Aurora Student will not prevent a student from registering in two (or more) courses that are designated not to be held for credit with one another. It is the student's responsibility to ensure that they are not registered for courses that are ineligible to be held for credit with one another. Read the course descriptions carefully. If you are unsure about a course you have selected, check with a Riddell Faculty [student advisor](#) prior to the [revision deadline](#). No academic concessions will be granted in this regard.

Have you been away for a While?

Students who have been away from the Riddell Faculty for more than a year cannot use Aurora Student until they have consulted a Riddell Faculty student advisor. Students who have attended another post-secondary institution since their last registration at the University of Manitoba must normally re-apply for admission.

SECTION 4: Department of Environment and Geography

SECTION 4: Department of Environment and Geography ,

4.1 Academic Staff,

Please refer to the Clayton H. Riddell Faculty of Environment, Earth, and Resources [Academic Staff](#) website.

4.2 Undergraduate Programming in the Department of Environment and Geography,

The fields of study in this department can be divided into four overlapping areas: environmental sciences, environmental studies, human geography and physical geography. These areas are built on a diverse range of academic frameworks or foundations, including: natural, physical and social sciences, education, law, agriculture, management, medicine, humanities and architecture.

Environmental Science applies scientific knowledge from many disciplines to issues and questions relating to an increasing human population, the sustainability of resource use, degradation caused by pollution and disturbance, and the endangerment and extinction of species and natural systems. Environmental Studies applies the theory and practice of group and organizational communication, understanding public policies and programs that underscore environmental concerns, and the need to integrate diverse social, institutional, political and legal considerations inherent in attaining environmental objectives. (Students have the opportunity to focus advanced studies in one of several areas, defined through consultation with a [Riddell Faculty student advisor](#).)

"Human Geography examines how people have been influenced by the environment and how, in turn, they have left their mark on the environment," Dr. Daniel Todd, Human Geographer. Students may choose to focus their studies into one of several areas including *Human-Environment Relations, Urban and Rural Development, Social Cultural Geography, Population, Resources and Development, and Area Studies*.

Areas of physical geography include the study of the environment through aspects of atmospheric science, geomatics, biogeography, and hydrology. Streams are currently available in *Atmospheric and Hydrological Sciences, Geomatics* (an emerging subfield, referring to the techniques of spatial data acquisition, handling and analysis) and *Physical Geography*.

Potential careers for graduates of these programs include a diverse array of possibilities in the natural sciences, social sciences, or a combination of both. Graduates are poised to assume positions where they identify and analyze the local, regional, national, and global patterns that shape our lives. As well, technical skills such as geographic information systems and remote sensing are demanded in several of the environmental sectors. Graduates of these programs can expect to enter the workforce in private, government, research, or not-for-profit sectors.

4.3 Cooperative Education Option,

A [Cooperative Education Option](#) is available to students registered in either the Major or Honours degree programs in Environmental Science, Environmental Studies, or Physical Geography. Coop is an arrangement whereby students spend alternating periods in university and employment. There are several advantages to a cooperative education program for students. One benefit is that students are able to acquire both theoretical knowledge and practical experience. This experience assists them in selecting areas of specialization for their senior courses in their chosen Stream. As well, Coop assists students in their professional development by enhancing networking opportunities, participation in conferences and workshops and provides the foundation of skills and strategies required in searching and acquiring employment after graduation. Students can also defray some of the costs of their university education through these work term placements. Further information about Cooperative Education and student eligibility is available from a [Riddell Faculty student advisor](#) available in the Faculty general office.

Students electing to participate in the Cooperative Education Option will be assessed a program fee with their formal admission into the program. Once a student has accepted a position with a Coop employer, no portion of the program fee will normally be refunded.

The Cooperative Education Option consists of two employment work terms, each over a minimum period of four months, and contributes 6 credit hours towards the four year degree program. Students complete ENVR 2900 Professional Development 1 (1.5), ENVR 3900 Professional Development 2 (1.5), work term placements ENVR 3980 Work Term 1 (0), ENVR 3990 Work Term 2 (0), and the work term report courses ENVR 3910 Work Term Report 1 (1.5) and ENVR 3920 Work Term Report 2 (1.5). Additional work terms are available to interested students. Each academic term and each employment term commence in January, May or September. While on an employment term, a Cooperative Education Option student is not permitted to take more than three additional credit hours of academic work outside of the requirements of the Coop placement without permission of a [Riddell Faculty student advisor](#).

Students are required to register in the appropriate Coop courses and pay course fees prior to beginning their placement.

For more information, please visit the [Riddell Faculty Co-operative Education Program](#) webpage.

SECTION 5: Bachelor of Arts in Geography Degree Regulations, Program Description and Courses Offered by

SECTION 5: Bachelor of Arts in Geography Degree Regulations and Program Description

SECTION 5: Bachelor of Arts in Geography Degree Regulations, Program Description and Courses Offered by,

5.1 Program Information

5.1 Program Information,

There are four broad categories of courses in the Geography discipline: **physical** geography is concerned with physical features on and over the globe; **human** geography examines the products of human activity; **regional** geography attempts to achieve a synthesis of physical and human geography of a particular place; and **techniques** in geography focus on analytical methods.

The attraction of Geography as a discipline lies in its diverse interests and approaches to knowledge building while being centred on the fundamental concepts of human-environment relations, location/place and space/ distance. Geographers see the world and want to know how physical processes and systems shape the land, air, water, flora and fauna around them and how these are influenced by human activity. We want to know how human societies, cultures, and economies work and how these human systems are interdependent with each other and with natural systems. We work at a variety of geographic scales, from the micro-scale of local communities and regions, through the macro-scale of global human and physical systems. Geography embraces the study of topics as wide-ranging as: weather and climate, population distribution, agricultural systems, globalization, landforms and geomorphology, environmental perceptions, health and healthcare, and biogeography. Therefore, by selecting courses from within the department, as well as complementary courses from other academic units of the University, students can develop fascinating, focused and challenging degree programs that will prepare them for careers in a variety of areas.

The General degree in Geography provides students with a basic level of understanding of the discipline and its inter-relationships. **This degree is also a useful consideration for students planning to complete the After-Degree Bachelor of Education program (see the [Faculty of Education](#) chapter of this *Calendar*).** The General degree program may be completed entirely by Distance Education (see the Distance Education Guide for further details). The Advanced degree program in Geography provides opportunities for students who desire a broad geographical education along with a reasonable degree of specialization in a particular field of Geography. Students planning a professional career or a high degree of specialization in Geography are strongly advised to enter the Honours degree program. The Honours degree demands the highest scholastic performance of all programs available. Students are strongly advised to enter an Honours degree program with their admission to the Bachelor of Arts in Geography. Consultation with the department head is also advised.

Structure of the B.A. Geography Degree Program

The structure of the B.A. Geography degree is summarized as follows:

A **Geography (Major)** component that varies in credit hour requirement depending on the degree program; 30 credit hours in the General; 54 credit hours in the Advanced; and 72 credit hours in the Honours. Students are not permitted to declare a second major.

Advanced and General degree students must complete a **Minor** in a subject field that is different than that of the declared major, and may be chosen from one of the other programs in the Clayton H. Riddell Faculty of Environment, Earth, and Resources. Students in the B.A. Geography are not permitted to complete a Minor in Physical Geography. The Minor requirements are described in [section 3.2](#) of this *Chapter*. Contact a [Riddell Faculty student advisor](#) in the Faculty general office for further information about eligible Minors.

Students must complete 5 subject fields with 6 credit hours in each (30 credit hours). For example: 6 credit hours in Geography, plus 6 credit hours in Environmental Science, plus 6 credit hours in Geological Sciences, plus 6 credit hours in Anthropology, plus 6 credit hours in Native Studies.

Students must also complete 6 credit hours in Humanities and 6 credit hours offered by the Faculty of Science.

Humanities

For course subjects taught by the Faculty of Arts that can be used towards the Humanities requirement, refer to the *Chapter* for the [Faculty of Arts, Additional Faculty Regulations and Policies section](#). Music (i.e. all courses listed for Advanced Major and Minor programs except ensemble courses) and History of Art (i.e. all courses listed with course prefix FAAH) may also be eligible courses. Students should see a [Riddell Faculty student advisor](#) for further information.

Note: Students can satisfy the requirement for a Humanity, and/or Arts, or Science and at the same time satisfy the Written English or Mathematics requirement and one of the 5 subject fields required with the same 6 credit hours of courses.

The qualifications of the degree programs are summarized as follows:

General

To qualify for the degree Bachelor of Arts in Geography, students must complete 90 credit hours including: all course requirements in their Geography General Major; a chosen minor field; the requirements in the five subject fields; and areas of Humanities and Sciences. As well, students must satisfy the Riddell Faculty regulations outlined in [section 3](#) of this *Chapter*. Minimum performance requirements include passing grades ('D' or better) in each course and a minimum degree Grade Point Average of 2.00 on Geography courses as well as the 90 credit hours that constitute the degree. Students cannot exceed 48 credit hours of failed courses.

Advanced

To qualify for the Bachelor of Arts in Geography (Advanced) degree, students must complete 120 credit hours including: all courses and performance requirements in their Geography Advanced Major; a chosen minor field; the requirements in the five subject fields; and areas of Humanities and Sciences. As well, students must satisfy the Riddell Faculty regulations outlined in [section 3](#) of this *Chapter*. Minimum performance requirements include passing grades ('D' or better) in each course and a minimum degree Grade Point Average of 2.00 on Geography courses and the 120 credit hours which constitute the degree. Students cannot exceed 18 credit hours of failed courses.

Honours

To qualify for the Bachelor of Arts in Geography (Honours) designation, students must complete 120 credit hours including: all course and performance requirements; the requirements in the five subject fields, and the areas of Humanities and Sciences. As well, students must satisfy the Riddell Faculty regulations outlined in [section 3](#) of this *Chapter*. Minimum performance requirements include passing grades ('D' or better) in each course and a minimum degree Grade Point Average of 3.00 on Geography courses and the 120 credit hours which constitute the degree. Students cannot exceed 18 credit hours of failed courses.

5.2 Entrance Requirements

5.2 Entrance Requirements

Students are required to attain a minimum degree Grade Point Average of 2.00 based on the Degree Standards Table in [Section 5.2.2](#) to be eligible for admission to the B.A. in Geography. Students who are admitted will be placed in the General degree program. Students may be eligible for transfer to either the Advanced or Honours degree program provided they satisfy the entrance requirements defined in 5.2.1. To enter the Advanced or Honours degree program, a student must consult with a [Riddell Faculty student advisor](#) in the Faculty general office.

5.2.1 Entrance Requirements				
Degree Program in B.A. Geography	Minimum Number of Credit Hours	Minimum Degree Grade Point Average	Maximum Credit Hours of Failed courses	Additional Entrance Requirements
General	24	2.00 ¹	48	grade of 'C' in each of GEOG 1280 and GEOG 1290 ²
Advanced	24	2.00	18	grade of 'C' in each of GEOG 1280 and GEOG 1290 ²
Honours	24	3.00	18	grade of 'B' in each of GEOG 1280 and GEOG 1290 ² or a GPA of 3.00 or better in all Geography courses

¹Minimum Grade Point Average for entrance into the General degree program is determined using the Degree Standards Table in 5.2.2.

²GEOG 1281 and GEOG 1291 may be used in lieu of GEOG 1280 and GEOG 1290, respectively.

5.2.2 Grade Point Average Calculation for Entrance and Continuation

General degree students in the B.A. Geography must attain a minimum 2.00 Grade Point Average at each point of assessment. The Degree Standards Table listed below is used to determine a student's eligibility for admission to the Riddell Faculty as well as evaluate a student's performance after each term.

5.2.2 Degree Standards Table	
Credit hours	Minimum Degree GPA
24-30	1.80
33-45	1.85
48-60	1.90
63-75	1.95

78-90	2.00
93+ hours	2.00

5.3 Minimum Performance Requirements

5.3 Minimum Performance Requirements

A student's academic performance is assessed first with his/her application for admission to the Riddell Faculty and then following each *term* in which the student is registered in more than 4.0 credit hours. To be in **good standing** and permitted to continue in a degree program, a student must achieve the minimum standards outlined for his/her degree program at each point of assessment. For General degree students, this includes the Degree Standards Table outlined above in [5.2.2](#), as well as the requirements outlined in [5.3.1](#). Students in the Advanced and Honours degrees are required to satisfy the requirements listed in [5.3.1](#). Minimum academic performance is based on the degree Grade Point Average and number of failed courses. Prior to each registration, Advanced and Honours degree students must have their course selections approved by a [Riddell Faculty student advisor](#). Students may not make any subsequent changes without receiving prior written permission.

To graduate with a B.A. Geography with the intended degree designation, a student must achieve the minimum performance standards and graduation requirements outlined in [5.3.1](#), following their last *term of registration* and satisfy all faculty and degree requirements in Geography as defined in sections [5.3.1](#), and [5.5](#) of this *Chapter*.

Students in the Honours and Advanced degree programs who do not meet these minimum performance requirements will be withdrawn from their existing program and placed in the Advanced and General degrees respectively. Students who do not meet the minimum performance requirements for the General degree program will receive an academic warning, be placed on probation or academic suspension as defined in section [3.14 Academic Warning, Probation and Academic Suspension \(Academic Standing\)](#) in this *Chapter*. Students withdrawn from the Honours degree program may be eligible to enter the Advanced program and are required to obtain permission from a [Riddell Faculty student advisor](#).

Students withdrawn from the Honours degree program will have the notation, 'Required to Withdraw from the Honours Program', recorded on their transcript of marks. Similarly, students withdrawn from the Advanced program will have the notation, 'Required to Withdraw from the Advanced Program', recorded on their transcript of marks.

5.3.1 Minimum Performance Requirements for Continuation and Graduation					
Degree Program (Cr. Hrs.)	Minimum Performance Requirements			Additional Graduation Requirements	
	Minimum Degree Grade Point Average (GPA)	Maximum Cr. Hrs. Failed Courses	Minimum Degree GPA in Geography Courses ³	Geography Courses Cr. Hr. Requirement (see 5.5 also)	Residence Requirement (Cr. Hrs.) (see section 3.10 also)
General ^{2,3} (90)	2.00; see 5.2.2 for continuation	48	2.00	30	48 cr. hrs. total or the final 30 cr. hrs.
Advanced ^{1,2,3} (120)	2.00	18	2.00	51	60
Honours ^{2,1} (120)	3.00	18	3.00	69	60

¹The courses required in this program will satisfy the [university mathematics](#)

[requirement](#).

²Within the first 60 credit hours of courses, students must have completed 6 credit hours in each of 5 subject fields (totalling 30 credit hours). See section 5.1 for details.

³General and Advanced degree students are required to maintain a Degree Grade Point Average of 2.00 on the courses defining their Geography Major. **Note:** Students must complete all prerequisite courses with minimum 'C' grades.

5.4 Graduating with Distinction or First Class Honours

5.4 Graduating with Distinction or First Class Honours, With Distinction

Students graduating with a B.A. Geography (General) degree will have their degree granted 'With Distinction' if they have a minimum degree Grade Point Average of 3.80 and provided a minimum of 60 credit hours of acceptable course work is completed at the University of Manitoba.

Students graduating with a B.A. Geography (Advanced) degree will have their degree granted 'With Distinction' if they have a minimum degree Grade Point Average of 3.80 and provided a minimum of 90 credit hours of acceptable course work is completed at the University of Manitoba.

First Class Honours

Students in the Honours program will have their degree granted with 'First Class Honours' if they have a minimum degree Grade Point Average of 3.80 and provided a minimum of 90 credit hours of acceptable course work is completed at the University of Manitoba.

5.5 B.A. Geography Program Chart

GEOG 1280 and GEOG 1290 Plus 6 credit hours of Humanities ⁷ Plus 6 credit hours from the Faculty of Science	12 credit hours in Geography courses numbered at the 2000-level ⁵	12 credit hours in Geography courses numbered at the 3000- and/ or 4000-level ⁵	
It is recommended that students complete the W and M courses in University 1 or Year 2. Note: 30 credit hours, with 6 credit hours in each of 5 subject fields, must be completed in the first 60 credit hours.			
MINOR 18 CREDIT HOURS			
GEOG 1280 and GEOG 1290	6 credit hours in Geography courses numbered at the 2000-level	6 credit hours in Geography courses numbered at the 3000-level	

NOTES:

¹Entrance into the Honours and Advanced degree programs is summarized in [5.2.1](#). The courses required in this program will satisfy the University Mathematics requirement.

²Entry into the General degree program is summarized in [5.2.1 and 5.2.2](#).

³Ancillary options are chosen in consultation with the department head.

⁴Among the 2000- and 3000-level courses, at least 6 credit hours must be systematic and at least 6 must be area studies. Systematic courses and area studies courses are listed in [Section 5.6](#).

⁵Among the 2000- and 3000-level courses, at least 12 credit hours must be systematic and at least 6 must be area studies. Systematic courses and area studies courses are listed in [Section 5.6](#). Students wishing to transfer from the General to the Advanced degree program are permitted to take either GEOG 2200 and GEOG 2250, or GEOG 2530 in either third or fourth year.

⁶Equivalent courses offered through Collège universitaire de Saint-Boniface may be used in lieu of the specified courses identified in the degree program chart. Collège universitaire de Saint-Boniface courses end in the number "1" (e.g. GEOG 1281).

⁷May also satisfy the Faculty of Arts requirement.

Note:

Honours in Geography may be taken in combination with the program of Central and East European Studies (see the department head). Cross-disciplinary Minor programs are available using GEOG 3590 (Asian Studies program). In addition, courses GEOG 2900, GEOG 2570, GEOG 3480⁸ and GEOG 3900 may be used in combination with the Honours, Advanced, and Minor programs in Canadian Studies.

- To fulfil prerequisite requirements, a grade of "C" must be achieved, unless otherwise stated, in any course stipulated as a prerequisite to a further course.
- Students should review the current course topics available through GEOG 3740 (6), GEOG 3750 (3), GEOG 3760 (6), GEOG 3770 (3) and GEOG 4670 (3). Also, all courses are not offered every year or every term. The course schedule for the current academic term is available

from the [Class Schedule](#).

- Students registering in certain courses may be required to participate in field trips or field components and pay a portion of the associated expenses. For details, contact the [Department of Environment and Geography](#) general office.

5.6 Systematic Courses (HS, PS, TS) and Area Studies (A)

5.6 Systematic Courses (HS, PS, TS) and Area Studies (A) , Courses numbered at the 2000- and 3000-level are arranged into Systematics (PS, HS and TS) and Area Studies (A). B.A. Geography students may specialize in the Physical Geography (PS); Human Geography (HS); Techniques (TS); Area Studies (A) but it is not compulsory for them to do so. B.A. Geography students wishing to specialize in Physical Geography should take at least three options (18 credit hours) from courses designated 'PS'. B.A. Geography students wishing to specialize in Human Geography should take at least three options (18 credit hours) from courses designated 'HS'. Students should discuss these options with a [Riddell Faculty student advisor](#).

B.A. Geography students wishing to specialize in Applied Geography should include 2000-level courses from GEOG 2200, GEOG 2210, GEOG 2250, GEOG 2310, GEOG 2510, GEOG 2520, and GEOG 2530; and 3000-level courses from GEOG 3200, GEOG 3320, GEOG 3460, GEOG 3480W, GEOG 3520, GEOG 3540, GEOG 3580W, GEOG 3810M, GEOG 3710, GEOG 3720 and GEOG 3800.

Courses offered for the current academic term are published in the [Class Schedule](#) and can be searched by Attribute Type. To find Systematic (HS, PS, TS) courses search: 'Geography: Human', 'Geography: Physical' or 'Geography: Techniques'. To find Area Studies (A) courses search: 'Geography: Area Studies'.

5.7 Environment, Earth, and Resources Course Descriptions- 1000 Level EER 1000 Earth: A User's Guide

This course will present a multi-disciplinary introduction to the Planet Earth as both the source of essential resources and as the site of resulting negative impacts. Focus in the course will be provided by addressing important and current topics, case studies, and concepts that the well-educated citizen of the Earth should understand and will include natural and human-induced processes within a broad range of spatial and temporal scales.

5.8 Geography Course Descriptions-1000 Level

GEOG 1280 Introduction to Human Geography (Formerly 053.128) This course studies aspects of the human world: population, settlement and resources. Not to be held with GEOG 1200 or GEOG 1201 (053.120), or GEOG 1281.

GEOG 1281 Introduction à la géographie humaine (L'ancien 053.128) Étude des divers aspects du milieu humain: la population, l'habitat et les ressources naturelles. L'étudiant ne peut se faire créditer avec le GEOG 1280, ou GEOG 1200 ou GEOG 1201(053.120). Donné au Collège universitaire de Saint-Boniface.

GEOG 1290 Introduction to Physical Geography (Formerly 053.129) This course studies aspects of our physical environment: climate, landforms, soils and vegetation. Not to be held with GEOG 1291 or GEOG 1200 or GEOG 1201.

GEOG 1291 Introduction à la géographie physique (L'ancien 053.129) Étude des divers aspects de l'environnement physique: le climat, le relief, les sols et la végétation. L'étudiant ne peut se faire créditer avec GEOG 1290(053.129), ou GEOG 1200 ou GEOG 1201(053.120). Donné au Collège universitaire de Saint-Boniface.

GEOG 1514 Unallocated Credit
Campus Manitoba course.

GEOG 1524 BU 40.151 (1000 Level)
Campus Manitoba course.

5.8 Geography Course Descriptions-2000 Level

GEOG 2200 Introduction to Thematic Cartography (TS) (Lab Required) (Formerly 053.220) An introduction to the principles of map compilation and reproduction, including analysis and cartographic display of spatially referenced data. Emphasis will be placed on cartographic data manipulation, generalization, and symbolization, map design, visualization and communication. Not to be held with GEOG 2221 (053.222). Prerequisite: a grade of C or better in a minimum of three credit hours from Geography courses numbered at the 1000 level, or permission of department head.

GEOG 2210 Economic Geography (HS) (Formerly 053.221) An introduction to spatial aspects of economic activities. It includes consideration of natural resource extraction and development, industrial location theory, agriculture, and the basis of regional development. Prerequisite: (GEOG 1200) or GEOG 1201 (053.120) (C), or GEOG 1280 or GEOG 1281 (053.128) (C), or permission of department head.

GEOG 2211 Géographie économique (HS) (L'ancien 053.221) Introduction à l'expression spatiale des activités économiques. Le cours traite du concept de ressource, de la localisation et de l'utilisation des ressources naturelles, des théories sur les facteurs de localisation des activités industrielles, de l'agriculture et des fondements du développement régional. Donné au Collège universitaire de Saint-Boniface. Préalable: une note minimale de C dans un minimum de 3 heures-crédits de géographie de niveau 1000 ou l'autorisation écrite du professeur.

GEOG 2250 Introduction to Geographic Information Systems (TS) (Lab Required) (Formerly 053.225) An introduction to the fundamental theoretical concepts of geographic information systems including acquisition, processing and analyzing environmental and socio-economic data. Topics to be covered include georeferencing, spatial data structures, processing, output and applications. Not to be held with GEOG 2221(053.222). Prerequisite: a grade of C or better in a minimum of three credit hours from Geography, Geology or Environment courses numbered at the 1000 level, or permission of department head.

GEOG 2272 Natural Hazards (PS) Environmental hazards to human settlement and economy are examined with particular attention to meteorological, soil erosion, mass wasting, earthquake and volcanic phenomena. Not to be held with GEOG 2440. Prerequisite: a grade of C or better in one of GEOG 1290, GEOL 1340, or GEOL 1410, or permission of department head.

GEOG 2300 Atmospheric Thermodynamics, Clouds and Precipitation (PS) (Formerly 053.230) Critical thermodynamic processes are discussed that are associated with the Earth's atmosphere including dry and moist processes, phases of water, stability, cloud development and precipitation processes. Prerequisites: (GEOG 1290 or GEOG 1291 (053.129) (C), or (GEOG 1200) or GEOG 1201 (053.120) (C)), and (MATH 1500 or MATH 1501 (136.150) (C), or MATH 1510 (136.151) (C), or MATH 1520 (136.152) (C), or MATH 1530 (136.153) (C)).

GEOG 2310 Introduction to Process Hydrology (PS) (Formerly 053.231) This course introduces students to the near-surface components of the hydrological cycle, including the processes of precipitation, evaporation, water-biosphere interactions, infiltration, overland and stream flow. Not to be held with (053.362). Prerequisites: (GEOG 1290 or GEOG 1291 (C), or (GEOG 1200) or GEOG 1201(053.120) (C)), and (PHYS 1020 or PHYS 1021 (016.102) (C), or PHYS 1050 or PHYS 1051 (016.105) (C), or MATH 1500 or MATH 1501 (136.150) (C), or MATH 1510 (136.151) (C), or MATH 1520 (136.152) (C), or MATH 1530 (136.153) (C)), or permission of department head.

GEOG 2330 Place, Populations and Mobility: Geographic Perspectives (HS) An examination of the factors controlling the number and distribution of human population. Variations in fertility, mortality and mobility will be analyzed and the causes and consequences reviewed. Not to be held with GEOG 2480 (053.248). Prerequisite: a grade of C or better in a minimum of three credit hours from

Geography courses numbered at the 1000 level, or permission of department head.

GEOG 2372 Geography of Tourism (HS)

This course examines the social, economic and environmental dimensions of tourism and recreation. Historical and contemporary experiences from around the world will be studied. Not to be held with GEOG 2410 (053.241). Prerequisite: a grade of C or better in (GEOG 1200) or GEOG 1280, or permission of department head.

GEOG 2414 Unallocated Credit

Campus Manitoba course.

GEOG 2481 Géographie de la population (HS)

(L'ancien 053.248) Une étude des facteurs exerçant un contrôle sur l'ampleur et la répartition des populations humaines; l'analyse des variations de fécondité, de mortalité et de mobilité ainsi que leurs causes et conséquences. Donné au Collège universitaire de Saint-Boniface. Préalable: une note minimale de C dans un minimum de 3 heures-crédits de géographie de niveau 1000 ou l'autorisation écrite du professeur.

GEOG 2514 Unallocated Credit

Campus Manitoba course.

GEOG 2520 Geography of Natural Resources (HS)

(Formerly 053.252) An introduction to the basic concepts of the subject and the distribution of resources. Stress will be placed on Canadian resources and resource requirements but examples from other resource systems will also be used. Prerequisite: a grade of C or better in a minimum of three credit hours from Geography courses numbered at the 1000 level, or permission of department head.

GEOG 2530 Introduction to Scientific Geographic Research (TS)

(Formerly 053.253) An introduction to the use of scientific methodology in geography and the application of scientific explanatory frameworks to geographic research projects. Data collection procedures are discussed with particular emphasis on measurement, sampling designs, and interview surveying techniques. Not to be held with (053.247). Prerequisite: a grade of C or better in a minimum of three credit hours from Geography courses numbered at the 1000 level, or permission of department head.

GEOG 2534 Unallocated Credit

Campus Manitoba course.

GEOG 2540 Weather and Climate (PS)

(Formerly 053.254) This half-course examines the nature, controls, and observations of weather and the variation of climate in time and space. Prerequisite: a grade of C or better in a minimum of three credit hours from Geography courses numbered at the 1000 level, or permission of department head.

GEOG 2541 Météorologie et climatologie (PS)

(L'ancien 053.254) Étude de la nature, des contrôles et des observations du temps et des variations spatio-temporelles du climat. Donné au Collège universitaire de Saint-Boniface. Préalable: une note minimale de C dans un minimum de 3 heures-crédits de géographie de niveau 1000, ou l'autorisation écrite du professeur.

GEOG 2550 Geomorphology (PS)

(Formerly 053.255) This half-course surveys a broad array of landforms in the world and the geomorphic processes responsible for their creation. Attention is strongly focused on those landform processes originating at the earth's surface. Prerequisite: (GEOG 1200) or GEOG 1201 (053.120) (C), or GEOG 1290 or GEOG 1291 (053.129) (C), or permission of department head.

GEOG 2551 Géomorphologie (PS)

(L'ancien 053.255) Vue d'ensemble des reliefs variés de la surface du globe et des processus géomorphologiques responsables de leur formation. (Laboratoire hebdomadaire). Donné au Collège universitaire de Saint-Boniface. Préalable: une note minimale de C dans un minimum de 3 heures-crédits de géographie de niveau 1000, ou l'autorisation écrite du professeur.

GEOG 2554 Unallocated Credit

Campus Manitoba course.

GEOG 2570 Geography of Canada (A)

(Formerly 053.257) A regional study of Canada in which the major regions of Canada are studied with respect to geographical patterns of their physical environment, settlement, culture, economic activity, and land use. Not to be held with GEOG 2560 (053.256), GEOG 2561 or GEOG 3431 (053.343). Prerequisite: a grade of C or better in a minimum of three credit hours from Geography courses numbered at the 1000 level, or permission of department head.

GEOG 2580 Geography of the United States (A)

(Formerly 053.258) A regional study of the United States in which the major regions of the United States are studied with respect to geographical patterns of their physical environment, settlement, culture, economic activity, and land use. Not to be held with GEOG 2560, GEOG 2561(053.256). Prerequisite: a grade of C or better in a minimum of three credit hours from Geography courses numbered at the 1000 level, or permission of department head.

GEOG 2630 Geography of Culture and Environment (HS)

(Formerly 053.263) An introduction to the cultural geographic study of environment, focusing on the evolution of landscape, the creation of regions, and human relationships with nature. Prerequisite: (GEOG 1200) or GEOG 1201 (053.120) (C), or GEOG 1280 or GEOG 1281 (053.128) (C), or permission of department head.

GEOG 2640 Geography of Culture and Inequality (HS)

(Formerly 053.264) An introduction to the cultural geographic study of human and place inequalities, focusing on behaviour in landscape, group differences, and human identities. Prerequisite: (GEOG 1200) or GEOG 1201 (053.120) (C), or GEOG 1280 or GEOG 1281 (053.128) (C), or permission of department head.

GEOG 2651 Géographie politique I

(L'ancien 053.265) Étude des relations qui existent entre l'État et son territoire: sa localisation, ses frontières et ses disparités régionales. L'étudiant ne peut se faire créditer avec le GEOG 2430 (053.243). Donné au Collège universitaire de Saint-Boniface. Préalable: une note minimale de C dans un minimum de 3 heures-crédits de géographie de niveau 1000, ou l'autorisation écrite du professeur.

GEOG 2661 Géographie politique II

(L'ancien 053.266) Étude des rapports de force entre les États et leurs relations à l'espace, aux ressources, à la population et aux groupes ethniques. L'étudiant ne peut se faire créditer avec le GEOG 2430 (053.243). Donné au Collège universitaire de Saint-Boniface. Préalable: une note minimale de C dans le GEOG 2651 (053.265), ou l'autorisation écrite du professeur.

GEOG 2864 Unallocated Credit

Campus Manitoba course.

GEOG 2900 Geography of Canadian Prairie Landscapes (A)

This course introduces students to the various geographical themes, concepts and processes within the context of the natural and anthropogenic development of the Canadian prairie region. It traces the evolution of the prairie landscape. It will focus on academic writing in the discipline. Not to be held with GEOG 2450. Prerequisite: a grade of C or better in a minimum of three credit hours from Geography courses numbered at the 1000 level, or permission of department head.

5.8 Geography Course Descriptions-3000 Level

GEOG 3200 Introduction to Remote Sensing (TS)

(Lab Required) (Formerly 053.320) The course is an introduction to the principles of optical, active and passive microwave remote sensing. A review of satellite and sensors and their geographic applications will be presented, along with digital image analysis techniques. Laboratory assignments will provide hands-on experience in dealing with remote sensing data. Not to be held with (053.454). Prerequisites: [(GEOG 1200) or GEOG 1201 (053.120) (C), or GEOG 1290 or GEOG 1291 (053.129) (C)], and [PHYS 1020 or PHYS 1021 (016.102) (C), or PHYS 1050 or PHYS 1051 (016.105) (C), or MATH 1300 or MATH 1301 (136.130) (C), or MATH 1500 or MATH 1501 (136.150) (C)], or permission of department head.

GEOG 3310 Atmospheric Dynamics, Storms and Radar (PS)

(Formerly 053.331) The course covers the critical dynamic processes that are associated with the Earth's atmosphere including forces that control wind, the kinematics of the wind field, general circulation, hodographs, thermal wind, laws of motion, mid-latitude circulations, convective storms and the utility of weather radar.

Prerequisite: GEOG 2300 (053.230) (C), or permission of department head.

GEOG 3320 Introduction to Microclimates and Micrometeorology (PS)

(Formerly 053.332) This course introduces the concept of energy balance climatology and examines relationships among climate, microclimate, and environments of the Earth's surface and human-made environments. Studies include bioclimates and hydroclimates. Prerequisites: (GEOG 2310 (053.231) (C)), and (GEOG 2300 (053.230) (C)), or permission of department head.

GEOG 3390 Introduction to Climate Change and Its Causes (PS)

The primary objective of this course is to provide students with a general understanding of the physical and astronomical factors that drive global climate change. Focus will be given to current and future climate change in the context of observations and modeling. Not to be held with GEOG 3610. Prerequisite: a minimum of three credit hours from Geography or Environment courses, or permission of department head.

GEOG 3411 Géographie de l'eau

(L'ancien 053.341) L'eau, élément essentiel de la géographie physique: bilan d'eau, cycle hydrologique, infiltration, percolation et écoulement, eaux souterraines, hydrologie fluviale et marine: course d'eau, lacs et océans, environnement. Donné au Collège universitaire de Saint-Boniface. Préalable: une note minimale de C dans le GEOG 1290 ou GEOG 1291 (053.129), ou l'autorisation écrite du professeur.

GEOG 3421 L'eau, enjeu géostratégique

(L'ancien 053.342) L'eau, un enjeu stratégique d'importance: un survol historique des enjeux liés à l'eau et les enjeux actuels, la répartition inégale de la ressource .eau. et son partage équitable, les solutions techniques, économiques, institutionnelles et juridiques envisagées et le droit international. Donné au Collège universitaire de Saint-Boniface. Préalable: une note minimale de C dans le GEOG 1280 ou GEOG 1281 (053.128), et les deux GEOG 2651 (053.265) et GEOG 2661 (053.266) (ou le GEOG 2430 (053.243)), ou l'autorisation écrite du professeur

GEOG 3431 Géographie de Canada (A)

Étude du Canada par régions. L'étudiant ne peut se faire créditer à la fois le GEOG 2560 (053.256) ou le GEOG 2570 (053.257) et le GEOG 3700 (053.370). Donné au Collège universitaire de Saint-Boniface. Préalable: une note minimale de C dans un minimum de 6 heures-crédits de géographie de niveau 1000 ou l'autorisation écrite du professeur.

GEOG 3460 Urban Geography (HS)

(Formerly 053.346) The course studies the processes and trends of urbanization; the classification of cities; central-place theory; cities as systems; land-use patterns; social forces and factorial ecology; and urban transport problems. Prerequisite: (GEOG 1200) or GEOG 1201 (053.120) (C), or GEOG 1280 or GEOG 1281 (053.128) (C), or permission of department head.

GEOG 3480 Canadian Problems (A)

(Formerly 053.348) The geographical basis of selected problems (e.g. regional, urban, rural, resource, land use). Prerequisite: GEOG 2560 (053.256) (C), or GEOG 2570 (053.257) (C), or GEOG 3431 (053.343) (C), or permission of department head.

GEOG 3481 Particularités de la géographie du Canada (A)

(L'ancien 053.348) Ce cours aborde des problèmes spécifiques la géographie canadienne: régions, urbanisme, milieu rural, ressources, utilisation du sol. Donné au Collège universitaire de Saint-Boniface. Préalable: une note minimale de C dans un des cours suivants: GEOG 2560 ou (053.256), GEOG 2570 (053.257) ou GEOG 3431 (053.343), ou l'autorisation écrite du professeur.

GEOG 3501 Géographie de l'Europe (A)

(L'ancien 053.350) Vue générale sur la géographie du continent européen et plus spécifiquement sur l'Union européenne. L'accent sera placé sur quelques pays. Donné au Collège universitaire de Saint-Boniface. Préalable: une note minimale de C dans un minimum de 6 heures-crédits de géographie de niveau 1000, ou l'autorisation écrite du professeur

GEOG 3520 Energy and Society (HS)

(Formerly 053.352) The course reviews in detail the role of energy in modern society. Explanation of basic energy laws and flows in the biosphere precedes discussion of energy resources, technologies, uses, and impacts. Prerequisite: a

grade of C or better in a minimum of three credit hours from Geography courses numbered at the 1000 level, or permission of department head.

GEOG 3524 Unallocated Credit

Campus Manitoba course.

GEOG 3540 Regional Development Planning Theory and Practise (HS)

(Formerly 053.354) The course considers regional disparities in a range of Western economies including Canada. The regional problem is explored theoretically and in the application of policies to alleviate disparities. Prerequisite: (GEOG 1200) or GEOG 1201 (053.120) (C), or GEOG 1280 or GEOG 1281 (053.128) (C), or GEOG 2210 or GEOG 2211 (053.221) (C), or permission of department head.

GEOG 3580 Landforms (PS)

(Formerly 053.358) Present-day and Pleistocene glacial processes and landforms are examined in one term; slope processes and forms as well as the activities of rivers comprise the other. Human modification of these systems is discussed. Not to be held with GEOL 3490 (007.349). Prerequisite: (GEOG 1200) or GEOG 1201 (053.120) (C), or GEOG 1290 or GEOG 1291 (053.129) (C), or GEOG 2550 or GEOG 2551 (053.255) (C), or permission of department head.

GEOG 3590 Geography of Developing Countries (A)

(Formerly 053.359) The main theme is modernization; examples from South Asia and Africa south of the Sahara. Historical development, population and social problems, land use and conservation, urbanization and industrialization. Not to be held with GEOG 3591. Prerequisite: a grade of C or better in six credit hours from Geography courses numbered at the 1000 level, or permission of department head.

GEOG 3591 Géographie des pays en voie de développement (A)

(L'ancien 053.359) Le thème principal sera la modernisation des pays en voie de développement: exemples de l'Asie méridionale et de l'Afrique noire. Seront étudiés les aspects suivants: le développement historique, les problèmes démographiques et sociaux, l'utilisation du sol et la conservation des ressources, l'urbanisation et l'industrialisation. L'étudiant ne peut se faire créditer à la fois le GEOG 3590 (053.359) . Donné au Collège universitaire de Saint-Boniface. Préalable: une note minimale de C dans un minimum de 6 heures-crédits de géographie niveau 1000, ou l'autorisation écrite du professeur.

GEOG 3640 Social Geography of the Environment (HS)

This course provides an intermediate-level assessment of current geographical approaches to society and environment. Students are exposed to critical realist, social constructionist, Marxist, feminist and post-Colonial traditions as they are applied to environmental and social justice, globalization and public health. It includes discussion and a community-based learning project. Prerequisite: a grade of C or better in (GEOG 1200) or GEOG 1280, or permission of department head.

GEOG 3701 Canada : Évolution de l'écoumène (A)

(L'ancien 053.370) Étude de l'impact qu'a eu l'arrivée des Européens, au début du XVIIe siècle, sur les différents aspects de l'environnement canadien; évolution de la nature de l'utilisation de l'espace canadien. L'étudiant ne peut se faire créditer avec GEOG 3700 (053.370) . Donné au Collège universitaire de Saint-Boniface. Préalable: une note minimale de C dans 6 heures-crédits de géographie de niveau 1000, ou l'autorisation écrite du professeur.

GEOG 3710 Population and the Third World (HS)

(Formerly 053.371) This course examines the policies and problems associated with population growth and redistribution in the Third World. Prerequisite: GEOG 2480 or GEOG 2481 (053.248) (C), or SOC 2480 (077.248) (C), or permission of department head.

GEOG 3720 Refugees, Displacees, Exiles (HS)

(Formerly 053.372) This course surveys the geographic dimensions of the nature, causes and consequences of past and contemporary involuntary migrations. Prerequisite: (GEOG 1200) or GEOG 1201 (053.120) (C), or GEOG 1280 or GEOG 1281 (053.128) (C), or GEOG 2480 or GEOG 2481 (053.248) (C), or permission of department head.

GEOG 3730 Geographic Information Systems (TS)

(Lab Required) (Formerly 053.373) Weekly two-hour lab. An introduction to geographic information systems (GIS) input, processing, output and applications.

Prerequisite: GEOG 2250 (053.225) (C), or permission of department head.

GEOG 3740 Field Studies in Geography (A, TS)
(Formerly 053.374) A field course designed to introduce students to either a detailed area study or to field techniques employed for specific geographic enquiry.
Prerequisite: Permission of department head.

GEOG 3750 Field Studies in Geography (A, TS)
(Formerly 053.375) A field course designed to introduce students to either a detailed area study or to field techniques employed for specific geographic enquiry.
Prerequisite: a grade of C or better in a minimum of three credit hours from Geography courses numbered at the 1000 level, or permission of department head.

GEOG 3760 Special Topics in Geography
(Formerly 053.376) This course will vary from year to year depending on the needs of students and the interests of instructors. Prerequisite: Permission of department head.

GEOG 3761 Sujets particuliers en géographie
(L'ancien 053.376) Le contenu de ce cours variera d'année en année selon les besoins des étudiants et la spécialité du professeur. Donné au Collège universitaire de Saint-Boniface. Préalable: l'autorisation écrite du professeur.

GEOG 3770 Special Topics in Geography
(Formerly 053.377) This course will vary from year to year depending on the needs of students and the interests of instructors. Prerequisite: Permission of department head.

GEOG 3771 Sujets particuliers en géographie
Le contenu de ce cours variera d'année en année selon les besoins des étudiants et la spécialité du professeur. Préalable: l'autorisation écrite du professeur.

GEOG 3800 Geography of Transportation Development (HS)
(Formerly 053.380) This course examines the development of selected modes of transportation and their associated route and network development. Emphasis is on the place of transportation in the cultural, economic, and physical landscape of Canada and the United States since 1800. Prerequisite: a grade of C or better in a minimum of three credit hours from Geography courses numbered at the 1000 level, or permission of department head.

GEOG 3810 Quantitative Research Methods in Geography (TS)
This course focuses on the quantitative analytical methods available for the interpretation on physical and human geography applications. Not to be held with GEOG 3680 (053.368). Prerequisite: GEOG 2530 (053.253) or STAT 1000 or STAT 1001 (005.100), or permission of department head.

GEOG 3821 Les territoires de la francophonie mondiale (A, HS)
(L'ancien 053.382) La mise en place des espaces francophones à travers le monde: le développement et l'éclatement des empires français et belge. La territorialité et l'identité au sein de la francophonie internationale. Répartition géographique et développement institutionnel. Ententes politiques et aspirations territoriales. Donné au Collège universitaire de Saint-Boniface. Préalable: Un note minimale de C dans un minimum de 6 heures-crédits dans un cours de géographie de niveau 1000.

GEOG 3831 L'espace francophone panaméricain (A, HS)
(L'ancien 053.383) L'étude des communautés francophones des Amériques dans le temps et dans l'espace. La mise en place de la francophonie panaméricaine et les circonstances de son éclatement. Ses enjeux économiques, sociaux, politiques et culturels. Les infrastructures, les institutions et les réseaux francophones. Donné au Collège universitaire de Saint-Boniface. Préalable: une note minimale de C dans le GEOG 3821 (053.382).

GEOG 3841 Les espaces francophones de l'Afrique, de l'Asie et de l'Océanie (A, HS)
(L'ancien 053.384) L'étude des communautés francophones africaines, asiatiques et océaniques. Les étapes de la colonisation et de la décolonisation, l'évolution vers l'indépendance et l'accession au statut d'État souverain. La mise en place des infrastructures, des institutions et des réseaux francophones. Donné au Collège universitaire de Saint-Boniface. Préalable: une note minimale de C dans GEOG 3821 (053.382).

GEOG 3850 Sustainable Manitoba (A)
This course approaches local sustainability issues from an interdisciplinary perspective. By looking at the ecological, social and economic aspects from a variety of discipline perspectives, a fuller understanding of sustainability is achieved. The broad range of perspectives is achieved through participation of guest speakers from other faculties and outside of the university as well as excursion outside the classroom. Not to be held with ENVR 3850. Prerequisite: 60 credit hours of course work, or permission of department head.

GEOG 3860 Animal Geographies (HS)
This course presents a variety of topics concerning the interactions between humans and animals, how humans influence and use animals, and the many roles animals play in human lives and environments. Animal Geographies lies at a meeting point between physical and human geography, where we must consider the blurring boundaries between what it means to be animal/human, and the implications of how animals are used and represented. A wide variety of perspectives, beliefs, and points of view will be explored. Prerequisite: Permission of department head.

GEOG 3870 Food Geographies
This course provides a critical examination of the geographies of food at a variety of scales, from the body to the global. The course focuses on themes in three interconnected areas: 1) food production and the global food system from farm to plate including agribusiness and alternative food production and distribution models; 2) food consumption habits and beliefs and foodways as geographically contingent material culture; and 3) food (in) security and its relationship to health and wellbeing. This course is cross-listed as HNSC 3630. Prerequisite: a grade of C or better in GEOG 1280 or GEOG 1281 or (GEOG 1200), or permission of department head.

GEOG 3900 Geography of Manitoba (A)
A regional study of Manitoba emphasizing the unique character and diversity of Manitoba's cultural landscapes. The historical, social, cultural, economic and political distinctiveness along with the impact of European settlement and aboriginal displacement will be discussed. Prerequisite: a grade of C or better in GEOG 2900, or permission of department head.

5.8 Geography Course Descriptions-4000 Level

GEOG 4050 Ecosystem Management
This course will provide students with an understanding of the practical applications of ecological science, environmental policy, and resource management approaches in the large-scale planning of landscapes. The course will review ecological principles and trace the historical development of the ecosystem concept. Comparisons are made to other possible environmental management approaches. The synthesis of major elements and concepts will be reinforced through case studies on the Manitoba landscape, with an emphasis on practical learning by students through field seminars and group discussions. Not to be held with ENVR 4050. Prerequisite: Permission of department head.

GEOG 4060 Biogeography
This course will provide students with a general understanding of the historical, ecological, analytical, and conservation aspects of biogeography. The course will also have a dual focus on the principles and concepts of reasons for the distribution of plants and animals worldwide, as well as incorporating discussion on as many local (Manitoba, Canada, North America) examples as possible. Not to be held with ENVR 4060. Prerequisite: Permission of department head.

GEOG 4200 Advanced Methods in Remote Sensing (Lab Required) (Formerly 053.420) Provides instruction in the current theory and application of remote sensing technology to Earth system Science. Emphasis will be placed on the processing and interpretation of remote sensing imagery and the integration of remote sensing data with other spatial data. Not to be held with (053.454). Prerequisite: GEOG 3200 (053.320) (C), or permission of department head.

GEOG 4260 Sacred Lands
(Formerly 053.426) Students will increase their understanding of the importance and significance of Sacred Lands and Sacred Spaces to International Indigenous Peoples. Experiential learning, seminars, and a field component may be included. Not to be held with NATV 4260 (032.426). Prerequisite: Permission of department head.

GEOG 4280 Gender and the Human Environment

This upper-level seminar course will develop in students a depth and breadth of understanding appropriate to the honours undergraduate/graduate level in the area of gender geography scholarship. From critical social science theoretical positions, this course asks students to examine what we can learn about how humans live on the earth if we see them as gendered. Just as we may also understand humans and their interactions in and with spaces, places and environments through the lenses of race, ethnicity, class, age and/or combinations of these categories with gender. Prerequisite: A grade of C or better in a minimum of six credit hours in Geography, or permission of department head.

GEOG 4290 Geographies of Health and Health Care

(Formerly 053.429) This course provides an introduction to and critical examination of the geographies of health and healthcare. Topics include perceptions and determinations of health and health care; health care delivery, focusing on spatial patterns and inequities; and the relationship between environment and health, particularly impacts of environmental contamination. Prerequisite: Permission of department head.

GEOG 4300 Synoptic Meteorology and Weather Analysis

(Formerly 053.430) Applied aspects of meteorology are described in terms of weather analysis and forecasting techniques for synoptic-scales and meso-scales using various meteorological tools. An introduction to severe weather forecasting techniques will also be described. Prerequisite: GEOG 3310 (053.331) (C), or permission of department head.

GEOG 4310 Boundary-Layer Climatology and Micrometeorology

(Formerly 053.431) A seminar course on advanced topics in microclimatology and micrometeorology. Prerequisite: GEOG 3320 (053.332) (C), or permission of department head.

GEOG 4330 Concepts in Atmospheric Modeling

This course will primarily focus on numerical modeling applications and techniques of the Earth's atmosphere with an emphasis on weather prediction. This includes understanding basic modeling terminology, numerical schemes, structure of models, types of models, what is required to run a model, and an introduction to data assimilation and ensemble techniques to weather prediction. Not to be held with GEOG 4320. Prerequisite: GEOG 3310 (C) or GEOG 3320 (C), or permission of department head.

GEOG 4350 Parks and Protected Areas Planning and Management: Field Studies

The course is taught in two segments, an on-campus component and field study component taking place in Banff National Park. The on-campus component examines the historical development of the concept of parks and protected areas, the role of interpretation, management and research in the parks and emerging issues in the management of parks and protected areas. In addition, during the on-campus component planning for the field will take place. The field segment will focus on a wide variety of management issues with particular attention to Banff National Park. Emerging issues and trends will be examined and past management responses evaluated. There will be opportunities for students to investigate specific management issues of interest to them and to participate in current research being conducted in the park. This course is also offered in the Faculty of Kinesiology and Recreation Management as REC 4350. Prerequisite: Permission of department head.

GEOG 4390 Global Climate Change

Students will be introduced to the complexities of climate changes through a series of introductory lectures and reading assignments that focus on recent scientific publications and review articles (mathematical skills are not required). Both sides of the climate change debate will be addressed in weekly assignments, and students will defend their conclusions in classroom discussion. Each student will take on a project in some aspect of climate change -- glaciers, sea ice, temperature trends, precipitation, agriculture, animal migration, aerosols, or a regional impact. Prerequisite: A grade of C or better in GEOG 3390 (or GEOG 3610 or 053.361), or permission of department head.

GEOG 4410 Rural Land Use

(Formerly 053.441) This course focuses on the dynamics of change on the rural-urban fringe. It involves seminars and individual field research. Prerequisite: Permission of department head.

GEOG 4550 Topics in Air Pollution: Climatology, Location, and Planning

(Formerly 053.455) An introduction to air pollution sources; meteorology of air pollution; calculation of ground concentrations; effects and controls; environmental planning and policy. Prerequisite: Permission of department head.

GEOG 4560 Techniques in Climatology

(Formerly 053.456) Instrumentation, the sources of climatic data, and the use of satellite photography, as well as methods of analysis and presentation are discussed. Prerequisite: GEOG 3320 (053.332) (C), or permission of department head.

GEOG 4580 Concepts and Methods in Geography

(Formerly 053.458) This course surveys the historical development of the nature, scope, and methods of human and physical geography. Prerequisite: Permission of department head.

GEOG 4590 Spatial Analysis

(Formerly 053.459) The theory and techniques of spatial statistical data exploration, inference and hypothesis testing as they pertain to geography analysis are explored. The role of spatial analytical techniques in field investigations, GIS and remote sensing applications are discussed. Prerequisites: (GEOG 3680 or 053.368) (C), and (MATH 1300 or MATH 1301 (136.130) or MATH 1500 or MATH 1501 (136.150) (C)), or permission of department head.

GEOG 4650 Models in Regional Analysis

(Formerly 053.465) Emphasis is placed on the use of regression techniques in regional analysis including the classical ordinary least squares methods and two-stage least squares. Migration and industrial location models are developed and calibrated using these techniques. Prerequisite: Permission of department head.

GEOG 4660 Honours Thesis

(Formerly 053.466) This course involves the production of a thesis under the supervision of a department faculty member. Prerequisite: Permission of department head.

GEOG 4670 Selected Issues

(Formerly 053.467) Intensive study of selected geographic issues. Prerequisite: Prearranged written consent of an individual instructor and permission of department head.

GEOG 4720 Advanced Methods in Geographic Information Systems

(Lab Required) (Formerly 053.472) Weekly two-hour lab. This course focuses on the practical application of techniques used in Geographic Information Systems (GIS) and the development of techniques used in Geographic Information Systems (GIS) and the development of GIS models. The development, testing and presentation of GIS data, models and results are studied. Prerequisite: Permission of department head.

SECTION 6: Bachelor of Environmental Science and Bachelor of Environmental Studies Degree Regulations, Program Descriptions and Courses Offered by,

6.1 Program Information

6.1 Program Information, Physical Geography includes the study of the environment through aspects of atmospheric science, geomorphology, biogeography, and hydrology, all of which draw upon the natural and applied sciences to understand the natural environment. Atmospheric sciences examine the physical and biophysical processes at and near the earth's surface shaping climate and determining the weather. These processes are examined over cascading scales, local to global. Hydrology studies the flow of water between the Earth's surface and the atmosphere, including the quantity and quality of water resources as well as the spatial variability in the hydrologic cycle. The examination of processes at the earth's surface and the associated landforms is called geomorphology. Various sub-disciplines in geomorphology include weathering and erosional processes, volcanoes, glacial and river systems. Biogeography studies the interrelationships between the biospheric environment and the physical environment. Formation of soils, ecosystem and biome cycles and components, as

well as human interaction with the physical environment are all topical areas in biogeography.

Geomatics is an emerging field referring to the techniques of spatial data acquisition, handling, and analysis. Included within this field have been geographic applications of computer analysis and spatial modeling, spatial statistics, remote sensing technology, and geographic information systems. Many of these techniques have their origins in the applied sciences, but both physical and human geographers have contributed greatly to their development and application. The application of such methodologies in geographic fields, such as resource management, urban geography, climate change, and applied geography has also provided closer co-operation between human and physical geography, as well as promoting considerable interdisciplinary research with other University disciplines.

The Major and Honours B.Sc. degree programs in Physical Geography serve students who desire advanced study in the academic subject matter of various themes contained within Physical Geography. The Honours program in particular is intended for students interested in the opportunity for exposure to advanced geographic research. As such, the Honours program demands higher academic performance. Students who are ineligible to enter Honours in their second year may establish this in the following year on the basis of their improved scholastic performance. The degree programs may be pursued on a full or part-time basis.

Minor in Another Department

Students in the B.Sc. Physical Geography have the opportunity to complete a Minor in a subject field that is different than that of the declared Major, and which normally consist of 18 credit hours from a department offering this option at the University of Manitoba. Students in the B.Sc. Physical Geography are not permitted to complete a Minor in the B.A. Geography. Students can declare only one Minor. The Minor requirements are described in [section 3.2](#) of this *Chapter*. Contact a [Riddell Faculty student advisor](#) in the Faculty general office for further information about eligible Minors.

Streams

Students are required to complete a stream approved by a Riddell Faculty student advisor. Students in the Major or Major (Coop) programs are required to complete a minimum of 30 credit hours of 2000- (or higher) level courses, of which at least 18 credit hours must be at or above the 3000-level. The B.Sc. Honours and Honours (Coop) programs require students to complete 39 credit hours in a Stream, of which at least 24 credit hours are defined at or above the 3000-level and must include *GEOG 4660 Honours Thesis* (6). Streams are currently available in *Atmospheric and Hydrological Sciences*, *Geomatics* and *Physical Geography*. See the department and/ or a [Riddell Faculty student advisor](#) for current information about these Streams.

Major

To qualify for the degree, Bachelor of Science in Physical Geography (Major), a student must complete 120 credit hours with passing grades ('D' or better) and a minimum degree grade point average of 2.00. Major (Coop) students must attain a minimum degree Grade Point Average of 2.50. Students must complete all faculty requirements. There is no limit to the number of credit hours a student completes provided he/she does not exceed 18 credit hours of failed courses.

Honours

To qualify for the degree Bachelor of Science in Physical Geography (Honours and Honours Coop), a student must complete 120 credit hours with passing grades ('D' or better) and a minimum degree grade point average of 3.00 in the courses that constitute the degree. Students must complete all faculty requirements. There is no limit to the number of credit hours a student completes provided he/she does not exceed 18 credit hours of failed courses.

6.2 Entrance Requirements

6.2 Entrance Requirements ,

Students complete the first-year of their degree program in University 1 where they select courses from a wide variety of offerings including from the Clayton H. Riddell Faculty of Environment, Earth, and Resources. Students admitted from University 1 are placed in the Major degree program until they have completed a minimum of 48 credit hours after which they may transfer to the Honours program or remain in the Major. To make a program transfer, students must consult a [Riddell Faculty student advisor](#).

6.2.1 Entrance Requirements			
Degree Program in Physical Geography	Minimum Number of Credit Hours	Minimum Degree Grade Point Average	Additional Entrance Requirements
Honours	48	3.00	A grade of 'B' or better in GEOG 1290 ³ ; a grade of 'C+' or better in 12 credit hours from PHYS 1020 ³ (or PHYS 1050), MATH 1500 ^{2,3} , PHYS 1030 (or PHYS 1070), MATH 1300 ³ (or MATH 1310)
Honours (Coop) ¹	60	3.00	ENVR 2900; students must satisfy the requirements for Entrance/continuation in the regular program and (normally) have completed GEOG 2200, GEOG 2250, GEOG 2300, GEOG 2310, GEOG 2550, PHYS 1020 ³ (or PHYS 1050), and MATH 1500 ^{2,3}
Major	24	2.00	A grade of 'C' or better in GEOG 1290 ³ ; a grade of 'C+' or better in 6 credit hours from PHYS 1020 ³ (or PHYS 1050) and MATH 1500 ^{2,3}
Major (Coop) ¹	60	2.50	ENVR 2900; students must satisfy the requirements for Entrance/continuation in the regular program and (normally) have completed GEOG 2200, GEOG 2250, GEOG 2300, GEOG 2310, GEOG 2550, PHYS 1020 ³ (or PHYS 1050), PHYS 1030 ³ (or PHYS 1070), MATH 1300 ³ (or MATH 1310) and MATH 1500 ^{2,3}

¹Students may be permitted to enter the program without satisfying all requirements listed. Students should consult with the Cooperative Education Coordinator for further information.

²MATH 1510 or MATH 1520 or MATH 1690 may be used in lieu of MATH 1500.

³Equivalent courses offered through Collège universitaire de Saint-Boniface may be used in lieu of the specified courses identified in the degree program chart. Collège uni-versitaire de Saint-Boniface courses end in the number 1.

6.3 Minimum Performance Requirements for Continuation and Graduation

6.3 Minimum Performance Requirements for Continuation and Graduation, A student's academic performance will be assessed with his/her application for admission to the Clayton H. Riddell Faculty of Environment, Earth, and Resources and following each *term* thereafter. A Riddell Faculty student advisor must approve a student's registration each Fall/Winter and Summer term. Any revisions in this schedule should also be approved prior to the end of the registration revision period.

To be in **good standing** and permitted to continue in a degree program, a student must achieve the minimum standards at each point of assessment. This assessment is based on the student's minimum degree Grade Point Average; the grades received in each of GEOG 1290 (or GEOG 1291), GEOG 2200, GEOG 2250 (or GEOG 2251), GEOG 2300, GEOG 2310, GEOG 2550, GEOG 3810; and the number of failed courses after admission to the Clayton H. Riddell Faculty of Environment, Earth, and Resources.

6.3.1 Minimum Performance Requirements	
Minimum Performance Requirements	Graduation Requirements ¹

Degree Program (Credit Hours)	Minimum Degree Grade Point Average (DGPA)	Maximum Credit Hours of Failed Courses	Physical Geography Core: Minimum Grade Requirements in GEOG 1290 ² , GEOG 2200 ² , GEOG 2250 ² , GEOG 2300, GEOG 2310, GEOG 2272, GEOG 2550, GEOG 3810	Stream (2000-Level or Higher)	Coop Option Courses
Major (120)	2.00	18	'C'	30 credit hours of which at least 18 credit hours must be at the 3000-level or higher; minimum Degree GPA of 2.00.	
Major Coop (120)	2.50	18	'C'	30 credit hours of which at least 18 credit hours must be at the 3000-level or higher; minimum Degree GPA of 2.00.	ENVR 2900, ENVR 3900, ENVR 3910, ENVR 3980, ENVR 3920, ENVR 3990; (ENVR 4910 and ENVR 4980 are optional)
Honours (120)	3.00	18	'B' in GEOG 1290; 'C+' grades in others	39 credit hours of which at least 24 credit hours must be at the 3000-level or higher; completion of GEOG 4660; minimum 'C+' grade in each course.	
Honours Coop (120)	3.00	18	'B' in GEOG 1290; 'C+' grades in others	39 credit hours of which at least 24 credit hours must be at the 3000-level or higher; completion of GEOG 4660; minimum 'C+' grade in each course.	ENVR 2900, ENVR 3900, ENVR 3910, ENVR 3980, ENVR 3920, ENVR 3990; (ENVR 4910 and ENVR 4980 are optional)
¹ B.Sc. Physical Geography students must successfully complete a minimum of 60 credit hours at the University of Manitoba to satisfy the Residence Requirement. The courses used to satisfy the requirement must be acceptable for credit in the Clayton H. Riddell Faculty of Environment, Earth, and Resources.					
² Equivalent courses offered through Collège universitaire de Saint-Boniface may be					

used in lieu of the specified courses identified in the degree program chart. Collège universitaire de Saint-Boniface courses end in the number 1.

To **graduate** from the Bachelor Science in Physical Geography with the intended degree designation, a student must achieve the minimum standards and graduation requirements outlined above in 6.3.1 following the final term of registration and satisfy all degree course requirements in the foundation, physical geography core and Stream.

Students in the Honours program who do not meet these minimum performance requirements for continuation or graduation will be withdrawn from the degree program and placed in the Major provided they are eligible based on their performance. Students who do not meet the minimum performance requirements of the Major will be placed on academic warning, probation or academic suspension as defined in [section 3.14 Academic Warning, Probation and Academic Suspension](#) in this *Chapter*.

Students withdrawn from the Honours program as a result of their inability to meet minimum performance requirements will have the notation, 'Required to Withdraw from the Honours Program,' recorded on their transcript of marks. Similarly, students withdrawn from the Major program will have the notation, 'Required to Withdraw from the Major Program,' recorded on their transcript of marks.

6.4 Graduating with Distinction or First Class Honours

6.4 Graduating with Distinction or First Class Honours, With Distinction

Students graduating with a B.Sc. Physical Geography (Major) degree will have their degree granted 'With Distinction' if they have a minimum Degree Grade Point Average of 3.50 on all course work.

The term 'Degree with Distinction' will appear both on the parchment and on the student's transcript of marks.

First Class Honours

Students in the Honours program will have their degree granted with 'First Class Honours' if they have a minimum Degree Grade Point Average of 3.50 based on all acceptable course work. The term First Class Honours will appear both on the parchment and on the student's transcript of mark.

It is recommended that students complete the W course in University 1 or Year 2			
Plus a Stream approved by a Riddell Faculty student advisor. Major Stream requirements are as follows: 30 credit hours of 2000- (or higher) level courses, of which 18 credit hours must be at the 3000- or 4000-level.			
NOTES:			
¹ Entrance into the degree programs is summarized in 6.2.1 in this <i>Chapter</i> .			
² The courses required in this program will satisfy the University Mathematics requirement .			
³ PHYS 1050 and PHYS 1070 may be used in lieu of PHYS 1020 and PHYS 1030, respectively.			
⁴ MATH 1510 or MATH 1520 may be used in lieu of MATH 1500; or MATH 1690 may be used in place of MATH 1500 (or equivalent) and MATH 1700; or MATH 1310 may be used in lieu of MATH 1300.			
⁵ GEOL 1440 may be used in lieu of GEOL 1340.			
⁶ BIOL 1000 and BIOL 1010 may be used in lieu of BIOL 1020 and BIOL 1030.			
⁷ Equivalent courses offered through Collège universitaire de Saint-Boniface may be used in lieu of the specified courses identified in the degree program chart. Collège universitaire de Saint-Boniface courses end in the number 1 (e.g. GEOG 1281).			
⁸ GEOG 2440 may be used in lieu of GEOG 2272.			
⁹ GEOG 3680 may be used in lieu of GEOG 3810.			
Note: To fulfil prerequisite requirements a grade of 'C' must be achieved, unless otherwise			

<p>stated, in any course stipulated as a prerequisite to a further course.</p> <ul style="list-style-type: none"> Students should review the course topics available for GEOG 3740 (6), GEOG 3750 (3), GEOG 3760 (6), GEOG 3770 (3) and <i>GEOG 4670</i> (3). Also, all courses are not offered every year. The course schedule for the current academic term is available from the Class Schedule. Students registering in certain courses may be required to participate in field trips or field components and pay a portion of the associated expenses. For details, contact the Department of Environment and Geography general office. <p>IMPORTANT: The Honours and Major programs need not be completed in the course order described in the chart above. The chart indicates one possible arrangement of the required courses and is meant to be a guide around which students can plan their program.</p>

Plus 6 credit hours from the Faculty of Arts			

It is recommended that students complete the W course in University 1 or Year 2

Plus a **Stream** approved by a Riddell Faculty student advisor. Major Coop Stream requirements are as follows: 30 credit hours of 2000- (or higher) level courses, of which 18 credit hours must be at the 3000- or 4000-level.

NOTE: Students in the Major Coop are required to maintain an overall degree Grade Point Average of 2.50.

MINOR 18 CREDIT HOURS

GEOG 1290 ⁷	15 credit hours selected from 2000-, 3000-, or 4000-level courses designated as Physical Geography (PS) or Techniques (TS) courses in the Geography course descriptions defined in sections 5.6 in this Chapter .
------------------------	---

NOTES:

¹Entrance into the degree programs is summarized in [6.2.1 in this Chapter](#).

²The courses required in this program will satisfy the University Mathematics requirement.

³PHYS 1050 and PHYS 1070 may be used in lieu of PHYS 1020 and PHYS 1030, respectively.

⁴MATH 1510 or MATH 1520 may be used in lieu of MATH 1500; or MATH 1690 may be used in place of MATH 1500 (or equivalent) and MATH 1700.

⁵GEOL 1440 may be used in lieu of GEOL 1340.

⁶BIOL 1000 and BIOL 1010 may be used in lieu of BIOL 1020 and BIOL 1030.

⁷Equivalent courses offered through Collège universitaire de Saint-Boniface may be used in lieu of the specified courses identified in the degree program chart. Collège universitaire de Saint-Boniface courses end in the number 1 (e.g. GEOG 1281).

Note:
To fulfil prerequisite requirements a grade of 'C' must be achieved, unless otherwise stated, in any course stipulated as a prerequisite to a further course.

- Students should review the course topics available for GEOG 3740 (6), GEOG 3750 (3), GEOG 3760 (6), GEOG 3770 (3) and *GEOG 4670* (3). Also, all courses are not offered every year. The course schedule for the current academic term is available from the [Class Schedule](#).
- Students registering in certain courses may be required to participate in field trips or field components and pay a portion of the associated expenses. For details, contact the Department of Environment and Geography general office.

IMPORTANT: The Honours and Major programs need not be completed in the course order described in the chart above. The chart indicates one possible

arrangement of the required courses and is meant to be a guide around which students can plan their program.

6.6 Environment, Earth, and Resources Course Descriptions- 1000 Level

EER 1000 Earth: A User's Guide

This course will present a multi-disciplinary introduction to the Planet Earth as both the source of essential resources and as the site of resulting negative impacts. Focus in the course will be provided by addressing important and current topics, case studies, and concepts that the well-educated citizen of the Earth should understand and will include natural and human-induced processes within a broad range of spatial and temporal scales.

6.7 Geography Course Descriptions-1000 Level

GEOG 1280 Introduction to Human Geography

(Formerly 053.128) This course studies aspects of the human world: population, settlement and resources. Not to be held with GEOG 1200 or GEOG 1201 (053.120), or GEOG 1281.

GEOG 1281 Introduction à la géographie humaine

(L'ancien 053.128) Étude des divers aspects du milieu humain: la population, l'habitat et les ressources naturelles. L'étudiant ne peut se faire créditer avec le GEOG 1280, ou GEOG 1200 ou GEOG 1201 (053.120). Donné au Collège universitaire de Saint-Boniface.

GEOG 1290 Introduction to Physical Geography

(Formerly 053.129) This course studies aspects of our physical environment: climate, landforms, soils and vegetation. Not to be held with GEOG 1291 or GEOG 1200 or GEOG 1201.

GEOG 1291 Introduction à la géographie physique

(L'ancien 053.129) Étude des divers aspects de l'environnement physique: le climat, le relief, les sols et la végétation. L'étudiant ne peut se faire créditer avec GEOG 1290 (053.129), ou GEOG 1200 ou GEOG 1201 (053.120). Donné au Collège universitaire de Saint-Boniface.

GEOG 1514 Unallocated Credit

Campus Manitoba course.

GEOG 1524 BU 40.151 (1000 Level)

Campus Manitoba course.

6.7 Geography Course Descriptions-2000 Level

GEOG 2200 Introduction to Thematic Cartography (TS)

(Lab Required) (Formerly 053.220) An introduction to the principles of map compilation and reproduction, including analysis and cartographic display of spatially referenced data. Emphasis will be placed on cartographic data manipulation, generalization, and symbolization, map design, visualization and communication. Not to be held with GEOG 2221 (053.222). Prerequisite: a grade of C or better in a minimum of three credit hours from Geography courses numbered at the 1000 level, or permission of department head.

GEOG 2210 Economic Geography (HS)

(Formerly 053.221) An introduction to spatial aspects of economic activities. It includes consideration of natural resource extraction and development, industrial location theory, agriculture, and the basis of regional development. Prerequisite: (GEOG 1200) or GEOG 1201 (053.120) (C), or GEOG 1280 or GEOG 1281 (053.128) (C), or permission of department head.

GEOG 2211 Géographie économique (HS)

(L'ancien 053.221) Introduction à l'expression spatiale des activités économiques. Le cours traite du concept de ressource, de la localisation et de l'utilisation des ressources naturelles, des théories sur les facteurs de localisation des activités

industrielles, de l'agriculture et des fondements du développement régional. Donné au Collège universitaire de Saint-Boniface. Préalable: une note minimale de C dans un minimum de 3 heures-crédits de géographie de niveau 1000 ou l'autorisation écrite du professeur.

GEOG 2250 Introduction to Geographic Information Systems (TS) (Lab Required) (Formerly 053.225) An introduction to the fundamental theoretical concepts of geographic information systems including acquisition, processing and analyzing environmental and socio-economic data. Topics to be covered include georeferencing, spatial data structures, processing, output and applications. Not to be held with GEOG 2221(053.222). Prerequisite: a grade of C or better in a minimum of three credit hours from Geography, Geology or Environment courses numbered at the 1000 level, or permission of department head.

GEOG 2272 Natural Hazards (PS) Environmental hazards to human settlement and economy are examined with particular attention to meteorological, soil erosion, mass wasting, earthquake and volcanic phenomena. Not to be held with GEOG 2440. Prerequisite: a grade of C or better in one of GEOG 1290, GEOL 1340, or GEOL 1410, or permission of department head.

GEOG 2300 Atmospheric Thermodynamics, Clouds and Precipitation (PS) (Formerly 053.230) Critical thermodynamic processes are discussed that are associated with the Earth's atmosphere including dry and moist processes, phases of water, stability, cloud development and precipitation processes. Prerequisites: (GEOG 1290 or GEOG 1291 (053.129) (C), or (GEOG 1200) or GEOG 1201 (053.120) (C)), and (MATH 1500 or MATH 1501 (136.150) (C), or MATH 1510 (136.151) (C), or MATH 1520 (136.152) (C), or MATH 1530 (136.153) (C)).

GEOG 2310 Introduction to Process Hydrology (PS) (Formerly 053.231) This course introduces students to the near-surface components of the hydrological cycle, including the processes of precipitation, evaporation, water-biosphere interactions, infiltration, overland and stream flow. Not to be held with (053.362). Prerequisites: (GEOG 1290 or GEOG 1291 (C), or (GEOG 1200) or GEOG 1201 (053.120) (C)), and (PHYS 1020 or PHYS 1021 (016.102) (C), or PHYS 1050 or PHYS 1051 (016.105) (C), or MATH 1500 or MATH 1501 (136.150) (C), or MATH 1510 (136.151) (C), or MATH 1520 (136.152) (C), or MATH 1530 (136.153) (C)), or permission of department head.

GEOG 2330 Place, Populations and Mobility: Geographic Perspectives (HS) An examination of the factors controlling the number and distribution of human population. Variations in fertility, mortality and mobility will be analyzed and the causes and consequences reviewed. Not to be held with GEOG 2480 (053.248). Prerequisite: a grade of C or better in a minimum of three credit hours from Geography courses numbered at the 1000 level, or permission of department head.

GEOG 2372 Geography of Tourism (HS) This course examines the social, economic and environmental dimensions of tourism and recreation. Historical and contemporary experiences from around the world will be studied. Not to be held with GEOG 2410 (053.241). Prerequisite: a grade of C or better in (GEOG 1200) or GEOG 1280, or permission of department head.

GEOG 2414 Unallocated Credit
Campus Manitoba course.

GEOG 2481 Géographie de la population (HS) (L'ancien 053.248) Une étude des facteurs exerçant un contrôle sur l'ampleur et la répartition des populations humaines; l'analyse des variations de fécondité, de mortalité et de mobilité ainsi que leurs causes et conséquences. Donné au Collège universitaire de Saint-Boniface. Préalable: une note minimale de C dans un minimum de 3 heures-crédits de géographie de niveau 1000 ou l'autorisation écrite du professeur.

GEOG 2514 Unallocated Credit
Campus Manitoba course.

GEOG 2520 Geography of Natural Resources (HS) (Formerly 053.252) An introduction to the basic concepts of the subject and the distribution of resources. Stress will be placed on Canadian resources and resource

requirements but examples from other resource systems will also be used. Prerequisite: a grade of C or better in a minimum of three credit hours from Geography courses numbered at the 1000 level, or permission of department head.

GEOG 2530 Introduction to Scientific Geographic Research (TS) (Formerly 053.253) An introduction to the use of scientific methodology in geography and the application of scientific explanatory frameworks to geographic research projects. Data collection procedures are discussed with particular emphasis on measurement, sampling designs, and interview surveying techniques. Not to be held with (053.247). Prerequisite: a grade of C or better in a minimum of three credit hours from Geography courses numbered at the 1000 level, or permission of department head.

GEOG 2534 Unallocated Credit
Campus Manitoba course.

GEOG 2540 Weather and Climate (PS) (Formerly 053.254) This half-course examines the nature, controls, and observations of weather and the variation of climate in time and space. Prerequisite: a grade of C or better in a minimum of three credit hours from Geography courses numbered at the 1000 level, or permission of department head.

GEOG 2541 Météorologie et climatologie (PS) (L'ancien 053.254) Étude de la nature, des contrôles et des observations du temps et des variations spatio-temporelles du climat. Donné au Collège universitaire de Saint-Boniface. Préalable: une note minimale de C dans un minimum de 3 heures-crédits de géographie de niveau 1000, ou l'autorisation écrite du professeur.

GEOG 2550 Geomorphology (PS) (Formerly 053.255) This half-course surveys a broad array of landforms in the world and the geomorphic processes responsible for their creation. Attention is strongly focused on those landform processes originating at the earth's surface. Prerequisite: (GEOG 1200) or GEOG 1201 (053.120) (C), or GEOG 1290 or GEOG 1291 (053.129) (C), or permission of department head.

GEOG 2551 Géomorphologie (PS) (L'ancien 053.255) Vue d'ensemble des reliefs variés de la surface du globe et des processus géomorphologiques responsables de leur formation. (Laboratoire hebdomadaire). Donné au Collège universitaire de Saint-Boniface. Préalable: une note minimale de C dans un minimum de 3 heures-crédits de géographie de niveau 1000, ou l'autorisation écrite du professeur.

GEOG 2554 Unallocated Credit
Campus Manitoba course.

GEOG 2570 Geography of Canada (A) (Formerly 053.257) A regional study of Canada in which the major regions of Canada are studied with respect to geographical patterns of their physical environment, settlement, culture, economic activity, and land use. Not to be held with GEOG 2560 (053.256), GEOG 2561 or GEOG 3431 (053.343). Prerequisite: a grade of C or better in a minimum of three credit hours from Geography courses numbered at the 1000 level, or permission of department head.

GEOG 2580 Geography of the United States (A) (Formerly 053.258) A regional study of the United States in which the major regions of the United States are studied with respect to geographical patterns of their physical environment, settlement, culture, economic activity, and land use. Not to be held with GEOG 2560, GEOG 2561(053.256). Prerequisite: a grade of C or better in a minimum of three credit hours from Geography courses numbered at the 1000 level, or permission of department head.

GEOG 2630 Geography of Culture and Environment (HS) (Formerly 053.263) An introduction to the cultural geographic study of environment, focusing on the evolution of landscape, the creation of regions, and human relationships with nature. Prerequisite: (GEOG 1200) or GEOG 1201 (053.120) (C), or GEOG 1280 or GEOG 1281 (053.128) (C), or permission of department head.

GEOG 2640 Geography of Culture and Inequality (HS) (Formerly 053.264) An introduction to the cultural geographic study of human and place inequalities, focusing on behaviour in landscape, group differences, and human identities. Prerequisite: (GEOG 1200) or GEOG 1201 (053.120) (C), or

GEOG 1280 or GEOG 1281 (053.128) (C), or permission of department head.

GEOG 2651 Géographie politique I

(L'ancien 053.265) Étude des relations qui existent entre l'État et son territoire: sa localisation, ses frontières et ses disparités régionales. L'étudiant ne peut se faire créditer avec le GEOG 2430 (053.243). Donné au Collège universitaire de Saint-Boniface. Préalable: une note minimale de C dans un minimum de 3 heures-crédits de géographie de niveau 1000, ou l'autorisation écrite du professeur.

GEOG 2661 Géographie politique II

(L'ancien 053.266) Étude des rapports de force entre les États et leurs relations à l'espace, aux ressources, à la population et aux groupes ethniques. L'étudiant ne peut se faire créditer avec le GEOG 2430 (053.243). Donné au Collège universitaire de Saint-Boniface. Préalable: une note minimale de C dans le GEOG 2651 (053.265), ou l'autorisation écrite du professeur.

GEOG 2864 Unallocated Credit

Campus Manitoba course.

GEOG 2900 Geography of Canadian Prairie Landscapes (A)

This course introduces students to the various geographical themes, concepts and processes within the context of the natural and anthropogenic development of the Canadian prairie region. It traces the evolution of the prairie landscape. It will focus on academic writing in the discipline. Not to be held with GEOG 2450. Prerequisite: a grade of C or better in a minimum of three credit hours from Geography courses numbered at the 1000 level, or permission of department head.

6.7 Geography Course Descriptions-3000 Level

GEOG 3200 Introduction to Remote Sensing (TS)

(Lab Required) (Formerly 053.320) The course is an introduction to the principles of optical, active and passive microwave remote sensing. A review of satellite and sensors and their geographic applications will be presented, along with digital image analysis techniques. Laboratory assignments will provide hands-on experience in dealing with remote sensing data. Not to be held with (053.454). Prerequisites: [(GEOG 1200) or GEOG 1201 (053.120) (C), or GEOG 1290 or GEOG 1291 (053.129) (C)], and [PHYS 1020 or PHYS 1021 (016.102) (C), or PHYS 1050 or PHYS 1051 (016.105) (C), or MATH 1300 or MATH 1301 (136.130) (C), or MATH 1500 or MATH 1501 (136.150) (C)], or permission of department head.

GEOG 3310 Atmospheric Dynamics, Storms and Radar (PS)

(Formerly 053.331) The course covers the critical dynamic processes that are associated with the Earth's atmosphere including forces that control wind, the kinematics of the wind field, general circulation, hodographs, thermal wind, laws of motion, mid-latitude circulations, convective storms and the utility of weather radar. Prerequisite: GEOG 2300 (053.230) (C), or permission of department head.

GEOG 3320 Introduction to Microclimates and Micrometeorology (PS)

(Formerly 053.332) This course introduces the concept of energy balance climatology and examines relationships among climate, microclimate, and environments of the Earth's surface and human-made environments. Studies include bioclimates and hydroclimates. Prerequisites: (GEOG 2310 (053.231) (C)), and (GEOG 2300 (053.230) (C)), or permission of department head.

GEOG 3390 Introduction to Climate Change and Its Causes (PS)

The primary objective of this course is to provide students with a general understanding of the physical and astronomical factors that drive global climate change. Focus will be given to current and future climate change in the context of observations and modeling. Not to be held with GEOG 3610. Prerequisite: a minimum of three credit hours from Geography or Environment courses, or permission of department head.

GEOG 3411 Géographie de l'eau

(L'ancien 053.341) L'eau, élément essentiel de la géographie physique: bilan d'eau, cycle hydrologique, infiltration, percolation et écoulement, eaux souterraines, hydrologie fluviale et marine: course d'eau, lacs et océans, environnement. Donné au Collège universitaire de Saint-Boniface. Préalable: une note minimale de C dans le GEOG 1290 ou GEOG 1291 (053.129), ou l'autorisation écrite du professeur.

GEOG 3421 L'eau, enjeu géostratégique

(L'ancien 053.342) L'eau, un enjeu stratégique d'importance: un survol historique
Undergraduate Studies

des enjeux liés à l'eau et les enjeux actuels, la répartition inégale de la ressource .eau. et son partage équitable, les solutions techniques, économiques, institutionnelles et juridiques envisagées et le droit international. Donné au Collège universitaire de Saint-Boniface. Préalable: une note minimale de C dans le GEOG 1280 ou GEOG 1281 (053.128), et les deux GEOG 2651 (053.265) et GEOG 2661 (053.266) (ou le GEOG 2430 (053.243)), ou l'autorisation écrite du professeur

GEOG 3431 Géographie de Canada (A)

Étude du Canada par régions. L'étudiant ne peut se faire créditer à la fois le GEOG 2560 (053.256) ou le GEOG 2570 (053.257) et le GEOG 3700 (053.370). Donné au Collège universitaire de Saint-Boniface. Préalable: une note minimale de C dans un minimum de 6 heures-crédits de géographie de niveau 1000 ou l'autorisation écrite du professeur.

GEOG 3460 Urban Geography (HS)

(Formerly 053.346) The course studies the processes and trends of urbanization; the classification of cities; central-place theory; cities as systems; land-use patterns; social forces and factorial ecology; and urban transport problems. Prerequisite: (GEOG 1200) or GEOG 1201 (053.120) (C), or GEOG 1280 or GEOG 1281 (053.128) (C), or permission of department head.

GEOG 3480 Canadian Problems (A)

(Formerly 053.348) The geographical basis of selected problems (e.g. regional, urban, rural, resource, land use). Prerequisite: GEOG 2560 (053.256) (C), or GEOG 2570 (053.257) (C), or GEOG 3431 (053.343) (C), or permission of department head.

GEOG 3481 Particularités de la géographie du Canada (A)

(L'ancien 053.348) Ce cours aborde des problèmes spécifiques la géographie canadienne: régions, urbanisme, milieu rural, ressources, utilisation du sol. Donné au Collège universitaire de Saint-Boniface. Préalable: une note minimale de C dans un des cours suivants: GEOG 2560 ou (053.256), GEOG 2570 (053.257) ou GEOG 3431 (053.343), ou l'autorisation écrite du professeur.

GEOG 3501 Géographie de l'Europe (A)

(L'ancien 053.350) Vue générale sur la géographie du continent européen et plus spécifiquement sur l'Union européenne. L'accent sera placé sur quelques pays. Donné au Collège universitaire de Saint-Boniface. Préalable: une note minimale de C dans un minimum de 6 heures-crédits de géographie de niveau 1000, ou l'autorisation écrite du professeur

GEOG 3520 Energy and Society (HS)

(Formerly 053.352) The course reviews in detail the role of energy in modern society. Explanation of basic energy laws and flows in the biosphere precedes discussion of energy resources, technologies, uses, and impacts. Prerequisite: a grade of C or better in a minimum of three credit hours from Geography courses numbered at the 1000 level, or permission of department head.

GEOG 3524 Unallocated Credit

Campus Manitoba course.

GEOG 3540 Regional Development Planning Theory and Practise (HS)

(Formerly 053.354) The course considers regional disparities in a range of Western economies including Canada. The regional problem is explored theoretically and in the application of policies to alleviate disparities. Prerequisite: (GEOG 1200) or GEOG 1201 (053.120) (C), or GEOG 1280 or GEOG 1281 (053.128) (C), or GEOG 2210 or GEOG 2211 (053.221) (C), or permission of department head.

GEOG 3580 Landforms (PS)

(Formerly 053.358) Present-day and Pleistocene glacial processes and landforms are examined in one term; slope processes and forms as well as the activities of rivers comprise the other. Human modification of these systems is discussed. Not to be held with GEOL 3490 (007.349). Prerequisite: (GEOG 1200) or GEOG 1201 (053.120) (C), or GEOG 1290 or GEOG 1291 (053.129) (C), or GEOG 2550 or GEOG 2551 (053.255) (C), or permission of department head.

GEOG 3590 Geography of Developing Countries (A)

(Formerly 053.359) The main theme is modernization; examples from South Asia and Africa south of the Sahara. Historical development, population and social problems, land use and conservation, urbanization and industrialization. Not to be held with GEOG 3591. Prerequisite: a grade of C or better in six credit hours from

Geography courses numbered at the 1000 level, or permission of department head.

GEOG 3591 Géographie des pays en voie de développement (A) (L'ancien 053.359) Le thème principal sera la modernisation des pays en voie de développement: exemples de l'Asie méridionale et de l'Afrique noire. Seront étudiés les aspects suivants: le développement historique, les problèmes démographiques et sociaux, l'utilisation du sol et la conservation des ressources, l'urbanisation et l'industrialisation. L'étudiant ne peut se faire créditer à la fois le GEOG 3590 (053.359). Donné au Collège universitaire de Saint-Boniface. Préalable: une note minimale de C dans un minimum de 6 heures-crédits de géographie niveau 1000, ou l'autorisation écrite du professeur.

GEOG 3640 Social Geography of the Environment (HS) This course provides an intermediate-level assessment of current geographical approaches to society and environment. Students are exposed to critical realist, social constructionist, Marxist, feminist and post-Colonial traditions as they are applied to environmental and social justice, globalization and public health. It includes discussion and a community-based learning project. Prerequisite: a grade of C or better in (GEOG 1200) or GEOG 1280, or permission of department head.

GEOG 3701 Canada : Évolution de l'écoumène (A) (L'ancien 053.370) Étude de l'impact qu'a eu l'arrivée des Européens, au début du XVII^e siècle, sur les différents aspects de l'environnement canadien; évolution de la nature et de l'utilisation de l'espace canadien. L'étudiant ne peut se faire créditer avec GEOG 3700 (053.370). Donné au Collège universitaire de Saint-Boniface. Préalable: une note minimale de C dans 6 heures-crédits de géographie de niveau 1000, ou l'autorisation écrite du professeur.

GEOG 3710 Population and the Third World (HS) (Formerly 053.371) This course examines the policies and problems associated with population growth and redistribution in the Third World. Prerequisite: GEOG 2480 or GEOG 2481 (053.248) (C), or SOC 2480 (077.248) (C), or permission of department head.

GEOG 3720 Refugees, Displacees, Exiles (HS) (Formerly 053.372) This course surveys the geographic dimensions of the nature, causes and consequences of past and contemporary involuntary migrations. Prerequisite: (GEOG 1200) or GEOG 1201 (053.120) (C), or GEOG 1280 or GEOG 1281 (053.128) (C), or GEOG 2480 or GEOG 2481 (053.248) (C), or permission of department head.

GEOG 3730 Geographic Information Systems (TS) (Lab Required) (Formerly 053.373) Weekly two-hour lab. An introduction to geographic information systems (GIS) input, processing, output and applications. Prerequisite: GEOG 2250 (053.225) (C), or permission of department head.

GEOG 3740 Field Studies in Geography (A,TS) (Formerly 053.374) A field course designed to introduce students to either a detailed area study or to field techniques employed for specific geographic enquiry. Prerequisite: Permission of department head.

GEOG 3750 Field Studies in Geography (A,TS) (Formerly 053.375) A field course designed to introduce students to either a detailed area study or to field techniques employed for specific geographic enquiry. Prerequisite: a grade of C or better in a minimum of three credit hours from Geography courses numbered at the 1000 level, or permission of department head.

GEOG 3760 Special Topics in Geography (Formerly 053.376) This course will vary from year to year depending on the needs of students and the interests of instructors. Prerequisite: Permission of department head.

GEOG 3761 Sujets particuliers en géographie (L'ancien 053.376) Le contenu de ce cours variera d'année en année selon les besoins des étudiants et la spécialité du professeur. Donné au Collège universitaire de Saint-Boniface. Préalable: l'autorisation écrite du professeur.

GEOG 3770 Special Topics in Geography (Formerly 053.377) This course will vary from year to year depending on the needs of students and the interests of instructors. Prerequisite: Permission of department head.

GEOG 3771 Sujets particuliers en géographie Le contenu de ce cours variera d'année en année selon les besoins des étudiants et la spécialité du professeur. Préalable: l'autorisation écrite du professeur.

GEOG 3800 Geography of Transportation Development (HS) (Formerly 053.380) This course examines the development of selected modes of transportation and their associated route and network development. Emphasis is on the place of transportation in the cultural, economic, and physical landscape of Canada and the United States since 1800. Prerequisite: a grade of C or better in a minimum of three credit hours from Geography courses numbered at the 1000 level, or permission of department head.

GEOG 3810 Quantitative Research Methods in Geography (TS) This course focuses on the quantitative analytical methods available for the interpretation on physical and human geography applications. Not to be held with GEOG 3680 (053.368). Prerequisite: GEOG 2530 (053.253) or STAT 1000 or STAT 1001 (005.100), or permission of department head.

GEOG 3821 Les territoires de la francophonie mondiale (A, HS) (L'ancien 053.382) La mise en place des espaces francophones à travers le monde: le développement et l'éclatement des empires français et belge. La territorialité et l'identité au sein de la francophonie internationale. Répartition géographique et développement institutionnel. Ententes politiques et aspirations territoriales. Donné au Collège universitaire de Saint-Boniface. Préalable: Un note minimale de C dans un minimum de 6 heures-crédits dans un cours de géographie de niveau 1000.

GEOG 3831 L'espace francophone panaméricain (A, HS) (L'ancien 053.383) L'étude des communautés francophones des Amériques dans le temps et dans l'espace. La mise en place de la francophonie panaméricaine et les circonstances de son éclatement. Ses enjeux économiques, sociaux, politiques et culturels. Les infrastructures, les institutions et les réseaux francophones. Donné au Collège universitaire de Saint-Boniface. Préalable: une note minimale de C dans le GEOG 3821 (053.382).

GEOG 3841 Les espaces francophones de l'Afrique, de l'Asie et de l'Océanie (A, HS) (L'ancien 053.384) L'étude des communautés francophones africaines, asiatiques et océaniques. Les étapes de la colonisation et de la décolonisation, l'évolution vers l'indépendance et l'accession au statut d'État souverain. La mise en place des infrastructures, des institutions et des réseaux francophones. Donné au Collège universitaire de Saint-Boniface. Préalable: une note minimale de C dans GEOG 3821 (053.382).

GEOG 3850 Sustainable Manitoba (A) This course approaches local sustainability issues from an interdisciplinary perspective. By looking at the ecological, social and economic aspects from a variety of discipline perspectives, a fuller understanding of sustainability is achieved. The broad range of perspectives is achieved through participation of guest speakers from other faculties and outside of the university as well as excursion outside the classroom. Not to be held with ENVR 3850. Prerequisite: 60 credit hours of course work, or permission of department head.

GEOG 3860 Animal Geographies (HS) This course presents a variety of topics concerning the interactions between humans and animals, how humans influence and use animals, and the many roles animals play in human lives and environments. Animal Geographies lies at a meeting point between physical and human geography, where we must consider the blurring boundaries between what it means to be animal/human, and the implications of how animals are used and represented. A wide variety of perspectives, beliefs, and points of view will be explored. Prerequisite: Permission of department head.

GEOG 3870 Food Geographies This course provides a critical examination of the geographies of food at a variety of scales, from the body to the global. The course focuses on themes in three interconnected areas: 1) food production and the global food system from farm to plate including agribusiness and alternative food production and distribution models; 2) food consumption habits and beliefs and foodways as geographically contingent material culture; and 3) food (in) security and its relationship to health and wellbeing. This course is cross-listed as HNSC 3630. Prerequisite: a grade of C or better in GEOG 1280 or GEOG 1281 or (GEOG 1200), or permission of department head.

GEOG 3900 Geography of Manitoba (A)

A regional study of Manitoba emphasizing the unique character and diversity of Manitoba's cultural landscapes. The historical, social, cultural, economic and political distinctiveness along with the impact of European settlement and aboriginal displacement will be discussed. Prerequisite: a grade of C or better in GEOG 2900, or permission of department head.

6.7 Geography Course Descriptions-4000 Level

GEOG 4050 Ecosystem Management

This course will provide students with an understanding of the practical applications of ecological science, environmental policy, and resource management approaches in the large-scale planning of landscapes. The course will review ecological principles and trace the historical development of the ecosystem concept. Comparisons are made to other possible environmental management approaches. The synthesis of major elements and concepts will be reinforced through case studies on the Manitoba landscape, with an emphasis on practical learning by students through field seminars and group discussions. Not to be held with ENVR 4050. Prerequisite: Permission of department head.

GEOG 4060 Biogeography

This course will provide students with a general understanding of the historical, ecological, analytical, and conservation aspects of biogeography. The course will also have a dual focus on the principles and concepts of reasons for the distribution of plants and animals worldwide, as well as incorporating discussion on as many local (Manitoba, Canada, North America) examples as possible. Not to be held with ENVR 4060. Prerequisite: Permission of department head.

GEOG 4200 Advanced Methods in Remote Sensing

(Lab Required) (Formerly 053.420) Provides instruction in the current theory and application of remote sensing technology to Earth system Science. Emphasis will be placed on the processing and interpretation of remote sensing imagery and the integration of remote sensing data with other spatial data. Not to be held with (053.454). Prerequisite: GEOG 3200 (053.320) (C), or permission of department head.

GEOG 4260 Sacred Lands

(Formerly 053.426) Students will increase their understanding of the importance and significance of Sacred Lands and Sacred Spaces to International Indigenous Peoples. Experiential learning, seminars, and a field component may be included. Not to be held with NATV 4260 (032.426). Prerequisite: Permission of department head.

GEOG 4280 Gender and the Human Environment

This upper-level seminar course will develop in students a depth and breadth of understanding appropriate to the honours undergraduate/graduate level in the area of gender geography scholarship. From critical social science theoretical positions, this course asks students to examine what we can learn about how humans live on the earth if we see them as gendered. Just as we may also understand humans and their interactions in and with spaces, places and environments through the lenses of race, ethnicity, class, age and/or combinations of these categories with gender. Prerequisite: A grade of C or better in a minimum of six credit hours in Geography, or permission of department head.

GEOG 4290 Geographies of Health and Health Care

(Formerly 053.429) This course provides an introduction to and critical examination of the geographies of health and healthcare. Topics include perceptions and determinations of health and health care; health care delivery, focusing on spatial patterns and inequities; and the relationship between environment and health, particularly impacts of environmental contamination. Prerequisite: Permission of department head.

GEOG 4300 Synoptic Meteorology and Weather Analysis

(Formerly 053.430) Applied aspects of meteorology are described in terms of weather analysis and forecasting techniques for synoptic-scales and meso-scales using various meteorological tools. An introduction to severe weather forecasting techniques will also be described. Prerequisite: GEOG 3310 (053.331) (C), or permission of department head.

GEOG 4310 Boundary-Layer Climatology and Micrometeorology

(Formerly 053.431) A seminar course on advanced topics in microclimatology and micrometeorology. Prerequisite: GEOG 3320 (053.332) (C), or permission of

department head.

GEOG 4330 Concepts in Atmospheric Modeling

This course will primarily focus on numerical modeling applications and techniques of the Earth's atmosphere with an emphasis on weather prediction. This includes understanding basic modeling terminology, numerical schemes, structure of models, types of models, what is required to run a model, and an introduction to data assimilation and ensemble techniques to weather prediction. Not to be held with GEOG 4320. Prerequisite: GEOG 3310 (C) or GEOG 3320 (C), or permission of department head.

GEOG 4350 Parks and Protected Areas Planning and Management: Field Studies

The course is taught in two segments, an on-campus component and field study component taking place in Banff National Park. The on-campus component examines the historical development of the concept of parks and protected areas, the role of interpretation, management and research in the parks and emerging issues in the management of parks and protected areas. In addition, during the on-campus component planning for the field will take place. The field segment will focus on a wide variety of management issues with particular attention to Banff National Park. Emerging issues and trends will be examined and past management responses evaluated. There will be opportunities for students to investigate specific management issues of interest to them and to participate in current research being conducted in the park. This course is also offered in the Faculty of Kinesiology and Recreation Management as REC 4350. Prerequisite: Permission of department head.

GEOG 4390 Global Climate Change

Students will be introduced to the complexities of climate changes through a series of introductory lectures and reading assignments that focus on recent scientific publications and review articles (mathematical skills are not required). Both sides of the climate change debate will be addressed in weekly assignments, and students will defend their conclusions in classroom discussion. Each student will take on a project in some aspect of climate change -- glaciers, sea ice, temperature trends, precipitation, agriculture, animal migration, aerosols, or a regional impact. Prerequisite: A grade of C or better in GEOG 3390 (or GEOG 3610 or 053.361), or permission of department head.

GEOG 4410 Rural Land Use

(Formerly 053.441) This course focuses on the dynamics of change on the rural-urban fringe. It involves seminars and individual field research. Prerequisite: Permission of department head.

GEOG 4550 Topics in Air Pollution: Climatology, Location, and Planning

(Formerly 053.455) An introduction to air pollution sources; meteorology of air pollution; calculation of ground concentrations; effects and controls; environmental planning and policy. Prerequisite: Permission of department head.

GEOG 4560 Techniques in Climatology

(Formerly 053.456) Instrumentation, the sources of climatic data, and the use of satellite photography, as well as methods of analysis and presentation are discussed. Prerequisite: GEOG 3320 (053.332) (C), or permission of department head.

GEOG 4580 Concepts and Methods in Geography

(Formerly 053.458) This course surveys the historical development of the nature, scope, and methods of human and physical geography. Prerequisite: Permission of department head.

GEOG 4590 Spatial Analysis

(Formerly 053.459) The theory and techniques of spatial statistical data exploration, inference and hypothesis testing as they pertain to geography analysis are explored. The role of spatial analytical techniques in field investigations, GIS and remote sensing applications are discussed. Prerequisites: (GEOG 3680 or 053.368) (C), and (MATH 1300 or MATH 1301 (136.130) or MATH 1500 or MATH 1501 (136.150) (C)), or permission of department head.

GEOG 4650 Models in Regional Analysis

(Formerly 053.465) Emphasis is placed on the use of regression techniques in regional analysis including the classical ordinary least squares methods and two-stage least squares. Migration and industrial location models are developed and calibrated using these techniques. Prerequisite: Permission of department head.

GEOG 4660 Honours Thesis

(Formerly 053.466) This course involves the production of a thesis under the supervision of a department faculty member. Prerequisite: Permission of department head.

GEOG 4670 Selected Issues

(Formerly 053.467) Intensive study of selected geographic issues. Prerequisite: Prearranged written consent of an individual instructor and permission of department head.

GEOG 4720 Advanced Methods in Geographic Information Systems

(Lab Required) (Formerly 053.472) Weekly two-hour lab. This course focuses on the practical application of techniques used in Geographic Information Systems (GIS) and the development of techniques used in Geographic Information Systems (GIS) and the development of GIS models. The development, testing and presentation of GIS data, models and results are studied. Prerequisite: Permission of department head.

SECTION 7: Bachelor of Environmental Science and Bachelor of Environmental Studies Degree Regulations, Program Descriptions and Courses Offered by

SECTION 6: Bachelor of Environmental Science and Bachelor of Environmental Studies Degree Regulations, Program Descriptions and Courses Offered by,

7.1 Program Information

7.1 Program Information,

The Clayton H. Riddell Faculty of Environment, Earth, and Resources offers General, Major, and Honours degree programs leading to a Bachelor of Environmental Science (B.Env.Sc.) and Bachelor of Environmental Studies (B.Env.St.). Through an interdisciplinary approach, environmental issues relating to human populations, sustainable resource development, pollution and conservation, environmental health, and endangerment and preservation of species are explored in conjunction with alternative conditions that have the potential to reverse current trends and contribute to ecological sustainability. Students have access to undergraduate courses offered by the Clayton H. Riddell Faculty of Environment, Earth, and Resources as well as the Faculties of Agricultural and Food Sciences, Arts, Law, Engineering, Architecture, and Science in order to complete their education. They are expected to take many courses outside the Riddell Faculty enabling them to obtain a truly interdisciplinary education.

The Major and Honours degree programs serve students who desire advanced study in an environmental field. The programs are intended for students interested in professional training and the opportunity for advanced research. Honours degree programs demand higher academic performance and lead most directly to graduate studies. Students who are ineligible to enter the Honours degree program in their third year may establish this in the following year on the basis of their improved scholastic performance. See a [Riddell Faculty student advisor](#) in the Faculty general office for information. The degree programs may be pursued on a full- or part-time basis.

The B.Env.Sc. and B.Env.St. degree programs share a general structure that includes a foundation of either introductory Sciences or Social Sciences/ Humanities. Students complete an environmental core and a Focus Area that is defined through consultation with a [Riddell Faculty student advisor](#) in the Faculty general office. Students completing the General degree program are required to complete 9 credit hours in a Focus Area; Major, Major Coop, Honours and Honours Coop students complete 33 credit hours in a Focus Area. Other Focus Area requirements are defined in the graduation requirements in [section 7.3.1](#) in this *Chapter*. You may also refer to the [Focus Area Brochure](#) for further information.

General

To qualify for the degree Bachelor of Environmental Science (General) or Bachelor of Environmental Studies (General), students must complete 90 credit hours including all faculty and degree requirements (including the foundation, environmental core and 9 credit hours of minimum 2000-level courses in a Focus Area). Minimum performance requirements include passing grades ('D' or better) in

each course and a minimum degree Grade Point Average of 2.00. There is no limit to the number of credit hours a student completes provided he/she does not exceed 48 credit hours of failed courses.

Major

To qualify for the degree Bachelor of Environmental Science (Major) or Bachelor of Environmental Studies (Major), a student must complete 120 credit hours with a minimum degree grade point average of 2.00. Focus Area requirements are as follows: 33 credit hours of which 21 credit hours must be completed at the 3000- or 4000-level; 2.00 Grade Point Average. Major (Coop) students must attain a minimum degree Grade Point Average of 2.50. There is no limit to the number of credit hours a student completes provided he/she does not exceed 18 credit hours of failed courses.

Honours

To qualify for the degree Bachelor of Environmental Science (Honours) or Bachelor of Environmental Studies (Honours), a student must complete 120 credit hours with a minimum degree grade point average of 3.25. Focus Area requirements are as follows: 33 credit hours of which 21 credit hours must be completed at the 3000- or 4000-level; 3.00 Grade Point Average and minimum 'C+' grades. There is no limit to the number of credit hours a student completes provided he/she does not exceed 18 credit hours of failed courses.

Minor in Another Department

Students in the B.Env.Sc. and B.Env.St. have the opportunity to complete a Minor in a subject field that is different than that of the declared major, and which normally consist of 18 credit hours from a department offering this option at the University of Manitoba. Students are not permitted to complete a Minor in Environmental Science or Environmental Studies. Contact a [Riddell Faculty student advisor](#) in the Faculty general office for further information about eligible Minors.

7.2 Entrance Requirements

7.2 Entrance Requirements ,

Students admitted from University 1 are placed in the Major degree program in either the Bachelor of Environmental Science or Bachelor of Environmental Studies until they have completed a minimum of 48 credit hours after which they can transfer to the General or Honours program or remain in the Major. To make a program transfer, students must consult with a [Riddell Faculty student advisor](#).

Transfer students, and Second Degree students may be eligible for direct entry into the General or Honours programs. These students should consult with a [Riddell Faculty student advisor](#) in the general office.

7.2.1 and 7.2.2 define the Entrance requirements for the degree programs in the Bachelor of Environmental Science and Bachelor of Environmental Studies, respectively.

7.2.1 Bachelor of Environmental Science Entrance Requirements			
Degree Program in B.Env.Sc.	Minimum Number of Credit Hours	Minimum Degree Grade Point Average	Additional Entrance Requirements
Honours	48	3.25	No failures on entry ¹ ; a grade of 'B' or better in ENVR 1000 and ENVR 2000 as well as a minimum 'C+' in 6 hours of BIOL 1020 ³ , BIOL 1030 ³ or CHEM 1310 ³ and 'C' in the other course.
Honours	60	3.25	No failures on entry ¹ ; ENVR 2900; students

(Coop) ²			must satisfy the requirements for entrance/continuation in the regular program and (normally) have completed ENVR 1000, ENVR 2000, ENVR 2270, ENVR 3160, STAT 1000 ³ , STAT 2000 ³ , BIOL 2300 ³ (AGEC 2370), ECON 2390 (ABIZ 2390), BIOL 1020 ³ , BIOL 1030 ³ and one of GEOG 1290 ³ or GEOL 1340.
Major	24	2.00	12 credit hours in ENVR 1000, ENVR 2000, BIOL 1020 ³ , BIOL 1030 ³ , CHEM 1300 ³ , CHEM 1310 ³ , STAT 1000 ³ , STAT 2000 ³ , MATH 1500 ³ (or MATH 1200 ³ , MATH 1300 ³ , MATH 1310, MATH 1510, MATH 1520), one of GEOG 1290 ³ or GEOL 1340, PHYS 1020 ³ (or PHYS 1050 ³), PHYS 1030 ³ (or PHYS 1070 ³), with a grade of 'C+' or better in six of the 12 credit hours, and a grade of 'C' or better in the remaining six credit hours.
Major (Coop) ²	60	2.50	ENVR 2900; students must satisfy the requirements for continuation in the regular program and (normally) have completed ENVR 1000, ENVR 2000, ENVR 2270, ENVR 3160, STAT 1000 ³ , STAT 2000 ³ , BIOL 2300 ³ (AGEC 2370), ECON 2390 (ABIZ 2390), BIOL 1020 ³ , BIOL 1030 ³ , and one of GEOG 1290 ³ or GEOL 1340.
General	48	2.00	
<p>¹Students may be permitted to enter the program without satisfying all requirements listed. Students should consult with a Student Advisor for further information.</p> <p>²Students may be permitted to enter the program without satisfying all requirements listed. Students should consult with the Cooperative Education Coordinator for further information.</p> <p>³Equivalent courses offered through Collège universitaire de Saint-Boniface may be used in lieu of the specified course identified in the entrance requirements chart. 7.3 Minimum Performance Requirements for Continuation and Graduation

7.3 Minimum Performance Requirements for Continuation and Graduation, A student's academic performance will be assessed with his/her application for admission to the Clayton H. Riddell Faculty of Environment, Earth, and Resources and following each *term* thereafter. A Riddell Faculty student advisor must approve a student's registration each Fall/Winter and Summer term. Any revisions to this schedule should also be approved prior to the end of the registration revision period.

To be in **good standing** and permitted to continue in a degree program, a student must achieve the minimum standards outlined in [section 7.3.1](#) at each point of assessment. This assessment is based on the student's minimum degree Grade Point Average and the number of failed courses after admission to the Riddell Faculty.

To graduate from either a Bachelor of Environmental Science or the Bachelor of Environmental Studies with the intended degree designation, a student must achieve the minimum standards and graduation requirements outlined in [section 7.3.1](#) following the final term of registration and satisfy all degree course requirements in the foundation, environment core and Focus Area as defined in [section 7.1](#) of this *Chapter*. In addition, students must satisfy the residence requirement by completing either a total of 48 credit hours or their last 24 credit hours at the University of Manitoba. These courses must be acceptable for credit in either the Bachelor of Environmental Science or the Bachelor of Environmental Studies.

Students who do not meet these minimum performance requirements for continuation or graduation will be required to transfer to the appropriate program based on their performance and eligibility as defined in 7.3.1. Students who do not meet the minimum performance requirements for the General degree program will be placed on probation or academic suspension as defined in [section 3.14 Academic Warning, Probation and Academic Suspension \(Academic Standing\)](#) in this *Chapter*.

Students required to withdraw from the Honours degree program will have the statement 'Required to Withdraw from the Honours Program' recorded on their transcript of marks. Similarly, students required to withdraw out of the Major degree program will have the statement 'Required to Withdraw from the Major Program' recorded on their transcript of marks.

7.3.1 Minimum Performance Requirements

Degree Program (Credit Hours)	Minimum Performance Requirements			Additional Graduation Requirements ¹	
	Minimum Degree Grade Point Average (DGPA)	Maximum Credit Hours of Failures	Focus Area	Minimum credit hours of course work completed at	Coop Option Courses

				the 3000- and 4000-levels	
General (90)	2.00	48	9 credit hours		
Major (120)	2.00	18	33 credit hours of which 21 must be at the 3000- or 4000-level; minimum cumulative GPA of 2.00.	33 credit hours	
Major (Coop) (120)	2.50	18	33 credit hours of which 21 must be at the 3000- or 4000-level; minimum cumulative GPA of 2.00.	33 credit hours	ENVR 2900, ENVR 3900, ENVR 3910, ENVR 3980, ENVR 3920, ENVR 3990; (ENVR 4910 and ENVR 4980 are optional)
Honours (120)	3.25	18	33 credit hours of which 21 must be at the 3000- or 4000-level; minimum cumulative GPA of 3.00; minimum 'C+' grade in each course.	39 credit hours	
Honours (Coop) (120)	3.25	18	33 credit hours of which 21 must be at the 3000- or 4000-level; minimum cumulative GPA of 3.00; minimum 'C+' grade in each course.	39 credit hours	ENVR 2900, ENVR 3900, ENVR 3910, ENVR 3980, ENVR 3920, ENVR 3990; (ENVR 4910 and ENVR 4980 are optional)
¹ Students must satisfy the residence requirement for the degree program in order to be eligible for graduation. This is defined as either a total of 48 or the last 24 credit hours at the University of Manitoba.					

7.4 Graduating with Distinction or First Class Honours

7.4 Graduating with Distinction or First Class Honours, With Distinction

Students graduating with a Bachelor of Environmental Science (General) or Bachelor of Environmental Studies (General) degree will have their degree granted 'With Distinction' if they have a minimum Degree Grade Point Average of 3.50 on all course work.

Students graduating with a Bachelor of Environmental Science (Major) or Bachelor of Environmental Studies (Major) degree will have their degree granted 'With Distinction' if they have a minimum Degree Grade Point Average of 3.50 on all course work.

The term Degree with Distinction will appear both on the parchment and on the student's transcript of marks.

First Class Honours

Students in the Honours program will have their degree granted with 'First Class Honours' if they have a minimum Degree Point Average of 3.50 based on all acceptable course work. The term First Class Honours will appear both on the parchment and on the student's transcript of marks.

MINOR 18 CREDIT HOURS

ENVR 1000, ENVR 2000	12 credit hours of ENVR courses number at the 2000-level or above.
----------------------	--

NOTES:

- ¹Entrance into the degree programs is summarized in [section 7.2.1](#) of this *Chapter*.
- ²The courses required in this program will satisfy the university mathematics requirements.
- ³MATH 1510 or MATH 1520 may be taken in place of MATH 1500 (or equivalent).
- ⁴It is recommended that students consider a selection from List A below when selecting courses from the Faculty of Arts.
- ⁵PHYS 1050 and PHYS 1070 may be used in lieu of PHYS 1020 and PHYS 1030, respectively.
- ⁶MATH 1310 and MATH 1710 may be taken in place of MATH 1300 and MATH 1700 (or equivalent), respectively.
- ⁷Focus Area courses must include a minimum of 21 credit hours at the 3000- and/or 4000-level. Focus Area performance requirements are defined in [section 7.3](#) of this *Chapter*. Information on Focus Areas is available in the [Focus Area Brochure](#).
- ⁸ENVR 2170 may be used in lieu of ENVR 2270.
- ⁹ENVR 2650 may be used in lieu of ENVR 3160.

IMPORTANT: The Honours and Major programs need not be completed in the

manner prescribed in the chart above. The chart indicates one possible arrangement of the required courses and is meant to be a guide around which students can plan their program.

NOTE:

- To fulfil prerequisite requirements, a grade of 'C' must be achieved, unless otherwise stated, in any course stipulated as a prerequisite to a further course.
- Students should review the current course topics available through *ENVR 2010* (1.5), *ENVR 2020* (3), *ENVR 3000* (3), *ENVR 3010* (1.5), *ENVR 3020* (3), *ENVR 4000* (3), *ENVR 4010* (1.5), and *ENVR 4020* (3) as well as those offered through *GEOG 3740* (6), *GEOG 3750* (3), *GEOG 3760* (6), *GEOG 3770* (3) and *GEOG 4670* (3). Also, all courses are not offered every year or every term. The course schedule for the current academic term is available from the [Class Schedule](#).
- Students registering in certain courses may be required to participate in field trips or field components and pay a portion of the associated expenses. For details, contact the [Department of Environment and Geography general office](#).
- Equivalent courses offered through Collège universitaire de Saint-Boniface may be used in lieu of the specified course identified in the program requirements chart. Collège universitaire de Saint-Boniface courses end in the number '1' (e.g. CHEM 1301).

NOTES:		
¹ Entrance into the degree programs is summarized in 7.2.2 .		
² The courses required in this program will satisfy the university mathematics requirements .		
³ GEOG 1281 and GEOG 1291 may be used in lieu of GEOG 1280 and GEOG 1290.		
⁴ Students are permitted to substitute NATV 1220 with another 3 credit hours from the department (not a language) or approved alternative course. See the Riddell Faculty student advisor for assistance.		
⁵ Students with an interest in the Conservation and Biodiversity Focus Area are advised to complete the combination of BIOL 1020 and BIOL 1030 as well as BIOL 2300 (or AGECE 2370) instead of BIOL 1010 and BIOL 2390.		
⁶ Met if students complete ECON 2390. Otherwise, it is recommended that students consider a selection from List A below when selecting courses from the Faculty of		

Arts. ⁷ Students must complete 3 credit hours of course work containing significant international content. Students are referred to List B for a list of available courses. Students may substitute with another course as approved by the student advisor. ⁸ Focus Area courses must include a minimum of 21 credit hours at the 3000- and/or 4000-level. Focus Area performance requirements are defined in section 7.3 of this <i>Chapter</i> . Information on Focus Areas is available in the Focus Area Brochure . ⁹ ENVR 2650 may be used in lieu of ENVR 3160. ¹⁰ GEOG 3680 may be used in lieu of GEOG 3810. IMPORTANT: The Honours and Major programs need not be completed in the manner prescribed in the chart above. The chart indicates one possible arrangement of the required courses and is meant to be a guide around which students can plan their program. NOTE:
<ul style="list-style-type: none"> To fulfil prerequisite requirements, a grade of 'C' must be achieved, unless otherwise stated, in any course stipulated as a prerequisite to a further course. Students should review the current course topics available through <i>ENVR 2010</i> (1.5), <i>ENVR 2020</i> (3), <i>ENVR 3010</i> (1.5), <i>ENVR 3020</i> (3), <i>ENVR 4000</i> (3), <i>ENVR 4010</i> (1.5), and <i>ENVR 4020</i> (3) as well as those offered through <i>GEOG 3740</i> (6), <i>GEOG 3750</i> (3), <i>GEOG 3760</i> (6), <i>GEOG 3770</i> (3) and <i>GEOG 4670</i> (3). Also, all courses are not offered every year or every term. The course schedule for the current academic term is available from the Class Schedule. Students registering in certain courses may be required to participate in field trips or field components and pay a portion of the associated expenses. For details, contact the Department of Environment and Geography general office. Equivalent courses offered through Collège universitaire de Saint-Boniface may be used in lieu of the specified course identified in the entrance requirements chart. Collège universitaire de Saint-Boniface courses end in the number '1' (e.g. GEOG 1281).

List A: Recommended List of Faculty of Arts Electives. Students may wish to consider courses from the following list when identifying appropriate selections from the Faculty of Arts.

- ANTH 1210 Human Origins and Antiquity Cr.Hrs.3
- ANTH 1220 Cultural Anthropology Cr.Hrs.3
- ANTH 1520 Critical Cultural Anthropology Cr.Hrs.3
- ECON 1010 Introduction to Microeconomic Principles Cr.Hrs. 3
- ECON 1020 Introduction to Macroeconomic Principles Cr.Hrs. 3
- ECON 1210 Introduction to Canadian Economic Issues and Policies Cr.Hrs.3
- ECON 1220 Introduction to Global and Environmental Economic Issues and Policies Cr.Hrs.3
- NATV 1200 The Native Peoples of Canada Cr.Hrs.6
- NATV 1240 The Native Peoples of Canada, Part 2 Cr.Hrs.3
- PHIL 1200 Introduction to Philosophy Cr.Hrs.6

PHIL 1290 Critical Thinking Cr.Hrs.3

PHIL 1320 Introductory Logic Cr.Hrs.6

PHIL 1510 Historical Introduction to Philosophy Cr.Hrs.6

RLGN 1420 Ethics in World Religions Cr.Hrs.3

RLGN 2180 Theory of Nature Cr.Hrs.3

List B: Courses containing significant international content:

ABIZ 1010 Economics of World Issues and Policies Cr.Hrs.3

ECON 2550 Political Economy 2: Economic Growth and Fluctuations in a Global Economic Environment Cr.Hrs.3

ECON 3670 International Trade Cr.Hrs.3

POLS 2040 Introduction to International Relations Cr.Hrs.6

POLS 3220 Globalization and the World Economy Cr.Hrs.3

POLS 3250 International Political Economy Cr.Hrs.3

GEOG 4260 Sacred Lands Cr.Hrs.3

or as approved by a [Riddell Faculty student advisor](#)

7.7 Environment, Earth, and Resources Course Descriptions-1000 Level

EER 1000 Earth: A User's Guide

This course will present a multi-disciplinary introduction to the Planet Earth as both the source of essential resources and as the site of resulting negative impacts. Focus in the course will be provided by addressing important and current topics, case studies, and concepts that the well-educated citizen of the Earth should understand and will include natural and human-induced processes within a broad range of spatial and temporal scales.

7.8 Environmental Science and Environmental Studies Course Descriptions-1000 Level

ENVR 1000 Environmental Science 1 - Concepts

(Formerly 128.100) This course will introduce students to the conceptual framework of the environment by examining its physical, biological, and social components. General topics to be considered will include ecological principles and the responses of natural and managed systems to disturbance; population growth; biodiversity and conservation; and environmental sustainability. Not to be held with BIOL 1340 (071.134)

7.8 Environmental Science and Environmental Studies Course Descriptions-2000 Level

ENVR 2000 Environmental Science 2 - Issues

(Formerly 128.200) This course will briefly review the major features of the structure and function of natural systems along with the degree to which these have been compromised. The main component of the course, however, will concentrate on the identification of the issues that underlie environmental degradation, while exploring alternative conditions that have the potential to reverse current trends and ultimately contribute to ecological sustainability. Prerequisite: ENVR 1000 (128.100) (C).

ENVR 2010 Field Topics in Environment

Field and practical experience in selected topics of current interest in the Environmental Science and Studies, with the content to vary depending on the needs of students and faculty. Prerequisite: Permission of department head.

ENVR 2020 Extended Field Topics in Environment

Field and practical experience in selected topics of current interest in the Environmental Science and Studies, with the content to vary depending on the needs of students and faculty. Prerequisite: Permission of department head.

ENVR 2180 Introductory Toxicology

(Formerly 128.218) A survey of general principles underlying the effects of toxic substances on biological systems, including consideration of the history, scope and applications of toxicology, the mechanisms of toxic action, and some major types of toxicants. Not to be held with ENVR 2190 (128.219) or BIOL 2380 (BOTN 2180 or 001.218 or ZOOL 2180 or 022.218) or BIOL 2382 (BOTN 2190 or 001.219 or ZOOL 2190 or 022.219) or AGRI 2180 (065.218) or AGRI 2190 (065.219). Prerequisites: [BIOL 1030 or BIOL 1031 or (071.125) (C)], and [(CHEM 1310 or CHEM 1311 (002.131) (C), or CHEM 1320 (002.132) (C)].

ENVR 2190 Toxicological Principles

(Formerly 128.219) A survey of general principles underlying the effects of toxic substances on biological systems, including consideration of the history, scope and applications of toxicology, and the mechanisms of toxic action. Not to be held with ENVR 2180 (128.218) or BIOL 2380 (BOTN 2180 or 001.218 or ZOOL 2180 or 022.218), or BIOL 2382 (BOTN 2190 or 001.219 or ZOOL 2190 or 022.219), or AGRI 2180 (065.218), or AGRI 2190 (065.219). Prerequisites: [BIOL 1030 or BIOL 1031 or (071.125) (C)], and [CHEM 1310 or CHEM 1311 (002.131) (C), or CHEM 1320 (002.132) (C)].

ENVR 2270 Environmental Problem Solving and Scientific Thinking

A course to help students develop skeptical and scientific thinking around environmental issues and problems. A multi-disciplinary approach will be taken, using current topical issues as examples. Not to be held with (ENVR 2170 or 128.217). Prerequisites: [CHEM 1310 or CHEM 1311 (002.131) (C)] and [BIOL 1030 or BIOL 1031 or (071.125) (C)].

ENVR 2350 Technical Communication in the Environmental Sectors

(Lab Required) (Formerly 128.235) An introduction to technical communication skills required for environmental practitioners in research, government, and industry. The course covers technical writing and literature search techniques, business writing including reports, memos and e-mails, professional presentation skills, and fundamental internet skills. Practical experience is gained through assignments and laboratory exercises. Not to be held for credit with (128.205). Prerequisite: ENVR 1000 (128.100) or BIOL 1340 (071.134) (C), or permission of department head.

ENVR 2550 Environmental Chemistry

(Lab Required) (Formerly 128.255) An introduction to the chemistry of the environment. Emphasis will be on the composition of the natural environment and the processes of natural and human-introduced chemical species that take place within it. The course will provide students with the chemical basis for understanding the environment and environmental problems. Not to be held with CHEM 2550 (002.255). Prerequisite: CHEM 1310 or CHEM 1311 (002.131) (C).

ENVR 2604 Unallocated Credit

Campus Manitoba course.

ENVR 2900 Professional Development in the Environmental Sectors 1

(Formerly 128.290) Through self directed learning students are introduced to the environmental sectors and issues including workplace health and safety, the respectful workplace, managing workloads and expectation, and professionalism. The course is a mandatory requirement to Cooperative Education Option admission. Prerequisite: 30 credit hours of university credit.

7.8 Environmental Science and Environmental Studies Course Descriptions-3000 Level

ENVR 3000 Multidisciplinary Topics in Environmental Science 1 (Formerly 128.300) Selected topics of current interest in the Environmental Sciences and Studies. Course content to vary with each offering depending on the needs and interests of students and faculty. Prerequisites: Permission of department head, and 60 credit hours of university credit.

ENVR 3010 Field Topics in Environmental Science 1 (Formerly 128.301) Field and practical experience in selected topics of current interest in the Environmental Sciences and Studies, with the content to vary depending on the needs and interests of students and faculty. Prerequisite: Permission of department head.

ENVR 3020 Extended Field Topics in Environmental Science 1 (Formerly 128.302) Field and practical experience in selected topics of current interest in the Environmental Sciences and Studies, with the content to vary depending on the needs and interests of students and faculty. Prerequisite: Permission of department head.

ENVR 3110 Environmental Conservation and Restoration (Lab Required) (Formerly 128.311) Environmental conservation and restoration are introduced and approaches based on science and traditional knowledge are contrasted. An emphasis is placed on systems thinking and both local and international case studies. Not to be held with (128.310). Prerequisites: BIOL 2390 (BOTN 2280 or 001.228 or ZOOL 2290 or 022.229) (C), or BIOL 2300 (BOTN 2370 or BOTN 2371 or 001.237 or ZOOL 2370 or ZOOL 2371 or 022.237) (C), or AGEC 2370 (065.237) (C), or permission of department head.

ENVR 3160 Environmental Responsibilities and the Law Environmental responsibilities and their legal framework in terms of policies, legislation, standards and guidelines and the tools to manage responsibility are examined through lectures, case study review and discussion. Environmental liability and due diligence are reviewed in relation to responsibilities of organizations and individuals. Strategies to manage environmental liabilities, including environmental and risk assessment, are also discussed. Not to be held with (ENVR 3150 or 128.315 or ENVR 2650) or ABIZ 3550. Prerequisite: a minimum grade of C in ENVR 2000, or permission of department head.

ENVR 3180 Methods in Ecotoxicology (Lab Required) This is a laboratory-based course exploring the development, conduction and application of bioassays, biomarkers, bioindicators and biomonitors in ecotoxicology. Through a laboratory setting, students learn how to perform standard bioassays for a variety of species (plants and invertebrates) as well as systems (aquatic and terrestrial) at different levels of biological organization, from the individual to the ecosystem. Not to be held with (ENVR 3300). Prerequisites: a minimum grade of C in each of ENVR 2180 or BIOL 2380 (BOTN 2180, ZOOL 2180) or AGRI 2180, and a second year course in the Faculty of Science or the Faculty of Agricultural and Food Sciences that has a laboratory component, or permission of department head.

ENVR 3250 Environmental Assessment (Lab Required) (Formerly 128.325) The theory, principles and practices of environmental assessment as a planning and decision-making process to identify and mitigate adverse effects of development projects. Environmental assessment is defined in the context of federal and provincial legislation, and applicable standards and guidelines. Laboratory assignments involve practical experiences, case study review and basic report preparation. Prerequisites: [ABIZ 3550 (061.355) (C) or (ENVR 3150 or 128.315) (C)], and [BIOL 2300 (BOTN 2370 or BOTN 2371 or 001.237 or ZOOL 2370 or ZOOL 2371 or 022.237) (C)], or AGEC 2370 (065.237) (C), or permission of department head.

ENVR 3340 Circumpolar Cultures and Lifestyles This course provides an introduction to the culture, lifestyles, belief systems, material culture, art, environmental issues, and politics of Aboriginal Peoples in northern Canada, Greenland, Alaska, Siberia and Scandinavia. Prerequisite: Permission of department head.

ENVR 3350 Environmental Management Systems (Formerly 128.335) This course provides an introduction to environmental management systems and specific material on the ISO 14001 international EMS standard. Auditing principles and techniques are described with specific guidance on

auditing an ISO 14001 EMS. Prerequisite: Permission of department head.

ENVR 3400 Introduction to Environment and Health (Formerly 128.340) An overview of the linkages between human health and environmental issues. The course discusses the nature of environmental hazards, human exposure and health outcomes. Major environmental and human health issues such as air pollution, hazardous substances, endocrine disruptors and products in the home are covered. Not to be held with (128.421). Prerequisite: 60 credit hours of university credit.

ENVR 3500 Project in Environmental Science (Formerly 128.350) A research project in any aspect of environmental science, chosen in consultation with the department head and an appropriate supervising faculty member. Written reports and oral presentation on the results of the project will be required. The course is normally available only to final year students in the Environmental Science or Studies Program. Prerequisite: Permission of department head.

ENVR 3550 Environmental Analysis (Lab Required) (Formerly 128.355) An introduction to classical and modern techniques for sampling, sample pre-treatment, and analysis of chemical substances in aquatic atmospheric and terrestrial environments and the interpretation of data obtained from such analyses. Not to be held with CHEM 3590 or (002.347) or (002.355). Prerequisite: ENVR 2550 (128.255) (C), or CHEM 2550 (002.255) (C), or CHEM 2470 (002.247) (C), or permission of department head.

ENVR 3750 Green Building and Planning An overview of the concepts and tools of Green building design and Green Planning. The course covers the history and trends in Green Building and Planning, related policies, tools and techniques. There is a strong emphasis on learning from local case-studies through seminars and field trips. Prerequisite: ENVR 2000 and 57 credit hours, or permission of department head.

ENVR 3850 This course approaches local sustainability issues from an interdisciplinary perspective. By looking at the ecological, social and economic aspects from a variety of discipline perspectives, a fuller understanding of sustainability is achieved. The broad range of perspectives is achieved through participation of guest speakers from other faculties and outside of the university as well as excursion outside the classroom. Not to be held for credit with GEOG 3850. Prerequisite: 60 credit hours, or permission of department head.

ENVR 3900 Professional Development in the Environmental Sectors 2 (Formerly 128.390) Attendance and participation in seminars, conferences and workshops to foster greater interaction between students and practitioners in the environmental sectors. Students improve professional skill sets through assignments and mock interviews. The normal sequence for participation is after completion of ENVR 3980 (128.398). Prerequisites: ENVR 2900 (128.290) (C), and 60 credit hours of university credit.

ENVR 3910 Coop Work Term Report 1 (Formerly 128.391) Work term report, completed in conjunction with the coop placement, designed to integrate professional experiences with the concepts and theories explored through academic study. Students must be admitted into the Coop program to be registered, and receive credit. Prerequisite: ENVR 2900 (128.290) (C). Prerequisite or Concurrent Requirement: ENVR 3980 (128.398).

ENVR 3920 Coop Work Term Report 2 (Formerly 128.392) Work term report, completed in conjunction with the coop placement, designed to integrate professional experiences with the concepts and theories explored through academic study. Students must be admitted into the Coop program to be registered, and receive credit. Prerequisite: ENVR 3980 (128.398) (P). Prerequisites or Concurrent Requirements: ENVR 3900 (128.390), and ENVR 3990 (128.399).

ENVR 3980 Coop Work Term 1 (Formerly 128.398) Work assignments in business, industry, research or government for students registered in the Honours or Major Cooperative program. This course is graded pass/fail. Prerequisite: ENVR 2900 (128.290) (C).

ENVR 3990 Coop Work Term 2

(Formerly 128.399) Work assignments in business, industry, research or government for students registered in the Honours or Major Cooperative program. This course is graded pass/fail. Prerequisite or Concurrent Requirement: ENVR 3900 (128.390).

7.8 Environmental Science and Environmental Studies Course Descriptions-4000 Level

ENVR 4000 Multidisciplinary Topics in Environmental Science 2

(Formerly 128.400) Selected topics of current interest in the Environmental Sciences and Studies. Course content to vary with each offering depending on the needs and interests of students and faculty. Prerequisites: Permission of department head, and 60 credit hours of university credit.

ENVR 4010 Field Topics in Environmental Science 2

(Formerly 128.401) Field and practical experience in selected topics of current interest in the Environmental Sciences and Studies, with the content to vary depending on the needs and interests of students and faculty. Prerequisite: Permission of department head.

ENVR 4020 Extended Field Topics in Environmental Science 2

(Formerly 128.402) Field and practical experience in selected topics of current interest in the Environmental Sciences and Studies, with the content to vary depending on the needs and interests of students and faculty. Prerequisite: Permission of department head.

ENVR 4050 Ecosystem Management

This course will provide students with an understanding of the practical applications of ecological science, environmental policy, and resource management approaches in the large-scale planning of landscapes. The course will review ecological principles and trace the historical development of the ecosystem concept. Comparisons are made to other possible environmental management approaches. The synthesis of major elements and concepts will be reinforced through case studies on the Manitoba landscape, with an emphasis on practical learning by students through field seminars and group discussions. Not to be held with GEOG 4050. Prerequisite: Permission of department head.

ENVR 4060 Biogeography

This course will provide students with a general understanding of the historical, ecological, analytical, and conservation aspects of biogeography. The course will also have a dual focus on the principles and concepts of reasons for the distribution of plants and animals worldwide, as well as incorporating discussion on as many local (Manitoba, Canada, North America) examples as possible. Not to be held with GEOG 4060. Prerequisite: Permission of department head.

ENVR 4110 Critical Thinking and the Environment

(Lab Required) (Formerly 128.411) Topical issues and responses regarding the environment including conservation, management, and policy making are critically evaluated at local, national, and global scales. Term projects emphasizing applied work with environmental organizations and researchers are presented. Not to be held with (128.410 or 001.468). Prerequisites: ENVR 2000 (128.200) (C), and 72 credit hours of course work, or permission of department head.

ENVR 4180 Ecotoxicological Risk Characterization

A biologically based, advanced course that will give students working knowledge of current processes and techniques for ecotoxicological risk characterization. The course material will cover the topics of problem definition, dose response characterization, exposure characterization, risk assessment, and risk management decision making. Prerequisite: ENVR 2180 (128.218) (C), or BIOL 2380 (BOTN 2180 or 001.218 or ZOOL 2180 or 022.218) (C), or AGRI 2180 (065.218) (C).

ENVR 4400 Advanced Issues in Environment and Health

(Formerly 128.440) An evaluation of global and local environmental health issues and the assessment and management tools used to manage these risks. Case studies of environmental issues and their human health effects are covered. Students have the opportunity to work on a substantial interdisciplinary environmental health project. Not to be held with (128.422). Prerequisite: ENVR 3400 (128.340) (C).

ENVR 4500 Thesis Project in Environmental Science and Studies

(Formerly 128.450) A research thesis project in any aspect of environmental science or environmental studies, chosen in consultation with the course coordinator and an appropriate supervisor, typically a faculty member. Written reports and oral

presentation on the results of the thesis project will be required. The course is normally available only to final year students in the Environmental Science Honours or Environmental Studies Honours Program. Prerequisites: Permission of course coordinator, and a GPA of 3.00 in the last 30 credit hours.

ENVR 4550 Aquatic Chemistry

(Formerly 128.455) An examination of biogeochemical processes affecting the distribution, speciation and bioavailability of chemical substances in the aquatic environment. The theoretical basis for the chemical behaviour of natural water systems is discussed, as well as the description of the processes involved in wastewater treatment. Not to be held with CHEM 4550 (002.455). Prerequisite: ENVR 3550 (128.355) (C), or (002.355) (C), or CHEM 3590 (C), or (002.347) (C), or permission of department head.

ENVR 4650 Advanced Issues in Environmental Law and Policy

This course provides an in-depth review of Canadian law and policy relating to environmental protection and management. In particular, the course describes the laws governing a variety of topics related to the environment, including constitutional responsibilities, federal and provincial environmental legislation, water law, parks and protected areas, wildlife and fisheries management, species at risk, and international law including climate change. Prerequisite: a minimum grade of C in ENVR 2650, or permission of department head.

ENVR 4910 Coop Work Term Report 3

(Formerly 128.491) Work term report, completed in conjunction with the coop placement, which is designed to integrate professional experiences with the concepts and theories explored through academic study. Students must be admitted into the Coop program to be registered, and receive credit. Prerequisite: ENVR 3990 (128.399) (P).

ENVR 4980 Work Term 3

(Formerly 128.498) Work assignments in business, industry, research or government for students registered in the Honours or Major Cooperative program. This course is graded pass/fail. Prerequisite: ENVR 3990 (128.399) (P).

SECTION 8: Department of Geological Sciences: Bachelor of Science in Geological Sciences - Geology, Geophysics, and General Degree Regulations, Program Descriptions and Courses Offered by

SECTION 8: Department of Geological Sciences

SECTION 8: Department of Geological Sciences ,

8.1 Academic Staff

8.1 Academic Staff,

Please refer to the Clayton H. Riddell Faculty of Environment, Earth, and Resources website at: umanitoba.ca/environment/about/academic_staff.html

8.2 Program Information

8.2 Program Information,

The Geological Sciences deal with the history of the Earth and its life, especially that which is recorded in rocks. Different component parts of the Earth system, the *lithosphere*, *biosphere*, *atmosphere* and *hydrosphere*, operate at different length and time scales. During interactions between the spheres there is feedback between the component parts as energy and mass are exchanged, transferred and redistributed. In a geological context, the feedback can occur on a global scale, or on very small scales such as that which we see in minerals. More recently humans have become a major force in this Earth system because we have intervened in many of these exchanges.

Considering the Earth's past, geoscientists typically work with long time scales (in the order of millions to billions of years). We also use Hutton's original philosophy of *uniformitarianism*, stated as *the present is the key to the past*, to solve geological problems. However, as we see changes at the Earth's surface (our environment) occurring on very short time scales we need to learn to extract the signal of human activity from the Earth's pre-human past. Once we understand and quantify the nature and extent of the Earth's natural evolution as well as our more recent

environmental impact, geological sciences can help predict future changes to the Earth.

Geology and Geophysics are the sciences that provide the quantitative data on the physical and chemical behaviour and characteristics of Earth materials - rocks, minerals, fluids and gases. These data are needed to model the behaviour of minerals in natural as well as many industrial systems. The theoretical and instrumental expertise needed to tackle many resource extraction, mineral processing and environmental problems is resident in geological science departments. From a broad Earth, environmental and resource perspective our collective future will depend on sustainable use of our Earth's resources and care of the environment.

The three-year General program (comprising of 90 credit hours) in Geological Sciences is designed to give students a basic understanding of the discipline in combination with a concentration of courses in a second subject area. The General Program is not intended for those students who seek a career in the geosciences. Rather, it is a useful consideration for students planning to enter the Bachelor of Education program (see the [Faculty of Education](#) in this calendar) or other programs that require an undergraduate degree for admission. Students intending to pursue a career in the geosciences or graduate study should hold an Honours or Major degree (comprising at least 120 credit hours) in Geology or Geophysics.

Professional Registration

The professional practice of geoscience in Canada is governed by provincial/territorial law and is regulated by professional geoscience associations. In Manitoba, the Association of Professional Engineers and Geoscientists (APEGM) regulates professional practice. The requirements for professional registration are acceptable academic preparation and a subsequent period of acceptable geoscience experience. Students considering professional registration should take the B.Sc. Geological Sciences Honours or Major degree *and* make appropriate course selections, particularly in the basic sciences. Students should consult with the Department of Geological Sciences. Graduates who do not meet the academic requirements may be required by the professional association to take additional courses or examinations. Current registration information for APEGM is available in the department or from the association's web site: www.apegm.mb.ca

Geological Sciences Prerequisite Information

To fulfil prerequisite requirements, a grade of 'C' must be achieved in any course stipulated as a prerequisite to a further course in Geological Sciences.

8.3 Degree Regulations

8.3 Degree Regulations,

8.3.1 B.Sc. in Geological Sciences (Major) Geology or Geophysics

To qualify for the degree, a student must complete a minimum of 120 credit hours with passing grades ('D' or better) in each course and with a minimum degree grade point average of 2.30 as indicated in the Graduation Requirements Table (see [section 8.3.5](#)). Students must complete all Faculty requirements as well as the [University Written English and Mathematics requirement](#) as described in the *Chapter*, [General Academic Regulations](#), in this *Calendar*.

Students admitted to the Major program will normally have completed University 1 requirements, which include six credit hours of courses from the Faculty of Arts, six credit hours of courses from the Faculty of Science and six credit hours from either the Clayton H. Riddell Faculty of Environment, Earth, and Resources, the Faculty of Arts or the Faculty of Science. Students who do not meet this requirement while in University 1 must do so within the Major program.

Minor in Another Department

Students in the B.Sc. Geological Sciences have the opportunity to complete a Minor in a subject field that is different than that of the declared major, and which normally consist of 18 credit hours from a department offering this option at the Undergraduate Studies

University of Manitoba. Students in the B.Sc. Geological Sciences are not permitted to complete a Minor in Geological Sciences. The Minor requirements are described in [section 3.2](#) of this *Chapter*. Contact the department and/or a [Riddell Faculty student advisor](#) in the Faculty general office for further information about eligible Minors.

Entrance to the Major

To enter a Major program in Geology or Geophysics, a student must have completed at least 24 credit hours with a minimum Degree Grade Point Average of 2.50 as stipulated in Entrance and Continuation Requirements Table (see [section 8.3.4](#)). In addition, the student must attain the minimum grade requirements specified for individual Year 1 courses according to the program tables for the Major in Geology ([section 8.4](#)) or the Major in Geophysics (see [section 8.5](#)). Students who do not obtain the entrance requirements for the Major program in their first year but who are interested in obtaining the Major degree should consult with the [department](#).

Continuation in the Major

A student's academic performance is assessed first with his/her application for admission to the Riddell Faculty and then following each *term* in which the student is registered. To be in **good standing** and permitted to continue in the degree program, a student must maintain a minimum degree Grade Point Average of 2.30 as stipulated in the Entrance and Continuation Requirements Table ([section 8.3.4](#)). Students are not limited in the number of repeated courses and failures. Students who do not meet the minimum performance requirement will be required to withdraw from the Major program and will be placed in the General program provided their Degree Grade Point Average is 2.00 or above. Students will have the notation 'Required to Withdraw from the Major Program', recorded on their transcript of marks.

If below 2.00, students will be placed on academic warning, probation or academic suspension as outlined in [section 3.14 Academic Warning, Probation and Academic Suspension \(Academic Standing\)](#) in this *Chapter*.

Failed courses: A student is required to repeat those failed courses that are specified as required courses for the program. Students are subject to the University of Manitoba regulations (see [General Academic Regulations, Section 5.1.3 Repeating a Course](#) as described in this *Calendar*) and the [Riddell Faculty degree regulations regarding eligibility to repeat a course](#). Students who need to repeat a course more than once to fulfil degree requirements must contact a [Riddell Faculty student advisor](#) for approval prior to registration.

Program approval

The department head (or designate) and a [Riddell Faculty student advisor](#) in the Faculty general office must approve a student's Major program each term. Students must also obtain departmental approval for all revisions to their programs. For departmental approval, please contact [Brenda Miller](#). The [Advanced/Major/Honours Program Approval](#) forms are available on the Riddell Faculty web page. (umanitoba.ca/environment/undergraduate)

Graduation in the Major

In order to graduate from the Geology or Geophysics Major, students must complete all degree program and faculty requirements as stipulated in [section 3](#) and [~/Catalog/ViewCatalog.aspx?pageid=viewcatalog&chapterid=1007&LoadUserEdits=true§ion 8](#) of this *Chapter*. Students must also achieve the minimum performance requirements as outlined in the Graduation Requirements Table (see [section 8.3.5](#)). This is defined as a minimum Degree Grade Point Average of 2.30 on 120 or 121 credit hours which constitute the degree.

Residence Requirement for Major Students

A student must successfully complete a minimum of 60 credit hours at the University of Manitoba. The courses used to satisfy the requirement must be

acceptable for credit in the Clayton H. Riddell Faculty of Environment, Earth, and Resources. Residence requirements apply both to first and second-degree students.

Recognition of Academic Merit

Degree with Distinction

To obtain a degree with distinction a student must achieve a minimum 3.50 Degree Grade Point Average on all courses constituting the Major degree. The term 'Degree with Distinction' will appear both on the parchment and on the student's transcript of marks.

8.3.2 B.Sc. in Geological Sciences (Honours) Geology or Geophysics

The Honours programs are the most heavily concentrated programs offered and lead most directly to graduate studies. A student is required to achieve higher grade standards than in the Major degree program. The Honours degree may be pursued on a part-time basis, although it must be recognized that students will require additional terms to complete degree requirements. Students must complete the degree program within 8 years of gaining initial admission to the Honours program. Failure to complete the Honours degree within the 8-year time limit may require a student to transfer into the Major program.

A student will normally begin the Honours program in second year and must meet the entrance requirements set out below. Students in full-time study can expect to complete the prescribed courses in three years beyond the first year of University 1. Honours programs lead to either the B.Sc. Geological Sciences (Hons.) (Geology) or the B.Sc. Geological Sciences (Hons.)(Geophysics).

To be eligible for any award granted exclusively on the basis of academic performance, a student must normally be enrolled in a full-time program as defined by the department.

Students must complete the [University Written English and Mathematics requirement](#) as described in the chapter, [General Academic Regulations](#), of this *Calendar*.

Entrance to Honours

To enter the Honours program in Geology or Geophysics, a student must have completed at least 24 credit hours with the minimum Degree Grade Point Average as stipulated in the Entrance and Continuation Requirements Table ([section 8.3.4](#)). In addition, the student must attain the minimum grade requirements specified for individual Year 1 courses according to the program tables for Honours Geology ([section 8.4](#)) or Honours Geophysics ([section 8.5](#)). Students who are ineligible to enter Honours with their admission to the Riddell Faculty may establish eligibility the following year on the basis of their second year of academic performance.

To enter the Honours degree program, a student must complete a program approval form available in the department general office and have it approved by the department head, or designate, and a [Riddell Faculty student advisor](#) in the Faculty general office.

Continuation in Honours

A student's academic performance is assessed first with his/her application for admission to the Riddell Faculty and then following each *term* in which the student is registered. To be in **good standing** and permitted to continue in the degree program, a student must maintain the performance requirement as stipulated in the Entrance and Continuation Requirements Table ([section 8.3.4](#)). Students are not limited in the number of repeated courses and failures. Students who do not meet the minimum performance requirements will be placed on academic warning, probation or academic suspension as outlined in [section 3.14 Academic Warning, Probation and Academic Suspension \(Academic Standing\)](#) in this *Chapter*. Students who do not maintain this minimum average to remain in the program will be required to withdraw from the Honours program and, if eligible, will be placed in the Major

program. Students will have the notation 'Required to Withdraw from the Honours Program' recorded on their transcript of marks.

Program Approval

The department head (or designate) and a [Riddell Faculty student advisor](#) in the Faculty general office must approve a student's Major program each term. Students must also obtain departmental approval for all revisions to their programs. For departmental approval, please contact [Brenda Miller](#). The [Advanced/Major/Honours Program Approval](#) forms are available on the Riddell Faculty web page. (umanitoba.ca/environment/undergraduate)

Residence Requirement for Honours Students

A student must successfully complete a minimum of 60 credit hours at the University of Manitoba. The courses used to satisfy the requirement must be acceptable for credit in the Clayton H. Riddell Faculty of Environment, Earth, and Resources. Residence requirements apply both to first and second-degree students.

Graduation from Honours

In order to graduate from the Honours Geology and Geophysics programs, students must complete all degree program and faculty requirements as stipulated in [section 3](#) and [section 8](#) of this *Chapter*. Students must also achieve the minimum performance requirements as outlined in the Graduation Requirements Table (see [section 8.3.5](#)). This is defined for the Honours Geology program as a minimum Degree Grade Point Average of 3.00 on 120 credit hours which constitute the degree and for Honours Geophysics as a minimum Degree Grade Point Average of 2.80 on the 120 (121) credit hours which constitute the degree.

Recognition of Academic Merit

First Class Honours

To graduate with **First Class Honours**, a student must achieve a Degree Grade Point Average of 3.50. The term 'First Class Honours' will appear both on the parchment and on the student's transcript of marks.

Honours Program Notes:

Double Honours Programs

Double Honours programs may be available. The program must be arranged in consultation with the departments concerned.

Honours Requirements and Options

Students who do not obtain the entrance requirements for the Honours program in their first year but who are interested in obtaining an Honours degree should consult with the department before registering for their second year.

Honours Geology Options

For students who wish to increase the focus of their knowledge, recommended electives are listed below:

Environmental Geoscience: BIOL 2300 (or AGECE 2370), CIVL 4250, SOIL 4060, SOIL 4130, SOIL 4500, GEOL 4370, GEOG 3390, ENVR 2180 (BIOL 2380 or AGRI 2180), ENVR 3110, ENVR 3250, or others approved by the department. (Students are responsible for completion of prerequisites for these courses.)

Honours Geophysics Option

Students who wish to enter the Honours Geophysics Option and have not taken 6 credit hours of introductory Geological Sciences (eg., GEOL 1340 and one of GEOL 1400, GEOL 1410, or GEOL 1420) may arrange with the department to make up this credit. Students must contact the department during the spring preceding entrance to the Honours program. All course choices in the Honours program should be made after consultation with the coordinator of the Geophysics program

8.3.3 B.Sc. in Geological Sciences (General)

Degree Program Structure

- A Geological Sciences component consisting of a minimum of 30 credit hours.
- A Minor of 18 credit hours (minimum) in a different department or an interdisciplinary program. e.g. in the Clayton H. Riddell Faculty of Environment, Earth, and Resources, or the Faculty of Arts, or the Faculty of Science. The Minor requirements are described in

[section 3.2](#) of this *Chapter*. Contact the department and/or a Riddell Faculty [student advisor](#) in the Faculty general office for further information about eligible Minors.

Students will normally have completed University 1 requirements, which include 6 credit hours from the Faculty of Arts, 6 credit hours from the Faculty of Science. Students who have not met these requirements while in University 1, must meet the requirements prior to graduation.

Entrance to the General

To be admitted to the General program, a student must have completed at least 24 credit hours with a minimum Cumulative Grade Point Average of 2.00. In addition, a student must have completed GEOL 1340 with the grade of 'C'. Refer to [Section 8.6](#) for further program requirements.

Continuation in the General

A student's academic performance is assessed first with his/her application for admission to the Riddell Faculty and then following each term in which the student is registered. To be in good standing and permitted to continue in the degree program, a student must maintain a minimum Degree Grade Point Average of 2.00 as stipulated in the Entrance and Continuation Requirements Table ([section 8.3.4](#)). Students are not limited in the number of repeated courses and failures. Students who do not meet the minimum performance requirement will be placed on academic warning, probation or academic suspension as outlined in [section 3.14 Academic Warning, Probation and Academic Suspension \(Academic Standing\)](#) in this *Chapter*.

Failed courses: A student is required to repeat those failed courses that are specified as required courses for the program. Students are subject to the University of Manitoba regulations (see [General Academic Regulations, Repeating a Course](#) as described in this *Calendar*) and the [Riddell Faculty degree regulations regarding eligibility to repeat a course](#). Students who need to repeat a course more than once to fulfil degree requirements must contact a [Riddell Faculty student advisor](#) for approval prior to registration.

Graduation in the General

To qualify for the degree, students must complete 90 credit hours, inclusive of Geological Sciences courses, a minor in a second department or program, and any University 1 requirements. Minimum performance requirements include passing grades ("D" or better) in each course, a minimum degree grade point average of 2.00 in Geological Sciences courses, and an overall degree grade point average of 2.00 on the 90 credit hours which constitute the degree. Note: Where a Geological Sciences course listed in the calendar has required prerequisites, a student must hold a minimum grade of "C" in each prerequisite course.

Residence Requirement for General Students

Undergraduate Studies

Students must complete a total of 48 credit hours at the University of Manitoba, or they must complete their final 30 credit hours at the University of Manitoba in order to satisfy the residency requirement. The courses used to satisfy the requirement must be acceptable for credit in the Clayton H. Riddell Faculty of Environment, Earth, and Resources.

Recognition of Academic Merit

Degree with Distinction

To obtain a degree with distinction, a student must achieve a minimum 3.50 Degree Grade Point Average on all courses constituting the General degree. The term 'Degree with Distinction' will appear both on the parchment and on the student's transcript of marks.

8.3.4 Geological Sciences Entrance and Continuation Requirements		
	Minimum Degree Grade Point Average	
Degree Program	Entrance	Continuation
Major (Geology)	2.50 ¹	2.30 ¹
Major (Geophysics)	2.50 ¹	2.30 ¹
Honours (Geology)	3.00 ¹	3.00 ¹
Honours (Geophysics)	2.80 ¹	2.80 ¹
General (Geological Sciences)	2.00 ¹	2.00 ¹
Notes:		
¹ In addition to the minimum degree grade point average noted in this chart, specific courses (with minimum grades) are required for entry and these are noted in the program chart for each program.		

8.3.5 Geological Sciences Graduation Requirements	
Degree Program	Minimum Degree Grade Point Average
Major (Geology) (120)	2.30
Major (Geophysics) (120)	2.30
Honours (Geology) (120)	3.00
Honours (Geophysics) (120)	2.80
General (Geological Sciences) (90)	2.00

		6 credit hours of Geological Sciences Electives from Lists A and B ⁴	Geological Sciences Electives from Lists A and B ⁴ not yet taken.
CHEM 1300, PHYS 1020 ² , and MATH 1500 ³ must be completed in University 1 or Year 2. It is recommended that students complete the W course in University 1 or Year 2.			
MAJOR GEOLOGY 120 CREDIT HOURS			
GEOL 1340 ⁷ (C+) and one of GEOL 1400, GEOL 1410, or GEOL 1420	GEOL 2440, GEOL 2500, GEOL 2520, GEOL 2530, GEOL 2800, GEOL 2770, GEOL 3910 ⁵	GEOL 2060, GEOL 3110, GEOL 3130, GEOL 3310, GEOL 3440, GEOL 3490, GEOL 3900, GEOL 4910 ⁵	GEOL 4670, GEOL 4920
6 credit hours from the Faculty of Arts			15 credit hours of Geological Sciences Electives from Lists A and B ⁴ not yet taken
CHEM 1300, PHYS 1020 ² , and MATH 1500 ³ must be completed in University 1 or Year 2. It is recommended that students complete the W course in University 1 or Year 2.			
Notes:			
¹ The courses required in this program will satisfy the University Mathematics requirement .			
² PHYS 1050 may be used in lieu of PHYS 1020.			
³ MATH 1510 or MATH 1520 may be used in lieu of MATH 1500.			
⁴ Among the Geological Sciences Electives, all students must complete at least 9 credit hours from List A. In addition, Honours students must complete 9 credit hours from List B or courses from List A not yet completed; Major students must complete at least 6 credit hours from List B or courses from List A not yet completed. NOTE: With departmental approval, students may substitute 6 credit hours of 2000-level or higher courses from other departments in order to satisfy professional registration requirements. See Other Note 1 below.			
⁵ Students will register for GEOL 3910 and GEOL 4910 in Summer term. NOTE: Students should be aware that they are expected to contribute to transportation and accommodation costs. See the department office at the beginning of each year for information.			
⁶ IMPORTANT: The Honours and Major programs need not be completed in the manner prescribed in the chart above. The chart indicates one possible arrangement of the required courses and is meant to be a guide around which students can plan their program. (Letters in brackets indicate the minimum prerequisite standing in a specific course required for entry to the program).			
⁷ Students who have GEOL 1440 (007.144) or the former 007.124 should consult with the department. At the discretion of the department, GEOL 1440 (007.144) or 007.124 may be permitted in lieu of GEOL 1340 for entry.			
One of GEOL 1400, GEOL 1410, or GEOL 1420 is highly recommended to be taken in Year 1, but will not be considered when assessing entrance requirements to the program. If this requirement is not fulfilled in Year 1, it must be completed by the end of Year 2.			
NOTE:			
<ul style="list-style-type: none"> To fulfil prerequisite requirements, a grade of 'C' must be achieved in 			

<p>any course stipulated as prerequisite to a further course in Geological Sciences.</p> <ul style="list-style-type: none"> All courses are not offered every year. The course schedule for the current academic term is available from the Class Schedule. Students registering in certain courses may be required to pay a portion of the costs associated with field trips. For details, contact the department general office. Equivalent courses offered through Collège universitaire de Saint Boniface may be used in lieu of the specified courses identified in the degree program chart. Collège universitaire de Saint-Boniface courses end in the number '1' (e.g. CHEM 1301).

Other Note 1: Geological Sciences - Geology Electives Lists A and B

List A Electives: Honours and Major students must complete a minimum of 9 credit hours from the following courses:	
GEOL 2390	Environmental Geology (3)
GEOL 4280	Instrumental Techniques In Geology (3)L
GEOL 4300	Mineral Deposits (3)L
GEOL 4520	Petroleum Geology (3)L
GEOL 4890	Basin Analysis (3)L

List B Electives: Honours students are required to complete a minimum of 9 credit hours; Major students must complete a minimum of 6 credit hours from the following courses:	
GEOL 3140	Gemology (3)L
GEOL 3420	Engineering Geology (3)
GEOL 3450	Hydrogeology (3) L
GEOL 3740	Exploration Seismology (3)L
GEOL 3750	Geology and Geophysics of the Planets (3)L
GEOL 3810	Applied Geophysics (3)L
GEOL 4260	Applied Geophysics Field Course (3)
GEOL 4270	Advanced Studies in Earth Sciences (3)
GEOL 4310	Paleontologic Principles (3)L
GEOL 4360	Mineral Exploration Techniques (3) L
GEOL 4370	Global Change (3)
GEOL 4740	Geophysics Field School (6)
GEOG 2250	Introduction to Geographic Information Systems (3)L
and/or up to 6 credit hours of additional courses not yet completed from List A.	
NOTE: With departmental approval, up to 6 credit hours of 2000-level or higher courses from other departments may be substituted for courses in List B in order to satisfy professional registration (APEGM) requirements.

--	---	---

NOTES:

¹MATH 1690 may be taken in place of MATH 1500 (or MATH 1510) and MATH 1700 (or MATH 1710); MATH 1300 may be taken in place of MATH 1210. Selection of MATH 1300 or MATH 1210 will determine the prerequisite background for Mathematics courses required in years 2, 3 and 4.

²MATH 2720 and MATH 2730 may be taken in place of MATH 2130 and MATH 2132. Students should note that MATH 1300 is a prerequisite to MATH 2720 and a corequisite to MATH 2730.

³MATH 2600 may be taken in place of MATH 2120

⁴GEOL 4740 will normally be taken immediately following the spring examinations on or about May 1 and will continue for approximately three weeks. Registration will show as Summer Term. NOTE: Students are expected to contribute to the costs of transportation, lodging, and food. Contact the Department for further information.

⁵The courses required in this program satisfy the university mathematics requirement.

⁶Students who have GEOL 1440 (007.144) or the former 007.124 should consult with the department. At the discretion of the department, GEOL 1440 (007.144) or 007.124 may be permitted in lieu of GEOL 1340 for entry.

One of GEOL 1400, GEOL 1410, or GEOL 1420 is highly recommended to be taken in Year 1, but will not be considered when assessing entrance requirements to the program. If this requirement is not fulfilled in Year 1, it must be completed by

the end of Year 2.

