of 24 credit hours during the Fall/Winter terms, with a maximum of four courses in each term. In each case, a credit hour overload may be considered for Winter Term based on Fall Term performance. Contact the University 1 Student Help Centre to discuss course overload requests.

3.2 Repeating Courses

University 1 students may repeat a course they have previously taken, but they are **not required** to do so because of a low grade or a VW, unless it is a course required for admission or required once in their target faculty. University 1 students who wish to repeat a course in which they have a final grade must consult with a University 1 Academic Advisor prior to registration. Students may be eligible for a laboratory exemption in classes they are repeating with a laboratory component (see Section 3.3 in this chapter).

For courses that have been repeated (i.e. 2nd attempt) only the last grade achieved will be counted towards the students' cumulative Grade Point Average. However, the official transcript will reflect the grades of all courses attempted. In most cases, students will only be given one opportunity to repeat a course in which they have received a final grade. This includes taking a course considered to be equivalent to the course originally attempted.

Students must refer to their target faculty or school's *Applicant Information Bulletin* to determine how repeating a course may affect admission eligibility.

3.3 Laboratory Exemptions

University 1 students who are repeating a course with a laboratory component may qualify for a laboratory exemption. Laboratory exemptions are only granted if the lab portion of the course was passed. Only certain courses (usually courses in the Faculty of Science) offer laboratory exemptions. Students should see the general office of the department offering the course to determine if they are eligible for a laboratory exemption. Students who are eligible for a laboratory exemption should bring written permission from the department offering the course to the University 1 Student Help Centre prior to registration.

3.4 Academic Performance

Grades obtained in University 1 become a part of the student's permanent record and will appear on the student's official transcript. See Section 3 of the General Academic Regulations and Requirements chapter of this *Calendar* for a description of how Grade Point Averages (GPAs) are calculated. Grades earned while in University 1 will determine admission to most target faculties or schools.

Performance Level

University 1 students who have completed 12 credit hours or more will have their academic performance assessed informally as part of an Early Warning Program. Students with a cumulative GPA of less than 2.00 will be identified as part of the Early Warning Program which is designed to assist students at the earliest sign of academic difficulty by providing academic advising, support services, and strategic referrals with the goal of returning the student to good standing.

Formal academic assessments are performed following each term for all University 1 students who have completed 24 credit hours or more. As a result of this assessment students will be determined to be minimum met, on probation, or on academic suspension.

Minimum Met

University 1 students who have completed 24 credit hours or more must achieve a cumulative GPA of 2.00 or greater at each point of assessment in order to have met the minimum requirements of University 1. Students considered to be minimum met may be eligible to enter their target faculty and are encouraged to contact their target faculty or a University 1 Academic Advisor for admission information.

Probation

Students who do not achieve a cumulative GPA of 2.00 after attempting a minimum of 24 credit hours will be placed on probation. The notation "On Probation" will be recorded on the student's transcript. Once on probation, a student will be allowed to register for another term. At each point of assessment (at the end of each term), students on probation must achieve a term GPA of 2.00 to be able to continue registering on probation. To clear probationary status the student's cumulative GPA must be 2.00 or higher. Once a student's cumulative GPA reaches 2.00 or higher they will have returned to good standing and will be able to register without restrictions.

While on probation, support services and referrals may be suggested in order to improve academic performance. Some restrictions on course load may apply. If the student does not achieve a term GPA of 2.00 in each term that they register while on probation, he/she will be placed on academic suspension for one calendar year (see below).

Please note students who are registered in spanned courses will be assessed at the end of each term in which they are registered. It is possible for a student to be placed on probation prior to completing a spanned course; however an assessment of academic suspension will not occur while a student is registered in a spanned course. Students on probation who are registered in spanned courses will continue on probation until the spanned course is complete, and may be placed on academic suspension at the end of the term in which the spanned course is complete if their term GPA is below 2.00.

Academic Suspension

A student will be placed on academic suspension after failing to achieve a minimum term GPA of 2.00 while on probation. A student placed on academic suspension in University 1 is normally not permitted to register in any other faculty or school at the University of Manitoba or to attend any other post-secondary institution for a period of one calendar year. Students must reapply to University 1 once the term of the suspension has been served. All students placed on academic suspension are strongly encouraged to meet with a University 1 Academic Advisor to discuss possible alternatives to suspension.

3.5 University 1 Honour List

Students who achieve a term GPA of 3.50 or higher on a minimum of 12 credit hours will be placed on the University 1 Honour List. The University 1 Honour List will be calculated after each term (i.e. Fall, Winter, Summer).

The University 1 Honour List designation will appear on the student's transcript.

SECTION 4: University 1 Program Requirements

4.1 Course Selection and Registration

Course selection information for University 1 students can be found in the University 1 *Start Book*, which describes in detail the courses and course selection options available to University 1 students. The list of courses available to University 1 students is also available in Section 5 of this chapter. With special permission, students may register for courses not on this list.

New University 1 students are **required** to complete the Start@U1 Online Tutorial and quiz **before registering** for courses. The Start@U1 Online Tutorial will teach students to choose courses, determine a course load, build a timetable and use the Aurora Student registration system. Other registration related concerns, such as fee payments and photo identification cards, will also be addressed. Additional registration information can be found on the University 1 website at umanitoba.ca/u1 and on the Registrar's Office website at umanitoba.ca/student/records.

Start@U1 details and the University 1 *Start Book* will be distributed beginning in May and throughout the summer for students newly admitted to

University 1 for the Fall Term; in the Fall for students admitted for the Winter Term; and in the Spring to students admitted for the Summer Term. Detailed information about Start@U1, including an online version of the *Start Book*, is also available at umanitoba.ca/u1.

4.2 University 1 Curriculum

University 1 is normally the first 24-30 credit hours of a student's degree program. The University 1 curriculum includes a breadth requirement to ensure that students are exposed to a representative sample of courses. To that end University 1 students are required to take 6 credit hours of courses from the Faculty of Arts, 6 credit hours of courses from the Faculty of Science, and 6 credit hours of courses from the Faculty of Arts or the Faculty of Science or the Clayton H. Riddell Faculty of Environment, Earth, and Resources. The remaining 12 credit hours of courses are to be chosen from the University 1 course list in the *Start Book* (also found in Section 5 of this chapter).

The University 1 curriculum will normally be fulfilled through the completion of the admission requirements to faculties and schools as outlined in this *Calendar* and in the University 1 *Start Book*. Students who are admitted to faculties and schools after University 1 and who have not completed the University 1 curriculum will complete the remaining requirements as part of their degree program. Additionally, students may be eligible to enter a faculty or school program once they have completed 24 credit hours, but must complete remaining University 1 coursework in their intended degree program (see Section 4.3 in this chapter).

4.3 Transfer to Faculties and Schools Following University 1

Target faculties and schools that students may enter after University 1 have established minimum admission requirements. It is strongly advised that students pay attention to these requirements when choosing their courses in University 1. Target faculties and schools that admit students directly from University 1 require the completion of either 24 or 30 credit hours, depending on the program. There are often alternative courses that will fulfil admission requirements and, with careful planning, the University 1 course selection can qualify students for admission to more than one program. Many target faculties and schools have also established a Focused Approach for choosing courses in University 1 that will allow students to complete their degree in the shortest possible time. Information about course requirements for each target faculty or school can be found in the Admission section in the chapter pertaining to each faculty or school in this *Calendar*, the *Start Book*, and in the *Applicant Information Bulletin* available on the Admissions website at umanitoba.ca/admissions, or from the Enrolment Services Office, 424 University Centre.

Students who have completed 30 credit hours or more with a cumulative Grade Point Average (GPA) of 2.0 must exit University 1 before registering in the next Fall/Winter Terms. Students with 30 credit hours or more who have not met specific academic standards are normally required to remain in University 1 until those standards are met. See Section 3.4 of this chapter for an explanation of University 1's academic standards.

Students who have completed 24 credit hours or more with a minimum cumulative GPA of 2.0 may be eligible to apply for admission to another faculty or school. Alternatively, students who have completed 24 to 29 credit hours with a cumulative GPA of 2.0 or higher may elect to remain in University 1 and register for a full course load.

Students who have completed 24 credit hours or more with a cumulative GPA of 1.99 or less may not be eligible for admission to a target faculty or school and would remain in University 1. Students should refer to University 1's academic standards as outlined in Section 3.4 of this chapter.

Students with less than 24 credit hours remain in University 1 for their next registration and may register for a full course load.

Note: School of Art (Studio programs), the Marcel A. Desautels Faculty of Music, the School of Agriculture (the Agriculture Diploma program), and the Faculty of Engineering continue to admit students directly from high school, providing specific entrance requirements are met. Alternatively, students may apply for admission to these programs following University 1. See the chapters of these faculties and schools in this *Calendar* for program information.

SECTION 5: University 1 Course List

Refer to Section 4 in this chapter for information about choosing courses in University 1. To find a description of the courses on this list, go to the chapter in this *Calendar* for the faculty or school that is offering the course. The chapters are in alphabetical order, and departments are listed alphabetically within each faculty or school chapter. Courses are listed in the department sections and sorted in numerical order.

Note that not all courses listed in this section are offered every year. To determine which courses are offered in the Fall 2010 and Winter 2011 Terms refer to umanitoba.ca/calendar and the University 1 *Start Book*. Students may be permitted to take courses not on this list with permission of the teaching faculty or school and University 1.

For a list of courses available at Collège universitaire de Saint-Boniface see a University 1 Academic Advisor or refer to umanitoba.ca/calendar.

Faculty Overview

The Faculty of Agricultural and Food Sciences has earned a reputation for its high-calibre teaching programs and its friendly helpful staff. Students benefit not only from the expertise of staff in the Faculty, but also from the close proximity of other faculties on campus, federal research facilities, and a vibrant Winnipeg-based agricultural community.

Information on the Faculty's History, Vision and Mission Statements, Research, Programs, Centres, and Departments can be found on our website at: umanitoba.ca/afs.

Degree Programs

The degree programs in the faculty are designed to prepare graduates for service in professions concerned with the production, processing and marketing of food. Professional agriculturists hold positions in extension, resource management and conservation, teaching, research and business. Professional food science graduates hold similar positions related to food manufacturing and processing. Graduates from the faculty have important contributions to make in the economy of Canada and the well-being of its citizens. Other graduates accept international responsibilities, particularly in the developing countries. Programs of study in the faculty include courses in physical and biological sciences, mathematics, social sciences, and humanities. With these courses as background, major studies may be taken in areas represented by programs in the faculty. The faculty also offers a two year pre-veterinary program for students who plan to take the degree Doctor of Veterinary Medicine.

Diploma Program

The two-year Agriculture Diploma program offers a practical education for persons interested in operating a farm or working in an agricultural business. Although many diploma graduates return to family farms after graduating, an increasing number of graduates can be found working for farm supply companies, feed companies, financial institutions and grain handling companies, as well as doing technical work for various government agencies.

The Agriculture Diploma program covers a wide range of agricultural subjects, from production through to marketing and business management. Communication and leadership skills also receive considerable emphasis. The program culminates in assignments and a major project that relate directly to the student's individual farm or business interests. The program

extends over two winters. Classes begin in late September and end in early April to accommodate students with obligations to plant and harvest crops.

An agrologist is a "person who is qualified to teach or to practice the science and art of agriculture or to conduct scientific experiments and research in relation thereto." The motto of the profession is *Ciba ad Omnes* (Food for All). B.Sc. (Food Science) graduates are eligible to become members of the Canadian Institute of Food Science and Technology (CIFST), a professional society associated with the manufacturing, processing and packaging of food.

3) Both CHEM 1310 and 1320 are required for the B.Sc. (Food Science) Science Option Program.

Other requirements:

High school requirements include Math 40S (Pre-Calculus) (60%) and Biology 40S (50%) for all degree programs, Chemistry 40S (50%) for B.Sc. (Agriculture), B.Sc. (Agroecology) and B.Sc. (Food Science) students; pre-veterinary students should include Physics 40S.

Students are required to take three credit hours of Philosophy in their degree.

The written English and mathematics requirement are met by completing the required courses in Agriculture.

Applicants who do not meet the above-mentioned course requirements may be eligible for admission. Please contact the Academic Advisor (Degree), Faculty of Agricultural and Food Sciences at (204) 474-8269, for further information.

First Year Agriculture: Brandon University

Brandon University offers the first year of the Agriculture degree program of the Faculty of Agricultural and Food Sciences. Under arrangements between the two universities, students who complete the first-year Agriculture program at Brandon University may apply for admission with full credit into the second year programs of the University of Manitoba.

Transfers of Credit

School of Agriculture graduates who have obtained a GPA of 3.0 in the Agriculture Diploma program are eligible for 60 credit hours of transfer into the following degree programs: Bachelor of Science (Agribusiness), Bachelor of Science (Agroecology), Bachelor of Science (Agriculture) – Agronomy or Animal Systems, when transferring into the same stream. If students choose to change streams it may not be possible to transfer the entire 60 credit hours due to program requirements; students should contact the Student Services Office for details. Grades will be transferred for those courses considered on a one-to-one basis; the remaining credit hours will be transferred without grades. This transfer articulation is applicable to diploma graduates who have entered the degree program as of September 2005.

Students wishing to enter a degree program without the above qualifications will be evaluated on a course-by-course basis. Students should have a cumulative grade point average of 2.50 and a C+ or better in courses for which transfer is being considered.

The Bachelor of Science (Agriculture), Plant Biotechnology, and the Bachelor of Science (Food Science) are not part of this articulation. Students should contact the Student Services Office for details on transfer into these programs.

A Table of the Transfer of Credit courses between Diploma and Degree can be found at umanitoba.ca/afs. Students inquiring about transfer of credits should contact the Student Services Office at 474-9295.

Courses taken outside the Faculty of Agricultural and Food Sciences or outside of the University of Manitoba may also qualify for credit towards the degree if the course content and the student's performance are deemed appropriate by the department concerned.

2.2 Admission Requirements for the Diploma Program

Diploma students enter directly to the Agriculture diploma program from high school; University 1 is not required.

Applicants must be high school graduates with Senior 4 standing in English, Mathematics, and one Science course – normally either Biology, Chemistry or Physics.

Students without a suitable high school standing may be admitted upon the recommendation of the Diploma Selection Committee. The committee will review each application and interview the applicant. The maturity, scholastic ability and agricultural experience of the applicant will be considered. Please contact the Academic Advisor (Diploma), Faculty of Agricultural and Food Sciences at (204) 474-6066, for further information.

Transfer of Credit

Courses taken within the degree program in the Faculty of Agricultural and Food Sciences as well as outside the Faculty of Agricultural and Food Sciences or outside of the University of Manitoba may also qualify for credit towards the diploma if the course content and the student's performance are deemed appropriate by the department concerned.

SECTION 3: Faculty Academic Regulations

3.1 Academic Regulations for Degree Program

The B.Sc. (Agriculture), B.Sc. (Agribusiness), B.Sc. (Agroecology) and B.Sc. (Food Science) degree programs have the triple objectives of vocational, professional and cultural education. To fulfil the objectives, the degrees are offered in a program of study. Most courses in first year, which are taken in University 1 and some in second year, are prescribed. The remainder of second year courses and all courses in third and fourth years are determined by the program of study, and by the student's selection of elective courses.

It is strongly recommended that all students plan their coursework for third and fourth years before the end of their second academic year.

The provisions of the chapter, General Academic Regulations and Requirements, and the chapter, University Policies, apply to all students. In addition, the Faculty of Agricultural and Food Sciences has regulations and requirements, published below, that apply specifically to its students. Sup-

plementary academic regulations are on file in the general office. Admission information can be found in the Admissions chapter of this *Calendar*.

Scholastic Requirements

To obtain a B.Sc. (Agriculture), B.Sc. (Agribusiness), B.Sc. (Agroecology) or B.Sc. (Food Science) degree, a student must pass 120 credit hours normally comprised of 30 hours from University 1 and 90 hours in the Faculty of Agricultural and Food Sciences (i.e., a total of 20 full-courses or the equivalent).

A maximum of 144 credit hours (24 full-courses or the equivalent) may be attempted to obtain the 120 credit hours.

A minimum passing grade of "D" in prescribed courses is required of all students in the faculty.

Elective courses in which passing grades were not obtained need not be repeated.

A student's Grade Point Average (GPA) will be determined from the number of "effective" courses which apply at a particular stage. The effective courses consist of all courses passed in addition to all failures which have not been cleared or substituted for in the student's record.

In order to graduate, students must obtain a minimum GPA of 2.0 calculated over the minimum 120 credit hours before graduation.

Residence Requirements of Degree Program

The residence requirements for the degrees offered by the Faculty of Agricultural and Food Sciences, can be found in the chapter, General Academic Regulations and Policy.

Time Limits and Lapse of Credit

The normal maximum time allowed for the completion of the Agriculture degree programs is ten years from the date of first registration. A candidate for a degree will not be permitted to count toward that degree any courses taken more than ten years prior to the date of awarding the degree.

Probational Standards

Effective Courses to Date		Minimum GPA
1-5	(6-30 credits)	1.80
5 1/2-10	(33-60 credits)	1.85
10 1/2- 15	(63-90 credits)	1.90
15 1/2- 20	(93-120 credits)	1.95
20+	(120+ credits)	2.00

Academic Suspension Regulations

A student is placed on academic suspension when one of the following occurs:

- When a student fails to obtain 12 Weighted Grade Points in the first year program; or
- When a student fails to meet the probational standards after attempting a minimum of 24 credit hours while on probation; or
- When a student accumulates failures in excess of 24 credit hours.

Re-entry Regulations

A student must remain out of faculty for a period of one year and then apply for re-entry.

The student must complete at least 12 credit hours with a minimum Grade Point Average of 2.50 in courses approved by the faculty in the academic term or session in which reinstatement is being attempted.

The student loses credit for all courses in which a grade of "D" was obtained prior to being reinstated.

The student is given credit for courses in which grades of "C" or better were obtained, as well as the courses attempted for reinstatement.

The student is reinstated and placed in the category of "good academic standing."

A student who is placed on academic suspension for the second time, will not be permitted reinstatement in the faculty.

Appeals

Appeals of academic assessment of students must be submitted to the general office of the Faculty of Agricultural and Food Sciences within 21 days of the date of notification of the action sent to the student.

- Restricted Electives
- Free Electives

4.1.3 Bachelor of Science (Agribusiness)

Chair: B. Oleson

Office: 356 Agriculture Building

Telephone: (204) 474-9384

Program Advisor: G. Johnson

Office: 379 Agriculture Building

Telephone: (204) 474-9795

Agribusiness students specialize in the people component of agriculture. This begins with the consumer, ends with the producer and involves all those along the food chain. Food production and distribution is undertaken in a business environment and agribusiness is the study of decision-making within this setting. Graduates gain insight into the agribusiness environment through mastering concepts in economics, finance, marketing and management. In addition to the faculty core courses, all students are required to take the B.Sc. (Agribusiness) degree core requirements. Students in Agribusiness are not required to take University 1 Chemistry as part of the Faculty Core requirement.

Through the choice of restricted electives, students will specialize in either agricultural economics, agribusiness management or international agribus-

ness. The respective agricultural economics, agribusiness management or international agribusiness options involve selecting restricted electives from courses offered by either the Department of Economics, or the Faculty of Management, or the Faculty of Arts through their cross-disciplinary programs.

Students selecting an option in agricultural economics can declare a minor in economics, and by meeting the additional requirements can qualify for a major in economics as well.

The international agribusiness option involves taking a minor in one of the cross disciplinary programs in the Faculty of Arts. International agribusiness requires knowledge of languages, cultures, and international political history, in addition to the other business skills required by the B.Sc. (Agribusiness) degree.

The Agroecology program, which students enter after completing University 1, provides students with an understanding of the natural processes in the agroecosystem and the impact of agricultural practices on these processes. The program emphasizes three areas: ecological sciences, agricultural production, and the social and economic implications of environmental management. Students will develop an understanding of how to manage natural and agricultural resources in a manner that enhances economic production while maintaining the integrity of natural and agricultural environments. An undergraduate research project is completed during third and fourth years as part of AGEC 3510 and AGEC 4540. Graduates are prepared for careers at the technical and management levels in government and non-government agencies involved in planning and management of natural and agricultural resources. By appropriate choice of free elective courses, students can prepare for graduate studies.

4.5 Cooperative Education Program

Cooperative Education is a process of learning, which formally integrates the student's academic study with work experience in employer organizations. Work-related experience is found in industry, government and the farming profession. The work terms provide the students with practical experience, help to finance their education and provide guidance for further career specialization. All regulations governing regular Faculty of Agricultural and Food Sciences degree programs apply to the Cooperative Education Program.

Academic Term Requirements

Once having been accepted into the Cooperative Education program there are three requirements for completion of the Work Term(s). Failure to do any of them in a timely fashion will result in a failing grade. Please note the

Degree Program requires three four month work terms and the Diploma Program requires one five month Work Term. Please see each program's "Employment Term Requirements" for details.

Part way through the work term, the Cooperative Education Coordinator will contact the student for a work site evaluation. During the evaluation both the student and employer will be interviewed and the work assessed. The student will need to make him/herself available for the interview.

Two weeks after the end of the work term, a work term report is due and must be submitted to the Cooperative Education Coordinator. Both content and format will be marked. (Details as to format and what is required in the report can be found in "Guidelines for Cooperative Education Work Term Report" which can be obtained from the Cooperative Education Coordinator.)

Also, two weeks after the end of the work term, a post employment review is required to be submitted to the Cooperative Education Coordinator.

For Degree, the appropriate department head, in consultation with the student's program chair, will assign each participating student a faculty advisor. For Diploma, the Director of the School of Agriculture, in consultation with the Academic Advisor, will assign each participating student a faculty advisor. The faculty advisor will be responsible for evaluating the student's work term report and assigning the student a grade based on the report, the employer's evaluation and Cooperative Education Coordinator's site evaluation. Grades of "Pass" or "Fail" will be assigned. Students successfully completing the work term(s) will have their "Cooperative Education Option" acknowledged on their graduation parchment.

Degree Program

Admission: To be considered for admission in the Cooperative Education Program, an undergraduate degree student must have a minimum GPA of 2.5, have completed at least 75 credit hours of study by the end of the academic year of application but still need to complete 21 credit hours in their last year of academic study.

Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Education Program. Acceptance into the program is dependant upon the student receiving a job placement through the Cooperative Education Office.

Employment Term Requirements: The Cooperative Education Program is a five year program in which 12 months are spent in three-four month work terms with a faculty approved employer. The student will receive three credits for completing the Cooperative Education Program (one credit for each completed term). Students are required to register in the appropriate employment term course and pay the fee prior to starting the employment term. Normally each employment term will be completed with a different employer. While on a work term, a cooperative education student is not permitted to take more than six hours of academic credit and may not take more than one course at a time.

Diploma Program

Admission: To be considered for admission in the Cooperative Education Program, a first year diploma student must have a minimum GPA of 2.5, and have completed at least 47 credit hour of studies by the end of the academic year of application.

Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Education Program. Acceptance into the program is dependant upon the student receiving a job placement through the Cooperative Education Office.

Employment Term Requirements: The Cooperative Education Program is a five month program between the first and second year with a faculty-approved employer. The student will receive two credits for completing the Cooperative Education Program. Students are required to register in the employment term course and pay the fee prior to starting the employment term.

Introduction to the Faculty of Architecture

The teaching of architecture began in 1913 as a four-year degree program within the Faculty of Arts. In 1920 the program became a part of the newly established Faculty of Engineering and Architecture. In 1938 a three year diploma program in interior decoration was established. In 1945 the departments of Architecture and Interior Decoration were combined in the School of Architecture and Fine Arts. In 1948 the entire school was reorganized as the School of Architecture. The professional architecture degree became a five year program; and a new four year Bachelor of Interior Design degree was also introduced. In 1949 a one year graduate program in Community Planning was established. In 1957 the Manitoba Legislature approved a grant for the construction of a building for the School of Architecture, the first in Canada to be designed exclusively for architecture education. In 1963 the school was reconstituted as the Faculty of Architecture and a two-year graduate program leading to the degree, Master of City Planning, was introduced.

In 1966 the curriculum in Architecture was reorganized so that the degree, Bachelor of Environmental Studies, became the prerequisite for the professional programs in Architecture and Landscape Architecture. This was followed in 1970 with a new curriculum leading to the professional degree, Master of Architecture, and two years later with new curriculum leading to a Master of Landscape Architecture. In 1990 an admissions year of 30 credit hours of Arts and Sciences courses became a prerequisite for entry into Environmental Design.

In 1998 the Bachelor of Environmental Design (B.Env.D.) became an undergraduate program consisting of two years of shared design studies followed by a third year in one of the 'professional options'. These options included Architecture, City Planning, Interior Design, and Landscape Architecture. University 1 was introduced as a prerequisite for admission to the Environmental Design Program. In 2006 the Faculty of Architecture began to reform the Environmental Design Program to create a four year undergraduate design program by including University 1 in its curriculum offerings. In 2007 the Faculty of Architecture introduced a four year design program consisting of two years of common 'Foundation Studies' (ED1/U1 and ED2) followed by two years of pre-professional 'Intermediate Studies' years (ED3 and ED4). The third and fourth years are referred to as the 'Option Years' and include Architecture, Interior Environments and Landscape + Urbanism (a shared option between City Planning and Landscape Architecture).

The B.Env.D. program is envisioned as a strong multidisciplinary undergraduate degree in its own right. It provides a solid base of design education for students intending to pursue careers and/or graduate studies in a wide variety of disciplines, including the Faculty's Master's degrees in Architecture, City Planning, Interior Design and Landscape Architecture, and at other institutions globally.

Available Options

Effective September 2008, the Bachelor of Environmental Design Degree Program has been reformed to require students to declare a specific program Option after the second year of studies (ED2) in the Environmental Design Program. Of the approximately 100 students moving into the third year of studies (ED3), admission into the Options will be divided equally. Students will be required to rank their program options in order of preference (1st, 2nd, 3rd choice). The selection of students into these Options will be based on the GPA, a Portfolio and Statement of Intent. Students entering the program should be aware that entry into the Options will be assigned on a competitive basis, and that not all students may be successfully placed in their first choice. Students who have not completed 2nd year studios or who still have more than 1 three credit hour lecture course to complete will not be eligible for admission into the Option years.

Architecture Option

The Architecture Option offers a program of studies that focuses on transforming the lessons of history, technology, culture, the environment, and

regional and social aspirations into a program for architecture. Students have the academic freedom, one of the program's highlights, to experiment with ideas and methods as they develop their own personal and critical approaches to architectural design. The sequential design studios and supporting courses cover a wide spectrum of investigations ranging in scale from urban design to individual buildings to their construction details, examining the impact of all of these on the environment.

Interior Environments Option (not available to AMP students)

The Interior Environments Option provides an opportunity to study the design of interior spaces within the context of architecture and to investigate the design of objects within the contexts of the human body and interior spaces. Students enrol in a series of design studios and courses to explore the impact of interior environments on human beings and vice versa. The impact of technology – especially sustainable strategies – on buildings and their inhabitants is also studied.

Landscape + Urbanism Option (not available to AMP students)

The departments of Landscape Architecture and City Planning offer a joint option in Landscape + Urbanism for students who have a broad interest in understanding and shaping human settlement and habitat. Design studios and supporting courses recognize that we live in an increasingly globalized world where issues of natural resource depletion, climate change and the demand for sustainable development are paramount. Design and planning issues are addressed within the social, economic, and political contexts that drive development and of the cultural and ecological forces that create the built environment.

Available Streams (only available to AMP students)

AMP students entering either Stream one or Stream Two of the program will enter into the Architecture Option years three (AMP 1's) or four (AMP 2's) as outlined above.

SECTION 2: Admission Requirements

2.1 Bachelor of Environmental Design (B.Env.D)

To be considered for admission into the Bachelor of Environmental Design Program an applicant must have completed 30 credit hours of university-level coursework with an overall minimum adjusted grade point average of 2.50. For a detailed outline of the admission requirements please see our web site at umanitoba.ca/environmentaldesign.

2.2 Bachelor of Environmental Design Architecture Masters Preparation Program (AMP)

Enrollment in the Environmental Design Masters Preparation Program is competitive and limited. Students will be admitted on the basis of an annual selection process. Applicants satisfying the minimum academic requirements are eligible for consideration at the discretion of the Department of Architecture Admissions Selection Committee. For a detailed list of the admission requirements please see our web site at umanitoba.ca/architecture.

SECTION 3: Faculty Academic Regulations

3.1 Undergraduate Scholastic Standards

A Grade Point Average (GPA) of 2.00 is required as an acceptable standard of performance.

A minimum grade of 'C' is required to pass all courses offered by the Environmental Design Program and by the Departments within the Faculty. All courses offered by the Environmental Design Program stipulate a grade of "C" in the prerequisite course(s).

To be eligible for the degree of Bachelor of Environmental Design a student is required to complete a minimum of two full academic years of studies in the Environmental Design Program including Years 3 and 4.

3.2 Supplementary Regulations

Special regulations governing admission, attendance, withdrawals, examinations, grading procedures and curriculum requirements are on file in the general office of the Environmental Design Program, Faculty of Architecture.

3.3 Dean's Honour List

Students who achieve a term GPA of 4.0 or better, while registered in 80 per cent of a full course load will be included in the Dean's Honour List for the Faculty of Architecture.

SECTION 4: Program and Graduation Requirements

4.1 Bachelor of Environmental Design

The Bachelor of Environmental Design Degree is a four year program of studies consisting of two years of common 'Foundation Studies' (ED1/U1 and ED2) followed by two years of 'pre-professional 'Intermediate Studies' (ED3 and ED4). The third and fourth years are referred to as the 'Option Years' and include Architecture, Interior Environments and Landscape + Urbanism (a shared option between City Planning and Landscape Architecture). Typically students entering the Environmental Design Program are admitted after completion of the admission requirements.

		Foundation Studies	
Apply to University 1		ED1 / U1	
Apply to Environmental Design ED2 Program			
		Intermediate Studies (Option Years)	
Apply to Option ED 3 Arch Option	or ED 3 IE Option		or ED 3 L + U Option
ED 4 Arch Option	or ED 4 IE Option		or ED 4 L + U Option

The Foundation Studies of the Environmental Design Program provide a solid grounding in the basic knowledge and language shared by all of the environmental design disciplines. It also provides opportunity to develop interdisciplinary perspectives through the other academic units in the University of Manitoba. Students come to understand the holistic nature of environmental design and, at an early stage, begin to establish a rich and multidisciplinary dialogue with their peers in the Faculty of Architecture. It also enables students to discover their strengths and interests relating to a particular environmental design discipline.

The Intermediate Studies of the Environmental Design Program provide opportunities to pursue a specific professional design discipline including Architecture, City Planning, Interior Design and Landscape Architecture. The third and fourth years are spent studying in the Option Years where students are exposed to, and challenged by, academic and professional design theories and practices specific to a particular design discipline.

Overall, the curriculum is structured around a design studio sequence that provides a forum for exploring the complex relationships between humans and the natural and built environments that constitute the places and artifacts of cultural production. Over a four year period, a student will develop the necessary knowledge and skills to pursue work in a wide variety of design practices.

The professional options are an important curriculum link to the graduate programs. Students holding a B.Env.D degree are eligible to apply to the graduate departments of Architecture, City Planning, Interior Design and Landscape Architecture and to other graduate programs globally. Students who have completed a design degree may be eligible to apply to the graduate program. Interested students should consult the *Graduate Calendar*, Faculty of Architecture.

In order to be eligible for the Bachelor of Environmental Design Degree students must complete ED2, ED3 and ED4 (total 129 credit hours). Admission enrollment is limited to 100 students on a competitive basis.

Please note that year one program requirements are under revision. New requirements will be listed on the School of Art's website (www.umanitoba.ca/schools/art). Once there, select "Future Students".

The School of Art offers degrees that cover the history, theory, and techniques of art. Students must also take elective courses outside the School of Art. These programs provide a general cultural background as well as the technical education necessary to become an educator, or a professional creative artist in fine art or applied fields. The programs reflect the assumption that in a time of fluctuating cultural values, technical training alone is not sufficient for significant work in any branch of the arts.

The first two years offer basic instruction in the fundamental principles of drawing, design and representation. In the fine arts studio electives in second year, the student selects a program that provides specialization in one or more of the following: ceramics, drawing, graphic design, painting, photography, printmaking, sculpture and video.

The school reserves the right to retain temporarily or permanently any work done by students in fulfilment of course requirements.

See Section 3.1.4 or 3.2.4 for information on the declaration of a double Major in the respective degree program. Effective September 2009 Arts students may complete Minor programs offered by other Faculties/Schools not listed above providing the Minor program consists of a minimum of 18 credit hours and all other degree requirements are satisfied.

SECTION 2: Admission to the Faculty of Arts

The following is a summary of the admission requirements. All admission requirements, as well as application deadline dates and forms, are included in an application information bulletin that is available from the Admissions Office, Enrolment Services, 424 University Centre; this information is also posted on the university's website.

Completion of a minimum of 24 credit hours of university level courses is required. Depending on the academic performance on the courses acceptable for credit, students may be admitted to or transit into the Faculty in good standing or on academic warning.

The specific requirements for the General, Advanced and Honours degree programs are given in Section 3: Basic Faculty Regulations for the Three Programs Leading to a B.A.

Each department and program outlines its entry and requirements in Section 7: Departments in, and Programs and Courses Offered by, the Faculty of Arts.

2.1 Admission from University 1

University 1 students in Good Standing (2.00 cumulative grade point average) may transit to the Faculty of Arts or Science subject to the following conditions:

- Students in good standing who have completed at least 24 credit hours may choose to transit to the Faculty of Arts or Science.
- Students in good standing who have completed 30 credit hours or more of courses must choose to transit to Arts or Science, if not admitted to another faculty or school, prior to the next regular term of registration.
- Students who have completed 24 credit hours or more and who have not achieved a minimum cumulative grade point average of 2.00 may be eligible for special consideration and therefore should contact the Faculty of Arts for further information on transiting.
- Students who have exceeded 30 credit hours of "F" grades or have more than a combined 42 credit hours of "F" and "D" grades are not admissible. Students may contact the Faculty of Arts for further information and advice.

2.2 Admission as a Transfer Student

Students transferring to the Faculty of Arts from another faculty or school at the University of Manitoba are called "internal transfers." Students transferring to the Faculty of Arts from another university or college are called "external transfers."

Transfer students must apply for admission to the Faculty of Arts at the Admissions Office by the application deadline date.

For the University of Manitoba's general policy on external transfer students and advanced standing, see the chapter on Admission to the University of Manitoba in this Calendar.

Students who apply to transfer to the Faculty of Arts must have completed no fewer than 24 credit hours of university level coursework and must have achieved a minimum grade point average of 2.00. Students who have completed 24 credit hours or more and who have not achieved at least a 2.00 grade point average may be eligible for special consideration and should contact the Faculty of Arts for information and advice. Students who have exceeded the maximum number of "F" and "D" grades permitted on courses acceptable for credit in Arts (see Section 4.10) are not admissible.

Anyone who has been placed on academic suspension by another faculty, school, or external institution will not normally be admissible if less than one year has elapsed since he/she had been placed on suspension. The waiting period will be increased to two years if the student has been placed on suspension more than once in consecutive years. For information regarding transfer credit see Sections 4.2.1 and 4.2.2.

2.3 Admission as a Student Seeking a Second Degree

A student who holds a first undergraduate degree from a recognized university program may apply for admission to pursue a second undergraduate degree. For information regarding possible transfer credit see Section 4.14.

2.4 Admission as a Visiting Student

A "visiting" student is one who is pursuing a degree at another institution and whose basis of admission is a Letter of Permission from his/her home institution granting permission to register at the University of Manitoba. Previously admitted visiting students can register in a subsequent term without applying for admission, provided they have a Letter of Permission and have not changed their home institution. Certain restrictions may be placed on the kind and number of courses in which they will be allowed to register.

2.5 Admission as a Special Student

A student who holds a first degree and who wishes to take courses out of interest may apply for admission as a "special" student.

SECTION 3: Basic Faculty Regulations for the Three Programs Leading to a B.A.

For academic regulations related to graduate degrees, see the *Graduate Calendar* of the Faculty of Graduate Studies. For academic regulations pertaining to the following degrees, *Baccalauréat ès Arts (Latin-Philosophie)*, *Baccalauréat ès Arts (Spécialisé en français)*, and *Baccalauréat ès Arts (Spécialisé en traduction)*, which are also offered under the Faculty of Arts but with instruction available only at Collège universitaire de Saint-Boniface, see the *Annuaire* of the Collège universitaire de Saint-Boniface.

Students are encouraged, prior to reading the faculty regulations which follow, to review the chapter, General Academic Regulations and Requirements, in this *Calendar*.

It is **highly recommended** that all students entering the Faculty of Arts to pursue a degree complete six credit hours in each of five different subject fields within the first 30 credit hours, and that, if possible, they include among those courses the subject fields in which they will probably specialize because future choices may be limited by the initial choice of courses a student makes. Also, students must meet a subject field requirement to qualify for entrance to both the Advanced and Honours programs (see Section 3.2 and 3.3).

Combinations of courses for the Major, Minor and Honours programs, other than those listed, may be permitted with written consent of the department head or program coordinator and consent from the Faculty of Arts General Office. Similarly, Honours courses may be taken by students in the General or Advanced Major programs with the written consent of the department head or program coordinator.

3.1 General Degree Program

3.1.1 Its General Purpose

This program is aimed at training students to evaluate information, reach conclusions, and act on these conclusions. The training is intended to result in flexibility and objectivity in problem-solving, sensitivity to the social and physical environment, breadth of learning, and an appreciation of our cultural, political, and economic milieu.

3.1.2 Entrance into the B.A. General Degree Program

1) At the point of admission or transfer to Arts all students proceeding to an undergraduate B.A. degree are automatically in the General degree program. Subsequently, students may apply in the Faculty of Arts General Office for admission to either the Advanced degree program or the Honours degree program.

2) All students who have completed 30 credit hours of coursework are encouraged to declare a Major and a Minor. Once the Major(s) or Minor is declared it can be changed to a different subject field at some later registration. Students may also declare a double Major in lieu of a Minor. Students who want to declare a double Major must complete a double Major declaration form available in the Faculty of Arts General Office or on the Faculty of Arts website. Students should note that for entry into most Majors/Minors, the faculty requirement is that the student must have a grade of "C" or better in the prerequisite course(s).

For entry into a Major(s)/Minor requiring courses from more than one department, the faculty requirement is that the student must have an average of "C" or better in all courses which are eligible to count towards the Major(s).

For detailed information regarding entry and specific course requirements for Majors and Minors, see the specific listing for the relevant department in Sections 7 and 8.

Students who have not declared a Major or Minor by the time 60 credit hours of coursework have been completed, will not be able to continue registration until a Major/Minor is declared.

3.1.3 Requirements for Continuing in the B.A. General Degree Program

1) By the time students complete 60 credit hours, they should have six credit hours in each of five different subject fields.

2) Students admitted to the Faculty of Arts, must by the time they have completed 60 credit hours have successfully completed or be registered for at

least three credit hours in a course with significant content in written English and at least three credit hours in a course in mathematics. (See the Chapter General Academic Regulations and Requirements, Appendix A: List of Approved Written English and Mathematics Courses, or search Aurora Student for the course attributes "Written English Requirement" or "Mathematics Requirement.")

3) Students must meet the minimum performance level as outlined in Section 4.10.

3.1.4 Ten Faculty Requirements for Graduating with a B.A. General Degree

1) A student must successfully complete 90 credit hours of courses acceptable for credit in the Faculty of Arts (see Section 4.2) with a minimum Grade Point Average of 2.00 (i.e. "C" or better) on these 90 credit hours.

The 90 credit hours of passed coursework must include the remaining nine faculty requirements.

2) There must be at least six credit hours from a subject field designated Humanities, at least six credit hours from a subject field designated Social Science, and at least six credit hours from a subject field designated Science (see Section 4.1.1).

3) There must be at least six credit hours completed in each of five different subject fields (as listed in Section 4.1.1). In addition, a subject field may also satisfy the requirement for a Humanity, or Social Science, or Science and at the same time satisfy the Mathematics or Written English requirement.

4) Major: There must be 30 credit hours which constitute a **Major** in one of the subject fields approved by the Faculty of Arts (see Section 4.1.1). The student must also have a Cumulative Grade Point Average of 2.00 (i.e. "C") or better in courses where a final grade is recorded and that are used toward the Major including only the last grade of any course that has been repeated and excluding any failed course(s). A student who declares only one Major must also complete a Minor. A student who declares two Majors will not be required or allowed to complete a Minor, but must complete five full course equivalents as specified by the Major department (i.e. 30 hours of credit in each subject field). *Students who have questions about a Major in a particular subject are strongly urged to consult an instructor in the appropriate department.*

Students who declare and complete a Major in Global Political Economy **will not** be required nor allowed to complete a separate field for a Minor for purposes of satisfying the degree requirements.

5) Minor: There must be 18 credit hours which are in a subject field that is different from that of the declared Major, and which constitute a **Minor** in one of the subject fields approved by the Faculty of Arts (see Section 4.1.1). A student who declares only one Major must also complete a Minor. A student who declares two Majors will not be required nor allowed to complete a Minor. A Minor may be declared once the prerequisite has been satisfied. A student who has 18 credit hours in more than one subject field can declare only one of them as a Minor (that is, it is not possible to declare a "double Minor"). No course can be used to satisfy both the Major and the Minor requirement.

6) There must be at least 30 credit hours which are taken and successfully completed in subject fields outside the Major(s) and Minor subject fields.

7) Except for six special cases, a student's Major and Minor cannot be from the same department. (For details on these six exceptions, see the departmental listings in Section 7 for Classics; English, Film, and Theatre; French, Spanish and Italian; German and Slavic Studies; Judaic Studies; and Native Studies)

8) There must be at least 60 credit hours that have been taught by the Faculty of Arts (may include up to 24 credit hours from the Department of Mathematics, Marcel A. Desautels Faculty of Music List A or Art History courses considered as Humanities, see Section 4.1.1), or which have been accepted on transfer as equivalent to courses taught by the Faculty of Arts.

9) There must be at least 30 credit hours numbered at or above the 2000 level.

10) Residency Requirement: A student in the B.A. General degree program must complete University of Manitoba residency requirements (see Section 4.3 for details).

3.2 Advanced Degree Program

3.2.1 Its General Purpose

This program is intended primarily to serve students who desire a general education along with a reasonable degree of specialization in one area of study through the Major.

3.2.2 Entrance to the B.A. Advanced Degree Program

1) To enter an Advanced program, a student must complete an application form which is available in the Faculty of Arts General Office and have it approved by an academic advisor.

Once admitted to the Faculty of Arts it is possible to enter this program at any point up to one month prior to graduation provided the student has successfully completed six credit hours in each of four different subject fields.

2) All students are *required, upon entering* the Advanced degree program, to *declare a Major and Minor*. Students may also declare a double Advanced Major in lieu of a Minor. Students who want to declare a double Advanced Major must complete a double Advanced Major declaration form available in the Faculty of Arts General Office or on the Faculty of Arts website. Students should note that for entry into a Major(s) requiring courses from only one department, the faculty requirement is that the student must have a grade of "C" or better in the prerequisite course(s).

For entry into a Major(s) requiring courses from more than one department, the faculty requirement is that the student must have an average of "C" or better in all courses which are eligible to count towards the Major.

For additional information regarding entrance into Majors (such as which courses are eligible for counting as fulfilling the Major) see the specific listing for the relevant department in Sections 7 and 8. Students with questions about an Advanced Major in a particular subject should consult an instructor in the appropriate department.

3) For entry to the Minor, the prerequisite is a grade of "C" or better in the prerequisite course(s).

3.2.3 Requirements for Continuing in the B.A. Advanced Degree Program

1) Students admitted to the Faculty of Arts, must by the time they have completed 60 credit hours have successfully completed or be registered for at least three credit hours in a course with significant content in written English and at least three credit hours in a course in mathematics. (See the Chapter General Academic Regulations and Requirements, Appendix A: List of Approved Written English and Mathematics Courses, or search Aurora Student for the course attributes "Written English Requirement" or "Mathematics Requirement.")

2) When students register again after completing 90 credit hours, they will be expected to indicate when they plan to graduate. Students should have completed all requirements for the General degree by this point.

3) Students must meet the minimum performance level as outlined in Section 4.10.

3.2.4 Ten Faculty Requirements for Graduating with a B.A. Advanced Degree

1) A student must successfully complete 120 credit hours from among the courses acceptable for credit in the Faculty of Arts (see Section 4.2), with a minimum Grade Point Average of 2.00 (i.e. "C" or better) on these 120 credit hours.

The 120 credit hours of passed coursework must include the remaining nine faculty requirements.

2) There must be at least six credit hours in a Humanities subject field, at least six credit hours in a Social Science subject field, and at least six credit hours in a Science subject field (see Section 4.1.1).

3) There must be at least six credit hours completed in each of five different subject fields (as listed in Section 4.1.1). In addition, a subject field may also satisfy the requirement for a Humanity, or Social Science, or Science and at the same time satisfy the Mathematics or Written English requirement.

4) Major: There must be at least 48 credit hours which constitute a **Major** in one of the subject fields approved by the Faculty of Arts (see Section 4.1.1). The student must have a Grade Point Average of 2.00 (i.e. "C") or better in courses where a final grade is recorded that are used toward the

Major including only the last grade of any course that has been repeated and excluding any failed course(s). A student who declares only one Advanced Major must also complete a Minor. A student who declares two Advanced Majors will not be required nor allowed to complete a Minor, but must complete the second Advanced Major in accordance with the requirements as specified by the Major department.

Note: Not every department offers an Advanced Major. See the departmental listings in Sections 8 and 9 for information.

Students with an Advanced Major in Global Political Economy **will not** be required nor allowed to complete a separate field for a Minor for purposes of satisfying the degree requirements.

5) Minor: There must be 18 credit hours in a field that is different from the above Advanced Major, and which constitute a **Minor** in one of the subject fields approved by the Faculty of Arts (see Section 4.1.1). A student who declares only one Advanced Major must also complete a Minor. A student who declares two Advanced Majors will not be required nor allowed to complete a Minor. No course can be used to satisfy both the Advanced Major and the Minor requirement. A student having 18 credit hours in more than one subject field can declare only one of them as his/her Minor.

6) A student who declares a single Advanced Major with a Minor must have at least 42 credit hours in subjects other than those used towards the Advanced Major and Minor subject fields. Similarly, a student who declares two Advanced Majors must have at least 42 credit hours in subjects other than those used towards their two Advanced Major subject fields.

7) Except for six special cases, a student's Advanced Major and Minor cannot be from the same department. (For details on these six exceptions, see the departmental listings, in Section 7, for Classics; English, Film and Theatre; French, Spanish and Italian; German and Slavic Studies; Judaic Studies; and Native Studies.)

8) There must be at least 81 credit hours that have been taught by the Faculty of Arts (may include up to 36 credit hours from the Department of Mathematics, Marcel A. Desautels Faculty of Music List A or Art History courses considered as Humanities, see Section 4.1.1), or which have been accepted on transfer as equivalent to courses taught by the Faculty of Arts.

9) There must be at least 42 credit hours numbered at or above the 2000 level.

10) Residency Requirement: A student in the B.A. Advanced degree program must complete University of Manitoba residency requirements (see Section 4.3 for details).

3.3 Honours Degree Program

3.3.1 Its General Purpose

This program is designed to provide a high degree of specialization in a subject field. The entrance requirements and evaluation of performance are at a higher level than the General or Advanced programs. The Honours program is the preferred program for students seeking entrance to graduate study.

3.3.2 Entrance to the B.A. Honours Degree Program

To enter an Honours program, a student must complete an application form which is available in the Faculty of Arts General Office. Students must have successfully completed six credit hours in each of four different subject fields (see Section 4.1.1), with a minimum Grade Point Average of 3.0 (3.25 for entry to Psychology) on all courses including failed and repeated courses. In addition, students are to have a Grade Point Average of 3.0 (3.25 for entry to Psychology) or better in all course(s) in the intended Honours subject field(s) including failed and repeated courses. Students applying for Honours History must have a grade of "B" or higher in all 3000 and 4000 level History courses.

3.3.3 Requirements for Continuing in the B.A. Honours Degree Program

1) Prior to each registration, Honours students must have their programs approved by the department, and then by the Faculty of Arts General Office, and cannot make any subsequent changes without receiving prior permission from their department and the faculty general office.

2) Students admitted to the Faculty of Arts, must by the time they have completed 60 credit hours have successfully completed or be registered for at least three credit hours in a course with significant content in written English and at least three credit hours in a course in mathematics. (See the

Chapter General Academic Regulations and Requirements, Appendix A: List of Approved Written English and Mathematics Courses, or search Aurora Student for the course attributes "Written English Requirement" or "Mathematics Requirement.").

3) To continue in an Honours program, the student must maintain a Degree Grade Point Average of 3.0 (3.25 for Psychology) at each point of assessment on all courses where a final grade is recorded (as well as meet any additional departmental requirements there may be). In order to continue in Honours History students must also maintain a "B" grade or higher in each History course at the 3000 and 4000 levels.

Students who fail to maintain the required minimum Degree Grade Point Average are required to withdraw from the Honours program. They will be automatically placed in the General degree program and will have the following academic assessment permanently recorded on their transcript: "Required to Withdraw from the Honours Program." These students may be eligible to apply to the Advanced degree program.

3.3.4 Four Faculty Requirements for Graduating with a B.A. Honours Degree

It should be noted that not every department has an Honours program. For specific information on available single and double Honours, please consult the specific listing for the relevant department in Section 7.

Note: Students in an Honours program who satisfy the requirements for a Minor (in accordance with the Minor requirements listed under the B.A. General degree; Section 3.1.4, point 5 - Minor) may request to have the Minor recorded on their transcript. These students must come to the Faculty of Arts General Office to formally declare their intention to have their Minor recorded on their transcript.

1) The number of credit hours which a student must successfully complete in order to receive an Honours degree ranges from 108 to 120, depending on the specific requirements of the individual department. Information on the specific course requirements for the individual departments will be found in Section 7.

2) In order to graduate a student in the B.A. Honours degree program must satisfy the University of Manitoba residency requirements (see Section 4.3 for details) and attain a minimum Degree Grade Point Average of 3.0 on all coursework where a final grade is recorded.

3) Included among the courses presented for graduation there is to be at least six credit hours completed in each of five different subject fields (as listed in Section 4.1.1).

4) Among the courses presented for graduation there must be at least six credit hours in a Humanities subject field, at least six credit hours in a Social Science subject field, and at least six credit hours in a Science subject field (on subject fields see Section 4.1.1).

Section 4: Additional Faculty Regulations and Policies

4.1 Recognized Subject Fields

4.1.1 Five-subject Field Requirement and Humanity/Social Science/Science Requirement

Faculties and Schools offer a number of courses covering a variety of subjects. To satisfy the subject field requirement for any B.A. degree a student must complete 6 credit hours in each of 5 different course subjects. For example: 6 credit hours in Psychology plus 6 credit hours in German plus 6 credit hours in Mathematics plus 6 credit hours in Music plus 6 credit hours in Biological Sciences.

Each course subject in the Faculty of Arts has been further categorized as either a Humanity or Social Science. Courses offered by the Faculty of Science will satisfy the Science requirement. Therefore a course may satisfy both the subject field requirement as well as the requirement for the Humanity/Social Science/Science.

Listed below are the categories of Humanities, Social Sciences, Sciences and the course subjects that belong to each category.

Humanities

1) Course subjects taught by the Faculty of Arts that can be used towards the **Humanities** requirement: Asian Studies, Canadian Studies, Catholic Studies, Classical Studies, English (excluding ENGL 0930, ENGL 0940, ENGL 2000, ENGL 2001), Film Studies, French, German, Greek, History, Icelandic, Italian, Judaic Studies, Latin, Native Languages, Native Studies, Philosophy, Polish, Portuguese, Religion, Russian, Spanish, Theatre, Ukrainian, and Yiddish. In addition the following courses may be used: Women's and Gender Studies WOMN 1500, WOMN 2530, WOMN 2570, WOMN 2600, WOMN 3600, WOMN 3610 and WOMN 3620.

2) Course subjects offered by other units which can be used towards the **Humanities** requirement: Music (i.e. all courses listed for Advanced Major and Minor programs except ensemble courses) and History of Art (i.e. all courses listed with course prefix FAAH). (For details, see Section 8).

Social Sciences

3) Course subjects taught by the Faculty of Arts that can be used towards the **Social Science** requirement: Anthropology, Economics, Global Political Economy courses GPE 2700, GPE 4700, Labour Studies, Linguistics, Political Studies, Psychology, and Sociology. In addition the following courses may be used: Women's and Gender Studies WOMN 1600, WOMN 2500, WOMN 2510, WOMN 2560, WOMN 3510, WOMN 3550, WOMN 3560 and Others ARTS 1160. Note: Geography courses completed prior to September 1, 2006 will be considered a Social Science.

Sciences

4) Course subjects taught by the Faculty of Science that can be used towards the **Science** requirement: Astronomy, Biological Sciences, Biotechnology, Botany, Chemistry, Computer Science, Forensic Science, Mathematics, Microbiology, Physics, Statistics, and Zoology. (For details, see the Faculty of Science chapter of this *Calendar*.) Note: Environmental

Science and Geological Sciences courses completed prior to September 1, 2006 will be considered a Science.

4.1.2 Major, Minor, or Honours Programs

1) The Faculty of Arts offers various Majors, Minors and Honours programs. For a listing of the programs offered by the respective departments, please refer to the departmental entry in Section 7.

2) Major and Minor programs offered by other Faculties or Schools are listed in Section 8. These include a General Major, Advanced Major and Minor offered by the Department of Mathematics, a General Major and Minor in History of Art offered by the School of Art, and an Advanced Major and Minor offered by the Marcel A. Desautels Faculty of Music.

An Arts student may declare a Minor offered by any Faculty and School providing the Minor program consists of a minimum of 18 credit hours. For details on those Minor programs please refer to the relevant Faculty/School's chapter in this Calendar.

4.2 Courses Acceptable for Credit in the Faculty of Arts

In addition to all courses offered by the Faculty of Arts there are two other categories of courses acceptable for credit in the Faculty of Arts:

4.2.1 Courses Offered by Other Faculties or Schools at the University of Manitoba:

Effective September 2007, all degree credit courses offered by other Faculties or Schools at the University of Manitoba are acceptable for credit in Arts (**excludes Pass/Fail courses**) subject to the Faculty of Arts overall degree requirements.

If a student was registered in another faculty or school within the University of Manitoba prior to registering in the Faculty of Arts, all courses in which the student received a final grade will be treated in the same way as they would have been had they been taken by a student already registered in the Faculty of Arts. That is, all of these courses will count in determining eligibility for admission to Arts in accordance with Sections 2.1, 2.2 and 4.10 and they will all be taken into account when determining the student's Grade Point Averages in accordance with Sections 4.8 and 4.10. In addition, they will all count towards the minimum number of credit hours required for graduating, provided the student received a passing grade in each of them, and the courses did not conflict with some other graduation or continuing regulation (such as the Residency Requirement).

4.2.2 Courses Offered at Other Universities and Colleges:

Effective September 2007, all courses offered at other universities and colleges which are evaluated as equivalent to University of Manitoba courses (**excludes Pass/Fail courses**) will be used when determining eligibility for admission and transfer credit.

There are two groups of courses that are taken at other universities or colleges and which can be used for credit in the Faculty of Arts at the University of Manitoba, namely: a) those taken by students who are already registered in the Faculty of Arts at the University of Manitoba, and b) those

taken by students prior to transferring to the Faculty of Arts at the University of Manitoba.

a) Students who are already registered in the Faculty of Arts at the University of Manitoba, and who wish to take courses at another university or college to count towards their University of Manitoba degree are required to obtain a Letter of Permission from The Registrar's Office prior to registering at that other institution; see the chapter, General Academic Regulations and Requirements. The Letter of Permission will not be given to a student who has not completed at least 24 hours of coursework at the University of Manitoba or who is on academic warning or academic suspension. As of September 1999 grades earned in courses at other universities are taken into account in the cumulative hours when determining the Grade Point Averages at the University of Manitoba. Grades earned at other universities will not be used in determining eligibility for awards (see Section 4.11 and 4.12 for details).

b) All completed courses that are deemed acceptable for credit in any degree program at the University of Manitoba (**excludes Pass/Fail courses**) which were taken by a student registered at another university or college prior to transferring to the Faculty of Arts, will be used when determining eligibility for admission and transfer credit. That is, all of these courses will count in determining admissibility, in accordance with Sections 2.1, 2.2 and 4.10.

As of September 1999 the applicable courses (credits and attempts) in both a) and b) are included on the University of Manitoba record, the external courses are counted as attempts and external grades are taken into account when determining the University of Manitoba Grade Point Average as well as count towards the maximum number of "F" and "D" grades permitted in an Arts degree (see Section 4.10). Grades earned at other universities will appear on the University of Manitoba transcript and will not be used in determining eligibility for awards (see Section 4.11 and 4.12 for details). There is no limit on attempts in any degree program.

All completed courses that are deemed acceptable for credit in any degree program at the University of Manitoba (**excludes Pass/Fail courses**), which were taken by a student at another university or college prior to transferring to the Faculty of Arts and are outside the ten-year period prior to admission and registration in the Faculty of Arts, will not be used for purposes of determining admissibility, advanced standing or transfer credit.

Students who wish to request a review or reassessment of transfer credit must do so within eight months of the initial determination of transfer of credit to the University of Manitoba.

4.3 Residency Requirement

As indicated in Section 3, each of the three undergraduate degree programs has a residency requirement which requires that a minimum number of credit hours must be taken at the University of Manitoba itself in order to qualify for the degree. Effective September 2009, students admitted to the Faculty of Arts will also be required to satisfy a residency requirement on the Major(s), Advanced Major(s) or Honours subject(s) in addition to the residency requirement on the degree.

1) B.A. General Degree

a) Degree: There are two ways in which the Residency Requirement for the B.A. General degree may be satisfied: either by successfully completing at the University of Manitoba no fewer than 48 credit hours of the required 90 credit hours (these 48 credit hours may be taken at various points in the student's career); or by successfully completing at the University of Manitoba itself no fewer than the last 30 credit hours of the required 90 credit hours.

b) Major: A minimum of 18 credit hours of the 30 credit hours required for the Major must be successfully completed at the University of Manitoba or through an approved University of Manitoba exchange program.

2) B.A. Advanced Degree

a) Degree: To receive the B.A. Advanced degree, the student must successfully complete at least 60 credit hours of the required 120 credit hours at the University of Manitoba.

b) Advanced Major: Students must successfully complete at the University of Manitoba or through an approved University of Manitoba exchange program the hours of coursework in their Advanced Major as noted below:

- In an Advanced Major requiring 48 to 57 credit hours, 30 credit hours must be completed at the University of Manitoba or through an approved University of Manitoba exchange program.

- In an Advanced Major requiring more than 57 credit hours, 36 credit hours must be completed at the University of Manitoba or through an approved University of Manitoba exchange program.

3) B.A. Honours Degree

a) Degree: In order to graduate with a B.A. Honours degree, students must take and successfully complete the hours of coursework offered by the University of Manitoba as noted below:

- In Honours programs requiring 108 credit hours, 48 credit hours must be from acceptable courses offered by the University of Manitoba;

- In Honours programs requiring 114 credit hours, 54 credit hours must be from acceptable courses offered by the University of Manitoba;

- In Honours programs requiring 120 credit hours, 60 credit hours must be from acceptable courses offered by the University of Manitoba.

b) Honours Subject(s): Students must successfully complete at the University of Manitoba or through an approved University of Manitoba exchange program the hours of coursework in their Honours subject(s) as noted below:

- In a single Honours subject requiring 54 to 69 credit hours, 33 credit hours must be completed in the Honours subject.

- In a single Honours subject requiring more than 69 credit hours, 39 credit hours must be completed in the Honours subject.

- In a double or joint Honours subject requiring 42 to 45 credit hours in one Honours subject, 24 credit hours must be completed in that Honours subject.

- In a double or joint Honours subject requiring less than 42 credit hours in one Honours subject, 21 credit hours must be completed in that Honours subject.

- In a double or joint Honours subject requiring more than 45 credit hours in one Honours subject, 33 credit hours must be completed in that Honours subject.

c) Once admitted to an Honours program, students are expected to take all their courses at the University of Manitoba. For information on exceptions to this requirement, the student should consult the Faculty of Arts General Office.

Residency Requirement Collège universitaire de Saint-Boniface:

In order to satisfy the University of Manitoba, Faculty of Arts residency requirement, students who transfer from Collège universitaire de Saint-Boniface must complete the following minimum hours at the Fort Garry Campus.

1) In order to receive the B.A. (General) or (Advanced) degree, the student must successfully complete at least 30 credit hours at the Fort Garry campus.

2) In order to receive the B.A. (Honours) degree, the student must successfully complete the hours of coursework offered at the Fort Garry campus as noted below:

- In Honours programs requiring 108 credit hours, 24 credit hours of acceptable coursework must be completed at the Fort Garry campus.

- In Honours programs requiring 114 credit hours, 24 credit hours of acceptable coursework must be completed at the Fort Garry campus.

- In Honours programs requiring 120 credit hours, 30 credit hours of acceptable coursework must be completed at the Fort Garry campus.

4.4 Year-of-Study Equivalent

A student's progress towards a degree is measured in terms of credit hours passed rather than years of study completed. The following table may be used to determine the year equivalent.

Year Equivalent	Credit Hours Passed (General Degree)	Credit Hours Passed (Advanced/Honours Degree)
1	fewer than 24 credit hours	fewer than 24 credit hours
2	24 credit hours to fewer than 54 credit hours	24 credit hours to fewer than 54 credit hours
3	54 credit hours or more	54 credit hours to less than 84 credit hours
4	not applicable	84 credit hours or more

4.5 Maximum Number of Courses During a Term

Normally a student may attempt a maximum of 15 credit hours during a term. If, however, a student takes at least 15 credit hours in any term and has obtained a Degree Grade Point Average of 2.75 and is in good standing, he/she may apply at the Faculty of Arts General Office to be allowed to take 3 additional credit hours in any term.

4.6 Prerequisite, Corequisite, and Course Availability

Prerequisite: Minimum grades of "C" are required in all courses listed as prerequisites, except as otherwise noted in the course descriptions published in each department and program section of this chapter. If a course is prerequisite for a second course, the prerequisite must be met in order to continue in the second course.

Some prerequisite courses may be taken concurrently. In this instance, the course description will indicate that a specific course is a pre- or corequisite for the course in which you wish to register. If you have not previously taken the course, you may register for it in the same term.

Corequisite: Where a course identifies another course as a corequisite it means that you must enrol in both courses at the same time.

Course availability: All courses listed in this *Calendar* are not offered every year. The course(s) being offered for the current terms are available at umanitoba.ca

4.7 Challenge for Credit

Some departments in the Faculty of Arts offer courses by means of challenge for credit. Since the courses offered in this manner may vary from year to year, students interested in this method of attaining credit should consult the Challenge for Credit section in the Faculty of Arts Registration Information located at the end of this chapter. The Academic Schedule in the front of this *Calendar* contains the relevant registration deadline dates appropriate to challenge for credit. Students on academic warning or academic suspension are not permitted to challenge courses for credit.

4.8 Repeating a Course

A student will normally be permitted to repeat a course only once. If a student wishes to repeat a course, he/she should be aware of the following:

- To repeat a course, a student must request permission to do so from the Faculty of Arts General Office.
- All completed courses will appear on the student's transcript and will be used to calculate the student's attempted hours. Courses that have been repeated will appear on the transcript but only the grade on the last attempt will be used in the calculation of the grade point average in the Major field, the cumulative grade point average and in the calculation of the grade point average required for the degree.
- Repeating a course will not remove the original grade from the transcript.
- All courses with "F" and "D" grades that are repeated count towards the limit of "F" and "D" grades permitted in an Arts degree as outlined in Section 4.10.

4.9 Statute of Limitations

Students who have not been registered at the University of Manitoba (or any other post-secondary institution) for a period of five years or longer immediately preceding an admission to Arts may submit a written appeal to

the General Office to be allowed to start afresh a Faculty of Arts degree. If the appeal is granted, all courses listed on the University of Manitoba record will remain but all previous work will **not** count towards satisfying degree requirements nor affect the degree GPA calculation. The following notation will appear under the term of readmission:

"Having discontinued attendance at post-secondary institutions for a period of five years or more, this student has been permitted to start afresh on recommendation of the Dean. All previous credits have been forfeited."

4.10 Maximum Number of "F" and "D" Grades Permitted on Courses Acceptable for Credit in Arts

Each student in the Faculty of Arts will be placed on academic suspension regardless if there has been evidence of improved performance if they have:

more than 30 credit hours of "F" grades, or

more than 42 credit hours of a combination of "F" and "D" grades.

Following the one year suspension, the student may return upon application to the Faculty of Arts General Office by selecting one of the following irreversible options:

(a) to continue with no possibility of further "F" or "D" grades. Any further "F" or "D" grades will result in academic suspension for two years. (Following the two year suspension, the student may apply to the Faculty of Arts General Office to return to start afresh.)

Or

(b) start afresh, with their previous work not counting towards satisfying degree requirements.

(In either case this does not mean that the previous coursework will be removed from the student history or transcript.)

4.11 Dean's Honour List and Graduating With Distinction or First Class Honours

Dean's Honour List

To qualify for this list a student must be registered in one of the three degree programs offered by the Faculty of Arts and complete at least 9 credit hours offered by the University of Manitoba during a term and attain a minimum Term Grade Point Average of 3.55. The notation "Dean's Honour List" will be included on the student's transcript specific to that term.

With Distinction

Students graduating with a B.A. General degree as a first degree will have their degree granted "With Distinction" if they have a minimum Degree Grade Point Average of 3.80 on all coursework taken at the University of Manitoba and provided a minimum of 60 credit hours of acceptable coursework is completed at the University of Manitoba. (Students seeking a second degree will be eligible for this recognition provided they complete a minimum of 60 credit hours of acceptable coursework at the University of Manitoba following admission to their second degree program.)

Students graduating with a B.A. Advanced degree as a first degree will have their degree granted "With Distinction" if they have a minimum Degree Grade Point Average of 3.80 on all coursework taken at the University of Manitoba and provided a minimum of 90 credit hours of acceptable coursework is completed at the University of Manitoba. (Students seeking a second degree will be eligible for this recognition provided they complete a minimum of 90 credit hours of acceptable coursework at the University of Manitoba following admission to their second degree program.)

This distinction will be noted on the parchment and on the student's transcript.

First Class Honours

Students graduating with a B.A. Honours degree will have their degree granted with "First Class Honours" if they have a minimum Degree Grade Point Average of 3.80 on all acceptable coursework completed at the University of Manitoba and have met the following residency requirements:

- Students must have completed a minimum of 78 credit hours of acceptable coursework at the University of Manitoba in a 108 credit hour Honours program;

- Students must have completed a minimum of 84 credit hours of acceptable coursework at the University of Manitoba in a 114 credit hour Honours program;
 - Students must have completed a minimum of 90 credit hours of acceptable coursework at the University of Manitoba in a 120 credit hour Honours program.
- The notation “First Class Honours” will appear on both the parchment and the student’s transcript.

4.12 University Gold Medal and Program Medals

Gold Medal

The Faculty of Arts will award the University Gold Medal to the student graduating with an Arts degree who:

1) has the highest Grade Point Average of all graduating students (with a minimum of 3.85) on all courses creditable in Arts attempted at the University of Manitoba over the last two Fall/Winter terms prior to graduation (with each Fall/Winter consisting of a minimum 24 hours of credit completed at the University of Manitoba) including any courses taken in the Summer Session between the last two Fall/Winter terms and

2) has a minimum Grade Point Average of 3.85 which is determined on the basis of all courses creditable in Arts attempted in completing the degree, including courses approved on transfer from other faculties/schools at the University of Manitoba.