⁷**IMPORTANT:** The Honours and Major programs need not be completed in the manner prescribed in the chart above. The chart indicates one possible arrangement of the required courses and is meant to be a guide around which students can plan their program. (Letters in brackets indicate the minimum prerequisite standing required for further study)

NOTE:

- To fulfil prerequisite requirements, a grade of 'C' must be achieved in any course stipulated as prerequisite to a further course in Geological Sciences.
- All courses are not offered every year. The course schedule for the current academic term is available from the [Class Schedule](#)
- Students registering in certain courses may be required to pay a portion of the costs associated with field trips. For details, contact the [department general office](#).
- Equivalent courses offered through Collège universitaire de Saint-Boniface may be used in lieu of the specified courses identified in the degree program chart. Collège universitaire de Saint-Boniface courses end in the number '1' (e.g. PHYS 1051).

Other Note 1: Geological Sciences - Geophysics Electives Lists A, B and P

List A Electives: Honours students are required to complete a minimum of 9 credit hours; Major students must complete a minimum of 6 credit hours from the following courses:

GEOL 4250	Theory and Application of Geophysical Inversion Methods (3)L
GEOL 4320	Physics of the Earth: Seismology and Heat Flow (3)
GEOL 4330	Physics of the Earth: Geomagnetism and Gravity (3)

List B Electives: Honours students are required to complete a minimum of 6 credit hours; Major students must complete a minimum of 6 credit hours from the following courses:

GEOL 2390	Environmental Geology (3)
GEOL 2770	Principles of Inorganic Geochemistry (3)L
GEOL 3110	Petrogenesis of Igneous Rocks (3)L
GEOL 3420	Engineering Geology (3)
GEOL 3440	Structure and Metamorphism (3)L
GEOL 3450	Hydrogeology (3)L
GEOL 3490	Glacial Geology and Geomorphology (3)L
GEOL 3750	Geology and Geophysics of the Planets (3)L
GEOL 3900	Sedimentology (3)L
GEOL 3910	Introduction to Field Mapping (3)
GEOL 4270	Advanced Studies in Earth Sciences (3)
GEOL 4300	Mineral Deposits (3)L
GEOL 4360	Mineral Exploration Techniques (3)L
GEOL 4370	Global Change (3)
GEOL 4520	Petroleum Geology (3)L
GEOL 4890	Basin Analysis (3)L
GEOL 4910	Advanced Field Mapping (3)
GEOG 2250	Introduction to Geographic Information Systems (3)L

Any List A or P not already taken, or any advanced level Geological Sciences, Physics or Mathematics course(s) approved by department.

List P Electives: Honours students are required to complete a minimum of 6 credit hours; Major students must complete a minimum of 3 credit hours from the following courses:

CHEM 2290	Chemical Energetics and Dynamics: Macroscopic De-scriptions (3)L
MECH 2260	Introduction to Fluid Mechanics (3)L
PHYS 2610	Circuit Theory and Introductory Electronics (3)L
PHYS 2650	Classical Mechanics 1 (3)
PHYS 3630	Electro - and Magnetostatic Theory (3)
PHYS 3670	Classical Thermodynamics (3)

Or alternate physical science course(s) approved by department.

8.6 B.Sc. Geological Sciences (General) Program Chart

8.6 B.Sc. Geological Sciences (General) ,

UNIVERSITY 1		YEAR 2	YEAR 3
GENERAL 90 CREDIT HOURS			
GEOL 1340 ¹ (C) plus one of GEOL 1400, GEOL 1410, or GEOL 1420 A minimum grade of 'C' on 6 credit hours from a second department or program for a minor ³ Meet any University 1 requirements ⁵		GEOL 2540 ² plus a further 21 credit hours in Geological Sciences courses numbered at the 2000-level or above A further 12 credit hours for the minor ⁴	
It is recommended that students complete the M and W course in University 1 or Year 2.			
MINOR GEOLOGICAL SCIENCES 18 CREDIT HOURS			
GEOL 1340 and one of GEOL 1400, GEOL 1410, or GEOL 1420		Plus 12 credit hours chosen from 2000- and 3000-level courses	
Notes: ¹ Students who have GEOL 1440 (007.144) or the former 007.124 should consult with the department. At the discretion of the department, GEOL 1440 (007.144) or 007.124 may be permitted in lieu of GEOL 1340 for entry. One of GEOL 1400, GEOL 1410, or GEOL 1420 is highly recommended to be taken in Year 1, but will not be considered when assessing entrance requirements to the program. If this requirement is not fulfilled in Year 1, it must be completed by the end of Year 2. ² GEOL 2500 may be used in lieu of GEOL 2540. Manitoba 40S Chemistry, CHEM 0090 or equivalent is a prerequisite for GEOL 2540 and GEOL 2500. CHEM 1300 is highly recommended and should be taken in U1. ³ Students should determine their minor prior to the end of the Year 2 of the program. ⁴ A minor will normally correspond to a Minor as outlined in a program chart for a specific department or program, e.g. refer to program charts for departments in the Clayton H. Riddell Faculty of Environment, Earth, and Resources, or in the Faculty of Arts, or in the Faculty of Science ⁵ Any U1 requirements not met in Year 1 must be completed before graduation.			
NOTE: <ul style="list-style-type: none"> To fulfil prerequisite requirements, a grade of 'C' must be achieved in any course stipulated as prerequisite to a further course in Geological Sciences. All courses are not offered every year. The course schedule for the current academic term is available from the Class Schedule Students registering in certain courses may be required to pay a portion of the costs associated with field trips. For details, contact the department general office. 			
Equivalent courses offered through Collège universitaire de Saint- Boniface may be used in lieu of the specified courses identified in the degree program chart. Collège universitaire de Saint-Boniface courses end in the number '1' (e.g. GEOG 1281).			

8.7 Environment, Earth, and Resources Course Descriptions-1000 Level

EER 1000 Earth: A User's Guide

This course will present a multi-disciplinary introduction to the Planet Earth as both the source of essential resources and as the site of resulting negative impacts. Focus in the course will be provided by addressing important and current topics, case studies, and concepts that the well-educated citizen of the Earth should understand and will include natural and human-induced processes within a broad range of spatial and temporal scales.

8.8 Geological Sciences Course Descriptions-1000 Level

GEOL 1340 The Dynamic Earth

(Lab Required) (Formerly 007.134) An introduction to dynamics of the Earth's interior and surface that created the environment in which life evolved and that continue to change the world in which people now live. Taught with GEOL 2250. Not to be held with (GEOL 1440 or 007.144) or GEOL 2250 (007.225) or (007.123) or (007.124). Recommended for students intending to proceed in further courses in the Geological Sciences.

GEOL 1400 Time-Trekker's Travelog: Our Evolving Earth

Take a trip across billions of years, as we explore awesome times in the evolution of our planet and its life -- from dust to us! Not to be held with (GEOL 1350 or 007.135 or 007.123).

GEOL 1410 Natural Disasters and Global Change

Discover how and when natural disasters occur, and how to identify and recognize them. Explore the Earth processes that lead to natural disasters and global change. Not to be held with (GEOL 1360 or 007.136).

GEOL 1420 Exploring the Planets

Discover the Solar System as we explore ancient ideas and modern concepts. Emphasis will be on recent space exploration and a comparison of the Earth and its neighbours. Not to be held with (GEOL 1370 or 007.137 or 007.124).

8.8 Geological Sciences Course Descriptions-2000 Level

GEOL 2060 Introductory Geophysics

(Lab Required) (Formerly 007.206) An introduction to geophysical exploration, Earth physics, satellite geophysics and remote sensing. Emphasis will be on quantitative modeling and will include geophysical measurements and handling of data. Prerequisites: [GEOL 1340 or (007.134), or (GEOL 1440 or 007.144), or (007.123), or (007.124) (C)], and [MATH 1300 (136.130), or MATH 1310 (136.131), or MATH 1500 (136.150), or MATH 1510 (136.151), or MATH 1520 (136.152), or MATH 1530 (136.153) (C)], and [PHYS 1020 (016.102), or PHYS 1050 (016.105) (C)], or permission of department head.

GEOL 2250 Geology for Engineers

(Lab Required) (Formerly 007.225) Principles of physical geology; materials in processes in geology; classification of igneous, metamorphic, and sedimentary rocks; elementary geological and geophysical surveying techniques; geological hazards, volcanism, earthquakes, landsliding, processes of weathering, transportation and geomorphology. For Engineering students only. Not to be held with GEOL 1340 (007.134), or (GEOL 1440 or 007.144), or (007.123), or (007.124).

GEOL 2390 Environmental Geology

(Formerly 007.239) Examination of geological processes and material as they interact with human activities, environmental planning, and management. Also available by correspondence. Prerequisite: university geology or GEOG 1290 or GEOG 1291 (053.129) (C), or (GEOG 1200) or GEOG 1201 (053.120) (C), or permission of department head.

GEOL 2440 Structural Geology 1

(Lab Required) (Formerly 007.244) Elementary mechanical principles of rock deformation, brittle and continuous deformation, geometry of faults, folds, joints, cleavage, lineations. Descriptive geometric and stereonet solution to structural geology problems, cross sections, structural contour maps. Prerequisite: GEOL 1340 (007.134) (C), or (GEOL 1440 or 007.144) (C), or (007.123) (C), or (007.124) (C).

GEOL 2500 Introduction to Mineralogy

(Lab Required) (Formerly 007.250) An introduction to the chemistry, physics and

classification of minerals. Brief, systematic description of about 200 of the most important minerals. Laboratory: hand specimen identification. For Major and Honours Geology students only. Entry to other students would be after consultation with the department and by permission. Not to be held with GEOL 2540 or (007.207) or (007.262). Prerequisites: (40S Chemistry or CHEM 0900 (002.090) (Pass)), and (GEOL 1340 (007.134) (C), or (GEOL 1440 or 007.144) (C), or (007.123) (C), or (007.124) (C), or (007.132) (C), or (007.133) (C)), or permission of department head. CHEM 1300 (002.130) is highly recommended. This course is intended for Major or Honours Geology students.

GEOL 2520 Igneous and Metamorphic Petrology

(Lab Required) (Formerly 007.252) The classification, occurrence and origin of igneous and metamorphic rocks. The study and identification of rocks using hand specimens and thin sections. Prerequisites: (GEOL 2500 (007.250) (C) and GEOL 2800 (C), or (007.260) (C)), or GEOL 2540 (C).

GEOL 2530 Introductory Sedimentary Petrology and Stratigraphy

(Lab Required) (Formerly 007.253) An introduction to sedimentary deposits and principles of stratigraphic analysis. Occurrence, classification and origin of sedimentary deposits. Facies concept, stratigraphic classification and correlation. Prerequisites: (GEOL 2500 (007.250) (C) and GEOL 2800 (C), or (007.260) (C)), or GEOL 2540 (C).

GEOL 2540 Introductory Mineralogy with Essential of Mineral Optics

(Lab Required) An introduction to the chemical composition, crystal structure, physical and optical properties of the most common minerals. Discussion of the occurrence of minerals in nature. Laboratory: Identification of minerals in hand specimens and thin sections. Not intended for students in Major or Honours Geology programs. Not to be held with GEOL 2500 (007.250). Prerequisites: (40S Chemistry or CHEM 0900 (002.090) (Pass) or equivalent), and (GEOL 1340 (007.134) (C), or (GEOL 1440 or 007.144) (C), or (007.123) (C), or (007.124) (C)), or permission of department head. CHEM 1300 (002.130) is highly recommended.

GEOL 2570 Energy and Mineral Resources

(Formerly 007.257) An introduction to the geological factors and processes responsible for the origin, concentration and distribution of fuels, geothermal resources, metallic and nonmetallic minerals. Available by correspondence only. Not for credit in a Major or Honours program in Geological Sciences. Prerequisite: Any university-level Geology course, or permission of department head.

GEOL 2770 Principles of Inorganic Geochemistry

(Lab Required) (Formerly 007.277) The cosmic abundance of the elements, nucleosynthesis, geological differentiation of the elements; chemical petrology of igneous, metamorphic and sedimentary rocks. An introduction to aqueous and low-temperature geochemistry. Prerequisite: GEOL 2500 (007.250) (C), or GEOL 2540 (C). Prerequisite or Concurrent Requirement: CHEM 1300 (002.130).

GEOL 2800 Optics and Spectroscopy of Minerals

(Lab Required) Use of the petrographic microscope; microscopic recognition of common rock-forming minerals; introduction to spectroscopic techniques in geosciences (including optical, vibrational and luminescence techniques). Not to be held with (007.260). Prerequisite or Corequisite: GEOL 2500 (007.250) (C), or permission of department head.

8.8 Geological Sciences Course Descriptions-3000 Level

GEOL 3110 Petrogenesis of Igneous Rocks

(Lab Required) (Formerly 007.311) Crystallization processes in magma and resultant textures; physical, chemical, and kinetic processes of magmatic systems. Prerequisites: (GEOL 2520 (007.252) (C)), and (GEOL 2770 (007.277) (C)).

GEOL 3130 Communication Methods in the Geological Sciences

(Lab Required) (Formerly 007.313) Practice in oral and written description of geologic subjects; tools of library and database research; manuscript organization; abstract writing; computer-aided table, figure, and slide preparation. Prerequisites: (GEOL 2500 (007.250) (C)), and (GEOL 2440 (007.244) (C)). This course is for students in the Honours and Major Geological Sciences programs only.

GEOL 3140 Gemology

(Lab Required) (Formerly 007.314) An introduction to the scientific study of natural and synthetic gem materials, methods of their identification and principles of

gemstone appraisals. Laboratory: identification of gemstones using optical methods. Prerequisites: (GEOL 2500 (007.250) (C)), and (GEOL 2800 (C), or (007.260) (C), or GEOL 2540 (C)).

GEOL 3310 Paleontology

(Lab Required) (Formerly 007.331) The study of fossils: invertebrate paleontology, with an introduction to paleontologic principles, vertebrate paleontology, and paleobotany. Prerequisite: GEOL 1340 (007.134) (C), or (GEOL 1440 or 007.144) (C), or (007.123) (C), or (007.124) (C), or permission of department head.

GEOL 3420 Engineering Geology

(Formerly 007.342) Engineering properties of rocks, laboratory testing and site investigations in engineering geology. Rocks as construction materials, engineering geology of tunnels, bridges, dams, reservoirs, shorelines, sanitary landfills, landslides, seismic risk areas, etc. Prerequisites: (GEOL 2440 (007.244) (C)), and (GEOL 2520 (007.252) (C)), and (GEOL 2530 (007.253) (C)).

GEOL 3440 Structure and Metamorphism

(Lab Required) Structural and metamorphic geology, links between deformation and metamorphism, and the application of pressure-temperature and time paths to study metamorphic equilibria. Not to be held with (GEOL 3290 or 007.329). Prerequisites: GEOL 2440, and GEOL 2520, and GEOL 3910, or permission of department head.

GEOL 3450 Hydrogeology

(Lab required) The hydrologic cycle and basic hydrologic processes; properties of aquifers and principles of groundwater flow; well hydraulics and groundwater resource evaluation; regional groundwater flow and subsurface geology; and basic chemical hydrogeology. Not to be held with CIVL 4250. Prerequisites: (MATH 1500 or MATH 1510 (C)), and (PHYS 1020 or PHYS 1050 (C)), and CHEM 1300 (C), and (GEOL 2060 or GEOG 2310 (C)), and GEOL 2530 (C).

GEOL 3490 Glacial Geology and Geomorphology

(Lab Required) (Formerly 007.349) Principles of landform development with emphasis on glacial deposition. Aerial photo and map interpretation in lab. Not to be held with GEOG 3580 (053.358). Prerequisite: GEOL 2530 (007.253) (C).

GEOL 3740 Exploration Seismology

(Lab Required) (Formerly 007.374) Collection of seismic data (land and sea); simple elastic wave theory; geometry of refraction and reflection seismology; rock velocity determination; seismic noise and signal; data corrections; data enhancement techniques; representation of data; survey procedures. Prerequisites: (GEOL 2060 (007.206) (C)), and (MATH 1500 (136.150) (C), or MATH 1510 (136.151) (C), or MATH 1520 (136.152) (C), or MATH 1530 (136.153) (C), or MATH 1690 (136.169) (C)).

GEOL 3750 Geology and Geophysics of the Planets

(Lab Required) (Formerly 007.375) Physical and chemical nature of the inner and outer planets and their satellites, asteroids and meteorites. The application of geophysical, geochemical and petrological techniques to planetology; remote sensing study of geological features of planetary surfaces and atmospheres. Prerequisite: GEOL 2060 (007.206) (C), or permission of department head.

GEOL 3810 Applied Geophysics

(Lab Required) (Formerly 007.381) The application of geophysical methods including gravity, magnetics, seismic reflection and refraction, electrical and electromagnetics methods in exploration, and environmental and engineering problems. Prerequisite: GEOL 2060 (007.206) (C).

GEOL 3900 Sedimentology

(Lab Required) (Formerly 007.390) The study of depositional environments of sedimentary rocks. Facies analysis and modeling of sedimentary deposits. Prerequisite: GEOL 2530 (007.253) (C).

GEOL 3910 Introduction to Field Mapping

(Formerly 007.391) Twelve day course introducing field mapping techniques including field navigation and basic field interpretations. Students are responsible for costs of room and board during the field course. Offered in the Summer term. Not to be held with (007.449). Prerequisites: (GEOL 2440 or 007.244) (C)), and (GEOL 2520 (007.252) (C)), and (GEOL 2530 (007.253) (C)), and permission of department head.

8.8 Geological Sciences Course Descriptions-4000 Level

GEOL 4250 Theory and Application of Geophysical Inversion Methods

(Lab Required) (Formerly 007.425) Introduction to generalized and linear/non-linear inversion theory. Inversion techniques for the potential field, electrical and seismic data will be discussed. Application to global problems will also be discussed. Prerequisites: (GEOL 2060 (007.206) (C)), and (MATH 2100 (136.210) (C), or MATH 1300 (136.130) (C), or MATH 1310 (136.131) (C)).

GEOL 4260 Applied Geophysics Field Course

(Formerly 007.426) One and one-half weeks field instruction in the planning and execution of geophysical surveys and the use of portable geophysical instruments. Taught with the first half of GEOL 4740 (007.474). Not to be held with GEOL 4740 (007.474). Prerequisites: GEOL 3810 (007.381 or 007.380) (C), and permission of department head.

GEOL 4270 Advanced Studies in Earth Sciences

(Formerly 007.427) Advanced study in a selected subject in Earth sciences. Prerequisite: Permission of department head.

GEOL 4280 Instrumental Techniques in Geology

(Lab Required) (Formerly 007.428) Lecture and laboratory course covering the application of microbeam, mass spectrometer, diffraction and wet geochemical analytical techniques in mineralogy and geochemistry. Includes coverage of ICP, PIXE, powder and single crystal diffraction and electron microprobe analysis. Prerequisites: (GEOL 2520 (007.252) (C)), and (GEOL 2530 (007.253) (C)), and (GEOL 2770 (007.277) (C)).

GEOL 4300 Mineral Deposits

(Lab Required) (Formerly 007.430) The tectonic setting and deformational and structural nature of ore deposits. The physics and chemistry of ore deposition and ore bearing fluids. The mineralogical, textural and environmental constraints on resource exploitation. Prerequisites: (GEOL 3110 (007.311) (C)), and (GEOL 3900 (007.390) (C)).

GEOL 4310 Paleontologic Principles

(Lab Required) (Formerly 007.431) Interpretation of Earth history using fossils: topics in taxonomy, functional morphology, paleoecology, evolution, biostratigraphy, and biogeography. Prerequisite: GEOL 3310 (007.331) (C), or permission of department head.

GEOL 4320 Physics of the Earth: Seismology and Heat Flow

(Formerly 007.432) Seismology and the structure, physical properties and equations of state of the Earth's interior; thermal constitution and the history of the Earth. Prerequisites: (GEOL 2060 (007.206) (C)), and (PHYS 2390 (C), and PHYS 2490 (C), or (016.237) (C)).

GEOL 4330 Physics of the Earth: Geomagnetism and Gravity

(Formerly 007.433) Geomagnetism and geoelectricity; paleomagnetism; figure, rotation and gravity of the Earth. Prerequisites: (GEOL 2060 (007.206) (C)), and (PHYS 2390 (C), and PHYS 2490 (C), or (016.237) (C)).

GEOL 4360 Mineral Exploration Techniques

(Lab Required) The course will examine methodologies used in exploration and evaluation of Canadian mineral deposits and case studies illustrating the application of these methods. Prerequisite: GEOL 3910 (C), or GEOL 3810 (C). Recommended pre- or co-requisite: GEOL 4300.

GEOL 4370 Global Change

(Formerly 007.437) Examination of the major processes controlling global change through time. The causes, magnitude, and periodicity of changes in the geological record resulting from the variability and interaction of continents, oceans, atmospheres, climate, Earth-sun relationships, and ice sheets, with an emphasis on paleoclimate. Prerequisite: GEOL 3900 (007.390) (C). Prerequisite or Concurrent Requirement: GEOL 3490 (007.349).

GEOL 4520 Petroleum Geology

(Lab Required) (Formerly 007.452) A study of the physical properties, origins and maturation, migration, and accumulation of petroleum products. Prerequisite: GEOL 3900 (007.390) (C).

GEOL 4670 Global Tectonics

(Lab Required) (Formerly 007.467) The structure and properties of, and physical processes taking place within, the Earth's interior. Continental cratons and their margins, orogenic belts, structural and petrologic features of the ocean basins, modern diastrophism, global tectonic theories. Prerequisites: (GEOL 3440 or (GEOL 3290) (C)), or GEOL 4320 (C), or permission of department head.

GEOL 4740 Geophysics Field Course

(Formerly 007.474) Three weeks of making geophysical surveys. Starts immediately following April examinations. Maps and reports to be submitted at the end of the three-week period. Students are responsible for costs of room and board during the field course. Offered in alternate Summer terms. Not to be held with GEOL 4260 (007.426). Prerequisites: GEOL 3810 (007.381 or 007.380) (C), and permission of department head.

GEOL 4810 Geophysical Data Analysis

(Formerly 007.481) The theory and application of spectral methods in geophysics. The use of Fourier Transforms, convolution, power spectra, coherence, transfer functions, covariance, correlation and filtering. Prerequisite: PHYS 2490 or (016.237) (C), or permission of department head.

GEOL 4870 Honours Thesis

(Formerly 007.487) A thesis based on a research project conducted by a fourth-year Honours student in Geology or Geophysics. Selection of a project and supervisor to be arranged prior to September 30 and submitted in writing to the department head. Consult with the department for submission deadlines. Not to be held with (007.495) or (007.496). Prerequisite: Permission of department head.

GEOL 4890 Basin Analysis

(Lab Required) (Formerly 007.489) The study of major sedimentary basins. Qualitative and quantitative aspects of basin origin, classification, evolution, fluid content and diagenesis, and sedimentary facies architecture. Prerequisite: GEOL 4520 (007.452) (C).

GEOL 4910 Advanced Field Mapping

(Formerly 007.491) Twelve-day course developing field mapping techniques including independent mapping and interpretation and synthesis in complex geological terrains. Students are responsible for costs of room and board during the field course. Offered in the Summer term. Not to be held with (007.449). Prerequisites: (GEOL 3440 or (GEOL 3290) (C)), and GEOL 3910 (C), and permission of department head.

GEOL 4920 Technical Report

(Formerly 007.492) A technical report based on a geoscience research project conducted by a fourth year Major student in Geology or Geophysics. Not to be held with GEOL 4870 (007.487). Normally this course is available after completion of Year 3 requirements in Geology or Geophysics Major program. Prerequisite: Permission of department head.

SECTION 1: Extended Education

SECTION 1: Extended Education, Extended Education provides a central focus for adult, distance, mature and summer continuing education in the university and undertakes planning and general administration for these programs and services. Insofar as possible, the university accepts the principle of parity of accessibility to its services in all areas of the province regardless of economic, geographic, physical, or social disadvantage.

Extended Education coordinates a wide range of programs through which degree courses and non-degree or certificate courses are offered. Degree courses are drawn from the offerings of various faculties and schools. Students must apply to, be admitted to, and register in a particular faculty or school to receive credit towards a degree.

SECTION 2: Program Areas

2.1 Access/Aboriginal Focus Programs,
Area Director: Diedre Desmarais

General Office: 188 Extended Education Complex

Telephone: 204-982-4233

Aboriginal Focus Programs

The Aboriginal Focus Programs area of Extended Education offers a range of programs that are designed to respond to the continuing education needs and concerns of Aboriginal people. The mission of the area is to create paths of choice in post-secondary education that are based on Indigenous worldviews and developed through partnerships with Indigenous Peoples and communities.

AFP offers certificate and diploma programs as well as degree programs through cooperative arrangements with Aboriginal stakeholders and faculties of The University of Manitoba. Programs are offered in a central location, as in-house training to staff of an organization, or as community-based programs. Programs are offered as 'open enrolment' or as block-funded cohort programs through an arrangement with an employer or sponsor. Delivery methodology can be part-time or full-time study, and can incorporate technology-based delivery where technology access permits. Aboriginal organizations that identify a need for specific post-secondary or adult education not currently available may be interested in knowing that AFP has the capacity to develop new programs to meet their needs. The following are programs currently being offered:

Degree/Diplomas	Years to Complete	Total Credit Hours
Aboriginal Environmental Stewardship Diploma	2	60
Aboriginal Community Wellness Diploma	2	60
Aboriginal Child and Family Services Diploma	2	60
Health Careers Transition Year (Degree credit)	1	21 to 24
General Transition Year (Degree credit)	1	21 to 24
Non-Degree – Certificates		
Aboriginal Counselling Skills Certificate	1	346 contact hours
Child Sexual Abuse Intervention & Treatment Certificate	1	380 contact hours
Special Education Educational Assistant Certificate	1	480 contact hours

Aboriginal Child and Family Services Diploma

This off-campus program provides an opportunity for students to build their knowledge and skills base in the area of social services work. It would be of interest to individuals working, or anticipating future employment, in the Aboriginal Child Welfare field.

Aboriginal Counselling Skills Certificate

This foundation program gives individuals in the helping professions, who are employed by First Nation and/or Aboriginal social service agencies, knowledge and skills in how to provide culturally appropriate counselling services to individuals and families. The Faculty of Social Work offers graduates 3 allocated and 6 unallocated hours of credit.

Aboriginal Environmental Stewardship Diploma

This diploma is a partnership program between Aboriginal focus Programs and the University of Manitoba's Clayton H. Riddell Faculty of Environment, Earth and Resources, the Faculty of Arts; Department of Native Studies and Building Environmental Aboriginal Human Resources (BEAHR). This two-year diploma will address the assessment, monitoring, protection, management, sustainability, legal requirements and current issues in the environmental field. All courses include both Aboriginal and western world views on the environment. BEAHR will coordinate work experience for students enrolled in this diploma making it easier to obtain employment upon graduation.

Child Sexual Abuse Intervention and Treatment Certificate

The disclosure of sexual abuse, as in the residential school experience, has highlighted the need for counsellors with specialised expertise. The CSAIT program builds on prior training and experience in counselling.

Health Career Transition Year

This program enables students to gain the knowledge, skills and confidence needed to successfully pursue a professional health career. Students take a combination of

preparatory and degree credit courses (21 – 24 credits) over one year. Tutorial, personal, financial and Aboriginal cultural supports are available to students.

Aboriginal Community Wellness Diploma

This degree credit program provides a professional development opportunity in community wellness for Aboriginal health and wellness service workers and those wishing to enter the field. The program is offered through a partnership between The University of Manitoba and the Manitoba Community Wellness Working Group. Each course in the program incorporates an indigenous wellness perspective. The diploma is designed to meet the educational needs for generic and specialized fields of practice (e.g., addictions).

Special Education Educational Assistant Certificate

This program provides culturally relevant accredited training for teacher assistants who work with special needs children under the direction of classroom and/or resource teachers.

Transition Year (18 to 24 credit hours)

The off-campus Transition Year is designed to facilitate the successful transition of students from their community to full-time post-secondary study. Students take a combination of preparatory and degree credit courses (21 - 24 credits) over one year. Emphasis is on building students' academic and personal skills through specific support to students such as expanded instruction, tutorial support and orientations to the expectations of post-secondary education programs.

Access Programs,

General Office: Aboriginal House, 220-45 Currie Place

Telephone: 204 474 8000

umanitoba.ca/extended/access

University of Manitoba Access Program (UMAP)

In cooperation with the Province of Manitoba, the University of Manitoba Access Program (UMAP) facilitates university studies at the degree level for persons who traditionally have not had the opportunity for such experience because of social, economic and cultural reasons, lack of formal education or residence in remote areas. Preference will be given to Aboriginal Manitobans (Status, Non-status, Metis or Inuit). Students in this program are provided with academic and personal supports. Financial assistance may be available. For information, call 474 8000 or, within Manitoba, 1 800 432 1960, extension 8000.

Health Careers Access Program (HCAP)

This program is designed to prepare Manitoban Aboriginal persons (Status, Non-Status, Metis, or Inuit) for entry to the health professional programs such as Medicine, Dentistry, Dental Hygiene, Pharmacy, Medical Rehabilitation (Physical and Respiratory Therapy) and Nursing. Through the cooperation of the Province of Manitoba and the University of Manitoba, students in this program are provided with academic and personal supports. Financial assistance may be available. For information call 474 8000 or, within Manitoba, 1 800 432 1960, extension 8000.

Professional Health Program (PHP)

This program is designed to support Aboriginal persons (Status, Non-Status, Metis, Inuit) in any of the professional health programs. Housed within the new Aboriginal Centre for Health Education at the Bannatyne Campus this program provides academic and personal supports. Limited financial assistance may be available. For information call 474 8000 or, within Manitoba, 1 800 432 1960, extension 8000.

Education Access Program (EAP)

The Education Access Program (EAP) is a partnership between the Faculty of Education and the Access Program. EAP provides students with supports to complete a Bachelor of Education (B.Ed.) degree at the University of Manitoba. Because the Bachelor of Education degree is an after-degree program, EAP students must complete their first degree with Access.

Students who identify teaching as their profession of choice must participate in a workshop series ("Destination Education") that is designed to enrich their awareness of the teaching field and the B.Ed. program. All students identifying education as their career choice will be assigned to the designated Access Education Academic Advisor. For information call 474 8000 or, within Manitoba, 1 800 432 1960 extension 8000. umanitoba.ca/education

2.2 Continuing Education Programs,

Director: Atlanta Sloane-Seale

General Office: 188 Extended Education Complex

Telephone: 204 474 8036

A variety of certificate programs, seminars, and short courses are offered for professional and personal development in general management, health and social services, adult education and training, accounting, municipal management and horticulture.

Certificate Programs

Extended Education offers a range of professional continuing education certificate programs, in cooperation with agencies in the community and faculties and schools on campus. These programs vary in length, comprehensiveness, and level of certification. Most certificate programs are offered annually. See Section 4.0 below for a listing of certificate programs.

In addition to advising on existing programs, the staff of Extended Education will consult with individuals, groups, and organizations (profit and non-profit) who have an interest in or desire to develop learning experiences specific to their needs.

Copies of the current calendars of Continuing Education Programs are available by calling (204) 474 8016 or toll-free in Canada 1888 216 7011 (extension 8016) or visit our website: umanitoba.ca/extended/coned

2.3 Distance and Online Education,

Director: Jonathan Dyck

General Office: 188D Extended Education Complex

Telephone: 204 474 8012

Website: umanitoba.ca/distance

Each year, over 7,000 university students complete degree credit courses offered by Distance and Online Education. Our courses are open to all University of Manitoba students and provide an opportunity for students to complete courses without attending classes. If you require flexibility in time and place for your studies, plan to take courses year round, live or work at a geographic distance from the UM or simply appreciate the convenience of studying at home, Distance and Online Education provides you the opportunity to complete your degree. Many students

choose to enroll in on-campus and Distance and Online Education courses at the same time.

Over 140 degree credit courses are offered in Fall, Winter, Fall/Winter, Summer, and Dist Ed Winter/Summer, from the following schools/faculties: Agricultural and Food Sciences; Arts; Education; Engineering; Clayton H. Riddell Environment, Earth and Resources; Human Ecology; Nursing; Kinesiology and Recreation Management; School of Art; Science; and Social Work. Programs offered by distance include a Bachelor of Arts, Bachelor of Arts in Geography, Bachelor of Social Work and Post-Baccalaureate Diploma in Education.

All Distance and Online Education courses are offered online. Standard course features include: course materials; interaction options such as chat, student lounge and e-mail; and online assignment submission. For further information regarding studying online, please see umanitoba.ca/distance.

To request a copy of the 2011-12 Distance and Online Education course calendar, call 474 8012, toll free in Canada at 1 888 216 7011, ext. 8012 or visit umanitoba.ca/distance. Please feel free to drop into Distance and Online Education, located in 188D EE Complex.

2.4 English Language Studies,
Director: Stephanie Olson

General Office: 188 Extended Education Complex

Telephone: 204 474 8738

English Language Studies provides opportunities for language learners to gain proficiency in additional languages. The area offers conversational language courses in French, Spanish, German, Japanese and Mandarin for beginner to advanced level students. Courses are part-time; sessions run from September to December, January to April and April to June.

The Area also offers part-time and full-time iB TOEFL preparation courses several times a year and is an official iB TOEFL testing site.

Eight levels of Intensive English Program sessions ranging in lengths from four weeks to one year, and consisting of 25 hours of classroom instruction per week are offered throughout the year. Academic instruction, and socio-cultural activities constitute the basis of this program. Students are housed in residence on campus or with a homestay family. Similar programs are also offered for groups coming from Mexico, Japan and Korea. At our U of M Tokyo Campus, several Intensive English Program instructors spend the month of March teaching English to students from Sagami Women's University. At its downtown Winnipeg campus, English Language Studies offers Adult EAL classes for Newcomers.

In collaboration with the Faculty of Education, a Certificate in Teaching English as a Second Language (CTESL) is offered to meet the needs of individuals who are pursuing a teaching career in ESL. The Certificate program consists of five 40-hour courses, including four required courses and one approved elective course. Courses can be taken full-time or part-time.

2.5 General Studies,
Interim Director: Jonathan Dyck

General Office: 188 Extended Education Complex

Telephone: 204 474 8330 or 474 7154

Welcome to General Studies

General Studies provides opportunities for students to take credit courses at the University of Manitoba without being enrolled in a degree program. Our students come from all walks of life: Professionals developing their careers; Students satisfying entrance requirements to professional and other faculties; Seniors enriching their lives; Students visiting from other institutions; Individuals exploring a career change. Whatever your educational interests, General Studies is a great option for study at the University of Manitoba. Courses are available in the Fall and Winter terms, Summer Session, through Distance and Online Education and Off-Campus Study.

Entrance Requirements to General Studies

Students may be admitted in one of the following categories: Auditing Student; Mature Student (Canadian Military only); Special Student; Visiting Student. Detailed information on the entrance requirements and a description of the student categories can be found in the [Admissions](#) chapter of this *Calendar* or by contacting the General Studies office.

Student Services

A Student Advisor is available to assist students with course and program planning, and to provide admission and registration information on a drop-in basis or by appointment throughout the year.

For information call (204) 474 8330 or 474 7154, or toll-free in Canada, 1 888 216 7011 (extension 7154 or 8330) or visit our website at umanitoba.ca/extended/general_studies.

2.6 Inter-Universities North Program,
In cooperation with Brandon University and the University of Winnipeg, courses in Arts, Science and Education are offered in communities north of the 53rd parallel. Telephone: 1 800 442 0462.

2.7 Military Support Office,
General Office: 188 Extended Education Complex

Telephone: 204 474 8006

The Military Support Office is designed to assist CF personnel and their immediate family members in the pursuit of a university education. The office has experienced staff to assist in overcoming the problems which can result from the frequent moves and deployments experienced by members of the Defence family.

Through this unique office, the University of Manitoba takes into account the difficulty which extensive mobility can create in satisfying the residency requirement for graduation. Recognition is given for a wide range of military training, academic counselling services are provided by highly qualified student advisors, and provision is made for academic and financial relief when military duties interrupt studies.

Courses are available through Distance and Online Education or on campus, either part-time or full-time, and a Mature Student entry program is also offered.

Call toll-free within North America 1 800 850 6166, or e-mail military@umanitoba.ca. The MSO website is at umanitoba.ca/extended/military.

2.8 Off-Campus Study,
Interim Director: Jonathan Dyck

General Office: 188 Extended Education Complex

Telephone: 204 474 8019

Off-Campus Study is designed to improve accessibility and success in university for students. A flexible and convenient alternative, Off-Campus Study allows students to take degree courses at sites within Winnipeg other than the Fort Garry Campus. Courses are taught by University of Manitoba instructors in the evenings and on weekends. Courses in High School program allow Senior 4 students to take university courses while still in high school and receive university credit.

For information call (204) 474 8019, or toll-free in Canada 1 888 216 7011 (extension 8019) or e-mail aclaman@ms.umanitoba.ca, or visit our website at umanitoba.ca/extended/off-campus

2.9 Summer Session,
Interim Director: Jonathan Dyck

General Office: 188 Extended Education Complex

Telephone: 204 474 6963

Summer Session offers a wide range of courses in the spring and summer, including feature programs, summer institutes, travel/study and off-campus courses. Summer Session provides an opportunity to accelerate degree completion, ease course loads in the fall and winter, or benefit from smaller classes.

May and June Day courses begin in early May and continue to late June. Most classes meet for two hours each day either in the morning or early afternoon.

May to August Evening courses run from early May to early August. Classes are generally scheduled two evenings each week and meet for two and one-half hours.

July and August Day courses begin in early July and continue to late August. Most classes meet for two hours each day either in the morning or early afternoon.

For information about Summer Session, call (204) 474-6963 or (204) 474-8008, or toll-free in Canada 1 888 216 7011 (extension 6963) or e-mail summer@umanitoba.ca, or go to umanitoba.ca/summer.

SECTION 3: Certificate/Diploma Programs

3.1 Agriculture, Prairie Horticulture

The purpose of this program is to focus on horticulture specific to the prairies, especially with respect to production and market conditions, climate, crop type, pests, disease, and other relevant prairie topics. Offered by independent study, part-time study.

3.2 Education, Adult and Continuing Education

To develop and enrich the knowledge and level of competence of those practicing in the field of adult education. Offered by face-to-face, blended and distance study. Part-time study. Some courses are cross-listed as degree credit in the Faculty of Education.

Teaching English As a Second Language

The Certificate Program objectives are to meet local, national, as well as international needs of teacher development in ESL and EFL. The program provides a focused initial preparation for teaching ESL. Upon successful completion of the

program, CTESL participants will be able to: Discuss the theoretical basis of second language instruction; demonstrate a variety of effective ESL teaching techniques; and explain, in pedagogically relevant ways, the linguistic structures of the English language.

3.3 General Management, Financial & Management Accounting

This certificate program is designed to provide an intermediate level accounting education to anyone working with accounting information. The program provides a solid technical and conceptual foundation in accounting processes. Courses can be applied to an accounting designation or transferred for degree credit. Part-time study, evening classes.

Applied Management

This certificate is designed to provide individuals in various work environments with the opportunity to combine management studies with applications relevant to their own careers and industries. Registrants select a particular specialization appropriate to their own development interests. Specializations are available in: police service, records management, retail management, organizational effectiveness and utilities management. Part-time study over two to three years.

Human Resource Management

Human Resource Management requires leadership, teamwork, communication and strategic planning. Our program provides these skills through seven required and one elective course which will enable you to gain more specialized knowledge. You will benefit from this program whether you have some work experience or are new to the HR field. Part-time study over three years.

Intellectual Property and Technology Commercialization Management

In partnership with the University of Manitoba's Office of the Vice President (Research) Intellectual Property Advice and Technology Assessment Office, this program is designed to address many intellectual property and technology commercialization issues. Part-time study.

Interdisciplinary Studies

This program provides a certificate to students completing a minimum of 200 contact hours within the Continuing Education Program Area. Students must identify their learning objectives and develop a program to meet these objectives. A specialized stream offered in partnership with the Manitoba Customer Contact Association, and the Learning Technologies Centre are also offered.

Quality Management

This certificate program offers a management approach to the design and implementation of quality programs. Offered by independent study. Part-time study over one year.

Municipal Administration

This certificate program provides an essential body of knowledge required to assume administrative responsibilities within small to mid-size municipalities in Manitoba. Available by independent study. Part-time study over four years.

3.4 Health and Social Services, Applied Behaviour Analysis

This program combines degree credit courses and supervised practicum courses to help individuals understand and practice the principles and techniques of applied behaviour analysis. Part-time study over three years.

Applied Counselling

The ACC Program provides knowledge of the counselling process and practical counselling skills development. It is for people who are involved in direct counselling through their paid or volunteer work. Participants' varied workplaces include: health care, education, social services, government, vocation employment counsellors, managers, and other work places where counselling takes place. Part-time study over one and a half to five years. The two specialization areas are general counselling and addiction studies.

General Case Management

This program is for individuals who want to prepare for future positions in Canada's rapidly changing health and social service sectors by gaining a general background in case management. Part-time study over three years.

Rehabilitation Case Management

This program prepares individuals to work in rehabilitation programs (e.g., medical, social and physical services, claims management, long term care, education). Participants learn varied case management models, principles of social and physical rehabilitation and functional and psychosocial theories in rehabilitation. Part-time study over three years.

3.5 United Way of Winnipeg Leadership Development Certificate Program,
This program is offered in partnership with the United Way of Winnipeg and provides extensive training to sponsored executives. Full-time program for 16 weeks.

3.6 Management/Professional Institute Affiliations, Canadian Institute of Management Certificate Program in Management and Administration* (CIM)

To offer management training for managers and supervisors in industry, business, and government. four years part-time study.

Certificate in Public Sector Management (CPSM) Co-sponsor: The Government of Manitoba

To offer management training for new and developing mid-managers employed by the provincial government. One-year part-time study program delivered in Blended Learning format integrating face-to-face sessions with online learning.

Purchasing Management Association of Canada* (PMAC)

The University of Manitoba participates with the PMAC in the offering the Strategic Supply Chain Management Program, a series of courses designed to develop proficiency in functional area processes and technical competencies, as well as a number of core and elective courses.

Credit Union Institute of Canada (CUIC)*

This program provides in-depth understanding of the key competency areas in credit union business management. Individual courses.

NOTE: * Certificate awarded by an external agency.

3.7 Engineering, Post Baccalaureate Certificate in Manufacturing Engineering (PBCME)

The PBCME is offered in partnership with the Faculty of Engineering, Extended Education and Red River College. Three years part-time study.

Distance and Online Education

Initial Access Times,

To determine your registration access time, please see the chapter/faculty for which you were admitted.

Section 1: Welcome and General Information,

Distance and Online Education (DE) courses are open to all UM students and provide an opportunity for students to complete courses without attending classes. Students have many different circumstances that motivate them to enrol in distance education courses: they may be full-time students needing flexibility for work and study; work shifts or part-time jobs; have families and enjoy the convenience of studying at home; live or work at a geographic distance from the UM; or wish to study year round in order to more quickly complete their degree.

Over 140 degree credit courses are offered from the following faculties/schools: Agricultural and Food Sciences; Art; Arts; Clayton H. Riddell Environment, Earth, and Resources; Education; Engineering; Human Ecology; Nursing; Kinesiology and Recreation Management; Science; and Social Work. Programs offered by distance include a Bachelor of Arts, Bachelor of Arts in Geography, Bachelor of Social Work, and a Post-Baccalaureate Diploma in Education.

To request a copy of the 2011-12 Distance and Online Education course calendar, call 474 8012, toll free in Canada at 1 888 216 7011, ext. 8012 or visit umanitoba.ca/distance.

Online Course Delivery

All Distance and Online Education courses are offered online. Courses are hosted by an online learning management system where you can logon to the UM web server and access your course website in a secure environment.

Standard course features include: course materials; interaction options such as chat, student lounge and e-mail; and online assignment submission. Some courses also feature synchronous online or telephone audioconferences; on-campus tutorials; or audio/video resources. For further information regarding studying online, please see umanitoba.ca/distance.

Required textbooks and/or audio/visual materials can be confirmed and ordered from the UM Book Store at umanitoba.ca/bookstore. Early registration is recommended to ensure that you receive required materials prior to the start of term.

Campus Manitoba

Campus Manitoba (CMB) offers courses at a variety of locations around the province through a consortium that includes: Brandon University, the University of Manitoba, the University of Winnipeg, Collège universitaire de Saint-Boniface, Red River College, Keewatin Community College and Assiniboine Community College. CMB is a unique program in that students receive transfer of credit for courses offered by any of the participating institutions. Courses are offered using a variety of technologies including virtual classroom software, as well as Internet and web-based components. Campus Manitoba courses are offered in the following locations:

Altona Cross Lake
Flin Flon Swan River
Boissevain Dauphin Killarney The Pas
Brandon Deloraine Southport Thompson
Carman Eriksdale Steinbach White Bear

For a list of course offerings and fees, contact: Campus Manitoba, Brandon University, Brandon, Manitoba R7A 6A9; telephone: 204 727 9668; Fax: 204 726 1059; e-mail: campus_mb@brandonu.ca; website: www.campusmanitoba.ca

Accessing Online Courses

The technologies required for studying by DE can vary depending on the course. Online courses require access to a computer, software, and an Internet provider. Some courses may require a headset and microphone for online audioconferences or access to a DVD player.

Further information regarding requirements for accessing online courses can be found in the DE course calendar or at umanitoba.ca/distance. Specific course requirements can be found under *Syllabus Available* in the DE course section ("D" section numbers) in Aurora Student.

Section 2: Registration ,

All course registration activities for DE courses must be done using Aurora Student. You may register for DE courses and on-campus courses in the same transaction. It is recommended that you register for courses immediately upon your initial registration access time or immediately after the registration period opens.

Please refer to the Registration System section or to umanitoba.ca/distance for registration dates and procedures. If you have questions regarding registering for DE courses, please call 474-8012 or 1-888-216-7011, ext. 8012.

2.1 Distance and Online Education Terms

Fall (3 cr. hrs.)	September 2011 - December 2011
Winter (3 cr. hrs.)	January 2012 - April 2012
Fall/Winter (6 cr.hrs.)	September 2011 - April 2012
Dist Ed Winter/Summer (6 cr. hrs.)	January 2012 - July 2012
Summer (3 cr. hrs.)	May 2012 - August 2012

The lecture section acts as an identifier for the specific section of a course. All DE section numbers are prefaced by the letter 'D', i.e. D01, D02, etc. It is important that you select the appropriate section number prior to registration.

Section 3: Additional Information,

3.1 Examinations

Final exams are held in April, July, August, and December. You are expected to be available at the scheduled day and time, and should consider this when registering for courses.

Most students are able to write exams in their community. Students living in Winnipeg must write at the UM Fort Garry Campus.

3.2 Distance and Online Education Course Fees

For information regarding Distance and Online Education tuition fees and any additional compulsory fees (e.g., Registration Fee, Library Fee, Student Services Fees, etc.) please refer to umanitoba.ca/registrar or call 474-9420. Undergraduate International Students are subject to an International Differential Fee; please refer to umanitoba.ca/registrar.

Section 4: Contacting Distance and Online Education ,

Undergraduate Studies

For further information and program and course descriptions, go to umanitoba.ca/distance or see the *Distance and Online Education course calendar*.

To obtain a copy, call (204) 474 8012 or Canada Toll-Free at 1 888 216 7011, extension 8012 or refer to umanitoba.ca/distance.

Fax: (204) 474 7661
Email: de_info@umanitoba.ca

umanitoba.ca/distance

General Studies

Section 1: Initial Access Times,
General Studies students registering for on-campus, distance education or online education courses may register starting in August 2011. For more information about initial access times and how to determine your specific time, please refer to the University of Manitoba home page: umanitoba.ca or access Aurora Student in July (select: Enrolment & Academic Records, Registration, Registration Time & Status).

Section 2: Registration Assistance,

Welcome to General Studies (Extended Education). We encourage you to review the [Admissions](#) section for information about registration, course descriptions, rules, regulations and procedures.

Please take the time to become familiar with the [academic regulations and requirements](#) of the University of Manitoba and the specific academic regulations and requirements of General Studies (below) or check the website umanitoba.ca/extended/general_studies. As well, you may wish to seek the advice of the General Studies Student Advisor.

The General Studies Student Advisor is available to assist you with course and program planning, and to provide admission and registration information on a drop-in basis or by appointment throughout the year.

Drop-in basis: Monday through Friday, 9:00 a.m. to 3:00 p.m.

188 Extended Education Complex

Telephone: Monday through Friday, 8:30 a.m. to 4:30 p.m.
Student Advisor: Karen Nickerson (204) 474-8330
Assistant Student Advisor: Michelle Kidd (204) 474-7154
Toll free in Canada: 1-888-216-7011 (ext. 7154 or 8330)
Fax: (204) 474-7661 **Email:** general_studies@umanitoba.ca
Web: umanitoba.ca/extended/general_studies

Section 3: Registration Information,

3.1 Instructions

You may register for up to a maximum of 30 credit hours in the combined Fall and Winter terms, and up to a maximum of 15 credit hours in any one term, including Summer Session.

Read the Information Section on AURORA found in the [registration](#) section. If you experience difficulty in accessing the registration system, contact General Studies for information and assistance.

If you have a family member or friend register on your behalf, please make sure they are aware of your initial registration access period. They must have your student number, your date of birth, and your six-digit PIN number. You are responsible for all transactions undertaken on your behalf.

3.2 Returning Students

If you have successfully completed 24 credit hours or more, you are eligible to apply directly to a faculty or school providing you have met that faculty or school entrance requirements. For detailed information on other faculties and schools refer to the appropriate chapter listed in this catalog or check the Admissions Office Applicant Information Bulletin for entrance requirements and deadline dates for a specific Faculty (www.umanitoba.ca/admissions). If you need help with course selection or have any concerns about your status, please contact the General Studies Student Advisor.

3.3 Visiting Students

New visiting students must apply for admission. Please contact the General Studies Office for information.

Visiting students who have been admitted and registered previously in at least one course are eligible to register in a subsequent session without reapplying for admission provided: your home university has not changed since you last registered in General Studies; you have a Letter of Permission from your home university approving the selected courses in which you wish to register; and, you provide the Letter of Permission to General Studies prior to registering.

3.4 Auditing Students

New auditing students must apply for admission. Please contact the General Studies Office for information. Auditing students must provide written permission from the course instructor to audit a specific course. The written permission form would then be submitted to the General Studies Student Advisor who will manually register the student for the course (with the student's written consent).

Section 4: Information Applicable to All General Studies Students,

4.1 Academic Assessment Policy

Academic Assessment gauges student success at the University. Formal academic assessment shall be done following each academic term for all General Studies students who have completed 30 credit hours or more of attempts. In order to be in "good standing" in General Studies, a student must achieve a degree Grade Point Average (GPA) of 2.00 or greater at each assessment period. Students in "good standing" may continue in General Studies or, preferably, transfer to a target faculty.

Students who do not achieve a degree GPA of 2.00 will be placed "on probation", which will appear on the student's transcript. Once "on probation", a student will be allowed to register for another term (or terms). At each point of assessment, students "on probation" must achieve a term GPA of 2.00 in order to proceed. In order to clear probation, a student must achieve a degree GPA of 2.00. While "on probation", students are encouraged to consult the General Studies student advisor prior to registration and on a regular basis thereafter.

If a student does not succeed in achieving a term GPA of 2.00, they will be placed on "academic suspension" for one calendar year. A student on "academic suspension" is normally not allowed to register in another faculty or school at the University of Manitoba or to attend any other post-secondary institution during the time of suspension. Following the suspension period, a student may reapply for admission to General Studies.

4.2 Credit Hour Policy

In an effort to assist students with academic decisions, all students who have completed 30 credit hours of study with General Studies will be required to meet with a student advisor before being allowed further registration. Until such time as the student meets with the advisor, a block will be placed on their record to prevent further registration.

4.3 Transferring to Other Faculties or Schools

General Studies students will need to determine the specific subject and credit hour requirements of the faculty to which they plan to apply. This information is available in this catalog or from the General Studies office. Students are encouraged to apply to a faculty of their choice as soon as the requirements have been satisfied.

Entry to every faculty and school requires a formal application for admission to be submitted to the Admissions Office. Admission dates and forms are available at the Admissions Office, 424 University Centre or on the Admissions Office website at umanitoba.ca/admissions, click on *Apply for Admission*. It is always in your best interest to seek admission or transfer to a faculty or school as early as possible.

4.4 Courses Available to General Studies Students

All courses in the following faculties and schools are available to General Studies students. Prerequisites may be required for some courses as specified in the course descriptions:

Clayton H. Riddell Faculty of Environment, Earth, and Resources

Faculty of Agricultural and Food Sciences

Faculty of Arts

Faculty of Science

I. H. Asper School of Business

School of Art

All courses offered in the following faculties require teaching faculty written approval before registering, with the exception of courses open to all students as listed under University 1:

Faculty of Architecture

Faculty of Education (5000 level courses only)

Faculty of Engineering

Faculty of Human Ecology

Faculty of Kinesiology and Recreation Management

Faculty of Nursing

Faculty of Social Work (students with less than 30 credit hours)

Marcel A. Desautels Faculty of Music

Off-Campus Study

Section 1: Initial Access Times,

You can register for Off-Campus Study and on-campus courses in the same transaction. For more information about initial access times and how to determine your specific time, please refer to the University of Manitoba home page at umanitoba.ca or please refer to the registration information in the *Calendar* (umanitoba.ca/calendar).

Section 2: Registration and General Information,

A flexible and convenient alternative, Off-Campus Study allows students to take degree courses at various community sites within Winnipeg, including the U of M Bannatyne Campus, Vincent Massey Collegiate, Gray Academy of Jewish Education, the University of Manitoba Downtown: Aboriginal Education Centre and the Canadian Mennonite University.

Students can register for Off-Campus Study courses on-line at umanitoba.ca. See the information in the *Calendar* (umanitoba.ca/calendar) for details on registration. Contact Off-Campus Study for more information on courses or for assistance concerning registration procedures. For questions regarding your academic program, contact a student advisor in your faculty or school.

2.1 Registration

It is your responsibility to be familiar with the requirements of your program and to complete the prerequisites for any courses you plan to take.

Where faculties/schools require written consent, for courses where written consent of the department head or instructor is required, you must submit the written consent to your faculty/school prior to registering.

2.2 Fall and Winter (September 2011 - April 2012)

Registration for all courses scheduled in Fall and Winter begins mid-July in accordance with the initial access times that apply to your faculty or school for registration as outlined in the *Calendar*, and continues until early September for courses beginning in September, and until mid January for courses beginning in January.

The period for late registration and registration revisions is usually from the first day of classes in September until mid-September for all Fall and Fall/ Winter courses. A late fee will be assessed on all registrations during this period.

2.3 Fee Information

When you register on-line, one of the transactions you must complete is a fee assessment, which will indicate the exact amount owing and the fee payment deadline.

2.4 Examinations

Final examinations are normally scheduled for the same location and time as the class. In some cases, examinations may be written at the University of Manitoba Fort Garry Campus. The examination schedule is published well in advance of the examination period. Students are expected to check the schedule and be available to write examinations as scheduled.

2.5 For Information

Off-Campus Study: 188 Extended Education Complex

Home economists in Manitoba, and other provinces, are regulated by legislation. Graduates may apply to the Manitoba Association of Home Economists (MAHE) for interim professional home economist (IPHE) status, and subsequently qualify as a professional home economist (PHEc).

SECTION 2: Admission Requirements

SECTION 2: Admission Requirements for the Faculty of Human Ecology Content, Admission requirements are described in an applicant information bulletin that is available together with application deadline dates and forms from the Admissions Office, Enrolment Services, 424 University Centre. Detailed admission information is posted on the university website:

http://www.umanitoba.ca/student/admissions/application/deadlines/human_ecology/

General Entrance Requirements to the Faculty of Human Ecology: A minimum adjusted grade point average (AGPA) of 2.0 in at least 24 credit hours of University 1, including 6 credit hours from Arts and 6 credit hours from Science to total 12 credit hours, plus 12-18 credit hours of other University 1 courses, for a total of 24-30 credit hours. Students must complete at least 6 more credit hours of Arts or Science courses once admitted to the Faculty. Beginning in September, 2012, high school students will be eligible to apply for direct entry to the Faculty. Detailed information is posted on the University website (above).

Other requirements for University study

High school prerequisites required for University level courses in certain programs: Mathematics 40S (pre-calculus or applied) and Chemistry 40S are required for the science requirements in Human Nutritional Sciences, the Interdisciplinary Health program, and textiles courses in Textile Sciences. Students who consider subscribing to the Engineering Sciences option in Textile Sciences must have pre-calculus Mathematics 40S, Physics 40S, and Chemistry 40S. Students planning to take BIOL 1020 for any program must have Biology 40S and any Grade 12 Mathematics course.

Minimum Adjusted GPA for consideration: 2.0.

The written English and Mathematics requirements are satisfied by required courses HMEC 2000 (or the former HMEC 2030) and STAT 1000 within the Human Ecology program. HMEC 2000 will be available to students upon admission to the Faculty of Human Ecology.

For students wishing to choose the focused approach for entry to the Faculty of Human Ecology, the course requirements for each of the programs or areas of concentration offered by the Faculty of Human Ecology are described in the U1 Start Book found at <http://umanitoba.ca/student/u1/startbook/index.html>.

SECTION 3: Faculty Academic Regulations

SECTION 3: Faculty Academic Regulations Intro, The provisions of the chapter, [General Academic Regulations and Requirements](#), and the chapter, [University Policies](#), apply to all students. In addition, the Faculty of

Human Ecology has regulations and requirements, published below, that apply specifically to its students.

3.1 Prerequisite, Corequisite, and Course Availability: Definitions,

Prerequisite: If a course is prerequisite to a second course, the prerequisite must be met in order to continue in the second course. The department giving the second course may require a minimum grade of 'C' in the first course to register in the second course. Some inactive (legacy) courses may be used as prerequisites. Please check with an Academic Advisor in Human Ecology.

Corequisite: If a first course is a corequisite to a second course, the first course (unless previously completed) must be taken in the same term as the second course.

Course Availability: Not all courses listed in this Calendar are offered every year. Students are referred to the on-line calendar for courses offered in the year. Human Ecology courses at the 3000 and 4000 level are available only to students registered in the Faculty of Human Ecology or one of the minors or options associated with the Faculty. Courses at the 3000 and 4000 level may be taken with written permission from an Academic Advisor as long as there is space.

3.2 Scholastic Standards,

Graduation and Grade Point Average

To graduate, a student must have passed 120 credit hours acceptable for credit in the current degree program and have obtained a minimum of 240 quality points. This is equivalent to a Degree Grade Point Average of 2.0. A pass indicates a grade of 'D' or better. A student's Degree Grade Point Average (DGPA) will be determined from the number of effective courses which apply at a particular stage. The effective courses consist of all courses passed, in addition to all failures which have not been cleared, or substituted for, in the student's record. A maximum of 150 credit hours (25 courses or the equivalent) may be attempted in order to obtain the 120 credit hours. Effective for the admissions cycle beginning September 2009, to graduate, students in the Interdisciplinary Health Program (IHP) must attain a Degree Grade Point Average of 2.5 (300 quality points on 120 credit hours) on graduation and meet the probation standards as stated below.

Assessment

The status of each student will be assessed in May of each year in which a student is registered.

Probationary Standing

Students must achieve or exceed the following standards at the specified stages in their academic careers. Failure to obtain the standard results in probation. Once placed on probation, students who fail to meet the appropriate performance level at the next assessment following the next registration will be academically suspended. A student is not permitted to be on probation for two consecutive years.

Probationary Standards

Effective Credit hours	Minimum DGPA
24-30 hours	1.80
33-60 hours	1.85
63-90 hours	1.90
93-117 hours	1.95
120+ hours	2.00

Probationary Standards – Interdisciplinary Health Program

Effective Credit hours	Minimum DGPA
24-30 hours	2.00
33-60 hours	2.20
63-90 hours	2.40
93-117 hours	2.50
120+ hours	2.50

Suspension

Suspended students must remain out of the Faculty of Human Ecology for one academic year from the date of suspension and must apply for reinstatement at the Admissions Office no later than May 1.

Where mathematically possible for a suspended student to complete the degree by repeating failed courses, a suspended student shall be automatically reinstated after remaining out of the faculty for one calendar year, or by achieving a degree GPA above the probationary standard.

Suspension (All Attempts Used)

Where it is mathematically impossible for a student to complete the degree by repeating failed courses, a suspended student, after remaining out of the faculty for one calendar year, may attempt reinstatement. By completing at least 12 credit hours in one term with a minimum 'D' grade in all courses and a term grade point average of at least 2.0, the student will be reinstated. The student will start the program afresh, with previous grades of 'C' or better applicable to the program.

3.3 Part-time Students,

The maximum time allowed for completion of the degree is 10 years. After completion of 24 credit hours, part-time students will be evaluated each May and must conform to the minimum performance levels.

3.4 Repeating Courses,

A student may repeat any course for the purpose of attaining a better grade. The latest registration of a repeated course will count in GPA calculations. There are no supplemental examinations for students who have failed final or deferred examinations.

3.5 Challenge for Credit,

A student wishing to challenge a course for credit should contact an Academic Advisor. Letter grades are granted upon completion of the course that is challenged for credit. A list of courses for challenge is available in the General Office. An application is required.

3.6 Transfer of Credit,

See the chapters on [Admissions and Academic Regulations and Requirements](#) at the beginning of this *Calendar*. Students from faculties other than University 1 or from other institutions must make an appointment with an Academic Advisor by the end of their first academic year to arrange for transfer of credit.

3.7 Appeals of Academic Regulations,

The Faculty Committee on Student Standing considers petitions from students who request special consideration with respect to rules and regulations governing their programs of study and qualification for graduation.

3.8 Dean's Honour List,

Eligible students who achieve term Grade Point Averages of 3.5 or higher in at least 12 credit hours per term will be included in the Deans Honour List.

3.9 Degree With Distinction,

Students who graduate with a degree GPA of 3.75 and higher will receive a degree with distinction.

3.10 Work Permit for Study Purposes ,

International students who are registering for courses or programs that require work placement must obtain a valid **Work Permit**, in addition to maintaining a valid Study Permit. Work placement includes, but is not limited to, any **paid or unpaid** practicum, internships, work experience, field placement, and co-op programs that are a required component for the completion of their degree, diploma or certificate. Please contact your program advisor or the [International Centre for Students](#) for further information.

3.11 Release and Indemnification Forms ,

In elective courses, students may be required to sign a release form for off-campus activities.

3.12 Written English and Mathematics Requirements,

The written English and Mathematics requirements are satisfied by required courses HMEC 2030 and STAT 1000 within the Human Ecology program. HMEC 2030 will be available to students upon admission to the Faculty of Human Ecology.

SECTION 5: Family Social Sciences Course Descriptions-1000 Level

FMLY 1010 Human Development in the Family

(Formerly 062.101) Introductory survey of key aspects of human development processes within the family context from a life span perspective. Not to be held with NURS 1260 (049.126).

FMLY 1012 Introduction to Social Development

This course is an introduction to Social Development with a particular emphasis on families and communities. Social development is concerned with the advancement of the common good, the effective management of social problems, the meeting of human needs, and the equitable distribution of society's resources. As such, this course explores the social factors and conditions that promote or hinder social development and how this affects the well-being of individual, families, and communities in contemporary societies. Not to be held with 062.172 or FMLY 1900

FMLY 1020 Family Issues across the Lifespan

(Formerly 062.102) Introduction to contemporary issues involving families across the lifespan. Topics include mate selection, marriage, parenthood, divorce, lone-parent families, work-family balance, family violence, families and older persons, and poverty in families. Not to be held with 062.114.

FMLY 1420 Family Management Principles

(Formerly 062.142) An introductory course that uses an ecosystem perspective resources, decision-making, planning, implementing, evaluating, and communication within family contexts. Applications to balancing work and family, individual and family stress, family finance, environmental issues, and the use of time and human resources will be made. Not to be held with the former 062.142.

FMLY 1900 Families, Housing and Community: An Introductory Perspective

(Formerly 062.190) An introduction to understanding housing and community for individuals and families; shelter outside mainstream; neighbourhoods and communities; links between well being and poverty, housing, and community; some policy and program issues; various approaches used in studying this topic. Opportunity for some field experience. Not to be held with 062.172.

SECTION 5: Family Social Sciences Course Descriptions-2000 Level

FMLY 2012 Development, Conflict, and Displacement

The course is an introduction to development, conflict, and displacement as they affect individuals, families and communities. Specifically, this course examines the current phenomenon of induced displacement due to social conflicts, natural disasters, or uneven development in developing countries. Students will examine concepts and issues arising from induced displacement and explore community based responses to this problem. Not be held with FMLY 2900. Prerequisite: 1012 or consent of the instructor.

FMLY 2350 Multicultural Family Issues

(Formerly 062.235) A focus on multicultural issues that affect family interaction in

Canada, which is designed to prepare students for professional practice. Emphasizes dominant/minority family relationships, internal family dynamics of minority families, social policies directed toward creating and maintaining multiculturalism and diversity education for future professionals. Manitoba Aboriginal family life is accentuated. Prerequisite: FMLY 1020 (062.102) or equivalent.

FMLY 2400 Family Financial Health

A survey of topics that have an impact on the financial health of Canadian families, including personal money management, mortgage financing, credit and debt, educational and retirement planning, taxation, insurance, savings and investments. The course prepares students to help families maximize resources and increase their financial literacy. Prerequisite: FMLY 1420 (051.142). Not to be held with the former FMLY 2070 (062.207).

FMLY 2600 Foundations of Childhood Developmental Health

(Formerly 062.260) This course examines implications of theory and research in child development for promoting developmental health. Laboratory component focuses on working with children and evaluating effects of developmental progress. Prerequisite: Minimum grade of C in FMLY 1010 (062.101). Limited enrolment.

FMLY 2800 Family Violence

(Formerly 062.280) A survey of the extent and nature of various forms of family violence across the life course. Topics include physical and sexual child abuse, sibling violence, partner violence, and elder abuse. Emphasis is on prevalence, incidence, causes, consequences and solutions. Prerequisite: FMLY 1010 (062.101) or FMLY 1020 (062.102) or PSYC 1200 (017.120) or SOC 1200 (077.120).

FMLY 2900 Families, Housing and Community: A Development Perspective

(Formerly 062.290) Focus is on developmental issues for individuals, families and communities. Of particular interest is the interrelationship between facilitating community development and the developmental well being of residents. Social, psychological, cultural and political components are considered. Prerequisite: FMLY 1900 (062.190 or 062.172) or consent of instructor.

SECTION 5: Family Social Sciences Course Descriptions-3000 Level

FMLY 3012 Theories of Social Development

This course is a survey of social development theories that have influence the study and practice of development since the 1950s. It addresses the question of why theories of social development are necessary and why different theories emerged at particular times in history. This course examines explanations of development and underdevelopment as they impact on individuals, families and communities. Not be held with FMLY 4900. Prerequisite: FMLY 1012.

FMLY 3220 Death and the Family

(Formerly 062.322) An examination of dying and death of family members throughout the family life cycle. Specific topics included are the meaning of death, the process of dying, caring relationships, grief and bereavement. Prerequisite: FMLY 1020 (062.102) or PSYC 1200 (017.120) or SOC 1200 (077.120).

FMLY 3240 Families in Later Years

(Formerly 062.324) An investigation of family issues in the later years of life, such as housing, intergenerational relations, adjustment to retirement, sibling relations, grandparenting, death. Students may not hold credit for FMLY 3240 (062.324) and the former 062.321. Prerequisites: [FMLY 1010 (062.101) and FMLY 1020 (062.102)] or PSYC 1200 (017.120) or SOC 1200 (077.120).

FMLY 3330 Parenting and Developmental Health

(Formerly 062.333) Examines parenting and its influence on developmental health, with consideration of change across time, the context in which parenting occurs, and the effect of the parent-child relationship on developmental health. Prerequisites: FMLY 1020 (062.102) and completion of 54 credit hours. Not to be held with 062.435.

FMLY 3400 Families as Consumers

An examination of the factors that influence the consumer behaviour of individuals and families across the life course, with particular attention to the situation of vulnerable consumers. Theory, education, policy and practice are related to contemporary consumer issues and the impact of consumption behaviour on the environment. Prerequisites: FMLY 2400 or FMLY 2070 (062.207) and ECON 1200 (018.120) or ECON 1210 (018.121) or ECON 1220 (018.122). Not to be held with

the former FMLY 3450 (062.345).

FMLY 3470 Selected Studies in the Family I

(Formerly 062.347) The opportunity to carry out an individual study in the area of the family of particular interest to the student. When enrolment warrants, the department may offer selected topics in a regular course format. Prerequisite: consent of instructor.

FMLY 3600 Adolescents in Families and Society

(Formerly 062.360) This course is designed to help students understand the nature of adolescent relationships with their families in communities. The application of theory and research on adolescent relationships to professional practice with families and communities is emphasized. Prerequisite: FMLY 2600 (062.260) and completion of 54 credit hours.

FMLY 3610 Developmental Health of Children and Youth

(Formerly 062.361) Population health gradients are largely set early in life and are affected by the environments in which children live. This course examines current knowledge of the social determinants of child and adolescent health. Consideration is given to policy implications, including directions for program development and evaluation. Not to be held with the former 062.450. Prerequisite: FMLY 2600 (062.260). Not to be held with 062.450.

FMLY 3780 Introduction to the Development of Programs for Children and Families

(Formerly 062.378) An introduction to the theory and practice of program development with special emphasis on programs for children and families. The course will cover techniques for conducting need assessments, as well as the process of planning and implementing programs to address community need. Prerequisite: HMEC 2000 or HMEC 2050 (028.205).

FMLY 3790 Introduction to the Evaluation of Programs for Children and Families

(Formerly 062.379) An introduction to the theory and practice of program evaluation with special emphasis on child and family programs. Considers the purpose of evaluation, types of evaluation, evaluation design and analysis, and the evaluation process. Prerequisite: HMEC 2050 (028.205).

FMLY 3800 Conflict Resolution in the Family

(Formerly 062.380) Students will examine the nature and development of conflict in family relationships throughout the life span. Implications of conflict for the quality of family relationships and individual development will be addressed. Prerequisite: FMLY 2800 (062.280) and completion of 54 credit hours.

FMLY 3802 Intimate Partner Violence

A critical examination of theory and research on violence in intimate relationships. Topics will include violence in dating, common-law, marital, ex-partner and same-sex relationships. Prerequisite: FMLY 2800.

FMLY 3804 Violence Against Children in the Family

An in-depth study of the dynamics and effects of the range of forms of violence against children occurring within families. Approaches to intervention and prevention will be examined. Prerequisite: FMLY 2800 (062.280).

FMLY 3900 Families, Housing and Community: A Policy Perspective

(Formerly 062.390) Examines policy relative to families, housing and community. Primer on public policy process and links to families. Examines housing policies at federal, provincial, and municipal levels and their impact on individuals and families. Opportunity for some field experience. Prerequisite: FMLY 1900 (062.190) or consent of instructor. Not to be held with 062.473.

SECTION 5: Family Social Sciences Course Descriptions-4000 Level

FMLY 4012 Social Development Policies

This course examines the formulation of social development policies and the impact of these policies on the well-being of individuals, families, and communities. The course uses a seminar format to foster students' capacity to understand and examine policy issues. Students will develop skills in understanding, analyzing, and formulation social development policies. Actual social development case studies will be evaluated and alternative family and community oriented policies discussed.

Not be held with FMYL 3900. Prerequisite: 3012.

FMYL 4300 Field Experience

(Formerly 062.430) Provide students with field experience in a supervised setting. The course consists of 120 hours of supervised work in an assigned setting and seminar time with peers and field experience coordinator. Grade is pass/fail. Prerequisite: 84 credit hours and consent of instructor. Not to be held with 062.436 or 062.455 or 062.456 or 062.457.

FMYL 4330 Management of Family Stress

(Formerly 062.433) Theories which influence family behaviour during stress are discussed, and coping/managerial skills to mitigate the effects of the stressors are examined. Stress management advice from agencies and in educational settings is analyzed. Prerequisite: FMYL 1020 (062.102)

FMYL 4400 Family Economics: Poverty and Wealth

Analysis of principles, major problems and trends in the economic welfare of individuals and families in both the Canadian and global economies. Emphasis on families and their relationships to the economy such as income inequality, family economic policy, human capital, poverty and resource distribution within families. Prerequisites: [FMYL 2400 or FMYL 2070 (or 062.207)] and [one of ECON 1200 (04 018.120) or ECON 1210 (or 018.121) or ECON 1220 (or 018.122)]. Not to be held with the former FMYL 4450 (or 062.445).

FMYL 4460 Family Financial Counselling

(Formerly 062.446) Theory and practice of financial counselling of debt-burdened families. Debt analysis. Appraisal of alternate solutions and of legal and psycho-social factors in terms of family well-being and financial capacity. Prerequisite: FMYL 3450 (062.345).

FMYL 4470 Selected Studies in the Family II

(Formerly 062.447) The opportunity to carry out advanced study in the area of the family of particular interest to the student. When enrolment warrants, the department may offer selected topics in a regular course format. Prerequisite: consent of instructor.

FMYL 4480 Work and Family Issues

(Formerly 062.448) An exploration of the interface between paid work and unpaid work and families in the Canadian and international contexts. Topics include demographic trends; parenting, child and elder care; management of work-family conflict; development of workplace solutions; and social policy implications. Prerequisite: FMYL 2070 (062.207) and 84 credit hours.

FMYL 4600 Risk and Resilience in Behavioural and Social Development

(Formerly 062.460) The development of behavioural and social difficulties are examined from a risk and resilience perspective. The interaction of factors at all levels of the human ecological system are considered in terms of their impact on increasing risk and/or building resilience in children and youth. Prerequisite: FMYL 2600 (062.260). Not to be held with 062.437.

FMYL 4602 Family Relationships, Health and Well-being

This course provides an indepth survey of the interaction between family relationship dynamics, health and well-being across the life course period. The influence of family members on health-related behaviours is reviewed and preventive family-based interventions are evaluated. Prerequisite: FMYL 3600 (or 062.360).

FMYL 4800 Senior Seminar in Family Violence and Conflict Resolution

(Formerly 062.480) Advanced study in the areas of family violence and/or conflict resolution. Special emphasis is placed upon current research and/or practice. Prerequisite: FMYL 3800 (062.380) and completion of 72 credit hours.

FMYL 4900 Families, Housing and Community: An Action Perspective

(Formerly 062.490) Examines relationships between families, housing and community; impact of communities on children; best practices for enhancing quality of life in communities; participatory processes for working with communities. Significant on-site learning. Emphasis on inner-city. Prerequisite: FMYL 2900 (062.290) or FMYL 3900 (062.390) or consent of instructor.

SECTION 5: General Human Ecology Course Descriptions-2000 Level

HMEC 2000 Research Methods and Presentation

An introduction to research designs, methods and techniques, as well as the practice of disseminating results, in the context of selected determinants of health. Applications in natural and social sciences will be presented. Skills related to presenting research findings will be taught. Prerequisite: STAT 1000 (005.100). Not to be held with HMEC 2050 (028.205).

HMEC 2030 Human Ecology: Perspectives and Communication

(Lab Required)(Formerly 028.203) Theory and practice of written and oral communication set within the context of the subject matter of areas of Human Ecology. Students may not hold credit for HMEC 2030 (028.203W) and 028.103 and 028.204.

HMEC 2050 Introduction to Research in Human Ecology

(Formerly 028.205) A general introduction to research issues in natural and social sciences and their application in the various subject areas in human ecology. Prerequisites: [HMEC 2030 (028.203W or 028.103W)] and STAT 1000 (005.100)M.

HMEC 2650 The Social Aspects of Aging

(Formerly 028.265) An examination of the social aspects of aging. Emphasis on understanding the aging process as a life transition involving adaptation through interaction with social and physical environments. Students may not hold credit for HMEC 2650 (028.265) or SWRK 2650 (047.265) or REC 2650 (123.265).

SECTION 5: General Human Ecology Course Descriptions-3000 Level

HMEC 3100 Communication for Professional Practice

(Formerly 028.310) Advanced communication skills as applied to professional practice in the fields of human ecology. Students may not hold credit for HMEC 3100 (028.310) and 028.204. Prerequisites: 39 credit hours in the Human Ecology program and HMEC 2030 (028.203 or 028.103).

HMEC 3500 Developmental Health

This course examines how social inequalities affect population health across the lifespan. It is guided by the determinants health with a particular focus on socioeconomic variables. Local, provincial, national and international perspectives provide meaningful insight into the roles of equality and inequality. Prerequisite: Any 2000 level research methods course.

SECTION 5: General Human Ecology Course Descriptions-4000 Level

HMEC 4090 Practicum in Human Ecology

(Formerly 028.409) This is a partnership among the university, field supervisor, and the student. It provides an opportunity for students to work in a supervised setting (e.g., health, social services or business) with health professionals as field supervisors. Students also have in-class experiences and assignments with an academic instructor. Prerequisite: 84 credit hours in the Human Ecology General or Interdisciplinary Health program and consent of instructor. Application required. Limited Enrolment.

SECTION 5: Human Nutritional Sciences Course Descriptions-1000 Level

HNSC 1100 Nutrition for Healthy Living

An introduction to nutrition and practical approaches for healthy diet and disease prevention. Prerequisites: Enrollment in the Aboriginal Community Wellness Diploma program. Not to be held with HNSC 1210

HNSC 1200 Food: Facts and Fallacies

(Formerly 030.120) This course will present facts and fallacies about food from harvest to market forms. Emphasis will be placed on technological development, consumer concerns and factors affecting nutritional quality. Current issues related to food safety and nutritional trends will also be discussed. Not to be held with 030.119.

HNSC 1210 Nutrition for Health and Changing Lifestyles

(Formerly 030.121) This course addresses the relationship between nutrition and health. The focus is on healthy eating and on strategies for modifying food patterns within the context of lifestyle and culture. Not to be held with 030.117 or 030.323 or

HNSC 1100.

SECTION 5: Human Nutritional Sciences Course Descriptions- 2000 Level

HNSC 2130 Nutrition Through the Life Cycle

(Formerly 030.213) Examination of nutritional needs throughout the life cycle, the nutritional concerns of different age groups and the development of healthy eating practices. Not to be held with 030.304. Prerequisite: HNSC 1210 (030.121).

HNSC 2140 Basic Principles of Human Nutrition

(Formerly 030.214) The scientific principles underlying nutrient function and dietary requirements. Prerequisites: A grade of C or higher in [CHEM 2770 or MBIO 2770 (002.277 or 060.277) or CHEM 2360 or MBIO 2360 (002.236 or 060.236)] and [HNSC 1210 (030.121) and HNSC 1200 (030.120)] or [FOOD 2500 (078.250)]. Not to be held with the former 030.325.

HNSC 2150 Composition, Functional and Nutritional Properties of Foods

(Formerly 030.215) Food composition, food market forms, food composition data for nutritional assessment and labelling. Prerequisites: HNSC 1200 (030.120) and HNSC 1210 (030.121) and [CHEM 1320 or CHEM 1310 (002.132 or 002.131)].

HNSC 2160 Principles of Food Preparation and Preservation

(Lab Required)(Formerly 030.216) Food preparation, preservation, handling and storage; quality and safety implications; scientific basis for culinary practice; use and application of equipment. Prerequisite: HNSC 1200 (030.120) and [CHEM 1320 or CHEM 1310 (002.132 or 002.131)]. Not to be held with 030.211 or 030.324.

SECTION 5: Human Nutritional Sciences Course Descriptions-3000 Level

HNSC 3260 Food Quality Evaluation

(Formerly 030.326) Discussion of quality concepts and quality assurance principles for food applications, and of methods for evaluation of sensory, chemical and physical aspects of quality. The course will include food industry visits and demonstrations of food testing techniques. Prerequisites: [HNSC 2160 (030.216) or FOOD 3010 (078.301)] and STAT 2000 (005.200).

HNSC 3300 Vitamins and Minerals in Human Health

(Formerly 030.330) The physiological importance of vitamins and minerals in the human body, including factors affecting dietary requirements, metabolism and roles in disease progression and prevention. Prerequisites: [CHEM 2780 or MBIO 2780 (002.278 or 060.278) or CHEM 2370 or MBIO 2370 (002.237 or 060.237)] and [HNSC 2140 (030.214) and ZOOL 1330 (022.133 or 022.254)]. Not to be held with the former 030.426.

HNSC 3310 Macronutrients and Human Health

(Formerly 030.331) Macronutrient functions and metabolic roles in human health, including the prevention and pathogenesis of various diseases. Prerequisites: [CHEM 2780 or MBIO 2780 (002.278 or 060.278) or CHEM 2370 or MBIO 2370 (002.237 or 060.237)] and [HNSC 2140 (030.214) and ZOOL 1330 (022.133 or 022.254)]. Not to be held with former 030.325.

HNSC 3320 Nutrition Education and Dietary Change

Formerly 030.332) Theoretical and practical aspects influencing dietary change at the individual and population level, with emphasis on nutritional education. Prerequisites: [PSYC 1200 (017.120) or SOC 1200 (077.120)] and HNSC 2130 (030.213) and HNSC 2140 (030.214)

HNSC 3330 Ingredient Technology for Designed Foods

(Formerly 030.333) Chemical and functional properties of ingredients and their application in designed foods: low fat, low calorie, high fibre, high energy and innovative food products. Prerequisites: [CHEM 2780 or MBIO 2780 (002.278 or 060.278) or CHEM 2370 or MBIO 2370 (002.237 or 060.237) and HNSC 2150 (030.215)] or [CHEM 2220 (002.222) and FOOD 2500 (078.250)].

HNSC 3342 Management for Food and Nutrition Professionals

Management strategies and cost control principles as applied to food and nutrition organizations. Topics include leadership, organizational design, teamwork, human resource management, performance improvement, cost management, and the interpretation of financial statements. Not to be held with HNSC 3340 (030.334).

Prerequisites: HNSC 1200 (030.120) and [GMGT 2030 (027.203) or GMGT 2070 (027.207) or GMGT 2080 (027.208)].

HNSC 3350 Culture and Food Patterns

(Lab Required) A study of the cultural, sociological and psychological aspects of food patterns and behaviour. Not to be held with 030.329. Prerequisites: [PSYC 1200 (017.120) or SOC 1200 (077.120)] and HNSC 1200 (030.120) and HNSC 1210 (030.121).

HNSC 3870 Food Geographies

This course provides a critical examination of the geographies of food at a variety of scales, from the body to the global. The course focuses on themes in three interconnected areas: 1) food production and the global food system from farm to plate including agribusiness and alternative food production and distribution models; 2) food consumption habits and beliefs and foodways as geographically contingent material culture; and 3) food (in) security and its relationship to health and wellbeing. This course is cross-listed with GEOG 3870. Prerequisites: A grade of "C" or better in GEOG 1280, GEOG 1281, GEOG 1200 or HNSC 1200, or permission of the department head.

SECTION 5: Human Nutritional Sciences Course Descriptions-4000 Level

HNSC 4120 Senior Thesis

The preparation and presentation of a report based on a survey of the literature or on a laboratory investigation of an approved topic. Prerequisites: Students must be registered in their final year of Human Nutritional Sciences program or the Minor in Human Nutrition and Metabolism. Application required. Enrolment limited. Not to be held with HNSC 4122 or HNSC 4600.

HNSC 4122 Research Project in Human Nutritional Sciences

A research project in any aspect of human nutritional sciences, chosen in consultation with the supervising faculty member. A written report and a poster or oral presentation required at the end of the project. Students must be registered in their final year of Human Nutritional Sciences program. Application required. Enrolment limited. May not be held with HNSC 4120 (030.412) OR HNSC 4600.

HNSC 4140 Quantity Food Production and Management

(Lab Required)(Formerly 030.414) Menu planning. Food costing. Experience in standard methods of institutional food production and service. Prerequisites: HNSC 3340 or HNSC 3342 (030.334) and HNSC 2160 (030.216) or consent of instructor. Additionally, students must complete the Food Handlers Certificate Program and must submit the form to the Department by June 15th in order to be permitted to enter HNSC 4140.

HNSC 4160 Seminar in Foods and Nutrition

(Formerly 030.416) A critical study of research in the field of foods and nutrition; oral and written reports required. Restricted to 4th year majors in the Department. Prerequisites: completion of 84 credit hours in the HNS program and HMEC 2000 or HMEC 3100 (028.310).

HNSC 4260 Selected Topics in Human Nutrition

(Formerly 030.426) Recent developments in human nutrition research. Prerequisite: consent of instructor.

HNSC 4270 Sensory Evaluation of Food

(Lab Required)(Formerly 030.427) Sensory perception, principles of the sensory analysis of food, requirements for sensory testing, test methods, selection and training of panelists, statistical analysis and interpretation of data. Prerequisites: [HNSC 2160 (030.216) or FOOD 3010 (78.301) or ENTM 3240 (038.324)] and STAT 2000 (005.200) or equivalent.

HNSC 4280 Food Product Development

(Formerly 030.428) This course focuses on food industry product development procedures. Emphasis will be on application of basic knowledge of foods and food processing in designing a new product. Prerequisites: MKT 2210 (118.221) and STAT 2000 (005.200) and [one of FOOD 3010 (078.301) or HNSC 3330 (030.333)]. Not to be held with FOOD 4510 (078.451).

HNSC 4290 Food, Nutrition and Health Policies

(Formerly 030.429) Principles and applications of policies, regulations and legislation in the areas of food and health that address nutrition and health problems of populations. Not to be held with the former 030.328. Prerequisites: HMEC 2050

(028.205) and HNSC 2130 (030.213) and HNSC 2150 (030.215) and STAT 2000 (005.200).

HNSC 4300 Community Nutrition Intervention

(Formerly 030.430) Principles of planning and evaluating nutrition related interventions. Examples of community needs assessments, program planning strategies and types of program evaluation will be examined. Not to be held with 030.411. Prerequisite: HNSC 3320 (030.332).

HNSC 4310 Nutrition and the Elderly

(Formerly 030.431) The role of nutrition in health promotion and disease prevention during aging. Prerequisites: HNSC 3310 (030.331) and HNSC 3320 (030.332). Prerequisite or corequisite: HNSC 3300 (030.330). Offered in alternate years, opposite HNSC 4340.

HNSC 4320 Nutrition Management of Disease States

(Lab Required)(Formerly 030.432) Nutritional assessment and dietary management of acute and chronic disease states. Prerequisite or corequisite: HNSC 3300 (030.330) and HNSC 3310 (030.331) and HNSC 3320 (030.332). Not to be held with 030.423 or 030.424.

HNSC 4340 Maternal and Child Nutrition

(Formerly 030.434) The role of nutrition in normal human development from conception through childhood. Prerequisites: HNSC 3310 (030.331) and HNSC 3320 (030.332). Prerequisite or corequisite: HNSC 3300 (030.330). Offered in alternate years opposite HNSC 4310.

HNSC 4350 Nutrition in Exercise and Sport

(Formerly 030.435) The application of nutritional regimens to meet exercise requirements and improve athletic performance. Current practices and recommendations for different types of sports will be examined. Prerequisites: [HNSC 1210 (030.121)] and [PHED 3430 (057.343), or KIN 3470, or PHED 3470] or [ZOOL 1330 (002.1330)]

HNSC 4362 Nutrition Option Practicum

Practical applications of nutrition principles in a variety of public service and research applications. Prerequisites: completion of 84 credit hours in the Human Nutritional Sciences program with two of the following courses: HNSC 3300, HNSC 3310, HNSC 3320, and HNSC 3330. Application to the department is required. Limited enrolment.

HNSC 4364 Foods Industry Option Practicum

This course involves supervised application of food quality, safety, and management principles in a commercial or government setting. Requirements include 280 hours of work related to the field experience. Prerequisites: Completion of 84 credit hours in Human Nutritional Sciences, including the following courses from the Food Industry Option: HNSC 3260, HNSC 3330, FOOD 4150 and one of GMG 2030, GMG 2070 or GMG 2080. Application to department is required. Limited enrolment.

HNSC 4540 Functional Foods and Nutraceuticals

(Formerly 030.454) This course will examine the bioactive components of functional foods and nutraceuticals, their sources, chemistry, process technology, efficacy, safety and regulation. Prerequisite: [CHEM 2770 or MBIO 2770 (002.277 or 060.277) or CHEM 2360 or MBIO 2360 (002.236 or 060.236)]. Not to be held with FOOD 4540 (078.454).

HNSC 4600 Practice-based Research in Human Nutritional Sciences

A practice-based research project relevant to dietetic practice. Prerequisite: Registration in the 4th year of the Human Nutritional Sciences program and any two of HNSC 3300, HNSC 3320 & HNSC 3330, and instructor permission required. Enrolment limited to students pre-selected by the Manitoba Partnership Dietetic Education Program. Not to be held with HNSC 4120 or HNSC 4122

SECTION 5: Interdisciplinary Health Degree Program Course Descriptions-2000 Level

HEAL 2600 Integration of Health Determinants of Individuals

Students study, integrate and apply the determinants that affect the health of individuals throughout the life span to selected case or learning scenarios. The case or learning scenarios present a variety of issues in the delivery of health-related Undergraduate Studies

services that are intended to benefit individual health. Prerequisites: One of CHEM 1300 (002.130) or BIOL 1020 (071.102) or STAT 1000 (005.100); and one of PSYC 1200 (017.120) or SOC 1200 (77.120) or consent of instructor.

SECTION 5: Interdisciplinary Health Degree Program Course Descriptions-3000 Level

HEAL 3600 Integration of Health Determinants for Communities
Students study, integrate and use community level determinants of population health in selected case or learning scenarios. These cases present a variety of issues in the design of health related services that are intended to benefit population health. Prerequisites: HEAL 2600 and 39 credit hours in the Curriculum for Interdisciplinary Health or consent of instructor.

SECTION 5: Interdisciplinary Health Degree Program Course Descriptions-4000 Level

HEAL 4600 Integration of Health Determinants for Canada and World

Students use selected case or learning scenarios to study the determinants of population health that depend on decision making in governmental or international agencies. The case scenarios present a variety of issues in the governance and management of population health. Prerequisites: HEAL 3600 and 57 credit hours in the Curriculum for Interdisciplinary Health or consent of instructor.

HEAL 4610 Health Studies Capstone

Students will explore selected topics from the social sciences to synthesize and evaluate actions that can affect the health of people. The course summarizes the social sciences knowledge that forms the basis for all health related professional work. Prerequisite: A grade of C+ in HEAL 3600 and 57 credit hours in the Curriculum for Interdisciplinary Health or consent of instructor. Restricted to students in Health Sciences and Health Studies.

HEAL 4620 Health Sciences Capstone

Students will explore selected topics from the biological sciences to synthesize and evaluate actions that can affect the health of people. The course summarizes the biological science knowledge that forms the basis for all health related professional work. Prerequisite: a grade of C+ in HEAL 3600 and 57 credit hours in the Curriculum for Interdisciplinary Health or consent of instructor. May not hold with HEAL 4610

HEAL 4650 Selected Topics in Interdisciplinary Health

The opportunity to carry out individual study in the area of interdisciplinary health. When enrolment warrants, special topics may be offered in a regular course format. Prerequisite: Consent of Instructor and Chairperson.

SECTION 5: Textile Sciences Course Descriptions-1000 Level

TXSC 1600 Textiles for Living

(Lab Required)(Formerly 064.160) This course covers the fundamental knowledge of textiles in a product development context. It includes properties of fibres, yarns and fabrics; characteristics of natural and manufactured fibres; chemical structures of the most commonly used natural and manufactured fibres for apparel and non-apparel end uses; woven, knitted, and non-woven structures; and dyeing and printing. Not to be held with 064.102.

TXSC 1610 Textiles, Product, and Consumers

(Formerly 064.161) This course covers the structure and characteristics of the natural and manufactured fibre sectors; downstream industries which transform natural or manufactured fibres into intermediate goods; the manufacturing industry which transforms intermediate supplies to final products; and the retailing industry which distributes final textile products to consumers or organizations.

SECTION 5: Textile Sciences Course Descriptions-2000 Level

TXSC 2420 History of Textiles

(Formerly 064.242) Development and diffusion of textile fibres, fabrics, and finishes from prehistoric times to present. May not hold with 064.332.

TXSC 2500 Preparation for Product Development

Designed for students with little or no background in textile product assembly or for

students who require a refresher course. This course provides an orientation to textile product assembly equipment, construction, techniques, and terminology. Students must pass this course before they will be permitted to continue in TXSC 2630. For Textile Sciences students only. NOTE: The credit associated with this course will not be counted toward the minimum credit hour requirements of the Textile Sciences degree. (Pass/fail grade).

TXSC 2600 Textiles for Apparel End Uses

(Formerly 064.260) Theories of product development and their applications to creating textile products for apparel end uses including fashion apparel; apparel for consumers throughout the lifespan, including childhood, young adults, older adults; apparel for consumers with disabilities; apparel for professional sports and recreation; and apparel for the healthcare sector. Prerequisites: [064.102] or [a minimum grade of C in TXSC 1600 (064.160) and TXSC 1610 (064.161) and 3 credit hours of 100-level chemistry].

TXSC 2610 Textiles for Non Apparel End Uses

(Formerly 064.261) Product development theories from engineering and management perspectives to illustrate the development of textile fibres, fabrics, and products for the industrial and healthcare sectors. Industrial uses of textiles include the automotive and the aerospace industries. End uses for the healthcare sector include textiles or textile products for rehabilitation, protection from bacteria, healing of wounds, and implantable textiles. Assessment of selected fabric properties such as strength, flammability, colourfastness and air permeability will be introduced. Prerequisites: [064.102] or [a minimum grade of C in TXSC 1600 (064.160) and TXSC 1610 (064.161) and 3 credit hours of 100-level chemistry].

TXSC 2620 Consumer and Organizational Behaviour Toward Textile Products

(Formerly 064.262) Theories and practices of consumer and organizational decision making with respect to textile products. Prerequisites: TXSC 2600 (064.260) or TXSC 2610 (064.261). Not to be held with MKTG 3230 (118.323).

TXSC 2630 Pattern Development in an Industrial Environment

(Lab Required)(Formerly 064.263) This course covers the process of communicating product design through pattern development. Students will learn the terminologies of pattern development, techniques of pattern development and manipulation, and the importance of anthropometry in creating apparel to suit its end uses. Prerequisite: TXSC 2600 (064.260). Additionally, students must complete TXSC 2500. TXSC 2500 is not required if a minimum standard is met on the challenge test. Continuation in TXSC 2630 is dependent on successful completion of TXSC 2500 or the challenge test. Not to be held with the former 064.348.

SECTION 5: Textile Sciences Course Descriptions-3000 Level

TXSC 3470

(Formerly 064.347) Directed study in a specific area of clothing and/or textiles. Prerequisite: consent of instructor and 60 credit hours in the Clothing and Textiles program.

TXSC 3500 Textiles for the Healthcare Sector

(Formerly 064.350) This course covers the recent developments of a range of technical textiles for the healthcare sector, including implantable textiles, barrier fabrics, and smart textiles. Prerequisite: TXSC 2610 (064.261) and [HMEC 2050 (028.205) or any 2000-level or 3000-level research method course] and CHEM 1000 (001.100) or CHEM 1300 (002.130). Not to be held with 064.347 which was offered from September 2004 to September 2005/2006.

TXSC 3600 Global Apparel and Textiles Trade

(Formerly 064.360) Covers the role of apparel and textiles trade in economic growth and development of industrialized, transitional, and developing nations. It will take into account the evolution of trade relations among apparel and textile producing countries and regions. Prerequisite: [TXSC 2620 (064.262)] and [ECON 1010 and 1020 (ECON 1200 (018.120) or ECON 1210 (018.121))] and [ECON 1220 (018.122)] and [HMEC 2000 or HMEC 2050 (028.205)]. Not to be held with the former 064.340.

TXSC 3610 Product Standards and Specifications

(Formerly 064.361) Challenge students to apply their knowledge and skills gained in TXSC 2600, TXSC 2610 and TXSC 2620 to develop textiles and textile product standards and specifications for various forms of product development (e.g., private label, national brands, licensed goods) where there are no known precedents.

Undergraduate Studies

Students will learn the process of developing product standards by working on case studies. Textile products will include apparel and non-apparel end uses.

Prerequisites: TXSC 3620 (064.362) and [HMEC 2000 or HMEC 2050 (028.205)]. Not to be held with 064.220 or 064.221 or 064.337.

TXSC 3620 Evaluation of Textile Performance

(Lab Required)(Formerly 064.362) Covers the serviceability of textile products for apparel and non apparel end uses. Students will learn to carry out commonly used textile testing methods for assessing durability, comfort, aesthetic properties and safety. Prerequisites: TXSC 2600 (064.260) and TXSC 2610 (064.261). Not to be held with the former 064.220 or 064.221 or 064.337.

TXSC 3630 Line Planning and Visual Communication

(Formerly 064.363) Covers the steps in developing a line of textile products for apparel and home furnishings end uses and the techniques of communicating product information to relevant members of the supply chain. Students will learn manual methods and computer aided design solutions to communicate product concepts. Prerequisite: TXSC 2630 (064.263). Not to be held with the former 064.225.

TXSC 3640 Pattern Development in a Computer Aided Design Environment

(Formerly 064.364) This course is a continuation of TXSC 2630. It covers advanced pattern manipulations using an industrial computer aided design system. Prerequisite: TXSC 2630 (064.263) and TXSC 3650 (064.365). Not to be held with 064.349.

TXSC 3650 Production of Textile Products

(Formerly 064.365) Covers the role of production in the product development process. Students will learn the terminology which meets industrial standards, the most commonly used production techniques for apparel and non apparel products, time studies, costing, development of specifications, manufacturing systems, and selected test methods for quality management. Prerequisites: TXSC 2630 and [HMEC 2000 or HMEC 2050 (028.205)]. Not to be held with 064.224 and 064.342

TXSC 3700 Special Topics in Textile Sciences

This course will vary from year to year depending on the trends within the textile/apparel complex. Students will be given the opportunity to study a detailed area of textile sciences through a field experience or travel study. Prerequisite: Permission of the instructor.

SECTION 5: Textile Sciences Course Descriptions-4000 Level

TXSC 4210 Seminar in Clothing and Textiles

(Formerly 064.421) Critical study of literature and other information sources in the field of clothing and textiles. Oral and written reports required. Restricted to fourth year majors in the department.

TXSC 4260

(Formerly 064.426) Application of marketing in the textile industries. Prerequisites: 064.340 and MKTG 2210 (118.221).

TXSC 4310

(Formerly 064.431) Supervised practical experience in the clothing and textile field in an appropriate off-campus setting. Prerequisite: completed 84 credit hours in the Clothing and Textiles program. GPA is considered; limited enrolment.

TXSC 4320 Selected Topics in Clothing and Textiles I

(Formerly 064.432) Directed study in a specific area of clothing and/or textiles. Prerequisite: Consent of instructor and 84 credit hours in the Clothing and Textiles program.

TXSC 4340

(Formerly 064.434) Independent study on an approved topic in a) marketing, production or design of apparel, b) history of costume and textiles, c) sociopsychological aspects of clothing, or d) textile performance, preservation and use. A detailed proposal for the study must be submitted in order to register. Prerequisite: completed 84 credit hours in the Clothing and Textile program and consent of department head.

TXSC 4500 Advanced Textiles for the Healthcare Sector

Covers the latest developments in technical textiles for the healthcare sector and the

measurement of attributes which are essential to the performance of textiles for medical or healthcare end uses. Prerequisites: A grade of "C" or better in: [TXSC 2600 (064.260)] and [TXSC 2610 (064.261)] and [TXSC 3620 (064.362)] and [TXSC 3500 (064.350)] and [CHEM 2220 (022.222)].

TXSC 4600 The Information Age and the Textiles Supply Chain
Covers the evolution of the textile complex from a production orientation to a logistics orientation; the role of information technology in creating or enhancing competitive advantage; the range of technologies used by the textile complex to communicate design, production, and management information throughout the supply chain; decision making process executives go through to decide which types of technology to purchase, how to implement them within the firm, the financial implications, the effects on business-to-business communication, and the effects on business-to-consumer communication. Prerequisite: TXSC 3600.

TXSC 4610 Integrative Project
This is a required course in which students are required to demonstrate their ability to integrate the skills and knowledge accumulated in the program. Specifically, students will solve a specific textile or product development problem which may originate from the students' interests, developed in collaboration with academic staff, or community-based. Prerequisite: TXSC 3610 (064.361) and TXSC 3630 (064.363) and TXSC 3640 (064.364). Not to be held with the former 064.430 or TXSC 4340 (064.434) or TXSC 4210 (064.421) or TXSC 4310 (064.431).

TXSC 4620 Colour Management
Covers the basic concepts and principles of colour science, the process of determining seasonal colour palette, colour specification systems, colour notation systems, commercial colour identification systems, the colour approval process in industrial, institutional, and consumer goods settings, colour measurement, and interpretation of colour data. Students will learn the process of preserving colour integrity throughout the supply chain. Prerequisites: TXSC 3610 (064.361). Not to be held with the former 064.339 or 064.430.

TXSC 4630 Quality Assurance Systems
Covers the concept of total quality management; the role of total quality management in apparel and textiles; the role of standard setting agencies in developing standards of product and service quality; management systems such as ISO 9000 and case studies of textiles and apparel firms which have adopted these systems. Students will learn by solving a series of problems presented to them in the format of case studies. Prerequisites: TXSC 3650 and TXSC 4620. Not to be held with 064.220 or 064.221 or 064.337.

SECTION 4: Program and Graduation Requirements

SECTION 4: Program and Graduation Requirements Introduction,
Within an overall health promotion orientation, the mission of the Faculty of Human Ecology is to sustain, develop and transmit knowledge that supports individuals and their interactions in families and communities as they enhance their quality of life and improve their physical and social environments. Our teaching and research integrates both basic and applied sciences, incorporating innovative technologies and emergent areas of knowledge. The Faculty of Human Ecology contributes to the health of people in Manitoba, Canada and elsewhere by promoting good health. This health promotion contribution is distinct from the treatment of ill health. The Faculty uses the WHO (World Health Organization) definition of health as the framework for planning and activities: *A state of complete physical, mental and social well-being and not merely the absence of disease or infirmity.* The Faculty uses the Ottawa Charter definition of health promotion: *The process of enabling people to increase control over, and to improve, their health (Ottawa Charter for Health Promotion, 1986).*

Programs in the Faculty of Human Ecology are specialized to meet the needs of students, employers and society. Scholarship, learning and research range from metabolic and clinical aspects to psychological, behavioural and community aspects. The Faculty's work extends along the continuum from cellular and biochemical aspects to health related products and policies. Study in the Faculty in one of seven undergraduate programs offers background that can lead to career opportunities in business and industry, dietetics and institutional administration, education, social services, government and research. We are one of the founding units of the University of Manitoba; our graduates have contributed to improving human health and well-being locally, nationally, and internationally for 95 years.

Students entering the Faculty will select one of the following six programs:

- Family Social Sciences Program
- Health Sciences Program
- Health Studies Program
- Human Ecology Program
- Human Nutritional Sciences Program
- Textile Sciences Program

In order to qualify for a degree, students must complete the 120 credit hours (123 for TS, Eng. Sci. option) specified for the selected program. Elective choices provided in each program can permit students to transfer between them; however, this opportunity decreases as students progress. Students who transfer to another program must meet the full requirements of that program. There is a quota in effect for intake to each program per academic year. The quota may affect movement into a program after the September intake.

4.1 Advisement

4.1 Advisement Content,
The Faculty will provide entering students with orientation information and will refer a student to a program advisor if the student requests. The program advisor will be a Faculty member from the student's department or program. Individual programs of study for returning students will be planned in consultation with departmental representatives at sessions scheduled in March of each year. All returning students in the Faculty of Human Ecology must submit a program plan for the succeeding year before the end of the Winter term.

4.2 Faculty Program Requirements

4.2 Faculty Program Requirements Content,
The following are the guidelines for the program requirements in the Faculty. The courses outlined for each program in the sections which follow, meets these basic requirements.

Admitted in September 2005 or Later:

- A faculty core of 9 credit hours consisting of:

Course No.	Credit Hours
HEAL 2600 Integration of Health Determinants of Individuals	3
HMEC 2000 Research Methods and Presentation	3
HMEC 3100 Communication for Professional Practice	3

- Plus a minimum of 51 additional credit hours within the Faculty;
- Plus a minimum of 30 additional credit hours outside the Faculty of which at least 6 credit hours must be from the Faculty of Science and six from the social sciences;
- Plus a minimum of 12 additional credit hours of free electives leading to a degree requirement of 120 (123) credit hours.

Notes:

1. Students in the Interdisciplinary Health Program complete PSYC 2250 in lieu of HMEC 2050 and may choose HMEC 3100 as an elective.

2. Students admitted before September, 2005 and graduating after May, 2005, will make the following program adjustments because of the deletion of the former 028.408 (HMEC 4080) as a degree requirement.

• Family Social Sciences students must complete an additional 3 credit hours of Faculty electives at the 3000 or 4000 level.

• Human Ecology program students must complete an additional 3 credit hours of Faculty electives.

• Human Nutritional Sciences students must complete an additional 3 credit hours of free electives.

• Textile Sciences students must complete an additional 3 credit hours of free electives.

3. Students admitted between September 2005 and September 2011 are urged to seek academic advising assistance for advice regarding completion of core course requirements.

4.3 Program Electives

4.3 Program Electives Content,
Courses within each program fall into one of three categories:

- Department electives must be chosen from within the program department.
- Outside electives must be chosen from a Faculty other than Human Ecology.
- Free electives may be chosen from within or outside the Faculty of Human Ecology.

4.4 Family Social Sciences

4.4 Family Social Sciences Content,

Head: Caroline Piotrowski

Applying knowledge from the social and physical sciences, students in Family Social Sciences examine factors affecting human psychosocial health and wellbeing. They study human development from infancy to old age within the context of families, communities, and culture.

Students are required to choose at least one area, or option, in which to focus their studies. The name of their option will appear as a “comment” on their transcripts. They may select from the following options: 1) Aging; 2) Child and Adolescent Development; 3) Family Economic Health; 4) Family Violence and Conflict Resolution; 5) Social Development. Family Social Sciences graduates are permitted to complete any option after their degree as a Special Student. Not every Family Social Sciences course will be offered every year. A chart providing course rotation information is available on the Family Social Sciences web page.

The Family Social Sciences program can provide students with academic preparation or complementary courses for programs such as Law, Social Work, Education or Graduate Studies.

In March of each year, program planning sessions are provided to assist students in their selection of courses for subsequent years of study.

4.4 Students Admitted in September 2002 or Later

4.4 Students Admitted In September 2002 or Later,
Students Admitted in September 2011 or Later

Courses to be taken by all Family Social Sciences students:

Course No.		Credit Hours
STAT 1000	Basic Statistical Analysis	3
One of:		
STAT 2000 <i>or</i> COMP 1260	Basic Statistical Analysis 2, Introductory Computer Usage 1, or any other Science course	3
One of:		
ECON 1010 and ECON 1020, ECON 1210 <i>or</i> ECON 1220	Principles of Economics, Introduction to Canadian Economic Issues, or Introduction to Global and Environmental Economic Issues and Policies	3-6
HMEC 2000	Research Methods and Presentation	3
HMEC 3100	Communication for Professional Practice	3
HEAL 2600	Integration of Health Determinants of Individuals	3
FMLY 1010	Human Development in the Family	3
FMLY 1012	Introduction to Social Development	3
FMLY 1020	Family Issues across the Lifespan	3
FMLY 1420	Family Management Principles	3
FMLY 2400	Family Financial Health (or FMLY 2070)	3
FMLY 2350	Multicultural Family Issues	3
FMLY 3780	Introduction to the Development of Programs for Children and Families	3
FMLY 3790	Introduction to the Evaluation of Programs for Children and Families	3
PSYC 1200 <i>or</i> SOC 1200	Introduction to Psychology or Introduction to Sociology	6
	Department Electives	24
	Faculty electives (3000 or 4000 level)	3
	Outside Electives	12-15
	Free electives	30

NOTES:

1) If students choose ECON 1010 and 1020 (former 1200), 12 credit hours of outside electives are required.

2) All courses listed in the general Family Social Sciences section (above) are required. In addition, students must choose at least one area, or option, in which to focus their studies. In the following section, the courses required to fulfill each option are listed. They will partially meet department, outside and free elective requirements. More courses will be required to complete the 120 credit hour degree. Students are encouraged to take more than one option. Each option must consist of 18 non-overlapping credit hours; that is, no course can satisfy the requirements of more than one option.

4.4 Aging Option

4.4 Aging Option,
Aging Option

This option is the Interfaculty Option in Aging, which can fulfill the requirement for an option within the Family Social Sciences major.

HMEC or SWRK or REC 2650	Social Aspects of Aging	3
FMLY 4300	Field Experience	6
NURS or KIN 2610	Health and Physical Aspects of Aging	3
FMLY 3220	At least 3 credit hours from: Death and the Family	3

FMLY 3240	Families in Later Years	
	At least 3 credit hours from:	3
NURS 2200	Selected Topics in Aging and Health	
PSYC 2370	Developmental Psychology from Adolescence to Old Age	
PSYC 3460	Abnormal Psychology	
PSYC 3490	Individual Differences	
PSYC 3610	Memory	
KIN 4500	Physical Activity and Aging	
REC 4250	Leisure and Aging	
RLGN 1410	Death and Concepts of the Future	
SOC 2490	Sociology of Health and Illness	
SOC 2620	The Sociology of Aging	
SOC 3510	Population Dynamics and Change	
SOC 3540	The Sociology of Health Care Systems	

4.4 Child and Adolescent Development Option

4.4 Child and Adolescent Development Option,
Child and Adolescent Development Option

FMLY 2600	Foundations of Childhood Developmental Health	3
FMLY 3600	Adolescents in Families and Societies	3
FMLY 4600	Risk and Resilience in Behavioural and Social Development	3
	At least nine credit hours from:	9
FMLY 2800	Family Violence	
FMLY 3610	Developmental Health of Children and Youth	
FMLY 3800	Conflict Resolution in the Family	
FMLY 3802	Intimate Partner Violence	
FMLY 3804	Violence Against Children in the Family	
FMLY 3330	Parenting and Developmental Health	
FMLY 4330	Management of Family Stress	
FMLY 4602	Family Relationships, Health and Well-Being	
FMLY 4480	Work and Family Issues	
HNSC 1210	Nutrition for Health and Changing Lifestyles	
HNSC 2130	Nutrition through the Life Cycle	
NURS 4440	Health Promotion in the Community	
NURS 4420	Prevention of Illness	
PSYC 2440	Behaviour Modification Principles	
PSYC 2450	Behaviour Modification Applications	

4.4 Family Economic Health Option

4.4 Family Economic Health Option,
Family Economic Health Option

	At least 9 credit hours from:	9
FMLY 3400	Families as Consumers	
FMLY 4330	Management of Family Stress	
FMLY 4400	Family Economics: Poverty and Wealth	
FMLY 4460	Family Financial Counselling	
FMLY 4480	Work and Family Issues	
	At least 9 credit hours from (at least 3 credit hours must be selected from courses numbered 3000 or 4000):	
ACC 1100	Introductory Financial Accounting	
ACC 1110	Introductory Managerial Accounting	
ANTH 2550	Culture and the Individual	
ANTH 2430	Ecology, Technology and Society	
ECON 2280	Social Welfare and Human Resources	
ECON 2310	Canadian Economic Problems	

ECON 2350	Community Economic Development
ECON 2360	Women in the Canadian Economy
ECON 2390	Introduction to Environmental Economics
ECON 2400	Introduction to Energy Economics
ECON 2540	Political Economy 1: Production and Distribution
ECON 2550	Political Economy 2: Economic Growth and Fluctuations in a Global Economic Environment
ECON 3390	Development Economics
ECON 3720	Urban and Regional Economics and Policies
FIN 2200	Corporation Finance
FIN 3420	Security Analysis
FMLY 3012	Social Development Policies
FMLY 3240	Families in Later Years
FMLY 3610	Developmental Health of Children and Youth
FMLY 4012	Theories of Social Development
FMLY 4602	Family Relationships, Health and Well-Being
GEOG 1280	Introduction to Human Geography
GEOG 2210	Economic Geography
GMGT 2030	Administrative Theory
GMGT 2440	Human Resource Management
HNSC 1210	Nutrition for Health and Changing Lifestyles
HNSC 2130	Nutrition through the Life Cycle
IDM 3000	Aboriginal Business Context: Influences and Impacts
MKTG 2210	Fundamentals of Marketing
MKTG 3230	Consumer Behaviour
NATV 1200	The Native Peoples of Canada
NATV 1220	The Native Peoples of Canada, Part 1
NATV 1240	The Native Peoples of Canada, Part 2
NURS 4440	Health Promotion in the Community
SOC 3370	Sociology of Work
SOC 3510	Population Dynamics and Change
SOC 3470	Political Sociology
SOC 3870	Social Inequality
TXSC 1600	Textiles for Living
TXSC 1610	Textiles, Product and Consumers
TXSC 2600	Textiles for Apparel End Uses
TXSC 2610	Textiles for Non Apparel End Uses
TXSC 2620	Consumer and Organizational Behaviour Toward Textile Products
TXSC 3600	Consumer and Organizational Behaviour Toward Textile Products

4.4 Family Violence and Conflict Resolution Option

4.4 Family Violence and Conflict Resolution Option, Family Violence and Conflict Resolution Option

FMLY 2800	Family Violence	3
FMLY 3800	Conflict Resolution in the Family	3
FMLY 4800	Senior Seminar in Family Violence and Conflict Resolution	3
	At least 9 credit hours (at least 3 credit hours must be selected from courses numbered 3000 or 4000):	9
ANTH 3380	Anthropology and Contemporary Social Issues	
FMLY 3610	Developmental Health of Children and Youth	
FMLY 3802	Intimate Partner Violence	
FMLY 3804	Violence Against Children in the Family	
FMLY 4330	Management of Family Stress	
FMLY 4600	Risk and Resilience in Behavioural and Social Development	
FMLY 4602	Family Relationships, Health and Well-Being	
NATV 1240	The Native Peoples of Canada, Part 2	
NURS 3300	Women and Health	
NURS 3400	Men's Health: Concerns, Issues and Myths	
PSYC 2460	Dyadic Relationships	
SOC 2370	Ethnic Relations	
SOC 2510	Criminology	
SOC 3700	Sociology of Law	
SOC 3750	Institutional Response to Violence in Family and Intimate Relationships	
SOC 3790	Women, Crime and Social Justice	
SOC 3830	Youth, Crime, and Society	
SWRK 3130	Contemporary Canadian Social Welfare	
WOMN 3560	Feminist Perspectives on Violence Against Women	

4.4 Social Development Option

4.4 Social Development Option, Social Development Option

FMLY 2012	Development, Conflict, and Displacement	3
FMLY 3012	Theories of Social Development	3
FMLY 4012	Social Development Policies	3
	Three (3) credit hours from:	3
HMEC or SWRK or REC 2650	Social Aspects of Aging	3
FMLY 2800	Family Violence	
FMLY 3240	Families in Later Years	
FMLY 3400	Families as Consumers	
FMLY 3800	Conflict Resolution in the Family	
FMLY 3804	Violence Against Children in the Family	
FMLY 4330	Management of Family Stress	
FMLY 4400	Family Economics, Poverty and Wealth	
FMLY 4600	Risk and Resilience in Behavioural and Social Development	
FMLY 4602	Family Relationships, Health and Well-Being	
FMLY 4480	Work and Family Issues	
	(Six) 6 credit hours from:	6
ANTH 1220	Cultural Anthropology	
SOC 2320	Canadian Society and Culture	
SOC 3890	Power and Inequality in Comparative Perspective	
SWRK 2050	Community and Organizational Theory	
NATV 1220	The Native Peoples of Canada, Part 1	
NATV 1240	The Native Peoples of Canada, Part 2	
LABR 3220	Global Sweatshops, Global Struggles	
POLS 1000	Democracy and Development	
POLS 2070	Introduction to Canadian Government	
POLS 4710	Political Theory and the Family	
WOMN 1600	Introduction to Women's and Gender Studies in the Social Sciences	

4.5 The After Degree Program in Family Social Sciences

4.5 The After Degree Program in Family Social Sciences Content,

An After Degree Program (ADP) in Family Social Sciences is offered to students who have completed a previous undergraduate degree. ADP students must complete 60 credit hours in total to earn their second degree in Family Social Sciences. All Family Social Sciences U1 prerequisites are waived. In order to facilitate ADP students completing the program in a timely manner, they will automatically be permitted (without special permission from the course instructor) to take Family Social Sciences 2000 level prerequisites as corequisites for any required Family Social Sciences 3000 and/or 4000 level courses. Please consult with the Academic Advisor when planning programs prior to registration. ADP students are required to choose at least one option and meet its requirements at the second year level and beyond. These 18 credit hours may include courses external to the Faculty of Human Ecology that are required to complete an option. If a second option is not chosen, then these credit hours must be taken within the department. There are no free electives in the ADP.

Students admitted in January 2007 or Later

Faculty of Human Ecology Core Courses (any 6 credit hours. See note 3):

At least 6 credit hours from:

HMEC 2000, HMEC 3100, or HEAL 2600	Research Methods and Presentation, Communication for Professional Practice, or Integration of Health Determinants of Individuals (see note 3)	6 - 9
------------------------------------	---	-------

Family Social Sciences Requirements (see note 4):

FMLY 2350	Multicultural Family Issues	3
FMLY 2400	Family Financial Health	3
FMLY 3780	Introduction to the Development of Programs for Children and Families	3
FMLY 3790	Introduction to the Evaluation of Programs for Children and Families	3

And a minimum of 6 credit hours from (see note 5):

FMLY 2600	Foundations of Childhood Developmental Health	6
FMLY 2800	Family Violence	
FMLY 2012	Development, Conflict, and Displacement	
HMEC/SWRK/ REC 2650	The Social Aspects of Aging	

Family Social Sciences Option (see note 6) 15
Family Social Sciences Electives (see note 7) 15-18

STAT 1000	Basic Statistical Analysis (see note 8)	3
TOTAL		60

NOTES:

- The same entrance requirements will be applied to ADP students in order to maintain current Faculty of Human Ecology standards.
- Basic social science knowledge is assumed because ADP students have previously completed an undergraduate degree; waiving U1 requirements for FSS courses acknowledges the skills, background and maturity of this particular group of students.
- This choice provides students who have previously taken a research methods course with the option of avoiding redundancy in their program. Students are free to take all three core courses if they feel it would benefit them. If students select 9 credit hours of core courses, the FSS electives component is reduced to 15 credit hours.
- This set of courses is currently required of all undergraduate FSS students and is required for students in the ADP.
- Students are required to take a minimum of any two (6 credit hours) of the introductory level courses across options. Review the list of options found in the 120 credit hour undergraduate degree program to assist with planning for prerequisites for higher level courses.

6. Each FSS option is a total of 18 credit hours; ADP students will have taken at least one 2000 level course (3 credit hours) required by the chosen option as part of their program requirements, leaving the remaining 15 credit hours to be completed to fulfil the option. Completion of the option may include courses external to the Faculty of Human Ecology that are required to complete an option

7. ADP students are encouraged to specialize in two options simultaneously to strengthen and broaden their expertise. If a second option is chosen, these credit hours may include courses external to the Faculty of Human Ecology that are required to complete the option. If students have completed the 2000 level course required for the second option, the requirement to complete the option is 15 credit hours. If a second option is not chosen, then these credit hours must be taken within the department.

8. Students who have previously completed an undergraduate statistics course can either transfer it in directly (if already assessed as equivalent) or can request to have it assessed for advanced standing; if successful, students will be required to add 3 credit hours to their program from courses selected from the Department of Family Social Sciences.

4.6 The Family Social Sciences Minor

4.6 The Family Social Sciences Minor Content,

A minor in Family Social Sciences is offered by the Department of Family Social Sciences. Students must complete 18 credit hours, distributed as follows: Six (6) credit hours in Family Social Sciences at the 1000 level, and at least three (3) credit hours in Family Social Sciences at the 2000 level, and at least three (3) credit hours in Family Social Sciences at the 3000 or 4000 level, with no more than 6 credit hours at the 1000 level.

Students must check with their home Faculties to see if the Family Social Sciences minor is available in their programs.

4.7 Human Ecology Program

4.7 Human Ecology Program Content,

Chair: Gustaaf Sevenhuysen

The Human Ecology program is one of five degree choices in the Faculty of Human Ecology and is designed for students who have career goals that require basic preparation in each of the major subject areas of the faculty. The program provides course work in Human Nutritional Sciences, Textile Sciences and Family Social Sciences as well as the requirement of an 18 hour Minor in a related field – the minor designation will also appear on the student’s transcript. The program has a large elective course component to permit students to select courses to meet individual interests and career options. Persons who intend to select this program are advised that high school Chemistry 40S and Mathematics 40S are prerequisites to CHEM 1300 University 1: Structure and Modeling in Chemistry, which is highly recommended as an elective course.

Before entering continuing years in the Faculty of Human Ecology, the overall program must be planned in consultation with the Chair or committee member. Course planning sessions are held in March of each year.

Students Admitted in September 2011 or Later

Course No.	Credit Hours
ECON 1010 or ECON 1210 and ECON 1220 Economics and 1020	6
Six credit hours from ECON 2280, ECON 2310, ECON 2390, ECON 2400, ECON 2540, ECON 2550	6
FMLY 1020 Family Issues across the Lifespan	3
Six credit hours from FMLY 1010, FMLY 1420 or FMLY 1012	6
FMLY 2350 Multicultural Family Issues	3
HMEC 2000 Research Methods and Presentation	3

Undergraduate Studies

HMEC 3100	Communication for Professional Practice	3
HEAL 2600	Integration of Health Determinants of Individuals	3
HNSC 1200	Food: Facts and Fallacies	3
HNSC 1210	Nutrition for Health and Changing Lifestyles	3
HNSC 2130	Nutrition through the Life Cycle	3
NATV 1200	The Native Peoples of Canada, or	6
NATV 1220 and NATV 1240	The Native Peoples of Canada Part 1 and The Native Peoples of Canada Part 2	
STAT 1000	Basic Statistical Analysis 1	3
PSYC 1200	Introduction to Psychology	6
Or		
SOC 1200	Introduction to Sociology	
TXSC 1600	Textiles for Living	3
TXSC 1610	Textiles, Product and Consumers	3
	Science course as defined by Faculty of Science	3
	Faculty Electives (at least 9 credit hours at 3000 or 4000 level; HMEC 4090, Practicum is highly recommended)	24
	Minor/option	18

Recommended Minors/Options:

Canadian Studies, Family Social Sciences, Human Nutrition and Metabolism, Labour and Workplace Studies, Management, Native Studies, Option in Aging, Political Studies, Sociology, Urban Studies, Women and Gender Studies

Free electives 12

4.8 Human Nutritional Sciences

4.8 Human Nutritional Sciences Content,

Head: James D. House

Students majoring in Human Nutritional Sciences will choose the Nutrition Option, the Foods Option, the Food Industry Option, or will select the second degree in Human Nutritional Sciences. The educational requirements to qualify for a dietetic internship and membership with the College of Dietitians of Manitoba (CDM) or dietetic colleges in other Canadian provinces may be met within the Nutrition Option with the recommended selection of courses. Students can apply for a dietetic internship during the program (see application requirements and procedures for Pre-Selection by the Manitoba Partnership Program), in the final year of their degree or after completion of their degree. Internships are awarded competitively by external institutions. Review the section on academic requirements for eligibility to apply for a dietetic internship for students admitted in September, 2007 and later. Those who plan to enter Human Nutritional Sciences are advised that high school Chemistry 40S and Mathematics 40S are prerequisites to CHEM 1300 University 1: Structure and Modeling in Chemistry. A student admitted to the Human Nutritional Sciences program must take a minimum of one HNSC required course in the year they are admitted. Before entering continuing years in the Faculty of Human Ecology, the overall program must be planned with departmental advice. Sessions are held in March of each year.

Students admitted in September 2010 or later must register for at least one HNSC course (3 credit hours) in order to stay in the Human Nutritional Sciences program.

Students Admitted in September 2011 or Later

Course No.	Course Name	Credit Hours
Courses to be taken by all Human Nutritional Sciences students		
CHEM 1300	University 1: Structure and Modeling in Chemistry	3
CHEM 1320	University 1: Introduction to Organic Chemistry (See Note 1)	3
CHEM 2770	Elements of Biochemistry 1 (See Note 2)	3
CHEM 2780	Elements of Biochemistry 2 (See Note 3)	3
FOOD 4150	Food Microbiology	3

Foods Option

HNSC 3300	Vitamins and Minerals in Human Health	3
	or	
HNSC 3310	Macronutrients and Human Health	
HNSC 3260	Food Quality Evaluation	3
HNSC 3350	Culture and Food Patterns	3
HNSC 4270	Sensory Evaluation of Food	3
HNSC 4280	Food Product Development	3
MKTG 2210	Fundamentals of Marketing	3
	Program Electives (See Note 6)	9
	Free Electives	24
	Restricted Faculty Electives (see Note 5)	

Food Industry Option

FOOD 4310	Introduction to HACCP	3
GMGT 2030 (or GMGT 2070 or GMGT 2080)	Administrative Theory	3
HNSC 3260	Food Quality Evaluation	3
HNSC 3300 or HNSC 3310	Vitamins and Minerals in Human Health or Macronutrients and Human Health	3
HNSC 4280	Food Product Development	3
HNSC 4364	Foods Industry Option Practicum	6
MKT 2210	Fundamentals of Marketing	3

NOTE: HNSC 4290 is not a requirement for students in the Food Industry Option. Students in the Food Industry Option must complete one of the following concentrations (15 credit hours). Select 15 credit hours of course work from the list that follows.

Quality Assurance Concentration

AGRI 2190	Toxicology Principles	1.5
ANSC 2530	Nutritional Toxicology	1.5
FOOD 4160	Food Analysis 1	3
FOOD 4250	Food Analysis 2	3
FOOD 4500	Food Safety and Regulations	3
FOOD 4250	Food Analysis 2	3
STAT 3000	Applied Linear Statistical Models	3
STAT 3170	Statistical Quality Control	3

Food Product Development Concentration

FOOD 4160	Food Analysis 1	3
FOOD 4250	Food Analysis 2	3
FOOD 4500	Food Safety and Regulations	3

4.8.1 Pre-Professional Preparation

Students in the Human Nutritional Sciences program can complete the entrance requirements for several professional programs as part of the degree.

A. Dietetics Focus: Academic requirements for eligibility to enter a dietetic internship.

1. Courses required in addition to the Human Nutritional Sciences program:

Course No.	Course Name	Credit Hours	Placement in Program
GMGT 2030	Administrative Theory (or GMGT 2070 or GMGT 2080)	3	Free Elective
HNSC 3342	Management for Food and Nutrition Professionals	3	Department Elective
HNSC 4140	Quantity Food Production and Management	3	Department Elective
HNSC 4XXX	One of HNSC 4300, HNSC 4310, HNSC 4362, or HNSC 4340	3-6	Department Elective

2. Entry into a Dietetic internship is competitive. It is strongly recommended that students seek advice from the Department on all aspects of preparing an application to an internship.

i. Students admitted prior to September 2007:

Students admitted prior to September, 2007 will follow regulations regarding Dietetic internship applications in the final year of their degrees (information available on the Human Ecology web site and from the Dean's Office).

ii. Students admitted for September 2007 or later:

Students admitted to the Faculty of Human Ecology's Department of Human Nutritional Sciences in September, 2007 or later, will be eligible to apply to be pre-selected by the Manitoba Partnership Dietetic Education Program (MPP) after completion of 60 – 90 credit hours. Details of the pre-selection process and the academic rating selection criteria will be published by the MPP and a link is available on the Faculty of Human Ecology's web site. If students are not pre-selected by the MPP, there are other opportunities to apply in the final year of degree for internships following degree completion.

3. For those intending to apply for a Dietetic internship, the second degree's Dietetics Preparation program meets the course requirements in Human Nutritional Sciences, but not all the other supporting course requirements, for example, psychology/sociology, humanities or social sciences, microbiology, research methods, communication arts, basic principles of management. Check with an Academic Advisor to review the supporting course requirements from previous academic work.

B. Medicine or Dentistry: Eligibility for entry into the program Doctor of Medicine, or the program Doctor of Dental Medicine, at the University of Manitoba.

Courses required in addition to the Human Nutritional Sciences program (can be taken as electives in the program):

Course No.	Course Name	Credit Hours	Placement in Program
CHEM 2210*	Introduction to Organic Chemistry 1: Structure and Function (see Note 7)	3	Free Elective
CHEM 2220	Introduction to Organic Chemistry 2: Reactivity and Synthesis (See Note 7)	3	Free Elective
CHEM 2360** or MBIO 2360	Biochemistry 1: Bio-molecules and an Introduction to Metabolic Energy	3	Free Elective
CHEM 2370** or MBIO 2370	Biochemistry 2: Catabolism, Synthesis and Information Pathways	3	Free Elective
	Humanities requirement (Check the Faculty of Medicine's application information regarding the Humanities/ Social Science requirement).		Free Elective
PHYS 1020	General Physics 1	3	Free Elective
PHYS 1030	General Physics 2	3	Free Elective

* Cannot be held with CHEM 1320 in the same program. Prerequisite is CHEM 1310 (University 1: Introduction to Physical Chemistry).

** These courses replace the biochemistry courses in the Human Nutritional Sciences program.

C. Law: Eligibility for entry into the program Bachelor of Laws at the University of Manitoba.

1. The Human Nutritional Sciences program meets the entrance requirements of the Faculty of Law.

2. It is necessary to apply to the Faculty of Human Ecology to take HMEC 2030 (Human Ecology: Perspectives and Communication) in University 1, as it is not normally available to students in University 1.

NOTES:

- Under required courses, students can take either CHEM 1320 (University 1: Introduction to Organic Chemistry) or CHEM 1310 (University 1: Introduction to Physical Chemistry).
- Under required courses, students can take either CHEM/MBIO 2770 (Elements of Biochemistry 1) or CHEM/MBIO 2360 (Biochemistry 1: Bio-molecules and an Introduction to Metabolic Energy).
- Under required courses, students can take either CHEM/MBIO 2780 (Elements of Biochemistry 2) or CHEM/MBIO 2370 (Biochemistry 2: Catabolism, Synthesis, and Information Pathways).
- Under required courses, students can take either BIOL 1412 (Physiology of the Human Body) or BIOL 2410 (Human Physiology 1) and BIOL 2412 (Human Physiology 2). Note that students selecting BIOL 1020 and 1030 are not required to complete BIOL 1410, and will decrease electives to 12 credit hours. The selection of BIOL 1020 and 1030 will have more options with regard to taking higher level Botany, Zoology and Microbiology courses as electives.
- Students admitted between 1994 and September 2001 may choose to eliminate the requirement for 9 credit hours of Restricted Faculty Electives from their programs.

Please advise an Academic Advisor using the elective change form available in the General Office.

6. Nine credit hours of courses from either the Asper School of Business and/or from 3rd and 4th year courses in the Department of Food Science.

7. For students who do not take CHEM 2210 and CHEM 2220, CHEM 1320 is preferred.

4.9 Minor in Human Nutrition and Metabolism

4.9 Minor in Human Nutrition and Metabolism Content, The Minor in Human Nutrition and Metabolism (18 credit hours) requires the following courses:

Course No.	Course Name	Credit Hours
HNSC 1200	Food: Facts and Fallacies	3
HNSC 1210	Nutrition for Health and Changing Lifestyles	3
HNSC 2140	Basic Principles of Human Nutrition	3
HNSC 3300	Vitamins and Minerals in Human Health	3
HNSC 3310	Macronutrients and Human Health	3
HNSC 4120	or Senior Thesis	3
HNSC 4540	Functional Foods and Nutraceuticals	

4.10 Second Degree Program in Human Nutritional Sciences

4.10 Second Degree Program in Human Nutritional Sciences Content, **Required Courses -- 45 Credit Hours**

Refer to information in section 4.8.1 about applying for a Dietetic internship. Students must complete 60 credit hours while enrolled in the second degree program. If any of the required courses have been completed in the previous degree, free electives must be chosen to meet the 60 credit hour requirement. Students are not required to satisfy the Written English requirement.

Course No.	Course Name	Credit Hours
CHEM 1300	University 1: Structure and Modeling in Chemistry (see note 1)	3
CHEM 1320	University 1: Introduction to Organic Chemistry (see note 1)	3
CHEM 2770	Elements of Biochemistry 1 (see note 2)	3
CHEM 2780	Elements of Biochemistry 2 (see note 3)	3
HNSC 2140	Basic Principles of Human Nutrition	3
HNSC 2160	Principles of Food Preparation and Preservation	3
HNSC 3300	Vitamins and Minerals in Human Health	3
HNSC 3310	Macronutrients and Human Health	3
HNSC 3320	Nutrition Education and Dietary Change	3
HNSC 3330	Ingredient Technology for Designed Foods	3
HNSC 4290	Food, Nutrition and Health Policies	3
STAT 1000	Basic Statistical Analysis 1	3
STAT 2000	Basic Statistical Analysis 2	3
BIOL 1410 or BIOL 1020 and BIOL 1030	Anatomy of the Human Body or Biology 1 and	3-6
BIOL 1412	Biology 2 (see note 4) Physiology of the Human Body (see note 5)	3

Free Elective Courses - 6 credit hours. If additional courses are required as prerequisites, they will be considered free electives.

Elective Courses – 9 credit hours from Human Nutritional Sciences (choose one of three options):

Course No.	Course Name	Credit Hours
A. Dietetics Preparation HNSC 3342	Management for Food and Nutrition Professionals	3
HNSC 4140	Quantity Food Production and Management	3
HNSC 4320	Nutrition Management of Disease States	3
B. Human Nutrition HNSC 4320	Nutrition Management of Disease States	3
or HNSC 4300	Community Nutrition Intervention	6
HNSC 4300, HNSC 4310, HNSC 4340 or HNSC 4350	Choose 6 credit hours from: Community Nutrition Intervention, Nutrition and the Elderly, Maternal and Child Nutrition, or Nutrition in Exercise and Sport	
C. Foods HNSC 2150	Composition, Functional and Nutritional Properties of Foods	3
HNSC 3260	Food Quality Evaluation	3
HNSC 4540	Functional Foods and Nutraceuticals	3

NOTES:

- Under required courses, students can take either CHEM 1320 (University 1: An Introduction to Organic Chemistry), or CHEM 1310 (University 1: An Introduction to Physical Chemistry). Students can take CHEM 2210 (Introduction to Organic Chemistry 1: Structure and Function) and CHEM 2220 (Introduction to Organic Chemistry 2: Reactivity and Synthesis) instead of CHEM 1300 and CHEM 1310 or CHEM 1320. For students who do not take CHEM 2210 and CHEM 2220, CHEM 1320 is preferred.
- Under required courses, students can take either CHEM/MBIO 2770 (Elements of Biochemistry1) or CHEM/MBIO 2360 (Biochemistry 1: Bio-molecules and in Introduction to Metabolic Energy).
- Under required courses, students can take either CHEM/MBIO 2780 (Elements of Biochemistry 2) or CHEM/ MBIO 2370 (Biochemistry 2: Catabolism, Synthesis, and Information Pathways).
- Under required courses, students can take either BIOL 1412 (Physiology of the Human Body) or BIOL 2410 (Human Physiology 1) and BIOL 2412 (Human Physiology 2). Note that students selecting BIOL 1020 and 1030 are not required to complete BIOL 1410, and will decrease electives to 12 credit hours. The selection of BIOL 1020 and 1030 will have more options with regard to taking higher level Botany, Zoology and Microbiology courses as electives.
- If BIOL 1020 and BIOL 1030 are taken, the additional 3 credit hours are considered to be free electives.

4.11 Interdisciplinary Health Program

4.11 Interdisciplinary Health Program Content,
Program Chairperson: Shahin Shooshtari

This curriculum consists of two degree programs: the Bachelor in Health Sciences and the Bachelor in Health Studies. These degree programs offer new approaches to planning, administration and delivery of health services by fully integrating biological science and social science in understanding the health of people. Students

will gain experience of dealing with health issues at the individual, community and institutional levels, as well as across the lifespan. The two degrees can serve as the foundation for careers in health care teams and community health management. They offer a general course of study, not a professional status. Students can use both degree programs to build the knowledge and prerequisites for entry into professional programs in the health and social science fields, such as medicine, dentistry and others. The Bachelor of Health Sciences degree provides students with an interdisciplinary background and skill set that will contribute to their preparation for a future in biomedical and health-related careers. This interdisciplinary skill set is seen as advantageous for future physicians and students applying for professional education.

4.11.1 Health Sciences Degree

Course No.	Course Name	Credit Hours
The following 30 credit hours are to be taken in U1		
BIOL 1020	Biology 1: Principles and Themes	3
BIOL 1030	Biology 2: Biological Diversity, Function and Interaction	3
CHEM 1300	University 1: Structure and Modeling in Chemistry	3
CHEM 1310	University 1: Introduction to Physical Chemistry	3
PSYC 1200	Introduction to Psychology	6
STAT 1000	Basic Statistical Analysis 1	3
BIOL 1410	Anatomy of the Human Body	3
BIOL 1412	Physiology of the Human Body	3
Required courses		
COMP 1260	Introductory Computer Usage I	3
ECON 1210	Introduction to Canadian Economic Issues and Policies	3
GMGT 2070	Introduction to Organizational Behaviour	3
HEAL 2600	Integration: Individual Focus	3
HEAL 3600	Integration: Community Focus	3
HEAL 4600	Integration: Canada and World Focus	3
HEAL 4620	Health Sciences Capstone	3
HMEC 2030	Human Ecology: Perspectives and Communication	3
HMEC 3500	Developmental Health	3
HNSC 1210	Nutrition for Health and Changing Lifestyles	3
PHIL 1290	Critical Thinking	3
PSYC 2250	Introduction to Psychological Research	3
Select 6 out of 9 credit hours		
GEOG 4290	Geographies of Health and Health Care	
PHIL 2740	Ethics and Biomedicine	
SOC 2490	Sociology of Health and Illness	
Elective Courses	To be taken from an approved list of Science courses (available on the Human Ecology web site and from the Dean's Office): At least 21 credit hours are to be taken from the list of approved Science courses (Group A). At least 24 credit hours are to be taken at the 3000 and 4000 level.	36
Free Electives		15

4.11.2 Health Studies Degree

Course No.	Course Name	Credit Hours
The following 30 credit hours are to be taken in UI		
ANTH 1210	Human Origins and Antiquity	3
ANTH 1220	Cultural Anthropology	3
BIOL 1020	Biology 1: Principles and Themes	3
BIOL 1030	Biology 2: Biological Diversity, Function and Interaction	3
PSYC 1200	Introduction to Psychology	6
SOC 1200	Introduction to Sociology	6
STAT 1000	Basic Statistical Analysis 1	3
Required courses		
COMP 1260	Introductory Computer Usage I	3
ECON 1210	Introduction to Canadian Economic Issues and Policies	3
GMGT 2070	Introduction to Organizational Behaviour	3
HEAL 2600	Integration: Individual Focus	3
HEAL 3600	Integration: Community Focus	3
HEAL 4600	Integration: Canada and World Focus	3
HEAL 4610	Health Studies Capstone	3
HMEC 2030	Human Ecology: Perspectives and Communication	3
HMEC 3500	Developmental Health	3
HNSC 1210	Nutrition for Health and Changing Lifestyles	3
PHIL 1290	Critical Thinking	3
PSYC 2250	Introduction to Psychological Research	3
Select 6 out of 9 credit hours		
GEOG 4290	Geographies of Health and Health Care	6
PHIL 2740	Ethics and Biomedicine	
SOC 2490	Sociology of Health and Illness	
Elective Courses	To be taken from an approved list of Social Science courses (available on the Human Ecology web site and from the Dean's Office):	36
	At least 21 credit hours are to be taken from the list of approved Social Science courses (Group A). At least 24 credit hours are to be taken at the 3000 and 4000 level.	
Free Electives		15

In Health Sciences, students are required to take 21 credit hours of science and 12 credit hours of social science courses from 36 credit hours of Approved Electives.

In Health Studies, students are required to take 21 credit hours of social science and 12 credit hours of science courses from 36 credit hours of Approved Electives.

4. Students in both programs are required to take at least 24 credit hours at the 3000 and 4000 levels from 36 credit hours of Approved Electives. Students in both programs are required to take at least 21 credit hours from List A, at most 6 credit hours from List B and at most 3 credit hours from List C from 36 credit hours of Approved Electives.

Students should consult the University Calendar to ensure that they have the appropriate pre- or corequisites before they attempt to register in a course. A number of courses are cross-listed between departments/faculties. The Student Advisor will give additional guidance.

4.11.3 Health Sciences and Health Studies Minors

Minors in Health Sciences and Health Studies are offered by the Interdisciplinary Health Degree program.

Health Sciences Minor:

HEAL 2600	Integration of Health Determinants of Individuals
HEAL 3600	Integration of Health Determinants for Communities
HEAL 4600	Integration of Health Determinants for Canada and the World
	6 credit hours of Science Orientation courses at the 3000 or 4000 level*
	3 credit hours of Social Science Orientation courses at the 3000 or 4000 level*
TOTAL	18 credit hours

Notes:

1. Before entering continuing years in the Faculty of Human Ecology, the overall program must be planned with academic advice. Sessions are held in March of each year.

2. Students are strongly encouraged to seek the advice of Academic Advisors in the Faculty of Human Ecology in order to plan their programs to develop pathways of knowledge that will assist them in moving toward careers in chosen fields. Advice is available in the Dean's Office and on the Human Ecology web site.

3. Students in both programs are required to structure their course selections as follows:

Health Studies Minor:

HEAL 2600	Integration of Health Determinants of Individuals
HEAL 3600	Integration of Health Determinants for Communities
HEAL 4600	Integration of Health Determinants for Canada and the World
	6 credit hours of Social Science Orientation courses at the 3000 or 4000 level*
	3 credit hours of Science Orientation courses at the 3000 or 4000

level*	1210		
18 credit hours	ECON	Introduction to Global and Environmental Economic Issues and	3
	1220	Policies	
TOTAL	FMLY 1010	Human Development in the Family	3
	HEAL 2600	Integration of Health Determinants of Individuals	3
	HMEC	Research Methods and Presentation	3
	2000		
	HMEC	Communication for Professional Practice	3
	3100		
	HNSC	Nutrition for Health and Changing Lifestyles	3
	1210		
	PERS 1200	Physical Activity, Health and Wellness	3
	PSYC 1200	Introduction to Psychology	6

or

SOC 1200	Introduction to Sociology	
STAT 1000	Basic Statistical Analysis 1	3
TXSC 1600	Textiles for Living	3
TXSC 1610	Textiles, Products, and Consumers	3
TXSC 2500	Preparation for Product Development	1
TXSC 2600	Textiles for Apparel End Uses	3
TXSC 2610	Textiles for Non Apparel End Uses	3
TXSC 2620	Consumer and Organizational Behaviour toward Textile Products	3
TXSC 2630	Pattern Development in an Industrial Environment	3
TXSC 3600	Global Apparel and Textiles Trade	3
TXSC 3610	Product Standards and Specifications	3
TXSC 3620	Evaluation of Textile Performance	3
TXSC 3630	Line Planning and Visual Communication	3
TXSC 3640	Pattern Development in a Computer Aided Design Environment	3
TXSC 3650	Production of Textile Products	3
TXSC 4610	Integrative Project	6
TXSC 4620	Colour Management	3
TXSC 4630	Quality Assurance Systems	3
	Department Electives	9
	Free Electives	27

*Courses from the approved program electives list for the Interdisciplinary Health Degree Program are listed online at:
http://umanitoba.ca/faculties/human_ecology/programs/idh/bhsciences/429.html.

4.12 Textile Sciences

4.12 Textile Sciences Content,
Acting Head: Tammi Feltham

The Textile Sciences undergraduate program imparts knowledge and skills which meet the demands of work and research environments driven by scientific, technological, and logistical innovations in textiles. It comprises two streams – product development and textile development. The product development stream is structured to help students develop problem solving abilities systematically through the application and integration of knowledge in textile science, human and organizational behaviour, environmental forces, and methods of quantifying and interpreting observations. The textile development stream is a response to the emerging significance of textiles in health and health promotion. Within the textile development stream, three options will be offered – Exercise and Sports Science, Engineering Sciences, and Microbiological Sciences. These options capitalize on the strengths of other academic disciplines within the University of Manitoba which are relevant to the study of textiles for health and health promotion. Students who choose the textile development stream must have pre-calculus Mathematics 40S or the former Mathematics 40S and Chemistry 40S. Students who consider subscribing to the Engineering Sciences Option must have pre-calculus Mathematics 40S, or the former Mathematics 40S, Physics 40S, and Chemistry 40S. Students must choose either the Textile Development or Product Development choice upon first registration in the Faculty.

In March of each year program planning sessions are provided to assist students in their selection of courses for subsequent years of study.

Students Admitted in September 2011 or Later

4.12.1 Product Development Stream

Course No.	Credit Hours	
CHEM 1000	Understanding the World through Chemistry	3
or		
CHEM 1300	University 1 Chemistry: Structure and Modelling in Chemistry	
ECON 1210	Introduction to Canadian Economic Issues and Policies	3

4.12.2 Textile Development Stream

Course No.	Credit Hours	
CHEM 1300	University 1 Chemistry: Structure and Modelling in Chemistry	3
CHEM 1310	University 1 Chemistry: An Introduction to Physical Chemistry	3
CHEM 2210	Introductory Organic Chemistry 1: Structure and Function	3
CHEM 2220	Introductory Organic Chemistry 2: Reactivity and Synthesis	3
FMLY 1010	Human Development in the Family	3
HEAL 2600	Integration of Health Determinants of Individuals	3
HMEC 2000	Research Methods and Presentation	3
HMEC 3100	Communication for Professional Practice	3
HNSC 1210	Nutrition for Health and Changing Lifestyles	3
PERS 1200	Physical Activity, Health and Wellness	3
PSYC 1200	Introduction to Psychology	6

or

SOC 1200	Introduction to Sociology	
STAT 1000	Basic Statistical Analysis 1	3
STAT 2000	Basic Statistical Analysis 2	3
TXSC 1600	Textiles for Living	3
TXSC 1610	Textiles, Products, and Consumers	3
TXSC 2600	Textiles for Apparel End Uses	3
TXSC 2610	Textiles for Non Apparel End Uses	3
TXSC 2620	Consumer and Organizational Behaviour toward Textile Products	3
TXSC 3500	Textiles for the Healthcare Sector	3
TXSC 3610	Product Standards and Specifications	3
TXSC 3620	Evaluation of Textile Performance	3
TXSC 4500	Advanced Textiles for the Healthcare Sector	3
TXSC 4610	Integrative Project	6
TXSC 4620	Colour Management	3
TXSC 4630	Quality Assurance Systems	3

Engineering Sciences Option

ENG 1430	Design in Engineering	4
or		
ENG 1440	Introduction to Statics	4
	Choose 24 credit hours from the following list of Engineering courses:	24
BIOE 2580	Biosystems Engineering Design Trilogy 1	4
BIOE 3590	Mechanics of Materials in Biosystems	4
CIVL 2800	Solid Mechanics	4
ENG 1430	Design in Engineering	4
ENG 1440	Introduction to Statics	4
MECH 2270	Principles of Engineering Materials	4
MECH 2290	Manufacturing Engineering	3
MECH 2300	Introduction to Production and Manufacturing	3
MECH 3540	Modern Engineering Materials	4
	Department Electives	3
	Free electives	12

Microbiological Sciences Option

BIOL 1020	Biology 1: Principles and Themes	3
BIOL 1030	Biology 2: Biological Diversity, Function and Interaction	3
MBIO 1000	Microbiology 1	3
MBIO 2360	Biochemistry 1: Biomolecules and an Introduction to Metabolic Energy	3
MBIO 2370	Biochemistry 2: Catabolism, Synthesis, and Information Pathways	3
MBIO 3010	Mechanism of Microbial Disease	3
	Department Electives	3
	Free electives	15

Exercise and Sports Science Option

BIOL 1020	Biology 1: Principles and Themes	3
BIOL 1030	Biology 2: Biological Diversity, Function and Interaction	3
KIN 2320	Human Anatomy	3
KIN 2330	Biomechanics	3
KIN 3470	Exercise Physiology	3
BIOL 1412	Physiology of the Human Body	3
	Textile Sciences Department Electives	3
	Free electives	18

4.13 Textile Sciences Minor

4.13 Textile Sciences Minor Content,

A minor in Textile Sciences is offered by the Department of Textile Sciences. Students must complete 18 credit hours, distributed as follows: A maximum of six (6) credit hours in Textile Sciences at the 1000 level, and at least three (3) credit hours in Textile Sciences at the 2000 level, and at least three (3) credit hours in Textile Sciences at the 3000 or 4000 level, with no more than 6 credit hours at the 1000 level.

Students must check with their home Faculties to see if the Textile Sciences minor is available in their programs.

4.14 Interfaculty Option in Aging

4.14 Interfaculty Option in Aging Content,

An Option in Aging is offered by and in the following faculties: Arts, Human Ecology, Nursing, Kinesiology and Recreation Management and Social Work.

To complete the option, students in Human Ecology must complete each of the following requirements:

- HMEC 2650 or REC 2650 or SWRK 2650, The Social Aspects of Aging;
- NURS 2610 or KIN 2610, Health and Physical Aspects of Aging;
- At least three credit hours of professional/discipline specific applied work on aging within the student's department of registration (a list of courses is available in the general office); and,
- An additional nine credit hours of aging-related courses from the participating units; a list is available in the General Office. Upon completion of these requirements, a "comment" will be added to the student's transcript.

Further information is available from the General Office of Human Ecology.

4.15 The Minor in Management

4.15 The Minor in Management Content,

A Management Minor is offered by the Asper School of Business. Human Ecology students may complete this Minor as part of the electives portion of their programs. The Minor will consist of any 18 credit hours of Management courses. Students must meet prerequisites for all courses. Further information is available from the Human Ecology General Office.

4.16 The Voluntary Minor

4.16 The Voluntary Minor Content,

Students in the Faculty of Human Ecology may declare and complete a Minor from departments and interdisciplinary programs in which a Minor is offered. The Family Social Sciences Minor and the Minor in Human Nutrition and Metabolism are available through the Faculty of Human Ecology. Information about Minors in programs other than Human Ecology is found in the appropriate description of departmental/school/faculty program offerings in the Undergraduate Calendar.

Completion of the Minor is entirely optional. Students may not, however, declare both their Major and Minor from the same department/interdisciplinary program. No course may be used as part of a prescribed program in the Faculty of Human Ecology and also be part of a prescribed Minor. For example, if a course in Chemistry is part of a student's degree requirements in the Faculty of Human Ecology, it cannot be used as part of a Minor in another program. Completion of a Minor may require that a student take more than the minimum number of credit hours for graduation.

Chapter Contents

Faculty of Kinesiology Chapter Content,

SECTION 1: Degree Programs Offered

1.1 Programs / Majors

1.2 Available Minor

1.3 Available Option

1.4 Available Areas of Emphasis

SECTION 2: Admission Requirements

2.1 Admission Requirements: Bachelor of Kinesiology

2.2 Admission Requirements: Bachelor of Physical Education

2.3 Admission Requirements: Bachelor of Recreation Management and Community Development

2.4 Additional Admission Requirements

2.5 Transfer and Second Degree Students

2.6 Visiting Students

2.7 Special Students

SECTION 3: Faculty Academic Regulations

3.1 Scholastic Standards: Academic Assessment

3.2 Policy on Repeating Faculty Required Courses

3.3 Dean's Honour List

3.4 University Gold Medal and Program Medals

3.5 Degree With Distinction

3.6 Attendance and Withdrawal

3.7 Leave of Absence

3.8 Time Limit for Completion of the Degree

3.9 Academic Integrity

3.10 Student Academic Appeals

SECTION 4: Program and Graduation Requirements

4.1 Program Requirements: Bachelor of Kinesiology

4.2 Program Requirements: Bachelor of Kinesiology – Athletic Therapy

4.3 Program Requirements: Bachelor of Physical Education

4.4 Program Requirements: Bachelor of Recreation Management and Community Development

4.5 Program Requirements for Students Admitted Prior to 2010

4.6 Minor in Recreation Studies

4.7 Interfaculty Option in Aging

4.8 Supervised Fieldwork Experience

4.9 External Minors

4.10 Education Teachable Minors

4.11 Canadian Society for Exercise Physiology Certifications

SECTION 5: Registration Information for All Students

5.1 Faculty Orientation Sessions

5.2 Course Sequencing and Prerequisites

5.3 Repeating Courses

5.4 Course Space Reserves

5.5 Experiential Learning Courses (ELCs)

5.6 Courses Requiring a Facility Use Pass

5.7 Course Field Work Fees

5.8 Challenge for Credit

5.9 Courses Available to Students in Other Faculties and Schools

5.10 Departmental Permission

SECTION 6: Course Descriptions

Faculty of Kinesiology and Recreation Management Information

Faculty of Kinesiology and Recreation Management Information ,
The mission of the faculty is to discover and disseminate knowledge related to physical activity, human movement, sport, and leisure to improve the health, well-being and quality of life of Manitobans, Canadians and citizens of the world.

Academic Program Strategic Goals:

To provide high quality, evidence-based degree programs that prepare students academically and professionally to create and disseminate knowledge in areas related to human movement and leisure.

Undergraduate Program Goals:

To deliver sound undergraduate curricula to students in areas broadly related to physical activity, recreation, and applied health, who by the completion of their undergraduate degrees will:

- have general knowledge and specific knowledge in their fields, including knowledge of current research;
- be able to use critical thinking skills across a broad range of issues in their fields;

- be able to communicate effectively (orally, in writing, and technologically);
- be competent in relevant skills and practices;
- be literate in common information technology;
- be advocates for healthy living;
- respect diversity;
- be prepared for future employment and/or study in their fields.

SECTION 1: Degree Programs Offered

1.1 Programs/Majors,

Program/Degree	*Years to Complete	Total Credit Hours
Bachelor of Physical Education	3	102
Bachelor of Kinesiology	4	120
Bachelor of Kinesiology- Athletic Therapy	4	126
Bachelor of Recreation Management and Community Development	4	120

*This includes one year (30 credit hours) of study in University 1.

1.2 Available Minor,

Minor in Recreation Studies (See Section 4.6 for details)

1.3 Available Option,

Interfaculty Option in Aging (See Section 4.7 for details)

1.4 Available Areas Of Emphasis:;

- Aging (BKin and BRMCD)
- Community Development and Wellness (BKin and BRMCD)
- Culture and Diversity (BKin and BRMCD)
- Coaching (BKin only)
- Fitness Professional (BKin only)
- Sport and Event Management (BRMCD only)
- Sustainable Tourism and Recreation (BRMCD only)

SECTION 2: Admission Requirements

SECTION 2: Admission Requirements, Admission Information

The general admission requirement for all degrees except Bachelor of Kinesiology – Athletic Therapy is completion of any 24 credit hours of University 1 coursework. However, in order to complete the degree in the shortest time possible it is recommended that students take the required Year 1 courses before applying to the Faculty. Entering students who have not completed all of the required Year 1 courses must complete them during their program. Equivalent academic course work completed from other recognized post secondary institutions will be considered.

Minimum GPA for admission consideration is 2.0 but admission is competitive.

Applicants who are members of traditionally disadvantaged groups (i.e., Aboriginal peoples, persons with disabilities, visible minorities, recent immigrants, etc.) may apply under a Special Consideration Category. Further information on the criteria for this category is available by contacting the Faculty.

All admission requirements, as well as application deadline dates and forms, are included in an applicant information bulletin that is available from the Admissions

Office, Enrolment Services, 424 University Centre; this information is also posted on the university's website in January each year.

2.1 Admission Requirements: Bachelor of Kinesiology,

Completion of a minimum of any 24 credit hours in University 1. However, in order to complete the degree in four years, the following first-year courses are recommended (30 credit hours):

BIOL 1020 Biology 1: Principles and Themes **and** BIOL 1030 Biology 2: Biological Diversity, Function and Interaction (with a minimum grade of "C" in each) **or** BIOL 1000 Biology: Foundations of Life **and** BIOL 1010 Biological Diversity and Interaction (with a minimum average grade of "C+"). Successful completion of BIOL 1020 and BIOL 1030 or BIOL 1000 and BIOL 1010 is required for admission to the Athletic Therapy Program and is strongly recommended for admission to Kinesiology.

PERS 1200 Physical Activity, Health and Wellness

PERS 1400 Concepts of Recreation and Leisure

PERS 1500 Foundations of Physical Education and Kinesiology

PSYC 1200 Introduction to Psychology

STAT 1000 (M) Basic Statistical Analysis 1

3 credit hours to fulfill the Written English Requirement

3 credit hours of Electives

2.2 Admission Requirements: Bachelor of Physical Education,

Completion of a minimum of any 24 credit hours in University 1. However, in order to complete the degree in three years, the following first-year courses are recommended (30 credit hours):

BIOL 1410 Anatomy of the Human Body and BIOL 1412 Physiology of the Human Body (minimum grade of "C") **NOTE:** BPE students who have completed BIOL 1020 and BIOL 1030 will also be required to take BIOL 1412, as BIOL 1412 is a pre-requisite for KIN 3470.

Written English Requirement: ENGL 1XXX English Literature (6 credit hours)

PERS 1500 Foundations of Physical Education and Kinesiology

PSYC 1200 Introduction to Psychology

A course that satisfies the Mathematics requirement from the Mathematics or Statistics department

6 credit hours of Electives (in area of teachable minor)

2.3 Admission Requirements: Bachelor of Recreation Management and Community Development,

Completion of a minimum of any 24 credit hours in University 1. However, in order to complete the degree in four years, the following first-year courses are recommended (30 credit hours):

PERS 1200 Physical Activity, Health and Wellness

PERS 1300 Introduction to Leisure Travel

PERS 1400 Concepts of Recreation and Leisure

PERS 1500 Foundations of Physical Education and Kinesiology

PSYC 1200 Introduction to Psychology

STAT 1000 (M) Basic Statistical Analysis 1

3 credit hours to fulfill the Written English Requirement

6 credit hours of Electives

2.4 Additional Admission Requirements,

High School Prerequisites: Math 40S (minimum grade of 50%) is required for all programs. Biology 40S (minimum grade of 50%) is required for BKin and BPE. Chemistry 40S and Physics 40S are not required but may be helpful for BKin and BPE.

Valid Health Care Provider CPR and Standard First Aid certification are required for applicants to the Bachelor of Kinesiology - Athletic Therapy Program.

2.5 Transfer and Second Degree Students,

Students admitted to the Faculty of Kinesiology and Recreation Management following the completion of another recognized university degree or coursework may transfer in credit that is deemed equivalent toward the course requirements of a Kinesiology and Recreation Management undergraduate degree. Students are eligible to transfer a maximum of 50 credit hours to the Bachelor of Physical Education degree and a maximum of 60 credit hours to the Bachelor of Kinesiology and Bachelor of Recreation Management and Community Development programs.

Students who hold a degree and have completed further courses at the University of Manitoba which are applicable to their second degree in the Faculty of Kinesiology and Recreation Management but which were not used for credit toward their first degree may receive additional transfer credit for that work.

Equivalent courses completed at other universities or post-secondary institutions will be considered for admission and transfer credit only if the courses have been taken within the last 10 years.

Students are encouraged to contact an Academic Advisor in the Faculty General Office for information on how to optimize their transfer credit. Course transfer equivalencies will not be processed until after an application and all necessary documents have been submitted.

2.6 Visiting Students,

Students who are enrolled and pursuing a degree at another institution may apply to be a visiting student with the Faculty of Kinesiology and Recreation Management. A Letter of Permission from the home institution granting permission to register for courses from the University of Manitoba is required in order for access to be granted to those courses.

2.7 Special Students,

After-Degree Special Students

Students who have successfully completed a first degree program who are not seeking another degree and wish to register for courses from the Faculty of Kinesiology and Recreation Management are eligible to apply as Special Students.

SECTION 3: Faculty Academic Regulations

SECTION 3: Faculty Academic Regulations ,

All students are asked to note that some academic policies and regulations may be subject to change. Please check the Web Calendar at umanitoba.ca for updated information.

The provisions of the following chapters from the Undergraduate Calendar (University Policies, and General Academic Regulations and Requirements) apply to all students. In addition, the Faculty of Kinesiology and Recreation Management has regulations and requirements, published below, that apply specifically to its students.

3.1 Scholastic Standards: Academic Assessment,

Scholastic Standards:

Formal academic assessments are performed following each term for all Faculty of Kinesiology and Recreation Management students who have completed 3 or more credit hours. As a result of this assessment students will be determined to be minimum met, satisfactory, on probation, suspension warning, or academic suspension for one year. All academic assessments will appear on the student's official transcript.

Minimum Met

Students must achieve a minimum DGPA of 2.0 at each point of assessment in order to have met the minimum requirements of the Faculty of Kinesiology and Recreation Management. Students who do not achieve a minimum DGPA of 2.0 will be placed on probation.

Probation

Once placed on probation, a student will be placed on hold and must meet with an academic advisor to review performance and to receive an override in order to register for another term. Students on probation who achieve a minimum term GPA of 2.0 will be assessed as satisfactory. Students who do not achieve a minimum term GPA of 2.0 will be placed on suspension warning.

Satisfactory

The assessment of satisfactory is used once a student has been placed on probation but has subsequently achieved a minimum term GPA of 2.0. Students with satisfactory standing will be able to register without restrictions. Students who do not maintain a minimum term GPA of 2.0 will be placed on suspension warning.

Suspension Warning

Once placed on suspension warning, a student must meet with an academic advisor before registering for another term. Students on suspension warning who achieve a minimum term GPA of 2.0 will be assessed as satisfactory. Students who do not achieve a minimum term GPA of 2.0 will be placed on academic suspension.

Academic Suspension

A student placed on academic suspension in the Faculty of Kinesiology and Recreation Management is not permitted to register for a period of one calendar year. The notation "Academic Suspension for 1 Year" will be recorded on the student's transcript.

Once a student has served a one year suspension, they must contact an academic advisor in order to be reinstated for future registration.

3.2 Policy on Repeating Faculty Required Courses,

A minimum grade of “C” is required to pass all Faculty-required courses. Students will be permitted to repeat a failed Faculty-required course **only once while in the program**. Students who fail the same Faculty-required course twice will normally be required to withdraw from the program.

3.3 Dean's Honour List,

Students enrolled in 12 credit hours or more who achieve a Term GPA of 3.50 or higher will be placed on the Dean’s Honour List. The Dean’s Honour List will be calculated after each term (i.e. Fall, Winter, and Summer).

The Dean’s Honour List designation will appear on the student’s transcript.

3.4 University Gold Medal and Program Medals, **Gold Medal**

The Faculty of Kinesiology and Recreation Management will award the University Gold Medal to the graduating student who:

- 1) has achieved the highest grade point average of all graduating students (minimum 3.75) on courses constituting the last two years of an eligible program (and including transfer courses in the applicable years); and,
- 2) has completed at least 80 percent of what is considered to be the normal full course-load in each of the last two years of the eligible program.

Program Medals

There are two program medals awarded each year in the Faculty of Kinesiology and Recreation Management to the two students with the highest standing (according to the University Gold Medal criteria) in the programs in which the winner of the University Gold Medal in Kinesiology and Recreation Management is not registered (the three programs are Kinesiology, Physical Education, and Recreation Management and Community Development).

3.5 Degree With Distinction,

Awarded to students who graduate with a cumulative Degree GPA of 3.8 or higher. The notation of ‘Degree with Distinction’ will appear on the student’s parchment and transcript.

3.6 Attendance and Withdrawal,

Students absent from class for three or more days due to illness are required to present a certificate from a physician. Unexcused absence of more than three hours of class time in a theory course or experiential learning course may result in the student being required to withdraw from the course or may result in an “F” grade being assigned.

3.7 Leave of Absence,

Students who have not registered for a full academic session will need to reactivate their status by contacting the Faculty General Office and must consult with an Academic Advisor. Students who have been absent from study for more than 5 years or have attended another institution since their last registration (not on a Letter of Permission) will have to re-apply for admission to the university.

3.8 Time Limit for Completion of the Degree,

Students admitted to the Bachelor of Kinesiology, Bachelor of Physical Education, or Bachelor of Recreation Management and Community Development degree programs must complete all requirements to graduate within ten years of admission to the program. Students with questions relating to the time limit regulation should consult the Undergraduate Program Administrator.

3.9 Academic Integrity,

The Faculty of Kinesiology and Recreation Management strictly adheres to the University of Manitoba Student Discipline By-Law and will enforce these regulations. It is the responsibility of the student to know what constitutes academic dishonesty. Plagiarism or any other form of cheating is subject to academic penalty, which could be as serious as suspension or expulsion from the Faculty or university. Students are encouraged to avoid academic misconduct by learning more about the University of Manitoba regulations at: http://umanitoba.ca/student/resource/student_advocacy/index.html

3.10 Student Academic Appeals,

Students who wish to appeal matters concerning their academic status should contact the Faculty of Kinesiology and Recreation Management Associate Dean (Academic). The Faculty has an academic appeals process for students who wish to appeal a policy or decision affecting their program of study.

SECTION 4: Program and Graduation Requirements

SECTION 4: Program and Graduation Requirements, Degree Requirements and Course Selection

It is the student’s responsibility to have read the *Undergraduate Calendar and Registration Guide* carefully, and to know all relevant university and faculty regulations, policies and practices. Completion of degree requirements is the responsibility of the student. Returning students should contact their advisor if they have any questions concerning their curriculum.

The following requirements apply to students in all four undergraduate degree programs in the Faculty. The four degree programs have a base of shared introductory core courses, as well as shared upper level courses with a professional focus. Shared core courses are intended to ensure students recognize the interconnections across our Faculty and its related fields of practice, and to facilitate the professional education of students.

Course Prefixes:

KIN Denotes required and elective courses in the Kinesiology degree program

PERS Denotes elective and core courses common to the undergraduate degree programs

PHED Denotes required and elective courses in the Physical Education degree program

REC Denotes required and elective courses in the Recreation Management and Community Development degree program

Introductory Core Courses (18-21 credit hours):

PERS 1400 Concepts of Recreation and Leisure 3

PERS 1500 Foundations of Physical Education and Kinesiology 3

PSYC 1200 introduction to Psychology 3

University Math Requirement:

STAT 1000 Basic Statistical Analysis 1 3 (or MATH 1XXX Mathematics)*

University Written Requirement:

Any course satisfying Written English Requirement or (ENGL 1XXX English Literature 6)** BPE students only	3
Professional Core Courses (12-15 credit hours):	
PERS 2100 Introduction to Professional Practice	3
PERS 2200 Program Planning Principles	3
PERS 3100 Inclusive Physical Activity and Leisure	3
PERS 3460 Sociology of Physical Activity and Leisure**	3
PERS 4100 Current Issues†	3

†BKin and BRMCD only

4.1 Program Requirements: Bachelor of Kinesiology, (Students admitted in September 2011 or later)

Program and Graduation Requirements: Bachelor of Kinesiology

To graduate with a four-year Bachelor of Kinesiology degree, a student must have passed the 120 credit hours of the program outlined below and must have achieved a Degree Grade Point Average (DGPA) of 2.00 with a minimum grade of "C" in all Faculty-required courses.

A maximum of 158 credit hours may be attempted in order to obtain the 120 credit hours required for graduation with the Bachelor of Kinesiology degree.

YEAR 1 / University 1: 30 Credit Hours

Course No.		Cr.Hrs.
BIOL 1XXX	BIOL 1020 Biology 1: Principles and Themes and BIOL 1030 Biology 2: Biological Diversity, Function and Interaction (with a minimum grade of "C" in each) or BIOL 1000 Biology: Foundations of Life and BIOL 1010 Biological Diversity and Interaction (with a minimum grade of "C+")	3
PERS 1200	Physical Activity, Health and Wellness	3
PERS 1400	Concepts of Recreation and Leisure	3
PERS 1500	Foundations of Physical Education and Kinesiology	3
PSYC 1200	Introduction to Psychology	6
STAT 1000	Basic Statistical Analysis 1	3
1XXX W	Written English Requirement	3
	Elective	3

YEAR 2: 30 Credit Hours

Course No.		Cr.Hrs.
BIOL 2410	Human Physiology 1	3
BIOL 2420	Human Physiology 2	3
PERS 2100	Introduction to Professional Practice	3
PERS 2200	Program Planning Principles	6
PERS	Introduction to Research	3

3350	KIN Human Anatomy	3
2320	KIN Biomechanics	3
2330	Electives	9
YEAR 3: 30 Credit Hours		
Course No.		Cr.Hrs.
KIN 2540	Psychology of Sport and Physical Activity	3
KIN 3470	Exercise Physiology	3
KIN 3512	Principles of Fitness Training	3
KIN 3740	Resistance Training and Conditioning	3
PERS 3100	Inclusive Physical Activity and Leisure	3
PERS 3340	Philosophy of Physical Activity and Leisure	3
PERS 3460	Sociology of Physical Activity and Leisure	3
	Electives	9
YEAR 4: 30 Credit Hours		
Course No.		Cr.Hrs.

KIN 4500	Physical Activity and Aging	3
PERS 4100	Current Issues	3
	Electives	21*

* PERS 4630 Supervised Fieldwork Experience is strongly recommended in Year 4 (12 credit hours)

* A maximum of 18 credit hours of electives may be taken from outside the Faculty following Year 1.

Degree Exit Requirement: Current Basic Rescuer CPR and Emergency or Standard First Aid Certification

4.2 Program Requirements: Bachelor of Kinesiology - Athletic Therapy, (Students admitted in September 2011 or later)

Program and Graduation Requirements: Bachelor of Kinesiology - Athletic Therapy

To graduate with a four-year Bachelor of Kinesiology – Athletic Therapy degree, a student must have passed the 126 credit hours of the program outlined below and must have achieved a Degree Grade Point Average (DGPA) of 2.00 with a minimum grade of "C" in all Faculty-required courses.

A maximum of 166 credit hours may be attempted in order to obtain the 126 credit hours required for graduation with the Bachelor of Kinesiology - Athletic Therapy.

Students are expected to progress through the Athletic Therapy program as outlined below. It is strongly recommended that courses be completed in the sequence and year indicated, otherwise an additional year may be re-quired.

Successful completion of BIOL 1020 and BIOL 1030, with a minimum grade of "C", or BIOL 1000 and BIOL 1010, with a minimum average grade of "C+" is a re-quirement for admission to the Athletic Therapy Program.

Valid Health Care Provider CPR and Standard First Aid certification are required before the beginning of each term of registration (if lapsed, students must re-certify).

Each year while in the program, Athletic Therapy students must also register as members with both the Manitoba Athletic Therapists Association (MATAs) and Canadian Athletic Therapists Association (CATA).

Athletic Therapy Practica (KIN 3912, KIN 3914 & KIN 4910)

Students in the Athletic Therapy Program will be required to complete several hours of clinical and field (sports team) experiences on campus and in the community during their degree. These experiences provide opportunities to apply the knowledge and skills students obtain via their educational curriculum, in a practical hands-on manner, and therefore enhance their preparation for the Canadian Athletic Therapy Association (CATA) examinations. Students must successfully complete the previous year's courses and be registered in all of the present year's courses in order to register in each practicum (KIN 3912, KIN 3914 & KIN 4910).

YEAR 1 / University 1: 30 Credit Hours

Course No.		Cr.Hrs.
BIOL 1XXX	BIOL 1020 Biology 1: Principles and Themes and BIOL 1030 Biology 2: Biological Diversity, Function and Interaction (with a minimum grade of "C" in each) or BIOL 1000 Biology: Foundations of Life and BIOL 1010 Biological Diversity and Interaction (with a minimum grade of "C+")	3
PERS 1200	Physical Activity, Health and Wellness	3
PERS 1400	Concepts of Recreation and Leisure	3

	Electives / Teaching Minor	6			

Degree Exit Requirement: Current Basic Rescuer CPR and Emergency or Standard First Aid Certification

4.4 Program Requirements: Bachelor of Recreation Management and Community Development,
(Students admitted in September 2011 or later)

Program and Graduation Requirements: Bachelor of Recreation Management and Community Development

To graduate with a four-year Bachelor of Recreation Management and Community Development degree, a student must have passed the 120 credit hours of the program outlined below and must have achieved a De-gree Grade Point Average (DGPA) of 2.00 with a minimum grade of "C" in all faculty-required courses. A maximum of 158 credit hours may be attempted in order to obtain the 120 credit hours required for graduation with the Bachelor of Recreation Management and Community Development degree.

Year 1 - University 1: 30 credit hours

Course No.		Credit Hours
PERS 1200	Physical Activity, Health and Wellness	3
PERS 1300	Introduction to Leisure Travel	3
PERS 1400	Concepts of Recreation and Leisure	3

Year 2: 30 credit hours

Course No.		Credit Hours
SOC 1200	Introduction to Sociology	6
PERS 2100	Introduction to Professional Practice	3
PERS 2200	Program Planning Principles	3
PERS 3350	Introduction to Research	3
REC 2400	Management and Marketing of Leisure Services	3
REC 3090	Foundations of Sustainable Nature-Based Tourism	3
	Undergraduate Studies	

REC 4310 Administration of Special Events (3 credit hours)

REC 4350 Parks and Protected Areas Planning and Management (6 credit hours)
(Summer Session Travel Study – Instructor Permission Re-quired)

PERS 4200 Special Topics (3 credit hours)

**External students may complete up to 12 credit hours from the Recreation Studies Minor course list without declaring the minor. Students who declare the minor must take the mini-mum 18 credit hours but will be allowed to take up to 30 hours from the above courses.

Note: No minor in Physical Education or Kinesiology is offered.

4.7 Interfaculty Option in Aging.

The Option in Aging is offered by and in the following faculties: Arts, Human Ecology, Nursing, *Kinesiology and Recreation Management*, Social Work and the Clayton H. Riddell Faculty of Environment, Earth, and Resources.

Students in the Faculty of Kinesiology and Recreation Management can elect to complete the Option in Aging which consists of 18 credit hours of aging-related course-work. All Option in Aging students MUST complete the following two courses (6 credit hours):

- KIN 2610/ NURS 2610 Health and Physical Aspects of Aging (alternates between faculties)
- REC 2650/HMEC 2650/SWRK 2650 Social Aspects of Aging (alternates between faculties)

PLUS ONE OF (3 credit hours):

- REC 4250 Leisure and Aging (BRMCD students; not offered every year)
- KIN 4500 Physical Activity and Aging (BKin students)

AND ELECTIVES* (9 credit hours):

- Approved age related courses from Kinesiology and Recreation Management or other faculties. A current list of applicable courses is available at the Faculty General Office.

In order to declare the Option in Aging, students must meet with an Academic Advisor once they have successfully completed the two compulsory courses of KIN 2610/ NURS 2610 and REC 2650/HMEC 2650/SWRK 2650.

Upon graduation, a student who has met all the requirements will have the concentration added to their transcript indicating they have completed the Option in Aging.

4.8 Supervised Fieldwork Experience (PERS 4630),

The supervised fieldwork experience is a professionally supervised experience that provides the student with the opportunity to apply knowledge gained in academic courses, and gives exposure to a workplace environment in a related field.

Students in the BKin and BRMCD programs are eligible to register for the 12 credit hour course provided they will complete 90 credit hours toward the degree and achieve a minimum Degree Grade Point Average of 2.5 or higher at the end of the third year of their degree. Student placements are scheduled for 13 weeks (working full-time) during the Fall Term (September through December). Information on the application process, deadlines and course details are available on the Faculty website and at the Faculty General Office.

***Note:** Advanced Recreation Electives offered change each year. Consult with an Academic Advisor for a list of approved courses that may fulfil this requirement.

** PERS 4630 Supervised Fieldwork Experience is strongly recommended in Year 4 (12 credit hours)

** A maximum of 18 credit hours of electives may be taken from outside the Faculty following Year 1.

Degree Exit Requirement: Current Basic Rescuer CPR and Emergency or Standard First Aid Certification

4.5 Program Requirements for Students Admitted Prior to 2011,
Faculty of Kinesiology and Recreation Management Students admitted before September 2011 will notice changes to course and program requirements. Students admitted prior to 2011 should contact the Undergraduate Program Administrator or Academic Advisor at the Faculty General Office for information on their specific degree requirements and courses needed for graduation.

4.6 Minor in Recreation Studies (123),

To qualify for and declare the Minor in Recreation Studies, students must achieve a grade of "C" or better in the two introductory courses PERS 1300 and PERS 1400. A student must obtain approval and declare the minor with their home faculty for access into advanced REC courses.

Required Core Courses for the Minor in Recreation Studies (12 credit hours):

- PERS 1300 Introduction to Leisure Travel (3 credit hours)
- PERS 1400 Concepts of Recreation and Leisure (3 credit hours)
- REC 2400 Management and Marketing of Leisure Services (3 credit hours)
- REC 3090 Sustainable Nature-Based Tourism (3 credit hours)

Electives (Choose 6 credit hours from the following):

REC 4090 Sustainable Nature-Based Tourism Planning, Management and Research (3 credit hours)

REC 4170 Sport Management (3 credit hours)

REC 4250 Leisure and Aging (3 credit hours)

Undergraduate Studies

4.9 External Minors,

Kinesiology and Recreation Management students may choose and declare an external minor offered by the Faculty of Arts, Clayton H. Riddell Faculty of Environment, Earth, and Resources, Faculty of Human Ecology, Faculty of Science, Faculty of Management, Marcel A. Desautels Faculty of Music, or School of Art. Completion of a declared minor is optional. See the applicable faculty and department chapters for the requirements of each minor. Minors must be declared with an Academic Advisor at the Faculty General Office in order to be approved and appear on a student's transcript.

In order to declare the Management Minor from the I. H. Asper School of Business, Faculty of Kinesiology and Recreation Management students must achieve a 3.0 DGPA (or higher). If a student has successfully completed 18 credit hours of course work from the Faculty of Management, and a 2.0 GPA in the Management course work by the time of graduation, the Minor in Management may also be declared upon completion of the degree program.

4.10 Education Teachable Minors (BPE Program),

Students who intend to apply for admission to the Faculty of Education after completing their BPE degree should review the information in the current *Undergraduate Calendar* and consult with the Faculty of Education to ensure they are selecting an appropriate teachable minor and courses for their choice of the Early, Middle or Senior Years stream.

4.11 Canadian Society for Exercise Physiology Certifications (CSEP: CPT & CEP),

The Canadian Society for Exercise Physiology Certified Exercise Physiologist (CSEP-CEP) is the highest level of professional certification for Kinesiology graduates in Canada. Through specific theory and practical based course work students are prepared for the national certification process. Further information can be found on the Faculty's website on how to become a Certified Personal Trainer (CSEP-CPT) or a Certified Exercise Physiologist (CSEP-CEP).

SECTION 5: Registration Information for All Students

SECTION 5: Registration Information for All Students, Faculty Academic Advisors

If you require further information after reading the *Undergraduate Calendar*, contact the Kinesiology and Recreation Management academic advisors, 8:30 a.m. - 4:30 p.m. Mon-day - Friday.

Patti Dickieson, Academic Advisor

103B Frank Kennedy Centre

telephone (204) 474 9748

Advising/Office Assistant

102 Frank Kennedy Centre

telephone (204) 474 9747

5.1 Faculty Orientation Sessions,

All new students admitted to the Faculty must attend an Orientation session in order to be unblocked from registration. Dates will be provided with the letter of acceptance (normally in early July before registration initial access) and on the Faculty website.

At this session students will receive important information regarding their program, registration, and an orientation manual. Upon acceptance into the Faculty, students
Undergraduate Studies

from outside of the province will be sent an orientation manual and should contact an Academic Advisor to discuss registration and other matters prior to registration initial access.

5.2 Course Sequencing and Prerequisites,

Planning the sequence of required courses is essential. Several Faculty courses in all degrees require successful completion of another course in order to register. Some courses may only be offered once per year. Please check current catalogue course descriptions and class schedules in your program to ensure that you achieve what is necessary for efficient course enrolment in future terms.

5.3 Repeating Courses,

When a course is repeated, the *most recent* attempt of that course will be included in the calculation of the Degree Grade Point Average; however, *both* grades will appear on the student academic history and official transcript. If a student wishes to repeat a course in which a grade has previously been assigned, they should contact an Academic Advisor for the necessary registration override prior to initial access.

Students will be permitted to re-peat a failed Faculty-required course only once while in the program. Students who fail the same Faculty-required course twice will normally be required to withdraw from the program.

5.4 Course Space Reserves,

Each degree program requires courses from outside faculties and departments. Specific sections in the following required courses have spaces reserved for students:

Recreation Management and Community Development: There are select reserved sections for STAT 1000.

Kinesiology/AT: There are select reserved sections for BIOL 2410, BIOL 2420, and STAT 1000.

Physical Education: There are select reserved sections for BIOL 1410 and BIOL 1412.

Students with the appropriate program code, major and/or minor will be able to access the reserve section of a required course. These courses can be identified in the Class Schedule as having section codes that appear as R01, R02...during registration initial access.

5.5 Experiential Learning Courses (ELCs),

Experiential learning courses (ELCs) provide three credit hours of integrated theory and practice, and include applied activities that are designed to translate theoretical components to hands-on-learning in the gymnasium, dance studio, fitness studio, playing field, outdoor environment or clinic. Below is a list of Faculty of Kinesiology and Recreation Management experiential learning courses:

- KIN 2750 Athletic Therapy Skills
- KIN 3740 Resistance Training and Conditioning
- PHED 2400 Coaching Theory and Practice
- PHED 2402 Advanced Coaching Theory and Practice
- PHED 2710 Human Movement Principles
- PHED 2720 Developmental Games and Activities
- PHED 2730 Gymnastics, Dance and Rhythmic Activities
- PHED 2740 Fitness Theory and Practice
- PHED 3102 Aboriginal Song and Dance
- PHED 3710 Active Health and Human Potential
- PHED 3750 Lifestyle Activities
- PHED 3760 Diverse Populations Mentorship
- PHED 3770 Aboriginal Games and Activities
- PHED 4710 Outdoor Education

- REC 4720 Wilderness Adventures

REC 4720 Wilderness Adventures: \$50.00

5.6 Courses Requiring a Paid Facility Use Pass,

In some courses students will be required to purchase a facility use pass in order to gain access into and utilize various learning environments. Students should be prepared to have their pass within the first week of class in the applicable term. Students report to the Recreation Services Customer Service Desk in Frank Kennedy Centre and must present a current proof of registration. Recreation Services information and rates can be found at:
<http://umanitoba.ca/faculties/kinrec/bsal/programs>

The following courses require a facility use pass:

KIN 3470 Exercise Physiology

KIN 3740 Resistance Training and Conditioning (ELC)

KIN 4460 Fitness Appraisal and Lifestyle Counselling

KIN 4560 Advanced Fitness Appraisal and Lifestyle Counselling

PHED 2400 Coaching Theory and Practice (ELC)

PHED 2402 Advanced Coaching Theory and Practice (ELC)

PHED 2710 Human Movement Principles (ELC)

PHED 2720 Developmental Games and Activities (ELC)

PHED 2730 Gymnastics, Dance and Rhythmic Activities (ELC)

PHED 2740 Fitness Theory and Practice (ELC)

PHED 3102 Aboriginal Song and Dance

PHED 3750 Lifestyle Activities (ELC)

PHED 3770 Aboriginal Games and Activities (ELC)

REC 3200 Advanced Program Planning and Leadership

5.7 Course Field Work Fees,

PERS 1500 Foundations of Physical Education and Kinesiology: \$50.00

PHED 2740 Fitness Theory and Practice: \$10.00

PHED 3750 Lifestyle Activities: \$30.00

REC 3090 Sustainable Nature-Based Tourism: \$40.00

KIN 3320 Advanced Human Anatomy: \$55.00

PHED 3770 Aboriginal Games and Activities: \$25.00

PHED 3102 Aboriginal Song and Dance: \$25.00

REC 4090 Sustainable Nature-Based Planning, Management, and Research: \$40.00

5.8 Challenge for Credit,

PERS 1500 Foundations of Physical Education and Kinesiology is open to challenge for credit. Students must demonstrate their competence in this course before challenging (e.g., students with significant professional experience and training who may have the necessary knowledge; transfer students who may have completed several related courses at other institutions that are not directly equivalent to PERS 1500). The Academic Schedule in the front section of this Calendar contains the relevant registration deadline dates appropriate to challenge for credit.

5.9 Courses Available to Students in Other Faculties or Schools,

Students from University 1 and other faculties or schools may register for the following courses:

- PERS 1200 Physical Activity, Health and Wellness
- PERS 1300 Introduction to Leisure Travel
- PERS 1400 Concepts of Recreation and Leisure
- PERS 1500 Foundations of Physical Education and Kinesiology
- KIN 2610 Health and Physical Aspects of Aging
- REC 2650 Social Aspects of Aging

Students from other faculties or schools (not University 1) may register for the following courses:

- PERS 3170 Canadian Sport History
- KIN 3520 Coaching the High Performance Athlete A
- KIN 3530 Coaching the High Performance Athlete B
- REC 4250 Leisure and Aging

Students who have declared the Recreation Studies Minor may register for additional Recreation Studies courses – refer to requirements in Section 4.6.

Note: During the Summer Session, students from other faculties and schools may register for additional courses after the initial registration access week, provided that they have the pre-requisite courses. Check the course descriptions.

5.10 Departmental Permission,

Students from other faculties who wish to register for courses other than those mentioned above may seek departmental permission by obtaining a form from the Faculty General Office (102 Frank Kennedy Centre) at the end of the initial registration access period of the applicable session.

SECTION 6: Kinesiology Course Descriptions-2000 Level

KIN 2320 Human Anatomy

(Lab Required) Structure of the skeletal, articular, and muscular systems of the human body. May not be held for credit with PHED 2320 (057.232), REHB 1480 (068.148), REHB 1490 (068.149), or REHB 1500 (068.150). Prerequisite: [BIOL 1030 (C)] or [BIOL 1000 and BIOL 1010 (C+)] or [BIOL 1412 (C)] or equivalent.

KIN 2330 Biomechanics

(Lab Required) The mechanical and anatomical analysis of human movement. May not hold for credit with PHED 2330 or PHED 2310 (057.231). Prerequisite: [KIN 2320 or PHED 2320 (057.232) (C)] or equivalent.

KIN 2540 Psychology of Sport and Physical Activity

This course will provide the student with an understanding of psychological variables affecting individuals within sporting and physical activity contexts. Among the topics to be explored will be motivation, arousal/anxiety, group dynamics and youth involvement in sport. May not hold for credit with PHED 2540. Prerequisite: PSYC 1200.

KIN 2610 Health and Physical Aspects of Aging

An introduction to health, well-being and aging. Emphasis on health as multidimensional including physical, social and mental health. Integration of theory and research in examining selected issues related to health and physical aspects of aging. This is an Option in Aging course and may not be held for credit with PHED 2610 (057.261) or NURS 2610 (049.261).

KIN 2750 Athletic Therapy Skills

This course will focus upon the theoretical study and practical application of massage therapy (basic and advanced) and sport specific taping, splinting and bracing techniques. The intent of this course is to help prepare students for their future in the profession of Athletic Therapy. May not hold for credit with PHED 2020 (057.202) or PHED 3180 (057.318). Open to Athletic Therapy students only.

SECTION 6: Kinesiology Course Descriptions-3000 Level

KIN 3160 Pathology and Sport Medicine

(Lab Required) Analysis of types of injuries and emergency procedures, and practical experience in first aid, taping and wrapping, massage, and various preventive techniques. May not be held for credit with PHED 3160 or PHED 3060 (057.306). Prerequisite: [PHED 2320 (057.232) or KIN 2320 (C)] or equivalent.

KIN 3200 Basic Trauma and Life Support

(Lab Required) Assessment and management of medical emergencies common to sports. Topics will include on-field primary and secondary surveys, airway management, assessment and management of head, spinal, chest, abdominal and extremity trauma. Open only to Athletic Therapy students or with permission of the instructor. May not hold for credit with KIN 3200 or PHED 3200 (057.320).

KIN 3320 Advanced Human Anatomy

(Lab Required) This course will concentrate on the structure and function of the human body's various tissues, organs and systems with particular emphasis upon basic histology, function and gross anatomy. This course will help prepare students who are interested in pursuing careers in Athletic Therapy and Kinesiology. Note: A fieldwork fee is attached to the course. Prerequisite: [KIN 2320 or PHED 2320 (057.232) (C)]

KIN 3330 Functional Assessment and Restoration A

General principles of assessment and restoration; assessment of acute and chronic musculo-skeletal injuries of the lower extremity; rehabilitation techniques to ensure full restoration of function. May not be held with KIN 3300. Prerequisite: KIN 3320.

KIN 3332 Functional Assessment and Restoration B

Assessment of acute and chronic musculo-skeletal injuries of the upper extremity and spine; rehabilitation techniques to ensure full restoration of function. May not be held with KIN 3300. Prerequisite: KIN 3330 (C).

KIN 3400 Therapeutic Modalities

(Lab Required) This course will concentrate on the use of therapeutic modalities commonly utilized in the profession of Athletic Therapy. It will introduce the student to various thermal mechanical, and electromagnetic agents used for therapeutic purposes. May not hold for credit with PT 2720 (167.272). Prerequisite: [BIOL 2420] or ZOOL 2540 (22.254).

KIN 3450 Motor Learning

(Lab Required). Principles underlying human motor performance and motor skill learning. May not hold for credit with PHED 3450 (057.345).

KIN 3470 Exercise Physiology

(Lab Required) Physiological and functional responses to acute and chronic exercise, focusing on the cardiovascular, respiratory and neuromuscular systems. May not be held for credit with PHED 3470 or PHED 3430 (057.343). Prerequisites: [BIOL 2420 or BIOL 1412 (C)] or equivalent.

KIN 3512

Theoretical concepts of designing programs employing the principles of overload and adaptation for all components of fitness for all age groups. May not hold with PHED 3090 (057.309) or PHED 3512. Prerequisite: PHED 3430 (057.343) or KIN 3470 or PHED 3470 (C).

KIN 3520 Coaching the High Performance Athlete A

The development of advanced technical and theoretical expertise in coaching, including conflict management, psychology of performance, effective leadership, making ethical decisions, and practice planning. The course prepares students to be "Trained" in the Competition - Development level of the National Coaching Certification Program (NCCP). May not hold for credit with KIN 3520. Prerequisite: Faculty permission and 45 credit hours of University course work. The student must demonstrate a high level of proficiency as an athlete, coach or official in their sport.

KIN 3530 Coaching the High Performance Athlete B

The development of advanced technical and theoretical expertise in coaching, including prevention and recovery, leading drug free sport, developing athletic abilities, and designing a basic sport program. The course completes the fully "Trained" component in the Competition - Development level of the National Coaching Certification Program (NCCP). May not hold for credit with PHED 3520. Prerequisite: PHED 3520 or KIN 3520.

KIN 3740 Resistance Training and Conditioning

Development of theoretical and practical knowledge of strength training and conditioning for programming over the entire healthy population from inactive sedentary individuals to elite athletes. May not hold for credit with PHED 2620 (057.262) or PHED 3740. Requires a paid facility use pass. Prerequisites: [KIN 2320 or PHED 2320 (057.232) (C) or equivalent] and [KIN 3470 (C) or equivalent]. Co-requisite: KIN 3512 (C) or equivalent.

KIN 3912 Athletic Therapy Practicum

To provide clinical and on-field internship experiences on campus and in the community for prospective Athletic Therapy candidates. May not hold for credit with PHED 3910 (057.391), KIN 3910. Evaluated on a pass-fail basis. Prerequisite [KIN 2750 (C)] and [KIN 2320 (C) or equivalent] and [KIN 3200 (C)].

KIN 3914 Clinical Block Placement

Clinical internship experiences on campus and in the community for prospective Athletic Therapy candidates. Evaluated on a pass/fail basis. May not be held for credit with KIN 3910 or PHED 3910 (057.310). Prerequisites: KIN 3912.

SECTION 6: Kinesiology Course Descriptions-4000 Level

KIN 4160 Advanced Pathology and Sport Medicine

Basic principles of pathology and clinical manifestations of cardiac respiratory, and neurologic disorders. Preventative measures, assessments and treatment methods employed in care of patients with these disorders will also be examined. May not be held for credit with PHED 4050 (057.405). Prerequisite: [KIN 3160 or PHED 3160 or PHED 3060 (057.306)] (C) and [KIN 3470 or PHED 3470 or PHED 3430 (057.343)] (C) and [KIN 3320 (C)]

KIN 4330 Advanced Biomechanics

A biomechanical analysis of the skills and techniques of the major sports, games, and exercises. May not be held for credit with PHED 4360 (057.436). Prerequisite: [KIN 2330 or PHED 2330 or PHED 2310 (057.231) (C)]. This course includes a laboratory.

KIN 4400 Therapeutic Exercise Rehabilitation

This course will concentrate on therapeutic exercise for the upper and lower extremities, torso and spine. Content will focus upon using exercise and basic therapy techniques to restore function by addressing deficiencies in range of motion, flexibility, strength, power, endurance, proprioception, coordination, agility and speed. Prerequisite: [KIN 3740 or PHED 3740 (C)] and [KIN 3160 (C)].

KIN 4460 Fitness Appraisal and Lifestyle Counselling

Theoretical knowledge and practical training related to physical activity, fitness and lifestyle appraisal and counseling. Note: Prepares students to certify as "Certified Personal Trainer (CPT) (Canadian Society for Exercise Physiology)." B. Kin. Students who wish to prepare for the Certified Exercise Physiologist (CEP) Canadian Society for Exercise Physiology Certification should consult the Undergraduate Program Administrator for information. May not be held for credit with PHED 446 (057.446). Prerequisite: [KIN 3470 or equivalent (C)]. Pre or Co requisites: [PERS 1200 or equivalent (C)] and [KIN 3512 or equivalent (C)].

KIN 4470 Advanced Exercise Physiology

An advanced examination of the physiological factors that affect human performance during physical activity. This will include exposure to related research and the development of techniques for its critical assessment. May not hold for credit with PHED 4410 (057.441). Prerequisites: [KIN 3470 or PHED 3470 or PHED 3430 (057.343) (C)].

KIN 4500 Physical Activity and Aging

The study of the aging processes and the effects of exercise and lifestyle factors on the health and fitness of the aging adult. May not be held for credit with PHED 4500 (057.450). Prerequisite: [KIN 3512 (C) or equivalent] or permission of the Instructor.

KIN 4540 Advanced Topics in Sport Psychology

This course will provide the student with a deeper understanding of psychological variables affecting individuals within sport contexts, including an exploration of various research methods and theories/research related to motivation, youth, and applied work in sport psychology. May not hold for credit with PHED 4540. Prerequisite: PHED 2540 or KIN 2540.

KIN 4560 Advanced Fitness Appraisal and Lifestyle Counselling

Advanced theoretical knowledge and experiential learning related to physical activity, fitness and lifestyle assessment, counselling, and exercise prescription for apparently healthy and clinical populations. Prepares students for Canadian Society of Exercise Physiology "Certified Exercise Physiologist" (CSEP-CEP) exams. May not hold for credit with PHED 4350. Prerequisites: [KIN 4460 (C) or equivalent] and [KIN 3512 (C) or equivalent]. Requires a paid facility use pass.

KIN 4910 Athletic Therapy Practicum

To provide clinical and on-field internship experiences on campus and in the community for prospective Athletic Therapy candidates. May not be held for credit with PHED 4910 or (057.491). Evaluated pass-fail. Prerequisite: [KIN 3914 (C) or equivalent] and [KIN 3400 (C)] and [KIN 3320 (C) or equivalent].

KIN 4060 Drugs and Ergogenic Aids in Sport

A multidisciplinary examination of drugs, hormones, dietary supplement and methods used by athletes in attempting to enhance athletic performance. Ethical concerns and mechanisms of action will be examined for steroids, stimulants, masking agents, blood doping, and hormonal and dietary supplements among others. May not hold for credit with PHED 4060 (057.406). [BIOL 1412 or ZOOL 1330 (022.133)] or [BIOL 2420 or ZOOL 2940 (022.254)] are strongly recommended prerequisites.

SECTION 6: Phys Ed & Rec Studies General Course Descriptions-1000 Level

PERS 1200 Physical Activity, Health and Wellness

An examination of the importance of physical activity for health and wellness, theories and determinants of health promoting behaviours, and strategies for promoting health behaviours. Examination of the benefits of physical activity for health and wellness, the present and recommended levels of physical activity, the factors influencing participation in physical activity, and individual organizational and national interventions for increasing physical activity. May not be held for credit with PHED 1200 (057.120)

PERS 1300 Introduction to Leisure Travel

To provide an introduction to tourist behaviour and the tourism system through an overview of: why people travel; the components of tourism; the scope and organization of tourism in Canada; and the interrelationship between recreation and tourism. May not be held for credit with REC 1200 (123.120).

PERS 1400 Concepts of Recreation and Leisure

The nature and scope of recreation and leisure, the past influences and implications Undergraduate Studies

for the future. An overview of the types and roles of various components of the leisure service delivery system. May not be held for credit with REC 1400 (123.140).

PERS 1500 Foundations of Physical Education and Kinesiology

An introduction to physical education and kinesiology as a profession and a discipline, including an overview of sub-disciplines, resources, and careers; a personal physical assessment; and principles for achieving physical fitness. Note: A fieldwork fee is attached to the course. May not be held for credit with PHED 1500 (057.150).

SECTION 6: Phys Ed & Rec Studies General Course Descriptions-2000 Level

PERS 2000 Special Topics (Introductory)

An introductory examination of selected topics in the fields of kinesiology, physical education and recreation. Topics will vary depending on faculty expertise and student need.

PERS 2100 Introduction to Professional Practice

An introduction to professional values and behaviours in the broad fields related to kinesiology, physical education, and recreation management including accountability, commitment, ethical decision making, interpersonal communication, respect for diversity, and service. Prerequisites: [PERS 1200 or PHED 1200 (057.120) (C)] or [PERS 1500 or PHED 1500 (057.150) (C)] and [PERS 1400 or REC 1400 (123.140)].(C)]

PERS 2200 Program Planning Principles

While contexts in practice may vary, program planning is an essential competency for all professionals in recreation, kinesiology, and physical education. To ensure the requisite skill set is acquired, the emphasis in this course will be on principles and processes in effective program planning, implementation, and evaluation. May not hold for credit with PHED 3080 or 057.308 or REC 2530 or 123.253. Prerequisites: [PERS 1200 or PHED 1200 (057.120) (C)] or [PERS 1500 or PHED 1500 (057.150) (C)] and [PERS 1400 or REC 1400 (123.140) (C)].

SECTION 6: Phys Ed & Rec Studies General Course Descriptions-3000 Level

PERS 3100 Inclusive Physical Activity and Leisure

This course introduces the foundations of inclusive physical activity and leisure and the application of this knowledge to individuals from diverse backgrounds and experiences with a focus on people with various forms of impairment. May not hold for credit with PHED 3390 (057.339) or REC 3060 (123.306). Prerequisite: [PERS 2100 (C)].

PERS 3170 Canadian Sport History

This course will emphasize the rise of modern sport in Canada and will reflect on the ways in which social change has influenced sport and physical activity. This course provides an overview of issues and topics related to the development of modern sports in Canada. Using the concepts of class, gender, race and ethnic identity as interpretive tools, the course will examine: physical activities and games of First Nations; sport and recreation in new France and British North America; sports in post-Confederation Canada; and developments in the 20th and 21st centuries. May not be held for credit with KIN 3170, PHED 3170 or PHED 3070 (057.307).

PERS 3340 Philosophy of Physical Activity and Leisure

Issues in sport, physical education and recreation will be examined from a philosophical perspective. May not be held for credit with KIN 3340, REC 3340 or PHED 2340 or 057.234. Prerequisite: PERS 2100 (C).

PERS 3350 Introduction to Research

Students will become familiar with the basic principles and methods of research in the biological, life and social sciences. Students will have the conceptual foundations and practical skills needed to locate, understand, and evaluate primary research publications. May not hold for credit with KIN 3350, REC 3350 or REC 2010 (123.201). Prerequisite: STAT 1000 or STAT 1001 (005.100).

PERS 3460 Sociology of Physical Activity and Leisure

This course examines sociological factors that influence and shape participation in the areas of physical activity, sport and leisure. The exploration of students' own experiences in this field is emphasized, using an analytical model examining

experiences as they arise out of the interplay of social structure and individual agency. May not hold for credit with PHED 3460 (057.346).

SECTION 6: Phys Ed & Rec Studies General Course Descriptions-4000 Level

PERS 4100 Current Issues

A capstone course examining current issues and strategies for addressing them in the broad fields related to kinesiology, recreation management, and physical education. Prerequisite: Successful completion of 90 credit hours of course work in the BKin or the BRMCD degree programs.

PERS 4200 Special Topics

A theoretical and practical examination of selected topics in the fields of recreation, leisure and kinesiology. Topics will vary depending on faculty expertise and student need. Prerequisites: [PERS 1400 or REC 1400 (123.140)(C)] or [PERS 1500 or PHED 1500 (057.150)(C)] or [PERS 1200 or PHED 1200 (057.120)] or departmental approval.

PERS 4600 Directed Studies

Completion of an independent study or fieldwork experience, including a major written submission, approved by the department and under the direction of a faculty member.

PERS 4630 Supervised Fieldwork Experience

The fieldwork practicum is a professionally supervised field experience that provides an opportunity to apply knowledge gained in academic courses, and exposure to new concepts of professional practice in the fields of physical activity, health and wellness, or leisure. Students are placed for a 13-week period of full-time work within a suitable agency. May not be held for credit with PHED 4620 (057.462) or REC 3080 (123.308) or REC 4630. Prerequisite: Successful completion of 90 credit hours of course work in the Bachelor of Kinesiology degree program and a minimum DGPA of 2.5.

SECTION 6: Physical Education Course Descriptions-2000 Level

PHED 2400 Coaching Theory and Practice

An introduction to theoretical and practical aspects of coaching at the community and school level, including the examination of topics of philosophical, psychological, ethical and technical significance. The course prepares students for certification from the national Coaching Certification Program (Competition A). May not hold for credit with KIN 2400, PHED 3720 or PHED 3050 (057.305). Requires a paid facility use pass.

PHED 2402 Advanced Coaching Theory and Practice

An analysis of the theoretical and practical aspects of coaching at elite levels, with a particular focus on topics of psychological and technical significance. An emphasis is placed on the sport psychology research literature. The course prepares students for certification from the National Coaching Certification Program (Competition B). May not be held for credit with KIN 2402 or KIN 3730 or PHED 3730. Requires a paid facility use pass. Prerequisite: KIN 2400 or PHED 2400 or PHED 3720 or KIN 3720 (C).

PHED 2550 Growth and Motor Development

(Formerly 057.255) Detailed study of physical growth and motor development from conception to adolescence, with implications for physical activity programs.

PHED 2710 Human Movement Principles

An introduction to the principles of inclusive physical education through the integration of theory, practice and guided reflection pertaining to the development of fundamental movement skills and strategies applied to educational games, gymnastics, and dance. May not hold for credit with PHED 1420 (057.142). Requires a paid facility use pass.

PHED 2720 Developmental Games and Activities

Practical and theoretical aspects of designing educational game experiences applicable to early through senior years physical education, to include the design, implementation, and assessment of safe and inclusive physical activities as well as planning, organizational and teaching strategies. Introduces students to Manitoba Curriculum Student Learning Outcomes in "Movement, Safety, Personal and Social Management". May not hold for credit with PHED 2650 (057.265). Requires a paid

facility use pass. Prerequisite: PHED 2710 (C).

PHED 2730 Gymnastics, Dance and Rhythmic Activities

Practical and theoretical aspects of designing gymnastics, dance and rhythmic activity experiences applicable to early through senior years physical education, to include the design, implementation, and assessment of safe and inclusive physical activities as well as planning, organizational and teaching strategies. Incorporates Manitoba Curriculum Student Learning Outcomes in "Movement" and "Safety." May not hold for credit with PHED 3410 (057.314). Requires a paid facility use pass. Prerequisite: PHED 2710 (C).

PHED 2740 Fitness Theory and Practice

Integrates theory and practice necessary to design and lead safe and effective group fitness programs, following performance standards established by the National Fitness Leadership Alliance. Introduces students to Manitoba Curriculum Student Learning Outcomes in "Fitness Management," and prepares them for Manitoba Fitness Council Theory and Group Fitness Specialty exams. May not be held for credit with PHED 1640 (057.164) or PHED 2640 (057.264) or PHED 2630 (057.263) or KIN 2740. Note: A fieldwork fee is attached to the course. Requires a paid facility use pass. Prerequisites: [PHED 2320 (057.232) or KIN 2320 (C)].

SECTION 6: Physical Education Course Descriptions-3000 Level

PHED 3102 Aboriginal Song and Dance

An introduction to a variety of traditional and culturally relevant Aboriginal songs and dances representative of Canada's Aboriginal peoples, including First Nations, Metis and Inuit, taught using western and traditional teaching styles with an emphasis on hands-on learning. A fieldwork fee is attached to the course.

PHED 3142 Principles of Fitness Training

Theoretical concepts of designing programs employing the principles of overload and adaptation for all components of fitness for all age groups. May not hold with KIN 3142 or PHED 3090 (057.309). Prerequisite: [PHED 3430 (057.343) or KIN 3470 or PHED 3470(C)].

PHED 3150 Outdoor Activities

(Formerly 057.315) May not be held for credit with 057.439. A fieldwork fee is attached to the course. Evaluated pass-fail. Requires a paid facility use pass. (To be deleted in 2009-2010).

PHED 3360 Culturally Relevant Physical Education and Health

An investigation of physical health and education from a critical theorist perspective, that is, one that investigates the different relations of power and privilege (based on ability, gender, race, socio-economic class, sexuality) experienced within education experiences of young people from diverse backgrounds will be analyzed from a holistic perspective. May not hold for credit with PHED 3100 (057.310). Prerequisite: [PHED 2720 or PHED 2650 (057.265) (C)].

PHED 3710 Active Health and Human Potential

An examination of lifestyle behaviours which can enable or constrain human wellness and potential. By integrating theory with practice, current wellness models and motivational theories will guide strategies for wellness planning personal and professional practice. Introduces students to Manitoba Curriculum Student Learning Outcomes in "Personal and Social Management", and "Healthy Lifestyle Practices", as well as curricular connections for the teaching of "active health". May not be held for credit with PHED 3440 (057.344).

PHED 3750 Lifestyles Activities

An introduction to the knowledge, skills, and attitudes that aid in the development of lifelong physically active and healthy lifestyles. May not hold for credit with KIN 3750 and or REC 3750. Requires a paid facility use pass.

PHED 3760 Diverse Populations Mentorship

Practical and theoretical aspects of designing physical activity experiences for students from diverse population, including on site leadership opportunities in a multicultural school context. Evaluated pass-fail.

PHED 3770 Aboriginal Games and Activities

This course will provide students with a unique opportunity to explore, in theory and practice, traditional and contemporary world views related to historical, cultural, and environmental approaches to Aboriginal games and activities. Requires a paid

facility use pass. Evaluated pass-fail.

SECTION 6: Physical Education Course Descriptions-4000 Level

PHED 4710 Outdoor Education

To introduce the students to the basic outdoor skills associated with summer winter backpacking/cross-country skiing/snow shoeing trips. Students will then learn to use a variety of outdoor settings for education opportunities on a variety of topics and disciplines. A fieldwork fee is attached to the course. May not hold for credit with KIN 4710 or REC 4710 Outdoor Education.

SECTION 6: Recreation Studies Course Descriptions-2000 Level

REC 2400 Management and Marketing of Leisure Services

Basic management, and marketing principles and practices and their applicability to delivery of leisure services. Topics include financial resources, budgeting, people-centred management, and marketing. Prerequisites: [PERS 1400 or REC 1400 (123.140) (C)].

REC 2650 The Social Aspects of Aging

(Formerly 123.265) An examination of the social aspects of aging. Emphasis on understanding the aging process as a life transition involving adaptation through interaction with social and physical environments. This is an Option in Aging course and may not be held for credit with IDES 2650 (051.265) or HMEC 2650 (028.265) or SWRK 2650 (047.265).

SECTION 6: Recreation Studies Course Descriptions-3000 Level

REC 3090 Sustainable Nature-Based Tourism

(Formerly 123.309) Analysis of the growth and development of sustainable nature-based tourism as a global and regional phenomenon. Particular emphasis will be placed upon the fundamental principles of sustainability, natural resource and visitor management for recreation, and the role of outdoor recreation and education in Sustainable Tourism Planning and Management. Prerequisite: [PERS 1300 or REC 1200 (123.120) (C)] and [PERS 1400 or REC 1400 (123.140) (C)].

REC 3200 Advanced Program Planning and Leadership

Consideration and application of program planning principles as they relate to specialized contexts and diverse populations. Foundations of leadership and interpersonal communication for effective and successful program implementation. Also requires a valid recreation facility use pass. May not hold for credit with REC 2540 (123.254) or REC 3870 (123.387) Prerequisite: PERS 2200 (C)

REC 3850 The Planning of Recreation Areas and Facilities

(Formerly 123.385) The process used to plan both recreational open spaces and facilities. Special consideration is given to the role of the recreation professional in relationship to other planners. Prerequisite: [PERS 1400 or REC 1400 (123.140) (C)] and PERS 2200 (C).

REC 3860 The Administration of Leisure Services

(Formerly 123.386) Basic management principles and practices and their applicability to the delivery of leisure services. Topics include management styles and systems, legal aspects, the financial base, budgeting, planning, etc. Prerequisite: [REC 1400 (123.140) (C)]. (To be deleted in 2008-2009).

SECTION 6: Recreation Studies Course Descriptions-4000 Level

REC 4060 Person Centred Leisure Education

(Formerly 123.406) A detailed examination of person centred leisure education with an emphasis on both theoretical and practice models and their application to the recreation service delivery system. Prerequisites: [PERS 3100 or REC 3060 (123.306) (C)].

REC 4070 Community Development and the Leisure Service Delivery System

(Formerly 123.407) The nature of community and the unique role that leisure service organizations play in the complex process of community development. Prerequisites: must have completed 70 percent of the core courses in Recreation Management and Community Development. May not be held for credit with 123.404. Prerequisites: [(PERS 2200 or REC 2530 (123.253) (C))] and [REC 2400

(C)].

REC 4090 Sustainable Nature-Based Tourism Planning, Management and Research

(Formerly 123.409) Building upon the changes to REC 3090 this course examines planning and management frameworks as they relate to sustainable nature-based tourism. The course examines the expansion of tourism as a global phenomenon and considers sustainable nature-based tourism as a community development process. In addition the role and importance of research in informing the tourism planning and management decision making processes is examined. Prerequisites: [REC 3090 (123.309) or (123.330) (C)]. May not be held for credit with 123.430. Note: A fieldwork fee is attached to the course. Prerequisites: [(REC 3090 (123.309) or (123.330) (C)].

REC 4120 Recreational Travel and Tourism

(Formerly 123.412) The purpose of this course is to provide students with a better understanding of the travel and tourism industry through an examination of its history, service systems and issues. Prerequisites: [PERS 1300 or REC 1200 (123.120) (C)].

REC 4140 Marketing Recreation and Park Services

(Formerly 123.414) A review of the general principles of marketing and an introduction to strategies for their implementation in public sector and not-for-profit recreation agency programs and services. Prerequisites: [REC 2400 or REC 3860 (123.386) (C)] or [MKT 2210 (118.221)] and [PERS 1400 or REC 1400 (123.140) (C)]. Pending Senate Approval

REC 4150 Clinical Aspects of Therapeutic Recreation

(Formerly 123.415) An examination of the current principles of therapeutic recreation in relation to their practical application to individuals in clinical settings such as nursing homes, hospitals and other long-term care facilities. Prerequisite: [PERS 3100 or REC 3060 (123.306) (C)].

REC 4170 Sport Management

An in-depth coverage of sport management, focusing on Canadian amateur sport systems (municipal, provincial, national) and professional sport organizations. Prerequisite: REC 2400 (C).

REC 4250 Leisure and Aging

The nature of the aging process and its impact on leisure behaviour. The factors influencing leisure among older adults, policy issues, and program and service methods and implications will be examined. This is an Option in Aging course. May not be held for credit with REC 4130 (123.413). Prerequisite: [PERS 3100 (C)] or [REC 2650] or permission of the instructor.

REC 4350 Parks and Protected Areas Planning and Management: Field Studies

The course is taught in two segments, an on-campus component and field study component taking place in Banff National Park. The on-campus component examines the historical development of the concept of parks and protected areas, the role of interpretation, management and research in the parks and emerging issues in the management of parks and protected areas. In addition, during the on-campus component planning for the field will take place. The field segment will focus on a wide variety of management issues with particular attention to Banff National Park. Emerging issues and trends will be examined and past management responses evaluated. There will be opportunities for students to investigate specific management issues of interest to them and to participate in current research being conducted in the park. Prerequisite: Written permission of the instructor required. Offered with GEOG 4350.

REC 4400 The Administration of Special Events

Advanced management principles and practices and their applicability to the delivery of leisure services. May not hold for credit with REC 4310 (123.431). Prerequisite: [REC 2400 or REC 3860 (123.386) (C)]. Pending Senate Approval.

REC 4720 Wilderness Adventures

Student will learn how to plan and participate in one or more wilderness adventure activities such as canoe tripping, sailing, kayaking, climbing, winter camping, etc. Students will also concentrate on conducting these activities safely with clients. It is hoped that this experience will positively affect future life sport and recreation activities. A fieldwork fee is attached to the course. May not be held for credit with

KIN 4720 or PHED 4720 Wilderness Adventures

REC 4850 Advanced Planning of Recreation Areas and Facilities
Advanced planning considerations with opportunity for application of planning process theories. May not be held for credit with REC 4340 (123.434). Prerequisite: [REC 3850 (123.385) (C)].

Undergraduate Studies

SECTION 1: Degree Programs Offered

SECTION 1: Degree Programs Offered ,

Program/Degree	*Years to Compete	Total Credit Hours
Bachelor of Laws (LL.B.)	5	157
Master of Laws (LL.M.)	6	161-163 and Thesis

*This includes two years (60 credit hours) of study in an undergraduate program.

Equivalent academic courses completed at recognized universities elsewhere will be considered. For all admission requirements see:

<http://law.robsonhall.ca/lb/admission-to-first-year>

*The Master of Laws is a thesis-based program designed for completion in one year after the completion of a three year LL.B. program. The program consists of participation in the Graduate Legal Theory Seminar, two additional courses and completion of a substantial thesis. Further details are available through the LL.M. website: www.umanitoba.ca/law/newsite/research.php. Applicants should also consult the Faculty of Graduate Studies website: umanitoba.ca/graduate_studies/.

SECTION 2: The Profession and the Faculty of Law

SECTION 2: Bachelor of Laws - LL.B.,

Robson Hall, Faculty of Law, offers a three year LL.B. program that starts with the fundamental doctrinal courses that allow students to acquire a solid foundation in law. From the foundational courses, students can move into legal specialities of their choice, or choose to pursue an LL.B. concentrating on Aboriginal law, business law, or human rights. Clinical legal education has been a part of the LL.B. program since the early 1970s and students develop lawyering skills under faculty guidance, expanding their perspectives and ethical understanding of the role of practising lawyers. Scholarship and research is built into the LL.B. program so students have an opportunity to develop a critical understanding of law and its development.

2.1 The Study of Law,

Legal education in Canada is divided into two phases: the academic study of law at one of the university law schools and practical training under the auspices of a provincial law society for those who wish to be admitted to practise and called to a Bar. As there is a reciprocal recognition of university law degrees between the common law provinces (all provinces except Quebec), the academic study can be taken in any one of these provinces.

A sound education in law provides a good foundation for a great variety of careers. In the past most law graduates have entered the private practise of law to concentrate on various types of legal work: real estate transactions, commercial contracts, company law, family law, taxation, etc. Contrary to popular belief only a few lawyers concentrate on court work and even fewer specialize in criminal cases. While the tendency to specialize in the practise of law is becoming more prevalent, most lawyers continue to be general practitioners prepared to perform most types of legal work according to the needs of their clients.

Besides the private practice of law, law graduates can join the legal departments which many corporations find it expedient to maintain; others enter the employ of various government departments to serve in a variety of capacities. A few pursue nonlegal vocations in, business, journalism, social work, and law enforcement. At the University of Manitoba consideration is given to the fact that while most students take law to become practising lawyers, some are taking law as an additional discipline to enhance their opportunities in fields other than the practise of law; thus, while the emphasis is on the academic study of substantive law, the study is carried on in a practical context.

2.2 Clinical Learning,

The curriculum invites critical assessment of the role of law in society as well as the development of skills relevant to the practice of law. In addition to lectures and seminars, students are given an opportunity to develop, under supervision, some of the research, writing, and forensic skills which will prove useful in the practise of law. In first year, students are acquainted with the various resource materials available in a law library, and they follow a program designed to develop legal research and writing techniques. In second and third years, students participate in moot courts, fictitious trials and appeals, which provide practise in research, examination of witnesses, and courtroom argument. This advocacy training is just one element of the program at Robson Hall that contributes to the excellent reputation of our graduates. In third year students may choose from a range of Clinical Courses or may participate in national competitive moot competitions.

Throughout their legal studies students may serve actual legal clients through volunteer work with the University Law Centre, Pro Bono Students, L. Kerry Vickar Business Law Clinic and The Legal Help Centre.

2.3 Research and Scholarly Writing,

Research and scholarly writing are integral elements of the mission of the University and the law school. Professors research, write and consult with the larger legal community in their particular area of expertise and students have similar opportunities. Each year students must take a perspective course which provides an opportunity to explore a particular area of law in depth. Perspective courses have limited enrolment and students must research and write a major paper.

2.4 Faculty of Law Centres of Excellence,

Robson Hall is home to two named research chairs. In 1999, the Faculty of Law established the Asper Chair of International Business and Trade Law. The Asper Chair sponsors a variety of research including bi-annual academic conferences in international business and trade law. An internship program allows up to four students a year to work with the Asper Chair and creates opportunities for students to advance their education, while gaining skills necessary to pursue careers in law or business with an international focus. Additionally, students involved in the Asper program have the opportunity to participate in international commercial dispute resolution competitions.

The Marcel Desautels Chair in Private Enterprise and the Law has a mandate to conduct research and provide education on issues of specific interest to the privately held or family owned businesses. The Desautel Centre's focus is on the needs of closely held businesses. The Faculty of Law also operates the Kerry Vickar Small Business Law Clinic which is headed by a director who is assisted by volunteer mentors from the practising bar.

2.5 Student Organizations,

All Law students are members of the Manitoba Law Students' Association (MLSA), the student government. Student participation in Faculty governance takes place through the representation of elected members of the MLSA. In addition to the Manitoba Law Students Association there exists a diversity of student groups at Robson Hall. No matter what your interests, joining a student group can greatly enhance your law school experience by providing you with greater opportunities throughout the year to interact with the community and other students. Student groups include:

Business Law Group
Canada Law Games
Citor
Christian Legal Fellowship (CLF)
Family Law Group
Feminist Legal Forum
Manitoba Aboriginal Law Students Association (MALSA)
MBA Mentorship Program
Mediators Beyond Borders
Pro Bono Students Canada (PBSC)

Outlaws
Robson Hall Bilingual Students Association

SECTION 3: Admission to the Faculty of Law

3.1 Course Requirements for Admission to LL.B. Program,
Robson Hall, Faculty of Law offers three First Year Admission categories:

Index Score (Regular) Category (50% GPA and 50% LSAT score)
Individual Consideration Category
Aboriginal Category

The minimum academic requirement for the Index score category is two (2) full years of university level courses including a mathematic requirement (equivalent of 60 credits). The LL.B. requirement fulfils the University's English requirement.

All applicants must write the Law School Admission Test (LSAT).

Download a copy of the [Applicant Information Bulletin](#).

SECTION 4: Academic Regulations

Section 4: Academic Regulations,
All students are asked to note that some academic policies and regulations are under review and are subject to change. Please check the Web Calendar at www.umanitoba.ca for updated information.

The provisions of the chapter, [General Academic Regulations and Requirements](#), and the chapter, [University Policies](#), apply to all students. In addition, the Faculty of Law has regulations and requirements, published below, that apply specifically to its students.

4.1 Residence requirements for the LL.B Degree,
To obtain the LL.B. degree from the University of Manitoba, ordinarily a student must successfully complete two of the three years of the LL.B. program at the University of Manitoba. The remaining year may be completed at another law school as approved by the Admissions Committee or the Dean's office.

4.2 Licence to Practise Law,
Graduates who wish to practise must apply to the Law Society of the province in which they wish to practise. Law societies generally require applicants to complete a bar admission course. The Law Society must be satisfied as to the good character and repute of its applicants, as well as their academic competence and qualifications. Inquiries with regard to the Province of Manitoba should be made to the **Error! Hyperlink reference not valid.**

4.3 Regulations of the Faculty of Law,
Regulations of the Faculty of Law, as amended from time to time governing attendance, evaluation, prizes, and progression may be consulted at the Faculty's website (www.umanitoba.ca/faculties/law).

4.4 Miscellaneous Registration Matters,
The dean's office, with the recommendation of a special faculty-based committee if so requested, shall, subject to appeal to the Faculty Council, consider and determine all applications from students admitted to the faculty: 1) for a letter of permission, with conditions, to take part of their law studies for credit at the University of Manitoba, at another university; 2) for permission, with conditions, to defer their

law studies for a period of one or more academic years after successfully completing first or second year, and to permit such students to re-register following such an absence; 3) for permission to withdraw before completing the academic year for which they are then registered and to permit, in the case of a student who withdraws from first year under exceptional circumstances, that student to re-register for a subsequent academic year as a supernumerary student, and in the case of a second or third year student, to permit such student to re-register for a subsequent academic year; in all cases with or without conditions; 4) for permission to switch from the full-time program to the half-time program and vice versa.

SECTION 6: Registration

Section 6: Registration

First year students in the Faculty of Law are registered by the faculty after the middle of August. Returning Second and Third year students should register themselves through Aurora. It is the students responsibility to check their Aurora account to confirm: their registration, to verify that they meet Faculty of Law requirements for graduation and access fee statements. In the event that a student fails to properly select courses the dean's office may reject the courses selected by the student and assign courses to that student and such assignments shall ordinarily be final.

SECTION 7: Law Course Descriptions-1000 Level

LAW 1100 Contracts

(Formerly 045.110) This course explores the basic principles of contract law. How is a contract formed? What is an offer? What constitutes acceptance? Are all promises enforceable as a contract? When should parties be allowed to avoid obligations? What happens if one party misrepresents the quality of subject matter of the contract? What if a party makes a mistake about what they buy or sell? What should happen if one party takes advantage of another for a better deal for themselves?

LAW 1140 Criminal Law and Procedure

(Formerly 045.114) A general introduction to criminal law and procedure dealing with principles of criminal liability, common defenses to criminal charges, selected specific offences, and the basic procedures to be followed in the administration of criminal justice in Canada.

LAW 1460 Constitutional Law

(Formerly 045.146) An examination of the legal problems arising from the nature of the Canadian political structure and, in particular, the distribution of legislative powers between the federal parliament and the provincial legislatures and an introduction to the impact of the Canadian Charter of Rights and Freedoms.

LAW 1480 Torts and Compensation Systems

(Formerly 045.148) A general introduction to the law of torts and other compensation systems such as the Workers' Compensation and Criminal Injuries Compensation schemes.

LAW 1500 Property

(Formerly 045.150) A general introduction to the principles of property with special emphasis on the principles of real property, their historical development and modern application.

LAW 1530 Legal System

(Formerly 045.153) An introduction to the study of law including initial analysis of various aspects of legal history, the structure of the legal system, legal reasoning, statutory interpretation, dispute resolution and the role of the judiciary. This course is graded pass/fail.

LAW 1540 Legal Methods

(Formerly 045.154) An introduction to legal research and writing skills and oral advocacy. Grading: Pass/Fail

SECTION 7: Law Course Descriptions-2000 Level

LAW 2400 Wills and Succession

(Formerly 045.240) The law of testate and intestate succession, Part IV of The Marital Property Act, and The Dependents' Relief Act.

LAW 2490 Trusts

(Formerly 045.249) The nature and functions of modern inter vivos and testamentary trusts. The creation of express, private trusts, charitable trusts, resulting trusts, and constructive trusts. The administration of trusts, and real and personal remedies of beneficiaries under trusts.

LAW 2510 Problems in Contract and Tort

(Formerly 045.251) A detailed study of significant topics in the area of tort and contract at an advanced level. Special attention will be paid to the inter-relationship of the two subject areas.

LAW 2530 Debtors' and Creditors' Rights

(Formerly 045.253) Remedies of the unsecured creditor, enforcement of judgments, fraudulent conveyances and preferences, general assignments and bankruptcy. Mechanics' liens and special rights arising out of builders' and workers' legislation relating to real estate transactions.

LAW 2600 Evidence

(Formerly 045.260) A study of the rules relating to the admissibility and weight of evidence in judicial proceedings.

LAW 2640 Family Law

(Formerly 045.264) An overview of key legal issues regarding familial relationships and family breakdown in Canadian society. Topics include cohabitation, marriage, separation, divorce, child custody and access, spousal and child support and property division.

LAW 2650 Introduction to Advocacy

(Formerly 045.265) A detailed study of the conduct of a case from its inception through to trial. The course requires that students prepare and conduct a trial. Grading: Pass/Fail.

LAW 2670 Civil Procedure

(Formerly 045.267) An introduction to the rules of civil procedure.

LAW 2680 Legal Negotiation

(Formerly 045.268) Most legal disputes settle before trial. This course examines how lawyers assist their clients through effective interviewing, counseling, strategic planning and negotiation as well as some of the mechanisms, both judicial and non-judicial, that facilitate pre-trial dispute settlement.

LAW 2690 Corporations I

(Formerly 045.269) A study of the major legal, practical and policy issues arising out of the formation and operation of business organizations in Canada, with a particular focus on business corporations. Students will examine major principles of Canadian corporate law, including corporate personality, management power, majority rule and minority protection.

LAW 2700 Income Tax Law and Policy

(Formerly 045.270) The object of this course is to develop a working knowledge of the basic principles and rules of the income tax system as these apply to individuals. A parallel objective is the discovery of the major policy positions that inform the personal income tax system and the development of the ability to use tax policy analysis to evaluate advantages of, and problems with, the current system.

SECTION 7: Law Course Descriptions-3000 Level

LAW 3010 Agency

(Formerly 045.301) The course will cover the entire landscape of the law of agency, including the various kinds of authority, the duties of principals and agents, and the legal ramifications for each person when one person acts (purportedly) on behalf of another person.

LAW 3012 International Business Law

Explores the legal, practical and social realities of international business transactions.

LAW 3014 International Trade Law

The course will deal with the doctrine, practice and policy issues in international trade and business.

LAW 3016 Corporations II

An advanced study of corporations law from various theoretical and practical perspectives.

LAW 3018 Human Rights Law

Critical and constructive study, at an advanced level, of a significant major subject or set of topics in Human Rights Law.

LAW 3040 Sales and Consumer Law

(Formerly 045.304) The Sale of Goods Act and related statutes including a study of the duties and remedies of the parties and questions of title. Manitoba Consumer Protection Law in the area of sales and credit.

LAW 3050 Commercial Law

(Formerly 045.305) A study of secured transactions and negotiable instruments.

LAW 3070 Gender and the Law

(Formerly 045.307) An exploration of ideas about gender differentiation in law, the legal system, legal education and the legal profession. It will offer an introduction to the feminist critique of law and feminist theories about sexual equality and discrimination.

LAW 3090 Children and the Law

(Formerly 045.309) Relationships between child, family, state and law are examined within an interdisciplinary context, focusing on such issues as rights theories and the public/private distinction; regulation of young offenders, child protection and state intervention; and child victims in the courts.

LAW 3140 Clinical Administrative Law

(Formerly 045.314) The primary purpose of this course is to train students in lawyering skills. Students will be required to engage in classroom work and participate in simulated exercises. Emphasis will be given to the difference between board and court advocacy. Grading: Pass/Fail.

LAW 3162 Topics in Dispute Resolution

This course offers a detailed exploration of the theory and practice of dispute resolution focusing on the various approaches, private and court-connected, currently used to resolve conflict. In critically examining selected alternative dispute resolution mechanisms, the course exposes students to issues such as rights-based and interest-based dispute resolution, power, gender and culture in ADR processes and the functions, and skills required of, third party interveners. May not be held with the former LAW 3160 (045.316).

LAW 3190 Law and Literature

(Formerly 045.319) Law and Literature is the legal analysis of literary texts and the literary analysis of legal texts. By introducing images of law and social control found in literature and popular culture, and exploring legal language and the construction of narrative, the course invites speculation about the nature and impact of law.

LAW 3200 Immigration and Refugee Law

(Formerly 045.320) An explanation of immigration and refugee law through a study of a representative section of problems.

LAW 3210 Competitions A

(Formerly 045.321) Credit for selected students who satisfactorily participate in those academic competitions approved by Faculty Council. Grading: Pass/Fail.

LAW 3220 Competitions B

(Formerly 045.322) Credit for selected students who satisfactorily participate in those academic competitions approved by Faculty Council. Grading: Pass/Fail.

LAW 3230 Aboriginal Peoples and Land Claims

(Formerly 045.323) The course shall provide an overview of land claims and treaty land entitlement policies in Canada and their impact upon land claims by Aboriginal communities.

LAW 3240 Current Legal Problems C

(Formerly 045.324) Critical and constructive study, at an advanced level, of a significant major subject or set of topics. Grading: Pass/Fail.

LAW 3250 Current Legal Problems D

(Formerly 045.325) Critical and constructive study, at an advanced level, of a significant major subject or set of topics. Grading: Pass/Fail.

LAW 3260 Insurance Law

(Formerly 045.326) A general introduction to the basic principles of insurance law. The fundamental elements common to most types of policies will be examined with particular emphasis on property and liability insurance. The terms and provisions of specific insurance policies and coverages such as automobile, property, liability policies will also be covered.

LAW 3300 Clinical Criminal Law

(Formerly 045.330) The primary purpose of this offering is to train students in lawyering skills in the criminal law area. To this end instruction is given on an intensive basis in small groups. Students may be required to engage in classroom work; to participate in various forms of simulation exercises and to conduct actual client based cases under the supervision of the instructor. Particular emphasis will be given to questions of professional responsibility and ethics. Grading: Pass/Fail.

LAW 3310 Aboriginal Peoples and the Law

(Formerly 045.331) A study of the laws relating to Aboriginal Peoples in North America from the colonial period to the present. Special emphasis will be given to aboriginal rights, hunting and fishing rights, the legal aspects of Indian Treaties and the Indian Act. A more general treatment will be given to a study of Aboriginal Peoples' relationship to civil and criminal law in modern Canadian society.

LAW 3330 Employment Law

(Formerly 045.333) A detailed study of employment law including employment principles, constructive and wrongful dismissal, just cause, human rights and remedies.

LAW 3340 Advanced Advocacy

(Formerly 045.334) Advanced topics in trial presentation, procedure and evidence with concentration on jury trials.

LAW 3360 Advanced Legal Research

(Formerly 045.336) This course will provide students with the wherewithal to conduct legal research across a number of jurisdictions using both print and digital formats. Students are evaluated on a number of research exercises, a midterm examination, a major research pathfinder and a presentation of research results.

LAW 3370 The Legislative Process

(Formerly 045.337) A study of how statutes and regulations are made in the Province of Manitoba, and how lawyers can effectively represent their clients in the context of lawmaking by politicians, civil servants and regulators.

LAW 3380 Issues in Law and Bio Ethics

(Formerly 045.338) The course deals with the legal aspects of prevention, creation, alteration, maintenance and termination of life through medical and other scientific means.

LAW 3390 Securities Law

(Formerly 045.339) A study of the basic concepts and application of the securities regulatory system in Canada.

LAW 3410 Canadian Legal History

(Formerly 045.341) The historical background of the Canadian legal system.

LAW 3450 Remedies

(Formerly 045.345) A study of the law relating to damages, specific performance, injunctions, and other equitable remedies.

LAW 3480 Restitution

(Formerly 045.348) Principles and remedies of the common law and equity capable of preventing unjust enrichment; quasi-contract and constructive trusts.

LAW 3490 Research Paper
(Formerly 045.349) Details in each case to be worked out with the associate dean.

LAW 3500 Intellectual Property
(Formerly 045.350) A study of the law of, and issues related to, the major areas of intellectual property, including trademarks, copyright and patent, as well as ancillary doctrines including some or all of industrial design, trade secrets, appropriation of personality and plant breeders' rights.

LAW 3510 Corporate Taxation
(Formerly 045.351) A study of federal tax laws as they affect corporation income, as well as a discussion of the effects of income tax laws on corporate and other commercial planning.

LAW 3520 Taxation of Trusts and Estates
(Formerly 045.352) A study of taxation principles as they relate to partnership and trust income and estate planning.

LAW 3530 Administrative Law
(Formerly 045.353) An introduction to administrative law generally, with concentration on the judicial review of the exercise of statutory authority by administrative entities.

LAW 3550 Crime, Law and Society
(Formerly 045.355) A study of various social problems in legal and sociological perspectives with emphasis on criminal law and the administration of criminal justice. Topics may include police discretion, preventive detention, plea bargaining, sentencing theory and practise in correction, drug abuse and the mentally ill.

LAW 3590 Charter Issues in Criminal Law
(Formerly 045.359) The rules of Criminal Procedure and principles underlying and unifying such rules with a particular emphasis on the effect of the Charter of Rights and Freedoms on those rules.

LAW 3600 Environmental Law
(Formerly 045.360) The balance between technical development and the life-support capacity of the environment. The acquisition and nature of private rights in natural resources and their control by legislation and common law. Remedies for environmental degradation. Constitutional and international legal issues.

LAW 3610 Landlord and Tenant
(Formerly 045.361) The law relating to tenancies, residential and commercial, with special attention to remedies, recent legislation, and proposed reforms.

LAW 3620 Comparative Law
(Formerly 045.362) An introduction to civil law; a brief historical survey, codification, judicial philosophy, detailed study of selected comparative law topics in tort and contract with special reference to the Civil Code of the Province of Quebec. An introduction to Soviet law, detailed study of selected topics in Soviet law.

LAW 3680 Land Titles
(Formerly 045.368) The law relating to the registration of assurances and titles.

LAW 3690 Real Estate Transactions
(Formerly 045.369) The law relating to vendors and purchasers of land and to mortgages and other security on land.

LAW 3740 International Law
(Formerly 045.374) An introduction to the nature, sources, and some of the fundamental concepts of international law.

LAW 3760 Jurisprudence
(Formerly 045.376) This seminar will cover all the major "schools" of jurisprudential theory, with attention paid to particular areas of legal theory and debate, to the nature and function of law, its relation to morality, and to the analysis of rights and other legal relationships. Efforts will be made to relate these areas of debate to legal issues of current interest and practicality.

LAW 3770 Labour-Management Relations
(Formerly 045.377) A survey of the development of trade unions; their present status under both federal and provincial legislation regarding the right of
Undergraduate Studies

association, collective bargaining, and the settlement of disputes.

LAW 3820 Manitoba Law Journal
(Formerly 045.382) The editor of the Manitoba Law Journal who successfully completes his/her term of office, and all other editors and journal staff who in addition to successfully completing their terms of office satisfactorily complete a written requirement, may opt for the Manitoba Law Journal credit. Grading: Pass/Fail.

LAW 3822 Scholarly Publications
Senior editors of scholarly publications approved by the Academic Affairs Committee who successfully complete their terms of office and any writing requirements. Grading: Pass/Fail.

LAW 3830 Legal Aid Clinic
(Formerly 045.383) Students who are selected to act as student supervisors at the University Law Centre during the summer and who continue to actively serve the University Law Centre during their third year may, by successfully completing a written assignment approved by a faculty supervisor, opt for the Legal Aid Clinic. Grading: Pass/Fail.

LAW 3850 Conflict of Laws
(Formerly 045.385) Sometimes called private international law, it has to do with choosing what place to sue, what law applies when the law of more than one place might apply, and with the enforceability of judgments through foreign courts.

LAW 3862 Business Transactions: The Art of the Deal
A study, involving practical exercises of certain aspects of solicitors' work, including interviewing, negotiating, counseling and memo writing.

LAW 3880 Municipal and Planning Law
(Formerly 045.388) A general course in municipal law, including important aspects of land-use control and planning law. Although the course deals generally with the nature, structure, functions, and powers of the various units comprising the local level of government, the focus is primarily on municipal corporations. Topics covered include assessment and taxation, land-use planning and control, tort liability, judicial review of bylaws, qualification and accountability of councillors, and the law relating to expropriation, as well as some discussion of contemporary urban problems.

LAW 3930 The Legal Profession and Professional Responsibility
(Formerly 045.393) A general introduction to the problems of professional responsibility and the ethics of lawyers individually, as well as the legal profession collectively. Topics dealt with will include ethical problems of the lawyer in the role of advocate and in the role of counsellor (confidentiality, conflict of interest, etc.); professional responsibility in the delivery of legal service (competency, fee determination, specialization regulation, etc.) and the legal profession and the public interest (government of profession, discipline, professional liability, etc.). These problems are to be studied by the critical examination of case law, codes and canons, and other published materials; by classroom discussion and debate on problems; and by workshops and panels which involve practising lawyers.

LAW 3940 Canadian Charter of Rights and Freedoms
(Formerly 045.394) An in-depth study of the legal, philosophical and historical foundations of the Canadian Charter of Rights and Freedoms. Included is a study of both the American and European experience with Charters of Rights as well as Canadian case law.

LAW 3970 Current Legal Problems A
(Formerly 045.397) Critical and constructive study, at an advanced level, of a significant major subject or set of topics.

LAW 3980 Current Legal Problems B
(Formerly 045.398) Critical and constructive study, at an advanced level, of a significant major subject or set of topics.

SECTION 5: Program Requirements

Program Requirements

SECTION 5: Program Requirements ,

This Section describes the program requirements that are in effect for the 2011-2012 academic year. However, prospective students should be aware that the Faculty of Law regularly reviews its curriculum to ensure that it continues to meet the current needs of our students.

5.1 First Year

5.1 First Year,

Each full-time student is required to take all of the following courses:

Course No.	Doctrinal Courses (Compulsory)	Credit Hours
LAW 1100	Contracts	6
LAW 1140	Criminal Law and Procedure	5
LAW 1460	Constitutional Law	5
LAW 1480	Torts and Compensation Systems	5
LAW 1500	Property	5
<u>Clinical Course (Compulsory)</u>		
LAW 1540	Legal Methods	5
<u>Perspective Course (Compulsory)</u>		
LAW 1530	Legal System	2
Total credit hours		33

5.2 Second Year Only

5.2 Second Year Only,

In **Second Year** each student must take:

<u>Doctrinal Courses (Compulsory)</u>		
LAW 2600	Evidence	4
LAW 3530	Administrative Law	3
LAW 2670	Civil Procedure	2
LAW 2690	Corporations I	3
<u>Clinical Courses (Compulsory)</u>		
LAW 2650	Introduction to Advocacy	3
LAW 2680	Legal Negotiation	3
Total Credit Hours		18

5.3 Second Year or Third Year

5.3 Second Year or Third Year,

In **either Second Year or Third Year** each student must take:

<u>Doctrinal Courses (Compulsory)</u>		
LAW 2490	Trusts	3
LAW 2640	Family Law	3
LAW 2700	Income Tax Law and Policy	3
Total Credit Hours		12

Perspective Courses (One is Compulsory in each of second and third year; more can be taken)

LAW 3012	International Business Law	3
LAW 3014	International Trade Law	3
LAW 3018	Human Rights Law	3
LAW 3070	Gender and the law	3
LAW 3090	Children and the Law	3
LAW 3162	Topics in Dispute Resolution	2
LAW 3190	Law and Literature	3
LAW 3230	Aboriginal Peoples and Land Claims	3
LAW 3310	Aboriginal Peoples and the Law	3
LAW 3370	The Legislative Process	3
LAW 3380	Issues in Law and Bio Ethics	3
LAW 3410	Canadian Legal History	3
LAW 3490	Research Paper	2
LAW 3550	Crime, Law and Society	3
LAW 3620	Comparative Law	3
LAW 3740	International Law	3
LAW 3760	Jurisprudence	2
LAW 3940	Canadian Charter of Rights and Freedoms	3
LAW 3980	Current Legal Problems B	3

T08 Poverty Law

T13 Philanthropy Law

T14 Sentencing and Penal Policy

T16 Advanced Public Law
Doctrinal Courses (Optional)

Wills and Succession	3
Problems in Contract and Tort	2
Debtors' and Creditors' Rights	2
Agency	2
Corporations II	3
Sales and Consumer Law	2
Commercial Law	3
Immigration and Refugee Law	2
Competitions A *	2
Competitions B *	3
Insurance Law	4
Employment Law	3
Securities Law	2
Restitution	2
Intellectual Property	4
Charter Issues in Criminal Law	3
Environmental Law	3
Landlord and Tenant	2
Land Titles	3
Real Estate Transactions	3
Labour-Management Relations	3
Scholarly Publication*	2
Legal Aid Clinic *	2
Conflict of Laws	3
Municipal and Planning Law	3
Current Legal Problems A	

L01 Advanced Issues in Intellectual Property 2
Current Legal Problems B

T05 Copyright

T06 Law of Homicide

T09 Miscarriage of Justice

T10 Trade Marks and Patents

T15 Natural Resources

T 17 Internet and E-Commerce Law & Policy

Each student in **Second Year** must take a minimum of 32 credit hours. The 32 credit hours are made up of mandatory, doctrinal and clinical courses plus electives comprising 14 to 16 credit hours. The 32 credit hours must include at least one perspective course.

Each student in **Third Year** must take a minimum of 32 credit hours. The 32 credit hours are comprised of LPPR and any second or third year compulsory doctrinal courses that have not been taken, plus electives comprising the additional credit hours. The 32 credit hours must include at least one perspective course.
Note: LAW 3490 Research Paper is excluded if it has been taken in second year.

Compulsory Course
LAW 3930 The Legal Profession and Professional Responsibility 3
The rest of a Third Year student's credit hours, comprising a minimum of 32 credit hours, shall be selected from additional Second or Third Year Courses, above,

including at least one Perspective Course, plus any of the Doctrinal, and Clinical Courses, below:

	<u>Clinical Courses</u> (Optional)	
LAW 3140	Clinical Administrative Law	4
LAW 3250	Current Legal Problems D	
	A01 Clinical Family Law	3
LAW 3300	Clinical Criminal Law	8
LAW 3340	Advanced Advocacy	3
LAW 3862	Business Transactions: The Art of the Deal	6
	<u>Doctrinal Courses</u> (Optional)	
LAW 3240	Current Legal Problems C	2
	A01 Court of Appeal Clerkship*	
LAW 3360	Advanced Legal Research	3
LAW 3450	Remedies	3
LAW 3510	Corporate Tax	3
LAW 3520	Taxation of Trusts & Estates	3
LAW 3980	Current Legal Problems B	
	T03 Advanced Family Law	3
xxx.xxx	Non-Law University Elective**	3

* No more than three of these electives can be selected for credit. Students may take more than three of these electives but no credit will be awarded over the limit.

**This option is available with permission of the Associate Dean. Note: Addition course fee will be assessed by the University.

Third Year

You may only take one of: Clinical Administrative Law, Advanced Advocacy, Intensive Criminal Law, Legal Help Centre Clinical or Clinical Family. If you take Art of the Deal you may take Clinical Administrative Law, Advanced Advocacy, Intensive Criminal Law Legal Help Centre Clinical or Clinical Family. You may not take any other clinical course if you are taking Clinical Criminal Law.

- Entrepreneurship/Small Business
- Finance
- Generalist
- Human Resources Management/Industrial Relations
- International Business
- Logistics and Supply Chain Management
- Management Information Systems
- Management of Organizations
- Marketing
- Operational Research/Operations Management

SECTION 5: Course Descriptions

See Listing of Course Descriptions with each Department Listing

- 5.1 Accounting and Finance
Includes subjects: ACC (Accounting), FIN (Finance), MIS (Management Information Systems)
- 5.2 Warren Centre for Actuarial Studies and Research
Includes subjects: ACT (Actuarial Studies)
- 5.3 Business Administration
Includes subjects: ENTR (Entrepreneurship/Small Business), GMGT (General Management), HRIR (Human Resource Management/Industrial Relations), INTB (International Business)
- 5.4 Interdepartmental Courses
Includes subjects: IDM (Interdisciplinary Management))
- 5.5 Marketing
Includes subjects: MKT (Marketing)
- 5.6 Supply Chain Management
Includes subjects: MSCI (Management Sciences), OPM (Operations Management), SCM (Supply Chain Management)

A detailed explanation of the requirements for each major may be found in Section 4.2.

The Co-operative Education Option is the only option that may be used to complete the Bachelor of Commerce (Honours) program. Complete details on the requirements for the Co-operative Education Option are found in Section 4.3.

1.3 Accreditation,
In 2009, the Asper School of Business received re-accreditation from AACSB International - The Association to Advance Collegiate Schools of Business.

In 2009, the Asper School of Business received accreditation from the SOA – Society of Actuaries.

These prestigious recognitions affirm the faculty’s commitment to the continuous improvement of its courses and programs. The mission of the Asper School of Business is to provide management education in Manitoba by creating and disseminating leading edge knowledge and developing skills relevant to current and future managers in organizations operating in a global environment.

SECTION 1: Degree Programs Offered

1.1 Degree Programs Offered,

Degree	Years to Complete	Total Credit Hours
Bachelor of Commerce Honours	4	120
Bachelor of Commerce Honours (Co-operative Education Option)	4.33+	120

NOTE: Students admitted prior to September 2011 should refer to the 2010-2011 Undergraduate Calendar for a description of their program requirements.

1.2 Available Majors and Option,
The following Majors may be used to complete the Bachelor of Commerce (Honours) program:

- Aboriginal Business Studies
- Accounting
- Actuarial Mathematics
- Undergraduate Studies

SECTION 2: Admission Requirements

2.1 Admission Requirements from High School and Previous Post-Secondary Institutions,
The following is a summary of the admission requirements for the Bachelor of Commerce (Honours.). Equivalent courses completed at other universities will be considered for admission and transfer credit only if the courses have been taken within the last 10 years. All admission requirements, as well as application deadline dates and forms, are included in the Applicant Information Bulletin that is available from the [Admissions Office](#), 424 University Centre. This information is also posted on the University of Manitoba’s website.

Direct Entry from High School

To be eligible to apply high school students must have:

- 1. Manitoba high school graduation, with five full credits at the Grade 12 level, in courses designated S (Specialized), G (General), or U (Dual Credit –University), with

2. A minimum 85% average over three courses: Pre-Calculus Math 40S or Applied Math 40S (Recommended Pre-Calculus 40S), English 40S, and one other 40S/U course, and

3. A minimum 60% in each of the three courses noted in point 2 above, and

4. Applicants may require a higher average than stipulated in point 2 to be successful in the annual competition for admission.

See Applicant Bulletin for complete details.

Track 1 Transfer Students

The following is a summary of the admission requirements for the Bachelor of Commerce (Honours.) for Track 1 transfer students. Equivalent courses completed at other universities will be considered for admission and transfer credit only if the courses have been taken within the last 10 years. All admission requirements, as well as application deadline dates and forms, are included in the Applicant Information Bulletin that is available from the Admissions Office, 424 University Centre. This information is also posted on the University of Manitoba's website.

Former Requirements (Prior to September 2011)

- Economics ECON 1200
- Mathematics MATH 1520 or MATH 1500 and Mathematics MATH 1310 or MATH 1300
- Psychology PSYC 1200 or Sociology SOC 1200
- A 3 or 6 credit hour course that satisfies the Written English ("W") requirement
- 0-3 credit hours of electives (depending on the chosen "W" course)

Minimum 24 credit hours completed by April 30. Although 24 credit hours is the minimum requirement for admission, a full year course load would require 30 credit hours; therefore, students only taking 24 credit hours for admission will need to pick up an extra 6 credit hours of course work once in the Asper School of Business.

*Students must achieve a minimum grade of "C" on each course listed above. Admission in this category is competitive.

See Applicant Bulletin for complete details.

New Requirements (as of September 2011)

- Economics ECON 1200 (6) or [ECON 1010 (3) and ECON 1020 (3)] (6)
- 6 credit hours from: Anthropology, History, Mathematics, Philosophy, Political Studies, Psychology, or Sociology (6)*
- Mathematics MATH 1520 or MATH 1500 (3)
- Statistics STAT 1000 (3)
- A 3 credit hour Written English ("W") course from a specific discipline (ARTS 1110, GMGT 1010 and GMGT 2010 are not considered to be from a specific discipline) (3)
- 3 credit hours of electives (3) **

Minimum 24 credit hours completed by April 30. Although 24 credit hours is the minimum requirement for admission, a full year course load would require 30 credit hours; therefore, students only taking 24 credit hours for admission will need to pick up an extra 6 credit hours of course work once in the Asper School of Business.

If students want to complete 30 credit hours in Year 1, students are recommended to take 6 credit hours from this suggested list of recommended courses: GMGT 1010 plus one of GMGT 2060, GMGT 2070 or MKT 2210.

* Courses chosen for this requirement must be independent from courses taken to fulfill other degree requirements.

Critical Thinking (Philosophy) PHIL 1290 is a preferred elective choice

Students must achieve a minimum grade of "C" on each course listed above. Admission in this category is competitive.

See Applicant Bulletin for complete details.

NOTE: For admission in September 2011, students must meet either the old admission criteria or the new criteria; a combination is not acceptable.

Track 2 Transfer Students

Applicants who are missing one or more of the Track 1/Foundation course requirements may apply under Track 2 provided they have met the following criteria: completed a minimum of 24 credit hours; achieved a minimum admission GPA of 3.1; and achieved a minimum grade of "C" on each course comprising the 24 credit hours. Track 2 applicants are encouraged to complete all outstanding Track 1/Foundation required courses during their first year after admission to the Asper School of Business.

Minimum 24 credit hours completed by April 30. Although 24 credit hours is the minimum requirement for admission, a full year course load would require 30 credit hours; therefore, students only taking 24 credit hours for admission will need to pick up an extra 6 credit hours of course work once in the Asper School of Business.

*Students must achieve a minimum grade of "C" on each course listed above. Admission in this category is competitive.

See Applicant Bulletin for complete details.

Priority for Admission

Admission to the Asper School of Business is limited to an annual quota. The quota will be filled by selecting students from a rank-ordered list of applicants in the following order:

For September 2011:

First Priority –Direct Entry from High School applicants.

Second Priority - Track 1 applicants with an AGPA of 2.60 or greater in descending order of AGPA. Thirty spaces are reserved for the Track 2 applicants with an AGPA of 3.10 or higher in descending order of AGPA.

Third Priority - Track 2 applicants (who are not already admitted under the Second Priority) with an AGPA of 3.10 or greater in descending order of AGPA.

Fourth Priority - Track 1 applicants with an AGPA of 2.00 - 2.59 in descending order of AGPA.

Both Track 1 applicants and Track 2 applicants may require an AGPA well in excess of the minimum to be successful in the annual competition for admission.

Other requirements

High school prerequisite: Grade 12 Pre-Calculus Mathematics 40S (or equivalent, with a minimum 60 %)

The Written English and Mathematics requirements are satisfied by Track 1/Foundation courses.

Minimum AGPA for consideration: 2.0 for Track 1 applicants; 3.1 for Track 2 applicants.

Admission to the Asper School of Business is limited to an annual quota and is competitive.

The Bachelor of Commerce (Honours) program does not have a Mature Student Category for admission.

All students seeking admission to the Bachelor of Commerce (Honours) program must first complete either the Direct Entry, Track 1 or Track 2 requirements.

All students planning to enter the Bachelor of Commerce (Honours) program must obtain a minimum of 60 per cent in Grade 12 Pre-Calculus Mathematics 40S (or equivalent) in order to complete all degree requirements.

The Bachelor of Commerce also has a Special Consideration Category.

See Applicant Bulletin for complete details.

Advance Standing: Transfer and Second Degree Students

Students who do not meet the eligibility requirements for admission after their first year of University can spend another year (or more) in another faculty, complete the eligibility requirements, and then apply (or re-apply) for admission. Students who complete additional course credits beyond the Track 1/Foundation or Track 2 requirements are eligible to receive applicable advance standing upon admission to the Asper School of Business.

The following regulations apply to students who must (or choose to) take more than one year to qualify for admission to the Asper School of Business.

All transfer and second degree students will be required to:

Meet the admission requirements of Track 1 or Track 2 in the year of application.

Complete all 120 credit hours required in the Bachelor of Commerce (Honours) program, including the 24 credit hours that comprise the specific Track 1/Foundation course requirements, the Core requirements, the course requirements for one Major, Business Options, and Elective courses. After admission to the Asper School, students in Track 2 must complete all outstanding courses listed in the Track 1/Foundation course requirements and achieve a minimum grade of "C" in each course.

Students who are admitted to the Asper School of Business who have completed more than the minimum 24 credit hours requirement of Track 1/Foundation course or Track 2 may be eligible to receive transfer credit for the additional work completed, provided the additional course work is creditable toward the degree requirements of the Bachelor of Commerce (Honours).

Students who are admitted to the Asper School of Business following the completion of another degree program are eligible to receive a maximum of 60 hours of transfer credit for applicable courses completed as part of their first degree. Students who, within their first degree, have more than 60 hours of transferable credits would be required to take substitute courses for credits in excess of the 60 hour limit on transfer.

Students who have a degree and in addition have completed further courses at the University of Manitoba which are applicable to the B. Comm.(Hons.) program that were not used for credit toward their first degree may receive additional transfer credit for that work.

Equivalent courses completed at other universities will be considered for admission and transfer credit only if the courses have been taken within the last 10 years.

Students are encouraged to contact a Undergraduate Program Advisor in the Undergraduate Program Office for information on how to optimize their transfer credit and advance standing.

See Applicant Bulletin for detailed information on admission requirements.

2.2 Admission Requirements from Joint Programs with Manitoba Colleges, The Asper School of Business has established Joint Programs with Red River College, Assiniboine Community College, University College of the North, and *fc*ole technique et professionnelle. Graduates of the Business Administration Diploma (University Stream) from these four colleges are eligible to apply directly to the Asper School of Business.

Successful applicants will receive block transfer credit for their courses completed in the Business Administration Diploma and are required to complete specified courses at the University of Manitoba in order to receive the Bachelor of Commerce (Honours) degree. Requirements for the Joint Programs are listed in [Section 4](#).

Admission to each Joint Program is limited to an annual quota and is competitive. Students must achieve a minimum grade point average of 3.00 on their Business Administration Diploma (University Stream) to be eligible for admission. Students must have graduated from the Diploma program within the last 5 years to be eligible for admission. Applicants are ranked in descending order of their grade point average and are admitted until the annual quota is met.

See Applicant Bulletin for detailed information on admission requirements.

SECTION 3: Academic Regulations

SECTION 3: Academic Regulations ,

All students are asked to note that some academic policies and regulations are under review and are subject to change. Please check the Undergraduate Program Office for updated information.

The provisions of the chapter, [General Academic Regulations and Requirements](#), and the chapter, [University Policies](#), apply to all students. In addition, the Asper School of Business has regulations and requirements, published below, which apply specifically to its students and to non-business students taking business courses.

3.1 Changes in Program Requirements,

Once students are admitted to the Asper School and have successfully completed any portion of the program, they will not be required to meet new course requirements subsequently stipulated for that portion of the program, whether the requirements be for the faculty or for an individual major.

NOTE: Students admitted prior to September 2011 should refer to the 2010-2011 Undergraduate Calendar for a description of their program requirements.

3.2 Evening Program,

The Asper School of Business does not offer an evening program. Although a limited number of business courses may be offered in evening time slots during both the Regular and Summer Sessions, it is not possible to complete all the course requirements of the Bachelor of Commerce (Honours) program without recourse to daytime attendance.

3.3 Management Minor for Non-Business Students,

The Management Minor consists of any 18 hours of credit in courses offered by the Asper School of Business. Entrance requirements and enrolment limits vary with a student's faculty of registration. Students planning to enrol in this minor should consult a student advisor in your home faculty.

3.4 Student Responsibility,

The Bachelor of Commerce (Honours) program undergoes changes from time to time. As a result, some changes in program structure, content and regulations may be made for the current and upcoming academic year. Specific program information for the regular program, the co-operative education program option, Joint Programs, and 2+2 Programs may be obtained from the Undergraduate Program Office.

Student's Responsibility

It is the responsibility of all students to ensure that they follow the program of study as outlined in their chosen Major and that they meet all the requirements as specified by the University of Manitoba and the Asper School of Business.

When you are registering for courses, it is your responsibility to ensure that you have satisfied all prerequisite and concurrent course requirements.

It is your responsibility to ensure you have registered for the correct courses to satisfy the requirements of the Bachelor of Commerce (Honours) degree.

Read course descriptions carefully to make sure you are not registered for a course that "May Not Be Held With" a course you have already taken. You will not be allowed to apply both courses toward your degree requirements.

NOTE: Students admitted prior to September 2011 should refer to the 2010-2011 Undergraduate Calendar for a description of their program requirements.

3.5 Prerequisite Requirements,

Prerequisite requirements must be met for entry into and continuance in the faculty.

Students must also meet all individual course prerequisites for further study in the program.

A passing grade is acceptable for prerequisite purposes for courses offered by the Asper School of Business unless a higher grade is called for in the course description.

3.6 Degree GPA Requirement for Graduation, Students Admitted in 2011 and Thereafter

Students admitted to the Asper School of Business in 2011 and thereafter must achieve a minimum degree GPA of 2.00 on all 120 credit hours required in the Bachelor of Commerce (Honours) degree program. Students must also achieve a passing grade of "D" or better in each course except for the individual courses required in the Track 1/Foundation course requirements that require a grade of "C" or better in each course.

All Track 1/Foundation courses, Core courses, Major courses, Business Options, and Electives applicable to the Bachelor of Commerce (Honours) degree requirements, as well as the grades achieved in each course, are transferred into the Asper School of Business and are included in the degree GPA.

NOTE: Students admitted prior to September 2011 should refer to the 2010-2011 Undergraduate Calendar for a description of their program requirements.

3.7 Calculation of the Cumulative GPA,

The computation of the cumulative GPA is the same as that described in the chapter, [General Academic Regulations and Requirements](#).

3.8 Residency Requirement, Undergraduate Studies

All Business students must complete a minimum of 60 credit hours at the University of Manitoba in order to satisfy the residence requirement of the Bachelor of Commerce (Honours) degree.

Students participating in approved International Exchange Programs may be exempt from the 60 credit hour requirement. Please consult with the Undergraduate Program Office for more details.

NOTE: Students admitted prior to September 2011 should refer to the 2010-2011 Undergraduate Calendar for a description of their program requirements.

Students considering completing course work at another university are referred to the chapter, General Academic Regulations and Policy, and the section on Letter of Permission.

3.9 Time Limit for Completion of the Degree,

The maximum period of eight years for completion of degree requirements will be reduced by one year for each block of 15 credit hours of advance standing received at the point of admission. This time limit applies to all students, whether full-time or part-time.

The maximum period for completion of degree requirements for students enrolled in the co-operative education option is currently under faculty review.

A student who does not complete all degree requirements within the time limit permitted will be required to withdraw from the faculty. Students may appeal to the Undergraduate Program Committee for a one year time extension; all appeals must be accompanied by a detailed letter explaining the student's circumstances and appropriate supporting documentation.

3.10 Maximum Number of Failures,

Each student in the Asper School of Business is permitted a maximum of 15 credit hours of failures. Students who exceed their limit of failures will be placed on Academic Suspension. Such students may enter the Reinstatement Program and should contact an Undergraduate Program Advisor in the Undergraduate Program Office for details.

3.11 Repeating, Substituting and Extra Courses, Maximum Limit Allowed

Each student will be permitted to repeat or substitute a maximum of 12 credit hours of previously passed courses, with a maximum of 6 credit hours per course within the regulations detailed below.

After completion of the approved course repeat or substitution, only the latest of the grades achieved will be included in the computation of the degree GPA.

Required Courses

A student who withdraws from a Core course or who obtains a grade of "F" in such a course should repeat that course during the following Fall or Winter Term. If a student repeats a course for which a grade was recorded, only the latest of the grades achieved will be included in the computation of the degree GPA. Therefore, if on repeating the course, the student does not complete the course successfully, a grade of "F" will be recorded for that course on the student's history.

Students may not substitute another course for a Core course.

Major Courses

Students who achieve a grade of "F" in a Major course must either repeat that course or substitute another Major course if the Major requirements permit an alternate

choice. Upon completion of the Major course, only the latest of the grades achieved will be included in the computation of the degree GPA. When a course is to be substituted, the student must seek the approval of the Undergraduate Program Office, in writing, prior to enrolling in the new course; failure to do so may result in a denial of the course substitution.

Electives and Business Options

Students who achieve a grade of “F” in an Elective or Option may either repeat that course or substitute another approved course in its place. Upon completion of the course, only the latest of the grades achieved will be included in the computation of the degree GPA. When a course is substituted for a failed Elective or Option, a student must request approval from the Undergraduate Program Office in writing prior to enrolling in the new course; failure to do so may result in a denial of the course substitution.

Voluntary Repeats

In order to improve their degree GPA, or to meet a prerequisite requirement, students may, with prior approval from the Undergraduate Program Office, voluntarily repeat any course in which a passing grade has been received, subject to any registration restrictions that may be published on the faculty website and subject to the limits imposed at the point of admission. Students must request approval from the Undergraduate Program Office prior to enrolling in the course; failure to do so may result in a denial of the course substitution.

After completion of the approved course repeat or substitution, only the latest of the grades achieved will be included in the computation of the degree GPA.

Extra Courses

Students who would like to take courses extra to their degree are permitted providing prior approval of the Undergraduate Program Office is obtained prior to registration. When a course is extra to the degree but a student would like to substitute the course for another already in the degree, the student must seek the approval of the Undergraduate Program Office, in writing, prior to enrolling in the new course; failure to do so may result in a denial of the course substitution.

3.12 Completing Two Majors (Second Major), Students Wishing to Complete Two Majors

Note the following Asper School of Business policy: “Students will not be given any registration priority for a second major.” The Asper School of Business cannot guarantee that you will obtain space in the courses you would like for a second major.

Students who have completed all the requirements or who have all the courses in registration for a major are not permitted to formally declare a different major unless there is space in the courses needed to complete the different major. Students are not permitted to declare a different major in order to obtain space in full courses.

3.13 Failure to Meet Requirements and the Suspension & Reinstatement Regulations,

Failure to meet the requirements for graduation within the limits specified above will result in the student being placed on Academic Suspension. Such students may enter the Reinstatement Program and should contact an Undergraduate Program Advisor in the Undergraduate Program Office for details.

Students in jeopardy should carefully monitor their first term results since they will be withdrawn from all second term Business courses if suspended, regardless of the date of official notification of the suspension.

Students who have been placed on Academic Suspension will only be considered for reinstatement into the Asper School of Business after the specific conditions of Undergraduate Studies

reinstatement have been met. Details concerning reinstatement are available from the Undergraduate Program Office.

3.14 Withdrawal from the Bachelor of Commerce (Honours) Program,

- A student who does not register for any courses in the Fall or Winter term after admission will cease to be a student in the Asper School of Business. Such students must re-apply for admission if that is desired and will have to meet the requirements for admission at the time of the new application.
- A student who registers for course work in the Fall or Winter term after admission but subsequently voluntarily withdraws from all course work may be permitted to re-register at any time thereafter, subject to all faculty policies and requirements as they existed at the time of first admission and completing a signed declaration of non-attendance at another post-secondary institution. Such students should be aware of the time limit for completion of the degree.
- A student who applies for transfer to another university program and subsequently registers for courses will cease to be a student in the Asper School of Business. Such a student must re-apply for admission if that is desired and will have to meet the requirements for admission at the time of the new application.

3.15 Withdrawal from Individual Courses,

Required Courses

Students in the Asper School of Business may withdraw without academic penalty from a required Core course provided they have not previously failed or withdrawn from that course and that they have met the Voluntary Withdrawal deadlines established by the university (see Deadline for Withdrawals in the Academic Schedule).

Electives and Business Options

Students may withdraw without academic penalty from an Elective or Option provided they do so before the final date for withdrawal (see Deadline for Withdrawals in the Academic Schedule).

Authorized Withdrawals

Authorized Withdrawals from courses after the registration revision period in each term may be granted on the basis of medical and compassionate grounds. A medical certificate signed by a physician or other appropriate professional must document medical grounds. Appeals based on compassionate reasons and circumstances must be supported by appropriate documentation. Students requesting Authorized Withdrawals should contact the Undergraduate Program Office.

3.16 Withdrawal from the Co-operative Education Option,

Students may be required to withdraw from the program for any of the following reasons:

- Failure to maintain the minimum academic requirements of the Asper School of Business,
- Failure to maintain the minimum credit hour requirements of the academic term in the co-op option,
- Unsatisfactory performance in the work place during a work term,
- Failure to observe the ethical standards of the Asper School and the University in place at the time; including being found guilty of academic dishonesty, or
- When, in the opinion of the Co-op Director and Faculty Advisor, the student does not exhibit sufficient qualities of ability, skills, aptitudes, attitudes, diligence or motivation to complete the program successfully.

Students who wish to withdraw voluntarily from the Co-op Program may do so by written letter to the Co-op Director at any time prior to accepting a position for a

work term. Any work term grades earned by the co-op student up to the date of the letter of withdrawal will stand.

Details for all continuing requirements or withdrawal procedures can be found in the Co-operative Education Option/Program Academic Regulations document.

3.17 Maximum Course Load/Minimum Course Load,
Students are not permitted to take more than 18 credit hours during an academic term without permission from the the Undergraduate Program Manager.

Students enrolled in the Co-operative Education Option are not permitted to take more than 3 credit hours during a co-operative work term.

Students enrolled in the Co-operative Education Option must register in a minimum of 9 credit hours between co-op work terms.

3.18 Course Selection and Requirements,
All students are limited to a maximum of six credit hours of IDM 4050 Readings in Management, IDM 4070 Management Research 1, and IDM 4080 Management Research 2. These courses are considered Business Options, rather than as part of any Major.

ACC 3050 Taxation Accounting, FIN 3270 Personal Financial Planning, FIN 3420 Security Analysis and FIN 3440 Real Estate Investments are also considered general Options. They are not part of any Major.

3.19 Eligibility Requirements for Awards,
To be eligible for the Dean's Honours List a student must complete a minimum of 12 credit hours of courses at the University of Manitoba during one academic term and achieve a term GPA of at least 3.50. Students participating in approved International Exchange Programs may be eligible for the Dean's Honour List.

To be eligible for most awards, a student must complete a minimum of 24 credit hours of courses at the University of Manitoba during an academic year consisting of consecutive Fall and Winter terms. Co-operative Education students are eligible to apply for most awards; please check the Asper Undergraduate Program web site and/or with the Financial Aid and Awards Office for more information on the eligibility requirements for Co-operative Education students.

The degree "With Distinction" will be awarded to all students graduating with the Bachelor of Commerce (Honours) Degree who attain a degree GPA of 3.80 or better on the following criteria: students admitted to the Asper School of Business in 2011 and thereafter will have their degree GPA determined on the basis of all courses which form a part of the 120 credit hours required in the four-year degree program.

The University Gold Medal in Business shall be awarded annually. The candidate for the one medal may be a graduate from either the Bachelor of Commerce (Honours) or the Bachelor of Commerce (Honours) [Co-operative Education Option]. Students graduating in October, February, and May are eligible for the Gold Medal in Business which shall be awarded annually at the spring convocation.

Students interested in the detailed terms of reference for the University Gold Medal in Business or who are interested in bursaries, awards and scholarships should contact the Undergraduate Program Office in Asper or the [University's Financial Aid and Awards Office](#).

3.20 Examination Regulations,
The faculty adheres to the General University Examination Regulations Policy. For particular examination regulations, including deferred examinations, pertinent to the Faculty, students are referred to the pamphlet, Examination Regulations for the Asper School of Business, available from the Undergraduate Program Office. The

faculty does not offer supplemental examinations. The faculty does not offer Challenge for Credit examinations.

3.21 Letter of Permission to Take Courses at Another University for Transfer of Credit,
Students wishing to complete courses at another institution for credit at the University of Manitoba will apply for written permission from the Registrar's Office prior to registering at the other institution. Students should apply for the Letter of Permission at least 4-6 weeks in advance. Information about "Studying at another University" and applying for a Letter of Permission are on the Registrar's web site at: umanitoba.ca/student/records.

To be eligible to take courses on a Letter of Permission, a Business student must:

- i) be applying to take a course not currently offered by Asper (when applying to take a course transferred as an Asper course) in the term for which they are applying and
- ii) have completed a minimum of 24 credit hours in the Asper School of Business in addition to any transfer credits received upon admission.

Grades achieved in courses taken on a Letter of Permission shall be transferred to the student's academic record and shall be included in the cumulative and degree GPA, but will not be included in a students term GPA.

3.22 Plagiarism, Cheating and Personation,
The Asper School of Business has adopted the Senate definition and policy on plagiarism, cheating and personation as described in the chapter, [General Regulations and Requirements](#). A student found guilty of participating in any of these activities is subject to serious academic penalty and possible prosecution under the Canadian Criminal Code.

3.23 Student Appeals of Academic Regulations,
Except as otherwise noted, student appeals should be directed to the Secretary of the Undergraduate Program Committee in the Undergraduate Program Office. The Committee considers appeals from Asper students who request special consideration in respect to rules and regulations governing their programs of study.

A certificate from an appropriate professional agency, such as the [University Counselling Service](#) or a licensed medical practitioner, should support appeals based on compassionate or medical problems.

3.24 Security of Academic Records,
The Asper School of Business has adopted supplementary criteria and procedures on access to student academic records to supplement the university policy on [Disclosure and Security](#) of Student Academic Records. Copies of these policies are available in the Undergraduate Program Office. (Currently under review.)

3.25 Transcripts and Degree Parchments,
Majors on Transcripts

After you graduate with your Bachelor of Commerce (Honours) degree, your formally declared major will appear on your University of Manitoba transcript. Your major will appear on your transcript once you have formally declared it on Aurora. Your major *will not* be listed on the Bachelor of Commerce (Honours) parchment.

If you complete the requirements of a second major within the credit hours required for the Bachelor of Commerce (Honours) degree, you may request that the second major also appear on your transcript after you graduate. See the Undergraduate Program Office in your graduating term to complete a request form.

Co-operative Education Option on Transcripts

If you have successfully completed the Co-operative Education Option, it will appear on your University of Manitoba transcript after you graduate with your Bachelor of Commerce (Honours) degree. The Co-operative Education Option will appear on your transcript once you have formally declared it on Aurora. Also, the Co-operative Education Option *will* appear on the Bachelor of Commerce (Honours) parchment.

SECTION 5.1 Accounting and Finance-Accounting Course Descriptions 1000 Level (ACC)

ACC 1100 Introductory Financial Accounting

(Lab required) Examination of accounting postulates underlying the preparation and presentation of financial statements.

ACC 1101 Introduction à la comptabilité financière

(L'ancien 009.110) Analyse des termes, des principes et des concepts utilisés dans la préparation d'états financiers. On ne peut se faire créditer à la fois le ACC 1101 et ACC 1100. Donnée au Collège de St. Boniface.

ACC 1110 Introductory Managerial Accounting

(Lab required). Role of accounting in creation and application of business information used by decision-makers in the management of enterprise. Prerequisite: ACC1100 (009.110) (D). Prerequisite or Concurrent Requirement: ECON 1010 (D) and ECON 1020 (D) or the former ECON 1200 (018.120) (D).

ACC 1111 Introduction à la comptabilité de management

(L'ancien 009.111) L'importance des méthodes comptables dans la gestion de l'information utilisées par la direction d'une entreprise. Préalable: ACC1101 (D) ou ACC 1100 (D) (ou 009.110) (D). Préalable ou concomittant: [ECON 1200 (D) ou ECON 1201 (D) (ou 018.120) (D)] ou [ECON 1010 (D) et ECON 1020 (D) ou ECON 1021 (D)]. Donnée au Collège de St. Boniface.

SECTION 5.2 Accounting and Finance-Accounting Course Descriptions-2000 Level (ACC)

ACC 2010 Intermediate Accounting - Assets

(Formerly 009.201) Accounting policies and practices dealing with calculation and measurement of assets and related reporting problems. Prerequisite: ACC 1100 (or 009.110) (C+).

ACC 2011 Comptabilité intermédiaire-Actifs

Cadre théorique de la comptabilité relatif aux principes et procédures d'analyse et mesure des actifs. Analyse comptable approfondie des postes de l'actif: encaisse, créances, stocks, placements, immobilisations corporelles et incorporelles et amortissement. Préalable: ACC 1101 (ou l'ancien 009.110) avec une note minimal de C+.

ACC 2020 Intermediate Accounting - Equities

(Formerly 009.202) Consideration of current accounting relating to equities with attention to the accounting treatment of current and long-term liabilities, income tax allocation, share capital, and surplus. Students may not hold credit for both ACC 2020 (or 009.202) and FIN 3250 (or 009.325). Prerequisite: ACC 2010 (or 009.201) (D).

ACC 2021 Comptabilité intermédiaire - Capitaux propres et Passifs

Cadre théorique de la comptabilité relatif aux capitaux propres avec une considération du traitement comptable des passifs à court et à long termes, régimes de retraite, locations impôts sur les bénéfices, actions, droits, etc. Modifications comptables. Préalable: ACC 2011 (ou l'ancien 009.201).

SECTION 5.3 Accounting and Finance-Accounting Course Descriptions-3000 Level (ACC)

ACC 3030 Advanced Accounting

(Formerly 009.303) Topics include: partnerships, consolidations, mergers, reporting on conglomerates, and fund accounting. Not offered every year. Prerequisites: ACC 2010 (or 009.201) (D) and ACC 2020 (or 009.202)(D) or approval of department head.

ACC 3040 Cost Accounting

(Formerly 009.304) Study of accounting concepts and functions as they relate to product costing, planning, control, and decision-making. Prerequisite: ACC 1110 (or 009.111) (C+).

ACC 3041 Compatibilité de coûts

Utilité de la comptabilité de management et prise de décision, concepts de coûts, systèmes de coûts, budgets, contrôle budgétaire, gestion décentralisée, analyse de la performance financière. Préalable: ACC 1111 (ou l'ancien 009.111).

ACC 3050 Taxation Accounting

(Formerly 009.305) Structure and concepts of the Canadian tax system, emphasis on current tax practices. Prerequisite: ACC 1100 (or 009.110) (C+).

ACC 3530 Accounting Information Systems

(Formerly 009.353) Role of accounting systems in total management information systems; design and installation of accounting systems. Prerequisites: ACC 1110 or ACC 1111 (or 009.111) (D) and MIS 2000 or MIS 2001 (or 009.200)(D).

SECTION 5.4 Accounting and Finance-Accounting Course Descriptions 4000 Level (ACC)

ACC 4010 Auditing

(Formerly 009.401) Study of philosophy and concepts of auditing, legal and ethical responsibilities of the auditor, basic techniques of auditing including statistical sampling and flowcharting, and the operational audit. Prerequisites: [ACC 2010 (or 009.201) and ACC 2020 (or 009.202) (D)] or approval of department head.

ACC 4030 Accounting Theory

(Formerly 009.403) Examination of principles and postulates of accounting theory. Coverage of selected topics will vary from year to year depending on interests of course participants. Prerequisites: ACC 2010 (or 009.201) (D) and FIN 2200 (or 9.220) (D). Prerequisite or Concurrent Requirement: ACC 2020 (or 009.202) (D).

ACC 4031 Théorie comptable

Évolution de la théorie comptable, processus de normalisation et influence du milieu sur son cheminement, étude des modèles de mesure des bénéfices, théorie d'agence, hypothèse de l'efficience des marchés de capitaux, etc. Préalable: ACC 2011 (ou l'ancien 009.201) et ACC 2021 (ou l'ancien 009.202) ou avec l'approbation du représentant de secteur.

ACC 4040 Advanced Managerial Accounting

(Formerly 009.404) A critical examination of managerial accounting techniques and the controllership function. Prerequisite: ACC 3040 (or 009.304) (D).

SECTION 5.5 Accounting and Finance-Finance Course Descriptions 2000 Level (FIN)

FIN 2200 Corporation Finance

An introduction to corporate finance regarding the allocation & acquisition of funds. Topics include: discounted cash flows, capital budgeting, financial instruments, cost of capital, risk-return trade-offs, market efficiency, capital structure and the use of derivatives. Prerequisite: [ACC 1100 (or 009.110) (D)] and [MATH 1500 or MATH 1520 (C)] and [STAT 1000 or STAT 1001 (C)] and [ECON 1010 (C) and ECON 1020 (C) or the former ECON 1200 (or 018.120) (C)].

FIN 2201 Gestion financière

(L'ancien 009.220) Introduction aux principes de la gestion financière de l'entreprise en particulier dans le choix du financement, le choix de l'investissement et la gestion des fonds. Préalables; [ACC 1101 (D) ou ACC 1100 (D) (009.110) (D)] [MATH 1500 (C) ou MATH 1501 (C) ou MATH 1520 (C)] [STAT 1001 (C) ou STAT 1000 (C) (005.100) (C)] et [(ECON 1201 (C) ou ECON 1200 (C) (018.120) (C)) ou [(ECON 1010 (C) ou ECON 1011 (C) et ECON 1020 (C)) ou (ECON 1021 (C))].Donnée au Collège de St. Boniface.

SECTION 5.6 Accounting and Finance-Finance Course Descriptions 3000 Level (FIN)

FIN 3250 Financial Statement Analysis

(Formerly 009.325) A study of the methods and techniques used for interpretation of annual financial reports and the significance of alternative accounting policies on

reported income. Students may not hold credit for both FIN 3250 (or 009.325) and ACC 2020 (or 009.202). Prerequisite: ACC 1100 (or 009.110) (D).

FIN 3270 Personal Financial Planning

(Formerly 009.327) An introduction to financial planning techniques used in professional practice. Topics include financial assessment, income tax planning, risk management, insurance, debt and credit management, investments, retirement planning, and estate planning. Prerequisite: FIN 2200 (or 009.220) (D).

FIN 3400 Investment Banking

(Formerly 009.340) The practice and theory of investment banking including valuation, initial public offerings, mergers and acquisitions, and restructuring. Prerequisite: FIN 2200 (or 009.220) (C+).

FIN 3410 Investments

An introduction to investment analysis and modern portfolio theory. Topics include equilibrium in the capital markets, fixed income securities, equities and derivative instruments. Prerequisite: [FIN 2200 (or 009.220) (C+)] and [MATH 1300 or MATH 1310 (C)] and [STAT 2000 (C)].

FIN 3420 Security Analysis

This course provides a practical application of techniques to analyse a company for investment purposes and evaluate purchases of stock and fixed-income securities. Topics include financial statement analysis, ratio analysis, alternative methods for forecasting corporate profits and dividends, risk assessment, and valuation techniques. Prerequisites: FIN 2200 (or 009.220) (C+).

FIN 3440 Real Estate Investments

An introduction to real estate finance. Topics include valuation, financing, transaction, tax and legal issues. Prerequisite: FIN 2200 (or 009.220) (C+).

FIN 3450 International Finance

An introduction to the theory of comparative advantage, foreign exchange markets, international parity relations, international debt and equity markets, international debt operating exposures, and international capital budgeting. Prerequisite: FIN 2200 (or 009.220) (C+).

FIN 3451 Finance Internationale

(Ancien 009.345) Introduction à l'étude des aspects internationaux du financement d'une compagnie et des marchés internationaux de capitaux. Préalable: FIN 2201 (ancien 009.220) avec une note minimale de C+.

FIN 3460 Financial Markets and Institutions

A study of financial systems with emphasis on Canada. Major topics include monetary policy, financial markets, financial institutions, financial regulation and risk management. Students may not hold credit for both FIN 3460 (or 009.346) and ECON 3640 (or 018.364). Prerequisite: [FIN 2200 (or 009.220) (C+)] and [MATH 1300 or MATH 1310 (C)] and [STAT 2000 (C)].

FIN 3470 Small Business Finance

(Formerly 009.347) Study of the financial issues faced by small business enterprises. Prerequisite: FIN 2200 (or 009.220) (D).

FIN 3480 Corporate Finance Theory and Practice

Intermediate Corporate Finance including the following topics: Capital budgeting theory and techniques, determination of relevant cost of capital, capital structure, dividend policy, leasing and other special topics. Prerequisite: [FIN 2200 (or 009.220) (C+)] and [MATH 1300 or MATH 1310 (C)] and [STAT 2000 (C)].

SECTION 5.7 Accounting and Finance-Finance Course Descriptions-4000 Level (FIN)

FIN 4230 Selected Topics in Finance

(Formerly 009.423) A study of current issues in finance. Topics considered will depend on the interests and needs of the participants. Prerequisite: FIN 2200 (or 009.220) (C+).

FIN 4260 Advanced Finance Theory

(Formerly 009.426) Theories that provide the foundation for modern corporate finance. Empirical tests of finance theories. Implications for managers. Prerequisites: FIN 3410 (or 009.341) (D) and FIN 3480 (or 009.348) (D).

FIN 4270 Options and Futures

Mechanics of futures, options and swaps markets. Topics include arbitrage, hedging, forward rate agreements, models of derivative valuation and value-at-risk. Prerequisite: FIN 3410 (or 009.341) (D).

FIN 4400 Financial Management Practices

Application of theoretical models in finance to real-world problems using cases. Topics include working capital management, long-term investment and financing decisions, valuation, risk management, reorganizations and international financial management. Prerequisite: FIN 3480 (or 009.348) (D).

SECTION 5.8 Accounting and Finance-Management Info Systems Course Descriptions 2000 Level (MIS)

MIS 2000 Information Systems for Management

(Lab required) Introduction to information systems in organizations, systems development/acquisition, and management issues concerning information technology in organizations.

MIS 2001 Les systèmes d'information de gestion

(L'ancien 009.200) Introduction aux systèmes d'information dans les organisations, au développement et à l'acquisition des systèmes et à la gestion des systèmes d'information. Préalable: ACC 1100 (D) ou ACC 1101 (D) (009.110) (D)] ou l'autorisation écrite du professeur ou de la professeure. Donné au Collège de St. Boniface

SECTION 5.9 Accounting and Finance-Management Info Systems Course Descriptions 3000 Level (MIS)

MIS 3500 Database Management Systems

(Formerly 009.350) Designing, developing and managing database systems, by using mainstream design methodologies and popular development tools. Prerequisites: [MIS 3510 (or 009.351) (D)] and [COMP 1010 (or 074.101) (C)].

MIS 3510 Systems Analysis and Design

(Formerly 009.351) Analyzing business tasks, processes, information and information technology, and designing information systems by employing methodologies, techniques and popular software used by information systems professionals. Prerequisites: MIS 2000 (or 009.200) (C+).

MIS 3520 Data Communications and Networking

(Formerly 009.352) A study of basic data communications topics, including communication media, protocols, network security, network topologies (local and wide area networks), Web development and network management issues. Prerequisite: MIS 2000 (or 009.200) (C+).

SECTION 5.10 Accounting and Finance-Management Info Systems Course Descriptions 4000 Level (MIS)

MIS 4250 Advanced Topics in Management Information Systems

(Formerly 009.425) A study of current issues in MIS. The topics for this course will vary over time, depending on student interests, faculty interests, and student demand. Not offered every year. Prerequisite: consent of instructor.

MIS 4500 Management Information Systems Strategy

(Formerly 009.450) A survey of the various issues associated with managing information as a resource. Explores MIS planning frameworks and tools, and the linkages between information systems, organizational structure and organizational strategy. Prerequisites: at least two of the following: (Formerly 009.450) A survey of the various issues associated with managing information as a resource. Explores MIS planning frameworks and tools, and the linkages between information systems, organizational structure and organizational strategy. Prerequisites: at least two of the following: ACC 3530 (or 009.353) (D), MIS 3500 (or 009.350) (D), MIS 3510 (or 009.351) (D), MIS 3520 (or 009.352) (D), MIS 4250 (or 009.425) (D).

SECTION 5.11 Warren Centre for Actuarial Studies Course Descriptions 2000 Level (ACT)

ACT 2020 Economic and Financial Applications

(Formerly 010.202) A synthesis of macroeconomic issues, quantitative aspects of finance using interest theory, and insurance economics. Prerequisite: ACT 2120 (or

010.212) (C+).

ACT 2120 Interest Theory

The application of calculus and probability to discrete and continuous interest functions. Key topics are the measurement of interest, present and accumulated values, and annuities. May not be held with the former 010.212 or 010.232 or ACT 3320 (or 010.332). Prerequisite: MATH 1690 (or 136.169) (B) or MATH 1700 or MATH 1701 (or 136.170) (B) or MATH 1710 (or 136.171) (B). Prerequisite or Concurrent Requirement: [MATH 2750 (or 136.275) (D) or MATH 2720 (or 136.272 or 136.270) (D) or MATH 2730 (or 136.273 or 136.271) (D)] and STAT 2400 (C).

ACT 2210 Introduction to Risk Management

(Formerly 010.221) Mathematical tools for the quantitative assessment of risk and their application to problems encountered in risk management. Prerequisite: MATH 1700 (or 136.170) or MATH 1690 (or 136.169) (D). Prerequisite or Concurrent Requirement: [MATH 2750 (or 136.275) (D) or MATH 2730 (or 136.273 or 136.271) (D)] and [STAT 2000 or 005.200) (D)]; or consent of instructor.

ACT 2321 Mathématiques financières

L'étude de l'intérêt composé et des rentes discrètes et continues; équations de valeur, analyse de fonds; détermination de taux de rendement; construction de tables. L'étudiant (e) ne peut se faire créditer à la fois le 010.232 et le 010.332. Donné au Collège de St. Boniface. Préalable: MATH 1500 ou MATH 1501 (ou 136.150) (D) ou MATH 1520 (ou 136.152) (D), ou l'équivalent.

SECTION 5.12 Warren Centre for Acturial Studies Course Descriptions 3000 Level (ACT)

ACT 3130 Actuarial Models 1

(Formerly 010.313) Elementary concepts respecting the quantification of the financial impact of contingent payments. May not be held with the former 010.347. Prerequisite: ACT 2120 (or 010.212) (C+). Prerequisite or Concurrent Requirement: /STAT 3400 (or the former STAT 3500 or 005.350) (D).

ACT 3230 Actuarial Models 2

(Formerly 010.323) Intermediate and advanced concepts respecting the quantification of the financial impact of contingent payments. Not to be held with the former 010.348. Prerequisite: ACT 3130 (or 010.313) (C+). Prerequisite or Concurrent Requirement: STAT 3400 (or the former STAT 3600 or 005.360) (D).

ACT 3330 Actuarial Models 3

(Formerly 010.333) Frequency and Severity Models, Compound Distribution Models, Ruin Models. May not be held with the former 010.448 Topic Risk Theory. Prerequisite: ACT 3130 (or 010.313) (C+). Prerequisite or Concurrent Requirement: ACT 3230 (or 10.323) (D).

ACT 3340 Financial Derivatives for Actuarial Practice

Introduction of interest rate models and rational valuation of derivative securities. Prerequisite: ACT 2020 (C+) or consent of instructor.

ACT 3530 Actuarial Models 4

(Formerly 010.353) Survival Models, Stochastic Process Models, and Simulation Models. May not be held with the former 010.447. Prerequisite: ACT 3130 (or 010.313) (C+). Prerequisite or Concurrent Requirement: ACT 3230 (or 10.323) (D).

SECTION 5.13 Warren Centre for Acturial Studies Course Descriptions 4000 Level (ACT)

ACT 4000 Advanced Actuarial Topics

(Formerly 010.400) A selection of advanced topics of current actuarial interest. Prerequisite: ACT 3230 (or 010.323) (D).

ACT 4060 Actuarial Aspects of Investment Practice

(Formerly 010.406) This course examines stochastic interest rates and tools and techniques for coping with general product issues in asset/liability management. May not be offered every year. Students may not hold credit for both ACT 4060 (or 010.406) and the former 010.448 Topic Asset/Liability Management. Prerequisites: [FIN 2200 (or 009.220) (C+)] and [FIN 3410 (or 009.341) (D)], or consent of instructor.

ACT 4140 Actuarial Modeling Methods 1

(Formerly 010.414) Estimation and Fitting of Survival Models. May not hold credit with the former 010.448 Topic Survival Models. Prerequisite: STAT 3800 (or the former STAT 3600 or 010.323) (D).

ACT 4150 Pension Mathematics

(Formerly 010.415) Actuarial applications for defined benefit pension plans. Actuarial cost methods, funding levels, operation of pension plans from an actuarial perspective. Students may not hold credit with ACT 7550 (or 010.755). May not be offered every year. Prerequisite: ACT 3230 (010.323) (D).

ACT 4240 Actuarial Modeling Methods 2

(Formerly 010.424) Estimation and Fitting of Frequency and Severity Models. May not be offered every year. Prerequisite: ACT 3330 (or 010.333) (D).

ACT 4250 Managing Insurance Operations in the International Business Environment

Introduction of the risks inherent in insurance products and assets, as well as the relationships between assets and liabilities across the entire operations of the global insurance enterprise. Prerequisites: FIN 2200 (C+) or consent of instructor.

ACT 4340 Actuarial Modeling Methods 3

(Formerly 010.434) Classical, Bayesian and Buhlmann Credibility Models. The connection between Credibility Theory and Experience Rating. Underlying assumptions for the different methods. Simulation in Estimating and Fitting Actuarial Models. May not hold credit with the former 010.488 Topic Credibility Theory. May not be offered every year. Prerequisite: ACT 4140 (010.424) (C+).

SECTION 5.14 Business Administration-Entrepreneurship/Small Business Course Descriptions 2000 Level (ENTR)

ENTR 2010 Managing the Smaller Business

Small firms dominated the Canadian economic scene and contribute to the nations' economic welfare in a major way but pose different managerial issues and problems for their owner/managers than larger organizations. This course will focus specifically on how to effectively manage and grow the smaller firm. Students may not hold credit for both ENTR 2010 and ENTR 3100. This course is not open to students in the Asper School of Business. This course is not for students who will pursue a major in Entrepreneurship/Small Business. U1 students may take this course.

ENTR 2020 Starting a New Business

This is a course for students in all Faculties who may wish to start a business of their own at some time or assess their potential for such an option. It will cover a broad range of topics to increase your understanding of what it takes to succeed in an entrepreneurial career. Students may not hold credit for both ENTR 2020 and ENTR 4100. This course is not open to students in the Asper School of Business. This course is not for students who will pursue a major in Entrepreneurship/Small Business. U1 students may take this course.

SECTION 5.15 Business Administration-Entrepreneurship/Small Business Course Descriptions 3000 Level (ENTR)

ENTR 3100 Small Business Management

(Formerly 118.310) An appreciation of the primary issues that should be considered in starting and managing a small business within the Canadian context. Students may not hold credit for both ENTR 3100 and ENTR 2010. Prerequisites: ACC 1100 (or 009.110) (D), and MKT 2210 (or 118.221) (D), and GMGT 2060 (GMGT 2080 or 027.208) (D)].

ENTR 3102 Technological Entrepreneurship

An overview of the inter-relationship between technology and entrepreneurship. An appreciation of the role of technical entrepreneurship in the economy, how a technology strategy is developed, implemented and defended as well as the societal implications of technological entrepreneurship. Prerequisite: MKT 2210 (or 118.221) (D).

ENTR 3104 Selected Topics in Small Business/Entrepreneurship

A study of selected areas of recent development related to small business/entrepreneurship. Topics may include innovation and creativity, venture financing, opportunity identification and recognition, franchising and entry

strategies of new business. Prerequisite: [MKT 2210 (118.221) (D)] and [GMGT 2060 (D) or GMGT 2080 (027.208) (D)].

ENTR 3106 Family Business Management

An examination of the unique challenges inherent in the management of a family business. Topics include founder relinquishment, the need for succession planning and firm regeneration, the core actors and their issues, ownership structure and estate planning. Prerequisite: GMGT 2060 (D) or GMGT 2080 (027.208) (D).

SECTION 5.16 Business Administration-Entrepreneurship/Small Business Course Descriptions 4000 Level (ENTR)

ENTR 4100 New Venture Analysis

A project oriented course focusing on the identification and evaluation of viable new venture concepts and their associated risks, problems, and opportunities. Students may not hold credit for both ENTR 4100 and ENTR 2020. Prerequisites: MKT 2210 (or 118.221) (D) and ACC 1110 (or 009.111) (D) and [GMGT 2060 (D) (or GMGT 2080 (or 027.208) (D)].

ENTR 4511 Entrepreneurship et création d'entreprises

(L'ancien 118.451) Ce cours porte sur la création d'entreprise. Lancement d'entreprise; caractéristiques de l'entrepreneur; plan d'entreprise; définition du projet; détermination du marché; fonctions administratives; problèmes particuliers au lancement d'entreprise, aide gouvernementale. On ne pourra se faire créditer ce cours avec le ENTR 4100 (ou 118.410). Donné au Collège de St. Boniface. Préalable: ACC 1100 (ou 009.110) (D) et MKT 2210 (ou 118.221) (D), et [GMGT 2030 (ou 027.203) (D) ou GMGT 2080 (ou 027.208) (D)].

SECTION 5.17 Business Administration-General Management Course Descriptions 1000 Level (GMGT)

GMGT 1010 Business and Society

The course will provide over arching frameworks to examine the nature, role, and importance of business in society. Key internal operations of business organizations will be discussed (e.g., finance, marketing, operations), but the majority of the course examines the relationships that business firms must balance among key stakeholders in their external environment (i.e., government, owners, customers, communities, suppliers, future generations, etc.). Students will examine various institutional contexts (e.g., economic, political-legal, and socio-cultural) and critically think about relationships between business and society, mindfully considering alternative approaches to management. Special emphasis will be placed on contemporary social issues in business (e.g., sustainable development, corporate social responsibility).

GMGT 1011 Les entreprises et la société

Analyse de la nature, du rôle, de l'impact et de l'importance des entreprises dans la société. Les activités internes des entreprises (ex. finances, marketing, opérations) seront discutées, mais la majorité du cours étudiera des relations entre les entreprises et les parties prenantes clés dans l'environnement externe (y inclut les gouvernements, les propriétaires, les clients, les communautés, les fournisseurs, et les générations à venir). Le étudiant et les étudiantes examineront les contextes institutionnels variés (ex. économiques, politico-légaux, et socioculturels) et appliqueront la pensée critique aux relations entre entreprises et la société, avec considération des modèles alternatifs de gestion. Accent sur les sujets sociaux contemporains en management (ex. le développement durable, la responsabilité sociale des entreprises). On ne peut se faire créditer à la fois le GMGT 1010.

SECTION 5.18 Business Administration-General Management Course Descriptions 2000 Level (GMGT)

GMGT 2010 Business Communications

The course provides an introduction to theoretical, cultural, and ethical bases of effective communication. Another goal is to develop students' interpersonal, oral, and written communication skills at individual, group, and organizational levels. The students will also develop analytical, problem-solving, rhetorical, and critical thinking abilities required in organizational and business settings. Students are strongly recommended to take GMGT 2010 in their first 30 credit hours in Asper. Not to be held for credit with GMGT 2000.

GMGT 2011 Business Communications

This course provides an introduction to theoretical, cultural and ethical bases of

effective communication. Another goal is to develop students' interpersonal, oral and written communication skills at individual, group and organizational levels. The students will also develop analytical, problem-solving, rhetorical and critical thinking abilities required in organizational and business settings. Students are strongly recommended to take GMGT 2011 in their first 30 credit hours in the BAA program. Not to be held for credit with GMGT 2001 (ancien 027.201), GMGT 2000 (ancien 027.200) or GMGT 2010.

GMGT 2030 Administrative Theory

(Formerly 027.203) Examination of the underlying principles concerning internal management of organizations. Emphasis on the study and analysis of various theoretical approaches to management. This course is not open to students registered in the Asper School of Business. Students may not hold credit for both GMGT 2030 (or 027.203) and GMGT 2060 (formerly GMGT 2080 or 027.208) or GMGT 2070 (or 027.207).

GMGT 2036 Introduction to Business 2 Inter-University Services course.

GMGT 2060 Management and Organizational Theory

Examination of the underlying principles concerning the formation of organizations and their internal management. Emphasis on the study and analysis of various theoretical approaches to organization theory and management. Prerequisite: GMGT 1010 (D). Students cannot hold for credit with GMGT 2080 (027.208) or GMGT 2030 (027.203).

GMGT 2061 Management et théorie des organisations

Analyse des principaux concepts qui sous-tendent la formation des organisations et leur gestion interne. L'accent est mise sur l'analyse des différentes approches théoriques relatives à la théorie des organisations et au management. On ne peut se faire créditer à la fois le GMGT 2061 et un des cours suivants: GMGT 2060, GMGT 2081, GMGT 2080, GMGT 2030. Préalable: GMGT 1011 ou GMGT 1010.

GMGT 2070 Introduction to Organizational Behaviour

(Formerly 027.207) Examination of the impact of human behaviour on the formal and informal organization. Topics include leadership, work groups, organizational conflict, and communications. Prerequisites: GMGT 1010. Students cannot hold for credit GMGT 2070 (or 027.207) and GMGT 2030 (or 027.203).

GMGT 2071 Introduction au comportement organisationnel

(L'ancien 027.207) Analyse de l'impact du comportement humain sur l'organisation formelle et informelle. Les sujets traités sont le leadership, les groupes de travail, les conflits au sein de l'organisation et la communication. Préalable: GMGT 1011 ou GMGT 1010. Donné au Collège de St. Boniface.

GMGT 2081 Introduction au management et à la théorie de l'organisation

(L'ancien 027.208) Analyse des principaux concepts régissant la formation d'organisations et leur gestion interne. L'accent est mis sur l'analyse de différentes approches théoriques concernant l'organisation et sa gestion. L'étudiant (e) ne peut se faire créditer à la fois le GMGT 2080 (ou 027.208) et le GMGT 2030 (ou 027.203). Donné au Collège de St. Boniface.

GMGT 2120 Business/Government Relations

(Formerly 027.212) Analysis of the interaction between business firms and government in the creation, modification, and implementation of government policies that affect business. Study of the ways business can influence government decision-making. Prerequisite: [ECON 1010 (D) and ECON 1020 (D)] or ECON 1200 (or 018.120) (D).

GMGT 2121 Les entreprises et le gouvernement

(L'ancien 027.212) Analyse des rapports entre le gouvernement et les entreprises au niveau de la conception, de la modification et de la mise en place des politiques gouvernementales affectant l'entreprise. Analyse des moyens dont disposent les entreprises pour influencer la prise de décision des gouvernements. Donné au Collège de St. Boniface. Préalable: ECON 1200 ou ECON 1201 ou 018.120) (D).

GMGT 2141 Introduction aux communications

(L'ancien 027.214) Communication orale dans le milieu des affaires. Rédaction de documents écrits venant appuyer les activités d'écoute et de parole. Apprentissage des connaissances grammaticales, syntaxiques et lexicales. Apprendre à s'exprimer

en public. Donné au Collège de St. Boniface.

SECTION 5.19 Business Administration-General Management Course Descriptions 3000 Level (GMGT)

GMGT 3010 Management Decision-Making

(Formerly 027.301) The decision-making process and factors that enter into making the decisions, including the objectives and approaches to decision-making, the basic type of managerial decisions, and exemplification of decision in operations.

Prerequisites: [GMGT 2060 (GMGT 2080 or 027.208) (D)] and GMGT 2070 (or 027.207) (D).

GMGT 3020 Seminar in Administration

(Formerly 027.302) Selected problem areas and issues as they relate to administration of complex organizations. Prerequisites: [GMGT 2060 (or GMGT 2080 (027.203) (D) or GMGT 2080 (or 027.208) (D))] and GMGT 2070 (or 027.207) (D), or consent of instructor.

GMGT 3030 Contemporary Social Issues in Business

Study of key issues in the relationship of business organizations and society with emphasis on the impact of management. Prerequisites: [GMGT 2060 or former GMGT 2080 (or 027.208) (D)] and GMGT 2070 (or 027.207) (D).

GMGT 3080 Issues in Technological Change

(Formerly 027.308) Analysis of the nature of invention and innovation including human, financial, economic, and legal factors. Social implications of innovation. Public policy towards research, invention, and innovation.

GMGT 3160 Managerial Economics

(Formerly 027.316) Principles and techniques of managerial economics with applications from business and the public sector. Prerequisite: [ECON 1010 and ECON 1020] or ECON 1200 (or 018.120) (D) or equivalent.

GMGT 3170 Administration of the Public Sector

(Formerly 027.317) Application of contemporary concepts of the administrative process: approaches and problems involved in performing managerial functions in public sector organizations with emphasis on socio-political issues. Prerequisite: GMGT 2060 (or GMGT 2080 or 027.208) (D).

GMGT 3300 Commercial Law

(Formerly 027.330) General history of law, the organization of courts, the Canadian Constitution, federal and provincial legislative functions. Legal concepts and problems relating to business organization, contracts, principal and agent, negotiable instruments, common torts, and bankruptcy proceedings.

GMGT 3301 Droit commercial

(L'ancien 027.330) Sommaire historique du droit, l'organisation des tribunaux, la constitution du Canada, les attributions législatives du gouvernement fédéral et des assemblées provinciales. Notions juridiques et problèmes attendant à l'organisation des entreprises, la rédaction des contrats, le mandant et le mandataire, les effets négociables, les débits et les procédures de faillite. Donné au Collège de St. Boniface.

GMGT 3500 Communications: Contextual Applications

(Formerly 027.350) This course is designed to introduce students to basic linguistically specialized areas of typical business and administrative settings. Course offered at St. Boniface College.

GMGT 3561 Séminaire en management

(L'ancien 027.356) Analyse de la gestion d'organisation: Réflexion critique sur des sujets d'actualité pertinents. L'étudiant(e) ne peut se faire créditer à la fois le GMGT 3560 (ou 027.356) et le GMGT 3020 (ou 027.302). Donné au Collège de St. Boniface. Préalable: GMGT 2080 (ou 027.208) (D) et GMGT 2070 (ou 027.207) (D) ou le consentement du professeur.

GMGT 3581 Éthique et responsabilité sociale

(L'ancien 027.358) Le rôle social de l'entreprise. L'environnement interne et externe de l'entreprise; les problèmes sociaux et les activités de responsabilité sociale; l'éthique professionnelle du gestionnaire contemporain, la comptabilité sociale; les groupes défavorisés; etc. Donné au Collège de St. Boniface. Préalable: GMGT 2070 (ou 027.207) (D).

SECTION 5.20 Business Administration- General Management Course Descriptions 4000 Level (GMGT)

GMGT 4010 Administrative Policy

(Formerly 027.401) Studies of policies available to business enterprise; with case studies to focus attention on problems involved in formulating and administering policies with interdisciplinary considerations. Take only in final term of program or with consent of department head. Prerequisite: prior to being admitted to GMGT 4010, students must be in Year 4, in the final term prior to graduation in the Asper School and have successfully completed (with a minimum grade of (D) in each course) all 30 credit hours of courses specified in Year 2 of the 4-Year Program. Prerequisite or Concurrent Requirement: all remaining core courses specified in Year 3 and 4 of the 4-Year Program (with a minimum grade of (D) in each course).

GMGT 4011 Gestion stratégique des organisations

(L'ancien 027.401) Étude de la gestion stratégique des organisations. L'étude de cas permettra à l'étudiante ou à l'étudiant d'intégrer les connaissances acquises tout en mettant l'accent sur les questions qui entourent l'élaboration des stratégies et la gestion des politiques établies. Ce cours ne sera suivi qu'à la fin du programme ou avec l'autorisation écrite du professeur ou de la professeure. Donné au Collège de St. Boniface.

GMGT 4040 Advanced Organization Theory and Behaviour

(Formerly 027.404) An analysis of the human and structural aspects of organizations and how their interrelationship influences organizational performance. Topics covered include leadership, motivation, conflict, and organizational politics. The influence of technology, size, and the external environment on organizational structure is also examined. Prerequisite: [GMGT 2060 (D) or GMGT 2080 (or 027.208) (D)] and GMGT 2070 (or 027.207) (D).

GMGT 4110 Commercial Law 2

(Formerly 027.411) Aspects of the law relating to business units, including a study of the law relating to proprietorships, partnerships and corporations, and secured transactions. Not taught every year. Prerequisite: GMGT 3300 (or 027.330) (D).

GMGT 4121 Commerce International

(Ancien 027.412) Étude des échanges internationaux à travers les politiques économiques internationales, les ententes régionales, les tarifs commerciaux, les institutions internationales et le financement des échanges.

GMGT 4140 Evaluation Techniques for Management

(Formerly 027.414) The development of specific techniques for program evaluation, the design of evaluations, the implementation of an evaluation within an ongoing organizational environment, and the problems associated with applying findings. Prerequisite: MIS 2000 (or 009.200) (D).

GMGT 4150 Managing Not-For-Profit Organizations

(Formerly 027.415) A description and analysis of the management perspective that is unique to organizations operating in the not-for-profit sector of the economy. Examination of both the internal and external environment of management in not-for-profit organizations. Prerequisites: [GMGT 2060 (D) or GMGT 2080 (or 027.208) (D)] and GMGT 2070 (or 027.207) (D).

GMGT 4151 Gestion des organisations sans but lucratif

(Ancien 027.415) Description et analyse de la dynamique des organismes sans but lucratif (OSBL) : leur environnement spécifique, leur fonctionnement interne et leurs modes d'intervention dans la communauté. Approfondissement de la compréhension de la spécificité du secteur tertiaire, ce qui rend apte à y intervenir efficacement soit en tant que gestionnaires, soit en tant que bénévoles. Préalables : GMGT 2061 ou GMGT 2060, GMGT 2081 ou GMGT 2080 (027.208), GMGT 2071 ou GMGT 2070 (027.207), HRIR 2440 ou HRIR 2441 (027.244). On ne peut pas obtenir de crédits à la fois pour GMGT 4151 et GMGT 4150.

GMGT 4160 Seminar in Business-Government Relations

(Formerly 027.416) Description and analysis of significant, current issues in the business-government relationship at an advanced level. Prerequisite: GMGT 1010 (D) or GMGT 2120 (or 027.212) (D).

GMGT 4210 Seminar in Management and Capitalism

This course provides students with an understanding of the institutions, developments, and debates associated with modern capitalism and their implications for management. Students will explore alternative management perspectives and bidirectional interactions within the context of larger issues. It is designed to ensure

that students are introduced to a variety of different perspectives, and that no single perspective is unduly privileged over others. Prerequisite: GMGT 1010 (D) or GMGT 2120 (D).

GMGT 4551 Développement d'habiletés de gestionnaire
(L'ancien 027.455) Développement de certaines habiletés nécessaires au succès professionnel. Les principaux apprentissages sont: la gestion du stress, la communication orale, la négociation, la recherche d'emploi, les techniques de créativité et d'innovation, la gestion des relations vie privée/vie professionnelle. Donné au Collège de St. Boniface. Préalable: GMGT 2070 (ou 027.207) (D).

SECTION 5.21 Business Administration-Human Resources/Industrial Relations Course Descriptions 2000 Level (HRIR)

HRIR 2440 Human Resource Management
(Formerly 027.244) Introduction to principles and procedures in the management of human resources. Topics include diversity management, conflict resolution, employment, law, planning, job analysis, performance appraisal, staffing, compensation, union-management relations, and current issues.

HRIR 2441 Gestion des ressources humaines 1
(L'ancien 027.244) Introduction au système de gestion des ressources humaines. Les sujets abordés ont trait à: la planification, l'analyse de postes, la formation, la gestion de la diversité, la gestion des carrières. L'évaluation du rendement, l'acquisition des ressources humaines, les modes de reconnaissance et la problématique de la gestion des ressources humaines dans un contexte en constant changement. On ne peut se faire créditer à la fois le HRIR 2441 et le HRIR 2440. Donné au Collège de St. Boniface.

SECTION 5.22 Business Administration-Human Resource/Industrial Relations Course Descriptions 3000 Level (HRIR)

HRIR 3430 Selected Topics in Industrial Relations
(Formerly 027.343) Analysis of specific topics or issues in the employment relationships in an industrial society. Prerequisites: [HRIR 2440 (or 027.244) (D)] and [HRIR 3450 (or 027.345 or 027.341) (D)], or consent of instructor.

HRIR 3450 Labour and Employment Relations
(Formerly 027.345) This course is to enhance knowledge and understanding of labour and employment relations in Canada and beyond. It addresses various issues and debates about these relations; their history, structure, and functioning; management employment relations practices; the role of labour unions; collective bargaining; and contemporary developments and alternatives. May not be held with the former 027.341.

HRIR 3511 Gestion des ressources humaines 2
(L'ancien 027.351) La planification des tâches, la structuration des rôles et du travail, la coordination et la réalisation des activités feront l'objet d'un apprentissage théorique associé au développement d'habiletés. Donné au Collège de St. Boniface. Préalable: HRIR 2440 (ou 027.244) (D).

HRIR 3541 Gestion des équipes de travail
(L'ancien 027.354) Initiation à la gestion des équipes de travail en mettant l'accent sur les dimensions humaines et administratives du travail en équipe. Donné au Collège de St. Boniface. Préalable: GMGT 2070 (ou 027.207) (D).

SECTION 5.23 Business Administration-Human Resources/Industrial Relations Course Descriptions 4000 Level (HRIR)

HRIR 4410 Staffing and Management Development
(Formerly 027.441) A review of: employment planning; recruitment and selection; internal placement; out placement; performance appraisal; career development. Training needs analysis, methods and evaluation. Prerequisite: HRIR 2440 (or 027.244) (D).

HRIR 4411 Dotation et développement des ressources humaines
(L'ancien 027.441) Le cours est une analyse approfondie et pratique des problèmes de dotation et de développement des ressources humaines au sein des organisations. À travers ce cours, les étudiant(e)s développeront leurs habiletés d'intervention dans des domaines tels que la planification des emplois, le recrutement et la sélection, l'évaluation de la performance, l'analyse des besoins de formation, l'implantation et

le contrôle d'un programme de formation, etc. Préalable: HRIR 2440 (ou 027.244) (D).

HRIR 4420 Compensation
(Formerly 027.442) A review of the major concepts and design of compensation systems including: strategy, internal equity, external competitiveness, rewarding individual contributions, performance incentives, employee benefits, government regulations, union role in compensation; budgets and administration. Prerequisite: HRIR 2440 (or 027.244) (D).

HRIR 4421 Rémunération
(L'ancien 027.442) Ce cours est une analyse des principaux concepts et des systèmes de rémunération incluant: stratégie, équité salariale, compétitivité, reconnaissance des contributions individuelles, incitatifs de performance, avantages sociaux, politiques gouvernementales, rôle des syndicats dans la rémunération, incidences et gestion du processus de rémunération. Préalable: HRIR 2440 (ou 027.244) (D).

HRIR 4480 Collective Bargaining and Administration
(Formerly 027.448) Detailed examination of the elements and issues in contract negotiation and administration and of the legal framework imposed on public and private negotiations. Comparison of Canadian industrial relations system with other national systems. Prerequisite: HRIR 3450 (or 027.345 or 027.341) (D).

HRIR 4481 La négociation collective
(L'ancien 027.448) Ce cours est une analyse des éléments et enjeux de la négociation collective et de la gestion des conventions collectives et une analyse du cadre juridique des négociations publiques et privées. Le système canadien de relations industrielles est comparé à d'autres systèmes nationaux. Préalable: HRIR 3450 (ou 027.345) ou l'ancien 027.341 (D).

HRIR 4511 Gestion de la diversité
(L'ancien 027.451) La gestion de la diversité du point de vue historique, social, légal et opérationnel. L'influence de la diversité de la main-d'oeuvre sur les politiques, les pratiques et les procédures de l'organisation. Modèle du développement organisationnel pluraliste relié à un ensemble de systèmes sociaux. Donné au Collège de St. Boniface. Préalable: HRIR 2440 (ou 027.244) (D).

HRIR 4520 Comparative Industrial Relations and Human Resource Management
(Formerly 027.452) To provide an international perspective on industrial relations (IR) and human resource management (HRM) through analysis and comparison of IR systems and HRM practice across selected countries and of current developments therein. Also covers theories and issues relevant to these topics. Students are encouraged, but not required, to complete HRIR 3450 (or 027.345 or 027.341) (D) prior to taking this course.

HRIR 4521 Relations industrielles et gestion des ressources humaines
(Ancien 027.452) Perspective internationale des relations industrielles (RI) et de la gestion des ressources humaines (GRH) par l'analyse et l'étude comparée des systèmes de relations industrielles et des pratiques de gestion des ressources humaines dans certains pays ainsi que des développements actuels. Théories et questions pertinentes à cette matière. Préalable recommandé mais non obligatoire : le HRIR 3451 (ancien 027.345) ou l'ancien 027.341.

HRIR 4531 Gestion du changement
(L'ancien 027.453) Changement et développement organisationnel: processus de changement, agent de changement. Domaines d'intervention: changements dans l'environnement et l'organisation, processus sociaux, culture d'entreprise, technostucture, qualité devie au travail. Dilemmes et perspectives. Donné au Collège de St. Boniface. Préalable: HRIR 2440 (ou 027.244) (D).

HRIR 4541 Innovations en gestion des ressources humaines
(L'ancien 027.454) Présentation des nouveaux courants en gestion des ressources humaines, en examiner les fondements, en présenter les modèles d'implantation et en faire une analyse critique. Donné au Collège de St. Boniface. Préalable: HRIR 2440 (ou 027.244) (D).

SECTION 5.24 Business Administration-International Business Course Descriptions 2000 Level (INTB)

INTB 2200 International Management
(Formerly 027.220) Analysis of the practice of management in an international setting. Examines the cultural, political, and economic environments which influence managerial decision-making in an international context.

SECTION 5.25 Business Administration-International Business Course Descriptions 3000 Level (INTB)

INTB 3001 Gestion interculturelle
Mise en évidence de l'influence de facteurs culturels sur les pratiques de gestion et la vie des entreprises. Présentation des dimensions de la culture de chaque pays étudié (religion, valeurs, normes, histoire, etc.) et développement d'outils pour faciliter l'adaptation des employés étrangers dans ces pays et le développement d'une communication interculturelle efficace avec leurs ressortissants. Préalable: GMG 2071 (ou l'ancien 027.207) Introduction au comportement organisationnel.

SECTION 5.26 Business Administration- International Business Course Descriptions 4000 Level (INTB)

INTB 4501 Cultures du monde
(L'ancien 027.450) Un aperçu des principales cultures du monde. Étude des relations entre la culture d'un peuple et ses rapports économiques internationaux. Donné au Collège de St. Boniface.