Students who have up to 30 hours of external transfer credit (including failed courses) would be eligible providing they attain the minimum degree Grade Point Average of 3.85 on courses completed at the University of Manitoba which are acceptable for credit in Arts.

The Gold Medal winner is ineligible for Faculty of Arts program medals.

For specific details on the tie-breaking mechanism, contact the Faculty of Arts General Office.

Program Medals

The Faculty of Arts will award a Program Medal to the student graduating in each of the General, Advanced and Honours degree programs who:

1) has the highest Grade Point Average of all graduating students (with a minimum of 3.75) on all courses creditable in Arts attempted at the University of Manitoba over the last two Fall/Winter terms prior to graduation (with each session consisting of a minimum of 24 hours of credit completed at the University of Manitoba) including any courses taken in the Summer Session between the last two Fall/Winter terms and

2) has a minimum Grade Point Average of 3.75 which is determined on the basis of all courses creditable in Arts attempted in completing the degree, including courses approved on transfer from other faculties/schools at the University of Manitoba.

Students who have up to 30 hours of external transfer credit (including failed courses) are eligible providing they attain the minimum Grade Point Average of 3.75 on courses completed at the University of Manitoba which are acceptable for credit in Arts.

The Gold Medal winner is ineligible for Faculty of Arts program medals.

For specific details on the tie-breaking mechanism, contact the Faculty of Arts General Office.

4.13 Evaluation of Undergraduate Student Coursework

A copy of the Faculty of Arts *Regulations for the Academic Evaluation of Student Coursework* is available to students for perusal on the front counter in the Faculty of Arts General Office or website. This booklet includes regulations concerning the method of student evaluation, final examinations and/or term tests, final grades, etc. It should in particular be noted that there are no Supplemental Examinations in the Faculty of Arts. For information on Incompletes, Deferred Examinations, Debarment, Academic Dishonesty, etc., see the chapter General Academic Regulations and Requirements in this *Calendar*.

4.14 Seeking a B.A. as a Second Degree

Once a Bachelor of Arts degree has been awarded by the University of Manitoba Senate, it cannot be revoked or “turned in” towards another degree.

Students who have completed a first degree may apply and be admitted to the Faculty of Arts seeking a second degree.

Effective the 2002-2003 Regular Session and thereafter, students who have graduated with a first degree from the University of Manitoba will be allowed to transfer up to 60 credit hours of coursework from their first degree toward a second degree program in the Faculty of Arts. Courses taken in a qualifying program will be considered part of the first degree. Courses extra to the first degree, excluding courses taken in a qualifying program or another awarded degree, diploma or certificate, may be transferred in addition to the 60 credit hours.

Students with first degrees awarded by external institutions will be eligible for up to 60 credit hours of transfer credit providing the degree was awarded and the courses were taken within the 10 year period prior to admission and registration in the Faculty of Arts (see Section 4.2.2).

Once admitted students must satisfy all relevant undergraduate degree requirements except for the Written English and Mathematics requirements.

Students may not be admitted to the Faculty of Arts or complete a Bachelor of Arts Degree while concurrently pursuing a degree in another Faculty or School.

Section 5: Student Responsibilities

5.1 Students’ Code of Responsibilities

5.1.1 A Community of Scholars

The Faculty of Arts at the University of Manitoba defines itself as a community of scholars, all citizens of which must commit themselves to the ad-

vancement of learning, the dissemination of knowledge, and the well-being of all its members. Essential to these goals is each individual's commitment to the following values:

The affirmation of the dignity, worth, and equality of all citizens in the community;

The importance of reasoned debate and inquiry in all academic pursuits;

The practise of ethical conduct and personal integrity in all aspects of academic life.

Students who enrol in the Faculty of Arts voluntarily choose to join this community of scholars, and in doing so they accept the responsibilities as well as the benefits of living within it.

The Faculty of Arts offers its students remarkable opportunities for the acquisition of knowledge, the development of skills, and the free exchange of ideas that will shape their future lives. The scholarly community also provides a forum for extra-curricular activities, personal growth and social relationships that are equally important to one's sense of fulfilment. This should be an exciting process of discovering new goals, new points of view, and, indeed, a new and better sense of one's ideals and potential. But it is also a process of coming to recognize the value and special nature of the academic community itself.

The dynamic freedom of student life in the Faculty of Arts carries a special obligation that each individual act in such a way as to promote the well-being of other members — to accept willingly the categorical imperative of behaving in such a way that, if everyone else did the same, the good of all would prevail. This is a matter of accepting the differences of others, respecting the rights of others, and not abusing the resources that the faculty and the university put at your disposal. It is also a matter of acting honourably in all personal and academic relationships, and not tolerating through diffidence or neglect any violations of such obligations on the part of others. Our common commitment as citizens of the scholarly community will then work to enhance every individual member's experience and likelihood of success. Only with such a commitment from everyone can the Faculty of Arts fulfil its mission at the core of a public institution charged with educating the leaders of tomorrow's society. And only with such a commitment can we make wise use of the public funds for which we are accountable.

5.1.2 Rights and Responsibilities

As a student in the Faculty of Arts you are entitled to the use of all appropriate resources (human and other) for the successful completion of your studies. But you are also responsible for the use of those resources in a manner that is honest, fair and equitable. For example, when you enrol in a course you implicitly accept the terms of a contract whereby the professor is committed to teaching to the best of his/her ability, while you and the other students are committed to learning to the best of yours. Repeated absences, or the neglect of reading or writing assignments, are not just matters of individual concern; because they undermine the effectiveness of discussion for others as well, they are a failure to honour the academic and social contract that is implicitly a part of your membership in this community. Similarly, borrowing a book from the library is a direct commitment to honour the rules and regulations governing the circulation of such material. To damage a library book by writing in it, highlighting, or worse, is not just an act of individual vandalism; it is the wilful partial destruction of a resource that other students (and even other generations of students) have the right and the need to consult. It is to forget, in other words, that public property is not no one's property; it is everyone's property.

Similar obligations to ethical conduct are an inherent part of all the academic work you do as requirements of your program. Participation in the free exchange of ideas, upon which the scholarly community depends, obligates all members of that community to complete honesty and to adequate documentation of their intellectual debts. Plagiarism, the representing of someone else's words or ideas as your own, or any other form of academic dishonesty such as cheating, is a betrayal not just of individual honour, but of the whole basis of civilized discourse upon which all other members of the community depend.

The Manitoba Code of Human Rights guarantees everyone the right to be free of discrimination on the basis of gender or sexual orientation, age, ancestry, religion, family status, physical or mental handicap, and political beliefs. The rights and responsibilities of students thus go well beyond the classroom, library, or computer facility. Every student in the Faculty of Arts is at all times entitled to pursue his/her activities and program of study free of any social discrimination, harassment, exploitation or abuse of power

on the part of others, staff or students. Consequently, every student also has a reciprocal obligation to act in a similarly ethical fashion toward all other members of the community. In order that we all be fully empowered to take advantage of the pursuit of knowledge, the development of skills and the special opportunities for personal growth offered by the faculty, there must be on everyone's part a commitment to avoid irresponsible behaviour that damages the academic potential or self-esteem of others.

5.1.3 Rules and Regulations

It is the intention of the Faculty of Arts to discourage any conduct that is detrimental to the welfare of the scholarly community and its individual members. In this *Undergraduate Calendar* there are many regulations governing the expectations and standards of academic work in the faculty, and there are mechanisms of appeal at the department and faculty level for those who feel that the application of these regulations has been unfair or unjust. There are also rules and regulations governing the use of university resources and facilities, and others governing the social conduct of members of the community — for example, a policy on sexual harassment and a policy banning weapons from campus. Any violations of these rules and regulations should be reported to the appropriate administrative agency or authority (e.g., the director of Libraries, the sexual harassment investigation officer or the Security Services). It must be remembered, too, that all federal, provincial and municipal laws (regarding, for example, violence, alcohol, and drugs) are enforced on campus.

There are, however, some kinds of behaviour that fall between these academic and legal concerns, which are nevertheless inappropriate in the context of an academic community. Any disruptive action or physically or verbally aggressive behaviour that serves to threaten or intimidate another member of the community (staff or student) should be immediately reported to the relevant head of department or dean. Persons who are found to have violated the rights of other individuals, or to have subverted the welfare of the academic community, will face disciplinary action, which may include expulsion from the faculty. It is important to recognize, though, that such discipline is always less effective than a common commitment to respect the rights of others.

5.1.4 Conclusion

The foregoing statement of responsibilities applies to all student members of the Faculty of Arts. Faculty members and support staff are governed by a number of university, Senate and faculty policies that set out similar standards of ethical and professional conduct. This code is meant to give the students in the Faculty of Arts a sense of the relation that exists between their rights and their responsibilities and how these rights and responsibilities in turn sustain the welfare of the whole academic community.

5.2 General Responsibilities

Every effort is made to ensure that students in the Faculty of Arts have access to sound information and individual advice and guidance. Within this context and within the framework of faculty and department requirements indicated above, students are personally responsible for course selection and conforming to regulations regarding continuation in, and graduating from, the three undergraduate programs.

Students should take special care to ensure:

That each time they register that the courses they choose meet all requirements for graduation;

- That the courses they choose meet prerequisite conditions;
- That the courses they choose are not exclusions of, or the equivalent of, other courses already taken;
- The accuracy of their registration records, including all changes; and
- That they have noted and are following all deadlines and procedures published in the *Calendar* and elsewhere.

A copy of the Policy on Disclosure and Security of Student Academic Records is available for students to read in the Faculty of Arts General Office.

Section 6: Special Circumstances and Appeals of Matters Regarding Academic Regulations

Students should promptly consult the Faculty of Arts General Office when special circumstances warrant consideration of exceptions to regulations. In addition, the Academic Regulations Appeals Committee meets through-

out the year to consider appeals from students who request special consideration with respect to rules and regulations governing their programs of study and qualifications for graduation.

Students who intend to appeal matters concerning regulations or decisions of the Faculty which may affect their registration must arrange to submit a written appeal including all pertinent documentation to the secretary normally within three months following the term in which the course was taken or from the date of the academic decision. Appeals will not be considered beyond three years after the end of the course or from the date of the academic decision:

Deadline to Submit Appeal **ARAC Meeting Date**
 June 30 Third week of August

October 1 Third week of November
 December 1 Third week of February
 April 1 Third or fourth week of May
 Deadlines falling on a Saturday or Sunday will be observed on the preceding Friday.

Meeting dates are subject to change by the chair.

Appeals should be addressed to: The Secretary of the Academic Regulations Appeals Committee, c/o Faculty of Arts General Office. Special forms are available in the General Office.

7.1.1 Program Information

Anthropology is a science that examines human issues from both cultural and biological perspectives. The most fundamental concern of this discipline is the survival of humanity and the conditions of continuity and change for all human life. The department offers courses in socio-cultural anthropology or ethnology, archaeology, language and culture, and biological or physical anthropology. While academic staff of the department have research interests that range from northern climates to the tropics and from Asia to the Americas, the department is also involved in research that sheds light on Manitoba and its people.

7.2.1 Program Information

Asia is home to approximately 60 percent of the world's population. Asian nations have emerged as major economic powers while their populations are asserting their own cultural and historical identities. With this comes an expectation that Western nations will take an interest not only in the economic potential of the continent but also in its rich cultural heritage.

The Asian Studies Centre was established in 1990 to stimulate and organize teaching and research on Asia. Faculty attached to the centre offer instruction in the languages and culture of China, India and Japan. As well, specialists in other departments offer Asia-related courses that can be used for a Major or Minor in Asian Studies.

For entry, continuation and graduation requirements for the General Degree, Advanced Degree and Honours Degree, see Section 4: Basic Faculty Regulations for the Three Programs Leading to a B.A.

Major Program

For entry to the Major, the prerequisite is a grade of "C" or better in both ASIA 1420 (HIST 1420) and ASIA 1430 (HIST 1430). For students who have taken additional courses toward the Major, then a minimum cumulative GPA of 2.00 is required on all courses including the higher grade of repeated courses and excluding failed courses.

A minimum cumulative GPA of 2.00 in all courses that comprise the Major is required to graduate including the higher grade of repeated courses and excluding failed courses.

For entry to the Minor, the prerequisite is a grade of "C" or better in both ASIA 1420 (HIST 1420) and ASIA 1430 (HIST 1430).

7.6 Department of Classics

Head: Mark Joyal

General Office: 364 University College

Telephone: 204 474 9502

E-mail: classics@umanitoba.ca

7.6.1 Program Information

Classics programs focus on the languages, literature and material cultures of ancient Greece and Rome. The two cultures are considered for their formative role at the beginnings of western civilization and for their continuing influence on modern civilization. Although courses, and entire programs, are available to students without any Latin or Greek, those intending to pursue specialist studies in any field of classical studies are urged to begin study of the languages as early as possible. The department, through academic staff members with expertise in art history and archaeology, offers a variety of opportunities for travel courses and fieldwork overseas.

The Department of Classics offers Major and Minor programs in Classical Studies, Greek, and Latin.

7.6.2 Classical Studies

For entry to the Honours program, see Section 4: Basic Faculty Regulations for the Three Programs Leading to a B.A.

It is recommended that students complete ECON 2800, ECON 3800, and ECON 3810 before attempting ECON 4430, ECON 4450.

Where it appears appropriate, a senior Honours student may be allowed to substitute a graduate course for an undergraduate course in Economics.

Honours students are advised to select their ancillary options from the following disciplines: Geography, History, Mathematics, Political Studies, Statistics, Sociology and Philosophy. However, other fields may be selected to satisfy study or career interests.

Preparation for Graduate Studies

Honours students contemplating graduate work should normally seek to obtain a good background in both mathematics and statistics. For mathematics, it is strongly recommended that they take ECON 2530 Introduction to Mathematical Economics and seriously consider ECON 3730 Topics in Mathematical Economics. For a good statistics background, ECON 4120 Intermediate Econometrics and ECON 4130 Seminar in Econometrics in combination with some basic statistics courses are highly desirable. Such students are also advised to include at least one course in economic history in their program. These, or equivalents, are required of doctoral candidates at the University of Manitoba.

Other

No student may hold credit for more than six credit hours from the following: ECON 2450(3), ECON 2460(3), ECON 2700(3), ECON 3700(3). No student may hold credit for more than six credit hours from the following: ECON 2470(3), ECON 2480(3), ECON 2800(3), ECON 3800(3).

Combinations of courses for the Major, Minor and Honours programs, other than those listed below, may be permitted by written consent of the department head. Similarly, Honours courses may be taken by students in the General Major or Advanced Major programs with the written consent of the instructor and the department head; an average grade of "B" in all Economics courses is normally required before such consent may be given.

Students may offer the cross-listed courses ABIZ 2390 Introductory Environmental Economics (same as ECON 2390), ABIZ 3080 Introduction to Econometrics (same as ECON 3180), and ABIZ 4120 Intermediate Econometrics (same as ECON 4120) toward any of the above programs.

For information regarding the Canadian Studies program, see Section 7.3; for the Central and East European Studies program, see Section 7.5.

For each pair, students may hold credit for only one course.

² In cases where students have been granted three hours of unallocated transfer credit in Economics at the 1000 level, and have achieved additional credits in Economics from The University of Manitoba, and wish to declare Economics as a General Major without having full credit in ECON 1200, then the Years 2-3 requirement for a Major in Economics will be ECON 2450 and ECON 2470, plus an additional 18 credit hours in Economics of which at least 6 hours must be at the 3000 level.

³ Students in the Advanced Major are urged to take ECON 2450, ECON 2460, ECON 2470 and ECON 2480 in Year 2, but must take at least two of these courses in Year 2.

⁵ For the purpose of satisfying program requirements in the Honours programs and of satisfying course prerequisites, General theory courses are acceptable substitutes for Honours theory courses according to the following schedule: As substitute for ECON 2700, ONE of the following conditions must be satisfied: (i) grades of B or better in each of ECON 2450 and ECON 2460; (ii) a grade of A or better in ECON 2450. As substitute for ECON 2800, ONE of the following conditions must be satisfied: (i) grades of B or better in each of ECON 2470 and ECON 2480; (ii) a grade of A or better in ECON 2470.

⁶ To meet a minimum required background in mathematics, Single Honours students must complete 6 credit hours in Mathematics in Year 2 (or Year 3 with departmental approval). Students contemplating entering the Single Honours Program in Economics are advised to take the Mathematics requirement in their first year of studies. Students contemplating graduate work in Economics should refer to the notes above "Preparation for Graduate Studies."

⁷ Students contemplating Double Honours in Economics and Mathematics are advised to consult the Department of Economics for specific details.

⁸ A maximum of 6 credit hours at the 1000 level may be used towards a Major, Minor or Honours Program.

7.9.1 Program Information

English literature connects us in vital ways to times, places, and cultures, including our own; engages us in important moral and social questions; encourages us to reflect upon the capacities of the human mind and imagination; invites us to probe connections between language, form, structure, and meaning; and entertains, surprises, shocks, and moves us. Through its offerings of courses in contemporary and historical literature and in creative writing, our program promotes the study of English from this wide range of perspectives.

For entry, continuation and graduation requirements for the General Degree, Advanced Degree and Honours Degree, see Section 4: Basic Faculty Regulations for the Three Programs Leading to a B.A.

7.9.5 Program Information

Film is the most important popular culture art form of the twenty-first century. Our knowledge and perception of the modern world is shaped by film or its related media — video and television. Film is a social, cultural, and historical document that, in addition to being worthwhile for study as an artistic medium, also shares issues with philosophy, sociology, political studies, and other disciplines. Instructors include people who have made and written about films and who are well prepared to discuss film history, film as cultural artifact and the connections between film and other disciplines.

For entry, continuation and graduation requirements for the General Degree, Advanced Degree and Honours Degree, see Section 4: Basic Faculty Regulations for the Three Programs Leading to a B.A.

Students will study dramatic expression, dramatic writing, and become part of the Black Hole Theatre Company, which stages 7 or 8 productions each year.

For entry, continuation and graduation requirements for the General Degree, Advanced Degree and Honours Degree, see Section 4: Basic Faculty Regulations for the Three Programs Leading to a B.A.

7.19.1 Program Information

The linguistics approach to language is based on the analysis of sound, the structure of words and sentences, and the meanings they transmit. But it also has to deal with the way sounds change, words come and go, and meanings shift. Linguistics is the humanities discipline that is closest to being a science in the generally accepted sense of the word. Partly because human language, the subject of linguistics, is almost entirely acquired sub-consciously, it is a massive and intricate structure that is free to develop in

accordance with natural rather than with consciously determined social laws.

For entry, continuation and graduation requirements for the General Degree, Advanced Degree and Honours Degree, see Section 4: Basic Faculty Regulations for the Three Programs Leading to a B.A.

Major Program

For entry to the Major, the prerequisite is a grade of "C" or better in LING 1200 or written consent of the department head. For students who have taken additional courses toward the Major, then a minimum cumulative GPA of 2.00 is required on all courses including the higher grade of repeated courses and excluding failed courses.

A minimum cumulative GPA of 2.00 in all courses that comprise the Major is required to graduate including the higher grade of repeated courses and excluding failed courses.

Minor Program

For entry to the Minor, the prerequisite is a grade of "C" or better in LING 1200, or written consent of the department head.

Other

In addition to its core concentration in *Linguistic Theory and Analysis* and such other areas of study as Applied Linguistics, Verbal Arts, etc., Linguistics also offers:

- A pre-professional concentration in *Applied Linguistic Science*, which will be of special interest to students planning a career in speech/language pathology; contact department general office for information; and
- A program in American Sign Language/English Interpretation, offered jointly with Red River College; see below for details.

Students intending to Major in Linguistics are strongly encouraged to undertake the in-depth study of a second language.

7.19.3 Linguistics Course Descriptions

For prerequisite, corequisite and course availability information, see Section 4.6: Prerequisite, Corequisite, and Course Availability.

LING 1200 Introduction to Linguistics Cr.Hrs.6 (Formerly 126.120) Language as a communication system composed of sound, grammatical and semantic subsystems. Development of a theoretical framework. Exercises in a variety of languages.

LING 1340 Semantics Cr.Hrs.3 (Formerly 126.134) An introduction to linguistic approaches to meaning, with special emphasis on the analysis of lexical domains.

LING 1360 Languages of Canada Cr.Hrs.3 (Formerly 126.136) A survey of languages and linguistic problems encountered in North America, with particular attention to questions of relationship and classification. Examples will be drawn from both indigenous and immigrant languages.

LING 1380 General Phonetics Cr.Hrs.3 (Formerly 126.138) The articulatory and acoustic analysis of speech sounds. Transcription exercises in a variety of languages.

LING 1420 Language and Gender Cr.Hrs.3 (Formerly 126.142) In exploring the relationship between language and gender, this course addresses such questions as: how are gender differences manifested and perpetuated through language use?; is there such a thing as "women's language"?; how do gender differences influence communication between women and men?; how does gender interact with (for example) race, class and sexuality with respect to language use? In addition, we consider issues of language structure, including sexism in English and the relative success of gender-based language reform efforts.

LING 1440 Rules of English Grammar Cr.Hrs.3 (Formerly 126.144) What are the criteria that are used to distinguish "good" from "bad" grammar? What are the rules we need to know in order to speak and write "properly"? In focusing on basic concepts in traditional grammar, this course reviews parts of speech, the English tense system, sentence types (active vs. passive), question formation and types of embedded clauses. It examines the rules of traditional grammar and explores the linguistic structures that lie behind the rules. This course is not intended for students learning English; it presupposes native or near-native competence in English.

LING 2200 Syntax Cr.Hrs.6 (Formerly 126.220) Sentences are complex arrangements of words and other elements, and syntactic structures have long been at the

centre of theoretical controversy. A typological survey of syntactic patterns, introducing formal and functional approaches to syntactic analysis. Prerequisite: [a grade of "C" or better in LING 1200 (126.120)] or written consent of instructor.

LING 2420 Phonology Cr.Hrs.3 (Formerly 126.242) Each language relies on a finite set of distinctive sounds. Based on physical features which are universal, sound systems are language-specific, abstract structures. Prerequisite: [a grade of "C" or better in LING 1200 (126.120)] or written consent of instructor.

LING 2440 Analytic Techniques Cr.Hrs.3 (Formerly 126.244) Techniques for recognizing the structure of words and sentences in a variety of languages. The formulation of linguistic rules, especially at the interface of morphology and phonology. Prerequisite: [a grade of "C" or better in LING 1200 (126.120)] or written consent of instructor.

LING 2460 Morphology Cr.Hrs.3 (Formerly 126.246) The internal structure of words: the traditional distinction between inflection and derivation, types of word structures, word-formation rules, levels of word-formation. The relationship of morphology to phonology and syntax. Prerequisite: [a grade of "C" or better in LING 1200 (126.120)] or written consent of instructor.

LING 2600 Verbal Art Cr.Hrs.3 (Formerly 126.260) Puns, punchlines, slogans and the chant of the auctioneer are as much instances of verbal art as are rhetorical flourishes and formal literary structures. With spoken language as its major focus, this course draws on a variety of languages, sources and genres to study artistic and playful uses of language. Prerequisite: [a grade of "C" or better in LING 1200 (126.120)] or written consent of instructor.

LING 2620 Language in Society Cr.Hrs.3 (Formerly 126.262) Language is embedded in a social context: dialect variability, the choice of speech registers, the use of special-purpose languages, code-switching, sexual specialization are instances of language behaviour reflecting non-linguistic reality. Prerequisite: [a grade of "C" or better in LING 1200 (126.120)] or written consent of instructor.

LING 2640 Comparative Linguistics Cr.Hrs.3 (Formerly 126.264) Language change and its consequences; aspects of historical linguistics, language classification and linguistic prehistory. Examples from Indo-European and North American Indian languages. Prerequisite: [a grade of "C" or better in LING 1200 (126.120)] or written consent of instructor.

LING 2720 Applied Linguistics Cr.Hrs.3 (Formerly 126.272) The practical implications of linguistic analysis in such areas as the formal or informal acquisition of a second language, the establishment of standards for spoken and written usage, language maintenance and other aspects of language planning. Prerequisite: [a grade of "C" or better in LING 1200 (126.120)] or written consent of instructor.

LING 2740 Introduction to Interpretation Theory Cr.Hrs.3 (Formerly 126.274) A survey of interpretation theory, including specifics of language use and problems in the transfer of cultural context for both source and target language, the history of language awareness on the part of the interpreter, and the development of theories of interpretation. This course will draw heavily on the field of ASL/English interpretation for illustration. Prerequisite: [a grade of "C" or better in LING 1200 (126.120)] or written consent of instructor.

LING 2800 Communication Disorders Cr.Hrs.3 (Formerly 126.280) A general introduction to the major pathologies of speech, language and hearing as viewed against the background of normal linguistic structures and functions. The distinction between mechanically- and neurologically-based disorders is illustrated in terms of aetiology, diagnosis and approaches to treatment. Prerequisite: [a grade of "C" or better in LING 1200 (126.120)] or written consent of instructor.

LING 2830 Linguistic Anatomy and Physiology 1 Cr.Hrs.3 (Formerly 126.283) An intensive survey of the principal organs of speech and hearing, their embryology, and the general features of their evolutionary history. Includes a survey of linguistic aphasiology and a review of neurological deficits associated with abnormal language behaviour. Prerequisite: [a grade of "C" or better in both LING 1200 (126.120) and LING 1380 (126.138)] or written consent of instructor.

LING 2860 Language Acquisition Cr.Hrs.3 (Formerly 126.286) The study of first language acquisition based on evidence from typologically diverse languages. Prerequisite: [a grade of "C" or better in both LING 1200 (126.120) and LING 1380 (126.138)] or written consent of instructor.

LING 2880 Acoustic Phonetics Cr.Hrs.3 (Formerly 126.288) The physical principles involved in the production, propagation and reception of sound. The subjective characteristics of sounds (loudness, pitch and quality) are related to their objective parameters (intensity, frequency and spectrum). The physical methods and the types of equipment used to analyze the basic physical properties of sounds will be demonstrated. Prerequisite: [a grade of "C" or better in both LING 1200 (126.120) and LING 1380 (126.138)] or written consent of instructor.

7.20.1 Program Information

The millennium from the end of the Roman empire to the Renaissance is the formative period of European civilization. The Middle Ages and the Dark Ages were periods of human drama full of change and growth and a struggle to regain a civilized way of life. The Age of Chivalry with its crusades, the flowering of the arts and architecture, and the emergence of new philosophical concepts and ideologies found culmination in the Renaissance. For those interested in the pre-modern world, this program permits a broad approach to the subject.

For entry, continuation and graduation requirements for the General Degree, Advanced Degree and Honours Degree, see Section 4: Basic Faculty Regulations for the Three Programs Leading to a B.A.

7.22.1 Program Information

Philosophy is composed of several areas of study: these include logic, metaphysics, ethics, political philosophy, philosophy of science, philosophy of language, and aesthetics. Philosophers use the tools of rigorous logic and clear conceptual analysis. Their goal is to understand things such as the nature of reason, the physical universe, right and wrong, the human mind, and sometimes even the meaning of life. There are good arguments and bad arguments. Training in philosophy will help the student not only consider these important questions but also to improve his or her clarity of expression and ability to think critically.

For entry, continuation and graduation requirements for the General Degree, Advanced Degree and Honours Degree, see Section 4: Basic Faculty Regulations for the Three Programs Leading to a B.A.

Major Program

7.23.1 Program Information

Political Studies examines the dynamics of human interaction in which individuals and groups compete to achieve their goals. The study of politics involves a consideration of the interactions between the individual, the state, government, public affairs and public policy. Political Studies examines the dynamics of these interactions in the context of competing visions, values and interests, particularly in the pursuit of varying public goals, including the quest for political power and the control of government. Politics is thus both a study of conflict between competing interests and a study of how these competing interests achieve compromise and cooperation.

7.25.1 Program Information

We are a world religions department. Our approach is interdisciplinary and engages a wide range of human activity commonly deemed "religious," seeking to understand how religions function, how religious discourse evolves, why certain religious perspectives gain prominence and how they are contested. We research and teach about a range of religions, past and present, from around the world, investigating the languages, ethical systems, practices, organizations, and institutions within which such religions are defined, refined, rejected, or renewed. Given the diversity of this study, such theoretical and methodological questions are viewed as central to the coherence of our courses, programs, and fields.

For entry, continuation and graduation requirements for the General Degree, Advanced Degree and Honours Degree, see Section 4: Basic Faculty Regulations for the Three Programs Leading to a B.A.

For entry to the Major, the prerequisite is a grade of "C" or better in six credit hours in Religion. For students who have taken additional courses toward the Major, then a minimum cumulative GPA of 2.00 is required on all courses including the higher grade of repeated courses and excluding failed courses.

A maximum of 12 credit hours in Religion courses numbered at the 1000-level may be used toward the 30 credit hours for the Major.

A minimum cumulative GPA of 2.00 in all courses that comprise the Major is required to graduate including the higher grade of repeated courses and excluding failed courses.

In addition to courses numbered at the 1000-level, the Department of Religion offers a number of upper-level courses for which there are prerequisites; see course descriptions.

It is not necessary for students to enter the offerings in Religion by way of courses numbered at the 1000-level. Students in any year or program may register for any course in Religion provided they satisfy course and program prerequisites. With written permission of the department head students may take courses numbered at the 4000-level.

In cooperation with St. Paul's College, the Department of Religion offers an arrangement of courses with special emphasis in Catholic studies as an option for students intending to Major or Minor in Religion. 7.26.1 Program Information

Sociology examines the patterns of interaction among individuals and the group activity that emerges from such interaction. A basic premise is that

social behaviour, and society itself, cannot be fully understood simply by studying the individuals involved. Sociology has a special interest in all those intermediate forms of association between the family and the state which together comprise much of the basis for social solidarity and cohesion. Whether individuals cooperate, compete, or fight is in large measure determined by forces outside themselves, by social forces that encourage or restrain their behaviour.

Criminology is the study of the patterns and causes of crime in society and the operation of the criminal justice system. The criminology program introduces students to the dimensions of the crime problem, the theories advanced to explain the various types of crime, and the array of agencies and programs designed to prevent, control, and respond to criminal activity. Attention is also given to issues relating to women and crime, youth and crime, the sociology of law, criminal law and procedure, comparative criminology, and community policing.

7.28.1 Program Information

The program explores alternatives within society to achieve equal rights and equal treatment for both sexes. Women's and Gender Studies is necessary because of a hitherto limited understanding of the role played by women in history and contemporary society. Women's and Gender Studies explores traditional and feminist views of women, the psychology of women, women's economic roles, and their relationships to men and each other. The program is interdisciplinary in focus.

For entry, continuation and graduation requirements for the General Degree, Advanced Degree and Honours Degree, see Section 4: Basic Faculty Regulations for the Three Programs Leading to a B.A.

1.2 The Profession of Dental Hygiene

Dental hygiene is a self regulated health service profession concerned primarily with the prevention of oral disease and the promotion of optimum oral health. As a licensed professional, the dental hygienist's scope of practice is regulated by provincial legislation. The dental hygiene process of care consists of five components: assessment, dental hygiene diagnosis, planning, implementation, and evaluation. Current practice settings include: Private dental practice, community health centres, institutions (e.g., hospitals, long-term care facilities), primary health care centres, home care and other outreach programs, educational institutions (e.g., universities, community colleges), the military, research, and industry. Dental hygienists acquire competence through instruction in basic sciences, oral health sciences, the humanities and clinical practice. Through more than 600 hours of a competency-based clinical curriculum, students are prepared to meet the needs of a broad range of population groups.

The School of Dental Hygiene Mission Statement: In a dynamic environment of excellence and progressive learning, the University of Manitoba, School of Dental Hygiene prepares future dental hygienists to enhance the health and well being of the public through oral health promotion, disease prevention and therapeutic means; and are active members of the global health care community.

Practice Requirements

After successful completion of the National Dental Hygiene Certification Board Examination, in Manitoba, graduates must apply to the College of Dental Hygienists of Manitoba for a licence to practice as a dental hygienist. Dental hygienists must fulfil the requirements of the respective provincial regulatory authorities licensing bodies. The minimum educational credential for licensure in the province of Manitoba is the Diploma in Dental Hygiene. Licensed dental hygienists may continue their education by completing a Bachelor of Science Degree in Dental Hygiene.

SECTION 2: Admission Requirements

2.1 Diploma in Dental Hygiene

The following is a summary of the admission requirements. Equivalent academic courses completed at recognized universities elsewhere will be considered. All admission requirements, as well as application deadline dates and forms, are included in an applicant information bulletin that is available from the Admissions Office, Enrolment Services, 424 University Centre; this information is also posted on the university's website.

ENGL 1310

CHEM 1300 and CHEM 1310 or CHEM 1320

PSYC 1200

BIOL 1410 and BIOL 1412

STAT 1000

6 credit hours of electives (Sociology is strongly recommended) for a total of 30 credit hours.

Other Requirements

High school prerequisites: REQUIRED: Mathematics 40S (pre-calculus or applied), Chemistry 40S; and Biology 40S, or eligibility as a mature student to the University of Manitoba.

Interview: An interview may be part of the admission process.

Minimum GPA for consideration: 3.00 with no grade less than C, with the exception of English which requires the minimum grade of B. Admission is competitive.

Selection criteria: 100 per cent based on academic standing for the Regular Applicant Category. Interview and Letters of Reference are considered within the Special Applicant Category. Preference will be given to Manitobans in the Special Applicant Category and on the alternate list.

It is recommended that all applicants attend an orientation session. Orientation for dental hygiene takes place at the School of Dental Hygiene, Banatyne Campus.

2.2 Bachelor of Science in Dental Hygiene, Degree Completion Program

The program will be available to dental hygiene diploma graduates of the University of Manitoba or other accredited dental hygiene educational institutions wishing to complete requirements for the baccalaureate degree on a full-time or part-time basis. Transfer of credit for courses completed at other institutions will be possible through appropriate University procedures. The School will evaluate credits from other institutions on an individual basis. It is advised that the majority of pre-requisite/elective courses are completed prior to admission to the program as the Program Fee for the Bachelor of Science in Dental Hygiene (B.Sc.D.H.) program does not include registration in courses administered outside of the School of Dental Hygiene (non-core HYG courses). In the selection process, preference will be given to students who have completed the majority of their pre-requisite courses prior to application.

Admission to the degree completion program requires of students that:

- They must possess a Diploma in Dental Hygiene from either a university or community college program accredited by either the Commission on Dental Accreditation of Canada or the American Dental Association's Commission on Dental Accreditation.
- They must possess the National Dental Hygiene Certification Board (NDHCB) Certificate
- They must hold current licensure to practice dental hygiene in Canada and be eligible for licensure in Manitoba.
- They must be interested in the pursuit of a career in education, research or community health; this component will require the submission of a 1-2 page paper detailing the applicants career goals in relation to the B.Sc.D.H. degree program.
- In the event of a surplus of qualified applicants, GPA's, interviews, letters of reference and/or other selection strategies to be determined by a Bachelor of Science in Dental Hygiene Committee on Selection, will be employed to select the class. (Candidates will be given notice of any additional requirements to the selection process if such a surplus occurs.)

All Diploma/Associate Degree Dental Hygiene graduates will be granted the equivalent of 75 credit hours for their Diploma in Dental Hygiene if their Diploma/Degree has been granted by an accredited Dental Hygiene program in Canada or the United States.

The required minimum grade for specified prerequisite courses including electives is a C. There is a **required minimum overall grade point average of 3.0 (B) in the candidates Diploma in Dental Hygiene or Associated Degree Program.**

SECTION 3: Faculty Academic Requirements

All students are asked to note that some academic policies and regulations are under review and are subject to change. Please check the Web Calendar at umanitoba.ca for updated information.

The provisions of the chapter, General Academic Regulations and Requirements, and the chapter, University Policies, apply to all students. In addition, the School of Dental Hygiene has regulations and requirements, published below, that apply specifically to its students.

3.1 Diploma in Dental Hygiene

3.1.a Immunization and Bloodborne Diseases Policy

Note: This policy is under review. Please consult the School of Dental Hygiene for further information.

All Diploma students enrolled in dental hygiene must be immunized against the following diseases: diphtheria/tetanus, polio, rubella, measles, mumps, chicken pox and hepatitis B. Students must be tested for tuberculosis if a suspected exposure occurs. Students who cannot be immunized because of allergies or other reasons must provide a physician's certificate to verify these reasons.

Before the first day of classes all students must complete the University of Manitoba Immunization Record Form, provided by the dental hygiene of-

fice. Immunization records must be signed by a physician or nurse verifying that all immunizations are up-to-date.

All students are responsible for updating their immunizations as needed.

Students will not be permitted to attend clinics until all immunization requirements are up-to-date.

3.1.b Criminal Record/Child Abuse Registry

An adult criminal record and child abuse registry self-declaration will be required of all applicants at the time of application. A formal Adult Criminal Record Check (including vulnerable sector screening) and a formal Child Abuse Registry Check is required at the time of registration, and annually thereafter keeping in accordance with existing policies of other health, education and social service programs at the University of Manitoba.

3.1.c CPR Certification

Accepted candidates will be required to show proof of CPR certification by October 15 of each year. The CPR Certification level required by the School of Dental Hygiene is: Basic Life Support (BLS) for Healthcare Providers. This certification must be maintained on a yearly basis up to the date of graduation.

3.1.d Instruments, Computer, Textbooks and Uniforms

Diploma students must purchase a dental hygiene student kit consisting of two sets of clinical instruments and uniforms. The total cost of the kit is approximately \$6,000. Students are also required to purchase one lab coat. Some laboratory equipment is loaned by the school. In addition, students entering the School of Dental Hygiene will be expected to purchase a specified laptop computer as well as *EVOLVE* software. This expenditure is approximately \$3500 for the full two year program. These costs replace most textbook expenditures.

Student Kits are the property of Dental Hygiene students. The school is unable to accept returns of any student computer, software, kit or kit items should a student leave the school for whatever reason.

3.1.e Examinations and Promotions

Regular attendance in all courses as well as a satisfactory record completed during the term will be required to qualify a student to sit for the annual or other grading examination.

To obtain standing in any year, a student must attain a minimum Term Grade Point Average (GPA) of 2.0 in all courses of that year. If a student is registered for less than 100% of the courses listed for the year, a minimum Term GPA of a 2.0 must also be obtained.

A student who has obtained a grade of "F" in more than two subjects or who fails to obtain a Term GPA of 2.0 will be regarded as having failed the year and will be required to repeat the work of that year in a succeeding annual session. The student must re-apply for admission to the school if the failed year is the first year.

No student will be allowed to register for the full work of any one year who has a condition remaining from a previous year.

Students are prohibited from interviewing individual members of the school with reference to examination standing at any time prior to the posting of official grade lists.

For details on final examinations, see the Chapter General Academic Regulations and Requirements of this Calendar.

For appeals process, see the Chapter General Academic Regulations and Requirements.

For a description of the grading system, see the Chapter General Academic Regulations and Requirements.

3.1.f Supplemental Examinations

A student who has failed in not more than two subjects at the regular final examinations of any year, or who fails to obtain a Term GPA of 2.0 in courses of the year, may upon application and at the discretion of the Dental Faculty Council be awarded the privilege of one or two supplemental examination(s).

The Faculty Council will specify in which subjects the student may write supplemental examinations. The passing grade in supplemental examinations is "C" in each subject.

A student must maintain a minimum Term GPA of 2.0 each year in order to be eligible for supplemental privileges.

A student who, having exercised supplemental privileges, has not more than one condition remaining, may in the ensuing annual session, be allowed to take only that one course in the Dental Hygiene program. If the condition is removed in that session, the student will be regarded as having completed the year to which the condition applied.

Supplemental examinations are held prior to the opening of the session in the autumn, and application must be made to the Registrars Office no later than those deadline dates listed in this Calendar.

3.1.g Challenge for Credit

There are a number of courses which may be challenged for credit. Information on the specific courses involved may be obtained from the director of the School of Dental Hygiene. Requests for course challenge must be received prior to the commencement of the term in which the course will be offered.

3.1.h Honours and Awards

Dean's Honours: awarded to students in each year of the dental hygiene Diploma program who have achieved a minimum sessional (fall & winter term combined) G.P.A. of 3.8. In addition, only students registered for 80 per cent or more of the normal course load during a regular session are eligible for Honours Standing.

A student who fails in one or more subjects, or who fails the year at the regular final examination, is not eligible to obtain Honours Standing or to receive any awards for the work of that year.

A student repeating a year's work is not eligible to obtain Honours Standing or to receive any awards for the work of that year.

The following policy applies to the eligibility of part-time students for academic awards:

A student who is carrying less than 80 per cent of the normal course load for the year is only eligible for an award in the individual subjects taken by him/her.

A student who is repeating a course may not be eligible for an award in that subject.

4.2 Bachelor of Science in Dental Hygiene, Degree Completion Program

Accredited dental hygiene programs in Canada and the U.S. have been traditionally offered as either stand-alone two year programs with direct entry from high school, or as two-year programs requiring a pre-professional year of studies prior to admission into the professional program. In order to pro-

vide access to a broad range of potential degree completion students, two options have been developed.

Option A. This option is for those graduates of accredited dental hygiene programs who have completed a pre-professional year prior to entry into their dental hygiene program.

Dental hygienists from the University of Manitoba who graduated between 1993 and 2007 must complete 21 credit hours

Dental hygienists from the University of Manitoba who graduated after 2007 must complete 19 credit hours

Graduates of other (non-University of Manitoba) dental hygiene programs who completed a pre-professional year prior to entry into their dental hygiene program, may be granted up to 15 credit hours from the pre-professional year and 75 credit hours from the 2-year dental hygiene program towards their degree. These graduates will be required to complete 30 hours of University of Manitoba credits in order to complete the degree and satisfy the residency requirement.

Option B. Dental hygienists who are graduates of accredited two year programs without the pre-professional year, must complete the 21 credit hours as described below plus 24 credit hours of free-choice electives. This requirement applies to graduates from the University of Manitoba (prior to 1993) as well as other accredited two-year dental hygiene programs in North America with no pre-professional year. As in Option A, the residency requirement of 30 credit hours for those non-University of Manitoba graduates will be upheld.

University of Manitoba Graduates

Students with diplomas in dental hygiene from the University of Manitoba will complete 19 credit hours if they graduated after 2007 and 21 credit hours if they graduated between 1993 and 2007. Dental hygienists who graduated from the University before 1993 will complete 24 credit hours of electives in addition to 21 dental hygiene baccalaureate credit hours (total 45).

Year of Graduation (U of M)	Pre-Professional Year	Total Dental Hygiene Program Credit Hours Granted	Option	Credit Hours for BScDH Completion	Total BScDH Credit Hours
After 2007	Yes	1 + 2 years (30 + 71 = 101 Credit Hours)	Option A	1 year (19 Credit Hours)	120 credits hours
Between 1993 and 2007	Yes	1 + 2 Years (30 + 69 = 99 Credit Hours)	Option A	1 year (21 credit hours)	120 credit hours

1.2 The Profession of Dentistry

The Faculty of Dentistry is dedicated to educating dental, dental hygiene and graduate students in a progressive learning environment, conducting research in oral health, and serving the community and the oral health professions as a source of knowledge and expertise. The faculty serves as a bridge between the fundamental scientific foundation of the profession and its translation into health care for the public. Dentists enhance and promote the total health of patients through oral health management. Dentists are concerned with promoting oral health and preventing and alleviating the effects of oral diseases and conditions in order to contribute to the well-being of their patients.

The curriculum is designed to ensure that students graduate as competent dentists prepared to meet the oral health care needs of their patients. It provides the knowledge of basic biomedical, behavioural and clinical sciences and biomaterials, the cognitive and behavioural skills, and the professional and ethical values necessary for practice as a dental professional.

Information on the Dental Hygiene program is in the chapter, School of Dental Hygiene.

Licensing Requirements

A graduate of the Faculty of Dentistry is entitled to apply to the Manitoba Dental Association to obtain a license to practice within the province of Manitoba. For information on licensing requirements and the application process please contact: The Registrar, Manitoba Dental Association, 103 698 Corydon Avenue, Winnipeg, Manitoba R3M 0X9; telephone (204) 988 5300.

National Examining Body

Graduates of this faculty are required to sit a written examination and an objective structured clinical examination during the calendar year of their graduation, administered by the National Dental Examining Board of Canada. The NDEB certification granted to graduates who pass these examinations, entitles them to apply for a license to practice in all provinces of Canada. The provinces of Ontario and Quebec have additional requirements. For information contact: The Registrar, National Dental Examining

Board, 203 - 100 Bronson Avenue, Ottawa, Ontario K1R 6G8; telephone (613) 236 5912.

Other Licensing Bodies

For regulations governing licensure in other areas (e.g., other provinces, the United States), candidates are advised to write the licensing body in the province/state in which they are interested.

SECTION 2: Admission Requirements

The following is a summary of the admission requirements. Equivalent academic courses completed at recognized universities elsewhere will be considered. All admission requirements, as well as application deadline dates and forms, are included in an application bulletin that is available from the Admissions Office, Enrolment Services, 424 University Centre; this information is also posted on the university's website (umanitoba.ca/dentistry).

After University 1, most students choose the Faculty of Science because the pre-Dentistry requirements easily fit Science degree programs.

Minimum 60 credit hours of pre-Dentistry study including:

BIOL 1020 and 1030

CHEM 1300 and CHEM 1310

CHEM 2210 and 2220

6 credit hours of English

24 credit hours of electives, 6 of which must be in the non-applied sciences or non-pure sciences.

All science courses must include the laboratory component.

Other requirements

High school prerequisites: Chemistry 40S, Mathematics 40S, Physics 40S and Biology 40S.

The 6 credit hours of English satisfies the written English requirement; the mathematics requirement must be met in the first 60 credit hours even though it is not a specific admissions requirement.

The English Canadian Dental Aptitude Test (DAT) must be written.

A personal interview is required.

Admission is competitive.

Information on the admission process may be accessed through the Faculty of Dentistry's web page (umanitoba.ca/dentistry) or by requesting an Information Application Bulletin from either the Faculty of Dentistry or the University of Manitoba Admissions Office (Enrolment Services)

Selection criteria: Grades, interview and DAT score equally weighted.

2.2 Bachelor of Science in Dentistry

In addition to the basic professional degree, the faculty offers the Bachelor of Science in Dentistry to interested dental students wishing to undertake research during their undergraduate program. The program is designed to assure that participation in it will not interfere with the student's dental degree. Through active participation in a research program, the students will be given the opportunity to develop skills in applying scientific knowledge to dental practice and an interest in dental research. In addition, the program will serve as a preparatory step for entry into various graduate programs. Information on admission to this program is available from the Dean's Office and through the Faculty of Dentistry's web page (umanitoba.ca/dentistry).

2.3 International Dentist Degree Program (IDDP)

The Faculty of Dentistry, University of Manitoba, offers the International Dentist Degree Program (IDDP) to a maximum of 7 graduates of international dental programs that are not accredited by the Commission on Dental Accreditation of Canada. After a 6 to 8 week summer orientation program, students enter the 3rd year of the regular dental program of the Faculty. Upon satisfactory completion of the 3rd and 4th years of the dental program, IDDP participants will be awarded the Doctor of Dental Medicine (DMD) degree. All graduates of DMD programs in Canada, once having passed the National Dental Examining Board of Canada (NDEB)

examinations, are eligible for licensure/registration as a dentist in all provinces in Canada.

Requirements for admission/entrance to the IDDP program include: the successful completion, within two years prior to the application deadline, of the Eligibility Examination, sponsored by the Associations of the Canadian Faculties of Dentistry (ACFD); submission of notarised official transcripts of diploma and dental school grades; letters of good standing from appropriate licensing body; autobiographical sketch; names and addresses of three references and a CV (resume).

Applicants, who have not completed Junior and Senior High School (6 years) in North America, must also complete an English language requirement (For further information please see the IDDP Applicant Information Bulletin available at the Dean's Office, or on-line via umanitoba.ca/dentistry/IDDP).

Competitive applicants in a given competition will be invited to an On-site Assessment held over a five day period at the Faculty of Dentistry. This assessment will, normally, be held mid-December preceding entry into the program. This assessment consists of a personal interview, a psychomotor skills assessment and an Objective Structured Clinical Examination (OSCE).

Information on admission to this program is available from the Dean's Office and through the Faculty of Dentistry's web page (umanitoba.ca/dentistry/IDDP).

SECTION 3: Faculty Academic Regulations

All students are asked to note that some academic policies and regulations are under review and are subject to change. Please check the Web Calendar at umanitoba.ca for updated information.

The provisions of the chapter, General Academic Regulations and Requirements, and the chapter, University Policies, apply to all students. In addition, the Faculty of Dentistry has regulations and requirements, published below that apply specifically to its students.

3.1 Instruments Computers and Textbook Software

Students entering the Faculty of Dentistry will be expected to own or purchase a laptop computer and Vital Source Technology software. This expenditure may be approximately \$3500 within the first year of the program if the laptop computer has to be purchased. Each following year of the program, students will be required to purchase additional software licensing/updates for a cost of approximately \$900/ year. These costs replace former textbook expenditures.

Each student, on registering, will be provided with a microscope. Otherwise, students are responsible for the purchase of instruments as may be necessary or required. Over the four years of dentistry, the cost of such instruments is approximately \$30,000 (see fee schedule); the bulk of the expenditure is incurred in the first two or three years. Dental Kits are the property of Dental students. The faculty is unable to accept returns of any student computer, software, kit or kit items should a student leave the faculty for whatever reason.

3.2 Criminal Record/Child Abuse Registry

An adult criminal record and child abuse registry self-declaration will be required of all applicants at the time of application. A formal Adult Criminal Record Check (including vulnerable sector screening) and a formal Child Abuse Registry Check is required at the time of registration, and annually thereafter keeping in accordance with existing policies of other health, education and social service programs at the University of Manitoba.

3.3 Immunization and Bloodborne Diseases Policy

Note: This policy is under review. Please consult the Faculty of Dentistry for further information.

All students enrolled in the Faculty of Dentistry must be immunized against the following diseases: diphtheria/tetanus, polio, rubella, measles, mumps, chicken pox and hepatitis B. Students must be tested for tuberculosis if a

suspected exposure occurs. Students who cannot be immunized because of allergies or for other reasons must provide a physician's certificate to verify these reasons.

Before the first day of classes, all students must complete the University of Manitoba Immunization Record Form provided by the Admissions Office. A physician or nurse must sign immunization records. All students are responsible for updating their immunizations as needed.

Students will not be permitted to attend clinics until all immunization requirements are up-to-date.

3.4 CPR Certification

Accepted candidates will be required to show proof of CPR certification by October 15 of each year. The CPR Certification level required by the Faculty of Dentistry is: [Basic Life Support \(BLS\) for Healthcare Providers](#). This certification must be maintained on a yearly basis up to the date of graduation.

3.5 Attendance

See the chapter, General Academic Regulations and Requirements. The Faculty of Dentistry has additional regulations that can be found in the Student Handbook, available on-line via the Faculty's web page (umanitoba.ca/dentistry).

3.6 Voluntary Withdrawal

Students intending to withdraw from a portion or all of their courses must report immediately in person or in writing to the Dean's Office. No fees will be refunded without the authorization of the dean. **Please Note: Computer Software, Computers and Kit fees are non-refundable.** See also the chapter on General Academic Regulations and Requirements.

Students who withdraw from the Faculty of Dentistry without notice will be considered to have terminated their connection with the faculty. If a subsequent application for registration is approved, they will be required to conform to the rules and regulations, fee schedules, sequence of courses, etc., in effect at the time of such subsequent application.

In cases where a student is obliged to withdraw after the final date of withdrawal published in the *Calendar* because of ill health or other sufficient reasons, their cases will be considered by the dean of the faculty.

3.7 Required Withdrawal

The Senate of the university has approved bylaws granting certain faculties and schools the authority to require a student to withdraw on the basis of unsuitability for the practice of the profession to which the program of study normally leads. Senate has approved such a bylaw for the Faculty of Dentistry, and is available from the Dean's Office.

3.8 Decisions Concerning Academic Promotions

The letter grade "D" is the lowest acceptable level of performance in each undergraduate course leading to the degree of D.M.D. when the work of any given year is being taken for the first time. (In the case of a repeated year, the minimum passing grade in each course is "C".)

A student who has a failing grade registered against him/her may not register for the program of the subsequent year, but may, at the discretion of Dental Faculty Council, be permitted to repeat the failed year.

A minimum term GPA of 2.0 in each year is required to qualify a student for standing in that year.

A student who fails to obtain a minimum term GPA of 2.0 and who is not granted supplemental privileges will be considered to have failed the year.

Except by special permission of Dental Faculty Council, no student may repeat more than one year in Dentistry, nor may any year be repeated more than once.

The work requirements of any repeated year may be modified, even increased, at the discretion of the Dental Faculty Council.

The passing grade in each course of a repeated year in Dentistry is "C".

If a student receives an "F" grade in a fourth year clinical course, they will be required to register and pay a fee for the entire repeated year, and the

work in that year may be modified or even increased by Dental Faculty Council.

3.9 Incomplete Standing in the Faculty of Dentistry

The incomplete "I(F)" designation is restricted to clinical courses.

Successful completion of course requirements is through extended clinics rather than supplemental assessment.

A student who is unable to complete the quantitative clinical requirements in a course by the end of the academic year may apply for an incomplete grade classification ["I(F)"] and extension of time. Details of this application procedure can be found in Dentistry's "Student Handbook" (on-line).

3.10 Supplemental Examinations

A "Supplemental Examination" is an examination which may be offered as a privilege to a student who has failed a course or failed to achieve a satisfactory result. Such examinations are offered in order to grant the student an opportunity to rectify the inadequacy without repeating the course.

Information on Supplemental Examinations can be found in the chapter, General Academic Regulations and Requirements at the beginning of this *Calendar*. Specific information on The Faculty of Dentistry's supplemental privileges can be found in Dentistry's "Student Handbook" (on-line)

3.11 Honours and Awards

Dean's Honour List: awarded to students in each year of the dental program who have achieved a minimum sessional (fall & winter term combined) G.P.A. of 3.8.

To qualify for Graduation with Honours, a candidate for the D.M.D. degree must qualify for the Dean's Honour List in both third and fourth year.

A student who repeats a year at his/her own request, i.e., not at the request of Dental Faculty Council, is not eligible for the Dean's Honour List or to receive any awards for the work in that repeated year.

The following policy applies to the eligibility of part-time students for academic awards: in allocating any award, the only academic performance of a student to be considered is that attained during the year(s) for which the award is made. Therefore, a part-time student is not eligible for any purely academic award, other than one in an individual course. However, a part-time student who is carrying 80 per cent or more of the normal course load for the year is eligible for any award where conditions other than academic merit apply, and further, subject to the provisions set forth above, any part-time student is eligible for any award in the individual courses taken in the year for which the award is made.

3.12 E-Mail Accounts

All students are expected to have an e-mail account with the University of Manitoba and check it regularly. The Faculty of Dentistry does not support communications with its students through external e-mail addresses.

3.13 Financial Aid

A number of loan and bursary funds, including 12 bursaries for first year students, are available to dental students. Applications and further information are available in the Dean's Office (late September).

3.14 Registration Exceptions

Students who have a failing grade/s registered against them and/or have other outstanding academic matters (i.e. deferred or supplemental examinations, modified program, etc.) in regards to the previous academic session will not be allowed to register using Aurora Student. Students who fall into this category should contact the student advisor for further information. A student advisor is available in D028 Dental Building or by calling (204) 789-3484.

The educational objective of the Faculty of Education is to prepare students for a career in the teaching profession. Attaining the B.Ed. degree leads to professional certification by Manitoba Education and the opportunity to attain initial employment as a classroom teacher in Manitoba and elsewhere. Those desiring other roles in education can achieve the professional requirements via the Post Baccalaureate Diploma in Education (PBDE) or graduate degrees in education (M.Ed. or Ph.D.).

1.1.1 After Degree Bachelor of Education: Early Years, Middle Years (Including a Weekend College Middle Years Scheduling Option) and Senior Years

Following a first degree, the After-Degree Bachelor of Education program consists of 60 credit hours (two years) of course work taken within the Faculty of Education and leads to general certification and a Bachelor of Education degree. The Weekend College Middle Years scheduling option takes three years of study to complete 60 credit hours. Special Consideration Category (currently under review)

The Faculty of Education has a Special Consideration Category. The Faculty recognizes the importance of providing the highest quality of education to all students in Manitoba via a teaching force that is fully representative of the cultural, ethnic and racial diversity of the province.

As the largest teacher education institution in the province, the Faculty recognizes its responsibility to facilitate the development of such a teaching force.

Furthermore, the Faculty recognizes the need to ensure that its recruitment and admission policies and procedures do not inappropriately obstruct the achievement of such a goal, but rather actively promote its attainment.

In keeping with the above, the Faculty will admit up to 10 percent of the After Degree B.Ed. applicants under this category. The Special Consideration Category includes: Canadian Aboriginal peoples, members of a visible minority or persons with disabilities.

Canadian Aboriginal Peoples – An aboriginal person is either one who by birth is a Registered Indian as provided for in the Indian Act, or who is an Indian person without legal status by the Indian Act, or who is a Métis, or who is an Inuit person.

Visible Minority – Persons other than Aboriginal Peoples who, because of their colour, are a visible minority in Canada.

Persons with Disabilities – Persons with disabilities are those who would consider themselves disadvantaged by reason of any physical, intellectual, mental, sensory or learning impairment.

All admission requirements are described in detail in an admissions bulletin that includes application deadline dates and application forms. This material is available from the Faculty of Education, 230 Education Building, or Enrolment Services, 424 University Centre or their website at: umanitoba.ca/student/admissions/application/deadlines/education/.

3.1.1 Adult Criminal Records and Child Abuse Registry

The Minister of Education for the Province of Manitoba requires that background checks be conducted on all candidates for teacher education in Manitoba and on all applications for certification for this province. Accordingly, all applicants offered admission to Bachelor of Education programs will be required to complete the "Adult Criminal Records Self-Declaration" form as a condition of final acceptance to the program. Only adult

criminal records must be disclosed, and the existence of such a record will not automatically exclude applicants.

In addition to the above self-declaration all successful applicants will be conditionally admitted pending clearance of an official Criminal Record Search and clearance from the Child Abuse Registry. Failure to clear or failure to provide these documents by the stated deadline will result in admission offer being revoked.

Applicants should also be aware that the Professional Certification Unit will also require students graduating from the Bachelor of Education program to undergo a criminal record check, including vulnerable sector screening as part of the certification process. Information on the Adult Criminal Records Self-Declaration is included in the admission bulletin available from the Enrolment Services/Admissions, 424 University Centre and the website: umanitoba.ca/student/admissions/application/education/.

SECTION 5: The Academic and Professional Bridging Program for Internationally Educated Teachers (IET Program)

(currently under review)

The provisions of the chapter, General Academic Regulations and Requirements, and the chapter, University Policies, apply to all students. In addition, the Faculty of Education has regulations and requirements, published below, that apply specifically to its students.

The IET Pilot Program is intended to serve internationally educated teachers who have applied to the Manitoba Education Professional Certification Unit and have received official notification that they require additional university coursework to be certified to teach in Manitoba. The program will admit up to 12 applicants.

Courses and workshops will be held in the Education Building at the University of Manitoba. In-school experiences will take place in middle years (Grades 5-8) schools within one or more School Divisions in Winnipeg. The time to complete the program will depend on the number of courses required by the Manitoba Education Professional Certification Unit.

In order to be admitted to the program, and IET student must:

- be a permanent Manitoba resident;
- be a graduate of a degree program from an accredited university recognized by the University of Manitoba with a minimum overall grade point average of 2.0;
- have received a written evaluation of teaching credentials from the Manitoba Professional Certification Unit. The assessment must conclude that additional coursework in Education is required to be certified to teach in Manitoba;
- have successfully passed the Canadian Test of English for Scholars and Trainees (CanTEST)

SECTION 6: Academic Regulations for Bachelor of Education

The provisions of the chapter, General Academic Regulations and Requirements, and the chapter, University Policies, apply to all students. In addition, the Faculty of Education has regulations and requirements, published below, that apply specifically to its students.

6.1 Academic Regulations for All Bachelor of Education Programs (currently under review)

(See also sections 6.2, 6.3)

Academic Requirement for Graduation (currently under review)

A Degree Grade Point Average (DGPA) of 2.0 is required for graduation in the Bachelor of Education.

Academic Standing (currently under review)

A minimum Degree Grade Point Average of 2.0 must be maintained in the Bachelor of Education for clear standing. A grade of "C" is considered a passing grade for Education courses.

Additional Academic Considerations

Each student in the Faculty of Education is presumed to be generally suited to a teaching program. Should this prove not to be the case, the Faculty reserves the right, at any time, to require a student to withdraw from the Bachelor of Education degree program. Unsatisfactory performance in School Experience courses may be considered reason to require a student to withdraw from the faculty. See *Professional Unsuitability By-Law* in this section.

Appeal Procedures

The general university policy for appeal of assigned grades applies to the Faculty of Education. See the chapter, General Academic Regulations and Policy, of this Calendar, Appeals of Assigned Grades. Information about admission decision appeals may be found in the chapter, Admissions.

Application Deadline for School Placement

Returning students planning to take School Experience (EDUB 1960, EDUB 1970, EDUB 1980, EDUB 2960, EDUB 2970 or EDUB 2980) during the upcoming Regular Session must make application for a School Placement no later than February 1. Forms will be available from the Student Services Office, Room 230 Education Building, Faculty of Education beginning December 15. Failure to apply for School Placement by February 1 may result in students being denied a placement.

Integrated B.Mus./B.Ed. students planning to take School Experience (EDUB 1940, EDUB 1950) during the Summer Session must make application for a School Placement no later than November 1. Forms will be distributed in mid-October. Failure to apply for School Placement by November 1 may result in students being denied a placement.

Assessment of Student Academic Performance (currently under review)

Academic performance is assessed at the end of each regular term in which the student is registered on all courses that are used for credit towards the B.Ed. degree.

Based on the Grade Point Average attained in these courses, the following decisions with respect to the student's eligibility to continue as a Faculty of Education student will be made. Normally,

- The student with a minimum of 2.0 is eligible to proceed;
- The student with a 1.5 to 1.99 is placed on academic probation; and
- The student with less than 1.5 is placed on academic suspension.

Academic Probation

Students placed on academic probation must attend an interview in the faculty prior to being permitted to re-register. During the next regular session, students must re-establish a Degree Grade Point Average of 2.0 or better. Normally, students on probation who fail to raise the DGPA to at least 2.0 will be placed on academic suspension.

Academic Suspension

Students who are placed on academic suspension may not register at the university for one year. Following this period, students wishing to pursue a Bachelor of Education degree, must enroll in another faculty, raise their Degree Grade Point Average, and then re-apply for admission to the Fac-

ulty of Education. Re-admission to the program will be subject to compliance with existing program regulations.

Attendance at Class

Regular attendance is expected of all students in all courses. An instructor can initiate procedures to debar a student from attending classes and from final examinations where unexcused absences exceed three hours of scheduled classes in any one term.

Continuing Students

See the chapter, University of Manitoba Admissions.

Dean's Honour List (currently under review)

Students registered in a minimum of 12 credit hours within a single term and who achieve a Term Grade Point Average of 3.5 or better will be included in the Dean's Honour List. Grades for coursework taken on a letter of permission and used towards the Bachelor of Education degree will be used in meeting the eligibility requirements for the Deans Honour List.

Students receiving failing grades in education coursework where such coursework is required to earn the Bachelor of Education degree and/or student teaching will not be eligible for the Dean's Honour List.

Debarment

See the chapter, General Academic Regulations and Requirements, Attendance at Class and Debarment.

Degree with Distinction (currently under review)

A student graduating from the Bachelor of Education program will have the degree granted "With Distinction" if a minimum Degree Grade Point Average of 3.80 has been attained on all courses that are used for credit towards the B.Ed. degree. This distinction will be noted on the parchment and on the student's transcript.

Gold Medal

The Gold Medal is awarded each year to the B.Ed. graduate who has the highest Grade Point Average (minimum 3.75) in the last 60 credit hours of the B.Ed. degree and who has completed at least 80 per cent of what is considered to be the normal full course load in each of the last two years of the program.

Grading Scale

Effective in 2000-2001 academic session, the Faculty of Education adopted the following grading scale:

Letter Grade	Grade Point	Level of Achievement	Percentage Range
A+	4.50	Exceptional	95 and above
A	4.00	Excellent	90-94
B+	3.50	Very Good	85-89
B	3.00	Good	80-84
C+	2.50	Satisfactory	75-79
C	2.00	Adequate	70-74
D	1.00	Marginal	60-69
F	0.00	Failure	Below 60

Incompletes

See the chapter, General Academic Regulations and Requirements, Academic Evaluation.

5000-level courses

Students enrolled in the B.Ed., the Integrated B.Mus./B.Ed. or the IET program are not permitted to take 5000-level courses.

Part-Time Programs

Opportunities for part-time study are available in all streams as well as the integrated programs. In any of the program streams, the curriculum and instruction courses and the practicum experience for each year must be taken concurrently. All Year 1 course requirements must be completed before proceeding to Year 2. Integrated B.Mus./B.Ed. students must complete Years 1 to 4 inclusive before proceeding to Year 5. When exceptions are permitted, they would normally only be allowed as a result of scheduling conflicts, unavailability of courses scheduled on a rotating basis, compassionate grounds or other exceptional circumstances. Part time students should note that not all curriculum and instruction courses are offered every year.

Students can begin part-time studies in the first year provided they successfully complete 3 credit hours of Education coursework from the Year 1 program requirements.

Professional Unsuitability By-Law

The Senate of the University has approved a by-law granting authority to the Faculty of Education to require a student to withdraw from the Faculty for reasons of professional unsuitability. A student may be required to withdraw from the Faculty when, at any time, the Professional Unsuitability Committee has determined that the student is unsuited, on consideration of competence or professional fitness, for the practice of teaching.

Copies of this by-law may be obtained from the Faculty of Education website.

Repeating a Course (currently under review)

Required courses which receive a grade of "F" must be repeated. Complementary courses which receive a grade of "F" must be repeated or replaced with other complementary courses. Courses which receive a "D" grade may be repeated; however, courses in which a grade of "D" or higher is obtained may only be repeated with the consent of the Associate Dean, Undergraduate Programs. Education courses may only be repeated once. When a course is repeated, the last grade achieved will be used in calculating the Degree Grade Point Average.

Early Years and Middle Years students who fail a school experience course will normally be required to repeat all of the Curriculum and Instruction courses related to that year's practicum.

Weekend College Middle Years students who fail Curriculum and Instruction course(s) may not be able to complete their program through this scheduling option, given that a new intake is every other year.

Senior Years and Integrated B.Mus./B.Ed. students who fail a school experience course will normally be required to repeat the Curriculum and Instruction courses associated with that practicum. Students who fail a Curriculum and Instruction course will normally be required to repeat the practicum course associated with that curriculum area.

Statute of Limitation

The normal maximum time allowed for the completion of the B.Ed. degree is six years from the date of admission. (This regulation applies to those admitted September, 2002 or later.)

Supplemental Examinations

Supplemental examinations are not permitted in education courses.

University Written English and Mathematics Requirement for Students in the Integrated B.Mus./B.Ed..

All students admitted since September, 1997, are required to complete the university written English and Mathematics requirement. This requirement is described in the chapter, General Academic Regulations and Requirements.

Voluntary Withdrawals

See the chapter, General Academic Regulations and Requirements.

Authorized Withdrawals (AWs) may be permitted on medical or compassionate grounds, subject to satisfactory documentation. Students must contact an Education Student Advisor to initiate an authorized withdrawal.

6.2 Academic Regulations for the After-Degree Bachelor of Education

Early Years, Middle Years (Including a Middle Years Weekend College Scheduling Option) and Senior Years (see also 6.1)

Transfer of Credit

Students may transfer a maximum of five full courses (30 credit hours) from another recognized university or college toward the After-Degree B.Ed. provided the courses are acceptable to the Bachelor of Education program.