INTB 4581 Problèmes contemporains en gestion internationale
(Ancien 027.458) Étude des thèmes relatifs aux problèmes et aux défis que pose la gestion dans un contexte international. Le contenu du cours peut varier d'une année à l'autre en fonction de l'actualité, des besoins et des intérêts de la clientèle étudiante. Préalable : INTB 2201 (027.220) ou GMG 4121 (027.412) ou l'autorisation écrite de la professeure ou du professeur.

SECTION 5.27 Business Administration-Leadership Course Descriptions (LEAD)

LEAD 2010 Learning to Lead
This seminar provides students with an introduction to and understanding of effective leadership and its application to a variety of group and organizational contexts. The classes encourage interdisciplinary discussions of theoretical, philosophical, historical, and technical elements of effective leadership. The course allows students to reflect on and develop their own leadership style through interactive lectures, experiential activities, and action learning in groups and organizations in which students want to lead and be led. This seminar is intended for all students that have an interest in leadership theory and effective leadership practices. Students may not hold credit for both LEAD 2010 and ARTS 1160. Prerequisite: Students must have completed 15 credit hours of passed courses to register in LEAD 2010.

SECTION 5.28 Interdepartmental Courses 2000 Level (IDM)

IDM 2980 Work Term 1
Work assignment in business, industry, or government for students registered in the Asper School of Business Cooperative option. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail).

IDM 2982 Co-op Work Term 1
Work assignment in business, industry, or government for students registered in the Asper School of Business co-operative option. Prerequisite: Written permission from the Asper School of Business Co-operative Education Office. May not be held with IDM 2980.

SECTION 5.29 Interdepartmental Course Descriptions 3000 Level (IDM)

IDM 3000 Aboriginal Business Context: Influences and Impacts
(Formerly 098.300) Explore the impact of legal, constitutional and governance issues on the internal and operating environment affecting economic development by Aboriginal peoples. Current strategies for successful partnerships between industry and Aboriginal peoples will also be examined. Prerequisites: [NATV 1200 (or 032.120) (D)] or [NATV 1220 (or 032.122) (D)] and [NATV 1240 (or 032.124) (D)] or consent of instructor.

(D)] or consent of instructor.

IDM 3980 Work Term 2
Work assignment in business, industry, or government for students registered in the Asper School of Business Cooperative option. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail).

IDM 3982 Co-op Work Term 2
Work assignment in business, industry, or government for students registered in the Asper School of Business co-operative option. Prerequisite: IDM 2980 with a grade of P or IDM 2982 with a grade of C and written permission from the Asper School of Business Cooperative Education Office.. May not be held with IDM 3980.

SECTION 5.30 Interdepartmental Courses 4000 Level (IDM)

IDM 4050 Readings in Management
(Formerly 098.405) Supervised readings in one of the areas of Management. Students are limited to a maximum of six hours of readings and research courses.

IDM 4070 Management Research 1
(Formerly 098.407) Individually supervised preparation of a detailed research proposal for an advanced study in one of the areas of Management. Students are limited to a maximum of six hours of readings and research courses.

IDM 4080 Management Research 2
(Formerly 098.408) Individually supervised research and preparation of a paper in one of the areas of Management based on the proposal developed in IDM 4070 (or 098.407). Students are limited to a maximum of six hours of readings and research courses.

IDM 4090 Aboriginal Business Leadership
(Formerly 098.409) An analysis of current leadership strengths and challenges facing Aboriginal organizations. Out of this analysis will come understanding of strategies for working effectively or ineffectively with Aboriginal organizations. Prerequisite: [NATV 1200 (or 032.120) (D)] or [NATV 1220 (or 032.122) (D)] and NATV 1240 (or 032.124) (D) or consent of instructor.

IDM 4980 Work Term 3
Work assignment in business, industry, or government for students registered in the Asper School of Business Co-operative option. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail)

IDM 4982 Co-op Work Term 3
Work assignment in business, industry, or government for students registered in the Asper School of Business co-operative option. Prerequisite: IDM 3980 with a grade of P or IDM 3982 with a grade of C and written permission from the Asper School of Business Co-operative Education Office. Not to be held with IDM 4980.

SECTION 5.31 Marketing Course Descriptions 2000 Level(MKT)

MKT 2210 Fundamentals of Marketing
(Formerly 118.221) Analysis of marketing problems, emphasizing various alternatives available for achieving economic efficiency in the distribution process; public policy with respect to marketing.

MKT 2211 Principes de marketing
(L'ancien 118.221) Analyse des problèmes précis de marketing, l'accent étant mis sur l'analyse de différentes façons de maximiser les bénéfices dans le processus de la distribution des biens et des services; le marketing et la société. Donné au Collège de St. Boniface.

SECTION 5.32 Marketing Course Descriptions 3000 Level (MKT)

MKT 3220 Marketing Research
Study of the planning and implementation of research required to make informed marketing decisions. Prerequisites: MKT 2210 (or 118.221) (D) and STAT 2000 (or 005.200) (D) or consent of instructor.

MKT 3221 Recherche en marketing
(Ancien 118.322) Étude de la planification et de la mise en oeuvre de la recherche comme exigence pour prendre des décisions éclairées en marketing. Préalables: [MKT 2211 (118.221) ou le MKT 2210] et [STAT 2000 ou STAT 2001 (005.200)].

MKT 3230 Consumer Behaviour
(Formerly 118.323) Study of buying behaviour of individuals and organizations as affected by psychological and sociological forces within society. Prerequisite: MKT 2210 (or 118.221) (D).

MKT 3231 Comportement du consommateur
(L'ancien 118.323) Étude de l'influence de l'environnement et de l'influence individuelle sur le comportement du consommateur. Donnée au Collège de St. Boniface. Préalable: MKT 2210 (ou 118.221) (D).

MKT 3240 Selected Topics in Marketing
(Formerly 118.324) Analysis of marketing as it relates to specialized fields. Prerequisite: MKT 2210 (or 118.221) (D).

MKT 3250 Marketing Strategy
(Formerly 118.325) Integration of sales and marketing strategies, including planning, formulation, and implementation. Emphasis on the role and importance of marketing strategy in overall corporate growth. Prerequisite: MKT 2210 (or 118.221) (D).

MKT 3291 Publicité
Analyse du rôle et de la gestion de la publicité dans le cadre du plan marketing. Théorie de la communication et la formulation de messages publicitaires, établissement du budget, la sélection des médias et l'analyse de l'efficacité de la publicité. Donnée au Collège de St. Boniface. Préalable: 18.221 (D).

MKT 3300 International Marketing
(Formerly 118.330) A study of international similarities and differences in marketing structures, functions and processes as related to the socio-economic and cultural environment and a consideration of the opportunities and problems of international marketing. Prerequisite: MKT 2210 (or 118.221) (D).

MKT 3301 Marketing international
(Ancien 118.330) Analyse comparée des structures, des fonctions et des processus de marketing dans des environnements sociaux, culturels et économiques variés. Diagnostic de l'environnement externe et élaboration des stratégies de marketing mix international. Préalable : MKT 2211 (ancien 118.221).

MKT 3310 Retail and Channel Management
(Formerly 118.331) The study of the functions performed by traditional and e-commerce distributors. Topics include location and competitive analysis, promotion, merchandising, buying, design, selection and historical development. (Formerly 118.331) The study of the functions performed by traditional and e-commerce distributors. Topics include location and competitive analysis, promotion, merchandising, buying, design, selection and historical development. May not be held with the former 118.321. Prerequisite: MKT 2210 (or 118.221) (D).

MKT 3340 Services Marketing
(Formerly 118.334) An examination of the differences in the marketing of goods versus services. Topics covered include service process design and management, problem identification and resolution, positioning issues, the importance of human resources, and promotional issues. Prerequisite: MKT 2210 (or 118.221) (D).

MKT 3390 Integrated Marketing Communications
(Formerly 118.339) The process of using promotional tools in a unified way so that a synergistic communications is created. The course examines the roles of advertising, sales promotion, direct marketing, and the internet within this broader framework. May not hold with the former 118.329. Prerequisite: MKT 2210 (or 118.221) (D).

SECTION 5.33 Marketing Course Descriptions 4000 Level (MKT)

MKT 4210 Marketing Management
Study of location and nature of markets, techniques by which firms attempt to affect the demand for their goods and services and the significance of these effects on business and society. Can be taken only in final year of program. Prerequisites: MKT 3220 (118.322) (D) or MKT 3230 (118.323) (D), and one other 3000 or 4000 Undergraduate Studies

level Marketing course (D), and ACC 1110 (009.111). Pre- or co-requisite: either MKT 3220 (118.322) (D) or MKT 3230 (118.323) (D), but not both.

MKT 4211 Gestion du marketing
(Ancien 118.421) Examen des stratégies et des tactiques marketing que les managers utilisent pour leurs produits et services à différents niveaux du cycle de vie du produit. Utilisation des analyses qualitatives et quantitatives pour développer la pensée critique essentielle à la prise de décision en marketing. Ne peut être pris qu'en dernière année du programme. Préalables: [(MKT 3221 ou MKT 3220 (118.332) ou (MKT 3230 (118.323))] et un cours additionnel de marketing niveau 3000 ou 4000: et [ACC 1111 ou ACC 1110 (ancien 009.111).]

MKT 4270 Sales Management
(Formerly 118.427) The study of the management of the personal selling area including an examination of the selling function, the sales manager, and sales management. Prerequisite: MKT 2210 (or 118.221) (D).

MKT 4271 Administration des ventes
(L'ancien 118.427) Analyse de l'administration de la vente personnelle, y compris l'analyse la fonction-vente, la supervision de la force de vente et la gestion des ventes. Donnée au Collège de St. Boniface. Préalable: MKT 2210 (ou 118.221) (D).

SECTION 5.34 Supply Chain Management-Management Science Course Descriptions 2000 Level (MSCI)

MSCI 2150 Introduction to Management Sciences
An introduction to management science techniques and models. Topics include linear programming, distribution problems, decision theory and queuing models. May not hold with the former 164.215 or 027.215 or ABIZ 2520. Prerequisites: [MATH 1520 (or 136.152) (C) or MATH 1500 (or 136.150) (C) or equivalent] and [STAT 1000 (005.100) (C) or equivalent]

MSCI 2151 Introduction aux sciences de la gestion
(L'ancien 164.215) Introduction aux techniques et modèles des sciences de la gestion. Les sujets traités incluent la programmation linéaire, les problèmes d'affectation et de transport, la théorie de la décision, les files d'attente. On ne pourra se faire créditer cours avec l'ancien 027.215. Préalables: [MATH 1310 (ou 136.131) (D) ou MATH 1300 (ou 136.130) (D)] et [MATH 1520 (ou 136.152) (D) ou MATH 1500 (ou 136.150) (D)]. Préalable ou corequis: STAT 1000 (ou STAT 1001) (D) et COMP 1260 (ou COMP 1261) (D) ou consentement du professeur.

SECTION 5.35 Supply Chain Management-Management Science Course Descriptions 3000 Level (MSCI)

MSCI 3400 Intermediate Management Science
(Formerly 164.340) Operations research models used in the analysis of management problems. Topics include network analysis, deterministic inventory models, dynamic programming and game theory. May not hold with the former 027.340. Prerequisite: MSCI 2150 (or 164.215) (D) or consent of instructor.

MSCI 3401 Sciences de la gestion 2
(L'ancien 164.340) Modèles de la recherche opérationnelle utilisés dans l'analyse de problèmes de gestion. Les sujets traités incluent les réseaux, les problèmes d'inventaire du point de vue déterministe, la programmation dynamique, la théorie des jeux. On ne pourra se faire créditer cours avec l'ancien 027.340. Préalables: MSCI 2150 (ou 164.215) (D) ou le consentement du professeur.

SECTION 5.36 Supply Chain Management -Management Science Course Descriptions 4000 Level (MSCI)

MSCI 4200 Topics in Management Science
(Formerly 164.420) Topics of current interest in management science. May not hold with former 027.420. Prerequisite: MSCI 2150 (or 164.215) (D). Not taught every year.

MSCI 4220 Management Science Models in Business and Industry
(Formerly 164.422) An applied course providing practical experience in modeling and solving business and industrial problems. Emphasis to be placed upon analysis, formulation, solution and implementation. Not taught every year. May not hold with former 027.422. Prerequisite or Concurrent Requirement: one of MSCI 3400 (or 164.340 or 027.340) (D) or MSCI 4200 (or 164.420 or 027.420) (D) or MSCI 4230

(or 164.423 or 027.423) (D).

MSCI 4230 Simulation Models in Management Science (Formerly 164.423) Introduction to and use of simulation models and techniques to solve business and industrial problems. May not hold with former 027.423. Not taught every year. Prerequisite: MSCI 2150 (or 164.215) (D).

SECTION 5.37 Supply Chain Management-Operations Course Descriptions 2000 Level (OPM)

OPM 2601 Principes de gestion des opérations et de la production (L'ancien 164.260) Étude des notions de base en gestion des opérations et de la production, systèmes de production, conception de système, analyse et contrôle. Donné au Collège universitaire de Saint-Boniface. On ne pourra se faire créditer ces cours avec l'ancien 027.260. Préalable ou corequis: STAT 1000 (ou 005.100) (D) ou l'équivalent.

SECTION 5.38 Supply Chain Management-Operations Course Descriptions 3000 Level (OPM)

OPM 3630 Simulation Models for Operations Management (Formerly 164.363) Currently not offered. May not hold with former 027.363.

OPM 3640 Project Planning and Control (Formerly 164.364) Currently not offered. May not hold with former 027.364.

OPM 3650 Management of Quality and Reliability (Formerly 164.365) This course offers a practical introduction to modern quality assurance and reliability management concepts, methods and practices. It builds upon the relevant subject matter in basic courses in production management and prepares for positions in the field of quality and reliability management. May not hold with former 027.365. Prerequisite: SCM 2160 [or the former OPM 2600 (or 164.260) (D)] and STAT 1000 (C).

OPM 3660 Operations Management in Service Organizations (Formerly 164.366) This course explores the applications of operations management concepts to the management of service operations. The characteristics of a service operation, while generally comparable to manufacturing a product, often place a unique demand upon the service manager. These demands, along with the analysis of actual company situations through case study applications, are emphasized. May not hold with former 027.366. Prerequisite: [SCM 2160 or former OPM 2600 (or 164.260) (D)] and STAT 1000 (C).

OPM 3670 POM Project in Industry An applied course, designed to bridge the gap between theoretical concepts developed in previous POM courses and current industrial practices by means of an industrial project. May not hold with former 027.367. Prerequisites: [SCM 2160 or former OPM 2600 (or 164.260 or 027.260) (D)] and STAT 1000 (C) or consent of instructor.

SECTION 5.39 Supply Chain Management-Operations Course Descriptions 4000 Level (OPM)

OPM 4611 Gestion de projets Étude de la gestion de projets. Définition et contexte d'application de la gestion de projets. Techniques, approches et outils de gestion d'un projet en fonction de la structure organisationnelle de l'entreprise et des contraintes de temps, coût et qualité. Préalable:GMGT 2081 Introduction au management et à la théorie de l'organisation et OPM 2601 Principes de la gestion des opérations et de la production.

OPM 4620 Production Management Seminar (Formerly 164.462) Problems, development, and application of analytical methods in production and operations management with emphasis on planning and control. May not hold with former 027.462. Prerequisite: MSCI 2150 (or 164.215) (D) and SCM 2160 or OPM 2600 (or 164.260) (D). May not hold with former 027.462.

OPM 4630 Production and Inventory Systems: Planning and Control (Formerly 164.463) To develop concepts and understanding about the planning and control system used to guide and coordinate the flow of materials, labor inputs and goods and services through the physical productive system. Topics to be covered

include: 1) Independent demand inventory systems, 2) Dependent demand inventory systems, 3) Aggregate planning, 4) Capacity planning and control. May not hold with former 027.463. Prerequisite: [SCM 2160 (or former OPM 2600 or 164.260) (D)] and STAT 1000 (C).

SECTION 5.40 Supply Chain Management-Supply Chain Management Course Descriptions 2000 Level (SCM)

SCM 2160 Supply Chain and Operations Management Study of supply chain management (SCM) and operations management. Positions operations management as a critical area of study within SCM. Focuses on process approach and system design. May not hold credit for both SCM 2160 and the former OPM 2600. Prerequisites: None.

SCM 2161 Gestion de la chaîne logistique et des opérations Étude de la gestion de la chaîne logistique (GCL) et des opérations. Positionne la gestion des opérations comme un domaine d'étude fondamental à l'intérieur de la GCL. Se focalise sur l'approche processus et la conception de système. L'étudiant (e) qui détient les crédits du SCM 2161 ne peut se faire créditer aucun des cours OPM 2601 (ancien 027.260) ou OPM 2600 (ancien 164.260) ou SCM 2160.

SCM 2210 Transportation Principles (Formerly 164.221) Demand forecasting, cost analysis, regulation of carriers, role of transport in economic development, project appraisal and transport planning. Also offered as ABIZ 2210 by the Department of Agribusiness and Agricultural Economics. May not be held with ABIZ 2210 (or 061.221). Prerequisite: [ECON 1010 and ECON 1020 (C)] or former ECON 1200 (or 018.120) (D).

SCM 2220 Selected Topics in Logistics and Transportation (Formerly 164.222) This course provides coverage on a number of critical topics in Supply Chain Logistics and Transportation. Areas of emphasis are based on current issues confronting managers and regulators/policy makers such as global supply chain logistics and transportation policy.

SCM 2230 Introduction to Supply Chain Management (Formerly 164.223) An examination of the management activities that are necessary to ensure an efficient flow of materials, funds, and information among the various organizations in supply chains, from the acquisition of raw materials to the delivery of the finished product to the end user.

SCM 2240 Purchasing and Supply Management Purchasing and supply management is an increasingly important element of corporate strategy as global supply chains become longer and more complex. In this course, students will learn about a major paradigm shift in purchasing, from a clerical activity to a strategic corporate function. The course covers strategic supply management, inter-organizational relationships, product and service specifications, price and cost analysis, negotiation, quality management, supply chain information technology, and other important purchasing topics, from a supply chain management perspective.

SECTION 5.41 Supply Chain Management-Supply Chain Management Course Descriptions 3000 Level (SCM)

SCM 3230 Global Supply Chains (Formerly 164.323) The course provides a global orientation to supply chain management, with a particular emphasis on the global linkages between organizations in international supply chains. Supply chain management practices in selected countries are also examined. Prerequisite: SCM 2230 (or 164.223) (D) or SCM 3360 (or 164.336 or 118.336) (D); or consent of instructor.

SCM 3360 Supply Chain Logistics (Formerly 164.336) The course provides an international/global orientation to logistics and supply chain management. May not be held with the former 118.336 or 118.326. Prerequisite: MKT 2210 (or 118.221) (D).

SECTION 5.42 Supply Chain Management-Supply Chain Management Course Descriptions 4000 Level (SCM)

SCM 4250 Beyond Business: Advanced Issues in Supply Chain Management The material covered in this course moves beyond a business perspective and

analyzes the relationship between supply chain management (SCM) and other parts of society as a whole. It examines the issues that arise as supply chain management interests with government and society. May not be held with the former SCM 4240 (or 164.424). Prerequisite: SCM 2230 (D); or the former 164.230 (D); or consent of instructor.

SECTION 4: Program and Graduation Requirements

SECTION 4: Program and Graduation Requirements ,

The Bachelor of Commerce (Honours) program comprises 120 credit hours of course work. The Co-operative Education Option also comprises 120 credit hours of course work plus a minimum of three 4-month approved work terms. The degree encompasses the following components which will be listed in detail below: Track 1/Foundation courses, Program Core courses (common to all students), Major courses, Business Options and Elective courses.

Each student must declare at least one major and present a minimum Degree Grade Point Average of 2.00.

Detailed information on the degree regulations is found in Section 3, in the Undergraduate Program Office (268 Drake) or on the undergraduate web site at: umanitoba.ca/faculties/management/programs/undergraduate/

NOTE: Students admitted prior to September 2011 should refer to the 2010-2011 Undergraduate Calendar for a description of their program requirements.

4.1 Program Requirements for the Bachelor of Commerce (Honours) Program – Track 1 with Guaranteed Admission, Track 1 and Track 2

4.1 Program Requirements for the Bachelor of Commerce (Honours) Program – Track 1 with Guaranteed Admission, Track 1 and Track 2,

All students admitted under these tracks (including International Students and International from 2+2 Joint Programs) will complete the Bachelor of Commerce Honours Program. The Bachelor of Commerce (Honours) degree is comprised of 120 credit hours and can be divided into the following components:

- The Track 1/Foundation Course Requirements (24 credit hours)
- The Core (51 credit hours)
- The Major (12 credit hours)
- Business Options (15 credit hours)
- Electives (15 credit hours)
- Business Option or Elective (3 credit hours)

These components comprise 120 credit hours; their associated limits are defined below.

NOTE: Students admitted prior to September 2011 should refer to the 2010-2011 Undergraduate Calendar for a description of their program requirements.

Track 1/Foundation Course Requirements

All students must complete the specified Track 1/Foundation course requirements. Direct Entry students from high school will complete the Track 1/Foundation courses in their first year. Track 1 students complete these requirements prior to their admission to the Asper School of Business. Track 2 students have completed 24 credit hours of university course work but are missing one or more of the specific Track 1/Foundation courses. Track 2 students should complete all outstanding Track 1/Foundation courses during their first year after admission to the Asper School of Business and must achieve a minimum grade of “C” in each outstanding Track 1/Foundation courses.

The Core

The CORE consists of 51 credit hours of specified mandatory courses from all four departments in this faculty as well as courses taught by the departments of Economics, Environment, Global Political Economy, Political Studies, , Philosophy and Sociology. All students are required to complete the Core. The Core presents the essence of a business degree program. The majority of the Core courses are taken in Years 2 and 3 of the Bachelor of Commerce Honours Program.

The Major

Each student is required to complete the course requirements of one MAJOR. Each department and the Dean’s Office have developed one or more Majors. Each Major consists of a 12 credit hours of course work specified by the department. Subject to demand and faculty resources, specialized Majors are available in Aboriginal Business Studies, Accounting, Actuarial Mathematics, Entrepreneurship/Small Business, Finance, Generalist, Human Resources Management/Industrial Relations, International Business, Logistics and Supply Chain Management, Management Information Systems, Management of Organizations, Marketing, and Operational Research/Operations Management. A list of the Departments and the Majors they oversee is outlined below.

Students will normally choose a Major at the beginning of the third year of the program, following completion of many of the Core courses, which introduce the areas. Students have an opportunity to transfer from one Major to another, but this opportunity decreases as the student progresses in the program.

Business Options

This component of the program consists of a required number of Business courses freely selected by the student. These courses are referred to as Business OPTIONS. Students are required to complete 15 credit hours of Options. Some students may want to take Options which will supplement their Major, whereas other students may prefer to broaden their educational base by selecting Business courses in another or several other Majors. Students who want to supplement their Majors may take up to 12 hours of their Options from that area. Students may complete a second Major as part of their Options requirements. Such students should consult with staff in the Undergraduate Program Office.

Electives

This component of the program is the ELECTIVE requirement. An Elective is any three or six credit hour course freely chosen by the student from courses taught in the degree programs of other faculties and schools, excluding the Asper School of Business. Students must complete 15 credit hours of Electives that meet the following criteria; a minimum of 6 credit hours of the Electives must be at the 2000 Level or higher plus a minimum of 3 credit hours of the Electives must comprise a freely chosen course that meets the Written English “W” requirement at any level.

Business Option or Elective

This component of the program consists of 3 credit hours which may be either a Business Option or Elective and it must be at the 2000 Level or higher.

Course Requirements for Direct Entry, Track 1 and Track 2 Students

The tables below list the Core courses that all Business students must complete. The courses are listed by year in a *suggested* sequence. Students normally complete the Core courses in the sequence shown.

To determine which additional courses to take each year (i.e., non-Core courses) students should consult the listing of course requirements for each year of their chosen Major.

YEAR 1: Track1/Foundation Courses	Cr. Hrs.
ANTH, HIST, MATH, PHIL, POLS, PSYC, SOC (see Note 1)	6

ECON 1010 AND ECON 1020	6
MATH 1520 OR MATH 1500	3
STAT 1000	3
Written English "W" (see Note 2)	3
Elective (see Note 3)	3
Minimum credit hours to qualify (see Note 4)	24
Year 1: Core Courses	
GMGT 1010	3
One of : GMGT 2060, GMGT 2070 or MKT 2210	3
Total credit hours (see Note 4)	30
YEAR 2	
ACC 1100	3
ACC 1110	3
FIN 2200	3
GMGT 2010	3
Two of : GMGT 2060, GMGT 2070, MKT 2210; whichever two courses not taken in Year 1 (see Note 5)	6
MIS 2000	3
MSCI 2150	3
Electives (see Note 6)	6
Total credit hours	30
YEAR 3	
HRIR 2440	3
GMGT 3300	3
SCM 2160	3
International Business Requirement (see Note 7)	3
Ethics (see Note 8)	3
Electives, Options & Major Courses (see Notes 6 and 10)	15
Total credit hours	30
YEAR 4	
GMGT 4010	3
Alternative Management Studies (see Note 9)	3
Electives, Options and Major Courses (see Notes 6 and 10)	24
Total credit hours	30
Total Credit Hours Required for Degree	120

NOTES:

1) 6 credit hours from: Anthropology, History, Mathematics, Philosophy, Political Studies, Psychology, or Sociology. Courses chosen for this requirement must be independent from courses taken to fulfill other degree requirements.

2) Students are required to select a three credit hour course to satisfy the Written English "W" requirement. The "W" course for the Foundation course requirement must be from a specific discipline (ARTS 1110, GMGT 1010 and GMGT 2010 are not considered to be from a specific discipline and therefore do not fulfil the Track 1/Foundation Written English course requirement). Courses that satisfy the Written English requirement are listed in the chapter, General Academic Regulations and Policy.

3) PHIL 1290 Critical Thinking is a preferred elective.

4) For Track 1 transfer students these 24 credit hours of specified courses are the minimum requirements for admission. Direct Entry high school admits will also be taking these Foundation courses in Year 1. All students regardless of admit type must take these courses and achieve a minimum grade of "C" (see applicant bulletin for complete details).

5) The prerequisite to GMST 2060 and GMGT 2070 is GMGT 1010 (D).

6) In addition to 51 credit hours of Core courses all students must take 12 credit hours in one Major, 15 credit hours of Business Options, 15 credit hours of Electives (which must include a minimum of 6 credit hours at the 2000 Level or higher plus 3

credit hours of Written English "W") plus 3 credit hours of either Business Options or Electives (which must be at the 2000 Level or higher).

7) International Business Requirement: One of the following courses must be chosen: ACT 4250, INTB 2200, FIN 3450, HRIR 4520, MKT 3300, MKT 3240 (Cross-Cultural Brand Management topic only) or SCM 3230.

8) Ethics requirement: One of the following courses: PHIL 2290, PHIL 2750, PHIL 2790, PHIL 2830, GMGT 3030 or GMGT 3581. If a 6 credit hour course is chosen, 3 credit hours will count as Electives.

9) Alternative Management Requirement: One of the following must be chosen: ECON 2540, ECON 2630, ECON 3710, ECON 3810, ENVR 4110, GPE 2700, POLS 3220, POLS 3250, SOC 3870 or GMGT 4210. If a 6 credit hour course is chosen, 3 credit hours will count as Electives. Take careful note of any course prerequisites in your timetable planning.

10) Students may register for Electives in any year. Registration in Options and Major courses normally begins in Year 3 of the 4-Year program.

Course Key

All Core courses are taught by the Asper School of Business except the following:

SUBJECT	Cr. Hrs.	
Economics		
ECON 2540	Political Economy 1: Production and Distribution	3
ECON 2630	An Intro to the World's Economies	6
ECON 3710	Sustainable Development: Issues and Policy	3
ECON 3810	Alternative Approached to Macroeconomic Analysis	3
Environment		
ENVR 4110	Critical Thinking and the Environment	3
Global Political Economy		
GPE 2700	Perspectives on Global Political Economy	3
Political Studies		
POLS 3220	Globalization and the World Economy	3
POLS 3250	International Political Economy	3
Sociology		
SOC 3870	Social Inequality	3
Philosophy		
PHIL 2290	Ethics and Society	6
PHIL 2750	Ethics and the Environment	3
PHIL 2790	Moral Philosophy	6
PHIL 2830	Business Ethics	3

4.2 Program Requirements for Majors

4.2 Program Requirements for Majors,

Students who intend to complete a second major should note that when a course is applicable to two different majors, that course may be used to satisfy only one set of major requirements.

Aboriginal Business Studies

The Major consists of NATV 4220, IDM 3000 plus six credit hours from ENTR 3100, ENTR 4100, FIN 3250, FIN 3470, GMGT 4150, IDM 4090, NATV 3000 (topic: Aboriginal Wisdom and Spirituality), or NATV 3350.

NOTE: This major is currently under review: Check with the Undergraduate Program Office for a list of acceptable alternatives.

Accounting

The Major consists of: ACC 2010, ACC 2020, ACC 3040 and ACC 4030. The prerequisite for ACC 2010 is "ACC 1100 (C+) and for ACC 3040 is ACC 1110 (C+).

Actuarial Mathematics

The Major consists of any 12 hours from ACT 2020, ACT 2120, ACT 3130, ACT 3230, ACT 3340, ACT 3530, ACT 4140 and ACT 4340.

Prior to registration, all students interested in or enrolled in Actuarial Mathematics should consult the Director or a Undergraduate Program Advisor for program planning advice.

To facilitate entry into and understanding of material covered in some advanced Actuarial courses, students entering the second year of the four-year program are advised to take the following courses: MATH 2720 plus MATH 2730 or MATH 2750 (which satisfies the elective requirement). Students declaring Actuarial Mathematics as their first major may take these course as either Business Options or non-Business Electives.

Students admitted in Fall 2006 and thereafter are required to attain a minimum grade of "C+" in all Actuarial courses in order to graduate with a Actuarial Mathematics Major.

Student interested in the Actuarial Mathematics major are encouraged to take MATH 1300 and MATH 1700 as Track 1/Foundation courses or alternately as electives in Year 1.

Entrepreneurship/Small Business

The Major consists of: ENTR 3100, ENTR 4100, FIN 3470 and one of: ACC 3050, FIN 3250, ACC 3530, , ENTR 3102 (not to be held with the former GMGT 3050), ENTR 3104, ENTR 3106, GMGT 3080, MKT 3220, MKT 3310 or MKT 4270.

Finance

The Major consists of: FIN 3410, FIN 3460, FIN 3480, and FIN 4400.

Finance Options are: FIN 3450, FIN 4230, FIN 4260, and FIN 4270. Students in the Finance Major may take all of these courses.

The prerequisite for FIN 3410, FIN 3460 and FIN 3480 is FIN 2200 (C+), MATH 1300 (C) or MATH 1310 (C), and STAT 2000 (C).

Generalist

The Major consists of one course from the required list of courses from four different Majors (i.e., Options that are not part of a Major's required course requirements are not eligible for the Generalist Major).

Human Resources Management/Industrial Relations

The Major consists of: HRIR 3450 plus three of the following: HRIR 4410, HRIR 4420, HRIR 4480, HRIR 4520 **OR** HRIR 3450 plus two of the following: HRIR 4410, HRIR 4420, HRIR 4480, HRIR 4520, plus one of the following: HRIR 3430, LABR 3010, LABR 3060, LABR 3070, LABR 3130, and LABR 3140.

Students entering the second year of the four-year program are advised to take HRIR 2440 since it is a prerequisite to advanced courses in the area.

International Business

The Major consists of: FIN 3450, INTB 2200, HRIR 4520, and MKT 3300.
Undergraduate Studies

One of the above four courses may be used in the core program; therefore the major will be comprised of the remaining three courses plus one course from the following list: MKT 3240 Special Topics in Marketing (Cross-Cultural Brand Management topic only), ACT 4250 Managing Insurance Operations in the International Business Environment or SCM 3230 Global Chain Management.

Students majoring in International Business are permitted to take 12 credit hours of a foreign language and/or courses with an international focus from an approved list and have these non-business courses count as Business Options. The list is available in the Undergraduate Program Office.

Logistics and Supply Chain Management

The Major consists of: SCM 2210, SCM 2230, SCM 3360 plus one of the following: SCM 2220, SCM 2240, SCM 3230, SCM 4250 (not to be held with the former SCM 4240), OPM 4630.

Recommended Business Options/Electives in this area include: MIS 3500, MIS 3510, INTB 2200, HRIR 3450, GMGT 3160, GMGT 4160, MSCI 3400, IDM 4050, IDM 4070, IDM 4080, MKT 3220, MKT 3340, , GEOG 3800, ECON 2450, ECON 2460.

Management Information Systems

The Major consists of MIS 3500, MIS 3510, MIS 3520, and MIS 4500.

Options available in this area are ACC 3530 and MIS 4250.

Students interested in pursuing the Management Information Systems Major are encouraged to take MIS 2000 in the second year of the four-year program since it is a prerequisite to advanced courses in the area.

Students interested in pursuing the Management Information Systems Major are also encouraged, but not required, to complete COMP 1020.

Management of Organizations

The Major consists of any 12 hours from: GMGT 3010, GMGT 3020, GMGT 3160, GMGT 4040, GMGT 4140 and GMGT 4150. Students entering the second year of the four-year program are advised to take GMGT 2070 and GMGT 2080 since they are prerequisites to advanced courses in the area.

Marketing

The Major consists of MKT 3220*, MKT 3230, MKT 4210 and 3 hours from MKT 3240, MKT 3250, MKT 3300, MKT 3310, MKT 3340, MKT 3390, MKTG 4270 or MKTG 4410. In addition to the 12 credit hours required for the major, Marketing students may take up to an additional 12 credit hours from the above list.

*Marketing students are also required to take STAT 2000 as one of their electives since it is a prerequisite for MKT 3220.

Operational Research/Operations Management

The Major consists of any 12 hours from MSCI 3400, OPM 3650, OPM 3660, OPM 3670, MSCI 4220, MSCI 4230, OPM 4620, and OPM 4630.

Prior to registration, all students enrolled in Operational Research/Operations Management should consult the Department Head or a Undergraduate Program Advisor for program planning advice.

4.3 Program Requirements for the Co-operative Education Option

4.3 Program Requirements for the Co-operative Education Option, All students must complete all 120 credit hours of the program including the Core, one of the Majors listed above in Section 4.2, as well as the Option and Elective course components. Students who intend to complete a Co-operative Education Option must also complete a minimum of three (3) 4-month work terms. Students admitted from September 2011 and who successfully complete the minimum three 3 work terms can combine the work terms together to satisfy 3 credit hours of Business Options. Complete details for entrance and continuing requirements may be obtained from the Undergraduate Program Office.

NOTE: Students admitted prior to September 2011 should refer to the 2010-2011 Undergraduate Calendar for a description of their program requirements.

4.4 Program Requirements for the Asper School of Business/Red River College Joint Program

4.4 Program Requirements for the Asper School of Business/Red River College Joint Program, Prior to admission to the Asper School of Business/Red River College Joint Program, students must complete the Business Administration Diploma (University Stream) at Red River College with a minimum cumulative grade point average of 3.00. Students must have graduated from the Diploma program within the last 5 years to be eligible for admission. Admission is limited and competitive. Following admission to the Asper School of Business, students in the Joint Program will be required to complete 66 credit hours to earn the Bachelor of Commerce (Honours) degree. The 66 credit hours can be divided into the following components: the Core, the Major, Business Options, and Electives. These components and their associated limits are defined below.

NOTE: Students admitted prior to September 2011 should refer to the 2010-2011 Undergraduate Calendar for a description of their program requirements.

NOTE: The Joint Program is currently under review; transfer credit details are subject to change.

The Core

The CORE comprises 30 credit hours of the 66 required in the Joint Program. The Foundation courses (6 credit hours) should be taken in the first year at the Asper School. Students must achieve a minimum "C" grade in each Foundation course. The Program Core courses (24 credit hours) may be taken at any point in the program, but the course GMGT 4010 must be taken in the student's final term. Core courses are listed below in the Course Requirements for RRC Joint Program Students.

The Major

Each student must complete the course requirements of one MAJOR. Each Major will consist of a 12 credit hour unit of course work. Information on completing a Second Major is listed in Section 3.12. The Majors are listed in Section 4.2.

Students may begin taking courses for their major as soon as prerequisites are met. Students have an opportunity to transfer from one Major to another, but this opportunity decreases as the student progresses in the program.

Note: Students in the Asper School of Business/Red River College Joint Program who want to major in Finance will be required to take FIN 2200 as one of their Business Options. Likewise, students who want to major in Management of Organizations must take GMGT 2060 as one of their Business Options.

Business Options

This component of the program consists of a required number of Business courses freely selected by the student. These courses are referred to as Business OPTIONS.

Students must take at least 12 credit hours of Business Options. Some students may want to take Business Options which will supplement their Major, whereas other students may prefer to broaden their educational base by selecting Business courses in another or several other Majors. Students who want to supplement their Majors may take up to 12 credit hours of their Business Options from that area. Students may complete a second Major as part of their Business Options requirements. Such students should consult with staff in the Undergraduate Program Office.

Electives

This component of the program is the ELECTIVE requirement. An elective is any three or six credit hour course freely chosen by the student from courses taught in the degree programs of other faculties and schools, excluding the Asper School of Business. Students must take at least 9 credit hours of Electives that meet the following criteria; a 3 credit hour course at the 2000 Level or higher, 3 credit hours must be a freely chosen course that meets the Written English "W" requirement at any level plus a 3 credit hour elective at any level.

Business Option or Elective

This component of the program consists of 3 credit hours which may be either a Business Option or Elective and it must be at the 2000 Level or higher.

Course Requirements for RRC Joint Program Students

The course requirements for the Asper School of Business/Red River College Joint Program are as follows.

Students should register for the Foundation courses in their first year at the University of Manitoba and must achieve a minimum "C" grade in each course.

Foundation Courses	Cr. Hrs
MATH 1520 or MATH 1500 (see Note 1)	3
Written English Course (see Note 2)	3
Program Core Requirements	
ACC 1110	3
MIS 2000	3
GMGT 1010	3
SCM 2160	3
GMGT 4010 (must be taken in final term)	3
Ethics (see Note 3)	3
Alternative Management Studies (see Note 4)	3
International Business (see Note 5)	3
Total Credit Hours	30

NOTES:

1) The prerequisite for MATH 1520 or MATH 1500 is a 60 per cent in Grade 12 Pre-Calculus Mathematics 40S or equivalent or a grade of "C" in the Mathematical Skills course taught by Extended Education. Students who have been admitted into the Asper School of Business/Red River College Joint Program and who successfully complete the Mathematical Skills course may be entitled to an additional three credit hour Elective from their Business Administration diploma.

2) Students are required to select a three credit hour course to satisfy the Written English "W" requirement. The "W" course for the Foundation course requirement must be from a specific discipline (ARTS 1110, GMGT 1010 and GMGT 2010 are not considered to be from a specific discipline and therefore do not fulfil the Track 1/Foundation Written English course requirement). Courses that satisfy the Written English requirement are listed in the chapter, General Academic Regulations and Policy.

3) All Management students must complete three credit hours of Ethics. Students may fulfil this requirement by completing one of the following courses: PHIL 2290 (6), PHIL 2750 (3), PHIL 2790 (6), PHIL 2830 (3), GMGT 3030 (3) or GMGT 3581 (3). If a 6 credit hour course is chosen, 3 credit hours will count toward the core Ethics requirement and 3 credit hours will count as Electives.

4) Alternative Management Requirement: One of the following must be chosen: ECON 2540, ECON 2630, ECON 3710, ECON 3810, ENVR 4110, GPE 2700, POLS 3220, POLS 3250, SOC 3870 or GMGT 4210. If a 6 credit hour course is chosen, 3 credit hours will count as Electives. Take careful note of any course prerequisites in your timetable planning.

5) International Business Requirement: One of the following courses must be chosen: ACT 4250, INTB 2200, FIN 3450, HRIR 4520, MKT 3300, MKT 3240 (Cross-Cultural Brand Management topic only) or SCM 3230.

4.5 Program Requirements for the Asper School of Business /Assiniboine Community College Joint Program

4.5 Program Requirements for the Asper School of Business /Assiniboine Community College Joint Program, Prior to admission to the Asper School of Business/Assiniboine Community College Joint Program students must complete the Business Administration Diploma (University Stream) at Assiniboine Community College with a minimum cumulative grade point average of 3.00. Students must have graduated from the Diploma program within the last 5 years to be eligible for admission. Admission is limited and competitive. Following admission to the Asper School of Business, students in the Joint Program will be required to complete 66 credit hours to earn the Bachelor of Commerce (Honours) degree. The 66 credit hours can be divided into the following components: the Core, the Major, Business Options, and Elective courses. These components and their associated limits are defined below.

NOTE: The Joint Program is currently under review; transfer credit details are subject to change.

NOTE: Students admitted prior to September 2011 should refer to the 2010-2011 Undergraduate Calendar for a description of their program requirements.

The Core

The CORE comprises 39 credit hours of the 66 required in the Joint Program. The Foundation courses (12 credit hours) should be taken in the first year in the Asper School. Students must achieve a minimum "C" grade in each Track 1/Foundation course. The Program Core courses (27 credit hours) may be taken at any point in the program, but the course GMGT 4010 must be taken in the student's final term. Core courses are listed below in Course Requirements for ACC Joint Program Students.

The Major

Each student must complete the course requirements of one MAJOR. Each Major will consist of a 12 credit hour unit of course work. Information on completing a Second Major is listed in Section 3.12. The Majors are listed Section 4.2.

Students may begin taking courses for their major as soon as prerequisites are met. Students have an opportunity to transfer from one Major to another, but this opportunity decreases as the student progresses in the program.

Note: Students in the Asper School of Business/Assiniboine Community College Joint Program who want to major in Finance will be required to take FIN 2200 as one of their Business options. Likewise, students who want to major in Marketing must take MKT 2210 as one of their Business Options.

Business Options

This component of the program consists of a required number of Business courses freely selected by the student. These courses are referred to as Business OPTIONS. Students must take 9 credit hours of Business Options. Some students may want to take Business Options which will supplement their Major, whereas other students may prefer to broaden their educational base by selecting Business courses in other Majors. Students who want to supplement their Majors may take up to 9 hours of their Business Options from that area. Students may complete a second Major as part of their Business Options requirements. Such students should consult with staff in the Undergraduate Program Office.

Electives

This component of the program is the ELECTIVE requirement. An Elective is any three or six credit hour course freely chosen by the student from courses taught in the degree programs of other faculties and schools, excluding the Asper School of Business. Students must 3 credit hours of Electives that is a freely chosen course that meets the Written English "W" requirement at any level.

Business Option or Elective

This component of the program consists of 3 credit hours which may be either a Business Option or Elective and it must be at the 2000 Level or higher.

Course Requirements for ACC Joint Program Students

The course requirements for the Asper School of Business/Assiniboine Community College Joint Program are as follows.

Students should register for the Track 1/Foundation courses in their first year at the University of Manitoba and must achieve a minimum "C" grade in each course.

Foundation Courses	Cr. Hrs.
6 credit hours from: ANTH, HIST, MATH, PHIL, POLS, PSYC OR SOC (See Note 1)	6
MATH 1520 or MATH 1500 (see Note 2)	3
Written English Course (see Note 3)	3
Program Core Requirements	
MIS 2000	3
GMGT 2060	3
GMGT 1010	3
MSCI 2150	3
SCM 2160	3
GMGT 4010 (must be taken in final term)	3
Ethics (see Note 4)	3
Alternative Management Studies (see Note 5)	3
International Business (see Note 6)	3
Total Credit Hours	39

NOTES:

1) 6 credit hours from: Anthropology, History, Mathematics, Philosophy, Political Studies, Psychology, or Sociology. Courses chosen for this requirement must be independent from courses taken to fulfill other degree requirements.

2) The prerequisite for MATH 1520 or MATH 1500 is 60 per cent in Grade 12 Pre-Calculus Mathematics 40S or equivalent or a grade of "C" in the Mathematical Skills course taught by Extended Education. Students who have been admitted into the Asper School of Business/ Assiniboine Community College Joint Program and who successfully complete the Mathematical Skills course may be entitled to an additional three credit hour Elective from their Business Administration diploma.

3) Students are required to select a three credit hour course to satisfy the Written English “W” requirement. The “W” course for the Foundation course requirement must be from a specific discipline (ARTS 1110, GMGT 1010 and GMGT 2010 are not considered to be from a specific discipline and therefore do not fulfil the Track 1/Foundation Written English course requirement). Courses that satisfy the Written English requirement are listed in the chapter, General Academic Regulations and Policy.

4) All Business students must complete three credit hours of Ethics. Students may fulfil this requirement by completing one of the following courses: PHIL 2290 (6), PHIL 2750 (3), PHIL 2790 (6), PHIL 2830 (3), , GMGT 3030 (3) or GMGT 3581 (3). If a 6 credit hour course is chosen, 3 credit hours will count toward the core Ethics requirement and 3 credit hours will count as Electives.

5) Alternative Management Requirement: One of the following must be chosen: ECON 2540, ECON 2630, ECON 3710, ECON 3810, ENVR 4110, GPE 2700, POLS 3220, POLS 3250, SOC 3870 or GMGT 4210. If a 6 credit hour course is chosen, 3 credit hours will count as Electives. Take careful note of any course prerequisites in your timetable planning.

6) International Business Requirement: One of the following courses must be chosen: ACT 4250, INTB 2200, FIN 3450, HRIR 4520, MKT 3300, MKT 3240 (Cross-Cultural Brand Management topic only) or SCM 3230.

4.6 Program Requirements for the Asper School of Business /University College of the North Joint Program

4.6 Program Requirements for the Asper School of Business /University College of the North Joint Program,
Prior to admission to the Asper School of Business/University College of the North Joint Program students must complete the Business Administration Diploma (University Stream) at University College of the North with a minimum cumulative grade point average of 3.00. Students must have graduated from the Diploma program within the last 5 years to be eligible for admission. Admission is limited and competitive. Following admission to the Asper School of Business, students in the Joint Program will be required to complete 81 credit hours to earn the Bachelor of Commerce (Honours) degree. The 81 credit hours can be divided into the following components: the Core, the Major, Business Options, and Electives. These components and their associated limits are defined below.

NOTE: The Joint Program is currently under review; transfer credit details are subject to change.

NOTE: Students admitted prior to September 2011 should refer to the 2010-2011 Undergraduate Calendar for a description of their program requirements.

The Core

The CORE comprises 39 credit hours of the 81 required in the Joint Program. The Foundation courses (15 credit hours) should be taken in the first year in the Asper School. Students must achieve a minimum “C” grade in each Foundation course. The Program Core courses (24 credit hours) may be taken at any point in the program, but the course GMGT 4010 must be taken in the student's final term. Core courses are listed below in Course Requirements for UCN Joint Program Students

The Major

Each student must complete the course requirements of one MAJOR. Each Major will consist of a 12 credit hour unit of course work. Information on completing a Second Major is listed in Section 3.12. The Majors are listed in Section 4.2.

Students may begin taking courses for their major as soon as prerequisites are met. Students have an opportunity to transfer from one Major to another, but this opportunity decreases as the student progresses in the program.

Note: Students in the Asper School of Business/University College of the North Joint Program who want to major in Finance will be required to take FIN 2200 as one of their Business Options. Likewise, students who want to major in Marketing must take MKT 2210 as one of their Business Options.

Business Options

This component of the program consists of a required number of Business courses freely selected by the student. These courses are referred to as Business OPTIONS. Students must take 15 credit hours of Business Options. Some students may want to take Business Options which will supplement their Major, whereas other students may prefer to broaden their educational base by selecting Business courses in other Majors. Students who want to supplement their Major may take up to 12 hours of their Business Options from that area. Students may complete a second Major as part of their Business Options requirements. Such students should consult with staff in the Undergraduate Program Office.

Electives

This component of the program is the ELECTIVE requirement. An Elective is any three or six credit hour course freely chosen by the student from courses taught in the degree programs of other faculties and schools, excluding the Asper School of Business. Students must take 12 credit hours of Electives that meet the following criteria; 6 credit hours must be at the 2000 Level or higher, 3 credit hours must be a freely chosen course that meets the Written English “W” requirement at any level plus a 3 credit hour elective at any level.

Business Option or Elective

This component of the program consists of 3 credit hours which may be either a Business Option or Elective and it must be at the 2000 Level or higher.

Course Requirements for UCN Joint Program Students

The course requirements for the Asper School of Business/University College of the North Joint Program are as follows.

Students should register for the Foundation courses in their first year at the University of Manitoba and must achieve a minimum “C” grade in each course.

Foundation Courses	Cr. Hrs.
6 credit hours from: ANTH, HIST, MATH, PHIL, POLS, PSYC OR SOC (See Note 1)	6
MATH 1520 or MATH 1500 (see Note 2)	3
Written English Course (see Note 3)	3
STAT 1000	3
Program Core Requirements	
MIS 2000	3
GMGT 1010	3
MSCI 2150	3
SCM 2160	3
GMGT 4010 (must be taken in final term)	3
Ethics (see note 4)	3

Alternative Management Studies (see Note 5)	3
International Business (see Note 6)	3
Total Credit Hours	39

NOTES:

1) 6 credit hours from: Anthropology, History, Mathematics, Philosophy, Political Studies, Psychology, or Sociology. Courses chosen for this requirement must be independent from courses taken to fulfill other degree requirements.

2) The prerequisite for MATH 1520 or MATH 1500 is a 60 per cent in Grade 12 Pre-Calculus Mathematics 40S or equivalent or a grade of “C” in the Mathematical Skills course taught by Extended Education. Students who have been admitted into the Asper School of Business/University College of the North Joint Program and who successfully complete the Mathematical Skills course may be entitled to an additional three credit hour Elective from their Business Administration diploma.

3) Students are required to select a three credit hour course to satisfy the Written English “W” requirement. The “W” course for the Foundation course requirement must be from a specific discipline (ARTS 1110, GMGT 1010 and GMGT 2010 are not considered to be from a specific discipline and therefore do not fulfil the Track 1/Foundation Written English course requirement). Courses that satisfy the Written English requirement are listed in the chapter, General Academic Regulations and Policy.

4) All Business students must complete three credit hours of Ethics. Students may fulfil this requirement by completing one of the following courses: PHIL 2290 (6), PHIL 2750 (3), PHIL 2790 (6), PHIL 2830 (3), GMGT 3030 or GMGT 3581 (3). If a 6 credit hour course is chosen, 3 credit hours will count toward the core Ethics requirement and 3 credit hours will count as Electives.

5) Alternative Management Requirement: One of the following must be chosen: ECON 2540, ECON 2630, ECON 3710, ECON 3810, ENVR 4110, GPE 2700, POLS 3220, POLS 3250, SOC 3870 or GMGT 4210. If a 6 credit hour course is chosen, 3 credit hours will count as Electives. Take careful note of any course prerequisites in your timetable planning.

6) International Business Requirement: One of the following courses must be chosen: ACT 4250, INTB 2200, FIN 3450, HRIR 4520, MKT 3300, MKT 3240 (Cross-Cultural Brand Management topic only) or SCM 3230.

4.7 Program Requirements for the Asper School of Business /École technique et professionnelle joint program

4.7 Program Requirements for the Asper School of Business /École technique et professionnelle joint program,
 Prior to admission to the Asper School of Business/École technique et professionnelle Joint Program students must complete the Business Administration Diploma (University Stream) at École technique et professionnelle with a minimum cumulative grade point average of 3.00. Students must have graduated from the Diploma program within the last 5 years to be eligible for admission. Admission is limited and competitive. Following admission to the Asper School of Business, students in the Joint Program will be required to complete 66 credit hours to earn the Bachelor of Commerce (Honours) degree. The 66 credit hours can be divided into the following components: the Core, the Major, Business Options, and Electives. These components and their associated limits are defined below.

NOTE: Students admitted prior to September 2011 should refer to the 2010-2011 Undergraduate Calendar for a description of their program requirements.

The Core

The CORE comprises 36 credit hours of the 66 required in the Joint Program. The Foundation courses (12 credit hours) should be taken in the first year in the Asper School. Students must achieve a minimum “C” grade in each Foundation course. The Program Core courses (24 credit hours) may be taken at any point in the program, but the course GMGT 4010 must be taken in the student’s final term. Core courses are listed below in Course Requirements for ETP Joint Program Students.

The Major

Each student must complete the course requirements of one MAJOR. Each Major will consist of a 12 credit hour unit of course work. Information on completing a Second Major is listed in Section 3.12. The Majors are listed in Section 4.2.

Students may begin taking courses for their major as soon as prerequisites are met. Students have an opportunity to transfer from one Major to another, but this opportunity decreases as the student progresses in the program.

Note: Students in the Asper School of Business/École technique et professionnelle joint program who want to major in Finance will be required to take FIN 2200 as one of their Business Options.

Business Options

This component of the program consists of a required number of Business courses freely selected by the student. These courses are referred to as Business OPTIONS. Students must take at least nine and not more than 9 hours of Business Options. Some students may want to take Business Options which will supplement their Major, whereas other students may prefer to broaden their educational base by selecting Business courses in other Majors. Students who want to supplement their Majors may take up to 9 hours of their Business Options from that area. Students may complete a second Major as part of their Business Options requirements. Such students should consult with staff in the Undergraduate Program Office.

Electives

This component of the program is the ELECTIVE requirement. An Elective is any three or six credit hour course freely chosen by the student from courses taught in the degree programs of other faculties and schools, excluding the Asper School of Business. Students must take at least six credit hours of Electives that meet the following criteria: 3 credit hours must be at the 2000 Level or higher and 3 credit hours must be a freely chosen course that meets the Written English “W” requirement at any level.

Business Option or Elective

This component of the program consists of 3 credit hours which may be either a Business Option or Elective but it must be at the 2000 Level or higher.

Course Requirements for ETP Joint Program Students

The course requirements for the Asper School of Business/École technique et professionnelle Joint Program are as follows.

Students should register for the Foundation courses in their first year at the University of Manitoba and must achieve a minimum “C” grade in each course.

Foundation Requirements	Cr. Hrs.
6 credit hours from: ANTH, HIST, MATH, PHIL, POLS, PSYC OR SOC (See Note 1)	6
MATH 1520 or MATH 1500 (see Note 2)	3
Written English Course/Elective (see Note 3)	3

Program Core Requirements	
MIS 2000	3
GMMT 1010	3
MSCI 2150	3
SCM 2160	3
GMMT 4010 (must be taken in final term)	3
Ethics (see note 4)	3
Alternative Management Studies (see Note 5)	3
International Business (see Note 6)	3
Total Credit Hours	36

NOTES:

1) 6 credit hours from: Anthropology, History, Mathematics, Philosophy, Political Studies, Psychology, or Sociology. Courses chosen for this requirement must be independent from courses taken to fulfill other degree requirements.

2) The prerequisite for MATH 1520 or MATH 1500 is a 60 per cent in Grade 12 Pre-Calculus Mathematics 40S or equivalent or a grade of “C” in the Mathematical Skills course taught by Extended Education. Students who have been admitted into the Asper School of Business/École technique et professionnelle Joint Program and who successfully complete the Mathematical Skills course may be entitled to an additional three credit hour Elective from their Business Administration diploma.

3) Students are required to select a three credit hour course to satisfy the Written English “W” requirement. The “W” course for the Foundation course requirement must be from a specific discipline (ARTS 1110, GMMT 1010 and GMMT 2010 are not considered to be from a specific discipline and therefore do not fulfil the Track 1/Foundation Written English course requirement). Courses that satisfy the Written English requirement are listed in the chapter, General Academic Regulations and Policy.

4) All Business students must complete three credit hours of Ethics. Students may fulfil this requirement by completing one of the following courses: PHIL 2290 (6), PHIL 2750 (3), PHIL 2790 (6), PHIL 2830 (3), GMMT 3030 or GMMT 3581 (3). If a 6 credit hour course is chosen, 3 credit hours will count toward the core Ethics requirement and 3 credit hours will count as Electives.

5) Alternative Management Requirement: One of the following must be chosen: ECON 2540, ECON 2630, ECON 3710, ECON 3810, ENVR 4110, GPE 2700, POLS 3220, POLS 3250, SOC 3870 or GMMT 4210. If a 6 credit hour course is chosen, 3 credit hours will count as Electives. Take careful note of any course prerequisites in your timetable planning.

6) International Business Requirement: One of the following courses must be chosen: ACT 4250, INTB 2200, FIN 3450, HRIR 4520, MKT 3300, MKT 3240 (Cross-Cultural Brand Management topic only) or SCM 3230.

SECTION 1: Degree Programs Offered

1.1 Programs,

Program/Degree	Years to Complete	Total Credit Hours
Master of Occupational Therapy (M.O.T.)	Regular Program: 2 years*	107
	Accelerated Program: 1 year**	12
Bachelor of Medical Rehabilitation (Physical Therapy) (B.M.R.(P.T.))***	4 years (University 1 plus 3 years)	140
Bachelor of Medical Rehabilitation (Respiratory Therapy) (B.M.R.(R.T.))	Regular Program: 4 years (University 1 plus 3 years)	109
	Degree Completion Program: 5 years	30

* Requires prior completion of a 3 or 4-year undergraduate degree.

** Requires prior completion of a Bachelor of Medical Rehabilitation (Occupational Therapy) degree or equivalent.

*** The Department of Physical Therapy has received approval to proceed with its proposal for a degree change in which the B.M.R. (P.T.) program will be replaced by a new graduate program, Master of Physical Therapy (M.P.T.). Effective immediately, no new students will be accepted into the B.M.R. (P.T.) program. The first intake into the M.P.T. degree program will occur in Fall 2012. Interested students are encouraged to check for updates posted on our website as they become available at umanitoba.ca/medrehab/pt/index.html.

1.2 Professional Designations, Master of Occupational Therapy (M.O.T.)

Graduates from the Master of Occupational Therapy Program have the professional designation M.O.T. It is important to note that occupational therapy is a regulated health profession, by law. To be eligible for employment in Manitoba, graduates must register with the College of Occupational Therapists of Manitoba (COTM) and must successfully complete the Canadian Association of Occupational Therapists (CAOT) National Certification Examination. Regulations are similar in most other Canadian provinces, in that students must be registered with the regulatory body in that jurisdiction and must pass the CAOT National Certification Exam. Writing of the national exam is scheduled twice a year. The University occupational therapy department provides a list of potential MOT graduates to CAOT to verify their eligibility to write the National Certification Exam. Newly-educated occupational therapists are eligible for registration with COTM (or other provincial regulatory body) and for employment prior to convocation and/or writing the national exam, provided they have successfully completed all academic and fieldwork requirements for the MOT program, and have provided the appropriate personnel at the regulatory body with a letter of verification from the Head of the Department of Occupational Therapy (students must request these letters). For information on the registration process in Manitoba, you can visit the COTM web site at www.cotm.ca or contact them by calling 957-1214. Other provinces have similar provisions to allow some form of registration and thus employment prior to convocation. A listing of provincial regulatory organizations is available from COTM (957-1214) and posted at SMR, or can be found at www.caot.ca/default.asp?changeID=63&pageID=50.

The Occupational Therapy program maintains accreditation through the Canadian Association of Occupational Therapists and a 7-year accreditation was received in 2005.

Bachelor of Medical Rehabilitation (Physical Therapy) (B.M.R.(P.T.))

Employment Following Senior Internship: New graduate physiotherapists will be allowed to register to practice under the mentorship of a graduate physiotherapist prior to completion of the PCE and prior to convocation from the university under the following procedure:

1. Following successful completion of all academic and clinical coursework, the Department Head, Physical Therapy will notify the College Registrar that the student has completed all of the academic requirements for graduation.
2. The new graduate will be eligible to register with the regulatory college on the Examination Candidate Register to practice under mentorship once the new graduate has:
 - a) successfully completed Part 1 (The Qualifying Examination) of the PCE;
 - b) provided evidence of professional liability insurance coverage;
 - c) completed the registration form and paid the registration fees;
 - d) provided the Registrar with the name of a currently registered physiotherapist who has agreed to serve as the applicant's mentor.
3. The graduate is expected to complete the PCE at the next available session.

Once the new graduate has successfully completed Part 2 of the PCE and has provided the Registrar with a copy of his/her Baccalaureate degree, the Registrar will place the graduate's name on the Active Practice Register and the graduate will be entitled to practice independently.

The Physical Therapy program was awarded ongoing accreditation status until 2015 from the Accreditation Council for Canadian Physiotherapy Academic Programs (ACCPAP).

Bachelor of Medical Rehabilitation (Respiratory Therapy) (B.M.R.(R.T.))

Respiratory Therapists are able to work throughout Canada after graduation from a Council on Accreditation in Respiratory Therapy accredited (CoARTE) educational program and successful completion of the credentialing examination produced by the Canadian Board for Respiratory Care (CBRC). In keeping with the current strategic mandate of Human Resources Development Canada, Canadian Registered Respiratory Therapists are mobile under the terms of the Agreement on Internal Trade. Only the Canadian Society of Respiratory Therapists (CSRT) has the right to confer the title of Registered Respiratory Therapist (RRT) by virtue of a candidate's successful completion of the national certification examinations. The examination produced by the CBRC is recognized both nationally and internationally. In order to write the CBRC examination, applicants must have graduated from a respiratory therapy educational program in Canada, which has been accredited by CoARTE. Writing of the national exam is scheduled twice a year. The University respiratory therapy department provides a list of potential program graduates to the CBRC in order to verify eligibility to write the national certification exam. Further information regarding the national certification exam can be found at <http://www.csrt.com/en/education/index.asp>.

Students admitted into the program of studies in respiratory therapy should note carefully that while the University of Manitoba, School of Medical Rehabilitation may admit students to its course of studies, the right to practice as a respiratory therapist is granted only through the appropriate authority of the province concerned, through a process of licensure. To be eligible for employment in Manitoba, graduates must register with the Manitoba Association of Registered Respiratory Therapists (MARRT). Regulations are similar in most other provinces in that the students must pass the CBRC examination and be registered with the regulatory body in that jurisdiction. Further information regarding registration in Manitoba can be found at <http://www.marrrt.org/index.jsp?p=membership>. Students are highly encouraged to become student members of both provincial and national professional associations.

The Respiratory Therapy program maintains accreditation through the Council on Accreditation of Respiratory Therapy Education (CoARTE). Accreditation was most recently awarded in 2007 for a 5-year term.

SECTION 2: Admission Requirements

Intro Medical Rehab Section 2,

The following is a summary of the admission requirements. Equivalent academic courses completed at the University of Manitoba or recognized universities elsewhere will be considered. All admission requirements, as well as application deadline dates and forms, are included in applicant information packages that are available from the School of Medical Rehabilitation general office, R106-771 McDermot Avenue, Bannatyne Campus. P.T. and R.T. info can also be obtained from the [Admissions Office](#), Enrolment Services, 424 University Centre. This information is also posted on the university's website.

2.1 Course Requirements: Occupational Therapy , Regular Program

Completion of a previous undergraduate degree, minimum B average in last 60 credit hours of study, completion of all program prerequisite courses or approved alternates with no grade in prerequisites below a B. Prerequisite courses include all of the courses listed below or equivalents* approved by the M.O.T. Admissions Committee:

Basic Statistical Analysis

Anatomy of the Human Body

Physiology of the Human Body

Minimum 3 credit hours in Behavioural Sciences

Minimum 3 credit hours in Social Sciences

*A list of prerequisite courses and equivalents is available at

www.umanitoba.ca/medrehab/ot/ot_prerequisite.html

Accelerated Option

Completion of a B.M.R.(O.T.) degree or equivalent, minimum B average in the last 60 credit hours of the degree, completion of an additional 42 credit hours of non-O.T. degree credits, and evidence of having passed the Canadian Association of Occupational Therapists (C.A.O.T.) certification examination and/or eligibility for registration in Manitoba by the College of Occupational Therapists of Manitoba (C.O.T.M.).

2.2 Course Requirements: Physical Therapy,

The Department of Physical Therapy has received approval to proceed with its proposal for a degree change in which the B.M.R.(P.T.) program will be replaced by a new graduate program, Master of Physical Therapy (M.P.T.). Effective immediately, no new students will be accepted into the B.M.R.(P.T.) program. The first intake into the M.P.T. degree program will occur in Fall 2012. Interested students are encouraged to check for updates posted on our website as they become available at umanitoba.ca/medrehab/pt/index.html.

Both BIOL 1020 and BIOL 1030 Biology 1 & 2, or both BIOL 1000 and BIOL 1010 Biology, or both BIOL 1410 and BIOL 1412 Human Anatomy and Physiology (or BIOL 2410 and BIOL 2420 Physiology 1 & 2 in lieu of BIOL 1412)

PSYC 1200 Introduction to Psychology

3 credit hour course to satisfy the written English requirement

6-9 credit hours of electives to total 24 credit hours in University 1

Admission criteria for the M.P.T. program can be found at:

http://www.umanitoba.ca/faculties/medicine/units/medrehab/pt/pt_mpt_eligibility.html.

Other requirements: Physical Therapy (B.M.R.(P.T.))

Minimum GPA required for consideration: 3.0. Minimum GPA of 3.0 in core courses.

The written English requirement must be satisfied in University 1; the mathematics requirement is satisfied after admission to Physical Therapy by the required course, REHB 2460.

Selection criteria: 50% interview and 50% Adjusted Grade Point Average. Volunteer experiences are strongly recommended prior to application.

While Physical Therapy does not require specific high school courses, Biology 40S and either Physics 40S or Chemistry 40S are required in order to take Biology 1: Principles and Themes (BIOL 1020), which is a required course option for admission. English 40S and Math 40S are highly recommended.

Undergraduate Studies

2.3 Course Requirements: Respiratory Therapy , Regular Program

BIOL 1020 and BIOL 1030 Biology 1 & 2, or both BIOL 1000 and BIOL 1010 Biology

SOC 1200 Introduction to Sociology, or PSYC 1200 Introduction to Psychology

STAT 1000 Introductory Statistics

3 credit hour course to satisfy the written English requirement

6 credit hours of electives to total 24 credit hours in University 1

Other requirements: Respiratory Therapy

Minimum GPA required for consideration: 3.0. Minimum GPA required in core courses: 3.0.

The written English and mathematics requirement must be satisfied in University 1. For students admitted prior to 2011, the mathematics requirement is satisfied after admission to Respiratory Therapy by required course REHB 2460.

While Respiratory Therapy does not require specific high school courses, Biology 40S and either Physics 40S or Chemistry 40S are required in order to take Biology 1: Principles and Themes (BIOL 1020), which is a required course option for admission. English 40S and Math 40S are highly recommended.

Selection Criteria: 67% Grades and 33% Interview.

Degree Completion Program

In addition to the regular degree program in Respiratory Therapy, the School offers a degree completion program. Generally, individuals who have attained a diploma in respiratory therapy from an accredited program of studies in Canada, who are actively involved in the practice of the profession, and who demonstrate an interest in continuing their studies in this field, will be accepted. The degree completion program requires a minimum of 30 credit hours of study to be determined by the student in consultation with the department head and/or faculty advisor.

SECTION 3: Faculty Academic Regulations

3.1 General,

Occupational Therapy

Program requirements are those of the Faculty of Graduate Studies. MOT Program Supplemental Regulations are available on the School of Medical Rehabilitation website (www.umanitoba.ca/medrehab/media/supplementary_regulations.pdf).

Physical Therapy and Respiratory Therapy

The provisions of the chapter, General Academic Regulations and Requirements, and the chapter, University Policies, apply to all students. In addition, the School of Medical Rehabilitation has regulations and requirements, published below, that apply specifically to its' students.

Policies with regard to admissions, selection, academic progression of the student, compulsory attendance, examination procedures, supplemental examination procedures, and withdrawal dates are in force and are on file in the general office of the School of Medical Rehabilitation.

3.2 Health Requirements,

Students in all departments are required to provide a health history and immunization record. A student will not be permitted to attend fieldwork/clinical placements until all health, immunization, CPR and mask fit requirements are current.

Immunizations

Standard Health Record Form Packages are sent to new students in Occupational Therapy, Physical Therapy and Respiratory Therapy upon acceptance into the programs. New students in Occupational Therapy, Physical Therapy and Respiratory Therapy are required to return forms to their respective departments by the dates published yearly in the Health Record Form Packages. Returning students in all three programs are required annually to review and update immunizations as necessary.

Cardiopulmonary Resuscitation Certification

All students of the Department of Occupational Therapy are required to obtain certification in cardiopulmonary resuscitation. Certification must be at the Basic Rescuer Level. New students in the program must provide proof of certification within the first 2 weeks of classes of the academic year in which they commence classes. This certification must have an issue date on or after July 1 of the year the student commences classes in the program. Second year students must provide proof of re-certification by October 1 of their second year in the program. This certification must have an issue date during or after the last week of August of the current year. Certification must remain current for all fieldwork experiences.

All students (both new and returning) in the Department of Physical Therapy are required to obtain certification in cardiopulmonary resuscitation annually. Certification must be at the Basic Rescuer Level. Proof of certification must be provided by October 1 and must not have an issue date prior to the last week of August of the current year. This will ensure that the certification remains current until the end of the clinical placement period for each year of the program.

All students (both new and returning) in the Department of Respiratory Therapy are required to obtain certification in cardiopulmonary resuscitation annually. Certification must be at the Basic Life Support (BLS) for Healthcare Providers. Students in year 1 and 2 of the program will be required to provide proof of certification by September 1. Students in year 3 of the program will be required to provide proof of certification before the first day of their fieldwork placement. For students in all years of the program, proof of certification must not have an issue date prior to the last week in June of the current year. This will ensure that the certification remains current until the end of the clinical education period for each year in the program.

Mask Fit Certification

Clinical/fieldwork education sites require students to maintain mask fit certification. Information on acquiring this certification is provided to new students with the Health Record Form Packages. All students are required to maintain mask fit certification throughout the program.

3.3 Dean's Honour List,

Undergraduate Students (Physical Therapy and Respiratory Therapy)

Students carrying a full course load, with a sessional Grade Point Average of 3.7 or higher and have not done resit or supplemental exams, are placed on the Dean's Honour List.

3.4 Attendance,

Regular attendance is expected of all students in all courses. Prior permission is required for any anticipated absences. Students absent from class due to illness may be required to present a certificate from a physician. Unexcused absence from an

examination may result in a grade of zero for that examination. Make-up examinations may be allowed under special circumstances.

3.5 Criminal Record Check and Child Abuse Registry Check,

Students are advised that clinical/fieldwork education sites require that students complete a Criminal Record Check and a Child Abuse Registry Check.

New students in the Master of Occupational Therapy program must provide results of a Child Abuse Registry Check and a Criminal Record Check within the first 2 weeks of classes of the academic year in which they commence classes. Both checks must have an issue date after July 1 of the year the student commences classes in the program. Second year students must provide updated results by October 1 of their second year in the program. Both checks must have an issue date during or after the last week of August of the current year.

All physical therapy students are required to obtain a formal Criminal Record Check and a formal Child Abuse Registry Check by October 1 of each year of the program. Both documents must not have an issue date prior to the last week of August of the current year, to ensure that they remain current until the end of the clinical placement period for each year of the program. Additionally, new students are required to complete a criminal record self-declaration form at the time of application to the program.

All respiratory therapy students are required to obtain a formal Criminal Record Check and a formal Child Abuse Registry Check by August 15 of each year of the program. These records must have been issued within the ninety (90) days previous to that date to ensure that they remain current until the end of the clinical education period for each year of the program.

SECTION 4: Program and Graduation Requirements

Students may not obtain any grade lower than "C" in all required courses.

4.2 Clinical/Fieldwork Education, **Occupational Therapy**

See University of Manitoba Graduate Calendar for descriptions of courses in the Master of Occupational Therapy (M.O.T.) program.

Physical Therapy

1,200 full-time hours of clinical/practical experience are required. Clinical placements are conducted from January to March for the first year of the program, and from March to August for the second and third years of the program. Placements occur primarily in locations in Manitoba, Saskatchewan, northwest Ontario and Kivalliq Region of Nunavut. Students are advised to take into account the financial implications of the summer placement requirements of the B.M.R.(P.T.) program. All students should be prepared to be placed outside of Winnipeg for a minimum of one placement.

Respiratory Therapy

1,600 full-time hours of clinical/fieldwork experience are required. Clinical placements are integrated throughout the three academic years with the majority of the clinical placements occurring in Year 3, the internship year. Placements during the regular academic year all take place within greater Winnipeg. Placements occur within a variety of hospital, public and private settings. (Refer to start and end dates for all years of the program.)

SECTION 5: Course Descriptions-Occupational Therapy

OT 4130 Re-Entry Fieldwork

(Formerly 168.413) Self-directed period of fieldwork preparation followed by a seven-week fieldwork education experience under the supervision of a licensed occupational therapist. Course evaluated on a pass/fail basis. Prerequisites: an earned degree in occupational therapy, permission of Head of Department of Occupational Therapy.

OT 6100 Human Determinants of Occupational Performance
(Formerly 168.610) Students study the anatomical, physiological, biomechanical, and psychosocial factors that underlie the physical, cognitive and affective components of human capacities. Content is presented in the context of understanding the relationship between human capacities and occupational performance, the ability to carry out activities and tasks of self-care, productivity and leisure throughout the lifespan.

OT 6110 Theoretical and Philosophical Foundations of Occupational Therapy

(Formerly 168.611) Students study the theoretical and philosophical foundations of occupational therapy and the relationship between occupation and health and well-being. A case based introduction to the processes and approaches that guide practice with clients of various ages and in a variety of practice settings.

OT 6120 Health and Disability

(Formerly 168.612) Students study definitions of health, factors influencing health, and systems that relate to health in populations. Students are also introduced to classification of diseases and disorders and impairments and the disablement process.

OT 6130 Occupational Therapy Practice Skills 1

(Formerly 168.613) Through instruction, case illustration and practice laboratory sessions students are introduced to practice skills related to the occupational therapy process. Occupational therapy skills and approaches used to identify occupational performance issues are introduced and practiced. Basic assessment of physical, cognitive, and affective performance components are taught. Students participate in problem solving and basic interventions around issues of occupational performance.

OT 6140 Enabling and Professional Development Skills

(Formerly 168.614) An introduction to the development of personal knowledge, skills and attitudes related to enabling occupation in clients, and to promoting professional behaviours for safe, reliable and ethical practice. Emphasis will be placed on the development of a variety of verbal and written communications skills, and clinical/professional reasoning.

OT 6190 Fieldwork Preparation

This course provides foundational knowledge and skills required to participate effectively in the fieldwork component of the Occupational Therapy Program.

Course evaluated on a pass/fail basis.

OT 6200 Basic Fieldwork

(Formerly 168.620) Students are placed in practice settings for four weeks of field experience under the supervision of a registered Occupational Therapist. Experiences are offered in a wide variety of Field sites in Manitoba, Saskatchewan and northwestern Ontario. Evaluated at an introductory level. Course evaluated on a pass/fail basis. Prerequisite: OT 6190.

OT 6300 Occupational Analysis and Adaptation

(Formerly 168.630) An in-depth examination of the relationship between components of human performance and engagement in occupations throughout the lifespan. Students analyze self-care, productivity and leisure occupations to identify physical, cognitive and affective components required for function. Principles and methods of adaptation and grading of occupation, task, activity, equipment and environment will be introduced.

OT 6310 The Environment and Occupational Performance

(Formerly 168.631) An examination of physical, social, cultural and institutional aspects of the environment and their relationship to occupational performance throughout the life span. Students will begin to identify the environment in terms of enablers and obstacles to function for individuals with variable capacities.

OT 6320 Health Conditions and Occupational Performance

(Formerly 168.632) An introduction to diseases, disorders and impairments as barriers to human occupational performance including an introduction to occupational therapy management approaches to enabling function.

OT 6330 Occupational Therapy Practice Skills 2

(Formerly 168.633) This course builds on OT Practice Skills 1. With a focus on practice skills related to the occupational therapy process, students gain further practice in assessment of occupational performance issues and physical, cognitive, and affective performance components. Students are introduced to assessment of environmental factors that influence occupational performance and participate in problem solving and interventions around occupational performance issues.

OT 6350 Research Methods for Evidence-Based Practice

(Formerly 168.635) This course is a theory and practical course designed to provide a basic understanding of research principles and methods, evidence-based practice, outcome measures, program evaluation and their applications in occupational therapy.

OT 6400 Intermediate Fieldwork 1

Students are placed in practice settings for eight weeks of field experience under the supervision of a registered occupational therapist. Experiences are offered in a wide variety of field sites in Manitoba, Saskatchewan and northwestern Ontario. Evaluated at an intermediate 1 level (pass/fail grade).

OT 7540 Advanced Enabling and Professional Development Skills 1

(Formerly 168.754) Builds on Enabling and Professional Development 1&2. Emphasis is placed on the integration and consolidation of professional practice knowledge, skills and attitudes.

OT 7560 Occupational Therapy Process Across the Lifespan 1

(Formerly 168.756) Using problem-based learning methods, students study and apply the occupational therapy process as it relates to selected learning scenarios involving children, adolescents, adults and older adults. Students work in small group tutorials exploring and discussing a variety of issues frequently faced by individuals who may benefit from occupational therapy services.

OT 7570 Advanced Practice in OT 1

(Formerly 168.757) Building on knowledge and skills learning in Practice Skills 1 and 2, students are introduced to advanced concepts, theories and models that guide client-centered occupational therapy evaluation and intervention. Students learn to apply theory to practice and continue developing required skills for the evaluation and intervention of occupational performance issues across the lifespan.

OT 7600 Intermediate Fieldwork 2

(Formerly 168.760) Students are placed in practice settings for eight weeks of field experience under the supervision of a registered occupational therapist. Experiences are offered in a wide variety of field sites. Evaluated at an intermediate 2 level

(pass/fail grade).

OT 7740 Advanced Enabling and Professional Development Skills 2

(Formerly 168.774) Builds on previous Enabling and Professional Development courses. Emphasis is placed on leadership skills and preparation for entry into the professional community.

OT 7750 Independent Study

(Formerly 168.775) Students complete an in-depth study of evidence for practice in an area of interest. Students will work with an assigned faculty advisor or clinical research consultant to define and evaluate a particular area of interest in occupational therapy practice.

OT 7760 Occupational Therapy Process Across the Lifespan 2

(Formerly 168.776) Using problem-based learning methods and self-directed learning, students study and apply the occupational therapy process as it relates to selected learning scenarios involving children, adolescents, adults and older adults. Students work in small group tutorials exploring and discussing a variety of issues frequently faced by individuals, groups and communities who may benefit from occupational therapy services.

OT 7770 Advanced Practice in OT 2

Building on knowledge, skills and attitudes learned in Advanced Practice in OT 1, students employ and evaluate concepts, theories and models of client-centred occupational therapy. Students develop skills that enable them to select, justify, and interpret appropriate evaluation methods and interventions to address occupational performance issues across the lifespan.

OT 7800 Advanced Fieldwork

(Formerly 168.780) Students are placed in practice settings for a six week period which can occur in a flexible time frame (i.e. students may initiate this placement at different points in time from July 1 to mid August depending upon availability of placements. Students may participate in part-time experiences over a longer period or other types of flexible arrangements as may arise and are determined to be appropriate learning experiences to meet educational standards). Experiences are offered in a wide variety of field sites. Evaluated at an advanced level (pass/fail grade).

SECTION 5: Course Descriptions-Physical Therapy

PT 1700 Psychosocial Issues

(Formerly 167.170) A general course to provide an overview of psychosocial behaviour and the implication for physiotherapy practice. 75 hours.

PT 1730 Physical Therapy Management

(Formerly 167.173) A theory and practical course on applying physical therapy techniques to patients with cardio and respiratory disorders. 166 hours.

PT 1740 Cardiorespiratory Clinical Education

(Formerly 167.174) Consists of an introductory period of clinical practice and specific practice related to the management of cardiorespiratory conditions. Course evaluated on a pass/fail basis. 245 hours.

PT 1750 Rehabilitation Exercise 1

(Formerly 167.175) Consists of lecture, tutorials, and practical sessions focused on topics of exercise physiology, fitness testing and training and rehabilitation exercise skills related to the healthy adult and selected patient populations. 105 hours.

PT 1910 Pathology and Clinical Manifestations

(Formerly 167.191) A theory course including the basic principles of pathology and microbiology; the natural history, pathology, clinical manifestations, management and prognosis of patients with disorders of the cardiovascular and respiratory systems. Corequisite: REHB 1200 (or 068.120). 83 hours.

PT 2720 Electro-Physical Agents in Physical Therapy Management

(Formerly 167.272) Selection and application of electro-physical agents in physical therapy. 45 hours.

PT 2750 Rehabilitation Exercise 2

(Formerly 167.275) A lecture and lab based course which focuses on the development of comprehensive rehabilitation, health, and fitness exercise programs

for normal subjects, clients with specific conditions/disabilities, and athletes. 34 hours.

PT 2760 Orthopedic Assessment and Management 1

(Formerly 167.276) Integrated approach to the orthopedic assessment and management of upper limb, lower limb, and spinal disorders. 113 hours.

PT 2770 Orthopedic Assessment and Management 2

(Formerly 167.277) Integrated approach to the physiotherapy assessment and management of upper limb, lower limb, and spinal disorders. Successful completion of PT 2760 (or 167.276) and PT 2770 (or 167.277) equivalent to E2/V2 level of professional classification. 112 hours.

PT 2780 Musculoskeletal Clinical Education

(Formerly 167.278) Consists of a period of clinical practice related to the management of musculoskeletal conditions. Course evaluated on a pass/fail basis. 375 hours.

PT 2790 Physical Therapy Management of Musculoskeletal Disorders

(Formerly 167.279) A theory and practical course on physical therapy management of patients with specific disorders. 150 hours.

PT 2890 Rehabilitation Biomechanics

(Formerly 167.289) Theory and practical application of biomechanics of human movement in relation to rehabilitation. Prerequisites: REHB 1480 (or 068.148), REHB 1490 (or 068.149) and REHB 1500 (or 068.150), or equivalent. 40 hours.

PT 3730 Advanced Musculoskeletal Topics

(Formerly 167.373) A theory, practical and tutorial-based course designed to provide the opportunity for problem-solving through the integration of relevant information, in the areas of orthopedic and sports physiotherapy. 61 hours.

PT 3740 Integrated Tutorials

(Formerly 167.374) A theory, practical and tutorial-based course designed to provide the opportunity for problem-solving through the integration of relevant information, in the physiotherapy management of geriatric, women's health, and multi-system conditions. 41 hours.

PT 3750 Physical Therapy Neurological Interventions Across the Lifespan 1

(Formerly 167.375) A theory and practical course on the basic principles of the application of techniques used in the Physical Therapy management of clients with neurological conditions, with a focus on neurological assessment and the treatment for spinal cord injured clients and clients with certain neurological conditions. 108 hours.

PT 3760 Physical Therapy Neurological Interventions Across the Lifespan 2

(Formerly 167.376) A theory and practical course on the basic principles of the application of techniques used in the Physical Therapy management of clients with neurological conditions, with a focus on neurological treatment. 115 hours.

PT 3880 Clinical Education in Neurological Disorders

(Formerly 167.388) Consists of a period of clinical practice related to the management of neurological conditions. Course evaluated on a pass/fail basis. 300 hours.

PT 3920 Summer Internship

(Formerly 167.392) An eight-week period of clinical/practical experience under the direction and supervision of registered physiotherapists. Course evaluated on a pass/fail basis. 300 hours.

SECTION 5: Course Descriptions-Medical Rehabilitation

REHB 1200 Basic Clinical Sciences

(Formerly 068.120) A lecture and tutorial course covering basic physiology related to membrane, muscle, pain and the cardiovascular, respiratory, endocrine, and immune systems. 50 hours.

REHB 1480 Human Anatomy - Systems

(Formerly 068.148) Lecture and laboratory study of the microscopic and macroscopic structure of the major systems of the human body. Living anatomy of the cardiorespiratory system. 90 hours.

REHB 1520 Musculoskeletal Anatomy

Lecture and laboratory study including living anatomy of the musculoskeletal structures of the head, neck and trunk and upper and lower extremities. May not be held for credit with the former REHB 1490 or REHB 1500.

REHB 2410 Pathology and Clinical Manifestations

(Formerly 068.241) A theory course including the basic principles of pathology and clinical manifestations, management and prognosis of patients with musculoskeletal disorders. Prerequisite: PT 1910 (or 167.191). 60 hours.

REHB 2450 Research Methodology for Medical Rehabilitation

(Formerly 068.245) A theory and practical course designed to provide a basic understanding of research principles and their application in Medical Rehabilitation. 45 hours.

REHB 2460 Statistics

(Formerly 068.246) A theory and practical course designed to provide a basic understanding of statistics with application to Medical Rehabilitation. 45 hours.

REHB 3410 Pathology and Clinical Manifestations of Neurological Conditions

(Formerly 068.341) Theoretical study of neurological pathology and clinical manifestations of the basic principles of medical management of persons with neurological disorders. Prerequisite: REHB 2410 (or 068.241). 37 hours.

REHB 3460 Introduction to Health Care Administration and Management

(Formerly 068.346) An introduction to professional and administrative issues of current concern to respiratory and physical therapists. Topics to be covered in lecture and seminar format are health care systems, professional ethics, departmental administration, principles of supervision, and medical and legal responsibilities. 39 hours.

REHB 3930 Neuroanatomy

(Formerly 068.393) The study of neuroanatomy and neurophysiology of the human body. 47 hours.

REHB 3940 Neurosciences

(Formerly 068.394) The study of neuroanatomy and neurophysiology of the human body. 45 hours.

SECTION 5: Course Descriptions-Respiratory Therapy

RESP 1270 Respiratory Anatomy and Physiology

(Formerly 169.127) Principles of pulmonary mechanics, ventilation, diffusion, perfusion, ventilation-perfusion relationships, gas transport, control of ventilation, and acid-base physiology. 60 hours.

RESP 1280 Medical Microbiology and Disease Transmission

(Formerly 169.128) Introduction to Medical Microbiology with emphasis on common pathogens, disease transmission, principles of asepsis, isolation sterilization and disinfection procedures. 32 hours.

RESP 1290 Cardiopulmonary Pharmacology

(Formerly 169.129) Pharmacology principles, phases of drug events, factors modifying drug effect, drug preparation, individual pharmacologic agents including: ANS drugs, CNS drugs, cardiac medications, respiratory medications, antibiotics. 36 hours.

RESP 1320 Applied Sciences for Respiratory Therapy

(Formerly 169.132) Gas laws, unique behaviour of specialty gases, fluid dynamics, fundamental principles of electricity, electronics and electrical safety, concepts of basic and advanced chemistry not treated in REHB 1200 (or 068.120). 53 hours.

RESP 1330 Technical Aspects of Respiratory Therapy

(Formerly 169.133) Medical gas and supply systems, flowmetering devices,

regulators, medical gas outlets, vacuum systems, regulatory authorities on the supply, production and distribution of medical gases. 45 hours.

RESP 1360 Treatment Administration in Respiratory Care

(Formerly 169.136) Administration of medical gases, humidity and aerosol therapy, environmental therapy, positive pressure breathing devices, respiratory exercises, incentive spirometries and bedside spirometry. 50 hours.

RESP 1370 Ventilatory Support Principles

(Formerly 169.137) Physical principles of continuous ventilatory support including: physics of ventilator operation and physiological aspects of ventilatory support. Provides a framework for RESP 2310 (or 169.231) and RESP 2320 (or 169.232). 120 hours.

RESP 1380 Basic Fieldwork 1

A seminar based preparatory period, followed by 80 hours of clinical fieldwork experiences in respiratory therapy, delivered with concurrent tutorial and laboratory based learning opportunities. The field work portion will be provided under the supervision of registered respiratory therapists at one or more approved clinical sites. Course is evaluated on a pass/fail basis.

RESP 2300 Respiratory Clinical Assessment

(Formerly 169.230) The correlation of patho-physiological mechanisms with the clinical manifestations of the common respiratory diseases and how rational management evolves from this understanding. 90 hours.

RESP 2310 Clinical Aspects of Ventilatory Management

(Formerly 169.231) Lecture, seminar and laboratory simulation on adult and pediatric ventilatory management. Estimation of ventilatory requirements, ventilator selection, weaning, ventilatory adjuncts, transport, and long term ventilatory support. 45 hours.

RESP 2320 Ventilatory Support Instrumentation

(Formerly 169.232) Comprehensive review of the components, operation and use of specified adult, pediatric and neonatal mechanical ventilators. Classroom and laboratory sessions. 180 hours.

RESP 2330 Pulmonary Investigations

(Formerly 169.233) Lung function testing principles and procedures including: static and dynamic measures, determination of volumes and capacities, exercise physiology. An analysis of lung function changes relative to common disease physiology. 50 hours.

RESP 2340 Physiologic Measurements and Instrumentation

(Formerly 169.234) Acid base physiology, interpretation of physiologic values, design theory, operation and care of gas analyzing devices, oximetry, capnography. 45 hours.

RESP 2350 Cardiology

(Formerly 169.235) Aspects of clinical assessment of the cardiovascular system, pathophysiology and selected treatment regimens and modalities. Laboratory on rhythm analysis and aspects of advanced cardiac life support. 60 hours.

RESP 2360 Pediatrics

(Formerly 169.236) Normal physiology, diseases and treatment, the child in hospital environment, high risk neonates, principles of intensive care, pediatric emergencies and fetal and maternal medicine. 60 hours.

RESP 2370 Anesthesiology

(Formerly 169.237) Principles of anesthesia, airway management, pain management, anesthetic agents, function of the anesthesia machine, pre- and postoperative assessment, recovery and safety features in the operating room. 45 hours.

RESP 2380 Basic Fieldwork 2

Building on RESP 1380, this course is comprised of seminars on professionally oriented topics and 80 hours of clinical fieldwork experiences in respiratory therapy, scheduled with concurrent tutorial and laboratory based learning opportunities. The fieldwork portion will be provided under the supervision of registered respiratory therapists at one or more approved clinical sites. Prerequisite: RESP 1380. Course will be graded on a Pass/Fail basis.

RESP 3300 Seminars in Respiratory Care
(Formerly 169.330) A series of seminars on Respiratory Disease and other clinical topics designed to bring together practical and theoretical aspects of the program. 60 hours.

RESP 3310 Clinical Education in Intensive Care
(Formerly 169.331) This course consists of 10 weeks of clinical experience in the adult intensive care setting in an approved clinical site. Course evaluated on a pass/fail basis. 432 hours.

RESP 3320 Clinical Education in Pediatric Respiratory Care
(Formerly 169.332) Three weeks of clinical experience in the Pediatric Intensive Care Unit at Children's Hospital. Shiftwork and extended shifts may be required. Course evaluated on a pass/fail basis. 144 hours.

RESP 3330 Clinical Education in Neonatal Respiratory Care
(Formerly 169.333) Four weeks of clinical experience in the Neonatal Intensive Care Unit at Children's Hospital and/or St. Boniface General Hospital. Shiftwork and extended shifts may be required. Course evaluated on a pass/fail basis. 180 hours.

RESP 3340 Clinical Education in Maternal/Fetal Health
(Formerly 169.334) One week of clinical experience in maternal and fetal health at the Women's Centre, Health Sciences Centre. Course evaluated on a pass/fail basis. 36 hours.

RESP 3350 Clinical Education in Pulmonary Diagnostics
(Formerly 169.335) Three weeks of clinical experience in the pulmonary diagnostic laboratory of an approved clinical site. Course evaluated on a pass/fail basis. 144 hours.

RESP 3360 Clinical Education in Anesthesia
(Formerly 169.336) Three weeks of clinical experience designed to acquaint the student with actual clinical techniques and procedures used in the operating and recovery room. Course evaluated on a pass/fail basis. 144 hours.

RESP 3370 Clinical Education in Community Care
(Formerly 169.337) Four weeks of clinical experience in community care settings including: pre-hospital care, health and wellness promotion, interfacility transport, chronic care, home care and community outreach. Course evaluated on a pass/fail basis. 180 hours.

RESP 3380 Clinical Education in Respiratory Care
(Formerly 169.338) Four weeks of clinical experience spent in the non-intensive care setting working with a variety of medical and surgical patients. Course evaluated on a pass/fail basis. 180 hours.

SECTION 1: Medical Education

1.1 Mission Statement,

The Mission of the Faculty of Medicine is to develop and deliver high quality educational programs for undergraduate and postgraduate students of medicine and medical rehabilitation, for graduates and post-doctoral fellows in the basic medical sciences and for physicians in practice; conduct research and other scholarly inquiry in the basic and applied medical sciences; and, contribute to the improvement of health status in Manitoba and beyond by providing advice, disseminating information to health professionals and the public, and by cooperating in the planning for the development and delivery of health care services.

The Mission of the Undergraduate Medical Education Program is to provide an environment which will assist students to become competent, caring, ethical physicians with the ability to think critically. This experience will prepare students to choose wisely their area of training, to successfully continue their education, and subsequently to meet responsibilities to their patients and society.

Medical education in Manitoba is designed to provide students with the knowledge and experience they need to practise medicine in a profession where new developments in science and public health policy create an ever-changing environment. In the first two years of the program the subject matter is divided into blocks which cover core concepts in health and medicine, human development and body systems. Clinical Skills, Problem Solving, Medical Humanities, Laboratory and Investigative Medicine, Health Equity, and Survival Tactics are integrated into the six blocks. The final two years, called the “clerkship” are spent in direct contact with patients and doctors in a clinical setting in which students gain experience with increasing responsibility for patient care and management.

1.2 History of Faculty,

Medical education had its beginnings in 1883 when 13 physicians applied to the local legislature for a charter to form the Manitoba Medical College. The college was chartered as an affiliate of the University of Manitoba. The number of students registered for the first session was 15, and the number in attendance at each session from that date to the present has ranged from 15 to 400. The university came to the aid of the Medical School from time to time by furnishing full-time professors in chemistry, physiology, pathology, bacteriology, and zoology. With the session of 1918-1919 the Manitoba Medical College ceased to exist as a separate institution. It made a gift of all its property and equipment to the University of Manitoba “on condition that the university establish a Faculty of Medicine, and carry on the work of medical education in an efficient manner.”

In 1921, a building for the accommodation of the departments of Physiology, Biochemistry, and Bacteriology was erected on the old Medical School property, and a further unit was completed in February, 1922. In January, 1956, the new wing of the medical building was officially opened, which included new quarters for the Medical Library. In February, 1965, the Chown Building was opened providing five-stories of administration offices and space for Pharmacology and Therapeutics and the Computer Department for Health Sciences. The Basic Medical Sciences Building, containing undergraduate teaching facilities, opened in 1973. It provides accommodation for anatomy, biochemistry, physiology, and medical microbiology. The Brodie Centre officially opened in the spring of 1996; it provides a library, research and recreational facilities. In 2004, the Office of the Dean and the Education Offices relocated to new administrative facilities in the Brodie Centre. General teaching facilities are located in the medical buildings, and facilities for clinical instruction are provided in the teaching hospitals affiliated with the University of Manitoba and in related institutions. The varied settings in which medicine is practised in Winnipeg and in rural and northern Manitoba also provide students with the opportunity to study community medicine outside the major teaching institutions.

1.3 Neil John Maclean Health Sciences Library,

The Neil John Maclean Health Sciences Library provides access to a wide range of evidence-based medicine resources in print and electronic format. Online resources include core medical textbooks such as *Harrison's Principles of Internal Medicine*, online pharmaceutical resources such as *Lexi-Comp*, and clinical resources such as *UpToDate*, *First Search*, and *MD-Consult*. The Library also provides online access to over 4,500 health sciences journals which can be linked to from important medical databases such as PubMed.

Students can access all of the online resources from on-campus and from home by using their student ID number and password. The Library's wireless network permits students to access online resources with a laptop. Computers for student use are also available in the Library.

The online resources are supplemented by a full range of print resources which include variety of textbooks, handbooks, and dictionaries. Back issues of many of the key medical journals are available. Special collections in the library include the Aboriginal Health Collection, History of Medicine Collection, and the Ross Mitchell Rare Book Room.

To facilitate student access and use of evidence-based resources, librarians offer training as part of the Faculty of Medicine curriculum. Each semester librarians offer a variety of training sessions open to all students on key medical resources such as PubMed. Librarians are available at the Information Desk in the Library or by appointment to answer any questions or provide individualized training.

1.4 Graduate Studies,

Graduate Studies information about graduate studies in medicine or related sciences, and information regarding opportunities for medical research may be obtained from: The Assistant Dean (Graduate Studies and Research), Faculty of Medicine, University of Manitoba, A108 Chown Building, 753 McDermot Avenue, Winnipeg, MB, R3E 0W3.

More than 300 graduate students are doing research and pursuing Masters and Doctoral degree programs in the Faculty of Medicine. Their research training programs offer opportunities to conduct research at a number of sites including Bannatyne Campus, the National Virology Lab, St. Boniface Research Centre, and the Institute for Bio-Diagnostics. Graduate programs are available in the Departments of Anatomy, Biochemistry and Medical Genetics, Community Health Sciences, Immunology, Medical Microbiology, Pathology, Pharmacology, Physiology, and Surgery.

1.5 Physician Assistant Education Program,

The Physician Assistant Education Program is the first graduate-level program for Physician's Assistant education in Canada. Upon completion of the comprehensive two year program, graduates receive a Master of Physician Assistant Studies degree. The program aims to educate outstanding Physician Assistant clinicians, to advance the academic field of the profession, and to foster leaders who will serve their communities and advance the physician assistant profession in Manitoba and Canada.

1.6 Department of Medical Education,

The mandate of the Department of Medical Education is to work in a collaborative manner across all programs and schools within the Faculty of Medicine to provide expertise and services related to medical education issues including: curriculum development, faculty development, design of evaluation tools and assessment strategies and the provision of standardized patients. These services are provided by the department through the Office of Educational Development. The second purpose of the department of Medical Education is to engage in research and scholarly activity related to medical education issues and serve as an academic home for faculty with primary appointments within medical education.

1.7 Continuing Medical Education,

This office is responsible for the Continuing Medical Education programs of the faculty, which are conducted in the Medical School, teaching hospitals, and in urban and rural medical centres. Information regarding programs may be obtained from: The Office of Continuing Medical Education, Faculty of Medicine, University of Manitoba, S203-753 McDermot Avenue, Winnipeg, MB R3E 0W3.

SECTION 2: Admission to the Faculty of Medicine

Intro Medicine section 2,

The Applicant Information Bulletin is the official policy document for Admission. The document can be found at:
www.umanitoba.ca/student/admissions/media/medicine_bulletin.pdf

2.1 Degree Offered, **Doctor of Medicine (M.D.)**

Minimum time to graduation: Four years in the Faculty of Medicine following an undergraduate degree.

2.2 Eligibility Requirements for Admission,
Refer to the Applicant Information Bulletin for the eligibility requirements:

www.umanitoba.ca/student/admissions/media/medicine_bulletin.pdf

All applicants must meet the following eligibility requirements:

Canadian citizen or permanent resident of Canada;

Bachelor's degree no later than June 30, 2012 from a university recognized by the University of Manitoba;

A minimum of 6 credit hours in Biochemistry at the university level with a minimum grade of C; applicants should refer to the Acceptable Biochemistry Course Combinations spreadsheet found on the Admissions website:
http://umanitoba.ca/faculties/medicine/admissions/info.html#Pre-requisites_To_Apply

Credit hours in the humanities/social sciences;

Medical College Admission Test (MCAT); the MCAT is administered by the AAMC and further information can be found at: www.aamc.org ;

Adjusted Grade Point Average (AGPA) of 3.30 or higher;

Technical Standards Requirement; the Faculty of Medicine has identified the requisite skills and abilities for admission, promotion and graduation in the MD program; these can be found at the following link:
[http://umanitoba.ca/faculties/medicine/alumni/media/Essential_skills_U_of_M_-_FEC2_\(2\).doc](http://umanitoba.ca/faculties/medicine/alumni/media/Essential_skills_U_of_M_-_FEC2_(2).doc) ;

Accommodation Policy; the Faculty of Medicine supports individuals with disabilities who may require accommodation to meet the requisite skills and abilities; the policy can be found at the following link:
http://umanitoba.ca/faculties/medicine/alumni/media/Accommodation_for_UGME_Students_with_Disabilities.doc ;

Proficiency in English Language; all applicants whose primary language is other than English must demonstrate proficiency in the English language; please contact Enrolment Services at the University of Manitoba;

Adult Criminal Record and Child Abuse Registry Checks; all applicants must complete a self-declaration regarding adult criminal records, pending criminal charges and registration on the child abuse registry as an offender; this self-declaration must be done at the time of application; an adult criminal record check, declaration of pending criminal charges and child abuse registry self-check is required at the time of registration and annually thereafter;

Professional Registration; all medical students must be eligible for, and become registered with the College of Physicians and Surgeons of Manitoba (CPSM) by the Undergraduate Studies

time of registration; eligibility requirements can be viewed on the CPSM website at:
www.cpsm.mb.ca

All applicants must have participated and been successful in the Multiple Mini Interview (MMI).

2.3 Eligibility Requirements for Transfer,
Applications for transfer are only accepted from students registered and in good standing at an LCME accredited medical school. Transfers can only be considered if there is a seat available through attrition. Details regarding the transfer policy can be found at the following link: http://umanitoba.ca/faculties/medicine/alumni/media/Transfer_Policy.pdf.

2.4 Immunization Requirements,
<http://umanitoba.ca/faculties/medicine/education/undergraduate/immunestatus.html>

2.5 Certification in Cardio-Pulmonary Resuscitation (CPR),
Students must have CPR designated as "Health Care Provider Level C" at the time of registration in year one. Students must have annual renewal of their CPR registration acceptable to the standards of the Heart and Stroke Foundation throughout the Undergraduate Medical Education program. Evidence of current renewal must be provided on an annual basis prior to the beginning of the academic year. Failure to comply, may result in exclusion from all academic programs until renewal is obtained.

SECTION 3: Academic Regulations

Intro Medicine Section 3,

The provisions of the chapter, [General Academic Regulations and Requirements](#), and the chapter, [University Policies](#), apply to all students. Faculty of Medicine regulations and requirements change from time to time. Detailed information concerning the general regulations governing admissions, evaluation, academic progress and withdrawal for undergraduate medical students may be obtained from the Undergraduate Medical Education Office. These regulations include the following items:

Students will not be allowed to register unless they are in good academic and financial standing from the previous year.

No student may repeat more than one year, and no year may be repeated more than once except by special permission of the Faculty Executive Council or Progress Committee.

Students who withdraw from the Faculty of Medicine without prior written notice will be considered to have terminated their connection with the faculty and will not be eligible for re-admission.

Students who withdraw from the faculty having given due notice of their intention to withdraw are eligible for re-admission. If re-admission is approved they will be required to conform to the rules and regulations, fee schedules, sequence of courses, in effect at the time of such readmission.

Students may, after completion of the work of a full year, be granted a leave of absence for one year subject to certain conditions related to the purpose of the leave of absence and on subsequent registration will be required to conform to the rules and regulations, fee schedules, and sequence of courses in effect at the time of such registration.

Students who have been or expect to be prevented from attending any regular examination by reason of illness or other cause beyond their control should at once notify the Associate Dean Undergraduate Education (UGME) and must give satisfactory documentary evidence of the cause of absence.

The Faculty Executive Council reserves the right to require any student to withdraw from the program for which the student is enrolled when it believes the student to be unsuited, on general considerations of scholarship, or conduct for the profession, or the field within the profession, to which the program of studies normally leads. This right prevails notwithstanding any other provision in the faculty regulations.

Students are required to present the personal and professional appearance, attitudes and behaviours expected of members of the medical profession. The Faculty of Medicine has a process through which lapses in professionalism are reported, investigated, and, when necessary, will result in remedial or punitive actions up to and including dismissal. For additional information please refer to the Curriculum Guide.

The Faculty of Medicine has a Conscientious Objection Policy through which medical students may request exemption from specific medical procedures or services. Requests are evaluated and, if granted, do not absolve students from the following aspects of the procedure or service in question, including: cognitive knowledge (indications, contraindications, benefits and risks); full and nonselective disclosure to support Informed Consent by patients; patient non-abandonment; appropriate patient referral; and non-discrimination. A full list of criteria can be found on the Conscientious Objection application form. A Conscientious Objection cannot limit a student's educational experience such that his or her overall medical education will be compromised and all affected curricular time must be made up otherwise. For information, contact the Undergraduate Medical Education Office.

Students must complete the undergraduate program for the M.D. degree of the Faculty of Medicine within six years of entry to first-year Medicine, exclusive of those students undertaking additional academic pursuits which are acceptable to the Progress Committee. When a student fails to complete the program the committee will review the academic record of the student. If the student is in good academic standing at that time, the committee may grant one further year for the completion of the program. The reasons for the prolonged duration of the student's program are confidential but must be approved as valid by the Associate Dean UGME.

3.1 Requirements for the Degree of Doctor of Medicine (M.D.) ,
Every candidate for the degree of Doctor of Medicine must have satisfied the following requirements:

Subsequent to the successful completion of the required university studies, a student must have attended four full sessions of not less than nine months each in this or some other school of medicine approved by this university, the last two years of which must have been spent as a student of the University of Manitoba.

A student must have completed the required work, have fulfilled satisfactorily all special requirements, have received satisfactory grades throughout the entire medical program, and have discharged all indebtedness to the university.

Degrees: All degrees in Medicine will be conferred by the Senate of the university on the recommendation of the Faculty Executive Council at a regular meeting of the University Senate or at a meeting specially called for that purpose.

3.2 Requirements for Registration to Practise Medicine,
A university degree in medicine does not in itself confer the right to practise the profession of medicine in Canada. That right is obtained from a provincial registering body in the particular province in which the graduate desires to practise, and follows the successful completion of the Medical Council of Canada's two qualifying examinations.

3.2.1 Federal Registration: The Medical Council of Canada

The Medical Council of Canada was established in 1912 by the Canada Medical Act. Its purpose is to grant a qualification to practise medicine acceptable for licence in every province of Canada. It is not a licensing body, but "anyone who secures the diploma of the Medical Council of Canada by examination is registered on the Canadian Medical Register. This registration entitles one to become licensed to

practise medicine in any province in Canada upon payment of the necessary fee and on meeting other provincial requirements."

The Medical Council of Canada examinations are normally taken by undergraduate medical students of the University of Manitoba at the end of the fourth year. There is a fee for this examination. Examinations are held annually in Winnipeg in May and November, and registration for these examinations may be made with: The Registrar, Medical Council of Canada, 2283 St. Laurent Boulevard, Ottawa, ON K1G 5A2. The deadline for application is usually in December; candidates are advised to contact the Medical Council of Canada for current information (www.mcc.ca).

3.2.2 Provincial Registration

The College of Physicians and Surgeons of Manitoba is the regulation body for the physicians in Manitoba. All medical students must be registered with the College of Physicians and Surgeons of Manitoba throughout their academic program. For information on registration in Manitoba contact: The College of Physicians and Surgeons of Manitoba, 1000-1661 Portage Ave., Winnipeg, MB R3G 3T7; telephone: (204) 774 4344.

SECTION 4: The Program for the M.D. Degree

4.1 Governance,

The program and its curriculum is the responsibility of the Faculty Executive Council (FEC). The policies, regulations, implementation and modifications of the educational program for the M.D. degree are determined by the FEC on the recommendation of the Faculty of Medicine Undergraduate Medical Curriculum Committee (UGMCC). The UGMCC consists of the faculty curriculum coordinators appointed by the Dean, two members elected by the Faculty Executive Council, the Associate Dean UGME, the Assistant Dean Student Affairs, the Director of Educational Development and six students. All members are voting members. The UGMCC is responsible for the curriculum, syllabus, teaching, and evaluation in the educational program leading to the M.D. degree.

4.2 General Statement,

The program is a continuum over the four years but is divided into the Pre-Clerkship, Years 1 and 2, and the Clerkship, Years 3 and 4, for administrative purposes. The mission and performance expectations of the program are published. They are given to faculty and students and are the guide for the curriculum. The curriculum is based on the view that it is neither necessary nor desirable for the faculty to present all the knowledge, skills and behaviours that are expected of a student by graduation. Instead the students are provided with the core material which lies in the mainstream of medical science. Students are expected to acquire further knowledge and skills for themselves through study, discussion and scholarly development. They are encouraged to take the initiative to approach instructors and colleagues with regard to learning. The program values the search for knowledge, the evaluation of its worth and its application to the analysis and solution of problems as opposed to the simple memorization of information. Students are expected to develop skills to acquire new knowledge and to realize that these skills will be used throughout their professional lives irrespective of their field of medicine. The curriculum encourages an interdisciplinary and integrated approach to medicine. Teaching sessions promote participation and active learning by students. Instructors, whatever their own discipline, ensure that their teaching is relevant to the overall development of students to become undifferentiated graduates of medicine with the potential to enter any postgraduate position for which they have the ability and aptitude. The Faculty of Medicine does not support students' limitation of their studies to only fields and disciplines of personal interest. Nonetheless, students are encouraged to pursue areas of interest and to develop their own education through electives. Our students learn to use information, skills and behaviour from multiple sources of teaching to prevent and solve the problems that face their patients and society. Our students learn that physicians are part of an interdisciplinary team and health care system that provide adequate, accessible, continuous and comprehensive health care. In order to modify and enhance the educational program, the opinions of students and their evaluation of the program and its teachers are formally sought and respected by faculty. This information is used by the UGMCC to improve the program.

4.3 The Plan of the Curriculum,

The curriculum is in the process of renewal. The curricular renewal will embrace enhanced programs in a variety of realms including: professionalism; interprofessional education and collaborative practice; quality health care and system innovation; and health equity.

4.3.1 Professionalism

The Professionalism program is an important component of the Undergraduate Medical Education curriculum. The goal of the program is to incorporate the attributes of professionalism into medical learners and emphasize how learners are expected to discuss why certain professionalism characteristics and attributes are necessary for the practice of medicine and for their identity as physicians.

A professionalism charter is developed and serves as a framework for defining and demonstrating medical professionalism.

Professionalism: Behaviour and attitudes befitting medical professionals is expected of our students in all phases of the curriculum. The Faculty of Medicine looks forward to learning of students who display exceptional professionalism through letters sent to the Associate Dean, UGME. The Faculty of Medicine uses a Professionalism Report by which single egregious or recurrent lapses in student professionalism can be brought to the school's attention. A summary statement will be included on an individual's Medical Student Performance Record if two or more validated reports have been received. The Faculty of Medicine maintains the option to dismiss students on the basis of unprofessional behaviour, regardless of performance in the curriculum.

4.3.2 Pre-Clerkship Program:

Year 1 (Blocks 1-3), and Year 2 (Blocks 4-6)

The Pre-Clerkship program is managed by UGME and was designed in a collaborative process by subject experts and by curriculum committees governed by UGME.

The pre-clerkship curriculum consists of the following mandatory programs: Cognitive Courses, Clinical Skills, Problem Solving, Medical Humanities, and Laboratory and Investigative Medicine, and one voluntary program: Stress Management. The Problem Solving program integrates and reiterates important concepts presented in the Cognitive Courses, emphasizing a clinical case approach to your medical education. The Clinical Skills program includes communication, history taking and physical examination skills. Medical Humanities includes human values, medical ethics, medical history, law, and palliative care and integrative medicine. The Laboratory and Investigative Medicine program is integrated with the Cognitive Courses.

The goals and objectives of the UGME curriculum are based on the mission and objectives of the undergraduate program as outlined: http://umanitoba.ca/faculties/medicine/education/undergraduate/ugme_mission_objectives.html. The evaluation of student academic progress is based on achievement of the learning objectives provided to students on-line through the curriculum management system.

The curriculum is composed of six instructional blocks over two years that address the basic medical sciences, population health, human growth and development as well as systems-based learning (for example, cardiovascular, reproduction, etc.) The two-year Pre-Clerkship curriculum brings together teachers and facilitators from across all Faculty Departments, other healthcare related faculties and disciplines as well as members of the public. All basic medical sciences, including anatomy, molecular biology, bio-chemistry, human genetics, immunology, microbiology, physiology contribute to the curriculum as do the clinically applied basic sciences of pathology, pharmacology and community health sciences. Clinical departments including anesthesia, clinical health psychology, family medicine, internal medicine, obstetrics, gynecology, ophthalmology, otolaryngology, pediatrics, psychiatry, surgery are involved in all aspects of the curriculum.

The Pre-Clerkship is divided into six blocks, three per year. An overview of each Block within the Pre-Clerkship component of the Undergraduate Medical Education program can be viewed at:

http://umanitoba.ca/faculties/medicine/education/undergraduate/program_overview.html.

Methods of Teaching

The Cognitive component is delivered by a variety of formats including self-directed learning, small group tutorials, lectures, lab practicals or demonstrations and simulation. Problem-based learning is emphasized in small group tutorials as well as in the longitudinal Problem Solving Program.

Methods of Assessment

Formative and summative assessments are provided throughout the pre-clerkship curriculum. These include self-reflection, learning portfolios, tutor feedback, instructional tests, multiple choice exam, practical exams, and problem-based learning short and long answer exams.

Attendance

All learners in the Undergraduate Medical Education Program must attend sessions that divide the whole class into smaller groups. Small group session attendance is reported and this contributes to the evaluation of the learner's professionalism. The Attendance Policy can be viewed at <http://umanitoba.ca/faculties/medicine/education/undergraduate/preclerkship/index.html>.

The procedures outlined in this policy do not preclude course directors, session leaders and instructors from tracking student learner attendance in their sessions and discussing any concerns related to attendance with the learners.

4.3.3 Clerkship Program: Years 3 And 4

The Clerkship component of the undergraduate program is designed to give medical students didactic instruction, supervised responsibility for patient care and frequent feedback and evaluation. The program is governed by the Clerkship Committee for which the terms of reference and membership can be viewed on the website: http://umanitoba.ca/faculties/medicine/education/undergraduate/ugme_governance.html.

The Clerkship Program consists of the Introduction to Clerkship program, core clerkship rotations, a multiple specialty rotation, and electives. It lasts 20 months. Core clerkships last a minimum of six weeks, multiple specialty clerkships are comprised of shorter individual rotations and electives are offered in units of two weeks or longer.

Clerkship Phase I:

Introduction to Clerkship (ITC) (4.5 weeks): The Clerkship Program begins with the ITC that is a preparation for clerkship. Each department that provides instruction in ITC has the goal of presenting information and clinical experiences that are relevant to clerkship as a whole.

Core Clerkship Rotations (48 weeks): The primary responsibility of the clerks in the program is the care of patients under the supervision of post-graduate students and faculty. Rotation through all major clinical disciplines is provided and these are supplemented by "elective" periods. Six-week periods are spent in family/community medicine, internal medicine, selectives in medicine and surgery, obstetrics/ gynecology, pediatrics, psychiatry, surgery, multiple specialty rotation of anesthesia, emergency medicine, ophthalmology, otolaryngology and a community health sciences project. Settings for the clerkship experience are varied, including wards and outpatient facilities of the hospitals, doctors' offices, rural and community-based hospitals. Formal teaching and evaluation of the knowledge,

skills, attitudes and behaviours pertinent to the discipline are provided during the clerkships.

Clerkship Phase II:

Electives and CaRMS National Interview Period (24 weeks): There are two major elective periods during clerkship. The first period occurs at the end of the core clinical rotations; the second occurs after the CaRMS National Interview Period. The second period of electives is generally restricted to electives in the Province of Manitoba. Throughout the elective periods, students must pursue education in a minimum of three different disciplines with a minimum duration of two weeks each. Electives may be pursued in a setting of the student's own choice, but must be approved by the faculty elective program director.

MCCQE Part I Refresher Series (5.5 weeks): The clerkship program ends with students participating in a mandatory ACLS course, a short program of half day lectures and time for self study in preparation for the licensing examination of the Medical Council of Canada Qualifying Examination Part I (MCCQE Pt 1) and then the actual writing of the MCCQE Part 1 examination.

SECTION 5: Student Evaluation and Academic Progress

5.1 Responsibility,

The policies and procedures for the evaluation of the students in the program for the M.D. degree are the responsibility of the Faculty Executive Council (FEC).

The responsibilities of the Progress Committee include:

- Recommending to FEC the academic standards by which the progress of students are judged and ensuring that examiners have followed the policies and procedures set by FEC.
- Determining which students may proceed to the next stage of the program or to graduation.
- Determining which students should write supplemental examinations, or be required to take remedial study, or be required to repeat all or part of the academic year before promotion to the next stage of the program or graduation.
- Placing students on Monitored Academic Status or Probation.
- Ensuring that the Committees of Evaluation have followed the policies and regulations of evaluation that have been approved by the FEC.

The Committees of Evaluation (COE): The COE, Pre-Clerkship Year 1), COE Pre-Clerkship Year 2 and Clerkship (Years 3 and 4) conduct the evaluation of the students. The knowledge, clinical and communication skills, attitudes and behaviour of the students are evaluated by examination, assessment of performance and completion of assignments.

The responsibilities of the COE's include:

- Planning and administration of the evaluation of all aspects of student examinations and performance.
- Planning and administration of all supplemental examinations.
- Planning and administration of all other measures of academic performance.
- Planning and administration of remedial training for students with unsatisfactory academic performance.

- The reporting of the results of examinations, supplemental examinations, other academic performance evaluation and remedial training to the Progress Committee.

5.2 Evaluation in the Pre-Clerkship Program,

5.2.1 Summative Examinations

The COEs will inform the students of the pre-determined pass mark for all examinations at the beginning of their block. The student, however, will be given the overall as well as the actual marks obtained in the different sections of the examination. Students' results will be reported to them as a pass or fail; neither grades nor honours will be given. Grades and relative performance will be recorded in students' evaluation files and each student can view his or her evaluation file in the undergraduate office.

The Faculty of Medicine uses a Pass/Fail system where grades are not reported external to the Faculty of Medicine. Transcripts and Medical Student Performance Reports will indicate only whether a student has passed or failed a year or block. However, within the Faculty of Medicine, student grades will be used to help identify students at academic risk and to help select students for distinctions such as awards and specialized programs.

There are written comprehensive examinations based on the objectives at the end of each block i.e. three in first year and three in second year. In addition, there is a mid-block examination in Block 1. Each examination may use various methods of evaluation: multiple choice questions, short answer questions, etc. There may also be take-home assignments in each course that contribute to the final mark.

The student's performance in the Clinical Skills program will be assessed by OSCE-type examination, typically conducted at the end of Year II. Expectations for students' conduct and information related to pass marks for summative examinations can be found in the following UGME policies.

- Examination Conduct Policy (

http://umanitoba.ca/faculties/medicine/education/opas/media/Examination_Conduct_Policy.pdf)

Examination Results Policy (

http://umanitoba.ca/faculties/medicine/education/opas/media/Examination_Results_Policy_Procedures.pdf)

Deferred Examinations Policy (

http://umanitoba.ca/faculties/medicine/education/opas/media/Deferred_Examinations_Policy.pdf)

Examination Accommodation Procedures

(http://umanitoba.ca/faculties/medicine/education/opas/media/Accommodations_Procedures.pdf)

5.2.2 Failures of the Evaluation in Pre-Clerkship Years 1 and 2

The UGME Promotion and Failure Policy governs decisions related to student promotion and failure at the Pre-Clerkship level.

(http://umanitoba.ca/faculties/medicine/education/opas/media/Promotions_and_Failures_Policy.pdf)

Students failing in up to two examinations can write supplementary examinations in accordance with the Supplemental Examination Policy. (http://umanitoba.ca/faculties/medicine/education/opas/media/Supplemental_Exams_Policy.pdf) Students who fail any supplementary examination in first- or second-year will fail that year.

Students who are granted supplemental privileges are expected to undertake remedial study at a time determined by the Faculty during the summer period. Following the remediation, they will sit a supplemental examination comparable but different to that failed. Students who fail the Clinical Skills program will be

granted supplemental privileges and receive a remedial period during the summer vacation that will take into account the areas of weakness revealed by their performance and the examination. The performance of students during the remedial period will be evaluated by a preceptor and will normally include an oral and/or written examination and/or repeated OSCE. Students who fail to reach the standard expected after remediation will fail the year.

Students in Year 1 and Year 2 who are successful on the supplemental examination(s) will be promoted.

Year 1 students who fail the year must apply for re-admission to medical school before June 1. Students being considered for re-admission will usually be interviewed by the Admissions Committee to determine how they might better approach medical school so that they might succeed on a second attempt. The Admissions Committee will advise the Associate Dean, Students who will recommend to the Progress Committee whether the student should be re-admitted.

Students who fail Year 2 will automatically repeat it and are not subject to review by the Admissions Committee.

5.2.3. Formative Evaluation in Pre-Clerkship

A variety of formative evaluative exercises are conducted in Pre-Clerkship including instructional tests, practice questions, reflective writing, self-evaluation, and peer-evaluations.

5.2.4. Remediation in Pre-Clerkship

The student will be required to meet with the Director of Remediation to develop a remedial plan. The exact nature of the remediation may vary with the student and will be designed to meet individual learning needs as defined by the student. The student will also be required to meet with the Associate Dean, Students, who may also direct the student to other faculty members or services for students.

5.3 Evaluation of Students in the Clerkship Program,
During the clerkship years students will be evaluated on their competence and this will include assessment of their cognitive knowledge and understanding, clinical skills, problem solving and judgement, technical skills, interpersonal attributes and general professional responsibility. Evaluation will be the responsibility of the Committee of Evaluation, Clerkship (COE Clerkship).

5.3.1 Methods of Summative Evaluation (General)

The policy and procedures applicable for evaluation are:

- Examination Conduct Policy (

http://umanitoba.ca/faculties/medicine/education/opas/media/Examination_Conduct_Policy.pdf)

Examination Results Policy (http://umanitoba.ca/faculties/medicine/education/opas/media/Examination_Results_Policy_Procedures.pdf)

Deferred Examinations Policy (http://umanitoba.ca/faculties/medicine/education/opas/media/Deferred_Examinations_Policy.pdf)

Examination Accommodation Procedures (http://umanitoba.ca/faculties/medicine/education/opas/media/Accommodations_Procedures.pdf)

Various methods will be used to assess students including the final evaluation reports (FITERs); written external NBME examinations and OSCE-type exams. Students' performance for evaluation purposes during examinations may be

recorded by writing, orally, by computer, by audio or by video taping. Whatever material necessary to generate the mark such as papers, computer records, tapes will be destroyed once the student has passed that evaluation (such material can be of help to a student needing remediation before the pass).

To achieve this quality assurance the Committee of Evaluation Clerkship may use direct observation or indirect observation by audio and video monitoring. Quality assurance material is subject to the aforementioned regulations of the university and the faculty. Furthermore, this material, which could identify the individual student will not be released to anyone, other than the Dean and Committee of Evaluation Clerkship, without the written consent of the student.

5.3.2 The Introduction to Clerkship (ITC)

The goal of Introduction to Clerkship (ITC) is to prepare the student for clerkship rotations. Students will be assessed for attendance and performance in learning groups. The purpose of student evaluations in ITC is to ensure that students are ready to begin their clerkship rotations.

Readiness for clerkship must be demonstrated in many areas including: basic medical knowledge and its application; clinical skills in evaluating patients; analysis of clinical data; problem identification and diagnosis; planning of investigation; planning of management and therapy; relationships to patients and staff. These attributes will be evaluated in a variety of ways throughout ITC.

Method of Evaluation

Students failing to attend mandatory sessions will be reported to the Associate Dean UGME, who will inform the COE Clerkship. Each student will receive a warning from the Associate Dean's office. If this warning is ignored the student's attendance record and performance will be considered by the COE Clerkship and the student may be failed for the sessions missed. A suitable remedial period may be provided. If the student does not perform satisfactorily in the remedial period the ITC will be failed.

The student must be informed of a recommendation for failure within seven working days of the end of the session. The pass/fail decision will be given by the departmental representative to the COE Clerkship. In the case of a failing evaluation the reasons for failure must be documented and submitted to the COE Clerkship.

5.3.3 ITC Remediation

Failure for inadequate attendance

The coordinator of the block of sessions missed may, with approval of the clerkship coordinator, provide the student with a remedial course, of comparable educational experience in that subject and the student will have to attend and perform satisfactorily to pass the ITC.

5.3.4 The Major Clinical Clerkships

Method of Evaluation

The evaluation of the students during the clinical clerkship rotations may be assessed by review of clinical performance, written examinations, projects as in community health sciences.

Clinical Performance

The goals and expectations of the Clerkship Program are consistent with the Undergraduate Medical Education Learning Goals and Objectives.

Students must complete a self-evaluation Midterm In-Training Evaluation Report (MITER) midway through the rotation. The self-evaluation MITER should be

discussed by the student and his/her preceptor(s). The clerkship director, or delegate, will collect preceptor assessments throughout the rotation. If a student's performance is likely to lead to a failure, the clerkship director must advise the student of an impending failure by the midway point of the rotation. In such cases, these students must be given help to improve their performance to the expected standard. The clerkship director, or delegate, will use all evaluations to make a final decision on the student's performance at the end of the rotation in that department. A Final In-Training Evaluation Report (FITER) of each student's achievement of these goals will be completed for each rotation.

A failing student must be informed of the failure by the clerkship director, or delegate, preferably before the end of the rotation but not later than seven working days after the end. All results will be submitted to the undergraduate committee of the department, who, for a failure, will review all the evaluations and preceptors' pass/fail assessments and determine the overall, pass/fail standing for the student during the rotation in question.

The pass/fail recommendation, with the FITER and any supporting evidence for that decision, will be submitted by the departmental representative to the COE Clerkship. The pass/fail decision will be reviewed and affirmed if there is a majority vote of the members of COE Clerkship present at the first meeting of the COE Clerkship after the end of the clerkship. In the case of a tie, the chair of COE Clerkship will have the deciding vote, otherwise he or she will not vote.

Clerkship Written Examinations

Students will take the National Board of Medical Examiners (NBME) subject examinations at the end of the following clerkship periods: obstetrics/ gynecology, pediatrics, psychiatry, and surgery. For internal medicine the NBME examination will take place after the internal medicine selective rotation. For surgery the NBME examination will take place following the major surgery rotation. The passing standard for National Board Exams will be the 11th percentile of the entire reference group. Students failing a National Board examination will resit this exam as outlined in the Supplemental Examination Policy.

(http://umanitoba.ca/faculties/medicine/education/opas/media/Supplemental_Exams_Policy.pdf)

5.3.5 The Comprehensive Clinical Examination (CCE)

The goal of the comprehensive clinical examination (CCE) is to objectively evaluate students' clinical competence in generic skills of data collection, interpersonal relationships, along with the content of the case for diagnosis, investigation, and management of common clinical problems. This examination frequently uses standardized patients to test these clinical skills. The CCE committee is a sub-committee of the COE Clerkship and is chaired by the CCE coordinator. The CCE is marked to a standard predetermined by the CCE committee and the results of the examination are submitted to the COE Clerkship.

5.3.6 The Multiple Specialty Rotation in Clerkship (MSR)

Method of Evaluation

The evaluation of students during each component of the MSR clerkship rotation includes assessments of attendance, performance and could include faculty prepared examinations. Students will be expected to attend all clinical, small group, and laboratory sessions. Clinical performance will be judged, where applicable, as in the major clerkships. The clerkship director, or designate, must advise each student by the midway point of each component of the rotation if his or her performance is likely to lead to a failing assessment in that component. Failing students must be given due opportunity to improve their performance to the expected standard. The clerkship director, or delegate, will use all evaluations to make a final decision on the student's performance at the end of each component of that rotation. A failing student must be informed of the failure by the preceptor, clerkship director, or delegate preferably before the end of the rotation but not later than seven working days after the end. All results will be submitted to the undergraduate committee of the department, who, in the case of a failure will review all the evaluations and preceptors' pass/fail assessments to determine the overall, pass/ fail standing for the student in that department.

5.3.7 The Elective Periods

Method of Evaluation

Electives are evaluated in a similar manner to other clerkship rotations and students are required to obtain a completed elective evaluation form for every elective pursued. These evaluations will be reviewed by the Director, Electives, and unsatisfactory assessments will be submitted to the COE Clerkship.

5.3.8 Remediation during Clerkship

The remedial will be taken during electives or other suitable time as determined by the Faculty. The clerkship director or designate will design this remediation which may include further clinical experience. Such a remedial period will be a maximum of 4 weeks and will be taken in an elective period or other suitable time as determined by the faculty.

Clerkship Clinical Performance Remediation

The COE Clerkship will provide the student who has failed a clinical rotation an appropriate remedial period with the department in which the rotation was failed. The rotation will be an equivalent educational experience to the clerkship failed, and its goal will be to assist the student to reach the expected standard of clinical competence. A similar process of evaluation will be used, and this may be supplemented by a clinical oral examination if the departmental undergraduate committee deems it necessary. The remedial will be taken during an elective period.

Remediation for NBME Examination Failures

Students failing the National Board exam twice in the same subject will receive a remedial period of training from the department of that subject. The Associate Dean UGME in conjunction with the clerkship director, or delegate, will design the remediation with the purpose of the student achieving at least the 11th percentile in the examination; further clinical experience may be needed to meet that purpose. Such a remedial period will be a maximum of four weeks and will be taken in an elective period and followed by a third attempt at the National Board examination.

Remediation for Failure in the CCE

The COE Clerkship will devise an appropriate remedial period which will take into account the areas of weakness demonstrated by the CCE and will be taken during elective time. This remediation will be evaluated by a clinical assessment and may include an oral and/or written exam.

Remediation for an MSR Clerkship Failure

The COE Clerkship will provide the student who has failed a clinical component of the MSR with a remedial period in the department in which the rotation was failed. This period is flexible but can be up to the same length as the failed rotation. Such a remedial rotation will be an equivalent educational experience to that failed and its goal will be for the student to reach the expected standard of clinical performance. A similar process of evaluation will be used and may be supplemented by a clinical oral and/ or written examination if the department deems it necessary. The remedial will be taken in an elective period.

Remediation for an Electives Failure

The COE Clerkship will devise a remedial period of up to four weeks which will take into account the areas of weakness revealed by the student's elective evaluation. This will be taken in the next available free time for the student. The remedial period will be evaluated by clinical assessment and can include an oral exam if the COE Clerkship deems it necessary.

5.3.9 Failure of a Student in the Clerkship Program

The Clerkship Program is a continuum held over Year 3 and Year 4. A failure of the Clerkship Program is considered to be a failure of one year, see Section 3 Academic Regulations, above.

Failure of the Clerkship

The student will be determined to have failed the Clerkship Program if:

1. Failure of Clinical Assessments

The student has received failing evaluations in one or more of the following:

a) Two major clerkships in different disciplines (Internal Medicine including selective, Surgery including selective, Pediatrics, Obstetrics/ Gynecology, Psychiatry, and Family Medicine)

OR

b) One major clerkship and:

i) its remedial, or

ii) an ITC remedial, or

iii) an MSR remedial, or

iv) an elective remedial

OR

c) Remedials in two of the following:

i) Anesthesia

ii) Emergency Medicine

iii) Otolaryngology

iv) Ophthalmology

v) Community Health Sciences

vi) Elective

vii) ITC

2. Failure of Examinations

The student has failures in one or more of the following:

a) A single NBME subject examination three times

OR

b) A total of five NBME examinations

OR

c) The CCE after remediation
Undergraduate Studies

3. Remediation Related Failures

If the remediation period recommended for a student, for whatever cause, requires more than eight weeks, then the student will be deemed to have failed the Clerkship Program.

5.3.10 Terms for the Repeat Clerkship

A student who fails the Clerkship Program, be it because of failure of clinical assessments, failure of examinations, or failure of remediation (as above), immediately ceases in the program, and will be required to repeat the Clerkship Program. The Repeat Clerkship will consist of the following, at a minimum: Six week rotations in each of Core Internal Medicine, Core Surgery, Pediatrics, Family Medicine, Psychiatry, and Obstetrics/Gynecology, plus 12 – 16 weeks electives. Students in the Repeat Clerkship will also be required to complete the ACLS course (0.5 weeks), and the LMCC refresher course (4.5 weeks). They will also be granted 3 weeks for CaRMs interviews and two weeks for vacation. Furthermore, if the failure occurred prior to the completion of the Medicine Selective, Surgery Selective, Multiple Specialty Rotation (MSR), or Community Health Sciences Project, then these will be required components of the Repeat Clerkship as well. The student must satisfactorily meet all clinical assessments, examinations, the CCE, as well as remedial rotations (as appropriate), regardless of whether they had been passed previously. The Repeat Clerkship will be submitted to the Progress Committee for review and final approval.

5.3.11 Terms for Failure of the Repeat Clerkship

The terms for failure of the Repeat Clerkship are the same as listed above in 5.3.7 "Failure of a Student in the Clerkship Program." A student who has failed the Repeat Clerkship will be required to withdraw from the Faculty of Medicine program.

5.4 Regulations for Students Taking Leave from the Clerkship Program , Students may, for health or personal reasons, withdraw from clinical rotations or take temporary leave. For planned leave, prior permission must be obtained from the Associate Dean UGME and/or Student Affairs.. For leaves due to sudden or unexpected circumstances, the Associate Dean UGME, the Clerkship Director UGME and the clerkship director or delegate of the rotation must be informed. Written documentation of the reason for leave will be required by the Associate Dean UGME. The information is confidential to the Associate Dean UGME and Student Affairs.

If the student misses more than 25% of a rotation they will not receive credit for the rotation regardless of the reason. The student will be required to repeat the entire rotation.

Brief periods of leave may be taken upon notification and approval by the clerkship director UGME. For complete details on attendance during clerkship please refer to the full Clerkship Attendance Policy and procedures at:

<http://umanitoba.ca/faculties/medicine/education/undergraduate/policies.html>

The normal clerkship is completed in 79 weeks, not counting CaRMS interview time and holiday time. When, because of leaves of absence, a student will take more than 79 weeks, including elective periods, to complete the Clerkship Program then the Committee of Evaluation (COE) Clerkship will review the student's record (clinical assessments and examinations) during the Clerkship Program to ensure that the time lost has not compromised the overall achievement of the student.

5.5 Reappraisal and Appeal of Failed Rotations and Examinations,

A student who has failed or received "Unsatisfactory" on a Block examination or an OSCE-Type examination can request a reappraisal of the evaluation in accordance with the Reappraisal of Student Evaluations Policy

[http://umanitoba.ca/faculties/medicine/education/continuing_med_ed/media/Reappraisal_of_Student_Evaluations_Policy_\(2\).pdf](http://umanitoba.ca/faculties/medicine/education/continuing_med_ed/media/Reappraisal_of_Student_Evaluations_Policy_(2).pdf).

If the student is not accepting of the decision reached by a Reappraisal Committee as outlined in the above stated policy, the student can appeal the decision to the Undergraduate Student Appeals Committee:
http://umanitoba.ca/faculties/medicine/education/opus/media/Undergraduate_Medical_Education_Student_Appeals_Policy.pdf.

A student can appeal a decision of the Undergraduate Student Appeals Committee to the Faculty of Medicine Student Appeals Committee and a student appeal of the Faculty of Medicine Student Appeals Committee can be brought to the Senate Committee on Student Appeals.

The Faculty of Medicine will not accept requests for reappraisal of external examinations. The National Board of Medical Examiners (NBME) provides a *Score Recheck Service*, details of which are posted on the NBME website at: <http://www.nbme.org/Schools/SubjectExams/score.html>. Students are responsible for the cost of a Score Recheck that may be requested on their behalf by the Faculty of Medicine.

SECTION 6: Academic Research in Medical Education

Intro Medicine Section 6,

Part of the educational responsibility of the Faculty of Medicine is to perform research on innovations and effectiveness in medical education. Whenever students are the research subjects, all such research must have approval from the Faculty of Medicine Research Ethics Board. Where students are studied individually their participation will be voluntary. Research findings will not identify individuals.

SECTION 7: Advanced Degrees in Medicine

7.1 Bachelor of Science in Medicine (B.Sc. (Med.)),

The Bachelor of Science in Medicine program is offered during the summer months following the first and second year of the undergraduate program in Medicine. The B.Sc. (Med) program is designed to provide the undergraduate medical student with an opportunity to gain firsthand experience in medical research. A large variety of basic science and translational or clinical research projects are available for the student to choose from each year.

The program is open to undergraduate students in the Faculty of Medicine and, if approved by the B.Sc. Medicine Committee, to selected undergraduate students from other Canadian and international medical schools. The work for this degree may be carried out in any department of the Faculty of Medicine at the University of Manitoba. This program may not be taken concurrently with any part of the medical curriculum nor by a student carrying any failures or more than one block of required remediation in his/her medical program. To enrol in the B.Sc. (Med) program the student must find a supervisor in any field within the Faculty of Medicine. The supervisor must be a faculty member of the Faculty of Medicine. Together, the student and supervisor submit a written project proposal for scrutiny to the B.Sc. (Med) Committee. If the project proposal is accepted by the committee, students are accepted into the B.Sc. Medicine Program and can then be registered with the university for the B.Sc. Medicine summer sessions.

An examining committee of two faculty members excluding the B.Sc. (Med) program director, one from outside the department in which the research work is carried out, will be established for each student.

Students will be required to produce research and present their findings acceptably in both a written report and at a research forum held at the conclusion of their second summer. Students will be evaluated by their Supervisor after the first summer and by their examining committee following the completion of the requirements for the B.Sc. (Med) degree. Students will be required to withdraw from the program if they make unsatisfactory progress, including after the first summer of research.

The B.Sc. (Med) degree will be conferred at the same time as the M.D. degree unless the student, having satisfactorily completed the requirements for the B.Sc. (Med) degree, discontinues the study of Medicine in this Faculty. In this case, the B.Sc. (Med) degree will not be conferred.

7.2 MD/PhD Option,
7.2.1 Purpose

The combined-degree MD/PhD Option in the Faculty of Medicine is designed to produce academic clinician scientists who are interested in a career that combines both research and clinical medicine.

7.2.2 Duration

The minimum program of study is the total required by the Faculty of Medicine for the MD program (4 years) plus the minimum requirements of the Faculty of Graduate Studies (3 years from honours undergraduate degree). Students having obtained advanced/graduate training prior to admission may be granted advanced standing. Students will be considered to be full-time graduate students throughout the entire period.

7.2.3 Eligibility

Students enrolled in or admitted to Medicine are eligible to apply.

7.2.4 Application Process

Students wishing to apply should contact the Director of the Option. Acceptance will minimally require: 1) identification of a supervisor (within a department in the Faculty of Medicine which has an approved PhD program) who has adequate resources for the proposed program of study and whose department recommends acceptance, 2) interview with the Faculty MD/PhD Selection Committee and their recommendation for acceptance, 3) identification of a source of adequate financial support for the student, and 4) acceptance by the Faculty of Graduate Studies.

7.2.5 Program Fees

The total tuition fees payable are the sum of the fees required for the MD and PhD programs of study. Continuing fees (Faculty of Graduate Studies) are also applicable.

7.2.6 Administration

The Associate Deans for Research, UGME and Students, Faculty of Medicine and the Associate Dean, Faculty of Graduate Studies, are advisory to the Option Director (Program Director, Advanced Degrees in Medicine). They will ensure: 1) adequate resources for all aspects of the delivery of the program, 2) liaison with the Department, the Faculty of Medicine (including flexibility re: leaves for research) and Faculty of Graduate Studies, 3) review of advisory committee composition/function and of student progress and satisfaction and 4) the provision of program elements considered important to the success of the Option. Selected faculty members who are clinician-scientists, most with dual MD/PhDs, will be requested to provide input as resource persons to the program.

7.2.7 Coursework

The minimum course requirements of the Faculty of Graduate Studies will be applicable in addition to the normal curriculum of undergraduate medical studies.

7.2.8 Research/Thesis Requirements

The quality and quantity of research supporting the thesis shall be consistent with that required for other doctoral candidates in the field.

7.2.9 Additional Program Elements: Seminar Series and Research Progress Evaluations

Each student will be required to regularly attend a designated research seminar series organized by the sponsoring research discipline of the student. In addition, mandatory attendance will be required of all MD/PhD students and their supervisory faculty advisors to participate in a quarterly, program-wide, MD/PhD Student Research Forum which will include MD/ PhD graduates. These regular research days will provide time for students to present their work to a critical audience (research proposals, work-in-progress, critical reviews in major areas of recent scientific advances, etc.), and will also serve to promote networking within the program. Each student will be required to present a research update at least once a year, and satisfactory performance at this yearly assessment is required for continuation of program support.

7.2.10 Conferment of the Dual Degrees of MD/PhD

The MD and PhD degrees will usually be conferred simultaneously during convocation upon satisfactory completion of the entire option.

SECTION 8: Registration Information

8.1 Initial Registration Access Times,

Students in the Faculty of Medicine Undergraduate Medical Education Program will be given access time to the registration system (Aurora Student) in July. For instructions on how to register online, please refer to the chapter, "Registration Information: Aurora Student". Registration must be complete prior to the first day of classes.

Please note that you are registering in the same course for both the **Fall AND Winter** sessions. Med III students will be able to register in their **Summer** session in mid-March. Contact Admissions and Enrolment Services at (204) 789-3569 should you encounter difficulties in registering.

Courses for the Undergraduate Medical Education program are:

Program & Year	Faculty/School Codes	Terms	Dept. Number & Course Number	Lecture Section	Lab Section
Medicine I	05	Fall 2011 and Winter 2012	UGME 1000	L01	Not Applicable
Medicine II	05	Fall 2011 and Winter 2012	UGME 2000	L01	Not Applicable
Medicine III	05	Fall 2011 Winter and Summer 2012	UGME 3000	L01	Not Applicable
Medicine IV	05	Fall 2011 and Winter 2012	UGME 4000 UGME 4990	L01	Not Applicable

8.2 Web Registration Exceptions,

Students who have a failing grade/s registered against them and/or have other outstanding academic matters (i.e. deferred or supplemental examinations, modified program, etc.) in regards to the previous academic session will not be allowed to register using the web registration system. Students who fall into this category should contact the office for further information.

Bachelor Science in Medicine and Summer Early Exposure Programs

Students approved to participate in summer enrichment programs will be registered by the Faculty.

8.3 Prior to Registration,

New Students: All incoming students must complete an application to the College of Physicians and Surgeons of Manitoba, complete a Heart and Stroke certified course in BLS for Healthcare Providers (HCP-C) and submit the following documentation prior to the first day of class: immunization records, Adult Criminal Records Check (with vulnerable sector search), Child Abuse Registry Self-Check, Essential Skills and Abilities (Technical Standards) for Admission, Promotion and Graduation in the MD Program, and Accommodation for Undergraduate Medical Students with Disabilities. If you are unable to submit these documents by the first day of class please contact Admissions and Enrolment Services.

Returning Students: All returning students must re-certify their CPR in a Heart and Stroke certified course in BLS for Healthcare Providers (HCP-C) and submit a copy of their card to the Faculty of Medicine office prior to the first day of class. Returning students must be registered with the College of Physicians and Surgeons of Manitoba by June 30 of each year and must provide current documentation on Adult Criminal Record Check (with vulnerable sector search) and Child Abuse Registry Self-Check prior to the first day of class.

SECTION 9: Biochemistry & Medical Genetics Course Descriptions-3000 Level

BGEN 3020 Introduction to Human Genetics (Formerly 137.302) Principles necessary to understand and study genetically influenced malformations, diseases and variation in individuals and in populations. Two terms. Lectures, tutorials and assignments. Not to be held with the former 080.301 or 125.301.

SECTION 9: Biochemistry & Medical Genetics Course Descriptions-4000 Level

BGEN 4010 Project Course in Human Genetics (Formerly 137.401) A research project chosen in consultation with and supervised by a faculty member. A written report is required. The course is available primarily to final year Honours students in the Honours Genetics program. Selection of project and supervision to be arranged prior to September 30 and submitted in writing to department head. Deadline for submission of first draft to supervisor by March 1. Deadline for submission of final draft to supervisor and course coordinator is March 31.

SECTION 9: Human Anatomy & Cell Science Course Descriptions-1000 Level ANAT 1030 Human Anatomy

(Formerly 080.103) To present the essentials of the organization and structure of the human body. Surface, functional and applied anatomy will be taken into consideration. For Pharmacy students only.

SECTION 9: Pharmacology Course Descriptions-4000 Level

PHAC 4020 Pharmacology Basics

General mechanism of action of the important groups of drugs and factors which control and modify their effects. Overview of the use and side effects of drugs. Not to be held with the former 089.210.

PHAC 4030 Drugs in Human Disease I

Foundation physiological principles underlying human disease integrated with drug disposition and effects of important drug groups on disorders of the autonomic and central nervous systems, and the cardiovascular system. May not be held with PHAC 4020. Prerequisites: ZOOL 2530 (or 022.253) and ZOOL (or 022.245).

PHAC 4040 Drugs in Human Disease II

Foundation physiological principles underlying human disease integrated with effects of important drug groups on endocrine and organ system disorders, allergy and inflammation, infection, and cancer. The course also offers an introduction to basic clinical pharmacology as well as several current specialized topics in pharmacology. May not be held with PHAC 4020. Prerequisites: ZOOL 2530 (or 022.253) and ZOOL 2540 (or 022.245).

SECTION 9: Physiology Course Descriptions-1000 Level

PHGY 1030 Fundamentals of Medical Physiology
(Formerly 090.103) The function and regulation of the systems and major organs of the human body as they relate to clinical disorders. For Pharmacy students only.

SECTION 9: Pharmacology Course Descriptions-2000 Level

PHAC 2100 Pharmacology
(Formerly 089.210) General principles of pharmacology including consideration of the pharmacodynamics of important drugs and control and modification of drug action.

SECTION 7: Course Descriptions

7.1 Undergraduate

7.2 Post-Baccalaureate

SECTION 1: Degree and Diploma Programs Offered

SECTION 1: Degree and Diploma Programs Offered,

Degree	Years to Complete	Total Credit Hours
Bachelor of Music	4 *	126
Bachelor of Music (Composition)	4 *	126
Bachelor of Music (History)	4 *	126
Bachelor of Music (Performance)	4 *	126
Bachelor of Music/ Bachelor of Education	5 **	174 – 177
Bachelor of Jazz Studies	4 *	126
Post-Baccalaureate Diploma in Performance	1	30

* Minimum time to graduation: Four years if admission is directly from high school and five years if admission is via University 1.

** An integrated degree that combines Music with Education; minimum time to graduation: five years in Music and Education if admission is directly from high school and six years if admission is via University 1.

SECTION 2: Admission to Music

2.1 Course Requirements for Admission from High School,

Admission to the Faculty is directly from high school, although admission from University 1 is an option.

Other requirements

High school prerequisites: Music 40S is strongly recommended, while a second 40S language is recommended. Private lessons in your instrument and formal instruction in music theory and keyboard study are strongly recommended. Good academic performance in subject areas other than music is also strongly recommended. Refer to: umanitoba.ca/faculties/music/future/210.htm for audition information or admissions@umanitoba.ca

SECTION 3: Academic Regulations

SECTION 3: Academic Regulations,

The provisions of the chapter, [General Academic Regulations and Requirements](#), and the chapter, [University Policies](#), apply to all students. In addition, the Faculty has regulations and requirements, published below, which apply specifically to its students. Detailed information regarding regulations is available in the general office of the Faculty. The aim of the Bachelor of Music and Bachelor of Jazz Studies programs is to provide a basic framework of knowledge and ability; both theoretical and practical, from which either professional activities or graduate specialization can start. The Bachelor of Music four-year program contains concentrations in specified areas in the third and fourth years. After their first two years, students select the area in which their interests and abilities are strongest. The faculty offers four-year programs leading to the degree of either Bachelor of Music, with the following concentrations: Performance, Composition, History, and General Music and the five-year Integrated Bachelor of Music/Bachelor of Education. The four-year Bachelor of Jazz Studies is a direct entry program from high school. Practical study may be in piano, organ, harp, harpsichord, classical guitar, lute, recorder, voice, or any standard orchestral instrument: strings, woodwinds, brass, and percussion, and all the traditional jazz instruments. Ensemble work is included in all years of the program. Music courses are available to students in other faculties and schools. Consult section 6.0 or the appropriate section of this Calendar for regulations.

3.1 Written English Requirement and Mathematics Requirement,
Students in the Bachelor of Music and the Bachelor of Jazz Studies programs meet the university's written English requirement through three credit hours of English; ENGL 1310 or an equivalent. The university's mathematics requirement is met through the required course, MUSC 3230 Acoustics of Music (3 credit hours). These courses are listed as requirements to complete the first year of all Bachelor of Music programs and Bachelor of Jazz Studies.

3.2 Electives (Non-Music),
Students are required to take one course in a subject other than music for each year of the Bachelor of Music and Bachelor of Jazz Studies program to a total of 21 credit hours (18 for the Integrated B.Mus./B.Ed.). With the exception of the university's written English requirement in the first year, the student is free to choose any subject but is advised to seek the advice of faculty.

3.3 Ensembles,
The Faculty offers a wide variety of opportunities for participation in ensembles such as the Women's Choir, Concert Choir, University Concert Band, University Singers, University Symphony Orchestra, University Wind Ensemble, University Jazz Orchestra, Jazz Ensembles, Collegium Musicum, Opera Theatre, Chamber Ensemble, Percussion Ensemble, Musical Theatre, XIE (eXperimental Improv Ensemble), Brass Choir, Classical Guitar Ensemble and other wind, string and keyboard combinations. Bachelor of Music students are required to participate in two ensembles each year for four years. Bachelor of Jazz Studies students are required to participate in one ensemble each year for four years. The Ensemble Committee determines placement in credit ensembles; such participation will normally be in ensembles directly relevant to the student's major practical study area. Students from other faculties and non-university musicians are welcome to participate as space and instrumental balance allow, but all participation is at the

discretion of the conductor or coach of the ensemble. Some ensembles are offered for credit in other faculties.

3.4 Scholarships,
Entrance and continuing scholarships are available for Faculty students. Details may be obtained from Financial Aid and Awards or the Marcel A. Desautels Faculty of Music.

3.5 Scholastic Progress,
Within the first week of the term, students will be informed of the organization of materials, the nature and timing of testing, and the proportionate weighting of marks that contribute to the final grade in all academic courses at the Marcel A. Desautels Faculty of Music. Regulations regarding the grading of all practical courses at the Faculty are contained in the Student Handbook; special attention is called to the Recital and Master Class Attendance Policy which is an integral part of the grading system for Major Practical Study in each year of the program. A grade of "C" or better is required in each Music course throughout the Bachelor of Music and Bachelor of Jazz Studies programs, except where the Faculty Student Handbook states otherwise. Students who take Music elective courses and fail to achieve a minimum grade of "C" in them should repeat these courses. Due to the system of rotating electives, this may not be possible and in such a case another approved Music elective may be substituted. Supplemental examinations are not normally given in the Faculty, with the following exception: where a jury mark of "D" has been assigned in Major Practical Study, the juried examination may be reheard prior to the next registration. A term Grade Point Average of less than 2.0 or failure to achieve a grade of "C" or better in two Music courses will result in a student being placed on probation. A student failing to equal or exceed the minimum academic level by the end of the next term following probationary assignment will be placed on academic suspension. Each student is permitted a maximum 21 credit hours of failed Music courses in the Bachelor of Music and Bachelor of Jazz Studies programs. Students will not be permitted to register for a required music course more than twice without the permission of the Dean.

3.6 Dean's Honour List,
B.Mus. and B.Jazz students who achieve a term Grade Point Average of 3.55 and are registered in a minimum of nine credit hours per term will be eligible for the Dean's Honour List. Students who are granted incomplete or deferred status will not be eligible.

3.7 Attendance,
Regular attendance is expected of all students in all courses. Any unexcused absences from ensemble or practical study courses or three unexcused absences from any other music course may result in the student being required to withdraw from the course or ensemble, or may result in a failing grade being assigned. Students absent from a class for three or more consecutive meetings due to illness may be required to present a certificate from a physician. Prior approval for extended absences from class for reasons other than illness must be obtained from the instructor and the director. Unexcused absence from a class test may result in a grade of zero for the test. Make-up tests may be allowed in special circumstances.

SECTION 5: Post-Baccalaureate Diploma in Performance

SECTION 5: Post-Baccalaureate Diploma in Performance Intro,
The Marcel A. Desautels Faculty of Music offers a Post-Baccalaureate Diploma in Performance designed for musicians who wish to further their performance skills in preparation for further study or professional activity. The unique features of the PBDP program are that students can design their own program of study and tailor it to their own areas of interest. They may take courses at the Faculty as well as in other faculties and schools at the University of Manitoba. In addition, courses taken while a student in the PBDP program may be transferred into the Master's program where the appropriate standard has been met and requirements have been satisfied.

5.1 Admission Requirements,

Applicants for Admission must submit the completed application form and fee, and must possess a Bachelor of Music degree or a Conservatory Diploma taken in residence. They must also pass an entrance audition, which requires the performance of three works of contrasting styles and/or historical periods appropriate to the audition medium. This audition would normally be held in person, but video auditions may be accepted where distance is a prohibitive factor. Application materials which misrepresent the level of performance ability, will be treated as fraudulent, resulting in dismissal from the program. Admission may not be possible for all qualified applicants, as it is dependent on number of spaces available, the major practical study area, and instructor availability. Applicants who hold the Post-Baccalaureate Diploma in Performance from the University of Manitoba (or an equivalent Post-Baccalaureate one-year program from another institution) may apply for a second PBDP if studying a different applied instrument than that of their first PBDP in their Major Practical Study, and Recital courses, and if the remaining course credits taken do not duplicate those of the first PBDP.

5.2 Admission Procedures,

Application forms may be obtained from the Faculty. Completed application forms must be received by February 15th to begin study in September, or June 15th for a January start date.

5.3 Program Requirements,

MUSC 5400 Major Practical Study, 1 hr. instruction/week or the equivalent, 6 credit hours

MUSC 5560 Recital, 1 hr. instruction/week, 6 credit hours

MUSC 5180 Ensemble, 3 credit hours

Electives: chosen from available 3000 and 4000 level courses recommended by the advisor and approved by the Faculty, 15 credit hours

Total Credit Hours: 30

Note: A minimum of 18 credit hours must be taken in the Marcel A. Desautels Faculty of Music (although all 30 may be taken within the Faculty).

Reminder: While Faculty staff and faculty are available to clarify Faculty and university regulations and degree requirements, it is the student's responsibility to ensure that diploma and program requirements are met.

5.4 Academic Standing,

Regulations for the Post-Baccalaureate Diploma program regarding academic standing, scholastic progress, attendance, required GPA, probation and suspension will follow those governing the Bachelor of Music and Bachelor of Jazz Studies programs as outlined in the Faculty Student Handbook.

5.5 Maximum Time Limits,

Expected time to complete program: 1 year. The maximum time allowed for completing the Post-Baccalaureate Diploma program is 3 years. Students will not be permitted to transfer for credit any course completed more than five years prior to the completion date of the diploma.

5.6 Courses Available,

Undergraduate 3000 and 4000 level courses approved by the Dean may be used as electives in designing the program of study. Students will register for their courses after their program has been determined in consultation with their major practical study teacher who will act as academic advisor during the Post-Baccalaureate Diploma program. Students may not count toward the PBDP any courses that counted for credit in a previous degree.

5.7 Credit Transfer,

The Faculty's Registrar will process transfer of credits into the PBDP program. A maximum of 12 credit hours of courses may be transferred into the PBDP program provided that they have not counted toward any previous degree. A minimum of 18 credit hours must be taken within the Faculty, although up to the full 30 credit hours of the diploma program may be taken within the Faculty. Transfer of credits from the PBDP program into the M.Mus. is processed through the Faculty of Graduate Studies. Courses may not be counted for more than one degree, and may be transferred from the PBDP to the M.Mus. only if they have not been counted toward the PBDP or more than the minimum credit hours have been taken.

5.8 Completion of the Program,

Minimum: 1 year, Maximum: 3 years. The Dean may grant extensions for medical or compassionate reasons. Medical: A letter from the student's physician stating the diagnosis and treatment with projected recovery. Compassionate: A letter from the student outlining the reasons for the extension showing that extenuating circumstances beyond the student's control have contributed to the need for an extension.

5.9 Assessment,

Student Assessment: Type of evaluation: Academic freedom dictates that there will be variation between classes according to the professor's preferred systems, approaches, materials, readings, and assignments. However, the University of Manitoba regulations as outlined in the General Calendar state that within the first week of lectures, instructors must inform the class of the method of evaluation to be used in each course. Minimum Grade Requirements: In the Faculty students must attain a grade of "C" or higher for a course to count toward a degree, except in the case of Recital where a minimum of "B" is required. The PBDP program will be governed by these regulations, as outlined in the Student Handbook. Should the student transfer to another faculty in the university that faculty's regulations would apply relating to transfer of credit. Successful completion of the program will be achieved by receiving a "C" or higher in 30 credit hours. Teacher Assessment: The SEEQ course evaluations will be used in the PBDP program for academic courses, and the Faculty's specialized forms will be used for the performance-related courses.

SECTION 6: Offerings for Non-Music Students

6.1 Courses Offered in the B.Mus. and B.Jazz Program for Students in Other Faculties,

Some courses are offered outside the B.Mus. and B.Jazz programs for students in other faculties.

6.2. Music Minor for Students in the Faculty of Engineering, the Faculty of Arts, and the Faculty of Science,

A Minor in Music is available to students in the Faculty of Engineering, the Faculty of Arts, and the Faculty of Science. The requirements for a Minor in Music for Engineering students can be found in the Faculty of Engineering section of this calendar, the requirements for a Minor in Music for Arts students can be found in the Faculty of Arts section of this calendar. The requirements for a Minor in Music for Science students are as follows:

MUSIC MINOR FOR SCIENCE MUSC Minor 18 Credit Hours			
Minor Option 1			
UNIVERSITY 1	YEAR 2	YEAR 3	YEAR 4
MUSC 1280 and MUSC 1290			
(At most, 12 credit hours numbered at the 1000 level may be used toward the minor)	12 credit hours of Music courses from List A (Students who elect ensemble courses from List A are required to complete all		

	three courses)			
Minor Option 2				
MUSC 1110 and MUSC 1120 (At most, 12 credit hours numbered at the 1000 level may be used toward the minor)	12 credit hours of Music courses from List A (Students who elect ensemble courses from List A are required to complete all three courses)			
NOTE: Unless otherwise noted, these courses are available to all students in the Faculty of Science who have completed the required prerequisites. Courses in list B are not available to students completing the minor. Ensemble courses (MUSC 2180, MUSC 3180, and MUSC 4180) are acceptable for credit towards a degree in Science only when applied to the minor. They are not acceptable for credit as options.				
Minor Program				
For entry to the minor, the prerequisite is a grade of "C" or better in each of MUSC 1280 and MUSC 1290 or a grade of "C" or better in each of MUSC 1110 and MUSC 1120. A maximum of 12 credit hours numbered at the 1000 level may be used towards 18 credit hours for a minor.				
List A				
Students are responsible for ensuring that all prerequisites have been met.				
MUSC 1050	The Well-Tempered Concert-Goer (3)

List B	
MUSC 1930	Rudiments of Music (3)

SECTION 7: Music Course Descriptions-1000 Level

MUSC 1050 The Well-Tempered Concert-Goer (Formerly 033.105) This course is an introduction to the art of music with the listening component based on attendance at ten live performances by Winnipeg's superior performing ensembles. Topics include instruments of the orchestra, musical materials, forms and structures, historical periods and biographical information on composers.

MUSC 1070 Introduction to the History of Music (Formerly 033.107) Introduction to the study of music history with emphasis on historical and stylistic developments of the Middle Ages and Renaissance.

MUSC 1080 History of Music 2 (Formerly 033.108) A study of the development of style, idiom and performance practise in the music of the 17th and early 18th centuries. Prerequisite: MUSC 1070 (or 033.107) or equivalent, or consent of the Faculty of Music.

MUSC 1110 Music Theory 1 (Formerly 033.111) This course is designed to develop fluency in the writing and recognition of the elements of music: melodic and harmonic intervals, modes and scales, rhythm and metre, triads and inversions, and the principles of melodic and homophonic design. Prerequisite: Knowledge of music rudiments as demonstrated by a Placement Test given during the first week of classes, or by completing MUSC 1930 (or 033.193) with a mark of "C" or better.

MUSC 1120 Music Theory 2 (Formerly 033.112) An examination of the idioms of vocal melody through the writing and analysis of duple paraphrase, duple- and syncopated-rhythm counterpoint in two parts, and tonal homophony leading to the Chorale phrase and Bar form. Prerequisite: a grade of "C" or better in MUSC 1110 (or 033.111).

MUSC 1180 Ensemble (Formerly 033.118) Participation in University Symphony Orchestra, University Wind Ensemble, Women's Choir, Bison Men's Chorus, University Jazz Orchestra, University Concert Band or University Singers, as is appropriate to the student's background and/or major applied area (placement to be determined by ensemble

committee).

MUSC 1182 Jazz Ensemble 1

Participation in jazz ensemble(s) as assigned by the ensemble committee.

MUSC 1190 Ensemble

(Formerly 033.119) Participation in a Faculty of Music Ensemble other than the one designated in MUSC 1180 (or 033.118) (to be chosen in consultation with the Faculty of Music).

MUSC 1192 Jazz Rhythm Performance Techniques

A practical approach to rhythmic proficiency in jazz, including emphasis on rhythmic and harmonic etudes, standard song form interpretation, interaction, call and response language for jazz performance.

MUSC 1280 Musical Style and Structure 1

(Formerly 033.128) An integrated study of the history and theory of Western music to 1750. Prerequisite: Canadian Conservatory Grade 4 or RCT Grade 2 Theory or consent of the Faculty of Music. Continuation in the Music Major or Minor requires a grade of C or better in this course.

MUSC 1290 Musical Style and Structure 2

(Formerly 033.129) An integrated study of the history and theory of Western music from 1750 to the present. Prerequisite: MUSC 1280 (or 033.128) . Continuation in the Music Major or Minor requires a grade of "C " or better in this course.

MUSC 1380 Basic Music Skills 1

(Formerly 033.138) A practical approach to the cultivation of critical aural perception: specifically, to develop the student's sight-singing, transcription and keyboard skills.

MUSC 1390 Basic Music Skills 2

(Formerly 033.139) A continuation of MUSC 1380. Prerequisite: MUSC 1380 (or 033.138).

MUSC 1400 Major Practical Study

(Formerly 033.140) Individual instruction in one of the following: any of the standard orchestral instruments (strings, woodwinds, brasses, percussion), classical guitar, harp, harpsichord, lute, organ, piano, recorder composition or voice. An important constituent of the grading procedure for this course is performance in, and attendance at, the recitals/concerts of the Faculty of Music. For Music students only.

MUSC 1460 Minor Practical Study

(Formerly 033.146) Individual instruction in an area other than that selected for MUSC 1400 (or 033.140) or in composition by special permission. Written consent of the director is required prior to registration.

MUSC 1930 Rudiments of Music

(Formerly 033.193) An introduction to fundamental aspects of music such as sound generation, notation, melodic and harmonic construction, with emphasis on an aural approach.

SECTION 7: Music Course Descriptions-2000 Level

MUSC 2070 History of Music 3

(Formerly 033.207) A study of music in the eighteenth century from the Rococo and pre-Classical repertoire through the works of Haydn and Mozart. Prerequisites: MUSC 1070 (or 033.107) and MUSC 1080 (or 033.108) or equivalents, or consent of the Faculty of Music.

MUSC 2072 Jazz History 1

A broad survey of the development of jazz and early popular styles of the 20th Century up until the early 1950s. This course is designed to reveal the origins of modern jazz and conventional jazz performance practices.

MUSC 2080 History of Music 4

(Formerly 033.208) A study of the changing styles, forms and contexts of music from the late 18th century to 1915. Prerequisite: MUSC 2070 (or 033.207) and MUSC 2110 (or 033.211) or consent of the Faculty of Music. First offering in the 1998-99 academic year.

MUSC 2082 Jazz History 2

A broad survey of jazz styles from 1950 to the present, with an emphasis on the development of contemporary performance practices. Prerequisite: MUSC 2072 or consent of the Faculty of Music.

MUSC 2110 Music Theory 3

(Formerly 033.211) An examination of the idioms of instrumental melody through the writing and analysis of triple paraphrase, triple- and quadruple-rhythm counterpoint in two parts, and chromatic homophony leading to the Minuet and binary form. Prerequisite: MUSC 1120 (or 033.112) or the consent of the Faculty of Music.

MUSC 2112 Jazz Theory 1

This course is designed to develop fluency in the writing and recognition of the elements of jazz: melodic and harmonic intervals, modes and scales, rhythm and meter, harmonic structure, and the principles of melodic and homophonic design. Prerequisite: MUSC 1120 (or 033.112) or consent of the Faculty of Music.

MUSC 2120 Music Theory 4

(Formerly 033.212) An examination of the diffusion of tonality in instrumental textures through the writing and analysis of chromatic paraphrase, florid counterpoint in two parts and chromatically-extended homophony leading to the Cavatina and ternary form. Prerequisite: MUSC 2110 (or 033.211) or consent of the Faculty of Music.

MUSC 2122 Jazz Theory 2

A continuation of Jazz Theory 1. New topics will include transcription analysis, transposition of lead sheets, modal and substitute harmony. Prerequisite: MUSC 2112 or consent of the Faculty of Music.

MUSC 2180 Ensemble

(Formerly 033.218) Participation in University Symphony Orchestra, University Wind Ensemble, Women's Choir, Bison Men's Chorus, University Jazz Orchestra, University Concert Band or University Singers, as is appropriate to the student's background and/or major applied area (placement to be determined by the ensemble committee).

MUSC 2182 Jazz Ensemble 2

Participation in jazz ensemble(s) as assigned by the ensemble committee. Prerequisite: MUSC 1182 or consent of the Faculty of Music.

MUSC 2190 Ensemble

(Formerly 033.219) Participation in a Faculty of Music Ensemble other than the one designated as appropriate to the student's background and/or major applied area (to be chosen in consultation with the Faculty of Music).

MUSC 2192 Jazz Improvisation 1

A course designed to give the student practical application of rhythmic devices, rhythmic modes, melodic and harmonic devices, scales, chords, and substitutions in the context of song forms, song fragments, repertoire. The student will be required to keep a journal of melodic devices and original jazz compositions. Prerequisite: MUSC 1120 (or 033.112) or consent of the Faculty of Music.

MUSC 2380 Basic Music Skills 3

(Formerly 033.238) A continuation of MUSC 1390.

MUSC 2390 Basic Music Skills 4

(Formerly 033.239) A continuation of MUSC 2380. Prerequisite: MUSC 2380 (or 033.238).

MUSC 2400 Major Practical Study

(Formerly 033.240) Individual instruction, normally in the area chosen in MUSC 1400 (or 033.140). An important constituent of the grading procedure for this course is performance in and attendance at the recitals/concerts of the Faculty of Music. For Music students only.

MUSC 2460 Conducting

(Formerly 033.246) The principles and development of baton technique and expressive gestures. Fundamentals of vocal and instrumental score reading, preparation and interpretation. Prerequisites: MUSC 1120 (or 033.112) or equivalent, or consent of the Faculty of Music.

MUSC 2480 Minor Practical Study

(Formerly 033.248) Individual instruction in an area other than that selected for MUSC 2400. Normally a continuation of MUSC 1460. Written consent of the director is required to register.

SECTION 7: Music Course Descriptions-3000 Level

MUSC 3050 Research Methods

(Formerly 033.305) Techniques of bibliography and expository writing in music. Minor research projects in selected areas; the use of primary and secondary sources.

MUSC 3090 Introduction to Ethnomusicology

(Formerly 033.309) A study of style, performance methods and social role of selected non-Western and indigenous Western music, with particular emphasis on native Canadian music, through readings in field studies and methodology.

MUSC 3100 Opera Repertoire

(Formerly 033.310) The nature of the opera, its beginnings and development to modern times.

MUSC 3112 Jazz Composition and Arranging 1

A study of the fundamentals of part writing such as instrumental range and transposition, various styles of unison writing, simple harmonic writing, melodic, harmonic and rhythmic devices along with standard and non-standard song structures. Course will culminate in a recital of student compositions and arrangements. Prerequisite: MUSC 2112 or consent of the Faculty of Music.

MUSC 3130 Music for Children 1

(Formerly 033.313) The philosophy, techniques and materials in Orff-Schulwerk, including practical activities in the areas of Basic Orff, creative movement, recorder, aural skills and choral techniques. Applicants should have a knowledge of music rudiments. Prerequisite: a grade of "C" or better in MUSC 1930 (or 033.193) or equivalent preparation (CC grade 4 theory; RCT grade 2 theory; an introductory Orff-Schulwerk course) or consent of the Faculty of Music.

MUSC 3140 Music for Children 2

(Formerly 033.314) Further study of the Orff-Schulwerk approach to music education, including the areas of Basic Orff, creative movement, recorder, aural skills, improvisation and choral techniques. Prerequisite: a grade of "C+" or better in MUSC 3130 (or 033.313) or equivalent preparation, plus consent of the Faculty of Music.

MUSC 3150 Orchestration

(Formerly 033.315) A study of the technical capabilities and tonal characteristics of orchestral instruments, as well as practical scoring and arranging for various groups, from chamber to full orchestra and band. Prerequisite: MUSC 2120 (or 033.212) or consent of the Faculty of Music. Required course for Composition majors.

MUSC 3180 Ensemble

(Formerly 033.318) Participation in University Symphony Orchestra, University Wind Ensemble, Women's Choir, Bison Men's Chorus, University Jazz Orchestra, University Concert Band or University Singers, as is appropriate to the student's background and/or major applied area (placement to be determined by ensemble committee).

MUSC 3182 Jazz Ensemble 3

Participation in jazz ensemble(s) as assigned by the ensemble committee. Prerequisite: MUSC 2182 or consent of the Faculty of Music.

MUSC 3190 Ensemble

(Formerly 033.319) Participation in a Faculty of Music Ensemble other than the one designated as appropriate to MUSC 3180 (or 033.318) (to be chosen in consultation with the Faculty of Music).

MUSC 3192 Jazz Improvisation 2

A continuation of Jazz Improvisation 1. Rhythmic devices, rhythmic modes, melodic and harmonic devices, scales, chords and substitutions in the context of song form, song fragments, repertoire. The student will be required to keep a journal of melodic devices and original jazz compositions. Prerequisite MUSC 2192 or consent of the Faculty of Music.

MUSC 3230 Acoustics of Music

(Formerly 033.323) A study of the physical basis of music; consideration of the nature of musical sound, tone production of typical musical instruments, scales, and temperaments, and architectural acoustics. Experiments and projects.

MUSC 3270 Performance Skills

(Formerly 033.327) For performance majors in the Faculty of Music. Provides training in performance-related skills of the music profession, including such topics as acting, body awareness, self-promotion, career management, master classes, concert organizing, concert promotion and participation.

MUSC 3272 Jazz Performance Skills

A course designed to equip the student with the techniques necessary to rehearse, interact and perform effectively with an ensemble in various situations.

MUSC 3300 Composition Study

(Formerly 033.330) Individual instruction in composition. For Music students only.

MUSC 3360 Topics in Music Education

(Formerly 033.336) This course may vary from year to year depending on the needs and interests of instructors and students.

MUSC 3380 From Rock to Rap and Beyond: A History of Popular Music in the Later 20th Century

(Formerly 033.338) A survey of popular music in North America and Britain from the mid-sixties to the present, beginning with the two foremost bands of the British Invasion, the Beatles and Stones, and the development of folk rock and psychedelic rock. Coverage of the seventies consists of a survey of the various genres of mainstream and album oriented rock while coverage of the eighties juxtaposes the superstars of MTV with radical developments in rap/hip hop and punk/new wave. The nineties focuses on the continual mainstreaming of music on the edge of rap, alternative and world beat.

MUSC 3390 From Ragtime to Rock'n'Roll: A History of Popular Music in the 20th Century

(Formerly 033.339) A survey of popular music in North America from the ragtime craze and Tin Pan Alley tradition, through the development of blues and country to the emergence of Rhythm and Blues and Rock.n.Roll to the beginnings of the .British Invasion..

MUSC 3442 Jazz Pedagogy 1

A course designed to instruct jazz musicians on procedure and methodology for teaching jazz song form, rhythmic concepts, repertoire and history to K-8 students. Class members will teach and perform with students from the Faculty of Music Preparatory Division.

MUSC 3470 Major Practical Study

(Formerly 033.347) Individual instruction, normally in the area chosen in MUSC 2400 (or 033.240). An important constituent of the grading procedure for this course is performance in and attendance at the recitals/concerts of the Faculty of Music. For Music students only.

MUSC 3480 Minor Practical Study

(Formerly 033.348) Individual instruction in an area other than that selected for Major Practical Study. Normally a continuation of MUSC 2480. Written consent from the Faculty of Music is required prior to registration.

MUSC 3550 Recital 1

(Formerly 033.355) Prerequisite: consent of the instructor and the director required.

MUSC 3552 Jazz Recital 1

A performance of works written by the student in Jazz Improvisation and Jazz Composition and Arranging, along with repertoire from Jazz Ensemble classes.

MUSC 3600 Conducting

(Formerly 033.360) Development of the conducting craft including the use of the baton, effective verbal and non-verbal rehearsal skills and practise in score preparation.

MUSC 3620 Independent Study 1

(Formerly 033.362) Individual project designed by the student and a supervising faculty member. This study may be in an academic or applied area. Approval from

the Faculty of Music is required.

MUSC 3650 Electroacoustic Music

An introduction to electroacoustic music composition with the focus on acousmatic music. The course covers sound aesthetics, historical perspective of electro-acoustic music, repertoire and basic studio techniques such as sound editing, digital signal processing, multi channel techniques and sound mixing.

MUSC 3690 Percussion Techniques

(Formerly 033.369) Class instruction in percussion instruments. Development of basic playing techniques and examination of materials and procedures for individual and group instruction.

MUSC 3730 Early Music Development

(Formerly 033.373) Procedures and materials for the development of musicality in children through listening activities, movement, creativity, singing and classroom instruments.

MUSC 3770 Vocal Techniques

(Formerly 033.377) Class instruction in vocal technique. Development of good vocal and choral sound and examination of materials and procedures for individual and group instruction.

MUSC 3780 Woodwind Techniques

(Formerly 033.378) Class instruction in woodwind instruments. Development of music playing techniques and examination of materials and procedures for individual and group instruction.

MUSC 3790 Brass Techniques

(Formerly 033.379) Class instruction in brass instruments. Development of basic playing techniques and examination of materials and procedures for individual and group instruction.

MUSC 3800 String Techniques

(Formerly 033.380) Class instruction in string instruments. Development of basic playing techniques and examination of materials and procedures for individual and group instruction.

MUSC 3820 Topics in Music

(Formerly 033.382) This course may vary from year to year depending on the needs and interests of instructors and students.

MUSC 3830 Topics in Music

(Formerly 033.383) This course may vary from year to year depending on the needs and interests of instructors and students.

MUSC 3840 Topics in Music

(Formerly 033.384) This course may vary from year to year depending on the needs and interests of instructors and students.

MUSC 3850 Topics in Music

(Formerly 033.385) This course may vary from year to year depending on the needs and interests of instructors and students.

MUSC 3880 Jazz Ensemble Techniques

(Formerly 033.388) Procedures for organizing, rehearsing, and directing small and large group jazz ensembles. Study of repertoire and performance materials, with emphasis on personal understanding of jazz improvisation and style. Prerequisite: enrollment in the B.Mus./B.Ed. integrated program or consent of the Faculty of Music.

MUSC 3960 Music of the Twentieth Century 1

(Formerly 033.396) An introduction to music written between 1900 and 1945. Works will be examined from both a compositional/theoretical perspective and in terms of their historical/social/philosophical contexts. Prerequisites: MUSC 2120 (or 033.212) and MUSC 2070 (or 033.207) and MUSC 2080 (or 033.208).

MUSC 3970 Music of the Twentieth Century 2

(Formerly 033.397) A continuation of MUSC 3960, examining works from 1945 to the present. Prerequisites: MUSC 3960 (or 033.396) and MUSC 2120 (or 033.212) or consent of the instructor.

SECTION 7: Music Course Descriptions-4000 Level

MUSC 4010 French Diction and Repertoire

(Formerly 033.401) Specialized instruction in French diction, translation and transcription using the International Phonetic Alphabet, with direct application to performance activities in French vocal repertoire. This course will be rotated on a three-year cycle with MUSC 4020 (or 033.402) and MUSC 4030 (or 033.403).

MUSC 4020 Italian Diction and Repertoire

(Formerly 033.402) Specialized instruction in Italian diction, translation and transcription using the International Phonetic Alphabet, with direct application to performance activities in Italian vocal repertoire. This course will be rotated on a three-year cycle with MUSC 4010 (or 033.401) and MUSC 4030 (or 033.403).

MUSC 4030 German Diction and Repertoire

(Formerly 033.403) Specialized instruction in German diction, translation and transcription using the International Phonetic Alphabet, with direct application to performance activities in German vocal repertoire. This course will be rotated on a three-year cycle with MUSC 4010 (or 033.401) and MUSC 4020 (or 033.402).

MUSC 4110 Special Area Paper

(Formerly 033.411) The student will select a particular area of special interest or significance, work under supervision of a faculty member, and present results in an extended paper. Prerequisites: MUSC 2120 (or 033.212) and MUSC 2070 (or 033.207), or consent of the Faculty of Music.

MUSC 4112 Jazz Composition and Arranging 2

A continuation of Jazz Composition and Arranging 1. The student will write for larger ensembles, including jazz orchestra. Course will culminate in a recital of student compositions and arrangements. Prerequisite: MUSC 3112 or consent of the Faculty of Music.

MUSC 4130 History of Women in Music

(Formerly 033.413) A study of the female contribution to the art of music from the Middle Ages to the present; emphasis on the changing roles of, and attitudes towards, women as composers and performers.

MUSC 4140 History of Canadian Music

A survey of music in Canada from Colonial times to the present, encompassing both folk, popular and classical traditions.

MUSC 4150 Choral Repertoire

(Formerly 033.415) A study and examination of choral repertoire suitable for community and church choir.

MUSC 4160 Major Practical Study

(Formerly 033.416) Individual instruction, normally in the area chosen in MUSC 3470 (or 033.347). An important constituent of the grading procedure for this course is performance in and attendance at the recitals/concerts of the Faculty of Music. For Music students only.

MUSC 4180 Ensemble

(Formerly 033.418) Participation in University Symphony Orchestra, University Wind Ensemble, Women's Choir, Bison Men's Chorus, University Jazz Orchestra, University Concert Band or University Singers, as is appropriate to the student's background and/or major applied area (placement to be determined by ensemble committee).

MUSC 4182 Jazz Ensemble 4

Participation in jazz ensemble(s) as assigned by the ensemble committee. Prerequisite: MUSC 3182 or consent of the Faculty of Music.

MUSC 4190 Ensemble

(Formerly 033.419) Participation in a Faculty of Music Ensemble other than the one designated as appropriate in MUSC 4180 (or 033.418) (to be chosen in consultation with the Faculty of Music).

MUSC 4192 Jazz Improvisation 3

A continuation of Jazz Improvisation 1 and 2. Rhythmic devices, rhythmic modes, melodic and harmonic devices, scales, intervallic devices, chords, and substitutions in the context of song forms, song fragments, repertoire. The student will be required to keep a journal of melodic devices and original jazz compositions.

Prerequisite: MUSC 3192 or consent of the Faculty of Music.

MUSC 4300 Composition Study

(Formerly 033.430) A continuation of MUSC 3300; under the instructor's supervision, the student will compose a major work intended for performance at the conclusion of the course. For Music students only.

MUSC 4330 Advanced Analysis

A survey of analytical approaches to tonal and post-tonal music. Aspects of musical structure, perception and performance will be explored through readings and the analysis of major works from the core repertoire. Prerequisite: MUSC 2120 or consent of the Faculty of Music.

MUSC 4350 Music for Children 3

(Formerly 033.435) Advanced study of the Orff-Schulwerk approach to music education. Prerequisite: a grade of "B" or better in MUSC 3140 (or 033.314), plus consent of the instructor.

MUSC 4360 Wind Repertoire

(Formerly 033.436) A selected survey of wind literature from 1500 to the present. Prerequisite: MUSC 4770 (033.477) and MUSC 4780 (033.478), or consent of the Faculty of Music.

MUSC 4370 Wind Conducting Techniques

(Formerly 033.437) A study of the psychological, philosophical and practical aspects of conducting wind ensembles at all levels. (entry to professional). Prerequisite: MUSC 4770 (033.477) and MUSC 4780 (033.478), or consent of the Faculty of Music.

MUSC 4380 Piano Repertoire

(Formerly 033.438) A comprehensive survey of major composers and their compositions for solo Piano. (Required course for piano Performance majors)

MUSC 4390 Piano Chamber Music Literature Seminar

(Formerly 033.439) A selected survey of piano chamber music.

MUSC 4430 Pedagogy and Repertoire

(Formerly 033.443) A consideration of approaches to the teaching of style and technique, through an examination of the repertoire for the student's major practical study.

MUSC 4440 Vocal Pedagogy

(Formerly 033.444) An exploration of the foundations of the singer's art and craft, including the physical nature of the singing voice, stages of development, and various national, historical and individual pedagogical approaches to the teaching of singing. Required course for voice majors in Performance and General Concentrations.

MUSC 4442 Jazz Pedagogy 2

A continuation of Jazz Pedagogy 1, with a focus on high school students. Class members will teach and perform with students from the Faculty of Music Preparatory Division. Prerequisite: MUSC 3442 or consent of the Faculty of Music.

MUSC 4470 Major Practical Study

(Formerly 033.447) Individual instruction, normally in the area chosen in MUSC 3470 (or 033.347). An important constituent of the grading procedure for this course is performance in and attendance at the recitals/concerts of the Faculty of Music. For Music students only.

MUSC 4480 Minor Practical Study

(Formerly 033.448) Individual instruction in an area other than that selected for Major Practical Study. Normally a continuation of MUSC 3480. Written consent of the director is required prior to registration.

MUSC 4490 Piano Pedagogy

(Formerly 033.449) An introduction to teaching of styles and techniques through an examination of piano repertoire. (Required course for piano and organ majors in Performance and General Concentrations.)

MUSC 4520 Coaching Skills

(Formerly 033.452) Introduction to and training in philosophies and techniques of

vocal coaching including both song and operatic repertoire.

MUSC 4530 Operatic Piano

(Formerly 033.453) Development of skills required of an operatic pianist, including standard arias, operatic scores, working with conductors and developing an orchestral sound. May include participation in community opera events. (by audition only)

MUSC 4560 Recital 2

(Formerly 033.456) Preparation and performance of a public, full-length graduation recital. The program, which must be approved by the applied instructor and the director, will normally include a major chamber music work.

MUSC 4562 Jazz Recital 2

A performance of works written by the student in Jazz Improvisation and Jazz Composition and Arranging, along with repertoire from Jazz Ensemble classes.

MUSC 4630 20th to 21st Century Piano Repertoire

(Formerly 033.463) Piano repertoire from 1900 to the present.

MUSC 4650 Interactive Computer Music

An introduction to interactive computer music composition. The course covers different techniques for interaction between performers and a computer. Experiments will be done using major software for live MIDI and audio processing. The course also covers sound synthesis. Possibilities are given to write with either projects involving performers or multi-disciplinary projects (for example, installation including visual elements).

MUSC 4660 Computer Assisted Composition

An introduction to Computer Assisted Composition. The course covers a variety of mathematical models for structuring musical parameters, such as probability, iterative functions, spectral pitch organization, rule-based systems and morphological models. Different environments using the Lisp language are used as a base for experiments.

MUSC 4750 Choral Techniques 1

(Formerly 033.475) Procedures for organizing, rehearsing and conducting various types of choral ensembles. Examination of performance materials.

MUSC 4760 Choral Techniques 2

(Formerly 033.476) Continued study in rehearsing and conducting standard choral ensembles. Study of repertoire and related literature. Prerequisite: MUSC 4750 (or 033.475).

MUSC 4770 Band and Orchestral Techniques 1

(Formerly 033.477) The historical development and present instrumentation of standard instrumental ensembles. Procedures for organizing, rehearsing and conducting bands and orchestras. Examination of performance and instructional materials.

MUSC 4780 Band and Orchestral Techniques 2

(Formerly 033.478) Continued study in rehearsing and conducting standard instrumental ensembles. Study of repertoire and related literature. Prerequisite: MUSC 4770 (or 033.477).

SECTION 7: Post-Baccalaureate Course Descriptions-5000 Level

MUSC 5180 Ensemble

(Formerly 033.518) Participation in a Faculty of Music ensemble as is appropriate to the student's background and/or major applied area. (To be decided by the Major Practical Study Teacher in consultation with the ensemble committee).

MUSC 5400 Major Practical Study

(Formerly 033.540) Individual instruction in the instrument area of study at the Post-Baccalaureate level.

MUSC 5560 Recital

(Formerly 033.556) Preparation and performance of a public, full-length recital at the Post-Baccalaureate level. The program, must be approved by the applied instructor and the jury committee judging the recital. It should include an appropriate balance of solo and chamber repertoire.

SECTION 4: Program Requirements

4.0: Program Requirements Introduction

SECTION 4: Program Requirements Intro,

These programs are in effect for students admitted since 1997-98. Students who entered in previous years should consult earlier calendars.

4.1 First Year

4.1 First Year ,

Bachelor of Music		
MUSC 1070	Introduction to the History of Music	3
MUSC 1080	History of Music 2	3
MUSC 1110	Music Theory 1	3
MUSC 1120	Music Theory 2	3
MUSC 1180	Ensemble	2
MUSC 1190	Ensemble	2

General Notes Regarding Electives

Most electives are not offered every year; some are offered every other year and some are offered less frequently. The listing of a subject as an elective does not guarantee that it will always be available or that it will be possible to fit it into all of the many varied timetable combinations of full- and part-time students. There may be a maximum limit set on the number of students permitted to take an elective in a particular session. Similarly, there will be a minimum limit. If registration is below the minimum, the elective will be cancelled for the session, and those registered will be required to transfer to another elective before the course change deadline date. Students are urged to discuss their elective program with members of the faculty toward the end of their second and third years to obtain advice concerning the best choice of electives for their needs. Each year, second-year and third-year students will be asked to complete a questionnaire concerning their choice of electives for the following year.

4.2 Baccalaureate Program for Registered Nurses

4.3 Courses Available to Students in Other Faculties

SECTION 5: Course Descriptions

5.1 Four-Year Baccalaureate Nursing Program

5.2 Baccalaureate Program for Registered Nurses

SECTION 1: Degree Programs Offered

1.1 Programs,

Program/Degree	Years to Complete	Total Credit Hours	Maximum Years to Complete
Four-Year Baccalaureate Nursing Program/Bachelor of Nursing	4*	129	10
Baccalaureate Program for Registered Nurses**/Bachelor of Nursing	2	45	5

*This includes one year (30 credit hours) of study in University 1.

**This program is designed specifically for active practicing Registered Nurses.

1.2 Available Options,

Inter-Faculty Option in Aging

Inter-Faculty Option in Aging courses are offered by the following faculties: Clayton H. Riddell Faculty of Environment, Earth, and Resources; Arts; Human Ecology; Nursing; Kinesiology and Recreation Management; and Social Work. To complete the Inter-Faculty Option in Aging, students will complete a total of 18 credit hours including each of the following:

- Required Courses (six credits). See the Registration Guide for the current course number being offered.

a) IDES 2650 /HMEC 2650/REC 2650/SWRK 2650 The Social Aspects of Aging (3 credit hours)

b) NURS 2610/KIN 2610 Health and Physical Aspects of Aging (3 credit hours)

- Electives (12 credit hours).

a) At least three credits of professional/discipline-specific applied work on aging within the student's faculty of registration; and

b) An additional nine credit hours in aging electives from the participating faculties. Students can take nine credit hours from their own faculty but are encouraged to select offerings from other faculties. Lists of eligible elective courses are available from the student advisors.

- The nursing option in aging elective is NURS 2200 Topics in Aging.

Upon completion of these requirements, the "Option in Aging" comment will be recorded on the student's transcript. Information on the Inter-Faculty Option in Aging is available from a student advisor.

1.3 Professional Designation,

A graduate of the Four-Year Baccalaureate Nursing Program must write the Canadian Registered Nurse Examination (CRNE) to become eligible to practice nursing. Following successful completion of all courses, the Faculty of Nursing provides the College of Registered Nurses (CRNM) with a letter indicating that the student has completed the program requirements and is a potential graduand. Completion of the program entitles students to work as graduate nurses and to write the CRNE to obtain the designation, Registered Nurse (RN). Application and registration information can be obtained from the CRNM website at: www.crnmb.ca.

SECTION 2: Admission Requirements

2.1 Four-Year Baccalaureate Nursing Program ,

The following is a summary of the admission requirements. All admission requirements, as well as application deadline dates and forms, are included in an applicant information bulletin that is available from the Admissions Office website at <http://www.umanitoba.ca/student/admissions/>.

Courses completed at recognized universities other than the U of M:

Non-Nursing courses must be assessed as exact equivalents in order to meet the specific course requirements for admission under Option 1 or Option 2. It may not be possible to establish equivalency of courses completed over 10 years prior to application. In those situations, required courses may have to be repeated.

Non-Nursing courses that were completed more than 10 years prior to admission and that have been evaluated by the University of Manitoba can be used in the admission process but will not be considered for transfer credit toward the Nursing degree. Thus, only courses completed within 10 years prior to the date of admission to the Faculty of Nursing will be considered for transfer credit.

All courses (regardless of age) within the most recent 60 credit hours of university level course work will be included in the calculation of AGPA.

The above information also applies to Nursing courses taken at universities other than the U of M; however, Nursing courses will be considered for evaluation and credit only if completed within 5 years prior to application/admission.

See also Section on "Advanced Standing/Transfer Credit".

Course requirements for admission:

Students must meet the entrance requirements under Option 1 or Option 2, and complete the University Written English requirement to be eligible for admission (see Note 1). All required courses must be at a 1000 level or higher. "0900" level courses (e.g. ENGL 0930) are not accepted for admission or transfer credit.

The AGPA for admission will be calculated on the most recent 60 credit hours (including repeated courses) of university level course work. If an applicant has less than 60 credit hours, the AGPA will reflect all credit hours completed (i.e.: a minimum of 30 credit hours to a maximum of 60 credit hours).

The minimum AGPA of applicants admitted under Option 2 may be significantly higher than for Option 1 applicants. An AGPA higher than the minimum is recommended as admission may be competitive. Preference will be given to Option 1 applicants. The lowest AGPA accepted in 2009 2010 was 3.07 20 for Option 1, and 3.493 80 for Option 2.

Note 1: According to University policy, students who have a completed undergraduate degree are exempt from the Written English and math requirements (see appropriate section in Calendar for University policy on written English requirement).

Option 1

The above general requirements for admission, and:

All applicants must complete a minimum of 30 credit hours in the following identified courses (or their equivalent) with a minimum grade of "C" in each course before entering the Faculty of Nursing. The University Written English requirement must be met. The minimum adjusted GPA for admission to the Faculty of Nursing under Option 1 is 2.5. The Faculty of Nursing may admit students from Option 1 with a GPA of 2.0-2.49 (in descending AGPA order) when space is available.

BIOL 1410 Anatomy of the Human Body (formerly ZOOL 1320)

BIOL 1412 Physiology of the Human Body (formerly ZOOL 1330)

NURS 1260 Human Growth & Development

NURS 1280 Introduction to Nursing

MBIO 1220 Essentials of Microbiology (see Note 6)

3 credit hours of Humanities electives (see Note 2)

6 credit hours of Social Science courses (see Note 3)

6 credit hours of courses offered by the Faculty of Science (see Notes 4, 5, and 6)

Note 2: Humanities: English, Philosophy, History, Religion, Languages, Classics, Native Studies, etc. Humanities information is found in the chapter for the Faculty of Arts, Additional Faculty Regulations and Policies section 4.1.1.

Note 3: Select from: Introduction to Psychology PSYC 1200 (6), **or** Introduction to Sociology SOC 1200 (6), **or** Human Origins and Antiquity ANTH 1210 (3) and Cultural Anthropology ANTH 1220 (3).

Note 4: With the exception of Geological Sciences (GEOL 1XX0), courses under the Clayton H. Riddell Faculty of Environment, Earth, and Resources do not meet the Science elective requirement if taken in 2003-2004 and later. 1000 level introductory Geological Sciences courses (GEOL 1XX0) now offered under the Clayton H. Riddell Faculty of Environment, Earth, and Resources, will be accepted as Science courses if taken prior to September 1, 2006.

Note 5: BIOL 1110 [Health and Health Professions] may not be used as a Science elective.

Note 6: Science Prerequisites. Students must meet the current Science prerequisites before registration for Science courses. See the chapter for the Faculty of Science for the current prerequisites. It is preferred that the above prerequisites have been completed within the last five years. Math 40S is a prerequisite for Microbiology and Statistics.

Option 2

The general requirements for admission, and:

All applicants must have completed at least 30 credit hours. The University written English requirement must be met (see Note 1). A minimum adjusted grade point Undergraduate Studies

average of 2.5 is required. A minimum grade of C is required in each of the following courses. Completed courses must include:

1000 level English (3 credit hours)

1000 level Science (3 credit hours)

Applicants from Diploma and Degree Nursing Programs Category

Applicants who have attended but have not completed a nursing diploma or degree program, the completion of which would result in the graduate's eligibility to write the Canadian Registered Nurse Examination (or equivalent) in order to qualify for registration to practice as a Registered Nurse, must meet the admission requirements outlined below.

1. Meet admission requirements under Option 1 or Option 2, including the competitive AGPA in the year of application.

2. Submit, in writing, the reason for leaving the previous or current program and for applying to the Four-Year Baccalaureate Nursing Program at the University of Manitoba.

3. The Director, Dean, Coordinator, or Head of the Nursing program in which the student was previously or is currently registered will be contacted by the Faculty of Nursing for information about the student's status in the previous or current nursing program (including matters pending) with regard to failures, probation, suspension, determination of professional unsuitability, disciplinary action, or other related matters.

The Admissions Committee reserves the right to deny admission to the University of Manitoba Nursing program based on any of the supplementary information. Applicants who would be eligible to register in third or fourth year courses will be considered for admission only if space is available.

Appeals of decision are limited to the question of procedural regularity only. The merits of the decision are not subject to review.

Special Consideration Category

The Special Consideration Category will consider applicants from Aboriginal populations of Canada only. Applicants in this category must meet the minimum entrance requirements of Option 1 including a minimum AGPA of 2.5; however, they do not have to meet the competitive grade point average of admitted students in the admission year. Applicants must complete a supplementary application form that is sent by the Admissions Office following submission of the regular application. The Supplementary Application and following information are due no later than June 1:

1. A typed personal statement that identifies the reasons for selecting Nursing as a career choice; describes their education, employment, and volunteer experience; relates the significance of these experiences to their choice of Nursing as a career; and provides their reasons for applying in the Special Consideration category.

2. Three professional letters of reference that address the applicant's suitability for Nursing and potential for success. One of the letters is required from a Nursing course leader, attesting to the applicant's suitability for the Nursing program. Examples of suitable references include a teacher, employer, clergy, and health professional. References from friends or family will not be accepted.

3. Proof of Aboriginal Ancestry (i.e., Copy of Treaty Status or Metis Card).

Selection is determined by the Admissions Committee.

In considering applications in this category, less weight will be given to background academic performance.

The Admissions Committee reserves the right to deny admission to the University of Manitoba based on any of the supplementary information.

Up to five percent of admission spaces may be offered to Special Consideration Category applicants. The allocation of available spaces is entirely at the discretion of the Faculty of Nursing.

The Admissions Committee shall not be bound to admit the maximum percentage of applicants in the Special Consideration category in any given year.

The Admissions Committee reserves the right to consider the applicant who has applied for Special Consideration under the regular admission category, if it benefits the applicant.

Appeals of decisions are limited to the question of procedural regularity only. The merits of the decision are not subject to review.

Provisional Admission - Criminal Record, Child Abuse Registry, Immunization and CPR

All successful applicants are admitted provisionally pending compliance with the Criminal Record/Child Abuse Registry and immunization/CPR requirements of the Faculty of Nursing. Failure to meet the requirements by August 1st will result in the offer of admission being revoked. Contact the Faculty of Nursing or check the website at www.umanitoba.ca/nursing for further information.

Applicants should note there will be a cost, as well as a time investment, in obtaining the immunizations, CPR certification, and Criminal Record and Child Abuse Registry checks.

Criminal Record Check/Child Abuse Registry Check for Admission

Admitted students must provide Criminal Record Screening reports, including Vulnerable Persons Search, and Child Abuse Registry listing. As it can take up to 120 days to obtain these documents, it is recommended that applicants apply for the Criminal Record Check, Vulnerable Persons Search, and Child Abuse Registry Check at the time of application to the program.

All successful applicants must provide a self-declaration of a criminal record and Child Abuse Registry listing, an official Criminal Record Check, including a vulnerable persons search, and Child Abuse Registry check following provisional admission to the Faculty of Nursing. A criminal conviction will not necessarily result in denial of admission to the Faculty of Nursing. However, criminal offences will be reviewed by a sub-committee of the Nursing Admissions Committee for the implications of the conviction in view of the professional mandate to protect the public. Failure to disclose any adult criminal record or listing on the Child Abuse Registry will invalidate an applicant's application and shall result in automatic expulsion from the Faculty of Nursing if the applicant has been admitted. Any applicant on the Child Abuse Registry will be denied admission.

Information on the self-declaration of a criminal record and Child Abuse Registry listing is provided in the Application Information Bulletin, available from Enrolment Services at 424 University Centre.

The College of Registered Nurses of Manitoba (CRNM) also requires that all graduates of an approved nursing education program who wish to practice nursing in this province disclose information about any conviction for an offence under the Criminal Code (Canada) as indicated above. The review process by the Faculty of Nursing is independent of the review process conducted by the CRNM.

Immunization and CPR Certification

Undergraduate Studies

Immunizations and certification in CPR at the Health Care Provider Level (C) are a requirement mandated by the Regional Health Authorities, and are a requirement for admission to the Faculty of Nursing. As the immunizations are recommended for all Canadian adults, and as it takes a number of months to obtain the immunizations, it is recommended that all applicants start their immunizations no later than the time of application to the Faculty of Nursing, in order to meet the August 1st deadline if offered admission.

CPR certification should not be obtained before April, as it must be valid for the entire academic year to April.

Advanced Standing/Transfer Credit

Advanced standing will be considered for courses completed at the University of Manitoba.

Nursing courses from any university, including the University of Manitoba, will be considered for advanced standing/transfer credit only if they have been completed within five years prior to admission to the Faculty of Nursing.

Credit for Nursing courses previously completed as a student in the Faculty of Nursing is not given if there has been a lapse of five years or more since last attendance in the program.

Non-Nursing courses completed at other recognized institutions will be considered if completed within the past 10 years.

See also section on "Courses Completed at Recognized Universities other than the University of Manitoba."

Advanced Placement Option: LPN

Applicants who graduated from the Licensed Practical Nursing (LPN) Program from Assiniboine Community College within five years of admission years prior to admission to the Faculty of Nursing may be eligible for transfer credit. Applicants must meet admission requirements.

Advanced Placement Option: RPN

Registered Psychiatric Nurses may be eligible for advanced standing in the Four-Year Baccalaureate Nursing Program. Applicants should inform the Faculty of their RPN status

2.2 Baccalaureate Program for Registered Nurses,

All admission requirements for applicants who are already Registered Nurses are described in detail in an applicant information bulletin that includes application deadline dates and application forms. This material is available from the admissions office website at: <http://www.umanitoba.ca/student/admissions/>

Admission Requirements

- 1) Graduation from an approved diploma of nursing education program;
- 2) Current active practicing membership in a Canadian provincial or territorial association/college of registered nurses; and
- 3) A minimum of 1125 hours of nursing experience will normally be required for selection.

The selection of students is based upon academic standing and professional experience. If applications exceed the number of spaces available, the best qualified candidates will be selected.

Proof of Professional Registration

Active practicing membership must be maintained throughout the program in the Canadian jurisdiction under which the student is a practicing RN. Verification will be obtained annually from the College of Registered Nurses of Manitoba by the Faculty for returning Manitoba students.

Students from outside of Manitoba must submit proof of registration annually from the registering body to the Faculty of Nursing.

After admission and at any time prior to completing the program, students with any changes to their active practicing status with the College of Registered Nurses of Manitoba or other Canadian jurisdiction in which they hold membership, (e.g., conditions placed on a registration or ineligibility for active practicing status), are required to report this information to the Associate Dean, Undergraduate Programs, Faculty of Nursing. Such changes will be reviewed on a case by case basis. Failure to report a change in status may result in disciplinary action.

Transfer of Credit

University credits earned outside of nursing diploma programs or earned as part of an incomplete degree may be considered for transfer of credit. If a required course in the baccalaureate program was earned as part of a nursing diploma program or as part of another degree, an alternative course must be substituted. Transfer of credit will be considered for university level nursing courses completed within the five years prior to admission. Credit for previous nursing courses is not given if there is a lapse of five years or more from the last date of attendance in the program or if taken more than five years prior to admission. Credit for non-nursing courses taken at other universities over 10 years prior to admission will not be granted.

Graduates of the Red River College Diploma Nursing Accelerated Program (DNAP) (est. 2000) will receive advanced standing in the Baccalaureate Program for Registered Nurses (BPRN) for the following courses, provided a minimum grade of C+ was achieved in each course for transfer: NURS 3210 Research Methods, NURS 4220 Law and Ethics, and 6 credit hours of non-nursing electives. The Nursing courses must have been completed within five years, and the non-Nursing courses completed within 10 years, prior to admission to the Faculty of Nursing. All remaining courses for the BPRN must be completed at the University of Manitoba in order to meet the residency requirement for the BPRN.

Transfer of Credit for Advanced Certificate Programs

No credit will be given for these certificates in the BPRN.

SECTION 3: Academic Regulations

Section 3: Nursing,

The provisions of the chapter, [General Academic Regulations and Requirements](#), and the chapter, [University Policies](#), apply to all students. In addition, the Faculty of Nursing has regulations and requirements, published below, that apply specifically to its students.

Following the regulations for all students, please see the regulations that are specific to each program.

3.1 Regulations for All Students,

Students are reminded of their obligation to be familiar with all regulations governing their continued progress in the program.

Students admitted to the Four-Year Baccalaureate Nursing Program must complete a minimum of 3 credit hours of course work in the Faculty of Nursing in the Fall or Winter term of their admission year. Students admitted to the BPRN must complete a minimum of 3 credit hours of course work in the first or second term following admission (e.g. students admitted for Winter term must complete 3 credit hours in the Winter or Summer term following admission).

Students who wish to interrupt their studies must apply in writing to the Associate Dean, Undergraduate Programs, for a leave of absence. Refer to section on Leave of Absence for further information.

Information Sessions

Optional information sessions will be held for students upon admission to the Faculty of Nursing, **prior to** registration. New students will receive an information package in the mail, and may attend an optional information session. Several sessions will take place in June and July.

Degree with Distinction

Four-Year Baccalaureate Nursing Program: Students who obtain a Degree GPA of 3.8 and above based on the last 67 credit hours of course work will be eligible for a Degree with Distinction.

Baccalaureate Program for Registered Nurses: Students who obtain a Degree GPA of 3.8 and above in their program of studies will be eligible for a Degree with Distinction.

Dean's Honour List

Students who achieve a minimum Term GPA of 3.5, including courses taken on a Letter of Permission, and who are registered for a minimum of 12 credit hours, will be placed on the Dean's Honour list. The Dean's Honour list will be determined after each term of study.

Scholastic Progress Requirements Applicable to All Students

Students will be required to obtain a minimum of "C" grade (2.0) in every course, and a program GPA of 2.5 in order to graduate. A final grade of "D" in any course taken to complete the degree requirement is considered a failure and is not accepted by the faculty.

Academic Probation

Four-Year Baccalaureate Nursing Program

Students enrolled in the Four-Year Baccalaureate Nursing program will be assessed after the Winter term upon completion of a minimum of 24 credit hours. Students failing to achieve the minimum Degree GPA of 2.5 will be placed on probationary status.

Probationary students will be assessed at the end of the Winter term after completion of a minimum of 15 credit hours. Students failing to achieve the minimum Degree GPA of 2.5 will be placed on academic suspension.

With special permission of the Associate Dean, Undergraduate Programs, Faculty of Nursing, a student on probation can request an early review of academic progress based on completion of less than 15 credit hours.

Students on probation are expected to meet with a Student Advisor at least twice in an academic year, with a minimum of once per term, for academic advisement.

Baccalaureate Program for Registered Nurses (BPRN)

Students enrolled in the BPRN will be assessed after the Winter term upon completion of a minimum of 18 credit hours. Students failing to achieve the minimum Degree GPA of 2.5 will be placed on probationary status.

Probationary students will be assessed at the end of the Winter term after completion of a minimum of 15 credit hours. Students failing to achieve the minimum Degree GPA of 2.5 will be placed on academic suspension.

Academic Suspension

A probationary student who does not achieve the minimum academic standing is required to withdraw from the Faculty of Nursing with the status "academic suspension." While suspended indefinitely, after one year's suspension the student may apply for reinstatement on academic probation.

To request reinstatement following academic suspension, the student should submit a written request before May 1 to the Chair, Student Appeals Committee, Faculty of Nursing.

Supplemental Examinations or Tests

The Faculty of Nursing does not permit supplemental examinations or tests.

"0900" Level Courses

Credit will not be given for "0900" courses.

Prerequisite Deficiency

Students who enrol in courses provisionally pending satisfactory completion of pre- or co-requisites must, if unsuccessful, withdraw or amend their registration accordingly. The Faculty of Nursing reserves the right to not send reminders of the requirement to withdraw.

Challenge for Credit

Students wishing to challenge a course for credit should contact a student advisor.

Professional Unsuitability By-Law

The Senate of the University has approved a by-law granting authority to the Faculty to require a student to withdraw from the Faculty for reasons of professional unsuitability. A student may be required to withdraw from the Faculty when, at any time, the Faculty Council, through the Professional Unsuitability By-Law, believes the student to be unsuited for the profession of nursing, on general considerations of scholarship, professional fitness or professional conduct.

Copies of this by-law may be obtained from the Faculty of Nursing website, umanitoba.ca/nursing. See chapter, [General Academic Regulations and Requirements](#).

Attendance

Regular attendance at class is expected of all students in all courses. Attendance in on-line courses will be interpreted as regular and consistent participation in the course. Attendance in the clinical practice/laboratory portions of nursing courses is mandatory to enable the student to satisfy the evaluative criteria of the theoretical and practical components of courses. Students absent from class or practice due to illness may be required to present a certificate of illness. This certificate must be signed by a recognized health care provider. Absence for compassionate reasons is considered on an individual basis. Where absence is involved, make-up time may be required.

A course leader may initiate procedures to debar a student from attending classes and from final examinations and/or from receiving credit where unexcused absences exceed those permitted by faculty regulations.

Voluntary Withdrawal

Students admitted in September, 2004 and later are allowed only one voluntary withdrawal per nursing course in the Faculty of Nursing.

Students who voluntarily withdraw from a nursing course a subsequent time will have their withdrawal reversed and will be expected to complete the course. Any financial implications will be the responsibility of the student. Students planning to withdraw from any course are advised to speak with a student advisor regarding the implications of this decision.

Uniforms

Students are expected to obtain uniforms and other equipment for Nursing courses and practice, as specified by the Faculty of Nursing. All students, including those in the BPRN, are required to wear name tags during clinical courses. Students should contact the Nursing Students' Association Council uniform representative for information. Name tags and crests are ordered during the year two orientation.

Health Requirements and Immunization Regulations

Immunizations are a requirement mandated by the Regional Health Authorities.

Immunization forms are sent to students upon acceptance into the program. Additional forms are available upon request. New students enrolling in the 4-yr program in the Faculty of Nursing must provide proof of current immunizations by August 1st. See section 2.1 Provisional Admission. New students enrolling in the BPRN must provide proof of current immunizations by August 1st for the Fall term, December 1st for the Winter term, and April 15th for the Summer term. See Penalty for Non-Compliance of Immunization and CPR section. Students should keep a copy of their immunization records and retrieve their immunization records from their files upon graduation.

Annual physical and dental examinations are recommended.

Cardiopulmonary Resuscitation Certification (CPR)

All students are required to obtain certification in CPR at the Health Care Provider Level (C). Newly admitted students must provide proof of certification by August 1st. See section 2.1 Provisional Admission. Thereafter, returning students in the Four-Year Baccalaureate Nursing Program, including students who are certified at the Instructor level, must provide proof of re-certification annually by June 1st to the Student Services Assistant or designate. Certification must be valid for the entire academic year; therefore, all nursing students must recertify in April/May.

All students in the BPRN must be certified at the Health Care Provider Level (C). Newly admitted students must submit proof of certification to the Student Services Assistant or designate by August 1st for the Fall term, December 1st for the Winter term, and April 15th for the Summer term. Thereafter, registered nurses are to maintain current certification at the required level.

Penalty for Non-Compliance of Immunization and CPR

Admission will be revoked for new students who do not comply with the deadlines for proof of current CPR and/or immunizations. Returning students, including Joint Baccalaureate Nursing program students from Red River College entering fourth year, who do not comply with the deadlines for proof of current CPR and/or immunizations will be placed on hold status, which blocks the student from the registration system. Students on hold status will be permitted to register after the initial registration period (mid-August) after all documentation has been received. Hold status also prevents receipt of refunds or histories/transcripts from the

Registrar's Office, attending clinical practice and graduation. Students who register after the initial registration period may not be able to register in some or all of the courses they had originally planned to take, and may experience a delay in completing the program.

Clinical Practice

Four-Year Baccalaureate Nursing Program students enrolled in nursing courses with clinical practice components may not register for any other course during those designated clinical days. Nursing clinical practice may be scheduled during the morning, afternoon or evening. Weekends are also used for some sections in clinical courses. Transportation costs to clinical practice settings are the responsibility of the student.

All students must be registered in all clinical courses for both terms by the specified deadline. Failure to register by this date may prevent accommodation in a clinical course. Current deadlines are published in the *Registration Information* on the Faculty of Nursing website.

Every effort will be made to accommodate eligible students who register for clinical courses during the initial registration period. However, spaces in clinical courses are dependent upon the availability of clinical sites, which are determined by health care agencies and the availability of clinical teachers. Therefore, it cannot be guaranteed that all students who registered for the course can be accommodated.

Unsafe Clinical Practice Policy

The debarment policy will be invoked when a student demonstrates unsafe clinical practice. Unsafe clinical practice is behaviour which places the client or staff in either physical or emotional jeopardy. Physical jeopardy is the risk of causing physical harm. Emotional jeopardy means that the student creates an environment of anxiety or distress which puts the client or family at risk for emotional or psychological harm. Unsafe clinical practice is an occurrence or a pattern of behaviour involving unacceptable risk.

Debarment Policy

A student may be debarred from class, clinical practice, laboratories, and examinations by action of the Associate Dean, Undergraduate Programs for persistent non-attendance, unsafe clinical practice, and/or failure to produce assignments to the satisfaction of the instructor. Once the debarment process has been initiated, the student will not be able to voluntarily withdraw from the course that is presently under investigation. Students so debarred will have failed that course.

Security of Academic Records

The university's policies regarding the security of student academic records are found in the chapter, [University Policies](#), of this Calendar.

3.2 Regulations for the Four-Year Baccalaureate Nursing Program, Scholastic Progress

Students entering second, third, and fourth years of the Four-Year Baccalaureate Nursing Program must have a minimum Degree GPA of 2.5 to proceed in the program and a minimum Program GPA of 2.5 to be eligible for graduation. For further information, refer to: Academic Probation - Four-Year Baccalaureate Nursing Program.

Clinical Agency Requirements

Students are required to satisfy the following, as required by the clinical agencies. Details will be provided at the year two orientation sessions.

- **Personal Health Information Act (PHIA)**

Students must abide by the policies and procedures established at clinical practice sites. Within Winnipeg this includes: attending a Winnipeg Regional Health Authority (WRHA) orientation session regarding the Personal Health Information Act (PHIA), signing the PHIA pledge, and obtaining a PHIA card. Students attending clinical practice at institutions outside the jurisdiction of the WRHA, such as hospital or community health programs in rural health authorities, may be required to attend a separate orientation and obtain a PHIA card appropriate for the health institution or region. PHIA card(s) and attendance at the PHIA orientation(s) are required for clinical practice and will be checked at clinical sites.

Electronic Patient Record Training

- **Mask Fit Testing**
- **Non-Violent Crisis Intervention Workshop**
- **Health Requirements and Immunization Regulations** - see information in section 3.1 Regulations for All Students

Failures in Clinical Course Rotations

Students who fail a rotation of a clinical course in which there are multiple rotations will be debarred from the course immediately following that rotation and will receive a final grade of "F". These students will not be permitted to voluntarily withdraw from the course following receipt of the failed grade.

Disciplinary Appeal

Until the final disposition of a disciplinary appeal, students in the Four-Year Baccalaureate Nursing Program will not be permitted to attend clinical practice or the nursing skills laboratory. At the discretion of the Associate Dean, Undergraduate Programs, Faculty of Nursing, students may be granted permission to attend the lecture component only of a nursing course(s) while awaiting a final disposition of an appeal currently in progress.

Clinical Absence

Four-Year Baccalaureate Nursing Program students returning following one year or more absence from clinical courses must complete a mandatory demonstration of psychomotor skills competency in the skills lab. Competency must be demonstrated prior to clinical attendance. Students should consult with a student advisor for instructions. Testing must be completed prior to July 1st.

Failures in Nursing Courses

Students will be permitted to repeat a nursing course only once following a failure. Withdrawal from the program will be required following a second failure in the same nursing course or any two clinical courses. Students who fail a Nursing course twice and are required to withdraw from the Faculty of Nursing are ineligible for re-admission to the Faculty of Nursing.

Students who fail the same Nursing course twice, prior to applying to the Faculty of Nursing, are ineligible for admission to the Faculty of Nursing.

Criminal Record Check/Child Abuse Registry Check – For Current Students

Following the initial submission of the Criminal Record Check/Child Abuse Registry Check, at any time prior to completing the program (regardless of admission date), students charged with or convicted of a criminal offence or listed on the Child Abuse Registry are required to report this information to the Associate Dean, Undergraduate Programs, Faculty of Nursing. Failure to report a criminal offence may result in dismissal from the program. Criminal offences will be reviewed by the Faculty of Nursing for the implications of the conviction in view of the professional mandate to protect the public. A listing on the Child Abuse Registry or failure to report the listing will result in dismissal.

Students are advised that some clinical practice sites require that students complete a current or additional Criminal Record search and/or a Child Abuse Registry check prior to the first clinical practice day.

Residence Requirements

See the chapter, [General Academic Regulations and Requirements](#) in this *Calendar*.

University Mathematics and Written English Requirement

The Written English requirement may be satisfied by a course also chosen to meet the Humanities requirement. Students should refer to the [General Academic Regulations and Requirements](#) in this *Calendar*. The mathematics requirement will be met in Year 2 of Nursing by Statistics STAT 1000.

Leave of Absence

Students wishing to interrupt their studies must submit a written request for a leave of absence, normally by June 1st, to the Associate Dean, Undergraduate Programs, Faculty of Nursing. Later requests may be considered in exceptional circumstances. A leave of absence may normally be granted for a maximum period of one year. Requests for an extension to the leave of absence or for a subsequent leave of absence must be made in writing and will be subject to approval by the Associate Dean, Undergraduate Programs.

In order to return to the Faculty of Nursing, students must submit a written request for reinstatement to the Associate Dean, Undergraduate Programs, no later than May 1st of the year of return. Requests for reinstatement will not normally be considered after May 1st. Students who do not apply for reinstatement by May 1st will normally be considered as having left the Nursing program, and will be withdrawn from the Faculty of Nursing.

As is usual in these kinds of situations, decisions made in response to requests for leaves of absence or reinstatement can be appealed, in this case to the Faculty of Nursing Admissions Committee.

Leave of absence status does not extend the program time limit outlined in the Faculty of Nursing regulations. To maintain leave of absence status, and not be discontinued from the Faculty of Nursing, students may not attend any other faculty or institution during the period in which the leave of absence is in effect. Upon return to the Faculty of Nursing, students will be required to demonstrate their skills as required by the Clinical Absence policy. Students on a 'leave of absence' will be subject to the same Criminal Record and Child Abuse Registry policies as students taking courses and, at the time of requesting a return to studies, will be required to provide a current self-declaration of a criminal record and child abuse registry listing.

Students who attend another faculty or institution while on leave, or who have been withdrawn from the Faculty of Nursing because they were not granted a leave of absence and did not take at least one Nursing course in Fall or Winter term, must re-apply through Admissions should they wish to return.

3.3 Regulations for the Baccalaureate Program for Registered Nurses, Scholastic Progress

Students in the Baccalaureate Program for Registered Nurses must have a minimum Degree GPA of 2.5 to proceed in the program and a minimum Program GPA of 2.5 to be eligible for graduation. For further information, refer to: Academic Probation - Baccalaureate Nursing Program for Registered Nurses.

Residence Requirements

Students in the Baccalaureate Program for Registered Nurses are required to complete, with the minimum grade of "C" in each course, at least 32 credit hours of

University of Manitoba courses. Of these courses, a minimum of 20 credit hours must be from among those offered by the Faculty of Nursing.

Failures in Nursing Courses

Students will be permitted to repeat a nursing course only once following a failure. Withdrawal from the program will be required following a second failure in the same nursing course.

Students who fail the same Nursing course twice, prior to applying to the Faculty of Nursing, are ineligible for admission to the Faculty of Nursing. Students who fail a Nursing course twice and are required to withdraw from the Faculty of Nursing are ineligible for re-admission to the Faculty of Nursing.

Criminal Record Search/Child Abuse Registry Check

Students in the BPRN are required to hold active registration with the CRNM which further requires a yearly self-declaration of any criminal charges or convictions. In addition, at any time prior to completing the BPRN (regardless of admission date), students charged with, or convicted of, a criminal offence or listed on the Child Abuse Registry are required to report this information to the Associate Dean, Undergraduate Programs, Faculty of Nursing. Failure to report a criminal offence may result in dismissal from the program. Criminal offences will be reviewed by the Faculty of Nursing for the implications of the conviction in view of the professional mandate to protect the public. A listing on the Child Abuse Registry or failure to report the listing will result in dismissal. In addition, please note that some clinical practice sites require that students complete a Criminal Record search and/or a Child Abuse Registry check.

Leave of Absence

BPRN students wishing to interrupt their studies must have completed a minimum of 3 credit hours of course work in the Faculty of Nursing in the Fall or Winter term of their admission year. Students must submit a written leave of absence request to the Associate Dean, Undergraduate Programs, Faculty of Nursing. Leave of absence status does not extend the program time limit outlined in the Faculty of Nursing regulations. To maintain leave of absence status at the University of Manitoba, students may not attend any other post-secondary institution during the period in which the leave of absence is in effect. See section 3.2 Transfer of Credit.

Reinstatement

Students who have withdrawn from the Faculty of Nursing (interrupted their studies without requesting a leave of absence) must submit a written request for reinstatement to the Associate Dean, Undergraduate Programs. The student advisor will inform the student of the appropriate procedure and advanced standing, if any, that the student may receive. Note: 1) the student who does not attend another faculty or institution and requests, within five years of voluntary withdrawal, to re-enter the Faculty of Nursing will be advised to forward such a request to the Associate Dean, Undergraduate Programs; 2) the student who requests to return to the Faculty of Nursing more than five years after withdrawal must re-apply through the admissions; 3) the student who has attended another faculty or an institution following withdrawal from Nursing must re-apply through admissions. See section 2.1 Advanced Standing/Transfer of Credit. **Note that the BPRN must be completed within five years, including time on a leave of absence.**

Proof of Professional Registration

Verification of registration of returning students will be obtained by the Faculty annually from the College of Registered Nurses of Manitoba. Students not registered with the College of Registered Nurses of Manitoba (CRNM) and continuing in the program must submit proof annually of active practicing status in the Canadian jurisdiction in which they hold membership.

After admission and at any time prior to completing the program, students with any changes to their active practicing status with the CRNM, or other Canadian

jurisdiction in which they hold membership (e.g., conditions placed on a registration or ineligibility for active practicing status), are required to report this information to the Associate Dean, Undergraduate Programs, Faculty of Nursing. Such changes will be reviewed on a case by case basis. Failure to report a change in status may result in disciplinary action.

SECTION 5: Nursing Course Descriptions-1000 Level

NURS 1260 Human Growth and Development

(Formerly 049.126) Study of the normal growth and development across the lifespan, with consideration of current physiological and psychological knowledge.

NURS 1280 Introduction to Nursing

(Formerly 049.128) The student is introduced to the profession of nursing and to some basic concepts relevant to nursing practice, education and research. Past, present and future roles and functions of the nurse will be explored.

SECTION 5: Nursing Course Descriptions-2000 Level

NURS 2110 Health Assessment of Individuals

(Formerly 049.211) The focus is on health assessment of adults including the normal changes which occur in childhood and aging. The course will provide opportunity to learn the health history and physical examination skills essential to health assessment.

NURS 2120 Nursing Health Assessment

(Formerly 049.212) This course focuses on the development of nursing theory and skills required to assess and record the physical and psychosocial status of healthy individuals. Age and cultural variations are identified. A basic level of assessment of the family and community will be introduced.

NURS 2130 Nursing Skills Laboratory

(Formerly 049.213) Students will learn skills required to assist healthy clients to maintain or improve health. Modifications to the skills required because of age and cultural differences of clients will be identified. Strategies for assisting family care givers to perform selected skills will be incorporated.

NURS 2180 Clinical Nursing Practice I

(Formerly 049.218) Students will apply concepts of health promotion and illness prevention to the care of infants, children, adolescents and young adults. The focus is on health related nursing phenomenon and the development of assessment, communication, teaching/facilitative and basic psychomotor skills. Pre or corequisite: NURS 1280 (or 049.128); and NURS 2120 (or 049.212); and NURS 2130 (or 049.213); and NURS 2240.

NURS 2190 Clinical Nursing Practice II

(Formerly 049.219) Students will apply concepts of health promotion and illness prevention to the care of healthy and at risk middle aged and elderly adults. The focus is on health risk phenomena and the development of assessment, communication, teaching/facilitative, and basic psychomotor skills. Pre- or corequisite: NURS 1280 (or 049.128); and NURS 2120 (or 049.212); and NURS 2130 (or 049.213); and NURS 2230.

NURS 2200 Selected Topics in Aging and Health

(Formerly 049.220) Emphasis will be placed on theory and research related to a current topic in aging and health. Special attention will be directed to integrating concepts and processes of aging. A practicum/field work component will be an integral part of the course. Prerequisite: core courses in the Inter-faculty Option in Aging or permission from the course leader.

NURS 2210 Primary Care Skills: Comprehensive Health Assessment

(Formerly 049.221) Students will engage in comprehensive data collection through obtaining a health history and performing a complete physical exam on newborn, pediatric, and adult clients.

NURS 2220 Pharmacology in Nursing Practice

(Formerly 049.222) Course introduces students to basic concepts and principles related to pharmacology (pharmacokinetics, pharmacodynamics, pharmacotherapeutics) and the nurses' role in drug therapy. The major classifications of drugs will be examined along with issues arising from the use of drug therapy in contemporary society. Prerequisites: ZOOL 1320 (or 022.132) and ZOOL 1330 (or 022.133).

NURS 2230 Health Promotion of Older Adults and their Families

Focuses on the aging changes that occur in older adults and the interaction between aging changes and illness and the resultant presentation of symptoms and functional consequences. Health promotion strategies, including health teaching are highlighted to encourage, maintain and enhance independence, based on the older adult's abilities. Selected teaching/learning models, barriers and motivators, and their application to older adults are discussed.

NURS 2240 Health Promotion of Child Bearing & Child Rearing Families

This course provides an overview of health promotion of infants, children, adolescents, and parents within the family context. The focus is on theories, concepts, nursing research, evidence-based nursing practice, and nursing care related to children and families. Prerequisite: ZOOL 1320 (or 022.132), ZOOL 1330 (or 022.133), NURS 1260 (or 049.126) and NURS 1280 (or 049.128). Pre or corequisite: NURS 2120 (or 049.212).

NURS 2610 Health and Physical Aspects of Aging

(Formerly 049.261) An introduction to health, well-being and aging. Emphasis on health as multidimensional including physical, social and mental health. Integration of theory and research in examining selected issues related to health and physical aspects of aging. Students may not hold credit for NURS 2610 (or 049.261) and PHED 2610 (or 057.261). (A required Option in Aging course)

SECTION 5: Nursing Course Descriptions-3000 Level

NURS 3200 Nursing of Individuals and Families with Long-Term Illness and Disability

(Formerly 049.320) Nursing of individuals and families of all age groups who require palliative nursing measures or need assistance in adapting to long-term illness. The learner will participate in planning relevant clinical experiences to meet own learning objectives.

NURS 3210 Nursing Research Methods

(Formerly 049.321) This course provides an overview of research strategies in nursing with a focus on the acquisition of concepts in order to appraise critically nursing research. Strongly recommended that students complete STAT 1000 (or 005.100) (formerly STAT 2200 (or 005.220)) prior to NURS 3210 (or 049.321).

NURS 3220 Community Health Nursing I

(Formerly 049.322) An analysis of concepts of prevention of disease/dysfunction and promotion of health in community based populations. Focus is on primary and secondary prevention and the promotion of health with identified risk groups. Population groups are assessed for risks to their physical and psychosocial health and current preventive and promotive measures analyzed and critiqued. The impact of macro systems in promoting health are discussed. MNHW NURS 3360 (or 049.336).

NURS 3230 Perspectives on Mental Health Nursing

(Formerly 049.323) Emphasis will be placed on the mental health needs of individuals and their families who are experiencing mental health problems and/or mental illness. Diverse perspectives on mental health and illness will be explored. A clinical practicum will provide an opportunity to apply mental health nursing principles in community settings.

NURS 3240 Adult Intensive Care Nursing 1

(Formerly 049.324) Focus is on the knowledge, integration and application of major intensive care nursing concepts and theories. Pre- or corequisite: NURS 3440 (or 049.344), formerly PHGY 3240 (or 090.324).

NURS 3250 Laboratory Practice in Adult Intensive Care Nursing

(Formerly 049.325) Laboratory course focusing on the acquisition of selected skills associated with the nursing care of critically ill adult patients. Pre- or corequisite:

NURS 3240 (or 049.324); NURS 3440 (or 049.344) or 090.324.

NURS 3260 Clinical Practice in Adult Intensive Care Nursing
(Formerly 049.326) Selective clinical experience, in adult intensive care settings, is designed to enable the learner to apply critical care theory. Prerequisites: NURS 3240 (or 049.324), NURS 3250 (or 049.325) and NURS 3440 (or 049.344) or 090.324.

NURS 3280 Nursing Skills Laboratory
(Formerly 049.328) This course focuses on the development of clinical nursing skills required to assist ill or dying clients. Modifications to the skills required because of age, cultural differences or client preference are identified.

NURS 3290 Health Restoration in Nursing
(Formerly 049.329) This course focuses on concepts, issues and research related to nursing care of clients across the lifespan in the acute phase of disease. The impact on the family and community will be explored.

NURS 3300 Clinical Nursing Practice III
(Formerly 049.330) Students will apply concepts of health restoration to the care of ill clients of all ages and their families in the acute stage of disease. The focus is on illness related phenomena, critical thinking, the development of the care provider and communicator roles, application of research findings and identification of practice issues. Pre- or corequisite: NURS 3280 (or 049.328); NURS 3290 (or 049.329).

NURS 3310 Health Maintenance in Nursing
(Formerly 049.331) This course focuses on concepts, issues and research related to nursing care of individuals across the lifespan who require health maintenance for long term illnesses. The impact on the family and community will be explored.

NURS 3320 Clinical Nursing Practice IV
(Formerly 049.332) Students will apply concepts of health maintenance to the care of clients of all ages with long term illness and their families. The focus is on illness related phenomena, analytical thinking, the development of the care provider and communicator roles, application of research findings and identification of practice issues. Pre- or corequisite: NURS 3270 (or 049.327); NURS 3280 (or 049.328); NURS 3310 (or 049.331).

NURS 3330 Women and Health
(Formerly 049.333) Introduction to health concepts and issues as they relate to women from a woman's health perspective. Emphasis on enhancing self-care and prevention. Studies the relationship between a woman and the Canadian Health Care System, and appropriate methodology for self-care, vis-a-vis nutrition, reproduction, menarche, menopause, etc. Not to be held for credit with the former 049.423. Caution: This course is not intended for 1st year students.

NURS 3340 Providing Care in a Culturally Diverse Society
(Formerly 049.334) This course fosters skills in recognizing and understanding the impact of culture on health related values, beliefs and practices. A culture-general approach is used to develop skills in the provision of nursing care within a culturally diverse society.

NURS 3350 Counselling Skills for Nurses
(Formerly 049.335) Builds on the significance of interpersonal skills in nursing practice in health and illness. Examines theoretical basis and practical application of a counselling approach with clients. Students will have the opportunity for experiential learning.

NURS 3360 Assessing the Health of Communities
(Formerly 049.336) An analysis of concepts of prevention of disease and dysfunction in aggregate and community-based populations in First Nations Communities. MNHW NURS 3220 (or 049.322).

NURS 3370 Primary Care Skills: Clinical Consolidation
(Formerly 049.337) Students will be provided with opportunities to integrate and consolidate clinical nursing skills. Clinical sites include: medicine, emergency, L & D, pediatric E.R.

NURS 3380 Primary Care Skills: Clinical Interventions
(Formerly 049.338) Acute and chronic health conditions throughout the lifespan, and as identified in First Nations and Inuit Health Branch's "Scope of Practice" will
Undergraduate Studies

be addressed through lectures, case studies, student presentations, internet technology and independent learning, basic trauma life support and pediatric life support courses.

NURS 3390 Nursing in Rural Environments
(Formerly 049.339) Emphasis will be placed on the health needs of residents in a rural environment. The nature of nursing and issues encountered in a rural setting, whether in a health care institution or a community health nursing practice are explored. A clinical practicum is an integral part of the course.

NURS 3400 Men's Health: Concerns, Issues and Myths
(Formerly 049.340) An exploration and examination of concerns, issues and myths surrounding men's health and men's health related behaviours. Students will develop a knowledge base for promoting health and preventing illness in men.

NURS 3430 Seminar in Professional Nursing Foundations
(Formerly 049.343) The study and application of academic skills, nursing informatics and theoretical foundations, designed to assist diploma-prepared registered nurses to successfully transition to university and the Baccalaureate Program for Registered Nurses. MNHW NURS 3190 (or 049.319).

NURS 3440 Principles of Disease Related to Adult Intensive Care
(Formerly 049.344) Course focuses on advanced physiology and pathophysiology of the following body systems: cardiovascular, respiratory, neurological, renal and endocrine. May not be held with the former 090.324.

NURS 3450 Introduction to Legal and Ethical Foundations of Nursing Practice
This course will examine the legal and ethical foundations that guide nursing practice. The processes of critical analysis and reasoning will be applied to common legal and ethical dilemmas. Not to be held with the former 049.216.

NURS 3584 Unallocated Credit
Campus Manitoba course.

SECTION 5: Nursing Course Descriptions-4000 Level

NURS 4160 Community Health Nursing II
(Formerly 049.416) Application, integration and synthesis of knowledge and skills in the utilization of the nursing process with families. Development of skills in the process of change with families. Orientation to the concept of prevention and health promotion as focal concepts in the practice of nursing with families in communities. Pre- or corequisite: NURS 3220 (or 049.322). MNHW NURS 4300 (or 049.430).

NURS 4170 Issues and Trends in Nursing and Health Care
(Formerly 049.417) Study of the forces shaping nursing education, service and research and analysis of current issues in nursing and health care. The learner will develop awareness of professional nursing roles and responsibilities.

NURS 4190 Leadership in Nursing Practice
(Formerly 049.419) Focuses on selected theories of leadership and management. Effective interpersonal behaviour in health care organizations will be examined. The learner will explore own potential to effect change in the health care system.

NURS 4200 The Teaching-Learning Process in Nursing Practice
(Formerly 049.420) Focuses on theories and models of teaching and learning. Principles and strategies for assessing the health/illness learning needs of individuals, groups and communities and for planning, implementing and monitoring the process in nursing situations will be examined. The nursing research base for the process will be explored. Linkages with related nursing concepts will also be demonstrated.

NURS 4210 Independent Study in Nursing
(Formerly 049.421) The learner will have an opportunity to formulate a learning contract to explore, in depth, an area of nursing. This learning contract is to include a major emphasis on the theoretical basis of the selected topic. Prerequisite: 35 credit hours of completed study in the program.

NURS 4220 Law and Ethics in Nursing Practice
(Formerly 049.422) A study of the legal and philosophical bases of the nursing profession and the legal and bioethical issues confronting the professional nurse primarily in the practice setting. A major goal of the course is to draw upon material

specific to the professional nurse.

NURS 4240 Health Promotion in the Community
(Formerly 049.424) This course will provide the opportunity to examine concepts, theories, research and nursing roles as they apply to the promotion of health in communities. Relevant theories and research about group process will be incorporated in the analysis of community health issues.

NURS 4250 Palliative Nursing Care
(Formerly 049.425) This course focuses on concepts, issues, research and skills related to the nursing care of individuals across the lifespan who are experiencing irreversible loss. The impact on the family and the community will be emphasized.

NURS 4260 Nursing Care in Mental Health and Illness
(Formerly 049.426) This course deals with the concept of mental health and illness as it applies to individuals across the lifespan. The effect on the individual, the family and the community will be stressed. The student will gain a greater awareness of the self and the therapeutic use of self in the providing of nursing care.

NURS 4270 Clinical Nursing Practice V
(Formerly 049.427) Students will apply nursing concepts and relevant theories and research in the care of clients and their families who are experiencing psychological stress and to those who are dying. The focus is on critical thinking, the development of the communicator, advocate and collaborator roles. Co-requisites: NURS 4250 (or 049.425); NURS 4260 (or 049.426).

NURS 4280 Theories in Nursing Practice
(Formerly 049.428) This course will enable the student to develop skill in the critical analysis of theories proposed by theorists in nursing and other disciplines. The utility of these theories for nursing practice, education and research will be examined.

NURS 4290 Clinical Practicum
(Formerly 049.429) This course enables students to integrate and critically apply concepts, theories and relevant research to an area of practice and a client group of their choice. Care will address all levels of health, reflect application of a focused body of theory, and consider concepts of leadership, research, ethics, family and community care. Prerequisites: all courses in the program.

NURS 4300 Promoting Health of Communities
(Formerly 049.430) Theoretical and practical application regarding the promotion of health in First Nations Communities. MNHW NURS 4160 (or 049.416).

NURS 4310 Nursing Leadership: Practice and Issues
(Formerly 049.431) The study of the forces shaping nursing leadership and analysis of current issues and trends in nursing and health care. Emphasis will be placed on leadership development within the context of the health care environment now and into the future. MNHW NURS 4170 (or 049.417) or NURS 4190 (or 049.419).

NURS 4420 Health Promotion in the Community
This course will provide the opportunity to examine concepts, theories, research and nursing roles as they apply to the promotion of health in communities. The focus will be on promoting the health of aggregates and communities. Prerequisite: As a general principle, all courses from any given year are to be completed before proceeding to the next year.

NURS 4430 Clinical Nursing Practice 6
Students will apply relevant concepts, theories, and research in population health promotion, primary health care, and prevention of illness. The focus is on the development of nursing skills to work effectively with aggregates and communities. Prerequisites: NURS 2180 (or 049.218), NURS 2190 (or 049.219), NURS 3300 (or 049.330); and NURS 3320 (or 049.332). Corequisites: NURS 4440 and NURS 4420.

NURS 4440 Prevention of Illness
This course focuses on the concepts of risk reduction and the prevention of illness and injury as they are applied to individuals, groups, and populations. The nurse's role in prevention and the early detection of health risks is highlighted. Issues and research relevant to illness and injury prevention are incorporated. Not to be held with the former NURS 2170 (or 049.217). Prerequisites: As a general principle, all courses from any given year are to be completed before proceeding to the next year.

SECTION 4: Program and Graduation Requirements

4.1 Four-Year Baccalaureate Nursing Program – Curriculum

4.1 Four-Year Baccalaureate Nursing Program – Curriculum,
The program can be done by part-time and full-time study.

All courses from any given year are to be completed before proceeding to the next year.

<i>Course No.</i>		
University 1	30 credit hours	
BIOL 1410	Anatomy of the Human Body (see Note 1)	3
BIOL 1412	Physiology of the Human Body (see Note 1)	3
NURS 1260	Human Growth and Development	3
NURS 1280	Introduction to Nursing	3
MBIO 1220	Essentials of Microbiology (see Note 1)	3
	Social Science (6 credits - see Note 1)	6
PSYC 1200	Introduction to Psychology (6)	
	or	
SOC 1200	Introduction to Sociology (6)	
	or	
ANTH 1210	Human Origins and Antiquity (3)	
	and	
ANTH 1220	Cultural Anthropology (3)	
	Science (6 credits from the Faculty of Science, see Notes 1, 3, 4 & 5)	6
	Humanities Elective (see Notes 1,2 & 6)	3

Note 1: All courses can be completed in University 1, or an equivalent program, if students do not wish to extend their program of study.

Note 2: Humanities. English, Philosophy, History, Religion, Languages, Classics, Native Studies, etc. Humanities information is found in the chapter for the Faculty of Arts, Additional Faculty Regulations and Policies section 4.1.1.

Note 3: Science Prerequisites. Students must meet the current Science prerequisites before registration for Science courses. See the chapter for the Faculty of Science for the current prerequisites. It is preferred that the above prerequisites have been completed within the last five years.

Note 4: With the exception of Geological Sciences (GEOL 1XX0), courses under the Clayton H. Riddell Faculty of Environment, Earth, and Resources do not meet the Science elective requirement if taken in 2003-2004 and later. 1000 level introductory Geological Sciences courses (GEOL 1XX0) now offered under the Clayton H. Riddell Faculty of Environment, will be accepted as Science courses if taken prior to September 1, 2006.

Note 5: The course, BIOL 1110 Health and Health Professions, may not be used as a Science elective. It may, however, be used as an elective from year 4, provided that the level requirements of all electives are met.

Note 6: Six credits of the twelve credits of electives including the Native Studies and the Humanities electives, must be at the 2000 level or above. Students should check for pre-requisites for 2000 and 3000 level Native Studies courses.

Year 2	31 credit hours

Year 4	29 + 10 credit hours	
	TERM A (16 credit hours)	
NURS 4250	Palliative Nursing Care	3
NURS 4260	Nursing Care in Mental Health and Illness	3
NURS 4270	Clinical Nursing Practice 5	4
	Electives (see Note 6)	6
	TERM B (13 credit hours)	
NURS 4310	Nursing Leadership: Issues & Practices	4
NURS 4420	Health Promotion in the Community	3
NURS 4430	Clinical Nursing Practice 6	3
NURS 4440	Prevention of Illness	3
	TERM C (10 credit hours)	
NURS 4290	Clinical Practicum (12 weeks)	10

Reminder: It is the responsibility of the student to ensure that degree requirements are met. In order to be eligible to work as a graduate nurse and/or write the Canadian Registered Nurse Examinations, students must meet all program requirements. It is the responsibility of students to ensure all program requirements have been met before working as a graduate nurse and/or writing the qualifying exams to become a Registered Nurse.

NURS 4290 Clinical Practicum

All other courses in the curriculum must be successfully completed and the grade posted prior to starting NURS 4290.

Any costs incurred in completing this course are the responsibility of the student. Proposals must meet the approval of the Faculty of Nursing and must have academic merit. A student's chosen area for completion of practicum experience must be approved by the Faculty of Nursing. The location of the practicum must meet the approval of the University of Manitoba. The location of the practicum is subject to change in the event approval is not received. There may be organizations which require contractual arrangements with the student and/or University of Manitoba prior to permitting the student to enter into the practicum experience. There is no guarantee the University of Manitoba will enter into such contractual arrangements to permit the student to carry out practice at a particular agency or site. In such cases, the student should be prepared to choose an alternate agency or site.

4.1.1 Courses Which May be Used as Electives

Electives are to be taken from Arts, Science, professional faculties or the Inter-Faculty Option in Aging (18 credit hours). (See section 1.2). Of the total credit hours of electives, at least 6 credit hours must be at the 2000 level or higher. Electives offered by the Faculty of Nursing are:

Course No.	Topics	Credit Hours
NURS 2200	Topics in Aging	3
NURS 3330	Women and Health	3
NURS 3340	Providing Care in a Culturally Diverse Society	3
NURS 3350	Counselling Skills for Nurses	3
NURS 3400	Men's Health: Concerns, Issues and Myths	3

These "NURS" courses may be taken as electives only, and are not an alternative for a required nursing course. Note: Each course is normally offered every second year. Inter-Faculty Option in Aging – See Section 1.2

4.2 Baccalaureate Program for Registered Nurses (BPRN)

4.2 Baccalaureate Program for Registered Nurses (BPRN),
The Faculty of Nursing BPRN was developed to recognize and value the knowledge and experience of practicing Registered Nurses. The learner-centred, process curriculum is designed to further the capacity of Registered Nurse practice in an ever-changing and increasingly complex health care system.

The curriculum consists of a minimum of 33 credit hours in Nursing, and 12 credit hours from Arts, Science or a professional faculty (for a total of 45 credit hours).

Students may elect full-time or part-time study. A variety of community settings are utilized for clinical experience. Courses may be offered in late afternoons or evenings, during Summer session and through distance education (correspondence) or internet-based study.

Students graduating with the minimum of 45 credit hours of coursework will be considered on an individual basis for admission to the graduate program in Nursing (Master of Nursing). For further information, contact the Faculty of Nursing, 474-7452.

4.2.1 Special Student Status in Nursing

Students who are not admitted to the BPRN may be eligible to apply to the Faculty of Nursing as a special student. Once admitted, students may register in University of Manitoba courses. Following are the guidelines for special student status:

- Special Students are allowed to register for a maximum of 15 credit hours.
- Special Students must obtain a minimum of "C" grade in a course in order to transfer credit into the BPRN.
- A nursing course completed as a special student may be accepted subsequently for credit in the BPRN up to five years from the date of completion.

Prior to registering for a nursing course, all special students must obtain written permission from a Faculty of Nursing student advisor and present a photocopy of their current Active Practising Membership with the College of Registered Nurses of Manitoba or other jurisdiction.

Completion of courses as a special student does not guarantee admission into the BPRN. All students must complete the application forms and submit required information by the application deadline for the term in which students are applying, unless otherwise indicated at the time of application.

The Faculty of Nursing will allow Registered Nurses admitted to another faculty at the University of Manitoba or another university to register for a maximum of 15 credit hours of nursing courses prior to being admitted to the Faculty of Nursing. Written permission must be obtained from a student advisor and does not guarantee space in the course.

4.2.2 BPRN - Curriculum

Note: Nursing electives may not be offered every year.

Course No. **Core Courses:**

NURS 3430 Seminar in Professional Nursing Foundations (see Note 1)	2
STAT 1000 Basic Statistical Analysis 1	3
NURS 3210 Nursing Research Methods	3
NURS 3220 Community Health Nursing 1 (see Notes 4 and 5)	4
NURS 4200 The Teaching-Learning Process in Nursing Practice	3
NURS 4210 Independent Study in Nursing Practice	4
NURS 4220 Law and Ethics in Nursing Practice	3
NURS 4310 Nursing Leadership: Issues and Practices	4
Nursing Electives (see Note 2)	10
Non-Nursing Electives (see Note 3)	9

Nursing Electives

10 credit hours of acceptable Nursing electives are to be chosen from the following list – at least one course chosen must be a 4 credit hour course.

NURS 2110 Health Assessment of Individuals (3)

NURS 2200 Topics in Aging (3)

NURS 3200 Nursing of Individuals and Families with Long-Term Illness and Disability (4)

NURS 3230 Perspectives on Mental Health Nursing (4)

NURS 3330 Women and Health (3)

NURS 3340 Providing Care in a Culturally Diverse Society (3)

NURS 3350 Counselling Skills for Nurses (3)

NURS 3390 Nursing in Rural Environments (4)

NURS 3400 Men's Health: Concerns, Issues and Myths (3)

NURS 4160 Community Health Nursing 2 (4)

NURS 4250 Palliative Nursing Care (BPRN specific section only) (3)

In addition, the following courses from the Inter-Faculty Option in Aging are acceptable as Nursing electives:

NURS 2610 / KIN 2610 Health and Physical Aspects of Aging (3)

SWRK 2650/ IDES 2650/ HMEC 2650/ REC 2650 The Social Aspects of Aging (3)

NOTES:

1) NURS 3430 should be taken in the first 12 credit hours of the program. Students who have credit for the previous NURS 3190 may substitute this course for NURS 3430.

2) Nursing electives may be used to customize a student's program. Electives may be used to expand on a number of different areas of nursing or may be used to focus on a particular area of nursing practice.

3) Of the 9 credit hours of non-Nursing electives, no more than 6 credit hours may be at the 1000 (introductory) level. See section 5.4 for suggestions re: Non-Nursing Electives for the BPRN. Students may not take courses for credit for which it is assumed that the content was covered in the diploma nursing program (i.e., Anatomy, Physiology, Microbiology, Pharmacology, Psychology, Sociology, etc.).

4) Graduates of the DNA program at Red River College are required to substitute a 4 credit hour Nursing clinical course for NURS 3220.

5) NURS 3360 and NURS 4300 are no longer offered. Students who have previously completed either course within 5 years prior to admission to the Faculty of Nursing may use NURS 3360 in place of NURS 3220 and/or NURS 4300 as a nursing elective.

4.2.3 Clinical Courses and NURS 3200 (Long Term Illness) and NURS 4210 (Independent Study) for the BPRN

Review section 3.1 Regulations for All Students which contains information regarding the Personal Health Information Act (PHIA), immunization and CPR regulations, and other information specific to clinical practice.

A clinical project course (normally designated by the fact that it is a 4 credit hour project based course) involves a heavier workload and time commitment than a 3 credit hour course. For most of these courses, clinical placements/assignments will be arranged between the course leader and student at or prior to the start of a term.

For courses NURS 3200 (Long Term Illness) and NURS 4210 (Independent Study), students must contact the course leader at least **three months prior to the start of classes** to state their intention to register for these courses and to discuss preference of clinical sites. Placement sites will be arranged as requested by the student on a first-come, first-served basis according to the availability of the agency. Registration in these courses is restricted to students who have contacted the course leader.

NURS 4210 Independent Study in Nursing

The Independent Study in Nursing is designed to provide the learner with an opportunity to synthesize previous learning while working with a high degree of independence. Under the guidance of a faculty advisor, students explore a topic of their choosing and design learning objectives consistent with the purpose of the course. Students are required to contact the course leader at least 8 weeks prior to the start of the course to select a topic and faculty advisor. The choice of topic, the proposed plan for completion of the Independent Study, and the faculty advisor must all be approved by the Faculty of Nursing.

Information sessions are scheduled, normally in April for the Fall session and in October for the Winter session, to familiarize students with the course. Students should check the Faculty's web page, BPRN section, for announcements about dates and times.

If a practice setting is required as part of the student's learning objectives, the student is responsible for negotiating access to the setting and addressing agency and faculty requirements. Be advised that there may be organizations which require contractual arrangements with the student and/or the University of Manitoba prior to permitting the student to enter the practice setting. These arrangements are subject to approval by the Faculty and require pre-planning.

Note: the prerequisite for this course is 35 credit hours of completed study in the program.

4.2.4 Courses Which May be Used as Non-Nursing Electives in the BPRN

Courses may be selected from any faculty or school of the University, subject to faculty/department regulations and subject to the student's meeting any prerequisite requirements. See Note 4 under 4.4 BPRN Curriculum. Some suggestions follow:

Faculty of Arts courses - e.g. anthropology, native studies, psychology, sociology, religion

Faculty of Human Ecology - e.g. human nutritional sciences, family social sciences

Asper School of Business (Management) - e.g. courses in business administration, management, organizational behaviour

Faculty of Kinesiology and Recreation Management

Faculty of Science - e.g. biology, chemistry, computer science, microbiology, zoology

Faculty of Social Work - e.g. courses in social welfare policy, communication skills

4.3 Courses Available to Students in Other Faculties

4.3 Courses Available to Students in Other Faculties, Students registered in faculties other than Nursing may take the following Nursing courses without Faculty permission:

NURS 1260 Human Growth & Development

NURS 1280 Introduction to Nursing

NURS 2200 Selected Topics in Aging and Health (see note 1)

NURS 3330 Women and Health (see note 1)

NURS 3400 Men's Health: Concerns, Issues and Myths (see note 1)

NOTES:

1) These courses are not intended for first year students.

Faculty of Pharmacy

Faculty of Pharmacy,
Intro to Pharmacy,

Pharmacists are specialists in drug therapy and provision of pharmaceutical care. This involves not only the traditional function of preparing and dispensing medications but includes designing and monitoring drug therapy plans to optimize patient care. The Faculty of Pharmacy has been educating pharmacists for over one hundred years. It has dynamic faculty members characterized by their teaching expertise, research programs and practice partnerships in the health sciences. Members of the Faculty are internationally recognized through their participation in research and various committees and agencies. Their research is funded through a variety of sources including, CIHR, NSERC, CRC, various other government agencies, and the pharmaceutical industry.

The undergraduate pharmacy program is meant to prepare students for entry-level practice in the profession of pharmacy by providing them with a solid foundation in the basic, pharmaceutical and clinical sciences which is applied to the concept of pharmaceutical care. In addition, the program is designed to provide students with a broad experience in patient care through the nineteen weeks of practical experience in health orientated health care settings and hospital and community pharmacies. The experience is further enhanced with an open elective program in the final year of studies.

*This includes one year (30 credit hours) of study in University 1. The Total Credit Hours for this program will increase to 169 beginning in the 2012-13 academic year.

1.2 Professional Designation, Manitoba Pharmaceutical Association

Students who are accepted for admission to the Faculty of Pharmacy and have commenced classes in the Faculty shall, before October 31 in the year in which they are admitted to the Faculty, file an application for registration as a student of the Manitoba Pharmaceutical Association. Application forms are obtainable from The Registrar, Manitoba Pharmaceutical Association, 200 Tache Ave., Winnipeg, Manitoba R2H 1A7; telephone, (204) 233-1411 and are also provided at the orientation session. The necessary documents which must accompany the application are indicated on the form.

Full information on the requirements for licensure in the Province of Manitoba is available from the registrar of the Manitoba Pharmaceutical Association.

Pharmacy Examining Board of Canada

All applicants for licensure must pass the qualifying examinations of the Pharmacy Examining Board of Canada. The board requires proof of language proficiency. Applicants who did not attend primary and secondary educational institutions where English or French was the principal language of instruction must provide evidence of successful completion of designated language proficiency tests before sitting for the qualifying examinations.

SECTION 2: Admission Requirements

2.1 Course Requirements, (University of Manitoba)

Chemistry CHEM 1300 and CHEM 1310

Biology BIOL 1020 and BIOL 1030

Mathematics MATH 1500, or MATH 1510 or MATH 1520

6 credit hours of Arts electives (of which 3 hours satisfy the University Written English requirement): 0900 courses such as ENGL 0940 are NOT acceptable.

9 credit hours of open electives: 0900 courses such as ENGL 0930 are NOT acceptable.

All admission requirements, as well as application deadline dates and forms, are included in the Applicant Information Bulletin which is available on the University website at:

<http://www.umanitoba.ca/student/admissions/application/deadlines/pharmacy/>

2.2 Other Requirements , Other requirements

High school prerequisites: Biology 40S, Chemistry 40S, and Pre-Calculus Math 40S (min. 60%).

Minimum GPA for consideration: 3.5. (Please refer to the Faculty of Pharmacy Applicant Information Bulletin for more details.)

The admission process includes a written essay/problem solving exercise.

Selection criteria: 70% AGPA, 30% written essay/problem solving exercise. Only students with an essay score of five or more (out of a possible ten) will be ranked for admission.

Criminal Record Check/Child Abuse Registry Check

Many health care agencies where Pharmacy students are placed in a health care setting require a criminal record and/or child abuse registry check. As a result all successful applicants to the Faculty of Pharmacy are now required to provide a self-declaration of a Criminal Record and Child Abuse Registry listing following provisional admission, and subsequently a current, official Criminal Record Search and Child Abuse Registry Check. All documents must be submitted to the Faculty of Pharmacy Dean's Office by the first day of classes. Any applicant on the Child Abuse Registry will be denied admission. A criminal conviction will not necessarily result in denial of admission to the Faculty of Pharmacy. Criminal offences will be reviewed by a sub-committee of the Pharmacy Admissions Committee for the implications of the conviction in view of the professional mandate to protect the public. Failure to disclose any adult criminal record or listing on the Child Abuse Registry will invalidate an application and shall result in automatic expulsion from the Faculty of Pharmacy if the applicant has been admitted. In addition, the Manitoba Pharmaceutical Association requires that all graduates of the Faculty of Pharmacy who wish to obtain a license to practice pharmacy in this province, must disclose information about any conviction for an offence under the Criminal Code (Canada), the Controlled Drugs and Substances Act (Canada), or the Food and Drugs Act (Canada) in order to be considered for eligibility for registration with the Manitoba Pharmaceutical Association. The review process conducted by the Faculty of Pharmacy is independent of the review process conducted by the Manitoba Pharmaceutical Association.

Immunization

All students enrolled in the Faculty of Pharmacy must be immunized against the following diseases: diphtheria/tetanus, polio, rubella, measles, mumps, chickenpox, Mantoux/Tuberculosis and hepatitis B. The influenza vaccination is recommended but not required. Students admitted to first year Pharmacy will be provided with an Immunization package at the time of acceptance into the Faculty. Students have the option to complete their immunizations with their own healthcare provider or participate in the Bannatyne Immune Status Program on campus. Students will be required to complete their Immunization Record Form by the end of their first year. Students will not be able to attend clinical rotations until all immunization requirements are up-to-date. Students are responsible for updating their immunizations as needed. Completion of the immunization schedule is required for course progression in Pharmacy.

SECTION 3: Faculty Academic Regulations

Section 3: Pharmacy,

The provisions of the chapter, [General Academic Regulations and Requirements](#), and the chapter, [University Policies](#), apply to all students. In addition, the Faculty of Pharmacy has regulations and requirements, published below, that apply specifically to its students.

3.1 Scholastic Progress,

For course progression in the Faculty of Pharmacy students must achieve a minimum combined fall and winter term GPA of 2.0, and attain the minimum passing grade of "C" in each course.

A student in any of the first three years of the pharmacy program who records no more than two grades of "D" during the academic year, and who achieves a minimum combined fall and winter term GPA of 2.00, may at the discretion of the dean be permitted to apply for a supplementary examination in those courses.

A student in the fourth year of the pharmacy program who records no more than one grade of "D" during the academic year, and who achieves a minimum combined fall

and winter term GPA of 2.00, may at the discretion of the of the dean be permitted to apply for a supplementary examination in that course.

Application forms for supplementary examinations are available in the Faculty of Pharmacy Dean's Office, and the examination is subject to a prescribed fee. Supplementary exams will normally take place in the following mid-summer examination session each year.

A student who has failed to record a minimum grade of "C" in more than two courses within years one to three of the pharmacy program, or in more than one course in the fourth year of the pharmacy program, or who records a grade of "F" during the academic year at any stage during their program may not be granted supplementary examinations unless the dean by reason of special circumstances applicable to the student's case otherwise decides.

A candidate who has been allowed to sit for a supplementary examination may not be awarded a grade higher than "C" in that course. Grade calculations for any course following supplementary examination will be inclusive of on-course assessment. Grades achieved following supplementary examination will replace those grades originally recorded on the student's academic record.

A student who fails to achieve a passing grade of "C" in one course, following supplementary examination if that option is offered, and who achieves a minimum combined fall and winter term GPA of 2.00, will be required to repeat that course and may at the discretion of the dean be required to repeat all, or a number of courses in that year.

A student whose combined fall and winter term GPA falls below 2.0, or who fails to achieve a minimum passing grade of "C" in two courses, following supplementary examination if that option is offered, and whose combined fall and winter term GPA remains above 1.75, will be considered to have failed that year, and will be required to repeat all subjects in the following academic year.

The records of all students who fail a year, and the disposition of the cases, shall be reported to Faculty Council for information, but not for debate. Students who have cause to disagree with the disposition may file an appeal against the decision.

A student who fails more than one year in the program, or who fails the same year twice, shall be required to withdraw from the Pharmacy program.

A student who fails to achieve a passing grade in more than two courses in the academic session, or whose combined fall and winter term GPA falls below 1.75, or who fails to achieve a passing grade in a repeated year, will be required to withdraw from the Pharmacy program.

3.2 Appeals Concerning Scholastic Progress ,

Should a student wish to appeal against any decision concerning scholastic progress, the following procedure should be followed:

The problem should be discussed with the Associate Dean (Academic) of Pharmacy, who will supply information about the appeals procedure, academic regulations and related matters.

Students who still wish to proceed with an appeal should consult the [Student Advocate](#) for advice and assistance, and a letter of appeal must be sent to the dean within 21 days of receiving notification of the decision. The letter should state the nature of the decision being appealed and the alternative that is being requested.

The Dean will respond in writing to notify the appellant of the date and time the student should attend a meeting of the Faculty Appeals Committee.

The Appeals Committee will comprise: the Dean of the Faculty (or designate) as chair; one senior support staff member as secretary; three members of the full-time faculty appointed by the full-time faculty; a representative of the profession appointed by the Manitoba Pharmaceutical Association; one student member of

Faculty Council appointed by the Faculty Council. The chair and senior support staff member are non-voting members.

Appellants have the right to attend the hearing of their appeal and may have a representative to assist them at the appeal hearing. This representative may be the Student Advocate or a fellow student or other full-time member of the university community not receiving payment for appearing, or working for Legal Aid. In addition, if the student wishes, one member of his or her immediate family, and also if desired a lawyer, may be present, but as observers who do not participate. The decision of the Appeals Committee will be conveyed to the student as soon as possible after the hearing.

If the appellant is still dissatisfied they may wish to discuss the issue further with the [Student Advocate and/or the university Ombudsman](#). Student appellants should not expect a favourable decision when their appeal is based on grounds related to external factors such as employment, sports, or hobbies.

3.3 Transfer of Credit Earned Elsewhere ,

Pharmacy students transferring credit from any faculty or school in the University of Manitoba or from other universities or colleges will have each course acceptable for transfer noted on the student record with the course classification of "TR" (transfer). The relevance of courses completed to the student's educational objective at the University of Manitoba and the quality of academic achievement as evidenced by the student's grades will be determining factors in assessing acceptability of credits earned elsewhere. No transfer of credit will be given for courses taken ten years or more prior to the application date. No transfer of credit will be permitted for courses where a "D" grade (or its percentage equivalent) has been awarded.

3.4 Residence Requirements ,

A minimum of two years attendance at the university within the Faculty is required for the Bachelor of Science in Pharmacy, except with the permission of the Faculty.

3.5 Attendance at Class ,

Regular attendance is required of all students in all courses. Students who are absent from class for a period of three days or more due to illness must present a certificate from a physician to the Dean's Office upon their return. An instructor may initiate procedures to debar a student from attending classes and from final examinations where unexcused absences exceed three continuous sessions. Students must obtain prior approval from the Dean for an absence exceeding one day for reasons other than illness.

3.6 Voluntary Withdrawals,

Any student seeking to withdraw from a portion of, or all of their courses must provide written notification to the Dean's Office of the reasons for this request. Re-entry to Pharmacy by students who voluntarily withdraw, will be dependent on the availability of space and external rotation facilities. Any student who has voluntarily withdrawn from a portion of, or all of their courses in Pharmacy on more than one occasion will not be permitted re-entry into the program. Withdrawals for medical or compassionate reasons will not contribute toward this maximum. Students who, for medical reasons, withdraw from the program may not re-register until they have established, through proper medical consultation, their fitness to resume studies.

3.7 Deferred Final Examinations,

Students may file an application for a deferred final examination with the Dean for reasons of illness or other disability, or for compassionate reasons, setting out the reasons for the deferral. The application must be filed within seven working days of the end of the examination series in which the examination was scheduled to be written and must be accompanied by a medical certificate or otherwise appropriate documentation certifying the reason for the deferral, the inability of the student to write the examination at the regular scheduled time and, where possible, indicating the period of disability. Based on the evidence provided, the Dean shall decide whether the application is approved. Students who, for medical reasons receive deferred examination privileges for all final examination series may not re-register until they have established, through proper medical consultation, their fitness to

resume studies. Any students requesting a deferred examination on the grounds that they are participating in an inter-university, provincial, inter-provincial, national or international scholastic or athletic event shall be granted said deferral, provided an application is filed with the Dean of the Faculty well in advance (normally 20 working days) of the scheduled examination; and that the Dean is satisfied, based on the evidence provided, that the application should be approved and that an appropriate time, and acceptable invigilator is not otherwise available to the student. Any student requesting deferred examination(s) will be required to sign an undertaking that the student has not discussed, reviewed, had access to, or otherwise become aware of the contents of the deferred examination except as expressly authorized by the instructor or professor for the course in which the deferred examination is being undertaken.

3.8 Incompletes,

A student who is unable to complete the term work prescribed in a course may apply to the instructor prior to the end of lectures for consideration of a grade classification of 'Incomplete.' Should an 'incomplete' be granted the student will still be required to write the final examination, if one is scheduled for the course, and a temporary grade of 'IF' will be submitted. In addition to the grade, the recommendation for an 'incomplete' should indicate the reason(s) for consideration being given, a description of the outstanding work to be completed, and the date by which the work must be submitted. If a final grade is not reported by the above maximum extension deadlines, the letter 'I' will be dropped and the grade of 'F' will remain as awarded, unless where specific circumstances warrant, the Associate Dean (Academic) extends the date by which an Incomplete must be cleared. Instructors must formally request such an extension prior to the elapse of the maximum deadline date. In addition, the [Registrar's Office](#) must be notified of the extension.

3.9 Dean's Honour List,

Eligible students who achieve a combined fall and winter sessional GPA of 4.0 or higher will be placed on the Dean's Honour List. Eligible students must have completed a minimum of 12.5 credit hours in each of the fall and winter terms. (Exception: Fourth year students must complete a minimum of 10 credit hours during the winter term). The Dean's Honour List designation is not applied until the end of the winter term.

3.10 Academic Self-Declaration,

All students accepted into the Faculty of Pharmacy will be required to complete a Self-Declaration of Records Form which declares current or previous academic suspensions and disciplinary actions. The disclosure contained therein must be satisfactory to the Faculty of Pharmacy.

3.11 Experiential Training (Structured Practical Experiential Program [SPEP]), Approved Placement Sites are limited, and the University cannot warrant that it will be able to find sufficient suitable placement sites in convenient locations, in a timely manner or at all. Students are responsible for all costs associated with SPEP, including travel and living expenses where placements are outside Winnipeg.

3.12 Academic Honesty,

Many courses in the Faculty of Pharmacy require group projects and students should be aware that these are subject to the same rules regarding academic honesty as individual projects. Because of the unique nature of group work, all members of the group should exercise special care to insure that work completed does not violate academic integrity. Should a violation occur, group members will be held jointly accountable unless the violation can be attributed to a specified individual, or group of individuals.

In the Faculty of Pharmacy all suspected cases of academic dishonesty will be passed to the Dean's Office for evaluation.

3.13 Professional Unsuitability By-Law,

The Senate has approved a by-law granting authority to the Faculty to require a student to withdraw for reasons of professional unsuitability. Copies of this by-law may be obtained from the Faculty of Pharmacy Dean's Office.

3.14 Completion of the Bachelor Program,

The maximum time allowable for completion of the Bachelor of Science, Pharmacy degree is seven years. Students must successfully complete all of the course work associated with a year in the program prior to being allowed to register for courses in the next year. In certain cases, the dean may grant exceptions to this requirement.

SECTION 4: Program and Graduation Requirements

4.1 Student Responsibility,

Students are advised to carefully review the Faculty of Pharmacy chapter of the *Undergraduate Calendar* to ensure compliance with degree program requirements.

It is the student's responsibility to know all relevant regulations, policies and practices.

Final completion of degree requirements is the responsibility of the student.

The University of Manitoba Registration System is not a degree audit system and the onus is on students to make sure they are selecting courses appropriate to their academic program.

4.2 Registration Assistance,

If you have questions or problems with your registration you can contact the Aurora Student Help Line at (204) 474-9420, or call the Faculty of Pharmacy Dean's Office at (204) 474-9306.

4.3 Course Information by Year,

First Year Orientation

A mandatory orientation session will be held on Wednesday, September 7, 2011 for 1st Year Pharmacy Students. More information on the orientation session will be mailed out in July to all 1st year students.

First Year Students

It is important that you register at your initial access time to guarantee that you get space in the required Science courses. All Pharmacy reserved space in Science will only be held until mid August.

When registering for Chemistry & Microbiology please register in the correct lecture & lab sections that have been reserved for Pharmacy Students.

Fall Term classes commence on Thursday, September 8, 2011. Attend all lectures/laboratories scheduled for that day.

The courses in the first year of the program are as follows:

Course No.	Credit Hours
First Year	
CHEM 2210Organic Chemistry	3
CHEM 2360Intermediate Biochemistry	3
CHEM 2370Intermediate Biochemistry	3
PHRM 1000Introduction to Pharmacy	1
PHRM 1110Pharmacy Skills Laboratory (PSL-1)	3
PHRM 1300Fundamentals of Pharmaceutics	2
PHRM 1430Applied Pathophysiology for Pharmacy Students	3
PHRM 1700Structured Practical Experiential Program 1 (SPEP-1)	1

MBIO 1010 General Microbiology	3
ANAT 1030 Human Anatomy	3
PHGY 1030 Fundamentals of Medical Physiology	6
Total Credit Hours	31

Second Year Students

It is important that you register at your initial access time to guarantee that you get space in the required Science courses. All Pharmacy reserved space in Science will only be held until mid August.

When registering for Microbiology please register in the correct lecture section that has been reserved for Pharmacy Students.

Fall Term classes commence on Thursday, September 8, 2011. Attend all lectures/laboratories scheduled for that day.

PHRM 2700 – This course falls under the Spring/Summer session guidelines. The Faculty of Pharmacy Dean’s Office will register you for this course in March. Fees for PHRM 2700 will be assessed in March 2012.

SPEP 2 will take place April 30, 2012 - May 11, 2012 with a debriefing session to be held on May 11, 2012.

The courses in the second year of the program are as follows:

Second Year

PHRM 2100 Pharmacy Skills Lab 2 (PSL-2)	3
PHRM 2220 Medicinal Chemistry 1	6
PHRM 2270 Pharmaceutics/Biopharmaceutics	6
PHRM 2280 Pharmacokinetics	3
PHRM 2310 Clinical Pharmacy 1	4
PHRM 2420 Applied Nutrition for Health Professionals	3
PHRM 2700 Structured Practical Experiential Program 2	2
MBIO 3010 Microbiology	3
PHAC 2100 Pharmacology	6
Total Credit Hours	36

Third Year Students

Register at your initial access time.

Fall Term classes commence on Thursday, September 8, 2011. Attend all lectures/laboratories scheduled for that day.

Term 2:

Classes End: March 23, 2012

Exams: March 26 - 30, 2012

SPEP: April 2 - 27, 2012

The SPEP 3 debriefing session will be held on April 27, 2012.

PHRM 3700 – This course falls under the Spring/Summer session guidelines. The Faculty of Pharmacy Dean’s Office will register you for this course in March. Fees for PHRM 3700 will be assessed in March 2012.

The courses in the third year of the program are as follows:

Third Year

PHRM 3100 Pharmacy Skills Lab 3 (PSL- 3)	2
PHRM 3210 Principles of Professional Practice*	3
PHRM 3220 Medicinal Chemistry 2	3
PHRM 3310 Clinical Pharmacy 2	10
PHRM 3320 Pharmaceutical Analysis Lab	3
PHRM 3430 Natural Products	3
PHRM 3500 Clinical Pharmacokinetics	4
PHRM 3510 Principles of Scientific Literature Evaluation*	2

PHRM 3640 Principles of Biotechnology	3
PHRM 3700 Structured Practical Experiential Program 3	4
Total Credit Hours	37

* **NOTE:** The credit hours for these two courses will change beginning in the 2012-13 academic year, which will increase the Total Credit Hours in the Third Year to 38.

Fourth Year Students

Register at your initial access time.

Fall Term classes commence on Tuesday, September 6, 2011. Attend all lectures scheduled for that day.

Classes End: Monday, October 31, 2011

Exams: November 1 - November 2, 2011

SPEP: Block 1 November 7 - December 16, 2011

Block 2 January 2 – February 10, 2012

Block 3 February 20 – March 30, 2012

Electives: Block 1 November 3 - December 21, 2011

Block 2 January 2 – February 17, 2012

Block 3 February 20 – April 6, 2012

The courses in the fourth year of the program are as follows:

Fourth Year

PHRM 4230 Pharmacy Practice Management	4
PHRM 4310 Clinical Pharmacy 3	4
PHRM 4450 Toxicology	3
PHRM 4470 Current Topics	3
PHRM 4700 SPEP - 4	10
PHRM 4800 Electives Program	10
Total Credit Hours	34
Total Credit Hours in all four years	*138

NOTES:

*The Total Credit Hours for this program will increase to 139 beginning in the 2012-13 academic year.

Students may not obtain any grade lower than “C” in all required courses.

A decision will be made annually on whether these courses will be taught in first or second term, or both.

SECTION 5: Course Descriptions

PHRM 1000 Introduction to Pharmacy

(Formerly 046.100) This course provides an orientation to Pharmacy and to the application of medicines within the context of today's dynamic medical care system. It has been designed to highlight professionalism early in the Pharmacy curriculum and will provide the opportunity for students to interact with Pharmacy professionals "at the cutting edge" of pharmacy practice.

PHRM 1110 Pharmacy Skills Laboratory

This is a multifaceted course using an integrated skills laboratory format to develop essential skills that students require for pharmacy practice. These skills primarily involve communication, problem solving and critical thinking that form the foundation for life-long learning. Exploring ethical principles and professionalism are also essential components of this course.

PHRM 1300 Fundamentals of Pharmaceutics

(Formerly 046.130) In a classroom and laboratory setting, this course provides an introduction to the compounding of pharmaceutical products and the physiochemical

basis of product formulation. Practical aspects of formulation and an introduction to the dispensing function are also explored.

PHRM 1430 Applied Pathophysiology for Pharmacy Students
(Formerly 046.143) A comprehensive theoretical foundation of the phenomena that produce alterations in human physiology function across the lifespan. Course content will prepare the student for subsequent courses related to diagnosis and management of disease processes associated with pathophysiologic dysfunction/alterations.

PHRM 1700 Structured Practical Experiential Program 1
(Formerly 046.170) This course is a service-learning experience, providing students the opportunity to work in community-based patient/client-centred settings. This course also includes two half day job shadowing experiential rotations in a variety of pharmacy practice settings (eg. community pharmacy practice, institutional pharmacy practice) under the supervision of pharmacist preceptors consistent with the Manitoba Pharmacy Act. It serves to familiarize students with the health care setting and the pharmacist's role. Students will be graded on a pass/fail basis.

PHRM 2100 Pharmacy Skills Lab 2
(Formerly 046.210) This course develops essential skills required for pharmacy practice. Focus is on drug distribution, pharmacy law, communication with "standardized patients" and drug information.

PHRM 2220 Medicinal Chemistry 1
(Formerly 046.222) This course explores the physicochemical aspects of drug structure in absorption, distribution, metabolism, excretion and receptor interaction as they relate to the biochemical, pharmacological, and therapeutics actions of medicinal compounds.

PHRM 2270 Pharmaceutics/Biopharmaceutics
(Formerly 046.227) This course introduces principles of formulation and good pharmaceutical manufacturing practice, including aspects of product development and assessment, stability testing, and quality control. It also explores the application of dosage forms to clinical situations.

PHRM 2280 Pharmacokinetics
(Formerly 046.228) This course introduces principles of pharmacokinetics to predict how drugs will be absorbed, distributed, metabolized and excreted from the body. Practical application of concepts and calculations will be emphasized.

PHRM 2310 Clinical Pharmacy 1
(Formerly 046.231) This course introduces principles of drug therapy to manage uncomplicated disease states. Aspects of drug therapy including efficacy, dosage requirements, adverse effects, compliance, drug interactions, and follow-up monitoring will be emphasized. The course also introduces principles of using "over the counter (OTC)" medications as therapeutic alternatives.

PHRM 2420 Applied Nutrition for Health Care Professionals
(Formerly 046.242) The application of the scientific principles underlying nutrient function and dietary requirements to questions of health.

PHRM 2700 Structured Practical Experiential Program 2
(Formerly 046.270) This course offers experiential learning in a variety of pharmacy practice settings (eg. community pharmacy practice, institutional pharmacy practice) It consists of 2 one week rotations at the end of the second year of the program. This course builds on skills learned in SPEP 1 and focuses on the practice of drug preparation and distribution, non-prescription medication counseling, and jurisprudent under the supervision of pharmacist preceptors consistent with the Manitoba Pharmacy Act. Students will be graded on a pass/fail basis.

PHRM 3100 Pharmacy Skills Lab 3
(Formerly 046.310) The course develops essential skills required for pharmacy practice. The focus is on interaction with patients and other health care professionals and the application of essential knowledge, skills and values required for the provision of pharmaceutical care.

PHRM 3210 Principles of Professional Practice
(Formerly 046.321) This course offers the opportunity to explore professionalism, ethics and socio-economic aspects of the health care system.

PHRM 3220 Medicinal Chemistry 2
(Formerly 046.322) This course builds on Medicinal Chemistry 1, exploring the detailed interactions between drugs and their receptors which give rise to specific biochemical and therapeutic responses.

PHRM 3310 Clinical Pharmacy 2
(Formerly 046.331) This course builds on principles of drug therapy introduced in Clinical Pharmacy 1. Aspects of providing direct patient care are emphasized to identify, solve and prevent actual or potential drug-related problems. The course also expands knowledge of "Over the Counter (OTC)" medications as therapeutic alternatives and introduces home diagnostic testing

PHRM 3320 Pharmaceutical Analysis Lab
(Formerly 046.332) This course offers the opportunity to prepare pharmaceutical dosage forms and perform analytical testing on the products. Qualitative and quantitative instrumental assay techniques are introduced.

PHRM 3430 Natural Products
(Formerly 046.343) Medicinal products of natural origin; introduction to systems of complementary medicine. Therapeutic aspects and products are emphasized

PHRM 3500 Clinical Pharmacokinetics
(Formerly 046.350) This course explores the practical application of pharmacokinetic concepts, calculations, and patient factors which effect pharmacokinetics in the clinical setting. Emphasis is on selected medications that require closer monitoring to ensure efficacy and patient safety.

PHRM 3510 Principles of Scientific Literature Evaluation
(Formerly 046.351) Primary literature is critically analyzed. Discussion of how study results impact on treatment strategies are emphasized.

PHRM 3640 Principles of Biotechnology
(Formerly 046.364). Introduction of biotechnology in pharmaceutical science and pharmacy. Students will be introduced to concepts from molecular biology, immunology, biotechnology and pharmacogenomics.

PHRM 3700 Structural Practical Experiential Program 3
(Formerly 046.370) This course offers experiential learning in a variety of pharmacy practice settings (e.g. community pharmacy practice, institutional pharmacy practice) It consists of 2 two week rotations at the end of the third year of the program. This course builds on skills learned in SPEP 1 and SPEP 2 and focuses on the introduction of applying pharmaceutical care to patients under the supervision of pharmacist preceptors consistent with the Manitoba Pharmacy Act. Students will be graded on a pass/fail basis.

PHRM 4230 Pharmacy Practice Management
(Formerly 046.460) An Introduction to administrative and behavioural sciences as they relate to planning, organization and operation of pharmacy practice and to the control of human and financial resources.

PHRM 4310 Clinical Pharmacy 3
(Formerly 046.444) A problem-based therapeutics course that builds on PHRM 3310. The emphasis is on the provision of pharmaceutical care to enhance students' ability to identify, resolve and prevent drug-related problems in given clinical scenarios.

PHRM 4450 Toxicology
(Formerly 046.445) Toxicology of prescription and non-prescription medications and drugs of abuse. The emphasis is on the study of emergency treatments of the overdosed patient. Forensic aspects of common poisonings and drug overdoses are also discussed

PHRM 4470 Current Topics
(Formerly 046.447) A discussion of topics of immediate interest to the profession. Subject to satisfactory completion of required projects and presentations. Attendance of 80% is mandatory. Students will be graded pass/fail.

PHRM 4700 Structural Practical Experiential Program 4
(Formerly 046.461) This course offers experiential learning in a variety of pharmacy practice settings (e.g. community pharmacy practice, institutional pharmacy practice) It consists of 2 six week rotations. This course builds on skills learned in SPEP 1, SPEP 2 and SPEP 3 and focuses on practicing advanced pharmaceutical

care and further developing therapeutic and disease knowledge under the supervision of pharmacist preceptors consistent with the Manitoba Pharmacy Act. Students will be graded on a pass/fail basis.

PHRM 4800

This program offers students the opportunity to explore areas in research and professional practice that are not part of the required undergraduate courses. Students have the option of applying to conduct projects at sites pre-approved by the Faculty or to propose alternative avenues for self-directed learning. All project proposals need to obtain final approval from the Faculty of Pharmacy which facilitates students' placement. Assessment will be based on written reports submitted by individual students to the Faculty of Pharmacy. Students will be graded on a pass/fail basis.

PHRM 7080 Biopharmaceutics and Relevant Pharmacokinetics (Formerly 046.708) Lecture course on biopharmaceutics with particular emphasis on the application of pharmacokinetic principles in the design of conventional and sustained-release drug dosage forms, assessment of drug bioavailability, and selection of dosage regimens.

PHRM 7100 Analytical Forensic Toxicology (Formerly 046.710) A study of the analytical and chemical procedures for the detection of chemicals and medications in body fluids and the identification of drugs of abuse. Some techniques will be emphasized through a practical project.

PHRM 7120 Medical and Scientific Writing (Formerly 046.712) Lectures and exercises on the preparation of medical and scientific manuscripts, including papers for publication or oral presentation, progress reports, reviews, short papers, grant applications and similar projects.

PHRM 7130 Novel Drug Delivery Systems (Formerly 046.713) Advanced course dealing with the role of drugs and drug products in the treatment of disease with emphasis on pharmaceutics and physical pharmacy. Current and future status of drug delivery systems, their design and evaluation will also be examined.

PHRM 7140 Pharmaceutical Implications of Free Radical Medicinal Chemistry (Formerly 046.714) Persistent and stable organic free radicals found in medicinal compounds, unstable and reactive free radicals found in vivo, natural defence mechanisms designed to remove free radicals in vivo, antioxidants as medicinal compounds, important applications of electron paramagnetic spectroscopy of free radicals, spin-trapping of very reactive free radicals, spin label oximetry

PHRM 7160 Pharmacy Seminar 1 (Formerly 046.716) Seminars and lectures on selected topics in pharmacy. Students are required to present both oral and written reports on research topics.

PHRM 7170 Pharmacy Seminar 2 (Formerly 046.717) Lectures and group discussions on recent developments in pharmaceutical fields. Students are required to give an oral presentation. (Prerequisite: PHRM 7160)

PHRM 7180 Pharmaceutical Implications of Biotechnology (Formerly 046.718) Introduction to biotechnology in pharmaceutical sciences and pharmacy. Students will be introduced to concepts from molecular biology, immunology, biotechnology and pharmacogenomics. Implications of biotechnology in pharmaceutical biopharmaceutical research.

SECTION 1: Degrees and Programs offered by the Faculty of Science

1.1 Degree Offerings,

Degree Offering Name	Minimum Years to Complete ¹	Minimum Required Credit Hours
Bachelor of Science General Degree - B.Sc. General	3	90
Bachelor of Science Major Degree – B.Sc. Major	4	120
B.Sc. Major Degree – Co-operative Option	5 ³	120
Bachelor of Science Double Major Degree	4	120 ²
Bachelor of Science Honours Degree – B.Sc. Honours	4	120 - 129
B.Sc. Honours Degree – Co-operative Option	5 ³	120
Bachelor of Computer Science Honours – B.C.Sc. Honours	4	120
B.C.Sc. Honours Degree – Co-operative Option	5 ³	120
Bachelor of Science Double Honours Degree	4	120 ²

1.2 Program Offerings (Honours, Majors, Minors, Focus Areas),

Program	Theme / Focus / Concentration / Option	Honours	Major	Co-op	Minor
Actuarial Mathematics		•

	Bioanalytical Chemistry	•	•	•	

SECTION 2: Admission to the Faculty of Science

2.1 Entrance to Science from University 1: Transiting,

To transit from University One to the Faculty of Science a student must have completed a minimum of 24 credit hours of courses and achieved a cumulative grade point average of at least 2.00. If a student has satisfied the minimum requirements for entry to Science, they simply perform the **transit function** on AURORA Student to enter the Faculty of Science. There are no fees for transiting and there is no application form required. If you need assistance with transiting to Science from U1, please contact a Faculty of Science Student Advisor. Students who do not meet the aforementioned minimums may still be eligible to enter the Faculty of Science and can ap-pear to be considered for admission to Science on the recommendation of the Dean. For further information please contact a Faculty of Science Student Advisor and/or refer to the Faculty of Science applicant information brochure and the University Admissions website: www.umanitoba.ca/admissions.

Students intending to enter a four year Major or Honours program should refer to the program charts in Section 4, Programs and Courses Offered by the Faculty of Science, for courses required for en-try into each program. Completion of these courses in University 1 will en-sure that a student may complete a four year Major or Honours program in four calendar years.

2.2 Transfer Students,

Students who wish to transfer to the Faculty of Science must have completed a minimum of 24 credit hours of post-secondary courses and have achieved a minimum cumulative grade point average of at least 2.00 to be eligible for consideration. Students who do not meet this minimum may appeal to be considered

for admission on the recommendation of the Dean. Please see a Science Student Advisor for information. External transfer students with 24 credit hours or more of transfer credit are assessed upon admission to the Faculty of Science.

Students who have completed less than 24 credit hours may be admitted to University 1 or the Division of Extended Education.

Students on academic suspension as a result of work completed at another post-secondary institution will not normally be considered for admission to the University of Manitoba until the suspension has been served.

Transfer of Credit

External: Please refer to the Admissions website at umanitoba.ca/admissions or the Admissions section at the front of this *Calendar*. Courses completed at an external institution ten years prior to registration in the Faculty of Science are not considered for transfer credit. Students should contact a Science student advisor regarding departmental transfer credit policies. **All courses acceptable to the Faculty of Science must be transferred.**

2.3 Second Degree Students,

Students possessing a first degree from a recognized university program and who have a minimum Cumulative Grade Point Average of 2.00 (or a 2.30 adjusted grade point average – see applicant information bulletin for details on AGPA) on all previous university work are eligible for admission as Second Degree students.

Second degree requirements may be shortened by up to 60 credit hours, and once admitted to a Second Degree Program, students will be expected to conform to all continuation, residency and graduation requirements as described in [Section 3](#) below.

Specific information on requirements for a Bachelor of Science degree following the completion of a degree in another faculty or school, or at another university, is available in the general office.

2.4 Special Students,

After Degree Special Students

Students who have successfully completed a first degree from a recognized university program with a Cumulative Grade Point Average of 2.00 or better are eligible for admission as Special Students.

2.5 Auditing Students,

Students who wish to audit courses must have written permission from the instructor of the desired course before they can register. Auditing students must register in person in the Faculty of Science general office. The Faculty of Arts will prohibit auditors from registering in their courses until after the initial access period for registration.

2.6 Returning to Science after an Extended Leave,

Students who have been away from Science for more than a year are blocked from using AURORA STUDENT. They must consult with a Science Student Advisor. If the student has not attended another post-secondary institution, they are eligible to return. The advisor will determine academic progress, registration date and time, and discuss degree plans. Students planning a return to studies are strongly urged to contact an Advisor well in advance of the start of registration. Students who have attended elsewhere since their last registration in Science must normally re-apply for admission and be academically competitive for admission on all of their previous academic work. July 1 is the application deadline for Fall term.

Students who have graduated must re-apply (July 1 for Fall Term – Other deadlines may be found at umanitoba.ca/admissions) and be academically competitive for admission.

SECTION 3: Academic Regulations

3.1 Regulations Applicable to All Programs,

The provisions of the chapters: "General Academic Regulations and Requirements" and "University Policies" apply to all students. In addition, the Faculty of Science has regulations and requirements published below that apply specifically to its students.

Repeating a Course

Science students are subject to the University of Manitoba regulations (see General Academic Regulations and Policy, Repeating a Course) and the Faculty of Science degree regulations regarding eligibility to repeat a course.

Repeating a course will **not** result in the removal of the first attempt and grade in that course from the student's record. The course will appear on the transcript as many times as it has been repeated. Only the grade from the last attempt will be included in the GPA calculations relating to a student's program of study.

There is a limit on the number of 'F' grades permitted in any degree.

Students who wish to repeat a course must obtain permission to repeat the course from the Faculty of Science prior to registration.

NOTE: In most cases, professional Faculties and Schools have specific rules governing the way repeated courses are treated in their admission process. Check the applicant information bulletin of the appropriate Faculty or School, or with the Admissions Office (424 University Centre), or with a Science student advisor for information regarding how different professional programs treat repeated courses in determining admission.

Voluntary Withdrawals

The responsibility for initiating withdrawals rests solely with the student. When eligible to do so, Voluntary Withdrawals must be done through Aurora Student, otherwise withdrawals must be authorized first by the Science general office and then through the Registrar's Office. No withdrawals will be permitted after the deadlines posted in the Academic Schedule.

There is no longer a limit on the number of Voluntary Withdrawal hours a student can accumulate (effective September 2006).

In exceptional circumstances, Authorized Withdrawals may be permitted on presentation of appropriate documentation. See the chapter, General Academic Regulations and Policy, section Voluntary Withdrawal from Programs and Courses or consult a Science student advisor for information.

Attendance at other Institutions

Students who attend other post-secondary institutions without a Letter of Permission must reapply for admission to the Faculty of Science before the application deadline and be academically competitive for admission. Similarly, students registered in Science here may not be registered at another academic institution at the same time unless they are registered elsewhere on a Letter of Permission. The penalty for unauthorized or undisclosed attendance may be disciplinary withdrawal or academic suspension.

For more information on Letters of Permission, refer to the Registration Information section of this calendar or to the Registrar's Office website at: umanitoba.ca/registrar.

Academic Dishonesty

Academic dishonesty is intentional cheating, fabrication, impersonation, or plagiarism. It is also knowingly helping or attempting to help others to be dishonest. Academic dishonesty lowers scholastic quality and defrauds others who will eventually depend on their own knowledge and integrity.

Plagiarism or any other form of cheating on examinations, term tests, or assignments is subject to academic penalty as serious as suspension or expulsion from the faculty or university.

Students who are unsure of what constitutes academic dishonesty should refer to the regulations in General Academic Regulations and Policy, Plagiarism and Cheating, and consult with a Science student advisor or a faculty member. Information about academic penalties for academic dishonesty is available on the Faculty of Science website.

Academic Suspension

Students returning from suspension must contact a Science Student Advisor prior to registration. A Science Student Advisor will outline the minimum required academic performance to remain in good academic standing in the Faculty of Science.

Academic Warning

If your last assessment was "Academic Warning" you **must** see a Science Student Advisor prior to registration to receive information about your status.

Required to Withdraw from Major or Honours

If your last assessment was "Required to Withdraw from the Honours or the Major program," you **must** consult a Science Student Advisor prior to registration. An advisor will review new degree plans, determine eligibility for a desired program, and update any affected university records.

Students on "Hold"

If a student is on "Hold", they are prevented from any registration transaction (including Voluntary Withdrawals) until you have cleared this status. Contact a Science Student Advisor if you wish to drop a course while on "Hold".

Term work and Debarment

A student is responsible for the completion of laboratory work, assignments, tests and other class work as prescribed by departments. A student who does not meet term work requirements to the satisfaction of a department will receive a warning to this effect from the department or the general office. If this warning is ignored, a student may be debarred from the course. Any student debarred from a course receives an automatic grade of "F" in that course.

Deferred Examinations

Students unable to write a final examination because of illness, disability, or for compassionate reasons, must file an application in the faculty general office for a deferred examination. The application must be filed within seven working days of the last examination in that series. Appropriate documentation must be provided that verifies that the incapacity existed at the time the examination was to be written.

A deferred examination is offered in a manner prescribed by the head of the department concerned. This would normally be written within 30 working days of the last examination in that series. Any other consideration would be determined by the department head.

Students requesting deferred examinations on the grounds that the examinations conflict with vacation or holiday plans shall not be granted deferrals.

A deferred examination is not normally granted to a student who has written the final examination.

Requests for retroactive deferred examinations, deferred examinations that need to be re-deferred, and / or requests where a student is seeking a deferral in a third examination series (i.e. Fall 2008, Winter 2009, Winter 2010 – any course) must be approved by the Faculty of Science Committee on Student Standing. Students must appeal, in writing, to the Committee on Student Standing and provide precise documentation that outlines why a deferral request should be granted in their case.

Appeals Involving Academic Regulations

The Committee on Student Standing in Science considers appeals from students who request special consideration in respect of rules and regulations governing their programs of study and qualification for graduation.

Appeals should be addressed to: The Secretary, Committee on Student Standing, General Office, Faculty of Science, 239 Machray Hall.

Appeal for Authorized Withdrawal

Students who have valid and documented reasons for withdrawal, such as medical illness or compassionate circumstances, may be authorized to withdraw without penalty. Requests for authorized withdrawals must be submitted in writing to a Faculty of Science Student Advisor. The Office of Student Advocacy located at 519 University Centre (474-7423, student_advocacy@umanitoba.ca) is available to provide information and assistance.

Appeal for other Academic Concessions

Students who believe they have grounds for academic concessions based on their personal circumstances should consult with a Science Student Advisor. The Office of Student Advocacy located at 519 University Centre (474-7423, student_advocacy@umanitoba.ca) is available to provide information and assistance.

Laboratory Registration

If a course requires registration in both a lecture and a separate appropriate laboratory section, AURORA STUDENT will not permit you to register in that course unless you register for both.

Laboratory Exemptions

If you think you are eligible for a laboratory exemption, you must check with the department offering the course to obtain formal consent of this. Once received, deliver the written permission to your faculty or school office, as an override may be required on your academic record. You must register for the laboratory exempt section.

It is your responsibility to ensure that you are eligible for a laboratory exemption. If you register for one of these courses and it is subsequently determined that you are not entitled to exemption, you will be required to register for a laboratory section. If no space remains available in the laboratory, you will be required to withdraw from the course.

Laboratory release

Certain Chemistry and Microbiology courses require that you check out of the laboratory before you withdraw or change lab sections. It is your responsibility to check with the departmental office prior to making any changes to your laboratory

registration. Failure to check out of your laboratory may result in your academic records being placed on HOLD.

3.2 B.Sc. General Degree Academic Regulations, B.Sc. (General) – Three Year Degree

The three year General program is intended to provide diversified training in Science. The design of the program is such that a student is exposed to several areas of science at an introductory level together with a requirement for more advanced study in at least two Science areas. These requirements will ensure that a student's program of study will have elements of breadth and depth.

This program is not intended for students who desire to practise in some field of specialization in the Sciences. Students with that intent are recommended to pursue the Honours or the four year Major program. However, the three year General program is flexible enough in most departments to allow a student to choose courses that would facilitate transferring to the four year Major program should that become desirable.

B.Sc. General Academic Regulations

A student must complete 90 credit hours with passing grades ("D" or better) in each course. A student must obtain a minimum grade point average of 2.00 on the 90 credit hours which constitute the degree to qualify for the degree of Bachelor of Science (General).

There is no limit on the number of courses that can be taken within the B.Sc. (General). Students may not exceed 36 credit hours of failures.

Introductory Level Science courses (24 credit hours): Students must select 6 credit hours from each of 3 areas listed below (18 credit hours) in Group A. Additionally, students must select 6 credit hours from any courses listed in Group A and/or Group B.

NOTE: No more than 6 credit hours may be selected from any single subject area for use toward the 24 credit hours of introductory course requirements.

Group A:

Astronomy: six credit hours chosen from PHYS 1810, PHYS 1820, PHYS 1830

Biology: BIOL 1020 and BIOL 1030

Chemistry: CHEM 1300 and CHEM 1310

Computer Science: COMP 1010 and COMP 1020

Mathematics: six credit hours chosen from MATH 1200, MATH 1300 (or equivalent), MATH 1500, (or equivalent), MATH 1700 (or equivalent), MATH 1690 (6).

Physics: PHYS 1020 or PHYS 1050; and PHYS 1030 or PHYS 1070

Statistics: STAT 1000 and STAT 2000

Group B:

BIOL 1410, COMP 1012², [FORS 2000](#), MATH 1210¹, MBIO 1010, MBIO 1220, STAT 2220³

Notes:

Undergraduate Studies

1. MATH 1210 is intended for Engineering students and may not be held for credit with MATH 1200 or MATH 1300.

2. COMP 1012 is intended for Engineering students and may not be held for credit with COMP 1010.

3. STAT 2220 is intended for Engineering students and may not be held for credit with STAT 1000

Advanced Level Science Courses (36 credit hours): Effective for students entering Science September 2008 or later², to satisfy the advanced level requirements of the 3-year General Degree program, eighteen (18) credit hours at the 2000, 3000, and (or) 4000 level **must** be chosen from each of **two** of the following Science departments: Biological Sciences, Chemistry, Computer Science, Mathematics, Microbiology, Physics and Astronomy, and (or) Statistics.

Of the 36 credit hours (total) from the advanced areas of study, at least 6 credit hours must be chosen from 3000 or 4000 level courses. Students should note prerequisite requirements for upper level courses when planning their program. Appropriate courses and combinations of courses are detailed in each departmental section. Substitute courses from a department may be taken by obtaining written authorization from the chosen department.

Biological Sciences Option - Effective Fall Term 2009: Because of the newly formed Department of Biological Sciences, effective September 2009, students required to complete 36 credit hours of advanced level credit² may elect to choose all 36 credit hours of the advanced level course requirements from the Department of Biological Sciences provided they follow the specified course selections prescribed in the Biological Sciences General Degree chart.

Other Faculty Courses (12 credit hours): a minimum of 12 credit hours must be taken from outside the Faculty of Science, of which at least six credit hours must be from the Faculty of Arts. A maximum of 30 credit hours may be taken from outside the Faculty of Science for use in the General Degree program.

Elective Courses (18 credit hours): 18 credit hours of the B.Sc. General Degree are open electives.

Chemistry Option - Effective Fall Term 2010: The Department of Chemistry has introduced a 3-year Degree program with a Chemistry Focus. Effective September 2010 students required to complete 36 credit hours of advanced level credit may elect to choose a specific set of introductory courses, plus all 36 credit hours of the advanced level course requirements from the Department of Chemistry provided they follow the specified course selections (introductory and advanced levels) prescribed in section 4.5.3 (Three Year B.Sc. – Chemistry Focus Chart).

NOTES:

1. Students having difficulty with the interpretation of these regulations or the way in which they are applied, are urged to contact a Science student advisor in the general office. Students are responsible for their own degree progress and completion.

2. Students admitted to the Faculty of Science prior to September 2008 should consult with a Science Student Advisor about degree requirements.

B.Sc. General Degree Minimum Performance Requirements

To remain in good academic standing a student must maintain a minimum Degree Grade Point Average (DGPA) of 2.00 at each point of assessment after entrance to the Faculty of Science. Assessment will take place after Fall, Winter, and Summer Terms. If a student's DGPA falls below 2.00 at any point of assessment, the student will receive an **Aca-demic Warning** which will appear on their transcript. The student will remain on Academic Warning until Good Academic Standing is achieved. Students on Academic Warning will be individually advised regarding their status, and of how to improve.

Students cannot accumulate more than 36 credit hours of failures (F grades) in courses acceptable for credit in the Faculty of Science on their academic history, regardless of the origin of the grade (i.e. courses taken while in University 1, courses that are transferred from other programs or other institutions will be included) and regardless of whether the course has been repeated. If the 36 credit hour limit of F grades is exceeded, the student will be placed on **Academic Suspension for two calendar years**. Upon completion of the two-year suspension, the student will be permitted to return to Science and start their degree afresh. Upon returning from a 2-Year Suspension, students may appeal to transfer up to 30 credit hours of previously completed coursework in which a minimum grade of "C" was achieved.

A student placed on academic suspension is not permitted to register in the Faculty of Science during the term of the suspension. Students wishing to return to the Faculty of Science are required to achieve certain academic standards upon their return. For information regarding these standards, consult a Science Student Advisor.

B.Sc. General Degree Residence Requirements

There are two ways in which students may fulfill the minimum requirement of credit hours that must be taken at the University of Manitoba: by taking at least 48 credit hours at the University of Manitoba; or by taking at least the final 30 credit hours at the University of Manitoba. The courses used to satisfy the residence requirement must be acceptable for credit in the Faculty of Science. Residency requirements apply to both first and second degree students.

3.3 B.Sc. Major Degree Academic Regulations, **B.Sc. (Major) – Four-Year Degree**

The four year Major programs provide in-depth study and enable graduates to function competently in a career in their chosen subject area.

While this program is not intended for students pursuing graduate studies, most programs allow students to do so with a minimum of difficulty.

The four year Major program may be pursued on a part-time basis, although it must be recognized that under those conditions students would require more than four years to complete degree requirements.

B.Sc. (Major): Academic Regulations

To qualify for the degree Bachelor of Science (Major), a student must complete 120 credit hours or more, with minimum grades of "C" on Major Program Specific courses (as specified by the department), passing grades ("D" or better) on the remaining courses, and a minimum grade point average of 2.00 on the 120 credit hours which contribute to the degree.

Program Specific courses are those identified by the department as being core to the given degree. See the Calendar entry for these departments for clarification.

At least six credit hours **must** be taken from outside the Faculty of Science. As of the 1999-2000 regular session, students admitted to a Major program must complete six credit hours of courses from the Faculty of Arts. Students in the Major degree programs may take a maximum of 36 credit hours from outside the Faculty of Science.

B.Sc. (Major): Entrance Requirements

To enter a four year Major program, a student must normally have achieved a minimum grade of "C+" in at least one introductory course designated by the department(s). In addition, to enter a four year Major program a student shall normally have completed at least 30 credit hours, although a student may enter on the recommendation of the department with only 24 credit hours completed.

Any student who, prior to being admitted to a four year Major program that has completed more than 30 credit hours will be allowed to apply those excess credit hours which meet the specifications of the program to the four year Major program.

Students must attain a Cumulative Grade Point Average of at least 2.00 (DGPA of 2.00 for Second Degree students and Start Afresh students) regardless of the point of entry, and must meet continuation requirements as outlined below.

B.Sc. (Major): Continuation Requirements

To continue in the program, a student must maintain a Cumulative Grade Point Average of 2.00 (DGPA of 2.00 for Second Degree students and Start Afresh students) at each point of assessment. Students who do not meet this minimum will be required to withdraw from the Major program.

There is no minimum term course load requirement for the Major program.

Failed courses: Any student that exceeds 18 credit hours of failing grades after entering a Major program will be required to withdraw from that program.

A student will be required to repeat those failed courses specified as required courses for the program; however, with the approval of the department the student may be allowed to substitute a new course for any elective course failed.

Program Approval: The department must approve a student's Major program prior to registration for courses in each session. Students must also obtain departmental approval for any and all revisions to their program.

Major students reverting to the General program must fulfil all academic requirements of that degree.

B.Sc. (Major): Residence Requirement

To satisfy the Faculty of Science residency requirements, a student must successfully complete at least 60 credit hours at the University of Manitoba. The courses used to satisfy the requirement must be acceptable for credit in the Faculty of Science. Residency requirements apply to both first and second degree students.

B.Sc. Double Major Programs

Students may wish to pursue a Double-Major program in the Faculty of Science. Consultation with, in addition to specific course selection and approval from, the departments involved must occur prior to the commencement of any Double-Major program. Students must also consult with a Faculty of Science Student Advisor prior to the start of any Double-Major program.

3.4 B.Sc. (Major) Cooperative Option Academic Regulations,
The Major programs that offer a Cooperative Option are: Biochemistry, Biological Sciences, Biotechnology, Chemistry, Computer Science, Genetics, and Microbiology.

A cooperative education program is an arrangement whereby a student spends alternating periods in university and employment. There are several advantages to cooperative education programs for students. One benefit is that students are able to acquire both theoretical knowledge and practical experience. This experience assists them in selecting areas of specialization for their senior courses. During an employment period students can also typically earn enough to defray the cost of their university education. The contacts developed with potential employers are also valuable to graduating students.

All regulations governing regular Major programs apply to the Cooperative Option. In addition, the following variations apply:

Entrance

To enter the Cooperative Option a student must be eligible to enter the Major program offered by the department.

The normal point of entry to a Major Cooperative Option is following the completion of second year in the Faculty of Science.

Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option in those departments where the demand for places exceeds the number of places available. In such situations the department reserves the right to determine and select the best qualified applicants.

Structure and Sequencing

The Cooperative Option consists of both academic terms and employment terms.

Each academic term can be either four months in duration or eight months in duration, as designated by the Major department.

Each employment term can be either four months in duration or eight months in duration, as designated by the Major department.

Each academic term and each employment term will commence in January, May or September.

The sequence of academic terms and employment terms is variable to suit the needs of each department, and is designated by each department.

Students are expected to follow the academic/employment term sequence defined by their department from admission through to graduation.

Employment Term Requirements

All Cooperative Options will include at least 12 months spent in employment terms with a department-approved employer. Normally, each employment term will be completed with one employer.

Students are required to register in the appropriate employment term course and pay the fee prior to starting their employment term. Cooperative Option students are required to submit three written employment reports on their employment term activities. These reports are due at times designated by the Major department. Each Major department will provide students with instructions regarding the content and format requirements of the employment reports.

Indications of unsatisfactory performance by a student on an employment term will be thoroughly investigated by the Major department. As a result of the investigation, if benefits from further professional training are questionable, the student may be required to withdraw from the Cooperative Option. The student would then be eligible to enter the regular four year Major program or the General program.

While on an employment term, a Cooperative Option student is not permitted to take more than six hours of academic credit, and may not take more than one course at a time.

Academic Term Requirements

Coursework requirements of the Cooperative Option are equivalent to the coursework requirements of the four year Major program with the exception of the Biological Sciences programs.

Cooperative Option students are expected (but are not required) to maintain a full-time course load while registered for an academic term. The "normal full load" per four-month term is three half courses (9 credit hours).

To continue in a four year Major Cooperative Option a student must attain a minimum Degree Grade Point Average of 2.00 at each point of assessment. Departments may designate courses within the four year Major Cooperative Option in which students are required to attain a grade above 'C'. Continuation in a four year Major Cooperative Option is also contingent upon satisfactory performance in employment terms.

A student who does not meet the academic requirements for continuation in a four year Major Cooperative Option will be required to withdraw from it.

A student who receives failing grades in more than 18 credit hours following admission to the four year Major program will be required to withdraw from the Major program.

Four year Major Cooperative Option students who are required to withdraw, or voluntarily revert to an alternative degree program must fulfil all academic requirements of that degree.

3.5 Honours Academic Regulations,

B.Sc. (Honours) and B.C.Sc. (Honours) – Four Year Degrees

The Honours programs in the Faculty of Science are the most heavily concentrated programs offered. These programs lead most directly to graduate study and are in most cases prescribed extensively by the departments. A student is required to pursue this degree full-time and may be required to achieve higher grade standards than in other degree programs. The programs are regarded as professional training.

Students graduating from the Honours program in Computer Science receive the degree designation Bachelor of Computer Science (Honours), also noted as B.C.Sc. (Honours).

A student electing an Honours program will normally begin Honours work in second year and must meet the entrance requirements set out below. Honours work will consist of three years of study in prescribed courses beyond the first year and will lead to the B.Sc. (Honours) or the B.C.Sc. (Honours).

Students must complete the university written English and Mathematics requirements as described in the chapter, [General Academic Regulations and Policy](#), of this *Calendar*.

As of the 1999-2000 Regular Session, students admitted to Honours programs must complete six credit hours from the Faculty of Arts. Because many Honours programs in the Faculty of Science do not have room for electives in Years 2, 3 and 4, these six credit hours, including the three credit hours of written English, should be completed in University 1.

Honours Entrance Requirements

To enter an Honours degree program, a student must have completed at least 24 credit hours, have a minimum DGPA of 3.00, and a grade of "B" or better in at least one introductory course designated by the department(s).

Another way to gain entry to the many Faculty of Science Honours programs is through the **Second Year Entry Route**. If a student finds himself/herself ineligible to enter a desired Honours program following the completion of 24 or more credit hours, eligibility to enter Honours via the second year entry route can be established by taking a minimum of 18 credit hours over consecutive Fall and Winter Terms (formerly called a Regular Session) with a minimum of 9 credit hours in each term. The 18 credit hours chosen must be applicable to the program the student wishes to enter, and the student must achieve at least a "B" average on those 18 credit hours. If a student chooses to attempt more than 18 credit hours over the consecutive Fall

and Winter terms, the best applicable 18 credit hours will be used to calculate whether or not the "B" average has been achieved for the purpose of assessing eligibility for entrance to the Honours program of choice. Note: Students wishing to enter an Honours program using the Second Year Entry Route must also have an overall DGPA of at least 3.00.

Program Approval: The department must approve a student's Honours program prior to registration for each session. Students must also obtain departmental approval for any and all revisions to their program.

Honours Continuation Requirements

A minimum Degree Grade Point Average of 3.00 is required at each point of assessment. Certain departments may have more rigorous continuation requirements. Check the specific departmental section for further information.

Students must complete a minimum of 9 credit hours in each Fall and Winter Term (or equivalent for students in the Co-operative option) to remain in Good Academic standing in the Honours program. Students failing to do so will be required to withdraw from the Honours program and may be eligible to pursue the B. Sc. Major program or the B. Sc. General degree program.

Students who do not meet the minimum requirement will be required to withdraw from the Honours program.

Students who accumulate more than 15 credit hours of failed courses after entering the Honours degree program (regardless of the origin of the grade or if the course has been repeated) will be required to withdraw from the program. Students required to withdraw from the Honours program may be eligible to pursue the B. Sc. Major program or the B. Sc. General degree program.

Honours Graduation Requirements

To qualify for the degree, Bachelor of Science (Honours), a student must complete a minimum of 120 credit hours or more with a minimum grade of C on all courses contributing to the 120 credit hours that satisfy the program requirements. Additionally, students must have a minimum degree grade point average of 3.00.

Honours Residence Requirement

A student must successfully complete a minimum of 60 credit hours at the University of Manitoba. The courses used to satisfy the requirement must be acceptable for credit in the Faculty of Science. Residency requirements apply to both first and second degree students.

Withdrawal from Honours

Honours students reverting to an alternate degree program must fulfil all academic requirements of that degree.

Double Honours Programs

Double Honours programs may be available as specified under departmental headings. Other programs may be arranged in consultation with the departments concerned.

3.6 Honours Cooperative Option Academic Regulations,
The Honours programs offering a Cooperative Option are: Biochemistry, Biological Sciences, Biotechnology, Chemistry, Computer Science, Genetics, Microbiology, Joint Computer Science - Mathematics, Joint Computer Science – Physics and Astronomy, and the Joint Computer Science – Statistics program (Coming Soon!).

A cooperative education program is an arrangement whereby a student spends alternating periods in university and employment. There are several advantages to cooperative education programs for students. One benefit is that students are able to acquire both theoretical knowledge and practical experience. This experience assists them in selecting areas of specialization for their senior courses. During an employment period students can also typically earn enough to defray the cost of their university education. The contacts developed with potential employers are also valuable to graduating students. The Honours Cooperative Option therefore offers valuable work experience and simultaneously ensures an academic program of Honours calibre.

All regulations governing regular Honours programs apply to the Cooperative Option. In addition, the following variations apply:

Entrance

To enter the Cooperative Option a student must be eligible to enter the Honours program offered by the department.

The normal point of entry to an Honours Cooperative Option is following the completion of second year in the Faculty of Science. Following that point of entry all requirements of the Cooperative Option must normally be completed in no more than four years (48 months).

Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option in those departments where the demand for placements exceeds the number of places available. In such situations the department reserves the right to determine and select the best qualified applicants.

Structure and Sequencing

The Cooperative Option consists of both academic terms and employment terms.

Each academic term can be either four months in duration or eight months in duration, as designated by the Honours department.

Each employment term can be either four months in duration or eight months in duration, as designated by the Honours department.

Each academic term and each employment term will commence in January, May or September.

The sequence of academic terms and employment terms is variable to suit the needs of each department, and is designated by each department.

Students are expected to follow the academic/employment term sequence defined by their department from admission through to graduation.

Employment Term Requirements

All Cooperative Options will include at least 12 months spent in employment terms with a department-approved employer. Normally, each employment term will be completed with one employer.

Cooperative Option students are required to submit at least three written employment reports on their employment term activities. These reports are due at times designated by the Honours department. Each Honours department will provide students with instructions regarding the content and format requirements of the employment reports.

Indications of unsatisfactory performance by a student on an employment term will be thoroughly investigated by the Honours department. As a result of the investigation, if benefits from further professional training are questionable, the student may be required to withdraw from the Cooperative Option. The student

would then be eligible to enter the regular Honours program, the four year Major program or the General program.

While on an employment term, a Cooperative Option student is not permitted to take more than six hours of academic credit, and may not take more than one course at a time.

Academic Term Requirements

Coursework requirements of the Cooperative Option are equivalent to the coursework requirements of the Honours program with the exception of the Biochemistry, Genetics and Microbiology programs.

Cooperative Option students must maintain a full-time course load while registered for an academic term. The "normal full load" per four-month term is three half courses (9 credit hours).

To continue in an Honours Cooperative Option a student must attain a Degree Grade Point Average of 3.00 or higher at each point of assessment. A student's performance will be evaluated following each academic term. In addition, the student must meet all individual course prerequisites for further study and departmental continuation and graduation requirements.

Continuation in an Honours Cooperative Option is contingent upon satisfactory performance on Employment Terms.

Honours Cooperative Option students who are required to withdraw or voluntarily revert to an alternative degree program must fulfil all academic requirements of that degree.

3.7 Minors: Academic Regulations for Science Students, Students in B.Sc. Major and Honours programs may, if they wish, declare and complete a Minor from any department or interdisciplinary program at the University of Manitoba which offers a listed Minor. In the Faculty of Science Minors are listed in the program charts for each department and interdisciplinary program. Other available Minor requirements can be found within the appropriate sections of the departmental/school/faculty offerings. Completion of a Minor in a B.Sc. Major or Honours program is entirely optional. Students may not, however, declare both their Major and Minor from the same department/interdisciplinary program. It should be noted that for Honours students any consideration of completing a Minor should be made early on, due to restricted opportunities in later years of their programs. Completion of a Minor may require that a student take more than the minimum number of credit hours required for graduation. If they wish, students may choose to complete and declare multiple Minors in the four year Major and Honours degree programs.

The Minor is not available to students in the B.Sc. General Degree program.

A Minor will normally consist of a minimum of 18 credit hours specified by the department(s) offering the Minor. Courses required in a student's specific Honours or Major degree program are acceptable for use in a chosen Minor, subject to the Faculty of Science regulation stating that students may not declare both their Major and Minor from the same department or interdisciplinary program.

Minors not offered by the Faculty of Science can be selected from the following list. For further information about courses required for the completion of a specific Minor, please refer to the section of the calendar that relates to the chosen area.

Animal Systems, Entomology, Food Science, Plant Biotechnology, Soil Science, Art History, Anthropology, Asian Studies, Canadian Studies, Catholic Studies, Central and East European Studies, Classics, Greek, Latin, Economics, English, Film Studies, Theatre, French, Spanish, Italian, German, Russian, Ukrainian, Polish, History, Icelandic, Labour Studies, Linguistics, Medieval Studies, Native Studies, Native Languages, Near Eastern and Judaic Studies, Philosophy, Political Studies, Psychology, Religion, Sociology, Ukrainian Canadian Heritage Studies, Women's

and Gender Studies, Geography, Geological Sciences, Physical Geography, Environmental Science, Environmental Studies, Human Nutrition and Metabolism, Family Social Sciences, Management*, and Music.

**Faculty of Management/Asper School of Business: For entry to the Minor, the prerequisite is a grade of "C" or better in the first 6 hours of Business courses. The Management Minor will consist of any 18 hours of credit in courses offered by the Asper School of Business. Enrolment in this program will be limited to 20 students annually. Students planning to enrol in this minor must consult a Faculty of Science student advisor.*

3.8 Dean's Honour List, Degree with Distinction, First Class Honours, **Dean's Honour List (all programs)**

Students enrolled in 12 credit hours or more who achieve a Term Grade Point Average of 3.80 or higher will be placed on the Dean's Honour List. The Dean's Honour List will be calculated after each term.

Degree with Distinction (4-Year Major Degree and 3-Year General Degree)

To obtain a Degree with Distinction a student must achieve a final minimum Degree Grade Point Average of 3.80. The term "Degree with Distinction" will appear on the student's parchment and the student's transcript of marks.

First Class Honours (Honours Degree Only)

To graduate with First Class Honours the student must achieve a final minimum Degree Grade Point Average of 3.80. The term "First Class Honours" will appear on the student's parchment and on the student's transcript of marks.

3.9 Faculty of Science Academic Awards, Refer to the Faculty of Science Website for information regarding awards available to Faculty of Science Students:

<http://umanitoba.ca/faculties/science/about/awards.html>

To be eligible for any award granted exclusively on the basis of academic performance, a student must be enrolled in 100% of a full program as defined by the department.

3.10 Academic Advising, Contact Information

Science General Office: 239 Machray Hall

Telephone: (204) 474 8256

Toll-Free: 1 800 432 1960, extension 8256

E-mail: science_advisor@umanitoba.ca

Science Advisor Availability: [availability calendar](#)

Student Responsibility

You must ensure that you are selecting the correct courses that will enable you to satisfy your degree requirements. Specific degree requirements are listed in the

program charts found in the departmental/program sections of this chapter. Final completion of specific degree requirements is the student's responsibility. Student Advisors are available to answer any questions regarding a student's academic progress.

AURORA STUDENT will not check degree requirements. You are responsible for knowing the requirements of your degree. Consult with a Science Student Advisor for advice and assistance if you are uncertain about your degree requirements.

AURORA Student will not prevent a student from registering in two (or more) courses that are designated as not to be held for credit with one another. It is the student's responsibility to ensure that they are not registered for courses that are ineligible to be held for credit with one another. Read the course descriptions carefully. If you are unsure about a course you have selected, check with a Science Advisor prior to the revision deadline. No academic concessions will be granted in this regard.

You cannot add or change a course classification through AURORA STUDENT. Therefore, if you are an undergraduate student and wish to take a course as a Special Student in your degree, as an Auditor, or as a Challenge for Credit, you must add this course in person in the Science General Office within the normal deadlines for such activity.

General Degree Program

Students in the General program are not required to contact a Science Student Advisor before registration; however, they are strongly advised to do so. A Science Student Advisor can answer any questions about degree progress and entry to professional faculties that may affect registration.