Students admitted to the After-Degree B.Ed. program for September 2004 academic year and thereafter may not receive advance standing for any Education course which is more than six years old at the point of their admission to the Faculty of Education.

Courses taken as part of the Certificate in Teaching English as a Second Language (CTESL) or Certificate in Adult and Continuing Education (CACE) through Extended Education, U of M, may receive credit for some coursework. See 8.5 PBDE Transfer of Credit for a listing of equivalents.

Those students who are currently in the program and wish to register for a course at another university or college must complete an "Application for Letter of Permission" prior to registering.

Maximum Course Load (excluding Weekend College Middle Years Scheduling Option) (currently under review)

The maximum credit hour load for B.Ed. students is 30 credit hours in the regular session (September-April). Students wishing to take courses above the maximum may do so with the following conditions:

- Requests to complete 33 credit hours are approved by the student advisor provided the student's minimum Degree Grade Point average is 2.50.
- Requests to complete 36 credit hours are approved by the student advisor provided the student's minimum Degree Grade Point average is 3.50.
- Requests to complete in excess of 30 credit hours where the student's degree grade point average is below the minimums noted above or where the student wishes to complete more than 36 credit hours must be approved by the Associate Dean, Undergraduate Programs. In this case, students must make formal request in writing to the Associate Dean, Undergraduate Programs.

Students in the Senior Years Stream may request written permission to complete additional Curriculum and Instruction courses, provided they have previously completed the course requirements for this additional major/minor and where there is space in that Curriculum and Instruction course. Where permission is granted, students may substitute this credit for three credit hours of complementary course work as outlined in their program plan. Students who choose to take more than the required two Curriculum and Instruction courses in their program have no guarantee that a practicum teaching experience will be provided in that additional teachable area.

6.3 Academic Regulations for the Integrated B.Mus./B.Ed. (see also 6.1)

Major/Minor Academic Requirements

Students must achieve a grade of C or greater in all courses which apply to the major and minor.

Transfer of Credit

Students may transfer a maximum of ten full course equivalents (60 credit hours) from another recognized university or college toward the Integrated B.Mus./B.Ed. degree provided the courses are acceptable to the program. Those students who are currently in the program and wish to register for a course at another university or college must complete an "Application for Letter of Permission" prior to registering.

SECTION 7: Complementary Courses

Not all courses are offered every year.

All students admitted to the Bachelor of Education degree program and the Internationally Educated Teachers program for September 2008 and beyond are expected to complete six (6) credit hours of specific Content Area comprised of three (3) credit hours of coursework in Aboriginal Education and three (3) credit hours of coursework in Special Education/Diversity as two of their complementary courses. SECTION 8: Post Baccalaureate Diploma in Education

The Faculty of Education offers a Post Baccalaureate Diploma in Education (PBDE) designed for teachers and other professionals.

The unique features of the PBDE program are that students can: design their own program of study and tailor it to their own areas of interest; take courses at the Faculty of Education as well as at other faculties and schools at the U of M or other approved institutions; and can transfer up to three credit hours of approved professional development courses offered by other agencies or organizations. Effective August 31, 2007, the Faculty ceased to approve requests from such agencies or organizations. A wide selection of courses is available through Summer Session, distance education, via the internet and summer institutes.

The PBDE is recognized by Manitoba Education for salary classification purposes. Further, the PBDE program provides the opportunity for teachers to follow courses of study leading to the special education and special education coordinator certificates, and to partial fulfilment of the requirements of the school administrators' (Level 1) and principals' (Level 2) certificates, all of which are issued by Manitoba Education. For information regarding specialist certificates, contact: Professional Certification Unit, Manitoba Education, Box 700, Russell, Manitoba, R0J 1W0; telephone toll free at: 1-800-667-2378, or 1-204-773-2998, or e-mail certification@gov.mb.ca, or web: www.edu.gov.mb.ca/k12/profcert/#clinician.

8.1 Admission Requirements

Applicants for Admission must possess:

- A Bachelor of Education degree and one of the following types of certificates granted by Manitoba Education: General Certificate, Limited Certificate, or Clinicians' Certificate; or equivalent from other provinces [See note 1 on teacher certification] or a bachelor's degree and two years of appropriate teaching/work experience (see note 2);
- A Grade Point Average of 2.00 in the bachelor's degree (including any after degree certification program).

Note 1:

Teacher Certification

The majority of applicants will possess a valid teaching certificate before being admitted to the Post Baccalaureate Diploma in Education Program.

Note 2:

Applicants must include a brief statement as to educational plans and a resume showing evidence of two years of appropriate full-time teaching or work experience.

8.2 Admission Procedure

Applications may be obtained from the Graduate and PBDE Programs Office, Faculty of Education, or Enrolment Services, 424 University Centre. Applications can also be found at umanitoba.ca/education/programs/pbde.shtml. Completed applications must be returned to Enrolment Services/Admissions Office, 424 University Centre by:

Canadian/US Applicants

- April 1 for classes beginning in May
- June 1 for classes beginning in July
- August 1 for classes beginning in September (Fall)
- December 1 for classes beginning in January (Winter)

International Applicants

- April 1 for classes beginning in September (Fall)
- June 1 for classes beginning in January (Winter)

8.3 Program Requirements

REMINDER: While Education student advisors are available to clarify faculty and university regulations and degree requirements, it is the student's responsibility to ensure that diploma and program requirements are met.

The Post Baccalaureate Diploma in Education consists of 30 credit hours of coursework, subject to the following regulations:

- A minimum of 12 credit hours must be taken in the Faculty of Education at the 5000-level;
- A maximum of 18 credit hours may be taken in the Faculty of Education below the 5000-level;
- A maximum of 18 credit hours may be taken outside the Faculty of Education at the introductory or higher level of which six credit hours may be taken at the 1000-level. In the case of language study other than English or French, a maximum of 12 credit hours may be taken at the 1000-level provided both are in the same language;
- A maximum of three credit hours may be earned through approved external professional courses. Effective August 31, 2007, the Faculty ceased to approve such requests from external organizations but will continue to grant credit for up to 24 months from completion date for those courses that had received approval. These courses are offered by professional groups, and credit may be granted where prior approval has been given to the course sponsor. Effective January, 2000, students applying for transfer of credit for external professional courses must do so within 24 months of course completion.

8.4 Academic Regulations

Appeal Procedures

The general university policy for appeal of assigned grades applies to the Faculty of Education. See the chapter, General Academic Regulations and Policy, of this Calendar, Appeals of Assigned Grades. Information about admission decision appeals may be found in the chapter, Admissions.

Assessment of Student Academic Performance

Academic performance is normally assessed at the completion of nine credit hours of course work and at the end of every session thereafter. A minimum grade of "C" is required for each course that is to be included in the student's diploma program. In addition, a student must maintain a minimum Degree Grade Point Average of 2.00 to continue in the program. A student whose Degree Grade Point Average falls below 2.00 will be placed

on academic suspension for two years. Reapplication is required for re-admission to the program.

Attendance at Class

Regular attendance is expected of all students in all courses. An instructor can initiate procedures to debar a student from attending classes and from final examinations where unexcused absences exceed three hours of scheduled classes in any one term.

Continuing Students

See the chapter, University of Manitoba Admissions.

Debarment

See the chapter, General Academic Regulations and Requirements, Attendance at Class and Debarment.

Grading Scale

Effective in 2000-2001 academic session, the Faculty of Education adopted the following grading scale:

Letter Grade	Grade Point	Level of Achievement	Percentage Range
A+	4.50	Exceptional	95 and above
A	4.00	Excellent	90-94
B+	3.50	Very Good	85-89
B	3.00	Good	80-84

F	0.00	Failure	Below 60

Incompletes

See the chapter, General Academic Regulations and Requirements, Academic Evaluation.

Maximum Time Limits

The maximum time allowed for completing the PBDE is nine years. In addition, a student will not be permitted to count toward the diploma any course completed more than nine years prior to the completion date of the diploma. Students will be permitted to retake and use as PBDE credit Education courses beyond the nine years provided they have not been previously used elsewhere for credit toward a degree or diploma program. Courses from other faculties will need to be dealt with on an individual basis.

Repeating a Course

Courses for which a grade of "F" or "D" is obtained, must be repeated or replaced; however, courses in which a grade of "C" or higher is obtained may only be repeated with the consent of the Assistant Dean, PBDE Program. When a course is repeated, the last grade achieved will be used in calculating the Degree Grade Point Average.

Supplemental Examinations

Supplemental examinations are not permitted in education courses.

Voluntary Withdrawals

See the chapter, General Academic Regulations and Requirements.

Authorized Withdrawals (AWs) may be permitted on medical or compassionate grounds, subject to satisfactory documentation. Students must contact an Education Student Advisor to initiate an authorized withdrawal.

1.3 The Profession of Engineering

Engineers use fundamental principles and energy sources from the natural world and direct them to the benefit of people. They interpret science in terms of material human needs and manage personnel, money, and materials. The profession is involved in all aspects of construction and manufacturing, including conceptualization, design, preparation of plans and specifications, and fabrication of products to meet predetermined standards of reliability and performance. Engineers acquire competence through instruction in basic sciences, mathematics, and engineering sciences; by introduction to the processes of synthesis and design; by complementary studies in the humanities, social sciences, and management; and by learning from the skills and experience of more senior engineers during the early years of employment.

The educational objective in the Faculty of Engineering is to prepare students for positions of leadership in a world where engineering, science, and management are of major importance.

SECTION 2: Admission to the Faculty of Engineering

Direct admission into the Faculty of Engineering from high school:

Applicants who have completed Chemistry 40S, Mathematics 40S (pre-calculus), and Physics 40S with a minimum overall average of 85 per cent, and no grade lower than 60 per cent in any one course, may be admitted to Engineering directly from high school.

From University 1 and/or other Faculties:

A minimum of 8 of the 12 courses in the preliminary engineering program, section 4.2, each with a minimum grade of "C", and a minimum Evaluated Grade Point Average (EVGPA) of 2.0. Acceptance to a department is competitive.

Other requirements

The university written English and mathematics requirements are satisfied by the English (ENGL 1310) and mathematics (MATH 1510, MATH 1710 and MATH 1210) courses in the preliminary engineering program.

Chemical Engineering at the University of North Dakota

The University of Manitoba has an agreement with the University of North Dakota, Grand Forks, N.D., which allows students to obtain a degree in chemical engineering from the University of North Dakota by taking the Preliminary Engineering program at the University of Manitoba and three years at the University of North Dakota. The chemical engineering program at the University of North Dakota is accredited by the Accreditation Board for Engineering and Technology in the United States and is recognized by the Association of Professional Engineers and Geoscientists of Manitoba. Information on this program may be obtained from the Student Advising Office, E1-284 EITC.

SECTION 3: Academic Regulations

The provisions of the chapter, General Academic Regulations and Requirements, and the chapter, University Policies, apply to all students. In addition, the Faculty of Engineering has regulations and requirements, published below, which apply specifically to its students. Notwithstanding the regulations given in this section, the Faculty Council of Engineering reserves the right to rule on individual cases in exceptional circumstances.

3.1 Appeals

Students who feel that they have received unfair treatment in a course should appeal to the instructor. If the matter is not thereby resolved, it should be raised with the Department Head, or the Associate Dean (Undergraduate). Students wishing to appeal their academic status should write to the Associate Dean (Undergraduate), Committee on Standing and Appeals, E1-284 EITC before August 15th. Information regarding this process is available from the Student Advising Office, E1-284 EITC.

3.2 Attendance

When the number of unexcused absences recorded against a student in the Faculty of Engineering in any course exceeds 10 per cent of the number of lectures and laboratories for that course the instructor may report the case to the Dean of Engineering. When a student's attendance or work continues to be unsatisfactory, the instructor has the authority to exclude the

student from classes, or examinations, or both. Such cases shall be reported to the Faculty Council of Engineering at the first opportunity. Students who are excluded from an examination for inadequate attendance in a compulsory course are required to repeat the course.

3.3 Categories of Students

A student shall normally register for three to six courses in a term. Registration for more than six or fewer than three courses in a term must be approved by the Department Head or, in the preliminary program, by the Associate Dean (Undergraduate).

Full-Time Student: Full-time students are those who are registered in at least 15 credit hours (considered 100 per cent) for the regular academic term of their specific programs. 80 per cent of a full course load is 12 credit hours; 60 per cent is 9 credit hours.

Part-Time Student: Part-time students are those who are registered for less than 15 credit hours for the regular academic term.

3.4 Complementary Studies Electives

Complementary studies electives are an integral part of the curriculum. Their purpose is to broaden the student's experience beyond the purely scientific and technical content of engineering. They include studies in engineering economics and the impact of technology on society, as well as the central issues, methodologies and thought processes characteristic of the humanities and social sciences. Opportunities for development of the student's oral and written communication skills are also provided. The coursework requirements may vary from one department to another. XXX.09X0 courses will not be allowed as complementary studies electives. ARTS 1110 Introduction to University may not be used for credit in the Faculty of Engineering.

3.5 Course Selection

When arranging a program of study, a student must satisfy the following requirements:

- All prerequisite and corequisite course requirements must be met.
- All previously failed compulsory courses must be repeated. Students will require assistance with registration due to a block on the AURORA registration system which does not allow more than two repeats.
- Students are not normally allowed to repeat courses graded "C" or higher, except under special circumstances with the approval of the Department Head.
- Failed elective courses may be repeated or replaced with alternative elective courses.

Prerequisite Course: A prerequisite course must have been completed with a "C" grade or better before a subsequent course can be attempted. Under exceptional circumstances, a course instructor may waive, subject to approval by the Department Head (or designate), a prerequisite requirement.

Corequisite Course: A corequisite course must be taken concurrently or before its companion course. Under exceptional circumstances, a course instructor may waive, subject to approval by the Department Head (or designate), a corequisite requirement.

3.6 Examinations

Deferred Examinations

Deferred Examinations (See *Chapter, General Academic Regulations and Requirements* of this Calendar for details) are normally scheduled to take place within 30 working days from the end of the examination series from which the examination was deferred. The date of the deferred examination for a particular course will be set by the Dean's Office no later than January 15, May 15 or July 7, and in consultation with the instructor.

Special Examinations

A student who has attempted to meet all requirements for the degree and has a single failure in their final session, in an engineering course, can apply for a special examination in that course. Special examinations may not be requested for any other reason. However, a special examination may be given on the recommendation of a Board of Examiners under exceptional circumstances. A special examination is given in addition to the regular examination. The grades from both examinations are retained on the student's record, and both are used in the calculation of TGPA and DGPA. The results of special examinations must be reported to the Faculty Council

of Engineering. The special examination privileges apply only to courses offered by the Faculty of Engineering.

Supplemental Examinations

The Faculty of Engineering does not provide supplemental examinations.

Challenge for Credit

Courses offered in Engineering may not be challenged for credit.

3.7 Foreign Language Requirements for co-op and non-co-op Students

There are some opportunities for undergraduate co-op and non-co-op students to work in foreign countries. However, there are foreign language requirements that must be fulfilled before placement can be considered. Students interested in foreign work assignments should acquaint themselves with these language requirements by consulting with their department head as soon as possible after their entry into the Faculty of Engineering.

3.8 Grading and Assessment

All grades awarded by instructors for undergraduate courses offered in the Faculty of Engineering are reviewed by examiners' boards, which comprise all of the instructors in the student's program year. After approval by department councils, they are presented to the Faculty Council of Engineering for acceptance. Following is a list of assessments which will occur at end of each of the terms (fall, winter, and summer):

Term Grade Point Average (TGPA)

The TGPA is computed from all of the final grades in all courses completed during a given academic term.

Degree Grade Point Average (DGPA)

The DGPA is computed from the final grades obtained in all courses attempted as part of a student's current degree program and courses transferred from other faculties and other institutions. Where a course has been repeated or replaced by an approved equivalent course only the last grade shall be included in the computation.

Cumulative Grade Point Average (CGPA)

The CGPA is computed from the final grades in all undergraduate courses attempted at the University of Manitoba and courses transferred from other faculties and other institutions.

Dean's Honour List

A continuing student who achieved a Term Grade Point Average (TGPA) of 3.50 or higher in their most recent academic assessment will be placed on the Dean's Honour List. The assessment is based on a minimum of 12 credit hours. The list will be updated at the end of each of the two regular session terms. A graduating student who achieved a Degree Grade Point Average (DGPA) of 3.50 or higher in their final academic evaluation will graduate on the Dean's Honour List.

In order to practice engineering in any province or territory in Canada, it is necessary to be a member of the professional engineering association of that province or territory. The requirements for membership are acceptable academic preparation and a subsequent period of acceptable engineering experience gained under the supervision of a registered professional engineer. The undergraduate programs in Biosystems, Civil, Computer, Electrical, Manufacturing, and Mechanical Engineering are accredited by the Canadian Engineering Accreditation Board (CEAB), reflecting acceptable academic preparation for membership in the association of professional engineers in any province or territory in Canada. Through a mutual recognition agreement, the programs are recognized as satisfying accreditation requirements in the United States, the United Kingdom, Ireland, New Zealand, Australia, and Hong Kong.

Graduates of an accredited program are eligible to apply for membership as an engineer-in-training, in the association of professional engineers in their province of residence in Canada. After a period of acceptable experience, they are eligible to apply to the association for registration as a professional engineer in that province.

3.11 Requirements for the Bachelor's Degree

A student who on graduation achieves a Degree Grade Point Average (DGPA) of 3.80 or higher is awarded the degree "With Distinction."

Criteria for Medal Awards

The Faculty of Engineering Program Gold Medal shall be awarded to the graduating student in each engineering program who has achieved the highest Degree Grade Point Average (DGPA) (minimum of 3.80) with no distinction as to full- or part-time status. The program Medal will be awarded at spring Convocation to the student who has completed that program in the past academic year (including October and February graduands).

The University Gold Medal for the Faculty of Engineering shall be awarded to the graduating student in the Faculty of Engineering who has achieved the highest Degree Grade Point Average (DPGA) (minimum of 3.80) for the entire program with no distinction as to full- or part-time status.

3.12 Student Progress and Academic Status

Students shall be evaluated at the conclusion of each academic term in which they receive a final grade in a minimum of 6 credit hours of course material (excluding Special Student credit hours), with the assessment being based on the resulting Term Grade Point Average (TGPA) in those courses. The academic assessments are as follows:

Good Academic Standing

A student with a TGPA of 2.00 or higher is in *Good Academic Standing*.

Academic Warning Letter

The first time the student's TGPA drops below 2.00, he/she will receive an *Academic Warning*. Students who receive such a warning are required to meet with an academic advisor from their department or, in the preliminary program, with the Associate Dean (undergraduate).

Academic Probation

The second time that a student's TGPA drops below 2.00, the student will be placed on *Academic Probation*.

Required to Withdraw

The third time that a student's TGPA drops below 2.00, the student will be *Required to Withdraw*. Students who receive such a suspension shall be ineligible to take Engineering courses from the end of the term for which the suspension was issued through to the start of that same term in the subsequent academic year (normally, a period of 8 months.)

In order to be reinstated following the suspension period, the student must submit a written application for reinstatement to the Associate Dean (Undergraduate). Applications must be made by August 14, for reinstatement by September 1, or December 7 for reinstatement by January 1.

Ineligible to Proceed in Engineering

A student shall be *Ineligible to Proceed in Engineering* under either of the following conditions:

- The student's TGPA drops below 2.00 for a fourth time, or;
- The student has accumulated in excess of 40 credit hours of repeated or replaced credit hours.

Repeated or replaced credit hours do not include Voluntary Withdrawal (VW), Authorized Withdrawal (AW), or Special Student (SS) credit hours.

Starting Afresh

Students who have become Ineligible to Proceed in Engineering may apply to the Dean for permission to start their degree afresh, should they wish to return to the Faculty of Engineering.

At the discretion of the Dean, a student may start afresh in an engineering program after a minimum period of two years from their last academic assessment by the Faculty of Engineering, and may request to transfer up to

40 credit hours in which a minimum grade of "C+" was achieved. All previous courses will remain on the student's academic transcript, but will not be applied to their new program.

3.13 Students Transiting to Departments

Students will be accepted into department programs based on the following criteria. Direct entry or University 1 students who have completed 8-12 Preliminary program courses will be ranked and admitted on a competitive basis based on the average of the best eight marks in courses in the Preliminary Engineering program.

Students transferring in from programs, faculties, or colleges will have all courses or equivalent courses that are required in a particular engineering program transferred in, including failed grades ("D's" and "F's") in those courses. The cumulative credit hours for the failed grades will count towards the 40 credit hour limit allowed within a single degree program.

Direct entry students must complete a program declaration form by May 1st in order to indicate their program of choice. Students from University 1 and other faculties must apply by May 1st through the Admissions Office.

3.14 Use of Calculating Devices

For courses offered by the Faculty of Engineering in which the use of devices capable of calculations is permitted in tests or examinations, such devices must be incapable of receiving and/or transmitting signals. Instructors wishing to restrict devices to certain capabilities must inform students, in writing, within the first week of term. Questions concerning the suitability of any given device should be directed to the course instructor(s).

3.15 Withdrawal from Courses

The responsibility for initiating withdrawals rests solely with the student, and no voluntary withdrawals are permitted after the deadlines for voluntary withdrawal without academic penalty (see the chapter, *General Academic Regulations and Requirements*, of this Calendar). For documented medical or compassionate reasons, Authorized Withdrawals may be permitted by the Dean.

A student who, after registering for courses, in any term, becomes ineligible to proceed in Engineering or receives an Engineering Suspension will be withdrawn from his or her Intersession/Summer Session program.

The Engineering Access Program (ENGAP) recognizes that students of Aboriginal ancestry may be challenged with geographic and economic barriers, and/or lack of access to academic preparation, which may make them unable to meet the faculty's admission requirements. ENGAP serves as a specifically designed post-secondary program that provides an opportunity for students to complete their Bachelor of Science degree in Engineering. The program accomplishes this objective by offering upgrading courses in mathematics, chemistry, and physics, as well as providing academic advice, personal and family counselling along with financial supports. Aboriginal students who do not meet the regular requirements may still wish to join the program to benefit from these supports.

The Department of Biosystems Engineering offers an accredited degree program in Biosystems Engineering. The program is designed to give students knowledge of the basic principles of engineering and, in particular, an adequate training and education in the fundamentals and professional applications of Biosystems Engineering. The program is offered in both a traditional and a co-operative education format. The department offers an Environmental Option in both traditional and co-operative education formats. With the appropriate selection of elective courses, the bachelor's degree in Biosystems Engineering meets the requirements for admission to the Faculty of Medicine.

Biosystems Engineering emphasizes the application of engineering principles to biologically-based systems (plants, animals, and microorganisms). The main areas of emphasis are environmental engineering, bioprocess engineering, biomedical engineering, and agricultural engineering (farm machinery, animal and plant production systems, water management, bioenvironmental controls, and light-frame buildings).

The undergraduate curriculum in Biosystems Engineering is an academic program in the Faculty of Engineering. Students wishing to study in the program in Biosystems Engineering must be admitted to the Faculty of Engineering. They are required to complete the Preliminary Engineering Program as a prerequisite to the courses in Biosystems Engineering.

Biosystems Engineering Degree Program

Students are encouraged to consult the department for eight- and ten-term program models. Students are strongly encouraged to follow the model programs when possible, as timetabling and course offerings are based on these program models.

Environmental Option

The departments of Biosystems Engineering and Civil Engineering offer an Environmental Option which provides an opportunity for students to focus on environmental engineering related courses. Successful completion of the Environmental Option will be indicated on graduates' transcripts. Students selecting the Environmental Option within the Biosystems Engineering department will have the knowledge to solve problems associated with the natural environment (groundwater contamination, soil degradation, pollution of rivers and lakes, air pollution, environmental impact assessment) as well as the built environment (building air quality, temperature and humidity control). Biosystems Engineering students will gain a thorough understanding of the fundamental concepts and interactions between biology, engineering science and engineering design to prepare them well for a career in environmental engineering.

Students planning to apply for entrance to Medicine after completing the B.Sc. in Biosystems Engineering are advised to take PHIL 2740 Ethics and Biomedicine as one complementary studies elective, CHEM 2210 Organic Chemistry 1 and CHEM 2360 Biochemistry 1 as their two free electives.

Co-operative Education Program in Biosystems Engineering

Coordinator: N. (Nazim) Cicek

Co-operative education is a process of learning which formally integrates the student's academic study with work experience in industry, government, and the profession. The work terms provide you with practical experience, help finance your education, and provide guidance for further career specialization. At the time of your first placement, you will have completed 80 credit hours of your program and be in a position to make a contribution in the workplace. You must be in good academic standing to enter the co-operative education program.

Students typically start their first co-op work term in May after completion of the winter term of their second year. The work term is 4 months, but can be extended to 8 months. In this case, students would replace one academic term with a work term. Students generally enter their next co-op work term in May of the following year. September and January starting times may be possible if students are willing to postpone an academic term.

Acceptance into the program is dependent upon the student receiving a job placement in consultation with the department's cooperative education coordinator. Once a job placement has been secured through the coordinator, the student is accepted into the program and enrolls in course BIOE 2000 Cooperative Work Study 1, BIOE 3000 Cooperative Work Study 2, or BIOE 4000 Cooperative Work Study 3 as appropriate. To pass these courses, students must prepare a work term report. The cooperative education coordinator assigns faculty advisors to mark work term reports; reports are given grades of "Pass" or "Fail." In order to remain in the co-operative education program, a student must maintain a minimum DGPA of 2.00 and must obtain a grade of "pass" for each work term report. All rules and regulations of the Faculty of Engineering apply. Students who do not maintain these standards may not remain in the co-operative education program. Each successfully completed cooperative education course carries one credit hour. A graduate who successfully completes BIOE 2000, BIOE 3000, and BIOE 4000 will have the words "Co-operative Education" appear on their transcript.

The Department of Civil Engineering offers a fully accredited degree program in Civil Engineering. Graduates of the Civil Engineering program are academically qualified to register as Engineers-in-Training in engineering licensing bodies in Canada.

The Civil Engineering program is designed to give students a broad knowledge of engineering principles and professional practice. The program has a strong core component that provides exposure to a range of areas in Civil Engineering, including – but not limited to – the design of building and bridges, the design of facilities and methods for treatment of water, waste water and solid waste, the design of foundations and earthworks such as dams and river bank protection, transportation planning, the design of roads and pavement, the design of hydraulic structures such as sewers, canals, and spillways, and the management of surface and ground water. In the last years of the program, there are some opportunities for specialization through selection of technical elective courses.

A cooperative education option allows students to include practical work experience in their program.

Civil Engineering Degree Program

Students are to consult with the department for four and five-year program plans. Students are expected to follow the program plans when possible, as timetabling and course offerings are based on these plans.

Environmental Engineering Option

An option in Environmental Engineering provides an opportunity for students to focus on environmental engineering related courses.

Student Support

Summer employment for a limited number of undergraduate students may be offered by the Department of Civil Engineering. Typical duties include assisting academic staff members with their research projects.

Laboratory Safety

Students entering Civil Engineering are required to attend a seminar on laboratory safety. The seminar will normally be held in September.

1) Students are required to take any course from the Faculty of Arts or Faculty of Management, at the 1000 level or above, as a complementary studies elective. However, ARTS 1110 Introduction to University may not be used for credit in the Faculty of Engineering.

2) Students may take one technical elective course with a significant engineering science and/or design component from another department, subject to the approval by the head (or designate) of Civil Engineering.

Co-operative Education Option in Civil Engineering

The Department of Civil Engineering offers a co-operative education option that provides a combination of education and experience by alternating academic terms with work terms.

Students generally apply for the co-op program in their fourth term of engineering studies. Entry into the program is competitive. Acceptance is based on GPA and general aptitude, and is contingent upon receiving a work term placement through the co-op office. The Department of Civil Engineering reserves the right to determine and select the best-qualified applicants. Students who are unable to maintain the standards of the co-op program will be transferred back into the regular program.

The course and grade requirements for completion of the Co-operative Education Option are the same as those required for the regular program. However, in order to satisfy course prerequisite requirements, timetables may differ from the regular program. Co-op students are evaluated in the same manner as regular students and all rules and regulations of the Faculty of Engineering apply.

Written reports must be completed at the end of each work term. Each successfully completed work term and its corresponding work term report receives a Pass/Fail grade. Co-op graduates with a passing grade in at least three work terms will have the Co-operative Education Option acknowledged on their B.Sc. (C.E.) graduation parchment.

Coordinator: Shari Klassen

The Department of Electrical and Computer Engineering offers an Industry Internship Program. This program is designed to complement and enrich the academic program with practical work experience. Preceding the final year, a student in either the Electrical Engineering or the Computer Engineering program has the option of spending a continuous work term period of 12 to 16 months in industry. This work term provides the student with practical experience, helps to finance the student's education, and provides guidance for further career specialization.

A student in good academic standing, who will have completed 120 credit hours of the academic program by the end of the session, may apply to participate in the Industry Internship Program. Acceptance in ECE 4720 Industry Internship is dependent upon the student receiving job placement.

Satisfactory work reports, which will be evaluated by faculty members in the Department of Electrical and Computer Engineering, are required upon returning in order to have this participation recorded in the student's transcript.

Second Degree in Electrical or Computer Engineering

Requirements include:

1. The completion of all deficient third and lower year courses required for the second degree. If a student has already taken any of these courses as fourth year electives towards the first degree, then they will not have to repeat or replace the courses already taken.

2. The equivalent of a full fourth year program required for the second degree, i.e., twelve half courses. This must include:

- i) A second thesis on a different topic relating to the field of the second degree

- ii) All the fourth year course requirements of the second degree. If a student has already taken one or more of the required fourth year courses during their first degree, then they must replace these courses by other appropriate fourth year courses as approved by the Department Head. For example, core courses common to both programs must be replaced by fourth year electives from the Department.

Electrical Engineering Degree Program

The program in Electrical Engineering has a core-plus-elective structure. The core develops the necessary base in mathematics, the physical sciences, dynamics, thermodynamics, electric fields and circuits, and fundamental professional courses focused on energy conversion and transmission, electronics, materials and devices, communications, and control systems. The final year includes a capstone group design project, control systems, and communication systems as core requirements, with the remaining program based on electives. A certain level of specialization is possible through the selection of elective courses offered in the final year.

The student's program must include a three credit hour complementary studies elective. Courses in engineering economics, technical writing, and ecology, technology and society are compulsory.

Students are encouraged to consult with the department for model four- and five-year programs. Students are strongly encouraged to follow the model programs when possible, as timetabling and course offerings are based on these.

The Department of Mechanical and Manufacturing Engineering offers fully accredited degree programs in Mechanical Engineering and Manufacturing Engineering. Students entering the Mechanical Engineering program in September 2009 for the 2009/2010 regular session and thereafter may specialize with an option in Aerospace or Manufacturing, or a stream in Materials, Solid Mechanics, or Thermofluids. No new students will be

accepted into the Manufacturing Engineering program as of September 2009. Students are urged to consult appropriate program requirements shown for each program/option.

The Mechanical Engineering program provides the education required by those who wish to practice in Mechanical Engineering that embraces, among other subdivisions, the design of mechanical devices and systems, manufacturing engineering and management, computer-aided design and computer-aided manufacturing, power generation and utilization, air conditioning, the material sciences, and the aeronautical sciences. The program places special emphasis on the use of computers in solving engineering problems.

The Manufacturing Engineering program is comprised of a thorough study in the engineering sciences followed by courses directly related to the field. The students will acquire creative and analytic skills to apply scientific approach to study macro/micro components of manufacturing systems. Advanced technologies such as robots, computer controlled machine tools, automation, mechatronics, production control methods and analysis of manufacturing systems and processes will be emphasized.

Both programs offer basic training in the sciences, mathematics and fundamental engineering subjects followed by more specialized discipline-related subjects. During the programs, arrangements are made for conducted visits to local power and industrial plants. Students are allowed to choose technical electives to suit their career objectives and are also required to take complementary studies electives related to social issues.

Co-operative Education Programs

Director: R. Derksen

Co-op Coordinator: Bernice Ezirim

The Department of Mechanical and Manufacturing Engineering offers a Co-operative Education Program in which academic study is complemented and enriched with practical work experience. The work terms provide students with practical experience, assistance in financing their education, and guidance for future career specialization.

Mechanical and Manufacturing Engineering Students who have successfully completed all courses in first year and first term of second year of Engineering are eligible to apply for admission into the program. Admission to Co-op occurs during the first academic term of second year for placement in May. Final acceptance into the program is dependent upon the student receiving a job placement through the Co-operative Education office. Students may seek employment on their own, but must consult with the Co-op Coordinator before doing so. Upon acceptance, Mechanical Engineering students enrol in the course MECH 2050, Mechanical Engineering Co-operative Education Assignment (and subsequently, MECH 3050, MECH 4050, and the optional MECH 4060) for the specific work term of employment. Corresponding courses for the Manufacturing Engineering program are MECH 3910, MECH 3920, MECH 4910, and the optional MECH 4920.

Each successfully completed work term and its corresponding work term report are rated at one credit hour. Graduates who successfully complete at least three work terms and the required work term reports will have the words "Co-operative Education Option" printed on their diplomas. For more information regarding the Co-op Program requirements, please see the Co-op Coordinator.

Mechanical Engineering Industry Internship Program (MEIIP)

The Mechanical and Manufacturing Engineering Department offers an Industry Internship Program in Mechanical and Manufacturing Engineering. Upon successful completion of 120 credit hours, a student has the opportunity of spending a continuous work term period of twelve to sixteen months in industry. Interested students may apply in the first term of third year. After an internship placement has been secured the student registers for course MECH 4930. One technical report is submitted upon completion of the internship. Students may obtain additional information from the Co-op Coordinator.

4.12.1 Introduction

The Faculty of Engineering offers the IEEQ Program, designed for international engineering graduates (IEGs) pursuing foreign credentials recognition with the Association of Professional Engineers and Geoscientists of Manitoba (APEGM, www.apegm.mb.ca), the regulatory body for engineering in Manitoba. Through the IEEQ Program, IEGs

- Meet requirements for academic qualification with APEGM and, upon successful completion of IEEQ program requirements, become registered with APEGM as a Member-in-Training; and,
- Earn a Post-Baccalaureate Diploma in Engineering from the University of Manitoba.

The provisions of Section 4: Academic Regulations apply to all students. In addition, the IEEQ Program has regulations and requirements that apply specifically to its students as follows. Additional detail on regulations and requirements not included below are provided to students upon their admission into the IEEQ Program, and can be found on-line at umanitoba.ca/engineering/ieeq

4.12.2 Admission Requirements and Application Procedures

The IEEQ Program can accept applicants whose Confirmatory Exam assignments by APEGM correspond to one of the six accredited undergraduate engineering programs offered in the Faculty of Engineering.

Program entrance is normally in September of any given year. In order to be admitted to the IEEQ Program, the student must:

- Be an IEG with an earned undergraduate engineering degree obtained from a university outside of Canada;
- Have obtained the results of an *Assessment of Academic Credentials* from APEGM, with a result of five or fewer Confirmatory Exams assigned by APEGM in order to be considered academically qualified;
- Be a Permanent Resident or Canadian Citizen; and,
- Demonstrate English language proficiency at benchmark level 8 on the Canadian Language Benchmarks.

Application forms are available through the IEEQ office (telephone 204.474.8961 or email ieeq@UManitoba.ca) or on-line at umanitoba.ca/engineering/ieeq.

4.12.3 Program Requirements

The Post-Baccalaureate Diploma in Engineering consists of a minimum of 24 hours of coursework, subject to the following regulations:

CIVL 4050 *Engineering Economics*;

ENG 4010 *Practicing Professional Engineering in Manitoba*;

ENG 4012 *IEEQ Co-op Assignment*;

Technical courses taken from the 3000 and 4000 level of the student's engineering discipline, and corresponding to the topic areas of Confirmatory Exams assigned by APEGM.

The total number of courses required in the IEEQ Program is generally as shown in the table below:

Number of Technical Confirmatory Exams ¹ Assigned by APEGM	Number of courses in IEEQ ²
One (1) or two (2)	5
Three (3)	7
Four (4)	9
Five (5)	11

Notes: 1 Technical exams refer to exams assigned from Group A or Group B of the Discipline Examinations (see http://engineerscanada.ca/e/pu_syllabus_1.cfm). Technical Exams do not include exams assigned from the Basic Studies (BS) or Complementary Studies (CS) syllabi, such as 98-CS-1 Engineering Economics.

2 Including CIVL 4050 *Engineering Economics*, ENG 4010 *Practicing Professional Engineering in Manitoba*, and ENG 4012 *IEEQ Co-op Assignment*

If the courses required in IEEQ total less than 24 credit hours, a transfer of credit from the original earned undergraduate engineering degree (obtained outside of Canada) may be made.

All courses must be completed with a grade of C or better. Failed courses may only be repeated once, and are subject to the limits outlined in the IEEQ Student Handbook and on the IEEQ website.

4.12.4 Maximum Time Limits

Students can choose a full-time or part-time option in the IEEQ Program. Students will be asked to declare their status upon their acceptance to the IEEQ Program.

Number of courses in IEEQ	Full-time	Part-time
Seven (7) or fewer	1 yrs	2 yrs
More than seven (7)	2 yrs	3 yrs

SECTION 2: Admission to the Clayton H. Riddell Faculty of Environment, Earth, and Resources

2.1 Admission from University 1

Most students newly admitted from high school and those who have completed less than 24 credit hours at another post-secondary institution will complete the first year of their degree program in University 1. In University 1, students will select courses from a wide variety of offerings in Faculties across campus. For information about University 1, see the *Chapter* on University 1 in this *Calendar*.

University 1 students are encouraged to apply for admission to a degree program in the Clayton H. Riddell Faculty of Environment, Earth, and Resources once they have completed 24 credit hours of course work and have met the minimum entrance requirements of their intended degree program. **Students must apply to be considered eligible for admission to the Riddell Faculty. Application information is available from the Admissions Office, Enrolment Services, 424 University Centre. This information is also available in the Riddell Faculty general office, 440 Wallace Building, and is posted on the University's website (umanitoba.ca/admissions).**

Faculty admission is determined on the basis of a 2.00 Grade Point Average on a minimum of 24 credit hours of course work from a recognized institution. Note: For students completing the Bachelor of Arts in Geography, entry is based on a Degree Standards Table found in section 5.2.2 in this *Chapter*.

Degree programs may define additional entrance requirements and students are referred to the appropriate section of this *Chapter* for further details as follows:

Section 5: Bachelor of Arts in Geography Degree Regulations and Program Description.

Section 6: Bachelor of Science in Physical Geography Degree Regulations and Program Description.

Section 7: Bachelor of Environmental Science and Bachelor of Environmental Studies Degree Regulations and Program Descriptions.

Section 8: Department of Geological Sciences: Bachelor of Science in Geological Sciences - Geology, Geophysics, and General Degree Regulations and Program Descriptions.

2.2 Transfer Students

Students applying for admission from other recognized universities or colleges are called 'transfer students'. For the University of Manitoba's general policy on transfer of credit and advanced standing, refer to the Admissions website: umanitoba.ca/admissions.

To be eligible for admission to the Clayton H. Riddell Faculty of Environment, Earth, and Resources, transfer students must have completed no fewer than 24 credit hours of university level course work and satisfied the minimum performance requirements of the intended degree program. Transfer students who have completed less than 24 credit hours must register in University 1 or Extended Education to complete the required credit hours of course work. Students with more than 24 credit hours who are not admissible to the Riddell Faculty should consider applying to Extended Education as their alternative choice.

Students on academic suspension as a result of work completed at another post-secondary institution or another Faculty will not normally be considered for admission to the Clayton H. Riddell Faculty of Environment, Earth, and Resources until the suspension has been served.

Transfer of Credit

See the Admissions section of this *Calendar*. Courses completed at an external institution ten years prior to registration in the Clayton H. Riddell Faculty of Environment, Earth, and Resources are not considered for transfer of credit. Students should contact a Riddell Faculty student advisor regarding transfer credit policies.

2.3 Visiting Students

Visiting students may apply for admission to the Clayton H. Riddell Faculty of Environment, Earth, and Resources on the basis of a Letter of Permission

from the Registrar or appropriate Dean of her/his home institution. Certain restrictions may be placed on the kind and number of courses in which a student will be allowed to register. Visiting students may wish to contact a Riddell Faculty student advisor in the Faculty general office for further information.

2.4 Second Degree Students

Students possessing a first degree from a recognized university program are eligible for admission as a Second Degree student provided they attained a minimum cumulative Grade Point Average of 2.00 on their first degree.

Second Degree requirements may be shortened by up to 60 credit hours and, once admitted, students will be expected to satisfy all continuation and graduation requirements in the degree program. Second Degree students are not required to satisfy the University Written English and Mathematics requirement. Specific information on degree requirements following completion of the first degree is available in the Riddell Faculty general office.

2.5 Special Students

After Degree Special Student

Students who have successfully completed a first degree from a recognized university program with a cumulative Grade Point Average of 2.00 or better are eligible for admission as Special Students.

2.6 Auditing Students

Students who wish to audit courses must have written permission from the instructor of the desired course before they can register. Auditing students must register in-person in the Riddell Faculty general office. The Clayton H. Riddell Faculty of Environment, Earth, and Resources prohibits auditors from registering in courses until after the initial access period.

SECTION 3: Degree Regulations Applicable to all Programs in the Clayton H. Riddell Faculty of Environment, Earth, and Resources

3.1 Courses Offered in Other Faculties and Schools Acceptable for Credit in the Clayton H. Riddell Faculty of Environment, Earth, and Resources

Students who are registered in the Clayton H. Riddell Faculty of Environment, Earth, and Resources may take any course offered by another faculty or school for credit towards their degree, subject to permission from the department head (or designate) and/or a Riddell Faculty student advisor.

3.2 Available Minors in Departments and Faculties

Students in the B.Env.Sc., B.Env.St., B.Sc. Geological Sciences (Geology and Geophysics) and B.Sc. Physical Geography degree programs may, if they wish, declare and complete a Minor from departments and interdisciplinary programs in which a Minor is offered. Students registered in the B.A. Geography (General; Advanced) and B.Sc. Geological Sciences (General) are required to complete a Minor prior to graduation. Students may not, however, declare both their Major and Minor from the same subject area. Students can declare only one minor. It should be noted that for Honours students any consideration of completing a Minor should be made early due to restricted opportunities in later years in their programs.

A Minor will normally consist of at least 18 credit hours, with a minimum of 12 credit hours being at the 2000-, 3000-, and 4000-levels (although there are some exceptions). It should be noted that no course can be used as part of a prescribed Honours or Major program and also be part of a prescribed Minor. An alternate course will have to be selected to satisfy the Minor requirement. For example: if a course in Economics is part of the student's Major or Honours program in B.Env.Sc., then that course may not be used as part of a Minor in Economics.

Students planning to enrol in the I.H. Asper School of Business [Management Minor] must consult a Riddell Faculty student advisor as enrolment in this minor program is limited. *The Management minor consists of any 18 credit hours in courses offered by the Asper School of Business.*

3.3 University Written English and Mathematics Requirement

Students are required to complete the University Written English and Mathematics requirement as outlined in the *Chapter, General Academic Regulations and Requirements of this Calendar*. It is recommended that students complete these requirements while in University 1 or in Year 2 of their program.

A list of all courses that satisfy the Written English and Mathematics requirements also appears in Appendix A of the *Chapter, General Academic Regulations and Requirements of this Calendar*. Course numbers of designated written English courses are marked with a 'W' and designated Mathematics courses are marked with an 'M'. Students may wish to consider *GEOL 1410W Natural Disasters and Global Change* (3), *GEOL 3130W Communication Methods in the Geological Sciences* (3), *GEOG 3480W Canadian Problems* (3), *GEOG 3580W Landforms* (6) and/or *GEOG 3680M Research Methods in Geography* (6) to satisfy these requirements. In addition, the Department of Environment and Geography offers several courses annually through Distance Education that satisfy the 'W' requirement.

3.4 University 1 Requirements of Faculty of Arts and Faculty of Science Courses

Students are required to take 6 credit hours from the Faculty of Arts, 6 credit hours from the Faculty of Science. See the *Chapter University 1* for further details.

For course subjects taught by the **Faculty of Science** refer to the *Chapter Faculty of Science* for a complete listing.

For course subjects taught by the **Faculty of Arts** refer to the *Chapter Faculty of Arts* for a complete listing.

3.5 Changes in Program Requirements

Once students have successfully completed any portion of a degree program, they will not be required to meet new course requirements subsequently stipulated for that portion of the program, whether the requirements be for the Faculty or for an individual degree program. Students are required to complete their program in its entirety as outlined in the *Calendar* effective upon the point of admission to the Faculty and program.

3.6 Prerequisite and Corequisite Courses

Definitions for prerequisite and corequisite courses are outlined in the *Chapter, Registration Information: Aurora Student of this Calendar*.

3.7 Course Availability

All courses listed in this *Calendar* are not offered every year. The course(s) offered for the current academic term are published in the online undergraduate calendar (umanitoba.ca/calendar) under *Class Schedule*.

The Department of Environment and Geography offer numerous courses under the following course numbers: *GEOG 3770 Special Topics in Geography* (3), *GEOG 4670 Selected Issues* (3), *GEOG 3740 Field Studies in Geography* (6), *GEOG 3750 Field Studies in Geography* (3), *GEOG 3760 Special Topics in Geography* (6), *ENVR 2010 Field Topics in Environment* (1.5), *ENVR 2020 Extended Field Topics in Environment* (3), *ENVR 3000 Multidisciplinary Topics in Environmental Science* (3), *ENVR 3010 Field Topics in Environmental Science 1* (1.5), *ENVR 3020 Extended Field Topics in Environmental Science 1* (3), *ENVR 4000 Multidisciplinary Topics in Environmental Science* (3), *ENVR 4010 Field Topics in Environmental Science 2* (1.5), and *ENVR 4020 Extended Field Topics in Environmental Science 2* (3).

The Department of Geological Sciences offers courses under the following course numbers: *GEOL 4270 Advanced Studies in Earth Sciences* (3) and *GEOL 4290 Topics in Environmental Geoscience* (3). Students are referred to the online *Class Schedule* for current information.

3.8 Repeated Courses and Attempted Credit Hours

Clayton H. Riddell Faculty of Environment, Earth, and Resources students are subject to the University of Manitoba regulations (see General Academic Regulations and Policy, Repeating a Course as described in this *Calendar*) and the Riddell Faculty degree regulations regarding eligibility to repeat a course. Repeating a course will not result in the removal of the first attempt and grade in that course from the student's record. The course will appear on the transcript as many times as it has been repeated. Only the grade from the last attempt will be included in the calculation of the cumulative and degree Grade Point Average, unless otherwise stipulated by the degree program.

Students who wish to repeat a course must contact a Riddell Faculty student advisor for approval prior to registration.

There is no limit to the number of credit hours permitted in the degree programs in the Faculty provided a student does not exceed the credit hour limit of failed courses stated for specific programs.

3.9 Voluntary Withdrawals

The responsibility for initiating withdrawals rests solely with the student. When eligible to do so, Voluntary Withdrawals must be done through Aurora Student; otherwise withdrawals must be authorized first by the Faculty general office and then through the Registrar's Office. No withdrawals will be permitted after the deadlines posted in the Academic Schedule.

3.10 Authorized Withdrawals

Subject to the provision of satisfactory documentation to a Riddell Faculty student advisor in the Faculty general office, Authorized Withdrawals (AWs) may be permitted on medical or compassionate grounds.

3.11 Residence Requirement

Students are required to complete a minimum number of credit hours at the University of Manitoba. Students should refer to their degree program in the appropriate section 5, 6, 7, or 8 of this *Chapter* for further information. The courses used to satisfy the residence requirement must be acceptable for credit by the degree program in the Clayton H. Riddell Faculty of Environment, Earth, and Resources. Residence requirements apply to both first and second degree students.

3.12 Letter of Permission to Take Courses at Another University

Students wishing to complete courses at another institution for credit at this university must obtain written permission from the Registrar's Office prior to registering at the other institution or no credit will be permitted. Any earned grades are transferred and form part of the degree Grade Point Average, when applicable. Students who register for courses elsewhere without a Letter of Permission must reapply to the Faculty.

Students who are on academic suspension may not elect courses at another institution for credit toward an Environment, Earth, and Resources degree at this university.

Attendance at Other Institutions

Students who attend other post-secondary institutions without a Letter of Permission must reapply for admission to the Faculty before the application deadline and be academically competitive for admission. Similarly, students registered in the Clayton H. Riddell Faculty of Environment, Earth, and Resources may not be registered at another academic institution at the same time unless they are registered elsewhere on a Letter of Permission. The penalty for unauthorized or undisclosed attendance may be disciplinary withdrawal or academic suspension.

3.13 Dean's Honour List

Dean's Honour List

A student's eligibility for the Dean's Honour List designation is evaluated after each term.

Students enrolled in a minimum of 12 credit hours of course work during a term and who achieve a term Grade Point Average of 3.50 or higher will be placed on the Dean's Honour List. The Dean's Honour List designation will appear on the student's transcript of marks.

3.14 Academic Warning, Probation and Academic Suspension

Assessment will take place after each term only if a student completes more than 4.0 credit hours in any given term.

Students will receive an academic warning if, at the point of assessment following a term, s/he fails to achieve the required minimum performance level. The notation 'Academic Warning' will be recorded on the student's transcript of marks.

While on academic warning, students in the Faculty are permitted to register for two additional terms up to a maximum of 30 credit hours to attain the minimum performance requirements. Those who fail to meet this standard will be placed **on probation** for the next two terms of registration. The notation 'On Probation' will be recorded on the student's transcript of marks.

While on probation, students are permitted to register for two additional terms up to a maximum of 30 credit hours to attain the minimum performance requirements. Those who fail to meet this standard will be placed on **academic suspension for one year**. The notation, 'Academic Suspension for One Year' will be recorded on the student's transcript of marks. A student placed on academic suspension is not allowed to register in the Clayton H. Riddell Faculty of Environment, Earth, and Resources during the duration of the suspension.

A student will be placed on **academic suspension for two years** under the following circumstances:

- Upon return from one year suspension, the student fails to attain a 2.00 degree grade point average in the following two terms after the probationary assessment (see a Riddell Faculty student advisor for information).
- The Faculty calculates that it is mathematically impossible for the student to clear his/her probationary standing by the following assessment period.
- The student exceeds the maximum number of credit hours of failed courses.

The notation, 'Academic Suspension for Two Years', will be recorded on the student's transcript of marks. Those serving two-year suspensions are required to start the degree afresh should they choose to return to the Clayton H. Riddell Faculty of Environment, Earth, and Resources. Students may appeal for transfer of credit up to 30 credit hours in courses in which a minimum grade of 'C' was achieved.

Students should consult with a Riddell Faculty student advisor for further assistance in clearing their academic warning, probation or suspension.

3.15 Academic Dishonesty

Academic dishonesty is intentional cheating, fabrication, impersonation, or plagiarism. It is also knowingly helping or attempting to help others to be dishonest. Academic dishonesty lowers scholastic quality and defrauds others who will eventually depend on their own knowledge and integrity.

Plagiarism or any other form of cheating on examinations, term tests, or assignments is subject to academic penalty as serious as suspension or expulsion from the Faculty or University.

Students who are unsure of what constitutes academic dishonesty should refer to the regulations in the *Chapter*, General Academic Regulations and Policy, Plagiarism and Cheating in this *Calendar* and consult with your professor or instructor.

3.16 Termwork and Debarment

A student is responsible for the completion of laboratory work, assignments, tests and other class work as prescribed by the course syllabus. A student who does not meet termwork requirements to the satisfaction of the Associate Dean (Academic) will receive a warning to this effect. If this warning is ignored, a student may be debarred from the course. Any student debarred from a course receives an automatic grade of 'F' in that course.

3.17 Deferred Examinations

A student who is unable to write a final examination because of illness or other incapacity or compassionate reasons must file an application for deferred examination in the Clayton H. Riddell Faculty of Environment, Earth, and Resources general office. Refer to the *Chapter* General Academ-

ic Regulations and Policy, Deferred Examinations in this *Calendar* for further information.

3.18 Challenge for Credit

Any student wishing to challenge a course for credit should contact the Clayton H. Riddell Faculty of Environment, Earth, and Resources general office.

3.19 Appeals Involving Academic Regulations

The Student Appeals and Discipline Committee in the Faculty considers appeals from students who request special consideration with respect to the rules and regulations governing their degree program and qualifications for graduation.

Appeals should be addressed to: Student Advisor, Secretary Student Appeals and Discipline Committee, General Office, Clayton H. Riddell Faculty of Environment, Earth, and Resources, 440 Wallace Building.

3.20 Incidental Fees

Incidental fees are assessed for some courses. This information is available in the department offices as well as in the online undergraduate calendar (umanitoba.ca/calendar) under *Class Schedule*.

3.21 Student Advisor Office Hours

Monday through Friday: 9:00 a.m. to 4:00 p.m.

Email: Faculty_Environment@umanitoba.ca

3.22 Student Responsibility

It is your responsibility to be familiar with the regulations, courses, and graduation requirements of your degree program. You are advised to review the appropriate sections of this *Calendar* carefully when selecting your courses to ensure compliance with degree program requirements. If you are not sure of how regulations and requirements apply to your case, please consult a Riddell Faculty student advisor. Since a complete graduation check is not done until you have declared your intention to graduate, you are encouraged to make an appointment with a Riddell Faculty student advisor prior to your initial registration access date to confirm you are meeting the degree requirements. Ultimately you are responsible to ensure compliance with degree program requirements.

Note: While we welcome the opportunity to assist you, it is important for you to realize that *it is your responsibility* to be familiar with university and Riddell Faculty academic regulations and registration procedures as they are described in this calendar.

3.23 Maximum Number of Courses During a Term

You may attempt a maximum of 15 credit hours in any one term unless otherwise stipulated by your program. If you wish to exceed the normal load you may apply in-person at the Faculty General Office, or complete the form available on the Riddell Faculty web page. (umanitoba.ca/environment)

3.24 Course Space Availability

The initial registration access time is based on *academic performance*; therefore, space in all courses is available on the system from the beginning of the registration period for Fall and Winter terms.

3.25 Registration

Student Responsibilities

Know your registration time. Review the registration instructions in the *Chapter*, Registration Information: Aurora Student of this *Calendar*.

It is the students' responsibility to ensure that all pre-registration approvals are completed and that all pre-requisites and program approval hold have been removed prior to the registration access period. Most students who do not complete this requirement will experience a program approval hold when they access Aurora Student.

Steps to confirming your registration access:

1. Review your program requirements and if required, complete your Request for Advance/Major/Honours Program Approval. The Program Approval form is available at: umanitoba.ca/environment/data/

majors_honors_approval.pdf The Program Approval Hold will only be removed when your course selection has been approved by the student advisor.

Students completing the Bachelor of Arts in Geography (General) or the Bachelor of Science in Geological Sciences (General) do NOT need program approval prior to registration.

2. Obtain all required departmental permission that pertain to waivers for pre-requisites, space, and timetable conflicts.
3. Complete your registration through Aurora Student.
4. Students interested in transferring between degree programs (i.e. switching from a Major to Honours, or from Major to Major Coop) must acquire the approval and submit to the student advisor in 440 Wallace Building.

What Aurora Student cannot do:

Aurora Student will not check degree requirements. You are responsible for knowing the requirements of your degree. Consult a Riddell Faculty student advisor for advice and assistance if degree requirements are unclear.

You cannot add or change a course classification through *Aurora Student*. Therefore, if you are an undergraduate student and wish to take a course as an Auditor, or as Challenge for Credit, you must add this course in-person in the Riddell Faculty general office within the normal deadlines for such activity.

Aurora Student will not prevent a student from registering in two (or more) courses that are designated not to be held for credit with one another. It is the student's responsibility to ensure that they are not registered for courses that are ineligible to be held for credit with one another. Read the course descriptions carefully. If you are unsure about a course you have selected, check with a Riddell Faculty student advisor prior to the revision deadline. No academic concessions will be granted in this regard.

Have you been away for a While?

Students who have been away from the Riddell Faculty for more than a year cannot use *Aurora Student* until they have consulted a Riddell Faculty student advisor. Students who have attended another post-secondary institution since their last registration at the University of Manitoba must normally re-apply for admission.

3.26 Interfaculty Option in Aging

Students in the B. Env. Sc., B. Env. St. and B.A. in Geography program may, if they wish, declare and complete the Option In Aging.

The Option in Aging spans six faculties, each of which offers its own specialized and targeted courses on aging. It is an opportunity to expand a student's area of study into several faculties, classrooms and learning experiences, giving a diverse and well-rounded educational experience.

To complete the Option, Clayton H. Riddell Faculty of Environment, Earth, and Resources students will need to complete the following courses, for a total of 18 credit hours of aging-related course work.

- 1) Two required courses of all students in the Option in Aging:
 - a. KIN /NURS 2610 Health and Physical Aspects of Aging (3 credit hours)
 - b. HMEC/REC /SWRK 2650 Social Aspects of Aging (3 credit hours)
- 2) Two courses required of all Clayton H. Riddell Faculty of Environment, Earth, and Resources students in the Option in Aging:
 - a. GEOG 4710 Geography of the Elderly and Aging (3 credit hours)
 - b. GEOG 4290 Geographies of Health and Health Care (3 credit hours)
- 3) An additional 6 credit hours of aging-related course work from any of the other faculties participating in the Option. This includes units in the Faculties of:

- Faculty of Arts
- Human Ecology
- Nursing
- Kinesiology and Recreation Management
- Social Work

Students are encouraged to meet with a student advisor to select aging-related courses from other units. They may also find guidance on the Option in Aging website (umanitoba.ca/option_in_aging).

Upon completion of these requirements, a 'notation' will be added to the student's transcript indicating they have completed the Option in Aging.

4.2 Undergraduate Programming in the Department of Environment and Geography

The fields of study in this department can be divided into four overlapping areas: environmental sciences, environmental studies, human geography and physical geography. These areas are built on a diverse range of academic frameworks or foundations, including: natural, physical and social sciences, education, law, agriculture, management, medicine, humanities and architecture.

Environmental Science applies scientific knowledge from many disciplines to issues and questions relating to an increasing human population, the sustainability of resource use, degradation caused by pollution and disturbance, and the endangerment and extinction of species and natural systems. Environmental Studies applies the theory and practice of group and organizational communication, understanding public policies and programs that underscore environmental concerns, and the need to integrate diverse social, institutional, political and legal considerations inherent in attaining environmental objectives. (Students have the opportunity to focus advanced studies in one of several areas, defined through consultation with a Riddell Faculty student advisor.)

"Human Geography examines how people have been influenced by the environment and how, in turn, they have left their mark on the environment," Dr. Daniel Todd, Human Geographer. Students may choose to focus their studies into one of several areas including *Human-Environment Relations, Urban and Rural Development, Social Cultural Geography, Population, Resources and Development, and Area Studies*.

Areas of physical geography include the study of the environment through aspects of atmospheric science, geomatics, biogeography, and hydrology. Streams are currently available in *Atmospheric and Hydrological Sciences, Geomatics* (an emerging subfield, referring to the techniques of spatial data acquisition, handling and analysis) and *Physical Geography*.

Potential careers for graduates of these programs include a diverse array of possibilities in the natural sciences, social sciences, or a combination of both. Graduates are poised to assume positions where they identify and analyze the local, regional, national, and global patterns that shape our lives. As well, technical skills such as geographic information systems and remote sensing are demanded in several of the environmental sectors. Graduates of these programs can expect to enter the workforce in private, government, research, or not-for-profit sectors.

4.3 Cooperative Education Option

A Cooperative Education Option is available to students registered in either the Major or Honours degree programs in Environmental Science, Environmental Studies, or Physical Geography. Coop is an arrangement whereby students spend alternating periods in university and employment. There are several advantages to a cooperative education program for students. One benefit is that students are able to acquire both theoretical knowledge and practical experience. This experience assists them in selecting areas of specialization for their senior courses in their chosen Stream. As well, Coop assists students in their professional development by enhancing networking opportunities, participation in conferences and workshops and provides the foundation of skills and strategies required in searching and acquiring employment after graduation. Students can also defray some of the costs of their university education through these work term placements. Further information about Cooperative Education and student eligibility is available from a Riddell Faculty student advisor available in the Faculty general office.

Students electing to participate in the Cooperative Education Option will be assessed a program fee with their formal admission into the program. Once a student has accepted a position with a Coop employer, no portion of the program fee will normally be refunded.

The Cooperative Education Option consists of two employment work terms, each over a minimum period of four months, and contributes 6 credit hours towards the four year degree program. Students complete ENVR 2900 Professional Development 1 (1.5), ENVR 3900 Professional Development 2 (1.5), work term placements ENVR 3980 Work Term 1 (0), ENVR 3990 Work Term 2 (0), and the work term report courses ENVR 3910 Work Term Report 1 (1.5) and ENVR 3920 Work Term Report 2 (1.5). Additional work terms are available to interested students. Each academic term and each employment term commence in January, May or September. While on an employment term, a Cooperative Education Option student is not permitted to take more than three additional credit hours of academic work outside of the requirements of the Coop placement without permission of a Riddell Faculty student advisor.

Students are required to register in the appropriate Coop courses and pay course fees prior to beginning their placement.

5.1 Program Information

There are four broad categories of courses in the Geography discipline: **physical** geography is concerned with physical features on and over the globe; **human** geography examines the products of human activity; **regional** geography attempts to achieve a synthesis of physical and human geography of a particular place; and **techniques** in geography focus on analytical methods.

The attraction of Geography as a discipline lies in its diverse interests and approaches to knowledge building while being centred on the fundamental concepts of human-environment relations, location/place and space/distance. Geographers see the world and want to know how physical processes and systems shape the land, air, water, flora and fauna around them and how these are influenced by human activity. We want to know how human societies, cultures, and economies work and how these human systems are interdependent with each other and with natural systems. We work at a variety of geographic scales, from the micro-scale of local communities and regions, through the macro-scale of global human and physical systems. Geography embraces the study of topics as wide-ranging as: weather and climate, population distribution, agricultural systems, globalization, landforms and geomorphology, environmental perceptions, health and healthcare, and biogeography. Therefore, by selecting courses from within the department, as well as complementary courses from other academic units of the University, students can develop fascinating, focused and challenging degree programs that will prepare them for careers in a variety of areas.

The General degree in Geography provides students with a basic level of understanding of the discipline and its inter-relationships. **This degree is also a useful consideration for students planning to complete the After-Degree Bachelor of Education program (see the Faculty of Education chapter of this Calendar).** The General degree program may be completed entirely by Distance Education (see the Distance Education Guide for further details). The Advanced degree program in Geography provides opportunities for students who desire a broad geographical education along with a reasonable degree of specialization in a particular field of Geography. Students planning a professional career or a high degree of specialization in Geography are strongly advised to enter the Honours degree program. The Honours degree demands the highest scholastic performance of all programs available. Students are strongly advised to enter an Honours degree program with their admission to the Bachelor of Arts in Geography. Consultation with the department head is also advised.

Structure of the B.A. Geography Degree Program

The structure of the B.A. Geography degree is summarized as follows:

A **Geography (Major)** component that varies in credit hour requirement depending on the degree program; 30 credit hours in the General; 54 credit hours in the Advanced; and 72 credit hours in the Honours. Students are not permitted to declare a second major.

Advanced and General degree students must complete a **Minor** in a subject field that is different than that of the declared major, and can be chosen from one of the other programs in the Clayton H. Riddell Faculty of Environment, Earth, and Resources. Students in the B.A. Geography are not permitted to complete a Minor in Physical Geography. The Minor requirements are described in section 3.3 of this *Chapter*. Contact a Riddell Faculty student advisor in the Faculty general office for further information about eligible Minors.

Students must complete 5 subject fields with 6 credit hours in each (30 credit hours). For example: 6 credit hours in Geography, plus 6 credit hours in Environmental Science, plus 6 credit hours in Geological Sciences, plus 6 credit hours in Anthropology, plus 6 credit hours in Native Studies.

Students must also complete 6 credit hours in Humanities and 6 credit hours offered by the Faculty of Science.

Humanities

For course subjects taught by the Faculty of Arts that can be used towards the Humanities requirement, refer to the *Chapter for the Faculty of Arts, Additional Faculty Regulations and Policies* section. Music (i.e. all courses listed for Advanced Major and Minor programs except ensemble courses) and History of Art (i.e. all courses listed with course prefix FAAH) may also be eligible courses. Students should see a Riddell Faculty student advisor for further information.

Note: Students can satisfy the requirement for a Humanity, and/or Arts, or Science and at the same time satisfy the Written English or Mathematics requirement and one of the 5 subject fields required with the same 6 credit hours of courses.

The qualifications of the degree programs are summarized as follows:

To qualify for the Bachelor of Arts in Geography (Honours) designation, students must complete 120 credit hours including: all course and performance requirements; the requirements in the five subject fields, and the areas of Humanities and Sciences. As well, students must satisfy the Riddell Faculty regulations outlined in section 3 of this *Chapter*. Minimum performance requirements include passing grades ('D' or better) in each course and a minimum degree Grade Point Average of 3.00 on Geography courses and the 120 credit hours which constitute the degree. Students cannot exceed 18 credit hours of failed courses.

5.2 Entrance Requirements

Students are required to attain a minimum degree Grade Point Average of 2.00 based on the Degree Standards Table in Section 5.2.2 to be eligible for admission to the B.A. in Geography. Students who are admitted will be placed in the General degree program. Students may be eligible for transfer to either the Advanced or Honours degree program provided they satisfy the entrance requirements defined in 5.2.1. To enter the Advanced or Honours degree program, a student must consult with a Riddell Faculty student advisor in the Faculty general office.

5.2.1 Entrance Requirements				
Degree Program in B.A. Geography	Minimum Number of Credit Hours	Minimum Degree Grade Point Average	Maximum Credit Hours of Failed courses	Additional Entrance Requirements

¹Minimum Grade Point Average for entrance into the General degree program is determined using the Degree Standards Table in 5.2.2.
²GEOG 1200 or both GEOG 1281 and GEOG 1291 may be used in lieu of GEOG 1200, or GEOG 1280 and GEOG 1290, respectively.

5.2.2 Grade Point Average Calculation for Entrance and Continuation

General degree students in the B.A. Geography must attain a minimum 2.00 Grade Point Average at each point of assessment. The Degree Standards Table listed below is used to determine a student's eligibility for admission to the Riddell Faculty as well as evaluate a student's performance after each term.

5.2.2 Degree Standards Table	
Credit hours	Minimum Degree GPA
24-30	1.80
33-45	1.85
48-60	1.90
63-75	1.95
78-90	2.00
93+ hours	2.00

5.3 Minimum Performance Requirements

A student's academic performance is assessed first with his/her application for admission to the Riddell Faculty and then following each *term* in which the student is registered in more than 4.0 credit hours. To be in **good standing** and permitted to continue in a degree program, a student must achieve the minimum standards outlined for his/her degree program at each point of assessment. For General degree students, this includes the Degree Standards Table outlined above in 5.2.2, as well as the requirements outlined in 5.3.1. Students in the Advanced and Honours degrees are required to satisfy the requirements listed in 5.3.1. Minimum academic performance is based on the degree Grade Point Average and number of failed courses. Prior to each registration, Advanced and Honours degree students must have their course selections approved by a Riddell Faculty student advisor. Students may not make any subsequent changes without receiving prior written permission.

To graduate with a B.A. Geography with the intended degree designation, a student must achieve the minimum performance standards and gradua-

tion requirements outlined in 5.3.1 following their last *term of registration* and satisfy all faculty and degree requirements in Geography as defined in sections 5.3.1 and 5.5 of this *Chapter*.

Students in the Honours and Advanced degree programs who do not meet these minimum performance requirements will be withdrawn from their existing program and placed in the Advanced and General degrees respectively. Students who do not meet the minimum performance requirements for the General degree program will receive an academic warning, be placed on probation or academic suspension as defined in section 3.14 Ac-

ademic Warning, Probation and Academic Suspension in this *Chapter*. Students withdrawn from the Honours degree program may be eligible to enter the Advanced program and are required to obtain permission from a Riddell Faculty student advisor.

Students withdrawn from the Honours degree program will have the notation, 'Required to Withdraw from the Honours Program', recorded on their transcript of marks. Similarly, students withdrawn from the Advanced program will have the notation, 'Required to Withdraw from the Advanced Program', recorded on their transcript of marks.

6.1 Program Information

Physical Geography includes the study of the environment through aspects of atmospheric science, geomorphology, biogeography, and hydrology, all of which draw upon the natural and applied sciences to understand the natural environment. Atmospheric sciences examine the physical and biophysical processes at and near the earth's surface shaping climate and determining the weather. These processes are examined over cascading scales, local to global. Hydrology studies the flow of water between the Earth's surface and the atmosphere, including the quantity and quality of water resources as well as the spatial variability in the hydrologic cycle.

The examination of processes at the earth's surface and the associated landforms is called geomorphology. Various sub-disciplines in geomorphology include weathering and erosional processes, volcanoes, glacial and river systems. Biogeography studies the interrelationships between the biospheric environment and the physical environment. Formation of soils, ecosystem and biome cycles and components, as well as human interaction with the physical environment are all topical areas in biogeography.

Geomatics is an emerging field referring to the techniques of spatial data acquisition, handling, and analysis. Included within this field have been geographic applications of computer analysis and spatial modeling, spatial statistics, remote sensing technology, and geographic information systems. Many of these techniques have their origins in the applied sciences, but both physical and human geographers have contributed greatly to their development and application. The application of such methodologies in geographic fields, such as resource management, urban geography, climate change, and applied geography has also provided closer co-operation between human and physical geography, as well as promoting considerable interdisciplinary research with other University disciplines.

The Major and Honours B.Sc. degree programs in Physical Geography serve students who desire advanced study in the academic subject matter of various themes contained within Physical Geography. The Honours program in particular is intended for students interested in the opportunity for exposure to advanced geographic research. As such, the Honours program demands higher academic performance. Students who are ineligible to enter Honours in their second year may establish this in the following year on the basis of their improved scholastic performance. The degree programs may be pursued on a full or part-time basis.

Minor in Another Department

Students in the B.Sc. Physical Geography have the opportunity to complete a Minor in a subject field that is different than that of the declared Major, and which normally consist of 18 credit hours from a department offering this option at the University of Manitoba. Students in the B.Sc. Physical Geography are not permitted to complete a Minor in the B.A. Geography. Students can declare only one Minor. The Minor requirements are described in section 3.3 of this *Chapter*. Contact a Riddell Faculty student advisor in the faculty general office for further information about eligible Minors.

Streams

Students are required to complete a stream approved by a Riddell Faculty student advisor. Students in the Major or Major (Coop) programs are required to complete a minimum of 30 credit hours of 2000- (or higher) level courses, of which at least 18 credit hours must be at or above the 3000-level. The B.Sc. Honours and Honours (Coop) programs require students to complete 39 credit hours in a Stream, of which at least 24 credit hours are defined at or above the 3000-level and must include *GEOG 4660 Honours Thesis* (6). Streams are currently available in *Atmospheric and Hydrological Sciences*, *Geomatics* and *Physical Geography*. See the department

and/ or a Riddell Faculty student advisor for current information about these Streams.

Major

To qualify for the degree, Bachelor of Science in Physical Geography (Major), a student must complete 120 credit hours with passing grades ('D' or better) and a minimum degree grade point average of 2.00. Major (Coop) students must attain a minimum degree Grade Point Average of 2.50. Students must complete all faculty requirements. There is no limit to the number of credit hours a student completes provided he/she does not exceed 18 credit hours of failed courses.

Honours

To qualify for the degree Bachelor of Science in Physical Geography (Honours and Honours Coop), a student must complete 120 credit hours with

passing grades ('D' or better) and a minimum degree grade point average of 3.00 in the courses that constitute the degree. Students must complete all faculty requirements. There is no limit to the number of credit hours a student completes provided he/she does not exceed 18 credit hours of failed courses.

6.2 Entrance Requirements

Students complete the first-year of their degree program in University 1 where they select courses from a wide variety of offerings including from the Clayton H. Riddell Faculty of Environment, Earth, and Resources. Students admitted from University 1 are placed in the Major degree program until they have completed a minimum of 48 credit hours after which they may transfer to the Honours program or remain in the Major. To make a program transfer, students must consult a Riddell Faculty student advisor.

6.3 Minimum Performance Requirements for Continuation and Graduation

A student's academic performance will be assessed with his/her application for admission to the Clayton H. Riddell Faculty of Environment, Earth, and Resources and following each term thereafter. A Riddell Faculty student advisor must approve a student's registration each Fall/Winter and Summer term. Any revisions in this schedule should also be approved prior to the end of the registration revision period.

To be in **good standing** and permitted to continue in a degree program, a student must achieve the minimum standards at each point of assessment. This assessment is based on the student's minimum degree Grade Point Average; the grades received in each of GEOG 1290 (or GEOG 1200, GEOG 1201, GEOG 1291), GEOG 2200 (or GEOG 2221), GEOG 2250 (or GEOG 2251), GEOG 2300, GEOG 2310, GEOG 2440, GEOG 2550, GEOG 3680; and the number of failed courses after admission to the Clayton H. Riddell Faculty of Environment, Earth, and Resources.

To **graduate** from the Bachelor Science in Physical Geography with the intended degree designation, a student must achieve the minimum standards and graduation requirements outlined above in 6.3.1 following the final term of registration and satisfy all degree course requirements in the foundation, physical geography core and Stream.

Students in the Honours program who do not meet these minimum performance requirements for continuation or graduation will be withdrawn from the degree program and placed in the Major provided they are eligible based on their performance. Students who do not meet the minimum performance requirements of the Major will be placed on academic warning, probation or academic suspension as defined in section 3.14 Academic Warning, Probation and Academic Suspension in this *Chapter*.

Students withdrawn from the Honours program as a result of their inability to meet minimum performance requirements will have the notation, 'Required to Withdraw from the Honours Program,' recorded on their transcript of marks. Similarly, students withdrawn from the Major program will have the notation, 'Required to Withdraw from the Major Program,' recorded on their transcript of marks.

7.1 Program Information

The Clayton H. Riddell Faculty of Environment, Earth, and Resources offers General, Major, and Honours degree programs leading to a Bachelor of Environmental Science (B.Env.Sc.) and Bachelor of Environmental Studies (B.Env.St.). Through an interdisciplinary approach, environmental issues relating to human populations, sustainable resource development, pollution and conservation, environmental health, and endangerment and preservation of species are explored in conjunction with alternative conditions that have the potential to reverse current trends and contribute to ecological sustainability. Students have access to undergraduate courses offered by the Clayton H. Riddell Faculty of Environment, Earth, and Resources as well as the Faculties of Agricultural and Food Sciences, Arts, Law, Engineering, Architecture, and Science in order to complete their education. They are expected to take many courses outside the Riddell Faculty enabling them to obtain a truly interdisciplinary education.

The Major and Honours degree programs serve students who desire advanced study in an environmental field. The programs are intended for students interested in professional training and the opportunity for advanced research. Honours degree programs demand higher academic performance and lead most directly to graduate studies. Students who are ineligible to enter the Honours degree program in their third year may establish this in the following year on the basis of their improved scholastic performance. See a Riddell Faculty student advisor in the Faculty general office for information. The degree programs may be pursued on a full- or part-time basis.

The B.Env.Sc. and B.Env.St. degree programs share a general structure that includes a foundation of either introductory Sciences or Social Sciences/Humanities. Students complete an environmental core and a Focus Area that is defined through consultation with a Riddell Faculty student advisor in the Faculty general office. Students completing the General degree program are required to complete 9 credit hours in a Focus Area; Major, Major Coop, Honours and Honours Coop students complete 33 credit hours in a Focus Area. Other Focus Area requirements are defined in the graduation requirements in section 7.3.1 in this *Chapter*.

7.3 Minimum Performance Requirements for Continuation and Graduation

A student's academic performance will be assessed with his/her application for admission to the Clayton H. Riddell Faculty of Environment, Earth, and Resources and following each *term* thereafter. A Riddell Faculty student advisor must approve a student's registration each Fall/Winter and Summer term. Any revisions to this schedule should also be approved prior to the end of the registration revision period.

To be in **good standing** and permitted to continue in a degree program, a student must achieve the minimum standards outlined in 7.3.1 at each point of assessment. This assessment is based on the student's minimum degree Grade Point Average and the number of failed courses after admission to the Riddell Faculty.

To graduate from either a Bachelor of Environmental Science or the Bachelor of Environmental Studies with the intended degree designation, a student must achieve the minimum standards and graduation requirements outlined in 7.3.1 following the final term of registration and satisfy all de-

gree course requirements in the foundation, environment core and Focus Area as defined in section 7.1 of this *Chapter*. In addition, students must satisfy the residence requirement by completing either a total of 48 credit hours or their last 24 credit hours at the University of Manitoba. These courses must be acceptable for credit in either the Bachelor of Environmental Science or the Bachelor of Environmental Studies.

Students who do not meet these minimum performance requirements for continuation or graduation will be required to transfer to the appropriate program based on their performance and eligibility as defined in 7.3.1. Students who do not meet the minimum performance requirements for the General degree program will be placed on probation or academic suspension as defined in section 3.14 Academic Warning, Probation and Academic Suspension in this *Chapter*.

Students required to withdraw from the Honours degree program will have the statement 'Required to Withdraw from the Honours Program' recorded on their transcript of marks. Similarly, students required to withdraw out of the Major degree program will have the statement 'Required to Withdraw from the Major Program' recorded on their transcript of marks.

¹Students must satisfy the residence requirement for the degree program in order to be eligible for graduation. This is defined as either a total of 48 or the last 24 credit hours at the University of Manitoba.

7.4 Graduating with Distinction or First Class Honours

With Distinction

Students graduating with a Bachelor of Environmental Science (General) or Bachelor of Environmental Studies (General) degree will have their degree granted 'With Distinction' if they have a minimum Degree Grade Point Average of 3.50 on all course work.

Students graduating with a Bachelor of Environmental Science (Major) or Bachelor of Environmental Studies (Major) degree will have their degree

granted 'With Distinction' if they have a minimum Degree Grade Point Average of 3.50 on all course work.

The term Degree with Distinction will appear both on the parchment and on the student's transcript of marks.

8.2 Program Information

The Geological Sciences deal with the history of the Earth and its life, especially that which is recorded in rocks. Different component parts of the Earth system, the *lithosphere*, *biosphere*, *atmosphere* and *hydrosphere*, operate at different length and time scales. During interactions between the spheres there is feedback between the component parts as energy and mass are exchanged, transferred and redistributed. In a geological context, the feedback can occur on a global scale, or on very small scales such as that which we see in minerals. More recently humans have become a major force in this Earth system because we have intervened in many of these exchanges.

Considering the Earth's past, geoscientists typically work with long time scales (in the order of millions to billions of years). We also use Hutton's original philosophy of *uniformitarianism*, stated as *the present is the key to the past*, to solve geological problems. However, as we see changes at the Earth's surface (our environment) occurring on very short time scales we need to learn to extract the signal of human activity from the Earth's pre-human past. Once we understand and quantify the nature and extent of the Earth's natural evolution as well as our more recent environmental impact, geological sciences can help predict future changes to the Earth.

Geology and Geophysics are the sciences that provide the quantitative data on the physical and chemical behaviour and characteristics of Earth materials - rocks, minerals, fluids and gases. These data are needed to model the behaviour of minerals in natural as well as many industrial systems. The theoretical and instrumental expertise needed to tackle many resource extraction, mineral processing and environmental problems is resident in geological science departments. From a broad Earth, environmental and resource perspective our collective future will depend on sustainable use of our Earth's resources and care of the environment.

The three-year General program in Geological Sciences is designed to give students a basic understanding of the discipline in combination with a concentration of courses in a second subject area. The General Program is not intended for those students who seek a career in the geosciences. Rather, it is a useful consideration for students planning to enter the Bachelor of Education program (see the Faculty of Education in this calendar) or other programs that require an undergraduate degree for admission. Students intending to pursue a career in the geosciences or graduate study should hold an Honours or Major degree (comprising at least 120 credit hours) in Geology or Geophysics.

Professional Registration

The professional practice of geoscience in certain provinces and territories in Canada is governed by provincial/territorial law and is regulated by pro-

fessional geoscience associations. In Manitoba, the Association of Professional Engineers and Geoscientists (APEGM) regulates professional practice. The requirements for professional registration are acceptable academic preparation and a subsequent period of acceptable geoscience experience. Students considering professional registration should take the B.Sc. Geological Sciences Honours or Major degree **and** make appropriate course selections, particularly in the basic sciences. Students should consult with the Department of Geological Sciences. Graduates who do not meet the academic requirements may be required by the professional association to take additional courses or examinations. Current registration information for APEGM is available in the department or from the association's web site: www.apegm.mb.ca

Geological Sciences Prerequisite Information

To fulfil prerequisite requirements, a grade of 'C' must be achieved in any course stipulated as a prerequisite to a further course in Geological Sciences.

8.3 Degree Regulations

8.3.1 B.Sc. in Geological Sciences (Major) Geology or Geophysics

The Major programs in Geology and Geophysics are designed for students interested in combining an in-depth study of Geology and Geophysics with broad coverage of another subject or subjects of their choice (Science or non-Science). Admission to graduate programs may be conditional upon completion of additional courses or require a period of pre-Master's study. Students intending to proceed to a Master's degree must consult with the department at the beginning of their second year of undergraduate study and in each subsequent year. The Major program may be pursued on a part-time basis, although it must be recognized that students may require additional terms to complete degree requirements.

To qualify for the degree, a student must complete a minimum of 120 credit hours with passing grades ('D' or better) in each course and with a minimum degree grade point average of 2.00 as indicated in the Graduation Requirements Table (see section 8.3.5). Students must complete all Faculty requirements as well as the university written English and Mathematics requirement as described in the *Chapter*, General Academic Regulations and Policy, in this *Calendar*.

Students admitted to the Major program will normally have completed University 1 requirements, which include six credit hours of courses from the Faculty of Arts, six credit hours of courses from the Faculty of Science and six credit hours from either the Clayton H. Riddell Faculty of Environment, Earth, and Resources, the Faculty of Arts or the Faculty of Science. Students who do not meet this requirement while in University 1 must do so within the Major program.

Minor in Another Department

Students in the B.Sc. Geological Sciences have the opportunity to complete a Minor in a subject field that is different than that of the declared major, and which normally consist of 18 credit hours from a department offering this option at the University of Manitoba. Students in the B.Sc. Geological Sciences are not permitted to complete a Minor in Geological Sciences. The Minor requirements are described in section 3.3 of this *Chapter*. Contact the department and/or a Riddell Faculty student advisor in the Faculty general office for further information about eligible Minors.

Entrance to the Major

To enter a Major program in Geology or Geophysics, a student must have completed at least 24 credit hours with a minimum Grade Point Average of 2.00 as stipulated in Entrance and Continuation Requirements Table (see section 8.3.4). In addition, the student must attain the minimum grade requirements specified for individual Year 1 courses according to the program tables for the Major in Geology (section 8.4) or the Major in Geophysics (see section 8.5). Students who do not obtain the entrance requirements for the Major program in their first year but who are interested in obtaining the Major degree should consult with the department.

Continuation in the Major

A student's academic performance is assessed first with his/her application for admission to the Riddell Faculty and then following each *term* in which the student is registered. To be in **good standing** and permitted to continue in the degree program, a student must maintain a minimum Grade Point Average of 2.00 as stipulated in the Entrance and Continuation Requirements Table (section 8.3.4). Students are not limited in the number of repeated courses and failures. Students who do not meet the minimum

performance requirement will be placed on academic warning, probation or academic suspension as outlined in section 3.14 Academic Warning, Probation and Academic Suspension in this *Chapter*. Students who do not maintain this minimum average to remain in the program will be required to withdraw from the Major program. Students will have the notation 'Required to Withdraw from the Major Program', recorded on their transcript of marks.

Failed courses: A student is required to repeat those failed courses that are specified as required courses for the program. Students are subject to the University of Manitoba regulations (see General Academic Regulations and Policy, Repeating a Course as described in this *Calendar*) and the *Riddell Faculty degree regulations regarding eligibility to repeat a course*. Students who need to repeat a course more than once to fulfil degree requirements must contact a Riddell Faculty student advisor for approval prior to registration.

Program approval

The department head (or designate) and a Riddell Faculty student advisor in the Faculty general office must approve a student's Major program each term. Students must also obtain departmental approval for all revisions to their programs.

Graduation in the Major

In order to graduate from the Geology or Geophysics Major, students must complete all degree program and faculty requirements as stipulated in sections 3 and 8 of this *Chapter*. Students must also achieve the minimum performance requirements as outlined in the Graduation Requirements Table (see section 8.4.4). This is defined as a minimum Degree Grade Point Average of 2.00 on 120 or 121 credit hours which constitute the degree.

Residence Requirement for Major Students

A student must successfully complete a minimum of 60 credit hours at the University of Manitoba. The courses used to satisfy the requirement must be acceptable for credit in the Clayton H. Riddell Faculty of Environment, Earth, and Resources. Residence requirements apply both to first and second-degree students.

Recognition of Academic Merit

Degree with Distinction

To obtain a degree with distinction a student must achieve a minimum 3.50 Degree Grade Point Average on all courses constituting the Major degree. The term 'Degree with Distinction' will appear both on the parchment and on the student's transcript of marks.

8.3.2 B.Sc. in Geological Sciences (Honours) Geology or Geophysics

The Honours programs are the most heavily concentrated programs offered and lead most directly to graduate studies. A student is required to achieve higher grade standards than in the Major degree program. The Honours degree may be pursued on a part-time basis, although it must be recognized that students will require additional terms to complete degree requirements. Students must complete the degree program within 8 years of gaining initial admission to the Honours program. Failure to complete the Honours degree within the 8-year time limit may require a student to transfer into the Major program.

A student will normally begin the Honours program in second year and must meet the entrance requirements set out below. Students in full-time study can expect to complete the prescribed courses in three years beyond the first year of University 1. Honours programs lead to either the B.Sc. Geological Sciences (Hons.) (Geology) or the B.Sc. Geological Sciences (Hons.)(Geophysics).

To be eligible for any award granted exclusively on the basis of academic performance, a student must normally be enrolled in a full-time program as defined by the department.

Students must complete the University Written English and Mathematics requirement as described in the chapter, General Academic Regulations and Policy, of this *Calendar*.

Entrance to Honours

To enter the Honours program in Geology or Geophysics, a student must have completed at least 24 credit hours with the minimum Degree Grade Point Average as stipulated in the Entrance and Continuation Requirements Table (section 8.3.4). In addition, the student must attain the minimum grade requirements specified for individual Year 1 courses according to the program tables for Honours Geology (section 8.4) or Honours Geo-

physics (section 8.5). Students who are ineligible to enter Honours with their admission to the Riddell Faculty may establish eligibility the following year on the basis of their second year of academic performance.

To enter the Honours degree program, a student must complete a program approval form available in the department general office and have it approved by the department head, or designate, and a Riddell Faculty student advisor in the Faculty general office.

Continuation in Honours

A student's academic performance is assessed first with his/her application for admission to the Riddell Faculty and then following each *term* in which the student is registered. To be in **good standing** and permitted to continue in the degree program, a student must maintain the performance requirement as stipulated in the Entrance and Continuation Requirements Table (section 8.3.4). Students are not limited in the number of repeated courses and failures. Students who do not meet the minimum performance requirements will be placed on academic warning, probation or academic suspension as outlined in section 3.14 Academic Warning, Probation and Academic Suspension in this *Chapter*. Students who do not maintain this minimum average to remain in the program will be required to withdraw from the Honours program and, if eligible, will be placed in the Major program. Students will have the notation 'Required to Withdraw from the Honours Program' recorded on their transcript of marks.

Program Approval

The department head (or designate) and a Riddell Faculty student advisor in the Faculty general office must approve a student's Honours program each term. Students must also obtain departmental approval for all revisions made to their programs.

Residence Requirement for Honours Students

A student must successfully complete a minimum of 60 credit hours at the University of Manitoba. The courses used to satisfy the requirement must be acceptable for credit in the Clayton H. Riddell Faculty of Environment, Earth, and Resources. Residence requirements apply both to first and second-degree students.

Graduation from Honours

In order to graduate from the Honours Geology and Geophysics programs, students must complete all degree program and faculty requirements as stipulated in sections 3 and 8 of this *Chapter*. Students must also achieve the minimum performance requirements as outlined in the Graduation Requirements Table (see section 8.4.4). This is defined for the Honours Geology program as a minimum Degree Grade Point Average of 3.00 on 120 credit hours which constitute the degree and for Honours Geophysics as a minimum Degree Grade Point Average of 2.80 on the 120 (121) credit hours which constitute the degree.

Recognition of Academic Merit

First Class Honours

To graduate with **First Class Honours**, a student must achieve a Degree Grade Point Average of 3.50. The term 'First Class Honours' will appear both on the parchment and on the student's transcript of marks.

Honours Program Notes:

Double Honours Programs

Double Honours programs may be available. The program must be arranged in consultation with the departments concerned.

Honours Requirements and Options

Students who do not obtain the entrance requirements for the Honours program in their first year but who are interested in obtaining an Honours degree should consult with the department before registering for their second year.

Honours Geology Options

For students who wish to increase the focus of their knowledge, recommended electives are listed below:

Environmental Geoscience: BIOL 2300 (or AGECE 2370), CIVL 4250, SOIL 4060, SOIL 4130, SOIL 4500, GEOL 4290, GEOL 4370, GEOL 4630, GEOG 3610, ENVR 2180 (BIOL 2380 or AGR1 2180), ENVR 3110, ENVR 3250, or others approved by the department. (Students are responsible for completion of prerequisites for these courses.)

Honours Geophysics Option

Students who wish to enter the Honours Geophysics Option and have not taken 6 credit hours of introductory Geological Sciences (eg., GEOL 1340 and one of GEOL 1400, GEOL 1410, or GEOL 1420) may arrange with the department to make up this credit. Students must contact the department during the spring preceding entrance to the Honours program. All course choices in the Honours program should be made after consultation with the coordinator of the Geophysics program

8.3.3 B.Sc. in Geological Sciences (General)

Degree Program Structure

- A Geological Sciences component consisting of a minimum of 30 credit hours.
- A Minor of 18 credit hours (minimum) in a different department or an interdisciplinary program. e.g. in the Clayton H. Riddell Faculty of Environment, Earth, and Resources, or the Faculty of Arts, or the Faculty of Science. The Minor requirements are described in section 3.3 of this *Chapter*.
- Students will normally have completed University 1 requirements, which include 6 credit hours from the Faculty of Arts, 6 credit hours from the Faculty of Science. Students who have not met these requirements while in University 1, must meet the requirements prior to graduation.

Entrance to the General

To be admitted to the General program, a student must have completed at least 24 credit hours with a minimum Cumulative Grade Point Average of 2.00. In addition, a student must have completed GEOL 1340 with the grade of 'C'. Refer to Table 8.6 for further program requirements.

Continuation in the General

Failed courses: A student is required to repeat those failed courses that are specified as required courses for the program. Students are subject to the University of Manitoba regulations (see General Academic Regulations and Policy, Repeating a Course as described in this *Calendar*) and the *Riddell Faculty degree regulations regarding eligibility to repeat a course*. Students who need to repeat a course more than once to fulfil degree requirements must contact a Riddell Faculty student advisor for approval prior to registration.

Graduation in the General

To qualify for the degree, students must complete 90 credit hours, inclusive of Geological Sciences courses, a minor in a second department or program, and any University 1 requirements. Minimum performance requirements include passing grades ("D" or better) in each course, a minimum degree grade point average of 2.00 in Geological Sciences courses, and an overall degree grade point average of 2.00 on the 90 credit hours which constitute the degree. Note: Where a Geological Sciences course listed in the calendar has required prerequisites, a student must hold a minimum grade of "C" in each prerequisite course.

Residence Requirement for General Students

Students must complete a total of 48 credit hours at the University of Manitoba, or they must complete their final 30 credit hours at the University of Manitoba in order to satisfy the residency requirement. SECTION 2: Extended Education

Extended Education provides a central focus for adult, distance, mature and summer continuing education in the university and undertakes planning and general administration for these programs and services. Insofar as possible, the university accepts the principle of parity of accessibility to its services in all areas of the province regardless of economic, geographic, physical, or social disadvantage.

Extended Education coordinates a wide range of programs through which degree courses and non-degree or certificate courses are offered. Degree courses are drawn from the offerings of various faculties and schools. Students must apply to, be admitted to, and register in a particular faculty or school to receive credit towards a degree.

SECTION 3: Program Areas

3.1 Aboriginal Focus Programs

Area Director: Dr. Rainey Gaywish

General Office: The University of Manitoba-Downtown:
Aboriginal Education Centre, 11 The Promenade

Telephone: 204-982-4233

The Aboriginal Focus Programs area of Extended Education offers a range of programs that are designed to respond to the continuing education needs and concerns of Aboriginal people. The mission of the area is to create paths of choice in post-secondary education that are based on Indigenous worldviews and developed through partnerships with Indigenous Peoples and communities.

AFP offers certificate and diploma programs as well as degree programs through cooperative arrangements with Aboriginal stakeholders and faculties of The University of Manitoba. Programs are offered in a central location, as in-house training to staff of an organization, or as community-based programs. Programs are offered as 'open enrolment' or as block-funded cohort programs through an arrangement with an employer or sponsor. Delivery methodology can be part-time or full-time study, and can incorporate technology-based delivery where technology access permits. Aboriginal organizations that identify a need for specific post-secondary or adult education not currently available may be interested in knowing that AFP has the capacity to develop new programs to meet their needs. The following are programs currently being offered:

Degree/Diplomas	Years to Complete	Total Credit Hours
Aboriginal Environmental Stewardship Diploma	2	60
Aboriginal Community Wellness Diploma	2	60
Aboriginal Child and Family Services Diploma	2	60
Health Careers Transition Year	1	21 to 24
General Transition Year	1	21 to 24
Non-Degree – Certificates		
Aboriginal Counselling Skills Certificate	1	346 contact hours
Child Sexual Abuse Intervention & Treatment Certificate	1	380 contact hours
Special Education Educational Assistant Certificate	1	480 contact hours

Aboriginal Child and Family Services Diploma

This off-campus program provides field staff of Aboriginal agencies in Manitoba the knowledge and skills they require to deliver child and family services as outlined by Manitoba's Child and Family Services Act, and as directed by the Aboriginal Child and Family Services agencies.

Aboriginal Counselling Skills Certificate

This foundation program gives individuals in the helping professions, who are employed by First Nation and/or Aboriginal social service agencies, knowledge and skills in how to provide culturally appropriate counselling services to individuals and families. The Faculty of Social Work offers graduates three allocated and 6 unallocated hours of credit.

Aboriginal Environmental Stewardship Diploma

This diploma is a partnership program between Aboriginal focus Programs and the University of Manitoba's Clayton H. Riddell Faculty of Environment, Earth and Resources, the Faculty of Arts; Department of Native Studies and Building Environmental Aboriginal Human Resources (BEAHR). This two-year diploma will address the assessment, monitoring, protection, management, sustainability, legal requirements and current issues in the environmental field. All courses include both Aboriginal and western world views on the environment. BEAHR will coordinate work experience for students enrolled in this diploma making it easier to obtain employment upon graduation.

Child Sexual Abuse Intervention and Treatment Certificate

The disclosure of sexual abuse, as in the residential school experience, has highlighted the need for counsellors with specialised expertise. The CSAIT program builds on prior training and experience in counselling.

Health Career Transition Year

This program enables students to gain the knowledge, skills and confidence needed to successfully pursue a professional health career. Students take a combination of preparatory and degree credit courses (21 – 24 credits) over one year. Tutorial, personal, financial and Aboriginal cultural supports are available to students.

Aboriginal Community Wellness Diploma

This newly revised degree credit program provides a professional development opportunity in community wellness for Aboriginal health and wellness service workers and those wishing to enter the field. The program is offered through a partnership between The University of Manitoba and the Manitoba Community Wellness Working Group. Each course in the program incorporates an indigenous wellness perspective. The diploma is designed to meet the educational needs for generic and specialized fields of practice (e.g., addictions).

Special Education Educational Assistant Certificate

This program provides culturally relevant accredited training for teacher assistants who work with special needs children under the direction of classroom and/or resource teachers.

Transition Year (18 to 24 credit hours)

The off-campus Transition Year is designed to facilitate the successful transition of students from their community to full-time post-secondary study. Emphasis is on building students' academic and personal skills through specific support to students such as expanded instruction, tutorial support and orientations to the expectations of post-secondary education programs. A minimum of 18 credit hours of university courses is offered in the Transition Year.

3.2 Access Programs

Interim Director: Brenda Lee Lafreniere

University of Manitoba Access Program (UMAP)

In cooperation with the Province of Manitoba, the University of Manitoba Access Program (UMAP) facilitates university studies at the degree level for persons who traditionally have not had the opportunity for such experience because of social, economic and cultural reasons, lack of formal education or residence in remote areas. Preference will be given to Aboriginal Manitobans (Status, Non-status, Metis or Inuit). Students in this program are provided with academic and personal supports. Financial assistance may be available. For information, call 474 8000 or, within Manitoba, 1 800 432 1960, extension 8000.

Health Careers Access Program (HCAP)

This program is designed to prepare Manitoban Aboriginal persons (Status, Non-Status, Metis, or Inuit) for entry to the health professional programs such as Medicine, Dentistry, Dental Hygiene, Pharmacy, Medical Rehabilitation (Physical and Respiratory Therapy) and Nursing. Through the coop-

eration of the Province of Manitoba and the University of Manitoba, students in this program are provided with academic and personal supports. Financial assistance may be available. For information call 474 8000 or, within Manitoba, 1 800 432 1960, extension 8000.

Professional Health Program (PHP)

This program is designed to support Aboriginal persons (Status, Non-Status, Metis, Inuit) in any of the professional health programs. Housed within the new Aboriginal Centre for Health Education at the Bannatyne Campus this program provides academic and personal supports. Limited financial assistance may be available. For information call 474 8000 or, within Manitoba, 1 800 432 1960, extension 8000.

Education Access Program (EAP)

The Education Access Program (EAP) is a joint partnership between the Faculty of Education and the Access Program. EAP provides students with supports to complete a Bachelor of Education (B.Ed.) degree at the University of Manitoba. Because the Bachelor of Education degree is an after-degree program, EAP students must complete their first degree with Access.

Students who identify teaching as their profession of choice must participate in a workshop series ("Destination Education") that is designed to enrich their awareness of the teaching field and the B.Ed. program. All students identifying education as their career choice will be assigned to the designated Access Education Academic Advisor. For information call 474-8000 or, within Manitoba, 1-800-432-1960 extension 8000. umanitoba.ca/education

Section 4: Information Applicable to All General Studies Students

4.1 Academic Assessment Policy

Academic Assessment gauges student success at the University. Formal academic assessment shall be done following each academic term for all General Studies students who have completed 30 credit hours or more of attempts. In order to be in "good standing" in General Studies, a student must achieve a degree Grade Point Average (GPA) of 2.00 or greater at each assessment period. Students in "good standing" may continue in General Studies or, preferably, transfer to a target faculty.

Students who do not achieve a degree GPA of 2.00 will be placed "on probation", which will appear on the student's transcript. Once "on probation", a student will be allowed to register for another term (or terms). At each point of assessment, students "on probation" must achieve a term GPA of 2.00 in order to proceed. In order to clear probation, a student must achieve a degree GPA of 2.00. While "on probation", students are encouraged to consult the General Studies student advisor prior to registration and on a regular basis thereafter.

If a student does not succeed in achieving a term GPA of 2.00, they will be placed on "academic suspension" for one calendar year. A student on "academic suspension" is normally not allowed to register in another faculty or school at the University of Manitoba or to attend any other post-secondary institution during the time of suspension. Following the suspension period, a student may reapply for admission to General Studies

4.2 Credit Hour Policy

In an effort to assist students with academic decisions, all students who have completed 45 credit hours of study with General Studies will be required to meet with a student advisor before being allowed further registration. Until such time as the student meets with the advisor, a block will be placed on their record to prevent further registration (*policy is currently under review*).

4.3 Transferring to Other Faculties or Schools

General Studies students will need to determine the specific subject and credit hour requirements of the faculty to which they plan to apply. This information is available in the *Undergraduate Calendar* (umanitoba.ca/calendar) or from the General Studies office. Students are encouraged to apply to a faculty of their choice as soon as the requirements have been satisfied.

Entry to every faculty and school requires a formal application for admission or transfer of faculty form to be submitted to the Admissions Office. Admission dates and forms are available at the Admissions Office, 424 University Centre or on the Admissions Office website at umanitoba.ca and click on *Apply for Admission*. It is always in your best interest to seek admission or transfer to a faculty or school as early as possible.

1.4 Professional Designations

Graduates of the Integrated Human Ecology and Education program are eligible to receive the professional certificate to teach at any level (K-12) in Manitoba providing all standards are met as established by the Province of Manitoba. See the Faculty of Education chapter for more details.

Graduates from the Human Nutritional Sciences program who have completed the Dietitians of Canada (DC) accredited undergraduate degree with courses as stipulated by DC may apply for a dietetic internship either through Pre-Selection by the Manitoba Partnership Program (MPP) or by application to dietetic internship programs in the final year of their degree or after completion of their degree.

Home economists in Manitoba, and other provinces, are regulated by legislation. Graduates may apply to the Manitoba Association of Home Economists (MAHE) for interim professional home economist (IPHE) status, and subsequently qualify as a professional home economist (PHEC).

SECTION 2: Admission Requirements for the Faculty of Human Ecology

Admission requirements are described in an applicant information bulletin that is available together with application deadline dates and forms from the Admissions Office, Enrolment Services, 424 University Centre. Detailed admission information is posted on the university website: http://www.umanitoba.ca/student/admissions/application/deadlines/human_ecology/.

General Entrance Requirements to the Faculty of Human Ecology: A minimum adjusted grade point average (AGPA) of 2.0 in at least 24 credit hours of University 1, including 6 credit hours from Arts and 6 credit hours from Science to total 12 credit hours, plus 12-18 credit hours of other University 1 courses, for a total of 24-30 credit hours. Students must complete at least 6 more credit hours of Arts or Science courses once admitted to the Faculty.

Other requirements for university study

High school prerequisites required for University level courses in certain programs: Mathematics 40S (pre-calculus or applied) and Chemistry 40S are required for the science requirements in Human Nutritional Sciences, the Interdisciplinary Health program, and textiles courses in Textile Sciences. Students who consider subscribing to the Engineering Sciences option in Textile Sciences must have pre-calculus Mathematics 40S, Physics 40S, and Chemistry 40S. Students planning to take BIOL 1020 for any program must have Biology 40S and any Grade 12 Mathematics course.

Minimum Adjusted GPA for consideration: 2.0.

The written English and Mathematics requirements are satisfied by required courses HMEC 2030 and STAT 1000 within the Human Ecology program. HMEC 2030 will be available to students upon admission to the Faculty of Human Ecology.

For students wishing to choose the focused approach for entry to the Faculty of Human Ecology, the course requirements for each of the programs or areas of concentration offered by the Faculty of Human Ecology are described in the U1 Start Book found at <http://umanitoba.ca/student/u1/start-book/index.html>.

SECTION 3: Faculty Academic Regulations

The provisions of the chapter, General Academic Regulations and Requirements, and the chapter, University Policies, apply to all students. In addition, the Faculty of Human Ecology has regulations and requirements, published below, that apply specifically to its students.

3.1 Prerequisite, Corequisite, and Course Availability: Definitions

Prerequisite: If a course is prerequisite to a second course, the prerequisite must be met in order to continue in the second course. The department giving the second course may require a minimum grade of 'C' in the

first course to register in the second course. Some inactive (legacy) courses may be used as prerequisites. Please check with an Academic Advisor in Human Ecology.

Corequisite: If a first course is a corequisite to a second course, the first course (unless previously completed) must be taken in the same term as the second course.

Course Availability: Not all courses listed in this Calendar are offered every year. Students are referred to the on-line calendar for courses offered in the year. Human Ecology courses at the 3000 and 4000 level are available only to students registered in the Faculty of Human Ecology or one of the minors or options associated with the Faculty. Courses at the 3000 and 4000 level may be taken with written permission from an Academic Advisor as long as there is space.

3.2 Scholastic Standards

Graduation and Grade Point Average

To graduate, a student must have passed 120 credit hours acceptable for credit in the current degree program and have obtained a minimum of 240 quality points. This is equivalent to a Degree Grade Point Average of 2.0. A pass indicates a grade of 'D' or better. A student's Degree Grade Point Average (DGPA) will be determined from the number of effective courses which apply at a particular stage. The effective courses consist of all courses passed, in addition to all failures which have not been cleared, or substituted for, in the students record. A maximum of 150 credit hours (25 courses or the equivalent) may be attempted in order to obtain the 120 credit hours. Effective for the admissions cycle beginning September 2009, to graduate, students in the Interdisciplinary Health Program (IHP) must attain a Degree Grade Point Average of 2.5 (300 quality points on 120 credit hours) on graduation and meet the probation standards as stated below.

Assessment

The status of each student will be assessed in May of each year in which a student is registered.

Probationary Standing

Students must achieve or exceed the following standards at the specified stages in their academic careers. Failure to obtain the standard results in probation. Once placed on probation, students who fail to meet the appropriate performance level at the next assessment following the next registration will be academically suspended. A student is not permitted to be on probation for two consecutive years.

Probationary Standards

Effective Credit hours	Minimum DGPA
24-30 hours	1.80
33-60 hours	1.85
63-90 hours	1.90
93-117 hours	1.95
120+ hours	2.00

Probationary Standards - Interdisciplinary Health Program

Effective Credit hours	Minimum DGPA
24-30 hours	2.00
33-60 hours	2.20
63-90 hours	2.40
93-117 hours	2.50
120+ hours	2.50

Suspension

Suspended students must remain out of the Faculty of Human Ecology for one academic year from the date of suspension and must apply for reinstatement at the Admissions Office no later than May 1.

Where mathematically possible for a suspended student to complete the degree by repeating failed courses, a suspended student shall be automatically reinstated after remaining out of the faculty for one calendar year, or by achieving a degree GPA above the probationary standard.

Suspension (All Attempts Used)

Where it is mathematically impossible for a student to complete the degree by repeating failed courses, a suspended student, after remaining out of the faculty for one calendar year, may attempt reinstatement. By completing at least 12 credit hours in one term with a minimum 'D' grade in all courses and a term grade point average of at least 2.0, the student will be reinstated. The student will start the program afresh, with previous grades of 'C' or better applicable to the program.

3.3 Part-time Students

The maximum time allowed for completion of the degree is 10 years. After completion of 24 credit hours, part-time students will be evaluated each May and must conform to the minimum performance levels.

3.4 Repeating Courses

A student may repeat any course for the purpose of attaining a better grade. The latest registration of a repeated course will count in GPA calculations. There are no supplemental examinations for students who have failed final or deferred examinations.

3.5 Challenge for Credit

A student wishing to challenge a course for credit should contact an Academic Advisor. Letter grades are granted upon completion of the course that is challenged for credit. A list of courses for challenge is available in the General Office. An application is required.

3.6 Transfer of Credit

See the chapters on Admissions and Academic Regulations and Requirements at the beginning of this *Calendar*. Students from faculties other than University 1 or from other institutions must make an appointment with an Academic Advisor by the end of their first academic year to arrange for transfer of credit.

3.7 Appeals of Academic Regulations

The Faculty Committee on Student Standing considers petitions from students who request special consideration with respect to rules and regulations governing their programs of study and qualification for graduation.

3.8 Dean's Honour List

Eligible students who achieve term Grade Point Averages of 3.5 or higher in at least 12 credit hours per term will be included in the Deans Honour List.

3.9 Degree With Distinction

Students who graduate with a degree GPA of 3.75 and higher will receive a degree with distinction.

3.10 Work Permit for Study Purposes

International students who are registering for courses or programs that require work placement must obtain a valid **Work Permit**, in addition to maintaining a valid Study Permit. Work placement includes, but is not limited to, any **paid or unpaid** practicum, internships, work experience, field placement, and co-op programs that are a required component for the completion of their degree, diploma or certificate. Please contact your program advisor or the International Centre for Students for further information.

3.11 Release and Indemnification Forms

In elective courses, students may be required to sign a release form for off-campus activities.

3.12 Written English and Mathematics Requirements

The written English and Mathematics requirements are satisfied by required courses HMEC 2030 and STAT 1000 within the Human Ecology program. HMEC 2030 will be available to students upon admission to the Faculty of Human Ecology.

SECTION 4: Program and Graduation Requirements

Within an overall health promotion orientation, the mission of the Faculty of Human Ecology is to sustain, develop and transmit knowledge that supports individuals and their interactions in families and communities as they enhance their quality of life and improve their physical and social environments. Our teaching and research integrates both basic and applied sciences, incorporating innovative technologies and emergent areas of knowledge. The Faculty of Human Ecology contributes to the health of people in Manitoba, Canada and elsewhere by promoting good health.

This health promotion contribution is distinct from the treatment of ill health. The Faculty uses the WHO (World Health Organization) definition of health as the framework for planning and activities: *A state of complete physical, mental and social well-being and not merely the absence of disease or infirmity*. The Faculty uses the Ottawa Charter definition of health promotion: *The process of enabling people to increase control over, and to improve, their health (Ottawa Charter for Health Promotion, 1986)*.

Programs in the Faculty of Human Ecology are specialized to meet the needs of students, employers and society. Scholarship, learning and research range from metabolic and clinical aspects to psychological, behavioural and community aspects. The Faculty's work extends along the continuum from cellular and biochemical aspects to health related products and policies. Study in the Faculty in one of seven undergraduate programs offers background that can lead to career opportunities in business and industry, dietetics and institutional administration, education, social services, government and research. We are one of the founding units of the University of Manitoba; our graduates have contributed to improving human health and well-being locally, nationally, and internationally for 95 years.

Students entering the Faculty will select one of the following six programs:

- Family Social Sciences Program
- Health Sciences Program
- Health Studies Program
- Human Ecology Program
- Human Nutritional Sciences Program
- Textile Sciences Program

In order to qualify for a degree, students must complete the 120 credit hours (123 for TS, Eng. Sci. option) specified for the selected program. Elective choices provided in each program can permit students to transfer between them; however, this opportunity decreases as students progress. Students who transfer to another program must meet the full requirements of that program. There is a quota in effect for intake to each program per academic year. The quota may affect movement into a program after the September intake.

4.1 Advisement

The Faculty will provide entering students with orientation information and will refer a student to a program advisor if the student requests. The program advisor will be a Faculty member from the student's department or program. Individual programs of study for returning students will be planned in consultation with departmental representatives at sessions scheduled in March of each year. All returning students in the Faculty of Human Ecology must submit a program plan for the succeeding year before the end of the Winter term.

4.2 Faculty Program Requirements

The following are the guidelines for the program requirements in the faculty. The courses outlined for each program in the sections which follow, meets these basic requirements.

Admitted in September 2005 or Later:

- A faculty core of 9 credit hours consisting of:

Course No.		Credit Hours
HMEC 2030	Human Ecology: Perspectives and Communication	3
HMEC 2050	Introduction to Research in Human Ecology	3
HMEC 3100	Communication for Professional Practice	3

- Plus a minimum of 51 additional credit hours within the faculty;
- Plus a minimum of 30 additional credit hours outside the faculty of which at least 6 credit hours must be from the Faculty of Science and six from the social sciences;
- Plus a minimum of 12 additional credit hours of free electives leading to a degree requirement of 120 (123) credit hours.

Notes:

1. Students in the Interdisciplinary Health Program complete PSYC 2250 in lieu of HMEC 2050 and may choose HMEC 3100 as an elective.

2. Students admitted before September, 2005 and graduating after May, 2005, will make the following program adjustments because of the deletion of the former 028.408 (HMEC 4080) as a degree requirement.

- Family Social Sciences students must complete an additional 3 credit hours of Faculty electives at the 3000 or 4000 level.
- Human Ecology program students must complete an additional 3 credit hours of Faculty electives.

- Human Nutritional Sciences students must complete an additional 3 credit hours of free electives.
- Textile Sciences students must complete an additional 3 credit hours of free electives.

4.3 Program Electives

Courses within each program fall into one of three categories:

- Department electives must be chosen from within the program department.
- Outside electives must be chosen from a faculty other than Human Ecology.
- Free electives may be chosen from within or outside the Faculty of Human Ecology.

4.4 Family Social Sciences

Applying knowledge from the social and physical sciences, students in Family Social Sciences examine factors affecting human psychosocial health and wellbeing. They study human development from infancy to old age within the context of families, communities, and culture.

Students are required to choose at least one area, or option, in which to focus their studies. The name of their option will appear as a “comment” on their transcripts. They may select from the following options: 1) Aging; 2) Child and Adolescent Development; 3) Family Economic Health; 4) Family Violence and Conflict Resolution; 5) Social Development. Family Social Sciences graduates are permitted to complete any option after their degree as a Special Student.

The Family Social Sciences program can provide students with academic preparation or complementary courses for programs such as Law, Social Work, Education or Graduate Studies.

In March of each year, program planning sessions are provided to assist students in their selection of courses for subsequent years of study.

4.5 The After Degree Program in Family Social Sciences

An After Degree Program (ADP) in Family Social Sciences is offered to students who have completed a previous undergraduate degree. ADP students must complete 60 credit hours in total to earn their second degree in Family Social Sciences. All Family Social Sciences U1 prerequisites are waived. In order to facilitate ADP students completing the program in a timely manner, they will automatically be permitted (without special permission from the course instructor) to take Family Social Sciences 2000 level prerequisites as corequisites for any required Family Social Sciences 3000 and/or 4000 level courses. Please consult with the Student Advisor when planning programs prior to registration. ADP students are required to choose at least one option to specialize in and meet its requirements at the second year level and beyond. These 18 credit hours may include courses external to the Faculty of Human Ecology that are required to complete an option. If a second option is not chosen, then these credit hours must be taken within the department. There are no free electives in the ADP.

STAT 1000	Basic Statistical Analysis (see note 8)	3
TOTAL	60	

NOTES:

1. The same entrance requirements will be applied to ADP students in order to maintain current Faculty of Human Ecology standards.
2. Basic social science knowledge is assumed because ADP students have previously completed an undergraduate degree; waiving U1 requirements for FSS courses acknowledges the skills, background and maturity of this particular group of students.
3. This choice provides students who have previously taken a research methods course with the option of avoiding redundancy in their program. Students are free to take all three core courses if they feel it would benefit them. If students select 9 credit hours of core courses, the FSS electives component is reduced to 15 credit hours.
4. This set of courses is currently required of all undergraduate FSS students and is required for students in the ADP.
5. Students are required to take a minimum of any two (6 credit hours) of the introductory level courses across options. Review the list of options found in the 120 credit hour undergraduate degree program to assist with planning for prerequisites for higher level courses.
6. Each FSS option is a total of 18 credit hours; ADP students will have taken at least one 2000 level course (3 credit hours) required by the chosen option as part of their program requirements, leaving the remaining 15 credit hours to be completed to fulfil the option. Completion of the option may include courses external to the Faculty of Human Ecology that are required to complete an option.
7. ADP students are encouraged to specialize in two options simultaneously to strengthen and broaden their expertise. If a second option is chosen, these credit hours may include courses external to the Faculty of Human Ecology that are required to complete the option. If students have completed the 2000 level course required for the second option, the requirement to complete the option is 15 credit hours. If a second option is not chosen, then these credit hours must be taken within the department.
8. Students who have previously completed an undergraduate statistics course can either transfer it in directly (if already assessed as equivalent) or can request to have it assessed for advanced standing; if successful, students will be required to add 3 credit hours to their program from courses selected from the Department of Family Social Sciences.

4.6 The Family Social Sciences Minor

A minor in Family Social Sciences is offered by the Department of Family Social Sciences. Students must complete 18 credit hours, distributed as follows: Six (6) credit hours in Family Social Sciences at the 1000 level, and at least three (3) credit hours in Family Social Sciences at the 2000 level, and at least three (3) credit hours in Family Social Sciences at the 3000 or 4000 level, with no more than 6 credit hours at the 1000 level.

Students must check with their home Faculties to see if the Family Social Sciences minor is available in their programs.

4.7 Human Ecology Program

Chair: Gustaaf Sevenhuysen

The Human Ecology program is one of five degree choices in the Faculty of Human Ecology and is designed for students who have career goals that require basic preparation in each of the major subject areas of the faculty. The program provides course work in Human Nutritional Sciences, Textile Sciences and Family Social Sciences as well as the requirement of an 18 hour Minor in a related field – the minor designation will also appear on the student's transcript. The program has a large elective course component to permit students to select courses to meet individual interests and

career options. Persons who intend to select this program are advised that high school Chemistry 40S and Mathematics 40S are prerequisites to CHEM 1300 University 1: Structure and Modeling in Chemistry, which is highly recommended as an elective course.

Before entering continuing years in the Faculty of Human Ecology, the overall program must be planned in consultation with the Chair or committee member. Course planning sessions are held in March of each year.

4.8 Human Nutritional Sciences

Head: James D. House

Students majoring in Human Nutritional Sciences will choose the Nutrition Option, the Foods Option, the Food Industry Option, or will select the second degree in Human Nutritional Sciences. The educational requirements to qualify for a dietetic internship and membership with the College of Dietitians of Manitoba (CDM) or dietetic colleges in other Canadian provinces may be met within the Nutrition Option with the recommended selection of courses. Students can apply for a dietetic internship during the program (see application requirements and procedures for Pre-Selection by the Manitoba Partnership Program), in the final year of their degree or after completion of their degree. Internships are awarded competitively by external institutions. Review the section on academic requirements for eligibility to apply for a dietetic internship for students admitted in September, 2007 and later. Those who plan to enter Human Nutritional Sciences are advised that high school Chemistry 40S and Mathematics 40S are prerequisites to CHEM 1300 University 1: Structure and Modeling in Chemistry. A student admitted to the Human Nutritional Sciences program must take a minimum of one HNSC required course in the year they are admitted. Before entering continuing years in the Faculty of Human Ecology, the overall program must be planned with departmental advice. Sessions are held in March of each year.

Students admitted in September 2010 or later must register for at least one HNSC course (3 credit hours) in order to stay in the Human Nutritional Sciences program.

Students admitted to the Faculty of Human Ecology's Department of Human Nutritional Sciences in September, 2007 or later, will be eligible to apply to be pre-selected by the Manitoba Partnership Dietetic Education Program (MPP) after completion of 60 – 90 credit hours. Details of the pre-selection process and the academic rating selection criteria will be published by the MPP and a link is available on the Faculty of Human Ecology's web site. If students are not pre-selected by the MPP, there are other opportunities to apply in the final year of degree for internships following degree completion.

3. For those intending to apply for a Dietetic internship, the second degree's Dietetics Preparation program meets the course requirements in Human Nutritional Sciences, but not all the other supporting course

requirements, for example, psychology/sociology, humanities or social sciences, microbiology, research methods, communication arts, basic principles of management. Check with an Academic Advisor to review the supporting course requirements from previous academic work.

4.11 Interdisciplinary Health Program

Program Chairperson: Caroline Piotrowski

This curriculum consists of two degree programs: the Bachelor in Health Sciences and the Bachelor in Health Studies. These degree programs offer new approaches to planning, administration and delivery of health services by fully integrating biological science and social science in understanding the health of people. Students will gain experience of dealing with health issues at the individual, community and institutional levels, as well as across the lifespan. The two degrees can serve as the foundation for careers in health care teams and community health management. They offer a general course of study, not a professional status. Students can use both degree programs to build the knowledge and prerequisites for entry into professional programs in the health and social science fields, such as medicine, dentistry and others. The Bachelor of Health Sciences degree provides students with an interdisciplinary background and skill set that will contribute to their preparation for a future in biomedical and health-related careers. This interdisciplinary skill set is seen as advantageous for future physicians and students applying for professional education.

Notes:

1. Before entering continuing years in the Faculty of Human Ecology, the overall program must be planned with academic advice. Sessions are held in March of each year.
2. Students are strongly encouraged to seek the advice of Academic Advisors in the Faculty of Human Ecology in order to plan their programs to develop pathways of knowledge that will assist them in moving toward careers in chosen fields. Advice is available in the Dean's Office and on the Human Ecology web site.
3. Students in both programs are required to structure their course selections as follows:

In Health Sciences, students are required to take 21 credit hours of science and 12 credit hours of social science courses from 36 credit hours of Approved Electives.

In Health Studies, students are required to take 21 credit hours of social science and 12 credit hours of science courses from 36 credit hours of Approved Electives.

Students in both programs are required to take at least 24 credit hours at the 3000 and 4000 levels from 36 credit hours of Approved Electives. Students in both programs are required to take at least 21 credit hours from List A, at most 6 credit hours from List B and at most 3 credit hours from List C from 36 credit hours of Approved Electives.

Students should consult the University Calendar to ensure that they have the appropriate pre- or corequisites before they attempt to register in a course. A number of courses are cross-listed between departments/faculties. The Student Advisor will give additional guidance.

4.12 Textile Sciences

Acting Head: Tammi Feltham

The Textile Sciences undergraduate program imparts knowledge and skills which meet the demands of work and research environments driven by scientific, technological, and logistical innovations in textiles. It comprises two streams – product development and textile development. The product development stream is structured to help students develop problem solving abilities systematically through the application and integration of knowledge in textile science, human and organizational behaviour, environmental forces, and methods of quantifying and interpreting observations. The textile development stream is a response to the emerging

significance of textiles in health and health promotion. Within the textile development stream, three options will be offered – Exercise and Sports Science, Engineering Sciences, and Microbiological Sciences. These options capitalize on the strengths of other academic disciplines within the University of Manitoba which are relevant to the study of textiles for health and health promotion. Students who choose the textile development stream must have pre-calculus Mathematics 40S or the former Mathematics 40S and Chemistry 40S. Students who consider subscribing to the Engineering Sciences Option must have pre-calculus Mathematics 40S, or the former Mathematics 40S, Physics 40S, and Chemistry 40S. Students must choose either the Textile Development or Product Development choice upon first registration in the Faculty.

In March of each year program planning sessions are provided to assist students in their selection of courses for subsequent years of study.

4.13 Textile Sciences Minor

A minor in Textile Sciences is offered by the Department of Textile Sciences. Students must complete 18 credit hours, distributed as follows: A maximum of six (6) credit hours in Textile Sciences at the 1000 level, and at least three (3) credit hours in Textile Sciences at the 2000 level, and at least three (3) credit hours in Textile Sciences at the 3000 or 4000 level, with no more than 6 credit hours at the 1000 level.

Students must check with their home Faculties to see if the Textile Sciences minor is available in their programs.

4.14 Interfaculty Option in Aging

An Option in Aging is offered by and in the following faculties: Arts, Human Ecology, Nursing, Kinesiology and Recreation Management and Social Work.

To complete the option, students in Human Ecology must complete each of the following requirements:

- HMEC 2650 or REC 2650 or SWRK 2650, The Social Aspects of Aging;
- NURS 2610 or KIN 2610, Health and Physical Aspects of Aging;
- At least three credit hours of professional/discipline specific applied work on aging within the student's department of registration (a list of courses is available in the general office); and,
- An additional nine credit hours of aging-related courses from the participating units; a list is available in the General Office. Upon completion of these requirements, a "comment" will be added to the student's transcript.

Further information is available from the General Office of Human Ecology.

4.15 The Minor in Management

A Management Minor is offered by the Asper School of Business. Human Ecology students may complete this Minor as part of the electives portion of their programs. The Minor will consist of any 18 credit hours of Management courses. Students must meet prerequisites for all courses. Further information is available from the Human Ecology General Office.

4.16 The Voluntary Minor

Students in the Faculty of Human Ecology may declare and complete a Minor from departments and interdisciplinary programs in which a Minor is offered. The Family Social Sciences Minor and the Minor in Human Nutrition and Metabolism are available through the Faculty of Human Ecology. Information about Minors in programs other than Human Ecology is found in the appropriate description of departmental/school/faculty program offerings in the Undergraduate Calendar.

Completion of the Minor is entirely optional. Students may not, however, declare both their Major and Minor from the same department/interdisciplinary program. No course may be used as part of a prescribed program in the Faculty of Human Ecology and also be part of a prescribed Minor. For example, if a course in Chemistry is part of a student's degree requirements in the Faculty of Human Ecology, it cannot be used as part of a Minor in another program. Completion of a Minor may require that a student take more than the minimum number of credit hours for graduation.

Students are encouraged to contact an Academic Advisor in the faculty office for information on how to optimize their transfer credit.

2.3 Visiting Students

Students who are enrolled and pursuing a degree at another institution may apply to be a visiting student with the Faculty of Kinesiology and Recreation Management. A Letter of Permission from the home institution granting permission to register for courses from the University of Manitoba is required in order for access to be granted to those courses.

2.4 Special Students

After-Degree Special Students

Students who have successfully completed a first degree program who are not seeking another degree and wish to take courses from the Faculty of Kinesiology and Recreation Management are eligible for admission as Special Students.

SECTION 3: Faculty Academic Regulations

All students are asked to note that some academic policies and regulations are under review and are subject to change. Please check the Web Calendar at umanitoba.ca for updated information.

The provisions of the following chapters from the Undergraduate Calendar (University Policies, and General Academic Regulations and Requirements) apply to all students. In addition, the Faculty of Kinesiology and Recreation Management has regulations and requirements, published below, that apply specifically to its students.

Attendance and Withdrawal

Students absent from class for three or more days due to illness are required to present a certificate from a physician. Unexcused absence of more than three hours of class time in a theory course or experiential learning course may result in the student being required to withdraw from the course or may result in an "F" grade being assigned.

Dean's Honour List

Students enrolled in 12 credit hours or more who achieve a Term Grade Point Average of 3.50 or higher will be placed on the Dean's Honour List. The Dean's Honour List will be calculated after each term (i.e. Fall, Winter, and Summer).

The Dean's Honour List designation will appear on the student's transcript.

University Gold Medal and Program Medals

Gold Medal

The Faculty of Kinesiology and Recreation Management will award the University Gold Medal to the graduating student who:

- 1) has achieved the highest grade point average of all graduating students (minimum 3.75) on courses constituting the last two years of an eligible program (and including no transfer courses in the applicable years); and,
- 2) has completed at least 80 percent of what is considered to be the normal full course-load in each of the last two years of the eligible program.

Program Medals

There are two program medals awarded each year in the Faculty of Kinesiology and Recreation Management to the two students with the highest standing (according to the University Gold Medal criteria) in the programs in which the winner of the University Gold Medal in Kinesiology and Recreation Management is not registered (the three programs are Physical Education, Kinesiology, and Recreation Management and Community Development).

Degree with Distinction

Awarded to students who graduate with a cumulative Degree Grade Point Average of 3.8 or higher. The notation of 'Degree with Distinction' will appear on the student's parchment and transcript.

Challenge for Credit

PERS 1500 Foundations of Physical Education and Kinesiology is open to challenge for credit. Students must demonstrate their competence in this course before challenging (e.g., students with significant professional experience and training who may have the necessary knowledge; transfer students who may have completed several related courses at other institutions that are not directly equivalent to PERS 1500). The Academic Schedule in the front section of this Calendar contains the relevant registration deadline dates appropriate to challenge for credit.

Leave of Absence

Students who have not registered for a full academic session will need to reactivate their status by contacting the Faculty General Office and must consult with an Academic Advisor. Students who have been absent from study for more than 5 years or have attended another institution since their last registration (not on a Letter of Permission) will have to re-apply for admission to the university.

Time Limit for Completion of the Degrees

Students admitted to the Bachelor of Physical Education, Bachelor of Kinesiology, or Bachelor of Recreation Management and Community Development degree programs must complete all requirements to graduate within ten years of admission to the program. Students with questions relating to the time limit regulation should consult the Undergraduate Program Administrator.

Academic Integrity

The Faculty of Kinesiology and Recreation Management adheres strictly to the University of Manitoba Student Discipline By-Law and will enforce these regulations. It is the responsibility of the student to know what constitutes academic dishonesty. Plagiarism or any other form of cheating is subject to academic penalty, which could be as serious as suspension or expulsion from the faculty or university. Students are encouraged to avoid academic misconduct by learning more about the University of Manitoba regulations at:

http://umanitoba.ca/student/resource/student_advocacy/index.html

Student Academic Appeals

A student who wishes to appeal an academic regulation or decision should consult the Associate Dean (Academic). The Faculty has an academic appeals process for students who wish to appeal a policy or decision affecting their program of study.

SECTION 4: Program and Graduation Requirements

The following requirements apply to students in all four undergraduate degree programs in the Faculty. The four degree programs have a base of shared introductory core courses, as well as shared upper level courses with a professional focus. Shared core courses are intended to ensure students recognize the interconnections across our Faculty and its related fields of practice, and to facilitate the professional education of students.

To remain in Good Standing students must achieve a minimum Term GPA of 2.0. Students with a Term GPA of less than 2.0 will be given an academic warning, and will be reinstated in Good Standing provided their following Term GPA is 2.0 or greater. Students who fail to be reinstated will be placed on Probation. Students are expected to progress through the Athletic Therapy program as outlined below. It is strongly recommended that courses be completed in the sequence and year indicated, otherwise an additional year may be required.

Successful completion of BIOL 1020 and BIOL 1030, with a minimum grade of "C", or BIOL 1000 and BIOL 1010, with a minimum average grade of "C+", is an eligibility requirement for admission to the Athletic Therapy Program.

Valid Basic Rescuer CPR and Standard First Aid certification is required before the beginning of each term of registration (if lapsed, students must recertify). Athletic Therapy students must also register as members with both the Manitoba Athletic Therapists Association (MATA) and Canadian Athletic Therapists Association (CATA) each year while in the program.

Athletic Therapy Practica (KIN 2910, KIN 3910, & KIN 4910)

Students in the Athletic Therapy Program will be required to complete several hours of clinical and field (sports team) experiences on campus and in the community during each year of their degree. These experiences provide opportunities to apply the knowledge and skills students obtain via their educational curriculum, in a practical hands-on manner, and therefore enhance their preparation for the Canadian Athletic Therapy Association (CATA) examinations. Prior to registering in each practicum (KIN 2910, KIN 3910, KIN 4910) students must have successfully completed, or be registered in, all of that year's courses. Students must successfully complete the previous year's practicum prior to registering in the following year's courses.

Information for All Students

Degree Requirements and Course Selection

It is the student's responsibility to have read this *Undergraduate Calendar and Registration Guide* carefully, and to know all relevant university and faculty regulations, policies and practices. Completion of degree requirements is the responsibility of the student. Returning students should contact their advisor if they have any questions concerning their curriculum.

Faculty Academic Advisor

If you require further registration information after reading both this *Registration Guide* as well as the current *Undergraduate Calendar*, contact the Kinesiology and Recreation Management staff, 8:30 a.m. - 4:30 p.m. Monday - Friday.

Faculty Orientation Sessions:

All new students entering the faculty must attend one of the following faculty Orientation Sessions or they will otherwise be blocked from registration:

Tuesday, July 6, 2009; 6:30 – 8:30 p.m.; 136 Frank Kennedy Building
Thursday, July 8, 2009; 6:30 – 8:30 p.m.; 136 Frank Kennedy Building

At this session students will receive important information regarding their program, registration, and an orientation manual. Upon acceptance into the faculty, students from other provinces will be mailed an orientation

manual and should contact an Academic Advisor to discuss registration in advance.

Special Students/Visiting Students

Those registering as Special Students or Visiting Students in the faculty must contact an Academic Advisor in order to register.

Sequencing and Prerequisites

Planning the sequence of courses is essential. Several faculty courses in all degrees require successful completion of another course in order to register. Please check current catalogue course descriptions in your program to ensure that you achieve what is necessary for enrolment in future terms.

Repeating Courses

When a course is repeated, the *most recent* attempt of that course will be included in the calculation of the degree grade point average; however, *both* grades will appear on a student academic history and official transcript. If a student wishes to repeat a course in which a grade has previously been assigned, they should contact an Academic Advisor for the necessary registration override prior to initial access. Students will be permitted to repeat a failed faculty-required course only once while in the program. Students who fail the same faculty-required course twice will normally be required to withdraw from the program.

Academic Assessment: Academic Warning, Probation and Suspension

Students whose last assessment was "On Probation" should review the BPE / BKin / BRMCD scholastic standards in the current *Undergraduate Calendar*. Students on Probation will be blocked from registering for the next applicable term until they have contacted an Academic Advisor. A student whose last term assessment was "On Suspension" will be unable to register for one full calendar year. Students who wish to return to studies upon completion of their suspension are required to apply through the Admissions Office. Students who wish to appeal matters concerning their academic status should contact the Faculty of Kinesiology and Recreation Management Dean's Office.

Course Space Reserves

Each degree program requires courses from outside faculties and departments. Specific sections in the following required courses have spaces reserved for students:

Recreation Management and Community Development: There are select reserved sections for STAT 1000.

Kinesiology/AT: There are select reserved sections for BIOL 2410, BIOL 2420, STAT 1000, and ABIZ 1000.

Physical Education: There are select reserved sections for BIOL 1410 and BIOL 1412.

Students with the appropriate program code, major and/or minor will be able to access the reserve section of a required course. These courses can be identified in the Class Schedule as having section codes that appear as R01, R02...during registration initial access.

Minors

Kinesiology and Recreation Management students may choose and declare an external minor offered by the Faculty of Arts, Clayton H. Riddell Faculty of Environment, Earth, and Resources, Faculty of Human Ecology, Faculty of Science, Faculty of Management, Marcel A. Desautels Faculty of Music, or School of Art. Completion of a minor is optional. See the applicable Faculty and Department chapters for the requirements of each minor. Minors must be declared with an Academic Advisor at the Faculty General Office.

In order to declare the Management Minor from the I. H. Asper School of Business, Faculty of Kinesiology and Recreation Management students must achieve a 3.0 DGPA (or higher). If a student has successfully completed 18 credit hours of course work from the Faculty of Management, and a 2.0 GPA in the Management course work by the time of graduation, the Minor in Management may also be declared upon completion of the degree program.

Education Teachable Minors

Students who intend to apply for admission to the Faculty of Education after completing their BPE degree should review the information in the cur-

rent *Undergraduate Calendar* and consult with the Faculty of Education to ensure they are selecting an appropriate teachable minor and courses for their choice of Early, Middle or Senior Years stream.

Recreation Services Membership

If you are registered for courses that require a facility pass, this should be purchased before classes begin. Students report to the Frank Kennedy Customer Service Desk to obtain or renew a facility membership by presenting a current proof of registration. Master of Laws (LL.M.)	6	161-163 and Thesis

*This includes two years (60 credit hours) of study in an undergraduate program.

Under the following heading is a summary of the admission requirements. Equivalent academic courses completed at recognized universities elsewhere will be considered. All admission requirements, as well as application deadline dates and forms, are included in an applicant information

bulletin that is available from the Admissions Office, Enrolment Services, 424 University Centre; this information is also posted on the university's website.

*The Master of Laws is a thesis-based program designed for completion in one year after the completion of a three year LL.B. program. The program consists of participation in the Graduate Legal Theory Seminar, two additional courses and completion of a substantial thesis. Further details are available through the LL.M. website: www.umanitoba.ca/law/newsite/research.php. Applicants should also consult the Faculty of Graduate Studies website: umanitoba.ca/graduate_studies/.

SECTION 2: The Profession and the Faculty of Law

The Faculty of Law is a professional faculty within the university. As the only faculty of law in Manitoba, it is the principal "gatekeeper" to professional practise in this province. However, it is more than merely a trade school for future practitioners. The Faculty of Law is also a university faculty and, as such, it views the study of principles, concepts and the relationship of law with other aspects of our social system to be as integral to a legal education as are the practical training of techniques and mechanics. Accordingly, our program emphasizes a balance between doctrinal, clinical and perspective courses, each of which contributes to an understanding of the law, its application, and its proper role within a civil society.