Students reverting from a Major or Honours program to the General program must consult a Science Student Advisor prior to registration, so that their university records may be changed.

Science Student Advisors may check your degree progress periodically. These checks are completed after registration. **Reminder: It is the student's responsibility to know and satisfy all degree requirements.**

Honours, Major, and Cooperative Options

Honours students are required to register in a minimum of 9 credit hours during each Fall and Winter Term. Prior to declaring graduation, Honours, Major, and Co-op students are encouraged to have their programs checked by Student Advisors on a regular basis. However, at the minimum, students must have their program checked and approved by a Science Advisor prior to the start of the term they enter their program and again prior to the term they plan on completing their degree.

Students entering or changing a program must see a Science Student Advisor so that eligibility can be checked and university records updated.

SECTION 4: Programs and Courses offered by the Faculty of Science

Course Selection

Course Selection, The courses required to complete the specific Honours, Major, General and Minor programs in Science are listed in the program charts found below.

Not all courses included in the course description sections below are currently offered. The course schedule for the current academic year is available through [AURORA Student](#). Students should note that space in Honours and Major specific courses may be reserved for students in those programs.

All Honours and Major Degree Programs (4-year degrees) offered by the Faculty of Science satisfy the University "M" (Mathematics) requirement.

Students registered in the 3-Year General Degree programs are responsible for ensuring that they successfully complete a course that will satisfy the University's "M" (Mathematics) requirement.

Students in all programs are responsible for ensuring that they successfully complete a course that will satisfy the University's "W" (Written English) requirement.

For a complete listing of courses that satisfy the University's "W" and "M" requirements refer to appendix A of the General Academic Regulations and Requirements section of this Calendar.

In the Faculty of Science, unless otherwise noted, a minimum grade of "C" is required in any course listed as a prerequisite.

NOTE: Course prerequisites may be waived with written consent of the department

4.1 Actuarial Mathematics Program

4.1 Actuarial Mathematics Program,

4.1.1 Program Information ,

This is an interdisciplinary program leading to a Bachelor of Science (Honours) degree in Actuarial Mathematics offered in collaboration with the Warren Centre for Actuarial Studies and Research of the I.H. Asper School of Business. The program covers mathematical, statistical, financial and economic concepts required to develop skills in the modelling and management of financial risk and contingent events. In the Faculty of Science the program has a greater emphasis on the mathematical and statistical courses than does the Actuarial Mathematics program offered by the I.H. Asper School of Business.

The Warren Centre, with the department of Statistics, offers a joint Honours program (see Section 4.13.3).

To enter the program, a student must have completed a minimum of 24 credit hours with a minimum GPA of 3.00, and also obtained a minimum grade of "B" in one of the following courses: a three (3) credit hour Written English (W) course, MATH 1300, MATH 1500, MATH 1700, STAT 1000, or both of ECON 1010 and ECON 1020. All of these courses are program requirements and students are strongly urged to take them in the first year.

To continue in the Actuarial Mathematics Honours program, students must maintain a minimum DGPA of 3.00, and complete a minimum of 9 credit hours during each Fall and Winter Term.

To graduate with the B. Sc. Honours degree, a student must achieve a minimum DGPA of 3.00, a minimum grade of "C+" in each of the Honours Program Specific courses (see below), and a minimum grade of "C" on all remaining courses that contribute to the 120 credit hours of the degree.

Honours Program Specific Courses

Students must achieve a minimum grade of "C+" in each of the following for both prerequisite purposes and graduation requirements:

ACT 2020, ACT 2120, ACT 2210, ACT 3130, ACT 3230, ACT 3530, ACT 4000, ACT 4060, ACT 4140, ACT 4340

In order to receive course credit for, and examination exemptions from, future Society of Actuaries (SoA) and VEE courses, students must obtain a minimum grade of "B" in the following courses: ECON 1010, ECON 1020, ACC 1100, FIN 2200, STAT 3470, and STAT 3490. Contact the Warren Centre for Actuarial Studies and Research for further information.

4.1.2 Actuarial Mathematics Program Chart,

UNIVERSITY 1	YEAR 2	YEAR 3	YEAR 4
HONOURS ACTUARIAL 120 CREDIT HOURS			
ECON 1010 ⁶ , ECON 1020 ⁶	ACT 2020, ACT 2120	ACT 2210, ACT 3130, ACT 3230, ACT 3530, ACT 4000	ACT 4060, ACT 4140, ACT 4340
MATH 1500 ¹ , MATH 1700 ¹ , MATH 1300 ¹	STAT 2400, STAT 3400	MATH 2300 ⁴	STAT 3470 ⁶ , STAT 3490 ^{3,6}
STAT 1000, STAT 2000	ACC 1100 ^{2,6} , FIN 2200 ^{2,6}	STAT 3050, STAT 3800	MSCI 2150 ⁵
3 credit hour "W" requirement	MATH 2720 ¹ , MATH 2730 ¹		
	COMP 1260 ⁵		
6 credit hours of electives ⁷	3 credit hours of approved electives ⁷	6 credit hours of approved electives ⁷	12 credit hours of approved electives ⁷
30 Hours	30 Hours	30 Hours	30 Hours
JOINT STATISTICS - ACTUARIAL MATHEMATICS HONOURS: See Section 4.13.3			
NOTES:			
1 MATH 1510 or MATH 1520 may be taken instead of MATH 1500; MATH 1310 may be taken instead of MATH 1300; MATH 1710 may be taken instead of MATH 1700; MATH 1690 may be taken in place of both MATH 1500 and MATH 1700; MATH 2750 may be taken in place of both MATH 2720 and MATH 2730.			
2 ACC 1100 and FIN 2200 may be taken in Year 2, 3 or 4; however, it is strongly recommended that these two courses be taken in Year 2 or 3. Note that ACC 1100 is a prerequisite for FIN 2200.			
3 STAT 3490 may be taken in Year 3 or 4.			
4 MATH 2300 may be taken in Year 2, 3 or 4.			
5 COMP 1260 and MSCI 2150 may be taken in Year 2, 3 or 4. Note that COMP 1260 is a prerequisite for MSCI 2150.			
6 In order to receive course credit and examination exemptions from future Society of Actuaries (SoA) and VEE courses, students must obtain a minimum grade of "B" in these courses. Contact the Warren Centre for Actuarial Studies and Research for further information.			
7 Recommended Electives			
The electives in Year 3 and Year 4 are to be chosen from Actuarial Mathematics, approved Business courses, Computer Science, Economics, Mathematics (3000 or 4000 level) and Statistics (4000 level courses). Other electives may be selected through consultation with the program director.			
<i>Year 1:</i> PSYC 1200 or SOC 1200			
<i>Year 2:</i> GMGT 2000			
<i>Year 3:</i> FIN 3410, STAT 3480			
<i>Year 4:</i> FIN 3270, ACT 4050, ACT 4060, STAT 4100, STAT 4520, STAT 4530, STAT 4630.			

4.2 Biochemistry

4.2 Biochemistry ,

4.2.1 Program Information,

The program coordinators must approve a student's Honours or Major program each session. Students must also obtain approval for any and all revisions to their program.

Biochemistry Honours Degree Requirements

To enter the joint Honours program in Biochemistry, a student must have completed at least 24 credit hours with a minimum GPA of 3.00 and also obtained a minimum grade of "B" in CHEM 1310 and a minimum grade of "C+" in BIOL 1020, BIOL 1030, PHYS 1020 (or PHYS 1050), PHYS 1030 (or PHYS 1070), MATH 1500 and MATH 1700 are required courses in the program and students are strongly encouraged to complete them in first year.

To continue in the Biochemistry Joint Honours program, students must maintain a minimum GPA of 3.00, and complete a minimum of 9 credit hours during each Fall and Winter Term.

To graduate with the Biochemistry Joint Honours degree, a student must achieve a minimum GPA of 3.00 and obtain a minimum grade of "C" on the courses that make up the 120 credit hours of the degree.

Chemistry and Microbiology Option Courses for Biochemistry Honours Students:

CHEM: 2290, 3400 3360, 3370, 3390, 3490, 3580, 4570, 4580, 4590, 4600, 4640, 4650, 4670, 4680, 4690, 4710 (6)

MBIO: 3000, 3010, 3030, 3280, 3430, 3470, 4010, 4020, 4410, 4440, 4480, 4520, 4530, 4570, 4580, 4600, 4610, 4670 (or 4672)

Option courses no longer offered that may be used if taken prior to their deletion: CHEM 3380, MBIO 2280, MBIO 3440, MBIO 3480, MBIO 4320, MBIO 4470, and MBIO 4510. NOTE: Several of these courses may not be held with current course offerings found on the above option lists. Please refer to the calendar descriptions for more information about specific course restrictions.

Other options may be considered and approved by the program advisor.

Biochemistry Honours Cooperative Option

Students interested in alternating academic terms and terms of paid employment as part of their Honours Biochemistry program may enter the Cooperative Option in their third year. The five year program provides students with minimum 12 months of paid employment by the time they graduate. It enables them to obtain work experience in research and industry with participating firms, government agencies and University units.

The course and grade requirements **for entry and continuation** in the Cooperative Option are the same as that for regular Honours program. Each academic term in the third and subsequent years must comprise a minimum of nine (9) credit hours. Students are required to complete the first and second year requirements of the program and MBIO 3410 before they begin their first employment term. Students should refer to the general faculty regulations for B. Sc. (Honours) Cooperative Options in Section 3.6.

To graduate with the B. Sc. Honours (Cooperative Option) degree, a student must achieve a minimum GPA of 3.00 and a minimum grade of "C" on all courses that contribute to the 120 credit hours of the degree.

In addition to the program specific courses, in years 3 and 4 students will select 21 credit hours from the list of optional Microbiology and Chemistry courses found

below. Additionally, students will select 12 credit hours of Science electives (see note 5).

Chemistry and Microbiology Option Courses for Biochemistry Honours Students:

CHEM: 2290, 3400 3360, 3370, 3390, 3490, 3580, 4570, 4580, 4590, 4600, 4640, 4650, 4670, 4680, 4690, 4710 (6)

MBIO: 3000, 3010, 3030, 3280, 3430, 3470, 4010, 4020, 4410, 4440, 4480, 4520, 4530, 4570, 4580, 4600, 4610, 4670 (or 4672)

Option courses no longer offered that may be used if taken prior to their deletion: CHEM 3380, MBIO 2280, MBIO 3440, MBIO 3480, MBIO 4320, MBIO 4470, and MBIO 4510. NOTE: Several of these courses may not be held with current course offerings found on the above option lists. Please refer to the calendar descriptions for more information about specific course restrictions.

Other options may be considered and approved by the program advisor.

Students must check with the Co-op office for application deadline information. Students will be notified of their provisional acceptance in the program by October. Acceptance into the program is dependent upon the student receiving an employment placement. Employment term positions available to the students will be approved by the department, and the employers will select the students they wish to employ. The first work term can be taken in January or May. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each employment term.

Biochemistry Four Year Major Degree Requirements

To enter the joint four year Major program, a student must have completed a minimum of 24 credit hours with a minimum GPA of 2.00, and also obtained a minimum grade of "C+" in CHEM 1310, and a minimum grade of "C" in BIOL 1020. BIOL 1030, PHYS 1020 (or PHYS 1050), PHYS 1030 (or PHYS 1070), MATH 1500, and MATH 1700 are required courses in the program and students are strongly encouraged to complete these courses in first year.

To continue in the Bachelor of Science Major degree program, students must maintain a minimum GPA of 2.00.

To graduate with the Bachelor of Science Major in Biochemistry, a student must complete 120 credit hours or more, with minimum grades of "C" on all Major Program Specific courses (see below), passing grades ("D" or better) on the remaining courses, and a minimum grade point average of 2.00 on the 120 credit hours that contribute to the degree.

Major Program Specific Courses:

CHEM: 2210, 2220, 2280, 2360 (MBIO 2360), 2370 (MBIO 2370), 2400 (2380), 2470, 3570, 4630 and whichever one of 4620, 4360, 4370 is selected

MBIO: 1010, 2020, 3410, and whichever one of 3450, 3460 or 4540 is selected.

Students in this program should note the following:

Students must satisfy any course prerequisites and corequisites for courses selected. Care should be taken to select courses in their proper sequence, e.g. CHEM 2370

(MBIO 2370) and MBIO 2020 should be taken in Year 2 as they are prerequisite to a number of subsequent required or optional courses.

Normally 4000 level courses are available only to students in their fourth year. MBIO 4530 and MBIO 4570 are not available to Major students.

Students are encouraged to elect other courses pertinent to the study of biochemistry although this is not required for completion of the degree. The departments of Microbiology and Chemistry will be glad to suggest such supplementary courses upon request.

Students who may wish to transfer to the Honours program in Biochemistry following Year 2 should be sure to complete all courses recommended in Year 2 (see chart below).

Biochemistry Major Cooperative Option

Students interested in alternating academic terms and terms of paid employment as part of their program may enter the Biochemistry Major Cooperative Option in their third year. The five year program provides students with a minimum 12 months of paid employment by the time they graduate. It enables them to obtain work experience in research and industry with participating firms, government agencies and University units.

The course and grade requirements for **entry and continuation** in the Cooperative Option are the same as those required for the regular Major program. Students are encouraged, but not required, to take 15 credit hours in each academic term in the third and subsequent years. Students are required to complete the first and second year requirements of the program and MBIO 3410 before they begin their first employment term. Students should refer to the general faculty regulations for B. Sc. (Major) Cooperative Options in Section 3.4.

To graduate with the degree Bachelor of Science Major (Cooperative Option), a student must complete the equivalent of 120 credit hours or more, with minimum grades of "C" on Major Program Specific courses (see below), passing grades ("D" or better) on the remaining courses, and a minimum grade point average of 2.00 on the 120 credit hours that contribute to the degree.

Major Program Specific Courses

CHEM 2210, 2220, 2280, 2360 (MBIO 2360), 2370 (MBIO 2370), 2400 (2380), 2470, 3570, 4630 and whichever of 4620, 4360, 4370 is selected

MBIO 1010, 2020, 3410, and whichever one of 3450, 3460 or 4540 selected.

Students must check with the Co-op office for application deadline information. Students will be notified of their provisional acceptance in the program by October. Acceptance into the program is dependent upon the student receiving an employment placement. Employment term positions available to the students will be approved by the department and the employers will select the students they wish to employ. The first work term can be taken in January or May. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each employment term.

30 Hours	30 Hours	30 Hours	30 Hours
JOINT FOUR YEAR MAJOR (Including Cooperative Option)^{3,4} 120 CREDIT HOURS			
CHEM 1300, CHEM 1310 BIOL 1020, BIOL 1030 PHYS 1050 (or 1020), PHYS 1070 (or PHYS 1030) MATH 1500 ¹ , MATH 1700 ¹	CHEM 2210, CHEM 2220, CHEM 2280, CHEM 2360, CHEM 2370, CHEM 2400, CHEM 2470 MBIO 1010, MBIO 2020	CHEM 3570 MBIO 3410 One of: MBIO 3450, MBIO 3460, MBIO 4540	CHEM 4630 One of: CHEM 4620, CHEM 4360, CHEM 4370
In University 1 or Year 2 the following must be completed:		24 credit hours of Microbiology and Chemistry (minimum 6 credit hours from each dept.). Of these 24 credit hours, at least 12 hours must be 4000	

6 credit hours from the Faculty of Arts including the University Written English "W" requirement ² 3 credit hours chosen from COMP, MATH, or STAT ⁵	level courses. 21 credit hours of approved electives ⁵ Work Terms (if Co-op Selected): MBIO 3980, MBIO 3990, MBIO 4980 and / or MBIO 4990
NOTES:	
1 MATH 1510 or MATH 1520 may be taken in place of MATH 1500; MATH 1710 may be taken in place of MATH 1700; MATH 1690 may be taken in place of MATH 1500 and MATH 1700.	
2 As there are no open electives in Year 2 of the program, students should complete the university written English requirement in University 1. If not completed in University 1, a "W" course must be completed prior to Year 3 in addition to the required Year 2 courses.	
3 IMPORTANT: Students in the cooperative programs must ensure that they are able to satisfy the prerequisites for all 3000 and 4000 level courses they plan to take.	
4 The four year Major program need not be completed in the manner prescribed in the chart above. The chart indicates one possible arrangement of the required courses and is meant to be a guide around which students can plan their program.	
5 MATH 1010, MATH 1020, MATH 1190, COMP 1260, COMP 1270 may not be chosen to satisfy this requirement	
(Letters in brackets indicate minimum prerequisite standing for further study.)	

4.7 Interdisciplinary Course in Forensic Science Course Description

FORS 2000 Introductory Forensic Science
Survey course which introduces forensic science via a series of guest lectures provided by experts from within the university and from the community (e.g., Winnipeg Police, RCMP, Chief Medical Examiner, etc.). Multidisciplinary topics will be covered including how a case is studied, use of scientific techniques in investigations, collection of evidence, the role of the expert witness, and presentation of evidence in court. Prerequisites: BIOL 1030 (C+), CHEM 1310 (C+).

4.8 Genetics Program

4.8 Genetics Program,
4.8.1 Program Information,
The Faculty of Science offers an interdisciplinary program leading to a B.Sc. (Honours) degree in Genetics. Genetics is the science of heredity dealing with the mechanisms of inheritance and has generated concepts basic to modern biology. Three areas are represented in this program: classical genetics, population genetics, and molecular genetics. Courses from Arts, Agricultural and Food Sciences, and Medicine are included in this program.

Genetics Entry, Continuation, and Graduation requirements

Honours

To enter the Honours program in Genetics, a student must have completed at least 24 credit hours with a minimum GPA of 3.00, and also obtained a minimum grade of "B" in BIOL 1030, and a minimum grade of "C" in CHEM 1310. STAT 1000, MATH 1500 and the additional 3 credit hours of specified Mathematics courses are program requirements and students are strongly encouraged to complete these courses in first year.

* Students interested in studying Genetics should note that Grade 12 mathematics and chemistry are prerequisite to CHEM 1300. Effective 2009-2010, students will also require Biology 40S (or equivalent) and any Grade 12 mathematics course (or equivalent) for entry to BIOL 1020 (the required prerequisite for BIOL 1030).

To continue in the Genetics Honours program, students must maintain a minimum GPA of 3.00, and complete a minimum of 9 credit hours during each Fall and Winter Term.

To graduate with the B. Sc. Honours degree, a student must maintain a minimum 3.00 GPA and achieve a minimum grade of "C" on all courses that make up the 120 credit hours of the degree.

Honours Cooperative Option

Students interested in alternating academic terms and terms of paid employment as part of their Honours Genetics program may enter the Cooperative Option in their third year in Genetics Honours. This five year program provides students with minimum 12 months of paid employment by the time they graduate. It enables them to obtain work experience in research and industry with participating firms, government agencies and University units.

The course and grade requirements for **entry and continuation** in the Cooperative Option are the same as that for regular Honours program (see above). Students are required to complete the first and second year requirements of the program and MBIO 3410 before they begin their first employment term. Each academic term in the third and subsequent years must comprise nine (9) credit hours. Students should refer to the general faculty regulations for B. Sc. (Honours) Cooperative Options in Section 3.6.

Students must apply for openings in the Cooperative Option in and should check with the Co-op office for deadline information. They will be notified of their provisional acceptance in the program by October. Acceptance into the program is dependent upon the students receiving an employment placement. Employment term positions available to the students will be approved by the department, and the employers will select the students they wish to employ. The first work term can be taken in January or May. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each 4-month employment term.

Major

To enter the Major Degree program in Genetics, a student must have completed at least 24 credit hours with a minimum GPA of 2.00, and also obtained a minimum grade of "C+" in BIOL 1030, and a minimum grade of "C" in CHEM 1310. STAT 1000, MATH 1500 and the additional 3 credit hours of specified Mathematics courses are program requirements and students are strongly encouraged to complete these courses in first year.

* Students interested in studying Genetics should note that Grade 12 mathematics and chemistry are prerequisite to CHEM 1300. Effective 2009-2010, students will also require Biology 40S (or equivalent) and any Grade 12 mathematics course (or equivalent) for entry to BIOL 1020 (the required prerequisite for BIOL 1030).

To continue in the Genetics Major Degree program, students must maintain a minimum GPA of 2.00.

To graduate with the Bachelor of Science (Major) in Genetics, a student must obtain passing grades on all courses, obtain a minimum GPA of 2.00 on the 120 credit hours that make up the degree, and a minimum grade of C in all required and optional courses that contribute to the Major.

Major Cooperative Option

Students interested in alternating academic terms and terms of paid employment as part of their Genetics Major program may enter the Cooperative Option in their third year. This five year program provides students with minimum 12 months of paid employment by the time they graduate. It enables them to obtain work experience in research and industry with participating firms, government agencies and University units.

The course and grade requirements for **entry and continuation** in the Cooperative Option are the same as that for regular Major Degree program (see above). Students are required to complete the first and second year requirements of the program and MBIO 3410 before they begin their first employment term. Students should refer to the general faculty regulations for B. Sc. (Major) Cooperative Options in Section 3.6.

Students must apply for openings in the Cooperative Option in and should check with the Co-op office for deadline information. They will be notified of their provisional acceptance in the program by October. Acceptance into the program is dependent upon the student receiving an employment placement. Employment term positions available to the students will be approved by the department, and the employers will select the student(s) they wish to employ. The first work term can be taken in January or May. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each 4-month employment term.

The Honours and Major programs combine courses in Psychology with related courses in Science. Courses from the Faculty of Arts are included in this program. The Faculty of Science offers programs leading to a B.Sc. (Honours) degree in Psychology and a B.Sc. (Major) degree in Psychology.</p> <p>To enter the Honours program, students must have obtained a grade of "B+" or better in PSYC 1200 (or in both PSYC 1211 and PSYC 1221) and a grade of "B" in six credit hours in courses offered by the Faculty of Science. In addition, students must have obtained a Grade Point Average of 3.25 or better on their first 24-30 credit hours and have no failed courses. Introductory courses in Biology, Chemistry, Computer Science, Mathematics, Statistics or Biological Sciences are highly recommended.</p>

The optional courses are:

Biological Sciences: BIOL 2410, BIOL 2420, BIOL 2540, BIOL 3290, BIOL 3300, BIOL 3560, BIOL 4500, BIOL 4540, BIOL 4542, BIOL 4560

Chemistry: CHEM 2280, CHEM 2290, CHEM 4360, CHEM 4370, CHEM 4620, CHEM 4630

Microbiology: MBIO 3000, MBIO 3010, MBIO 3030, MBIO 3430, MBIO 3440, MBIO 3450, MBIO 3460, MBIO 4010, MBIO 4410, MBIO 4530* (6), MBIO 4540, MBIO 4670 (or the former MBIO 4570), MBIO 4600, MBIO 4610.

Forensic Science: FORS 2000 (satisfies the University "W" requirement)

Computer Science: COMP 1010, COMP 1020, COMP 1260, COMP 1270

Physics: PHYS 1020, PHYS 1030, PHYS 1050, PHYS 1070

Animal Science: ANSC 3500, ANSC 4280

Undergraduate Studies

To continue in the Honours program, a student must register in a minimum of 9 credit hours in each Fall and Winter Term and must meet all of the continuation criteria of the Faculty of Science. In addition, students must maintain a minimum Degree Grade Point Average of 3.25 based on all courses in the program. Students who do not meet the minimum continuation requirement will be required to withdraw from the Honours program.

The department must approve a student's Honours program for each session. All revisions to the program must also have prior approval from the Associate Head (Undergraduate) or the Undergraduate Advisor.

To graduate, a student must obtain 120 credit hours of courses with grades of "C" or better in each course and with a minimum grade point average of 3.25 on the 120 credit hours that contribute to the degree. In addition, students must complete the program of study in the chart below.

Four Year Major

To enter the Major program, students must normally have obtained a grade of C+ or better in PSYC 1200 (or in both PSYC 1211 and PSYC 1221) and in six credit hours in courses offered by the Faculty of Science and meet the Faculty of Science

requirements for entry to the Major program. Introductory courses in Biological Sciences, Chemistry, Computer Science, Mathematics, or Statistics are highly recommended.

To continue in the Major program, a student must meet all of the continuation criteria of the Faculty of Science. This includes maintaining a minimum GPA of 2.00 at each point of assessment, and no more than 18 credit hours of failing grades after entry to the program. Students who do not meet the minimum continuation requirement will be required to withdraw from the Major program. The department must approve a student's Major program for each session. All program revisions must also have prior approval.

To graduate with the degree of Bachelor of Science (Major), a student must complete 120 credit hours of courses with passing grades (D or better) in each course, with a minimum GPA of 2.00 on the 120 credit hours that contribute to the degree. In addition, the student must complete the program of study as listed in the program chart below.

NOTE: Psychology cannot be used to fulfill either the introductory or advanced level Science requirements in the 3-year B.Sc. General Degree.

4.12.2 Psychology,

UNIVERSITY 1	YEAR 2	YEAR 3	YEAR 4

Psychology Courses

All Psychology courses are available to Science students. For a complete course listing, see the Faculty of Arts section.

Psychology courses taught at the College universitaire de Saint-Boniface can be used to satisfy degree requirements

4.14 Courses Offered in Other Faculties and Schools Acceptable

4.14 Courses Offered in Other Faculties and Schools Acceptable , All courses acceptable for credit in any degree program at the University of Manitoba are acceptable for credit in Science (excluding Pass/Fail courses) subject to overall degree requirements. All courses will be included on admission to the Faculty and will be applied toward the elective requirement in all degree programs offered in Science. For course descriptions, including any prerequisites and/or restrictions, see the chapter entitled Course Descriptions in this Calendar.

Students are reminded that normally a maximum of 30 credit hours (General Degree) or 36 credit hours (Major Degree) from courses offered by Faculties or Schools other than the Faculty of Science can contribute to degree requirements.

To enter the Biological Sciences Honours program a student must have completed at least 24 credit hours with a minimum grade of "B" BIOL 1030, CHEM 1300, CHEM 1310, STAT 1000 and the 3 credit hours of specified Mathematics, Physics or Statistics are program requirements and students are strongly urged to complete these courses in first year.

To continue in the Biological Sciences Honours program, students must maintain a minimum GPA of 3.00, and complete a minimum of 9 credit hours during each Fall and Winter Term.

To graduate with the B.Sc. Honours degree, a student must achieve a minimum GPA of 3.00, and obtain a minimum of 120 credit hours of the de-

Four Year Honours Cooperative Option

Students interested in alternating academic terms and work terms of paid employment as part of their Honours Biological Sciences program may enter the Cooperative Option after completion of their second year in Honours Biological Sciences. This program provides students with 12 months of paid employment by the time they graduate. It enables them to obtain work experience with participating firms, government agencies and University units.

There are several themes offered within the Biological Sciences Program and the Cooperative Option can be completed within any of these areas of study. See below for a description of the different themes and the course requirements of those themes offered by the Department of Biological Sciences.

4.3 Department of Biological Sciences
4.3 Department of Biology Contact Info,

4.3.1 Biological Sciences

4.3.1 Biological Sciences,

Biology is one of the most rapidly evolving and diverse sciences in the modern world, exploring all aspects of life from biomolecules to ecosystems. The Department of Biological Sciences is committed to advancing our understanding of biological structure and function, and developing new tools and technologies to address current and emerging problems facing all living organisms. Connections will be forged between molecules, cells, tissues, organs, organisms, populations, communities, and ecosystems, highlighting the need to explore all levels of biological interactions. Programs emphasize the organism as the key element in studies of the development and evolution of form and function, and the role in adaptations to the environment. Based on a core of fundamental biological principles, our programs explore diverse areas such as organismal biology, environmental biology, genetics, cell biology and development, physiology, ecology, behaviour, and systematics and evolution. The Department focuses on the integration of research and teaching expertise to create opportunities for growth and novel synergisms in the training of future leaders in the field.

4.3.2 B.Sc. Honours: Biological Sciences

4.3.2 B. Sc. Honours: Biological Sciences,

The Honours program is designed for students planning a professional career in Biological Sciences at the graduate level. Such students are strongly advised to enter the Honours program at the beginning of second year.

Appropriate courses will be arranged in consultation with the Theme Advisor who may be contacted through the Biological Sciences Office (212 Biological Sciences Building). Students are encouraged to select a specific theme area of study as part of their Biological Sciences program. Should a student not opt for one of the five theme groups, they may design their own program by completing the core course requirements plus 30 credit hours of 3000 and/or 4000 level Biological Sciences

Students may apply for openings in the Biological Sciences Honours Cooperative Option after completing at least two years (60 credit hours) in the Honours program, usually in the fall of their third year. Before the first employment term begins, the prerequisite courses listed below must be completed. Acceptance and continuation in the program is dependent upon the student receiving employment placements. Students are encouraged to check with the Co-op office (214 Buller Building) for application deadlines.

Prerequisite courses to be completed before employment terms begin: BIOL 1020, BIOL 1030, CHEM 1300, CHEM 1310, STAT 1000, 3 credit hours of specified Mathematics or Physics, BIOL 2300, BIOL 2500, BIOL 2520, and BIOL 3100 *. In addition, students must complete 9 credit hours from program core courses as follows: students must select one course from Group A (BIOL 2200, BIOL 2210), plus one course from Group B (BIOL 2240, BIOL 2242, BIOL 2260), plus one additional course from either Group A or Group B. [* A Pre-Coop Workshop may be substituted for BIOL 3100 only to permit an employment term in September of Year 3, but BIOL 3100 must still be taken.]

Students should note that the course and grade requirements for the Biological Sciences Honours Cooperative Option are the same as those for the regular Honours program, with the addition of the Work Term courses (see above). **To continue** in the Biological Sciences Honours Cooperative program a student must maintain a minimum DGPA of 3.00, and successfully complete all work term courses.

Students should refer to the general faculty regulations for B. Sc. (Honours) Cooperative Options in Section 3.6.

Work term positions available to the students will be approved by the department and may include positions within Biological Sciences, other University departments or positions with employers outside the University. Employers will select the students they wish to employ. The first employment term will preferably be taken in January or May of the third year, but may under exceptional circumstances begin in the preceding September. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for

places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

The program will include three employment terms, each of 4-months duration, two of which may be consecutive. A fourth work term is optional. Students are required to register in and pay tuition for each employment term prior to its commencement. Students will be required to submit an employment report upon the completion of each employment term. In order to stay in the Cooperative program, a student must obtain a grade of "pass" for each work term report.

4.3.3 B.Sc. (Major): Biological Sciences

4.3.3 B.Sc. (Major): Biological Sciences,

The four year Major program is also designed for students planning a professional career in the Biological Sciences, but who may not be considering graduate training. It will provide intensive training in all areas of Biology comparable to that of the Honours program, but has less demanding performance requirements. Additionally, students may complete the Major degree requirements on a part-time basis if they so choose. Students who so wish, and have appropriate standing and course selection, may transfer to the Honours program at any time up to the commencement of Year 4.

Appropriate courses will be arranged in consultation with the Theme Advisor who may be contacted through the Biological Sciences Office, 212 Biological Sciences Building. Students are encouraged to select a specific theme area of study as part of their Biological Sciences program. See the information below outlining the different theme areas offered by the Department of Biological Sciences.

Course BIOL 4100 is not available to students in this program.

To enter the Biological Sciences four year Major program a student must have completed a minimum of 24 credit hours with a minimum DGPA of 2.00, and obtained a minimum grade of "C+" in BIOL 1030, CHEM 1300, CHEM 1310, STAT 1000 and the 3 credit hours of specified Mathematics, Physics or Statistics are program requirements and students are strongly encouraged to complete these courses in first year.

To continue in the Bachelor of Science Major degree, a student must maintain a minimum DGPA of 2.00.

To graduate with the Bachelor of Science (Major) in Biological Sciences, a student must obtain passing grades on all courses, and obtain a minimum GPA of 2.00 on the 120 credit hours that contribute to the degree.

Four Year Major Cooperative Option

Students interested in alternating academic terms and work terms as part of their Major Biological Sciences program may enter the Cooperative Option after completion of their second year in the Biological Sciences Major. This program provides students with 12 months of paid employment by the time they graduate. It enables them to obtain work experience with participating firms, government agencies and University units.

Students may apply for openings in the Biological Sciences Major Cooperative Option after completing at least two years (60 credit hours) in the Major program, usually in the fall of their third year. Before the first employment term begins, the prerequisite courses listed below must be completed. Acceptance and continuation in the program is dependent upon the student receiving employment placements. Students are encouraged to check application deadlines with the Co-op program office (214 Buller Building).

Prerequisite courses to be completed before employment terms begin: BIOL 1020, BIOL 1030, CHEM 1300, CHEM 1310, STAT 1000, 3 credit hours of specified Mathematics or Physics, BIOL 2300, BIOL 2500, BIOL 2520 and BIOL 3100 *. In addition, students must complete 9 credit hours from program core courses as follows: students must select one course from Group A (BIOL 2200, BIOL 2210), Undergraduate Studies

plus one course from Group B (BIOL 2240, BIOL 2242, BIOL 2260), plus one additional course from either Group A or Group B. [* A Pre-Coop Workshop may be substituted for BIOL 3100 only to permit an employment term in September of Year 3, but BIOL 3100 must still be taken.]

Students should note that the course and grade requirements for the Biological Sciences Major Cooperative Option are the same as those for the regular Major program (see above), with the addition of BIOL 3100 and the Work Term courses. **To continue** in the Biological Sciences Major Cooperative program, a student must have a Cumulative Grade Point Average of 2.00, and a pass on all work term courses.

Students should also refer to the general faculty regulations for B. Sc. (Major) Cooperative Options in Section 3.4.

Work term positions available to the students will be approved by the department and may include positions within Biological Sciences, other University departments or positions with employers outside the University. Employers will select the students they wish to employ. The first employment term will preferably be taken in January or May of the third year, but may under exceptional circumstances begin in the preceding September. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

The program will include three employment terms, each of 4-months duration, two of which may be consecutive. A fourth work term is optional. Students are required to register in and pay fees for each employment term prior to its commencement. Students will be required to submit an employment report upon the completion of each employment term. In order to stay in the Cooperative program, a student must obtain a grade of "pass" for each work term report.

4.3.4 Biological Sciences Theme Areas

4.3.4 Biological Sciences Theme Areas,

I. Cell, Molecular and Developmental Biology: Students in the Department of Biological Sciences with an interest in the exciting field of cell and developmental biology can select the Cell, Molecular, and Developmental Biology theme for focus. This theme will provide students a selection of courses that highlight fundamental principles and many important advances in this rapidly growing area of contemporary biology. Students can concentrate on aspects that deal with the molecular structures and processes of cellular life and their roles in the function, reproduction, and development of living organisms. The theme is structured such that students can choose from a broad range of disciplines, including biochemistry, molecular biology, morphology, genetics, cell biology, and developmental biology. The organisms under study in this theme are equally diverse, ranging from microbes through to invertebrates, vertebrates, plants, and fungi. The Department collaborates with many other life sciences departments and this theme allows student to develop a highly flexible course portfolio that includes courses from the Departments of Biological Sciences, Chemistry, Microbiology, or Plant Science.

Specific courses required for the Cell, Molecular, and Developmental Biology Theme in addition to the core course requirements: BIOL 2540 (3); *Plus a minimum of 6 Credit hours of Biochemistry:* CHEM 2770 (MBIO 2770) and CHEM 2780 (MBIO 2780); or CHEM 2210 and CHEM 2360 (MBIO 2360) and CHEM 2370 (MBIO 2370).

II. Ecology and Environmental Biology: Ecology is the study of interactions between organisms and their environment, both in natural settings and human-influenced habitats. In our society ecology and environmental biology provides a scientific link to the living world. Ecologists study the lives of many organisms including animals, plants, fungi, protists, and bacteria. Interactions among these organisms are investigated at many scales ranging from the microscopic to the global. At the individual level, ecology investigates the impact of environmental factors on organisms through their physiology and behaviour. Ultimately, ecologists link these factors to survival and reproduction in variable environments. At the population level, ecology examines the causes of fluctuations in numbers and changes in distribution of a single species. This work is often the focus of agencies

concerned with exploitation, extinction, and rehabilitation of both commercially and esthetically important species. At the community and ecosystem level, ecology considers many coexisting species. It examines the interactions between species within the communities (competition, predation, parasitism, mutualism, etc.) as well as broader investigations of community structure and composition. Ultimately, the skills developed within this theme prepare students for future careers in academia, government agencies, private consulting companies, or NGOs whose mandates encompass ecological and environmental concerns.

Specific courses required for the Ecology and Environmental Biology Theme in addition to the core course requirements: BIOL 3310 (3); BIOL 3312 (3); BIOL 3314 (3); STAT 2000 (3).

III. Environmental and Integrative Physiology: The Environmental and Integrative Physiology theme will be of interest to a wide array of students interested in pursuing employment opportunities in the Environmental, Consulting, Pharmaceutical, Healthcare, and Professional job markets. Based on the suggested courses and sub themes within this program students will be able to graduate with an all inclusive degree or specialize in particular disciplines ranging from molecular physiology to whole organism physiology and eco/environmental physiology, a subject area that is at the interface between ecology and physiology. Students will be exposed to modern research techniques in lab classes and will be taught by instructors and faculty with active research programs within the Department of Biological Sciences.

Specific courses required for the Environmental and Integrative Physiology Theme in addition to the core course requirements: 6 Credit hours of Biochemistry CHEM 2770 (MBIO 2770) and CHEM 2780 (MBIO 2780); or CHEM 2210 and CHEM 2360 (MBIO 2360) and CHEM 2370 (MBIO 2370); Plus: two of the following courses (one of which is already required in the four-year Biological Sciences Degree programs): BIOL 3470 (3), BIOL 3472 (3) BIOL 3450 (3), BIOL 3452 (3).

IV. Evolution and Biodiversity: Evolution is broadly defined as “descent with modification” and is the process that generates the earth’s biodiversity. The theory of evolution provides a unifying framework for biology because all organisms are descended from a common ancestor. As a result, evolutionary principles permeate research and teaching throughout biology.

Evolutionary biology addresses two overarching questions. (1) What was the history of life? (2) What processes account for adaptation and diversification? Systematics reconstructs the history of life by studying relationships among species, and involves comparisons of physical appearance, development, biochemistry, genetics, behaviour, ecology and biogeography. Evolutionary Genetics investigates how processes such as natural selection, mutation, and migration interact to cause evolutionary change within populations. Evolutionary history, genetics, and ecological context are required to fully understand the evolution of traits, for example body size, wing shape or leaf structure. Thus evolution integrates knowledge from a wide spectrum of sub-disciplines within biology.

Evolutionary biology has wide-ranging practical applications. Principles of evolution are required to understand: the evolution of pathogens such as HIV and avian influenza; domestication of wild species and consequences of genetic modifications; the identification of natural products; long-term responses to environmental change; and human biology. Courses from this theme will prepare students for academia, medicine, and government agencies or NGO’s that emphasize the cataloguing and conservation of biological diversity.

Specific course required for the Evolution and Biodiversity Theme in addition to the core course requirements:

List A: One of the following: BIOL 3360, BIOL 4240, BIOL 4242, BIOL 4362

List B: One of the following: BIOL 2262, BIOL 3200, BIOL 3242, BIOL 3250, BIOL 3270, BIOL 4212, BIOL 4214, BIOL 4216, BIOL 4218,

V. Integrative Biology: The Integrative Biology theme will be of interest to students planning to pursue careers in the various biology sub disciplines and who wish an undergraduate degree that is “interdisciplinary” within the life science departments that cuts across the traditional boundaries. This program will suit students who are interested in the “after degree” program in Education or who are intending to apply to a professional program (e.g. Medicine, Dentistry, Pharmacy, Medical Rehabilitation) and who would like a broad background in the Life Sciences. With the appropriate choice of Biological Science courses it would be possible to indicate the Integrative Biology theme along with a second theme from the department.

Specific courses required for the Integrative Biology Theme in addition to the core course requirements: All five of the following (three of which are already designated as core courses in the four-year Biological Sciences Degree programs): BIOL 2200 (3), BIOL 2210 (3), BIOL 2240 (3), BIOL 2242 (3), MBIO 1010 (3); One of the following (one of which is already required in the four-year Biological Sciences Degree programs): BIOL 3450 (3), BIOL 3470; Plus: 18 credit hours in Biological Sciences (3000/4000 level courses) and 12 credit hours in Microbiology (3000/4000 level courses).

Note: a maximum of 15 credit hours of Biological Sciences and Microbiology courses at the 2000 level are permitted in the Integrative Theme for use toward the 3000/4000 level requirements of the degree.

4.3.5 B. Sc. General Degree: Biological Sciences

4.3.5 B.Sc. General Degree: Biological Sciences,

Courses taken as part of a General degree program provide an introduction to the major fields of study in the Biological Sciences. Commencing in Fall Term 2009, students will have two options for the General Degree under the Department of Biological Sciences.

Option A: 18 credit hours of 2000, 3000, and (or) 4000 level Biological Sciences courses (subject to the Faculty requirement that of the 36 credit hours in the two chosen advanced level Science areas, at least 6 credit hours must be at the 3000/4000 level);

Option B: Students may choose 36 credit hours from the Biological Sciences provided they select the following courses: each of BIOL 2300, BIOL 2500, BIOL 2520; one of BIOL 2200 or BIOL 2210; one of BIOL 2240, BIOL 2242, or BIOL 2260; plus 21 additional credit hours (2000 level or higher) from the Biological Sciences including at least a minimum of 6 credit hours at the 3000 or 4000 level.

Students anticipating a transfer to either the four year Major or Honours program at the end of their second or third year should consult with the Departmental Program Advisor before registering.

The charts indicate one possible arrangement of the 120 credit hours that make up the degree and are meant to be a guide around which students can plan their programs with a view to satisfying the prerequisites of the required courses. These 120 credit hours are a combination of the courses outlined in the charts above and elective courses chosen by the student in consultation with the program advisors.

3. For the Integrative Biology Theme only, a maximum of 15 credit hours of 2000 level Microbiology and Biological Sciences courses may be used towards the 30 hours of 3000/4000 level requirements.

4. Courses from other departments or faculties may be acceptable for use towards the 30 credit hours of 3000/4000 level Biological Sciences courses required in the Honours and Major Degree programs. Please consult with the department for permission to use alternate courses.

5. Students should confirm the new regulations of the B.Sc. General Degree with a Faculty of Science Student Advisor if they wish to choose 36 hours of advanced level study from the Department of Biological Sciences.

6. BIOL 3100 is a required course in the Biological Sciences Major Co-op programs.

(The number 6 in brackets indicates a six credit hour course.)

4.3.7 Biological Sciences Course Descriptions-1000 Level

BIOL 1000 Biology: Foundations of Life (Formerly 071.100) A course in unifying principles of biology including cell biology, bioenergetics, cell division, genetics and evolution. May not be used for credit in a Major or Honours program in the Biological Sciences. Not to be held with BIOL 1001, BIOL 1020, BIOL 1021, the former 071.125, or 071.201. Prerequisite: Any grade 12 or 40S Mathematics course (50%), or equivalent.

BIOL 1001 Biologie : Les fondements de la vie (Ancien 071.100) Étude de certains principes unificateurs de la vie. Attention particulière à la biologie cellulaire, à la bioénergétique, à la division cellulaire, à la génétique et à l'évolution. Ne peut être utilisé dans un programme de majeure ou de spécialisation. On ne peut se faire créditer BIOL 1001 et BIOL 1000 (071.100) et BIOL 1020 ou BIOL 1021 (071.125, 071.201). Préalable : Mathématiques 40S ou le cours Mathematic Skills (50%) enseigné par la Division de l'éducation permanente. Donné seulement au Collège universitaire de Saint-Boniface.

BIOL 1010 Biology: Biological Diversity and Interaction (Formerly 071.101) An introduction to biological diversity including prokaryotes, protists, fungi, plants and animals; the form and function of plants and animals and basic concepts of ecology. May not be used for credit in a Major or Honours program in the Biological Sciences. Not to be held with BIOL 1011, BIOL 1030, BIOL 1031, the former 071.125, or 071.201. Prerequisite: Any grade 12 or 40S Mathematics course (50%), or equivalent.

BIOL 1011 Biologie : La diversité biologique et ses interactions (Ancien 071.101) Introduction à la diversité (les procaryotes, les protistes, les champignons, les plantes et les animaux), à la forme et à la fonction des plantes et des animaux ainsi qu'aux principaux concepts de l'écologie. Ne peut être utilisé dans un programme de majeure ou de spécialisation. On ne peut se faire créditer BIOL 1011 et BIOL 1010 (071.101) et BIOL 1030 ou BIOL 1031 (071.125, 071.201). Préalable : Mathématiques 40S ou le cours Mathematic Skills (50%) enseigné par la Division de l'éducation permanente. Donné seulement au Collège universitaire de Saint-Boniface.

BIOL 1020 Biology 1: Principles and Themes (Lab Required) A laboratory-based course in unifying principles of biology including cell biology, bioenergetics, cell division, genetics and evolution. This course is intended for major and honours students in the Biological Sciences. Not to be held with BIOL 1021, BIOL 1000, BIOL 1001 (071.100), BIOE 2590 (034.259), or the former 071.125, 071.123 or 071.201. Prerequisite: Biology 40S (or equivalent) and any 40S Mathematics (or equivalent) and one of 40S Chemistry or 40S Physics (or equivalent); or BIOL 1000 (C). Students who complete BIOL 1000 as the prerequisite for BIOL 1020 will not be allowed to use both BIOL 1000 and BIOL 1020 towards their degree program as the two courses may not be held for credit with one another.

BIOL 1021 Biologie I: Thèmes et Principes (Labo requis) (Ancien 071.102) Les principes unificateurs à la base de la biologie dont la biologie cellulaire, la bioénergétique, la division cellulaire, la génétique et l'évolution. Pour ceux et celles qui veulent suivre un programme de sciences biologiques avec majeure ou spécialisation. On ne peut se faire créditer BIOL 1021 et BIOL 1020 et BIOL 1001, BIOL 1000 (071.100) ou BIOE 2590 (034.259) ou 071.125, 071.123, 071.201. Préalables: Biologie 40S (ou BIOL 1001 ou BIOL 1000 avec une note minimale de C) et Mathématique 40S et un des deux cours suivants : Chimie 40S ou Physique 40S. Si le BIOL 1001 sert de préalable au BIOL 1021, on ne peut se faire créditer le BIOL 1001 et le BIOL 1021 dans le cadre d'un programme. Donné seulement au Collège universitaire de Saint-Boniface.

BIOL 1030 Biology 2: Biological Diversity, Function and Interactions (Lab Required) A laboratory-based course introducing biological diversity including prokaryotes, protists, fungi, plants and animals; the form and function of plants and animals and basic concepts of ecology. This course is intended for major and honours students in the Biological Sciences. Not to be held with BIOL 1031, BIOL 1010 or BIOL 1011 (071.101), BIOE 2590 (034.259), or the former 071.125, 071.123 or 071.201. Prerequisite: BIOL 1020 or BIOL 1021 (C). NOTE: BIOL 1030 is a prerequisite to further courses in Microbiology and to most courses in Biological Sciences. It is also intended for students proceeding to Agricultural and Food Sciences, Dentistry, Human Ecology, Medicine, Optometry, Pharmacy, Veterinary Science, Physical Education and Science.

BIOL 1031 Biologie II: Diversité Biologique, Fonction et Interaction (Labo requis) Introduction à la biodiversité dont les eucaryotes, les protistes, les champignons, les plantes et les animaux, la forme et la fonction des plantes et des animaux et les principes de base de l'écologie. Pour ceux et celles qui veulent suivre un programme de sciences biologiques avec majeure ou spécialisation. On ne peut se faire créditer BIOL 1031 et BIOL 1030 et BIOL 1011, BIOL 1000 (071.101) ou BIOE 2590 (034.259) ou 071.125, 071.123, 071.201. Préalable : une note minimale

de C dans BIOL 1021 ou BIOL 1020. NOTE : BIOL 1031 est préalable au cours de biochimie (CHEM 2361) et aux cours plus avancés de microbiologie, et à la plupart des cours de sciences biologiques. Il prépare aussi aux études en agriculture, en sciences alimentaires, en dentisterie, en écologie humaine, en médecine, en optométrie, en pharmacie, en sciences vétérinaires, en éducation physique et en sciences. Donné seulement au Collège universitaire de Saint-Boniface.

BIOL 1110 Health and Health Professions (Formerly 071.111) Students discuss the inter-relationship between health, health determinants, and the impact that science, health-science, behavioural-social sciences, and technology, have on health care and the health professions. Participants will consider their own role as health care consumers. Open only to students who have completed less than six credit hours. For further information contact University 1.

BIOL 1300 Economic Plants (Formerly BOTN 1010, 001.101) A survey of economically important plants and their products. The history of plant use, plants in folklore and medicine, fermentation and viticulture, domestication of plants, and forestry are the major topics covered. Chemical, structural, and nutritional aspects of plant products are also discussed. Not to be held with the former 001.206 or 001.233.

BIOL 1340 The State of the Earth's Environment: Contemporary Issues (Formerly 071.134) A presentation of contemporary environmental issues focusing on the scientific basis of problems caused by the growth of human population, use and depletion of resources, pollution, and damage to the environment. The current state of our knowledge bases will be discussed, along with improvements in them that may be necessary. The course will consider needs for action, priorities, and opportunities. May not be used to meet a program requirement of an Honours or Major program in the Biological Sciences. Not to be held with ENVR 1000 (128.100).

BIOL 1410 Anatomy of the Human Body (Lab Required) (Formerly ZOO 1320, 022.132) Microanatomy and gross anatomy discussed including changes occurring from conception to old age. Although this course may be used as an elective in an Arts or Science program, it may not be used to meet a program requirement of an Honours or Major program in the Biological Sciences. No prerequisite. High school Biology strongly recommended.

BIOL 1411 Anatomie du corps humain Discussions sur la micro-anatomie et la macro-anatomie incluant les changements qui se produisent de la conception à la vieillesse. Bien que ce cours fasse partie des cours au choix dans un programme en arts ou en sciences, il ne peut rencontrer les exigences de la spécialisation ni du programme de majeure en sciences biologiques. Aucun préalable n'est requis pour ce cours mais le cours de biologie du niveau secondaire est vivement recommandé. On ne peut se faire créditer BIOL 1411 et BIOL 1410. Donné seulement au Collège universitaire de Saint-Boniface.

BIOL 1412 Physiology of the Human Body (Lab Required) (Formerly ZOO 1330, 022.133) Function of all systems discussed with homeostatic regulatory mechanisms as foundation themes. Although this course may be used as an elective in an Arts or Science program, it may not be used to meet a program requirement of an Honours or Major program in the Biological Sciences. Not available to students who have previously obtained credit in, or are currently registered in both of BIOL 2410 (or equivalent - ZOO 2530, BIOL 2411, ZOO 2531, 022.253) and BIOL 2420 (or equivalent - ZOO 2540, BIOL 2421, ZOO 2541, 022.254). Prerequisite: BIOL 1410 (ZOO 1320, 022.132) (C); or one of BIOL 1030, BIOL 1031, or the former 071.125 (C). This prerequisite is waived for students in the Baccalaureate Program for Registered Nurses.

BIOL 1413 Physiologie de corps humain (ancien ZOO 1331, 002.133) L'étude des fonctions de tous les systèmes ainsi que les mécanismes de normalisation homéostatique feront partis des thèmes de base étudiés. Bien que ce cours fasse partie des cours au choix dans un programme en arts ou en sciences, il ne peut rencontrer les exigences de la spécialisation ni du programme de majeure en sciences biologiques. On ne peut se faire créditer BIOL 1413 et BIOL 1412, BIOL 2411 (ou équivalent-ZOO 2530, BIOL 2410, ZOO 2531, 002.254) Préalable: Une note minimale de C dans BIOL 1410 ou 1411 (ZOO 1320, 002.132)(C); ou une note minimale de C dans BIOL 1030 ou BIOL 1031 ou l'ancien 071.125 (C). Ce préalable ne concerne pas les étudiantes et étudiants dans le programme de Baccalauréat pour les infirmières enregistrées et infirmiers

enregistrés.

4.3.7 Biological Sciences Course Descriptions-2000 Level

BIOL 2200 The Invertebrates

(Lab Required) (Formerly ZOO 2600, 022.260) Biology and phylogeny of invertebrates. Emphasis on common taxa and on those groups of particular phylogenetic significance. Not to be held with BIOL 2201 (ZOO 2601). Prerequisite: one of BIOL 1030, BIOL 1031, or the former 071.125 (C).

BIOL 2201 Les invertébrés

(Labo requis) (Anciens ZOO 2601 et 022.260) Étude phylogénétique et biologique des invertébrés insistant sur les taxa et les groupes qui ont une importance phylogénétique particulière. On ne peut se faire créditer BIOL 2201 et BIOL 2200 (ZOO 2601, ZOO 2600, 022.260). Préalable : une note minimale de C dans BIOL 1031 ou BIOL 1030 (071.125). Donné seulement au Collège universitaire de Saint-Boniface.

BIOL 2210 The Chordates

(Lab Required) (Formerly ZOO 2320, 022.232) A study of the origin, evolutionary history and structure of the major groups of Chordates. Provides the foundation for more specialized courses such as Biology of Fishes, Ornithology, and Systematics and Biogeography of Fishes. Not to be held with BIOL 2231 (ZOO 2501, 022.250). Prerequisite: one of BIOL 1030, BIOL 1031, or the former 071.125 (C).

BIOL 2231 L'évolution et la structure morphologique des chordés

(Labo requis) (Anciens ZOO 2501 et 022.250) Étude de l'histoire évolutive de la structure et des adaptations des chordés basée sur les animaux fossilisés et sur les animaux vivants. Établissement des bases pour l'étude des groupes majeurs de chordés. On ne peut se faire créditer BIOL 2231 et BIOL 2210 et ZOO 2501 (022.250) ou ZOO 2320 (022.232). Préalable : une note minimale de C dans BIOL 1031 ou BIOL 1030 (071.125). Donné seulement au Collège universitaire de Saint-Boniface.

BIOL 2240 The Non-Flowering Plants

(Lab Required) (Formerly BOTN 2110, 001.211) An introduction to the mosses and liverworts, ferns and their allies, and conifers, specifically treating their structure, reproduction, identification and ecological significance. Not to be held with the former BOTN 2110, 001.211. Prerequisite: one of BIOL 1030, BIOL 1031, or the former 071.125 (C).

BIOL 2242 The Flowering Plants

(Lab Required) (Formerly BOTN 2010, 001.201) A study of the structure and function of the flowering plants. Lecture topics are supplemented by laboratory exercises that focus on the anatomy and morphology of roots, stems, leaves and reproductive organs. Not to be held with the former 001.230. Prerequisite: one of BIOL 1010 (071.101) (B), BIOL 1011 (B), BIOL 1030 (C), BIOL 1031 (C), or the former 071.125 (C).

BIOL 2260 Biology of Fungi and Lichens

(Lab Required) (Formerly BOTN 2210, 001.221) An introduction to the fungi, both free living and lichenized, with emphasis on the major taxonomic groupings, their organization and structure, their life histories, identification and general economic significance. Not to be held with BIOL 2261 or the former 001.321. Prerequisite: one of BIOL 1010 (071.101) (B), BIOL 1011 (B), the former 071.123 (B), BIOL 1030 (C), BIOL 1031 (C), or the former 071.125 (C).

BIOL 2261 Les champignons et les lichens

(Labo requis) Une introduction aux champignons et aux lichens. L'accent est mis sur les groupes taxinomiques majeurs, leur organisation et leurs structures, leurs cycles de vie, leur identification et leur importance écologique générale. On ne peut se faire créditer BIOL 2261 et BIOL 2260 et BOTN 2210 ou 001.321. Préalables : BIOL 1011 ou BIOL 1010 (071.101) ou 71.123 avec une note minimale de B; ou BIOL 1031 ou BIOL 1030 (071.125) avec une note minimale de C. Donné seulement au Collège universitaire de Saint-Boniface.

BIOL 2262 Biology of Algae

(Lab Required) (Formerly BOTN 2290, 001.229, BIOL 3260) Lectures and laboratories dealing with the cellular features of major groups of algae and their phylogenetic and adaptive significance. The basics of algal taxonomy are also covered. Not to be held with the former courses BIOL 3260, 001.323, or 001.341.

Prerequisite: One of BIOL 1030, BIOL 1031, or the former 071.125 (C).

BIOL 2300 Principles of Ecology

(Lab Required) (Formerly BOTN 2370, 001.237, ZOO 2370, 022.237) Principles of ecology at the individual, population, community, and ecosystems levels. This course is also offered as AGEC 2370. It is the normal prerequisite to other courses in ecology. Not to be held with BIOL 2301 (BOTN 2371, ZOO 2371), BIOL 2390 (BOTN 2280, 001.228, ZOO 2290, 022.229), AGEC 2370 (065.237). Prerequisite: one of BIOL 1030, BIOL 1031, or the former 071.125 (C). Prerequisite or concurrent requirement: STAT 1000 or STAT 1001 (005.100) (D).

BIOL 2301 Principes D'écologie

(Labo requis) (Anciens BOTN 2371, ZOO 2371, 001.237 et 022.237) Principes d'écologie au niveau de l'individu, de la population, de la communauté et de l'écosystème. Également offert à la Faculté de sciences de l'agriculture et de nutrition de l'Université du Manitoba sous la cote AGEC 2370. On ne peut se faire créditer BIOL 2301 et BIOL 2300 (ZOO 2371, ZOO 2370, 022.237, BOTN 2371, BOTN 2370, 001.237) et AGEC 2370 (065.237) ou BIOL 2390 (ZOO 2290, 022.229, BOTN 2280, 001.228). Préalable : une note minimale de C dans BIOL 1031 ou BIOL 1030 (071.125). Préalable ou concomitant : une note minimale de D dans STAT 1001 ou STAT 1000 (005.100). Donné seulement au Collège universitaire de Saint-Boniface.

BIOL 2380 Introductory Toxicology

(Formerly BOTN 2180, 001.218, ZOO 2180, 022.218) A survey of general principles underlying the effects of toxic substances on biological systems, including consideration of the history, scope and applications of toxicology, the mechanisms of toxic action, and some major types of toxicants. This course is also taught in Environmental Science as ENVR 2180 (128.218), and in Agriculture as AGRI 2180 (065.218). Not to be held with BIOL 2381, BIOL 2382 (BOTN 2190, ZOO 2190, 001.219, 022.219), ENVR 2190 (128.219), or AGRI 2190 (065.219). Prerequisites: one of BIOL 1030, BIOL 1031, or the former 071.125 (C); and one of CHEM 1310, CHEM 1311 (002.131), or CHEM 1320 (002.132) (C).

BIOL 2381 Introduction à la Toxicologie

Un survol des principes généraux à la base des effets des substances toxiques sur les systèmes biologiques, tout en prenant en considération l'histoire, l'étendue et les applications de la toxicologie, les mécanismes d'action des toxines et certains types majeurs de toxines. On ne peut se faire créditer le BIOL 2381 et BIOL 2380 et BIOL 2382 (BOTN 2190, ZOO 2190, 001.219, 022.219), ENVR 2190 (128.219) ou AGRI 2190 (065.219). Préalables: une note minimale de C dans BIOL 1031 ou BIOL 1030 (071.125) et un de CHEM 1311 ou CHEM 1310 (002.131) ou CHEM 1320 (002.132) avec une note minimale de C. Donné seulement au Collège universitaire de Saint-Boniface.

BIOL 2390 Introductory Ecology

(Formerly BOTN 2280, 001.228, ZOO 2290, 022.229) The course involves a study of the interrelationships of living organisms (including human) with each other and with their environment. It is not normally acceptable as a prerequisite to other courses in ecology. Not to be held with BIOL 2300 (BOTN 2370, ZOO 2370, 001.237, 022.237), BIOL 2301 (BOTN 2371, ZOO 2371), or AGEC 2370 (065.237). Prerequisite: one of BIOL 1010, BIOL 1030, BIOL 1031, or the former 071.125 (C).

BIOL 2410 Human Physiology 1

(Formerly ZOO 2530, 022.253) The mechanisms of action of the body's major control systems (nervous and endocrine) and of the muscular and reproductive systems are examined. Not to be held with BIOL 2411 (ZOO 2531) or BIOL 3460 (ZOO 3530, 022.353). Prerequisite: a "C" or better in one of BIOL 1030, BIOL 1031, the former 071.125, or BIOL 1412 (ZOO 1330, 022.133); or a "C+" or better in both BIOL 1000 (or equivalent - BIOL 1001, 071.100) and BIOL 1010 (or equivalent - BIOL 1011, 071.101).

BIOL 2411 Physiologie du corps humain 1

(Anciens ZOO 2531 et 022.253) Étude des principaux mécanismes de contrôle du corps (systèmes nerveux et endocrinien) ainsi que des systèmes musculaire et reproducteur. On ne peut se faire créditer BIOL 2411 et BIOL 2410 (ZOO 2531, ZOO 2530, 022.253) et BIOL 3460 (ZOO 3530, 022.353). Préalable : une note minimale de C dans BIOL 1031 ou BIOL 1030 (071.125) ou une note minimale de C+ dans BIOL 1001 ou BIOL 1000 (071.100) et BIOL 1011 ou BIOL 1010 (071.101), ou une note minimale de C dans BIOL 1412 (ZOO 1330, 022.133).

Donné seulement au Collège universitaire de Saint-Boniface.

BIOL 2420 Human Physiology 2

(Formerly ZOO 2540, 022.254) An examination of homeostatic regulation by the body's major effector organ systems (cardiovascular, respiratory, digestive, renal, and immune). Not to be held with BIOL 2421 (ZOO 2541). Prerequisite: Completion of BIOL 2410 (ZOO 2530, 022.253) (D), or BIOL 2411 (ZOO 2531), or BIOL 3460 (ZOO 3530, 022.353) (D); or consent of department.

BIOL 2421 Physiologie du corps humain II

(Anciens ZOO 2541 et 022.254) Étude de la régulation homéostatique par les systèmes effecteurs du corps (cardiovasculaire, respiratoire, digestif, rénal et immunitaire). On ne peut se faire créditer BIOL 2421 et BIOL 2420 (ZOO 2541, 022.254). Préalable : une note minimale de D dans BIOL 2411 ou BIOL 2410 (ZOO 2531, ZOO 2530, 022.253) ou un D dans BIOL 3460 (ZOO 3530, 022.353) ou l'autorisation écrite de la professeure ou du professeur. Donné seulement au Collège universitaire de Saint-Boniface.

BIOL 2440 Human Reproductive Physiology

(Formerly ZOO 2140, 022.214) This course provides an in-depth understanding of human reproduction with particular emphasis on intrinsic control mechanisms and extrinsic methods of regulation of reproduction. This course also provides the basis for the understanding of alterations from normal mechanisms of reproductive processes. Prerequisites: BIOL 1410 (ZOO 1320, 022.132) (C) and BIOL 1412 (ZOO 1330, 022.133) (C); or consent of department. Check with the Department of Biological Sciences for course availability.

BIOL 2500 Genetics 1

(Lab Required) (Formerly BOTN 2460, 001.246) Principles of heredity, gametogenesis and the cytological basis of inheritance in plants and animals. The concepts of dominance and genetic interaction, sex and inheritance, linkage, chromosomal variations, quantitative and population genetics, the genetic code. Not to be held with BIOL 2501 (BOTN 2461), or PLNT 2520 (039.252). Prerequisite: one of BIOL 1030, BIOL 1031, or the former 071.125 (C).

BIOL 2501 Génétique I

(Labo requis) (Anciens BOTN 2461 et 001.246) Principes de l'hérédité, de la gamétogénèse et des fondements cytologiques de la transmission héréditaire chez les plantes et les animaux. Concepts de dominance et d'interaction génétique, de détermination du sexe, de la transmission des caractères liés au sexe et des gènes liés, variations chromosomiques, génétique des populations et code génétique. On ne peut se faire créditer BIOL 2501 et BIOL 2500 (BOTN 2461, BOTN 2460, 001.246) ou PLNT 2520 (039.252). Préalable : une note minimale de C dans BIOL 1031 ou BIOL 1030 (071.125). NOTE : Ce cours ne peut pas être reconnu en microbiologie (MBIO). Donné seulement au Collège universitaire de Saint-Boniface.

BIOL 2520 Cell Biology

(Formerly ZOO 2280, 022.228) The microscopic and submicroscopic aspects of cellular structure and function are considered with emphasis on the living cell as a dynamic system. Not to be held with BIOL 2521 (ZOO 2281). Prerequisite: one of BIOL 1030, BIOL 1031, or the former 071.125 (C).

BIOL 2521 Biologie cellulaire

(Anciens ZOO 2281 et 022.228) Étude de la fonction des organites cellulaires conjointement avec leur structure microscopique ou leur ultrastructure, en insistant sur l'ensemble de la vie cellulaire en tant que système dynamique. On ne peut se faire créditer BIOL 2521 et BIOL 2520 (ZOO 2281, ZOO 2280, 022.228). Préalable : une note minimale de C dans BIOL 1031 ou BIOL 1030 (071.125). Donné seulement au Collège universitaire de Saint-Boniface.

BIOL 2540 Developmental Biology

(Formerly ZOO 2150, 022.215) Principles and concepts of developmental biology including gametogenesis, fertilization, early and late development. Cellular, tissue and molecular aspects will be presented utilizing both invertebrate and vertebrate examples. Prerequisite: One of BIOL 1030, BIOL 1031, or the former 071.125 (C).

4.3.7 Biological Sciences Course Descriptions-3000 Level

BIOL 3100 Skills in Biological Sciences

This course will introduce students to the concepts and skills necessary to succeed in a Biology-based career, including: communication skills (scientific writing and oral presentations), critical thinking, strategies for employment and graduate training, Undergraduate Studies

familiarization with the range of biological research, and exposure to a variety of Biology-based careers. This course may not be held with the former BOTN 3570 (001.357) or ZOO 3750 (022.375). Prerequisite: This course is restricted to Honours and Major students in the Biological Sciences.

BIOL 3200 Advanced Invertebrate Biology

(Lab Required) (Formerly ZOO 3610, 022.361) Topics of current interest to be presented in lecture series given by staff. Students may undertake approved projects and may present reports and seminars. Prerequisite: BIOL 2200 (ZOO 2600, 022.260) or BIOL 2201 (ZOO 2601) (C).

BIOL 3242 Vascular Flora of Manitoba

(Lab Required) (Formerly BOTN 3070, 001.307) A survey of the vascular plants of Manitoba emphasizing identification, nomenclature and classification, and including brief accounts of the distribution and post-glacial history of the main floristic associations within the province. Students must submit a collection of at least 20 different vascular plants identified to species. A guide to the collection should be obtained from the Botany department office in the Spring/Summer prior to commencing the course. Prerequisite: BIOL 1010 (or equivalent - BIOL 1011, 071.101) (B); or one of BIOL 1030, BIOL 1031 or the former 071.125 (C).

BIOL 3250 Lichens and Bryophytes

(Lab Required) The biology, evolution, and ecology of lichens and bryophytes. Emphasis is placed on the role of lichens and bryophytes in the ecosystem, gene flow, animal interactions, co-evolution, secondary compounds, and species identification. Not to be held with BIOL 3240 (BOTN 3260, 001.326) or BIOL 4246 (BOTN 4050, 001.405). Prerequisite: BIOL 1030 or BIOL 1031 or the former 071.125 (C).

BIOL 3270 Introductory Parasitology

(Lab Required) (Formerly ZOO 3460, 022.346) General course covering major parasitic phyla: namely, Protozoa, Platyhelminthes, Aschelminthes, Acanthocephala, and Arthropoda. Emphasis will be on principles of parasitology. Prerequisite or concurrent requirement: BIOL 2200 (ZOO 2600, 022.260) (C), or BIOL 2201 (ZOO 2601), or consent of department.

BIOL 3280 Forest Botany

(Formerly BOTN 3270, 001.327) An examination of the structure and dynamics of plant communities in forested ecosystems. Topics include forest type classification, physiological and anatomical responses of representative forest species, decomposition and nutrient cycling, disturbance and forest succession. Not to be held with the former 001.402. Prerequisites: BIOL 2242 (BOTN 2010, 001.201) (C); and one of BIOL 2300 (BOTN 2370, 001.237, ZOO 2370, 022.237), BIOL 2301 (BOTN 2371, ZOO 2371) or AGE 2370 (065.237) (C); or consent of the department.

BIOL 3290 Medicinal and Hallucinogenic Plants

(Formerly BOTN 3280, 001.328) A botanical and historical survey of medicinal, hallucinogenic and poisonous plants used in various cultures. Not to be held with BIOL 3291. Prerequisite: a minimum of 30 hours of university credit, or consent of department.

BIOL 3291 Plantes médicinales et hallucinogènes

Un survol botanique et historique des plantes médicinales, hallucinogènes et toxiques utilisées dans diverses cultures. Préalables: Minimum de 30 heures crédits universitaires ou le consentement du Département. Donné seulement au Collège universitaire de Saint-Boniface.

BIOL 3300 Evolutionary Biology

(Lab Required) (Formerly BOTN 3000, ZOO 3000) Evolution is the ultimate cause of biological diversity. This course introduces the major questions and research methods in evolutionary biology. Topics include evolutionary genetics, adaptation, speciation, and the reconstruction of evolutionary history. Not to be held with the former 022.400. Prerequisites: a "C" or better in one of BIOL 2500 (BOTN 2460, 001.246), BIOL 2501 (BOTN 2461), or PLNT 2520 (039.252); and any one of the following with a minimum grade of "C": BIOL 2200 (ZOO 2600, 022.260), BIOL 2210 (ZOO 2320, 022.232), BIOL 2231 (ZOO 2501, 022.250F), BIOL 2240 (BOTN 2110, 001.211), BIOL 2260 (BOTN 2210, 001.221), BIOL 2261, BIOL 3260 (BOTN 2290, 001.229); or consent of department.

BIOL 3301 Biologie évolutive

(Labo requis) (Ancien BOTN 3001 ou ZOO 3001) Introduction aux sujets

principaux et aux méthodes de recherche en biologie évolutive. Les sujets incluent : génétique évolutive, adaptation, spéciation et reconstruction de l'histoire de l'évolution. On ne peut se faire créditer BIOL 3301 et BIOL 3300 (ZOO 3001, ZOO 3000, BOTN 3001, BOTN 3000, 022.400). Préalables: une note minimale de C dans BIOL 2501 ou BIOL 2500 (BOTN 2461, BOTN 2460, 001.246) ou PLNT 2520 (039.252) et un cours parmi les suivants (avec une note minimale de C) : BIOL 2240 (BOTN 2110, 001.211), BIOL 2261 ou BIOL 2260 (BOTN 2210, 001.221), BIOL 3260 (BOTN 2290, 001.229), BIOL 2210 (ZOO 2320, 022.232), BIOL 2231 (ZOO 2501, 022.250), BIOL 2201 ou BIOL 2200 (ZOO 2601, ZOO 2600, 022.260), ou l'autorisation du professeur ou de la professeure. Donné seulement au Collège universitaire de Saint-Boniface.

BIOL 3310 Foundations of Population Ecology
(Lab Required) (Formerly ZOO 3680) The study of living populations, through experimentation and theory, will be examined. Topics investigated will include population regulation, competition, predation, disease, harvest, nonlinear and spatial dynamics and individual based models. Concepts and methods are reinforced through tutorials and evaluated by assignments and examinations. Not to be held with the former 022.348. Prerequisites: a "C" or better in one of BIOL 2300 (BOTN 2370, ZOO 2370, 001.237, 022.237), BIOL 2301 (BOTN 2371, ZOO 2371) or AGECE 2370 (065.237); and STAT 2000 or STAT 2001 (005.200) (C); or consent of department.

BIOL 3312 Community Ecology
(Formerly BOTN 3540, 001.354) Lectures and laboratories emphasizing the structure and function of terrestrial biotic communities with emphasis upon selected Manitoba situations. Prerequisite: a C or better in one of BIOL 2300 (BOTN 2370, ZOO 2370, 001.237, 022.237), BIOL 2301 (BOTN 2371, ZOO 2371) or AGECE 2370 (065.237); or consent of department.

BIOL 3314 Field Ecology
(Formerly BOTN 3420, 001.342, ZOO 3450, 022.345) Problems, techniques and assumptions involved in measuring parameters of biological populations and environmental variables. A field trip will be held prior to the start of classes. Students must register in the department office by August 5. Prerequisites: a "C" or better in one of BIOL 2300 (BOTN 2370, ZOO 2370, 001.237, 022.237), BIOL 2301 (BOTN 2371, ZOO 2371) or AGECE 2370 (065.237); and STAT 2000 or STAT 2001 (005.200) (D).

BIOL 3318 Boreal Ecology
(Formerly ZOO 3380, 022.338) A survey of ecological factors in the formation, evolution, and survival of northern biota including northern peoples. There will be optional weekend field trips. Prerequisite: a "C" or better in one of BIOL 2300 (BOTN 2370, ZOO 2370, 001.237, 022.237), BIOL 2301 (BOTN 2371, ZOO 2371) or AGECE 2370 (065.237); or BIOL 2390 (ZOO 2290, 022.229, BOTN 2280, 001.228) (C); or consent of department.

BIOL 3340 Biology of Primitive Fungi and Allies
(Lab Required) Studies on the Biology of primitive fungi and slime moulds including their evolution, life histories, development, structure, taxonomy, biochemistry, and importance to humans. Environmental collection, baiting, isolation and axenic culturing stressed in laboratories. Prerequisite: BIOL 1010 (B); or BIOL 1030 (BIOL 1031) (C).

BIOL 3350 Methods of Data Collection and Analysis in Ecology
This course will consider methods of collection and analysis of ecological data, emphasizing experimental design of ecological studies, sampling, analysis of ecological data sets, and presentation techniques. This course may not be held for credit with BIOL 4320 (ZOO 4200, 022.420). Prerequisites: BIOL 2300 (C) and STAT 2000 or STAT 2001 (D); or consent of department.

BIOL 3360 Animal Behaviour
(Lab Required) (Formerly ZOO 3100, 022.310) An introduction to the study of animal behaviour including key concepts from the parent disciplines of ethology and comparative psychology, the genetic and physiological bases of behaviours, and evolutionary aspects introducing optimality and game theoretical models characteristic of modern behavioural ecology. Laboratory work involves the design and execution of a behavioural project at the Assiniboine Park Zoo. Not to be held with the former 022.343. Prerequisites: a "C" or better in one of BIOL 2300 (BOTN 2370, ZOO 2370, 001.237, 022.237), BIOL 2301 (BOTN 2371, ZOO 2371) or AGECE 2370 (065.237); and BIOL 2210 (ZOO 2320, 022.232) (C); or consent of

department.

BIOL 3370 Limnology
(Lab Required) (Formerly ZOO 3500, 022.350) Lectures and laboratories providing an introduction to the physics, chemistry and biology of lakes. Prerequisite: a "C" or better in one of BIOL 2300 (BOTN 2370, ZOO 2370, 001.237, 022.237), BIOL 2301 (BOTN 2371, ZOO 2371) or AGECE 2370 (065.237).

BIOL 3372 Wetland Ecology
(Formerly BOTN 3580, 001.358, ZOO 3580, 022.358) Lectures and field exercises examine the biotic (algae, macrophytes, invertebrates, and vertebrates) and abiotic (hydrology, nutrient cycling) properties of Delta Marsh, a prairie lakeshore wetland. Other wetland types, including peatlands, will also be considered in lectures and field trips. The course is offered in Summer Session at the university Field Station (Delta Marsh). Prerequisite: a C or better in one of BIOL 2300 (BOTN 2370, ZOO 2370, 001.237, 022.237), BIOL 2301 (BOTN 2371, ZOO 2371) or AGECE 2370 (065.237); or consent of department.

BIOL 3450 Plant Physiology
(Lab Required) (Formerly BOTN 2020, 001.202) A study of the function of the flowering plants. The focus will be on photosynthesis, plant water relations, plant nutrition, and the role of hormonal and extrinsic factors in the regulation of plant development. Not to be held with PLNT 3500 or the former 001.230. Prerequisite: BIOL 2242 (BOTN 2010, 001.201) (C).

BIOL 3452 Environmental Plant Physiology
(Lab Required) (Formerly BOTN 3010, 001.301) An integrated study of the major physiological processes in higher plants, and how these processes influence growth and development of plants in natural ecosystems. Stress responses of plants to water, light and nutrients will be emphasized. Not to be held with PLNT 3500 (039.350), 001.317, or 001.467. Prerequisite: BIOL 3450 (BOTN 2020, 001.202) (C); and CHEM 1310 or CHEM 1311 (002.131) (C).

BIOL 3470 Environmental Physiology of Animals 1
(Lab required) This course is intended to acquaint students with some of the major environmental challenges encountered by animals and stresses the diversity of physiological solutions to these problems in aquatic and terrestrial organisms. Areas covered may include thermal biology, circulation, gas exchange and buoyancy regulation. Laboratories explore related subjects in various animals. This course may not be held for credit with the former BIOL 3462, ZOO 3540 (022.354). Prerequisite: BIOL 2200 (C) or BIOL 2210 (C); or consent of department.

BIOL 3472 Environmental Physiology of Animals 2
(Lab Required) This course is intended to acquaint students with the control and integration of organ systems and body functions of animals, and their biochemical and physiological adaptations to environmental perturbations. Areas covered may include neuroendocrinology, excretion, and water, salt, and acid-base balance. Laboratories explore related subjects in various animals. This course may not be held for credit with BIOL 3460, or the former ZOO 3530, or the former 022.353. Prerequisites: BIOL 2200 (C) or BIOL 2210 (C) or consent of department.

BIOL 3500 Genetics 2
(Lab Required) (Formerly BOTN 3460, 001.346) The course complements Genetics I (BIOL 2500, BOTN 2460, 001.246, BIOL 2501, BOTN 2461) and deals with various aspects of linkage and crossing over, gene function, allelism, mutation and repair, the use of bacteria and viruses as genetic tools, basics of developmental genetics and extra-nuclear inheritance. Not to be held with BIOL 3501. Prerequisite: BIOL 2500 (BOTN 2460, 001.246) (C), or BIOL 2501 (BOTN 2461) or PLNT 2520 (039.252 or 039.209) (C). Prerequisite or concurrent requirement: One of CHEM 2370, CHEM 2371 (002.237), MBIO 2370, MBIO 2371 (060.237), CHEM 2780 (002.278), or MBIO 2780 (060.278); or consent of department.

BIOL 3501 Génétique 2
(Labo requis) Ce cours est le complément du cours d'introduction à la génétique BIOL 2501 (ou BOTN 2461, BOTN 2460, 001.246) et présente les divers aspects de la liaison génique et la recombinaison génique, la fonction des gènes, l'allélisme, les mutations et la réparation, l'utilisation des bactéries et des virus comme outils génétiques, les bases de la génétique du développement et l'hérédité extranucléaire. Prérequis : une note minimale de C dans un de BIOL 2501 ou BIOL 2500 (BOTN 2461, BOTN 2460, 001.246) ou PLNT 2520 (039.252, 039.209). Préalable ou concomitant : un de CHEM 2371 ou CHEM 2370 (002.237), MBIO 2371 ou MBIO

2370 (060.237), CHEM 2780 (002.278) ou MBIOL 2780 (060.278) ou le consentement du département. Donn  seulement au Coll ge universitaire de Saint-Boniface.

BIOL 3540 Advanced Developmental and Cellular Biology (Lab Required) (Formerly ZOO 3070, 022.307) The course focuses on contemporary concepts and approaches in developmental biology, including theoretical and practical aspects. The emphasis is on the laboratory component. Prerequisite: BIOL 2540 (ZOO 2150, 022.215) (C); or consent of department.

BIOL 3550 Plant Anatomy (Lab Required) (Formerly BOTN 3190, 001.319) A study of the anatomical aspects of the growth and development of plants cells, tissues and organs. Laboratory exercises will complement material. Not to be held with the former 001.316 or 001.403. Prerequisite: BIOL 2242 (BOTN 2010, 001.201) (C).

BIOL 3560 Comparative Animal Histology (Lab Required) (Formerly ZOO 3060, 022.306) This course focuses on the cell and tissue organization of animals. Cell morphology and specialization, tissue types and a survey of the cellular and tissue organization of all organ systems are covered. The primary focus is on mammals but comparative aspects of other animal groups are also included. Not to be held with BIOL 3561 (ZOO 3061, 022.347). Prerequisite: One of BIOL 1030, BIOL 1031, or the former 071.125 (C). Recommended prerequisite: one of BIOL 2210 (ZOO 2320, 022.232), BIOL 2231 (ZOO 2501, 022.250), BIOL 2520 (ZOO 2280, 022.228), or BIOL 2521 (ZOO 2281).

BIOL 3561 Histologie Animale Compar e (Labo requis) (Anciens ZOO 3061 et 022.306)  tude de l'organisation cellulaire et tissulaire des animaux, de la morphologie cellulaire, de la sp cialisation, des types de tissus et de l'organisation cellulaire et tissulaire de tous les syst mes. Accent mis sur les mammif res, mais des  tudes comparatives avec d'autres groupes animaux seront aussi incluses. On ne peut se faire cr diter BIOL 3561 et BIOL 3560 (ZOO 3061, ZOO 3060, 022.306, 022.347). Pr alable : une note minimale de C dans BIOL 1031 ou BIOL 1030 (071.125). Pr alable conseill  : un de BIOL 2210 (ZOO 2320, 022.232), BIOL 2231 (ZOO 2501, 022.250), BIOL 2521 ou BIOL 2520 (ZOO 2281, ZOO 2280, 022.228). Donn  seulement au Coll ge universitaire de Saint-Boniface.

BIOL 3600 Biological Diversity and Sustainability Anthropogenic drivers of change of many components of biological diversity; the resulting impacts on ecosystem capacity to provide on-going goods and services that are essential constituents of well-being and ultimately sustainability. Prerequisites: BIOL 2300 (C); or BIOL 1030 (C) and BIOL 2390 (C).

BIOL 3980 Work Term 1 (Formerly ZOO 3980, 022.398, BOTN 3980, 001.398) Work assignment in business, industry, or government for students registered in the Ecology Cooperative Option. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only).

BIOL 3990 Work Term 2 (Formerly ZOO 3990, 022.399, BOTN 3990, 001.399) Work assignment in business, industry, or government for students registered in the Biological Sciences Cooperative Option. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only).

4.3.7 Biological Sciences Course Descriptions-4000 Level

BIOL 4100 Honours Thesis (Formerly BOTN 4600, 001.460, ZOO 4110, 022.411) The student will conduct a research project, chosen in consultation with a Biological Sciences faculty member acting as an advisor, and produce a thesis in which the project, the results and conclusions are presented. The student will defend the thesis at an oral examination held on completion of the thesis. This course is restricted to final year Honours Biological Science students. Not to be taken concurrently with BIOL 4880 (ZOO 4880, 022.488, BOTN 4880, 001.488).

BIOL 4210 Biology of Fishes (Lab Required) (Formerly ZOO 4170, 022.417) Lectures survey organ systems, life history, and the population biology of fishes. The ecological analysis of fish communities is addressed through a field trip and a series of workshops on the analysis of field data. Evaluation is based upon work related to the field trip and Undergraduate Studies

examinations based upon the lecture material. Not to be held with the former 022.467. Prerequisite: BIOL 2210 (ZOO 2320, 022.232) (C) or BIOL 2231 (ZOO 2501, 022.250) (C).

BIOL 4212 Systematics and Biogeography of Fishes (Lab Required) (Formerly ZOO 4220, 022.422) A study of the evolutionary history, interrelationships and distribution patterns of the fish-like vertebrates. Laboratories will cover the identification of the major groups of fish-like vertebrates. Not to be held with the former 022.418 or 022.467. Prerequisite: BIOL 2210 (ZOO 2320, 022.232) (C) or BIOL 2231 (ZOO 2501, 022.250) (C); or consent of department.

BIOL 4214 Biology of Amphibians and Reptiles (Lab Required) (Formerly ZOO 4230, 022.423) Lectures consider the evolution, biology and adaptations of amphibians and reptiles. Laboratories and student presentations will deal with classification, structure, identification, and methods of field and laboratory study of these animals. Not to be held with the former 022.476. Prerequisite: BIOL 2210 (ZOO 2320, 022.232) (C) or BIOL 2231 (ZOO 2501, 022.250) (C); or consent of department.

BIOL 4216 Biology of Birds (Lab Required) (Formerly ZOO 4240, 022.424) Biology of birds including: morphology, systematics, evolution, life histories and breeding biology, ecology, migration, and distribution of birds. Not to be held with the former 022.468. Prerequisite: BIOL 2210 (ZOO 2320, 022.232) (C) or BIOL 2231 (ZOO 2501, 022.250) (C). Prerequisite or concurrent requirement: BIOL 3360 (ZOO 3100).

BIOL 4218 Biology of Mammals (Lab Required) (Formerly ZOO 4250, 022.425) Structure, classification, evolution, life histories and distribution of mammals and their relation to human cultures. Techniques of studying mammals. Identification of the mammals of Manitoba. Offered in 2009-2010 and alternate years thereafter. Prerequisites: BIOL 2210 (ZOO 2320, 022.232) (C) or BIOL 2231 (ZOO 2501, 022.250) (C); and one of BIOL 2300 (BOTN 2370, ZOO 2370, 001.237, 022.237), BIOL 2301 (BOTN 2371, ZOO 2371) or AGEC 2370 (065.237) (C); or consent of department.

BIOL 4220 Marine Biodiversity (Lab Required) (Formerly ZOO 4260) Examines key ecological principles governing the maintenance of marine biodiversity, particularly in northern ecosystems. Topics include the definitions and global patterns of biodiversity and the ecological mechanisms influencing changes in these patterns in the context of applied population, community and ecosystem ecology. The course will also emphasize practical solutions, including fisheries' harvest models and marine protected areas. Prerequisites: a "C" or better in one of BIOL 2300 (BOTN 2370, ZOO 2370, 022.237, 001.237), BIOL 2301 (BOTN 2371, ZOO 2371) AGEC 2370 (065.237), or BIOL 2390 (BOTN 2280, ZOO 2290, 001.228, 022.229); or consent of department.

BIOL 4240 Advanced Plant Systematics (Lab Required) (Formerly BOTN 4040, 001.404) An examination of biosystematic principles and methods as they relate to all groups of plants. Prerequisite: BIOL 3242 (BOTN 3070, 001.307) (C).

BIOL 4242 The Evolution of Plant Structures and Systems (Lab Required) (Formerly BOTN 4130, 001.413) A comparative study of the morphological and anatomical characteristics of extant and extinct plants in the context of current evolutionary theory. Prerequisite: BIOL 2242 (BOTN 2010, 001.201) (C) or consent of department.

BIOL 4250 Principles of Plant Pathology (Lab Required) (Formerly BOTN 4210, 001.421) A study of the interactions of causal agents, environment, and host plants in the development of disease. Special attention will be given to diseases of local and regional significance. Laboratory exercises will illustrate the basic techniques of plant pathology. Prerequisites: BIOL 3450 (BOTN 2020, 001.202) (C) and BIOL 2260 (BOTN 2210, 001.221) (C) or BIOL 2261; or consent of department.

BIOL 4260 Experimental Parasitology (Lab Required) (Formerly ZOO 4730, 022.473) Principles of parasitology including immunology, ecology, biochemistry, and physiology. Students must carry out an experimental study. Prerequisite: BIOL 3270 (ZOO 3460, 022.346) (C).

BIOL 4262 Wildlife and Fisheries Parasitology

(Lab Required) (Formerly ZOO 4720, 022.472) Parasites of major vertebrate groups of economic importance in temperate regions. Emphasis on: identification, means of control, and how to evaluate the impact of parasites on animal populations. A major project is required. Prerequisite: BIOL 3270 (ZOO 3460, 022.346) (C).

BIOL 4310 Applications of Population Ecology in Fisheries and Wildlife

(Lab Required) (Formerly ZOO 4850) The material introduced in BIOL 3310 (ZOO 3680, 022.348) is developed into the quantitative analyses of field data to form a basis for conservation and management. Topics covered include: surplus harvest models, virtual population analysis, spatial population modeling, bioeconomics, and quantitative adaptive management. Concepts are reinforced through tutorials. Prerequisite: BIOL 3310 (ZOO 3680, 022.348).

BIOL 4312 Analysis of Biological Communities

(Formerly BOTN 4650, 001.465) A survey of methods and approaches to the analysis of biological and environmental data containing many variables. Offered in alternate years. Not to be held with BIOL 7440 (BOTN 7440). Prerequisites: a "C" or better in one of BIOL 2300 (BOTN 2370, ZOO 2370, 001.237, 022.237), BIOL 2301 (BOTN 2371, ZOO 2371) or AGE 2370 (065.237); and STAT 2000 or STAT 2001 (005.200) (C).

BIOL 4330 Plant Interactions

(Formerly BOTN 4150, 001.415) This course examines the ecology of interactions between plants and their biotic environment - other plants, animals and soil microbes. This is a reading course. Students will participate in discussions of key papers, examine recent and historic literature, and write a term paper examining a selected topic. Prerequisite: a "C" or better in BIOL 2300; or consent of department.

BIOL 4340 Aquaculture

(Lab Required) (Formerly ZOO 4820, 022.482) Biology and methods of commercial culture of fish and other aquatic animals. Emphasis on: physiological, nutritional, genetic, pathological and economic aspects and on current and new technologies. Prerequisite: STAT 2000 or STAT 2001 (005.200) (D); and consent of instructor.

BIOL 4362 Behavioural Ecology and Cognitive Ethology

(Lab Required) (Formerly ZOO 4280, 022.428) Examines proximate and ultimate questions relating to mating and parental behaviour, communication, social parasitism and animal intellect to provide insight into the intimate relationship between behavioural evolution and the environment. Laboratory and field exercises complement major topics considered in lectures. Not to be held with the former 022.448. Prerequisite: BIOL 3360 (ZOO 3100, 022.310), or the former 022.343 (C); or consent of department.

BIOL 4374 Aquatic Botany

(Formerly BOTN 4010, 001.401) This course examines the relationship between algae, fungi and macrophytes, and the physical, chemical and biological properties of the aquatic environment. Specific adaptations to life in water, and patterns of distribution and succession in rivers, lakes and wetlands will be covered. Prerequisite: a "C" or better in one of BIOL 2300 (BOTN 2370, ZOO 2370, 001.237, 022.237), BIOL 2301 (BOTN 2371, ZOO 2371) or AGE 2370 (065.237); or consent of department.

BIOL 4380 Environmental Toxicology

(Lab Required) (Formerly ZOO 4840, 022.484) A survey of the principles governing the dynamics of chemicals in the environment, with emphasis on the biological systems, using case histories of known pollution problems. Prerequisites: a "C" or better in one of CHEM 2370, CHEM 2371 (002.237), MBIO 2370, MBIO 2371 (060.237), CHEM 2780 (002.278), or MBIO 2780 (060.278); plus a "C" or better in one of BIOL 2300 (BOTN 2370, ZOO 2370, 001.237, 022.237), BIOL 2301 (BOTN 2371, ZOO 2371) or AGE 2370 (065.237); plus a "C" or better in one of BIOL 2410 (ZOO 2530, 22.253), BIOL 2411 (ZOO 2531) or BIOL 3460 (ZOO 3530, 022.353); and BIOL 3462 (ZOO 3540, 022.354, or 22.352) (C); or consent of department.

BIOL 4390 Principles of Wildlife Management

(Lab Required) (Formerly ZOO 4710, 022.471) Introduction to the biological and socioeconomic goals of wildlife management and to the basic techniques of wildlife management in terms of these goals. There will be four or five field trips. Some weekend field trips may be required. Prerequisite: BIOL 3310 (ZOO 3680,

022.348) (C); or consent of department.

BIOL 4430 Advanced Plant Stress Physiology

(Lab Required) (Formerly BOTN 4120, 001.412) Selected topics on plant responses to environmental stress at the physiological and biochemical levels. Laboratory will consist of supervised projects in the above areas. Prerequisites: one of BIOL 3452 (BOTN 3010, 001.301), the former 001.317 (C), or PLNT 3500 (039.350); and CHEM 2210 or CHEM 2211 (002.221) (C); and one of CHEM 2370, CHEM 2371 (002.237), MBIO 2370, MBIO 2371 (060.237) (C), CHEM 2780 (002.278), or MBIO 2780 (060.278) (C).

BIOL 4460 Comparative Animal Energetics

(Formerly ZOO 4830, 022.483) Energetic strategies of animals living in ecologically diverse environments. Integration of physiological, morphological and behavioural adaptations with an emphasis on vertebrate species. Prerequisites: BIOL 2210 (ZOO 2320, 022.232) (C) or BIOL 2231 (ZOO 2501, 022.250) (C); and one of BIOL 2410 (ZOO 2530, 022.253) (C), BIOL 2411 (ZOO 2531), BIOL 3460 (ZOO 3530, 022.353) (C), or BIOL 3462 (ZOO 3540, 022.354) (C); or consent of department.

BIOL 4470 Sensory-Motor Physiology

(Lab Required) (Formerly ZOO 4160, 022.416) Information flow in the nervous system and the control of behaviour. The diverse roles that ion channels and synaptic circuitry play in sensory reception, neuronal integration and motor control are emphasized. Prerequisite: a "C" or better in one of BIOL 2410 (ZOO 2530, 022.253), BIOL 2411 (ZOO 2531), BIOL 3460 (ZOO 3530, 022.353), the former 022.245, 022.337, or 022.352; or consent of department.

BIOL 4480 Comparative Endocrinology

(Lab Required) (Formerly ZOO 4600, 022.460) The structure, control, and function of vertebrate endocrine systems. BIOL 2520 (or equivalent - ZOO 2280, 022.228, BIOL 2521, ZOO 2281), and one of BIOL 2410 (or equivalent - ZOO 2530, 022.253, BIOL 2411, ZOO 2531), BIOL 3460 (ZOO 3530, 022.353) or the former 022.245 or 022.352, and a course in biochemistry are strongly recommended as prerequisites. Prerequisite: one of BIOL 1030, BIOL 1031, or the former 071.125 (C).

BIOL 4500 Molecular Genetics of Plant Development

(Formerly BOTN 4180, 001.418) Analysis of plant development at the molecular level. Recent advances in model system genetics will be highlighted including seedling, root, shoot, and flower development as well as environmental responses. Prerequisite: BIOL 2500 (BOTN 2460, 001.246) or BIOL 2501 (BOTN 2461) (C).

BIOL 4540 Developmental Molecular Biology

(Lab Required) (Formerly ZOO 4150, 022.415) An examination of early development with emphasis on the molecular events. Sex determination, gametogenesis and early embryogenesis will be discussed. Prerequisite: BIOL 2540 (ZOO 2150, 022.215) (C); or consent of department.

BIOL 4542 Genes and Development

(Formerly ZOO 4270, 022.427) An in depth examination of selected topics in embryonic development, emphasizing the genetic control of the cell and molecular mechanisms that direct embryogenesis. The course will focus primarily on vertebrate development, but insights provided by studies on invertebrates will also be covered. Prerequisites: BIOL 2520 (ZOO 2280, 022.228) or BIOL 2521 (ZOO 2281)(C); and BIOL 2540 (ZOO 2150, 022.215) (C); or consent of department.

BIOL 4552 Molecular Biology Techniques for Eukaryotes

(Lab Required) A techniques-intensive course focusing on the understanding of molecular biology techniques, troubleshooting problems, writing reproducible Materials and Methods for publications, accurate recording of procedures in lab journals, and bioinformatics exercises. Not to be held with BOTN 7460 (001.746) or the former 001.742. Prerequisite: BIOL 2500.

BIOL 4560 Microtechnique

(Lab Required) This intensive course covers a spectrum of animal tissue and cell preparation techniques for microscopy and a survey of the variety of types of microscopy. These span all types of microscopy; live cell techniques, fixation and tissue processing methods for both paraffin embedding media and plastic media, sectioning and staining imaging and image processing, introduction to histochemistry and immunocytochemistry and electron microscopy. This is a practical course with a major hands-on laboratory emphasis. Prerequisites: BIOL

1030 or BIOL 1031 (C+); or consent of department. This course is restricted to students in year 3 or 4 of a Major or Honours degree program.

BIOL 4610 The Business of Biotechnology

A critical examination of Biotechnology development and marketing. Lectures, tutorials and workshops providing in-depth study of topics including the legal, business, marketing, industrial and governmental, and scientific and ethical aspects of the biotechnology industry and, "for profit" science. Prerequisites: PLNT 2530 (C+), MBIO 3000 (C+), and MBIO 3410 or MBIO 3411 (C+). BIOL 2500 (or equivalent - BIOL 2501 (BOTN 2460, BOTN 2461, 001.246), BIOL 2520 (or equivalent - ZOOL 2280, BIOL 2521, ZOOL 2281, 022.228) and CHEM 3590 (002.359) are highly recommended.

BIOL 4800 Special Topics in Field Biology

(Formerly BOTN 4800, 001.480, ZOOL 4800, 022.480) Lectures, field studies and research projects on a selected topic. Course content to vary from year to year depending on instructor. Usually offered during the summer months. Prerequisite: consent of department.

BIOL 4890 Special Topics in Biology

(Formerly BOTN 4890, 001.489, ZOOL 4890, 022.489) Biology encompasses a broad array of ideas and special topic areas. In this course, students can pursue a specific topic in detail through lectures, seminars and research projects. Normally restricted to third and fourth year Honours and Major students. Prerequisite: Consent of department.

BIOL 4980 Work Term 3

(Formerly BOTN 4980, 001.498, ZOOL 4980, 022.498) Work assignment in business, industry, or government for students registered in the Biological Sciences Cooperative Option. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only)

BIOL 4990 Work Term 4

(Formerly BOTN 4990, 001.499, ZOOL 4990, 022.499) Work assignment in business, industry, or government for students registered in the Biological Sciences Cooperative Option. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only)

4.4.1 Program Information,

Biotechnology Honours Degree Requirements

To enter the Biotechnology Joint Honours program a student must have completed at least 24 credit hours with a minimum GPA of 3.00, and also obtained a minimum grade of "B" in CHEM 1310 and a minimum grade of "C+" in BIOL 1020. CHEM 1300, BIOL 1030, MATH 1500, PHYS 1020 (or PHYS 1050), and STAT 1000 are required courses in the program and students are strongly encouraged to complete these courses in first year. Six credit hours of Arts electives, including the written English course should also be taken in Year 1.

Students will select one stream (Analytical, Environmental/Biosystems or Molecular Biotechnology). Students are also encouraged to select a Minor in a complementary area. There are enough free electives to cover the 18 credit hours required for a Minor. All students must complete a Common Core of required courses plus required Stream Specific courses. The remaining courses can be selected from the list of Recommended Electives. This list is meant to give students some idea of appropriate electives; however, students have the option to choose courses not on the list in consultation with the Program Advisors.

To continue in the Biotechnology Joint Honours program, students must maintain a minimum GPA of 3.00 and complete a minimum of 9 credit hours during each Fall and Winter Term. No more than 15 credit hours of F grades may be accumulated, regardless of whether any course has been repeated and a higher grade achieved. Research Project in Biotechnology (BTEC 4000) must be taken in the final year of the program.

To graduate from the Biotechnology Joint Honours program students must achieve a minimum GPA of 3.00 and obtain minimum grade of "C" on the courses that contribute to the 120 credit hours that make up the degree.

Students who do not meet these minimum requirements will be required to withdraw from the program and may be eligible to enter the 4-Year Major degree program in Biotechnology. Depending on course selection students may also be eligible to enter other Major Programs (e.g. Biochemistry, Biological Sciences, Chemistry, or Microbiology) and/or the 3-year B.Sc. General Degree program.

Biotechnology 4-Year Major Degree Requirements

To enter the Biotechnology Joint Major program a student must have completed at least 24 credit hours with a minimum GPA of 2.00 and also obtained a minimum grade of "C+" in CHEM 1310 and a minimum grade of "C" in BIOL 1020. BIOL 1030, CHEM 1300, MATH 1500, PHYS 1020 or 1050, and STAT 1000 are required courses in the program and students are strongly urged to complete these courses in first year. Six credit hours of Arts electives, including the written English course should also be taken in Year 1.

Students will select one stream (Analytical, Environmental/Biosystems or Molecular Biotechnology). Students are also encouraged to select a Minor in a complementary area. There are enough free electives to cover the 18 credit hours required for a Minor. All students must complete a Common Core of required courses plus required Stream Specific courses. The remaining courses can be selected from the list of Recommended Electives. This list is meant to give students some idea of appropriate electives; however, students have the option to choose courses not on the list in consultation with the Program Advisors.

To continue in the Major program a student must maintain a minimum GPA of 2.00. No more than 18 credit hours of F grades can be accumulated regardless of whether any course has been repeated and a higher grade achieved.

To graduate from the Biotechnology Joint Major degree, students must maintain a minimum GPA of 2.00 on the 120 credit hours that contribute to the degree. Students must also obtain a minimum grade of "C" on all common core and stream specific courses outlined below. There is no term registration load requirement in the Major degree.

Students who do not meet these minimum requirements will be required to withdraw from the program and will normally be eligible to enter the 3-Year B.Sc. General degree program.

Common Core Courses:

BIOL 2500, BIOL 2520, BIOL 4560, BIOL 4610, CHEM 2210, CHEM 2220, CHEM/MBIO 2360, CHEM /MBIO 2370, CHEM 2470, CHEM 3590, CHEM 4630, MBIO 1010, MBIO 2020, MBIO 3000, MBIO 3410, MBIO 4510, PLNT 2530, PLNT 4610

Program Stream Courses:

Analytical Biotechnology: MATH 1700¹, CHEM 4370, CHEM 4590, CHEM 4670, CHEM 4700

Environmental Biotechnology: MATH 1700¹, BIOE 3200, BIOE 3530, BIOE 4510, MBIO 4672

Molecular Biotechnology: MBIO 3030, BIOL 4552, MBIO 4600, MBIO 4610, MBIO 4672

Note: In some instances pre-requisites will be waived upon approval by the appropriate department.

Complementary Existing Minors that could satisfy the Recommended Electives (Minors require 18 cr hrs of prescribed courses):

Management, Animal Systems, Food Science, Plant Biotechnology, or Human Nutrition and Metabolism

Recommended General Electives if not required in Program stream:

All courses in above described Minors.

Appropriate pre-requisites must also be taken for all Electives.

BIOE 3200, BIOE 3530, BIOE 4510, BIOL 1300 (BOTN 1010), BIOL 2242 (BOTN 2010), BIOL 2380 (BOTN/ZOOL 2180), BIOL 2260 (BOTN 2210), BIOL 2300 (BOTN/ZOOL 2370), BIOL 3550 (BOTN 3190), BIOL 3290 (BOTN 3280), BIOL 3500 (BOTN 3460), BIOL 4500 (BOTN 4180), BIOL 4550 (BOTN 4460), BIOL 2540 (ZOO 2150), BIOL 3540 (ZOO 3070), BIOL 4540 (ZOO 4150); CHEM 4360, CHEM 4370, CHEM 4590, CHEM 4620, CHEM 4670, CHEM 4700; COMP 1010, COMP 1020, COMP 1260, COMP 1270; ENG 1420; ENTR 2020; MATH 1700¹; MBIO 2110, MBIO 3280 (MBIO 2280), MBIO 3010, MBIO 3030, MBIO 3430, MBIO 4440 (MBIO 3440), MBIO 3450, MBIO 3460, MBIO 3470, MBIO 4480 (MBIO 3480), MBIO 4010, MBIO 4410, MBIO 4470, MBIO 4600, MBIO 4610, MBIO 4672; PHAC 4030, PHAC 4040; PHIL 2740, PHIL 2830; PLNT 3140, PLNT 3500, PLNT 3520, PLNT 3570, PLNT 4310, PLNT 4330, PLNT 4550, PLNT 4560, PLNT 4570, PLNT 4580, PLNT 4590, PLNT 4600; STAT 2000

Other suitable courses may be selected through consultation with the department heads.

(The number 6 in brackets indicates a 6 credit hour course.)			

4.4.3 Biotechnology Course Descriptions

BTEC 3980 Work Term 1

Work assignments in business, industry or government for students registered in the Microbiology Honours or Major Cooperative program. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only).

BTEC 3990 Work Term 2

Work assignments in business, industry or government for students registered in the Microbiology Honours or Major Cooperative program. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only).

BTEC 4000 Research Project in Biotechnology

(Lab Required) Students can carry out independent biotechnology based research in their area of interest under the supervision of a faculty member or an approved external biotechnology professional. Results will be presented as an interim oral report and a written journal style paper. Registration restricted to Year 4 Honours Biotechnology students. Not to be held with any other Research Project courses such as MBIO 4530 or CHEM 4710.

BTEC 4980 Work Term 3

Work assignments in business, industry or government for students registered in the Microbiology Honours or Major Cooperative program. Requires submission of a

written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only).

BTEC 4990 Work Term 4

Work assignments in business, industry or government for students registered in the Microbiology Honours or Major Cooperative program. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only).

2. PHYS 1020 may be used in place of PHYS 1050; and, in the 3-year degree only - PHYS 1030 may be used in place of PHYS 1070. Students planning on completing a 4-year degree in Chemistry are required to complete PHYS 1070.

3. MATH 1010, MATH 1020, MATH 1190, MATH 1191, COMP 1260 and COMP 1270 may not be used to satisfy this requirement.

4. Students may elect to complete the requirements set out in one of the Chemistry focus areas. If a student opts for one of the focus areas, they should consult with the Department of Chemistry and a Science Student Advisor for information regarding specific course requirements for each focus area.

5. IMPORTANT: The four year Major program need not be completed in the manner prescribed in the chart above. The chart indicates one possible arrangement of the required courses and is meant to be a guide around which students can plan their program.

6. Elective courses should be selected in consultation with the Department of Chemistry and/or a Faculty of Science Student Advisor.

(Letters in brackets indicate minimum prerequisite standing for further study. The number 6 in brackets indicates a 6 credit hour course.)

4.5.4 Chemistry General Degree and Minor Requirements

4.5.4 Chemistry General Degree and Minor Requirements,

THREE YEAR B.Sc. General – Chemistry Focus 90 CREDIT HOURS	
CHEM 1300, CHEM 1310 (C)	21 hours of required 2000 level Chemistry courses: CHEM 2210, CHEM 2220, CHEM 2280, CHEM 2290, CHEM 2400 (CHEM 2380), CHEM 2470, CHEM 2360
BIOL 1020, BIOL 1030	15 credit hours of 2000 level or higher CHEM: Excluding the Chemistry service courses (2240, 2560, 2770, 2780), Co-op courses (3980, 3990, 4980, 4990) and specialized courses (4600, 4700, 4710). A minimum of 6 credit hours must be chosen from the 3000 / 4000 level.
MATH 1500 ¹ , MATH 1700 ¹	6 credit hours of electives to be chosen from outside the Faculty of Science
PHYS 1050 ² , PHYS 1070 ²	18 credit hours of open electives
6 credit hours from the Faculty of Arts. (Should include the student's "W" requirement.)	
THREE YEAR GENERAL 90 CREDIT HOURS	
CHEM 1300, CHEM 1310 (C)	a minimum of 18 credit hours from the following list of advanced level courses: CHEM 2210, CHEM 2220, CHEM 2280, CHEM 2290, CHEM 2360, CHEM 2370, CHEM 2400 (CHEM 2380), CHEM 2470, CHEM 3360, CHEM 3370, CHEM 3400 (CHEM 3380), CHEM 3390, CHEM 3570, CHEM 3580, CHEM 3590, CHEM 4360, CHEM 4370, CHEM 4570, CHEM 4580, CHEM 4590, CHEM 4620, CHEM 4630, CHEM 4640, CHEM 4660, CHEM 4670, CHEM 4680, CHEM 4690 (subject to the Faculty requirement that of the 36 credit hours in the two advanced level Science areas, at least 6 credit hours must be at the 3000/4000 level).
MINOR	
CHEM 1300, CHEM 1310 (C)	Normally CHEM 2210 and CHEM 2220, plus an additional 6 credit hours of Chemistry

NOTES:

1. MATH 1510 or MATH 1520 may be taken in place of MATH 1500; MATH 1710 may be taken in place of MATH 1700; MATH 1690 may be taken in place of MATH 1500 and MATH 1700.
2. PHYS 1020 may be used in place of PHYS 1050; and, in the 3-year degree only - PHYS 1030 may be used in place of PHYS 1070. Students planning on completing a 4-year degree in Chemistry are required to complete PHYS 1070.
3. MATH 1010, MATH 1020, MATH 1190, MATH 1191, COMP 1260 and COMP 1270 may not be used to satisfy this requirement.
4. Students may elect to complete the requirements set out in one of the Chemistry focus areas. If a student opts for one of the focus areas, they should consult with the Department of Chemistry and a Science Student Advisor for information regarding specific course requirements for each focus area.

5. IMPORTANT: The four year Major program need not be completed in the manner prescribed in the chart above. The chart indicates one possible arrangement of the required courses and is meant to be a guide around which students can plan their program.

(Letters in brackets indicate minimum prerequisite standing for further study. The number 6 in brackets indicates a 6 credit hour course.)

4.5.6 Chemistry Course Descriptions-0 Level

CHEM 0900 Preparatory Chemistry

(Formerly 002.090) A course designed for students with little, or no background in chemistry who wish to achieve the prerequisites for advanced courses, or for students who require a refresher course in basic chemistry. Concurrent registration in CHEM 0900 and any of CHEM 1300, CHEM 1301, CHEM 1311 or CHEM 1320 is not permitted. (Pass/Fail grade only.) Prerequisite or Concurrent Requirement: Any grade 12 or 40S Mathematics course or equivalent.

4.5.6 Chemistry Course Descriptions-1000 Level

CHEM 1000 Understanding the World through Chemistry

(Formerly 002.100) This course introduces students to the principles of chemistry necessary for an understanding of contemporary issues in agriculture, the environment, industry, medicine, and the economy. High school chemistry is not required. May be used as a prerequisite (minimum grade "B") for CHEM 1300 or CHEM 1301 (Developmental section). Not to be held with CHEM 1001 or the former 002.125. May not be used to fulfill chemistry requirements in a Chemistry Honours, Major, General or Minor program. Not available to students who have previously obtained credit in, or are concurrently registered in, any 2000 level university Chemistry course.

CHEM 1030 Carbon Chemistry in Nature and Society

(Formerly 002.103) This course introduces organic molecules and illustrates the principles of organic chemistry with topics from cosmetics and personal care products, the petroleum industry, food preparation chemistry, polymers and plastics, poisons and biological toxins, and risk assessment. May not be used to fulfill chemistry requirements in a Chemistry Honours, Major, General or Minor program. Not available to students who have previously obtained credit in, or are concurrently registered in, any 2000 level university Chemistry course. Not to be held with CHEM 1031 or the former 002.125. Prerequisite: One of CHEM 1000, CHEM 1001 (002.100) (C), CHEM 1300, CHEM 1301 (002.130) (C), Chemistry 40S (or equivalent), or CHEM 0900 (002.090).

CHEM 1300 University 1 Chemistry: Structure and Modelling in Chemistry

(Lab Required) (Formerly 002.130) Atomic and molecular models and their applications to chemistry, including a discussion of solid, liquid, and gaseous states, and of mixtures. Not to be held with CHEM 1301. Prerequisites: Applied Mathematics 40S or Pre-calculus Mathematics 40S, or the former Mathematics 40S (300); and Chemistry 40S (or equivalent) or CHEM 0900 (002.090) (P), or a minimum grade of "B" in CHEM 1000 or CHEM 1001 (002.100).

CHEM 1301 Université I Chimie : La structure et la modélisation chimique

(Labo requis) (Ancien 002.130) Structure et modèles atomiques et leurs applications à la chimie, y inclus une étude des états solide, liquide et gazeux des substances chimiques et des mélanges. On ne peut se faire créditer CHEM 1301 et CHEM 1300 (002.130). Préalables : Mathématiques 40S (Mathématiques appliquées ou Précalcul), et Chimie 40S (ou son équivalent), ou CHEM 0900 (002.090)(P) ou CHEM 1000 (002.100) avec une note minimale de B. NOTE : Ceux et celles qui s'inscrivent à CHEM 1301 et qui n'ont pas réussi CHEM 0900 doivent subir un test diagnostique durant la première semaine de cours. On conseille fortement à ceux et celles qui obtiennent moins de 60 % dans ce test de suivre CHEM 0900 avant CHEM 1301. CHEM 0900 est un cours de rattrapage en chimie offert occasionnellement à l'Université du Manitoba. Donné seulement au Collège universitaire de Saint-Boniface.

CHEM 1310 University 1 Chemistry: An Introduction to Physical Chemistry

(Lab Required) (Formerly 002.131) Thermochemistry, chemical thermodynamics,

and chemical kinetics. Prerequisite: CHEM 1300 or CHEM 1301 (002.130) (C).

CHEM 1311 Université I Chimie : Une introduction à la chimie physique

(Labo requis) (Ancien 002.131) La thermochimie, la thermodynamique chimique, la cinétique chimique. On ne peut se faire créditer CHEM 1311 et CHEM 1310 (002.131). Préalable : une note minimale de C dans CHEM 1301 ou CHEM 1300 (002.130). Donné seulement au Collège universitaire de Saint-Boniface.

CHEM 1320 University 1 Chemistry: An Introduction to Organic Chemistry

(Lab Required) (Formerly 002.132) Structures, properties and reactions of organic molecules. Not to be held with CHEM 2210 or CHEM 2211 (002.221) Prerequisite: CHEM 1300 or CHEM 1301 (002.130) (C).

CHEM 1804 UW CHEM-2801 Chemistry & Society (1000 Level) Campus Manitoba course.

4.5.6 Chemistry Course Descriptions-2000 Level

CHEM 2210 Introductory Organic Chemistry 1: Structure and Function

(Lab Required) (Formerly 002.221) An introduction to the concepts of organic reactivity and bonding in organic molecules. Preparation and properties of functionalized organic molecules. Not to be held with CHEM 1320 (002.132) or CHEM 2211. Prerequisite: CHEM 1310 or CHEM 1311 (002.131) (C).

CHEM 2211 Introduction à la chimie organique I : Structure et fonction

(Labo requis) (Ancien 002.221) Introduction aux concepts de réactivité organique et de liaison chez les molécules organiques. Préparation et propriétés de molécules organiques renfermant un groupe fonctionnel. On ne peut se faire créditer CHEM 2211 et CHEM 2210 (002.221) et CHEM 1320 (002.132). Préalable : une note minimale de C dans CHEM 1311 ou CHEM 1310 (002.131). Donné seulement au Collège universitaire de Saint-Boniface.

CHEM 2220 Introductory Organic Chemistry 2: Reactivity and Synthesis

(Lab Required) (Formerly 002.222) An introduction to the reactivity of organic compounds and organic spectroscopy. The application of functional group interconversions to syntheses. Not to be held with CHEM 2221. Prerequisite: CHEM 2210 or CHEM 2211 (002.221) (C).

CHEM 2221 Introduction à la chimie organique II : Réactivité et synthèse

(Labo requis) (Ancien 002.222) Introduction à la réactivité des composés organiques et à la spectroscopie organique. L'application de l'interchangeabilité des groupes fonctionnels dans les synthèses de composés. On ne peut se faire créditer CHEM 2221 et CHEM 2220. Préalable : une note minimale de C dans CHEM 2211 ou CHEM 2210 (002.221). Donné seulement au Collège universitaire de Saint-Boniface.

CHEM 2240 Applied Chemistry for Engineers

(Formerly 002.224) Bonding, surface chemistry, phase rule, electrochemistry, materials and descriptive inorganic chemistry of selected elements. Prerequisite: CHEM 1300 or CHEM 1301 (002.130) (C).

CHEM 2280 Physical Chemistry: Microscopic Descriptions of Matter

(Lab Required) (Formerly 002.228) Molecular based approach to understanding physical behaviour of matter. Introduction to principles of quantum mechanics, electronic structure and bonding, molecular spectroscopy. Not to be held with CHEM 2281. Prerequisites: CHEM 1310 or CHEM 1311(002.131) (C); PHYS 1030 or PHYS 1031 (016.103) (C) or PHYS 1070 or PHYS 1071 (016.107) (C); plus six credit hours of 1000 level mathematics (preferably calculus) with the exception of the former 136.100, MATH 1010 (136.101), MATH 1190, MATH 1191 (136.119), FA 1020 (054.102), or MATH 1020 (136.102).

CHEM 2281 Chimie physique : Étude microscopique de la matière (Labo requis) (Ancien 002.228) Approche basée sur le plan moléculaire pour comprendre les propriétés physiques de la matière. Introduction aux principes de la

mécanique quantique, de la structure électronique et de la liaison, de la spectroscopie moléculaire. On ne peut se faire créditer CHEM 2281 et CHEM 2280. Préalables : une note minimale de C dans CHEM 1311 ou CHEM 1310 (002.131); et une note minimale de C dans un de PHYS 1031, PHYS 1030 (016.103), PHYS 1071 ou PHYS 1070 (016.107), et 6 crédits de niveau 1000 en mathématiques (de préférence Calcul), à l'exception de 136.100, MATH 1010 (136.101), MATH 1190, MATH 1191 (136.119), MATH 1020 (136.102), et FA 1020 (054.102). Donné seulement au Collège universitaire de Saint-Boniface.

CHEM 2290 Chemical Energetics and Dynamics: Macroscopic Descriptions

(Lab Required) (Formerly 002.229) Chemical energetics, entropy and the second law of thermodynamics, chemical dynamics. Not to be held with CHEM 2291. Prerequisites: CHEM 1310 or CHEM 1311 (002.131) (C); PHYS 1030 or PHYS 1031 (016.103) (C) or PHYS 1070 or PHYS 1071 (016.107) (C); plus six credit hours of 1000 level mathematics (preferably calculus) with the exception of the former 136.100, MATH 1010 (136.101), MATH 1190, MATH 1191 (136.119), MATH 1020 (136.102), or FA 1020 (054.102).

CHEM 2291 L'énergétique et la dynamique chimique : Description macroscopique

(Labo requis) (Ancien 002.229) L'énergétique chimique, l'entropie et la deuxième loi de la thermodynamique, la dynamique chimique. On ne peut se faire créditer CHEM 2291 et CHEM 2290. Préalables : une note minimale de C dans CHEM 1311 ou CHEM 1310 (002.131) et une note minimale de C dans un de PHYS 1031, PHYS 1030 (016.103), PHYS 1071 ou PHYS 1070 (016.107), et 6 crédits de niveau 1000 en mathématiques (de préférence Calcul) à l'exception de 136.100, MATH 1010 (136.101), MATH 1191, MATH 1190 (136.119), MATH 1020 (136.102) et FA 1020 (054.102). Donné seulement au Collège universitaire de Saint-Boniface.

CHEM 2360 Biochemistry 1: Biomolecules and an Introduction to Metabolic Energy

(Lab Required) (Formerly 002.236) An introductory course dealing with kinds of molecules encountered in biochemistry, and the concept of metabolic energy as a product of catabolism and a requirement for biosynthesis. This course is also given in Microbiology as MBIO 2360. Not to be held with CHEM 2361, CHEM 2770 (002.277), MBIO 2360, MBIO 2361 (060.236), or MBIO 2770 (060.277). Prerequisites: CHEM 1310 or CHEM 1311 (002.131) (C); and one of BIOL 1030, BIOL 1031, or the former 071.125 (C). NOTE: Students may hold this course for credit in the B.Sc. General Degree program, but may not use it to fulfill the minimum requirement of 12 credit hours in 2000 level Chemistry (pre-September 2008 regulations). Those students following the new General Degree regulations (effective 2008-09) are able to use this course as part of the 18 credit hours of advanced level Chemistry or Microbiology.

CHEM 2361 Biochimie I : Les molécules biochimiques et une introduction à l'énergie métabolique

(Labo requis) (Ancien 002.236) Introduction aux différents types moléculaires rencontrés en biochimie ainsi qu'au concept d'énergie métabolique comme produit du catabolisme nécessaire à la biosynthèse. Aussi offert par le Département de microbiologie sous la cote MBIO 2361. On ne peut se faire créditer CHEM 2361 et CHEM 2360 (002.236) et CHEM 2770 (002.277), MBIO 2361, MBIO 2360 (060.236) ou MBIO 2770 (060.277). Préalables : une note minimale de C dans CHEM 1311 ou CHEM 1310 (002.131) et une note minimale de C dans BIOL 1031 ou BIOL 1030 (071.125). NOTE : CHEM 2361 ne peut être reconnu aux fins des 12 crédits requis par le département de chimie pour les étudiantes et les étudiants inscrits à Université 1 avant 2007-2008. Pour les personnes qui suivent les nouveaux règlements du baccalauréat général (2008-2009), CHEM 2361 peut faire partie des 18 crédits de chimie ou de microbiologie de niveau avancé. Donné seulement au Collège universitaire de Saint-Boniface.

CHEM 2370 Biochemistry 2: Catabolism, Synthesis, and Information Pathways

(Lab Required) (Formerly 002.237) An introductory course dealing with the basic metabolic processes that occur in living cells, including the production and use of metabolic energy, the breakdown and synthesis of biomolecules; the synthesis of DNA, RNA and proteins; and the regulation of these processes. This course is also given in Microbiology as MBIO 2370. Not to be held with CHEM 2371, CHEM 2780 (002.278), MBIO 2370, MBIO 2371 (060.237), or MBIO 2780 (060.278). Prerequisites: one of CHEM 2360, CHEM 2361 (002.236), MBIO 2360, or MBIO 2361 (060.236); and CHEM 2210 or CHEM 2211(002.221), both courses with a minimum grade of "C". NOTE: Students may hold this course for credit in the B.Sc.

General Degree program, but may not use it to fulfill the minimum requirement of 12 credit hours in 2000 level Chemistry (pre-September 2008 regulations). Those students following the new General Degree regulations (effective 2008-09) are able to use this course as part of the 18 credit hours of advanced level Chemistry or Microbiology.

CHEM 2371 Biochimie II : Catabolisme, synthèse et les voies d'information

(Labo requis) (Ancien 002.237) Introduction aux processus métaboliques cellulaires de base incluant la production et l'utilisation de l'énergie métabolique, la dégradation et la synthèse des molécules biochimiques, la synthèse de l'ADN, de l'ARN et des protéines et la régulation de ces processus. Aussi offert par le Département de microbiologie sous la cote MBIO 2371. On ne peut se faire créditer CHEM 2371 et CHEM 2370 (002.237) et CHEM 2780 (002.278), MBIO 2371, MBIO 2370 (060.237) ou MBIO 2780 (060.278). Préalables : une note minimale de C dans un de CHEM 2361, CHEM 2360 (002.236), MBIO 2361 ou MBIO 2360 (060.236) et dans CHEM 2211 ou CHEM 2210 (002.221). NOTE : CHEM 2371 ne peut être reconnu aux fins des 12 crédits requis par le département de chimie pour les étudiantes et les étudiants inscrits à Université 1 avant 2007-2008. Pour les personnes qui suivent les nouveaux règlements du baccalauréat général (2008-2009), CHEM 2371 peut faire partie des 18 crédits de chimie ou de microbiologie de niveau avancé. Donné seulement au Collège universitaire de Saint-Boniface.

CHEM 2381 Chimie des éléments représentatifs

(Labo requis) (L'ancien 002.238) Chimie descriptive des éléments représentatifs et interprétation de leurs propriétés physiques et chimiques d'après les théories habituelles de structure et de liaison. On ne peut se faire créditer à la fois le CHEM 2380 (002.238). Préalable: CHEM 1310 ou CHEM 1311 (ou 002.131) (C). Donné seulement au Collège universitaire de Saint-Boniface.

CHEM 2400 Inorganic chemistry: Structure and Applications

(Lab Required) Overview of chemical bonding, structure and reactivity across the Periodic Table, illustrated by examples linking Inorganic Chemistry with e.g. materials science and biochemistry. The lab component involves synthesis and analysis of simple inorganic compounds. Not to be held with CHEM 2380, CHEM 2381 or CHEM 2401. Prerequisite: CHEM 1310 or CHEM 1311 (C).

CHEM 2401 Chimie inorganique: structure et applications

Revue de la liaison chimique, de la structure et de la réactivité à travers le tableau périodique des éléments. La revue sera illustrée par des exemples liant la chimie inorganique à la science des matériaux et à la biochimie. Pour le laboratoire, des composés inorganiques simples seront préparés et analysés. On ne peut se faire créditer CHEM 2401 et CHEM 2400 et CHEM 2381 ou 2380. Préalable: une note minimale de C dans CHEM 1311 ou CHEM 1310 (002.131)

CHEM 2470 Introductory Analytical Chemistry

(Lab Required) (Formerly 002.247) A course in quantitative analysis provides training useful for nearly all scientists. It equips the students with the theoretical principles on which the analytical methods are based, with the ability to plan and perform experimental work, to interpret the results. Not to be held with CHEM 2471. Prerequisites: CHEM 1310 or CHEM 1311 (002.131) (C); and three credit hours of mathematics with the exception of the former 136.100, MATH 1010, MATH 1190, MATH 1191, MATH 1020, or FA 1020.

CHEM 2471 Introduction à la chimie analytique

(Labo requis) (Ancien 002.247) Introduction aux techniques courantes de laboratoire en analyse chimique comprenant les méthodes gravimétriques, volumétriques et quelques autres méthodes instrumentales. On ne peut se faire créditer CHEM 2471 et CHEM 2470. Préalables : une note minimale de C dans CHEM 1311 ou CHEM 1310 (002.131) et un cours de 3 crédits de Mathématiques de niveau 1000 à l'exception de 136.100, MATH 1010, MATH 1190, MATH 1191, MATH 1020 ou FA 1020. Donné seulement au Collège universitaire de Saint-Boniface.

CHEM 2550 Environmental Chemistry

(Lab Required) (Formerly 002.255) An introduction to the chemistry of the environment. Emphasis will be on the composition of the natural environment and the processes of natural and human-introduced chemical species that take place within it. The course will provide students with the chemical basis for understanding the environment and environmental problems. This course is also taught in Environmental Science as ENVR 2550. Prerequisite: CHEM 1310 or CHEM 1311

(002.131) (C).

CHEM 2560 Water Quality Analysis for Engineers

(Lab Required) Principles and applications of chemical and instrumental methods for the analysis of water quality. This course is restricted to students in Civil Engineering.

CHEM 2770 Elements of Biochemistry 1

(Lab Required) (Formerly 002.277) Basic concepts of biochemistry including the properties of biomolecules (amino acids and proteins, enzymes, carbohydrates, lipids, and nucleic acids) and aspects of energy production in cells. For students in Agricultural and Food Sciences, Human Ecology, and Four Year Biological Sciences programs in Science. May not be used as part of an Honours, Major, General, or Minor program in Chemistry or in Microbiology. This course is also given in Microbiology as MBIO 2770. Not to be held with CHEM 2360, CHEM 2361 (002.236), MBIO 2360, MBIO 2361 (060.236), CHEM 2860 (002.286), or MBIO 2770 (060.277). Prerequisites: one of CHEM 1310, CHEM 1311 (002.131) (C), or CHEM 1320 (002.132) (C); plus six credit hours of university level biological sciences.

CHEM 2780 Elements of Biochemistry 2

(Lab Required) (Formerly 002.278) The continuation of CHEM 2770 or MBIO 2770, dealing with nitrogen and lipid metabolism, representative biosynthetic pathways, and synthesis and importance of DNA, RNA and proteins. For students in Agricultural and Food Sciences, Human Ecology, and four-year Biological Science programs in Science. May not be used as part of an Honours, Major, General, or Minor program in Chemistry or Microbiology. This course is also given in Microbiology as MBIO 2780. Not to be held with CHEM 2370, CHEM 2371 (002.237), MBIO 2370, MBIO 2371 (060.237), MBIO 2780 (060.278) or the former courses 002.235, 002.240, 060.235, 060.240. Prerequisites: one of CHEM 2770 (002.277), MBIO 2770 (060.277) (C), CHEM 2360, CHEM 2361 (002.236), MBIO 2360, or MBIO 2361(060.236) (C).

CHEM 2860 Chemistry of Biomolecules

(Lab Required) (Formerly 002.286) The chemistry of molecules encountered in biochemistry, including their structures, reactions, and physical properties. The concept of metabolic energy in biochemistry. Not to be held with CHEM 2360, CHEM 2361 (002.236), CHEM 2770 (002.277), MBIO 2360, MBIO 2361 (060.236), MBIO 2770 (060.277), or the former courses 002.240 060.240, 002.235 or 060.235. Prerequisite: one of CHEM 1310, CHEM 1311 (002.131), or the former 002.128 with a minimum grade of "C". This course is available only to students registered in the Chemistry Honours or Four Year Major program.

4.5.6 Chemistry Course Descriptions-3000 Level**CHEM 3360** Elementary Quantum Chemistry and Molecular Bonding

(Lab Required)(Formerly 002.336) Elementary quantum chemistry and its applications to structure and bonding in molecules and solids. Prerequisite: CHEM 2280 (002.228) or CHEM 2281 or the former 002.230 (C).

CHEM 3370 Symmetry, Spectroscopy and Structure

(Lab Required) (Formerly 002.337) Applications of symmetry in chemistry; molecular spectroscopy; structure of solids. Prerequisite: CHEM 2280 or CHEM 2281 (002.228) or the former 002.230 (C).

CHEM 3390 Structural Transformations in Organic Chemistry

(Lab Required) (Formerly 002.339) An intermediate course dealing with the reactions of organic chemistry involving functional group transformations and carbon - carbon bond forming reactions. Prerequisite: one of CHEM 2220, CHEM 2221 (002.222), or the former 002.220 (C). CHEM 2290 or CHEM 2291(002.229) is recommended.

CHEM 3400 Inorganic Chemistry: Reactivity and Properties

(Lab Required) Advanced chemistry of the elements with emphasis on chemical reactivity, electronic structure and physical properties of inorganic compounds. The laboratory focuses on the preparation, structure determination and spectroscopic characterization of inorganic compounds. This course may not be held for credit with CHEM 3380. Prerequisite: CHEM 2400 or CHEM 2380 (C).

CHEM 3490 Introduction of Polymers

(Formerly 002.349) An introduction to the formation, structure, physical properties, Undergraduate Studies

and degradation of polymers. Prerequisites: one of CHEM 2220, CHEM 2221 (002.222) or the former 002.220 (C); and CHEM 2290 or CHEM 2291 (002.229), or the former 002.230 (C).

CHEM 3570 Biophysical Chemistry

The application of physical chemistry to biological problems, with an emphasis on quantitative interpretation. Topics include enzyme kinetics, bioenergetics, transport processes and spectroscopy. Prerequisites: CHEM 2360 and MATH 1500 (or equivalent). CHEM 2280 is recommended.

CHEM 3571 Chimie biophysique

L'application de la chimie physique aux problèmes biologiques avec l'emphase sur l'interprétation quantitative. Les sujets comprennent la cinétique enzymatique, la bioénergétique, les processus de transport ainsi que la spectroscopie. Préalables: une note minimale de C dans un de CHEM 2361, CHEM 2360, MBIO 2361 ou MBIO 2360 (060.237) et MATH 1501 ou MATH 1500 (ou l'équivalent). CHEM 2281 est recommandé. Donnée seulement au Collège universitaire de Saint-Boniface.

CHEM 3580 Methods in Physical Organic Chemistry

(Lab Required) (Formerly 002.358) A course dealing with the application of physical chemical principles to organic reaction mechanisms. Prerequisite: one of CHEM 2220, CHEM 2221 (002.222) or the former 002.220 (C). Prerequisite or concurrent registration: CHEM 2290 or CHEM 2291(002.229).

CHEM 3590 Instrumental Analysis

(Lab Required) A course dealing with the theory and use of standard instruments used for chemical and biochemical analyses. An introduction to the interpretation of data obtained from such analyses. This course is designed to follow a classical analytical chemistry course. Not to be held with ENVR 3550 (128.355) or the former 002.347 or the former 002.355. Prerequisite: CHEM 2470 (002.247) (C).

CHEM 3980 Work Term 1

Work assignments in business, industry or government for students registered in the Chemistry Honours or Major Cooperative program. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only)

CHEM 3990 Work Term 2

Work assignments in business, industry or government for students registered in the Chemistry Honours or Major Cooperative program. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only).

4.5.6 Chemistry Course Descriptions-4000 Level**CHEM 4360** Signalling and Regulation of Gene Expression

(Formerly 002.436) The biochemistry of cell response to external stimuli, with emphasis on animals. Cell surface receptors and ligands; signalling to the nucleus; phosphorylation and proteolysis; transcription; gradients in cell patterning. Not to be held with CHEM 4361. Prerequisite: a "C" or better in one of CHEM 2370, CHEM 2371 (002.237), MBIO 2370, MBIO 2371(060.237), the former 002.235, or the former 060.235.

CHEM 4361 Signalisation et régulation de l'expression génétique

(Ancien 002.436) Biochimie de la réponse cellulaire aux stimuli externes, en mettant l'accent sur les animaux. Les récepteurs à la surface des cellules, les ligands, la signalisation au noyau, la phosphorylation, la protéolyse, la transcription et les gradients dans le typage cellulaire. On ne peut se faire créditer CHEM 4361 et CHEM 4360. Préalable : une note minimale de C dans un de CHEM 2371, CHEM 2370 (002.237), MBIO 2371 ou MBIO 2370 (060.237) (ou 002.235, 060.235). Donnée seulement au Collège universitaire de Saint-Boniface.

CHEM 4370 Glycobiology and Protein Activation

(Formerly 002.437) The role of carbohydrate containing biomolecules in biochemistry and their importance for understanding some genetic diseases. The importance of limited proteolysis in activation of biomolecules. Not to be held with CHEM 4371 or the former 002.449. Prerequisite: a "C" or better in one of CHEM 2370, CHEM 2371 (002.237), MBIO 2370, MBIO 2371(060.237), the former 002.235, or the former 060.235.

CHEM 4371 Glycobiologie et activation des protéines

(Ancien 002.437) Le rôle des biomolécules contenant des glucides en biochimie et

leur importance dans la connaissance des maladies génétiques. L'importance de la protéolyse limitée dans l'activation des biomolécules. On ne peut se faire créditer CHEM 4371 et CHEM 4370 et 002.449. Préalable : une note minimale de C dans un de CHEM 2371, CHEM 2370 (002.237), MBIO 2371 ou MBIO 2370 (060.237) (ou 002.235, 060.235). Donné seulement au Collège universitaire de Saint-Boniface.

CHEM 4550 Aquatic Chemistry

(Formerly 002.455) An examination of biogeochemical processes affecting the distribution, speciation and bioavailability of chemical substances in the aquatic environment. The theoretical basis for the chemical behaviour of natural water systems is discussed, as well as the description of processes involved in wastewater treatment. This course is also taught in Environmental Science as ENVR 4550 (128.455). Prerequisite: A grade of "C" or better in one of CHEM 3590, the former 002.347, the former 002.355, or ENVR 3550 (128.355); or permission of the department.

CHEM 4570 Topics in Inorganic Chemistry

(Formerly 002.457) A variety of topics from recent literature. This is an advanced 4000 level course. Registration requires departmental permission. This course may not be offered every year - check with department for availability.

CHEM 4580 Topics in Organic Chemistry

(Formerly 002.458) Selected topics dealing with the structure and reactivity of organic compounds. This is an advanced 4000 level course. Registration requires departmental permission. This course may not be offered every year - check with department for availability.

CHEM 4590 Bioanalytical Methods

(Lab Required) This course introduces different methods used currently for the analysis of biological materials. Qualitative and quantitative aspects are explored. Instrumentation is described and practical methods are designed. Not to be held with the former 002.347. Prerequisite: a grade of "C" or better in CHEM 3590, or ENVR 3550 (128.355), or the former 002.355.

CHEM 4600 Advanced Chemical Techniques

(Lab required) (Formerly 002.460) A workshop course consisting of lectures, problem solving, and advanced instrumental techniques. The course is designed to train potential research students in techniques like NMR, mass spectroscopy, and chromatography. This course is required of all final year Honours students in Chemistry. Prerequisite: one of CHEM 3360 (002.336) (C), CHEM 3400 (C), CHEM 3380 (002.338) (C), CHEM 3390 (002.339) (C), or CHEM 3580 (002.358) (C).

CHEM 4620 Biochemistry of Nucleic Acids

(Formerly 002.462) The structure of nucleic acids; synthesis and sequence determination; interaction with drugs and protein. Not to be held with CHEM 4621. Prerequisite: a "C" or better in one of CHEM 2370, CHEM 2371 (002.237), MBIO 2370, MBIO 2371 (060.237), the former 002.235, or the former 060.235.

CHEM 4621 Biochimie des acides nucléiques

(Ancien 002.462) La structure des acides nucléiques; synthèse et détermination des séquences. Interactions avec les protéines et les médicaments. On ne peut se faire créditer CHEM 4621 et CHEM 4620. Préalable : une note minimale de C dans un de CHEM 2371, CHEM 2370 (002.237), MBIO 2371 ou MBIO 2370 (060.237) (ou 002.235, 060.235). Donné seulement au Collège universitaire de Saint-Boniface.

CHEM 4630 Biochemistry of Proteins

(Formerly 002.463) The structure and function of proteins, their physical and chemical properties and methods for studying them. Not to be held with CHEM 4631. Prerequisite: a "C" or better in one of CHEM 2370, CHEM 2371 (002.237), MBIO 2370, MBIO 2371 (060.237), the former 002.235, or the former 060.235.

CHEM 4631 Biochimie des protéines

(Ancien 002.463) Les structures et fonctions des protéines, leurs propriétés physiques et chimiques et les méthodes utilisées pour les étudier. On ne peut se faire créditer CHEM 4631 et CHEM 4630. Préalable : une note minimale de C dans un de CHEM 2371, CHEM 2370 (002.237), MBIO 2371 ou MBIO 2370 (060.237) (ou 002.235, 060.235). Donné seulement au Collège universitaire de Saint-Boniface.

CHEM 4640 Spectroscopy, Relaxation and Structure

(Formerly 002.464) A course dealing with quantum mechanical manipulations and illustrations from magnetic resonance and other spectroscopies; relaxation and

polarization phenomena. Prerequisite: CHEM 3370 (002.337) (C) or permission of the Instructor.

CHEM 4650 Molecular States and Processes

(Formerly 002.465) A course dealing with various aspects of molecular states and processes including student selected topics. Prerequisite: CHEM 3370 (002.337) (C).

CHEM 4660 Computational Chemistry

An overview of modern computational methods employed in the study of chemical systems, combining theoretical understanding with practical applications. Prerequisite: CHEM 3360

CHEM 4670 Drug Design and Drug Discovery

An understanding of the design, synthesis and interactions of drug molecules. Emphasis will be on novel drug-like molecules in the early stages of drug discovery with special focus on brain diseases and infectious diseases. Prerequisites: CHEM 2220 (C); and one of CHEM 2360, CHEM 2361, MBIO 2360, MBIO 2361, 002.236, 060.236 (C) or CHEM 2860 (C).

CHEM 4680 Organometallic Chemistry

(Formerly 002.468) Chemistry of organometallic compounds of the transition metals and representative elements. Prerequisite: CHEM 3400 (C), or CHEM 3380 (002.338) (C), or CHEM 3390 (002.339) (C).

CHEM 4690 Specific Methods in Organic Synthesis

(Formerly 002.469) Advanced methods and principles of organic synthesis of complex molecules. Prerequisite: CHEM 3390 (002.339) (C).

CHEM 4700 Advanced Biochemistry Laboratory

(Lab required) (Formerly 002.470) A laboratory and workshop consisting of lectures, problem solving, and advanced instrumental techniques such as magnetic resonance spectroscopy, mass spectrometry, circular dichroism, x-ray crystallography, fluorescence spectroscopy and computer analysis of protein sequences. This course is required for all final year Honours students in Biochemistry. Prerequisite or concurrent requirement: CHEM 4620 or CHEM 4621; and CHEM 4630 or CHEM 4631.

CHEM 4710 Research Project in Chemistry or Biochemistry

(Lab required) (Formerly 002.471) A research project in any aspect of chemistry or biochemistry, chosen in consultation with the course administrator and an appropriate supervising faculty member. Written reports and oral presentation at the end of the project will be required. The course is normally available only to final year students in chemistry programs. Not to be held with CHEM 4711 or MBIO 4530 (060.453). Prerequisite: Permission of the course administrator.

CHEM 4711 Projet de recherche en chimie ou biochimie

Un projet de recherche dans n'importe quel aspect de la chimie ou de la biochimie, choisi en consultation avec l'administrateur du cours ou un superviseur approprié de la Faculté. Des rapports écrits et des présentations orales à la fin du projet seront nécessaires. Cours normalement offert seulement lors de leur dernière année du programme de chimie. On ne peut se faire créditer CHEM 4711 et CHEM 4710 et MBIO 4530 (60.453). Préalable : permission de l'administrateur du cours. Donné seulement au Collège universitaire de Saint-Boniface.

CHEM 4800 Topics in Physical/Theoretical Chemistry

Selected topics related to physical chemistry properties of matter, their measurement, and computational methods for studying them. This is an advanced 4000 level course, registration only by Departmental permission. This course may not be offered every year - check with department for availability.

CHEM 4802 Topics in Analytical Chemistry

Selected topics on the most recent and sensitive techniques described in the literature in the Analytical, Bioanalytical and Environmental areas. A selection of topics among separation, surface, ionization, spectroscopy, voltammetry and spectrometry techniques will be covered. This is an advanced 4000 level course, registration only by Department permission. This course may not be offered every year - check with department for availability.

CHEM 4804 Topics in Biochemistry

Selected advanced topics relevant to the study of biomolecules. This is an advanced 4000 level course, registration only by Departmental permission. This course may

not be offered every year - check with department for availability.

CHEM 4980 Work Term 3

Work assignments in business, industry or government for students registered in the Chemistry Honours or Major Cooperative program. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only).

CHEM 4990 Work Term 4

Work assignments in business, industry or government for students registered in the Chemistry Honours or Major Cooperative program. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only).

4.6 Department of Computer Science

4.6 Dept of Computer Science ,

4.6.1 Program Information

4.6.1 Program Information,

Computer technology continues to advance and computer applications are found in all fields and disciplines. As new applications proliferate, opportunities for careers in computing will continue to be strong. Both the Major and the Honours programs offer a co-op option so students may combine education with employment experience.

The department must approve a student's Honour or Major program prior to registration for each Fall/Winter Term. Students must also obtain departmental approval for any and all revisions to their program.

The Computer Science Honours and Major programs, including the Coop programs, and the Software Engineering area of specialization, are accredited by the Computer Science Accreditation Council.

Honours

The Honours program in Computer Science at the University of Manitoba was the first Honours program in Canada to be given professional accreditation by the Canadian Information Processing Society. The program provides an opportunity to study the subject in greater depth than the other programs in Computer Science and leads to an Honours Bachelor of Computer Science degree (B.C.Sc.). In addition, this program gives professional preparation for careers in areas such as software engineering, system design or project management.

An outline of the Honours program is provided below. MATH 1700 or equivalent is strongly recommended as an option. Optional courses are selected in consultation with the department advisor.

To enter the Honours program in Computer Science, a student must have completed at least 24 credit hours with a minimum GPA of 3.00, and also obtained a minimum grade of "B" in COMP 1020. Students are strongly encouraged to complete MATH 1300 and MATH 1500 (or equivalents) with at least a "C" average prior to entering the Computer Science Honours program. Failure to complete these first year Mathematics requirements will result in the inability to register for certain 2000 level required courses.

To continue in the Computer Science Honours program, students must maintain a minimum GPA of 3.00 and complete a minimum of 9 credit hours during each Fall and Winter Term.

To graduate from the Computer Science Honours program students must achieve a minimum GPA of 3.00 and obtain a minimum grade of "C" on the courses that make up the 120 credit hours of the degree.

Students can take a maximum of 90 credit hours of computer science, statistics and mathematics courses. Outside of computer science and mathematics courses, students are encouraged to select courses such that their programs include at least 15 credit hours of study in science, engineering, or business, and at least 9 credit hours of study in the humanities or social sciences.

Undergraduate Studies

Honours Cooperative Option

The first class of students graduated from the Cooperative program in October 1983. This program provides students with a total of 12 months of paid employment by the time they graduate. It enables them to obtain work experience with participating firms in Winnipeg as well as other parts of Canada. For example, students have, in the past, found employment in Calgary, Edmonton, Toronto, Vancouver and Ottawa, and they have found the program an invaluable preparation for their working lives.

Students interested in alternating employment terms and academic terms as part of their Honours Computer Science program may apply to enter the Cooperative Option in their second year in Honours Computer Science. The course and grade requirements **for entry** to this option are the same as those required for entry to the regular Honours program, as indicated in the chart below.

Students should refer to the general faculty regulations for Cooperative Options in Section 3.6, especially for information on performance requirements.

Students should note that the course and grade requirements for the Cooperative Option are the same as that of the regular Honours program. **REMINDER:** Students must complete at least nine (9) credit hours per each Fall and Winter Term (or equivalent for cooperative students) to remain in the Honours program.

To graduate with the Honours degree, a student must present a minimum grade of "C" in each course which contributes to the degree and a GPA of 3.00.

Students can take a maximum of 90 credit hours of computer science, statistics and mathematics courses. Outside of computer science and mathematics courses, students are encouraged to select courses such that their programmes include at least 15 credit hours of study in science, engineering, or business, and at least nine (9) credit hours of study in the humanities or social sciences.

Students in this program will normally graduate following the completion of the Year 4 academic requirements in December, will receive their degree in February, and will be eligible to attend the May Convocation.

Employment term positions available to the students will be approved by the department, and the employers will select the students they wish to employ. Students will apply for openings in the Cooperative Option in April of their second year in the Honours program. They will be notified of their provisional acceptance in the program in September. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

The employment terms will be designed to provide students with the opportunity to acquire practical experience in a computer installation site and to acquire insight into areas of specialization within the computing field. Students can also typically earn enough to defray the cost of their university education.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each of their three employment terms.

Four Year Major

To enter the Major Degree program in Computer Science, a student must have completed at least 24 credit hours with a minimum GPA of 2.00, and also obtained a minimum grade of "C+" in COMP 1020. Students are strongly encouraged to complete MATH 1300 and MATH 1500 (or equivalents) with at least a "C" average prior to entering the Computer Science Honours program. Failure to complete these first year Mathematics requirements will result in the inability to register for certain 2000 level required courses.

To continue in the Major program a student must maintain a minimum GPA of 2.00.

To graduate with the Computer Science Major degree, a student must present a minimum grade of “C” in: STAT 1000, COMP 2080, COMP 2130, COMP 2140, COMP 2150, COMP 2160, COMP 2280, COMP 3350, COMP 3370, COMP 3430 and in each of the 21 credit hours of 3000 and 4000 level Computer Science courses that apply to the Computer Science component of their degree program. Additionally, students must achieve a minimum GPA of 2.00 on the courses that contribute to the 120 credit hours of the degree.

This program is suitable for those students interested in combining a fairly extensive program in Computer Science with broad coverage of another subject or subjects of their choice (Science or non-Science). The program offers greater scheduling flexibility, more relaxed entrance requirements, and a wider range for the inclusion of electives from other disciplines than the Honours program, but it is not considered to offer the same professional training as the Honours program. Admission to graduate programs may be conditional upon completion of additional courses. Students intending to proceed to a master’s degree from the four year Major program must consult with the department at the beginning of their second year of undergraduate study and in each subsequent year.

The student will be able to transfer to the Honours program at the end of the second year, provided that departmental and faculty requirements for the Honours program at that stage are satisfied.

Students, who at the end of University 1 are undecided between the four year Major program and the Honours program, should note that the required courses in Year 2 Honours satisfy the requirements for both the Honours and Major programs. It is suggested that students with the necessary prerequisite standing in University 1 may wish to register in the courses listed for Year 2 of the Honours program, and thus keep both options open.

Students can take a maximum of 90 credit hours of computer science, statistics and mathematics courses. Outside of computer science and mathematics courses, students are encouraged to select courses such that their programmes include at least 15 credit hours of study in science, engineering, or business, and at least nine (9) credit hours of study in the humanities or social sciences. Students may be allowed to take up to 48 credit hours of courses outside the Faculty of Science with departmental permission, despite the faculty maximum of 36 credit hours. The permission would typically be granted if a student is completing a minor outside of Science and may have completed a variety of electives outside the Faculty prior to declaring a minor in one department.

Four Year Major Cooperative Option

To continue in the Major program a student must maintain a minimum GPA of 2.00.

To graduate with the Major degree, a student must present a minimum grade of “C” in: STAT 1000, COMP 2080, COMP 2130, COMP 2140, COMP 2150, COMP 2160, COMP 2280, COMP 3350, COMP 3370, COMP 3430 and in each of the 21 credit hours of 3000 and 4000 level Computer Science courses that apply to the Computer Science component of their degree program. Students must also obtain a minimum GPA of 2.00 on the 120 credit hours that contribute to the degree.

Students can take a maximum of 90 credit hours of computer science, statistics and mathematics courses. Outside of computer science and mathematics courses, students are encouraged to select courses such that their programmes include at least 15 credit hours of study in science, engineering, or business, and at least 9 credit hours of study in the humanities or social sciences. Students may be allowed to take up to 48 credit hours of courses outside the Faculty of Science with departmental permission, despite the faculty maximum of 36 credit hours. The permission would typically be granted if a student is completing a minor outside of Science and may have completed a variety of electives outside the Faculty prior to declaring a minor in one department.

This program provides students with a minimum of 12 months of paid employment by the time they graduate. It enables them to obtain work experience with participating firms in Winnipeg as well as other parts of Canada.

Students interested in alternating employment terms and academic terms as part of their four year Major program in Computer Science may apply to enter the Cooperative Option in their third year of the four year Major program in Computer Science. The course and grade requirements for entry to this option are the same as those required for entry to the regular four year Major program, as indicated in the chart above. Students should refer to the general faculty regulations for Cooperative Options in Section 3.4.

Students should note that the course and grade requirements for the Cooperative Option are the same as that for the regular Major program. Students in this program will normally graduate following the completion of the Year 4 academic requirements in December, will receive their degree in February, and will be eligible to attend the May Convocation.

Employment term positions available to the students will be approved by the department, and the employers will select the students they wish to employ. Students will apply for openings in the Cooperative Option in April of their second year in the Major program. They will be notified of their provisional acceptance in the program in September. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

The employment terms will be designed to provide students with the opportunity to acquire practical experience and insight into areas of specialization within the computing field. Students can also typically earn enough to defray the cost of their university education.

Students are required to register in, and pay fees for, each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each of their three employment terms.

Three Year General

As prescribed with all other faculty regulations in Section 3.2, students in this program must select 18 credit hours of 2000, 3000, and (or) 4000 level courses from each of **two** Science areas. To satisfy the requirement in the area of Computer Science, students must select a minimum of 18 credit hours from the 2000, 3000, and (or) 4000 level courses offered by the department (subject to the Faculty requirement that of the 36 credit hours in the two advanced level Science areas, at least 6 credit hours must be at the 3000/4000 level.).

Area Specializations	Human-Computer Interaction and Computer Graphics
Students who obtain a grade of “C” or better in the courses listed for an area of specialization will receive a notation on their transcript stating that they have met the requirements of that specialization. Students may obtain such a notation for more than one area.	Requires: COMP 2190, COMP 3020, and COMP 3490; one of COMP 4020 or COMP 4490.
Theoretical Computer Science	Databases
Requires: COMP 3170, COMP 3030, and COMP 4420; and two of COMP 4340, 4140, and/or COMP 4510.	Requires: COMP 3380 and COMP 4380; and one of COMP 4710 or COMP 4740.
Networks and Security	Software Engineering
Requires: COMP 3720, COMP 4140, COMP 4580,	Requires: COMP 3010, COMP 3020, COMP 3040, COMP 3380, COMP 3620,

and COMP 4720.	COMP 4050, and COMP 4350.
Artificial Intelligence	Computer Systems
Requires: COMP 3190; and two of COMP 4190, COMP 4200, and/or COMP 4360.	Requires: One of COMP 3010, COMP 3090, or COMP 3290; and two of COMP 4430, COMP 4550, COMP 4510, and/or COMP 4690.

4.6.2 Computer Science

4.6.2 Computer Science Program Charts,

UNIVERSITY 1	YEAR 2	YEAR 3	YEAR 4
HONOURS^{3,4,6} (Including Cooperative Option if selected)³ 120 CREDIT HOURS

MATH 1300 ¹ and MATH 1500 ¹		3 credit hours of 3000 level Computer Science courses	
In University 1 and / or Year 2 the following must be completed:		21 credit hours of approved electives ^{2,4,6}	
STAT 1000 (C)		Work Terms (if Co-op Selected):	
6 credit hours from the Faculty of Arts, which should include the required 3 credit hour "W" course.		COMP 2980, COMP 3980, COMP 4980 must be completed prior to the last academic term	
21 credit hours of approved elective courses ^{2,4,6}			
30 Hours	30 Hours	30 Hours	30 Hours
FOUR YEAR MAJOR^{3,4,5,6} (Including Cooperative Option if Selected)³ 120 CREDIT HOURS			
COMP 1010, COMP 1020 (C+)	COMP 2080, COMP 2130 ¹ , COMP 2140, COMP 2150, COMP 2160, COMP 2280	COMP 3350, COMP 3370, COMP 3430	
MATH 1300 ¹ and MATH 1500 ¹		21 credit hours of 3000 or 4000 level Computer Science courses of which 6 credit hours must be at the 4000 level	
In University 1 or Year 2 the following must be completed:		30 credit hours of approved electives ^{4,6}	
STAT 1000 (C)		Work Terms (if Co-op Selected):	
6 credit hours from the Faculty of Arts, which should include the required 3 credit hour "W" course.		COMP 2980, COMP 3980, COMP 4980 must be completed prior to the last academic term	
21 credit hours of approved electives ^{4,6}			
THREE YEAR GENERAL (90 CREDIT HOURS)			
COMP 1010, COMP 1020	18 credit hours of 2000, 3000, and (or) 4000 level Computer Science courses (subject to the Faculty requirement that of the 36 credit hours to in the two advanced level Science areas, at least 6 credit hours must be at the 3000/4000 level.)		
MINOR			
COMP 1010, COMP 1020	COMP 2140		
Plus a minimum of 9 credit hours from 2000 and (or) 3000 level			

Computer Science courses.
NOTES:
1 MATH 1210 or MATH 1310 may be taken in place of MATH 1300; MATH 1510, MATH 1520, or MATH 1690 (6) may be taken in place of MATH 1500. A "C" average is required in the 6 credit hours of Mathematics used as prerequisite to COMP 2130.
2 It is recommended that STAT 2000 be taken as an elective.
3 Entry to the Honours Cooperative Option and four year Major Cooperative Option is at the end of second year. Employment terms follow 3A (September-December), 3B (May-August) and 4A (January-April). Students in the Cooperative Option must complete three employment terms and receive a passing grade in COMP 2980, COMP 3980 and COMP 4980 prior to the last academic term.
4 Additional information on how students may select their courses can be found at the beginning of this section.
5 IMPORTANT: The four year Major need not be completed in the manner prescribed in the chart above. The chart indicates one possible arrangement of the required courses and is meant to be a guide around which students can plan their program. Students in the Cooperative Option should be aware that while other arrangements are possible, they may jeopardize their chances of obtaining employment by selecting such arrangements. Students should discuss their planned sequence of courses with the department prior to making adjustments to the sequence above.
6 IMPORTANT: a maximum of 90 credit hours of computer science, statistics and mathematics courses can be included in a Major or Honours program.

4.6.3 Computer Science - Mathematics Joint Honours Program (Including Co-op if selected)

4.6.3 Computer Science - Mathematics Joint Honours Program (including Co-op if selected),

The departments of Computer Science and Mathematics offer a joint Honours program for in-depth study in both Computer Science and Mathematics.

Honours Requirements

To enter the Joint Honours Computer Science-Mathematics program, the student must have a minimum grade of "B" in each of COMP 1020, MATH 1300 and MATH 1700 (or any equivalent), and have satisfied the Faculty of Science requirements for entry to the honours program. It is recommended that STAT 2000 be completed in University 1 as an elective.

UNIVERSITY 1	YEAR 2	YEAR 3	YEAR 4
JOINT HONOURS (Including Cooperative Option if selected) 120 CREDIT HOURS

			30 Hours
NOTES:			
1 PHYS 1030 is not suitable for entry to the Honours or the four year Major program. Students must also take PHYS 1070 if they have already taken PHYS 1030. Students can hold credit for both PHYS 1030 and PHYS 1070.			
2 MATH 1310 may be taken in place of MATH 1300; MATH 1510 or MATH 1520 may be taken in place of MATH 1500; MATH 1710 may be taken in place of MATH 1700; MATH 1690 may be taken in place of MATH 1500 and MATH 1700.			
3 As there are no electives in Year 2 of the program, students should complete the University written English requirement in University 1. If not completed in University 1, a "W" course must be completed prior to Year 3 in addition to the required Year 2 courses.			
4 When chosen, the Cooperative Option work terms (2980, 3980, 4980) will normally be completed during the Summer Terms following years 2, 3, and 4 respectively.			

4.6.4 Computer Science – Physics & Astronomy Joint Honours Program

4.6.4 Computer Science – Physics & Astronomy Joint Honours Program , The departments of Computer Science and Physics & Astronomy offer a joint Honours program for in-depth study in both Computer Science and Physics & Astronomy.

To enter the Joint Honours Computer Science-Physics program, the student must have a minimum grade of "B" in each of PHYS 1050 (or "B+" in PHYS 1020), PHYS 1070, MATH 1300, MATH 1500, MATH 1700 (or any equivalent), COMP 1010 and COMP 1020. Students must complete a minimum of 9 credit hours per team in each Fall and Winter term.

To graduate with the Honours degree, a student must obtain a minimum GPA of 3.00 and present a minimum grade of "C" in each course that contributes to the degree

The department must approve a student's Honour or Major program each session. Students must also obtain departmental approval for any and all revisions to their program.

UNIVERSITY 1	YEAR 2	YEAR 3	YEAR 4
JOINT HONOURS (Including Cooperative Option if selected) 120 CREDIT HOURS			
PHYS 1050 (B) (or PHYS 1020 (B+)) and PHYS 1070 ¹ (B)	PHYS 2260, PHYS 2380, PHYS 2390, PHYS 2490, PHYS 2650	PHYS 2600, PHYS 2610, PHYS 3380, PHYS 3670, PHYS 3680	15 credit hours of 3000 and 4000 level Honours Physics courses, with at least 6 credit hours at the 4000 level
COMP 1010, COMP 1020 (B)	COMP 2080, COMP 2130, COMP 2140, COMP 2160, COMP 2280	COMP 2190, COMP 3170, COMP 3430	12 credit hours of 3000 or 4000 level courses from Computer Science, with at least 9 credit hours at the 4000 level
MATH 1300 ² (B), MATH 1500 ² (B), MATH 1700 ² (B)		6 credit hours of 3000 and / or	

4.6.5 Computer Science Course Descriptions-1000 Level

COMP 1010 Introductory Computer Science 1 (Lab Required) (Formerly 074.101) An introduction to computer programming using a procedural high level language. Not to be held with COMP 1011 or COMP 1012. Prerequisite: any grade 12 or 40S Mathematics, or equivalent.

COMP 1011 Introduction à l'informatique I (Labo requis) (Ancien 074.101) Introduction à la programmation par un langage procédural évolué. On ne peut se faire créditer plus d'un cours parmi les suivants: le COMP 1010 et les anciens 074.112, 074.121, 074.123 ou 074.125. Donné seulement au Collège universitaire de Saint-Boniface. Préalable: N'importe quel cours de mathématiques de 12e année ou de niveau 40S, ou l'équivalent. Donné seulement au Collège universitaire de Saint-Boniface.

COMP 1012 Computer Programming for Scientists and Engineers (Lab Required) An introduction to computer programming suitable for solving problems in science and engineering. Students will implement algorithms for numerical processing, statistical analysis and matrix operations. Not to be held with COMP 1010. Prerequisite: Mathematics 40S or equivalent. Co-requisite: MATH1500 (or equivalent).

COMP 1020 Introductory Computer Science 2 (Lab Required) (Formerly 074.102) More features of a procedural language, elements of programming. Not to be held with COMP 1021. Prerequisite: COMP 1010 or COMP 1011 (074.101) (C); or COMP 1012 (C) or High School Computer Science 40S (75%) and any grade 12 or 40S Mathematics, or equivalent.

COMP 1021 Introduction à l'informatique II (Labo requis) (L'ancien 074.102) Introduction à la programmation orientée objet, aux structures de données informatiques et à l'algorithme. On ne peut se faire créditer à la fois le COMP 1020 (074.102). Préalable: COMP 1010 ou COMP 1011; ou Informatique 40S (avec une note minimale de 75%) et n'importe quel cours de mathématiques de la 12ième année ou du niveau 40S, ou l'équivalent. Donné seulement au Collège universitaire de Saint-Boniface.

COMP 1260 Introductory Computer Usage 1 (Formerly 074.126) This course offers an introduction to modern computer services. Areas covered will include word processing, spreadsheets, data management systems and graphics. No prior computer knowledge is necessary. May not hold

with COMP 1261. May not be taken within the Computer Science Honours or Major program.

COMP 1261 Introduction aux services informatiques modernes I (Ancien 074.126) Entre autres, l'accent est mis sur le traitement de texte, les chiffriers, les systèmes pour la gestion de données et le traitement graphique. Ce cours ne demande aucune connaissance préalable en informatique. On inscrit(e) à un programme de majeure ou de spécialisation en Informatique ne peut s'inscrire à ce cours. On ne peut se faire créditer à la fois le COMP 1260. Donné seulement au Collège universitaire de Saint-Boniface.

COMP 1270 Introductory Computer Usage 2 (Formerly 074.127) Using advanced tools to design web pages. Students will also learn how to make effective presentations, work in other operating system environments, use file transfer tools, apply simple script programming to web page designs, and understand current issues relating to technology in society. May not hold with COMP 1271. May not be taken within the Computer Science Honours or Major program. Recommended Prerequisite: COMP 1260, COMP 1261 (074.126) or equivalent knowledge is strongly recommended.

COMP 1271 Introduction aux services informatiques modernes II (Ancien 074.127) Utilisation de nouveaux outils pour la création de pages WEB, apprendre les techniques de présentations efficaces, se familiariser avec d'autres systèmes d'exploitation, utiliser les outils de transfert de fichiers, programmer des scripts de base lors de la conception de pages WEB, comprendre les questions actuelles liées à la technologie dans la société. On ne peut se faire créditer à la fois le COMP 1270 (074.127). Préalable: COMP 1260 ou COMP 1261 (ou connaissances équivalentes) fortement recommandé. Donné seulement au Collège universitaire de Saint-Boniface.

4.6.5 Computer Science Course Descriptions-2000 Level

COMP 2061 Structures discrètes et programmation (Labo requis) (Ancien 074.206F) Introduction aux éléments de la représentation, de l'organisation et de la manipulation des données dans les systèmes informatisés. Méthodes permettant de concevoir et d'utiliser des logiciels d'envergure. On ne peut se faire créditer à la fois le 074.206 et le COMP 2140 (074.214). Préalables: COMP 1021 or COMP 1020 (074.102) (ou l'ancien 074.123), un de MATH 1301 ou MATH 1300 (ou 136.130) (C) ou MATH 1310 (ou 136.131) (ou les anciens 010.114 ou 013.146), et un de MATH 1501 ou MATH 1500 (ou 136.150), MATH 1510 (ou 136.151), l'ancien 136.153, ou MATH 1690 (ou 136.169) (C). Donné seulement au Collège universitaire de Saint-Boniface.

COMP 2080 Analysis of Algorithms (Formerly 074.208) Methods of analyzing the time and space requirements of algorithms. Average case and worst case analysis. Models of computation. Prerequisites: COMP 2130 (074.213) (C); and one of COMP 2140 (074.214), the former 074.206, or COMP 2061 (C). STAT 1000 or STAT 1001 is strongly recommended.

COMP 2130 Discrete Mathematics for Computer Science (Formerly 074.213) An introduction to the set theory, logic, integers, combinatorics and functions for today's computer scientists. Prerequisites: COMP 1020 or COMP 1021 (C), and a "C" average in one of: MATH 1210, MATH 1300, MATH 1301 (136.130), MATH 1310 (136.131); and one of: MATH 1500, MATH 1501(136.150), MATH 1510 (136.151), MATH 1520 (136.152), the former 136.153, or MATH 1690 (136.169).

COMP 2140 Data Structures and Algorithms (Lab Required) (Formerly 074.214) Introduction to the representation and manipulation of data structures. Topics will include lists, stacks, queues, trees, and graphs. Not to be held with COMP 2061 or 074.206. Prerequisites: one of COMP 1020, COMP 1021 (074.102), or the former 074.123 (C).

COMP 2150 Object Orientation (Formerly 074.215) Design and development of object-oriented software. Topics will include inheritance, polymorphism, data abstraction and encapsulation. Examples will be drawn from several programming languages. Not to be held with the former 074.215 or 074.227. Prerequisite: COMP 2160 (074.216); and one of COMP 2140 (074.214), the former 074.206, or COMP 2061(C).

COMP 2160 Programming Practices (Lab Required) (Formerly 074.216) Introduction to issues involved in real-world computing. Topics will include memory management, debugging, compilation, performance, and good programming practices. Not to be held with the former 074.225. Prerequisite: COMP 1020 or COMP 1021 (074.102) (C).

COMP 2190 Introduction to Scientific Computing (Formerly 074.219) An applied computational course introducing topics such as approximation by polynomials, solution of non-linear equations, linear systems, simulation and computational geometry. May not hold with COMP 2191. Prerequisites: One of COMP 1020 or COMP 1021 (074.102), or COMP 1012 (C); and one of MATH 1500, MATH 1501 (136.150) (C), MATH 1510 (136.151) (C), MATH 1520 (136.152) (C), the former 136.153 (C), or MATH 1690 (136.169) (C). Prerequisite or concurrent registration: One of MATH 1300, MATH 1301, or MATH 1310.

COMP 2191 Introduction au calcul scientifique (Ancien 074.219) Un cours en informatique appliquée introduisant des concepts tels que l'approximation par polynômes, la résolution d'équations non linéaires, les systèmes linéaires, la simulation et la géométrie analytique. On ne peut se faire créditer à la fois le COMP 2190. Préalables: COMP 1020 ou COMP 1021 (ou 074.102) (C), et un de MATH 1500 ou MATH 1501 (ou 136.150) (C), MATH 1510 (ou 136.151) (C), MATH 1520 (ou 136.152) (C), l'ancien 136.153 (C) ou MATH 1690 (ou 136.169) (C). Préalable ou concomitant: Un de MATH 1300, MATH 1301, ou MATH 1310. Donné seulement au Collège universitaire de Saint-Boniface.

COMP 2280 Introduction to Computer Systems (Lab Required) (Formerly 074.228) Data representation and manipulation, machine-level representation of programs, assembly language programming, and basic computer architecture. Not to be held with the former 074.222 or 074.240; also not available to students who have previously completed ECE 3610. Prerequisites: COMP 2140 (074.214) (C), COMP 2160 (074.216) (C), and COMP 2130 (074.213) (C).

COMP 2980 Workterm 1 (Formerly 074.298) Work assignment in business, industry, or government for students registered in the Computer Science Cooperative Option. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail)

4.6.5 Computer Science Course Descriptions-3000 Level

COMP 3010 Distributed Computing (Formerly 074.301) Introduction to distributed computing. Topics include task models, server-side computing, database connectivity, information sharing. Prerequisite: one of COMP 2140 (074.214), the former 074.206, or COMP 2061(C); and COMP 2150 (074.215).

COMP 3020 Human-Computer Interaction 1 (Formerly 074.302) Human-computer interaction: human factors and usability, user-centered design, prototyping, usability evaluation. Not to be held with the former 074.371. Prerequisite: one of COMP 2140 (074.214), the former 074.206, or COMP 2061 (C). A course in cognitive psychology, such as PSYC 2480 (017.248), is recommended.

COMP 3030 Automata Theory and Formal Languages (Formerly 074.303) An introduction to automata theory, grammars, formal languages and their applications. Topics: finite automata, regular expressions and their properties; context-free grammars, pushdown automata and properties of context-free languages; turing machines. Applications: lexical analysis, text editing, machine design, syntax analysis, parser generation. Prerequisites: one of COMP 2140 (074.214), the former 074.206, or COMP 2061(C); and COMP 2080 (074.208) (C).

COMP 3040 Technical Communication in Computer Science (Formerly 074.304) This course is designed to help students become more effective and confident writers in the context of the computing profession. Students will be introduced to a broad range of written and oral presentation styles used in the computing workplace. Prerequisite: Students must be enrolled in third year (or higher) of a majors or honours programme in the Department of Computer Science.

COMP 3090 Digital Logic 2

(Formerly 074.309) Design and implementation of digital circuits. Minimization and state reduction, asynchronous circuits, arithmetic circuits, implementation using modern hardware techniques. Not to be held with ECE 2200, or the former 074.342, 074.447 or 024.422. Prerequisite: COMP 2280 (074.228) (C); or both of the former 074.222 and 074.223(C).

COMP 3170 Analysis of Algorithms and Data Structures

(Formerly 074.317) Fundamental algorithms for sorting, searching, storage management, graphs, databases and computational geometry. Correctness and analysis of those algorithms using specific data structures. An introduction to lower bounds and intractability. Prerequisites: one of COMP 2140 (074.214), the former 074.206, or COMP 2061(C); and COMP 2080 (074.208) (C).

COMP 3190 Introduction to Artificial Intelligence

(Formerly 074.319) Principles of artificial intelligence: problem solving, knowledge representation and manipulation; the application of these principles to the solution of 'hard' problems. Prerequisite: one of COMP 2140 (074.214), the former 074.206, or COMP 2061(C).

COMP 3290 Introduction to Compiler Construction

(Formerly 074.329) Introduction to the standard compiler phases: scanning, parsing, symbol-table management, code generation, and code optimization. The emphasis is on the simpler techniques for compiler construction such as recursive descent. Prerequisites: COMP 2140 (or 074.214 or 074.206 or COMP 2061)(C) and COMP 2280 (074.228 or 074.222 or ECE 3610)(C). COMP 2160 (074.216) is recommended.

COMP 3350 Software Engineering 1

(Formerly 074.335) Introduction to software engineering. Software life cycle models, system and software requirements analysis, specifications, software design, testing and maintenance, software quality. Prerequisites: COMP 2150 (074.215) (C), or COMP 2061(074.206) (C).

COMP 3370 Computer Organization

(Formerly 074.337) Principles of computer systems architecture, organization and design. Performance, instruction sets, processors, input/output, memory hierarchies. Prerequisite: COMP 2280 (074.228 or 074.222)(C) or ECE 3610 (C).

COMP 3380 Databases Concepts and Usage

(Formerly 074.338) An introduction to database systems including the relational, hierarchical, network and entity-relationship models with emphasis on the relational model and SQL. Prerequisite: one of COMP 2140 (074.214), the former 074.206, or COMP 2061(C).

COMP 3430 Operating Systems

(Lab Required) (Formerly 074.343) Operating systems, their design, implementation, and usage. Not to be held with the former 074.450 or 074.460. Prerequisites: one of COMP 2140 (074.214 or 074.206 or COMP 2061)(C); and COMP 2280 (C) or ECE 3610 (C). COMP 2160 (074.216) is recommended.

COMP 3440 Programming Language Concepts

(Formerly 074.344) An introduction to major concepts involved in the design of modern programming languages. The imperative, functional, and logical families and differences between them. Facilities for high level data and control structures, modular programming, data typing, and other topics will be covered. Not to be held with the former 074.310 or 074.348. Prerequisite: one of COMP 2140 (074.214), the former 074.206, or COMP 2061(C).

COMP 3490 Computer Graphics 1

(Formerly 074.349) An introductory course in computer graphics including topics such as raster graphics, two and three dimensional transforms, and simple rendering. Prerequisite: one of COMP 2190, COMP 2191 (074.219) (C), or a calculus or algebra course at the 2000 level or higher (C).

COMP 3620 Professional Practice in Computer Science

(Formerly 074.362) Ethical, moral, and legal issues in the development and use of computer systems; standards of practice; implications of advanced computer systems. Prerequisite: one of COMP 2140 (074.214), the former 074.206, or COMP 2061(C).

COMP 3720 Computer Networks 1

(Lab Required) (Formerly 074.372) This course examines the principles of computer networks, including network architectures, algorithms, and performance. Not to be held with ECE 3700 or the former 074.430. Prerequisites: COMP 2140 (074.214) (C) and COMP 2280 (074.228) (C).

COMP 3820 Introduction to Bioinformatics Algorithms

An introduction to problems in molecular biology and computational solutions. Focus on design and analysis of efficient algorithms. Prerequisites: COMP 2080 (074.208) and MBIO 2410 (C); or permission of instructor. Suggested concurrent requirement: COMP 3170.

COMP 3980 Workterm 2

(Formerly 074.398) Work assignment in business, industry, or government for students registered in the Computer Science Cooperative Option. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail). Prerequisite: COMP 2980 (074.298) (P).

4.6.5 Computer Science Course Descriptions-4000 Level

COMP 4020 Human-Computer Interaction 2

(Formerly 074.402) Advanced issues in the field of human-computer interaction. Topics will be selected from current research and development issues in the field of HCI. Prerequisite: COMP 3020 (074.302) (C). A course in cognitive psychology such as PSYC 2480 (017.248) is recommended.

COMP 4050 Project Management

(Formerly 074.405) Introduction to the issues involved in managing large, complex software projects. Prerequisite: COMP 3350 (074.335) (C).

COMP 4060 Topics in Computer Science

(Formerly 074.406) This course will examine topics of interest at the fourth-year level. Specific topics will vary from year to year. Topics will be selected from current research in computer science. Prerequisite: Departmental permission.

COMP 4140 Introduction to Cryptography and Cryptosystems

(Formerly 074.414) Description and analysis of cryptographic methods used in the authentication and protection of data. Classical cryptosystems and cryptoanalysis, the Advanced Data Encryption Standard (ADES) and Public-key cryptosystems. Prerequisite: COMP 2130 (074.213) (C). Students must be registered in fourth year of a Major or Honours programme in the Department of Computer Science.

COMP 4180 Intelligent Mobile Robotics

Topics include artificial intelligence, computer vision, human-robot interaction, and multi-robot systems. These abstract components are grounded in the problem of developing a team of intelligent mobile robots. All topics are covered with specific emphasis on applied problems, e.g. real-time performance. Not to be held with the former COMP 4060 –“Mobile Robotics”. Prerequisites: COMP 2160 (074.216) and COMP 3190 (074.319) (C).

COMP 4190 Artificial Intelligence

(Formerly 074.419) Reasoning with temporal knowledge; causal reasoning; plausible reasoning; nonmonotonic reasoning; abductive reasoning. Prerequisite: COMP 3190 (074.319) (C).

COMP 4200 Expert Systems

Organization of expert systems; knowledge representation in expert systems; inference; knowledge engineering; tools for building expert systems; limitations of expert systems. Prerequisite: COMP 3190 (074.319) (C).

COMP 4340 Graph Theory Algorithms 1

(Formerly 074.434) Spanning trees, connectivity, planar graphs, directed graphs, networks, colouring problems and tours are studied and their applications to computer science will be highlighted. Prerequisite: COMP 3170 (074.317) (C).

COMP 4350 Software Engineering 2

(Formerly 074.435) Advanced treatment of software development methods. Topics will be selected from requirements gathering, design methodologies, prototyping, software verification and validation. Prerequisite: COMP 3350 (074.335) (C).

COMP 4360 Machine Learning

(Formerly 074.436) Learning strategies; evaluation of learning; learning in symbolic

systems; neural networks, genetic algorithms. Prerequisite: COMP 3190 (074.319) (C).

COMP 4380 Database Implementation

(Formerly 074.438) Implementation of modern database systems including query modification/optimization, recovery, concurrency, integrity, and distribution. Prerequisite: COMP 3380 (074.338) (C).

COMP 4420 Advanced Design and Analysis of Algorithms

(Formerly 074.442) Algorithm design with emphasis on formal techniques in analysis and proof of correctness. Computational geometry, pattern matching, scheduling, numeric algorithms, probabilistic algorithms, approximation algorithms and other topics. Prerequisites: COMP 3170 (074.317) (C); and STAT 1000 or STAT 1001 (005.100) (C).

COMP 4430 Operating Systems 2

(Formerly 074.443) Design and implementation of modern operating systems. Detailed analysis of an open source modern operating system and hands-on experience with its kernel and major components. Prerequisites: COMP 2160 (074.216) (C) and COMP 3430 (074.343) (C).

COMP 4490 Computer Graphics 2

(Formerly 074.449) Methods in computer graphics including topics such as representation of curves and surfaces, viewing in three dimensions, and colour models. Prerequisite: COMP 3490 (074.349) (C).

COMP 4510 Introduction to Parallel Computation

(Formerly 074.451) An overview of the architectures of current parallel processors and the techniques used to program them. Not to be held with ECE 4530 or the former 024.446. Prerequisites: COMP 3370 (074.337) (C) and COMP 3430 (074.343) (C).

COMP 4520 Undergraduate Honours Project

(Formerly 074.452) A research based project on a specific area of computer science. Students must find a faculty supervisor and write a proposal in their penultimate term. If acceptable, the defined research is to be carried out in the student's final term. Permission to take the course is given on an individual basis. Available to 4th Year students only. Prerequisite: departmental permission.

COMP 4550 Real-Time Systems

(Formerly 074.455) An introduction to the theory and practice of real-time systems. Topics include the design of real-time systems, scheduling, event based processing, and real-time control. This course may not be held for credit if a student has previously completed both of ECE 4240 and ECE 3760. Prerequisites: COMP 3430 (074.343) (C) and COMP 3370 (074.337) (C).

COMP 4560 Industrial Project

(Formerly 074.456) Students will work in teams on an industrial project. Projects are supplied by the Department. Prerequisites: COMP 3350 (074.335) (C) and departmental permission.

COMP 4580 Computer Security

(Lab Required) (Formerly 074.458) Computer security and information management. This course will examine state-of-the-art knowledge about the issues relevant to data and computer security. Prerequisite: COMP 3430 (074.343) (C); and COMP 3720 (074.372) or the former 074.430 (C).

COMP 4690 Computer Systems and Architecture

(Formerly 074.469) Investigation of today's modern computer architecture and system design concepts, including requirements, specifications, and implementation. Instruction sets, instruction-level parallelism, speculative execution, multi-threaded architectures, memory hierarchy, multiprocessors, storage design and implementation, and interconnection networks. Prerequisite: COMP 3370 (074.337) (C).

COMP 4710 Introduction to Data Mining

Introduction to data mining concepts and their applications. Prerequisite: COMP 3380 (074.338) or consent of department.

COMP 4720 Computer Networks 2

(Formerly 074.472) This course examines advanced topics in computer networks, including network security, network management, performance, and multimedia

networking. Prerequisite: COMP 3720 (074.372) or the former 074.430 (C). Corequisite: COMP 3430 (074.343) (C).

COMP 4740 Advanced Databases

(Formerly 074.474) Parallel, distributed, object-oriented, object-relational, and XML databases; other emerging database technologies. Prerequisite: COMP 3380 (074.338) (C).

COMP 4980 Workterm 3

(Formerly 074.498) Work assignment in business, industry, or government for students registered in the Computer Science Cooperative Option. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail). Prerequisite: COMP 3980 (074.398) (P).

4.9 Department of Mathematics

4.9 Department of Mathematics,

4.9.1 Program Information

4.9.1 Program Information,

Mathematics provides the language, reasoning and analytic tools that many other disciplines use to investigate their areas. These include all the physical sciences, computer and engineering sciences, social sciences, and the biological and health sciences. A wide range of business, industrial, and government programs rely on mathematics to provide insight and analysis. Students may specialize in mathematics alone or in combinations with physics, computer science, economics, or statistics.

The department must approve a student's Honour or Major program each session. Students must also obtain approval for any and all revisions to their program.

NOTE: Students entering either the Faculty of Arts or Science, and intending to take courses from the department, are strongly advised to speak to a Science student advisor or a faculty advisor in the department concerning an appropriate choice of mathematics courses. They may also consult the Department of Mathematics website at umanitoba.ca/science/mathematics.

Honours Requirements

To enter the Honours program in Mathematics, a student must have completed at least 24 credit hours with a minimum GPA of 3.00, and also obtained a minimum grade of "B" in the following courses: MATH 1300; and one of MATH 1700 or MATH 1690 (or equivalent).

To continue in the Mathematics Honours program, students must maintain a minimum GPA of 3.00, and complete a minimum of 9 credit hours during each Fall and Winter Term.

To graduate with the B. Sc. Honours de-gree, a student must maintain a minimum 3.00 GPA and achieve a minimum grade of "C" on all courses that make up the 120 credit hours of the degree.

The program for students who elect Honours in Mathematics is as follows:

Year 2 Mathematics courses as indicated in the chart below and nine (9) credit hours from such fields as physics, chemistry, actuarial mathematics, computer science, statistics, philosophy, or economics. Other fields may be elected with the approval of the department.

Year 3 Mathematics courses as indicated in the chart below and electives to be chosen from the subject fields below or a third or fourth year Mathematics course not already elected. Students performing satisfactorily in Year 2 may obtain permission to take an additional course.

Year 4 Mathematics courses as indicated in the chart below and electives to be chosen from the subject fields below or a third or fourth year Mathematics course not already elected. Students performing satisfactorily in Year 3 may obtain permission to take an additional course.

Electives normally allowed are:

Statistics: STAT 2000, STAT 2400, STAT 3470, STAT 3480, STAT 3400 (STAT 3500), STAT 3800 (STAT 3600), STAT 4100 (STAT 4140), STAT 4520, STAT 4530, STAT 4580, STAT 4590, STAT 4600, STAT 4620, STAT 4630, STAT 4690.

Physics: PHYS 2380, PHYS 2600, PHYS 2610, PHYS 2650, PHYS 3670, PHYS 3680, PHYS 3650, PHYS 3660, PHYS 3630, PHYS 3640, PHYS 3380, PHYS 4390, PHYS 4620, PHYS 4640, PHYS 4650.

Chemistry: CHEM 2280, CHEM 2290, CHEM 3360, CHEM 3370, CHEM 4640, CHEM 4650.

Economics: ECON 2530, ECON 2700, ECON 3700, ECON 3730, ECON 4120, ECON 4130.

Mechanical Engineering: MECH 3490.

Other courses may be chosen with permission of the department. Students are required to obtain the approval of the department concerning their choice of electives.

Double Honours: A student may elect Honours in Mathematics and one other field, subject to the approval of both departments. The Mathematics prescription for a Double Honours program is as indicated in the table below.

Honours programs must be approved each year by the department.

Four Year Major Requirements

To enter the four year Major in Mathematics, a student must have a “C+” in either MATH 1690 or in two of MATH 1300, MATH 1500 and MATH 1700 or any equivalent and have satisfied all Faculty requirements for entry to the program.

To continue in the Mathematics Major degree program students must maintain a minimum DGPA of 2.00.

To graduate with the B. Sc. Major degree, a student must achieve a minimum GPA of 2.00 on the 120 credit hours that contribute to the degree, and a minimum grade of “C” in each of the Major Program Specific courses (see below).

Major Program Specific Courses

MATH 1300, MATH 1500, MATH 1700, (or MATH 1690 in place of MATH 1500 and MATH 1700), MATH 2202, MATH 2352, MATH 2600, MATH 2750, MATH 2800, MATH 3300, MATH 3350, MATH 3400, MATH 3700, MATH 3710, MATH 3740, MATH 3760, and MATH 3800.

It is suggested that among their electives, students might choose courses in which mathematics is extensively used, for example, courses in physics, chemistry and certain courses in economics. For advice on this point students should talk to a faculty member in the department.

Four Year Major in Applied Mathematics with Option (Computer Science, Economics, Statistics)

These programs provide a sound general knowledge of applied mathematics together with a significant number of courses in the option area. Courses in the Computer Science option provide training in aspects of computer science which are most useful to the practicing mathematician. Courses in the Computer Sciences, Economics, and Statistics options are fundamental to each area and provide a strong mathematical basis for further study.

To enter the four year Major in Applied Mathematics with one of the above three options, a student must have a “C+” in either MATH 1690 or two of MATH 1200, MATH 1300, MATH 1500, or MATH 1700, one of which must be either MATH 1500, or MATH 1700, and have satisfied all faculty requirements for entry to the program.

To continue in the Applied Mathematics Major degree programs, students must maintain a minimum DGPA of 2.00.

To graduate with the B. Sc. Major degree, a student must achieve a minimum GPA of 2.00 on the 120 credit hours that contribute to the degree, and a minimum grade of “C” in each of the Major Program Specific courses (see below).

Applied Mathematics Major Program Specific Courses

MATH 1200, MATH 1300, MATH 1500, MATH 1700 (or MATH 1690 in place of MATH 1500 and MATH 1700), MATH 2300, MATH 2400, MATH 2600, MATH 2720, MATH 2730, MATH 2800, MATH 3500, MATH 3600, MATH 3700, MATH 3740, MATH 3800, MATH 3810, and MATH 3820.

It is recommended that students take all 12 credit hours of 1000 level mathematics courses in their initial 30 credit hours; however, students should take at least MATH 1300, MATH 1500 and MATH 1700. See the individual charts below for additional requirements for each option.

Options List: MATH 2450, MATH 2500, MATH 2552, the former MATH 2550, or any 3rd or 4th year Mathematics course.

Three Year General

As prescribed with all other faculty regulations in Section 3.2, students in this program must select 18 credit hours of 2000, 3000, and (or) 4000 level courses from each of two Science areas. To satisfy the requirement in the area of Mathematics, students must select a minimum of 18 credit hours of 2000, 3000, and (or) 4000 level Mathematics courses (subject to the Faculty requirement that of the 36 credit hours in the two advanced level Science areas, at least 6 credit hours must be at the 3000/4000 level).

See a Science Student Advisor or a Faculty Advisor in the department for information regarding entry to or completion of any of the programs outlined below.

4.9.2.1 Mathematics Honours Program Chart

4.9.2.1 Mathematics Honours Program Chart,

4.9.2 Mathematics			
UNIVERSITY 1	YEAR 2	YEAR 3	YEAR 4
MATHEMATICS HONOURS⁴ 120 CREDIT HOURS			
MATH 1300 ¹ (B)	MATH 2202, MATH 2352 (6), MATH 2600, MATH 2750 (6), MATH 2800	48 credit hours³ of 3000 and 4000 level Mathematics⁴ courses, which must include the following: MATH 3230, MATH 3400, MATH 3760 (6), MATH 3800; and one of the two concentrations listed below:	
MATH 1690 (6) (B) (or MATH 1500 ¹ and MATH 1700 ¹ (B))			
The following can be completed in U1 or Year 2: STAT 1000 ² , COMP 1010 ²			
6 credit hours from the Faculty of Arts, which should include the required “W” course		Applied and Computational Mathematics Concentration: MATH 3300 or MATH 3350 (6); MATH 3700 or MATH 3710; and at least 12 credit hours from the former 136.351, MATH 3600, MATH 3810, MATH 3820, MATH 4310, MATH 4610, MATH 4800 or MATH	

		4810	
		Pure Mathematics Concentration:	
		MATH 3350 (6), MATH 3710 and at least 12 credit hours from MATH 3240, MATH 4200, MATH 4350 (6), MATH 4410 or MATH 4420, MATH 4710, MATH 4750 (6)	
18 credit hours of electives (review above list for acceptable electives)	30 credit hours	12 credit hours of approved electives (review above list for acceptable electives)	30 credit hours
30 credit hours	30 credit hours	30 credit hours	30 credit hours

NOTES:

1 MATH 1510 or MATH 1520 may be taken in place of MATH 1500; MATH 1310 may be taken in place of MATH 1300; MATH 1710 may be taken in place of MATH 1700. MATH 1690 may be taken in place of both MATH 1500 and 1700).

2 STAT 1000 and COMP 1010 must be completed by the end of Year 2.

3 Students considering graduate work in pure mathematics should note that many graduate schools may require a student to rectify any deficiencies in MATH 4200, MATH 4210, MATH 4350, MATH 4710, MATH 4720 and MATH 4750.

4 MATH 3200, MATH 3210, MATH 3740 and MATH 3910 cannot be used in an Honours program.

5 **IMPORTANT:** The four year Major programs need not be completed in the manner prescribed in the charts above. Each chart indicates one possible arrangement of the required courses and is meant to be a guide around which students can plan their programs with a view to satisfying the prerequisites of the required courses. Please refer to the text above for the minimum requirements for entry to a four year Major.

(Letters in brackets indicate minimum prerequisite standing for further study. The number 6 in brackets indicates a 6 credit hour course.)

4.9.2.2 Mathematics Double Honours Program Chart

4.9.2.2 Mathematics Double Honours Program Chart,

MATHEMATICS HONOURS DOUBLE⁴ MINIMUM 120 CREDIT HOURS (comprising courses listed in chart below, and the required courses from the other department)			
MATH 1300 ¹ (B), MATH 1690 (6) (B) (or MATH 1500 ¹ and MATH 1700 ¹ (B))	MATH 2202, MATH 2352 (6), MATH 2600, MATH 2750 (6), MATH 2800	MATH 3230, MATH 3350 (6), MATH 3710, MATH 3760 (6)	MATH 3800 Plus 12 credit hours from MATH 4200, MATH 4210, MATH 4350, MATH 4710, MATH 4720, MATH 47503 Plus at least an additional 3 credit hours from among the above and MATH 3220, MATH 3240, MATH 3400, MATH 3430, MATH 3450, MATH 4250, MATH 4400, MATH 4410, MATH 4420, MATH 4430, MATH 4800, MATH 4920, MATH 4960
STAT 1000 ²			
COMP 1010 ²			
Plus 6 credit hours from the Faculty of Arts, which should include the			

required "W" course			

NOTES:

1 MATH 1510 or MATH 1520 may be taken in place of MATH 1500; MATH 1310 may be taken in place of MATH 1300; MATH 1710 may be taken in place of MATH 1700. MATH 1690 may be taken in place of both MATH 1500 and 1700).

2 STAT 1000 and COMP 1010 must be completed by the end of Year 2.

3 Students considering graduate work in pure mathematics should note that many graduate schools may require a student to rectify any deficiencies in MATH 4200, MATH 4210, MATH 4350, MATH 4710, MATH 4720 and MATH 4750.

4 MATH 3200, MATH 3210, MATH 3740 and MATH 3910 cannot be used in an Honours program.

5 **IMPORTANT:** The four year Major programs need not be completed in the manner prescribed in the charts above. Each chart indicates one possible arrangement of the required courses and is meant to be a guide around which students can plan their programs with a view to satisfying the prerequisites of the required courses. Please refer to the text above for the minimum requirements for entry to a four year Major.

(Letters in brackets indicate minimum prerequisite standing for further study. The number 6 in brackets indicates a 6 credit hour course.)

STAT 1000 ³		24 credit hours of approved Economics courses ⁴	
COMP 1010 ³		6 credit hours of Mathematics courses at the 3000 or 4000 level, which must include at least one of MATH 3510, MATH 3600, MATH 3810, MATH 3820, MATH 4310, or any Mathematics course at the 4000 level.	
9 credit hours of electives ⁶ , including the required "W" course.	6 credit hours of approved electives ⁶		
30 Hours	30 Hours	30 Hours	30 Hours

NOTES:

1 MATH 1310 may be taken in place of MATH 1300; MATH 1510, or MATH 1520 may be taken in place of MATH 1500; MATH 1710 may be taken in place of MATH 1700.

2 The combination of MATH 1500¹ and MATH 1700¹ may be replaced by MATH 1690.

3 Some courses may be taken in a different year than indicated; STAT 1000, COMP 1010, MATH 2600 and ECON 3180 (or STAT 2000) may be taken in Year 2.

4 Of the 24 credit hours of electives in Economics in Years 3 and 4, no more than 6 credit hours may be at the 2000 level (with the exception of ECON 2530) and at least 6 credit hours must be at the 4000 level.

5 MATH 3300, plus 3 of the 6 unallocated credit hours in Mathematics in Years 3 and 4, may be replaced by MATH 3350.

6 Students are encouraged to consider useful courses in Computer Science and Statistics as electives.

7 The prerequisite of ECON 3170 is waived for students in this program.

(The number 6 in brackets indicates a 6 credit hour course.)

4.9.2.10 Mathematics - Computer Science Joint Honours Program

4.9.2.10 Mathematics -Computer Science Joint Honours Program,

4.9.2.10 Mathematics - Computer Science Joint Honours Program (Including Co-op if selected)

The departments of Computer Science and Mathematics offer a joint Honours program for in-depth study in both Computer Science and Mathematics.

Honours Requirements

To enter the Joint Honours Computer Science-Mathematics program, the student must have a minimum grade of "B" in each of COMP 1020, MATH 1300 and MATH 1700 (or any equivalent), and have satisfied the Faculty of Science requirements for entry to the honours program. It is recommended that STAT 2000 be completed in University 1 as an elective.

UNIVERSITY 1	YEAR 2	YEAR 3	YEAR 4
JOINT HONOURS (Including Cooperative Option if selected) 120 CREDIT HOURS			
COMP 1010 and COMP 1020 (B)	COMP 2080 ³ , COMP 2140, COMP 2160, COMP 2280	COMP 3030, COMP 3170, COMP 3370, COMP 3430, COMP 4310 (or COMP 4420)	
MATH 1300 ¹ (B), MATH 1690 (6) (B),	MATH 2202, MATH 2352 (6), MATH 2750 (6)	Three of: COMP 3020, COMP 3290, COMP 3350, COMP 3380, COMP 3720	
(or MATH 1500 ¹ and MATH 1700 ¹ (B))	one of: MATH 2600 or MATH 2800	Two of: COMP 4020, COMP 4050, COMP 4290, COMP 4350, COMP 4380, COMP 4720	
STAT 1000 (C)		MATH 3740 (6) or MATH 3760 (6); and MATH 3350 (or MATH 3300 and MATH 3310) (6); and MATH 3400; and whichever of MATH 2600 or MATH 2800 not yet taken	
6 credit hours from the Faculty of Arts, which should include the required 3 credit hour "W" course ²		12 credit hours of 3000 or 4000 level Mathematics courses, of which at least 3 credit hours must be 4000 level	
6 credit hours of electives	Work Term (if Co-op Selected)⁴:	Work Term (if Co-op Selected)⁴:	Work Term (if Co-op Selected)⁴:
	COMP 2980	COMP 3980	COMP 4980
30 Hours	30 Hours	30 Hours	30 Hours

NOTES:

1 MATH 1510 or MATH 1520 may be taken in place of MATH 1500; MATH 1310 may be taken in place of MATH 1300; MATH 1710 may be taken in place of MATH 1700.

2 As there are no electives in Year 2 of the program, students should complete the written English requirement in University 1. If not completed in University 1, a "W" course must be completed prior to Year 3 in addition to the required Year 2 courses.

3 Students in this program will not take COMP 2130 or COMP 3130. COMP 2130 is waived as a prerequisite for students in this program.

4 When chosen, the Cooperative Option work terms (2980, 3980, 4980) will normally be completed during the Summer Terms following years 2, 3, and 4 respectively. (Letters in brackets indicate minimum prerequisite standing for further study. The number 6 in brackets indicates a 6 credit hour course.)

4.9.2.11 Mathematics - Statistics Joint Honours Program

4.9.2.11 Mathematics - Statistics Joint Honours Program,

4.9.2.11 Mathematics - Statistics Joint Honours Program

The departments of Statistics and Mathematics offer a joint Honours program for students wishing in depth study in Statistics and Mathematics.

To enter the Honours program students must have satisfied the Faculty of Science requirements for entry to the program, and have completed STAT 1000, MATH 1300 and either MATH 1690, or MATH 1500 and MATH 1700 or any equivalent with a minimum grade of “B” in each of STAT 1000 and MATH 1690 (or a “B” average in MATH 1500 and MATH 1700).

To graduate with the B. Sc. Honours degree, a student must achieve a minimum DGPA of 3.00 and a minimum grade of “C+” in each of the Honours Program Specific courses, and a minimum grade of “C” on all remaining courses that contribute to the 120 credit hours of the degree. See the Calendar entry for each of the Department of Statistics and the Department of Mathematics for the Honours Program Specific courses.

UNIVERSITY 1	YEAR 2	YEAR 3	YEAR 4
JOINT HONOURS 120 CREDIT HOURS (comprising courses listed in chart below, and electives)			
MATH 1300 ¹ (B), MATH 1690 (6) (B) (or MATH 1500 ¹ and MATH 1700 ¹ (B))	STAT 2000 ² , STAT 2400 MATH 2202, MATH 2352 (6), MATH 2600, MATH 2750 (6), MATH 2800	STAT 3050, STAT 3470, STAT 3480, STAT 3400, STAT 3800	STAT 4100, STAT 4520, STAT 4530
The following courses must be taken in University 1 or Year 2: STAT 1000 (B), COMP 1010 6 credit hours from the Faculty of Arts, which should include the required “W” course 12 credit hours of approved electives	Plus a total of 30 credit hours from: MATH 2400 and any 3000 / 4000 level Mathematics courses, which must include at least 3 credit hours at the 4000 level and must also include MATH 3230, MATH 3740 (6)(or MATH 3760 (6)), MATH 3350 (6) (or MATH 3300), MATH 3700 (or MATH 3710), MATH 3400 and MATH 3800 6 credit hours of approved electives		
30 Hours	30 Hours	30 Hours	30 Hours

NOTES:
1 MATH 1310 may be taken in place of MATH 1300; MATH 1510 or MATH 1520 may be taken in place of MATH 1500; MATH 1710 may be taken in place of MATH 1700.
2 STAT 2000 may be taken in University 1.
(Letters in brackets indicate minimum prerequisite standing for further study. The number 6 in brackets indicates a 6 credit hour course.)

4.9.3 Mathematics Course Descriptions-0 Level

MATH 0401 Habiletés mathématiques
Ce cours a été conçu principalement, mais non exclusive, en fonction des besoins d'étudiants se préparant à suivre des cours d'informatique, de mathématiques, de statistiques ou de physique de niveau universitaire, sans avoir réussi le préalable normal, le Mathématiques 40S. L'étudiant va y apprendre à appliquer des outils mathématiques à des situations élémentaires, puis computationnellement plus compliquées. Les leçons magistrales comporteront une révision de concepts fondamentaux, des exemples, des résolutions de problèmes pratiques, des applications et de la rétroaction. Ce cours ne comporte aucun crédit universitaire; il n'est pas conçu pour remplacer le Mathématiques 40S comme condition d'admission à certains cours de niveau 1000; un résultat de C (60%) est requis au MATH 0401. Préalable : autorisation par le chef du secteur des sciences mathématiques au Collège. Selon le niveau de réussite au test de dépistage en mathématiques administré au Collège, l'étudiant peut être contraint de suivre ce cours avant d'être autorisé à s'inscrire à des cours ayant le préalable Mathématiques 40S.

MATH 0500 Preparing for University Mathematics
A voluntary non-credit mathematics course for students, holding credit in Pre-Calculus 40S or Applied Mathematics 40S or equivalent, who would benefit from

improving their knowledge and skills concerning topics included in the Manitoba secondary school mathematics curriculum.

This course may be taken prior to or concurrently with MATH 1200, 1210, 1300, 1310, 1500, 1510, 1520, 1700, 1710 or 1690. Students participating in this course should purchase the set of notes "Preparing for University Mathematics" from the University of Manitoba Bookstore.

Prerequisite: a grade of 60% in Pre-Calculus 40S, 70% in Applied Mathematics 40S or a grade of 60% or better in the Math Skills course offered by Extended Education. (NOTE: The fee for this course is non-refundable upon withdrawal).

4.9.3 Mathematics Course Descriptions-1000 Level

MATH 1010 Applied Finite Mathematics
(Lab Required) (Formerly 136.101) For students needing to fill the requirement of a university level mathematics course. Introduces students to modern applications of discrete mathematics. Topics include: mathematics of finance, linear programming, graph theory, and game theory. This is a terminal course and may not be used as a prerequisite for other Mathematics courses. This course cannot be used as part of an Honours, Major, General or Minor program in the mathematical sciences. Not available to any student already holding a grade of “C” or better in any Mathematics course with the exception of MATH 1020 (136.102), FA 1020 (054.102), MATH 1190, MATH 1191 (136.119). Not to be taken concurrently with any other Mathematics course with the exception of MATH 1020, FA 1020, MATH 1190, or MATH 1191. No prerequisite.

MATH 1020 Mathematics in Art
(Formerly 136.102) Specific theory, structuring systems, and mathematical methods and principles used in works of art from various historical periods and contexts will be explored in relation to Euclidean and non-Euclidean geometries. Topics include: linear perspective; shapes, patterns, balance and symmetry; ratio, proportion and harmony; and order, dynamics, and chaos. The course will be one half art and one half mathematics, team-taught by faculty from the School of Art and the Department of Mathematics. This course is also given in the School of Art as FA 1020. This is a terminal course and may not be used as a prerequisite for other Mathematics courses. This course cannot be used as part of an Honours, Major, General or Minor program in the mathematical sciences. Not available to any student already holding a grade of “C” or better in any Mathematics course with the exception of MATH 1010 (136.101), MATH 1190, MATH 1191 (136.119). Not to be taken concurrently with any other Mathematics course with the exception of MATH 1010, MATH 1190, or MATH 1191. Not to be held with FA 1020 (054.102). No prerequisite.

MATH 1190 Topics in Mathematics
(Formerly 136.119) This course is designed to give students in various faculties a measure of insight into modern mathematics. Topics are taken from number systems, geometry, and combinatorics. This is a terminal course and may not be used as a prerequisite for other Mathematics courses. This course cannot be used as part of an Honours, Major, General or Minor program in the mathematical sciences. May not hold with MATH 1191. Not available to any student already holding a grade of “C” or better in any Mathematics course with the exception of MATH 1010 (136.101), MATH 1020 (136.102), or FA 1020 (054.102). Not to be taken concurrently with any other Mathematics course with the exception of MATH 1010, MATH 1020, or FA 1020. No prerequisite.

MATH 1191 Sujets choisis en mathématiques
(Ancien 136.119) Ce cours offre aux étudiants de diverses facultés un aperçu des mathématiques modernes. Les sujets étudiés sont tirés des systèmes de nombres, de la géométrie et de la combinatoire. Ce cours est terminal et ne peut être reconnu comme préalable à aucun autre cours universitaire en mathématiques. Ce cours ne peut pas être reconnu aux fins d'un programme spécialisé ou général, majeure ou mineure en sciences mathématiques. L'inscription est interdite à tout étudiant ayant obtenu une note de C ou mieux dans un quelconque cours de mathématiques, à l'exception des cours MATH 1010 (136.101) ou MATH 1020 (FA 1020, 136.102, 054.102). Ce cours ne peut pas être suivi en même temps qu'un autre cours de mathématiques, à l'exception des cours MATH 1010 ou MATH 1020 (FA 1020). Aucun préalable. Donné seulement au Collège universitaire de Saint-Boniface.

MATH 1200 Elements of Discrete Mathematics
(Lab Required) (Formerly 136.120) Sequences and series, trigonometry, complex numbers, algebra of polynomials, approximation of zeros of functions, linear difference equations. Not to be held with MATH 1210, or MATH 1201. Not available to any student holding credit in any Mathematics course numbered 2000 or

higher, unless MATH 1200 is a required course in a student's program. Prerequisite: a minimum grade of 60% in Pre-calculus 40S or the former Mathematics 40S (300), or a grade of 60% or better in the Mathematical Skills course taught by Extended Education.

MATH 1201 Éléments de mathématiques discrètes

(Labo requis) (Ancien 136.120) Suites et séries, trigonométrie, nombres complexes, algèbre de polynômes, approximation des zéros de fonctions, équations aux différences. On ne peut se faire créditer le MATH 1201 et le MATH 1200 ou MATH 1210. L'inscription est interdite à tout étudiant ayant obtenu des crédits de niveau 2000 ou plus en mathématiques, à moins que le cours MATH 1201 soit obligatoire dans le programme de l'étudiant. Préalable : Mathématiques 40S (précalcul) ou l'ancien Mathématiques 40S (300) avec une note minimale de 60 %, ou une note minimale de C dans le l'ancien 136.100 ou le cours Mathematical Skills offert par Extended Education de l'Université du Manitoba, ou le cours Habiletés mathématiques offert au Collège universitaire de Saint-Boniface. Donné seulement au Collège universitaire de Saint-Boniface.

MATH 1210 Techniques of Classical and Linear Algebra

(Lab Required) To introduce a variety of practical algebraic concepts and skills necessary for the study of calculus and advanced engineering mathematics. The emphasis of this course is in the development of methodology and algebraic skill necessary for successful completion of subsequent engineering mathematics courses. This course is intended for Engineering and Geophysics students only. Not to be held with MATH 1200 (136.120), MATH 1201, MATH 1300 (136.130), MATH 1301, or MATH 1310 (136.131). Prerequisites: a minimum grade of 60% in Pre-calculus Mathematics 40S or the former Mathematics 40S (300), or a grade of 60% or better in the Mathematical Skills course taught by Extended Education.

MATH 1300 Vector Geometry and Linear Algebra

(Lab Required) (Formerly 136.130) An introduction to vectors, matrices, systems of linear equations and three-dimensional geometry. Not to be held for credit with MATH 1210, MATH 1310 (136.131), MATH 1301, or the former MATH 1680 (136.168). Prerequisite: a minimum grade of 60% in Pre-calculus Mathematics 40S or the former Mathematics 40S (300), or a grade of 60% or better in the Mathematical Skills course taught by Extended Education. NOTE: A minimum grade of 70% in Applied Mathematics 40S may be used as a prerequisite to this course.

MATH 1301 Géométrie vectorielle et algèbre linéaire

(Labo requis) (Ancien 136.130) Introduction aux vecteurs, aux matrices, aux systèmes d'équations linéaires et à la géométrie à trois dimensions. On ne peut se faire créditer le MATH 1301 et les MATH 1310 (ancien 136.131), MATH 1680 (ancien 136.168), MATH 1210. Préalable : Mathématiques 40S (précalcul) ou l'ancien Mathématiques 40S (300) avec une note minimale de 60 %, ou une note minimale de C dans le l'ancien 136.100 ou le cours Mathematical Skills offert par Extended Education de l'Université du Manitoba, ou le cours Habiletés mathématiques offert au Collège universitaire de Saint-Boniface. Donné seulement au Collège universitaire de Saint-Boniface.

MATH 1310 Matrices for Management and Social Sciences

(Lab Required) (Formerly 136.131) Matrix methods with examples relevant to the Management and Social Sciences. Topics include vectors, matrices, systems of linear equations, and determinants; applications include economic models, the simplex method for linear programming, Markov chains, and game theory. Not to be held with MATH 1210, MATH 1300 (136.130), MATH 1301, or the former MATH 1680 (136.168). Prerequisite: a minimum grade of 60 % in Pre-calculus Mathematics 40S or the former Mathematics 40S (300), or a grade of 60% or better in the Mathematical Skills course taught by Extended Education. NOTE: A minimum grade of 70% in Applied Mathematics 40S may be used as a prerequisite to this course.

MATH 1500 Introduction to Calculus

(Lab Required) (Formerly 136.150) Differentiation and integration of elementary functions, with applications to maxima and minima, rates of change, area, and volume. Not to be held with MATH 1501, MATH 1510 (136.151), MATH 1520 (136.152), the former 136.153, the former MATH 1680 (136.168), or MATH 1690 (136.169). Prerequisite: a minimum grade of 60% in Pre-calculus Mathematics 40S or the former Mathematics 40S (300), or a grade of 60% or better in the Mathematical Skills course taught by Extended Education.

MATH 1501 Introduction au calcul

(labo requis) (Ancien 136.150) Différentiation et intégration des fonctions élémentaires avec application à la théorie des extrêmes, aux taux de changements ainsi qu'aux aires et aux volumes. On ne peut se faire créditer le MATH 1501 (ancien 136.150) et les MATH 1510 (ancien 136.151), MATH 1520 (ancien 136.152), l'ancien 136.153, MATH 1680 (ancien 136.168), MATH 1690 (ancien 136.169). Préalable : Mathématiques 40S (précalcul) ou l'ancien Mathématiques 40S (300) avec une note minimale de 60 %, ou une note minimale de C dans l'ancien 136.100 ou le cours Mathematical Skills offert par Extended Education de l'Université du Manitoba, ou le cours Habiletés mathématiques offert au Collège universitaire de Saint-Boniface. Donné seulement au Collège universitaire de Saint-Boniface.

MATH 1510 Applied Calculus 1

(Lab Required) (Formerly 136.151) Functions and graphs; limits and continuity; differentiation of functions defined explicitly, implicitly and parametrically; applications of derivatives to velocity and acceleration, related rates, maxima and minima; differentials, indefinite and definite integrals, application of integration to area. Physical applications in this course make it especially suitable for students intending to take programs in engineering. Not to be held with MATH 1500, MATH 1501 (136.150), MATH 1520 (136.152), the former 136.153, the former MATH 1680 (136.168), or MATH 1690 (136.169). Prerequisite: a minimum grade of 60% in Pre-calculus Mathematics 40S or the former Mathematics 40S (300), or a grade of 60% or better in the Mathematical Skills course taught by Extended Education; and Physics 40S (300) or a "P" in PHYS 0900 (016.090).

MATH 1520 Introductory Calculus for Management and Social Sciences

(Lab Required) (Formerly 136.152) Differentiation and integration of functions of one variable and partial differentiation of functions of several variables. Emphasizes applications in the areas of management and social science. Not to be held with MATH 1500, MATH 1501 (136.150), MATH 1510 (136.151), the former 136.153, the former MATH 1680 (136.168), or MATH 1690 (136.169). Prerequisite: a minimum grade of 60% in Pre-calculus Mathematics 40S or the former Mathematics 40S (300), or a minimum grade of 60% in the Mathematical Skills course taught by Extended Education.

MATH 1690 Calculus

(Lab Required) (Formerly 136.169) An introduction to the calculus of functions of one variable. This course covers the same material as MATH 1500 (136.150) and MATH 1700 (136.170) together, but in greater depth. Exposure to high school calculus (45S) is desirable, but not essential. This course is mathematically challenging and is intended for students planning to enter an Honours or 4 year Major program in Mathematics. Not to be held with MATH 1500, MATH 1501 (136.150), MATH 1510 (136.151), MATH 1520 (136.152), the former 136.153, the former MATH 1680 (136.168), MATH 1700, MATH 1701 (136.170), MATH 1710 (136.171), or the former 136.173. Prerequisite: a minimum grade of 80 % in Pre-calculus Mathematics 40S or the former Mathematics 40S (300).

MATH 1700 Calculus 2

(Lab Required) (Formerly 136.170) Theory and techniques of integration, curve sketching, volume, arc length, surface area and partial derivatives. Not to be held with MATH 1690 (136.169), MATH 1701, MATH 1710 (136.171), or the former 136.173. Prerequisite: A grade of "C" or better in one of MATH 1500, MATH 1501 (136.150), MATH 1510 (136.151), MATH 1520 (136.152), the former 136.153, or the former MATH 1680 (136.168).

MATH 1701 Calcul II

(Labo Requis) (Ancien 136.170) Théories et techniques d'intégration, tracés de courbes, calculs de volume, de longueur d'arc, d'aires et des dérivées partielles. On ne peut se faire créditer le MATH 1701 (ancien 136.170) et les MATH 1690 (ancien 136.169), MATH 1700, MATH 1710 (ancien 136.171), ancien 136.173. Préalable : MATH 1501 (ancien 136.150), MATH 1510 (ancien 136.151), MATH 1520 (ancien 136.152), l'ancien 136.153 ou l'ancien MATH 1680 (ancien 136.168). Donné seulement au Collège universitaire de Saint-Boniface.

MATH 1710 Applied Calculus 2

(Lab Required) (Formerly 136.171) Applications of integration to volumes, centres of mass, moments of inertia, work and fluid pressure; differentiation of trigonometric, inverse trigonometric, exponential, and logarithmic functions; techniques of integration; polar coordinates. Physical applications in this course make it especially suitable for students intending to take programs in engineering.

Not to be held with MATH 1690 (136.169), MATH 1700 (136.170), MATH 1701, or the former 136.173. Prerequisite: A grade of "C" or better in one of MATH 1500 (136.150), MATH 1501, MATH 1510 (136.151), MATH 1520 (136.152), the former 136.153, or the former MATH 1680 (136.168). Prerequisite or concurrent Requirement: PHYS 1050 or PHYS 1051.

4.9.3 Mathematics Course Descriptions-2000 Level

MATH 2120 Introductory Numerical Methods for Engineers (Lab Required) (Formerly 136.212) Numerical methods applied to problems in engineering; roots of nonlinear equations and systems of linear equations, numerical differentiation and integration, initial-value problems. For Engineering and Geophysics students only. Not to be held with MATH 2600 (136.260) or MATH 2601. Prerequisites: one of COMP 1010, COMP 1011 (074.101), the former 074.111, or the former 074.112 (C); and MATH 2132 or the former MATH 2100 (136.210) (C).

MATH 2130 Engineering Mathematical Analysis 1 (Lab required) Multivariable differential and integral calculus up to and including multiple integrals in cylindrical and spherical coordinates. For Engineering and Geophysics students only. This course may not be held for credit with MATH 2720 (136.272, 136.270), MATH 2750 (136.275), or the former MATH 2110 (136.211). Prerequisites: MATH 1210 and MATH 1710 (136.171) (C).

MATH 2132 Engineering Mathematical Analysis 2 (Lab required) Infinite series, Taylor and Maclaurin Series; ordinary differential equations including Laplace transforms. For Engineering and Geophysics students only. This course may not be held for credit with MATH 2800 (136.280), MATH 2730 (136.273, 136.271), or the former MATH 2100 (136.210). Prerequisites: MATH 1210 (C) and MATH 1710 (136.171) (C).

MATH 2202 Fundamentals of Mathematical Analysis (Formerly MATH 2200) The language of mathematics: logic, methods of proof, elementary set theory. Foundations of calculus: the real numbers, continuity. This course is mathematically challenging and is intended primarily for students registered in Honours, Joint Honours or the Four-Year Major program. Registration for this course requires approval of the department. Not to be held with the former MATH 2200 (136.220). Prerequisites: a grade of C+ or better in one of MATH 1300, MATH 1301 (136.130), or MATH 1310 (136.131); and a grade of C+ or better in one of MATH 1690 (136.169), MATH 1700, MATH 1701 (136.170), or MATH 1710 (136.171).

MATH 2300 Linear Algebra 2 (Formerly 136.230) A continuation of MATH 1300 or MATH 1310. Finite dimensional vector spaces; linear transformation and matrices; eigenvalues and eigenvectors; diagonalization and applications; inner product spaces. Not to be held with MATH 2301, MATH 2352, the former MATH 2350 (136.235), or MATH 3130 (136.313). Prerequisites: a grade of "C" or better in one of MATH 1300, MATH 1301 (136.130), or MATH 1310 (136.131); and a grade of "C" or better in one of MATH 1500, MATH 1501 (136.150), MATH 1510 (136.151), MATH 1520 (136.152), the former 136.153, or MATH 1690 (136.169).

MATH 2301 Algèbre linéaire II (Ancien 136.230) Suite du MATH 1301 (ancien 136.131 ou 013.146). Espaces vectoriels à dimensions finies, transformations linéaires et matrices; vecteurs réels et valeurs réelles. La diagonalisation et ses applications. Espaces avec produits scalaires. On ne peut se faire créditer le MATH 2301 et les MATH 2300, MATH 2352, ancien MATH 2350 (136.235), MATH 3130. Préalables : MATH 1301 ou MATH 1300 (ancien 136.130), MATH 1310 (ancien 136.131), et un de MATH 1501 ou MATH 1500 (ancien 136.150), MATH 1510 (ancien 136.151), MATH 1520 (ancien 136.152), l'ancien 136.153 ou MATH 1690 (ancien 136.169). Donné seulement au Collège universitaire de Saint-Boniface.

MATH 2352 Advanced Linear Algebra (Formerly MATH 2350 or 136.235) Vector spaces, linear transformations, inner product spaces, eigenvalues and eigenvectors, orthogonal and Hermitian matrices, and applications. This course is mathematically challenging and is intended primarily for students registered in Honours, Joint Honours or the Four-Year Major program. Registration in this course requires approval of the department. Not to be held with MATH 2300, MATH 2301 (136.230), the former MATH 2350 (136.235), or MATH 3130 (136.313). Prerequisites: a grade of "C+" or better in one of MATH 1300, MATH 1301 (136.130), or MATH 1310 (136.131); and a grade of "C+" or

better in one of MATH 1690 (136.169), MATH 1700, MATH 1701 (136.170), MATH 1710 (136.171), or the former 136.173.

MATH 2400 Applied Graph Theory (Formerly 136.240) Graphs, planar graphs, directed graphs. Applications such as scheduling, assignments, timetabling, tournaments, networks with algorithms. Prerequisite: one of MATH 1300 (C), MATH 1301(136.130) (C) or MATH 1310 (136.131) (C). Not available to students already holding credit for, or are currently registered in COMP 4340 (074.434).

MATH 2450 Combinatorial Mathematics (Formerly 136.245) An introduction to several areas of current interest in combinatorial mathematics, including techniques of enumeration, graphs, block designs and generalizations, linear recursions. This course is not normally offered every year. May not hold with MATH 2451. Prerequisite: An average of "C" or better in six credit hours of Year 1 Math courses with the exception of the former 136.100, MATH 1010 (136.101), MATH 1020 (136.102), FA 1020 (054.102), MATH 1190 (136.119), or MATH 1191; or consent of department.

MATH 2451 Mathématiques combinatoires (Ancien 136.245) Une introduction à certains sujets d'intérêt courant en mathématiques combinatoires, c'est-à-dire les techniques d'énumération, les graphes, les dessins de blocs et les généralisations, les récursions linéaires. On ne peut se faire créditer le MATH 2451 (ou MATH 2450) à la fois avec l'ancien 136.245. Préalable: une moyenne de "C" ou plus dans un cours d'introduction en sciences mathématiques à l'exception l'ancien 136.100, MATH 1010 (ou 136.101), MATH 1020 (ou 136.102), FA 1020 (ou 054.102) et MATH 1190 ou MATH 1191 (ou 136.119) (ou un cours de Mathématiques de l'ancien niveau 1000), ou consentement du département. Donné seulement au Collège universitaire de Saint-Boniface.

MATH 2500 Introduction to Number Theory (Formerly 136.250) Topics may include divisibility, unique factorization, linear and quadratic congruences, Fermat's theorem. This course may not be held with MATH 2501. Prerequisite: An average of "C" or better in six credit hours of Year 1 Mathematics courses with the exception of the former 136.100, MATH 1010 (136.101), MATH 1020 (136.102), FA 1020 (054.102), MATH 1190 (136.119) and MATH 1191; or consent of department.

MATH 2501 Introduction à la théorie des nombres (Ancien 136.250) Étude de la divisibilité, de la factorisation unique, des congruences linéaire et quadratique et du théorème de Fermat. On ne peut se faire créditer le MATH 2501 et le MATH 2500. Préalable : une note minimale de C dans un cours d'introduction en sciences mathématiques à l'exception de l'ancien 136.100, MATH 1010 (ancien 136.101), MATH 1020 (ancien 136.102) FA 1020 (ancien 054.102) et MATH 1191 ou MATH 1190 (ancien 136.119) ou l'autorisation écrite du département de mathématiques. Donné seulement au Collège universitaire de Saint-Boniface.

MATH 2551 Géométrie moderne (Ancien 136.255) Approche moderne à la géométrie à l'aide de transformations géométriques. Sujets variés, tels isométries, symétries, similarités, inversion circulaire et groupes. On ne peut se faire créditer le MATH 2551 et l'ancien MATH 2550. Préalables : MATH 1690 (ancien 136.169) ou un de MATH 1501, MATH 1500 (ancien 136.150), MATH 1510 (ancien 136.151), MATH 1520 (ancien 136.152), ancien 136.153; aussi, un de MATH 1301 (ancien 136.130), MATH 1310 (ancien 136.131), MATH 1701 ou MATH 1700 (ancien 136.170), MATH 1710 (ancien 136.171), ancien 136.173. Donné seulement au Collège universitaire de Saint-Boniface.

MATH 2552 Geometry of the Plane A modern approach to geometry through the use of geometric transformations. Topics may include isometries, symmetries, similarities, circular inversion and groups. Not to be held with MATH 2551 or the former MATH 2550 (136.255). Prerequisites: MATH 1690 (136.169) (C); or a grade of "C" or better in one of MATH 1500 (136.150), MATH 1501, MATH 1510 (136.151), MATH 1520 (136.152), or the former 136.153, and a grade of "C" or better one of MATH 1300 (136.130), MATH 1301, MATH 1310 (136.131), MATH 1700 (136.170), MATH 1701, MATH 1710 (136.171), or the former 136.173.

MATH 2600 Numerical Mathematics 1 (Formerly 136.260) Elementary techniques of numerical solution of mathematical problems: solution of equations, finite differences, interpolation, systems of

equations, numerical differentiation and integration. This course may not be held for credit with MATH 2120 (136.212) or MATH 2601. Prerequisites: One of MATH 1300 (136.130), MATH 1301, or MATH 1310 (136.131) (C); and one of MATH 1690 (136.169), MATH 1700 (136.170), MATH 1701, MATH 1710 (136.171), or the former 136.173 (C); and COMP 1010 (074.101) or COMP 1011 (C); or consent of instructor.

MATH 2601 Mathématiques numériques I

(Ancien 136.260) Techniques élémentaires de solution numérique de problèmes mathématiques : solution d'équation; différences finies; interpolation, systèmes d'équations; différentiation numérique; intégration numérique. On ne peut se faire créditer le MATH 2601 et le MATH 2600, MATH 2120. Préalables : MATH 1301 ou MATH 1300 (ancien 136.130) ou MATH 1310 (ancien 136.131), MATH 1690 (ancien 136.169), MATH 1701 ou MATH 1700 (ancien 136.170), MATH 1710 (ancien 136.171) ou ancien 136.173, et COMP 1011 ou COMP 1010 (ancien 074.101) ou son équivalent, ou l'autorisation écrite du professeur. Donné seulement au Collège universitaire de Saint-Boniface.

MATH 2701 Calcul III A

(Ancien 136.270) Calcul des variables multiples. On ne peut se faire créditer le MATH 2701 et le MATH 2751 (ancien 136.275) ou les anciens 006.277, 006.228, 006.243, 013.239 ou 013.234. Préalables : le MATH 1301 (ancien 136.130) ou MATH 1311 (ancien 136.131) (ou l'ancien 013.146) et un des MATH 1691 (ancien 136.169), MATH 1701 (ancien 136.170), MATH 1711 (ancien 136.171) ou MATH 1731 (ancien 136.173) (ou les anciens 013.149, 013.159 ou 006.126).

MATH 2711 Calcul III B

(Ancien 136.271) Analyse, suites et séries. On ne peut se faire créditer le MATH 2711 et le MATH 2751 (ancien 136.275), ou les anciens 006.237, 006.238, 006.244, 013.249 ou 013.234. Préalable : un de MATH 1690 (ancien 136.169), MATH 1701 (ancien 136.170), MATH 1711 (ancien 136.171) ou MATH 1731 (ancien 136.173) (ou les anciens 013.149, 013.159, ou 006.126) et un de MATH 1201 (ancien 136.120) ou MATH 2201 (ancien 136.220). Concomitant : MATH 1301 (ancien 136.130) ou le MATH 1311 (ancien 136.131) (ou l'ancien 013.146).

MATH 2720 Multivariable Calculus

(Formerly 136.272) Calculus of several variables. Not to be held with MATH 2721 (136.272, 136.270), MATH 2750 (136.275), the former MATH 2110 (136.211), or MATH 2130. Prerequisites: A grade of "C" or better in one of MATH 1300 (136.130), MATH 1301, or MATH 1310 (136.131) (C); and a grade of "C" or better in one of MATH 1690 (136.169), MATH 1700 (136.170), MATH 1701, MATH 1710 (136.171), or the former 136.173.

MATH 2721 Calcul à plusieurs variables

(Ancien 136.270) Calcul différentiel et intégral à plusieurs variables. On ne peut se faire créditer le MATH 2721 et le MATH 2720 ou le MATH 2751 (ancien 136.275) ou le 136.270 ou le MATH 2110 (ancien 136.211) ou le MATH 2130. Préalables : le MATH 1301, MATH 1300 (ancien 136.130) ou MATH 1311 (ancien 136.131) (ou l'ancien 013.146) et un de MATH 1691 (ancien 136.169), MATH 1701, MATH 1700 (ancien 136.170), MATH 1711 (ancien 136.171) ou l'ancien 136.173. Donné seulement au Collège universitaire de Saint-Boniface.

MATH 2730 Sequences and Series

(Formerly 136.273) Introductory analysis, sequences and series. Not to be held with MATH 2132, the former MATH 2100 (136.210), MATH 2731 (136.273, 136.271), MATH 2750 (136.275). Prerequisite: a grade of "C" or better in one of MATH 1690 (136.169), MATH 1700, MATH 1701 (136.170), MATH 1710 (136.171) or the former 136.173. Prerequisite or concurrent requirement: one of MATH 1300 (136.130), MATH 1301, or MATH 1310 (136.131).

MATH 2731 Suites et séries

(Ancien 136.271) Analyse, suites et séries. On ne peut se faire créditer le MATH 2731 et le MATH 2730 ou le MATH 2750 (ancien 136.275), ou le 136.271 ou le MATH 2132 ou le MATH 2100 (ancien 136.210). Préalables : un de MATH 1690 (ancien 136.169), MATH 1701, MATH 1700 (ancien 136.170), MATH 1711 (ancien 136.171) ou l'ancien 136.173. Concomitant : le MATH 1301, MATH 1300 (ancien 136.130) ou le MATH 1311 (ancien 136.131). Donné seulement au Collège universitaire de Saint-Boniface.

MATH 2750 Intermediate Calculus

(Formerly 136.275) Sequences, series and power series. Differentiation and integration of real-valued functions of several real variables. Not to be held with

MATH 2130, MATH 2132, the former MATH 2100 (136.210), the former MATH 2110 (136.211), MATH 2701, MATH 2720, MATH 2721 (136.272, 136.270), MATH 2730, MATH 2731 (136.273, 136.271). This course is mathematically challenging and is intended primarily for students registered in an Honours, Joint Honours or Four-Year Major program. Registration in this course requires approval of the department. Prerequisites: a grade of "C+" or better in one of MATH 1300, MATH 1301 (136.130), or MATH 1310 (136.131); and a grade of "C+" or better in one of MATH 1690 (136.169), MATH 1700, MATH 1701 (136.170), MATH 1710 (136.171), or the former 136.173.

MATH 2800 Ordinary Differential Equations with Applications 1

(Formerly 136.280) An introduction to the theory of ordinary differential equations, and practical techniques of solution, principally relating to first order and linear higher order equations; linear systems. Applications to problems in science and other selected areas. Not to be held with MATH 2801 (136.280), MATH 2132, or the former MATH 2100 (136.210). Prerequisite: a grade of "C" or better in MATH 1300, MATH 1301 (136.130), or MATH 1310 (136.131) (C). Prerequisite or concurrent requirement: MATH 2720, MATH 2721 or MATH 2750.

MATH 2801 Équations différentielles ordinaires et leurs applications I

(Ancien 136.280) Introduction à la théorie des équations différentielles ordinaires. Techniques pratiques de solution, principalement en ce qui a trait aux équations du premier ordre et aux équations linéaires d'ordre plus élevé. Systèmes linéaires. Applications à des problèmes en sciences ou à d'autres domaines. On ne peut se faire créditer le MATH 2801 et le MATH 2800 ou le MATH 2132 ou le MATH 2100 (ancien 136.210). Préalable : MATH 1301 ou MATH 1300 (ancien 136.130) ou MATH 1310 (ancien 136.131). Concomitant : MATH 2721, MATH 2720 ou MATH 2750. Donné seulement au Collège universitaire de Saint-Boniface.

4.9.3 Mathematics Course Descriptions-3000 Level

MATH 3120 Applied Discrete Mathematics

(Lab Required) (Formerly 136.312) Sets, groups, graphs, and Boolean algebra. For Engineering students only. Not to be held with COMP 2130 (074.213), or the former 074.212. Prerequisites: MATH 2120 (136.212) (C).

MATH 3130 Linear Spaces for Physicists

(Formerly 136.313) A course intended for honours/major students in Physics. Review of linear algebra (MATH 1300) vector spaces; linear transformations; eigenvalues and eigenvectors; inner product spaces; additional topics as time permits. Not to be held with MATH 2300, MATH 2301 (136.230), MATH 2352, or the former MATH 2350 (136.235). Prerequisites: MATH 2750 (136.275) (C); or both of MATH 2720 (or equivalent - MATH 2721, 136.270, 136.272) (C) and PHYS 2490 (or the former 016.237) (C).

MATH 3132 Engineering Mathematical Analysis

Vector integral calculus; series of Ordinary differential equations; Fourier series and Partial differential equations. For Engineering and Geophysics students only. Not to be held with MATH 3740 (136.374), MATH 3800 (136.380), or the former MATH 3100 (136.310). Prerequisites: MATH 2130 (C) and MATH 2132 (C).

MATH 3142 Engineering Mathematical Analysis 4

Introduction to discrete mathematics; systems of linear differential equations; complex function theory and applications. For Engineering and Geophysics students only. Not to be held with MATH 3110 (136.311), MATH 3700 (136.370), MATH 3710 (136.371), or MATH 3800 (136.380). Prerequisites: MATH 2130 (C); and MATH 2132 or the former MATH 2110 (136.211) (C). NOTE: MATH 3132 is highly recommended.

MATH 3220 Set Theory

(Formerly 136.322) Axiom systems, cardinal and ordinal numbers, models of set theory, the axiom of choice, the generalized continuum hypothesis, etc. Not currently offered. Prerequisite: MATH 2202 or the former MATH 2200 (136.220) (C); or consent of department.

MATH 3230 Metric Spaces

(Formerly 136.323) Definition of metric spaces; examples. Compactness, connectedness and continuity in metric spaces. Applications to analysis. Not to be held with MATH 3210 (136.321) Prerequisites: MATH 2750 (136.275) (C); and MATH 2202 or the former MATH 2200 (136.220) (C); or consent of department.

MATH 3240 Topology 1

(Formerly 136.324) Topics include topologies, continuity, connectedness, compactness, and separation properties. Not to be held with MATH 3210 (136.321). Prerequisite: MATH 3230 (136.323) (C) or consent of department.

MATH 3300 Modern Algebra 1

(Formerly 136.330) Introduction to the concepts and structures of modern algebra, including groups, rings and fields; substructure, isomorphism, quotients. Not to be held with MATH 3350 (136.335). Prerequisites: one of MATH 2300 (C), MATH 2301 (136.230) (C), MATH 2352 (C), or the former MATH 2350 (136.235) (C); and an additional 6 credit hours of 2000 level mathematics courses; or consent of department.

MATH 3310 Modern Algebra 2

(Formerly 136.331) Continuation of MATH 3300. Further study of rings and fields: integral domains, polynomial rings; ideals and quotient rings; rational function fields. Lattices and Boolean algebras may be included. Not to be held with MATH 3350 (136.335). Prerequisite: MATH 3300 (136.330) (C).

MATH 3350 Advanced Algebra

(Formerly 136.335) An introduction to abstract algebra with topics taken from among the theories of groups, rings, modules, fields and lattices. This course is taught at an Honours/Major level. Not to be held with MATH 3300 (136.330) or MATH 3310 (136.331). Prerequisites: MATH 2352 or the former MATH 2350 (136.235) (C); and MATH 2202 or the former MATH 2200 (136.220) (C); or consent of department.

MATH 3400 Combinatorics 1

(Formerly 136.340) Basic counting principles, pigeon-hole principle, recursion, graphs. This course is taught at an Honours/Major level. Prerequisites: MATH 2202 or the former MATH 2200 (136.220) (C); and MATH 2352 or the former MATH 2350 (136.235) (C); or consent of department.

MATH 3430 Modern Geometry

(Formerly 136.343) Topics in modern euclidean geometry, affine and projective geometry, inversive geometry, etc. This course is taught at an Honours/Major level. Prerequisites: MATH 2750 (136.275) (C); and MATH 2352 or the former MATH 2350 (136.235) (C); or consent of department.

MATH 3450 Theory of Numbers

(Formerly 136.345) Divisibility, congruences; quadratic residues and reciprocity; introduction to analytic and algebraic number theory. Prerequisites: MATH 2750 (136.275) (C); and MATH 2202 or the former MATH 2200 (136.220) (C); or consent of department.

MATH 3530 Mathematical Problems in the Biological Sciences

(Formerly 136.353) Circulatory system, flow of blood. Enzyme kinetics. Cell populations. Diffusion in biology. Some ecological systems. Prerequisites: MATH 2300 or MATH 2301 (136.230) (C); and MATH 2730 (136.273) (C); and MATH 3800 (136.380) (C); or consent of department.

MATH 3600 Numerical Mathematics 2

(Formerly 136.360) Numerical differentiation and Gaussian quadrature; curve-fitting by splines; numerical methods for initial-value problems, boundary-value problems, and transforms; problems involving large, sparse or ill-conditioned linear systems. Not to be held with MATH 3601 (136.360). Prerequisites: MATH 2600 or MATH 2601 (136.260) (C); MATH 2800 or MATH 2801 (136.280) (C); MATH 2720 or MATH 2721 (136.272, 136.270) (C) and MATH 2730 (MATH 2731, 136.273, 136.271) (C), or MATH 2750 (136.275) (C); and either COMP 1010 or COMP 1011 (074.101) (C); or consent of department.

MATH 3601 Mathématiques numériques II

(Ancien 136.360) Différentiation numérique; quadrature Gaussienne; lissage à l'aide de splines; méthodes numériques pour les problèmes à valeurs initiales et problèmes aux frontières; transformations; problèmes où interviennent les systèmes de grade taille, pars ou mal conditionnés. On ne peut se faire créditer à la fois avec le MATH 3600 (ou 136.360). Préalables: MATH 2600 ou MATH 2601 (ou 136.260) (C); MATH 2800 ou MATH 2801 (ou 136.280) (C); MATH 2720 ou MATH 2721 (ou 136.272) (C) et MATH 2730 ou MATH 2731 (ou 136.271) (C), ou MATH 2750 (ou 136.275) (C); et le COMP 1010 ou COMP 1011 (ou 074.101) (C); ou le consentement du professeur. Donné seulement au Collège universitaire de Saint-

Boniface.

MATH 3700 Applied Complex Analysis

(Formerly 136.370) Concepts and techniques of complex variable theory in the context of applied mathematics. Not to be held with MATH 3142, the former MATH 3110 (136.311), or MATH 3710 (136.371). Prerequisites: MATH 2720 or MATH 2721 (136.272, 136.270) (C); and one of MATH 2730, MATH 2731 (136.273, 136.271) (C), MATH 2750 (136.275) (C), or PHYS 2490 (016.237) (C); or consent of department.

MATH 3710 Complex Analysis 1

(Formerly 136.371) The geometry of the complex plane, analytic functions, contour integration. Cauchy's theorem and formula, the residue theorem, etc. Not to be held with MATH 3142, the former MATH 3110 (136.311), or MATH 3700 (136.370) Prerequisite: MATH 3230 (136.323).

MATH 3740 Methods of Advanced Calculus

(Formerly 136.374) Uniform convergence of series and integrals. Transformations, inverse and implicit function theorems. Vector analysis including Green's and Stokes theorems. Not to be held with MATH 3760 (136.376). Prerequisites: MATH 2300 or MATH 2301 (136.230) (C); MATH 2720 or MATH 2721 (136.272, 136.270) (C); MATH 2730 or MATH 2731 (136.273, 136.271) (C); or consent of department.

MATH 3760 Advanced Calculus

(Formerly 136.376) Vector analysis; The Riemann and Riemann-Stieltjes integral, uniform convergence of series and integrals, power series and Fourier series. This course is taught at an Honours/Major level. Not to be held with MATH 3740 (136.375). Prerequisites: MATH 2750 (136.275) (C); and MATH 2352 or the former MATH 2350 (136.235) (C); and MATH 2202 or the former MATH 2200 (136.220) (C); or consent of department.

MATH 3800 Ordinary Differential Equations with Applications 2

(Formerly 136.380) Laplace transforms, series solutions of ODEs, systems of linear ODEs, applications, introduction to dynamical systems. Prerequisite: MATH 2800 or MATH 2801 (136.280) (C); and one of MATH 2730 (136.273, 136.271), MATH 2731, or MATH 2750 (136.275) (C).

MATH 3810 Partial Differential Equations 1

(Formerly 136.381) Fourier series and introductory Sturm-Liouville theory. Derivation of wave, diffusion and Laplace equations. Solution by separation of variables. Prerequisites: MATH 2720 or MATH 2721 (136.272, 136.270) (C) and MATH 2730 or MATH 2731 (136.273, 136.271) (C), or MATH 2750 (136.275) (C); and MATH 2800 or MATH 2801 (C); or consent of department.

MATH 3820 Introduction to Mathematical Modelling

(Formerly 136.382) An introduction to the principles and techniques involved in the design, development, solution, testing and revision of mathematical models of "real-world" phenomena illustrated through the discussion of case studies. Prerequisites: MATH 2600 or MATH 2601 (136.260) (C); and MATH 2800 or MATH 2801 (136.280) (C). Prerequisite or concurrent requirement: STAT 1000 or STAT 1001.

MATH 3821 Introduction à la modélisation mathématique 1

(L'ancien 136.382) Une introduction aux principes et aux techniques entourant le design, le développement, la résolution, l'expérimentation et la révision de modèles mathématiques de phénomènes du "vrai monde" à l'aide d'études de cas. Préalables: MATH 2600 ou MATH 2601, puis MATH 2800 ou MATH 2801 (ou l'ancien 136.280)(C). Préalable ou concomitant: STAT 1000 ou STAT 1001. Donné seulement au Collège universitaire de Saint-Boniface. L'étudiante(e) ne peut se faire créditer à la fois le MATH 3821 et le MATH 3820.

MATH 3911 Sujets choisis en mathématiques I

(Ancien 136.391) Sujets d'intérêt courant en mathématiques appliquées, selon les besoins et intérêts des étudiants et des étudiantes et du professeur ou de la professeure incluant notamment des sujets spécialisés non abordés dans les autres cours offerts par le secteur. Préalables : autorisation écrite du professeur ou de la professeure. Donné seulement au Collège universitaire de Saint-Boniface.

4.9.3 Mathematics Course Descriptions-4000 Level

MATH 4200 Topology 2

(Formerly 136.420) Topics include Tychonoff spaces, ordered spaces, arbitrary

products, the Stone-Cech compactification, various types of disconnectedness, generalizations of compactness, paracompactness, and introductory homotopy theory. Prerequisite: MATH 3240 (136.324) (C).

MATH 4230 Algebraic Topology

(Formerly 136.423) An introduction to Algebraic Topology. Topics include basic homotopy theory, fundamental groups of topological spaces, free groups and group presentations, classification of low dimensional manifolds, Seifert-Van Kampen theorem, covering spaces and homology theory. Prerequisite: MATH 3240 (136.324) (this course may be taken concurrently with the consent of the department) (C); and MATH 3300 (136.330) (or MATH 3350 may be taken concurrently in place of MATH 3300) (C).

MATH 4250 Mathematical Logic

(Formerly 136.425) The mathematical study of propositional and predicate logic; proof theory. Introduction to model theory (completeness, compactness, Lowenheim-Skolem theorems). Recursion theory, undecidability, incompleteness. Prerequisite: MATH 3350 (136.335) (C) or consent of department.

MATH 4310 Applied Matrix Analysis

Vector and matrix norms; LU, QR, Schur, and singular value decompositions; projections; least squares; Gerschgorin theorem, perturbation theory; positive definite systems; quadratic forms; pseudoinverse; diagonalization; canonical forms; function of matrices; minimal polynomials; Perron-Frobenius theory; and applications. Not to be held with MATH 3500 (136.350). Prerequisite: A grade of "C" or better in one of MATH 2300, MATH 2301 (136.230), MATH 2352, or the former MATH 2350 (136.235).

MATH 4350 Modern Algebra

(Formerly 136.435) A continuation of the topics of MATH 3350, and an introduction to such further topics as category theory, universal algebra, multilinear algebra, and homological algebra. Prerequisite: MATH 3350 (136.335) (C).

MATH 4400 Combinatorics 2

(Formerly 136.440) Generating functions, combinatorial geometry, symbolic dynamics, forbidden configurations, topics from combinatorial matrix theory. Prerequisites: MATH 2750 (136.275) (C), MATH 3400 (136.340) (C), and MATH 3350 (136.335) (C).

MATH 4410 Graphs, Codes and Designs

(Formerly 136.441) Graph decompositions, colourings, and applications, adjacency matrices, triple systems and generalizations, BIBD's, orthogonal designs, linear codes, Hamming codes, error-correction codes, public key cryptography, secret sharing. Prerequisites: MATH 3400 (136.340) (C) and MATH 3350 (136.335) (C).

MATH 4420 Finite Geometry

(Formerly 136.442) Finite fields, finite affine and projective planes, partial geometries and related configurations. Prerequisite: MATH 3350 (136.335) (C) and MATH 3400 (136.340) (C).

MATH 4430 Introduction to Elliptic Curves

(Formerly 136.443) Homogeneous coordinates, non-singular cubic curves, cubic curves of finite fields. Prerequisites: MATH 2500 or MATH 2501 (136.250) (C); and MATH 2352 or the former MATH 2350 (136.235) (C); and either MATH 3300 (136.330) (C) and MATH 3310 (136.331) (C), or MATH 3350 (136.335) (C).

MATH 4610 Introduction to Finite Elements and Boundary Elements

(Formerly 136.461) Introduction to finite element and boundary element techniques for solving partial differential equations. Prerequisites: MATH 3600 (136.360) (C); and either MATH 3740 (136.375) (C) or MATH 3760 (136.376) (C).

MATH 4700 Applied Functional Analysis

(Formerly 136.470) Elements of metric, normed and inner product spaces; operators and inverses; applications in analysis and numerical analysis. Prerequisite: MATH 3740 (136.375) or MATH 3760 (136.376) (C).

MATH 4710 Complex Analysis 2

(Formerly 136.471) Conformal mappings, space of analytic functions, space of meromorphic functions, harmonic functions. Prerequisites: MATH 3240 (136.324) (C), MATH 3710 (136.371) (C), and MATH 3760 (136.376) (C).

MATH 4730 Tensor and Variational Calculus

(Formerly 136.473) An introduction to tensor calculus, differential forms, and variational principles on differentiable and Riemannian manifolds. Prerequisites: six credit hours of 2000 level calculus; and MATH 2800 or MATH 2801 (136.280) (C); or consent of department. Prerequisite or concurrent requirement: MATH 3740 (136.375) or MATH 3760 (136.376).

MATH 4750 Real Variables

(Formerly 136.475) Measure and integration on the real line and on abstract spaces. Classical Banach spaces of functions, and basic functional analysis. Prerequisites: MATH 2352 or the former MATH 2350 (136.235) (C); and MATH 3230 (136.323) (C); and MATH 3760 (136.376) (C); or consent of department.

MATH 4800 Dynamical Systems: Theory and Applications

(Formerly 136.480) Systems of differential equations, linear systems, applied dynamics, phase space, stability, introduction to chaos. Prerequisites: MATH 3600 or MATH 3601 (136.360) (C) and MATH 3800 (136.380) (C).

MATH 4810 Partial Differential Equations 2

(Formerly 136.481) Partial differential equations and their classification. Special functions and generalized Eigen function expansions. Solution by separation of variables, and transform methods. Prerequisite: MATH 3800 (136.380) and MATH 3810 (136.381) (C).

MATH 4900 Project Course in Applied Mathematics 1

(Formerly 136.490) A research project chosen by the student in consultation with the department head and an appropriate supervising Faculty member. A written report will be required, to be submitted by the end of the term. An oral examination may be required. This course is restricted to students in fourth year of the Honours program in Mathematics. Prerequisite: MATH 3820 (136.382) (C).

MATH 4920 Topics in Mathematics 1

(Formerly 136.492) Topics of current interest in Mathematics or Applied Mathematics upon the interests and requirements of students and faculty, and will include specialized topics not available in regular course offerings. Prerequisite: consent of department.

MATH 4921 Sujets choisis en mathématiques

(L'ancien 136.492) Sujets d'intérêt courant en mathématiques ou en mathématiques appliqués, selon les besoins et intérêt des étudiants et professeurs, incluant notamment des sujets spécialisés non disponibles dans les autres cours offerts par le secteur. Préalable: autorisation par le chef du secteur des sciences mathématiques. Donnée seulement au Collège universitaire de Saint-Boniface. L'étudiant(e) ne peut se faire créditer à la fois le MATH 4921 et le MATH 4920.

MATH 4960 Topics in Mathematics 2

(Formerly 136.496) Topics will vary depending upon the interests and requirements of students and faculty, and will include specialized topics not available in regular course offerings. Prerequisite: consent of department.

4.10 Department of Microbiology

4.10 Microbiology Contact Information,

4.10.1 Program Information

4.10.1 Program Information, Microbiology is the study of microorganisms such as bacteria, viruses, fungi, protozoa, and algae, and their interactions with the environment. It is also an area of study that plays a pivotal role in understanding other life science disciplines, such as medicine, agriculture, ecology, and pharmacy. Studies in cloning, recombinant DNA technology, and gene sequencing are part of the program. The departments of Microbiology and Chemistry offer joint Honours programs (including Co-op) and joint Four Year Major programs (including Co-op) in biochemistry and biotechnology (See Sections 4.2 and 4.4).

The department must approve a student's Honours or Major program prior to registration in each session. Students must also obtain approval for any and all revisions to their program.

Microbiology Prerequisite Information

Students are advised to take courses in the year suggested in the charts below; otherwise difficulties may arise with timetabling and prerequisite requirements. Students are responsible for all prerequisites and corequisites of the courses required or selected in all programs below. Since Chemistry courses form an integral part of all Microbiology programs, students should note that Grade 12 mathematics and chemistry are prerequisite to CHEM 1300.

Honours Requirements and Options

To enter the Honours program in Microbiology, a student must have completed at least 24 credit hours with a minimum GPA of 3.00, and also obtained a minimum grade of “B” in MBIO 1010, and a minimum grade of “C+” in CHEM 1310. BIOL 1020, BIOL 1030, STAT 1000 and the 3 credit hours of specified Mathematics or Physics are program requirements and students are strongly encouraged to complete these courses in first year.

* Students interested in studying Microbiology should note that Grade 12 mathematics and chemistry are prerequisite to CHEM 1300. Effective 2009-2010, students will also require Biology 40S (or equivalent) and any Grade 12 mathematics course (or equivalent) for entry to BIOL 1020 (the required prerequisite for BIOL 1030).

To continue in the Microbiology Honours program, students must maintain a minimum GPA of 3.00, and complete a minimum of 9 credit hours during each Fall and Winter Term.

To graduate from the Microbiology Honours program students must achieve a minimum GPA of 3.00 and obtain a minimum grade of “C” on the courses that make up the 120 credit hours of the degree.

Students who wish to elect CHEM 2280, CHEM 2290 or CHEM 2470 as options should note the prerequisites in making a choice of mathematics courses.

By careful choice of electives, programs may be selected giving emphasis to various areas of Microbiology, e.g., Biochemistry and Molecular Biology or Environmental and Ecological Microbiology. In choosing optional courses, students should be aware of any prerequisite requirements.

Honours Cooperative Option

Students interested in alternating academic terms and terms of paid employment as part of their Honours Microbiology program may enter the Cooperative Option in their third year in Honours Microbiology. This program provides students with a minimum of 12 months of paid employment by the time they graduate. It enables them to obtain work experience in research and industry with participating firms, government agencies and university units.

The course and grade requirements **for entry** to this option are the same as those required for entry to the regular Honours program (see above), as indicated in the chart. Students are required to complete the first and second year requirements of the program; and MBIO 3010 and MBIO 3410 before they begin their first employment term. Students should refer to the general faculty regulations for B.Sc. (Honours) Cooperative Options in Section 3.6.

To continue in the Honours Cooperative program a student must maintain a minimum GPA of 3.00, successfully complete each work term, and complete a minimum of 9 credit hours during each academic term. Students should note that the grade requirements for the Cooperative Option are the same as that for the regular Honours program (see above).

Students must check with the Co-op office for application deadline information. They will normally be notified of their provisional acceptance in the program by October. Acceptance into the program is dependent upon the student receiving an employment placement. Employment term positions available to the students will be approved by the department, and the employers will select the students they wish to employ. The first work term can be taken in January or May. Students are

advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each employment term.

Four Year Major

To enter the Major Degree program in Microbiology, a student must have completed at least 24 credit hours with a minimum GPA of 2.00, and also obtained a minimum grade of “C+” in MBIO 1010, and a minimum grade of “C” in CHEM 1310. BIOL 1020, BIOL 1030, STAT 1000 and the 3 credit hours of specified Mathematics or Physics are program requirements and students are strongly urged to complete these courses in first year.

* Students interested in studying Microbiology should note that Grade 12 mathematics and chemistry are prerequisite to CHEM 1300. Effective 2009-2010, students will also require Biology 40S (or equivalent) and any Grade 12 mathematics course (or equivalent) for entry to BIOL 1020 (the required prerequisite for BIOL 1030).

To continue in the Microbiology Major Degree, students must maintain a minimum GPA of 2.00.

To graduate from the 4-year Major degree program in Microbiology, students are required to obtain a minimum GPA of 2.00 on the 120 credit hours that contribute to the degree.

Potential entrants to this program should also note the following:

Students who wish to elect CHEM 2280, CHEM 2290 or CHEM 2470 as options should note the prerequisites in making a choice of mathematics courses.

Chemistry CHEM 2210 must be taken before MBIO 2370 (CHEM 2370). Courses MBIO 2360 and CHEM 2360, and MBIO 2370 and CHEM 2370 are the same and credit cannot be held for both. Microbiology students will normally register in MBIO 2360 and MBIO 2370, but CHEM 2360 and CHEM 2370 will be regarded as equivalents in the four year Major program.

Students must note course and grade prerequisites when selecting 3000 and 4000 level Microbiology courses.

Microbiology MBIO 4530 is not available in this program.

By careful choice of electives, programs may be selected giving emphasis to various areas of Microbiology, e.g., Biochemistry and Molecular Biology or Environmental and Ecological Microbiology. In choosing optional courses, students should be aware of any prerequisite requirements.

The listed requirements are minimum requirements. Students are reminded that should they wish to take further courses in Microbiology, they are at liberty to do so within the degree regulations.

Four Year Major Cooperative Option

Students interested in alternating employment terms and academic terms as part of their Major program in Microbiology may enter the Cooperative Option in their third year in Microbiology. This program provides students with a minimum of 12 months of paid employment by the time they graduate. It enables them to obtain work experience in research and industry with participating firms, government agencies and University units.

The course and grade requirements for entry to this option are the same as those required for entry to the regular Major program. MBIO 3010 and MBIO 3410 are required in Year 3. Students are required to complete the first and second year requirements of the program and MBIO 3410 before they begin their first employment term. See the general faculty regulations for B.Sc. (Major) Cooperative Option in Section 3.4.

Students must check with the Co-op office for application deadline information. They will normally be notified of their pro-visional acceptance in the program by October. Acceptance into the pro-gram is dependent upon the student receiving an employment placement. Employment term positions available to the students will be approved by the department, and the employers will select the students they wish to em-ploy. The first work term can be taken in January or May. Students are ad-vised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be re-quired to submit an employment report upon the completion of each em-ployment term.

Option List for All Microbiology Programs:

Biological Sciences:

BIOL 2242 (BOTN 2010), BIOL 2260 (BOTN 2210), BIOL 2261, BIOL 2300 (BOTN 2370, ZOOL 2370), BIOL 2301 (BOTN 2371, ZOOL 2371), BIOL 2380 (BOTN 2180, ZOOL 2180), BIOL 2381, BIOL 2410 (ZOOL 2530), BIOL 2411 (ZOOL 2531), BIOL 2420 (ZOOL 2540), BIOL 2421 (ZOOL 2541), BIOL 2540 (ZOOL 2150), BIOL 3260 (BOTN 2290), BIOL 3290 (BOTN 3280), BIOL 3291, BIOL 3330 (BOTN 3250), BIOL 3370 (ZOOL 3500), BIOL 3450 (BOTN 2020), BIOL 3452 (BOTN 3010), BIOL 3460 (ZOOL 3530), BIOL 3462 (ZOOL 3540), BIOL 3470, BIOL 3472, BIOL 3500 (BOTN 3460), BIOL 3501, BIOL 3540 (ZOOL 3070), BIOL 3560 (ZOOL 3060), BIOL 3561, BIOL 4242 (BOTN 4130), BIOL 4244 (BOTN 4160), BIOL 4246 (BOTN 4050), BIOL 4250 (BOTN 4210), BIOL 4430 (BOTN 4120), BIOL 4480 (ZOOL 4600), BIOL 4540 (ZOOL 4150), BIOL 4542 (ZOOL 4270), BIOL 4560 (ZOOL 4140)

Chemistry:

CHEM 2280, CHEM 2290, CHEM 2380, CHEM 2400, CHEM 2470, CHEM 3390, CHEM 3590, CHEM 3570, CHEM 4590, CHEM 4360, CHEM 4370, CHEM 4620, CHEM 4630 CHEM 4670

Environmental Science: ENVR 2180

Food Sciences: FOOD 4150, FOOD 4280

General Agriculture: AGECE 2180, AGECE 2370

Pharmacology: PHAC 4030, PHAC 4040

Statistics: STAT 2000

NOTE: Other suitable options may be selected with permission of the de-partment.

Three Year General

As prescribed with all other faculty regulations in Section 3.2, students in this program must select 18 credit hours of 2000, 3000 and (or) 4000 level cours-es from each of **two** Science areas. To satisfy the requirement in the area of Microbiology, students must take a minimum of 18 credit hours of Microbiology courses as prescribed in the chart below (subject to the Faculty requirement that of the 36 credit hours in the two advanced level Science areas, at least 6 credit hours must be at the 3000/4000 level.).

Students wishing to elect courses in Microbiology in fulfilment of the re-quirements for the B.Sc. (General) degree should note the following:

- Students must obtain a grade of “C” or better in the following: MBIO 1010, BIOL 1020, BIOL 1030, CHEM 1300 and CHEM 1310.
- Students are encouraged to elect additional Microbiology courses above the required minimum.
- Microbiology MBIO 2770 and MBIO 2780 (CHEM 2770 and CHEM 2780) are not available in this program.

Minor

Students must complete MBIO 1010, CHEM 1300, CHEM 1310, BIOL 1020, BIOL 1030, plus 12 credit hours of Microbiology courses at the 2000 and (or) 3000 level.

Biochemistry and Biotechnology Programs

The Department of Microbiology, in conjunction with the Department of Chemistry, offers Joint Honours programs, Joint Honours Coopera-tive Option programs, Joint four year Major programs and Joint four year Major Cooperative Option programs in Biochemistry and Biotechnology. See Sections 4.2 Biochemis-try Program and 4.4 Biotechnology Program for full details.

4.10.3 Microbiology Course Descriptions-1000 Level

MBIO 1010 Microbiology I
(Lab Required) Topics will include the definition and history of microbiology, concepts of practical microbiology, prokaryotic cell structure, prokaryotic specialization in gene expression and transfer of genetic information, the role of microbes in environments including the human body, and applications of microbiology to food production and biotechnology. Not to be held with MBIO 1011 or the former MBIO 2100 (MBIO 2101) or MBIO 2110 (MBIO 2111).

Prerequisite or concurrent requirement: BIOL 1020.

MBIO 1011 Microbiologie I

(Labo requis) Le cours traitera de la définition et de l'histoire de la microbiologie, des concepts pratiques de la microbiologie, de la structure des cellules procaryotes, de l'expression des gènes spécifiques aux procaryotes, du transfert de l'information génétique, du rôle des microbes dans l'environnement incluant le corps humain, ainsi que des applications de la microbiologie dans la production des aliments et dans la biotechnologie. On ne peut se faire créditer MBIO 1011 et MBIO 1010 et MBIO 2101, MBIO 2100 (060.210), MBIO 2111, ou MBIO 2110 (060.211). Préalable ou concomitant : BIOL 1021. Donné seulement au Collège universitaire de Saint-Boniface.

MBIO 1220 Essentials of Microbiology

(Formerly 060.122) A review of the essential principles of microbiology including immunity, with emphasis on microbial disease. Not available to students who have previously obtained credit in or are currently enrolled in MBIO 3010 or MBIO 3011 (or 060.301). Prerequisite: any grade 12 or 40S Mathematics, or equivalent. This prerequisite is waived for students in the Baccalaureate Program for Registered Nurses. NOTE: MBIO 1220 is intended for students planning to enter the Faculty of Nursing or other health care or related programs, but may be used as an elective in an Arts or Science program. It may also be used to meet a program requirement for the Honours and Major programs in Microbiology.

4.10.3 Microbiology Course Descriptions-2000 Level

MBIO 2020 Microbiology II

(Lab Required) Topics will include bacterial growth, chromosome replication, the specifics of transcription and translation and their application to the regulation of microbial gene expression. Families of bacterial and animal viruses, their modes of reproduction and pathogenicity will be discussed. Mutation and gene transfer in bacteria will be introduced. Not to be held with MBIO 2021 or MBIO 2110 (60.211), MBIO 2111. Prerequisites: MBIO 1010 or MBIO 1011 and one of CHEM 1310, CHEM 1311 or CHEM 1320 (C).

MBIO 2021 Microbiologie II

(Labo requis) Le cours traitera de la croissance bactérienne, de la réplication de l'ADN, des processus de la transcription et de la traduction ainsi que leurs rôles dans la régulation de l'expression génétique. Les familles des bactéries et de virus animaux, leurs modes de reproduction, leurs pouvoirs pathogènes seront discutés. L'introduction aux mutations et au transfert de gènes bactériens sera également discutée. On ne peut se faire créditer MBIO 2021 et MBIO 2020 et MBIO 2111 ou MBIO 2110 (060.211). Préalables : MBIO 1011 ou MBIO 1010 et un des suivants : CHEM 1311, CHEM 1310 ou CHEM 1320 (002.132). Donné seulement au Collège universitaire de Saint-Boniface.

MBIO 2230 Introductory Biogeochemistry

(Formerly 060.223) The roles and interactions of biological, chemical and geological reactions in determining the composition of the environment. Microorganisms as major agents of biogeochemical change and their roles in the element cycles will be especially emphasized. Not available to students who have previously obtained credit in MBIO 4320 (060.432) or MBIO 4440 (060.444) or are currently registered in MBIO 4440. Prerequisite: one of MBIO 1010, MBIO 1011, BIOL 1030, BIOL 1031 or the former 071.125(C); and CHEM 1310 or CHEM 1311 (002.131) (C).

MBIO 2360 Biochemistry 1: Biomolecules and an Introduction to Metabolic Energy

(Lab Required) (Formerly 060.236) An introductory course dealing with kinds of molecules encountered in biochemistry, and the concept of metabolic energy as a product of catabolism and a requirement for biosynthesis. This course is also given in Chemistry as CHEM 2360. Not to be held with MBIO 2361, MBIO 2770 (060.277), CHEM 2360, CHEM 2361 (002.236), CHEM 2860 (002.286), or CHEM 2770 (002.277) Prerequisites: CHEM 1310 or CHEM 1311 (002.131); and one of BIOL 1030, BIOL 1031, or the former 071.125, both courses with a minimum grade of "C". NOTE: Students may hold this course for credit in the B.Sc. General Degree program, but may not use it to fulfill the minimum requirement of 12 credit hours in 2000 level Chemistry (pre-September 2008 regulations). Those students following the new B.Sc. General Degree regulations (effective 2008-09) are able to use this course as advanced level credit in both Microbiology and Chemistry.

MBIO 2361 Biochimie I : Les molécules biochimiques et une introduction à l'énergie métabolique

(Labo requis) (Ancien 060.236) Introduction aux différents types moléculaires rencontrés en biochimie ainsi qu'au concept d'énergie métabolique comme produit du catabolisme nécessaire à la biosynthèse. Aussi offert par le département de chimie sous la cote CHEM 2361. On ne peut se faire créditer MBIO 2361 et MBIO 2360 (060.236) et MBIO 2770 (060.277), CHEM 2361, CHEM 2360 (002.236), CHEM 2860 (002.286) ou CHEM 2770 (002.277). Préalables : une note minimale de C dans CHEM 1311 ou CHEM 1310 (002.131) et une note minimale de C dans BIOL 1031 ou BIOL 1030 (071.125). NOTE : MBIO 2361 ne peut être reconnu aux fins des 12 crédits requis par le département de chimie pour les étudiantes et les étudiants inscrits à Université 1 avant 2007-2008. Pour les personnes qui suivent les nouveaux règlements du baccalauréat général (2008-2009), MBIO 2361 peut faire partie des 18 crédits de chimie ou de microbiologie de niveau avancé. Donné seulement au Collège universitaire de Saint-Boniface.

MBIO 2370 Biochemistry 2: Catabolism, Synthesis, and Information Pathways

(Lab Required) (Formerly 060.237) An introductory course dealing with the basic metabolic processes that occur in living cells, including the production and use of metabolic energy, the breakdown and synthesis of biomolecules; the synthesis of DNA, RNA and proteins; and the regulation of these processes. This course is also given in Chemistry as CHEM 2370. Not to be held with MBIO 2371, MBIO 2780 (060.278), CHEM 2370, CHEM 2371 (002.237), or CHEM 2780 (002.278). Prerequisites: CHEM 2210 (002.221) (C); and one of MBIO 2360 (060.236), MBIO 2361, CHEM 2360 (002.236), or CHEM 2361 (C). NOTE: Students may hold this course for credit in the B.Sc. General Degree program, but may not use it to fulfill the minimum requirement of 12 credit hours in 2000 level Chemistry (pre-September 2008 regulations). Those students following the new B.Sc. General Degree regulations (effective 2008-09) are able to use this course as advanced level credit in both Microbiology and Chemistry.

MBIO 2371 Biochimie II : Catabolisme, synthèse et les voies d'information

(Labo requis) (Ancien 060.237) Introduction aux processus métaboliques cellulaires de base incluant la production et l'utilisation de l'énergie métabolique, la dégradation et la synthèse des molécules biochimiques, la synthèse de l'ADN, de l'ARN et des protéines et la régulation de ces processus. Aussi offert par le département de chimie sous la cote CHEM 2371. On ne peut se faire créditer MBIO 2371 et MBIO 2370 (060.237) et MBIO 2780 (060.278), CHEM 2371, CHEM 2370 (002.237), ou CHEM 2780 (002.278). Préalables : une note minimale de C dans un de MBIO 2361, MBIO 2360 (060.236), CHEM 2361 ou CHEM 2360 (002.236) et dans CHEM 2211 ou CHEM 2210 (002.221). NOTE : MBIO 2371 ne peut être reconnu aux fins des 12 crédits requis par le département de chimie pour les étudiantes et étudiants inscrits à Université 1 avant 2007-2008. Pour les personnes qui suivent les nouveaux règlements du baccalauréat général (2008-2009), MBIO 2371 peut faire partie des 18 crédits de chimie ou de microbiologie de niveau avancé. Donné seulement au Collège universitaire de Saint-Boniface.

MBIO 2410 Essentials of Molecular Biology

An introduction to the mechanisms, themes and patterns that are present in the molecular biology of both eukaryotic and prokaryotic organisms. The applications of molecular biology to disciplines such as genomics, applied bioinformatics and medical microbiology will be discussed. Not available to students who have previously obtained credit in MBIO 2020 or MBIO 2021 (060.211). Prerequisite: one of grade 12 Biology, grade 12 Chemistry, BIOL 1000, CHEM 1000, or any higher level Chemistry or Biology course; or consent of department. NOTE: MBIO 2410 is intended for students outside of Microbiology and Biological Sciences who require an introduction to molecular biology, such as those with interests in bioinformatics, biophysics, or bioengineering. It may be used to fulfill Microbiology Major or Honours program course requirements and it may serve as Advanced level Microbiology in the three-year general degree program if completed prior to or concurrently with MBIO 2020.

MBIO 2770 Elements of Biochemistry 1

(Lab Required) (Formerly 060.277) Basic concepts of biochemistry including the properties of biomolecules (amino acids and proteins, enzymes, carbohydrates, lipids, and nucleic acids) and aspects of energy production in cells. For students in Agricultural and Food Sciences, Human Ecology, and four-year Biological Sciences programs in Science. May not be used as part of an Honours, Major, General, or Minor program in Chemistry or in Microbiology. This course is also given in Chemistry as CHEM 2770. Not to be held with CHEM 2770 (002.277), MBIO 2360,

MBIO 2361 (060.236), CHEM 2360, CHEM 2361 (002.236), or CHEM 2860 (002.286). Prerequisites: CHEM 1310 or CHEM 1311 (002.131) (C) or CHEM 1320 (or 002.132) (C), plus six credit hours of university level biological sciences.

MBIO 2780 Elements of Biochemistry 2
(Lab Required) (Formerly 060.278) The continuation of MBIO 2770 (CHEM 2770), dealing with nitrogen and lipid metabolism, representative biosynthetic pathways, and synthesis and importance of DNA, RNA and proteins. For students in Agricultural and Food Sciences, Human Ecology, and four-year Biological Sciences programs in Science. May not be used as part of an Honours, Major, General, or Minor program in Chemistry or Microbiology. This course is also given in Chemistry as CHEM 2780. Not to be held with CHEM 2780 (002.278), MBIO 2370, MBIO 2371 (060.237), CHEM 2370, or CHEM 2371 (002.237). Prerequisite: A grade of "C" or better in one of MBIO 2770 (060.277), CHEM 2770 (002.277), MBIO 2360, MBIO 2361 (060.236), CHEM 2360, or CHEM 2361 (002.236).

4.10.3 Microbiology Course Descriptions-3000 Level

MBIO 3000 Applied Biological Safety

A comprehensive overview of (i) applied biological safety in research and industrial environments and (ii) the disease-causing features of relevant infectious agents and considerations for their containment. The course consists of lectures and demonstration components. Prerequisite: MBIO 1010 (MBIO 1011)(C) or the former MBIO 2100 (or equivalent MBIO 2101, 060.210) (C); and one of CHEM 1310, CHEM 1311 (002.131), CHEM 1320 (002.132) or permission of instructor. Check with department for availability.

MBIO 3010 Mechanisms of Microbial Disease

(Formerly 060.301) A consideration of host-parasite relationships, an introduction to the immune response, microbial pathogenesis, viral diseases, clinical microbiology and public health, and an introduction to antimicrobial agents. Not to be held with MBIO 3011. Prerequisites: MBIO 2020 (MBIO 2021)(C) or the former MBIO 2100 (or equivalent MBIO 2101, 060.210) (C); and one of MBIO 2370, MBIO 2371(060.237), CHEM 2370, or CHEM 2371 (002.237) (C).

MBIO 3011 Mécanismes des maladies microbiennes

(Ancien 060.301) Étude des relations hôtes-parasites. Introduction à la réponse immunitaire, à la pathogénie microbienne, aux maladies virales, à la microbiologie clinique, à la santé publique et aux agents antimicrobiens. On ne peut se faire créditer MBIO 3011 et MBIO 3010. Préalables : une note minimale de C dans MBIO 2021 ou MBIO 2020 (MBIO 2100, MBIO 2101, 060.210) et une note minimale de C dans un de MBIO 2371, MBIO 2370 (060.237), CHEM 2371 ou CHEM 2370 (002.237). Donné seulement au Collège universitaire de Saint-Boniface.

MBIO 3030 Microbiology III

(Lab Required) The course will include an introduction to microbial growth and genomics approaches used for the analysis of microbial metabolism. Using these tools, the physiology of microbial cell walls, transport, and motility, as well as microbial metabolism as related to ATP production, respiration, fermentation and carbon fixation will be discussed. Not to be held with MBIO 3031 or the former MBIO 2100 (60.210). Prerequisites: MBIO 2020 (MBIO 2021)(C); and one of MBIO 2370, MBIO 2371, CHEM 2370, CHEM 2371 (C); or consent of instructor.

MBIO 3031 Microbiologie III

(Labo requis) Ce cours présentera une introduction à la croissance microbienne et aux approches génomiques utilisées pour l'analyse du métabolisme microbien. En utilisant ses outils, la physiologie de la paroi cellulaire microbienne, le transport, la mobilité ainsi que le métabolisme microbien en relation avec la production d'ATP, la respiration, la fermentation et la fixation du carbone seront discutés. On ne peut se faire créditer MBIO 3031 et MBIO 3030 et MBIO 2101 ou MBIO 2100 (060.210). Préalables : une note minimale de C dans MBIO 2021 ou MBIO 2020 ou l'autorisation du professeur et une note minimale de C dans un de MBIO 2371, MBIO 2370 (060.237), CHEM 2371 ou CHEM 2370 (002.237).

MBIO 3280 Microbial Communities

(Lab Required) This course will examine microbial communities, which will be discussed in terms of their composition, physiological adaptations and their effects on their abiotic and biological surroundings. Topics will include nutrient cycling, biodegradation and adaptation to extreme environments, and the applications arising from these microbial functions. Methods for quantitation of microbial biomass and biological activity will be discussed. This course may not be held for credit with

MBIO 2280. Prerequisites: both MBIO 1010 (MBIO 1011)(C) and CHEM 1310 (CHEM 1311, 002.131)(C); or MBIO 2100 (MBIO 2101, 060.210)(C). MBIO 2020 (MBIO 2020, MBIO 2110) and MBIO 2410 are recommended prerequisites.

MBIO 3410 Molecular Biology

(Formerly 060.341) A rigorous treatment of the foundations of modern day molecular biology as it pertains to molecular disease, gene and cell manipulation, and cellular controls. Not to be held with MBIO 3411. Prerequisites: One of MBIO 2370, MBIO 2371 (060.237), CHEM 2370, CHEM 2371 (002.237), MBIO 2780 (060.278), or CHEM 2780 (002.278) (C); and a C or better in one of MBIO 2020 (MBIO 2021), MBIO 2110 (MBIO 2111), BIOL 2520 (BIOL 2521, ZOOL 2280, ZOOL 2281) or BIOL 2500 (BIOL 2501, BOTN 2460, BOTN 2460).

MBIO 3411 Biologie moléculaire

(Ancien 060.341) Traitement rigoureux des bases de la biologie moléculaire moderne reliées à la maladie moléculaire, aux manipulations génétiques et cellulaires, ainsi qu'aux contrôles cellulaires. On ne peut se faire créditer MBIO 3411 et MBIO 3410. Préalables : une note minimale de C dans un de MBIO 2371, MBIO 2370 (060.237), CHEM 2371, CHEM 2370 (002.237), MBIO 2780 (060.278) ou CHEM 2780 (002.278) et un des cours suivants (avec une note minimale de C) : MBIO 2021, MBIO 2020, (MBIO 2111, MBIO 2110, 060.211), BIOL 2521 ou BIOL 2520 (ZOOL 2281, ZOOL 2280, 022.228), ou BIOL 2501 ou BIOL 2500 (BOTN 2461, BOTN 2460, 001.246). Donné seulement au Collège universitaire de Saint-Boniface.

MBIO 3430 Molecular Evolution

(Formerly 060.343) An analysis starting with prebiotic evolution, progressing through the elaboration of macromolecules and examining their adaptation to their function as cellular components. Proteins, carbohydrates, and nucleic acids as structural, catalytic, and genetic elements in evolution of living systems. Prerequisite: MBIO 2410 (C) or MBIO 3410 (C) or permission of instructor. MBIO 2020 (MBIO 2021) and one of MBIO 2370, MBIO 2371, CHEM 2370, CHEM 2371, MBIO 2780 or CHEM 2780 are strongly recommended for students who have not completed MBIO 3410.

MBIO 3450 Regulation of Biochemical Processes

(Formerly 060.345) Mechanisms of regulation of enzyme activity, including allostery, control of selected biosynthetic and degradative pathways and regulation of gene expression. Contact department regarding availability. Not to be held with MBIO 3451. Prerequisites: MBIO 2020 (MBIO 2021) or MBIO 2110 (MBIO 2111) (C); and one of MBIO 2370, MBIO 2371, CHEM 2370, or CHEM 2371 (C); or consent of the department.

MBIO 3451 Régulation des processus biochimiques

(Ancien 060.345) Mécanismes de régulation de l'activité enzymatique, incluant l'allostérie, le contrôle de certaines routes biosynthétiques ou dégradatives sélectionnées, ainsi que la régulation de l'expression génétique. On ne peut se faire créditer MBIO 3451 et MBIO 3450. Préalables : une note minimale de C dans MBIO 2021 ou MBIO 2020 (MBIO 2111, MBIO 2110, 060.211) ou l'autorisation écrite de la professeure ou du professeur, et une note minimale de C dans un de MBIO 2371, MBIO 2370 (060.237), CHEM 2371 ou CHEM 2370 (002.237). Donné seulement au Collège universitaire de Saint-Boniface.

MBIO 3460 Membrane and Cellular Biochemistry

(Lab Required) (Formerly 060.346) Isolation, fractionation, structure and function of cellular membranes and subcellular components. The central role of these elements in the biochemistry of cellular processes will be stressed. Not to be held with MBIO 3461. Prerequisites: One of MBIO 2370, MBIO 2371 (060.237), CHEM 2370, or CHEM 2371 (002.237) (C).

MBIO 3461 Biochimie membranaire et cellulaire

(Labo requis) (Ancien 060.346) Isolement, fractionnement, structure et fonction des membranes cellulaires et des composés subcellulaires. Mise en évidence du rôle central joué par ces éléments dans la biochimie des processus cellulaires. On ne peut se faire créditer MBIO 3461 et MBIO 3460. Préalables : une note minimale de C dans un de MBIO 2371, MBIO 2370 (060.237), CHEM 2371 ou CHEM 2370 (002.237). Donné seulement au Collège universitaire de Saint-Boniface.

MBIO 3470 Microbial Systematics

(Lab Required) (Formerly 060.347) Characterization and classification of the major group of micro-organisms. Bases for divisions and the relatedness among organisms will be studied. Laboratory work on the identification of representative species.

Prerequisite: MBIO 3030 (MBIO 3031) or MBIO 2110 (MBIO 2111) (C).

MBIO 3980 Work Term 1

(Formerly 060.398) Work assignments in business, industry or government for students registered in the Microbiology Honours or Major Cooperative program. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only).

MBIO 3990 Work Term 2

(Formerly 060.399) Work assignments in business, industry or government for students registered in the Microbiology Honours or Major Cooperative program. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only).

4.10.3 Microbiology Course Descriptions-4000 Level

MBIO 4010 Immunology H

(Lab Required) (Formerly 060.401) Topics will include antigens, antibodies, antigen-antibody reactions, immunogenetics, regulation of immune reactions, complement, hypersensitivities, autoimmunity, immunodeficiencies, transplantation and tumour immunology. Priority will be given to fourth year Science Honours students. Not to be held with MBIO 4011, MBIO 4020 (060.402), or the former 060.444. Prerequisite: MBIO 3010 or MBIO 3011 (060.301) (C).

MBIO 4011 Immunologie

(Labo requis) (Ancien 060.401) Étude des antigènes, des anticorps, des réactions antigènes-anticorps, de l'immunogénétique, de la régulation de la réponse du système immunitaire, du complément, des réactions d'hypersensibilité, de l'auto-immunité, des déficiences immunitaires, de l'immunologie des greffes et des tumeurs. On ne peut se faire créditer MBIO 4011 et MBIO 4010 (060.401) et MBIO 4020 (060.402) ou l'ancien 060.444. Préalable : une note minimale de C dans MBIO 3011 ou MBIO 3010 (060.301). Donné seulement au Collège universitaire de Saint-Boniface.

MBIO 4020 Immunology

(Formerly 060.402) Topics will include antigens, antibodies, antigen-antibody reactions, immunogenetics, regulation of immune reactions, complement, hypersensitivities, autoimmunity, immunodeficiencies, transplantation and tumour immunology. Not to be held with MBIO 4010, MBIO 4011 (060.401). Prerequisite: MBIO 3010 or MBIO 3011 (060.301) (C).

MBIO 4410 Virology

(Formerly 060.441) A comprehensive examination of fundamental properties of viruses, virus taxonomy, and the different ways in which viruses replicate. The ways viruses cause disease and experimental methods used in virology also will be examined. Not to be held with MBIO 4411, or for credit by students who have already taken MMIC 7010 (097.701). Prerequisites: MBIO 3010 or MBIO 3011 (060.301) (C); and MBIO 3410 or MBIO 3411(060.341) (C).

MBIO 4411 Virologie

Analyse détaillée des propriétés fondamentales des virus, de la taxonomie virale ainsi que des façons dont les virus se reproduisent. Examen des méthodes expérimentales utilisées en virologie et des façons dont les virus provoquent des maladies. On ne peut se faire créditer MBIO 4411 et MBIO 4010 et MMIC 7010 (097.701). Préalables : une note minimale de C dans MBIO 3011 ou MBIO 3010 (060.301) et dans MBIO 3411 ou MBIO 3410 (060.341). Donné seulement au Collège universitaire de Saint-Boniface.

MBIO 4440 Systems Microbiology: from Genomes to Life

(Lab Required) The purpose of this course is to use knowledge of the components of the bacterial cell to synthesize an understanding of the growth of microbes and their adaptation to their environments. The most recent research tools and systems biology approaches will be discussed. This course may not be held for credit with MBIO 3440. Prerequisites: MBIO 3030 (MBIO 3031)(C); or the former MBIO 2110 (MBIO 2111, 60.211)(C); and one of MBIO 2370, MBIO 2371, CHEM 2370, CHEM 2371(C).

MBIO 4480 Microbes in our Environment

(Lab Required) A course investigating the diversity of roles microbes play in our immediate environment, and how they affect it. Environments to be examined may include the human body, waste treatment facilities and extreme environments. Molecular tools to study the community structure and roles of individual organisms

will also be discussed. This course may not be held for credit with MBIO 3480 or MBIO 4320. Prerequisites: MBIO 3030 (MBIO 3031)(C); or the former MBIO 2110 (MBIO 2111, 60.211)(C); and one of MBIO 2370, MBIO 2371, CHEM 2370, CHEM 2371(C).

MBIO 4520 Industrial Bioprocesses

(Lab Required) Bioprocesses for a range of commercially important healthcare and industrial products including antibiotics, vaccines, steroids, therapeutic recombinant proteins, monoclonal antibodies, and ethanol will be discussed. Other topics will include bioreactor design, metabolic engineering, applied genetic engineering and animal cell technology. This course may not be held for credit with MBIO 4510. Prerequisites: MBIO 3030 (or one of MBIO 2100 or MBIO 2101) (C+); and one of MBIO 2370, MBIO 2371, CHEM 2370, CHEM 2371 (C+).

MBIO 4530 Project in Microbiology

(Lab Required) (Formerly 060.453) A research project chosen in consultation with the department head, and supervised by a staff member. A written report is normally required. The course is available only to final year Honours students in Microbiology, the Joint Microbiology-Chemistry programs, or the Genetics program. Not to be held with CHEM 4710 (002.471).

MBIO 4540 Biological Energy Transduction

(Formerly 060.454) Biochemistry of biological processes involving interconversion of different forms of energy such as oxidative phosphorylation, membrane transport and contractile processes. Not to be held with MBIO 4541. Prerequisite: MBIO 2020 (MBIO 2021) or MBIO 2110 (MBIO 2111) (C); and one of MBIO 2370, MBIO 2371, CHEM 2370, or CHEM 2371(C); or consent of the department. MBIO 3030 (MBIO 3031) is recommended as a prerequisite to this course.

MBIO 4541 Transduction de l'énergie biologique

(Ancien 060.454) Biochimie des processus biologiques comportant l'interconversion des différentes formes d'énergie comme la phosphorylation oxydative, le transport dans les membranes et les processus de contractions. On ne peut se faire créditer MBIO 4541 et MBIO 4540. Préalables : une note minimale de C dans MBIO 2021 ou MBIO 2020 (MBIO 2111, MBIO 2110, 060.211) et une note minimale C dans un de MBIO 2371, MBIO 2370 (060.237), CHEM 2371 ou CHEM 2370 (002.237), ou l'autorisation écrite de la professeure ou du professeur. MBIO 3031 (MBIO 3030) est recommandé. Donné seulement au Collège universitaire de Saint-Boniface.

MBIO 4581 Technologie de l'ADN recombinant

(Ancien 060.458) Techniques d'isolement de plasmides, la digestion de l'ADN par les enzymes (endonucléases) de restriction, le clonage, la détermination de la séquence des nucléotides dans l'ADN, la transformation de l'ADN, le transfert de gènes. On ne peut se faire créditer MBIO 4581 et MBIO 4570 (060.457). Préalable : une note minimale de C dans MBIO 3411 ou MBIO 3410 (060.341). Donné seulement au Collège universitaire de Saint-Boniface.

MBIO 4600 Molecular Genetics of Prokaryotes

(Lab Required) (Formerly 060.460) A detailed examination of replication, expression, mutability, repair and transposition of DNA in bacteria and their viruses. Priority will be given to Science Honours and Majors students. Check with department for availability. Not to be held with MBIO 4601, MBIO 4602 or the former 060.452 or 060.456. Prerequisites: MBIO 2020 (MBIO 2021) or MBIO 2110 (MBIO 2111) (C); and one of MBIO 2370, MBIO 2371, CHEM 2370, or CHEM 2371 (C). BIOL 2500, (BIOL 2501, BOTN 2460, BOTN 2461) is recommended.

MBIO 4601 Génétique moléculaire des procaryotes

(Labo requis) (Ancien 060.460) Étude détaillée de la réplication, de l'expression, de la mutagenèse de la réparation de l'ADN ainsi que des éléments génétiques transposables des bactéries et des virus. On ne peut se faire créditer MBIO 4601 et MBIO 4600 et les anciens 060.452 ou 060.456. Préalables : une note minimale de C dans MBIO 2021 ou MBIO 2020 (MBIO 2111, MBIO 2110, 060.211) et une note minimale de C dans un de MBIO 2371, MBIO 2370 (060.237), CHEM 2371 ou CHEM 2370 (002.237). BIOL 2501 ou BIOL 2500 (BOTN 2461, BOTN 2460, 001.246) est recommandé. Donné seulement au Collège universitaire de Saint-Boniface.

MBIO 4602 Molecular Genetics of Prokaryotes - Lectures

A detailed examination of replication, expression, mutability, repair and transposition of DNA in bacteria and their viruses. Lecture material will be identical to that of MBIO 4600, but MBIO 4602 lacks the laboratory component. Honours

and Major students must register in MBIO 4600. Check with the department for availability. Not to be held with MBIO 4600, MBIO 4601 or the former 060.460, 060.452 or 060.456. Prerequisites: MBIO 2020 (MBIO 2021) or the former MBIO 2110 (MBIO 2111) (C); and one of MBIO 2370, MBIO 2371, or CHEM 2370, CHEM 2371(C). BIOL 2500 (BOTN 2460, BOTN 2461) is recommended.

MBIO 4610 Molecular Genetics of Eukaryotes

(Lab Required) (Formerly 060.461) A comprehensive study dealing with replication and expression of DNA, genome structure, and the involvement of genes in AIDS and cancer. Priority will be given to Science Honours and Majors students. Check with the department for availability. Not to be held with MBIO 4612, or the former 060.452 or 060.455. Prerequisites: MBIO 2020 (MBIO 2021) or MBIO 2110 (MBIO 2111) (C); and one of MBIO 2370, MBIO 2371, CHEM 2370, or CHEM 2371 (C). BIOL 2500 (BIOL 2501, BOTN 2460, BOTN 2461) is recommended.

MBIO 4612 Molecular Genetics of Eukaryotes - Lectures

A comprehensive study dealing with replication and expression of DNA, genome structure, and the involvement of genes in diseases such as cancer. Lecture material will be identical to that of MBIO 4610, but MBIO 4612 lacks the laboratory component. Honours and Majors students must register in MBIO 4610. Check with the department for availability. Not to be held with MBIO 4610 (060.461) or the former 060.452 or 060.455. Prerequisites: MBIO 2020 (MBIO 2021) or MBIO 2110 (MBIO 2111) (C); and one of MBIO 2370, MBIO 2371, CHEM 2370 or CHEM 2371(C). BIOL 2500 (BOTN 2460, BOTN 2461) is recommended.

MBIO 4670 Applied Molecular Biology H

(Lab Required) The overall objective of this course is to introduce and describe current molecular techniques and their application to biological problems. These include, but are not limited to basic gene cloning, mutagenesis, and over-expression. Priority will be given to Science Honours students. Not to be held with MBIO 4672, or the former MBIO 4570 (60.457), MBIO 4581 or the former MBIO 4580 (60.458). Prerequisites: MBIO 3410 or MBIO 3411 (60.341) (C).

MBIO 4672 Applied Molecular Biology

The overall objective of this course is to introduce and describe the current molecular techniques and their application to biological problems. These include, but are not limited to, basic gene cloning, mutagenesis and over-expression. Not to be held with MBIO 4670, the former MBIO 4570 (060.457), MBIO 4581 or the former MBIO 4580 (060.458). Prerequisite: MBIO 3410 or MBIO 3411 (060.341) (C).

MBIO 4980 Work Term 3

(Formerly 060.498) Work assignments in business, industry or government for students registered in the Microbiology Honours or Major Cooperative program. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only).

MBIO 4990 Work Term 4

(Formerly 060.499) Work assignments in business, industry or government for students registered in the Microbiology Honours or Major Cooperative program. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only).

4.11 Department of Physics and Astronomy

4.11 Department of Physics and Astronomy ,

4.11.1 Program Information

4.11.1 Program Information,

Physics is the discipline that by experiment and logical analysis examines the laws of nature that form the basis for all relationships and interactions between matter and energy. Knowledge of physics is also essential in other natural sciences, such as chemistry and geology, and to professions such as engineering, medicine and dentistry. Astronomy, the other focus of this department, examines the universe, the earth and the planets, as well as phenomena such as quasars, pulsars, comets, and asteroids; a planetarium and an astronomical observatory are part of this program. In both Physics and Astronomy mathematical skills are developed simultaneously.

The department must approve a student's Honour or Major program prior to registration in each session. Students must also obtain approval for any and all revisions to their program.

The Department of Physics and Astronomy and the Department of Electrical and Computer Engineering have defined focus areas of study within their own programs. Students taking the courses recommended for these focus areas will find it easier to transfer between programs in Physics and Astronomy and Electrical and Computer Engineering programs. Students interested in obtaining more information about transferring to a Physics program from Electrical Engineering should consult with the Head of the Physics department.

Honours

To enter the Honours programs in Physics and Astronomy, a student must have completed at least 24 credit hours with a minimum GPA of 3.00, and also obtained a minimum grade of "B" in PHYS 1070, or a "B+" in PHYS 1030. Students are strongly encouraged to complete MATH 1300, MATH 1500, and MATH 1700 in Year 1. Not only are these courses required in the Physics and Astronomy programs, they are required prerequisites to several second year Physics and Astronomy required courses.

To continue in the Physics and Astronomy Honours program, students must maintain a minimum GPA of 3.00, and complete a minimum of 9 credit hours during each Fall and Winter Term.

To graduate with the B. Sc. Honours degree, a student must achieve a minimum GPA of 3.00 and minimum grade of "C" in each course that contributes to the 120 credit hours of the degree.

There are a number of awards — the Coish, the C.P. Loewen, the Neamtan, the Roulston, and the Sen Scholarships — available in this program.

Joint Honours

The Department of Physics and Astronomy offers joint honours programs in conjunction with the Departments of Mathematics, Computer Science, and Chemistry.

To enter the Joint Honours Mathematics-Physics program the student must have a minimum grade of "B" in: MATH 1300, MATH 1510, MATH 1710 (or MATH 1690), PHYS 1050 (or "B+" in PHYS 1020) and PHYS 1070.

To enter the Joint Honours Computer Science-Physics program, the student must have a minimum grade of "B" in: PHYS 1050 (or "B+" in PHYS 1020), PHYS 1070, MATH 1300, MATH 1500 (or equivalent), MATH 1700 (or equivalent), and COMP 1020.

To enter the Joint Honours Chemistry-Physics program, the student must have a minimum grade of "B" in: PHYS 1050 (or "B+" in PHYS 1020), PHYS 1070, CHEM 1300, CHEM 1310, MATH 1500 and MATH 1700.

Double Honours

The Department of Physics and Astronomy offers a double honours degree in conjunction with the Biochemistry program.

Four Year Major

The goal of this program is to provide an excellent physics education for a student with broad interests. It provides more control over the degree program, permitting significantly more electives and scheduling flexibility.

To enter the four year Major program in Physics and Astronomy, a student must have PHYS 1070 (C+) or PHYS 1030 (B). In addition, students must have satisfied the faculty requirements for entry to the four year Major program. Students are strongly encouraged to complete MATH 1300, MATH 1500, and MATH 1700 in Year 1. Not only are they required courses in the Physics and Astronomy programs,

these courses are required prerequisites to several required second year Physics and Astronomy courses.

Three Year General

As prescribed with all other faculty regulations in Section 3.2, students in this program must select 36 credit hours of 2000 and (or) 3000 level courses from two Science departments. To satisfy the requirement in the Department of Physics and Astronomy, students must select a minimum of 18 credit hours from the list in the chart below.

Variations in any of the programs listed above may be possible, but must be approved by the head of the department and the Science general office.

	A minimum of 18 credit hours must be chosen from this list: PHYS 2070, PHYS 2210 (or the former PHYS 2200), PHYS 2250, PHYS 2260, PHYS 2270, PHYS 2280, PHYS 2350, PHYS 2380, PHYS 2700, PHYS 2710, PHYS 3180, PHYS 3380, PHYS 3800, PHYS 4230. (Subject to the Faculty requirement that of the 36 hours of advanced level courses, at least 6 credit hours must be chosen from the 3000 and (or) 4000 level.)		
MINOR			
PHYS 1050 (C) and PHYS 1070 (C) (or PHYS 1020 (C+) and PHYS 1030 (C+))	A minimum of 12 credit hours from PHYS 2070, PHYS 2210 (or the former PHYS 2200), PHYS 2250, PHYS 2260, PHYS 2270, PHYS 2280, PHYS 2350, PHYS 2380, PHYS 2700, PHYS 2710, PHYS 3180, PHYS 3380, PHYS 3800.		
JOINT HONOURS: PHYSICS – CHEMISTRY refer to section 4.5.3			
JOINT HONOURS: PHYSICS – COMPUTER SCIENCE (including Co-operative Option) refer to section 4.6.4			
JOINT HONOURS: PHYSICS – MATHEMATICS refer to section 4.9.3			

NOTES:

1 Students must achieve a minimum grade of "C" in all courses contributing to the Honours program.

2 MATH 1310 may be taken in place of MATH 1300; MATH 1510 or MATH 1520 may be taken in place of MATH 1500; MATH 1710 may be taken in place of MATH 1700; MATH 1690 may be taken in place of MATH 1500 and MATH 1700. MATH 2750 may be taken as a recommended course in lieu of MATH 2720 and MATH 2730.

3 Although they are not required courses in the Physics programs, MATH 2720³, MATH 2730³, MATH 2800, and MATH 3700 are highly recommended electives for the Physics Honours and Four Year Major degrees, and should be taken when possible.

4 The selection of these 6 credit hours must be made in consultation with the Departmental Program Advisor.

IMPORTANT: The four year Major program need not be completed in the manner prescribed in the chart above. The chart indicates the recommended arrangement of the required courses and is meant to be a guide around which students can plan their program (Letters in brackets refer to minimum prerequisite standing required for further study. The number 6 in brackets indicates a 6 credit hour course).

IMPORTANT: The four year Major program need not be completed in the manner prescribed in the chart above. The chart indicates the recommended arrangement of the required courses and is meant to be a guide around which students can plan their program (Letters in brackets refer to minimum prerequisite standing required for further study. The number 6 in brackets indicates a 6 credit hour course).

4.11.3 Physics and Astronomy Course Descriptions-0 Level

PHYS 0900 Preparing for University Physics (Formerly 016.090) A review of elementary physics, emphasizing the laws of mechanics, for students considering enrolling in a first-year university physics course. Mathematical techniques used in solving physics problems and the relevance of physics to everyday life will be stressed. Although this course may be used as part of the prerequisite requirements for first-year Physics courses, students are encouraged to take Physics 40S whenever possible.

4.11.3 Physics and Astronomy Course Descriptions-1000 Level

PHYS 1020 General Physics 1 (Lab Required) (Formerly 016.102) It's a crazy world; come and find out why objects fall, slide, bounce, stick, go in circles or stay straight, float or sink, glide or crash. Why don't satellites fall to the ground? What exactly does weightlessness mean anyway? Find answers to these and other questions as you get to know Newton's and other basic laws of nature and see what makes the world go round. This course, together with the sequel PHYS 1030 (or 016.103), is recommended for students seeking either a single, comprehensive course in Physics or entry into health science programs. It may also be used for entry into the Honours Physics program ("B+" or better) or the Major Physics program ("B" or better). Not to be held with PHYS 1021, PHYS 1050, PHYS 1051 (016.105), PHYS 1410 (016.141), PHYS 1420 (016.142), or the former 016.127. Prerequisites: Either Physics 40S, PHYS 0900 (016.090) (P), or equivalent; and either Pre-calculus Mathematics 40S, Applied Mathematics 40S (with 70% or better), or equivalent. It is strongly recommended that students attain a minimum of 70% as the average of their marks in Physics 40S and Pre-calculus Mathematics 40S.

PHYS 1021 Physique générale I

(Labo requis) (Ancien 016.102) Ce cours d'initiation à la physique ne requiert pas de calcul et traite de certains thèmes tirés de la mécanique et de la thermodynamique avec des exemples tirés des sciences biologiques et physiques. Ce cours, de même que le PHYS 1030 (ou 016.103), est particulièrement conseillé aux étudiants désireux d'avoir une vue d'ensemble de la physique ou qui ont l'intention d'entreprendre des études dans les sciences de la santé. Il peut aussi servir comme cours de base pour un programme de spécialisation en physique ("B+" ou mieux) ou de majeure en physique ("B" ou mieux). On ne peut se faire créditer à la fois le PHYS 1020 (ou 016.102) avec le PHYS 1050 ou PHYS 1051 (ou 016.105), le PHYS 1410 (ou 016.141), ou le PHYS 1420 (ou 016.142). Préalables: Soit Physique 40S, PHYS 0900 (ou 016.090) (avec Pass) ou l'équivalent, et soit le cours de Mathématiques précalcul 40S, ou une note de 70% dans les cours de Mathématiques appliquées 40S, ou l'équivalent. Il est fortement recommandé aux étudiants d'obtenir une note de 70% dans les cours de Mathématiques précalcul 40S et de Physique 40S. Donné seulement au Collège universitaire de Saint-Boniface.

PHYS 1030 General Physics 2

(Lab Required) (Formerly 016.103) Discover how physics is the basis of the hi-tech world we live in and how we live in it. Learn how to use simple, intuitive physics concepts that are described using little math and no calculus to understand a diversity of topics including how electricity is made, what drives the greenhouse effect, what makes a diamond sparkle, lasers, LASIC eye surgery and the workings of the human eye. This course, together with its prerequisite PHYS 1020 (016.102), is recommended for students seeking either a single comprehensive course in Physics, or entry into health science programs. Not suitable for entry to Major or Honours in Physics. This course may not be held with PHYS 1031, PHYS 1410 (016.141), PHYS 1420 (016.142), or the former 016.120. Prerequisite: One of PHYS 1020, PHYS 1021 (016.102) (C), PHYS 1050, or PHYS 1051 (016.105) (C).

PHYS 1031 Physique générale II

(Labo requis) (Ancien 016.103) Ce cours d'initiation à la physique ne requiert pas de calcul et traite de certains thèmes tirés de l'électricité, du magnétisme, de l'optique et de la physique moderne et appuyé d'exemples pris des sciences biologiques et physiques. Ce cours, de même que le PHYS 1020 (ou 016.102), est particulièrement conseillé aux étudiants désireux d'avoir une vue d'ensemble de la physique ou qui ont l'intention d'entreprendre des études des sciences de la santé. Il ne peut servir aux programmes de majeure ou de spécialisation en physique. On ne peut se créditer à la fois le PHYS 1030 (ou 016.103) et le PHYS 1410 (ou 016.141) ou le PHYS 1420 (ou 016.142) ou les anciens 016.120. Préalable: PHYS 1020 ou PHYS 1021 (ou 016.102) (C) ou PHYS 1050 ou PHYS 1051 (ou 016.105) (C). Donné seulement au Collège universitaire de Saint-Boniface.

PHYS 1050 Physics 1: Mechanics

(Lab Required) (Formerly 016.105) It's rocket science! Mechanics is the science of describing (Kinematics) and explaining (Dynamics) motion. The basic concepts of calculus together with laws of conservation of momentum and energy are used to develop the tools required to describe, analyze and predict the outcomes of linear and rotational motion in simple mechanical systems. A brief introduction to the Einstein theory of special relativity provides a taste of modern approaches to this subject. This course develops a strong scientific foundation for students considering a program of study in engineering or the physical sciences. Not to be held with PHYS 1020, PHYS 1021 (016.102), PHYS 1051, PHYS 1410 (016.141), PHYS 1420 (016.142), or the former courses 016.118, 016.120, or 016.127. Prerequisites: Pre-calculus Mathematics 40S (300) (or equivalent) and Physics 40S (300) (or equivalent); or PHYS 0900 (016.090) (Pass). It is strongly recommended that students attain a minimum of 80 per cent as the average of their marks in Physics 40S (300) and Pre-calculus Mathematics 40S (300). Prerequisite or concurrent requirement: One of MATH 1500, MATH 1501, MATH 1510, MATH 1520, the former 136.153 or MATH 1690.

PHYS 1051 Physique I : La mécanique

(Labo requis) (Ancien 016.105) Une introduction, basée sur le calcul, à la mécanique classique. Les sujets suivants seront traités: les vecteurs, la dynamique et la cinématique du mouvement de translation. La cinématique de la rotation, l'énergie, le travail, le moment linéaire, les collisions, le mouvement oscillatoire. Ce cours est destiné particulièrement aux étudiants qui voudraient poursuivre leur programme d'études dans les sciences physiques ou en ingénierie. On ne peut se faire créditer à la fois le PHYS 1050 (ou 016.105) et le PHYS 1020 ou PHYS 1021 (ou 016.102) ou PHYS 1410 (ou 016.141) ou le PHYS 1420 (ou 016.142) (et les anciens 016.118, 016.120 ou 016.127). Préalables: Mathématiques pré-calcul 40S (ou l'équivalent) et Physique 40S (ou l'équivalent) ou le PHYS 0900 (ou 016.090) (avec "Pass"). Il est fortement recommandé que l'étudiant obtienne une moyenne de 80% dans les Préalables de mathématiques précalcul 40S et de Physiques 40S. Préalables ou concomitants: Un de MATH 1500 ou MATH 1501, MATH 1510, MATH 1520, l'ancien 136.153 ou MATH 1690. Donné seulement au Collège universitaire de Saint-Boniface.

PHYS 1070 Physics 2: Waves and Modern Physics

(Lab Required) (Formerly 016.107) At the heart of modern communications, waves and oscillations are key to understanding the world around us from subatomic scales to biology, traffic flow, the stock market, climate change and the cosmos itself. Learn about the mysterious quantum world, the basis of the latest nanotechnology, where particles are waves and waves are particles. Explore Bohr's model of the atom and discover Heisenberg's Uncertainty Principle. This calculus based course addresses the underlying concepts for all modern science and engineering. This course, like Physics 1 (PHYS 1050), is intended for students considering a program in the physical sciences. Not to be held for credit with PHYS 1071, PHYS 1410 (016.141), PHYS 1420 (016.142). Prerequisites: PHYS 1050 (or equivalent - PHYS 1051, 016.105, 016.118) (C) or PHYS 1020 (or equivalent - PHYS 1021, 016.102) (B); and "C" or better in one of MATH 1500, MATH 1501 (136.150), MATH 1510 (136.151), MATH 1520 (136.152), or the former 136.153. Prerequisite or concurrent requirement: one of MATH 1700, MATH 1701, MATH 1690, MATH 1710, or the former 136.173.

PHYS 1071 Physique II : La physique des ondes et la physique moderne

(Labo requis) (Ancien 016.107) Une introduction, basée sur le calcul, à la physique des ondes et à la physique moderne. Les sujets suivants seront traités: les oscillations: les ondes, la superposition, l'interférence, la relativité, l'effet photoélectrique, le modèle quantique, l'atome de Rutherford, le modèle de Bohr, les spectres atomiques, la théorie de deBroglie, le principe d'incertitude de Heisenberg, les réactions nucléaires, la fission, la fusion, les particules sous-atomiques. Ce cours, tout comme le PHYS 1050 (ou 016.105) Physique, est destiné aux étudiantes et aux étudiants qui veulent suivre un programme d'études en sciences physiques. On ne peut se faire créditer à la fois le PHYS 1070 (ou 016.107) avec le PHYS 1410 (ou 016.141), ou le PHYS 1420 (ou 016.142). Préalables: PHYS 1050 ou PHYS 1051 (ou 016.105) (ou l'ancien 016.118) (C) ou PHYS 1020 ou PHYS 1021 (ou 016.102) (B), et MATH 1500 ou MATH 1501 (ou 136.150) ou MATH 1510 (ou 136.151), MATH 136.152 (ou 136.152), ou l'ancien 136.153 (C). Préalables ou concomitants: MATH 1700 ou MATH 1701 ou MATH 1690 ou MATH 1710. Donné seulement au Collège universitaire de Saint-Boniface.

PHYS 1300 Energy and the Environment

(Formerly 016.130) This course provides a broad physical outlook on the

environment in which we live. Emphasis will be placed on topics of current interest such as the atmosphere, outer space, the fundamental structure of energy and matter, energy sources, the application of physical principles in modern technology, etc. The lectures will include films and demonstrations; student participation will be encouraged in discussions and in the choice of topics. The course is designed for students of all faculties and a prior knowledge of mathematics and physics is not a requirement. Not to be held with PHYS 1301. This course cannot be used as a part of a Major or Minor in Physics.

PHYS 1301 Énergie et environnement

(Ancien 016.130) Ce cours présente les particularités physiques générales de notre environnement. On insistera sur certains problèmes d'actualité, à savoir l'atmosphère, le cosmos, la structure de la matière et de l'énergie, les sources d'énergie, l'application des principes de la physique à la technologie moderne, etc. Le cours comportera des projections de films et des démonstrations. La participation aux discussions et aux choix des sujets à traiter est encouragée. Ce cours est conçu pour les étudiants de toutes les facultés et n'exige aucune connaissance des mathématiques ou de la physique. Il ne peut faire partie des programmes de Mineure ou de Majeure en Physique. On ne peut se faire créditer à la fois le PHYS 1300. Donné seulement au Collège universitaire de Saint-Boniface.

PHYS 1504 UW 38.1501 (1000 Level)

PHYS 1604 UW PHYS-2103 (1000 Level)

p

PHYS 1810 General Astronomy 1

(Lab Required) (Formerly 016.181) The topics covered in this course outline the properties of stars and planets that can be observed and the physics necessary to interpret these observations. It includes a brief introduction to galaxies and cosmology. Using lectures and laboratory sections, it provides an astronomy background and introduction to the scientific method. It ranges from introductory physical background to considering current research problems. This course is mainly descriptive, taught at a qualitative level, with simple arithmetic and trigonometry used frequently. Not to be held with the former 016.180.

PHYS 1820 General Astronomy 2: Exotic Stars, Galaxies and Cosmology

(Lab Required) (Formerly 016.182) This course extends the material from General Astronomy 1, increasing the student's physical understanding of topics like black holes, galaxies, and the expanding universe. Topics range from the Big Bang to the formation of neutron stars. A significant amount of simple arithmetic and trigonometry is used to provide the insights into physical background and to illuminate current research problems. Labs and observing sessions are used to teach scientific method. Not to be held with the former 016.180. Prerequisites: Pre-calculus Mathematics 40S or equivalent, or consent of department.

PHYS 1830 Perspective on the Universe

(Lab Required) (Formerly 016.183) This general interest course is a qualitative course on the concepts and discoveries in astronomy. Topics may vary from year to year and could include Life on Other Worlds or Astronomy in the News. These themes are used to give the student a qualitative astronomy background ranging from planets and stars to galaxies and cosmology. A few special sessions at Glenlea Observatory and the Lockhart Planetarium introduce the student to scientific method. Although simple arithmetic and trigonometry will be used occasionally, this is a descriptive course.

4.11.3 Physics and Astronomy Course Descriptions-2000 Level**PHYS 2060 Fundamentals of Physics in Radiation Therapy**

(Lab Required) (Formerly 016.206) Provides the student with a fundamental understanding of the physical nature of photons and electrons and the manner in which they interact with an absorbing scattering medium. The concepts presented in this series will enhance the student's ability to make decisions regarding clinical radiation therapy treatments. Also taught by Allied Health as RTT 2060. Restricted to students in the Radiation Therapy program. Prerequisite: PHYS 1030 or PHYS 1031 (016.103) (C). Prerequisite or concurrent requirements: RTT 2040 and RTT 2080.

PHYS 2070 Observational Astronomy

(Lab Required) (Formerly 016.207) Students will undertake a project on galaxies or

nebulae using the University of Manitoba's Astronomical Observatory at Glenlea. Prerequisite: PHYS 1030 or PHYS 1031 (016.103) (B); or PHYS 1070 or PHYS 1071 (016.107) (C); or one of PHYS 1810 (016.181) (C) or PHYS 1830 (016.183) (C).

PHYS 2090 Radiation Protection in Radiation Therapy (Formerly 016.209) Previews fundamental concepts used to minimize the risk when working with radiation, with emphasis on radiation therapy. Includes types and sources of radiation, radiation quantities and units, biological effect and potential risks, basic principles of protection, regulation and dose limits, methods of dose monitoring, and applications in radiation therapy. Also taught by Allied Health as RTT 2090. Restricted to students in the Radiation Therapy program. Prerequisites: RTT 2100 (163.210) (C), RTT 2060 (163.206) (C).

PHYS 2150 Radiation Biology (Formerly 016.215) This course deals with the fundamentals of radiation biology and focuses on the effects of radiation at a cellular and molecular level. Also taught by Allied Health as RTT 2150. Restricted to students in the Radiation Therapy program. Prerequisite: PHYS 1030 or PHYS 1031 (016.103) (C).

PHYS 2152 Modern Physics for Engineers (Lab Required) An overview of topics in modern physics including wave particle duality, atomic structure and quantum mechanics. Elementary classical electromagnetic theory and wave theory are reviewed as an introduction to the modern physics concepts. For Engineering students only. Not to be held with PHYS 1070 or PHYS 1071 (016.107). Prerequisites: a "C" or better in one of PHYS 1050, PHYS 1051 (016.105), or the former 016.118; or a "B" or better in PHYS 1020 or PHYS 1021 (016.102); and a "C" or better in one of MATH 1500, MATH 1501 (136.150), MATH 1510 (136.151), MATH 1520 (136.152), or the former 136.153; and a "C" or better in one of MATH 1700, MATH 1701 (136.170), MATH 1710 (136.171), the former 136.173, or MATH 1690 (136.169). Prerequisite or concurrent requirement: MATH 2130.

PHYS 2201 Électricité et magnétisme (Labo requis) (Ancien 016.220) Champs électrostatique, potentiel électrostatique, loi de Gauss, capacitance, matériaux diélectriques, champs magnétiques, loi d'Ampère, induction magnétique, matériaux magnétiques, courant de déplacement, forme intégrale des équations de Maxwell, loi d'Ohm, lois de Kirchoff, analyse de circuits en courant continu, circuits équivalents, analyse de circuits en courant alternatif, impédance complexe, circuits RLC, couplage magnétique, transformateurs, diodes et circuits avec diodes. On ne peut se faire créditer à la fois le PHYS 2200 (ou 016.220) et le PHYS 2600 (ou 016.260) ou le PHYS 2610 (ou 016.261). Préalables: Un de PHYS 1070 ou PHYS 1071 (ou 016.107) (ou les anciens 016.106 ou 016.120) (C), ou PHYS 1020 ou PHYS 1021 (ou 016.102) (C+) et PHYS 1030 ou PHYS 1031 (ou 016.103) (C+); et un de MATH 1500 ou MATH 1501 (ou 136.150) (C), MATH 1510 (ou 136.151) (C), MATH 1520 (ou 136.152) (C), l'ancien 136.153 (C) ou MATH 1690 (ou 136.169) (C). Préalables ou concomitants: MATH 1200 ou MATH 1201 et un de MATH 1690, MATH 1700 ou MATH 1701, MATH 1710 ou l'ancien 136.173. Donné seulement au Collège universitaire de Saint-Boniface.

PHYS 2210 Understanding Electricity and Magnetism An introduction ranging from its history to connections with real-world phenomena in engineering and biology, and common sense on the understanding of the phenomena. The student is carefully guided through mathematical derivations. Physics is used to develop the theory and the applications of such things as motors, radios, magnetic resonance imaging (MRI) systems and computers. Not to be held with PHYS 2200, PHYS 2201, PHYS 2600 (016.260) or PHYS 2610 (016.261). Prerequisites: A "C" or better in PHYS 1070 (or equivalent - PHYS 1071, 016.107, 016.106, 016.120), or a "C+" or better in both of PHYS 1020 (or equivalent - PHYS 1021, 016.102) and PHYS 1030 (or equivalent - PHYS 1031, 016.103); and a "C" or better in one of MATH 1500, MATH 1501 (136.150), MATH 1510 (136.151), MATH 1520 (136.152), the former 136.153, or MATH 1690 (136.169). Prerequisite or concurrent requirements: MATH 1200 or MATH 1201; and one of MATH 1690, MATH 1700, MATH 1701, MATH 1710, or the former 136.173.

PHYS 2250 Introductory Modern Physics (Formerly 016.225) Come join us as we explore the ground breaking discoveries in physics during the last 100 years that have laid the foundation for our modern high-tech world and brought us nuclear power, computers, nanotechnology and new energy technologies (to name a few). Then, finish off with a look into the future, at the 21st century physics frontier. Not available to students who have previously obtained credit in, or are currently registered in PHYS 2251, PHYS 2380 (016.238)

or the former 016.250. Not available to students in Honours or Major programs in Physics. Prerequisites: a "C" or better in PHYS 1070 (or equivalent - PHYS 1071, 016.107, 016.127), or a "C+" or better in both of PHYS 1020 (or equivalent - PHYS 1021, 016.102) and PHYS 1030 (or equivalent - PHYS 1031, 016.103); and a "C" or better in one of MATH 1500, MATH 1501 (136.150), MATH 1510 (136.151), MATH 1520 (136.152), the former 136.153, or MATH 1690 (136.169). Prerequisite or concurrent requirements: MATH 1200 or MATH 1201; and one of MATH 1690, MATH 1700, MATH 1701, MATH 1710 or the former 136.173 (D).

PHYS 2251 Introduction à la physique moderne (Ancien 016.225) Un cours d'introduction en physique atomique et nucléaire. Théorie cinétique des gaz, théorie de la relativité, effets de quantum, physique atomique, physique nucléaire. Ce cours n'est pas disponible aux étudiants qui auraient Préalablement obtenu des crédits ou qui sont concurrentement inscrits dans le cours PHYS 2380 (ou 016.238) (ou les anciens 016.250 ou 016.230)). Ce cours n'est pas disponible aux étudiants dans les programmes de spécialisation ou de majeure en Physique. On ne peut se faire créditer à la fois le PHYS 2250. Préalables: Un de: PHYS 1070 ou PHYS 1071 (ou 016.107) (C), ou PHYS 1020 ou PHYS 1021 (ou 016.102) (C+) et PHYS 1030 ou PHYS 1031 (ou 016.103) (C+) (ou l'ancien 016.121) (C+), (ou les anciens 016.127 (C); et un de MATH 1500 ou MATH 1501 (ou 136.150) (C), MATH 1510 (ou 136.151) (C), MATH 1520 (ou 136.152) (C), l'ancien 136.153 (C) ou MATH 1690 (ou 136.169) (C). Préalables ou concomitants: MATH 1200 ou MATH 1201 et un de MATH 1690, MATH 1700 ou MATH 1701, MATH 1710 ou l'ancien 136.173. Donné seulement au Collège universitaire de Saint-Boniface.

PHYS 2260 Optics (Lab Required) (Formerly 016.226) A survey of refraction, reflection, simple lens systems and optical systems, dispersion, achromatism and an elementary treatment of diffraction, interference, and polarization. Not to be held with PHYS 2261. Prerequisites: A "C" or better in PHYS 1070 (or equivalent - PHYS 1071, 016.107), or a "C+" or better in both of PHYS 1020 (or equivalent - PHYS 1021, 016.102) and PHYS 1030 (or equivalent - PHYS 1031, 016.103); and a "C" or better in one of MATH 1500, MATH 1501 (136.150), MATH 1510 (136.151), MATH 1520 (136.152), the former 136.153, or MATH 1690 (136.169). Prerequisite or concurrent requirements: One of MATH 1300, MATH 1301 (136.130), or MATH 1310 (136.131); and one of MATH 1690, MATH 1700, MATH 1701 (136.170), MATH 1710 (136.171), or the former 136.173.

PHYS 2261 Optique (Labo requis) (Ancien 016.226) Étude de la réfraction, réflexion, des systèmes de lentilles simples et des systèmes optiques, dispersion, achromatisme et vuee lementerai de la diffraction, interférence et polarisation. On ne peut se faire créditer à la fois le PHYS 2260. Préalables: Un de: PHYS 1070 ou PHYS 1071 (ou 016.107) (C), ou PHYS 1020 ou PHYS 1021 (ou 016.102) (C+) et PHYS 1030 ou PHYS 1031 (ou 016.103) (C+); et un de MATH 1500 ou MATH 1501 (ou 136.150) (C), MATH 1510 (ou 136.151) (C), MATH 1520 (ou 136.152) (C), l'ancien 136.153 (C) ou MATH 1690 (ou 136.169) (C). Préalables ou concomitants: MATH 1300 ou MATH 1301 ou MATH 1310 et un de MATH 1690, MATH 1700 ou MATH 1701, MATH 1710 ou l'ancien 136.173. Donné seulement au Collège universitaire de Saint-Boniface.

PHYS 2270 Physical Topics for Biologists A (Formerly 016.227) Physical topics with a relation to biology are discussed. Radiative transfer of energy, boundary layers, heat conduction, diffusion, mass transport, and the use of radioactive materials in biology are considered. Not to be held with PHYS 2271. Prerequisite: a grade of "C" or better in one of PHYS 1050, PHYS 1051 (016.105), PHYS 1020, or PHYS 1021 (016.102); or consent of department.

PHYS 2271 Éléments de physique pour les sciences biologiques A (Ancien 016.227) Ce cours introduit les éléments de physique ayant un rapport direct avec les sciences biologiques. En particulier, le transfert d'énergie par rayonnement, les effets de surface, la conduction thermique, les phénomènes de diffusion, les phénomènes de transport ainsi que l'utilisation de matériaux radioactifs. On ne peut se faire créditer à la fois le PHYS 2270. Préalable: PHYS 1070 ou PHYS 1071 (ou 016.107) (C) ou PHYS 1030 ou PHYS 1031 (ou 016.103) (C) ou le consentement du département. Donné seulement au Collège universitaire de Saint-Boniface.