The University of Manitoba first became involved in legal education in 1884 when it established a three-year program of studies leading to an LL.B. degree. It was a reading program which articulated students could follow concurrently with the course prescribed by the Law Society of Manitoba. In 1914, the university and the Law Society entered into an agreement to jointly sponsor the Manitoba Law School, which offered a three-year program combining lectures with apprenticeship. Upon completion of the program, a successful student received both an LL.B. degree and a call to the Bar. This arrangement lasted until 1966 when the Law School became the Faculty of Law of the University of Manitoba.

The Faculty of Law is located in Robson Hall, which contains the E.K. Williams Law Library, the Moot Court, state of the art computer classrooms, and a remarkable collection of art. The Law library is a resource not only to law students and faculty but also the legal profession of Manitoba, and the general public.

There are truly countless Manitobans who have contributed to legal education in Manitoba over the years. Two names stand out, namely H.A. Robson and E.K. Williams, who were the only two chairs of the Board of Trustees of the Manitoba Law School. Their contribution has been commemorated in the names of the faculty's building and library.

2.1 The Study of Law

Legal education in Canada is divided into two phases: the academic study of law at one of the university law schools and practical training under the auspices of a provincial law society for those who wish to be admitted to practise and called to a Bar. As there is a reciprocal recognition of university law degrees between the common law provinces (all provinces except Quebec), the academic study can be taken in any one of these provinces.

A sound education in law provides a good foundation for a great variety of careers. In the past most law graduates have entered the private practise of law to concentrate on various types of legal work: real estate transactions, commercial contracts, company law, family law, taxation, etc. Contrary to popular belief only a few lawyers concentrate on court work and even fewer specialize in criminal cases. While the tendency to specialize in the practise of law is becoming more prevalent, most lawyers continue to be general practitioners prepared to perform most types of legal work according to the needs of their clients.

Besides the private practice of law, law graduates can join the legal departments which many corporations find it expedient to maintain; others enter the employ of various government departments to serve in a variety of capacities. A few pursue nonlegal vocations in, business, journalism, social work, and law enforcement. At the University of Manitoba consideration is given to the fact that while most students take law to become practising lawyers, some are taking law as an additional discipline to enhance their opportunities in fields other than the practise of law; thus, while the emphasis is on the academic study of substantive law, the study is carried on in a practical context.

2.2 Clinical Learning

The curriculum invites critical assessment of the role of law in society as well as the development of skills relevant to the practice of law. In addition to lectures and seminars, students are given an opportunity to develop, under supervision, some of the research, writing, and forensic skills which will prove useful in the practise of law. In first year, students are acquainted with the various resource materials available in a law library, and they follow a program designed to develop legal research and writing techniques. In second and third years, students participate in moot courts, fictitious trials and appeals, which provide practise in research, examination of witnesses, and courtroom argument. This advocacy training is just one element of the program at Robson Hall that contributes to the excellent reputation of our graduates. In third year students may choose from a range of Clinical Courses or may participate in national competitive moot competitions.

Throughout their legal studies students may serve actual legal clients through volunteer work with the University Law Centre or Pro Bono Students. The University of Manitoba Law Centre commenced operation in 1970 with the two-fold purpose of furthering clinical education by exposing law students to actual legal problems and aiding persons who are unable financially to hire a lawyer or receive legal service through the existing Legal Aid Service Society of Manitoba. The centre, as presently constituted, is the official adjunct of the Legal Aid Service Society of Manitoba and supervised by practising lawyers and members of the Faculty of Law. Second and third year Law students can work at the centre. Pro Bono Students Canada at Robson Hall is part of a national network that facilitates placing law students with not-for-profit organizations in their community to provide free or "pro bono" legal information. Each project is supervised by a practicing lawyer and offers the opportunity for students to apply the skills they learn in classes while at the same time providing a valuable service to traditionally underrepresented groups and not for profit organizations. Students can participate in "pro bono" projects in any year of their program.

2.3 Research and Publications

Research and scholarly writing are integral elements of the mission of the University and the law school. Professors research, write and consult with the larger legal community in their particular area of expertise and students have similar opportunities. Each year students must take a perspective course which provides an opportunity to explore a particular area of law in depth. Perspective courses have limited enrolment and students must research and write a major paper.

Students may also devise a self directed research project under the supervision of an individual faculty member. Other opportunities to participate in scholarly work exist. The Legal Research Institute, created in 1968, coordinates legal research projects initiated within the Faculty of Law and works also on specific problems referred to it by public and private parties. Under the auspices of the Institute students may work as research assistants to professors during the summer or term. Students also have the opportunity to work as editors of Robson Hall's scholarly publications, including the *Manitoba Law Journal*, the *Asper Review of International Business and Trade Law* and *Underneath the Golden Boy*. It is a great honour to be selected for the editorial boards of these publications and provides academically oriented students with excellent hands-on experience working with renowned scholars.

2.4 Faculty of Law Centres of Excellence

Robson Hall is home to two named research chairs. The Marcel Desautels Chair in Private Enterprise and the Law has a mandate to conduct research and provide education on issues of specific interest to the privately held or family owned businesses that are the engine of the Canadian economy. Whereas many business oriented programs in Law schools are directed towards the needs of larger, publicly traded national or transnational corporations, the Desautel Centre's focus is on the very different needs of smaller more closely held businesses. The Faculty of Law also operates the Kerry

Vickar Small Business Law Clinic which is headed by a director who is assisted by volunteer mentors from the practising bar. The purpose of the clinic is to provide experience to second and third year Law students in assessing and analyzing the legal needs of small business owners and in preparing legal information useful to them. This gives the students hands-on experience in this important area of law practice. It also provides "clients" with background material informing them as to their legal needs which helps them in their dealings with their own lawyers. In 1999, the Faculty of Law established the Asper Chair of International Business and Trade Law. The Asper Chair sponsors a variety of research including bi-annual academic conferences in international business and trade law. An internship program allows up to four students a year to work with the Asper Chair and creates opportunities for students to advance their education, while gaining skills necessary to pursue careers in law or business with an international focus. Additionally, students involved in the Asper program have the opportunity to participate in international commercial dispute resolution competitions.

2.5 Student Organizations

All Law students are members of the Manitoba Law Students' Association (MLSA), the student government. Student participation in Faculty governance takes place through the representation of elected members of the MLSA. The association also organizes many extracurricular activities. All Aboriginal Law students and other interested Law students are members of the Aboriginal Law Students' Association through which they address issues of concern to them. In addition students may participate in a variety of other student run extracurricular activities ranging from sports (hockey, curling) to academic (Canadian Lawyers for International Human Rights, Manitoba Association of Women and the Law, Business Law Group, Internet Law Group).

SECTION 3: Admission to Law

3.1 Course Requirements for Admission to LL.B. Program

Applicants must complete 60 credit hours, 30 credit hours in University 1 and 30 credit hours in any degree program. Because many students complete an undergraduate degree before applying to Law, it is recommended that students consider these degree requirements when choosing courses.

Other Requirements

The mathematics requirement must be completed in the first 60 credit hours, that is during the two pre-Law years. The LL.B. program fulfils the University's English requirement.

All applicants must write the Law School Admission Test (LSAT).

Minimum GPA for consideration: Very competitive, see applicant information bulletin at the Faculty's website (www.umanitoba.ca/faculties/law).

Selection criteria: 50% on grades and 50% on the LSAT score.

SECTION 4: Academic Regulations

All students are asked to note that some academic policies and regulations are under review and are subject to change. Please check the Web Calendar at www.umanitoba.ca for updated information.

The provisions of the chapter, General Academic Regulations and Requirements, and the chapter, University Policies, apply to all students. In addition, the Faculty of Law has regulations and requirements, published below, that apply specifically to its students.

4.1 Residence requirements for the LL.B. Degree

To obtain the LL.B. degree from the University of Manitoba, ordinarily a student must successfully complete two of the three years of the LL.B. program at the University of Manitoba. The remaining year may be completed at another law school as approved by the Admissions Committee or the Dean's office.

4.2 Licence to Practise Law

Upon graduation from the LL.B. program, all graduates who wish to be admitted to practise and called to the Bar must apply to the Law Society of

the province in which they wish to practise. Most, if not all, of the law societies require applicants to complete satisfactorily a bar admission course usually comprising a period of articles of clerkship and, in addition, seminars and courses. It should be noted that although an LL.B. degree qualifies graduates to apply for a licence to practise, it does not entitle them to such a licence, the granting of which is entirely within the purview of the law societies. The Law Society must be satisfied as to the good character and repute of its applicants, as well as their academic competence and qualifications. Inquiries with regard to the Province of Manitoba should be made to the Secretary, or the Director of Education, Law Society of Manitoba, 201 - 219 Kennedy Street, Winnipeg, Manitoba, R3C 1S8.

4.3 Regulations of the Faculty of Law

Regulations of the Faculty of Law, as amended from time to time governing attendance, evaluation, prizes, and progression may be consulted at the Faculty's website (www.umanitoba.ca/faculties/law).

4.4 Miscellaneous Registration Matters

The dean's office, with the recommendation of a special faculty-based committee if so requested, shall, subject to appeal to the Faculty Council, consider and determine all applications from students admitted to the faculty: 1) for a letter of permission, with conditions, to take part of their law studies for credit at the University of Manitoba, at another university; 2) for permission, with conditions, to defer their law studies for a period of one or more academic years after successfully completing first or second year, and to permit such students to re-register following such an absence; 3) for permission to withdraw before completing the academic year for which they are then registered and to permit, in the case of a student who withdraws from first year under exceptional circumstances, that student to re-register for a subsequent academic year as a supernumerary student, and in the case of a second or third year student, to permit such student to re-register for a subsequent academic year; in all cases with or without conditions; 4) for permission to switch from the full-time program to the half-time program and vice versa.

4.5 Curriculum Requirements

In the event that a student fails to properly select courses and to register within the normal registration period, the dean's office may reject the courses selected by the student and assign courses to that student and such assignments shall ordinarily be final.

In addition to the regular classroom hours, there are seminars and workshops involved in some of the courses. The faculty may limit the enrolment in any optional course.

SECTION 5: Program Requirements

This Section describes the program requirements that are in effect for the 2010-2011 academic year. However, prospective students should be aware that the Faculty of Law regularly reviews its curriculum to ensure that it continues to meet the current needs of our students. As part of that process, courses may be added to, or deleted from, the required program, and the number of credit hours assigned to individual courses may change. Additionally, the number of credit hours required in each year of the program is also subject to change.

Complete all 126 credit hours required in the Bachelor of Commerce (Honours) program, including the 24 credit hours that comprise the specific Track 1 requirements, the Core requirements, the course requirements for one Major, Business Options, and Elective courses. After admission to the Asper School, students in Track 2 must complete all outstanding courses listed in the Track 1 requirements and achieve a minimum grade of "C" in each course.

Students who are admitted to the Asper School of Business who have completed more than the minimum 24 credit hours requirement of Track 1 or Track 2 may be eligible to receive transfer credit for the additional work completed, provided the additional course work is creditable toward the degree requirements of the Bachelor of Commerce (Honours).

Students who are admitted to the Asper School of Business following the completion of another degree program are eligible to receive a maximum of 60 hours of transfer credit for applicable courses completed as part of their first degree. Students who, within their first degree, have more than 60 hours of transferable credits would be required to take substitute courses for credits in excess of the 60 hour limit on transfer.

Students who have a degree and in addition have completed further courses at the University of Manitoba which are applicable to the B. Comm.(Hons.) program that were not used for credit toward their first degree may receive additional transfer credit for that work.

Equivalent courses completed at other universities will be considered for admission and transfer credit only if the courses have been taken within the last 10 years.

Students are encouraged to contact a Undergraduate Program Advisor in the Undergraduate Program Office for information on how to optimize their transfer credit and advance standing.

2.2 Admission Requirements from Joint Programs with Manitoba Colleges

The Asper School of Business has established Joint Programs with Red River College, Assiniboine Community College, University College of the North, and École technique et professionnelle. Graduates of the Business Administration Diploma (University Stream) from these four colleges are eligible to apply directly to the Asper School of Business.

Successful applicants will receive block transfer credit for their courses completed in the Business Administration Diploma and are required to complete specified courses at the University of Manitoba in order to receive the Bachelor of Commerce (Honours) degree. Requirements for the Joint Programs are listed in Section 4.

Admission to each Joint Program is limited to an annual quota and is competitive. Students must achieve a minimum grade point average of 3.00 on their Business Administration Diploma (University Stream) to be eligible for admission. Students must have graduated from the Diploma program within the last 5 years to be eligible for admission. Applicants are ranked in descending order of their grade point average and are admitted until the annual quota is met.

See Applicant Bulletin for detailed information on admission requirements.

SECTION 3: Academic Regulations

All students are asked to note that some academic policies and regulations are under review and are subject to change. Please check the Undergraduate Program Office for updated information.

The provisions of the chapter, General Academic Regulations and Requirements, and the chapter, University Policies, apply to all students. In addition, the Asper School of Business has regulations and requirements, published below, which apply specifically to its students and to non-business students taking business courses.

3.1 Changes in Program Requirements

Once students are admitted to the Asper School and have successfully completed any portion of the program, they will not be required to meet new course requirements subsequently stipulated for that portion of the program, whether the requirements be for the faculty or for an individual major.

3.2 Evening Program

The Asper School of Business does not offer an evening program. Although a limited number of business courses may be offered in evening time slots during both the Regular and Summer Sessions, it is not possible to complete all the course requirements of the Bachelor of Commerce (Honours) program without recourse to daytime attendance.

3.3 Management Minor for Non-Business Students

The Management Minor consists of any 18 hours of credit in courses offered by the Asper School of Business. Entrance requirements and enrolment limits vary with a student's faculty of registration. Students planning to enrol in this minor should consult a student advisor in your home faculty.

3.4 Student Responsibility

The Bachelor of Commerce (Honours) program undergoes changes from time to time. As a result, some changes in program structure, content and regulations may be made for the current and upcoming academic year. Specific program information for the regular program, the co-operative education program option, Joint Programs, and 2+2 Programs may be obtained from the Undergraduate Program Office.

Student's Responsibility

It is the responsibility of all students to ensure that they follow the program of study as outlined in their chosen Major and that they meet all the requirements as specified by the University of Manitoba and the Asper School of Business.

When you are registering for courses, it is your responsibility to ensure that you have satisfied all prerequisite and concurrent course requirements.

It is your responsibility to ensure you have registered for the correct courses to satisfy the requirements of the Bachelor of Commerce (Honours) degree.

Read course descriptions carefully to make sure you are not registered for a course that "May Not Be Held With" a course you have already taken. You will not be allowed to apply both courses toward your degree requirements.

3.5 Prerequisite Requirements

Prerequisite requirements must be met for entry into and continuance in the faculty.

Students must also meet all individual course prerequisites for further study in the program.

A passing grade is acceptable for prerequisite purposes for courses offered by the Asper School of Business unless a higher grade is called for in the course description.

3.6 Degree GPA Requirement for Graduation

Students Admitted in 2000 and Thereafter

Students admitted to the Asper School of Business in 2000 and thereafter must achieve a minimum degree GPA of 2.00 on all 126 credit hours required in the Bachelor of Commerce (Honours) degree program. Students

must also achieve a passing grade of “D” or better in each course except for the individual courses required in the Track 1 requirements that require a grade of “C” or better in each course.

All Track 1 courses, Core courses, Major courses, Options, and Electives applicable to the Bachelor of Commerce (Honours) degree requirements, as well as the grades achieved in each course, are transferred into the Asper School of Business and are included in the degree GPA.

3.7 Calculation of the Cumulative GPA

The computation of the cumulative GPA is the same as that described in the chapter, General Academic Regulations and Requirements.

3.8 Residency Requirement

All Business students must complete a minimum of 66 credit hours at the University of Manitoba in order to satisfy the residence requirement of the Bachelor of Commerce (Honours) degree.

Students participating in approved International Exchange Programs may be exempt from the 66 credit hour requirement. Please consult with the Undergraduate Program Office for more details.

Students considering completing course work at another university are referred to the chapter, General Academic Regulations and Policy, and the section on Letter of Permission.

3.9 Time Limit for Completion of the Degree

The maximum period of eight years for completion of degree requirements will be reduced by one year for each block of 15 credit hours of advance standing received at the point of admission. This time limit applies to all students, whether full-time or part-time.

The maximum period for completion of degree requirements for students enrolled in the co-operative education option is currently under faculty review.

A student who does not complete all degree requirements within the time limit permitted will be required to withdraw from the faculty. Students may appeal to the Undergraduate Program Committee for a one year time extension; all appeals must be accompanied by a detailed letter explaining the student’s circumstances and appropriate supporting documentation.

3.10 Maximum Number of Failures

Each student in the Asper School of Business is permitted a maximum of 15 credit hours of failures. Students who exceed their limit of failures will be placed on Academic Suspension. Such students may enter the Reinstatement Program and should contact an Undergraduate Program Advisor in the Undergraduate Program Office for details.

3.11 Repeating, Substituting and Extra Courses

Maximum Limit Allowed

Each student will be permitted to repeat or substitute a maximum of 12 credit hours of previously passed courses, with a maximum of 6 credit hours per course within the regulations detailed below.

After completion of the approved course repeat or substitution, only the latest of the grades achieved will be included in the computation of the degree GPA.

Required Courses

A student who withdraws from a Core course or who obtains a grade of “F” in such a course should repeat that course during the following Fall or Winter Term. If a student repeats a course for which a grade was recorded, only the latest of the grades achieved will be included in the computation of the degree GPA.

Students may not substitute another course for a Core course.

Students should not subsequently withdraw from a Core course in which they have a previous withdrawal or failure except for those courses taken during Summer Session. If, on repeating the course, the student does not complete the course successfully, a grade of “F” will be recorded for that course on the student’s history.

Major Courses

Students who achieve a grade of “F” in a Major course must either repeat that course or substitute another Major course if the Major requirements permit an alternate choice. Upon completion of the Major course, only the latest of the grades achieved will be included in the computation of the degree GPA. When a course is to be substituted, the student must seek the approval of the Undergraduate Program Office, in writing, prior to enrolling in the new course; failure to do so may result in a denial of the course substitution.

Electives and Options

Students who achieve a grade of “F” in an Elective or Option may either repeat that course or substitute another approved course in its place. Upon completion of the course, only the latest of the grades achieved will be included in the computation of the degree GPA. When a course is substituted for a failed Elective or Option, a student must request approval from the Undergraduate Program Office in writing prior to enrolling in the new course; failure to do so may result in a denial of the course substitution.

Voluntary Repeats

In order to improve their degree GPA, or to meet a prerequisite requirement, students may, with prior approval from the Undergraduate Program Office, voluntarily repeat any course in which a passing grade has been received, subject to any restrictions that may be published in the faculty registration guide and subject to the limits imposed at the point of admission. Students must request approval from the Undergraduate Program Office prior to enrolling in the course; failure to do so may result in a denial of the course substitution.

After completion of the approved course repeat or substitution, only the latest of the grades achieved will be included in the computation of the degree GPA.

Extra Courses

Students who would like to take courses extra to their degree are permitted providing prior approval of the Undergraduate Program Office is obtained prior to registration. When a course is extra to the degree but a student would like to substitute the course for another already in the degree, the student must seek the approval of the Undergraduate Program Office, in writing, prior to enrolling in the new course; failure to do so may result in a denial of the course substitution.

3.12 Completing Two Majors (Second Major)

Students Wishing to Complete Two Majors

Note the following Asper School of Business policy: “Students will not be given any registration priority for a second major.” The Asper School of Business cannot guarantee that you will obtain space in the courses you would like for a second major.

Students who have completed all the requirements or who have all the courses in registration for a major are not permitted to formally declare a different major unless there is space in the courses needed to complete the different major. Students are not permitted to declare a different major in order to obtain space in full courses.

3.13 Failure to Meet Requirements and the Suspension & Reinstatement Regulations

Failure to meet the requirements for graduation within the limits specified above will result in the student being placed on Academic Suspension. Such students may enter the Reinstatement Program and should contact an Undergraduate Program Advisor in the Undergraduate Program Office for details.

Students in jeopardy should carefully monitor their first term results since they will be withdrawn from all second term Business courses if suspended, regardless of the date of official notification of the suspension.

Students who have been placed on Academic Suspension will only be considered for reinstatement into the Asper School of Business after the specific conditions of reinstatement have been met. Details concerning reinstatement are available from the Undergraduate Program Office.

3.14 Withdrawal from the Bachelor of Commerce (Honours) Program

- A student who does not register for any courses in the Fall or Winter term after admission will cease to be a student in the Asper School of Business.

Such students must re-apply for admission if that is desired and will have to meet the requirements for admission at the time of the new application.

- A student who registers for course work in the Fall or Winter term after admission but subsequently voluntarily withdraws from all course work may be permitted to re-register at any time thereafter, subject to all faculty policies and requirements as they existed at the time of first admission and completing a signed declaration of non-attendance at another post-secondary institution. Such students should be aware of the time limit for completion of the degree.
- A student who applies for transfer to another university program and subsequently registers for courses will cease to be a student in the Asper School of Business. Such a student must re-apply for admission if that is desired and will have to meet the requirements for admission at the time of the new application.

3.15 Withdrawal from Individual Courses

Required Courses

Students may withdraw without academic penalty from an Elective or Option provided they do so before the final date for withdrawal (see Deadline for Withdrawals in the Academic Schedule).

Authorized Withdrawals

Authorized Withdrawals from courses after the registration revision period in each term may be granted on the basis of medical and compassionate grounds. A medical certificate signed by a physician or other appropriate professional must document medical grounds. Appeals based on compassionate reasons and circumstances must be supported by appropriate documentation. Students requesting Authorized Withdrawals should contact the Undergraduate Program Office.

3.16 Withdrawal from the Co-operative Education Option

Students may be required to withdraw from the program for any of the following reasons:

Students who wish to withdraw voluntarily from the Co-op Program may do so by written letter to the Co-op Director at any time prior to accepting a position for a work term. Any work term grades earned by the co-op student up to the date of the letter of withdrawal will stand.

Details for all continuing requirements or withdrawal procedures can be found in the Co-operative Education Option/Program Academic Regulations document.

3.17 Maximum Course Load/Minimum Course Load

Students are not permitted to take more than 18 credit hours during an academic term without permission from the Undergraduate Program Manager.

Students enrolled in the Co-operative Education Option are not permitted to take more than 3 credit hours during a co-operative work term.

SECTION 4: Program and Graduation Requirements

The Bachelor of Commerce (Honours) program comprises 126 credit hours of course work. The Co-operative Education Option also comprises 126 credit hours of course work plus a minimum of three 4-month approved work terms. The degree encompasses the following components which will be listed in detail below: qualifying courses, core courses (common to all students), major courses, business options and elective courses.

Each student must declare at least one major and present a minimum Degree Grade Point Average of 2.00.

Detailed information on the degree regulations is found in Section 3, in the Undergraduate Program Office (268 Drake) or on the undergraduate web site at: umanitoba.ca/faculties/management/programs/undergraduate/

4.1 Program Requirements for the Bachelor of Commerce (Honours) Program – Track 1 with Guaranteed Admission, Track 1 and Track 2

All students admitted under these tracks (including International Students and International from 2 + 2 Joint Programs) will complete the Bachelor of Commerce Honours Program. The Bachelor of Commerce (Honours) degree is comprised of 126 credit hours and can be divided into the following components:

- The Track 1 Course Requirements (24 credit hours).
- The Core (57 credit hours)
- The Major (12 credit hours)

- Business Options (15-18 credit hours)
- Electives (15-18 credit hours)

These components comprise 126 credit hours; their associated limits are defined below.

Track 1 Course Requirements

All students must complete the specified Track 1 course requirements. Track 1 and Track 1 with Guaranteed Admission from High School students complete these requirements prior to their admission to the Asper School of Business. Track 2 students have completed 24 credit hours of university course work but are missing one or more of the specific Track 1 courses. Track 2 students should complete all outstanding Track 1 courses during their first year after admission to the Asper School of Business and must achieve a minimum grade of “C” in each outstanding Track 1 course.

The Core

The CORE consists of 57 credit hours of specified mandatory courses from all four departments in this faculty as well as courses taught by the departments of Computer Science, Statistics, Philosophy and Religion. All students are required to complete the Core. The Core presents the essence of a business degree program. The majority of the Core courses are taken in the first two years after admission to the Asper School of Business.

The Major

Each student must complete the course requirements of one MAJOR. Each department and the Dean’s Office have developed one or more Majors. Each Major consists of a 12 credit hours of course work specified by the department. Subject to demand and faculty resources, specialized Majors are available in Aboriginal Business Studies, Accounting, Actuarial Mathematics, Entrepreneurship/Small Business, Finance, Generalist, Human Resources Management/Industrial Relations, International Business, Logistics and Supply Chain Management, Management Information Systems, Management of Organizations, Marketing, and Operational Research/Operations Management. A list of the Departments and the Majors they oversee is outlined below.

Students will normally choose a Major at the beginning of the third year of the program, following completion of many of the Core courses, which introduce the areas. Students have an opportunity to transfer from one Major to another, but this opportunity decreases as the student progresses in the program.

Business Options

The third component of the program consists of a required number of Business courses freely selected by the student. These courses are referred to as Business OPTIONS. Students must complete at least 15 and not more than 18 hours of Options. Some students may want to take Options which will supplement their Major, whereas other students may prefer to broaden their educational base by selecting Business courses in another or several other Majors. Students who want to supplement their Majors may take up to 12 hours of their Options from that area. Students may complete a second Major as part of their Options requirements. Such students should consult with staff in the Undergraduate Program Office.

Electives

The fourth component of the program is the ELECTIVE requirement. An Elective is any three or six credit hour course freely chosen by the student from courses taught in the degree programs of other faculties and schools, excluding the Asper School of Business. Students must complete at least 15 and not more than 18 credit hours of Electives.

The total of Major/Option/Elective courses is 45 credit hours. Therefore each student may choose a 12/15/18 credit hour combination or 12/18/15 credit hour combination (based on entry to the faculty with the minimum 24 credit hours from Track 1).

Course Requirements for Track 1 with Guaranteed Admission, Track 1 and Track 2 Students

The tables below list the Core courses that all Business students must complete. The courses are listed by year in a *suggested* sequence. Students normally complete the Core courses in the sequence shown.

To determine which additional courses to take each year (i.e., non-Core courses) students should consult the listing of course requirements for each year of their chosen Major.

1.2 Professional Designations

Master of Occupational Therapy (M.O.T.)

Graduates from the Master of Occupational Therapy Program have the professional designation M.O.T. It is important to note that occupational therapy is a regulated health profession, by law. To be eligible for employment in Manitoba, graduates must register with the College of Occupational Therapists of Manitoba (COTM) and must successfully complete the Canadian Association of Occupational Therapists (CAOT) National Certification Examination. Regulations are similar in most other Canadian provinces, in that students must be registered with the regulatory body in that jurisdiction and must pass the CAOT National Certification Exam. Writing of the national exam is scheduled twice a year. The University occupational therapy department provides a list of potential MOT graduates to CAOT to verify their eligibility to write the National Certification Exam. Newly-educated occupational therapists are eligible for registration with COTM (or other provincial regulatory body) and for employment prior to convocation and/or writing the national exam, provided they have successfully completed all academic and fieldwork requirements for the MOT program, and have provided the appropriate personnel at the regulatory body with a letter of verification from the Head of the Department of Occupational Therapy (students must request these letters). For information on the registration process in Manitoba, you can visit the COTM web site at www.cotm.ca or contact them by calling 957-1214. Other provinces have similar provisions to allow some form of registration and thus employment prior to convocation. A listing of provincial regulatory organizations is available from COTM (957-1214) and posted at SMR, or can be found at www.caot.ca/default.asp?changeID=63&pageID=50.

The Occupational Therapy program maintains accreditation through the Canadian Association of Occupational Therapists. Accreditation was received in 1986, 1989, 1991, 1995, 2000 and 2005.

Bachelor of Medical Rehabilitation (Physical Therapy) (B.M.R.(P.T.))

Employment Following Senior Internship: New graduate physiotherapists will be allowed to register to practice under the mentorship of a graduate physiotherapist prior to completion of the PCE and prior to convocation from the university under the following procedure:

1. Following successful completion of all academic and clinical coursework, the University of Manitoba (Registrar's Office) will notify the Registrar in writing that the student has been recommended to Senate for convocation.
2. The new graduate will be eligible to register with the regulatory college on the Examination Candidate Register to practice under mentorship once the new graduate has:
 - a) successfully completed Part 1 (The Qualifying Examination) of the PCE;
 - b) provided evidence of professional liability insurance coverage;

- c) completed the registration form and paid the registration fees;
 - d) provided the Registrar with the name of a currently registered physio-therapist who has agreed to serve as the applicant's mentor.
3. The graduate is expected to complete the PCE at the next available ses- sion.

Once the new graduate has successfully completed Part 2 of the PCE and has provided the Registrar with a copy of his/her Baccalaureate degree, the Registrar will place the graduate's name on the Active Practice Register and the graduate will be entitled to practice independently.

The Physical Therapy program was awarded ongoing accreditation status until 2015 from the Accreditation Council for Canadian Physiotherapy Ac- ademic Programs (ACCPAP).

Bachelor of Medical Rehabilitation (Respiratory Therapy) (B.M.R.(R.T.))

Students admitted into the program of studies in respiratory therapy should note carefully that while the University of Manitoba, School of Medical Re- habilitation may admit students to its course of studies, the right to practice as a respiratory therapist is granted only through the appropriate authority of the province concerned, through a process of licensure. Many provinces and states have licensure and many require their licensed practitioners to be "Registered Respiratory Therapists." Only the Canadian Society of Res- piratory Therapists has the right to confer the title of "Registered Respiratory Therapist" by virtue of a candidate's successful completion of national registration examinations, as well as other factors being taken into account. Although possession of a criminal record is frequently not relevant in so far as admission to an academic course of studies, it may be a barrier to be- coming qualified to practice as a registered respiratory therapist at a later time. Persons contemplating practice as a registered respiratory therapist should consider communicating with the Executive Director of the Cana- dian Society of Respiratory Therapists and the Registrar, President or Exec- utive Director of the provincial licensing organization as soon as possible, if they have concerns or questions with respect to this matter. Students will be advised concerning details of the national registration examinations during the orientation process to the program of studies. Students who be- come members of the Canadian Society of Respiratory Therapists (CSRT) or who apply to write the Canadian Board for Respiratory Care (CBRC) cre- dentialing examinations will receive a copy of the National Occupational Profile which forms the basis of the national examination and has been in- corporated into the curriculum planning process for the respiratory therapy program at the University of Manitoba. Students are highly encouraged to become student members of both provincial and national professional as- sociations. Certain aspects of the educational program will be directed to- ward developing in the student an understanding and appreciation of professional practice issues.

The Respiratory Therapy program maintains accreditation through the Council on Accreditation of Respiratory Therapy Education (CoARTE). Ac- creditation was most recently awarded in 2007 for a 5-year term.

SECTION 3: Faculty Academic Regulations

3.1 General

Occupational Therapy

Program requirements are those of the Faculty of Graduate Studies. MOT Program Supplemental Regulations are available on the School of Medical Rehabilitation website.

Physical Therapy and Respiratory Therapy

The provisions of the chapter, General Academic Regulations and Requirements, and the chapter, University Policies, apply to all students. In addition, the School of Medical Rehabilitation has regulations and requirements, published below, that apply specifically to its' students.

Policies with regard to admissions, selection, academic progression of the student, compulsory attendance, examination procedures, supplemental examination procedures, and withdrawal dates are in force and are on file in the general office of the School of Medical Rehabilitation.

3.2 Health Requirements

Students in all departments are required to provide a health history and immunization record. A student will not be permitted to attend fieldwork/clinical placements until all health, immunization and CPR requirements are current.

Immunizations

Standard Health Record Form Packages are sent to new students in Occupational Therapy, Physical Therapy and Respiratory Therapy upon acceptance into the programs. New students in Occupational Therapy and Physical Therapy are required to return forms to their respective departments by the dates published yearly in the Health Record Form Packages. New students in Respiratory Therapy are required to return forms by August 31. Returning students in all three programs are required annually to review and update immunizations as necessary.

Cardiopulmonary Resuscitation Certification

All students of the Department of Occupational Therapy are required to obtain certification in cardiopulmonary resuscitation. Certification must be at the Basic Rescuer Level. New students in the program must provide proof of certification within the first 2 weeks of classes of the academic year in which they commence classes. This certification must have an issue date on or after July 1 of the year the student commences classes in the program. Second year students must provide proof of re-certification by October 1 of their second year in the program. This certification must have an issue date during or after the last week of August of the current year. Certification must remain current for all fieldwork experiences.

All students (both new and returning) in the Department of Physical Therapy are required to obtain certification in cardiopulmonary resuscitation annually. Certification must be at the Basic Rescuer Level. Proof of certification must be provided by October 1 and must not have an issue date prior to the last week of August of the current year. This will ensure that the certification remains current until the end of the clinical placement period for each year of the program.

All students of the Department of Respiratory Therapy are required to obtain certification in cardiopulmonary resuscitation. Certification must be at the Basic Rescuer Level. First and second year students must provide proof of certification before their first fieldwork experience, usually mid-September. Third year students will be certified/re-certified by the program at the beginning of their clinical internship year in preparation for advanced level certification(s) in cardiopulmonary resuscitation.

3.3 Dean's Honour List

Undergraduate Students (Physical Therapy and Respiratory Therapy)

Students carrying a full course load, with a sessional Grade Point Average of 3.7 or higher and have not done resit or supplemental exams, are placed on the Dean's Honour List.

3.4 Attendance

Regular attendance is expected of all students in all courses. Prior permission is required for any anticipated absences. Students absent from class due to illness may be required to present a certificate from a physician. Unexcused absence from an examination may result in a grade of zero for that examination. Make-up examinations may be allowed under special circumstances.

3.5 Criminal Record Check and Child Abuse Registry Check

Students are advised that clinical/fieldwork education sites require that students complete a Criminal Record Check and a Child Abuse Registry Check.

New students in the Master of Occupational Therapy program must provide results of a Child Abuse Registry Check and a Criminal Record Check within the first 2 weeks of classes of the academic year in which they commence classes. Both checks must have an issue date after July 1 of the year the student commences classes in the program. All physical therapy students are required to obtain a formal Criminal Record Check and a formal Child Abuse Registry Check by October 1 of each year of the program. Both documents must not have an issue date prior to the last week of August of the current year, to ensure that they remain current until the end of the clinical placement period for each year of the program. Additionally, new students are required to complete a criminal record self-declaration form at the time of application to the program.

All respiratory therapy students are required to produce a Criminal Record Check and a Child Abuse Registry Check by August 15 of the year in which they commence classes. Mission Statement

The Mission of the Faculty of Medicine is to develop and deliver high quality educational programs for undergraduate and postgraduate students of medicine and medical rehabilitation, for graduates and post-doctoral fellows in the basic medical sciences and for physicians in practice; conduct research and other scholarly inquiry in the basic and applied medical sciences; and, contribute to the improvement of health status in Manitoba and beyond by providing advice, disseminating information to health professionals and the public, and by cooperating in the planning for the development and delivery of health care services.

The Mission of the Undergraduate Medical Education Program is to provide an environment which will assist students to become competent, caring, ethical physicians with the ability to think critically. This experience will prepare students to choose wisely their area of training, to successfully continue their education, and subsequently to meet responsibilities to their patients and society.

Medical education in Manitoba is designed to provide students with the knowledge and experience they need to practise medicine in a profession where new developments in science and the public health policy create an ever-changing environment. In the first two years of the program the subject matter is divided into blocks which cover core concepts in health and medicine, human development and body systems. Clinical Skills, Problem Solving, Medical Humanities, Laboratory and Investigative Medicine, Health Equity, and Survival Tactics are integrated into the six blocks. The final two years, called the "clerkship" are spent in direct contact with patients and doctors in a clinical setting in which students gain experience with increasing responsibility for patient care and management. History of the Faculty

Medical education had its beginnings in 1883 when 13 physicians applied to the local legislature for a charter to form the Manitoba Medical College. The college was chartered as an affiliate of the University of Manitoba. The number of students registered for the first session was 15, and the number in attendance at each session from that date to the present has ranged from 15 to 400. The university came to the aid of the Medical School from time to time by furnishing full-time professors in chemistry, physiology, pathology, bacteriology, and zoology. With the session of 1918-1919 the Manitoba Medical College ceased to exist as a separate institution. It made a gift of all its property and equipment to the University of Manitoba "on condition that the university establish a Faculty of Medicine, and carry on the work of medical education in an efficient manner."

In 1921, a building for the accommodation of the departments of Physiology, Biochemistry, and Bacteriology was erected on the old Medical School property, and a further unit, now occupied by Pathology, was completed in February, 1922. In January, 1956, the new wing of the medical building was officially opened, which included new quarters for the Medical Library. In February, 1965, the Chown Building was opened providing

five-stories of administration offices and space for Pharmacology and Therapeutics and the Computer Department for Health Sciences. The Basic Medical Sciences Building, containing undergraduate teaching facilities, opened in 1973. It provides accommodation for anatomy, biochemistry, physiology, medical microbiology and immunology. The Brodie Centre officially opened in the spring of 1996; it provides a library, research and recreational facilities. In 2004, the Office of the Dean and the Education Offices relocated to new administrative facilities in the Brodie Centre. General teaching facilities are located in the medical buildings, and facilities for clinical instruction are provided in the teaching hospitals affiliated with the University of Manitoba and in related institutions. The varied settings in which medicine is practised in Winnipeg and in rural and northern Manitoba also provide students with the opportunity to study community medicine outside the major teaching institutions.

The Neil John Maclean Health Sciences Library

The Neil John Maclean Health Sciences Library provides access to a wide range of evidence-based medicine resources in print and electronic format. Online resources include core medical textbooks such as *Harrison's Principles of Internal Medicine*, online drug resources such as *Lexi-Comp*, and clinical resources such as *UptoDate*, *First Search*, and *MD-Consult*. The Library also provides online access to over 4,500 health sciences journals which can be linked to from important medical databases such as PubMed.

Students can access nearly all of the online resources from on-campus and from home by using their student ID number and password. The Library's wireless network permits students to access online resources with a laptop. Computers for student use are also available in the Library.

The online resources are supplemented by a full range of print resources which include variety of textbooks, handbooks, and dictionaries. Back issues of many of the key medical journals are available. Special collections in the library include the Aboriginal Health Collection, History of Medicine Collection, and the Ross Mitchell Rare Book Room.

To facilitate student access and use of evidence-based resources, librarians offer training as part of the Faculty of Medicine curriculum. Each semester librarians offer a variety of training sessions open to all students on key medical resources such as PubMed. Librarians are available at the Information Desk in the Library or by appointment to answer any questions or provide individualized training.

Graduate Studies

Graduate Studies information about graduate studies in medicine or related sciences, and information regarding opportunities for medical research may be obtained from: The Assistant Dean (Graduate Studies and Research), Faculty of Medicine, University of Manitoba, A108 Chown Building, 753 McDermot Avenue, Winnipeg, MB, R3E 0W3.

More than 300 graduate students are doing research and pursuing Masters and Doctoral degree programs in the Faculty of Medicine. Their research training programs offer opportunities to conduct research at a number of sites including Bannatyne Campus, the National Virology Lab, St. Boniface Research Centre, and the Institute for Bio-Diagnostics. Graduate programs are available in the Departments of Biochemistry and Medical Genetics, Community Health Sciences, Immunology, Medical Microbiology, Pathology, and Physiology.

Physician Assistant Education Program

The Physician Assistant Education Program is the first graduate-level program for Physician's Assistant education in Canada. Upon completion of the comprehensive two year program, graduates receive a Master of Physician Assistant Studies degree. The program aims to educate outstanding Physician Assistant clinicians, to advance the academic field of the profession, and to foster leaders who will serve their communities and advance the physician assistant profession in Manitoba and Canada

Department of Medical Education

The mandate of the department of Medical Education is to work in a collaborative manner across all programs and schools within the Faculty of Medicine to provide expertise and services related to medical education issues including: curriculum development, faculty development, design of evaluation tools and assessment strategies and the provision of standardized patients. These services are provided by the department through the Office of Educational Development. The second purpose of the department of Medical Education is to engage in research and scholarly activity related to medical education issues and serve as an academic home for faculty with primary appointments within medical education.

Continuing Medical Education

This office is responsible for the Continuing Medical Education programs of the faculty, which are conducted in the Medical School, teaching hospitals, and in urban and rural medical centres. Information regarding programs may be obtained from: The Office of Continuing Medical Education, Faculty of Medicine, University of Manitoba, S203-753 McDermot Avenue, Winnipeg, MB R3E 0W3.

SECTION 2: Admission to the Faculty of Medicine

Please check the Applicant Information Bulletin available in June for current information.

2.1 Degree Offered

Doctor of Medicine (M.D.)

Minimum time to graduation: Four years in the Faculty of Medicine following an undergraduate degree (University 1, plus two or three years).

2.2 Requirements for Admission

The following is a summary of the admission requirements. Equivalent academic courses can be completed at recognized universities elsewhere. For complete admission requirements, as well as application deadline dates and forms, refer to the Applicant Information Bulletin, available at www.umanitoba.ca/medicine/admissions/index.html.

The Faculty of Medicine restricts enrolment to Canadian citizens and Permanent Residents.

All applicants must have completed a bachelor's degree, and prerequisites in Biochemistry and Humanities or Social Science. At the University of Manitoba these are Biochemistry 2360 and 2370. Applicants should be aware that there are course prerequisites for Biochemistry at University of Manitoba and should obtain this information from the Admissions website, www.umanitoba.ca/medicine/admissions/index.html.

We recommend students consider taking courses in the life sciences, particularly anatomy, microbiology, physiology and genetics.

Other requirements

- All applicants must write the Medical College Admission Test (MCAT). Since the MCAT will test the applicant's knowledge and problem solving skills in Biology, Physical Chemistry, Organic Chemistry and Physics applicants must consider taking these courses during their first two years of university studies.
- Applicants will be assessed in part on their Adjusted Grade Point Average (AGPA).

The Personal Assessment Score (PAS) is based on the information provided in writing and orally by the applicant which may include their referee reports and will include interview scores.

Transfer into the undergraduate program

The Faculty of Medicine will consider requests for transfer from students who are enrolled in LCME accredited medical schools in Canada and the United States. Student transfers are only considered in exceptional circumstances. Transfers can be considered only when there is a position open, by attrition, in the class into which the applicant requests transfer or to which evaluation shows the student to be qualified. A copy of the transfer policy can be obtained from www.umanitoba.ca/faculties/medicine/admissions/gen_questions.html#faqG19

2.3 Immunization Requirements

All students enrolled in the Faculty of Medicine should be immunized against the following diseases: diphtheria/tetanus, polio, rubella, measles, mumps and hepatitis B. Evidence of chickenpox immunity by history, serology or vaccination will be required. Students who cannot be immunized because of allergies or for other reasons must provide a physician's certificate to verify these reasons. Students admitted to first year Medicine will be provided with an immunization package at the time of acceptance into the Faculty and will be required to provide their Immunization Record Form before being allowed to attend classes. Students may not be able to participate in clinical exposures until all immunization requirements are up-to-date. Students are responsible for updating their immunizations as needed.

2.4 Certification in Cardio-Pulmonary Resuscitation (CPR)

Students must have CPR designated as “Health Care Provider Level C” at the time of registration in year one. Students must have annual renewal of their CPR registration acceptable to the standards of the Heart and Stroke Foundation throughout the undergraduate medical education program. Evidence of current renewal must be provided on an annual basis; failure to comply may result in exclusion from the course of study until renewal is obtained.

2.5 Technical Standards Requirement

(Essential Skills and Abilities for Admission, Promotion and Graduation)

Please be advised that the Faculty of Medicine has adopted a Technical Standards Policy Document that describes the requisite skills and abilities that must be met in order to participate in the undergraduate medical education program. The policy may be obtained from www.umanitoba.ca/faculties/medicine/admissions/index.html.

2.6 Registration with the College of Physicians and Surgeons of Manitoba

All students must be registered with the College of Physicians and Surgeons of Manitoba throughout their academic program in accordance with the Manitoba Medical Act. As part of the documentation requirements for College registration, students will be required to provide a criminal record check (including a vulnerable sector search) satisfactory to the College.

2.7 Adult Criminal Records and Child Abuse Registry

An adult criminal records and child abuse registry self declaration will be required of all applicants at the time of application. An adult criminal records and child abuse check is required at the time of registration, and annually thereafter keeping in accordance with existing policies of other health, education and social service programs at the University of Manitoba.

SECTION 3: Academic Regulations

The provisions of the chapter, General Academic Regulations and Requirements, and the chapter, University Policies, apply to all students. Faculty of Medicine regulations and requirements change from time to time. Detailed information concerning the general regulations governing admissions, evaluation, academic progress and withdrawal for undergraduate medical students may be obtained from the Undergraduate Medical Education Office. These regulations include the following items:

Students will not be allowed to register unless they are in good academic and financial standing from the previous year.

No student may repeat more than one year, and no year may be repeated more than once except by special permission of the Faculty Executive Council or Progress Committee.

Students who withdraw from the Faculty of Medicine without prior written notice will be considered to have terminated their connection with the faculty and will not be eligible for re-admission.

Students who withdraw from the faculty having given due notice of their intention to withdraw are eligible for re-admission. If re-admission is approved they will be required to conform to the rules and regulations, fee schedules, sequence of courses, in effect at the time of such readmission.

Students may, after completion of the work of a full year, be granted a leave of absence for one year subject to certain conditions related to the purpose of the leave of absence and on subsequent registration will be required to conform to the rules and regulations, fee schedules, and sequence of courses in effect at the time of such registration.

Students who have been or expect to be prevented from attending any regular examination by reason of illness or other cause beyond their control should at once notify the Associate Dean Undergraduate Education (UGME) and must give satisfactory documentary evidence of the cause of absence.

The Faculty Executive Council reserves the right to require any student to withdraw from the program for which the student is enrolled when it believes the student to be unsuited, on general considerations of scholarship,

or conduct for the profession, or the field within the profession, to which the program of studies normally leads. This right prevails notwithstanding any other provision in the faculty regulations.

Students are required to present the personal and professional appearance, attitudes and behaviours expected of members of the medical profession. The Faculty of Medicine has a process through which lapses in professionalism are reported, investigated, and, when necessary, will result in remedial or punitive actions up to and including dismissal. For additional information please refer to the Curriculum Guide.

The Faculty of Medicine has a Conscientious Objection Policy through which medical students may request exemption from specific medical procedures or services. Requests are evaluated and, if granted, do not absolve students from the following aspects of the procedure or service in question, including: cognitive knowledge (indications, contraindications, benefits and risks); full and nonselective disclosure to support Informed Consent by patients; patient non-abandonment; appropriate patient referral; and non-discrimination. A full list of criteria can be found on the Conscientious Objection application form. A Conscientious Objection cannot limit a student's educational experience such that his or her overall medical education will be compromised and all affected curricular time must be made up otherwise. For information, contact the Undergraduate Medical Education Office.

Students must complete the undergraduate program for the M.D. degree of the Faculty of Medicine within six years of entry to first-year Medicine, exclusive of those students undertaking additional academic pursuits which are acceptable to the Progress Committee. When a student fails to complete the program the committee will review the academic record of the student. If the student is in good academic standing at that time, the committee may grant one further year for the completion of the program. The reasons for the prolonged duration of the student's program are confidential but must be approved as valid by the Associate Dean UGME.

3.1 Requirements for the Degree of Doctor of Medicine (M.D.)

Every candidate for the degree of Doctor of Medicine must have satisfied the following requirements:

Subsequent to the successful completion of the required university studies, a student must have attended four full sessions of not less than nine months each in this or some other school of medicine approved by this university, the last two years of which must have been spent as a student of the University of Manitoba.

A student must have completed the required work, have fulfilled satisfactorily all special requirements, have received satisfactory grades throughout the entire medical program, and have discharged all indebtedness to the university.

Degrees: All degrees in Medicine will be conferred by the Senate of the university on the recommendation of the Faculty Executive Council at a regular meeting of the University Senate or at a meeting specially called for that purpose.

3.2 Requirements for Registration to Practise Medicine

A university degree in medicine does not in itself confer the right to practise the profession of medicine in Canada. That right is obtained from a provincial registering body in the particular province in which the graduate desires to practise, and follows the successful completion of the Medical Council of Canada's two qualifying examinations.

Federal Registration: The Medical Council of Canada

The Medical Council of Canada was established in 1912 by the Canada Medical Act. Its purpose is to grant a qualification to practise medicine acceptable for licence in every province of Canada. It is not a licensing body, but “anyone who secures the diploma of the Medical Council of Canada by examination is registered on the Canadian Medical Register. This registration entitles one to become licensed to practise medicine in any province in Canada upon payment of the necessary fee and on meeting other provincial requirements.”

The Medical Council of Canada examinations are normally taken by undergraduate medical students of the University of Manitoba at the end of the fourth year. There is a fee for this examination. Examinations are held annually in Winnipeg in May and November, and registration for these ex-

aminations may be made with: The Registrar, Medical Council of Canada, 2283 St. Laurent Boulevard, Ottawa, ON K1G 5A2. The deadline for application is usually in December; candidates are advised to contact the Medical Council of Canada for current information (www.mcc.ca).

Provincial Registration

The College of Physicians and Surgeons of Manitoba is the regulation body for the physicians in Manitoba. All medical students must be registered with the College of Physicians and Surgeons of Manitoba throughout their academic program. For information on registration in Manitoba contact: The College of Physicians and Surgeons of Manitoba, 1000-1661 Portage Ave., Winnipeg, MB R3G 3T7; telephone: (204) 774 4344.

SECTION 4: The Program for the M.D. Degree

4.1 Governance

The program and its curriculum is the responsibility of the Faculty Executive Council (FEC). The policies, regulations, implementation and modifications of the educational program for the M.D. degree are determined by the FEC on the recommendation of the Faculty of Medicine Undergraduate Medical Curriculum Committee (UGMCC). The UGMCC consists of the faculty curriculum coordinators appointed by the Dean, two members elected by the Faculty Executive Council, the Associate Dean UGME, the Assistant Dean Student Affairs, the Director of Educational Development and six students. All members are voting members. The UGMCC is responsible for the curriculum, syllabus, teaching, and evaluation in the educational program leading to the M.D. degree.

4.2 General Statement

The program is a continuum over the four years but is divided into the Pre-Clerkship, Years 1 and 2, and the Clerkship, Years 3 and 4, for administrative purposes. The mission and performance expectations of the program are published. They are given to faculty and students and are the guide for the curriculum. The curriculum is based on the view that it is neither necessary nor desirable for the faculty to present all the knowledge, skills and behaviours that are expected of a student by graduation. Instead the students are provided with the core material which lies in the mainstream of medical science. Students are expected to acquire further knowledge and skills for themselves through study, discussion and scholarly development. They are encouraged to take the initiative to approach instructors and colleagues with regard to learning. The program values the search for knowledge, the evaluation of its worth and its application to the analysis and solution of problems as opposed to the simple memorization of information. Students are expected to develop skills to acquire new knowledge and to realize that these skills will be used throughout their professional lives irrespective of their field of medicine. The curriculum encourages an interdisciplinary and integrated approach to medicine. Teaching sessions promote participation and active learning by students. Instructors, whatever their own discipline, ensure that their teaching is relevant to the overall development of students to become undifferentiated graduates of medicine with the potential to enter any postgraduate position for which they have the ability and aptitude. The Faculty of Medicine does not support students' limitation of their studies to only fields and disciplines of personal interest. Nonetheless, students are encouraged to pursue areas of interest and to develop their own education through electives. Our students learn to use information, skills and behaviour from multiple sources of teaching to prevent and solve the problems that face their patients and society. Our students learn that physicians are part of an interdisciplinary team and health care system that provide adequate, accessible, continuous and comprehensive health care. In order to modify and enhance the educational program, the opinions of students and their evaluation of the program and its teachers are formally sought and respected by faculty. This information is used by the UGMCC to improve the program.

4.3 The Plan of the Curriculum

The curriculum is in the process of renewal. The curricular renewal will embrace enhanced programs in a variety of realms including: professionalism; interprofessional education and collaborative practice; quality health care and system innovation; and health equity.

Professionalism

The Professionalism program is an important component of the Undergraduate Medical Education curriculum. The goal of the program is to incorpo-

rate the attributes of professionalism into medical learners and emphasize how learners are expected to discuss why certain professionalism characteristics and attributes are necessary for the practice of medicine and for their identity as physicians.

A professionalism charter is being developed to function as a framework for defining and demonstrating medical professionalism.

Pre-Clerkship Program:

Year 1 (Blocks 1-3), and Year 2 (Blocks 4-6)

The Pre-Clerkship program is designed by the course directors and program coordinators in conjunction with department/discipline advisors/representatives and by committees governed by the faculty Pre-Clerkship Curriculum Committee. The curriculum consists of six mandatory programs: Cognitive, Clinical Skills, Problem Solving, Medical Humanities and Laboratory and Investigative Medicine, Health Equity, and one voluntary program: Stress Management. The Problem Solving program attempts to integrate and re-iterate important concepts presented during the Cognitive component, emphasizing a clinical presentation approach to your medical education. The Clinical Skills program (which includes communication, history taking and physical examination skills), the Medical Humanities program (which includes human values, medical ethics, medical history, law, and palliative care and integrative medicine), the Laboratory and Investigative Medicine program, and Health Equity are integrated with the Cognitive program as much as possible.

The objectives of the curriculum are based on the mission and performance expectations of the undergraduate program as outlined in the Curriculum Guide. The evaluation of student academic progress is based on the student's achievement of the written objectives as provided in the student notes, course of study books, and on the Pre-Clerkship web page. The curriculum is composed of six instructional blocks that address the core concepts of health and medicine, human growth and development and four blocks based on organ-systems. The two-year Pre-Clerkship curriculum brings together teachers from the basic science and clinical departments, from other health related faculties/disciplines as well as the public. All sciences basic to medicine, including anatomy and molecular science, biochemistry, human genetics, immunology, microbiology, physiology contribute to the curriculum as do the clinically applied basic sciences of pathology, pharmacology and community health sciences. Clinical departments including anesthesia, clinical health psychology, family medicine, internal medicine, obstetrics, gynecology, ophthalmology, otolaryngology, pediatrics, psychiatry, surgery are also involved.

The Pre-Clerkship is divided into six blocks, three per year.

Block 1 – Introduction to Medicine: Has two sections:

Population Health and Medicine - introduces the main elements to the understanding of any disease or health problem including definitions of life, health, disease and death; burden of illness or size of the problem; causes or risk factors; the natural history and outcomes; prevention and control; all based on the principles of emphasizing the concept of evidence-based medicine. This section will provide the core concepts of statistical methods in the health sciences, research methods, critical appraisal of the medical literature, and the framework for the determinants of health, an understanding of the role of stress in health and disease, the conceptual basis for making a diagnosis, including treatment, occupational and environmental health and health policy. Students learn the concept of the physician as a member of a multidisciplinary health team both in the hospital and in the community.

Structure and Function and Disease Mechanisms –introduces Anatomy, Physiology, Molecular Biology and Medical Genetics and has an overall goal to provide background knowledge in preparation for the subsequent intensive study of the human body in health and disease in later blocks. The art of medicine can be called an “applied science”, and so it emphasizes the application of these basic sciences to the human organism. A selection of examples to illustrate “foundational concepts” or principles of human biology are covered. Students are given directed readings and references for study of some topics in depth, according to individual needs.

The core concepts of disease processes are illustrated through lectures and tutorials. Building on the previous sections, basic science principles and clinical applications are presented. Contributions are made by the disciplines of Pathology, Pharmacology, Oncology, Hematology, Infectious Diseases and Immunology to present core concepts of disease at both a cellular and patient level. Study of normal anatomy will continue. Students will be encouraged to use clinical examples of disease to appreciate and

understand the underlying cellular processes. This material is introductory and the topics will be further expanded and revisited in greater depth in the system subject blocks.

Block 2 - Human Development : This nine week block will cover the stages of development from conception to geriatrics including embryology, child development, nutrition, adulthood, sexuality, and death. Community Health, Genetics, Pediatrics, Psychology, Psychiatry, and Geriatrics will be highlighted. In this block students will be introduced to the principles of physical, psychological, social and behavioural aspects of normal human development at the various life stages from conception to death within populations, families and as individuals. As well they will learn about the physical, psychological, social and behavioural challenges individuals face during the various development stages. Students will learn to appreciate health as a component of life cycle development and to identify principles of community development which impact on the well-being of individuals and families at various life stages.

System Blocks: Each of the following Blocks will cover, in a clinically relevant context, normal anatomy and physiology, followed by pathophysiology of disease.

Block 3 - Involves Cardiovascular, Respiratory, Ear, Nose & Throat. There will also be a few additional structure and function classes.

Block 4 - Medicine II commences with the fourth block consisting of Reproduction, Kidney and Endocrinology & Metabolism.

Block 5 – This block consists of the following systems: Neuroscience, Musculoskeletal and Ophthalmology.

Block 6 – The Pre-Clerkship curriculum ends with the following systems: Gastrointestinal/Liver, Blood & Lymph and Dermatology.

Methods of Teaching

The Cognitive component is delivered by a variety of formats including assigned self-study periods, small group tutorials, traditional didactic lectures, small group activities in entire class format, lab practicals or demonstrations and computer simulated labs. Regular time is scheduled each week to provide students with the opportunity for self-directed and independent learning. Group study is encouraged. Problem solving is emphasised in all small group tutorials as well as in the identified problem solving sessions.

Attendance

There is an expectation that all student learners in the Undergraduate Medical Education Program attend sessions that divide the whole class into smaller groups. Specific small group sessions will be tracked, recorded, reported and contribute to the evaluation of the student learner's professionalism. This policy can be viewed at <http://umanitoba.ca/faculties/medicine/education/undergraduate/preclerkship/index.html>.

The procedures outlined in this policy do not preclude course directors, session leaders and instructors from tracking student learner attendance in their sessions and discussing any concerns related to attendance with the learners. The information gathered from such tracking will not be recorded and reported as a professionalism component of the Medical Education Program.

Clerkship Program: Years 3 And 4

The Clerkship component of the undergraduate program is designed to give medical students didactic instruction, supervised responsibility for patient care and frequent feedback and evaluation. The program is governed by the Clerkship Committee, consisting of a Chair appointed by the Dean, the clerkship directors of the clinical departments, the Director of Educational Development and student representatives. The Clerkship Program consists of the Introduction to Clerkship program, core clerkship rotations, a multiple specialty rotation, and electives. It lasts 20 months. Core clerkships last a minimum of six weeks, multiple specialty clerkships are comprised of shorter individual rotations and electives are offered in units of two weeks or longer.

Introduction to Clerkship (ITC) (5 weeks): The Clerkship Program begins with the ITC that is a preparation for clerkship. It consists of observed clinical encounters with patients in the major disciplines, predominantly arranged to take place in the hospitals. Courses in clinically based laboratory medicine, clinical pharmacology and therapeutics, community health sciences, immunization/infection control, and radiology are given.

Clerkship Phase I:

Core Clerkship Rotations (48 weeks): The primary responsibility of the clerks in the program is the care of patients under the supervision of post-graduate students and faculty. Rotation through all major clinical disciplines is provided and these are supplemented by "elective" periods. Six-week periods are spent in family/community medicine, internal medicine, selectives in medicine and surgery, obstetrics/ gynecology, pediatrics, psychiatry, surgery, multiple specialty rotation of anesthesia, emergency medicine, ophthalmology, otolaryngology and a community health sciences project. Settings for the clerkship experience are varied, including wards and outpatient facilities of the hospitals, doctors' offices, rural and community-based hospitals. Formal teaching and evaluation of the knowledge, skills, attitudes and behaviours pertinent to the discipline are provided during the clerkships.

Clerkship Phase II:

Electives and CaRMS National Interview Period: There are two major elective periods during clerkship. The first period occurs at the end of the core clinical rotations; the second occurs after the CaRMS National Interview Period. The second period of electives is generally restricted to electives in the Province of Manitoba. Throughout the elective periods, students must pursue education in a minimum of three different disciplines with a minimum duration of two weeks each. Electives may be pursued in a setting of the student's own choice, but must be approved by the faculty elective coordinator.

ACLS and the MCCQE Part I Refresher Series: The clerkship program ends with students participating in a mandatory ACLS course and a short program of half day lectures and time for self study in preparation for the licensing examination of the Medical Council of Canada Qualifying Examination Part I.

SECTION 5: Student Evaluation and Academic Progress

5.1 Responsibility

The policies and procedures for the evaluation of the students in the program for the M.D. degree are the responsibility of the Faculty Executive Council (FEC).

The Progress Committee recommends to FEC the academic standards by which the progress of students are judged and ensures that examiners have followed the policies and procedures set by FEC. The Progress Committee, following the recommendations of the Committees of Evaluation, also:

- Determines which students may proceed to the next stage of the program or to graduation.
- Determines which students should write supplemental examinations, or be required to take remedial study, or be required to repeat all or part of the academic year before promotion to the next stage of the program or graduation.
- Place students on Monitored Academic Status or Probation.
- Ensures that the Committees of Evaluation have followed the policies and regulations of evaluation that have been approved by the FEC.

The Committees of Evaluation (COE): The COE's, Pre-Clerkship (years 1 and 2) and Clerkship (years 3 and 4) conduct the evaluation of the students. The knowledge, clinical and communication skills, attitudes and behaviour of the students are evaluated by examination, assessment of performance and completion of assignments.

The responsibilities of the COE's include:

- Planning and administration of the evaluation of all aspects of student examinations and performance.
- Planning and administration of all supplemental examinations.
- Planning and administration of all other measures of academic performance.
- Planning and administration of remedial training for students with unsatisfactory academic performance.
- The reporting of the results of examinations, supplemental examinations, other academic performance evaluation and remedial training to the Progress Committee.

Procedure for students with non-academic problems that interfere with evaluation

Students who cannot take an examination, attend mandatory sessions, perform satisfactorily or complete assignments because of non-academic problems must inform either the Associate Dean UGME or Assistant Dean Student Affairs as soon as possible. Either of these individuals will decide if the reason is sufficient to postpone or cancel evaluation. This may be applied retroactively. The Associate Dean UGME will then determine how the evaluation will be completed. In the case of illness a confirming certificate from the student's regular physician or a specialist in the field of the illness is expected. In other situations confirmation that problems are affecting the student should be provided from a recognized authority e.g. the University Counselling Services. In all cases the nature of the problem is confidential between the student and the physician or adviser involved. The physician or adviser must confirm in writing that the problem has affected student's performance and evaluation. The student will usually be expected to submit a further confirmation that the problem will not affect performance or evaluations when the student resumes the program.

5.2 Evaluation in the Pre-Clerkship Program

The Committee of Evaluation Pre-Clerkship will be responsible for evaluation of students during the first two years of the program. The COE Pre-Clerkship will be headed by two co-chairs, responsible for first and second year respectively and appointed by the Dean. The members of the COE include the Pre-Clerkship faculty curriculum coordinators, the Associate Dean UGME and representatives of the individual blocks of the program, the Clinical Skills programs and the Medical Humanities program. Additional members may be added at the discretion of the FEC. The COE Pre-Clerkship is responsible for developing the evaluation process, determining the pass mark of the examinations and ensuring that the examinations of each block are comparable, reliable, valid and fair.

Examinations

The COE will inform the students of the pre-determined pass mark for all examinations at the beginning of their block. The student, however, will be given the overall as well as the actual marks obtained in the different sections of the examination. Students' results will be reported to them as a pass or fail; neither grades nor honours will be given. Grades and relative performance will be recorded in students' evaluation files and each student can view his or her evaluation file in the undergraduate office.

The Faculty of Medicine uses a Pass/Fail system where grades are not reported external to the Faculty of Medicine. Transcripts and Medical Student Performance Reports will indicate only whether a student has passed or failed a year or block. However, within the Faculty of Medicine, student grades will be used to help identify students at academic risk and to help select students for distinctions such as awards and specialized programs.

Knowledge: There are written comprehensive examinations based on the objectives at the end of each block i.e. three in first year and three in second year. Except for the first block, all the blocks may include up to 10 per cent of questions from material in the previous block. For each block there is an examination committee that consists of the COE chair, course directors and pertinent departmental representatives for the respective block. The examination committees are responsible to ensure that the taught objectives are tested and the evaluation is fair. Each examination of knowledge may use various methods of evaluation: multiple choice questions, short answer essays, demonstrations etc. There may also be take-home assignments in each course that contribute to the final mark.

Clinical Skills: The student's performance in the Clinical Skills program will be assessed by observation of performance and by examination. There is a Clinical Skills evaluation committee, responsible to the COE Pre-Clerkship, that determines the standards of performance expected of students and develops examinations. There will usually be an examination of Clinical Skills at the end of each year. The format of the examination will normally be an "objective structured clinical examination," (OSCE). The Clinical Skills evaluation committee is responsible to the COE Pre-Clerkship for the planning and administration of the examination. The committee will recommend the pass mark, once the stations have been chosen, for approval to the COE Pre-Clerkship. The format of the examination and the system used to determine the pass mark will be told to the students. The Clinical Skills evaluation committee will inform the COE Pre-Clerkship about those students who fail the clinical skills program. If a preceptor determines that a student's performance is unsatisfactory then the student must be informed and reported to the Clinical Skills evaluation committee. The committee will provide supplemental education to help the student reach the satisfactory standard. The COE Pre-Clerkship will confirm that

the student has failed due to poor performance or by examination and will determine the period of remedial work to help the student meet the standard of the program.

Professionalism: Behaviour and attitudes befitting medical professionals is expected of our students in all phases of the curriculum. The Faculty of Medicine looks forward to learning of students who display exceptional professionalism through letters sent to the Associate Dean, UGME. The Faculty of Medicine uses a Professionalism Report by which single egregious or recurrent lapses in student professionalism can be brought to the school's attention. A summary statement will be included on an individual's Medical Student Performance Record if two or more validated reports have been received. The Faculty of Medicine maintains the option to dismiss students on the basis of unprofessionalism, regardless of performance in the curriculum.

Failures of the Evaluation in Pre-Clerkship Years 1 and 2

Pass marks: May be revised from time to time but will be declared before the initial and supplementary examinations.

Examinations: Students failing in up to two examinations can write supplementary examinations. Students who fail any supplementary examination in first- or second-year will fail that year.

Students who are granted supplemental privileges are expected to undertake remedial study at a time determined by the Faculty during the summer period. Following the remediation, they will sit a supplemental examination comparable but different to that failed. Students who fail the Clinical Skills program will be granted supplemental privileges and receive a remedial period during the summer vacation that will take into account the areas of weakness revealed by their performance and the examination. The performance of students during the remedial period will be evaluated by a preceptor and will normally include an oral and/or written examination and/or repeated OSCE. Students who fail to reach the standard expected after remediation will fail the year.

Students in Year 1 and Year 2 who are successful following remediation will be promoted.

Year 1 students who fail the year must apply for re-admission to medical school before June 1. Students being considered for re-admission will usually be interviewed by the Admissions Committee to determine how they might better approach medical school so that they might succeed on a second attempt. The Admissions Committee will advise the Assistant Dean Admissions who will recommend to the Progress Committee whether the student should be re-admitted.

Students who fail Year 2 will automatically repeat it and are not subject to review by the Admissions Committee.

Remediation of failures: The student will be required to meet with the Director of Remediation to develop a remedial plan. The exact nature of the remediation may vary with the student and will be designed to meet individual learning needs as defined by the student. The student will also be required to meet with the Assistant Dean Student Affairs who may also direct the student to other faculty members or services for students.

5.3 Evaluation of Students in the Clerkship Program

During the clerkship years students will be evaluated on their competence and this will include assessment of their cognitive knowledge and understanding, clinical skills, problem solving and judgement, technical skills, interpersonal attributes and general professional responsibility. Evaluation will be the responsibility of the Committee of Evaluation, Clerkship (COE Clerkship).

The committee will consist of:

- *Voting Members:* The chair; one representative, usually the clerkship director, or delegate, from each department, and the coordinator of ITC Laboratory and Investigative Medicine, the coordinators of ITC, clerkship, electives and comprehensive clinical examination. In the absence of the elected representative the department may send a substitute.
- *Non-Voting Members:* Ex-officio the Associate Dean UGME; the Assistant Dean Student Affairs, and four undergraduate student representatives.

Method of Evaluation (General)

The policy and procedures applicable for evaluation are: Examination Regulations Policy: 1305 of the University of Manitoba; Faculty of Medicine Security of Records policy approved, 1982; Policy on Disclosure and Se-

curity of Student Academic Records approved University of Manitoba Board, May, 1989. Examinations and evaluations will use various methods to assess students. These will include mid-point (MITERs) and final evaluation reports (FITERs); written examinations (externally or internally prepared in essay, multiple-choice or other formats); projects; clinical examinations with “traditional” cases, case scenarios, simulated or standardized patients using “traditional” long cases, short station Objective Structured Clinical Examinations (OSCE) or longer Comprehensive Clinical Examination (CCE) formats. Students’ performance for evaluation purposes during examinations may be recorded by writing, orally, by computer, by audio or by video taping. Whatever form is used, the data generated is subject to the examination regulations of the University of Manitoba and the Faculty of Medicine. Material necessary to generate the mark such as papers, computer records, tapes will be destroyed once the student has passed that evaluation (such material can be of help to a student needing remediation before the pass).

The Committee of Evaluation Clerkship will monitor examinations and evaluations of students to ensure that they are credible, appropriate, precise, valid and reliable. To achieve this quality assurance the Committee of Evaluation Clerkship may use direct observation or indirect observation by audio and video monitoring. Quality assurance material is subject to the aforementioned regulations of the university and the faculty. Material, such as audio/video tapes which could identify the individual student will not be released to anyone, other than the Dean and Committee of Evaluation Clerkship, without the written consent of the student.

5.3.1 The Introduction to Clerkship (ITC)

The goal of Introduction to Clerkship (ITC) is to prepare the student for clerkship rotations. Students will be assessed for attendance and performance in learning groups. The purpose of student evaluations in ITC is to ensure that students are ready to begin their clerkship rotations.

Readiness for clerkship must be demonstrated in many areas including: basic medical knowledge and its application; clinical skills in evaluating patients; analysis of clinical data; problem identification and diagnosis; planning of investigation; planning of management and therapy; relationships to patients and staff. These attributes will be evaluated in a variety of ways throughout ITC.

Method of Evaluation

Students failing to attend mandatory sessions may be reported to the Associate Dean UGME, who will inform the COE Clerkship. Each student will receive a warning from the Associate Dean’s office. If this warning is ignored the student’s attendance record and performance will be considered by the COE Clerkship and the student may be failed for the sessions missed. A suitable remedial period may be provided. If the student does not perform satisfactorily in the remedial period the ITC will be failed.

Each department, clinical or laboratory, will determine the criteria for determining the competence of the student during the ITC experience in that department. These standards should be based on the expected requirements for satisfactory preparation for the clerkship of the department. Each preceptor, with significant involvement in clinical or laboratory teaching, will provide a pass/fail decision on each student taught to the ITC supervisor of the department together with a written evaluation of the performance when needed. The preceptor will advise each student during the course if the performance is likely to lead to a failing assessment. Students must be given due opportunity to improve their performance to the expected standard. The departmental supervisor, with the undergraduate committee of the department, will review the evaluations and preceptor pass/fail assessments to determine if the student has achieved an overall pass/fail for the ITC period in that department. The student must be informed of a recommendation for failure within seven working days of the end of the session. The pass/fail decision will be given by the departmental representative to the COE Clerkship. In the case of a failing evaluation the reasons for failure must be documented and submitted to the COE Clerkship.

5.3.2 ITC Remediation

Failure for inadequate attendance

The coordinator of the block of sessions missed may, with approval of the clerkship coordinator, provide the student with a remedial course, of comparable educational experience in that subject and the student will have to attend and perform satisfactorily to pass the ITC.

Failure for poor clinical performance

The COE Clerkship will review the deficiencies of the student and will provide the student with a remedial period prior to the beginning of the Clerkship. The remediation will be designed to improve the clinical deficiencies

of the student to meet the standard for a pass and will be assessed by the preceptors.

Failure of the ITC remedial

Failure of the remedial period for non-attendance or poor clinical performance will be recorded as a failure of a major clerkship. But, since a repeat of the ITC would need to be postponed until the core rotations are completed, the student may proceed to the regular clerkship rotations. However, if such a student fails a core/major rotation in addition to the ITC, then the Clerkship Program must be restarted at the next ITC period.

5.3.3 The Major Clinical Clerkships

Method of Evaluation

The evaluation of the students during the clinical clerkship rotations may be assessed by review of clinical performance, written examinations, projects as in community health sciences and a comprehensive clinical examination.

Clinical Performance

The goals and expectations of the Clerkship Program are consistent with the Undergraduate Medical Education Learning Goals and Objectives.

Students must complete a self-evaluation Midterm In-Training Evaluation Report (MITER) midway through the rotation. The self-evaluation MITER should be discussed by the student and his/her preceptor(s). The clerkship director, or delegate, will collect preceptor assessments throughout the rotation. If a student’s performance is likely to lead to a failure, the clerkship director must advise the student of an impending failure by the midway point of the rotation. In such cases, these students must be given help to improve their performance to the expected standard. The clerkship director, or delegate, will use all evaluations to make a final decision on the student’s performance at the end of the rotation in that department. A Final In-Training Evaluation Report (FITER) of each student’s achievement of these goals will be completed for each rotation.

A failing student must be informed of the failure by the clerkship director, or delegate, preferably before the end of the rotation but not later than seven working days after the end. All results will be submitted to the undergraduate committee of the department, who, for a failure, will review all the evaluations and preceptors’ pass/fail assessments and determine the overall, pass/fail standing for the student during the rotation in question.

The pass/fail recommendation, with the FITER and any supporting evidence for that decision, will be submitted by the departmental representative to the COE Clerkship. The pass/fail decision will be reviewed and affirmed if there is a majority vote of the members of COE Clerkship present at the first meeting of the COE Clerkship after the end of the clerkship. In the case of a tie, the chair of COE Clerkship will have the deciding vote, otherwise he or she will not vote.

Major Clerkship Clinical Performance Remediation

The COE Clerkship will provide the student who has failed a clinical rotation an appropriate remedial period with the department in which the rotation was failed. The rotation will be an equivalent educational experience to the clerkship failed, and its goal will be to assist the student to reach the expected standard of clinical competence. A similar process of evaluation will be used, and this may be supplemented by a clinical oral examination if the departmental undergraduate committee deems it necessary. The remedial will be taken during an elective period.

Clerkship Departmental Examinations

Students will take the National Board of Medical Examiners (NBME) subject examinations at the end of the following clerkship periods: obstetrics/gynecology, pediatrics, psychiatry, and surgery. For internal medicine the NBME examination will take place after the internal medicine selective rotation. For surgery the NBME examination will take place following the major surgery rotation. The passing standard for National Board Exams will be the 11th percentile of the entire reference group. Students failing a National Board examination will resit this exam at the next opportunity as determined by the Associate Dean (UGME) or designate.

Remediation for NBME Examination Failures

Students failing the National Board exam twice in the same subject will receive a remedial period of training from the department of that subject. The Associate Dean UGME in conjunction with the clerkship director, or delegate, will design the remediation with the purpose of the student achieving at least the 11th percentile in the examination; further clinical experience may be needed to meet that purpose. Such a remedial period will be a

maximum of four weeks and will be taken in an elective period and followed by a third attempt at the National Board examination.

5.3.4 The Comprehensive Clinical Examination (CCE)

The goal of the comprehensive clinical examination (CCE) is to objectively evaluate students' clinical competence in generic skills of data collection, interpersonal relationships, along with the content of the case for diagnosis, investigation, and management of common clinical problems. This examination frequently uses standardized patients to test these clinical skills. The CCE committee is a sub-committee of the COE Clerkship and is chaired by the CCE coordinator. The CCE is marked to a standard predetermined by the CCE committee and the results of the examination are submitted to the COE Clerkship.

Remediation for Failure in the CCE

The COE Clerkship will devise an appropriate remedial period which will take into account the areas of weakness demonstrated by the CCE and will be taken during elective time. This remediation will be evaluated by a clinical assessment and may include an oral and/or written exam.

5.3.5 The Multiple Specialty Rotation in Clerkship (MSR)

Method of Evaluation

The evaluation of students during the MSR clerkship rotation includes assessments of attendance, performance and could include faculty prepared examinations. Students will be expected to attend all clinical, small group, and laboratory sessions. If more than 10% of a block of sessions is missed, without an excused absence, then the student may fail that block of sessions. Clinical performance will be judged, where applicable, as in the major clerkships. The clerkship director, or delegate, will obtain the information from the staff of the department as determined necessary to evaluate the student by the undergraduate committee of the department. The clerkship director, or delegate, must advise each student by the midway point in the rotation if his or her performance is likely to lead to a failing assessment. Failing students must be given due opportunity to improve their performance to the expected standard. The clerkship director, or delegate, will use all evaluations to make a final decision on the student's performance at the end of all rotations in that department. While a constituent part of the MSR clerkship may be failed, failure may be outweighed by good evaluations in other constituent parts. A failing student must be informed of the failure by the preceptor, clerkship director, or delegate preferably before the end of the rotation but not later than seven working days after the end. All results will be submitted to the undergraduate committee of the department, who, in the case of a failure will review all the evaluations and preceptors' pass/fail assessments to determine the overall, pass/fail standing for the student in that department.

The Community Health Science Project

Each student will complete a paper and presentation in community health sciences during the Multiple Specialty Rotation. The paper will be evaluated by the supervisor to a standard set by the department with approval of the community health science undergraduate clerkship director. If the paper is unsatisfactory then the preceptor will meet with the student to determine an appropriate time for improvement before a failure is recorded. In the case of a failure, the clerkship director, or delegate, will submit the failure to the COE Clerkship and advise upon the remediation needed for the student to produce a satisfactory paper.

Remediation for an MSR Clerkship Failure:

The COE Clerkship will provide the student who has failed a clinical component of the MSR with a remedial period in the department in which the rotation was failed. This period is flexible but can be up to the same length as the failed rotation. Such a remedial rotation will be an equivalent educational experience to that failed and its goal will be for the student to reach the expected standard of clinical performance. A similar process of evaluation will be used and may be supplemented by a clinical oral and/or written examination if the department deems it necessary. The remedial will be taken in an elective period.

5.3.6 The Elective Periods

Method of Evaluation

Electives are evaluated in a similar manner to other clerkship rotations and students are required to obtain a completed elective evaluation form for every elective pursued. These evaluations will be reviewed by the electives coordinator and unsatisfactory assessments will be submitted to the COE Clerkship. If an elective experience is failed, all of the student's elective

evaluations will be considered to determine a composite pass/fail for the elective period.

Remediation for an Electives Failure

The COE Clerkship will devise a remedial period of up to four weeks which will take into account the areas of weakness revealed by the student's elective evaluation. This will be taken in the next available free time for the student. The remedial period will be evaluated by clinical assessment and can include an oral exam if the COE Clerkship deems it necessary.

5.3.7 Failure of a Student in the Clerkship Program

The Clerkship Program is a continuum held over Year 3 and Year 4. A failure of the Clerkship Program is considered to be a failure of one year, see Section 3 Academic Regulations, above.

Failure of the Clerkship

The student will be determined to have failed the Clerkship Program if:

1. Failure of Clinical Assessments

The student has received failing evaluations in one or more of the following:

- a) Two major clerkships in different disciplines (Internal Medicine including selective, Surgery including selective, Pediatrics, Obstetrics/Gynecology, Psychiatry, and Family Medicine)

OR

- b) One major clerkship and:
 - i) its remedial, or
 - ii) an ITC remedial, or
 - iii) an MSR remedial, or
 - iv) an elective remedial

OR

- c) Remedials in two of the following:
 - i) Anesthesia
 - ii) Emergency Medicine
 - iii) Otolaryngology
 - iv) Ophthalmology
 - v) Elective
 - vi) ITC

2. Failure of Examinations

The student has failures in one or more of the following::

- A National Board examination three times, or
 - Three National Board examinations twice, or
 - The CCE after remediation, or
 - The community health science paper, including its remediation.
3. If the remediation period recommended for a student, for whatever cause, requires more than eight weeks, then the student will be deemed to have failed the Clerkship Program.

5.3.8 Terms for the Repeat Clerkship

A student who fails the Clerkship Program, be it because of failure of clinical assessments, failure of examinations, or failure of remediation (as above), immediately ceases in the program, and will be required to repeat the Clerkship Program. The Repeat Clerkship will consist of the following, at a minimum: Six week rotations in each of Core Internal Medicine, Core Surgery, Pediatrics, Family Medicine, Psychiatry, and Obstetrics/Gynecology, plus 12 – 16 weeks electives. Students in the Repeat Clerkship will also be required to complete the ACLS course (0.5 weeks), and the LMCC refresher course (4.5 weeks). They will also be granted 3 weeks for CaRMs interviews and two weeks for vacation. Furthermore, if the failure occurred prior to the completion of the Medicine Selective, Surgery Selective, Multiple Specialty Rotation (MSR), or Community Health Sciences Project, then these will be required components of the Repeat Clerkship as well. The student must satisfactorily meet all clinical assessments, examinations, the CCE, as well as remedial rotations (as appropriate), regardless of whether they had been passed previously. The Repeat Clerkship will be submitted to the Progress Committee for review and final approval.

5.3.9 Terms for Failure of the Repeat Clerkship

The terms for failure of the Repeat Clerkship are the same as listed above in 5.3.7 "Failure of a Student in the Clerkship Program." A student who has failed the Repeat Clerkship will be required to withdraw from the Faculty of Medicine program.

5.4 Regulations for Students Taking Leave from the Clerkship Program

Students may, for health or personal reasons, withdraw from clinical rotations or take temporary leave. For planned leave, prior permission must be obtained from the Associate Dean UGME or Assistant Dean Student Affairs and the Clerkship Coordinator. For leaves due to sudden or unexpected circumstances, Office of the Associate Dean UGME, the Clerkship Coordinator and the clerkship director or delegate of the rotation must be informed. Written documentation of the reason for leave will be required by the Office of the Associate Dean UGME. The information is confidential to the Associate Dean UGME and Assistant Dean Student Affairs.

If, at the time of taking leave, less than one half of that part of the rotation has been completed, the student will have to start the rotation again from the beginning of the rotation at a later date convenient to the schedule.

If, at the time of taking leave, more than one half of that part of the rotation has been completed and if the student's performance to that date has been considered satisfactory, the student will only have to complete the missed time at a later date convenient to the schedule. The final evaluation will be made from the assessments in both parts of the rotation.

Brief periods of leave of up to one day may be taken upon notification and approval by the clerkship director and/or delegate. Leaves of absence may be requested for personal, academic, or compassionate reasons, or to accommodate interviews for postgraduate positions. Permission must be obtained in advance, in accordance with the *Leave of Absence from a Clerkship Rotation Guidelines and Procedures* that is available at the www.umanitoba.ca/medicine website or in hard copy from the Undergraduate Medical Education Office. The normal clerkship is completed in 80 weeks, not counting CaRMS interview time and holiday time. When, because of leaves of absence, a student will take more than 80 weeks, including elective periods, to complete the Clerkship Program then the COE Clerkship will review the student's record (clinical assessments and examinations) during the Clerkship Program to ensure that the time lost has not compromised the overall achievement of the student. Moreover the COE Clerkship must decide if the extended nature of the student's course has resulted in a standard of evaluation for the student that is different from the other students of the year who have had less time. If the COE Clerkship determines that this student has not reached the standard expected of a student completing the regular Clerkship Program, and even if all rotations have been completed, then the COE Clerkship may require a further period of clinical training for students. This will not count as a failure, but as a remedial period to help the student to attain the standard expected in a student completing the Clerkship Program. During this remedial period all regular methods of evaluation, clinical assessments and examinations, will apply although, at the recommendation of the COE Clerkship, certain examinations may be omitted. If this remedial period is failed then the student will be deemed to have failed the Clerkship Program.

Students who miss a statutory holiday because they are on-call that day are entitled to a day off in lieu. This day must be taken in the same rotation. When there is a difference between statutory holidays between the hospitals and the University, Clerkship students are expected to follow the hospital schedule.

5.5 Reviews and Appeals of Failed Rotations and Examinations

A student who disagrees with any evaluation, or recommended remediation, from departmental rotations or by examination, whether externally or internally produced, may ask for it to be reviewed and re-evaluated. The student should consider obtaining the advice of the Student Advocate (telephone (204) 474-9251). Students are required to sign their FITERs but can include a notation about disagreement with the findings.

The request for review should be addressed to the Assistant Dean Student Affairs, who direct the request to the appropriate authorities. The request can be made verbally to the authority but is better in writing; the request should be supported by reasons for the disagreement. Student representatives or the Assistant Dean Student Affairs can put forward the student's request at the undergraduate departmental committees and COE. If the recommendation for failure is upheld by the appropriate committee of evaluation, the same request and its supporting arguments can be submitted to the Progress Committee and presented by either the student representatives, the Assistant Dean Student Affairs, or the Student Advocate. If the Progress Committee upholds the failure, then the student may appeal the result within 28 working days of receipt of the failure by submitting a written appeal to the Progress Committee.

On the receipt of such an appeal the Progress Committee will refer the appeal to the Faculty Executive Council Committee on Student Academic Appeals. The Student Academic Appeals Committee will hear the appeal within 28 days of an appeal being filed. The student will be informed of the decision within 10 working days of the conclusion of the appeal. If necessary, the student may then appeal to the Senate Committee on Student Appeals. It is strongly recommended that the student obtain the advice of the Student Advocate. If a failing evaluation is overturned on appeal then the original pass/fail evaluation must be stricken from the student's record and the new evaluation inserted – examination marks and the comments of clinical assessments will be kept, except where they were found to be invalid during the appeal, in which case a correct comment or mark is inserted.

SECTION 6: Academic Research in Medical Education

Part of the educational responsibility of the Faculty of Medicine is to perform research on innovations and effectiveness in medical education. Whenever students are the research subjects, all such research must have approval from the Faculty of Medicine Research Ethics Board. Where students are studied individually their participation will be voluntary. Research findings will not identify individuals.

SECTION 7: Advanced Degrees in Medicine

7.1 Bachelor of Science in Medicine (B.Sc. (Med.))

The Bachelor of Science in Medicine program is offered during the summer months following first and second year of the undergraduate program in Medicine. The B.Sc. (Med) program is designed to provide the undergraduate medical student with the opportunity to gain firsthand experience in medical research. A large variety of basic science and clinical research projects are available for the student to choose from each year.

The program is open to undergraduate students in the Faculty of Medicine and, if approved by the B.Sc. Medicine Committee, to selected undergraduate students from other Canadian and international medical schools. The work for this degree may be carried out in any department of the Faculty of Medicine. This program may not be taken concurrently with any part of the medical curriculum nor by a student carrying any failures or more than one block of required remediation in his/her medical program. To enrol in the B.Sc. (Med) program the student must find a supervisor in any field within the Faculty of Medicine. The supervisor must be a member of the Faculty of Medicine. Together, the student and supervisor submit a written project proposal for scrutiny to the B.Sc. (Med) Committee. If the project proposal is accepted by the committee, students are accepted into the B.Sc. Medicine Program and can then be registered with the university for the B.Sc. Medicine summer sessions.

An examining committee of two faculty members excluding the B. sc. (Med) program director, one from outside the department in which the research work is carried out, will be established for each student.

Students will be required to produce research and present their findings acceptably in both a written report and at a research forum at the conclusion of their second summer. Students will be evaluated by their Supervisor after the first summer and by their examining committee following the completion of the requirements for the B.Sc. (Med) degree. Students will be required to withdraw from the program if they make unsatisfactory progress, including after the first summer of research.

The B.Sc. (Med) degree will be conferred at the same time as the M.D. degree unless the student, having satisfactorily completed the requirements for the B.Sc. (Med) degree, discontinues the study of medicine in this faculty. In this case, the B.Sc. (Med) degree will not be conferred.

7.2 MD/PhD Option

Purpose

The combined-degree MD/PhD Option in the Faculty of Medicine is designed to produce academic clinician scientists who are interested in a career that combines both research and clinical medicine.

Duration

The minimum program of study is the total required by the Faculty of Medicine for the MD program (4 years) plus the minimum requirements of the Faculty of Graduate Studies (3 years from honours undergraduate degree). Students having obtained advanced/graduate training prior to admission may be granted advanced standing. Students will be considered to be full-time graduate students through the entire period.

Eligibility

Students enrolled in or admitted to Medicine are eligible to apply.

Application process

Students wishing to apply should contact the Director of the Option. Acceptance will minimally require: 1) identification of a supervisor (within a department in the Faculty of Medicine which has an approved PhD program) who has adequate resources for the proposed program of study and whose department recommends acceptance, 2) interview with the Faculty MD/PhD Selection Committee and their recommendation for acceptance, 3) identification of a source of adequate financial support for the student and 4) acceptance by the Faculty of Graduate Studies.

Program fees

The total tuition fees payable are the sum of the fees required for the MD and PhD programs of study. Continuing fees (Graduate Studies) are also applicable.

Administration

The Associate Deans for Research and UGME and Assistant Dean Admissions are advisory to the Option Director (Program Director, Advanced Degrees in Medicine). They will ensure 1) adequate resources for all aspects of the delivery of the program, 2) liaison with the Department, the Faculty of Medicine (including flexibility re: leaves for research) and Faculty of Graduate Studies, 3) review of advisory committee composition/function and of student progress and satisfaction and 4) the provision of program elements considered important to the success of the Option. Faculty members holding dual MD/PhDs will be requested to provide input as resource persons to the program.

Coursework

The minimum course requirements of the Faculty of Graduate Studies will be applicable in addition to the normal curriculum of medical studies.

Research/Thesis requirements

The quality and quantity of research supporting the thesis shall be consistent with that required for other doctoral candidates in the field.

Additional program elements:

Seminar Series and Research Progress Evaluations

Each student will be required to regularly attend a designated research seminar series organized by the sponsoring research discipline of the student. In addition, mandatory attendance will be required of all MD/PhD students and their supervisory faculty advisors to participate in a quarterly, program-wide, MD/PhD Student Research Forum which will include MD/PhD graduates. These regular research days will provide time for students to present their work to a critical audience (research proposals, work-in-progress, critical reviews in major areas of recent scientific advances, etc.), and will also serve to promote networking within the program. Each student will be required to present a research update at least once a year, and satisfactory performance at this yearly assessment is required for continuation of program support.

Conferment of the Dual Degrees of MD/PhD

The MD and PhD degrees will usually be conferred simultaneously during convocation upon satisfactory completion of the entire option.

SECTION 8: Registration Information

Dean: Dean Sandham

Associate Dean (Postgraduate Medical Education): Ira Ripstein

Administrator, Postgraduate Medical Education: Laura Kryger

Postgraduate medical education (PGME) at the University of Manitoba is comprised of a variety of training programs. Programs are usually organized to be in one of three categories:

- Programs accredited by the Royal College of Physicians and Surgeons of Canada (RCPSC).
- Programs accredited by the College of Family Physicians of Canada (CFPC).
- Other training and fellowship programs approved by the Faculty of Medicine.

Programs in the first two categories are most likely to be recognized towards obtaining a license to practice medicine. The RCPSC and CFPC provide accreditation for the training program content and evaluative processes. After the successful completion of their training, candidates are eligible to challenge the appropriate national specialty exams for their particular programs. The complete listing of these programs follows in this section under the heading Description of Programs. The specific and detailed national requirements for individual programs may be obtained from the Postgraduate Medical Education Office.

The University of Manitoba is accredited every six years by the RCPSC and the CFPC to administer the training programs, and supports all training programs in a variety of ways.

Several hospitals and healthcare facilities in Winnipeg and rural areas outside of Winnipeg are used as training sites. The main teaching sites include: Health Sciences Centre, St. Boniface General Hospital, Seven Oaks General Hospital, Dauphin General Hospital, and Brandon General Hospital.

General Regulations

Once accepted into a training program the student (now usually referred to as a "resident") must pay a registration fee to the University of Manitoba. Each resident must register every subsequent year of his or her training program in person at the PGME office.

The resident must also register with the College of Physicians and Surgeons of Manitoba so that his or her name is entered onto the Clinical Assistant Register Part 1.

The resident must obtain malpractice insurance, usually from the Canadian Medical Protective Association or its equivalent.

Residents enrolled in postgraduate residency programs are expected to conform to such new requirements as may be adopted from year to year.

Residents must apply directly to either the Royal College of Physicians and Surgeons or the College of Family Physicians of Canada for evaluation of training and for permission to sit the college examinations. Being a resident in a program does not automatically enrol the resident for such examination or certification.

Eligibility

Graduates of Canadian medical schools are eligible for consideration of PGME training, and are required to challenge the Medical Council of Canada Qualifying Examination, Part I prior to commencing their residencies.

Generally, Canadian citizens or landed immigrants are eligible for provincial funding for residency training under the contract established with the Professional Association of Residents and Interns of Manitoba (PARIM).

International medical graduates (IMGs) are eligible to apply for admission after they have challenged the Medical Council of Canada Evaluating Examination. IMGs must be Canadian or permanent residents to be eligible to apply for postgraduate medical training. IMGs may apply for possible residency positions through the CaRMS match (see below).

Visa-trainees represent a special training category for entrance to postgraduate medical training. The visa-trainee applicant must pass the Medical Council of Canada Evaluating Examination and be sponsored by an agency which has entered into a contract with the University of Manitoba for such training.

All residents must receive remuneration from an institution recognized by the Government of Manitoba while registered in a training program in PGME.

Criteria for Selection

Selection for admission to the various training programs will be made primarily on the basis of scholastic, personal and professional attributes as determined by academic records, personal interviews, letters of reference and in-training evaluation reports. The selection process is determined by each particular training program through a set selection process. Admission to the postgraduate training year one (PGY1) for most programs is conducted through the CaRMS PGY1 match outlined below.

University Registration

All postgraduate trainees and fellows (not registered with the Faculty of Graduate Studies for M.Sc. or Ph.D. degrees) must be registered as postgraduate trainees in the Faculty of Medicine. The normal registration period is June 15 to July 1 each year, and is done by the Faculty PGME Office.

Program Administration

The departments which provide PGME training programs in the Faculty of Medicine are: Anesthesia, Community Health Sciences, Family Medicine, Biochemistry and Human Genetics, Emergency Medicine, Internal Medicine, Medical Microbiology, Obstetrics, Gynecology and Reproductive Sciences, Otolaryngology, Pathology, Pediatrics and Child Health, Psychiatry, Radiology and Surgery. Some departments offer more than one program, and may also offer training in sub-specialty areas.

Each program has a Program Director and a Resident Program Committee to administer the training program. There are also program coordinators at each training site. The Program Director of each program reports both to the Department Head and the Associate Dean of PGME.

Beyond the program level, administrative matters pertaining to postgraduate residency training programs are the responsibility of the Associate Dean for PGME and the Faculty PGME Executive Committee and its sub-committees. These committees are responsible for reviewing programs, allocation of residency positions, hearing resident appeals, and other duties as outlined in the terms of reference for each committee. The committees make recommendations to both the Dean of the faculty and the Faculty Executive Committee.

Description of Programs

Postgraduate medical education will generally follow one of two pathways leading to licensure eligibility as described below.

College of Family Physicians of Canada Accredited Programs

The training program for family physicians offers a two-year basic program in outpatient, in-hospital and community settings. This program is composed of several streams (urban, rural, aboriginal, bilingual and DND) and the program leads to eligibility for certification with the College of Family Physicians of Canada (CFPC).

A small number of positions are also available from time to time for enhanced training within the Family Medicine Training Program for a third year of training in Emergency Medicine, Anesthesia and Palliative Care. Some of these enhanced positions may be associated with a return of service requirement. A six month training program in the Care of the Elderly is also available from time to time.

Royal College of Physicians and Surgeons of Canada Accredited Programs

The Faculty of Medicine offers a wide range of specialty and sub-specialty programs leading to eligibility for certification with the Royal College of Physicians and Surgeons of Canada. Programs vary in length from 2-7 years of medical training.

Primary Specialties:

Anatomical Pathology	Anesthesia
Cardiac Surgery	Community Medicine
Diagnostic Radiology	Emergency Medicine
Internal Medicine	General Surgery
Neurology (Adult)	Medical Genetics
Nuclear Medicine	Neurosurgery
Orthopedic Surgery	Obstetrics and Gynecology
Pediatrics	Otolaryngology
Plastic Surgery	Physical Medicine and Rehabilitation
Radiation Oncology	Psychiatry
Medical Microbiology	Urology

Subspecialty Programs*

(available only with completion in a primary specialty):

Cardiology (Adult)	Clinical Immunology and Allergy (Child & Adult)
Critical Care Medicine	Endocrinology and Metabolism (Adult)
Gastroenterology	Geriatric Medicine
Gynecologic Oncology	Hematology (Child & Adult)
Infectious Diseases (Child & Adult)	Maternal and Fetal Medicine
Medical Oncology	Neonatal-Perinatal Medicine
Nephrology (Child & Adult)	Respiratory Medicine (Child & Adult)
Rheumatology (Adult)	Thoracic Surgery
Vascular Surgery	Emergency Medicine (Child)
Palliative Medicine	Developmental Pediatrics

NOTE: These programs require different primary specialty credits, and may not be offered every year at the University of Manitoba.

Application Procedures:

All applicants for the PGY1 year of programs accredited by the RCPSC and CFPC must apply through the Canadian Residency Matching Service (CaRMS). All graduates of Canadian medical schools and international medical schools who are Canadian citizens or permanent residents and who have had no prior postgraduate medical training in Canada or the United States are eligible for the CaRMS match.

Applications for positions beyond the entry PGY1 year should be made at the PGME Office, 260 Brodie Centre or to Program Director for the specific program. Availability of positions will vary from year to year and are not guaranteed for any program. No resident can be accepted unless a funded position is available.

The Canadian Resident Matching Service (CaRMS)

This matching service is an autonomous, national organization of the Association of Canadian Medical Colleges. It provides an orderly method for students to select where to pursue postgraduate medical education and for program directors to rank the applicants they wish to enroll. A second matching process (the second iteration) by CaRMS is subsequently available (after the 1st CaRMS match) to medical students not matched in the first iteration, and other medical graduates who have already received some prior postgraduate training. All information about registration and matching processes is available on the CaRMS website: www.CaRMS.ca. There are listings of all programs on their website.

Evaluation of Residents in Postgraduate Medical Education Programs

Evaluation at all levels is based primarily on clinical performance in the patient care setting. The Program Director and the Resident Program Committee in each program are responsible for the implementation of the evaluation process in their own program. At the end of each clinical rotation or at other appropriate stages of the program, each trainee is evaluated by an in-training evaluation report appropriate to that program and training level. The evaluator(s) discusses the evaluation with the trainee and the report is forwarded to the program director. The written evaluation report should be signed by the resident to indicate that he or she has seen the report. This ongoing evaluation process may be supplemented by written examinations, oral examinations, supervised history and physical examination and by direct observation of clinical and technical skills.

When a resident receives an unsatisfactory evaluation or examination result, the program director will review the evaluation with the resident. Unsatisfactory evaluations will also be discussed in a confidential manner at the Resident Program Committee meeting. The committee will make recommendations regarding remedial training. If a subsequent remedial period is also evaluated as being unsatisfactory, the program director will contact the Associate Dean for Postgraduate Medical Education and the Probation Protocol and Procedure will be instituted. A failed probation period may result in a resident being discharged from his or her training program.

The Faculty Executive Council reserves the right to require any student to withdraw from the program of enrolment when it believes the student to be unsuited, on general considerations of scholarship, professional fitness or professional conduct for post-graduate medical education. However, the Faculty of Medicine does not have a professional unsuitability by-law. The right to require a student to withdraw on the basis of professional unsuitability may arise through the professional unsuitability by-law of the College of Physicians and Surgeons. This right prevails notwithstanding any other provision in the faculty regulations.

Appeals

A postgraduate trainee who wishes to appeal the results of any aspect of the evaluation procedure must follow the written guidelines established by the PGME Committee and the Faculty of Medicine. These guidelines may be obtained from the PGME Office.

SECTION 2: Admission To Music

2.1 Course Requirements for Admission from High School

Admission to the Faculty is directly from high school, although admission from University 1 is an option.

Other requirements

High school prerequisites: Music 40S is strongly recommended, while a second 40S language is recommended. Private lessons in your instrument and formal instruction in music theory and keyboard study are strongly recommended. Good academic performance in subject areas other than music is also strongly recommended. Refer to: umanitoba.ca/faculties/music/future/210.htm for audition information or admissions@umanitoba.ca

SECTION 3: Academic Regulations

The provisions of the chapter, General Academic Regulations and Requirements, and the chapter, University Policies, apply to all students. In addition, the Faculty has regulations and requirements, published below, which apply specifically to its students. Detailed information regarding regulations is available in the general office of the Faculty. The aim of the Bachelor of Music and Bachelor of Jazz Studies programs is to provide a basic framework of knowledge and ability; both theoretical and practical, from which either professional activities or graduate specialization can start. The Bachelor of Music four-year program contains concentrations in specified areas in the third and fourth years. After their first two years, students select the area in which their interests and abilities are strongest. The faculty offers four-year programs leading to the degree of either Bachelor of Music, with the following concentrations: Performance, Composition, History, and General Music and the five-year Integrated Bachelor of Music/Bachelor of Education. The four-year Bachelor of Jazz Studies is a direct entry program from high school. Practical study may be in piano, organ, harp, harpsichord, classical guitar, lute, recorder, voice, or any standard orchestral instrument: strings, woodwinds, brass, and percussion, and all the traditional jazz instruments. Ensemble work is included in all years of the program. Music courses are available to students in other faculties and

schools. Consult section 6.0 or the appropriate section of this Calendar for regulations.

3.1 Written English Requirement and Mathematics Requirement

Students in the Bachelor of Music and the Bachelor of Jazz Studies programs meet the university's written English requirement through three credit hours of English; ENGL 1310 or an equivalent. The university's mathematics requirement is met through the required course, MUSC 3230 Acoustics of Music (3 credit hours). These courses are listed as requirements to complete the first year of all Bachelor of Music programs and Bachelor of Jazz Studies.

3.2 Electives (Non-Music)

Students are required to take one course in a subject other than music for each year of the Bachelor of Music and Bachelor of Jazz Studies program to a total of 21 credit hours (18 for the Integrated B.Mus./B.Ed.). With the exception of the university's written English requirement in the first year, the student is free to choose any subject but is advised to seek the advice of faculty.

3.3 Ensembles

The Faculty offers a wide variety of opportunities for participation in ensembles such as the Women's Choir, Concert Choir, University Concert Band, University Singers, University Symphony Orchestra, University Wind Ensemble, University Jazz Orchestra, Jazz Ensembles, Collegium Musicum, Opera Theatre, Chamber Ensemble, Percussion Ensemble, Musical Theatre, XIE (experimental improv ensemble), Brass Choir, Classical Guitar Ensemble and other wind, string and keyboard combinations. Bachelor of Music students are required to participate in two ensembles each year for four years. Bachelor of Jazz Studies students are required to participate in one ensemble each year for four years. The ensemble committee determines placement in credit ensembles; such participation will normally be in ensembles directly relevant to the student's major practical study area. Students from other faculties and non-university musicians are welcome to participate as space and instrumental balance allow, but all participation is at the discretion of the conductor or coach of the ensemble. Some ensembles are offered for credit in other faculties.

3.4 Scholarships

Entrance and continuing scholarships are available for Faculty students. Details may be obtained from Financial Aid and Awards or the Marcel A. Desautels Faculty of Music.

3.5 Scholastic Progress

Within the first week of the term, students will be informed of the organization of materials, the nature and timing of testing, and the proportionate weighting of marks that contribute to the final grade in all academic courses at the Marcel A. Desautels Faculty of Music. Regulations regarding the grading of all practical courses at the Faculty are contained in the Student Handbook; special attention is called to the Recital and Master Class Attendance Policy which is an integral part of the grading system for Major Practical Study in each year of the program. A grade of "C" or better is required in each Music course throughout the Bachelor of Music and Bachelor of Jazz Studies programs, except where the Faculty Student Handbook states otherwise. Students who take Music elective courses and fail to achieve a minimum grade of "C" in them should repeat these courses. Due to the system of rotating electives, this may not be possible and in such a case another approved Music elective may be substituted. Supplemental examinations are not normally given in the Faculty, with the following exception: where a jury mark of "D" has been assigned in Major Practical Study, the juried examination may be reheard prior to the next registration. A term Grade Point Average of less than 2.0 or failure to achieve a grade of "C" or better in two Music courses will result in a student being placed on probation. A student failing to equal or exceed the minimum academic level by the end of the next term following probationary assignment will be placed on academic suspension. Each student is permitted a maximum 21 credit hours of failed Music courses in the Bachelor of Music and Bachelor of Jazz Studies programs. Students will not be permitted to register for a required music course more than twice without the permission of the Dean.

3.6 Dean's Honour List

B.Mus. and B.Jazz students who achieve a term Grade Point Average of 3.55 and are registered in a minimum of nine credit hours per term will be eligible for the Dean's Honour List. Students who are granted incomplete or deferred status will not be eligible.

3.7 Attendance

Regular attendance is expected of all students in all courses. Any unexcused absences from ensemble or practical study courses or three unexcused absences from any other music course may result in the student being required to withdraw from the course or ensemble, or may result in a failing grade being assigned. Students absent from a class for three or more consecutive meetings due to illness may be required to present a certificate from a physician. Prior approval for extended absences from class for reasons other than illness must be obtained from the instructor and the director. Unexcused absence from a class test may result in a grade of zero for the test. Make-up tests may be allowed in special circumstances.

SECTION 4: Program Requirements

These programs are in effect for students admitted since 1997-98. Students who entered in previous years should consult earlier calendars.

General Notes Regarding Electives

Most electives are not offered every year; some are offered every other year and some are offered less frequently. The listing of a subject as an elective does not guarantee that it will always be available or that it will be possible to fit it into all of the many varied timetable combinations of full- and part-time students. There may be a maximum limit set on the number of students permitted to take an elective in a particular session. Similarly, there will be a minimum limit. If registration is below the minimum, the elective will be cancelled for the session, and those registered will be required to transfer to another elective before the course change deadline date. Students are urged to discuss their elective program with members of the faculty toward the end of their second and third years to obtain advice concerning the best choice of electives for their needs. Each year, second-year and third-year students will be asked to complete a questionnaire concerning their choice of electives for the following year.

SECTION 5: Post-Baccalaureate Diploma in Performance

The Marcel A. Desautels Faculty of Music offers a Post-Baccalaureate Diploma in Performance designed for musicians who wish to further their performance skills in preparation for further study or professional activity. The unique features of the PBDP program are that students can design their own program of study and tailor it to their own areas of interest. They may take courses at the Faculty as well as in other faculties and schools at the University of Manitoba. In addition, courses taken while a student in the PBDP program may be transferred into the Master's program where the appropriate standard has been met and requirements have been satisfied.

5.1 Admission Requirements

Applicants for Admission must submit the completed application form and fee, and must possess a Bachelor of Music degree or a Conservatory Diploma taken in residence. They must also pass an entrance audition, which requires the performance of three works of contrasting styles and/or historical periods appropriate to the audition medium. This audition would normally be held in person, but video auditions may be accepted where distance is a prohibitive factor. Application materials, which misrepresent the level of performance ability, will be treated as fraudulent, resulting in dismissal from the program. Admission may not be possible for all qualified applicants, as it is dependent on number of spaces available, the major practical study area, and instructor availability. Applicants who hold the Post-Baccalaureate Diploma in Performance from the University of Manitoba (or an equivalent Post-Baccalaureate one-year program from another institution) may apply for a second PBDP if studying a different applied instrument than that of their first PBDP in their Major Practical Study, and Recital courses, and if the remaining course credits taken do not duplicate those of the first PBDP.

5.2 Admission Procedures

Application forms may be obtained from the Faculty. Completed application forms must be received by February 15th to begin study in September, or June 15th for a January start date.

5.3 Program Requirements

MUSC 5400 Major Practical Study, 1 hr. instruction/week or the equivalent, 6 credit hours

MUSC 5560 Recital, 1 hr. instruction/ week, 6 credit hours

MUSC 5180 Ensemble, 3 credit hours

Electives: chosen from available 3000 and 4000 level courses recommended by the advisor and approved by the Faculty, 15 credit hours

Total Credit Hours: 30

Note: A minimum of 18 credit hours must be taken in the Marcel A. Desautels Faculty of Music (although all 30 may be taken within the Faculty).

Reminder: While Faculty staff and faculty are available to clarify Faculty and university regulations and degree requirements, it is the student's responsibility to ensure that diploma and program requirements are met.

5.4 Academic Standing

Regulations for the Post-Baccalaureate Diploma program regarding academic standing, scholastic progress, attendance, required GPA, probation and suspension will follow those governing the Bachelor of Music and Bachelor of Jazz Studies programs as outlined in the Faculty Student Handbook.

5.5 Maximum Time Limits

Expected time to complete program: 1 year. The maximum time allowed for completing the Post-Baccalaureate Diploma program is 3 years. Students will not be permitted to transfer for credit any course completed more than five years prior to the completion date of the diploma.

5.6 Courses Available

Undergraduate 3000 and 4000 level courses approved by the Dean may be used as electives in designing the program of study. Students will register for their courses after their program has been determined in consulta-

tion with their major practical study teacher who will act as academic advisor during the Post-Baccalaureate Diploma program. Students may not count toward the PBDP any courses that counted for credit in a previous degree.

5.7 Credit Transfer

The Faculty's Registrar will process transfer of credits into the PBDP program. A maximum of 12 credit hours of courses may be transferred into the PBDP program provided that they have not counted toward any previous degree. A minimum of 18 credit hours must be taken within the Faculty, although up to the full 30 credit hours of the diploma program may be taken within the Faculty. Transfer of credits from the PBDP program into the M.Mus. is processed through the Faculty of Graduate Studies. Courses may not be counted for more than one degree, and may be transferred from the PBDP to the M.Mus. only if they have not been counted toward the PBDP or more than the minimum credit hours have been taken.

5.8 Completion of the Program

Minimum: 1 year, Maximum: 3 years. The Dean may grant extensions for medical or compassionate reasons. Medical: A letter from the student's physician stating the diagnosis and treatment with projected recovery. Compassionate: A letter from the student outlining the reasons for the extension showing that extenuating circumstances beyond the student's control have contributed to the need for an extension.

5.9 Assessment

Student Assessment: Type of evaluation: Academic freedom dictates that there will be variation between classes according to the professor's preferred systems, approaches, materials, readings, and assignments. However, the University of Manitoba regulations as outlined in the General Calendar state that within the first week of lectures, instructors must inform the class of the method of evaluation to be used in each course. Minimum Grade Requirements: In the Faculty students must attain a grade of "C" or higher for a course to count toward a degree, except in the case of Recital where a minimum of "B" is required. The PBDP program will be governed by these regulations, as outlined in the Student Handbook. Should the student transfer to another faculty in the university that faculty's regulations would apply relating to transfer of credit. Successful completion of the program will be achieved by receiving a "C" or higher in 30 credit hours. Teacher Assessment: The SEEQ course evaluations will be used in the PBDP program for academic courses, and the Faculty's specialized forms will be used for the performance-related courses.

1.3 Professional Designation

A graduate of the Four-Year Baccalaureate Nursing Program must write the Canadian Registered Nurse Examination (CRNE) to become eligible to practice nursing. Following successful completion of all courses, the Faculty of Nursing provides the College of Registered Nurses (CRNM) with a letter indicating that the student has completed the program requirements and is a potential graduand. Completion of the program entitles students to work as graduate nurses and to write the CRNE to obtain the designation, Registered Nurse (RN). Application and registration information can be obtained from the CRNM website at: www.crnmb.ca.

SECTION 2: Admission Requirements

2.1 Four-Year Baccalaureate Nursing Program

The following is a summary of the admission requirements. All admission requirements, as well as application deadline dates and forms, are included in an applicant information bulletin that is available from the Admissions Office website at <http://www.umanitoba.ca/student/admissions/>.

Courses completed at recognized universities other than the U of M:

Non-Nursing courses must be assessed as exact equivalents in order to meet the specific course requirements for admission under Option 1 or Option 2. It may not be possible to establish equivalency of courses completed over 10 years prior to application. In those situations, required courses may have to be repeated.

Non-Nursing courses that were completed more than 10 years prior to admission and that have been evaluated by the University of Manitoba can be used in the admission process but will not be considered for transfer credit toward the Nursing degree. Thus, only courses completed within 10 years prior to the date of admission to the Faculty of Nursing will be considered for transfer credit.

All courses (regardless of age) within the most recent 60 credit hours of university level course work will be included in the calculation of AGPA.

The above information also applies to Nursing courses taken at universities other than the U of M; however, Nursing courses will be considered for evaluation and credit only if completed within 5 years prior to application/admission.

See also Section on “Advance Standing/Transfer Credit”.

Course requirements for admission:

Students must meet the entrance requirements under Option 1 or Option 2, and complete the University Written English requirement to be eligible for admission (see Note 1). All required courses must be at a 1000 level or higher. “0900” level courses (e.g. ENGL 0930) are not accepted for admission or transfer credit.

The AGPA for admission will be calculated on the most recent 60 credit hours (including repeated courses of university level course work. If an applicant has less than 60 credit hours, the AGPA will reflect all credit hours completed (i.e.: a minimum of 30 credit hours to a maximum of 60 credit hours).

The minimum AGPA of applicants admitted under Option 2 may be significantly higher than for Option 1 applicants. An AGPA higher than the minimum is recommended as admission may be competitive. Preference will be given to Option 1 applicants. The lowest AGPA accepted in 2009 was 3.07 for Option 1, and 3.493 for Option 2.

Note 1: According to University policy, students who have a completed undergraduate degree are exempt from the Written English and math requirements (see appropriate section in Calendar for University policy on written English requirement).

Option 1

The above general requirements for admission, and:

All applicants must complete a minimum of 30 credit hours in the following identified courses (or their equivalent) with a minimum grade of “C” in each course before entering the Faculty of Nursing. The University Written English requirement must be met. The minimum adjusted GPA for admission to the Faculty of Nursing under Option 1 is 2.5. The Faculty of Nursing may admit students from Option 1 with a GPA of 2.0-2.49 (in descending AGPA order) when space is available.

Riddell Faculty of Environment, Earth, and Resources do not meet the Science elective requirement if taken in 2003-2004 and later. 1000 level introductory Geological Sciences courses (GEOL 1XX0) now offered under the Clayton H. Riddell Faculty of Environment, Earth, and Resources, will be accepted as Science courses if taken prior to September 1, 2006.

Note 5: BIOL 1110 [Health and Health Professions] may not be used as a Science elective.

Note 6: Science Prerequisites. Students must meet the current Science prerequisites before registration for Science courses. See the chapter for the Faculty of Science for the current prerequisites. It is preferred that the above prerequisites have been completed within the last five years. Math 40S is a prerequisite for Microbiology and Statistics.

The general requirements for admission, and:

All applicants must have completed at least 30 credit hours. The University written English requirement must be met (see Note 1). A minimum adjusted grade point average of 2.5 is required. Applicants from Diploma and Degree Nursing Programs Category

Applicants who have attended but have not completed a nursing diploma or degree program, the completion of which would result in the graduate’s eligibility to write the Canadian Registered Nurse Examination (or equivalent) in order to qualify for registration to practice as a Registered Nurse, must meet the admission requirements outlined below.

1. Meet admission requirements under Option 1 or Option 2, including the competitive AGPA in the year of application.
2. Submit, in writing, the reason for leaving the previous or current program and for applying to the Four-Year Baccalaureate Nursing Program at the University of Manitoba.
3. The Director, Dean, Coordinator, or Head of the Nursing program in which the student was previously or is currently registered will be contacted by the Faculty of Nursing for information about the student’s status in the previous or current nursing program (including matters pending) with regard to failures, probation, suspension, determination of professional unsuitability, disciplinary action, or other related matters.

The Admissions Committee reserves the right to deny admission to the University of Manitoba Nursing program based on any of the supplementary information.

Appeals of decision are limited to the question of procedural regularity only. The merits of the decision are not subject to review.

Special Consideration Category

The Special Consideration Category will consider applicants from Aboriginal populations of Canada. Applicants in this category must meet the minimum entrance requirements of Option 1 including a minimum AGPA of 2.5; however, they do not have to meet the competitive grade point average of admitted students in the admission year. Applicants must complete a supplementary application form that is sent by the Admissions Office following submission of the regular application. The Supplementary Application and following information are due no later than June 1:

1. A typed personal statement that identifies the reasons for selecting Nursing as a career choice; describes their education, employment, and volunteer experience; relates the significance of these experiences to their choice of Nursing as a career; and provides their reasons for applying in the Special Consideration category.

2. Three professional letters of reference that address the applicant's suitability for Nursing and potential for success. Examples of suitable references include a teacher, employer, clergy, and health professional, and not friends or family.

Selection is determined by the Admissions Committee.

In considering applications in this category, less weight will be given to background academic performance.

Up to five percent of admission spaces may be offered to Special Consideration Category applicants. The allocation of available spaces is entirely at the discretion of the Faculty of Nursing.

The Admissions Committee shall not be bound to admit the maximum percentage of applicants in the Special Consideration category in any given year.

The Admissions Committee reserves the right to consider the applicant who has applied for Special Consideration under the regular admission category, if it benefits the applicant.

Appeals of decisions are limited to the question of procedural regularity only. The merits of the decision are not subject to review.

Criminal Record Check/Child Abuse Registry Check for Admission

The many clinical agencies where Nursing students are placed for clinical practice require that all graduates of an approved nursing education program who wish to practice nursing in this province disclose information about any conviction for an offence under the Criminal Code (Canada), the Controlled Drugs and Substances Act (Canada), or the Food and Drugs Act (Canada).

Accordingly, all successful applicants must provide a self-declaration of a criminal record and Child Abuse Registry listing following provisional admission to the Faculty of Nursing. Successful applicants are also required to submit an official Criminal Record Check, including a vulnerable persons search, and Child Abuse Registry check before being allowed to register for courses. A criminal conviction will not necessarily result in denial of admission to the Faculty of Nursing. However, criminal offences will be reviewed by a sub-committee of the Nursing Admissions Committee for the implications of the conviction in view of the professional mandate to protect the public. Failure to disclose any adult criminal record or listing on the Child Abuse Registry will invalidate an applicant's application and shall result in automatic expulsion from the Faculty of Nursing if the applicant has been admitted. Any applicant on the Child Abuse Registry will be denied admission.

Information on the self-declaration of a criminal record and Child Abuse Registry listing is provided in the Application Information Bulletin, available from Enrolment Services at 424 University Centre.

The College of Registered Nurses of Manitoba (CRNM) also requires that all graduates of an approved nursing education program who wish to practice nursing in this province disclose information about any conviction for an offence under the Criminal Code (Canada) as indicated above. The review process by the Faculty of Nursing is independent of the review process conducted by the CRNM.

Advance Standing/Transfer Credit

Advance standing will be considered for courses completed at the University of Manitoba.

Nursing courses from any university, including the University of Manitoba, will be considered for advance standing/transfer credit only if they have been completed within five years prior to admission to the Faculty of Nursing.

Credit for Nursing courses previously completed as a student in the Faculty of Nursing is not given if there has been a lapse of five years or more since last attendance in the program.

Non-Nursing courses completed at other recognized institutions will be considered if completed within the past 10 years.

See also section on "Courses Completed at Recognized Universities other than the University of Manitoba."

Advance Placement Option: LPN

Applicants who graduated from the Licensed Practical Nursing (LPN) Program from Assiniboine Community College within five years of admission

to the Faculty of Nursing may be eligible for transfer credit. Applicants must meet admission requirements.

Advance Placement Option: RPN

Registered Psychiatric Nurses may be eligible for advanced standing in the Four-Year Baccalaureate Nursing Program. Applicants should inform the Faculty of their RPN status.

2.2 Baccalaureate Program for Registered Nurses

All admission requirements for applicants who are already Registered Nurses are described in detail in an applicant information bulletin that includes application deadline dates and application forms. This material is available from the admissions office website at: <http://www.umanitoba.ca/student/admissions/>

Admission Requirements

- 1) Graduation from an approved diploma of nursing education program;
- 2) Current active practicing membership in a provincial, territorial, state, or national nursing association/college of registered nurses; and
- 3) A minimum of 1125 hours of nursing experience will normally be required for selection.

The selection of students is based upon academic standing and professional experience. If applications exceed the number of spaces available, the best qualified candidates will be selected.

Proof of Professional Registration

Active practicing membership must be maintained throughout the program in the jurisdiction under which the student is a practicing RN. Verification will be obtained annually from the College of Registered Nurses of Manitoba by the Faculty for returning Manitoba students.

Students from outside of Manitoba must submit proof of registration annually from the registering body to the Faculty of Nursing.

After admission and at any time prior to completing the program, students with any changes to their active practicing status with the College of Registered Nurses of Manitoba, (e.g., conditions placed on a registration or ineligibility for active practicing status), are required to report this information to the Associate Dean, Undergraduate Programs, Faculty of Nursing. Such changes will be reviewed on a case by case basis. Failure to report a change in status may result in disciplinary action.

Transfer of Credit

University credits earned outside of nursing diploma programs or earned as part of an incomplete degree may be considered for transfer of credit. If a required course in the baccalaureate program was earned as part of a nursing diploma program or as part of another degree, an alternative course must be substituted. Transfer of credit will be considered for university level nursing courses completed within the five years prior to admission. Credit for previous nursing courses is not given if there is a lapse of five years or more from the last date of attendance in the program or if taken more than five years prior to admission. Credit for non-nursing courses taken at other universities over 10 years prior to admission will not be granted.

Graduates of the Red River College Diploma Nursing Accelerated Program (DNAP) (est. 2000) will receive advanced standing in the Baccalaureate Program for Registered Nurses (BPRN) for the following courses, provided a minimum grade of C+ was achieved in each course for transfer: NURS 3210 Research Methods, NURS 4220 Law and Ethics, and 6 credit hours of non-nursing electives. The Nursing courses must have been completed within five years, and the non-Nursing courses completed within 10 years, prior to admission to the Faculty of Nursing. All remaining courses for the BPRN must be completed at the University of Manitoba in order to meet the residency requirement for the BPRN.

Transfer of Credit for Advanced Certificate Programs

No credit will be given for these certificates in the Baccalaureate Program for Registered Nurses.

SECTION 3: Academic Regulations

The provisions of the chapter, General Academic Regulations and Requirements, and the chapter, University Policies, apply to all students. In addition, the Faculty of Nursing has regulations and requirements, published below, that apply specifically to its students.

Following the regulations for all students, please see the regulations that are specific to each program.

3.1 Regulations for All Students

Students are reminded of their obligation to be familiar with all regulations governing their continued progress in the program.

Students who do not register for any courses in one academic year must apply in writing to the Associate Dean, Undergraduate Programs, for permission to continue. Refer to section on "Leave of Absence" for further information.

Information Sessions

Optional information sessions will be held for students upon admission to the Faculty of Nursing, **prior to** registration. New students will receive an information package in the mail, and may attend an optional information session. Several sessions will take place in June and July.

Degree with Distinction

Four-Year Baccalaureate Nursing Program: Students who obtain a Degree GPA of 3.8 and above based on the last 67 credit hours of course work will be eligible for a Degree with Distinction.

Baccalaureate Program for Registered Nurses: Students who obtain a Degree GPA of 3.8 and above in their program of studies will be eligible for a Degree with Distinction.

Dean's Honour List

Students who achieve a minimum Term GPA of 3.5, including courses taken on a Letter of Permission, and who are registered for a minimum of 12 credit hours, will be placed on the Dean's Honour list. The Dean's Honour list will be determined after each term of study.

Scholastic Progress Requirements Applicable to All Students

Students will be required to obtain a minimum of "C" grade (2.0) in every course, and a program GPA of 2.5 in order to graduate. A final grade of "D" in any course taken to complete the degree requirement is considered a failure and is not accepted by the faculty.

Academic Probation

Four-Year Baccalaureate Nursing Program

Students enrolled in the Four-Year Baccalaureate Nursing program will be assessed after the Winter Term upon completion of a minimum of 24 credit hours. Students failing to achieve the minimum Degree GPA of 2.5 will be placed on probationary status.

Probationary students will be assessed at the end of the Winter Term after completion of a minimum of 15 credit hours. Students failing to achieve the minimum Degree GPA of 2.5 will be placed on academic suspension.

With special permission of the Associate Dean, Undergraduate Programs, Faculty of Nursing, a student on probation can request an early review of academic progress based on completion of less than 15 credit hours.

Students on probation are expected to meet with a Student Advisor at least twice, with a minimum of once per term, for academic advisement.

Baccalaureate Program for Registered Nurses

Students enrolled in the Baccalaureate Program for Registered Nurses will be assessed after the Winter Term upon completion of a minimum of 18 credit hours. Students failing to achieve the minimum Degree GPA of 2.5 will be placed on probationary status.

Probationary students will be assessed at the end of the Winter Term after completion of a minimum of 15 credit hours. Students failing to achieve the minimum Degree GPA of 2.5 will be placed on academic suspension.

Academic Suspension

A probationary student who does not achieve the minimum academic standing is required to withdraw from the Faculty of Nursing with the status "academic suspension." While suspended indefinitely, after one year's suspension the student may apply for reinstatement on academic probation.

To request reinstatement following academic suspension, the student should submit a written request before May 1 to the Chair, Student Appeals Committee, Faculty of Nursing.

Supplemental Examinations or Tests

The Faculty of Nursing does not permit supplemental examinations or tests.

"0900" Level Courses

Credit will not be given for "0900" courses.

Prerequisite Deficiency

Students who enrol in courses provisionally pending satisfactory completion of pre- or co-requisites must, if unsuccessful, withdraw or amend their registration accordingly. The Faculty of Nursing reserves the right to not send reminders of the requirement to withdraw.

Challenge for Credit

Students wishing to challenge a course for credit should contact a student advisor.

Professional Unsuitability By-Law

The Senate of the University has approved a by-law granting authority to the Faculty to require a student to withdraw for reasons of professional unsuitability. A student may be required to withdraw from the Faculty when, at any time, the Faculty Council, through the Professional Unsuitability By-Law, believes the student to be unsuited for the profession of nursing, on general considerations of scholarship, professional fitness or professional conduct.

Copies of this by-law may be obtained from the Faculty of Nursing website. See chapter, General Academic Regulations and Requirements.

Attendance

Regular attendance at class is expected of all students in all courses. Attendance in on-line courses will be interpreted as regular and consistent participation in the course. Attendance in the clinical practice/laboratory portions of nursing courses is mandatory to enable the student to satisfy the evaluative criteria of the theoretical and practical components of courses. Students absent from class or practice due to illness may be required to present a certificate of illness. This certificate must be signed by a recognized health care provider. Absence for compassionate reasons is considered on an individual basis. Where absence is involved, make-up time may be required.

A course leader may initiate procedures to debar a student from attending classes and from final examinations and/or from receiving credit where unexcused absences exceed those permitted by faculty regulations.

Voluntary Withdrawal

Students admitted in September, 2004 and later are allowed only one voluntary withdrawal per nursing course in the Faculty of Nursing.

Students who voluntarily withdraw from a nursing course a subsequent time will have their withdrawal reversed and will be expected to complete the course. Any financial implications will be the responsibility of the student. Students planning to withdraw from any course are advised to speak with a student advisor regarding the implications of this decision.

Uniforms

Students are expected to obtain uniforms and other equipment for Nursing courses and practice, as specified by the Faculty of Nursing. All students, including those in the Baccalaureate Program for Registered Nurses, are required to wear name tags during clinical courses. Students should contact the Nursing Students' Association Council uniform representative for information. Name tags and crests are ordered during the year two orientation.

Clinical Agency Requirements

Students are required to satisfy the following, as required by the clinical agencies. Details will be provided at the year two orientation sessions.

Personal Health Information Act (PHIA)

Students must abide by the policies and procedures established at clinical practice sites. Within Winnipeg, this includes: attending a Winnipeg Regional Health Authority (WRHA) orientation session regarding the Personal Health Information Act (PHIA), signing the PHIA pledge, and obtaining a PHIA card. Students attending clinical practice at institutions outside the jurisdiction of the WRHA, such as hospital or community health programs in rural health authorities, may be required to attend a separate orientation and obtain a PHIA card appropriate for the health institution or region. PHIA card(s) and attendance at the PHIA orientation(s) are required for clinical practice and will be checked at clinical sites.

Electronic Patient Record Training

Mask Fit Testing

Non-Violent Crisis Intervention Workshop

Health Requirements and Immunization Regulations

Immunizations are a requirement mandated by the Regional Health Authorities. Students who do not meet the immunization requirement will not be able to register in any Nursing courses.

Immunization forms are sent to students upon acceptance into the program. Additional forms are available upon request. New students enrolling in the 4-yr program in the Faculty of Nursing must provide proof of current immunizations by August 1st. New students enrolling in the BPRN program must provide proof of current immunizations by August 1st for the fall term, December 1st for the winter term and April 15th for the summer term. Thereafter, returning students must provide proof of immunizations that require updating annually by June 1st or December 1st respectively. See "Penalty for Non-Compliance of Immunization and CPR" section. Students should keep a copy of their immunization records, and retrieve their immunization records from their files upon graduation.

Annual physical and dental examinations are recommended.

Cardiopulmonary Resuscitation Certification (CPR)

All students are required to obtain certification in CPR at the Health Care Provider Level (C). Newly admitted students must provide proof of certification by August 1st. Thereafter, returning students in the Four-Year Baccalaureate Nursing Program, including students who are certified at the Instructor level, must provide proof of re-certification annually by June 1st to the Student Services Assistant or designate. Certification must be valid for the entire academic year; therefore, all nursing students must recertify in April/May.

All students in the Baccalaureate Program for Registered Nurses must be certified at the Health Care Provider Level (C). Newly admitted students must submit proof of certification to the Student Services Assistant or designate by August 1st for the fall term, December 1st for the winter term and April 15th for the summer term. Thereafter, registered nurses are to maintain current certification at the required level.

Penalty for Non-Compliance of Immunization and CPR

Students who do not comply with the deadlines for proof of current CPR and/or immunizations will be placed on hold status which blocks the student from the registration system. Students on hold status will be permitted to register after the initial registration period (mid-August) after all documentation has been received. Hold status also prevents receipt of refunds or histories/transcripts from the Registrar's Office, attending clinical practice and graduation. Students who register after the initial registration period may not be able to register in some or all of the courses they had originally planned to take, and may experience a delay in completing the program.

Clinical Practice

Four-Year Baccalaureate Nursing Program students enrolled in nursing courses with clinical practice components may not register for any other course during those designated clinical days. Nursing clinical practice may be scheduled during the morning, afternoon or evening. Weekends are also used for some sections in clinical courses. Transportation costs to clinical practice settings are the responsibility of the student.

All students must be registered in all clinical courses for both terms by the specified deadline. Failure to register by this date may prevent accommodation in a clinical course. Current deadlines are published in the *Registration Information* on the Faculty of Nursing website.

Every effort will be made to accommodate eligible students who register for clinical courses during the initial registration period. However, spaces in clinical courses are dependent upon the availability of clinical sites, which are determined by health care agencies, and the availability of clinical teachers. Therefore, it cannot be guaranteed that all students who registered for the course can be accommodated.

Unsafe Clinical Practice Policy

The debarment policy will be invoked when a student demonstrates unsafe clinical practice. Unsafe clinical practice is behaviour which places the client or staff in either physical or emotional jeopardy. Physical jeopardy is the risk of causing physical harm. Emotional jeopardy means that the student creates an environment of anxiety or distress which puts the client or family at risk for emotional or psychological harm. Unsafe clinical practice is an occurrence or a pattern of behaviour involving unacceptable risk.

Debarment Policy

A student may be debarred from class, clinical practice, laboratories, and examinations by action of the Associate Dean, Undergraduate Programs for persistent non-attendance, unsafe clinical practice, and/or failure to produce assignments to the satisfaction of the instructor. Once the debarment process has been initiated, the student will not be able to voluntarily withdraw from the course that is presently under investigation. Students so debarred will have failed that course.

Failures in Clinical Course Rotations

Students who fail a rotation of a clinical course in which there are multiple rotations will be debarred from the course immediately following that rotation and will receive a final grade of "F". These students will not be permitted to voluntarily withdraw from the course following receipt of the failed grade.

Disciplinary Appeal

Until the final disposition of a disciplinary appeal, students in the Four-Year Baccalaureate Nursing Program will not be permitted to attend clinical practice or the nursing skills laboratory. At the discretion of the Associate Dean, Undergraduate Programs, Faculty of Nursing, students may be granted permission to attend the lecture component only of a nursing course(s) while awaiting a final disposition of an appeal currently in progress.

Clinical Absence

Four-Year Baccalaureate Nursing Program students returning following one year or more absence from clinical courses must complete a mandatory demonstration of psychomotor skills competency in the skills lab. Competency must be demonstrated prior to clinical attendance. Students should consult with a student advisor for instructions. Testing must be completed prior to July 1st.

Leave of Absence

Students wishing to interrupt their studies must have completed a minimum of three credit hours of course work in the Faculty of Nursing in the fall or winter term of their admission year. Students must submit a written leave of absence request to the Associate Dean, Undergraduate Programs, Faculty of Nursing. Leave of absence status does not extend the program time limit outlined in the Faculty of Nursing regulations. To maintain leave of absence status at the University of Manitoba, students may not attend any other university during the period in which the leave of absence is in effect. See "Transfer of Credit" under section 2.2.

Reinstatement

Students who have withdrawn from the Faculty of Nursing (interrupted their studies without requesting a leave of absence) must submit a written request for reinstatement to the Associate Dean, Undergraduate Programs. The student advisor will inform the student of the appropriate procedure and advance standing, if any, that the student may receive. Note: 1) the student who does not attend another faculty or institution and requests, within five years of voluntary withdrawal, to re-enter the Faculty of Nursing will be advised to forward such a request to the Associate Dean, Undergraduate Programs; 2) the student who requests to return to the Faculty of Nursing more than five years after withdrawal must re-apply through Admissions; 3) the student who has attended another faculty or institution following withdrawal from Nursing must re-apply through Admissions. See "Advance Standing/Transfer of Credit" under section 2.1.

Security of Academic Records

The university's policies regarding the security of student academic records are found in the chapter, University Policies, of this Calendar.

3.2 Regulations Applicable to the Four-Year Baccalaureate Nursing Program

Scholastic Progress

Students entering second, third, and fourth years of the Four-Year Baccalaureate Nursing Program must have a minimum Degree GPA of 2.5 to proceed in the program and a minimum Program GPA of 2.5 to be eligible for graduation. For further information, refer to: Academic Probation - Four-Year Baccalaureate Nursing Program.

Failures in Nursing Courses

Students will be permitted to repeat a nursing course only once following a failure. Withdrawal from the program will be required following a second failure in the same nursing course or any two clinical courses. Students

who fail a Nursing course twice and are required to withdraw from the Faculty of Nursing are ineligible for re-admission to the Faculty of Nursing.

Students who fail the same Nursing course twice, prior to applying to the Faculty of Nursing, are ineligible for admission to the Faculty of Nursing.

Criminal Record Check/Child Abuse Registry Check – For Current Students

Following the initial submission of the Criminal Record Check/Child Abuse Registry Check, at any time prior to completing the program (regardless of admission date), students charged with or convicted of a criminal offence or listed on the Child Abuse Registry are required to report this information to the Associate Dean, Undergraduate Programs, Faculty of Nursing. Failure to report a criminal offence may result in dismissal from the program. Criminal offences will be reviewed by the Faculty of Nursing for the implications of the conviction in view of the professional mandate to protect the public. A listing on the Child Abuse Registry or failure to report the listing will result in dismissal.

Students are advised that some clinical practice sites require that students complete a current or additional Criminal Record search and/ or a Child Abuse Registry check prior to the first clinical practice day.

Residence Requirements

See the chapter, General Academic Regulations and Requirements in this *Calendar*.

University Mathematics and Written English Requirement

The Written English requirement may be satisfied by a course also chosen to meet the Humanities requirement. Students should refer to the General Academic Regulations and Requirements in this *Calendar*. The mathematics requirement will be met in Year 2 of Nursing by Statistics STAT 1000.

3.3 Regulations Applicable to the Baccalaureate Program for Registered Nurses

Scholastic Progress

Students in the Baccalaureate Program for Registered Nurses must have a minimum Degree GPA of 2.5 to proceed in the program and a minimum Program GPA of 2.5 to be eligible for graduation. For further information, refer to: Academic Probation - Baccalaureate Nursing Program for Registered Nurses.

Residence Requirements

Students in the Baccalaureate Program for Registered Nurses are required to complete, with the minimum grade of “C” in each course, at least 32 credit hours of University of Manitoba courses. Of these courses, a minimum of 20 credit hours must be from among those offered by the Faculty of Nursing.

Failures in Nursing Courses

Students will be permitted to repeat a nursing course only once following a failure. Withdrawal from the program will be required following a second failure in the same nursing course.

Students who fail the same Nursing course twice, prior to applying to the Faculty of Nursing, are ineligible for admission to the Faculty of Nursing. Students who fail a Nursing course twice and are required to withdraw from the Faculty of Nursing are ineligible for re-admission to the Faculty of Nursing.

Criminal Record Search/Child Abuse Registry Check

Students in the BPRN are required to hold active registration with the CRNM which further requires a yearly self-declaration of any criminal charges or convictions. In addition, at any time prior to completing the BPRN (regardless of admission date), students charged with, or convicted of, a criminal offence or listed on the Child Abuse Registry are required to report this information to the Associate Dean, Undergraduate Programs, Faculty of Nursing. Failure to report a criminal offence may result in dismissal from the program. Criminal offences will be reviewed by the Faculty of Nursing for the implications of the conviction in view of the professional mandate to protect the public. A listing on the Child Abuse Registry or failure to report the listing will result in dismissal. In addition, please note that some clinical practice sites require that students complete a Criminal Record search and/or a Child Abuse Registry check.

Proof of Professional Registration

Verification of registration of returning students will be obtained by the Faculty annually from the College of Registered Nurses of Manitoba. Stu-

dents not registered with the College of Registered Nurses of Manitoba (CRNM) and continuing in the program must submit proof annually of active practicing status in the jurisdiction in which they hold membership.

After admission and at any time prior to completing the program, students with any changes to their active practicing status with the College of Registered Nurses of Manitoba, (e.g., conditions placed on a registration or ineligibility for active practicing status), are required to report this information to the Associate Dean, Undergraduate Programs, Faculty of Nursing. Such changes will be reviewed on a case by case basis. Failure to report a change in status may result in disciplinary action.

It is the responsibility of students to ensure all program requirements have been met before working as a graduate nurse and/or writing the qualifying exams to become a Registered Nurse.

NURS 4290 Clinical Practicum

All other courses in the curriculum must be successfully completed and the grade posted prior to starting NURS 4290.

Any costs incurred in completing this course are the responsibility of the student. Proposals must meet the approval of the Faculty of Nursing and must have academic merit. A student's chosen area for completion of practicum experience must be approved by the Faculty of Nursing. The location of the practicum must meet the approval of the University of Manitoba. The location of the practicum is subject to change in the event approval is not received. There may be organizations which require contractual arrangements with the student and/or University of Manitoba prior to permitting the student to enter into the practicum experience. There is no guarantee the University of Manitoba will enter into such contractual arrangements to permit the student to carry out practice at a particular agency or site. In such cases, the student should be prepared to choose an alternate agency or site.

4.1.1 Courses Which May be Used as Electives

Electives are to be taken from Arts, Science, professional faculties or the Inter-Faculty Option in Aging (18 credit hours). (See section 1.2). Of the total credit hours of electives, at least 6 credit hours must be at the 2000 level or higher. Electives offered by the Faculty of Nursing are:

These "NURS" courses may be taken as electives only, and are not an alternative for a required nursing course. Note: Each course is normally offered every second year.

Inter-Faculty Option in Aging – See Section 1.2

4.2 Baccalaureate Program for Registered Nurses (BPRN)

The Faculty of Nursing BPRN was developed to recognize and value the knowledge and experience of practicing Registered Nurses. The learner-centred, process curriculum is designed to further the capacity of Registered Nurse practice in an ever-changing and increasingly complex health care system.

The curriculum consists of a minimum of 33 credit hours in Nursing, and 12 credit hours from Arts, Science or a professional faculty (for a total of 45 credit hours).

Students may elect full-time or part-time study. A variety of community settings are utilized for clinical experience. Courses may be offered in late afternoons or evenings, during summer session and through distance education (correspondence) or internet-based study.

Students graduating with the minimum of 45 credit hours of coursework will be considered on an individual basis for admission to the graduate program in Nursing (Master of Nursing). For further information, contact the Faculty of Nursing, 474-7452.

4.2.1 Special Student Status in Nursing

Students who are not admitted to the Baccalaureate Program for Registered Nurses may be eligible to apply to the Faculty of Nursing as a special student. Once admitted, students may register in University of Manitoba courses. Following are the guidelines for special student status:

- Special Students are allowed to register for a maximum of 15 credit hours.
- Special Students must obtain a minimum of "C" grade in a course in order to transfer credit into the Baccalaureate Program for Registered Nurses.
- A nursing course completed as a special student may be accepted subsequently for credit in the Baccalaureate Program for Registered Nurses up to five years from the date of completion.

Prior to registering for a nursing course, all special students must obtain written permission from a Faculty of Nursing student advisor and present a photocopy of their current Active Practising Membership with the College of Registered Nurses of Manitoba or other jurisdiction.

Completion of courses as a special student does not guarantee admission into the Baccalaureate Program for Registered Nurses. All students must complete the application forms and submit required information by the application deadline for the term in which students are applying, unless otherwise indicated at the time of application.

The Faculty of Nursing will allow Registered Nurses admitted to another faculty at the University of Manitoba or another university to register for a maximum of 15 credit hours of nursing courses prior to being admitted to the Faculty of Nursing. 4.2.3 Clinical Courses and NURS 4210 (Independent Study) and NURS 3200 (Long Term Illness) for the BPRN

Review section 3.1 Regulations for All Students which contains information regarding the Personal Health Information Act (PHIA), immunization and CPR regulations, and other information specific to clinical practice.

A clinical project course (normally designated by the fact that it is a 4 credit hour project based course) involves a heavier workload and time commitment than a 3 credit hour course. For most of these courses, clinical placements/assignments will be arranged between the course leader and student at or prior to the start of a term.

For courses NURS 3200 (Long Term Illness) and NURS 4210 (Independent Study), students must contact the course leader at least **three months prior to the start of classes** to state their intention to register for these courses and to discuss preference of clinical sites. Placement sites will be arranged as requested by the student on a first-come, first-served basis according to

the availability of the agency. Registration in these courses is restricted to students who have contacted the course leader.

NURS 4210 Independent Study in Nursing

The student is responsible for choosing an area for completion of the practicum experience. The choice of subject, the proposed plan for completion of the study, and the faculty advisor selected by the student must all be approved by the Faculty of Nursing. In addition, the location of any practicum component must be approved by the Faculty of Nursing.

There may be organizations which require contractual arrangements with the student and/or the University of Manitoba prior to permitting the student to enter the practicum experience. There is no guarantee that the University of Manitoba will enter into a particular agreement and, if an agreement is not approved, the student would have to select an alternate practicum site. Any costs incurred in completing this course are the responsibility of the student.

Information sessions for NURS 4210 are held twice yearly, in October and in March. Refer to the BPRN News website for dates. **Any student who is unable to attend the information session should contact the Course Leader at least 3 months prior to the start of the term in which the course is offered in order to discuss the proposal.**

Note: the prerequisite for this course is 35 credit hours of completed study in the program.

4.2.4 Courses Which May be Used as Non-Nursing Electives in the BPRN

Courses may be selected from any faculty or school of the University, subject to faculty/department regulations and subject to the student's meeting any prerequisite requirements. See Note 4 under 4.4 BPRN Curriculum. Some suggestions follow:

Criminal Record Check/Child Abuse Registry Check

Many health care agencies where Pharmacy students are placed in a health care setting require a criminal record and/or child abuse registry check. As a result all successful applicants to the Faculty of Pharmacy are now required to provide a self-declaration of a Criminal Record and Child Abuse Registry listing following provisional admission, and subsequently a current, official Criminal Record Search and Child Abuse Registry Check. All documents must be submitted to the Faculty of Pharmacy Dean's Office by the first day of classes. Any applicant on the Child Abuse Registry will be denied admission. A criminal conviction will not necessarily result in denial of admission to the Faculty of Pharmacy. Criminal offences will be reviewed by a sub-committee of the Pharmacy Admissions Committee for the implications of the conviction in view of the professional mandate to protect the public. Failure to disclose any adult criminal record or listing on the Child Abuse Registry will invalidate an application and shall result in automatic expulsion from the Faculty of Pharmacy if the applicant has been admitted. In addition, the Manitoba Pharmaceutical Association requires that all graduates of the Faculty of Pharmacy who wish to obtain a license to practice pharmacy in this province, must disclose information about any conviction for an offence under the Criminal Code (Canada), the Controlled Drugs and Substances Act (Canada), or the Food and Drugs Act (Canada) in order to be considered for eligibility for registration with the Manitoba Pharmaceutical Association. The review process conducted by the Faculty of Pharmacy is independent of the review process conducted by the Manitoba Pharmaceutical Association.

Immunization

All students enrolled in the Faculty of Pharmacy must be immunized against the following diseases: diphtheria/tetanus, polio, rubella, measles, mumps, chickenpox, Mantoux/Tuberculosis and hepatitis B. The influenza vaccination is recommended but not required. Students admitted to first year Pharmacy will be provided with an Immunization package at the time of acceptance into the Faculty. Students have the option to complete their immunizations with their own healthcare provider or participate in the Bannatyne Immune Status Program on campus. Students will be required to complete their Immunization Record Form by the end of their first year. Students will not be able to attend clinical rotations until all immunization requirements are up-to-date. Students are responsible for updating their immunizations as needed. Completion of the immunization schedule is required for course progression in Pharmacy.

SECTION 3: Faculty Academic Regulations

The provisions of the chapter, General Academic Regulations and Requirements, and the chapter, University Policies, apply to all students. In addition, the Faculty of Pharmacy has regulations and requirements, published below, that apply specifically to its students.

3.1 Scholastic Progress

For course progression in the Faculty of Pharmacy students must achieve a minimum combined fall and winter term GPA of 2.0, and attain the minimum passing grade of "C" in each course.

A student in any of the first three years of the pharmacy program who records no more than two grades of "D" during the academic year, and who achieves a minimum combined fall and winter term GPA of 2.00, may at the discretion of the dean be permitted to apply for a supplementary examination in those courses.

A student in the fourth year of the pharmacy program who records no more than one grade of "D" during the academic year, and who achieves a minimum combined fall and winter term GPA of 2.00, may at the discretion of the dean be permitted to apply for a supplementary examination in that course.

Application forms for supplementary examinations are available in the Faculty of Pharmacy Dean's Office, and the examination is subject to a prescribed fee. Supplementary exams will normally take place in the following mid-summer examination session each year.

A student who has failed to record a minimum grade of "C" in more than two courses within years one to three of the pharmacy program, or in more than one course in the fourth year of the pharmacy program, or who records a grade of "F" during the academic year at any stage during their program may not be granted supplementary examinations unless the dean by reason of special circumstances applicable to the student's case otherwise decides.

A candidate who has been allowed to sit for a supplementary examination may not be awarded a grade higher than "C" in that course. Grade calculations for any course following supplementary examination will be inclusive of on-course assessment. Grades achieved following supplementary examination will replace those grades originally recorded on the student's academic record.

A student who fails to achieve a passing grade of "C" in one course, following supplementary examination if that option is offered, and who achieves a minimum combined fall and winter term GPA of 2.00, will be required to repeat that course and may at the discretion of the dean be required to repeat all, or a number of courses in that year.

A student whose combined fall and winter term GPA falls below 2.0, or who fails to achieve a minimum passing grade of "C" in two courses, following supplementary examination if that option is offered, and whose combined fall and winter term GPA remains above 1.75, will be considered to have failed that year, and will be required to repeat all subjects in the following academic year.

The records of all students who fail a year, and the disposition of the cases, shall be reported to Faculty Council for information, but not for debate. Students who have cause to disagree with the disposition may file an appeal against the decision.

A student who fails more than one year in the program, or who fails the same year twice, shall be required to withdraw from the Pharmacy program.

A student who fails to achieve a passing grade in more than two courses in the academic session, or whose combined fall and winter term GPA falls below 1.75, or who fails to achieve a passing grade in a repeated year, will be required to withdraw from the Pharmacy program.

3.2 Appeals Concerning Scholastic Progress

Should a student wish to appeal against any decision concerning scholastic progress, the following procedure should be followed:

The problem should be discussed with the Associate Dean (Academic) of Pharmacy, who will supply information about the appeals procedure, academic regulations and related matters.

Students who still wish to proceed with an appeal should consult the Student Advocate for advice and assistance, and a letter of appeal must be sent to the dean within 21 days of receiving notification of the decision. The letter should state the nature of the decision being appealed and the alternative that is being requested.

The Dean will respond in writing to notify the appellant of the date and time the student should attend a meeting of the Faculty Appeals Committee.

The Appeals Committee will comprise: the Dean of the Faculty (or designate) as chair; one senior support staff member as secretary; three members of the full-time faculty appointed by the full-time faculty; a representative of the profession appointed by the Manitoba Pharmaceutical Association; one student member of Faculty Council appointed by the Faculty Council. The chair and senior support staff member are non-voting members.

Appellants have the right to attend the hearing of their appeal and may have a representative to assist them at the appeal hearing. This representative may be the Student Advocate or a fellow student or other full-time

member of the university community not receiving payment for appearing, or working for Legal Aid. In addition, if the student wishes, one member of his or her immediate family, and also if desired a lawyer, may be present, but as observers who do not participate. The decision of the Appeals Committee will be conveyed to the student as soon as possible after the hearing.

If the appellant is still dissatisfied they may wish to discuss the issue further with the Student Advocate and/or the university Ombudsman. Student appellants should not expect a favourable decision when their appeal is based on grounds related to external factors such as employment, sports, or hobbies.

3.3 Transfer of Credit Earned Elsewhere

Pharmacy students transferring credit from any faculty or school in the University of Manitoba or from other universities or colleges will have each course acceptable for transfer purposes noted on the student record with the course classification of "TR" (transfer). The relevance of courses completed to the student's educational objective at the University of Manitoba and the quality of academic achievement as evidenced by the student's grades will be determining factors in assessing acceptability of credits earned elsewhere. No transfer of credit will be given for courses taken ten years or more prior to application date. No transfer of credit will be permitted for courses where a "D" grade (or its percentage equivalent) has been awarded.

3.4 Residence Requirements

A minimum of two years attendance at the university within the Faculty is required for the Bachelor of Science in Pharmacy, except with the permission of the Faculty.

3.5 Attendance at Class

Regular attendance is required of all students in all courses. Students who are absent from class for a period of three days or more due to illness must present a certificate from a physician to the Dean's Office upon their return. An instructor may initiate procedures to debar a student from attending classes and from final examinations where unexcused absences exceed three continuous sessions. Students must obtain prior approval from the Dean for an absence exceeding one day for reasons other than illness.

3.6 Voluntary Withdrawals

Any student seeking to withdraw from a portion of, or all of their courses must provide written notification to the Dean's Office of the reasons for this request. Re-entry to Pharmacy by students who voluntarily withdraw, will be dependent on the availability of space and external rotation facilities. Any student who has voluntarily withdrawn from a portion of, or all of their courses in Pharmacy on more than one occasion will not be permitted re-entry into the program. Withdrawals for medical or compassionate reasons will not contribute toward this maximum. Students who, for medical reasons, withdraw from the program may not re-register until they have established, through proper medical consultation, their fitness to resume studies.

3.7 Deferred Examinations

Students may file an application for a deferred final examination with the Dean for reasons of illness or other disability, or for compassionate reasons, setting out the reasons for the deferral. The application must be filed within seven working days of the end of the examination series in which the examination was scheduled to be written and must be accompanied by a medical certificate or otherwise appropriate documentation certifying the reason for the deferral, the inability of the student to write the examination at the regular scheduled time and, where possible, indicating the period of disability. Based on the evidence provided, the Dean shall decide whether the application is approved. Students who, for medical reasons receive deferred examination privileges for all final examination series may not re-register until they have established, through proper medical consultation, their fitness to resume studies. Any students requesting a deferred examination on the grounds that they are participating in an inter-university, provincial, inter-provincial, national or international scholastic or athletic event shall be granted said deferral, provided an application is filed with the Dean of the Faculty well in advance (normally 20 working days) of the scheduled examination; and that the Dean is satisfied, based on the evidence provided, that the application should be approved and that an ap-

propriate time, and acceptable invigilator is not otherwise available to the student. Any student requesting deferred examination(s) will be required to sign an undertaking that the student has not discussed, reviewed, had access to, or otherwise become aware of the contents of the deferred examination except as expressly authorized by the instructor or professor for the course in which the deferred examination is being undertaken.

3.8 Incompletes

A student who is unable to complete the term work prescribed in a course may apply to the instructor prior to the end of lectures for consideration of a grade classification of 'Incomplete.' Should an 'incomplete' be granted the student will still be required to write the final examination, if one is scheduled for the course, and a temporary grade of 'IF' will be submitted. In addition to the grade, the recommendation for an 'incomplete' should indicate the reason(s) for consideration being given, a description of the outstanding work to be completed, and the date by which the work must be submitted. If a final grade is not reported by the above maximum extension deadlines, the letter 'I' will be dropped and the grade of 'F' will remain as awarded, unless where specific circumstances warrant, the Associate Dean (Academic) extends the date by which an Incomplete must be cleared. Instructors must formally request such an extension prior to the elapse of the maximum deadline date. In addition, the Registrar's Office must be notified of the extension.

3.9 Eligibility for Medals, Scholarships, Awards and Prizes

Eligible students who achieve a combined fall and winter sessional GPA of 4.0 or higher will be placed on the Dean's Honour List. Eligible students must have completed a minimum of 12.5 credit hours in each of the fall and winter terms. The Dean's Honour List designation is not applied until the end of the winter term.

3.10 Academic Self-Declaration

All students accepted into the Faculty of Pharmacy will be required to complete a Self-Declaration of Records Form which declares current or previous academic suspensions and expulsions. The disclosure contained therein must be satisfactory to the Faculty of Pharmacy.

3.11 Experiential Training (Structured Practical Experiential Program [SPEP])

Approved Placement Sites are limited, and the University cannot warrant that it will be able to find sufficient suitable placement sites in convenient locations, in a timely manner or at all. Students are responsible for all costs associated with SPEP, including travel and living expenses where placements are outside Winnipeg.

3.12 Academic Honesty

Many courses in the Faculty of Pharmacy require group projects and students should be aware that these are subject to the same rules regarding academic honesty as individual projects. Because of the unique nature of group work, all members of the group should exercise special care to insure that work completed does not violate academic integrity. Should a violation occur, group members will be held jointly accountable unless the violation can be attributed to a specified individual, or group of individuals.

In the Faculty of Pharmacy all suspected cases of academic dishonesty will be passed to the Dean's Office for evaluation.

3.13 Professional Unsuitability By-Law

The Senate has approved a by-law granting authority to the Faculty to require a student to withdraw for reasons of professional unsuitability. Copies of this by-law may be obtained from the Faculty of Pharmacy Dean's Office.

3.14 Completion of the Bachelor Program

The maximum time allowable for completion of the Bachelor of Science, Pharmacy degree is seven years. Students must successfully complete all of the course work associated with a year in the program prior to being allowed to register for courses in the next year. In certain cases, the dean may grant exceptions to this requirement.

SECTION 4: Program and Graduation Requirements

4.1 Student Responsibility

Students are advised to carefully review the Faculty of Pharmacy chapter of the *Undergraduate Calendar* to ensure compliance with degree program requirements.

It is the student's responsibility to know all relevant regulations, policies and practices.

Final completion of degree requirements is the responsibility of the student.

The University of Manitoba Registration System is not a degree audit system and the onus is on students to make sure they are selecting courses appropriate to their academic program.

4.2 Registration Assistance

If you have questions or problems with your registration you can contact the Aurora Student Help Line at (204) 474-9420, or call the Faculty of Pharmacy Dean's Office at (204) 474-9306.

SECTION 2: Admission to the Faculty of Science

2.1 Entrance to Science from University 1: Transiting

To transit from University One to the Faculty of Science a student must have completed a minimum of 24 credit hours of courses and achieved a cumulative grade point average of at least 2.00. If a student has satisfied the minimum requirements for entry to Science, they simply perform the **transit function** on AURORA Student to enter the Faculty of Science. There are no fees for transiting and there is no application form required. If you need assistance with transiting to Science from U1, please contact a Faculty of Science Student Advisor. Students who do not meet the aforementioned minimums may be eligible to enter the Faculty of Science and can appeal to be considered for admission to Science on the recommendation of the Dean. For further information please contact a Faculty of Science Student Advisor and/or refer to the Faculty of Science applicant information brochure and the University Admissions website: www.umanitoba.ca/admissions.

Students entering the Faculty of Science are placed in the three year General Degree program, unless they have applied to enter a specific four year Major or Honours program. Entrance to a four year Major or Honours program requires that students successfully complete the specific courses for the intended program, and that an application be approved by the department or program coordinator and a Faculty of Science student advisor prior to registration. Students intending to enter a specific four year Major or Honours program should refer to the program charts in Section 4, Programs and Courses Offered by the Faculty of Science, for courses required for entry into each program. Completion of these courses in University 1 will ensure that a student may complete a four year Major or Honours program in four calendar years.

2.2 Transfer Students

Students who wish to transfer to the Faculty of Science must have completed a minimum of 24 credit hours of post-secondary courses and have achieved a minimum cumulative grade point average of at least 2.00 to be eligible for consideration. Students who do not meet this minimum may appeal to be considered for admission on the recommendation of the Dean. Please see a Science Student Advisor for information. External transfer students with 24 credit hours or more of transfer credit are assessed upon admission to the Faculty of Science.

Students who have completed less than 24 credit hours may be admitted to University 1 or the Division of Extended Education.

Students on academic suspension as a result of work completed at another post-secondary institution will not normally be considered for admission to the University of Manitoba until the suspension has been served.

Transfer of Credit

External: Please refer to the Admissions website at umanitoba.ca/admissions or the Admissions section at the front of this *Calendar*. Courses completed at an external institution ten years prior to registration in the Faculty of Science are not considered for transfer credit. Students should contact a Science student advisor regarding departmental transfer credit policies. **All courses acceptable to the Faculty of Science must be transferred.**

2.3 Second Degree Students

Students possessing a first degree from a recognized university program and who have a minimum Cumulative Grade Point Average of 2.00 (or a 2.30 adjusted grade point average – see applicant information bulletin for details on AGPA) on all previous university work are eligible for admission as Second Degree students.

Second degree requirements may be shortened by up to 60 credit hours, and once admitted to a Second Degree Program, students will be expected to conform to all continuation, residency and graduation requirements as described in Section 3 below.

Specific information on requirements for a Bachelor of Science degree following the completion of a degree in another faculty or school, or at another university, is available in the general office.

2.4 Special Students

After Degree Special Students

Students who have successfully completed a first degree from a recognized university program with a Cumulative Grade Point Average of 2.00 or better are eligible for admission as Special Students.

2.5 Auditing Students

Students who wish to audit courses must have written permission from the instructor of the desired course before they can register. Auditing students must register in person in the Faculty of Science general office. The Faculty of Arts will prohibit auditors from registering in their courses until after the initial access period for registration.

2.6 Returning to Science after an Extended Leave

Students who have been away from Science for more than a year are blocked from using AURORA STUDENT. They must consult with a Science Student Advisor. If the student has not attended another post-secondary institution, they are eligible to return. The advisor will determine academic progress, registration date and time, and discuss degree plans. Students planning a return to studies are strongly urged to contact an Advisor well in advance of the start of registration. Students who have attended elsewhere since their last registration in Science must normally re-apply for admission and be academically competitive for admission on all of their previous academic work. July 1 is the application deadline for Fall term.

Students who have graduated must re-apply (July 1 for Fall Term – Other deadlines may be found at umanitoba.ca/admissions) for, and be academically competitive for admission.

SECTION 3: Faculty of Science Academic Regulations

3.1 Regulations Applicable to All Programs

The provisions of the chapter, General Academic Regulations and Requirements, and the chapter, University Policies, apply to all students. In addition, the Faculty of Science has regulations and requirements, published below that apply specifically to its students.

Repeating a Course

Science students are subject to the University of Manitoba regulations (see General Academic Regulations and Policy, Repeating a Course) and the Faculty of Science degree regulations regarding eligibility to repeat a course.

Repeating a course will **not** result in the removal of the first attempt and grade in that course from the student's record. The course will appear on the transcript as many times as it has been repeated. Only the grade from the last attempt will be included in the GPA calculations relating to a student's program of study.

There is a limit on the number of 'F' grades permitted in any degree.

Students who wish to repeat a course must obtain permission to repeat the course from the Faculty of Science prior to registration.

NOTE: In most cases, professional Faculties and Schools have specific rules governing the way repeated courses are treated in their admission process. Check the applicant information bulletin of the appropriate Faculty or School, or with the Admissions Office (424 University Centre), or with a Science student advisor for information regarding how different professional programs treat repeated courses in determining admission.

Voluntary Withdrawals

The responsibility for initiating withdrawals rests solely with the student. When eligible to do so, Voluntary Withdrawals must be done through Aurora Student, otherwise withdrawals must be authorized first by the Science general office and then through the Registrar's Office. No withdrawals will be permitted after the deadlines posted in the Academic Schedule.

There is no longer a limit on the number of Voluntary Withdrawal hours a student can accumulate (effective September 2006).

In exceptional circumstances, Authorized Withdrawals may be permitted on presentation of appropriate documentation. See the chapter, General Academic Regulations and Policy, section Voluntary Withdrawal from Programs and Courses or consult a Science student advisor for information.

Attendance at other Institutions

Students who attend other post-secondary institutions without a Letter of Permission must reapply for admission to the Faculty of Science before the application deadline and be academically competitive for admission. Similarly, students registered in Science here may not be registered at another academic institution at the same time unless they are registered elsewhere on a Letter of Permission. The penalty for unauthorized or undisclosed attendance may be disciplinary withdrawal or academic suspension.

For more information on Letters of Permission, refer to the Registration Information section of this calendar or to the Registrar's Office website at: umanitoba.ca/registrar.

Academic Dishonesty

Academic dishonesty is intentional cheating, fabrication, impersonation, or plagiarism. It is also knowingly helping or attempting to help others to be dishonest. Academic dishonesty lowers scholastic quality and defrauds others who will eventually depend on their own knowledge and integrity.

Plagiarism or any other form of cheating on examinations, term tests, or assignments is subject to academic penalty as serious as suspension or expulsion from the faculty or university.

Students who are unsure of what constitutes academic dishonesty should refer to the regulations in General Academic Regulations and Policy, Plagiarism and Cheating, and consult with a Science student advisor or a faculty member. Information about academic penalties for academic dishonesty is available on the Faculty of Science website.

Academic Suspension

Students returning from suspension must contact a Science Student Advisor prior to registration. A Science Student Advisor will outline the required academic performance to remain in good academic standing in the Faculty of Science.

Academic Warning

If your last assessment was "Academic Warning" you **must** see a Science Student Advisor prior to registration to receive information about your status.

Required to Withdraw from Major or Honours

If your last assessment was "Required to withdraw from the Honours or the Major program," you **must** consult a Science Student Advisor prior to registration. An advisor will review new degree plans, determine eligibility for a desired program, and update any affected university records.

Students on "Hold"

If your records are on "Hold", you are prevented from any registration transaction (including Voluntary Withdrawals) until you have cleared this status. Contact a Science Student Advisor if you wish to drop a course while on "Hold".

Term work and Debarment

A student is responsible for the completion of laboratory work, assignments, tests and other class work as prescribed by departments. A student who does not meet term work requirements to the satisfaction of a department will receive a warning to this effect from the department or the general office. If this warning is ignored, a student may be debarred from the course. Any student debarred from a course receives an automatic grade of "F" in that course.

Deferred Examinations

A student, who is unable to write a final examination because of illness, disability, or for compassionate reasons, must file an application in the faculty general office for a deferred examination. The application must be filed within seven working days of the last examination in that series. Appropriate documentation must be provided that verifies that the incapacity existed at the time the examination was to be written.

A deferred examination is offered in a manner prescribed by the head of the department concerned. This would normally be written within 30 working days of the last examination in that series. Any other consideration would be determined by the department head.

Students requesting deferred examinations on the grounds that the examinations conflict with vacation or holiday plans shall not be granted deferrals.

A deferred examination is not normally granted to a student who has written the final examination.

Requests for retroactive deferred examinations, deferred examinations that need to be re-deferred, and / or requests where a student is seeking a deferral in a third examination series (i.e. Fall 2008, Winter 2009, Winter 2010 – any course) must be approved by the Faculty of Science Committee on Student Standing. Students must appeal, in writing, to the Committee on Student Standing and provide precise documentation that outlines why a deferral request should be granted in their case.

Appeals Involving Academic Regulations

The Committee on Student Standing in Science considers appeals from students who request special consideration in respect of rules and regulations governing their programs of study and qualification for graduation.

Appeals should be addressed to: The Secretary, Committee on Student Standing, General Office, Faculty of Science, 239 Machray Hall.

Appeal for Authorized Withdrawal

Students who have valid and documented reasons for withdrawal, such as medical illness or compassionate circumstances, may be authorized to withdraw without penalty. Requests for authorized withdrawals must be submitted in writing to a Faculty of Science Student Advisor. The Office of Student Advocacy located at 519 University Centre (474-7423, student_advocacy@umanitoba.ca) is available to provide information and assistance.

Appeal for other Academic Concessions

Students who believe they have grounds for academic concessions based on their personal circumstances should consult with a Science Student Advisor. The Office of Student Advocacy located at 519 University Centre (474-7423, student_advocacy@umanitoba.ca) is available to provide information and assistance.

Laboratory Registration

If a course requires registration in both a lecture and a separate appropriate laboratory section, AURORA STUDENT will not permit you to register in that course unless you register for both.

Laboratory Exemptions

If you think you are eligible for a laboratory exemption, you must check with the department offering the course to obtain formal consent of this. Once received, deliver the written permission to your faculty or school office, as an override may be required on your academic record. You must register for the laboratory exempt section.

It is your responsibility to ensure that you are eligible for a laboratory exemption. If you register for one of these courses and it is subsequently determined that you are not entitled to exemption, you will be required to register for a laboratory section. If no space remains available in the laboratory, you will be required to withdraw from the course.

Laboratory release:

Certain Chemistry and Microbiology courses require that you check out of the laboratory before you withdraw or change lab sections. It is your responsibility to check with the departmental office prior to making any changes to your laboratory registration. Failure to check out of your laboratory may result in your academic records being placed on HOLD.

3.2 B.Sc. General Degree Academic Regulations

B.Sc. (General) – Three Year Degree

The three year General program is intended to provide diversified training in Science. The design of the program is such that a student is exposed to several areas of science at an introductory level together with a requirement for more advanced study in at least two Science areas. These requirements will ensure that a student's program of study will have elements of breadth and depth.

This program is not intended for students who desire to practise in some field of specialization in the Sciences. Students with that intent are recommended to pursue the Honours or the four year Major program. However, the three year General program is flexible enough in most departments to allow a student to choose courses that would facilitate transferring to the four year Major program should that become desirable.

B.Sc. General Academic Regulations

A student must complete 90 credit hours with passing grades ("D" or better) in each course. A student must obtain a minimum grade point average of 2.00 on the 90 credit hours which constitute the degree to qualify for the degree of Bachelor of Science (General).

There is no limit on the number of courses that can be taken within the B.Sc. (General). Students may not exceed 36 credit hours of failures.

Introductory Level Science courses (24 credit hours): Twenty four (24) credit hours must be chosen from the following list of introductory Science courses, with at least six credit hours from each of four of the following subject areas:

- Astronomy: six credit hours chosen from PHYS 1810, PHYS 1820, PHYS 1830
- Biology: BIOL 1020 and BIOL 1030
- Chemistry: CHEM 1300 and CHEM 1310
- Computer Science: COMP 1010 and COMP 1020
- Mathematics: six credit hours chosen from MATH 1200, MATH 1300, MATH 1310, MATH 1500, MATH 1510, MATH 1520, MATH 1690 (6), MATH 1700, MATH 1710.
- Physics: PHYS 1020 or PHYS 1050; and PHYS 1030 or PHYS 1070
- Statistics: STAT 1000 and STAT 2000

Advanced Level Science Courses (36 credit hours): Effective for students entering Science September 2008 or later², to satisfy the advanced level requirements of the 3-year General Degree program, eighteen (18) credit hours at the 2000, 3000, and (or) 4000 level must be chosen from each of **two** of the following Science departments: Biological Sciences, Chemistry, Computer Science, Mathematics, Microbiology, Physics and Astronomy, and (or) Statistics.

Of the 36 credit hours (total) from the advanced areas of study, at least 6 credit hours must be chosen from 3000 or 4000 level courses. Students should note prerequisite requirements for upper level courses when planning their program. Appropriate courses and combinations of courses are detailed in each departmental section. Substitute courses from a department may be taken by obtaining written authorization from the chosen department.

Biological Sciences Option - Effective Fall Term 2009: Because of the newly formed Department of Biological Sciences, effective September 2009, students required to complete 36 credit hours of advanced level credit² may elect to choose all 36 credit hours of the advanced level course requirements from the Department of Biological Sciences (formerly Botany and Zoology) provided they follow the specified course selections prescribed in section 5.3.3.5 (Biological Sciences General Degree chart).

Other Faculty Courses (12 credit hours): a minimum of 12 credit hours must be taken from outside the Faculty of Science, of which at least six credit hours must be from the Faculty of Arts. A maximum of 30 credit hours may be taken from outside the Faculty of Science for use in the General Degree program.

Elective Courses (18 credit hours): 18 credit hours of the B.Sc. General Degree are open electives.

New for Fall 2010 - Chemistry Option - Effective Fall Term 2010: The Department of Chemistry has introduced a 3-year Degree program with a Chemistry Focus. Effective September 2010 students required to complete 36 credit hours of advanced level credit may elect to choose a specific set

of introductory courses, plus all 36 credit hours of the advanced level course requirements from the Department of Chemistry provided they follow the specified course selections (introductory and advanced levels) prescribed in section 4.5.3 (Three Year B.Sc. – Chemistry Focus Chart).

NOTES:

1. Students having difficulty with the interpretation of these regulations or the way in which they are applied, are urged to contact a Science student advisor in the general office. Students are responsible for their own degree progress and completion.

2. Students admitted to the Faculty of Science prior to September 2008 should consult with a Science Student Advisor about degree requirements.

B.Sc. General Degree Minimum Performance Requirements

To remain in good academic standing the student must maintain a minimum Cumulative Grade Point Average (CGPA) of 2.00 (DGPA of 2.00 for Second Degree students and Start Afresh students) at each point of assessment after entrance to the Faculty of Science. Assessment will take place after Fall, Winter, and Summer Terms. If a student's CGPA falls below 2.00 (DGPA of 2.00 for Second Degree students and Start Afresh students) at any point of assessment, the student will receive an **Academic Warning** which will appear on their transcript. The student will remain on Academic Warning until Good Academic Standing is achieved. Students on Academic Warning will be individually advised regarding their status, and of how to improve.

Students cannot accumulate more than 36 credit hours of failures (F grades) in courses acceptable for credit in the Faculty of Science on their academic history, regardless of the origin of the grade (i.e. courses taken while in University 1, courses that are transferred from other programs or other institutions will be included) and regardless of whether the course has been repeated. If the 36 credit hour limit of F grades is exceeded, the student will be placed on **Academic Suspension for two calendar years**. Upon completion of the two-year suspension, the student will be permitted to return to Science and start their degree afresh. At this point, while a CGPA will be automatically calculated for the student, the DGPA will be used for academic assessment. Students may appeal to transfer up to 30 credit hours of previously completed coursework in which a minimum grade of "C" was achieved.

A student placed on academic suspension is not permitted to register in the Faculty of Science during the term of the suspension. Students wishing to return to the Faculty of Science are required to achieve certain academic standards upon their return. For information regarding these standards, consult a Science Student Advisor.

B.Sc. General Degree Residence Requirements

There are two ways in which students may fulfill the minimum requirement of credit hours that must be taken at the University of Manitoba: by taking at least 48 credit hours at the University of Manitoba; or by taking at least the final 30 credit hours at the University of Manitoba. The courses used to satisfy the residence requirement must be acceptable for credit in the Faculty of Science. Residency requirements apply to both first and second degree students.

3.3 B.Sc. Major Degree Academic Regulations

B.Sc. (Major) – Four-Year Degree

The four year Major programs provide in-depth study and enable graduates to function competently in a career in their chosen subject area.

While this program is not intended for students pursuing graduate studies, most programs allow students to do so with a minimum of difficulty.

The four year Major program may be pursued on a part-time basis, although it must be recognized that under those conditions students would require more than four years to complete degree requirements.

Prior to entry to the four year Major or Honours program, a student is subject to the performance regulations of the B.Sc. (General) program.

B.Sc. (Major): Academic Regulations

To qualify for the degree Bachelor of Science (Major), a student must complete 120 credit hours or more, with minimum grades of "C" on Major Program Specific courses (as specified by the department), passing grades ("D" or better) on the remaining courses, and a minimum grade point average of 2.00 on the 120 credit hours which contribute to the degree.

Program Specific courses are those identified by the department as being core to the given degree. See the Calendar entry for these departments for clarification.

At least six credit hours **must** be taken from outside the Faculty of Science. As of the 1999-2000 regular session, students admitted to a Major program must complete six credit hours of courses from the Faculty of Arts. Students may take a maximum of 36 credit hours from outside the Faculty of Science.

B.Sc. (Major): Entrance Requirements

To enter a four year Major program, a student must normally have achieved a minimum grade of "C+" in at least one introductory course designated by the department(s). In addition, to enter a four year Major program a student shall normally have completed at least 30 credit hours, although a student may enter on the recommendation of the department with only 24 credit hours completed.

Any student who, prior to being admitted to a four year Major program, has completed more than 30 credit hours will be allowed to apply those excess credit hours which meet the specifications of the program to the four year Major program.

Students must attain a Cumulative Grade Point Average of at least 2.00 (DGPA of 2.00 for Second Degree students and Start Afresh students) regardless of the point of entry, and must meet continuation requirements as outlined below.

B.Sc. (Major): Continuation Requirements

To continue in the program, a student must maintain a Cumulative Grade Point Average of 2.00 (DGPA of 2.00 for Second Degree students and Start Afresh students) at each point of assessment. Students who do not meet this minimum will be required to withdraw from the Major program.

There is no minimum term course load requirement for the Major program.

Failed courses: Any student that exceeds 18 credit hours of failing grades after entering a Major program will be required to withdraw from that program.

A student will be required to repeat those failed courses specified as required courses for the program; however, with the approval of the department the student may be allowed to substitute a new course for any elective course failed.

Program Approval: The department must approve a student's Major program prior to registration for courses in each session. Students must also obtain departmental approval for any and all revisions to their program.

Major students reverting to the General program must fulfil all academic requirements of that degree.

B.Sc. (Major): Residence Requirement

To satisfy the Faculty of Science residency requirements, a student must successfully complete at least 60 credit hours at the University of Manitoba. The courses used to satisfy the requirement must be acceptable for credit in the Faculty of Science. Residency requirements apply to both first and second degree students.

B.Sc. Double Major Programs

Students may wish to pursue a Double-Major program in the Faculty of Science. Consultation with, in addition to specific course selection and approval from, the departments involved must occur prior to the commencement of any Double-Major program. Students must also consult with a Faculty of Science Student Advisor prior to the start of any Double-Major program.

3.4 B.Sc. (Major) Cooperative Option Academic Regulations

The Major programs that offer a Cooperative Option are: Biochemistry, Biological Sciences, Biotechnology, Chemistry, Computer Science, Genetics (pending COPSE approval), and Microbiology.

A cooperative education program is an arrangement whereby a student spends alternating periods in university and employment. There are several advantages to cooperative education programs for students. One benefit is that students are able to acquire both theoretical knowledge and practical experience. This experience assists them in selecting areas of specialization for their senior courses. During an employment period students can also typically earn enough to defray the cost of their university education.

The contacts developed with potential employers are also valuable to graduating students.

All regulations governing regular Major programs apply to the Cooperative Option. In addition, the following variations apply:

Entrance

To enter the Cooperative Option a student must be eligible to enter the Major program offered by the department.

The normal point of entry to a Major Cooperative Option is following the completion of second year in the Faculty of Science.

Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option in those departments where the demand for places exceeds the number of places available. In such situations the department reserves the right to determine and select the best qualified applicants.

Structure and Sequencing

The Cooperative Option consists of both academic terms and employment terms.

Each academic term can be either four months in duration or eight months in duration, as designated by the Major department.

Each employment term can be either four months in duration or eight months in duration, as designated by the Major department.

Each academic term and each employment term will commence in January, May or September.

The sequence of academic terms and employment terms is variable to suit the needs of each department, and is designated by each department.

Students are expected to follow the academic/employment term sequence defined by their department from admission through to graduation.

Employment Term Requirements

All Cooperative Options will include at least 12 months spent in employment terms with a department-approved employer. Normally, each employment term will be completed with one employer.

Students are required to register in the appropriate employment term course and pay the fee prior to starting their employment term. Cooperative Option students are required to submit three written employment reports on their employment term activities. These reports are due at times designated by the Major department. Each Major department will provide students with instructions regarding the content and format requirements of the employment reports.

Indications of unsatisfactory performance by a student on an employment term will be thoroughly investigated by the Major department. As a result of the investigation, if benefits from further professional training are questionable, the student may be required to withdraw from the Cooperative Option. The student would then be eligible to enter the regular four year Major program or the General program.

While on an employment term, a Cooperative Option student is not permitted to take more than six hours of academic credit, and may not take more than one course at a time.

Academic Term Requirements

Coursework requirements of the Cooperative Option are equivalent to the coursework requirements of the four year Major program with the exception of the Microbiology and Biological Sciences programs.

Cooperative Option students are expected (but are not required) to maintain a full-time course load while registered for an academic term. The "normal full load" per four-month term is three half courses (9 credit hours).

To continue in a four year Major Cooperative Option a student must attain a minimum Degree Grade Point Average of 2.00 at each point of assessment. Departments may designate courses within the four year Major Cooperative Option in which students are required to attain a grade above 'C'. Continuation in a four year Major Cooperative Option is also contingent upon satisfactory performance in employment terms.

A student who does not meet the academic requirements for continuation in a four year Major Cooperative Option will be required to withdraw from it.

A student who receives failing grades in more than 18 credit hours following admission to the four year Major program will be required to withdraw from the Major program.

Four year Major Cooperative Option students who are required to withdraw, or voluntarily revert to an alternative degree program must fulfil all academic requirements of that degree.

3.5 Honours Academic Regulations

B.Sc. (Honours) and B.C.Sc. (Honours) – Four Year Degrees

The Honours programs in the Faculty of Science are the most heavily concentrated programs offered. These programs lead most directly to graduate study and are in most cases prescribed extensively by the departments. A student is required to pursue this degree full-time and may be required to achieve higher grade standards than in other degree programs. The programs are regarded as professional training.

Students graduating from the Honours program in Computer Science receive the degree designation Bachelor of Computer Science (Honours), also noted as B.C.Sc. (Honours).

A student electing an Honours program will normally begin Honours work in second year and must meet the entrance requirements set out below. Honours work will consist of three years of study in prescribed courses beyond the first year and will lead to the B.Sc. (Honours) or the B.C.Sc. (Honours).

Students must complete the university written English and Mathematics requirements as described in the chapter, General Academic Regulations and Policy, of this *Calendar*.

As of the 1999-2000 Regular Session, students admitted to Honours programs must complete six credit hours from the Faculty of Arts. Because many Honours programs in the Faculty of Science do not have room for electives in Years 2, 3 and 4, these six credit hours, including the three credit hours of written English, should be completed in University 1.

Honours Entrance Requirements

To enter an Honours degree program in Year 2, a student must have a grade of "B" or better in at least one introductory course designated by the department(s), and a Degree Grade Point Average of not less than 2.50 on all courses completed at the end of Year 1 (minimum 24 credit hours).

Another way to gain entry to the many Faculty of Science Honours programs is through the **Second Year Entry Route**. If a student finds himself/herself ineligible to enter a desired Honours program following his/her first or second year, eligibility to enter Honours via the second year entry route can be established by taking a minimum of 18 credit hours over consecutive Fall and Winter Terms (formerly called a Regular Session) with a minimum of 9 credit hours in each term. The 18 credit hours chosen must be applicable to the program the student wishes to enter, and the student must achieve at least a "B" average on those 18 credit hours. If a student chooses to attempt more than 18 credit hours over the consecutive Fall and Winter terms, the best applicable 18 credit hours will be used to calculate whether or not the "B" average has been achieved for the purpose of assessing eligibility for entrance to the Honours program of choice. Note: It must be mathematically possible for the student to remain in Honours at the point of the first academic assessment after entering Honours, to be eligible for entry to Honours (i.e. a student must be able to reach the minimum GPA required to continue in the specific Honours program by the end of their first term in the Honours program – see the section regarding "Continuation in Honours" below).

Honours Continuation Requirements

A minimum Degree Grade Point Average of 3.00 is required at each point of assessment. Departments may designate courses within the Honours program in which students are required to obtain a grade above "C+".

Students must complete a minimum of 9 credit hours in each Fall and Winter Term (or equivalent for students in the Co-operative option) to remain in Good Academic standing in the Honours program. Students failing to do so will be required to withdraw from the Honours program and may be eligible to pursue the B. Sc. Major program or the B. Sc. General degree program.

Students who do not meet the minimum requirement will be required to withdraw from the Honours program.

Students who accumulate more than 15 credit hours of failed courses after entering the Honours degree program (regardless of the origin of the grade or if the course has been repeated) will be required to withdraw from the program. Students required to withdraw from the Honours program may be eligible to pursue the B. Sc. Major program or the B. Sc. General degree program.

To qualify for the degree, Bachelor of Science (Honours), a student must complete a minimum of 120 credit hours or more, with minimum grades of "C+" on Honours Program Specific courses (as specified by the department) and grades of "C" or better on the remaining courses with a minimum grade point average of 3.00 on the 120 credit hours which contribute to the degree.

Program Specific courses are those identified by the department as being core to the given degree. See the specific departmental Calendar entries for clarification.

Program Approval: The department must approve a student's Honours program prior to registration for each session. Students must also obtain departmental approval for any and all revisions to their program.

Honours Residence Requirement

A student must successfully complete a minimum of 60 credit hours at the University of Manitoba. The courses used to satisfy the requirement must be acceptable for credit in the Faculty of Science. Residency requirements apply to both first and second degree students.

Withdrawal from Honours

Honours students reverting to an alternate degree program must fulfil all academic requirements of that degree.

Double Honours Programs

Double Honours programs may be available as specified under departmental headings. Other programs may be arranged in consultation with the departments concerned.

3.6 Honours Cooperative Option Academic Regulations

The Honours programs offering a Cooperative Option are: Biochemistry, Biological Sciences, Biotechnology, Chemistry, Computer Science, Genetics, Microbiology, Joint Computer Science - Mathematics, Joint Computer Science – Physics and Astronomy, and the Joint Computer Science – Statistics program (pending approval).

A cooperative education program is an arrangement whereby a student spends alternating periods in university and employment. There are several advantages to cooperative education programs for students. One benefit is that students are able to acquire both theoretical knowledge and practical experience. This experience assists them in selecting areas of specialization for their senior courses. During an employment period students can also typically earn enough to defray the cost of their university education. The contacts developed with potential employers are also valuable to graduating students. The Honours Cooperative Option therefore offers valuable work experience and simultaneously ensures an academic program of Honours calibre.

All regulations governing regular Honours programs apply to the Cooperative Option. In addition, the following variations apply:

Entrance

To enter the Cooperative Option a student must be eligible to enter the Honours program offered by the department.

The normal point of entry to an Honours Cooperative Option is following the completion of second year in the Faculty of Science. Following that point of entry all requirements of the Cooperative Option must normally be completed in no more than four years (48 months).

Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option in those departments where the demand for placements exceeds the number of places available. In such situations the department reserves the right to determine and select the best qualified applicants.

Structure and Sequencing

The Cooperative Option consists of both academic terms and employment terms.

Each academic term can be either four months in duration or eight months in duration, as designated by the Honours department.

Each employment term can be either four months in duration or eight months in duration, as designated by the Honours department.

Each academic term and each employment term will commence in January, May or September.

The sequence of academic terms and employment terms is variable to suit the needs of each department, and is designated by each department.

Students are expected to follow the academic/employment term sequence defined by their department from admission through to graduation.

Employment Term Requirements

All Cooperative Options will include at least 12 months spent in employment terms with a department-approved employer. Normally, each employment term will be completed with one employer.

Cooperative Option students are required to submit at least three written employment reports on their employment term activities. These reports are due at times designated by the Honours department. Each Honours department will provide students with instructions regarding the content and format requirements of the employment reports.

Indications of unsatisfactory performance by a student on an employment term will be thoroughly investigated by the Honours department. As a result of the investigation, if benefits from further professional training are questionable, the student may be required to withdraw from the Cooperative Option. The student would then be eligible to enter the regular Honours program, the four year Major program or the General program.

While on an employment term, a Cooperative Option student is not permitted to take more than six hours of academic credit, and may not take more than one course at a time.

Academic Term Requirements

Coursework requirements of the Cooperative Option are equivalent to the coursework requirements of the Honours program with the exception of the Biochemistry, Genetics and Microbiology programs.

Cooperative Option students must maintain a full-time course load while registered for an academic term. The "normal full load" per four-month term is three half courses (9 credit hours).

To continue in an Honours Cooperative Option a student must attain a Degree Grade Point Average of 3.00 or higher at each point of assessment. A student's performance will be evaluated following each academic term. In addition, the student must meet all individual course prerequisites for further study and departmental continuation and graduation requirements. Departments may designate courses within the Honours Cooperative Option in which students are required to attain a grade above "C+" (Honours Program Specific courses). A grade of "C" is required on all remaining courses which contribute to the degree.

Continuation in an Honours Cooperative Option is contingent upon satisfactory performance on Employment Terms.

Honours Cooperative Option students who are required to withdraw or voluntarily revert to an alternative degree program must fulfil all academic requirements of that degree.

3.7 Minors: Academic Regulations for Science Students

Students in B.Sc. Major and Honours programs may, if they wish, declare and complete a Minor from any department or interdisciplinary program at the University of Manitoba which offers a listed Minor. In the Faculty of Science Minors are listed in the program charts for each department and interdisciplinary program. Other available Minor requirements can be found within the appropriate sections of the departmental/school/faculty offerings. Completion of a Minor in a B.Sc. Major or Honours program is entirely optional. Students may not, however, declare both their Major and Minor from the same department/interdisciplinary program. It should be noted that for Honours students any consideration of completing a Minor should be made early on, due to restricted opportunities in later years of their programs. Completion of a Minor may require that a student take more than the minimum number of credit hours required for graduation.

The Minor is not available to students in the B.Sc. General Degree program.

A Minor will normally consist of a minimum of 18 credit hours specified by the department(s) offering the Minor. Courses required in a student's specific Honours or Major degree program are acceptable for use in a chosen Minor, subject to the Faculty of Science regulation stating that students may not declare both their Major and Minor from the same department or interdisciplinary program.

Minors not offered by the Faculty of Science can be selected from the following list. For further information about courses required for the completion of a specific Minor, please refer to the section of the calendar that relates to the chosen area.

Animal Systems, Entomology, Food Science, Plant Biotechnology, Soil Science, Art History, Anthropology, Asian Studies, Canadian Studies, Catholic Studies, Central and East European Studies, Classics, Greek, Latin, Economics, English, Film Studies, Theatre, French, Spanish, Italian, German, Russian, Ukrainian, Polish, History, Icelandic, Labour Studies, Linguistics, Medieval Studies, Native Studies, Native Languages, Near Eastern and Judaic Studies, Philosophy, Political Studies, Psychology, Religion, Sociology, Ukrainian Canadian Heritage Studies, Women's and Gender Studies, Geography, Geological Sciences, Physical Geography, Environmental Science, Environmental Studies, Human Nutrition and Metabolism, Family Social Sciences, Management*, and Music.

***Faculty of Management/Asper School of Business: For entry to the Minor, the prerequisite is a grade of "C" or better in the first 6 hours of Business courses. The Management Minor will consist of any 18 hours of credit in courses offered by the Asper School of Business. Enrolment in this program will be limited to 20 students annually. Students planning to enrol in this minor must consult a Faculty of Science student advisor.**

3.8 Dean's Honour List, Degree with Distinction, First Class Honours

Dean's Honour List (all programs)

Students enrolled in 12 credit hours or more who achieve a Term Grade Point Average of 3.80 or higher will be placed on the Dean's Honour List. The Dean's Honour List will be calculated after each term.

Degree with Distinction (4-Year Major Degree and 3-Year General Degree)

To obtain a Degree with Distinction a student must achieve a final minimum Degree Grade Point Average of 3.80. The term "Degree with Distinction" will appear on the student's parchment and the student's transcript of marks.

First Class Honours (Honours Degree Only)

To graduate with First Class Honours the student must achieve a final minimum Degree Grade Point Average of 3.80. The term "First Class Honours" will appear on the student's parchment and on the student's transcript of marks.

3.9 Faculty of Science Academic Awards

Refer to the Faculty of Science Website for information regarding awards available to Faculty of Science Students:

<http://umanitoba.ca/faculties/science/about/awards.html>

To be eligible for any award granted exclusively on the basis of academic performance, a student must be enrolled in 100% of a full program as defined by the department.

Student Responsibility

You must ensure that you are selecting the correct courses that will enable you to satisfy your degree requirements. Specific degree requirements are listed in the program charts found in the departmental/program sections of this chapter. Final completion of specific degree requirements is the student's responsibility. Student Advisors are available to answer any questions regarding a student's academic progress.

AURORA STUDENT will not check degree requirements. You are responsible for knowing the requirements of your degree. Consult with a Science Student Advisor for advice and assistance if you are uncertain about your degree requirements.

AURORA Student will not prevent a student from registering in two (or more) courses that are designated as not to be held for credit with one another. It is the student's responsibility to ensure that they are not registering for courses that are ineligible to be held for credit with one another. Read the course descriptions carefully. If you are unsure about a course you have selected, check with a Science Advisor prior to the revision deadline. No academic concessions will be granted in this regard.

You cannot add or change a course classification through AURORA STUDENT. Therefore, if you are an undergraduate student and wish to take a course as a Special Student in your degree, as an Auditor, or as a Challenge for Credit, you must add this course in person in the Science General Office within the normal deadlines for such activity.

General Degree Program

All students are admitted to, and register in, the General degree program unless they indicate otherwise to a Science Student Advisor.

Students in the General program are not required to contact a Science Student Advisor before registration; however, they are strongly advised to do so. A Science Student Advisor can answer any questions about degree progress and entry to professional faculties that may affect registration.

Students reverting from a Major or Honours program to the General program must consult a Science Student Advisor prior to registration, so that their university records may be changed.

Science Student Advisors may check your degree progress periodically. These checks are completed after registration. **Reminder: It is the student's responsibility to know and satisfy all degree requirements.**

Honours, Major, and Cooperative Options

Students must obtain departmental approval and deliver it to the Science General Office prior to accessing AURORA STUDENT. Honours students are required to register in a minimum of 9 credit hours during each Fall and Winter Term. Prior to declaring graduation, Honours, Major, and Co-op students must have their program checked by a Science Student Advisor.

Students entering or changing a program must see a Science Student Advisor so that eligibility can be checked and university records updated.

SECTION 4: Programs and Courses offered by the Faculty of Science

Important Course Selection Information

The courses required to complete the specific Honours, Major, General and Minor programs in Science are listed in the program charts found below.

Not all courses included in the course description sections below are currently offered. The course schedule for the current academic year is available through AURORA Student at umanitoba.ca. Students should note that space in Honours and Major specific courses may be reserved for students in those programs.

All Honours and Major Degree Programs (4-year degrees) offered by the Faculty of Science satisfy the University "M" (Mathematics) requirement.

Students registered in the 3-Year General Degree program are responsible for ensuring that they successfully complete a course that will satisfy the University's "M" (Mathematics) requirement.

Students in all programs are responsible for ensuring that they successfully complete a course that will satisfy the University's "W" (Written English) requirement.

For a complete listing of courses that satisfy the University's "W" and "M" requirements refer to appendix A of the General Academic Regulations and Requirements section of this Calendar.

NOTE: Course prerequisites may be waived with written consent of the department

Asper School of Business. The program covers mathematical, statistical, financial and economic concepts required to develop skills in the modelling and management of financial risk and contingent events. In the Faculty of Science the program has a greater emphasis on the mathematical and statistical courses than does the Actuarial Mathematics program offered by the I.H. Asper School of Business.

The Warren Centre, with the department of Statistics, offers a joint Honours program (see Section 4.13.3).

To enter the program, a student must have at least three (3) credit hours in an approved Written English course, ECON 1200 (6), STAT 1000, STAT 2000, MATH 1500 and MATH 1700 (or MATH 1690) and MATH 1300 or any equivalent with a grade of at least "B" in all of the above courses and have satisfied the Faculty of Science requirements for entry to the Honours program. It is strongly recommended by the Warren Centre for Actuarial

Studies that students complete a minimum of 24 credit hours over the Fall and Winter Terms.

To continue in the Honours program, i.e., to proceed from Year 2 to Year 3 and from Year 3 to Year 4, and to successfully complete Year 4 of the Honours program and to graduate with the Honours degree, a student must have a Degree Grade Point Average of 3.00 or better, and a grade of "C+" in each Actuarial Mathematics course in the program.

To graduate with the B. Sc. Honours degree, a student must achieve a minimum DGPA of 3.00 and a minimum grade of either "B" or "C+" (as indicated) in each of the Honours Program Specific courses (see below), and a minimum grade of "C" on all remaining courses that contribute to the 120 credit hours of the degree.

The five year program provides students with minimum 12 months of paid employment by the time they graduate. It enables them to obtain work experience in research and industry with participating firms, government agencies and University units.

The course and grade requirements **for entry and continuation** in the Cooperative Option are the same as that for regular Honours program. Each academic term in the third and subsequent years must comprise a minimum of nine (9) credit hours. Students are required to complete the first and second year requirements of the program and MBIO 3410 before they begin their first employment term. Students should refer to the general faculty regulations for B. Sc. (Honours) Cooperative Options in Section 3.6.

To graduate with the B. Sc. Honours (Cooperative Option) degree, a student must achieve a minimum DGPA of 3.00, a minimum grade of "C+" in each of the Honours Program Specific courses (see below), and a mini-

Other options may be considered and approved by the program advisor.

Students will apply for openings in the Cooperative Option in September of their third year in the Biochemistry Honours program. They will be notified of their provisional acceptance in the program by October. Acceptance into the program is dependent upon the student receiving an employment placement. Employment term positions available to the students will be approved by the department, and the employers will select the students they wish to employ. The first work term can be taken in January or May. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each employment term.

Biochemistry Four Year Major Degree Requirements

To enter the joint four year Major program, a student must have a minimum of "C+" in each of CHEM 1300 and CHEM 1310, and a minimum of "C" in BIOL 1030; or a minimum of "C+" in BIOL 1030 and a minimum of "C" in each of CHEM 1300 and CHEM 1310; plus standing in PHYS 1070 (or PHYS 1030), MATH 1500, and MATH 1700 is required. In addition, students must satisfy the general faculty requirements for entry to four year Major programs.

To continue in the Bachelor of Science Major degree, a student must maintain a minimum CGPA of 2.00.

To graduate with the Bachelor of Science (Major), a student must complete 120 credit hours or more, with minimum grades of "C" on Major Program Specific courses (see below), passing grades ("D" or better) on the remaining courses, and a minimum grade point average of 2.00 on the 120 credit hours that contribute to the degree.

MBIO: 1010, 2020, 3410, and whichever one of 3450, 3460 or 4540 is selected.

Students in this program should note the following:

Students must satisfy any course prerequisites and corequisites for courses selected. Care should be taken to select courses in their proper sequence, e.g., CHEM 2370 (MBIO 2370) and MBIO 2020 should be taken in Year 2 as they are prerequisite to a number of subsequent required or optional courses.

Normally 4000 level courses are available only to students in their fourth year. MBIO 4530 and MBIO 4570 are not available to Major students.

Students are encouraged to elect other courses pertinent to the study of biochemistry although this is not required for completion of the degree. The departments of Microbiology and Chemistry will be glad to suggest such supplementary courses upon request.

Students who may wish to transfer to the Honours program in Biochemistry following Year 2 should be sure to complete all courses recommended in Year 2 (see chart below).

Biochemistry Major Cooperative Option

Students interested in alternating academic terms and terms of paid employment as part of their program may enter the Biochemistry Major Cooperative Option in their third year. The five year program provides students with a minimum 12 months of paid employment by the time they graduate. It enables them to obtain work experience in research and industry with participating firms, government agencies and University units.

The course and grade requirements for **entry and continuation** in the Cooperative Option are the same as those required for the regular Major program. Students are encouraged, but not required, to take 15 credit hours in each academic term in the third and subsequent years. Students are required to complete the first and second year requirements of the program and MBIO 3410 before they begin their first employment term. Students should refer to the general faculty regulations for B. Sc. (Major) Cooperative Options in Section 3.4.

To graduate with the degree Bachelor of Science (Major Cooperative Option), a student must complete the equivalent of 120 credit hours or more, with minimum grades of "C" on Major Program Specific courses (see below), passing grades ("D" or better) on the remaining courses, and a mini-

MBIO: 1010, 2020, 3410, and whichever one of 3450, 3460 or 4540 selected.

Students will apply for openings in the Cooperative Option in September of their third year in the Biochemistry Major program. They will be notified of their provisional acceptance in the program by October. Acceptance into the program is dependent upon the student receiving an employment placement. Employment term positions available to the students will be approved by the department and the employers will select the students they wish to employ. The first work term can be taken in January or May. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each employment term.

Biology is one of the most rapidly evolving and diverse sciences in the modern world, exploring all aspects of life from biomolecules to ecosystems. The Department of Biological Sciences is committed to advancing our understanding of biological structure and function, and developing new tools and technologies to address current and emerging problems facing all living organisms. Connections will be forged between molecules, cells, tissues, organs, organisms, populations, communities, and ecosystems, highlighting the need to explore all levels of biological interactions. Programs emphasize the organism as the key element in studies of the development and evolution of form and function, and the role in adaptations to the environment. Based on a core of fundamental biological principles, our programs explore diverse areas such as organismal biology, environmental biology, genetics, cell biology and development, physiology, ecology, behaviour, and systematics and evolution. The Department focuses on the integration of research and teaching expertise to create opportunities for growth and novel synergisms in the training of future leaders in the field.

4.3.2 B.Sc. Honours: Biological Sciences

The Honours program is designed for students planning a professional career in Biological Sciences at the graduate level. Such students are strongly advised to enter the Honours program at the beginning of second year.

Appropriate courses will be arranged in consultation with the Program Advisor who may be contacted through the Biological Sciences Office, 121 Machray Hall. Students are encouraged to select a specific theme area of study as part of their Biological Sciences program. Should a student not opt for one of the five theme groups, they may design their own program by completing the core course requirements plus 30 credit hours of 3000 and/ or 4000 level Biological Sciences courses. See the information below outlining the different theme areas offered by the Department of Biological Sciences.

To enter the Biological Sciences Honours program a student must have a "B" in either BIOL 1030 or CHEM 1310 and not less than a "C+" in the other course. In addition, a student is required to have a degree Grade Point Average of 2.50 on all courses completed at the end of Year 1 in or-

der to enter Honours in Year 2. STAT 1000 and the 3 credit hours of specified Mathematics, Physics or Statistics courses can be completed in University 1 or Year 2.

To continue in the Honours program, i.e., to proceed from Year 2 to Year 3 and Year 3 to Year 4, a student must have a Degree Grade Point Average of 3.00, and in addition, must have a 3.00 average on all Biology courses during each session and a grade of "C+" or better in each Biology course.

To graduate with an Honours degree, a student must obtain a Degree Grade Point Average of 3.00 or better, a grade of "C+" or better in all Biology courses, and a grade of "C" or better on all remaining courses that contribute to the degree.

Four Year Honours Cooperative Option

Students interested in alternating academic terms and terms of paid employment as part of their Honours Biological Sciences program may enter the Cooperative Option after completion of their second year in Honours Biological Sciences. This program provides students with 12 months of paid employment by the time they graduate. It enables them to obtain work experience with participating firms, government agencies and University units.

There are several themes offered within the Biological Sciences Program and the Cooperative Option can be completed within any of these areas of study. See below for a description of the different themes and the course requirements of those themes offered by the Department of Biological Sciences.

Students may apply for openings in the Biological Sciences Honours Cooperative Option after completing at least two years (60 credit hours) in the Honours program, usually in the fall of their third year. Before the first employment term begins, the prerequisite courses listed below must be completed. Acceptance and continuation in the program is dependent upon the student receiving employment placements.

Prerequisite courses to be completed before employment terms begin: BIOL 1020 and BIOL 1030, CHEM 1300, CHEM 1310, STAT 1000, 3 credit hours of specified Mathematics or Physics, **BIOL 2300, BIOL 2500, BIOL 2520, and BIOL 3100 ***. **In addition, students must complete 9 credit hours from program core courses as follows: students must select one course from Group A (BIOL 2200, BIOL 2210), plus one course from Group B (BIOL 2240, BIOL 2242, BIOL 2260), plus one additional course from either Group A or Group B.** [* A Pre-Coop Workshop may be substituted for **BIOL 3100** only to permit an employment term in September of Year 3, but **BIOL 3100** must still be taken.]

Students should note that the course and grade requirements for the Biological Sciences Honours Cooperative Option are the same as those for the

regular Honours program, with the addition of the Work Term courses (see above). To continue in the Biological Sciences Honours Cooperative program, a student must have a Degree Grade Point Average of 3.00, and in addition, must have a 3.00 Grade Point Average on all Biological Sciences courses during that term, a grade of "C+" or better in each Biological Sciences course, and a pass on all work term courses.

Students should refer to the general faculty regulations for B. Sc. (Honours) Cooperative Options in Section 3.6.

Employment term positions available to the students will be approved by the department and may include positions within Biological Sciences, other University departments or positions with employers outside the University. Employers will select the students they wish to employ. The first employment term will preferably be taken in January or May of the third year, but may under exceptional circumstances begin in the preceding September. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

The program will include three employment terms, each of 4-months duration, two of which may be consecutive. A fourth work term is optional. Students are required to register in and pay fees for each employment term prior to its commencement. Students will be required to submit an employment report upon the completion of each employment term. In order to stay in the Cooperative program, a student must obtain a grade of "pass" for each work term report.

4.3.3 B.Sc. (Major): Biological Sciences

The four year Major program is also designed for students planning a professional career in the Biological Sciences, but who may not be considering graduate training. It will provide intensive training in all areas of Biology comparable to that of the Honours program, but has less demanding performance requirements. Students who so wish, and have appropriate standing and course selection, may transfer to the Honours program at any time up to the commencement of Year 4.

Appropriate courses will be arranged in consultation with the Program Advisor who may be contacted through the Biological Sciences Office, 121 Machray Hall. Students are encouraged to select a specific theme area of study as part of their Biological Sciences program. See the information below outlining the different theme areas offered by the Department of Biological Sciences.

Course BIOL 4100 is not available to students in this program.

To enter the Biological Sciences four-year Major program a student must have a "C+" in either BIOL 1030 or CHEM 1310 and not less than a "C" in the other course, and have satisfied the faculty requirements for entry to the four year Major program. STAT 1000 and the 3 credit hours of specified Mathematics, Physics or Statistics courses can be completed in University 1 or Year 2.

Four Year Major Cooperative Option

Students interested in alternating academic terms and terms of paid employment as part of their Major Biological Sciences program may enter the Cooperative Option after completion of their second year in the Biological Sciences Major. This program provides students with 12 months of paid employment by the time they graduate. It enables them to obtain work experience with participating firms, government agencies and University units.

There are several themes offered within the Biological Sciences Program and the Cooperative Option can be completed within any of these areas of study. See below for a description of the different themes and the course requirements of those themes offered by the Department of Biological Sciences.

course from Group A (BIOL 2200, BIOL 2210), plus one course from Group B (BIOL 2240, BIOL 2242, BIOL 2260), plus one additional course from either Group A or Group B. [* A Pre-Coop Workshop may be substituted for BIOL 3100 only to permit an employment term in September of Year 3, but BIOL 3100 must still be taken.]

Students should note that the course and grade requirements for the Biological Sciences Major Cooperative Option are the same as those for the regular Major program (see above), **with the addition of BIOL 3100** and the Work Term courses. To continue in the Biological Sciences Major Cooperative program, a student must have a Cumulative Grade Point Average of 2.00, a grade of "C" or better in each Biological Sciences course required in the program, and a pass on all work term courses.

Students should also refer to the general faculty regulations for B. Sc. (Major) Cooperative Options in Section 3.4.

Employment term positions available to the students will be approved by the department and may include positions within Biological Sciences, other University departments or positions with employers outside the University. Employers will select the students they wish to employ. Students will be required to submit an employment report upon the completion of each employment term. In order to stay in the Cooperative program, a student must obtain a grade of "pass" for each work term report.

4.3.4 Biological Sciences Theme Areas

I. Cell, Molecular and Developmental Biology: Students in the Department of Biological Sciences with an interest in the exciting field of cell and developmental biology can select the Cell, Molecular, and Developmental Biology theme for focus. This theme will provide students a selection of courses that highlight fundamental principles and many important advances in this rapidly growing area of contemporary biology. Students can concentrate on aspects that deal with the molecular structures and processes of cellular life and their roles in the function, reproduction, and development of living organisms. The theme is structured such that students can choose from a broad range of disciplines, including biochemistry, molecular biology, morphology, genetics, cell biology, and developmental biology. The organisms under study in this theme are equally diverse, ranging from microbes through to invertebrates, vertebrates, plants, and fungi. The Department collaborates with many other life sciences departments and this theme allows student to develop a highly flexibly course portfolio that includes courses from the Departments of Biological Sciences, Chemistry, Microbiology, or Plant Science.

Specific courses required for the Cell, Molecular, and Developmental Biology Theme in addition to the core course requirements: BIOL 2540 (ZOOL 2150) Developmental Biology (3); *Plus a minimum of 6 Credit hours of Biochemistry:* CHEM 2770 (MBIO 2770) and CHEM 2780 (MBIO 2780); or CHEM 2210 and CHEM 2360 (MBIO 2360) and CHEM 2370 (MBIO 2370).

II. Ecology and Environmental Biology: Ecology is the study of interactions between organisms and their environment, both in natural settings and human-influenced habitats. In our society ecology and environmental biology provide a scientific link to the living world. Ecologists study the lives of many organisms including animals, plants, fungi, protists, and bacteria. Interactions among these organisms are investigated at many scales ranging from the microscopic to the global. At the individual level, ecology investigates the impact of environmental factors on organisms through their physiology and behaviour. Ultimately, ecologists link these factors to survival and reproduction in variable environments. At the population level, ecology examines the causes of fluctuations in numbers and changes in distribution of a single species. This work is often the focus of agencies concerned with exploitation, extinction, and rehabilitation of both commercially and esthetically important species. At the community and ecosystem level, ecology considers many coexisting species. It examines the interactions between species within the communities (competition, predation, parasitism, mutualism, etc.) as well as broader investigations of community structure and composition. Ultimately, the skills developed within

this theme prepare students for future careers in academia, government agencies, private consulting companies, or NGOs whose mandates encompass ecological and environmental concerns.

Specific courses required for the Ecology and Environmental Biology Theme in addition to the core course requirements: BIOL 3310 (ZOOL 3680) Foundations of Population Ecology (3); BIOL 3312 (BOTN 3540) Community Ecology (3); BIOL 3314 (BOTN 3420/ZOOL 3460) Field Ecology (3); STAT 2000 Basic Statistical Analysis 2 (3).

III. Environmental and Integrative Physiology: The Environmental and Integrative Physiology theme will be of interest to a wide array of students interested in pursuing employment opportunities in the Environmental, Consulting, Pharmaceutical, Healthcare, and Professional job markets. Based on the suggested courses and sub themes within this program students will be able to graduate with an all inclusive degree or specialize in particular disciplines ranging from molecular physiology to whole organism physiology and eco/environmental physiology, a subject area that is at the interface between ecology and physiology. Students will be exposed to modern research techniques in lab classes and will be taught by instructors and faculty with active research programs within the Department of Biological Sciences.

Specific courses required for the Environmental and Integrative Physiology Theme in addition to the core course requirements: 6 Credit hours of Biochemistry CHEM 2770 (MBIO 2770) and CHEM 2780 (MBIO 2780); or CHEM 2210 and CHEM 2360 (MBIO 2360) and CHEM 2370 (MBIO 2370); Plus: two of the following courses (one of which is already required in the four-year Biological Sciences Degree programs): BIOL 3460 (ZOOL 3530) Environmental Physiology of Animals 1 (3), BIOL 3462 (ZOOL 3540) Environmental Physiology of Animals 2 (3), BIOL 3450 (BOTN 2020) Plant Physiology (3), BIOL 3452 (BOTN 3010) Environmental Physiology of Plants (3).

IV. Evolution and Biodiversity: Evolution is broadly defined as “descent with modification” and is the process that generates the earth’s biodiversity. The theory of evolution provides a unifying framework for biology because all organisms are descended from a common ancestor. As a result, evolutionary principles permeate research and teaching throughout biology.

Evolutionary biology addresses two overarching questions. (1) What was the history of life? (2) What processes account for adaptation and diversification? Systematics reconstructs the history of life by studying relationships among species, and involves comparisons of physical appearance, development, biochemistry, genetics, behaviour, ecology and biogeography. Evolutionary Genetics investigates how processes such as natural selection, mutation, and migration interact to cause evolutionary change within populations. Evolutionary history, genetics, and ecological context are required to fully understand the evolution of traits, for example body size, wing shape or leaf structure. Thus evolution integrates knowledge from a wide spectrum of sub-disciplines within biology.

Evolutionary biology has wide-ranging practical applications. Principles of evolution are required to understand: the evolution of pathogens such as HIV and avian influenza; domestication of wild species and consequences of genetic modifications; the identification of natural products; long-term responses to environmental change; and human biology. Courses from this theme will prepare students for academia, medicine, and government agencies or NGO’s that emphasize the cataloguing and conservation of biological diversity.

Specific course required for the Evolution and Biodiversity Theme in addition to the core course requirements:

List A: One of the following: BIOL 3360, BIOL 4240, BIOL 4242, BIOL 4362

List B: One of the following: BIOL 2262, BIOL 3200, BIOL 3242, BIOL 3250, BIOL 3270, BIOL 4212, BIOL 4214, BIOL 4216, BIOL 4218, BIOL 4244

V. Integrative Biology: The Integrative Biology theme will be of interest to students planning to pursue careers in the various biology sub disciplines and who wish an undergraduate degree that is “interdisciplinary” within the life science departments that cuts across the traditional boundaries. This program will suit students who are interested in the “after degree” program in Education or who are intending to apply to a professional program (e.g. Medicine, Dentistry, Pharmacy, Medical Rehabilitation) and who would like a broad background in the Life Sciences. With the appropriate choice of Biological Science courses it would be possible to indicate the Integrative Biology theme along with a second theme from the department.

Specific courses required for the Integrative Biology Theme in addition to the core course requirements: All five of the following (three of which are already designated as core courses in the four-year Biological Sciences Degree programs): BIOL 2200 The Invertebrates (3), BIOL 2210 The Chordates (3), BIOL 2240 The Flowering Plants 1 (3), BIOL 2242 The Non-Flowering Plants (3), MBIO 1010 Microbiology I (3); One of the following (one of which is already required in the four-year Biological Sciences Degree programs): BIOL 3450 Plant Physiology (3), BIOL 3460 Environmental Physiology of Animals; Plus: 18 credit hours in Biological Sciences (3000/4000 level courses) and 12 credit hours in Microbiology (3000/4000 level courses).

Note: a maximum of 15 credits of Biological Sciences and Microbiology courses at the 2000 level are permitted in year 3 and 4. For the Integrative Biology theme only, these 15 credit hours of 2000 level course may be used toward the 3000/4000 level requirements of the degree.

4.3.5 B. Sc. General Degree: Biological Sciences

Courses taken as part of a General degree program provide an introduction to the major fields of study in the Biological Sciences. Commencing in Fall Term 2009, students will have two options for the General Degree under the Department of Biological Sciences.

Option A: 18 credit hours of 2000, 3000, and (or) 4000 level Biological Sciences courses (subject to the Faculty requirement that of the 36 credit hours in the two chosen advanced level Science areas, at least 6 credit hours must be at the 3000/4000 level);

Option B: Students may choose 36 credit hours from the Biological Sciences provided they select the following courses: each of BIOL 2300, BIOL 2500, BIOL 2520; one of BIOL 2200 or BIOL 2210; one of BIOL 2240, BIOL 2242, or BIOL 2260; plus 21 additional credit hours from the Biological Sciences including at least 6 credit hours at the 3000 or 4000 level.

Students anticipating a transfer to either the four year Major or Honours program at the end of their second or third year should consult with the Departmental Program Advisor before registering.

4.4.1 Program Information

Biotechnology Honours Degree Requirements

To enter the joint Honours program, students must have a Degree GPA (DGPA) of not less than 2.50 on all courses completed at the end of Year 1 (minimum 24 credit hours). Also students must have a minimum grade of B in BIOL 1030 and CHEM 1310 and a minimum grade of C+ in BIOL 1020, CHEM 1300, MATH 1500, PHYS 1020 (or PHYS 1050), and STAT 1000. Six credit hours of Arts electives, including the written English course should also be taken in Year 1.

Students will select one stream (Analytical, Environmental/Biosystems or Molecular Biotechnology). Students are also encouraged to select a Minor in a complementary area. There are enough free electives to cover the 18 credit hours required for a Minor. All students must complete a Common Core of required courses plus required Stream Specific courses. The remaining courses can be selected from the list of Recommended Electives. This list is meant to give students some idea of appropriate electives; however, students have the option to choose courses not on the list in consultation with the Program Advisors.

To continue in the Honours program, i.e., to proceed from Year 2 to Year 3 and from Year 3 to Year 4, and to successfully complete Year 4 of the Honours program, a student must maintain a minimum DGPA of 3.00 and achieve a minimum grade of "B" on all Common Core Courses, a minimum grade of "C+" on all Stream Specific Courses, and a minimum grade of C on all electives courses. Students must complete a minimum of nine credit hours per term to continue in Honours. No more than 15 credit hours of F grades may be accumulated, regardless of whether any course has been repeated and a higher grade achieved. Research Project in Biotechnology (BTEC 4000) must be taken in the final year of the program.

To graduate from the Biotechnology Honours program students require a minimum GPA of 3.00 on the 120 credit hours that make up the degree and attain the minimum grade requirements in the program specific courses. Additionally, students must satisfy all of the Faculty's Honours program requirements.

Students who do not meet these minimum requirements will be required to withdraw from the program and may be eligible to enter the 4-Year Major degree program in Biotechnology. Depending on course selection students may also be eligible to enter other Major Programs (e.g. Biochemistry, Biological Sciences, Chemistry, or Microbiology) and/or the 3-year B.Sc. General Degree program.

4.5.1 Program Information

Chemistry is the science concerned with the properties of atoms and molecules, of which all matter is composed. Chemistry is important for all aspects of the material world - food production; the manufacture of medicines, textiles, and plastics; energy production; identifying environmental problems and remedies; and understanding the workings of living organisms. The department offers study in analytical, inorganic, organic and physical chemistry, and in biochemistry.

Chemistry Club: The Chemistry Club is the University of Manitoba Student Chapter of the Chemical Institute of Canada. The aim of the organization is to advance interest in chemistry. All students engaged in chemical studies are eligible for membership in the chapter and are encouraged to apply. Regular meetings, tours, publications, etc., are planned by each year's membership.

Scholarships and Awards: Several scholarships and awards are granted each year to Honours and Major students in Chemistry, Biochemistry, and Biotechnology on the basis of outstanding academic performance. To be eligible for these awards for any regular session, students are normally required to have completed a full program with a minimum of 18 credit hours of Chemistry in that session. They must also be registered for a full program with a minimum of 18 credit hours of Chemistry in the next regular session. Additional information is available from the Chemistry general office.

The department must approve a student's Honour or Major program each session. Students must also obtain departmental approval for any and all revisions to their program.

Honours Requirements

To enter the Honours program in Chemistry, students must have CHEM 1300 (B) and CHEM 1310 (B); PHYS 1050 (C+) or PHYS 1020 (B); MATH 1500 (C) and MATH 1700 or any equivalent with a grade of "C"; and have satisfied all faculty requirements for entry to the Honours program. If not taken prior to entrance, PHYS 1070 must be taken at the first opportunity after entering the program.

To continue in and graduate from the Honours program, i.e., to proceed from Year 2 to Year 3 and from Year 3 to Year 4 and successfully complete Year 4 of the Honours program, a student must have a Degree Grade Point Average of 3.00 and in addition, must have a 3.00 average on all Chemistry courses during that term, and a grade of "C+" or better in each Chemistry course. Students must complete 9 credit hours in each Fall and Winter Term. To graduate with the Honours degree, a student must also have a minimum grade of "C" in all remaining courses that contribute to the degree.

Honours Cooperative Option

Students interested in alternating academic terms and terms of paid employment as part of their Honours Chemistry program may enter the Cooperative Option in their third year in Honours Chemistry. This program provides students with a minimum of 12 months of paid employment by the time they graduate. It enables them to obtain work experience in research and industry with participating firms, government agencies and university units.

The course and grade requirements for entry to this option are the same as those required for entry to the regular Honours program, as indicated in the chart. Students are required to complete 24 credit hours of Chemistry (including CHEM 2470 and either CHEM 2280 or CHEM 2290) before they begin their first employment term. Students should refer to the general faculty regulations for B.Sc. (Honours) Cooperative Options in Section 3.6.

Students should note that the grade requirements for the Cooperative Option are the same as that for the regular Honours program. To continue in and graduate from the Honours Cooperative program (e.g. to proceed from Year 2 to Year 3), a student must have a Degree Grade Point Average of

3.00 and in addition, must have a 3.00 average on all Chemistry courses during that session and a grade of "C+" or better in each Chemistry course. Each academic term in the third and subsequent years must comprise a minimum of 9 credit hours. To graduate with the Honours degree (Cooperative Option), a student must also have a minimum grade of "C" in all remaining courses that contribute to the degree.

Students will apply for openings in the Cooperative Option in September of their third year in the Honours program. They will be notified of their provisional acceptance in the program by October. Acceptance into the program is dependent upon the student receiving an employment placement. Employment term positions available to the students will be approved by the department, and the employers will select the students they wish to employ. The first work term can be taken in January or May. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each employment term.

Four Year Major Requirements

To enter the four year Major in Chemistry, students must have CHEM 1300 (C+) and CHEM 1310 (C+); PHYS 1050 (C) or PHYS 1020 (C+); MATH 1500 and MATH 1700 or any equivalent and have satisfied all faculty requirements for entry to the four year Major program. If not taken prior to entrance, PHYS 1070 must be completed at the first opportunity after entering the program.

To continue in the Major program, a student must have a Cumulative Grade Point Average of 2.00 at each point of assessment.

To graduate with the Major degree, students must present a grade of "C" or better on the 54 credit hours of Chemistry required in the degree and a Degree Grade Point Average of 2.00.

Students who, at the end of University 1, are undecided between the four year Major and Honours programs should note that the prescription for Honours Year 2 satisfies both the Honours and Major programs.

Major Cooperative Option

Students interested in alternating employment terms and academic terms as part of their Major Chemistry program may enter the Cooperative Option in their third year in Chemistry. This program provides students with a minimum of 12 months of paid employment by the time they graduate. It enables them to obtain work experience in research and industry with participating firms, government agencies and University units.

The course and grade requirements **for entry** to this option are the same as those required for entry to the regular Major program. Students are required to complete 24 credit hours of Chemistry (including CHEM 2470 and either CHEM 2280 or CHEM 2290) before they begin their first employment term. To continue in the Major program, a student must have a Cumulative Grade Point Average of 2.00 at each point of assessment. To graduate with the Major degree (Cooperative Option), students must present a grade of "C" or better on the 54 credit hours of Chemistry required in the degree and a Degree Grade Point Average of 2.00. See the general faculty regulations for B.Sc. (Major) Cooperative Option in Section 3.4.

Students will apply for openings in the Cooperative Option in September of their third year in the Major program. They will be notified of their provisional acceptance in the program by October. Acceptance into the program is dependent upon the student receiving an employment placement. Employment term positions available to the students will be approved by the department, and the employers will select the students they wish to employ. The first work term can be taken in January or May. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each employment term.

Chemistry Program Focus Areas

Students may elect to take courses that, in combination, make up a Chemistry focus area. Currently, there are four Chemistry focus areas. They are: Biopharmaceutical Chemistry, Environmental Chemistry, Bioanalytical Chemistry, and Materials Science. Each focus area has specific course requirements that students must satisfy in order to graduate and receive the focus area notation on their transcripts. Other focus areas may be selected with approval from the Department Head. Students must consult with the Department of Chemistry and/or a Faculty of Science Student Advisor for information about the specific course requirements for each of the different focus areas.

Three Year Requirements

Courses taken as part of a three-year degree program provide an introduction to the major fields of study in Chemistry. Commencing in Fall Term 2010, students will have two options for a three year Degree under the Department of Chemistry.

Option A – Three Year General: As prescribed with all other faculty regulations in Section 3.2, students in this program must select 18 credit hours of 2000, 3000, and (or) 4000 level courses from each of **two** Science areas. To satisfy the requirement in the area of Chemistry, students must select a minimum of 18 credit hours from the following list of advanced level courses: CHEM 2210, CHEM 2220, CHEM 2280, CHEM 2290, CHEM 2360, CHEM 2370, CHEM 2380, CHEM 2470, CHEM 3360, CHEM 3370, CHEM 3380, CHEM 3390, CHEM 3570, CHEM 3580, CHEM 3590, CHEM 4360, CHEM 4370, CHEM 4570, CHEM 4580, CHEM 4590, CHEM 4620, CHEM 4630, CHEM 4640, CHEM 4660, CHEM 4670, CHEM 4680, CHEM 4690 (subject to the Faculty requirement that of the 36 credit hours in the two advanced level Science areas, at least 6 credit hours must be at the 3000/4000 level).

Option B - Three Year B.Sc. – Chemistry Focus: Students that choose this path for their three-year degree program will follow the program chart below. The 24 credit hours of introductory courses and 36 credit hours of advanced level requirements have been prescribed in such a way so that students that follow the chart can seamlessly transfer to a 4-year Chemistry Honours or Major degree program should they choose to do so after the completion of the 90 credit hours listed in the chart.

Students anticipating a transfer to either the four year Major or Honours program at the end of their second or third year should consult with the Departmental Program Advisor before registering.

4.6.1 Program Information

Computer technology continues to advance and computer applications are found in all fields and disciplines. As new applications proliferate, opportunities for careers in computing will continue to be strong. Both the Major and the Honours programs offer a co-op option so students may combine education with employment experience.

The department must approve a student's Honour or Major program prior to registration for each Fall/Winter Term. Students must also obtain departmental approval for any and all revisions to their program.

The Computer Science Honours and Major programs, including the Coop programs, and the Software Engineering area of specialization, are accredited by the Computer Science Accreditation Council.

Honours

The Honours program in Computer Science at the University of Manitoba was the first Honours program in Canada to be given professional accreditation by the Canadian Information Processing Society. The program provides an opportunity to study the subject in greater depth than the other programs in Computer Science and leads to an Honours Bachelor of Computer Science degree (B.C.Sc.). In addition, this program gives professional preparation for careers in areas such as software engineering, system design or project management.

An outline of the Honours program is provided below. MATH 1700 or equivalent is strongly recommended as an option. Optional courses are selected in consultation with the department advisor.

To enter the Computer Science Honours program, a student must have a "B" in COMP 1020 and a "C" average in Mathematics MATH 1300 and MATH 1500 or any equivalent. In addition, a student is required to have a Grade Point Average of 2.50 on all courses completed at the end of Year 1. To continue in the Honours program, the student must, by the end of second year, receive a grade of "C" or better in STAT 1000. Students ineligible to enter after Year 1 can establish eligibility in Year 2, see Section 3.5 Entrance to Honours. For additional information on the second year entry route contact a program advisor.

To continue in the Honours program, i.e., to proceed from Year 2 to Year 3 and from Year 3 to Year 4, and to complete Year 4 of the Honours program successfully, a student must have a 3.00 Degree Grade Point Average at each point of assessment. Students must complete 9 credit hours each Fall and Winter Term.

To graduate with the Honours degree, a student must present a minimum grade of "C" in each course which contributes to the degree and a DGPA of 3.00.

Students can take at most 90 credit hours of computer science, statistics and mathematics courses. Outside of computer science and mathematics courses, students are encouraged to select courses such that their programmes include at least 15 credit hours of study in science, engineering, or business, and at least 9 credit hours of study in the humanities or social sciences.

Honours Cooperative Option

The first class of students graduated from the Cooperative program in October 1983. This program provides students with a total of 12 months of paid employment by the time they graduate. It enables them to obtain work experience with participating firms in Winnipeg as well as other parts of Canada. For example, students have, in the past, found employment in Calgary, Edmonton, Toronto, Vancouver and Ottawa, and they have found the program an invaluable preparation for their working lives.

Students interested in alternating employment terms and academic terms as part of their Honours Computer Science program may apply to enter the Cooperative Option in their second year in Honours Computer Science. The course and grade requirements **for entry** to this option are the same as those required for entry to the regular Honours program, as indicated in the chart below.

Students should refer to the general faculty regulations for Cooperative Options in Section 3.6, especially for information on performance requirements.

Students should note that the course and grade requirements for the Cooperative Option are the same as that of the regular Honours program. **RE-MINDER:** Students must complete at least nine (9) credit hours per each Fall and Winter Term (or equivalent for cooperative students) to remain in the Honours program.

To graduate with the Honours degree, a student must present a minimum grade of "C" in each course which contributes to the degree and a DGPA of 3.00.

Students can take at most 90 credit hours of computer science, statistics and mathematics courses. Outside of computer science and mathematics courses, students are encouraged to select courses such that their programmes include at least 15 credit hours of study in science, engineering, or business, and at least nine (9) credit hours of study in the humanities or social sciences.

Students in this program will normally graduate following the completion of the Year 4 academic requirements in December, will receive their degree in February, and will be eligible to attend the May Convocation.

Employment term positions available to the students will be approved by the department, and the employers will select the students they wish to employ. Students will apply for openings in the Cooperative Option in April of their second year in the Honours program. They will be notified of their provisional acceptance in the program in September. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

The employment terms will be designed to provide students with the opportunity to acquire practical experience in a computer installation site and to acquire insight into areas of specialization within the computing field. Students can also typically earn enough to defray the cost of their university education.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each of their three employment terms.

Four Year Major

To enter the Computer Science Major Degree program, refer to the chart below.

To continue in the Major program a student must have a minimum Cumulative Grade Point Average of 2.00 (2.00 DGPA for Second Degree and Start Afresh students) at each point of assessment.

To graduate with the Major degree, a student must present a minimum grade of "C" in each of STAT 1000, COMP 2080, COMP 2130, COMP 2140, COMP 2150, COMP 2160, COMP 2280, COMP 3350, COMP 3370, COMP 3430 and in each of the 21 credit hours of 3000 and 4000 level Computer Science courses that apply to the Computer Science component of their degree program.

This program is suitable for those students interested in combining a fairly extensive program in Computer Science with broad coverage of another subject or subjects of their choice (Science or non-Science). The program offers greater scheduling flexibility, more relaxed entrance requirements, and a wider range for the inclusion of electives from other disciplines than the Honours program, but it is not considered to offer the same professional training as the Honours program. Admission to graduate programs may be conditional upon completion of additional courses. Students intending to proceed to a master's degree from the four year Major program must consult with the department at the beginning of their second year of undergraduate study and in each subsequent year.

The student will be able to transfer to the Honours program at the end of the second year, provided that departmental and faculty requirements for the Honours program at that stage are satisfied.

Students, who at the end of University 1 are undecided between the four year Major program and the Honours program, should note that the required courses in Year 2 Honours satisfy the requirements for both the Honours and Major programs. It is suggested that students with the necessary prerequisite standing in University 1 may wish to register in the courses listed for Year 2 of the Honours program, and thus keep both options open.

Students can take at most 90 credit hours of computer science, statistics and mathematics courses. Outside of computer science and mathematics courses, students are encouraged to select courses such that their programmes include at least 15 credit hours of study in science, engineering, or business, and at least nine (9) credit hours of study in the humanities or social sciences. Students may be allowed to take up to 48 credit hours of courses outside the Faculty of Science with departmental permission, despite the faculty maximum of 36 credit hours. The permission would typically be granted if a student is completing a minor outside of Science and may have completed a variety of electives outside the Faculty prior to declaring a minor in one department.

Four Year Major Cooperative Option

To continue in the Major program a student must have a Cumulative Grade Point Average of 2.00 at each point of assessment.

To graduate with the Major degree, a student must present a minimum grade of “C” in each of STAT 1000, COMP 2080, COMP 2130, COMP 2140, COMP 2150, COMP 2160, COMP 2280, COMP 3350, COMP 3370, COMP 3430 and in each of the 21 credit hours of 3000 and 4000 level Computer Science courses that apply to the Computer Science component of their degree program.

Students can take at most 90 credit hours of computer science, statistics and mathematics courses. This program provides students with a minimum of 12 months of paid employment by the time they graduate. It enables them to obtain work experience with participating firms in Winnipeg as well as other parts of Canada.

Students interested in alternating employment terms and academic terms as part of their four year Major program in Computer Science may apply to enter the Cooperative Option in their third year of the four year Major program in Computer Science. The course and grade requirements for entry to this option are the same as those required for entry to the regular four year Major program, as indicated in the chart above. Students should refer to the general faculty regulations for Cooperative Options in Section 3.4.

Students should note that the course and grade requirements for the Cooperative Option are the same as that for the regular Major program. Students in this program will normally graduate following the completion of the

Year 4 academic requirements in December, will receive their degree in February, and will be eligible to attend the May Convocation.

Employment term positions available to the students will be approved by the department, and the employers will select the students they wish to employ. Students will apply for openings in the Cooperative Option in April of their second year in the Major program. They will be notified of their provisional acceptance in the program in September. Students are required to register in, and pay fees for, each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each of their three employment terms.

Three Year General

As prescribed with all other faculty regulations in Section 3.2, students in this program must select 18 credit hours of 2000, 3000, and (or) 4000 level courses from each of **two** Science areas. To satisfy the requirement in the area of Computer Science, students must select a minimum of 18 credit hours from the 2000, 3000, and (or) 4000 level courses offered by the department (subject to the Faculty requirement that of the 36 credit hours in the two advanced level Science areas, at least 6 credit hours must be at the 3000/4000 level.).

Area Specializations

Students who obtain a grade of “C” or better in the courses listed for an area of specialization will receive a notation on their transcript stating that they have met the requirements of that specialization. Students may obtain such a notation for more than one area.

4.8.1 Program Information

The Faculty of Science offers an interdisciplinary program leading to a B.Sc. (Honours) degree in Genetics. Genetics is the science of heredity dealing with the mechanisms of inheritance and has generated concepts basic to modern biology. Three areas are represented in this program: classical genetics, population genetics, and molecular genetics. Courses from Arts, Agricultural and Food Sciences, and Medicine are included in this program.

Genetics Entry Requirements and Optional Courses

To enter the Genetics Honours program students must have a "B" in each of CHEM 1300* and CHEM 1310, and not less than a "C+" in BIOL 1030*; or a "B" in BIOL 1030* and a "C+" in each of CHEM 1300* and CHEM 1310; plus a grade of "C" in STAT 1000 and standing in MATH 1500 and one of MATH 1200, MATH 1300, MATH 1700 or any equivalent. In addition, students must satisfy the general faculty requirements for entry to Honours programs. The Genetics Program Coordinator must approve a student's Honours program each session. Students must also obtain approval for any and all revisions to their program.

* Students interested in studying Genetics should note that Grade 12 mathematics and chemistry are prerequisite to CHEM 1300. Effective 2009-2010, students will also require Biology 405 (or equivalent) and any Grade 12 mathematics course (or equivalent) for entry to BIOL 1020 (the required prerequisite for BIOL 1030).

To continue in the Genetics Honours program, i.e. proceed from Year 2 to Year 3, and Year 3 to Year 4, students must maintain a minimum Degree

Grade Point Average of 3.00, and complete a minimum of 9 credit hours during each Fall and Winter Term.

To graduate with the B. Sc. Honours degree, a student must maintain a minimum 3.00 DGPA, achieve a minimum grade of "C+" in each of the Honours Program Specific courses (see below), and achieve a minimum grade of "C" on all remaining courses that contribute to the 120 credit hours of the degree.

Honours Program Specific Courses

BIOL 3500 (BOTN 3460); PLNT 3140; MBIO 3410; whichever of ANTH 2890, ANTH 2560 or ANTH 2860 selected; BGEN 3020; and either MBIO 4530* or BGEN 4010* (if selected).

Honours Cooperative Option

Students interested in alternating academic terms and terms of paid employment as part of their Honours Genetics program may enter the Cooperative Option in their third year in Genetics Honours. This five year program provides students with minimum 12 months of paid employment by the time they graduate. It enables them to obtain work experience in research and industry with participating firms, government agencies and University units.

The course and grade requirements for **entry and continuation** in the Cooperative Option are the same as that for regular Honours program (see above). Students are required to complete the first and second year requirements of the program and MBIO 3410 before they begin their first employment term. Each academic term in the third and subsequent years must comprise nine (9) credit hours. Students should refer to the general faculty regulations for B. Sc. (Honours) Cooperative Options in Section 3.6.

Students will apply for openings in the Cooperative Option in September of their third year in the Genetics Honours program. They will be notified of their provisional acceptance in the program by October. Acceptance into the program is dependent upon the students receiving an employment

placement. Employment term positions available to the students will be approved by the department, and the employers will select the students they wish to employ. The first work term can be taken in January or May. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each 4-month employment term.

Note: A genetics major program has been proposed for 2010-11. See a science student advisor for further information.

4.9.1 Program Information

Mathematics provides the language, reasoning and analytic tools that many other disciplines use to investigate their areas. These include all the physical sciences, computer and engineering sciences, social sciences, and the biological and health sciences. A wide range of business, industrial, and government programs rely on mathematics to provide insight and analysis. Students may specialize in mathematics alone or in combinations with physics, computer science, economics, or statistics.

The department must approve a student's Honour or Major program each session. Students must also obtain approval for any and all revisions to their program.

NOTE: Students entering either the Faculty of Arts or Science, and intending to take courses from the department, are strongly advised to speak to a Science student advisor or a faculty advisor in the department concerning an appropriate choice of mathematics courses. They may also consult the Department of Mathematics website at umanitoba.ca/science/mathematics.

Honours Requirements

To enter the Honours program in Mathematics a student must have a minimum grade of "B" in MATH 1300 and either MATH 1700 or MATH 1690 or any equivalent. In addition, students must have satisfied the Faculty requirements for entry to the Honours program. Students must complete a minimum of nine (9) credit hours each Fall and Winter Term.

To graduate with the B. Sc. Honours degree, a student must achieve a minimum DGPA of 3.00 and a minimum grade of “C+” in each of the Honours Program Specific courses (see below), and a minimum grade of “C” on all remaining courses that contribute to the 120 credit hours of the degree.

Honours Program Specific Courses

MATH 3230, MATH 3300, MATH 3350, MATH 3400, MATH 3700, MATH 3710, MATH 3760 and MATH 3800.

The program for students who elect Honours in Mathematics is as follows:

Year 2 Mathematics courses as indicated in the chart below and nine (9) credit hours from such fields as physics, chemistry, actuarial mathematics, computer science, statistics, philosophy, or economics. Other fields may be elected with the approval of the department.

Year 3 Mathematics courses as indicated in the chart below and electives to be chosen from the subject fields below or a third or fourth year Mathematics course not already elected. Students performing satisfactorily in Year 2 may obtain permission to take an additional course.

Year 4 Mathematics courses as indicated in the chart below and electives to be chosen from the subject fields below or a third or fourth year Mathematics course not already elected. Students performing satisfactorily in Year 3 may obtain permission to take an additional course.

Electives normally allowed are:

Statistics: STAT 2000, STAT 2400, the former STAT 3180, STAT 3470, STAT 3480, STAT 3400 (STAT 3500), STAT 3800 (STAT 3600), STAT 4100 (STAT 4140), STAT 4520, STAT 4530, STAT 4580, STAT 4590, STAT 4600, STAT 4620, STAT 4630, STAT 4690.

Economics: ECON 2530, ECON 2700, ECON 3700, ECON 3730, ECON 4120, ECON 4130.

Mechanical Engineering: MECH 3490.

Other courses may be chosen with permission of the department. Students are required to obtain the approval of the department concerning their choice of electives.

Double Honours: A student may elect Honours in Mathematics and one other field, subject to the approval of both departments. The Mathematics prescription for a Double Honours program is as indicated in the table below.

Honours programs must be approved each year by the department.

Four Year Major Requirements

To enter the four year Major in Mathematics, a student must have a “C+” in either MATH 1690 or in two of MATH 1300, MATH 1500 and MATH 1700 or any equivalent and have satisfied all Faculty requirements for entry to the program.

To graduate with the B. Sc. Major degree, a student must achieve a minimum DGPA of 2.00 and a minimum grade of “C” in each of the Major Program Specific courses (see below).

Major Program Specific Courses

MATH 1300, MATH 1500, MATH 1700, (or MATH 1690 in place of MATH 1500 and MATH 1700), MATH 2202, MATH 2352, MATH 2600, MATH 2750, MATH 2800, MATH 3300, MATH 3350, MATH 3400, MATH 3700, MATH 3710, MATH 3740, MATH 3760, and MATH 3800.

It is suggested that among their electives, students might choose courses in which mathematics is extensively used, for example, courses in physics, chemistry and certain courses in economics. For advice on this point students should talk to a faculty member in the department.

Four Year Major in Applied Mathematics with Option (Computer Science, Economics, Statistics)

These programs provide a sound general knowledge of applied mathematics together with a significant number of courses in the option area. Courses in the Computer Science option provide training in aspects of computer science which are most useful to the practicing mathematician. Courses in the Computer Sciences, Economics, and Statistics options are fundamental to each area and provide a strong, mathematical basis for further study.

To enter the four year Major in Applied Mathematics with one of the above three options, a student must have a “C+” in either MATH 1690 or two of MATH 1200, MATH 1300, MATH 1500, or MATH 1700, one of which must be either MATH 1500, or MATH 1700, and have satisfied all faculty requirements for entry to the program.

To graduate with the B. Sc. Major degree, a student must achieve a minimum DGPA of 2.00 and a minimum grade of “C” in each of the Major Program Specific courses (see below).

Major Program Specific Courses

MATH 1200, MATH 1300, MATH 1500, MATH 1700 (or MATH 1690 in place of MATH 1500 and MATH 1700), MATH 2300, MATH 2400, MATH 2600, MATH 2720, MATH 2730, MATH 2800, MATH 3500, MATH 3600, MATH 3700, MATH 3740, MATH 3800, MATH 3810, and MATH 3820.

It is recommended that students take all 12 credit hours of 1000 level mathematics courses in their initial 30 credit hours; however, students should take at least MATH 1300, MATH 1500 and MATH 1700. See the individual charts below for additional requirements for each option.

Options List: MATH 2450, MATH 2500, MATH 2552, the former MATH 2550, or any 3rd or 4th year Mathematics course.

Three Year General

As prescribed with all other faculty regulations in Section 3.2, students in this program must select 18 credit hours of 2000, 3000, and (or) 4000 level courses from each of **two** Science areas. To satisfy the requirement in the area of Mathematics, students must select a minimum of 18 credit hours of 2000, 3000, and (or) 4000 level Mathematics courses (subject to the Faculty requirement that of the 36 credit hours in the two advanced level Science areas, at least 6 credit hours must be at the 3000/4000 level).

4.10.1 Program Information

Microbiology is the study of microorganisms such as bacteria, viruses, fungi, protozoa, and algae, and their interactions with the environment. It is also an area of study that plays a pivotal role in understanding other life science disciplines, such as medicine, agriculture, ecology, and pharmacy. Studies in cloning, recombinant DNA technology, and gene sequencing are part of the program. The departments of Microbiology and Chemistry offer joint Honours programs (including Co-op) and joint Four Year Major programs (including Co-op) in biochemistry and biotechnology (See Sections 4.2 and 4.4).

The department must approve a student's Honours or Major program prior to registration in each session. Students must also obtain approval for any and all revisions to their program.

Microbiology Prerequisite Information

Students are advised to take courses in the year suggested in the charts below; otherwise difficulties may arise with timetabling and prerequisite requirements. Students are responsible for all prerequisites and corequisites of the courses required or selected in all programs below. Since Chemistry courses form an integral part of all Microbiology programs, students should note that Grade 12 mathematics and chemistry are prerequisite to CHEM 1300.

By careful choice of electives, programs may be selected giving emphasis to various areas of Microbiology, e.g., Biochemistry and Molecular Biology or Environmental and Ecological Microbiology. In choosing optional courses, students should be aware of any prerequisite requirements.

Honours Cooperative Option

Students interested in alternating academic terms and terms of paid employment as part of their Honours Microbiology program may enter the Cooperative Option in their third year in Honours Microbiology. This program provides students with a minimum of 12 months of paid employment by the time they graduate. It enables them to obtain work experience in research and industry with participating firms, government agencies and university units.

The course and grade requirements **for entry** to this option are the same as those required for entry to the regular Honours program (see above), as indicated in the chart. Students are required to complete the first and second year requirements of the program; and MBIO 3010 and MBIO 3410 before they begin their first employment term. Students should refer to the general faculty regulations for B.Sc. (Honours) Cooperative Options in Section 3.6.

Students should note that the grade requirements for the Cooperative Option are the same as that for the regular Honours program (see above). **To continue** in the Honours Cooperative program, i.e., to proceed from Year 2 to Year 3 and from one academic term to the next and to complete the Honours Cooperative program successfully, a student must have a Degree Grade Point Average of 3.00, and in addition, must have a 3.00 Grade Point Average on all Microbiology courses during that term. Each academic term in the third and subsequent years must comprise 9 credit hours.

Students will apply for openings in the Cooperative Option in September of their third year in the Honours program. They will be notified of their provisional acceptance in the program by October. Acceptance into the program is dependent upon the student receiving an employment placement. Employment term positions available to the students will be approved by the department, and the employers will select the students they

wish to employ. The first work term can be taken in January or May. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each employment term.

Four Year Major

To enter the four year Major program in Microbiology students must have a minimum of "C+" in each of CHEM 1300* and CHEM 1310, and a minimum of "C" in BIOL 1030*; or a minimum of "C+" in BIOL 1030* and a minimum of "C" in each of CHEM 1300* and CHEM 1310. Statistics STAT 1000 and the 3 credit hours of specified Mathematics or Physics can be completed in University 1 and Year 2. In addition, the faculty requirements for entry to the four year Major program must be satisfied.

* Students interested in studying Microbiology should note that Grade 12 mathematics and chemistry are prerequisite to CHEM 1300. Effective 2009-2010, students will also require Biology 40S (or equivalent) and any Grade 12 mathematics course (or equivalent) for entry to BIOL 1020 (the required prerequisite for BIOL 1030).

Potential entrants to this program should also note the following:

Students who wish to elect CHEM 2280, CHEM 2290 or CHEM 2470 as options should note the prerequisites in making a choice of mathematics courses.

Chemistry CHEM 2210 must be taken before MBIO 2370 (CHEM 2370). Courses MBIO 2360 and CHEM 2360, and MBIO 2370 and CHEM 2370 are the same and credit cannot be held for both. Microbiology students will normally register in MBIO 2360 and MBIO 2370, but CHEM 2360 and CHEM 2370 will be regarded as equivalents in the four year Major program.

Students intending to apply for transfer to the Honours program after Year 2 should register for MBIO 2280 in Year 2.

Students must note course and grade prerequisites when selecting 3000 and 4000 level Microbiology courses.

Microbiology MBIO 4530 is not available in this program.

By careful choice of electives, programs may be selected giving emphasis to various areas of Microbiology, e.g., Biochemistry and Molecular Biology or Environmental and Ecological Microbiology. In choosing optional courses, students should be aware of any prerequisite requirements.

The listed requirements are minimum requirements. Students are reminded that should they wish to take further courses in Microbiology, they are at liberty to do so within the degree regulations.

Four Year Major Cooperative Option

Students interested in alternating employment terms and academic terms as part of their Major program in Microbiology may enter the Cooperative Option in their third year in Microbiology. Students are required to complete the first and second year requirements of the program and MBIO 3410 before they begin their first employment term. See the general faculty regulations for B.Sc. (Major) Cooperative Option in Section 3.4.

Students will apply for openings in the Cooperative Option in September of their third year in the Major program. They will be notified of their provisional acceptance in the program by October. Acceptance into the program is dependent upon the student receiving an employment placement. Employment term positions available to the students will be approved by the department, and the employers will select the students they wish to employ. The first work term can be taken in January or May. Students are advised that satisfying the entrance requirements does not guarantee a place

in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each employment term.

4.11.1 Program Information

Physics is the discipline that by experiment and logical analysis examines the laws of nature that form the basis for all relationships and interactions between matter and energy. Knowledge of physics is also essential in other natural sciences, such as chemistry and geology, and to professions such as engineering, medicine and dentistry. Astronomy, the other focus of this department, examines the universe, the earth and the planets, as well as phenomena such as quasars, pulsars, comets, and asteroids; a planetarium and an astronomical observatory are part of this program. In both Physics and Astronomy mathematical skills are developed simultaneously.

The department must approve a student's Honour or Major program prior to registration in each session. Students must also obtain approval for any and all revisions to their program.

Honours

To enter the Honours program in Physics and Astronomy, a student must have a "B" in PHYS 1050 and PHYS 1070, or a "B+" in PHYS 1020 and a "B" in PHYS 1070, standing in MATH 1500, a "B" in both MATH 1700, and MATH 1300 or any equivalents. In addition, a student must satisfy the faculty requirements for entry to the Honours program.

To continue in the Honours program, i.e., to proceed from Year 2 to Year 3 and Year 3 to Year 4, students must achieve a minimum DGPA of 3.00 and a grade of "C" in all Honours Physics and Astronomy courses which are either required in the program or required as prerequisites to other Physics and Astronomy courses taken in the Honours program.

To graduate with the B. Sc. Honours degree, a student must achieve a minimum DGPA of 3.00 and minimum grade of "C" in each course that contributes to the 120 credit hours of the degree.

There are a number of awards — the Coish, the C.P. Loewen, the Neamtan, the Roulston, and the Sen Scholarships — available in this program.

Joint Honours

The Department of Physics and Astronomy offers joint honours programs in conjunction with the Departments of Mathematics, Computer Science, and Chemistry.

To enter the Joint Honours Mathematics-Physics program the student must have a minimum grade of "B" in: MATH 1300, MATH 1510 and MATH 1710 (or MATH 1690), PHYS 1050 (or "B+" in PHYS 1020) and PHYS 1070.

To enter the Joint Honours Computer Science-Physics program, the student must have a minimum grade of "B" in: PHYS 1050 (or "B+" in PHYS 1020), PHYS 1070, MATH 1300, MATH 1500 (or equivalent), MATH 1700 (or equivalent), and COMP 1020.

To enter the Joint Honours Chemistry-Physics program, the student must have a minimum grade of "B" in: PHYS 1050 (or "B+" in PHYS 1020), PHYS 1070, CHEM 1300, CHEM 1310, MATH 1500 and MATH 1700.

Double Honours

The Department of Physics and Astronomy offers a double honours degree in conjunction with the Biochemistry program.

Four Year Major

The goal of this program is to provide an excellent physics education for a student with broad interests. It provides more control over the degree program, permitting significantly more electives and scheduling flexibility.

To enter the four year Major program in Physics and Astronomy, a student must have PHYS 1050 (C+) or PHYS 1020 (B), and PHYS 1070 (C+), MATH 1500³ and MATH 1700³ with a minimum grade of "C" and an average of "C+" on these two courses. In addition, students must have satisfied the faculty requirements for entry to the four year Major program.

Three Year General

As prescribed with all other faculty regulations in Section 3.2, students in this program must select 36 credit hours of 2000 and (or) 3000 level courses from **two** Science departments. To satisfy the requirement in the Department of Physics and Astronomy, students must select a minimum of 18 credit hours from the list in the chart below.

Variations in any of the programs listed above may be possible, but must be approved by the head of the department and the Science general office.

4.11.3 Physics and Astronomy Course Descriptions

Note: Students failing to obtain a minimum grade of “C” in any course stipulated as a prerequisite to a further course in Physics and Astronomy are not allowed to proceed without written consent from the instructor.

PHYS 0900 Preparing for University Physics Cr.Hrs.0 (Formerly 016.090) A review of elementary physics, emphasizing the laws of mechanics, for students considering enrolling in a first-year university physics course. Mathematical techniques used in solving physics problems and the relevance of physics to everyday life will be stressed. Although this course may be used as part of the prerequisite requirements for first-year Physics courses, students are encouraged to take Physics 40S whenever possible.

PHYS 1020 General Physics 1 Cr.Hrs.3 (Lab Required) (Formerly 016.102) It's a crazy world; come and find out why objects fall, slide, bounce, stick, go in circles or stay straight, float or sink, glide or crash. Why don't satellites fall to the ground? What exactly does weightlessness mean anyway? Find answers to these and other questions as you get to know Newton's and other basic laws of nature and see what makes the world go round. This course, together with the sequel PHYS 1030 (or 016.103), is recommended for students seeking either a single, comprehensive course in Physics or entry into health science programs. It may also be used for entry into the Honours Physics program (“B+” or better) or the Major Physics program (“B” or better). Not to be held with PHYS 1021, PHYS 1050, PHYS 1051 (016.105), PHYS 1410 (016.141), PHYS 1420 (016.142), or the former 016.127. *Prerequisites:* Either Physics 40S, PHYS 0900 (016.090) (P), or equivalent; and either Pre-calculus Mathematics 40S, Applied Mathematics 40S (with 70% or better), or equivalent. It is strongly recommended that students attain a minimum of 70% as the average of their marks in Physics 40S and Pre-calculus Mathematics 40S.

PHYS 1030 General Physics 2 Cr.Hrs.3 (Lab Required) (Formerly 016.103) Discover how physics is the basis of the hi-tech world we live in and how we live in it. Learn how to use simple, intuitive physics concepts that are described using little math and no calculus to understand a diversity of topics including how electricity is made, what drives the greenhouse effect, what makes a diamond sparkle, lasers, LASIC eye surgery and the workings of the human eye. This course, together with its prerequisite PHYS 1020 (016.102), is recommended for students seeking either a single comprehensive course in Physics, or entry into health science programs. Not suitable for entry to Major or Honours in Physics. This course may not be held with PHYS 1031, PHYS 1410 (016.141), PHYS 1420 (016.142), or the former 016.120. *Prerequisite:* One of PHYS 1020, PHYS 1021 (016.102) (C), PHYS 1050, or PHYS 1051 (016.105) (C).

PHYS 1050 Physics 1: Mechanics Cr.Hrs.3 (Lab Required) (Formerly 016.105) It's rocket science! Mechanics is the science of describing (Kinematics) and explaining (Dynamics) motion. The basic concepts of calculus together with the laws of conservation of momentum and energy are used to develop the tools required to describe, analyze and predict the outcomes of linear and rotational motion in simple mechanical systems. A brief introduction to the Einstein theory of special relativity provides a taste of modern approaches to this subject. This course develops a strong scientific foundation for students considering a program of study in engineering or the physical sciences. Not to be held with PHYS 1020, PHYS 1021 (016.102), PHYS 1051, PHYS

1410 (016.141), PHYS 1420 (016.142), or the former courses 016.118, 016.120, or 016.127. *Prerequisites:* Pre-calculus Mathematics 40S (300) (or equivalent) and Physics 40S (300) (or equivalent); or PHYS 0900 (016.090) (Pass). It is strongly recommended that students attain a minimum of 80 per cent as the average of their marks in Physics 40S (300) and Pre-calculus Mathematics 40S (300). *Prerequisite or concurrent requirement:* One of MATH 1500, MATH 1501, MATH 1510, MATH 1520, the former 136.153 or MATH 1690.

PHYS 1070 Physics 2: Waves and Modern Physics Cr.Hrs.3 (Lab Required) (Formerly 016.107) At the heart of modern communications, waves and oscillations are key to understanding the world around us from subatomic scales to biology, traffic flow, the stock market, climate change and the cosmos itself. Learn about the mysterious quantum world, the basis of the latest nanotechnology, where particles are waves and waves are particles. Explore Bohr's model of the atom and discover Heisenberg's Uncertainty Principle. This calculus based course addresses the underlying concepts for all modern science and engineering. This course, like Physics 1 (PHYS 1050), is intended for students considering a program in the physical sciences. Not to be held for credit with PHYS 1071, PHYS 1410 (016.141), PHYS 1420 (016.142). *Prerequisites:* PHYS 1050 (or equivalent - PHYS 1051, 016.105, 016.118) (C) or PHYS 1020 (or equivalent - PHYS 1021, 016.102) (B); and “C” or better in one of MATH 1500, MATH 1501 (136.150), MATH 1510 (136.151), MATH 1520 (136.152), or the former 136.153. *Prerequisite or concurrent requirement:* one of MATH 1700, MATH 1701, MATH 1690, MATH 1710, or the former 136.173.

4.12.1 Program Information

Psychology is the scientific study of behaviour and mental processes, including the biological bases of behaviour and cognitive processes, and behavioural and cognitive neuroscience. The Honours and Major programs combine courses in Psychology with related courses in Science. Courses from the Faculty of Arts are included in this program. The Faculty of Science offers programs leading to a B.Sc. (Honours) degree in Psychology and a B.Sc. (Major) degree in Psychology.

Honours

To enter the Honours program, students must have obtained a grade of "B+" or better in PSYC 1200 (or in both PSYC 1211 and PSYC 1221) and a grade of "B" in six credit hours in courses offered by the Faculty of Science. In addition, students must have obtained a Grade Point Average of 3.25 or better on their first 24-30 credit hours and have no failed courses. Introductory courses in Biology, Chemistry, Computer Science, Mathematics, Statistics or Biological Sciences (Zoology) are highly recommended.

To continue in the Honours program, a student must register in a minimum of 9 credit hours in each Fall and Winter Term and must meet all of the continuation criteria of the Faculty of Science. In addition, students must maintain a minimum Degree Grade Point Average of 3.25 based on all courses in the program. Students who do not meet the minimum continuation requirement will be required to withdraw from the Honours program.

The department must approve a student's Honours program for each session. All revisions to the program must also have prior approval from the Associate Head (Undergraduate) or the Undergraduate Advisor.

To graduate, a student must obtain 120 credit hours of courses with grades of "C" or better in each course and with a minimum grade point average of 3.25 on the 120 credit hours that contribute to the degree. In addition, students must complete the program of study in the chart below.

Four Year Major

To enter the Major program, students must normally have obtained a grade of C+ or better in PSYC 1200 (or in both PSYC 1211 and PSYC 1221) and in six credit hours in courses offered by the Faculty of Science and meet the Faculty of Science requirements for entry to the Major program. Introductory courses in Biology, Chemistry, Computer Science, Mathematics, Statistics or Zoology are highly recommended.

To continue in the Major program, a student must meet all of the continuation criteria of the Faculty of Science. This includes maintaining a minimum Cumulative Grade Point Average of 2.00 at each point of assessment (2.00 DGPA for Second Degree and Start Afresh students), and no more than 18 credit hours of failing grades after entry to the program. Students who do not meet the minimum continuation requirement will be required to withdraw from the Major program. The department must approve a student's Major program for each session. All program revisions must also have prior approval.

To graduate with the degree of Bachelor of Science (Major), a student must complete 120 credit hours of courses with passing grades (D or better) in each course, with a minimum Degree Grade Point Average of 2.00. In addition, the student must complete the program of study as listed in the program chart below.

4.13.1 Program Information

Statistics is a discipline grounded in mathematics that has practical applications in many other areas. Statistics is an analytical discipline that helps other disciplines carry out research projects and studies that involve measurement, comparison, and interpretation. Statistics is a useful ancillary subject to other sciences, the social sciences, and many of the professional programs. The department offers joint programs with Mathematics, Economics and Actuarial Mathematics.

Honours Requirements

Students will normally take STAT 2000 and STAT 2400 in Year 2 and enter Honours in Year 3.

To enter the Honours program students must have a "B" or better in STAT 2000 and STAT 2400 and either: an average grade of "B" or better with a minimum grade of "C+" in each of MATH 1500² and MATH 1700²; or a minimum grade of "C+" in MATH 1690.

To continue in the Honours program a student must achieve a Degree Grade Point Average of 3.00 or better at each point of assessment. A student must have either a grade of "C+" or better in MATH 2750 (6) or a grade of "C+" or better in each of MATH 2720 and MATH 2730. Students must complete a minimum of 9 credit hours during each Fall and Winter Term.

To graduate with the B. Sc. Honours degree, a student must achieve a minimum DGPA of 3.00 and a minimum grade of "C+" in each of the Honours Program Specific courses (see below), and a minimum grade of "C" on all remaining courses that contribute to the 120 credit hours of the degree.

Honours Program Specific courses

All courses specified in the program charts below (excluding the required optional courses and electives).

The department must approve a student's Honours program each session. Students must obtain departmental approval for any and all revisions to their programs.

Four Year Major Requirements

The B.S.W. program intends to provide students with knowledge and skills necessary for professional preparation for generalist practice in a variety of

social work fields. The B.S.W. program is the only program in Manitoba accredited by the Canadian Association for Social Work Education, and graduates are eligible for acceptance into schools of graduate studies. The B.S.W. degree is accepted as a professional degree by the Manitoba Institute for Registered Social Workers, by the Manitoba Association of Social Workers, and by the Canadian Association of Social Workers, and holders of the degree are eligible for membership to these organizations.

SECTION 2: Admission Requirements

Bachelor of Social Work

The following is a summary of the admission requirements to the Bachelor of Social Work. Equivalent academic courses completed at recognized universities elsewhere will be considered. All admission requirements, as well as application deadline dates and forms, are included in an applicant information bulletin that is available from the Admissions Office, Enrolment Services, 424 University Centre; this information is also posted on the university's website.

2.1 Admission to the Fort Garry Social Work Program

Admission Requirements

Completion of 30 credit hours of university level courses which are acceptable to the University of Manitoba.

The written English and mathematics requirements are recommended to be completed as part of University 1. If these requirements are not met in University 1 (i.e. the first 30 credit hours) they must be completed prior to graduation.

Minimum GPA for consideration for all applicants (including Educational Equity applicants): 2.5

A Criminal Record Statement and a Child Abuse Registry (CAR) check (for a record of those registered as an offender) must be completed following selection.

Selection criteria: Two applicant pools are created; with 60% of all spaces are allocated to applicants with the highest grades, and 40% of all spaces are allocated to applicants based on the Education Equity initiative.

Concentrated Program

All applicants wishing to complete the program in two years of full-time study must have completed a minimum of 51 credit hours of university study (which are acceptable to the University of Manitoba) prior to admission to the BSW program. Of the 51 credit hours of university study, 21 credit hours must not be older than ten years to qualify for the two year concentrated program. Applicants wishing to complete the degree through the two year concentrated program must have an Adjusted Grade Point Average of 3.00 from all previous university study. In the event that three credit hours in each of written English and mathematics have not been completed as part of the 51 credit hours of previous university study, they must be completed within the first year of the two-year program.

The Selection Process

The selection process is designed to accomplish three objectives: to treat applicants fairly and equitably, to provide the diversity of practitioners required by the profession, and to provide for an efficient admissions process. The faculty selects applicants to the Fort Garry Campus B.S.W. program through two categories as described below.

Academic Achievement Category: 60% of all available positions are awarded on the basis of highest Adjusted Grade Point Average.

Educational Equity Initiative: 40% of all available positions are allocated to those eligible for inclusion in one or more of the Educational Equity Priority Groups and awarded on the basis of highest Adjusted Grade Point Average.

The purpose of the Educational Equity initiative is to achieve equality in professional education so that no person shall be denied educational opportunities or benefits for reasons unrelated to ability. In the fulfillment of this goal, the aim is to correct the conditions of disadvantage in professional education experienced by Aboriginal peoples, persons with disabilities, gender and sexual minorities, immigrants and refugees to Canada, and persons who are, because of their race or colour, a visible minority in Canada. Giving effect to the principle of educational equity means more than treating persons in the same way; it also requires special measures and the accommodation of difference. Details of the Educational Equity initiative are provided in the application information bulletin.

Students in the Fort Garry Social Work Program must successfully meet the graduation criteria set for all BSW students in the Faculty of Social Work.

2.2 Admission to the Inner City Social Work Program

The Inner City Social Work (B.S.W.) ACCESS Program at the William Norrie Centre is an inner-city extension of the Faculty of Social Work. Students admitted to the centre are accepted directly into a four-year B.S.W. program, and do not require prior university study.

The objective of this program is to enhance the accessibility of the B.S.W. program by preparing as social workers those mature students who have had inner-city or similar social service experience, but who lack the normal university entrance requirements. Special academic and social support is

provided to students admitted to the program. Staff assists candidates in arranging funding resources.

All students complete a total of 123 credit hours of university study. Full time or part-time study is offered.

Admission to the centre is limited. Applicants to the full-time program must be 21 years old, low income, and residents of Winnipeg at the time of application. The deadline date for submitting applications is early February.

A part-time B.S.W. Access program is offered to individuals who meet the above criteria, work for a Winnipeg or Aboriginal agency, and/or have two years employment in human service fields. Deadline for applications for part-time studies is mid January.

Students at the centre must successfully meet the graduation criteria set for all BSW students in the Faculty of Social Work. For further information, contact: Inner City Social Work Program, 485 Selkirk Avenue, Winnipeg, Manitoba, R2W 2M6; telephone: (204) 668-8160.

All students complete a total of 123 credit hours of university study. Full time or part-time study is offered.

The objective of this program is to enhance the accessibility of the B.S.W. program by preparing as social workers mature students who, without the support of the program, would be unable to successfully complete a university degree due to lack of financial resources, lack of academic qualifications, remote location, and cultural barriers. Special academic and personal support is provided to students admitted to the program, as well as some assistance in arranging funding resources.

Students who have completed 30 credit hours of university level courses and have a minimum GPA of 2.5 may apply as External Students.

2.4 Admission to the Distance Delivery Social Work Program

The Faculty of Social Work remains committed to the accessibility of social work education. The faculty has extended the concept of accessibility to include geographical accessibility through the delivery of the B.S.W. based on two approaches: (1) to individuals by means of an independent study program and (2) to community-based groups using the cohort method.

The Distance Delivery B.S.W. program is intended to target individuals who are employed in the social services and living outside of Winnipeg, but who may not have had the opportunity to pursue professional social work education.

All students complete a total of 123 credit hours of university study. Full time or part-time study is offered.

Delivery methods for the independent study component of the program include a combination of audioconference sessions and online independent study manuals. Access to high speed internet is required.

All course examinations are scheduled and arranged by the university's Registrar's Office to take place in the student's community.

Delivery of the program to the community-based cohorts utilizes the face-to-face delivery with the option of a combination of face-to-face and independent study.

Applicants to the Distance Delivery B.S.W. program must meet all three of the following requirements to be admitted into the program:

- A minimum of two years of social service related work experience, within the last five years;
- Residency outside of Winnipeg;
- The university admission requirements for either a regular student or a mature student.

Complete and detailed admissions information is available on our web site at umanitoba.ca/faculties/social_work or by calling the Faculty of Social Work Distance Delivery BSW Student Advisor at (204) 474-6070.

The provisions of the chapter, General Academic Regulations and Requirements, and the chapter, University Policies, apply to all students. In addition, the Faculty of Social Work has regulations and requirements, published below, that apply specifically to its students.

3.1 Prerequisite and Corequisite Policy

The faculty has established a set of pre-/corequisite requirements to assist students in planning their program of study.

All students must abide by the pre- and corequisite requirements for all courses.

Any exceptions to the pre- and corequisite policy MUST be approved by the Committee on Academic Standings prior to course registration. Should a student violate the pre- and corequisite policy, credit(s) for the course(s) will be deleted from the student's academic record. For detailed information, please refer to the B.S.W. Student Handbook.

3.2 Residence Requirements for a Degree Program

The general university residence requirement applies to the Faculty of Social Work. See Section 2, in the chapter, General Academic Regulations and Requirements.

3.3 Scholastic Progress

Except in circumstances covered in the official regulations referred to below, clear standing in the faculty requires both the Degree Grade Point Average and Subject Grade Point Average of 2.5 (C+) at the end of each academic session. A minimum grade of 2.0 (C) is required for all Social Work courses. The passing grades for electives taken in other faculties or schools are those required by the faculties or schools concerned. Complete statements of the regulations governing scholastic progress in the Faculty of Social Work are published in the B.S.W. Student Handbook. Students wishing to do so may consult the policy governing scholastic progress as written in the B.S.W. Student Handbook with the Chair of the Committee on Academic Standings, or the Dean. In the event of any question or dispute, this set of regulations shall be considered the official version. Directors of off-campus programs and the Student Services and Admissions/Advising Office at Fort Garry Campus will advise students on issues concerning scholastic progress.

3.4 Professional Unsuitability Bylaw

The Senate has approved a bylaw granting authority to the faculty to require a student to withdraw for reasons of professional unsuitability (see the chapter, General Academic Regulations and Requirements, Section 6.2.3.). The bylaw is published in the B.S.W. Student Handbook. Students are reminded of their obligation to be familiar with all regulations governing their continued progress in the program.

3.5 Dean's Honour List

BSW student eligibility for the Dean's Honour List is considered on a term by term basis. To qualify for the Dean's Honour List a student must:

- Have completed a minimum of 9 credit hours in the term under consideration, of which a minimum 6 credit hours must be with a standard grade.
- and
- Have achieved a minimum Term GPA of 3.6
- Pass/Fail courses are included in the credit hour count.

3.6 Appeal of Grades

The general university policy for appeal of assigned grades applies to the Faculty of Social Work. As well, the Faculty Council has approved a Social Work policy on the appeal of assigned grades and term work. The policy is outlined in the B.S.W. Student Handbook. The Faculty Council has established the Academic Standing Appeals Committee to deal with these matters.

3.7 Distance Courses Open to Fort Garry Campus and Inner City Social Work Students

Information on granting credits for social work courses is available in the B.S.W. Student Handbook.

The Faculty of Social Work has articulated agreements with specific diploma and certificate programs. Please consult the B.S.W. Student Handbook for detailed information.

4.2 Field Instruction

Students are expected to register for two courses in field, SWRK 3150 and SWRK 4120. Courses are taken when students have completed the prerequisites and are in the appropriate year of their degree plan. Field courses each have a corequisite, which is SWRK 4200 Field Focus of Social Work Practice 1 for SWRK 3150 Field Instruction 1 and SWRK 4300 Field Focus of Social Work Practice 2 for SWRK 4120 Field Instruction 2. The Field Focus course selected should correspond with the field placement area of practice. Students wishing to divert from their degree plan should consult the Coordinator of Student Services and Admissions/Advising Office before February 1. Forms requesting confirmation of student plans to take field instruction in the following year will be distributed in the winter term. Students must request a field placement by completing a field section form at least 75 calendar days prior to the term that they will commence field. Students requesting a summer field placement must request the field placement at least 40 calendar days prior to summer field start. Students who do not meet the deadline cannot be guaranteed a field placement in that term.

Field Instruction in both SWRK 3150 and SWRK 4120 consists of participation in the field placement two days per week, both terms (16 hours per week). Field Instruction in the concentrated program constitutes four days per week (32 hours) in both terms at one placement. Students contemplating switching to a concentrated field placement are required to make themselves aware of eligibility requirements for this program and contact the Coordinator of Student Services and Admissions/Advising Office for confirmation of their eligibility no later than February 1. Only when this is resolved are they eligible to select this field option.

Section 5: Course Descriptions

SWRK 1310 Introduction to Social Welfare Policy Analysis Cr.Hrs.3 (Formerly 047.131) Examination of social welfare policy as the end product of ideologies. Introduction of elements of ideology and the comparison of competing ideological systems.

The Field Instruction program will provide the student with opportunities to learn first hand how to provide professional practice in a variety of social service agencies. The program provides an educationally focused experience in delivering progressively more demanding and complex professional social work interventions.

Field Instruction will be provided by university-appointed field instructors who may be agency-based or university-based, and who have knowledge, skills, and expertise in generic principles that can be applied to a wide range of fields of practice. The method of instruction will include individual and may include group seminars designed to assist the student to integrate theory with practice. This instruction is provided on a weekly basis. Field liaisons are available for student support, if necessary.

Active participation by the student is expected in all phases of Field Instruction including orientation conducted in their individual agency placements at the beginning of the academic year. Students absent due to illness or other reasons must contact the Field Instructor or Field Coordinator.

Students may be placed in a variety of agencies or departments. These include: school, probation, child and family services, health and mental health settings, occupational social work, those with a disability focus, and ethnically specific services. These settings provide experience in using a variety of intervention skills with individuals, families, groups, communities and policy initiatives. Every effort will be made to place students registering in SWRK 4120 (the final year of their field program) in a setting related to their field of interest. Final authority for field placement location, however, rests with the Field Coordinator. Decisions may be based on availability of agency openings, as well as on the educational needs of students. Students are expected to assume responsibility for any transportation expenses required for travel to and from the agency sites in which they are taking their Field Instruction course.

All students registered in Field Instruction courses (SWRK 3150 and SWRK 4120) are required to attend Field orientation on Tuesday, September 7, 2010 and Wednesday, September 8, 2010. As attendance at Field orientation is mandatory, Field students are not required to attend classes on the 8th and 9th. Information regarding Field orientation will be mailed to each Field student in late August. If more information is required, contact the Field Coordinator at (204) 474-8300.

Students are allowed one voluntary withdrawal from the course SWRK 3150 Field Instruction 1 and one voluntary withdrawal from the course SWRK 4120 Field Instruction 2. If a student withdraws from SWRK 3150 he/she must withdraw from SWRK 4200 and if a student withdraws from SWRK 4120 he/she must withdraw from SWRK 4300. Students who fail to withdraw from the corequisite course(s), will be withdrawn.