PHYS 2280 Physical Topics for Biologists B (Formerly 016.228) Physical properties of solids, liquids, and gases including

diffusion and membranes; radiation and radioactivity. Aspects of particular interest to the biological sciences are stressed. Not to be held with PHYS 2281. Prerequisite: a grade of "C" or better in one of PHYS 1070, PHYS 1071 (016.107), PHYS 1030, or PHYS 1031 (016.103); or consent of department.

PHYS 2281 Éléments de physique pour les sciences biologiques B (Ancien 016.228) Ce cours traite des propriétés physiques des solides, des liquides et des gaz ainsi que des phénomènes de radiation et de la radioactivité. L'accent sera mis sur les aspects ayant un rapport direct avec les sciences biologiques. On ne peut se faire créditer à la fois le PHYS 2280. Préalable: PHYS 1070 ou PHYS 1071 (ou 016.107) (C) ou PHYS 1030 ou PHYS 1031 (ou 016.103) (C) ou le consentement du département. Donné seulement au Collège universitaire de Saint-Boniface.

PHYS 2350 Energy Sources: Physical Aspects (Formerly 016.235) A detailed investigation of the physical aspects of energy production and utilization. Critical comparison of the various energy sources including solar, nuclear, fossil, and wind will be emphasized. The physics of energy collection, production, storage, and distribution will be discussed in the context of thermodynamics, radiation, solid state and nuclear physics. Prerequisite: a grade of "C" or better in one of PHYS 1070, PHYS 1071 (016.107), PHYS 1030, or PHYS 1031 (016.103); or consent of department.

PHYS 2380 Quantum Physics 1 (Formerly 016.238) The first in a sequence of three courses on Quantum Physics. This course introduces the basic principles of quantum theory including cavity radiation and Planck's postulate, wave-particle duality, the Bohr model, and the Schrodinger theory of quantum mechanics. Special emphasis is placed on the derivation of the time independent Schrodinger equation and its solutions in one dimension. Not to be held with the former 016.250. Prerequisites: PHYS 1070 or PHYS 1071 (016.107) (C); and one of MATH 1690 (136.169) (C), MATH 1700, MATH 1701 (136.170) (C), MATH 1710 (136.171) (C), or the former 136.173 (C).

PHYS 2390 Theoretical Physics 1 This course provides an introduction to the mathematics required for both the Honours and Major programs in Physics and Astronomy. Topics include series expansions, partial derivatives, vector calculus and integral theorems. Not to be held with the former 016.237. Prerequisites: PHYS 1070, PHYS 1071 (016.107) (C); and a grade of "C" or better in one of MATH 1690 (136.169), MATH 1700, MATH 1701 (136.170), MATH 1710 (136.171), or the former 136.173.

PHYS 2490 Theoretical Physics 2 This course provides a continuation of the introduction to the mathematics required for both the Honours and Major programs in Physics and Astronomy. Topics include Fourier series, differential equations, special functions, boundary value problems and transform methods. Not to be held with the former 016.237. Prerequisite: PHYS 2390.

PHYS 2600 Electromagnetic Field Theory (Formerly 016.260) Electric field, electric potential, Gauss' law, capacitors, dielectric materials, magnetic fields, Ampere's law, magnetic induction, magnetic materials, displacement current, integral form of Maxwell's equations. Not to be held with PHYS 2200 or PHYS 2201 (016.220). Prerequisites: a "C" or better in one of PHYS 1070, PHYS 1071 (016.107), the former 016.106, or the former 016.120; and a "C" or better in one of MATH 1690 (136.169), MATH 1700, MATH 1701 (136.170), MATH 1710 (136.171) or the former 136.173.

PHYS 2610 Circuit Theory and Introductory Electronics (Lab Required) (Formerly 016.261) Ohm's law, Kirchhoff's laws, DC circuit analysis, equivalent circuits, AC circuit analysis, complex impedance, RLC circuits, magnetic coupling, transformers, diodes and diode circuits. Not to be held with PHYS 2200 or PHYS 2201 (016.220). Prerequisite: PHYS 2600 (016.260) (C).

PHYS 2650 Classical Mechanics 1 (Formerly 016.265) The first in a sequence of three courses on intermediate to advanced level mechanics. Topics include dynamics of a particle, conservation theorems, rotation, rolling motion, oscillations, gravitation and central force motion, and associated mathematical methods. Prerequisite: one of PHYS 1070, PHYS 1071 (016.107), or the former 016.106 (C). Prerequisite or concurrent requirements: PHYS 2490.

PHYS 2700 Concepts of Physical Science to 1900 (Formerly 016.270) The evolution of scientific thought is traced through three major

historical periods, namely the early Greeks, the scientific revolution of the 16th and 17th centuries and the modern period up to 1900. The course is designed to present the key ideas of scientific inquiry into the nature of heat, light, matter and celestial mechanics within their historical context. Not to be held with the former 016.131. This course is not to be held for credit in a Major or Honours program in Physics and Astronomy.

PHYS 2710 Concepts of Physical Science from 1900 (Formerly 016.271) This course deals with the concepts of modern physics which arose near the turn of the twentieth century and revolutionized our view of the physical world. Einstein's Theory of Relativity, the Bohr-Rutherford atom and wave-particle duality are discussed. The impact of these ideas on modern society is explored. N.B. This course should be preceded by PHYS 2700 (016.270) or the former 016.131. Not to be held with the former 016.132. This course is not to be held for credit in a Major or Honours program in Physics and Astronomy.

4.11.3 Physics and Astronomy Course Descriptions-3000 Level

PHYS 3180 Stars (Formerly 016.318) This course is an application of physics to the structure of stars, their formation and evolution; theoretical models and observations; comparisons of main sequence stars like our Sun, binary star systems, post-main sequence evolution, and the final stages of stellar evolution such as the formation of white dwarfs, neutron stars and black holes. Prerequisite: PHYS 1070 or PHYS 1071 (016.107) (C).

PHYS 3220 Medical Physics and Physiological Measurement (Formerly 016.322) This course will introduce the core subject areas of Medical Physics, in particular the physics of physiology and of radiology. The mechanics of body systems and the theory, medical applications and safety issues relating to the production, use, detection and measurements of electromagnetic radiation (both ionizing and non-ionizing) will be included. It will also cover Medical imaging (Ultrasound, CT and MRI) and will provide the student with an understanding of the physics underlying neurological, audiological, respiratory and vascular function and measurements. Prerequisite: one of PHYS 2600 (016.260) (C) or PHYS 2210 (or the former PHYS 2200 or 016.220)(C), or PHYS 2152, or consent of the department.

PHYS 3360 Intermediate Modern Physics (Formerly 016.336) Introduction to wave mechanics and its applications in atomic, molecular, and solid state physics. A survey of nuclear and particle physics phenomena. An introduction to astrophysics. Prerequisite: PHYS 2250 or PHYS 2251 (016.225) (C).

PHYS 3380 Quantum Physics 2 (Formerly 016.338) This course is the sequel to PHYS 2380 (016.238). It focuses on solutions of the three-dimensional Schrodinger equation with special emphasis on one-electron atoms, multi-electron atoms, and single molecules. Not to be held with PHYS 4640 (016.464), PHYS 4650 (016.465), the former 016.358, or the former 016.370. Prerequisite: PHYS 2380 (016.238), or the former 016.250 (C).

PHYS 3430 Honours Physics Laboratory (Lab Required) (Formerly 016.343) Six hours per week. Prerequisites: PHYS 2260 or PHYS 2261 (016.226) (C); and one of PHYS 2610 (016.261) or the former 016.269 (C); or consent of department.

PHYS 3570 Physics of Materials 1 (Formerly 016.357) Introduction to the physics of materials. Solids within the elastic limit: stress and strain tensors, elastic constants. Liquids: continuity equation, Bernoulli, Euler and Navier-Stokes equations. Recommended prerequisite or concurrent requirement: PHYS 3680.

PHYS 3630 Electro - and Magnetostatic Theory Material covered will include electrostatics (i.e. Gauss' Law, Laplace and Poisson equations) and magnetostatics (Lorentz force, Maxwell equations) as well as the properties of electrostatic fields in matter and magnetism in materials. Not to be held with the former 016.369. Prerequisites: PHYS 2600 (016.260) (C); and PHYS 2490 or the former 016.237(C); or consent of department.

PHYS 3640 Electro - and Magnetodynamics and Special Relativity Topics covered will include time dependent Maxwell's equations, Ohm's and Faraday's Law, electromagnetic waves, potential and fields, radiation, and special relativity including the Lorentz transformations. Not to be held with the former

016.369. Prerequisite: PHYS 3630 (C).

PHYS 3650 Classical Mechanics 2

(Formerly 016.365) The second in a sequence of three courses on intermediate to advanced level mechanics. Topics include dynamics of a system of particles, noninertial reference frames, dynamics of rigid bodies, calculus of variations, Lagrangian and Hamiltonian dynamics. Not to be held with the former 016.233. Prerequisite: PHYS 2650 (016.265) (C).

PHYS 3660 Classical Mechanics 3

(Formerly 016.366) The third in a sequence of three courses on intermediate to advanced level mechanics. Topics include nonlinear oscillations and chaos, coupled oscillations, the wave equation in continuous media, special relativity. Not to be held with the former 016.356. Prerequisite: PHYS 3650 (016.365) (C).

PHYS 3670 Classical Thermodynamics

An introduction to the laws of classical equilibrium thermodynamics and their applications. Not to be held with the former 016.341. Prerequisite: PHYS 2490 or the former 016.237(C).

PHYS 3680 Statistical Mechanics

An introduction to the principles of classical and quantum statistical mechanics and their applications. Not to be held with the former 016.341. Prerequisites: PHYS 2380 (016.238) (C) and PHYS 3670 (C).

PHYS 3800 Topics in Astronomy

(Lab Required) (Formerly 016.380) An assignment and conference course to be taken only through consultation with the head of the department. The topics will vary depending upon student needs and interests, and will include specialized topics not available in regular course offerings.

4.11.3 Physics and Astronomy Course Descriptions-4000 Level

PHYS 4230 The Phenomenology of Galaxies

(Formerly 016.423) This course describes the phenomenology of galaxies as determined by recent observational data. Topics include the characteristics and distribution of stars; radiation from the interstellar medium (hydrogen, molecular gas and dust); the kinematics of the stellar and gaseous components of the Milky Way; the formation and evolution of galaxies and clusters of galaxies. Prerequisite: PHYS 3180 (016.318) (C).

PHYS 4240 Astronomy Project

(Formerly 016.424) A research oriented course involving processing, analysis, and interpretations of astrophysical data. Available topics include neutron stars, supernova remnants, astrophysical jet sources, the interstellar medium, and galactic structure. Prerequisites: PHYS 2070 (016.207) (C) and PHYS 3180 (016.318) (C). Prerequisite or concurrent requirement PHYS 4230.

PHYS 4250 Computational Physics

(Formerly 016.425) Application of numerical methods and programming skills to model a variety of physics problems on a computer. Topics include differential equations, boundary value and eigenvalue problems, special functions, and Monte Carlo methods, with examples from classical, quantum, and statistical mechanics. Prerequisites: PHYS 2490 or the former 016.237 (C); or consent of department.

PHYS 4300 Topics in Physics

(Formerly 016.430) Topics will vary depending upon student needs and interests, and will include specialized topics not available in regular course offerings. Prerequisite: a "C" or better in one of PHYS 3380 (016.338), the former 016.370, or the former 016.358; or consent of department.

PHYS 4360 Medical Radiation Physics

The relevant physics of the production and interaction of radiation beams used in both diagnostic and therapeutic medicine will be covered. Such beams included X- and g-rays, particle beams, visible and I.R. radiation, microwaves, and ultrasound. Prerequisite: PHYS 4560 (016.456) or consent of instructor.

PHYS 4390 Quantum Physics 3

Sequel to PHYS 3380 (016.338). Hilbert space formalism, symmetry and conservation laws, angular momentum, stationary state perturbation theory, variational methods. Not to be held with the former 016.438. Prerequisites: PHYS

2490 or the former 016.237 (C); and PHYS 3380 (016.338) (C).

PHYS 4400 Medical Imaging

Fundamental principles of image formation, analysis of the characteristics of medical images, parametric description of image quality; application to transmission radiography. Prerequisite: Consent of instructor.

PHYS 4510 Introduction to Nuclear Physics

(Formerly 016.451) Nuclear properties, the nuclear two-body problem; the deuteron and nucleon-nucleon scattering, nuclear models, nuclear disintegration; alpha-decay, gamma transitions, and beta-decay nuclear reactions; elementary particles. Prerequisite: a "C" or better in one of PHYS 3380 (016.338), the former 016.370, or the former 016.358.

PHYS 4520 Introduction to Solid State Physics

(Formerly 016.452) An introduction to the following topics as they relate to the properties of solids: crystal structure and lattice energy; lattice vibrations and specific heat; free-electron theory and band theory-metals, semiconductors and insulators; vacancies, diffusion, dislocations, and simple alloys. Prerequisite: a "C" or better in one of PHYS 3380 (016.338), the former 016.370, or the former 016.358.

PHYS 4560 Applied Nuclear Science

(Formerly 016.456) Review of nuclear physics, radioactive decay, nuclear reactions, interaction of radiation with matter, stopping powers, radiation dosimetry, radiation hazards; applications of nuclear science in medicine, nuclear reactors, chain reaction, moderators, neutron transport theory, nuclear fusion. Prerequisite: PHYS 4510 (016.451) (C).

PHYS 4590 Advanced Optics

Light as a classical electromagnetic wave, optical fields in media, interference by wavefront and amplitude splitting, diffraction, diffraction theory of image formation, spatial filtering and image processing, coherence theory. Not to be held with the former 016.458. Prerequisites: PHYS 2260 (016.226) (C); and PHYS 3640 or the former 016.369 (C).

PHYS 4600 Lasers and Applications

Light and atoms: semi-classical theory, principles of laser operation and properties of laser light, polarization optics, Gaussian beam optics, laser spectroscopy. Not to be held with the former 016.458. Prerequisites: PHYS 2260 (016.226) and PHYS 3380 (016.338) (C).

PHYS 4620 Advanced Classical Mechanics

(Formerly 016.462) Canonical invariants and Lagrange and Poisson brackets. Hamilton-Jacobi theory, action-angle variables, normal modes of vibration. Prerequisite: PHYS 3660 (016.366) or the former 016.356 (C).

PHYS 4630 Physics of Materials 2

(Formerly 016.463) Physics of materials beyond the elastic limit, emphasizing atomistic features. Structural aspects, crystal defects, plastic deformation, radiation damage, diffusion and dislocations. Prerequisite: PHYS 3570 (016.357) (C).

PHYS 4672 Physics Laboratory A

(Lab Required) For students in term 1 of their final year in Honours. Experiments are available in nuclear physics, solid state physics, and optics. All are open ended, permitting the student to pursue the investigation of a phenomenon as far as desired. First part of a two course series. Not to be held with the former PHYS 4670, 016.444 or PHYS 4570 (016.457). Prerequisites: PHYS 3430 (016.343) (C) or consent of department.

PHYS 4674 Physics Laboratory B

(Lab Required) For students in term 2 of their final year in Honours. Experiments are available in nuclear physics, solid state physics, and optics. All are open ended, permitting the student to pursue the investigation of a phenomenon as far as desired. Second part of a two course series. Not to be held with the former PHYS 4670, 016.444 or PHYS 4570 (016.457). Prerequisites: PHYS 3430 (016.343) (C); and one of PHYS 4672 (C) or PHYS 4676 (C).

PHYS 4676 Honours Thesis - Proposal and Preparation

For students in term 1 of their final year in Honours. The student will prepare a proposal for the undergraduate thesis and demonstrate the feasibility of the project under the supervision of a faculty member. The results of the study will be presented

(in written and oral form) to an examining committee during the term. Both experimental and theoretical topics are acceptable. A grade of C (based on the presentations) is required to proceed to the next course which forms the final stage of the honours thesis. Not to be held with the former PHYS 4670, the former 016.444, the former PHYS 4570 (016.457), or PHYS 4672. Prerequisites: PHYS 3430 (016.343) (C) and consent of department.

PHYS 4678 Honours Thesis - Dissertation

For students in term 2 of their final year in Honours. The student will complete the work needed and produce an undergraduate thesis under the supervision of a faculty member. The grade will be based on the examining committee's evaluation of a progress report (presented mid-term) and an evaluation of the thesis manuscript and oral presentation at the end of term. Both experimental and theoretical topics are acceptable. Not to be held with the former PHYS 4670 (016.444), PHYS 4570 (016.457), PHYS 4672, or PHYS 4674.

4.13 Department of Statistics
4.13 Department of Statistics ,

4.13.1 Program Information

4.13.1 Program Information,
Statistics is a discipline grounded in mathematics that has practical applications in many other areas. Statistics is an analytical discipline that helps other disciplines carry out research projects and studies that involve measurement, comparison, and interpretation. Statistics is a useful ancillary subject to other sciences, the social sciences, and many of the professional programs. The department offers joint programs with Mathematics, Economics and Actuarial Mathematics.

Honours Requirements

Students will normally take STAT 2000 and STAT 2400 in Year 2 and enter Honours in Year 3.

To enter the Honours program in Statistics, a student must have completed at least 24 credit hours with a minimum GPA of 3.00, and also obtained a minimum grade of "B" in STAT 2400. STAT 1000, MATH 1300, MATH 1500, and MATH 1700 are all requirements of the Statistics Honours degree program and students are strongly encouraged to take these courses in Year 1.

To continue in the Statistics Honours program, students must maintain a minimum GPA of 3.00, and complete a minimum of 9 credit hours during each Fall and Winter Term.

To graduate with the B. Sc. Honours degree, a student must achieve a minimum GPA of 3.00 and minimum grade of "C" in each course that contributes to the 120 credit hours of the degree.

Four Year Major Requirements

Students will normally take STAT 2000 and STAT 2400 in Year 2 and enter the four year Major in Year 3.

To enter the Major Degree program in Statistics, a student must have completed at least 24 credit hours with a minimum GPA of 2.00, and also obtained a minimum grade of "C+" in STAT 2400. STAT 1000, MATH 1300, MATH 1500, and MATH 1700 are all requirements of the Statistics Honours degree program and students are strongly encouraged to take these courses in Year 1.

To continue in the four year Major program a student must maintain a minimum GPA of 2.00.

To graduate from the four year Major program a student must obtain a minimum GPA of 2.00 on the 120 credit hours that contribute to the degree and also a minimum grade of "C" in each of the Major Program Specific courses (see below).

Major Program Specific courses

Undergraduate Studies

All courses specified in the program charts below (excluding the required optional courses and electives).

The department must approve a student's four year Major program each session. Students must obtain departmental approval for any and all revisions to their programs.

In order to improve their academic backgrounds as well as job opportunities, students should carefully elect the optional courses in this program. They should particularly consider the following sequence of courses in Economics and Computer Science.

Economics: ECON 1010, ECON 1020, ECON 2450, ECON 2460, ECON 2470, ECON 2480, ECON 3170, ECON 3180, ECON 3730, ECON 4120, ECON 4130.

Computer Science (Software and Artificial Intelligence): COMP 1260, COMP 1270, COMP 1010, COMP 1020, COMP 2080, COMP 2130, COMP 2140, COMP 3380, COMP 3440, COMP 4200, COMP 4380.

Computer Science (Numerical Analysis and Graphics): COMP 1260, COMP 1270, COMP 1010, COMP 1020, COMP 2080, COMP 2130, COMP 2140, COMP 2190, COMP 3140 or COMP 3490.

Three Year General

As prescribed with all other faculty regulations in Section 3.2, students in this program must select 18 credit hours of 2000, 3000, or 4000 level courses from each of two Science areas. To satisfy the requirement in the area of Statistics, students must take a minimum of 18 credit hours of 2000, 3000 and (or) 4000 level Statistics courses.

4.13.2 Statistics Program Charts

4.13.2 a Statistics Program Charts,

4.13.2 b Statistics Program Charts,

4.13.2 Statistics			
FOUR YEAR MAJOR² 120 CREDIT HOURS (comprising courses listed in chart below, and electives)			
STAT 1000	STAT 2400 (C+)	STAT 3050, STAT 3400 ³ , STAT 3470, STAT 3480, STAT 3800 ⁴	STAT 4100, STAT 4200, STAT 4520, STAT 4530
MATH 1500 ¹ , MATH 1700 ¹ , MATH 1300 ¹	MATH 2300, MATH 2720 ¹ , MATH 2730 ¹		
The following courses must be taken in University 1 or Year 2:		15 credit hours chosen from:	
COMP 1010, STAT 2000, MATH 1200		STAT 3170, STAT 3380, STAT 3490, STAT 4170, STAT 4580, STAT 4590, STAT 4600, STAT 4630, STAT 4690, STAT 4700	
6 credit hours from the Faculty of Arts, which should include the required "W" course		6 credit hours chosen from:	
21 credit hours of elective courses - including courses to be chosen from an area of application outlined in note 3 below. ³		MATH 2202, MATH 2600, MATH 2800, MATH 3230, MATH 3540, MATH 3600, MATH 3700, MATH 3740 (6), MATH 3800, MATH 3810	
		12 credit hours of elective courses -	

	including courses required for the chosen area of application outlined in note 3 below. ³
--	--

NOTES:

1 MATH 1310 may be taken in place of MATH 1300; MATH 1510, or MATH 1520 may be taken in place of MATH 1500; MATH 1710 may be taken in place of MATH 1700. MATH 1690 may be taken in place of both MATH 1700 and 1500. MATH 2750 may be taken in place of MATH 2720 and 2730.

2 Of the electives chosen as part of the Honours Degree, 18 credit hours are to be selected from one department which represents a field of application such as: Actuarial Mathematics, Biological Sciences, Microbiology, Economics, Psychology or Sociology. (Mathematics and Computer Science are excluded from this list.) In consultation with the department, combinations of courses from a coherent area of studies may be selected.

3 Of the electives chosen as part of the Major Degree, 15 credit hours must be selected from either, Computer Science and Mathematics, or from one of the following departments: Actuarial Mathematics, Biological Sciences, Microbiology, Economics, Psychology, or Sociology.

4 STAT 3400 and STAT 3800 have corequisites of MATH 2720 and MATH 2730. Therefore students who wish to take STAT 3400 and STAT 3800 should consider taking MATH 1300, MATH 1500 and MATH 1700 in University 1 or Year 2, as they are prerequisite to MATH 2720 and MATH 2730.

5 IMPORTANT: The four year Major program need not be completed in the manner prescribed in the chart above. The chart indicates one possible arrangement of the required courses and is meant to be a guide around which students can plan their program.

(The number 6 in brackets indicates a six credit hour course)

4.13.3 Statistics - Actuarial Mathematics Joint Honours Program

4.13.3 Statistics - Actuarial Mathematics Joint Honours Program.

The Department of Statistics and the Warren Centre for Actuarial Studies and Research offer a joint Honours program for students wishing in depth study in Statistics and Actuarial Mathematics.			
Entry Requirements:			
<p>To enter the Joint Honours program, students must have completed 24 credit hours with a minimum GPA of 3.00. Students must also obtain a minimum grade of "B" in one of the following courses: an approved Written English course, (both of) ECON 1010 and ECON 1020, MATH 1300, MATH 1500, MATH 1700 or STAT 1000; and must also obtain a minimum grade of "B" in STAT 2000.</p> <p>To graduate with the B. Sc. Honours degree, a student must achieve a minimum DGPA of 3.00 and a minimum grade of "C" on all courses that contribute to the 120 credit hours of the degree.</p> <p>NOTE 1: For all ACT courses, "C+" is the minimum grade required for prerequisite purposes.</p> <p>NOTE 2: In order to receive course credit for, and examination exemptions from, future Society of Actuaries (SoA) and VEE courses, students must obtain a minimum grade of "B" in the following courses: ECON 1010, ECON 1020, ACC 1100, FIN 2200, STAT 3470, and STAT 3490. Contact the Warren Centre for Actuarial Studies and Research for further information.</p> <p>Recommended Electives:</p> <p>ACT 4050, ACT 4150, ACT 4240; FIN 3410; COMP 1010; STAT 4630</p>

30 Hours	30 Hours	30 Hours	30 Hours
NOTES:			
1 MATH 1310 may be taken in place of MATH 1300; MATH 1510, or MATH 1520 may be taken in place of MATH 1500; MATH 1710 may be taken in place of MATH 1700; MATH 1690 may be taken in place of both of MATH 1500 and MATH 1700; MATH 2750 may be taken in place of both of MATH 2720 and MATH 2730; MATH 2352 (6) may be taken in place of MATH 2300.			
2 ACC 1100 and FIN 2200 may be taken in Year 2, 3 or 4; however, it is strongly recommended that these two courses be taken in Year 2 or 3. Note that ACC 1100 is a prerequisite for FIN 2200.			
3 COMP 1260 and MSCI 2150 may be taken in Year 2, 3 or 4. Note that COMP 1260 is a prerequisite for MSCI 2150.			
4 In order to receive course credit for, and examination exemptions from, future Society of Actuaries (SoA) and VEE courses, students must obtain a minimum grade of "B" in these courses.			
(Letters in brackets indicate minimum prerequisite standing for further study.)			

4.13.4 Statistics - Mathematics Joint Honours Program

4.13.4 Statistics - Mathematics Joint Honours Program,

The departments of Statistics and Mathematics offer a joint Honours program for students wishing in depth study in Statistics and Mathematics.			
To enter the Honours program students must have satisfied the Faculty of Science requirements for entry to the program, and have completed STAT 1000, MATH 1300 and either MATH 1690, or MATH 1500 and MATH 1700 or any equivalent with a minimum grade of "B" in each of STAT 1000 and MATH 1690 (or a "B" average in MATH 1500 and MATH 1700).			
To graduate with the B. Sc. Honours degree, a student must achieve a minimum DGPA of 3.00 and a minimum grade of "C+" in each of the Honours Program Specific courses, and a minimum grade of "C" on all remaining courses that contribute to the 120 credit hours of the degree. See the Calendar entry for each of the Department of Statistics and the Department of Mathematics for the Honours Program Specific courses.

2 STAT 2000 may be taken in University 1.			
(Letters in brackets indicate minimum prerequisite standing for further study. The number 6 in brackets indicates a 6 credit hour course.)			

4.13.5 Statistics - Economics Joint Honours Program

4.13.5 Statistics - Economics Joint Honours Program,

The Department of Statistics along with the Department of Economics (Faculty of Arts) offer a Joint Honours program for students wishing in depth study in Statistics and Economics. For Economics course listings, refer to the Faculty of Arts chapter in the Calendar.			
Students will normally take STAT 2000 and STAT 2400 in second year and enter Honours in Year 3.			
To enter the Joint Honours Statistics Economics program, the student must have a minimum grade of "B" in both of ECON 1010 and ECON 1020 (or ECON 1210 and ECON 1220) and STAT 2400; and an average grade of "B" or better with a minimum grade of "C+" in each of MATH 1500 and MATH 1700 or any equivalents and have satisfied the Faculty of Science requirements for entry to the honours program.

NOTES:			
1 MATH 1310 may be taken in place of MATH 1300; MATH 1510, or MATH 1520 may be taken in place of MATH 1500; MATH 1710 may be taken in place of MATH 1700.			
2 ECON 1210 and ECON 1220 may be used in place of ECON 1010 and ECON 1020.			
3 Of the 18 credit hours in Economics electives in Years 2, 3 and 4, no more than 6 credit hours may be at the 2000 level or below; ECON 2530 and ECON 3180 are recommended in Year 2 or 3. The normal prerequisite for ECON 3180 is ECON 3170, which will be waived for students in this program who have completed Year 1.			
(Letters in brackets indicate minimum prerequisite standing for further study. The number 6 in brackets indicates a 6 credit hour course.)			

4.13.6 Statistics Course Descriptions-1000 Level

STAT 1000 Basic Statistical Analysis 1

(Formerly 005.100) An introduction to the basic principles of statistics and procedures used for data analysis. Topics to be covered include: gathering data, displaying and summarizing data, examining relationships between variables, sampling distributions, estimation and significance tests, inference for means. Not to be held with STAT 1001, STAT 2220 (005.222). Prerequisite: Any grade 12 or 40S Mathematics, or equivalent.

STAT 1001 Analyse statistique de base I

(Ancien 005.100) Une introduction aux principes fondamentaux de la statistique et aux procédures utilisées en analyse de données. Les sujets traités incluent: la cueillette des données, l'affichage et l'élagage des données, les relations entre variables, les distributions échantillonnables, l'estimation et les tests de signification, l'inférence pour les moyennes. On ne peut se faire créditer à la fois le STAT 1000 (005.100) et le STAT 2220 (005.222). Préalable: Un cours de mathématiques 40S ou l'équivalent. Donnée seulement au Collège universitaire de Saint-Boniface.

4.13.6 Statistics Course Descriptions-2000 Level

STAT 2000 Basic Statistical Analysis 2

(Formerly 005.200) The study of estimation and hypothesis testing procedures for means and proportions in one, two and multiple sample situations, introduction to the analysis of variance; regression and correlation analysis; optional topics may include nonparametric procedures, design of experiments, probability models. Not to be held with STAT 2001. Prerequisite: STAT 1000 (005.100) (C), or STAT 1001 (C).

STAT 2001 Analyse statistique de base II

(Ancien 005.200) L'étude des procédures d'estimation et de tests d'hypothèses pour les moyennes et les proportions dans les contextes d'échantillonnage à une, deux ou plusieurs variables; introduction à l'analyse de variance; régression et corrélation; les sujets optionnels peuvent inclure les méthodes nonparamétriques, la conception d'expériences, les modèles probabilistes. On ne peut se faire créditer à la fois le STAT 2000. Préalable: STAT 1000 ou STAT 1001(ou 005.100) (C). Donnée seulement au Collège universitaire de Saint-Boniface.

STAT 2220 Contemporary Statistics for Engineers

(Lab Required) (Formerly 005.222) Descriptive statistics, basic probability concepts, special statistical distributions, statistical inference-estimation and hypothesis testing, regression, reliability, statistical process control. Not to be held with STAT 1000, STAT 1001, or 005.100. Prerequisite: a "C" or better in one of MATH 1690 (136.169), the former MATH 1680 (136.168), MATH 1700, MATH 1701 (136.170), MATH 1710 (136.171), or the former 136.173.

STAT 2400 Introduction to Probability I

(Lab Required) Basic probability, discrete distributions including binomial, hypergeometric, geometric and Poisson, joint distributions, continuous distributions, statistical inference and applications involving discrete random variables. This course is not available to any student who has previously obtained credit for STAT 3500. Prerequisites: STAT 1000 or STAT 1001 (005.100) (C); and one of MATH 1700, MATH 1701 (136.170), or MATH 1690 (136.169) (C).

4.13.6 Statistics Course Descriptions-3000 Level

STAT 3000 Applied Linear Statistical Models

Applied Linear regression and analysis of variance for designed experiments. This course is not for use in the Honours or Major degree programs in Statistics. Not to be held with STAT 3470 (005.347), STAT 3480 (005.348), the former STAT 3120 (005.312) or the former STAT 3130 (005.313). Prerequisite: STAT 2000 (005.200) or STAT 2001 (005.201) (C).

STAT 3050 Introduction to Probability Theory and Its Applications

(Formerly 005.305) Development of the basic concepts of probability theory and application in areas of biostatistics, actuarial science, reliability theory, queuing theory. Prerequisites: STAT 3400 or the former STAT 3500 (005.350) (C); and MATH 2720 or MATH 2721(136.272, 136.270) (C); and MATH 2730 or MATH 2731 (136.273, 136.271) (C).

STAT 3170 Statistical Quality Control

(Formerly 005.317) Techniques for quality improvement through the use of

statistical process control. Topics will include acceptance sampling, Pareto diagrams, boxplots, normal probability plots, control charts (EWMA and CUSUM), measurements of process capability and process performance. Prerequisite: STAT 2000 or STAT 2001 (005.200) (C).

STAT 3380 An Introduction to Nonparametric Statistics

(Formerly 005.338) Parametric versus nonparametric inference; inference using ranks and order statistics; tolerance intervals; contingency tables; goodness-of-fit tests; examples from the social and physical sciences. Prerequisite: STAT 2000 or STAT 2001 (005.200) (C).

STAT 3400 Introduction to Probability II

(Lab Required) Continuation of STAT 2400. Continuous distributions, properties of common distributions, distributions of functions of random variables. Not to be held with the former STAT 3500 (005.350). Prerequisite: STAT 2400(C). Prerequisite or Concurrent requirement: one of MATH 2720, MATH 2721, MATH 2730, or MATH 2731.

STAT 3470 Statistical Methods for Research Workers 1

(Formerly 005.347) Linear regression, multiple regression, correlation analysis, introduction to one way analysis of variance, some related topics. Not to be held with STAT 3000 or the former STAT 3120 (005.312). Prerequisite: STAT 2000, STAT 2001 (005.200) (C). Prerequisite or Concurrent Requirement: STAT 3400 or the former STAT 3500 (005.350).

STAT 3480 Statistical Methods for Research Workers 2

(Formerly 005.348) Analysis of variance, randomized block design, nested and Latin square experiments, analysis of covariance. Not to be held with STAT 3000 or the former STAT 3130 (005.313). Prerequisite: STAT 3470 (005.347) (C).

STAT 3490 Time Series Analysis

(Formerly 005.349) Trend and seasonal components, exponential smoothing by the multiple regression method, the Box-Jenkins Methodology, analysis of seasonal data. Prerequisite: STAT 3470 (005.347) (C) or the former STAT 3120 (005.312) (C).

STAT 3800 Mathematical Statistics

(Lab Required) Multivariate distributions and transformations, order statistics, sampling distributions, convergence, introduction to statistical inference. Not to be held with the former STAT 3600 (005.360). Prerequisite: STAT 3400 or the former STAT 3500 (005.350) (C). Prerequisite or Concurrent requirement: Whichever of MATH 2720 (MATH 2721) or MATH 2730 (MATH 2731) not yet taken.

4.13.6 Statistics Course Descriptions-4000 Level

STAT 4100 Statistical Inference 1

Introduction to methods of estimation, including asymptotic and Bayesian methods. Not to be held with the former STAT 4140 (005.414). Prerequisite: STAT 3800 or the former STAT 3600 (005.360).

STAT 4170 Lifetime Data Analysis

(Formerly 005.417) An introduction to basic principles and techniques for lifetime data analysis in biostatistics and reliability, with emphasis on theory and applications. Topics to be covered include: censoring, truncation, survival and hazard functions, parametric and nonparametric methods, proportional hazards regression. Prerequisites: STAT 3480 (005.348) (C); and either STAT 3800 or the former STAT 3600 (005.360) (C); or consent of department.

STAT 4200 Statistical Inference 2

Introduction to methods of hypothesis testing, including asymptotic and Bayesian methods. Not to be held with the former STAT 4140 (005.414). Prerequisite: STAT 4100.

STAT 4520 Sampling Techniques 1

(Formerly 005.452) A development of sampling theory for use in sample survey problems, in regression estimates, in systematic sampling, sources of errors in surveys. Prerequisites: STAT 3800 or the former STAT 3600 (005.360) (C); and STAT 3480 (005.348); or consent of department.

STAT 4530 Design of Experiments 1

(Formerly 005.453) Objectives in designing experiments; designs commonly used in research including analysis and an introduction to the construction of designs.

Prerequisites: STAT 3800 or the former STAT 3600 (005.360) (C); and STAT 3480 (005.348) (C); or consent of department.

STAT 4580 Sampling Techniques 2
(Formerly 005.458) A mathematical treatment of some advanced topics in sampling theory. Multistage sampling plans and other selected topics. Prerequisite: STAT 4520 (005.452) (C) or consent of department.

STAT 4590 Design of Experiments 2
(Formerly 005.459) The theory and analysis of experimental designs treated in STAT 4530 (005.453) and more advanced designs; construction of designs. Prerequisite: STAT 4530 (005.453) (C) or consent of department.

STAT 4600 Statistics Topics 1
(Formerly 005.460) Topics of current interest in Statistics that will vary with the needs and interests of students and Faculty. Prerequisite: STAT 3800 or the former STAT 3600 (005.360) (C); or consent of department.

STAT 4630 Stochastic Processes
(Formerly 005.463) An introduction to stochastic processes. Prerequisite: STAT 3050 (005.305) (C); and STAT 3800 or the former STAT 3600 (005.360) (C); or consent of department.

STAT 4690 Applied Multivariate Analysis
(Formerly 005.469) The course will emphasize applications of various techniques in multivariate analysis and gaining familiarity with the relevant programs in statistical packages, i.e., SAS, BMDP. Prerequisites: STAT 3480 (005.348) (C); and a "C" or better in one of MATH 2300 (136.230), MATH 2301, MATH 2352, or the former MATH 2350 (136.235); or consent of instructor.

STAT 4700 Statistical Consulting
(Formerly 005.470) The role of a Statistics Consultant. Practical consulting experience. This course is normally open to fourth year and graduate students in Statistics. Prerequisites: STAT 3800 or the former STAT 3600 (005.360) (C); and STAT 3480 (005.348); or consent of department. Prerequisites or concurrent requirements: STAT 4520 and STAT 4530.

Chapter Contents

Chapter Contents Social Work,

SECTION 1: Degree Offered

- 1.1 Degree
- 1.2 Concentration in Child and Family Services
- 1.3 Interfaculty Concentration in Aging

SECTION 2: Admission Requirements

- 2.1 Admission to the Fort Garry Social Work Program
- 2.2 Admission to the Inner City Social Work Program
- 2.3 Admission to the Northern Social Work Program
- 2.4 Admission to the Distance Delivery Social Work Program
- 2.5 The Collège universitaire de Saint-Boniface

Undergraduate Studies

- 2.6 Special Student Admission

SECTION 3: Faculty Academic Regulations

- 3.1 Prerequisite and Corequisite Policy
- 3.2 Residence Requirements for a Degree Program
- 3.3 Scholastic Progress
- 3.4 Professional Unsuitability Bylaw
- 3.5 Dean's Honour List
- 3.6 Appeal of Grades
- 3.7 Distance Courses Open to Fort Garry Campus and Inner City Social Work Students
- 3.8 Opting Into Field and Practices of the Two-Year Plan
- 3.9 Courses Open to Challenge for Credit
- 3.10 Credit for Social Work Courses Taken at Other Universities

SECTION 4: Program and Graduation Requirements

- 4.1 Curriculum Outline
- 4.2 Field Instruction
- 4.3 Requirements for Graduation

SECTION 5: Course Descriptions

SECTION 1: Degree Offered

Section 1: Social Work,

The B.S.W. program intends to provide students with knowledge and skills necessary for professional preparation for generalist practice in a variety of social work fields. The B.S.W. program is the only program in Manitoba accredited by the Canadian Association for Social Work Education, and graduates are eligible for acceptance into schools of graduate studies. The B.S.W. degree is accepted as a professional degree by the Manitoba Institute for Registered Social Workers, by the Manitoba Association of Social Workers, and by the Canadian Association of Social Workers, and holders of the degree are eligible for membership to these organizations.

1.1 Program,

Degree	*Years to Complete	*Total Credit Hours
Bachelor of Social Work (Full-Time)	4	123
Bachelor of Social Work (Concentrated)**	2	123
Bachelor of Social Work (Part-Time)	Up to 9	123

*This includes one year (30 credit hours) of prior university study.

**Please see 4.1 B

1.2 Concentration in Child and Family Services,

The Faculty offers the Concentration in Child and Family Services. Students are required to complete prescribed electives and core courses related to child and family services. For more information and a detailed list of concentration requirements please refer to the Faculty's website.

Upon the successful completion of these requirements, a notation will be added to the student's transcript.

1.3 Interfaculty Concentration in Aging,

The Interfaculty Concentration in Aging is offered by the following faculties: Arts, Human Ecology, Nursing, Kinesiology and Recreation Management, Clayton H. Riddell Faculty of Environment, Earth and Resources, and Social Work. To complete the concentration, students will complete each of the following requirements: a) 2610* Health and Physical Aspects of Aging; b) 2650* The Social Aspects of Aging; c) one field placement SWRK 3150 or SWRK 4120 in aging d) one Field Focus of Social Work Practice course (SWRK 4200 or SWRK 4300) in aging. Students are encouraged to take courses from the participating units other than Social Work.

NOTE: *These courses are offered on a rotational basis by participating units.

Upon the successful completion of these requirements, a notation will be added to the student's transcript. For further information on the Interfaculty Concentration in Aging please refer to the Faculty's website umanitoba.ca/faculties/social_work

SECTION 2: Admission Requirements

Section 2: Social Work ,

The following is a summary of the admission requirements to the Bachelor of Social Work. Equivalent academic courses completed at recognized universities elsewhere will be considered. All admission requirements, as well as application deadline dates and forms, are included in an applicant information bulletin that is available from the Admissions Office, Enrolment Services, 424 University Centre; this information is also posted on the university's website.

2.1 Admission to the Fort Garry Social Work Program,

Admission Requirements

Completion of 30 credit hours of university level courses which are acceptable to the University of Manitoba.

The written English and mathematics requirements are recommended to be completed as part of University 1. If these requirements are not met in University 1 (i.e. the first 30 credit hours) they must be completed prior to graduation.

Minimum GPA for consideration for all applicants (including Educational Equity applicants): 2.5

A Criminal Record Statement and a Child Abuse Registry (CAR) check (for a record of those registered as an offender) must be completed following selection. Selection criteria: Two applicant pools are created; 60% of all spaces are allocated to applicants with the highest grades, and 40% of all spaces are allocated to applicants based on the Education Equity initiative.

Concentrated Program

All applicants wishing to complete the program in two years of full-time study must have completed a minimum of 51 credit hours of university study (which are acceptable to the University of Manitoba) prior to admission to the BSW program. Applicants wishing to complete the degree through the two year concentrated program must have an Adjusted Grade Point Average of 3.00 from all previous university study. In the event that three credit hours in each of written English and mathematics have not been completed as part of the 51 credit hours of previous university study, they must be completed within the first year of the two-year program.

The deadline for submission of applications in March 1st (for September start date).

The Selection Process

The selection process is designed to accomplish three objectives: to treat applicants fairly and equitably, to provide the diversity of practitioners required by the profession, and to provide for an efficient admissions process. The faculty selects applicants to the Fort Garry Campus B.S.W. program through two categories as described below.

Academic Achievement Category: 60% of all available positions are awarded on the basis of highest Adjusted Grade Point Average.

Educational Equity Initiative: 40% of all available positions are allocated to those eligible for inclusion in one or more of the Educational Equity Priority Groups and awarded on the basis of highest Adjusted Grade Point Average.

The purpose of the Educational Equity initiative is to achieve equality in professional education so that no person shall be denied educational opportunities or benefits for reasons unrelated to ability. In the fulfillment of this goal, the aim is to correct the conditions of disadvantage in professional education experienced by Aboriginal peoples, persons with disabilities, gender and sexual minorities, immigrants and refugees to Canada, and persons who are, because of their race or colour, a visible minority in Canada. Giving effect to the principle of educational equity means more than treating persons in the same way; it also requires special measures and the accommodation of difference. Details of the Educational Equity initiative are provided in the application information bulletin.

Students in the Fort Garry Social Work Program must successfully meet the graduation criteria set for all BSW students in the Faculty of Social Work.

2.2 Admission to the Inner City Social Work Program ,

The Inner City Social Work (B.S.W.) ACCESS Program at the William Norrie Centre is an inner-city extension of the Faculty of Social Work. Students admitted to the centre are accepted directly into a four-year B.S.W. program, and do not require prior university study.

The objective of this program is to enhance the accessibility of the B.S.W. program by preparing as social workers those mature students who have had inner-city or similar social service experience, but who lack the normal university entrance requirements. Special academic and social support is provided to students admitted to the program. Staff assists candidates in arranging funding resources.

All students complete a total of 123 credit hours of university study. Full time or part-time study is offered.

Admission to the centre is limited. Applicants to the full-time program must be 21 years old, low income, and residents of Winnipeg at the time of application. The deadline date for submitting applications is early February.

A part-time B.S.W. Access program is offered to individuals who meet the above criteria, work for a Winnipeg or Aboriginal agency, and/or have two years employment in human service fields. Deadline for applications for part-time studies is mid January.

Students at the centre must successfully meet the graduation criteria set for all BSW students in the Faculty of Social Work. For further information, contact: Inner City Social Work Program, 485 Selkirk Avenue, Winnipeg, Manitoba, R2W 2M6; telephone: (204) 668-8160.

2.3 Admission to the Northern Social Work Program ,

The Northern Bachelor of Social Work (B.S.W.) program, based in Thompson Manitoba, is an extension of the Fort Garry Faculty of Social Work. Students are admitted directly into a four-year B.S.W. program and do not require prior university study.

All students complete a total of 123 credit hours of university study. Full time or part-time study is offered.

The objective of this program is to enhance the accessibility of the B.S.W. program by preparing as social workers mature students who, without the support of the program, would be unable to successfully complete a university degree due to lack of financial resources, lack of academic qualifications and remote location. Special academic and personal support is provided to students admitted to the program, as well as some assistance in arranging funding resources.

Students who have completed 30 credit hours of university level courses and have a minimum GPA of 2.5 may apply as External Students.

Admission to the Northern Social Work program is limited. Applicants must meet specified northern residency requirements. The deadline date for submitting applications is March 1 (classes begin in September).

Students in the Northern Social Work program must successfully meet the graduation criteria set for all BSW students in the Faculty of Social Work. For further information, contact the Director, Faculty of Social Work at Thompson, 3 Station Road, Thompson, Manitoba, R8N 0N3; telephone: (204) 677-1450.

2.4 Admission to the Distance Delivery Social Work Program ,

The Faculty of Social Work is committed to the accessibility of social work education. The faculty has extended the concept of accessibility to include

geographical accessibility through the delivery of the B.S.W. based on two approaches: (1) to individuals by means of an independent study program and (2) to community-based groups using the cohort method.

The Distance Delivery B.S.W. program is intended to encourage individuals who are employed in the social services and living outside of Winnipeg, but who may not have had the opportunity to pursue professional social work education.

All students complete a total of 123 credit hours of university study. Full time or part-time study is offered.

Delivery methods for the independent study component of the program include a combination of audioconference sessions and online independent study manuals. Access to high speed internet is required.

All course examinations are scheduled and arranged by the university's Registrar's Office to take place in the student's community.

Delivery of the program to the community-based cohorts utilizes the face-to-face delivery with the option of a combination of face-to-face and independent study.

Applicants to the Distance Delivery B.S.W. program must meet all three of the following requirements to be admitted into the program:

A minimum of two years of social service related work experience, within the last five years;

Residency outside of Winnipeg;

The university admission requirements for either a regular student or a mature student.

Complete and detailed admissions information is available on our web site at umanitoba.ca/faculties/social_work or by calling the Faculty of Social Work Distance Delivery BSW Student Advisor at (204) 474-6070.

The deadline for submission of applications in March 1st (for September start date).

Students in the Distance Delivery B.S.W. program must successfully meet the graduation criteria set for all BSW students in the Faculty of Social Work.

2.5 The Collège universitaire de Saint-Boniface,

The Collège universitaire de Saint-Boniface, in conjunction with the University of Manitoba, now offers a French language Bachelor of Social Work program. Please contact Program Coordinator at 237-1818 ext. 447 for more information.

2.6 Special Student Admission,

A Special Student in Social Work is one who wishes to take undergraduate Social Work courses with no intentions of proceeding to a B.S.W. degree at the present time. In addition, the student is not currently registered at any other university. Students seeking admission as Special Students may re-quest information from the Faculty of Social Work, 521 Tier Building; tel-ephone (204) 474 7050. Criteria for admission are:

- Successful completion of a minimum of 30 credit hours of university level courses which are acceptable to the University of Manitoba;

and

- Adjusted Grade Point Average of 2.5 (C+).

Students are reminded they must submit an official transcript (one bearing the university seal) to the BSW Student Advisor along with the application form on their appointment day (University of Manitoba students need only provide a student history). An application fee applies. Once admitted as a Special Student, students will:

- Be limited to completion of nine credit hours of required social work courses plus SWRK 1310 and SWRK 2080.
- Be prohibited from adding courses in the Faculty of Social Work until August (refer to the *Registration Guide* for specific dates).
- Have all courses classified as "SS," which means that grades for these courses may not generate a Grade Point Average.

Students Enrolled in other Faculties/Schools

Students currently enrolled in other faculties or schools at the University of Manitoba may register for Social Work courses provided they have completed a Undergraduate Studies

minimum of 30 credit hours of university study and achieved a minimum Cumulative Grade Point Average of 2.5. These students will also be limited to completion of SWRK 1310 and SWRK 2080 plus nine credit hours of required social work courses.

Courses available to Special Students and students enrolled in other faculties and schools at the University of Manitoba:

Required Social Work Courses:

SWRK 1310 Introduction to Social Welfare Policy Analysis

SWRK 2080 Interpersonal Communication Skills

SWRK 2090 Human Behaviour and Social Work Practice

SWRK 2110 Emergence of the Canadian Welfare State

SWRK 2120 Britain: Poor Laws to the Welfare State

SWRK 2130 Comparative Social Welfare Systems

SWRK 3130 Contemporary Canadian Social Welfare

SWRK 3100 Systematic Inquiry in Social Work

Elective Social Work Courses:

SWRK 2050 Community & Organizational Theory

SWRK 2070 Small Group Dynamics

SWRK 4050 Selected Topics in Social Work

SWRK 4080 Current Issues in Social Welfare

NOTE: Special and non-Social Work students are required to abide by the same pre-/corequisite policy that applies to B.S.W. students.

SECTION 3: Faculty Academic Regulations

Section 3: Social Work,

All students are asked to note that some academic policies and regulations are under review and are subject to change.

The provisions of the chapter, General Academic Regulations and Requirements, and the chapter, University Policies, apply to all students. In addition, the Faculty of Social Work has regulations and requirements, published below, that apply specifically to its students.

3.1 Prerequisite and Corequisite Policy ,

The faculty has established a set of pre-/corequisite requirements to assist students in planning their program of study.

All students must abide by the pre- and corequisite requirements for all courses. Any exceptions to the pre- and corequisite policy **MUST** be approved by the Committee on Academic Standings prior to course registration. Should a student violate the pre- and corequisite policy, credit(s) for the course(s) will be deleted from the student's academic record. For detailed information, please refer to the B.S.W. Student Handbook.

3.2 Residence Requirements for a Degree Program,

The general university residence requirement applies to the Faculty of Social Work.

3.3 Scholastic Progress ,

Except in circumstances covered in the official regulations referred to below, clear standing in the faculty requires both the Degree Grade Point Average and Subject Grade Point Average of 2.5 (C+) at the end of each academic session. A minimum grade of 2.0 (C) is required for all Social Work courses. The passing grades for electives taken in other faculties or schools are those required by the faculties or schools concerned. Complete statements of the regulations governing scholastic progress in the Faculty of Social Work are published in the B.S.W. Student Handbook. Students wishing to do so may consult the policy governing scholastic progress as written in the B.S.W. Student Handbook with the Chair of the Committee on Academic Standings, or the Dean. In the event of any question or dispute, this set of regulations shall be considered the official version. Directors of off-campus programs and the Student Services and Admissions/ Advising Office at Fort Garry Campus will advise students on issues concerning scholastic progress.

3.4 Professional Unsuitability Bylaw ,

The Senate has approved a bylaw granting authority to the faculty to require a student to withdraw for reasons of professional unsuitability (see the chapter, General Academic Regulations and Requirements, Section 6.2.3.). The bylaw is published in the B.S.W. Student Handbook. Students are reminded of their obligation to be familiar with all regulations governing their continued progress in the program.

3.5 Dean's Honour List,

BSW student eligibility for the Dean's Honour List is considered on a term by term basis. To qualify for the Dean's Honour List a student must:

- Have completed a minimum of 9 credit hours in the term under consideration, of which a minimum 6 credit hours must be with a standard grade.

and

- Have achieved a minimum Term GPA of 3.6

Pass/Fail courses are included in the credit hour count.

3.6 Appeal of Grades,

The general university policy for appeal of assigned grades applies to the Faculty of Social Work. As well, the Faculty Council has approved a Social Work policy on the appeal of assigned grades and term work. The policy is outlined in the B.S.W. Student Handbook. The Faculty Council has established the Academic Standing Appeals Committee to deal with these matters.

3.7 Distance Courses Open to Fort Garry Campus and Inner City Social Work Students,

B.S.W students who are enrolled in the Fort Garry Campus or Inner City Social Work programs may take up to six credit hours of selected social work courses through Distance Delivery. The following courses are excluded: SWRK 2080, SWRK 3100, SWRK 3140, SWRK 4200 and SWRK 4300. If any Fort Garry Campus or Inner City Social Work program students are enrolled in the above mentioned practice courses they will be withdrawn.

3.8 Opting Into Field and Practices of the Two-Year Plan,

Students may apply for "opt-in" by fulfilling the following conditions:

- Consult with and submit written request for "Opt-in" to the Coordinator of Student Services and Admission/Advising Office and Field Coordinator no later than February 1.
- Successfully complete all Social Work courses required by the end of Winter term prior to opt-in year (except for SWRK 4210 Feminist Perspectives on Social Work Practice, SWRK 4220 Aboriginal People and Social Work Practice, SWRK 4200 Field Focus of Social Work Practice 1, SWRK 4300 Field Focus of Social Work Practice 2, SWRK 3150 Field Instruction 1 and SWRK 4120 Field Instruction 2) and
- Successfully complete all elective courses (including written English and mathematics requirements) by the end of Winter term prior to opt-in year.
- Achieve a minimum Degree Grade Point Average of 3.00 at point of opting in.
- Achieve a minimum Subject Grade Point Average of 3.00 at point of opting in.

Final approval to opt-in is also based on faculty resources: space availability in SWRK 4210 Feminist Perspectives on Social Work Practice and SWRK 4220 Aboriginal People and Social Work Practice during Summer Session; space availability in SWRK 4200 Field Focus of Social Work Practice 1 and SWRK 4300 Field Focus of Social Work Practice 2 courses in Fall and Winter terms; and the availability of concentrated field placements.

3.9 Courses Open to Challenge for Credit ,

The Faculty of Social Work accommodates those students who are qualified and who can demonstrate acceptable knowledge and skill, by allowing them to challenge certain Social Work courses. They are:

SWRK 2080 Interpersonal Communication Skills

SWRK 3100 Systematic Inquiry in Social Work

SWRK 3130 Contemporary Canadian Social Welfare

Information on the procedures for challenge is available in the B.S.W. Student Handbook. The dates at which courses may be challenged are given in the academic schedule of the Undergraduate Calendar.

3.10 Credit for Social Work Courses Taken at Other Universities,

The Faculty of Social Work supports the principle of granting credit for social work courses taken within the last nine years in accredited programs leading to professional social work qualification. Information on granting credits for social work courses is available in the B.S.W. Student Handbook.

The Faculty of Social Work has articulated agreements with specific diploma and certificate programs. Please consult the B.S.W. Student Handbook for detailed information.

SECTION 5: Course Descriptions-1000 Level

SWRK 1310 Introduction to Social Welfare Policy Analysis (Formerly 047.131) Examination of social welfare policy as the end product of ideologies. Introduction of elements of ideology and the comparison of competing ideological systems. The relationship of economic, political and ethical views of society and their manifestations in societal responses to human need and social services. Students may not hold credit for both SWRK 1310 (or 047.131) and the former 047.130.

SWRK 1311 Introduction à l'analyse de la politique de bien-être social

Étude de la politique de bien-être social en tant que produit fini d'idéologies. Introduction à quelques éléments de l'idéologie et comparaison des systèmes idéologiques concurrents. Analyse de l'interaction des visions économiques, politiques et ethniques de la société et de leurs manifestations en tant que réponses sociétales aux besoins humains et aux services sociaux. On ne peut se faire créditer le SWRK 1310 (ou 047.131) et (ancien 047.130).

SWRK 1614 Unallocated Credit
Campus Manitoba course.

SECTION 5: Course Descriptions-2000 Level

SWRK 2050 Community and Organizational Theory (Formerly 047.205) Deals with concepts such as conflict and power which relate social work practice to the nature of secondary human relationships. These are applied to the dynamics within and between communities and organizations.

SWRK 2051 Théorie et organisation communautaire
Étude de concepts tels que le conflit et le pouvoir qui ramènent la pratique du travail social à la nature des relations humaines de second niveau. Application de ces concepts à la dynamique en vigueur au sein des communautés et des organisations et entre celles-ci. On ne peut se faire créditer le SWRK 2050 (047.205) Préalable : première moitié de SWRK 2091

SWRK 2070 Small Group Dynamics (Formerly 047.207) Group norms, values, and goal as they relate to decision-making and communication patterns in groups. Membership roles and leadership styles are related to group development and group functioning.

SWRK 2071 Dynamique des petits groupes

Explication des normes de groupe, des valeurs et des buts qui influencent la prise de décision et les modèles de communication dans les groupes. Influence du rôle des membres et des styles de leadership sur le développement et le fonctionnement du groupe. On ne peut se faire créditer le SWRK 2070 (047.207). Préalable : première moitié de SWRK 2091.

SWRK 2080 Interpersonal Communication Skills

(Formerly 047.208) A basic core of interpersonal skills for communicating effectively and for establishing and maintaining relationships in one-to-one and group situations. Emphasis is on experiential learning using a variety of techniques.

SWRK 2081 Habiletés en communication interpersonnelle

Acquisition d'une gamme essentielle d'habiletés interpersonnelles pour communiquer efficacement et pour établir et maintenir des relations tant dans des situations individuelles que de groupe. Accent sur l'apprentissage expérientiel utilisant une variété de techniques.

SWRK 2090 Human Behaviour and Social Work Practice

(Formerly 047.209) Students are introduced to a broad range of theories and will develop an understanding of how people and environments reciprocally affect each other. Particular emphasis is placed on understanding how gender, race, ethnicity, socioeconomic factors, age, ability, and sexual orientation contribute to and influence human behaviour throughout the lifespan.

SWRK 2091 Comportement humain et pratique du travail social

Application d'une théorie générale des systèmes à l'étude de la situation de la personne dans une famille et dans son environnement avec examen subséquent des implications pour la pratique du travail social. Critique de modèles variés du développement humain. Sessions d'information sur des dimensions du comportement qui s'avèrent critiques par rapport à la pratique du travail social.

SWRK 2101 Perspectives sur les transitions de la vie et de l'individu

Examen de l'impact du cours transitoire de la vie sur le bien-être psychosocial des individus. Concentration sur les crises et les impasses problématiques qui surgissent aux moments décisifs avec leurs implications pour l'intervention en travail social. Préalable : première moitié de SWRK 2091. On ne peut se faire créditer SWRK 2101 (SWRK 2100/047.210) et l'ancien 047.206.

SWRK 2110 Emergence of the Canadian Social Welfare State

(Formerly 047.211) An examination of the emergence of the Canadian welfare state from its various colonial inheritances to the Canada Assistance Plan. Social, political, economic, religious, geographical, demographic and cataclysmic factors influencing the development of the welfare state are examined and analyzed. Prerequisite: SWRK 1310 (or 047.131). Students may not hold credit for both SWRK 2110 (or 047.211) and the former 047.130.

SWRK 2111 Émergence de l'État-providence canadien de bien-être social

Examen et comparaison des systèmes de bien-être social de trois sociétés modernes. Analyse des facteurs économiques, politiques, sociaux, religieux, géographiques, démographiques et cataclysmiques influençant les modèles variés de la prestation sociale quant à leur signification par rapport au système canadien de bien-être social. On ne peut se faire créditer le SWRK 2110 (ou 047.211) et (ancien 047.130). Préalable : SWRK 1311

SWRK 2130 Comparative Social Welfare Systems

(Formerly 047.213) The welfare systems of three modern societies are examined and compared. Economic, political, social, religious, geographical, demographic and cataclysmic factors influencing the development of the various models of social provision are analyzed for their significance to the Canadian welfare system. Prerequisite: SWRK 1310 (or 047.131). Students may not hold credit for both SWRK 2130 (or 047.213) and the former 047.130.

SWRK 2650 The Social Aspects of Aging

(Formerly 047.265) An examination of the social aspects of aging. Emphasis on understanding the aging process as a life transition involving adaptation through interaction with social and physical environments. Students may not hold credit for REC 2650 (or 123.265) and IDES 2650 (or 051.265) or HMEC 2650 (or 028.265) or SWRK 2650 (or 047.265). (A required Option in Aging course)

SWRK 2651 Aspects sociaux du vieillissement

Examen des aspects sociaux du vieillissement. Accent sur la compréhension du processus de vieillissement dans toute transition de vie impliquant une adaptation à l'interaction entre l'environnement social et l'environnement physique. On ne peut se faire créditer le SWRK 2651 et le REC 2650 (or 123.265) ou IDES 2650 (or 051.265) ou HMEC 2650 ou REC 2650 (047.265).

SECTION 5: Course Descriptions-3000 Level

SWRK 3100 Systematic Inquiry in Social Work

(Formerly 047.310) Relates systematic methods of scientific inquiry to social work practice; theory building for practice; information collection; descriptive data for decision-making, understanding technical research material, introduction to issues of research design.

SWRK 3101 L'enquête systématique en travail social

Lien entre les méthodes systématiques de recherche scientifique et la pratique du travail social, la construction théorique pour la pratique, la collecte d'information et de données descriptives pour le processus décisionnel pour la compréhension des matériaux techniques de la recherche et introduction aux enjeux et aux défis de sdevis de recherche. On ne peut se faire créditer le SWRK 3100 (ancien 047.310)

SWRK 3111 Perspectives sur la déviance

Étude des problèmes humains à l'aide de plusieurs modèles analytiques communément appliqués dans la pratique du travail social. Préalable : première moitié de SWRK 2091.

SWRK 3130 Contemporary Canadian Social Welfare

(Formerly 047.313) An examination of social welfare in Canadian society, leading to an evaluation of present approaches in the light of changing economic and social conditions and changing needs. Prerequisite: SWRK 1310 (or 047.131). Students may not hold credit for both SWRK 3130 (or 047.313) and the former 047.301.

SWRK 3131 L'État canadien contemporain du bien-être social

Étude du bien-être social dans la société canadienne menant à une évaluation des approches actuelles à la lumière des transformations des conditions économiques et sociales et des besoins mouvants. On ne peut se faire créditer le SWRK 3131 et l'ancien 047.301. Préalable : SWRK 1311.

SWRK 3140 Introduction to Social Work Practice

(Formerly 047.314) Introduces students to ecological and other generalist based practice frameworks and the role of professional social workers. Course emphasizes values and knowledge in context of a rational approach to problem solving which includes problem definition, assessment, contracting, intervention and evaluation. Pre- or corequisite SWRK 1310 (or 047.131), SWRK 2080 (or 047.208) and SWRK 2090 (or 047.209).

SWRK 3141 Introduction à la pratique du travail social

Introduction à la perspective écologique ou à d'autres approches généralistes sur lesquelles se fondent les cadres opératoires de la pratique du travail social et le rôle des travailleuses sociales et des travailleurs sociaux professionnels. Accent mis sur les valeurs et les connaissances dans le contexte d'une approche rationnelle de résolution de problème incluant ainsi la définition même du problème, la consultation, le contrat, l'intervention et l'évaluation. On ne peut se faire créditer le SWRK 3140 (ancien 047.314). Préalable ou concomitant : SWRK 1311 ou SWRK 1310 (ou 047.131), SWRK 2081 ou SWRK 2080 (ou 047.208) et SWRK 2091 ou SWRK 2090 (ou 047.209).

SWRK 3150 Field Instruction 1

(Formerly 047.315) A first educationally directed field experience in which the student will have the opportunity to assume responsibility for social work engagement, assessment, planning, intervention and evaluation, integrating theory from class. While Access Programs may require additional field hours, 420 hours is the minimum required for all BSW students. This time commitment includes involvement with the agency in planning for, and engaging in, practice activity, and evaluation of performance. It also includes educational contact time with the field instructor in individual and/or group sessions. Subject to satisfactory completion and reports, students will be graded on a pass/fail basis. Prerequisites: SWRK 1310 (or 047.131), SWRK 2080 (or 047.208), SWRK 2090 (or 047.209), and SWRK 3140 (or 047.314), and consent by course instructor (Field Coordinator). Corequisite: 6 credit hours of SWRK 4200 (or 047.420).

SWRK 3151 Formation a la pratique du terrain 1

Première expérience de formation pratique sur le terrain au cours de laquelle l'étudiant ou l'étudiante aura l'occasion d'assumer une responsabilité dans son engagement pour le travail social, la consultation, la planification, l'intervention, l'évaluation et l'application concrète de la théorie apprise en classe. Les heures requises sont calculées sur une base de 28 semaines, 2 jours par semaine, 7,5 heures par jour pour un total de 420 heures. Ces heures comprennent la participation aux activités de stage et l'évaluation de la performance. Ces heures incluent aussi les réunions et les entrevues formatives avec la personne qui supervise le stage sur une base individuelle ou en groupe de sessions. En plus, il y aura 13 sessions obligatoires d'ateliers d'application d'habiletés de 3 heures chacune aux deux semaines pendant les semestres pour un total de 39 heures. Préalables: SWRK 1311 et SWRK 2081 et SWRK 2091 et SWRK 4141. Concomitant: SWRK 4201.

SECTION 5: Course Descriptions-4000 Level

SWRK 4050 Selected Topics in Social Work

(Formerly 047.405) Directed readings or concentrated study in some aspect of social service which is of interest to the student. Students must contract with an instructor prior to registration. Prerequisite: written consent of instructor.

SWRK 4051 Sujets spéciaux

Lectures dirigées ou études concentrées sur un aspect particulier du service social selon l'intérêt de l'étudiant ou de l'étudiante. Préalable : l'autorisation écrite de la professeure ou du professeur. On ne peut se faire créditer le SWRK 4051 et SWRK 4050 (ou 47.450).

SWRK 4070 Social Problem and Social Work Practice Seminar

(Formerly 047.407) In-depth study of the problem area, exploration of the ways other disciplines relate to the problem, and strengthening of interventive abilities of the student. Prerequisite: SWRK 3040 (or 047.304) / SWRK 3120 (or 047.312), SWRK 4200 (or 047.420) / SWRK 3150 (or 047.315) or written consent of instructor.

SWRK 4071

Étude en profondeur des situations à problèmes. Exploration des voies par lesquelles d'autres disciplines envisagent ou abordent le problème et le renforcement des habiletés d'intervention chez l'étudiant ou l'étudiante. Préalables :SWRK 3041 (SWRK 3040/047.304), SWRK 3121 (SWRK 3120/047.312), SWRK 4201/SWRK 3151 (SWRK 4200/SWRK 3150; 047.420/047.315) ou l'autorisation écrite de la professeure ou du professeur.

SWRK 4080 Current Issues in Social Welfare

(Formerly 047.408) Study of a particular area of social welfare to improve policies and practices. Students may select one seminar from several which are offered. These may vary from year to year.

SWRK 4081 Enjeux actuels en bien-être social

Étude d'un champ particulier du bien-être social en vue d'améliorer les politiques et les pratiques. L'étudiante ou l'étudiant aura à choisir un séminaire parmi de nombreux autres qui sont offerts. Ceux-ci peuvent varier d'une année à l'autre.

SWRK 4120 Field Instruction 2

(Formerly 047.412) A second educationally directed practice experience building on SWRK 3150 (or 047.315) in which the student will have the opportunity to carry a sustained professional role in situations which require the integration of values, knowledge, and skill at the level of a beginning professional practitioner. While Access Programs may require additional field hours, 420 hours is the minimum required for all BSW students. This time commitment includes involvement with the agency in planning for, and engaging in, practice activity, and evaluation of performance. It also includes educational contact time with the field instructor in individual and/or group sessions. Subject to satisfactory completion and reports, students will be graded on a pass/fail basis. Prerequisites: 6 credit hours of SWRK 4200 (or 047.420), and SWRK 3150 (or 047.315), and consent by course instructor (Field Coordinator). Corequisite: 6 credit hours. of SWRK 4300.

SWRK 4121 Formation à la pratique du terrain II

Seconde expérience de formation pratique sur le terrain construite à partir du cours 3151. Occasion d'apporter une contribution professionnelle soutenue dans des situations nécessitant une intégration des valeurs, connaissances et aptitudes au niveau débutant du praticien professionnel. Les heures requises sont calculées sur la base de 28 semaines, 2 jours par semaine, 7,5 heures par jour pour un total de 420

heures. Ces heures incluent aussi les réunions et les entrevues formatives avec la personne qui supervise le stage sur une base individuelle ou en groupe de sessions. En plus, il y aura 13 sessions obligatoires d'ateliers d'application, d'habiletés de 3 heures chacune aux deux semaines pendant les deux semestres pour un total de 39 heures. Préalables: SWRK 3151 et SWRK 4201. Concomitant: SWRK 4301.

SWRK 4130 Advanced Interpersonal Communication Skills

(Formerly 047.413) An experiential course for self-understanding and self-awareness to produce a disciplined and conscious use of self in professional communication and relationships. Prerequisites: SWRK 2080 (or 047.208) and written consent of instructor.

SWRK 4131 Habiletés en communication interpersonnelle avancée

Cours expérientiel pour la compréhension de soi et la vigilance à soi pour produire une utilisation consciente et disciplinée de soi dans la communication et les relations professionnelles. Préalables : SWRK 2081 (SWRK 2080/047.208) et l'autorisation écrite de la professeure ou du professeur.

SWRK 4200 Field Focus of Social Work Practice

(Formerly 047.420) A seminar for the critical examination of social work theory, values, policy and skills in the context of a field or focus of practice. The course integrates policy with practice at micro, meso and macro levels. Course seminar topics may vary from year to year and are organized to cover various fields or focus of practice. Prerequisite: SWRK 1310 (or 047.131), SWRK 2080 (or 047.208), SWRK 2090 (or 047.209), and SWRK 3140 (or 047.314). Prerequisites: SWRK 1310 (or 047.131), SWRK 2080 (or 047.208), SWRK 2090 (or 047.209), and SWRK 3140 (or 047.314). Corequisite: SWRK 3150 (047.315). Students cannot hold credit for both swrk 4150 (or 047.415) and SWRK 4200 (or 047.420).

SWRK 4201 Champs d'intervention et de pratique du travail social

Séminaire d'enseignements des habiletés requises dans la pratique du travail social soit en contexte de stage ou d'intervention pratique. Insistance sur la pratique en termes de planification des changements (le système client), les politiques et les réseaux d'interrelations (le système services). Les séminaires peuvent varier d'une année à l'autre et sont organisés pour couvrir une variété de terrains ou de cadres d'interventions pratiques. Préalables : SWRK 1311 ou SWRK 1310, SWRK 2081 ou SWRK 2080, SWRK 2091 ou SWRK 2090 et SWRK 3141 ou SWRK 3140. Concomitant : SWRK 3151.

SWRK 4210 Feminist Perspectives on Social Work Practice and Social Welfare Policy

(Formerly 047.421) An analysis of social work practice and welfare policy from a feminist perspective. Course emphasizes the integration of social work intervention with policy in the social welfare context and overlays concepts such as empowerment, ecological practice, oppression, and practice in context of cultural diversity. Prerequisites: SWRK 1310 (or 047.131), SWRK 2080 (or 047.208), SWRK 2090 (or 047.209), and SWRK 3140 (or 047.314). Students may not hold credit for both SWRK 4210 (or 047.421) and SWRK 4170 (or 047.417) or SWRK 4210 (or 047.421) and SWRK 4190 (or 047.419).

SWRK 4211 Les perspectives féministes de la pratique du travail social et de la politique du bien-être social

Analyse de la pratique du travail social et de la politique de bien-être social selon la perspective féministe. Accent mis sur l'imbrication synergique de l'intervention sociale avec les politiques dans le contexte du bien-être social et avec des concepts superposés tels que : potentialisation, pratique écologique, oppression et pratique en contexte de diversité culturelle. On ne peut se faire créditer le SWRK 4211 (ou 047.421) et SWRK 4171 (ou 047.417) ou SWRK 4211(ou 047.421) et SWRK 4191 (ou 047.419). Préalables : SWRK 1311, SWRK 2081, SWRK 2091 et SWRK 3141.

SWRK 4220 Aboriginal People and Social Work Practice

(Formerly 047.422) An analysis of social work practice and welfare policy from an aboriginal perspective. The course emphasizes the linkage between practice and policy and overlays concepts such as colonization, decolonization, and approaches to practices which include cross culture, structure, and anti-oppression in the context of Aboriginal world views, experience and helping practices. Prerequisites: SWRK 1310 (or 047.131), SWRK 2080 (or 047.208), SWRK 2090 (or 047.209), and SWRK 3140 (or 047.314). Students may not hold credit for both SWRK 4220 (or 047.422) and SWRK 4160 (or 047.416) or SWRK 4220 (or 047.422) and SWRK 4180 (or 047.418).

SWRK 4221 **Peuple autochtone et pratique du travail social**
Analyse de la pratique du travail social et de la politique de bien-être social à partir d'une perspective autochtone. Insistance sur l'imbrication entre la pratique du travail social, les politiques sociales et des concepts superposés tels que : potentialisation, pratique écologique et pratique en contexte de diversité culturelle. On ne peut se faire créditer SWRK 4220 (047.412) et SWRK 4160 (047.416) ou SWRK 4180 (047.418). Préalables : SWRK 1311 (SWRK 1310/047.131), SWRK 2081 (SWRK 2080/047.208), SWRK 2091 (SWRK 2090/047.209) et SWRK 3141 (SWRK 3140/047.314).

SWRK 4250 **Family Group Conferences**
This course provides an overview of the research, theory and application of Family Group Conferencing within the context of child and family services and the implications for intervention. Emphasis is on experiential learning of Family Group Conferencing process and techniques.

SWRK 4260 **Addiction and CFS Practice**
The focus of this course is to increase the student's knowledge about addictions as well as to develop student's skills for intervention with families affected by addiction within the context of child and family services. Emphasis is on experiential learning of knowledge, process and techniques.

SWRK 4270 **Crisis Intervention**
This course provides an overview of the research, theory and application of crisis intervention, methods and techniques within the context of child and family services. Emphasis will be on expanding existing knowledge through experiential learning of crisis intervention processes and techniques.

SWRK 4300 **Field Focus of Social Work Practice 2**
A seminar for the critical examination of social work theory, values, policy and skills in the context of a field or focus of practice. The course integrates policy with practice at micro, meso and macro levels. Course seminar topics may vary from year to year and are organized to cover various fields or focus of practice. For students admitted after 1993-1994. Prerequisite: SWRK 4200 (Or 047.420), SWRK 3150 (or 047.315). Corerequisite: SWRK 4120.

SWRK 4301 **Champs d'intervention et de pratique du travail social**
Séminaire d'enseignement des habiletés requises dans la pratique du travail social soit en contexte de stage ou d'intervention pratique. Insistance sur la pratique en termes de planification des changements (le système client), les politiques et les réseaux d'interrelations (le système services). Les séminaires peuvent varier d'une année à l'autre et sont organisés pour couvrir une variété de terrains ou de cadres d'interventions pratiques. Préalables : SWRK 1311 (SWRK 1310/047.131), SWRK 2081 (SWRK 2080/047.208), SWRK 2091 (SWRK 2090/047.209), SWRK 3141 (SWRK 3140/047.314), 6 crédits de SWRK 4201 (SWRK 4200/047.420) et SWRK 3151 (SWRK 3150/047.315). Concomitant : SWRK 4121 (SWRK 4120/047.412)

SECTION 4: Program and Graduation Requirements

Section 4: Program and Graduation Requirements

Section 4: Social Work,
When planning your workload, allow approximately two hours of study/ reading time for each hour of class time. It is also advisable to schedule time to use the library. The faculty will offer as many evening courses as possible each year.

4.1 Curriculum Outline

4.1 Curriculum Outline,

A) Three-Year Plan

This plan allows a Fort Garry Campus student who has completed 30-50 credit hours of general university study prior to admission, to combine Social Work professional courses with other university courses. It requires three years of full-time study, after admission to the faculty, to complete the requirements for the

B.S.W. degree. A student who has already completed the 51 credit hours of general university study which are acceptable to the University of Manitoba may also register for this program ignoring the elective requirements.

Three-Year Plan Example

Course No.	Course Name	Credit Hours	Year
SWRK 1310	Introduction to Social Welfare Policy Analysis	3	1
SWRK 2080	Interpersonal Communication Skills	3	1
SWRK 2090	Human Behaviour and Social Work Practice	6	1
SWRK 3140	Introduction to Social Work Practice	3	1
SWRK 3150	Field Instruction 1	12	2
SWRK 4200	Field Focus of Social Work Practice 1	6	2
SWRK 4120	Field Instruction 2	12	3
SWRK 4300	Field Focus of Social Work Practice 2	6	3
SWRK 2110	Emergence of the Canadian Welfare State	3	1
or			
SWRK 2120	Britain: Poor Laws to the Welfare State	3	1
or			
SWRK 2130	Comparative Social Welfare Systems	3	1
SWRK 3100	Systematic Inquiry in Social Work	3	1
SWRK 3130	Contemporary Canadian Social Welfare	3	2
SWRK 4210	Feminist Perspectives on Social Work Practice	6	2 or 3
SWRK 4220	Aboriginal People and Social Work Practice	6	2 or 3

NOTES:

- 1) SWRK 1310 and SWRK 2080 are open to University 1 students,
- 2) All students must take the foundation courses (see 6.7) very early in the program. Failure to do so may restrict progression through the program.
- 3) See course descriptions (Section 6) for a complete list of pre-/corequisites.
- 4) Students must take SWRK 1310 before proceeding to SWRK 2110, SWRK 2120, SWRK 2130, and SWRK 3130. In addition, SWRK 1310, SWRK 2080 and SWRK 2090 are pre- or corequisite to SWRK 3140.
- 4) All foundation courses are pre-requisite to SWRK 4200, SWRK 4300, SWRK 4210, SWRK 4220, SWRK 3150 and SWRK 4120. In addition, SWRK 3150 Field Instruction 1 is pre-requisite to SWRK 4120 Field Instruction 2.
- 6) See Registration Information (Section 6) for a list and description of SWRK 4200 and SWRK 4300 courses.
- 7) Students must take one section of SWRK 4200 and one section of SWRK 4300. Each section is anchored in a different field or focus of social work practice. It is recommended that students take SWRK 4200 and SWRK 4300 courses that corresponds with their field placement area of practice.
- 8) Students must take SWRK 4200 concurrently with SWRK 3150 and SWRK 4300 concurrently with SWRK 4120. If a student withdraws from SWRK 4200, he/she must also withdraw from SWRK 3150 and if a student withdraws from SWRK 4300, he/she must also withdraw from SWRK 4120. As well, if a student withdraws from SWRK 3150 he/she must withdraw from SWRK 4200 and if a student withdraws from SWRK 4120 he/she must withdraw from SWRK 4300. Students, who fail to withdraw from the corequisite course, will be withdrawn.
- 9) Student admitted after '97-'98 must complete 3 credit hours of written English and 3 credit hours of mathematics as part of first 30 credit hours (unless completed prior to admission).
- 10) This plan assumes that students do not take courses in the summer.

Year 1 = 21 Credit hours social work courses 6 Credit hours electives

Year 2 = 27 Credit hours social work courses 6 Credit hours electives

Year 3 = 24 Credit hours social work courses 9 Credit hours electives

SWRK 4210Feminist Perspectives on Social Work Practice	6
SWRK 4220Aboriginal People and Social Work Practice	6
Year 2 (September - May)	
SWRK 3150Field Instruction 1	12
SWRK 4200Field Focus of Social Work Practice 1	6
SWRK 4120Field Instruction 2	12
SWRK 4300Field Focus of Social Work Practice 2	6
Total credit hours	72

Note: See course descriptions (Section 6) for a complete list of pre/co requisities.

Planning Chart for Elective Courses for Three-Year Program

Required Electives	Credit Hours	Year
Admitted on basis of	30	1
Unallocated transfer		
Electives to be completed		
Written English (W)	1	
Mathematics (M)	1	

B) Two-Year Plan (Concentrated Program) – Fort Garry Campus

Fort Garry Campus students who have completed 51 credit hours of general university study prior to admission to the B.S.W. program, and have maintained a minimum Adjusted Grade Point Average (A.G.P.A.) of 3.00, are eligible for the two year plan (Concentrated Program). If a student has completed the 51 credit hours of general university study which are acceptable to the University of Manitoba, but does not have the required 3.00 A.G.P.A., or prefers a more extended time period, that student can register for either the three-year plan or the part-time plan.

Students eligible to register for the concentrated program may choose to do so at point of initial registration following admission only.

If any of the required social work courses were part of 51 credit hours completed prior to admission to the BSW program, they will have to be substituted with elective courses after admission to the BSW program. Any outstanding elective courses, including written English and mathematics requirements, must be completed by the end of Winter term in the first year of the BSW Concentrated Program.

Students must maintain a Degree Grade Point Average (D.G.A.P.) and Subject Grade Point Average (S.G.P.A.) of a minimum 3.00 at the end of each term to remain in the Concentrated Program. In an instance where one or both of these requirements are not met, the student's status will be changed from Concentrated to Regular.

Students planning on completing their program in two years must follow the structure outlined below (which requires completing at least 12 credit hours, including SWRK 4210 and SWRK 4220, during the summer).

Two-Year Plan

Year 1 (September - August)		
Course No.	Course Name	Credit Hours
SWRK 1310	Introduction to Social Welfare Policy Analysis	3
SWRK 2080	Interpersonal Communication Skills	3
SWRK 2090	Human Behaviour and Social Work Practice	6
SWRK 2110	Emergence of the Canadian Welfare State	3
	or	
SWRK 2120	Britain: Poor Laws to the Welfare State	3
	or	
SWRK 2130	Comparative Social Welfare Systems	3
SWRK 3100	Systematic Inquiry in Social Work	3
SWRK 3130	Contemporary Canadian Social Welfare	3
SWRK 3140	Introduction to Social Work Practice	3

Undergraduate Studies

C) The Part-Time Plan

Please note that it is possible to pursue the Bachelor of Social Work degree through a program of part-time study. Part-time students must complete all the required social work and elective courses within nine years of their admission to the faculty.

4.2 Field Instruction

Students are expected to register for two courses in field, SWRK 3150 and SWRK 4120. Courses are taken when students have completed the prerequisites and are in the appropriate year of their degree plan. Field courses each have a corequisite, which is SWRK 4200 Field Focus of Social Work Practice 1 for SWRK 3150 Field Instruction 1 and SWRK 4300 Field Focus of Social Work Practice 2 for SWRK 4120 Field Instruction 2. The Field Focus course selected should correspond with the field placement area of practice. Students wishing to divert from their degree plan should consult with the Coordinator of Student Services and Admissions/Advising Office before February 1. Forms requesting confirmation of student plans to take field instruction in the following year will be distributed in the winter term. Students must request a field placement by completing a field section form at least 75 calendar days prior to the term that they will commence field. Students requesting a summer field placement must request the field placement at least 40 calendar days prior to summer field start. Students who do not meet the deadline cannot be guaranteed a field placement in that term.

Field Instruction in both SWRK 3150 and SWRK 4120 consists of participation in the field placement two days per week, both terms (16 hours per week). Field Instruction in the concentrated program constitutes four days per week (32 hours) in both terms at one placement. Students contemplating switching to a concentrated field placement are required to make themselves aware of eligibility requirements for this program and contact the Coordinator of Student Services and Admissions/Advising Office for confirmation of their eligibility no later than February 1. Only when this is resolved are they eligible to select this field option.

The Field Instruction program will provide the student with opportunities to learn first hand how to provide professional practice in a variety of social service agencies. The program provides an educationally focused experience in delivering progressively more demanding and complex professional social work interventions.

Field Instruction will be provided by university-appointed field instructors who may be agency-based or university-based, and who have knowledge, skills, and expertise in generic principles that can be applied to a wide range of fields of practice. The method of instruction will include individual and may include group seminars designed to assist the student to integrate theory with practice. This instruction is provided on a weekly basis. Field liaisons are available for student support, if necessary.

Active participation by the student is expected in all phases of Field Instruction including orientation conducted in their individual agency placements at the beginning of the academic year. Students absent due to illness or other reasons must contact the Field Instructor or Field Coordinator.

Students may be placed in a variety of agencies or departments. These include: school, probation, child and family services, health and mental health settings, occupational social work, those with a disability focus, and ethnically specific services. These settings provide experience in using a variety of intervention skills

with individuals, families, groups, communi-ties and policy initiatives. Every effort will be made to place students reg-istering in SWRK 4120 (the final year of their field program) in a setting related to their field of interest. Final authority for field placement location, however, rests with the Field Coordinator. Decisions may be based on availability of agency openings, as well as on the educational needs of stu-dents. Students are expected to assume responsibility for any transporta-tion expenses required for travel to and from the agency sites in which they are taking their Field Instruction course.

The Field Coordinator is the Instructor of Record for SWRK 3150 and SWRK 4120. While the Faculty is responsible for assisting in securing a reasonable placement for the student, it is important to note that a student is not guaranteed confirmation in a field placement setting on the sole basis of the completion of prerequisite courses. Students must demonstrate readiness for practice in the process of securing a placement. If concerns are raised regarding the student's behaviour, judgment or practice and/or if the student demonstrates difficulty in his or her attempts to attain confirmation as a result of his or her performance in the field interview process, the Field Coordinator and Associate Dean of Undergraduate Programs will determine what additional steps may be taken to resolve this matter, or may determine the student is unprepared for meeting the requirements of field placement at this time.

All students registered in Field Instruction courses (SWRK 3150 and SWRK 4120) are required to attend Field orientation on Tuesday, September 6, 2011 and Wednesday, September 7, 2011. As attendance at Field orienta-tion is mandatory, Field students are not required to attend classes on the 6th and 7th. Information regarding Field orientation will be mailed to each Field student in late August. If more information is required, contact the Field Coordinator at (204) 474-8300.

Students are allowed one voluntary withdrawal from the course SWRK 3150 Field Instruction 1 and one voluntary withdrawal from the course SWRK 4120 Field Instruction 2. If a student withdraws from SWRK 3150 he/she must withdraw from SWRK 4200 and if a student withdraws from SWRK 4120 he/she must withdraw from SWRK 4300. Students who fail to withdraw from the corequisite course(s), will be withdrawn.

Accelerated Field – Inner City Social Work Program and Distance Delivery Program

Accelerated Field allows eligible students to undertake Field Instruction I (SWRK 3150) and Field Instruction 2 (SWRK 4120) in one field placement between September and April. Field Instruction includes four days of placement per week for a total of 840 hours. Students who are approved to take Accelerated Field must also register for two corequisite Field/Focus of Social Work Practice (SWRK 4200 and SWRK 4300) courses.

Inner City Social Work Program students and Distance Delivery Program students who have completed 75 credit hours including the four foundation courses (SWRK 1310, SWRK 2080, SWRK 2090 and SWRK 3140) and have maintained a minimum Degree Grade Point Average (D.G.P.A.) of 3.0 and Subject Grade Point Average (S.G.P.A.) of 3.0 are eligible to apply for Accelerated Field. Inner City Social Work Program students in request of Accelerated Field must attach to their Field Placement Request Form, a written request to the Director of Inner City Social Work Program indicating an interest in an Accelerated Field Placement. Distance Delivery Program students in request of Accelerated Field must attach to their Field Placement Request Form, a written request to the Coordinator of Distance Delivery Program indicating an interest in an Accelerated Field Placement. Requests must be handed in on time and are due at least 75 calendar days prior to the term that the student will commence.

4.3 Requirements for Graduation

Eligibility for graduation is contingent upon:

The successful completion of 72 credit hours of required Social Work courses; successful completion means attaining a minimum grade of "C" in all Social Work courses and a minimum Subject Grade Point Average (S.G.P.A.) of 2.50 (C+).

The successful completion of 51 credit hours of electives. Students admit-ted after 1997/98, are required to successfully complete three credit hours of written English and three credit hours of Mathematics. The passing grades for electives taken in other faculties or schools are those required by the faculties or schools concerned. A minimum of "C" must be attained in Social Work electives. The minimum Degree Grade Point Average (D.G.P.A.) re-quired for graduation is also 2.50 (C+).

Total credit hours required for a B.S.W. are 123 (51 credit hours of elec-tives + 72 credit hours of required Social Work courses).

Student Responsibilities

It is the student's responsibility to be familiar with all the requirements of the B.S.W. de-gree, to ensure compliance with degree program requirements, including prerequisite requirements, and to understand all relevant regulations, pol-icies and practices. The final completion of degree require-ments is the student's responsibility.

4.2 Field Instruction

4.2 Field Instruction,
Students are expected to register for two courses in field, SWRK 3150 and SWRK 4120. Courses are taken when students have completed the prereq-uisites and are in the appropriate year of their degree plan. Field courses each have a corequisite, which is SWRK 4200 Field Focus of Social Work Practice 1 for SWRK 3150 Field Instruction 1 and SWRK 4300 Field Focus of Social Work Practice 2 for SWRK 4120 Field Instruction 2. The Field Fo-cus course selected should correspond with the field placement area of practice. Students wishing to divert from their degree plan should consult with the Coordinator of Student Services and Admissions/Advising Office be-fore February 1. Forms requesting confirmation of student plans to take field instruction in the following year will be distributed in the winter term. Students must request a field placement by completing a field section form at least 75 calendar days prior to the term that they will commence field. Students requesting a summer field placement must request the field place-ment at least 40 calendar days prior to summer field start. Students who do not meet the deadline cannot be guaranteed a field placement in that term.

Field Instruction in both SWRK 3150 and SWRK 4120 consists of partici-pation in the field placement two days per week, both terms (16 hours per week). Field Instruction in the concentrated program constitutes four days per week (32 hours) in both terms at one placement. Students contemplat-ing switching to a concentrated field placement are required to make them-selves aware of eligibility requirements for this program and contact the Coordinator of Student Services and Admissions/Advising Office for confir-mation of their eligibility no later than February 1. Only when this is re-solved are they eligible to select this field option.

The Field Instruction program will provide the student with opportunities to learn first hand how to provide professional practice in a variety of social service agencies. The program provides an educationally focused experi-ence in delivering progressively more demanding and complex profession-al social work interventions.

Field Instruction will be provided by university-appointed field instructors who may be agency-based or university-based, and who have knowledge, skills, and expertise in generic principles that can be applied to a wide range of fields of practice. The method of instruction will include individ-ual and may include group seminars designed to assist the student to inte-grate theory with practice. This instruction is provided on a weekly basis. Field liaisons are available for student support, if necessary.

Active participation by the student is expected in all phases of Field Instruction including orientation conducted in their individual agency placements at the beginning of the academic year. Students absent due to illness or other reasons must contact the Field Instructor or Field Coordinator.

Students may be placed in a variety of agencies or departments. These include: school, probation, child and family services, health and mental health settings, occupational social work, those with a disability focus, and ethnically specific services. These settings provide experience in using a variety of intervention skills with individuals, families, groups, communities and policy initiatives. Every effort will be made to place students registering in SWRK 4120 (the final year of their field program) in a setting related to their field of interest. Final authority for field placement location, however, rests with the Field Coordinator. Decisions may be based on availability of agency openings, as well as on the educational needs of students. Students are expected to assume responsibility for any transportation expenses required for travel to and from the agency sites in which they are taking their Field Instruction course.

The Field Coordinator is the Instructor of Record for SWRK 3150 and SWRK 4120. While the Faculty is responsible for assisting in securing a reasonable placement for the student, it is important to note that a student is not guaranteed confirmation in a field placement setting on the sole basis of the completion of prerequisite courses. Students must demonstrate readiness for practice in the process of securing a placement. If concerns are raised regarding the student's behaviour, judgment or practice and/or if the student demonstrates difficulty in his or her attempts to attain confirmation as a result of his or her performance in the field interview process, the Field Coordinator and Associate Dean of Undergraduate Programs will determine what additional steps may be taken to resolve this matter, or may determine the student is unprepared for meeting the requirements of field placement at this time.

All students registered in Field Instruction courses (SWRK 3150 and SWRK 4120) are required to attend Field orientation on Tuesday, September 6, 2011 and Wednesday, September 7, 2011. As attendance at Field orientation is mandatory, Field students are not required to attend classes on the 6th and 7th. Information regarding Field orientation will be mailed to each Field student in late August. If more information is required, contact the Field Coordinator at (204) 474-8300.

Students are allowed one voluntary withdrawal from the course SWRK 3150 Field Instruction 1 and one voluntary withdrawal from the course SWRK 4120 Field Instruction 2. If a student withdraws from SWRK 3150 he/she must withdraw from SWRK 4200 and if a student withdraws from SWRK 4120 he/she must withdraw from SWRK 4300. Students who fail to withdraw from the corequisite course(s), will be withdrawn.

Accelerated Field – Inner City Social Work Program and Distance Delivery Program

Accelerated Field allows eligible students to undertake Field Instruction I (SWRK 3150) and Field Instruction 2 (SWRK 4120) in one field placement between September and April. Field Instruction includes four days of placement per week for a total of 840 hours. Students who are approved to take Accelerated Field must also register for two corequisite Field/Focus of Social Work Practice (SWRK 4200 and SWRK 4300) courses.

Inner City Social Work Program students and Distance Delivery Program students who have completed 75 credit hours including the four foundation courses (SWRK 1310, SWRK 2080, SWRK 2090 and SWRK 3140) and have maintained a minimum Degree Grade Point Average (D.G.P.A.) of 3.0 and Subject Grade Point Average (S.G.P.A.) of 3.0 are eligible to apply for Accelerated Field. Inner City Social Work Program students in request of Accelerated Field must attach to their Field Placement Request Form, a written request to the Director of Inner City Social Work Program indicating an interest in an Accelerated Field Placement. Distance Delivery Program students in request of Accelerated Field must attach to their Field

Placement Request Form, a written request to the Coordinator of Distance Delivery Program indicating an interest in an Accelerated Field Placement. Requests must be handed in on time and are due at least 75 calendar days prior to the term that the student will commence.

4.3 Requirements for Graduation

4.3 Requirements for Graduation,

Eligibility for graduation is contingent upon:

The successful completion of 72 credit hours of required Social Work courses; successful completion means attaining a minimum grade of "C" in all Social Work courses and a minimum Subject Grade Point Average (S.G.P.A.) of 2.50 (C+). The successful completion of 51 credit hours of electives. Students admitted after 1997/98, are required to successfully complete three credit hours of written English and three credit hours of Mathematics. The passing grades for electives taken in other faculties or schools are those required by the faculties or schools concerned. A minimum of "C" must be attained in Social Work electives. The minimum Degree Grade Point Average (D.G.P.A.) required for graduation is also 2.50 (C+). Total credit hours required for a B.S.W. are 123 (51 credit hours of electives + 72 credit hours of required Social Work courses).

Student Responsibilities

It is the student's responsibility to be familiar with all the requirements of the B.S.W. degree, to ensure compliance with degree program requirements, including prerequisite requirements, and to understand all relevant regulations, policies and practices. The final completion of degree requirements is the student's responsibility.

Graduate Studies,
Grad Admissions Chapter Contents,

SECTION 1: Preface

SECTION 2: Admission

2.1 Degrees and Diplomas Offered

2.2 Admission to Graduate Studies

2.3 Application

2.4 Classification of Students

SECTION 1: Preface (Grad Admissions),

At the University of Manitoba, graduate study and research were conducted on a modest scale from the foundation of the university and during its early years. In 1949, a Faculty of Graduate Studies and Research was established to systematize efforts in these fields. Currently more than 3,300 graduate students are registered at the university. A substantial number of graduate students received fellowships, scholarships, or assistantships made available under such arrangements as the Natural Sciences and Engineering Research Council, and the university itself. Providing additional opportunity for graduate students, research work funded through grants from business corporations and government bodies is now conducted at the university.

Agriculture Canada and the Department of Fisheries and Oceans maintain major research establishments on the Fort Garry campus. Additional and extensive research facilities are available in the faculties of Dentistry and Medicine located in central Winnipeg and the university's Bannatyne Campus. The Faculty of Medicine operates in close conjunction with the major teaching hospitals.

Graduate work at the doctoral level is offered in the faculties of Agricultural and Food Sciences, Arts, Clayton H. Ridell Faculty of Environment, Earth and Resources, Dentistry, Education, Engineering, Human Ecology, Medicine, Science, Social Work, and the Asper School of Business/Faculty of Management.

The Faculty of Graduate Studies is governed by the Faculty Council of Graduate Studies. The Faculty Council delegates powers to the Executive Committee of Graduate Studies which in turn delegates responsibilities to standing committees of the faculty, such as the Guidelines and Policy Committee and the Awards Committee.

SECTION 2: Admission to Graduate Studies,

2.1 Degrees and Diplomas Offered

The Faculty of Graduate Studies offers advanced courses of instruction and facilities for research leading to the following:

Master of Architecture (M.Arch.)

Master of Arts (M.A.)

Maîtrise ès Arts (Collège universitaire de Saint-Boniface)

Master of Business Administration (M.B.A.)

Master of City Planning (M.C.P.)

Graduate Studies

Master of Dentistry (M.Dent.)

Master of Education (M.Ed.)

Maîtrise en Éducation (Collège universitaire de Saint-Boniface)

Master of Engineering (M.Eng.)

Master of Environment (M.Env.)

Master of Fine Arts (M.F.A.)

Master of Interior Design (M.I.D.)

Master of Landscape Architecture (M.Land.Arch.)

Master of Laws (LL.M.)

Master of Mathematical, Computational and Statistical Sciences (M.M.C.S.S.)

Master of Music (M.Mus)

Master of Natural Resources Management (M.N.R.M.)

Master of Nursing (M.N.)

Master of Occupational Therapy (M.O.T.)

Master of Physician Assistant Studies (M.P.A.S.)

Master of Public Administration (M.P.A.)

Master of Public Health (M.P.H.)

Master of Science (M.Sc.)

Master of Social Work (M.S.W.)

Doctor of Philosophy (Ph.D.)

Diploma in Population Health (Dip.P.H.)

See the Graduate Studies Program index in this *Calendar* for listings of graduate programs by unit.

2.2 Admission

General Policy on Admission

The general policy on admission to the Faculty of Graduate Studies is found in the Academic Guide section of this *Calendar*. Note that admission standards as well as criteria and procedures for admission may vary from program to program. Consult the specific departmental listing in this *Calendar* for details.

Admission to the Faculty of Graduate Studies is competitive and a combination of factors is considered in the admission decision, including:

- The past academic performance of the applicant and assessments of referees. These are used as indicators of the likelihood that the applicant

can successfully complete the course of studies and research for the degree.

- The capacity of the department (unit, faculty, institute, etc.) to provide the program of study and research requested by the applicant, including adequate study and research facilities.

The availability and willingness of a faculty member competent to supervise the program of study and research of the applicant.

Application Forms

Applications can be made online at umanitoba.ca/graduate_studies/. Paper application forms are available from the Faculty of Graduate Studies general office and from all departments. For application deadline dates, refer to the specific graduate program in this *Calendar*. Application to live in residence is made separately (See Housing and Student Life in the Student Affairs chapter.)

2.3 Application

Departmental Deadlines

Please refer to the Department to which you wish to apply in the Graduate Programs Section of this *Calendar*.

Application Fee

This fee must accompany all admission applications:

Canadian/permanent residents - \$100. (CAD)

International applicants - \$100. (CAD)

Application Declaration

All persons seeking admission to the University of Manitoba must sign the following declaration on the Application for Admission Form: "I hereby certify that I have read and understood the instructions and information sheet attached to this application form and that all statements made in conjunction with this application are true and complete. I understand that my application will be rejected if I have not disclosed my complete academic record or have submitted false information in support of my application to the Faculty of Graduate studies. In such an event I understand that future applications from me will not be considered."

Application Fraud or Misconduct

It should be noted that the commission of application fraud or misconduct may result in acceptance and registration being withdrawn and the applicant disqualified from consideration, not only in the year of application, but, in all subsequent sessions. If discovered in a subsequent session it may result in dismissal from the university. Application fraud or misconduct includes the following:

- Failure to declare attendance at another post-secondary institution;
- Presenting falsified academic documentation or causing or encouraging another person to falsify records through translation or data changes;
- Presenting falsified personal documentation, e.g. using a false name, date of birth, country of origin, etc.;
- Presenting falsified or fictitious reference documentation;
- Cheating on or having another person write a standardized entry exam such as TOEFL, MCAT, LSAT, DAT or GMAT;
- Presenting another person's standardized test score as one's own to falsify a test result; and
- Failure to report suspensions from another post-secondary institution.

2.4 Classification of Students

The classification of a student at the University of Manitoba is determined on admission to a program of study.

Please refer to Section 1.4 of the Academic Guide in this *Calendar* for Student Status/Classification of Students.

Awards Information

Awards ,

Award Programs Grad,

The following awards are offered through the Faculty of Graduate Studies, which lists the value and deadline to submit applications. A complete listing of awards is on the web: http://umanitoba.ca/graduate_studies/awards

Please note that awards information is subject to changes. The most up to date information can be found on our website.

(CIHR) Canadian Institutes of Health Research (www.cihr.ca)

\$ 17,500 CGS Master's

Consult department/unit for their deadline in November

(NSERC) Natural Sciences and Engineering Research Council (www.nserc.ca)

Doctoral Prize

\$10,000 plus a framed citation and a silver medal

Consult department for departmental deadline in September

Postgraduate Scholarship (PGS)

\$17,300 Master's (PGS M)

\$21,000 Ph.D. (PGS D)

Canada Graduate Scholarship (CGS)

\$17,500 Masters (CGSM)

\$35,000 Doctoral (CGSD)

Consult department for departmental deadline in September

Industrial Postgraduate Scholarship

No Deadline to apply.

(SSHRC) Social Sciences and Humanities Research Council (www.sshrc.ca)

\$17,500 Master's

\$20,000 Ph.D.

\$35,000 CGS Doctoral

Consult department/unit for their specific deadline in October

Vanier Canada Graduate Scholarships

<http://www.vanier.gc.ca/hp-pa-eng.shtml>

\$50,000 Ph.D.

Deadline to be determined. Please check with Awards Office for details.

Trudeau Scholars Programme (www.trudeaufoundation.ca)

\$35,000 Ph.D. Mid November

Manitoba Graduate Scholarship

\$15,000 for Master's

\$7,500 for PhD (Top up to UMGF)

Students must apply for the UMGF to be considered for the Manitoba Graduate Scholarship

University of Manitoba Graduate Fellowship

\$12,000 for Master's

\$16,000 for Ph.D.

Consult department/unit for their specific deadline in December

The Faculty of Graduate Studies academic guide contains all the rules and policies pertaining to the Faculty of Graduate Studies. Adherence to these rules is of utmost importance for the effective functioning/operation of programs and for guiding and monitoring the progress of students. The integrity of the process is at stake. The major goal of this guide is to prevent potential problems that may affect the completion of a student's program. It is the responsibility of students and the unit offering a graduate program to read and follow the policies contained herein.

All regulations as laid out in the Faculty of Graduate Studies Academic Guide are subject to revision by the appropriate bodies of the Faculty of Graduate Studies. This compendium is presented as the most recent set of regulations as a guideline for students and staff. Regulations may vary from one department or program to another. Individual departments may have additional regulations that supplement these general regulations. All such supplementary procedures and regulations must be approved as specified by the By-Laws of the Faculty of Graduate Studies, be published and available to students, and kept on file in the Faculty of Graduate Studies Office.

For those programs that are administered through a Faculty (as opposed to a Department) the term "Department" should be substituted by "Unit" within this document (i.e. Department Head becomes Unit Head.)

SECTION 1: Application, Admission, and Registration Policies

1.1 Application and Admission Procedures,

The application (and all required documentation) is to be submitted directly to the Faculty of Graduate Studies. **Applicants should contact the department to which they are applying for the procedures, requirements and departmental application deadlines in effect.**

Steps:

1. A completed official application for admission form must be submitted, together with the application fee and supporting documentation, to the Faculty of Graduate Studies. Until such time as an application is complete it will not be considered.

NOTE: International students need to pay special attention to the appropriate requirements with respect to transcripts (see application form for details).

2. Applications are subsequently reviewed by the unit offering the program who will decide whether the applicant meets the unit's criteria which include but are not limited to space, facilities, and advisors.

3. Notification of recommended/rejected applications are sent to the Faculty of Graduate Studies who check that the applicant meets the eligibility requirements of the Faculty of Graduate Studies. The Faculty of Graduate Studies notifies applicants of their acceptance or rejection.

Deadlines for Recommended Applications (from Departments to the Faculty of Graduate Studies)

The following are the deadlines for receipt by the Faculty of Graduate Studies Office for recommendations from graduate departments.

Session	Start Date	Canadian/US	International
FALL	September	July 1	April 1
WINTER	January	November 1	August 1
SUMMER (May Start)	May	March 1	December 1
SUMMER (July start)	July	May 1	February 1

IMPORTANT: Applicants **are** required to submit the application and documentation to the Faculty of Graduate Studies for an earlier date than is listed above. Applicants are advised to confirm the deadline of the department to which the application is being made. Contact information for each department can be found at http://umanitoba.ca/faculties/graduate_studies/admissions/index.html

The deadlines are meant to accommodate the needs of students in securing appropriate documentation. Late applications may be considered for the next available start date.

Application Fee

This fee must accompany all admission applications:

Canadian/Permanent Residents - \$100.00 (CDN)

International Applicants - \$100.00 (CDN)

Transcripts:

Applicants must arrange for official transcripts from all post-secondary institutions attended to be sent to the University of Manitoba. **Applicants must ensure that the original transcripts bearing the university seal or attested copies are sent directly from their issuing university to the Faculty of Graduate Studies.** In cases where the transcript does/will not clearly state that a degree has been conferred, an official degree certificate is required to accompany the transcript. It is important that the transcript(s) be sent so as to arrive as soon as possible to coincide with the arrival of the application.

Transcripts: International

Where academic records from a country other than Canada are produced in a language other than English the applicant must arrange for the submission of official literal translations of all records. To be official, original language documents and English translations must arrive together in envelopes which have been sealed and endorsed by the issuing institution.

Transcripts: University of Manitoba

University of Manitoba students may request student histories (unofficial academic records) to be mailed directly to the Faculty of Graduate Studies free of charge. Some departments require official transcripts which may be obtained from the Registrar's Office, 400 University Centre (Please allow at least two weeks for delivery).

Proficiency in English

A successfully completed English Language Proficiency Test from the approved list is required of all applicants unless they have received a high school diploma or university degree from Canada or one of the countries listed on the [English Language Proficiency Test Exemption List](#) (see next section). If applicable, this score is required as a basis for admission and applicants will NOT be accepted subject to receipt of an acceptable score. Documented proof of either of the above must be submitted with the application for admission. **Please note:** scores more than two years old are not acceptable.

Thresholds required for successful completion are indicated in parentheses.*

University of Michigan English Language Examination Assessment Battery MELAB (80%)

Graduate Studies

Test of English as a Foreign Language TOEFL– Paper-based test (550); Internet based -iBT (80)

Canadian Test of English for Scholars and Teachers CanTEST (band 4.5 in listening and reading and band 4.0 in writing and oral interview)

International English Language Testing System IELTS (6.5)

Academic English Program for University and College Entrance AEPUCE (65%)

Canadian Academic English Language Assessment (CAEL) (60 overall and 60 on each subset)

Note:

1. In addition, Foreign language students may be asked by the Department to complete the CanTEST prior to or following registration in the Faculty of Graduate Studies and, if need be, the Department may recommend remedial measures in language skills based on the results of the CanTEST.

*2. Some departments may require a specific test or test scores greater than those indicated above.

English Language Proficiency Test Exemption List**

Applicants holding secondary school diplomas and/or university degrees from the following countries are exempt from the English Language Proficiency Test requirement:

Australia	Nigeria
Belize	Puerto Rico
English Speaking West Indies	Singapore
Canada	South Africa
Guyana	United Kingdom
Ireland	U.S.A.
Kenya	Zambia
Lesotho	Zimbabwe
New Zealand	

** An updated list of additional countries exempt from the English Language Proficiency Test can be found at

http://umanitoba.ca/faculties/graduate_studies/admissions/english_exemption_list.htm

Letters of Recommendation

Letters of Recommendation forms are available in the Faculty of Graduate Studies Office, 500 University Centre or on the web:

http://umanitoba.ca/faculties/graduate_studies/media/letter_of_reference.pdf

Two letters of recommendation must be sent to the Faculty of Graduate Studies in individually sealed envelopes with the referee's signature across the closing flap of the envelope. Applicants should check with the department to which they are applying as some departments require more than two Letters of Recommendation on a departmentally approved form.

Admission Tests

Some departments require admissions tests, such as the Graduate Record Examination (GRE) or the Graduate Management Aptitude Test (GMAT). These requirements are listed in the Supplementary Regulations of the particular department, and if required, the scores must be submitted at the time of application.

Entrance Requirements

The minimum standard for acceptance into any category in the Faculty of Graduate Studies is a 3.0 Grade Point Average (GPA) or equivalent in the last two previous years of full time university study (60 credit hours).

Note: This is the minimum requirement of the Faculty of Graduate Studies and departments may have higher standards and additional criteria.

Eligibility of University of Manitoba Staff Members

A staff member at the University above the rank of Lecturer or Instructor II is not eligible to register for a higher degree in the department in which the appointment is held.

1.2 Registration Procedures,

Undergraduate students are not allowed to register in graduate courses; that is, admission to the Faculty of Graduate Studies is a condition for registration in courses at the 6000 level and above.

All graduate students must initially register in the term specified in their letter of acceptance as specified in the Academic Schedule of the Graduate Calendar. Any student not registering within one term of acceptance will be required to re-apply for admission. In exceptional circumstances and with prior approval from the Department, a student may defer registration for up to one term following acceptance into the Faculty of Graduate Studies. In the case of International students, admission may be deferred, with prior approval from the Department, for up to one year following acceptance.

All programs must be approved by the head of the major department or designate. Approval to take courses from departments outside the major department must be obtained from the outside department.

The approval or denial of admission and registration to two programs rests solely with the faculties/units concerned. The approval/denial must be submitted to the Faculty of Graduate Studies prior to the student's admission/registration.

Where a student does register in two programs the student must declare themselves as part-time in at least one of the programs. Students should note that completing a graduate program as a part-time student will affect their eligibility for the University of Manitoba Graduate Fellowship and may limit other funding possibilities.

Re-Registration

Any student whose program of study extends over more than one year must re-register in fall and winter term of each succeeding year of his/her program until a degree is obtained (or in the case of Pre-Master's students their program is completed). **Failure to re-register will result in the termination of the student's graduate status.** A student who has been discontinued and would like to be considered for continuation in a program must apply for re-admission, which is not guaranteed. The re-registration requirement does not apply to Occasional students or students on an Exceptional or Parental Leave of Absence (please refer to the "Leave of Absence" section of this Guide).

Note: Registration is not complete until fee payment or fee payment arrangements have been made with the Comptroller in writing prior to the fee payment deadline dates. The notation 'Discontinued Graduate Program' will be placed on the academic record of any graduate student who has failed to maintain continuous registration.

Registration Revisions

For designated periods subsequent to registration, approved revisions and transfers may be made. It is required that students adhere to dates and deadlines as published in the Academic Schedule of the Graduate Academic Calendar.

Note: Graduate students are not allowed to withdraw from courses without written permission from their Department head on recommendation from their advisor/advisory committee approving the program change. The notation "student discontinued program" will be placed on the academic record of any graduate student who has withdrawn from courses without such approval.

Western Deans' Agreement

This agreement was established in 1974 as an expression of co-operation and mutual support among universities offering Graduate programs in western Canada. Its primary purpose is the reciprocal enrichment of graduate programs throughout western Canada. This agreement is not intended to preclude other agreements between participating institutions.

1. The Western Deans' Agreement provides an automatic tuition fee waiver for visiting students. Graduate students paying normal required tuition fees to their home institution will not pay tuition fees to the host institution.

2. Students may be required to pay student, activity, application, or other ancillary fees to the host institution, according to general policies in effect at the host institution. Wherever possible, these fees will also be waived.

3. Students will qualify for the fee waiver if they:

a) present the "Authorization Form: Western Deans' Agreement" signed by the Dean or designate and the Department Head or Graduate Advisor of a participating Western institution specifying the courses to be taken for credit toward a graduate degree program at their home institution;

b) are in good standing in a graduate program at the home institution;

c) have paid all current and back fees at the home institution.

4. Students must meet all requirements as prescribed by the host university's regulations, deadlines, class capacities, and course prerequisites.

5. Registration is possible in courses at both the graduate and undergraduate levels, and in credit courses offered through distance education or other means. To be eligible, courses must be an integral part of the applicants' graduate degree program. Fee waiver is not permitted for audit or non-credit courses.

6. Students must have the Authorization Form approved by the relevant Department Head and the Faculty of Graduate Studies at the host institution at least two weeks prior to the commencement of the course(s) requested. The fee waiver is not available retroactively.

7. Students are subject to regulations of the home institution governing credit for the courses to be undertaken. As a condition of registration at the host institution, students will arrange for official transcripts from the host institution to be sent to the home institution confirming successful completion of courses selected.

8. Students must send confirmation of registration and notice of any change to the graduate Records Office of the home institution at the time of registration or course change is completed.

9. Students may not claim fee waivers under the terms of this Agreement for a period of more than 12 months total.

10. Each institution has its own regulations regarding the maximum number of transfer credits permitted in a given degree program.

Participating Universities

Athabasca University

University of Alberta
 Brandon University
 University of British Columbia
 British Columbia Institute of Technology
 University of Calgary
 Concordia University College of Alberta
 University of Lethbridge
 University of Manitoba
 University of Northern British Columbia
 University of Regina
 Royal Roads University
 University of Saskatchewan
 Simon Fraser University
 University of Victoria
 University of Winnipeg

Note: Changes in course classifications are regarded as course/program changes and may not be made without approval (refer to the “Registration Revision” section of this Guide) or after the deadline dates for course changes as indicated in the Academic Schedule of the *Calendar*.

Continuing Courses (CO)

For those graduate level courses (6000, 7000, and 8000) which are being taken by students enrolled in the Faculty of Graduate Studies and which continue beyond the normal academic term, the instructor shall recommend that a mark classification of “CO” be used until such time as a final grade can be established. If the course is not completed by August 31, the student must re-register for the course(s).

Graduate Level Courses (6000, 7000, and 8000) which extend beyond the normal academic term must be denoted as such in this *Calendar*.

In the absence of an assigned mark of “CO”, the student may receive a mark of “F” in that term.

Note:

1. A CO will normally not be permitted longer than twelve months.
2. In exceptional circumstances, where a CO grade is requested for a second twelve months, at the time the CO grade is submitted on the examination register the instructor and Department head must also submit the “Recommendation for Continuing Status of a Course” form stating the reason for the CO and the deadline by which the course must be completed.

Incomplete Courses

Students who are unable to complete the term work prescribed in a course may apply to the instructor prior to the end of lectures for consideration of a grade classification of “Incomplete”. It is understood that the student is to write the final examination if one is scheduled for the course.

Taking into account the results of the final examination, the value of the term work completed, and the extent of the incomplete term work, the instructor shall calculate the temporary grade using a zero value for incomplete work.

Normally, the following maximum extensions are allowed:

For courses terminated in April, August 1st

For courses terminated in August, December 1st

For courses terminated in December, April 1st

If a final grade is not reported within one month of the extension deadline, the letter “I” will be dropped and the grade will remain as awarded. The student will no longer have an opportunity to improve the grade. In no case will the satisfaction of the incomplete requirements result in a lower grade being awarded.

1.4 Student Status/Categories of Students, Full-Time And Part-Time Students

A student is considered to be full-time if the student is planning to carry the normal academic load of the department during the registration period. Graduate students who do not meet the criteria specified for full-time students should complete the form “Request for Part Time Status.”

This form must be approved by the department head and advisor and submitted to the Faculty of Graduate Studies prior to registration.

1.3 Course Classifications, General Classifications

Students who register through Aurora Student Information System (Aurora Student) must also have prior approval of the Department Head or designate. Students registering through Aurora Student should add only those courses that are a Major course in their program. Courses with Auxiliary “X”, Audit “A”, or Occasional “O” status (see below) must be added by the department.

X Auxiliary course: Course is not a major requirement of the program but is required by the student’s advisor.**

A Audit course: Course is not taken for credit. No grade is recorded.

O Occasional course: Course is not a requirement of the program.

**Extra courses which are not actually part of the Master’s or Ph.D. program but which are specified and required by the student’s advisor, may be classified as X (Auxiliary) and the grade will not be included in the degree GPA which appears on the transcript. However, X course grades may be used in the calculation of the GPA for continuation in the program and a minimum grade requirement may be required for X coursework by the Department. (Please consult the Departmental supplemental regulations.) Additionally, X courses are used in the calculation of the GPA for the purposes of Admission and Awards. (NOTE: The University of Manitoba Graduate Fellowship (UMGF) and International Graduate Student Scholarship (IGSS) use X courses in the calculation of the GPA.) The student’s advisor and head of the unit must determine if there is a valid need for the registration in courses under the X classification. A maximum of 12 credit hours under the X course classification is permitted while registered in a given program.

Pre-Master's Or Qualifying Students

In specific cases where the academic background of the student is judged to be insufficient for the given program in a unit, the department may recommend that the student be admitted to a pre-Master's program of study. The pre-Master's program is designed to bring the student's standing to approximately the level of an Honours graduate in the major department, and to provide any necessary prerequisites for courses.

Occasional Students

A student wishing to take graduate courses with no intention of applying those toward an advanced degree at the University of Manitoba is classed as an occasional student. Occasional students must meet the same degree and grade point average entrance requirements as regular graduate students and must write final examinations in the courses taken (unless audited), but will not receive credit toward a degree. In special circumstances, an occasional student may apply for permission to proceed to a degree program and also apply for transfer, for credit, of courses taken in the occasional category.

Note:

1 Transfer of courses from the "occasional category" to a degree program is not automatic: request for advance credit may be made within the first year of a degree program.

2. Fees paid by a student while registered as an occasional student are not transferable, at a later date, to a degree program.

3. Registration in the occasional student category can be for no more than one academic year without reapplication.

4. Graduate level course work must be taken while registered as an occasional student.

Joint Masters (With The University of Winnipeg)

The University of Manitoba and the University of Winnipeg offer four joint Master's programs in History, Religion, Public Administration, and Peace and Conflict Studies. The University of Manitoba Faculty of Graduate Studies is responsible for the administration of the joint programs and students complete the regular University of Manitoba application and registration forms. Students taking pre-Master's qualifying work for these programs register at the University where the courses are being taken.

Visiting Students

Visiting students are students who are registered at another institution who are taking one or more courses at the University of Manitoba on a Letter of Permission from their home university.

Provisional (Admission)

A new student is allowed provisional status in a program for up to one term from the time of registration. Registration for additional terms in that program will not be permitted until the provision is cleared. Provisional registration may be for such reasons as missing or incomplete documentation, lack of complete or appropriate academic background, etc.

SECTION 2: Academic Performance – General

SECTION 2: Academic Performance: General,

Students are ultimately responsible for ensuring that they meet degree and program requirements. The advisor (co-advisor), advisory committee and the

department must ensure that each student follows the guidelines and meets the program requirements. The Faculty of Graduate Studies performs a final check of program requirements for each student just prior to graduation. Students are cautioned, therefore, to check all regulations with respect to the degree requirements. Failure to meet all the requirements will result in failure to graduate.

Any student re-registering in the period between receiving unsatisfactory grades and a decision by the Faculty of Graduate Studies on a deficiency does so at his/her own risk.

Departments may make recommendations with regard to the regulations concerning minimum academic performance; however, enforcement of academic regulations rests with the Faculty of Graduate Studies. The following procedures apply to recommendations made by departments:

The department is responsible for informing the Faculty of Graduate Studies when a student's performance is unsatisfactory in research or course work and the department must describe any recommended remedial action(s).

The department must notify the student of the deficiency and of their recommendation.

If the student fails to satisfy any remedial action recommended, the student will be required to withdraw from the program.

Note:

When a graduate student is required to withdraw from a program of study, the notation on the academic record will be: "Required to withdraw". Voluntary withdrawal from a program is not permitted once the grades have been declared and indicate that the student has failed to achieve the required minimum.

Departmental recommendations will supersede student requests for voluntary withdrawal.

A student who has been required to withdraw from a graduate program at The University of Manitoba may be permitted to enrol in another graduate program only if the application for admission is approved by the Dean of Graduate Studies or designate.

Academic Performance

Student progress shall be reported at least annually to the Faculty of Graduate Studies on the "Progress Report Form". Students who fail to maintain satisfactory performance may be required to withdraw on the recommendation by the Department head to the Dean of Graduate Studies.

Performance in Course Work

A minimum degree grade point average (GPA) of 3.0 with no grade below C+ must be maintained for continuance in the Faculty of Graduate Studies. Departments may specify, in their supplementary regulations, standards that are higher than those of the Faculty of Graduate Studies. Students who fail to maintain the specified grades will be required to withdraw unless a departmental remedial recommendation (as outlined below) is approved by the Dean of Graduate Studies.

A student may be permitted to remove deficiencies in grades by repeating the course or taking an equivalent substitute course only once for each course to a maximum of 6 credit hours of coursework. If a course is repeated or replaced, the highest grade obtained will be used in the determination of the degree grade point average.

Note:

In exceptional circumstances, the major department may appeal to the Faculty of Graduate Studies for approval of remedial recommendation(s) falling outside those prescribed above.

Students receiving a grade of C or less in more than 6 credit hours of coursework are required to withdraw.

In general, supplemental exams are not permitted to students in the Master's or Ph.D. program.

All actions taken administratively are to be reported, in summary form to the Faculty of Graduate Studies Executive Committee.

SECTION 3: General Regulations – Pre-Master's

SECTION 3: General Regulations: Pre-Master's, Admission and Requirements

Graduates of bachelor degree programs with a minimum grade point average (GPA) of 3.0 in the last two full years of university study will be considered for admission to a pre-Master's program. These are the minimum requirements of the Faculty of Graduate Studies. Departments may specify higher or additional criteria. **Admission to a pre-Master's program does not guarantee future admission to a Master's program.** As the pre-Master's program of study is intended to bring a student's background up to the equivalent of the required 4-year degree, departments should assign to students, as part of their pre-Master's program of study, an appropriate number of applicable upper level (3000 or 4000) undergraduate courses. In exceptional circumstances and upon prior approval by the Graduate Dean, 7000 level courses may be considered for inclusion in the pre-Master's program of study for those students who hold a 4 year degree. Courses taken as part of the pre-Master's program may not be transferred to a Master's program at a later date.

Academic Performance

1. The department head or designate is responsible for assigning the courses and monitoring the progress of each student.

2. A minimum degree grade point average of 3.0 with no grade below C+ must be maintained for continuance in pre-Master's study. Students who fail to maintain this standing will be required to withdraw unless a departmental remedial recommendation (as below) is approved by the Dean of Graduate Studies.

3. Students deficient in 6 hours of credit or less may be permitted to write a supplemental examination (when offered) in courses in which a grade of C or less was obtained.

4. Students deficient in 6 hours of credit or less with a grade of C, D, or F in a course or courses may be permitted, if the overall average is C or better, to write one supplemental examination in each course (when offered), to repeat the courses, or to take equivalent substitute courses.

Note: In exceptional circumstances, when a student is deficient in more than 6 credit hours, the student may be permitted to repeat the pre-Master's year or to write supplemental examinations (when offered) or to substitute equivalent course work in order to make up the deficiencies.

A student may be permitted to repeat the pre-Master's year only once, and to remove deficiencies in grades by writing supplemental examination or repeating courses only once for each course to a maximum of 9 credit hours of course work.

If a course is repeated or a supplemental examination is written, the highest grade obtained in that course will be used in the determination of the degree GPA.

The degree GPA is cumulative in a pre-Master's program if more than one year is required to complete the course requirements.

All action taken administratively is to be reported in summary form to the Faculty of Graduate Studies Executive Committee.

SECTION 4: General Regulations – Master's

SECTION 4: General Regulations: Master's Intro, Diploma Programs:

The regulations for the Master's program shall also prevail for diploma programs. Students should also consult the department supplemental regulations regarding diploma programs.

Individual departments may have additional regulations that supplement these general regulations. All such supplementary procedures and regulations must be approved as specified by the By-Laws of the Faculty of Graduate Studies, be published and available to students, and kept on file in the Faculty of Graduate Studies.

Admission

Students who are eligible to be considered for direct admission to a program of study leading to the Master's degree include:

- Graduates of four-year undergraduate degree programs (or equivalent) from
 - a. Canadian institutions empowered by law to grant degrees; or
 - b. Colleges and universities outside Canada which are officially recognized by The Faculty of Graduate Studies.
- Graduates from first-cycle Bologna compliant degrees.
- Students who have completed the pre-Master's program from the University of Manitoba or from
 - a. Canadian institutions empowered by law to grant degrees; or
 - b. Colleges and universities outside Canada which are officially recognized by The Faculty of Graduate Studies.

All students applying for a Master's degree program must have attained a minimum GPA of 3.0 in the last two full years (60 credit hours) of study. This includes those applying for direct admission and those entering from a pre-Master's program. Students who meet the minimum requirements for admission to the Faculty of Graduate Studies are not guaranteed admission.

The pre-Master's program is designed to bring the student's standing to the approximate level of an Honours graduate in the major department, and to provide the student with any necessary prerequisites for courses to be taken in the Master's program.

In specific cases where the academic background of the student is judged to be insufficient for the given program in a unit, the department may recommend that the student be admitted to a pre-Master's program of study.

Student's Advisor/Co-Advisor

Each Master's student should have an advisor upon entry into the program, and must have one assigned no later than one term following registration. The advisor is approved by the Department Head, must be a member of the Faculty of Graduate Studies, be active in research, have expertise in a discipline related to the student's program, and hold at least a Master's degree or equivalent. Any exceptions or

special circumstances must be recommended by the Head of the major department and approved by the Dean of the Faculty of Graduate Studies. It is the responsibility of the Department Head to determine whether faculty members meet these criteria, and also to report on equivalency as necessary. In special circumstances, an advisor and co-advisor upon approval of the Department Head may advise a student.* The advisor and co-advisor must be members of the Faculty of Graduate Studies. (Refer to *Academic Membership* at http://umanitoba.ca/faculties/graduate_studies/admin/131.html.)

The advisor will advise the student on a program of study, direct research, and supervise the thesis or practicum work. In departments where the choice of thesis/practicum topic and thesis/practicum advisor are postponed for some time after a student's entry into the program, the Department Head shall appoint a faculty member to advise the student in the interim period before the regular advisor is assigned or chosen.

***Note:** When an advisor and co-advisor are assigned, together they shall fulfill the role of the advisor (that is, neither shall fulfill any other advisory or examining committee membership requirements). The co-advisors will usually be identified together at the beginning of a student's program. However, in some circumstances the need for a co-advisor may arise mid-way through a student's program. In all instances the Faculty of Graduate Studies must be informed of the co-assignment. One advisor must be identified as the primary advisor; however, both co-advisors' signatures are required on all documents where the advisor's signature is required.

Advisory Committee (Master's)

In those departments that specify that a Master's advisory committee is required, the committee must consist of at least one person who holds a primary appointment from within the major department. Additional specifications regarding the advisory committee are found in the departmental supplemental regulations.

Program Requirements

All students must complete one of the following programs of study for the Master's degree (unless otherwise specified in the approved departmental supplemental regulations):

Thesis/Practicum Route:

A minimum of 12 credit hours of course work plus a thesis or practicum. The minimum must include at least 6 credit hours at the 7000 level with the balance of the coursework at the 3000 level or above. A maximum of 24 credit hours of coursework is allowed toward the thesis/practicum based Master's program.*

Comprehensive Examination Route:

A minimum of 24 credit hours of course work and comprehensive examination(s). The minimum must include at least 12 credit hours at the 7000 level or above with the balance of the coursework at the 3000 level or above, or, in exceptional circumstances, and upon approval of the Dean of the Faculty of Graduate Studies, the 2000 level. A maximum of 48 credit hours of coursework is allowed toward the comprehensive examination based Master's program.*

*Unless professional accreditation requirements or existing supplemental regulations indicate otherwise.

Notes:

The program of study is determined by the major department and may include requirements in addition to those specified above. All departmental supplemental regulations require prior approval of the Faculty of Graduate Studies.

For historical reasons, the following thesis/practicum based programs are subject to the same min/max credit hour restrictions as for the comprehensive-based Master's:

Master of Nursing, Master of Architecture, Master of City Planning, Master of Landscape Architecture, Master of Natural Resource Management.

Language Reading Requirements

Some departments specify a language requirement for the Master's degree. Students are advised to check departmental supplemental regulations regarding this requirement.

Advance Credit

Advance credit for courses completed prior to admission to a Master's program will be considered on an individual basis. The student's major department makes the request to the Faculty of Graduate Studies by completion of the "Recommendation for Advance Credit (Transfer of Courses)" form.

Note:

Application for advance credit must be made within the first year of the program (see Lapse of Credit of Courses in this section).

No more than half of the required course work for the program can be given advance credit.

A course may not be used for credit toward more than one degree, diploma or certificate.

For thesis-/practicum-oriented programs the student must complete the thesis/practicum at The University of Manitoba.

For the comprehensive examination route, the student must complete the comprehensive examination(s) at The University of Manitoba.

Regardless of the extent of advance credit received, all students are required to pay the program fee.

Transfer Credit

Courses within a program of study may be taken elsewhere and transferred for credit at The University of Manitoba. Courses must be approved for transfer to the program of study by the major department and the Faculty of Graduate Studies before the student may register for them. This permission is granted in the form of a Letter of Permission, which may be obtained by making application to the Registrar's Office.

Transfer credit (courses taken at other universities while registered in a program at The University of Manitoba) is granted as follows: For Master's students, transfer credit must not exceed 50% of the minimum credit hours of coursework required for the program.

Note: Students seeking a Master's degree from The University of Manitoba must complete at least 50% of their required program coursework at The University of Manitoba.

Minimum Time Requirement

The minimum time for students in the Master's program is equivalent to two terms. Most departments require more than this.

Maximum Time Limits

The maximum time allowed for the completion of the Master's degree except where indicated in specific units is as follows:

Note: Each department may have supplementary regulations for maximum time limits.

2 years: Master of Laws

3 years: Master of Occupational Therapy (accelerated program).

4 years: Master of Physician Assistant Studies

6 years: Master of Business Administration, Master of Public Administration, Master of Education, Master of Nursing, Master of Social Work and Master of Engineering.

5 years: All other Master's degree and diplomas

Recommendations for extensions of time to complete the degree will be considered on an individual basis and must be approved by the Dean of Graduate Studies **at least four months** prior to expiration of the respective maximum time limit.

Note: A student who has not completed the degree requirements within the time limit or within the time limit of the extension (see also sections: "Extension of Time to Complete Program of Study" and "Leave of Absence") will be required to withdraw from the Faculty of Graduate Studies and the notation on the student record will be "Required to withdraw: time to complete program expired".

Lapse of Credit of Courses

Courses completed more than eight years prior to the date of awarding of a degree may not normally be used for credit toward that degree.

Academic Performance

Student progress shall be reported at least annually to the Faculty of Graduate Studies on the "Progress Report Form". Students who fail to maintain satisfactory performance may be required to withdraw on the recommendation by the Department Head, to the Dean of Graduate Studies.

Performance in Coursework

A minimum degree grade point average of 3.0 with no grade below C+ must be maintained for continuance in the Master's program. Students who fail to maintain this standing will be required to withdraw unless the Dean of Graduate Studies approves a departmental remedial recommendation (refer to the section: Academic Performance – General).

Performance not related to Coursework

Students are required to demonstrate satisfactory academic performance in areas not related to performance in courses, such as attendance at or participation in course lectures, seminars and in laboratories and progress in research, thesis or practicum. **The specific nature of satisfactory academic performance is outlined in the departmental Supplementary Regulations and must be reported to the Faculty of Graduate Studies on the "Progress Report Form".** Students who fail to maintain satisfactory performance may be required to withdraw on the recommendation of the Department Head to the Dean of the Faculty of Graduate Studies.

Course or Program Changes

Students are not permitted to change their program of study, including withdrawal from individual courses, without the approval of their advisor and/or advisory committee and Department Head. Withdrawal from courses or changes of course category (i.e., grade mode) without such approval will result in the student being required to withdraw from the Faculty of Graduate Studies.

Deadlines For Graduation

The final requirements of the degree, in the form of the final report on the thesis/practicum (and the corrected copies of the thesis/practicum); comprehensive examination; or M. Eng. Project, must be submitted to the Faculty of Graduate Studies by the appropriate deadline. For those programs that do not have a culminating exercise (thesis/practicum/comprehensive examination/M.Eng. project) the unit must forward potential graduate names to the Faculty of Graduate Studies by the deadline. The deadline for each of the graduation dates is published in the Academic Schedule of the Graduate Calendar. Extensions to these deadlines will be considered in exceptional circumstances only.

Academic Requirement for Graduation

A cumulative degree grade point average of 3.0 or greater is required in those courses that constitute the program of study for graduation in the Faculty of Graduate Studies.

Comprehensive Examination

The regulations governing comprehensive examinations, where required, are specified in the supplementary regulations of the major department. No student may sit for those examinations more than twice. The results of the comprehensive examinations shall be submitted to the Faculty of Graduate Studies on the appropriate form in the terms "pass" or "fail."

Note: Any student who receives a "fail" on the comprehensive examination twice will be required to withdraw from the Faculty of Graduate Studies.

Thesis Proposal/Practicum Plan

Each student is required to develop a thesis proposal/practicum plan in his or her chosen field of study. Normally, the thesis is developed under the mentorship of the advisor/co-advisor. The advisor/advisory committee/Department Head/grad chair must formally approve the thesis proposal. (Each department may have specific guidelines regarding the thesis proposal). Research involving human or animal subjects requires ethical approval prior to initiation of research. Please refer to the appropriate ethics review committee.

4.1 Thesis and Practicum Regulations,

General

Students must demonstrate their mastery of the field and that they are fully conversant with the relevant literature through their thesis.

Practicum versus thesis:

While the practicum differs from the thesis in its emphasis on the application of theory, it is similar in scope, span, and rigor. The weight of work required for the practicum is equal to that required for the Master's thesis. In general, the practicum takes the form of an exercise in the practical application of knowledge and skill. It usually involves the careful definition of a problem, the application of appropriate knowledge and skills to the problem, and a report of the results in a manner suitable for evaluation by an examining committee. The requirements are specified by the departments concerned.

Style and format:

The thesis/practicum must be written according to a standard style acknowledged by a particular field of study and recommended by the major department, be lucid and well written, and be reasonably free from typographical and other errors.

The electronic and paper copies of the thesis/practicum must be submitted in good, clear type. As long as the copies are clearly legible, the thesis/practicum may be reproduced by a method that is presented in the thesis guidelines which are available

on the Faculty of Graduate Studies website:

http://umanitoba.ca/faculties/graduate_studies/. Minimum left margin is 3.8 cm (1.5 inches), other margins are 2.5 cm (1 inch). Wherever possible, these margins should be adhered to for illustrative materials. Minimum paper weight of the paper copy is 16 lb. Bond or equivalent.

Deadlines and Details for submissions of final copies:

The Academic Schedule in the Graduate Calendar should be consulted regarding dates by which theses/practica must be submitted.

Following the approval of the thesis/practicum by the examining committee and the completion of any revisions required by that committee, the thesis, and where applicable, the practicum, must be submitted to the Faculty of Graduate Studies as follows:

One single-sided paper copy in unbound form, enclosed in an envelope or folder; and

One digital version submitted as an e-thesis at the MSpace website:

<https://mspace.lib.umanitoba.ca/index.jsp>

The e-thesis is the official copy. Students are encouraged to review the e-thesis submission requirements prior to creating a digital version. Electronic multimedia files or accompanying files that are part of an e-thesis should be posted to MSpace as separate files.

The paper copy will become a circulating copy. Where possible, the contents of the official electronic version must be replicated in the paper copy.

Both digital and paper copies of the thesis/practicum are required for the University Library and remain the property of the University of Manitoba.

4.2 Thesis/Practicum Examination Procedures, Examining Committee

The student's advisor will recommend a suggested thesis/practicum examining committee to the Department Head for approval, which shall then be reported to the Faculty of Graduate Studies Office on the "Master's Thesis/Practicum Title and Appointment of Examiners" form. The committee must consist of a minimum of three examiners. At least two examiners must be members of the Faculty of Graduate Studies. One examiner must hold a primary appointment from within the major department and one examiner must be external to the department. All examiners must be deemed qualified by the Department Head and willing to serve.

Note: The external member should be considered arm's length to the department. While the definition of "arm's length" is left to the discretion of the department, be advised that justification may be required by the Faculty of Graduate Studies for this selection.

Distribution and Examination

The head of the major department will arrange for the distribution of the thesis/practicum to the examiners and will notify the Faculty of Graduate Studies Office at the time that the thesis/practicum has been distributed for examination. It is the duty of all examiners to read the thesis/practicum and report on its merits according to the following categories:

Acceptable without modification or with minor revision(s)

Acceptable subject to modification and/or revision(s)

Not acceptable
Graduate Studies

Note:

1. The examining process should be completed within one month of distribution of the thesis/practicum.
2. A student has the right to an examination of the thesis/practicum if he/she believes it is ready for examination.

Oral Examination

Normally, students must pass an oral examination on the subject of the thesis/practicum and matters relating thereto. The form of the oral examination will be as prescribed by the Supplementary Regulations of the major department. The oral examination shall be open to all members of The University of Manitoba community except in exceptional cases. The oral examination may be closed, for example, when the results of the thesis/practicum research must be kept confidential for a period of time. In such cases, the examining committee and Department Head shall recommend such action to the Dean of Graduate Studies who shall then approve that the final examination be closed to all but the examining committee and the Dean of Graduate Studies (or designate). It is expected that all members of the examining committee be present at the defense.

Final Approval/Rejection

Following completion of the examination of the thesis/practicum, examiners will consider the oral examination and the written thesis/practicum to determine the nature of and procedures for approval of any revisions that will be required prior to submission to the Faculty of Graduate Studies. The advisor is normally responsible for ensuring that revisions are completed according to the instructions from the examining committee. The Faculty of Graduate Studies will accept the thesis/practicum only when the required revisions have been completed.

Note: A student will be required to withdraw when the Master's thesis or practicum has been rejected twice at the stage where:

- a) The examining committee reports on the merits of the written thesis;
- b) The defense; or
- c) A combination of both stages.

Final Report

The judgement of the examiners shall be reported to the Faculty of Graduate Studies in the qualitative terms "approved" or "not approved". Such verdicts must be unanimous, and each examiner must indicate, by his/her signature, concurrence with the verdict. Anything less than unanimity shall be considered a failure. In the case of a failure for the thesis/practicum at the Master's level a detailed written report will be prepared by the Chair and submitted to the Faculty of Graduate Studies, who will make the report available to the candidate and advisor.

The candidate will be recommended for the Master's degree upon receipt by the Faculty of Graduate Studies of favorable results of the thesis or practicum examining committee and when the corrected copy of the electronic version of the thesis/practicum is submitted to MSpace and corrected copy of the paper version of the thesis/practicum is submitted to the Faculty of Graduate Studies, providing all other degree requirements have been satisfied.

4.3 Publication and Circulation of Thesis/Practicum

Every graduate student registering in a thesis/practicum Master's program at The University of Manitoba shall be advised that, as a condition of being awarded the degree, he/she will be required to grant a license of partial copyright to the University and to the Library and Archives Canada for any thesis or practicum submitted as part of their degree program.

Note: This license makes the thesis/practicum available for further research only. Publication for commercial purposes remains the sole right of the author.

The forms and conditions pertaining to these license agreements are available at the Faculty of Graduate Studies Office. Note that this and other related regulations may give rise to important questions of law, and students may need additional legal advice on the copyright laws of Canada and/or other countries. Students who wish to obtain legal advice concerning their subsequent rights are advised to do so prior to signing the agreements. Signing of the license agreements is normally done after the contents of the thesis/practicum have been delineated and the importance of copyright and/or patents fully comprehended.

Publication in the above manner does not preclude further publication of the thesis or practicum report or any part of it in a journal or in a book. In such cases, an acknowledgement that the work was originally part of a thesis or practicum at The University of Manitoba should be included.

Notes:

Copyright – Copyright in theses and practica is protected in international copyright law. A copyright symbol © or (c) is incorporated on a page containing statements of permission to microfilm and to lend copies of the thesis or practicum. After completion, this page should be inserted in the thesis/practicum immediately following the title page. Blank copies of this page are available from the Faculty of Graduate Studies Office.

Patents – Refer to the section “Policy of Withholding Theses Pending Patent Applications” in this Guide.

Restriction of theses or practica for publication – In exceptional cases, not covered by the regulation concerning patents, where adequate cause can be shown to delay publication, the student may request the Dean of Graduate Studies to restrict access, for a period up to one year after submission, of the digital and unbound paper versions of a thesis or practicum submitted to The University of Manitoba. The Dean, in consultation with the student’s advisor, shall determine for what period, if any, access will be so restricted.

Library and Archives Canada – A microfiche of the thesis is forwarded to the Library and Archives Canada and is listed in a monthly and annual national bibliography, ‘Canadiana’, which is published by the National Library.

SECTION 5: General Regulations – Ph.D.

SECTION 5: General Regulations: Ph.D. Intro,

FOR FACULTY-BASED PH.D PROGRAMS, THE DEAN OR DESIGNATE IS THE DE FACTO DEPARTMENT HEAD.

The degree of Doctor of Philosophy is granted only upon evidence of general proficiency and of distinctive attainment in a special field. In particular, a recognized ability for independent investigation must be demonstrated by the candidate in a thesis which embodies original research or creative scholarship and is presented with a high degree of literary skill. It is a research degree and is never conferred solely as a result of coursework study.

These general regulations apply to all students in all departments. Individual departments may have procedures and regulations that supplement these general regulations. All such procedures and regulations must be consistent with these general regulations, approved as specified by the By-Laws of the Faculty of Graduate Studies, published and available to students, and kept on file in the Faculty of Graduate Studies.

Admission

Normally, a Master’s degree or equivalent from a recognized university and a cumulative GPA of 3.0 or equivalent in the last two previous years of full time university study (60 credit hours) is the minimum requirement for admission to the

Ph.D. program. With special recommendation of the department concerned (please see below), applicants with an honours Bachelor’s degree may be considered for entry to Ph.D. study.

Direct Admission from the Bachelor’s Honours or equivalent

Students to be considered for admission to a Ph.D. program directly from the honours Bachelor’s degree or equivalent must be outstanding in their academic background (GPA well above 3.0 in the last two full years of undergraduate study). Once admitted, these students must complete at least 24 credit hours of course work and will be assessed Ph.D. fees for 3 years.

Transfer from the Master’s to the Ph.D. program

Students who have not completed a Master’s program may transfer to the Ph.D. program within the same department upon recommendation to the Faculty of Graduate Studies by the student’s major department. The recommendation must be made within 24 months of the student’s commencement of the Master’s program. The coursework completed in the Master’s program would normally become a part of the Ph.D. program, and the number of years spent in the Master’s program would be counted as years in the Ph.D. program. Students must complete at least 24 credit hours of coursework. If the transfer occurs within 12 months of the initial registration in the Master’s program, the student will be assessed Ph.D. fees for 3 years. If the transfer occurs after 12 months, the student will be assessed Ph.D. program fees for 2 years (as they will have already paid fees for the Master’s program). Students are cautioned that such transfers may impact on the University of Manitoba Graduate Fellowship duration. The request to transfer from the Master’s to the Ph.D. program must be submitted to the Faculty of Graduate Studies at least one month prior to the term for which the student intends to commence the Ph.D. program. The following are required when making the request: The “Application for Admission” form (and application fee); “Ph.D. Selection Committee Report” form, and; in the case where the student does not hold a Master’s degree, a memo from the Department Head.

Note: Where a student with a Master’s degree or equivalent is initially admitted and registered in a Master’s program, that student may be transferred to the Ph.D. program within the same department on recommendation from the student’s advisor and Department Head, provided the recommendation is made at the time of admission to the Master’s Program (i.e. “Possible transfer to Ph.D. Program within 12 months”) and the follow up transfer recommendation occurs within 12 months of the initial registration in the Master’s program. In such a case, the application fee is waived and fees assessed towards the Master’s program will be deducted from the full 2 years of Ph.D. program fees.

Provisional Admission to the Ph.D.

Students nearing completion of the Master’s degree may be accepted provisionally to the Ph.D. program for a 12 month period (commencing with the first registration in the Ph.D. program). Further registration in the Ph.D. program is contingent upon completion of all requirements of the Master’s degree within the 12 months.

Note: Students must maintain continuous registration in their Master’s program until completion. Students will require assistance from the department or the Faculty of Graduate Studies to complete dual registration in the Master’s and Ph.D. program simultaneously.

Selection Committee

Upon receipt of an application, the head of the major department will appoint a selection committee of at least three persons to evaluate the student’s qualifications and report on his/her suitability for Ph.D. study. In making admission decisions, departments may also consider such things as the availability of facilities and financial assistance. If acceptance is recommended by the selection committee and approved by the head of the department and the Dean of the Faculty of Graduate Studies, the Faculty of Graduate Studies sends a letter of acceptance to the applicant.

Student’s Advisor/Co-Advisor

Every Ph.D. student must have an advisor, appointed by the Department Head, whose duties will be to advise the student on a program and courses, direct research, and supervise thesis work. The advisor must be a member of the Faculty of Graduate Studies, be active in research, have expertise in a discipline related to the student's program and hold a Ph.D. or equivalent. In special circumstances, an advisor and co-advisor, upon approval of the Department Head may advise a student.* The co-advisor must be a member of the Faculty of Graduate Studies. It is the responsibility of the Department Head to determine whether faculty members meet these criteria, and to report on equivalency as necessary.

The student's advisor also acts as a channel of communication to the student's advisory committee, the major department, and the Faculty of Graduate Studies. Usually the student and the advisor choose to work together by mutual agreement. In departments where the choice of thesis topic advisor are postponed for some time after entry into the program, the Department Head or the selection committee shall appoint a faculty member to advise the student as to the rules and regulations and on a program and course requirements in the interim period not to exceed eighteen months before a permanent advisor is chosen.

***Note:** When an advisor and co-advisor are assigned, together they shall fulfill the role of the advisor (that is, neither shall fulfill any other advisory or examining committee membership requirements). The co-advisors will usually be identified together at the beginning of a student's program. However, in some circumstances the need for a co-advisor may arise mid-way through a student's program. In all instances the Faculty of Graduate Studies must be informed of the co-assignment. One advisor must be identified as the primary advisor; however, both co-advisors' signatures are required on all documents where the advisor's signature is required.

Program of Study

As soon as possible but no later than 24 months after a student has commenced the program, the student's program of study, which includes information about the minimum time for completion of the degree, course work to be taken, foreign language requirement, and the research area in which the thesis will be done, should be forwarded to the Faculty of Graduate Studies. The program of study and any changes thereto must be approved by the student's advisor, and the advisory committee and the head of the major department. The approval of the student's advisor and the head of the major department are sufficient for registration.

Advisory Committee

The Head of the major department is responsible for the establishment of an advisory committee for each Ph.D. student. The advisory committee must consist of a minimum of three members of the Faculty of Graduate Studies, one of whom must hold a primary appointment from within the major department and one of whom must hold a primary appointment outside the major department. Committees may include one guest member who has expertise in a related discipline but is not a member of the Faculty of Graduate Studies. The membership of the committee, including the ad-visor, as well as any changes to it, must be approved by the Dean of Graduate Studies. The advisor is the Chair of the advisory committee.

Responsibilities of the committee are to approve the program of study and thesis proposal and to exercise general supervision over the student's work throughout the Ph.D. program. The committee should meet with the student periodically (and must meet with the student at least once a year) to review the student's progress and to report this progress to the Faculty of Graduate Studies (through the Head of the major department). (In the situation where a Ph.D. Advisory Committee or responsible individual(s) would not normally be established until the candidacy exam is completed then at least one responsible individual will meet with the student.) If there is evidence of unsatisfactory performance, the student may be required to withdraw.

Program Requirements

All students must complete one of the following programs of study for the Ph.D. degree (unless otherwise specified in the approved departmental supplemental regulations): Where admission to the Ph.D. is directly from a Master's degree, a minimum of 12 credit hours at the 7000 level or higher plus a thesis is required. Any further coursework beyond the minimum 12 credit hours at the 7000 level must be at Graduate Studies

the 3000 level or above. For those students who hold a Master's degree, a maximum of 24 credit hours of course work is allowed toward the Ph.D. program.*

Where admission to the Ph.D. is directly from an Honours Bachelor degree or equivalent, a minimum of 24 credit hours plus a thesis is required. The coursework must include a minimum of 18 credit hours at the 7000 level or higher with the balance of the coursework at the 3000 level or above. For those students who do not hold a Masters degree, a maximum of 48 credit hours of course work is allowed toward the Ph.D. program.*

*Unless professional accreditation requirements and supplemental regulations indicate otherwise.

NOTE: The program of study is determined by the major department and may include requirements in addition to those specified above. All departmental supplemental regulations require prior approval of the Faculty of Graduate Studies.

Language Reading Requirements

Some departments specify a language requirement for the Ph.D. degree. Students are advised to check departmental supplemental regulations regarding this requirement.

Advance Credit

Advance credit for courses completed prior to admission to a Ph.D. program will be considered on an individual basis. The student's major department makes the request to the Faculty of Graduate Studies by completion of the "Recommendation for Advance Credit (Transfer of Courses)" form.

Note:

1. Application for advance credit must be made within the first year of the program (see Lapse of Credit of Courses in this section).
2. No more than half of the required course work for the program can be given advance credit.
3. A course may not be used for credit toward more than one degree, diploma or certificate.
4. The student must register at The University of Manitoba for one academic year as a full-time student and must also complete the thesis at The University of Manitoba.
5. Regardless of the extent of advanced credit received, all students are required to pay the program fee.

Transfer Credit

Courses within a program of study may be taken elsewhere and transferred for credit at The University of Manitoba, but all such courses must be approved for transfer to the program of study by the major department and the Faculty of Graduate Studies before the student may register for them. This permission is granted in the form of a Letter of Permission which may be obtained by making application to the Registrar's Office.

Transfer credit (courses taken at other universities while registered in a program at The University of Manitoba) is to be granted as follows: For Ph.D. students transfer credit must not exceed 50% of the minimum credit hours of coursework required.

Note: Students seeking a Ph.D. degree from The University of Manitoba must complete at least 50% of their required program coursework at The University of Manitoba.

Minimum Time Limit

The minimum time requirement for the program of study for the degree will normally be two years of study beyond the level of the Master's degree, or three years beyond the level of a Bachelor's degree. The student may be permitted to spend one of these years in an approved program of research or study elsewhere. Such permission must be approved by the Dean of Graduate Studies on the recommendation of the student's advisory committee.

Maximum Time Limit

A student's candidature shall lapse if he/she fails to complete the degree within seven years following initial registration in the Ph.D. program. For those students who transfer from the Master's to the Ph.D., years spent in the Master's program are counted as years in the Ph.D. program. Recommendations for extensions of time to complete the degree will be considered on an individual basis and must be approved by the Dean of Graduate Studies.

Note: A student who has not completed the degree requirements within the time limit or within the time limit of the extension (see also sections "Extension of Time to Complete Program of Study" and "Leave of Absence") will be required to withdraw from the Faculty of Graduate Studies and the notation on the student record will be "Required to withdraw: Time to complete program expired".

Residence Requirement

Two residence periods at The University of Manitoba devoted to full-time graduate study, subsequent to admission into the Ph.D. program, are required of all students. (For the purposes of the Residence Requirement one residence period is Fall Term, Winter Term or Summer Term (May – August) combined.) The student shall be geographically available to visit the campus regularly during these residence periods.

Note: The purpose of the residency is to ensure that Ph.D. students have an opportunity to work within the stimulating environment provided by contact with a cohort of dedicated peers and professors in a chosen field of study, and also to enhance the breadth and depth of their graduate experience by being part of a broader university culture.

Note: Students may not retain the status of full-time while employed full-time without prior permission of the Dean of the Faculty of Graduate Studies and recommendation from the major department.

Lapse of Credit of Courses

Courses completed more than eight years prior to the date of awarding of a degree may not normally be used for credit toward that degree.

Academic Performance

Student progress shall be reported at least annually to the Faculty of Graduate Studies on the "Progress Report Form". Students who fail to maintain satisfactory performance may be required to withdraw on the recommendation by the Department Head, upon receiving input from the advisory committee, to the Dean of Graduate Studies.

Performance in course-work

A minimum degree grade point average of 3.0 with no grade below C+ must be maintained for continuance in the Ph.D. program. Students who fail to maintain this standing will be required to withdraw unless the Dean of Graduate Studies approves a departmental remedial recommendation (refer to the section: Academic Performance – General).

Performance not related to course work

Students may also be required to withdraw from their Ph.D. program for reasons of unsatisfactory performance other than those related to failing grades. These include, Graduate Studies

but are not restricted to, such things as unsatisfactory attendance and lack of progress in research and/or thesis. The student's advisory committee will make a recommendation for required withdrawal to the Department Head. The Department Head will then recommend to the Dean of the Faculty of Graduate Studies that the student be required to withdraw for reasons of unsatisfactory academic performance.

Course or Program Changes

Students are not permitted to change their program of study, including withdrawal from individual courses, without the approval of their advisor and/or advisory committee and Department Head. Withdrawal from courses or changes of course category without such approval will result in the student being required to withdraw from the Faculty of Graduate Studies.

Deadlines for Graduation

The final requirements of the degree, in the form of the final report on the thesis (and the corrected copies of the thesis) must be submitted to the Faculty of Graduate Studies by the appropriate deadline. The deadline for each of the graduation dates is published in the Academic Schedule of the Graduate Calendar. Extensions to these deadlines will be considered in exceptional circumstances only.

Academic Requirement for Graduation

A cumulative degree grade point average of 3.0 or greater is required in those courses that constitute the program of study for graduation in the Faculty of Graduate Studies.

Candidacy Examination

While the format and content of the candidacy exam will vary from unit to unit, the purposes of the candidacy exam in doctoral programs is to determine the student's competence in the discipline with respect to understanding and absorbing a broad spectrum of material, and then researching, identifying, analysing, synthesizing, and communicating ideas about that material in depth.

At the time specified by the advisory committee, normally within the first two years of the Ph.D. program but in no case later than one year prior to expected graduation, the student must successfully complete the formal candidacy examination. The format of the candidacy examination may vary with the department.

1. The examination is conducted according to a procedure established by the major department and approved by the Guidelines and Policy Committee of the Faculty of Graduate Studies.
2. This exercise is independent from the Thesis Proposal exercise.
3. The examination procedure must be made known to the students.
4. The Dean of Graduate Studies must be informed whether the candidate has passed or failed the candidacy examination (on the "Report on Ph.D. Candidacy Examination" form).
5. Students must be provided with feedback on their performance and access to the reasons for the pass/fail.
6. A pass decision of the examiners must be unanimous.
7. Any student who fails the candidacy examination twice will be required to withdraw from the Faculty of Graduate Studies.
8. On successful completion of this examination, the student will be considered a candidate for the Ph.D. degree.

Thesis Proposal

The proposed thesis research must be approved by the advisory committee and, if appropriate, by the Research Ethics Review Committee before the work has begun on the thesis research or project.

A written thesis proposal must contain the research planned for the program and must be approved by the advisory committee. In order to approve the proposal the whole committee must meet as a committee. Approval of the completed thesis proposal must be documented on the Progress Report form and Ph.D. Thesis Proposal form and forwarded to the Faculty of Graduate Studies within 24 months of the student's initial registration in the program. Some departments may have specific procedures in place for approval of thesis proposals and students are advised to consult their departmental office. This exercise is independent from the candidacy examination exercise.

5.1 Thesis Regulations: Ph.D., General

An essential feature of Ph.D. study is the candidate's demonstration of competence to complete a research project and present the findings. **The thesis must constitute a distinct contribution to knowledge in the major field of study and the material must be of sufficient merit to be, in the judgement of the examiners, acceptable for publication.**

Style and format:

The thesis must be written according to a standard style acknowledged by the particular field of study and recommended by the major department, be lucid and well written, and be reasonably free from typographical and other errors.

The electronic and paper copies of the thesis must be submitted in good, clear type. As long as the copies are clearly legible, the thesis may be reproduced by a method that is presented in the thesis guidelines which are available on the Faculty of Graduate Studies website: http://umanitoba.ca/faculties/graduate_studies/. Minimum left margin is 3.8 cm (1.5 inches), other margins are 2.5 cm (one inch). Wherever possible, these margins should be adhered to for illustrative materials. Minimum paper weight of the paper copy is 16 lb. Bond or equivalent.

Policies and procedures for the inclusion of published papers within the doctoral theses are governed by the supplementary regulations of individual departments. The following are the general policies and procedures of the Faculty of Graduate Studies:

- The candidate's specific contribution to each paper (in case of multiple-authored papers) must be clearly indicated;
- An abstract, full introduction, and conclusions must be included;
- Where more than one manuscript is included, connecting text and common abstracts, introduction, and conclusions must be included;
- There must be adherence to all other requirements as outlined in thesis guidelines.

Deadlines and Details for submission of final copies:

The Academic Schedule in the Graduate Calendar should be consulted regarding dates by which theses must be submitted.

Following the approval of the thesis by the examining committee and the completion of any revisions required by that committee, the thesis must be submitted to the Faculty of Graduate Studies as follows:

One single-sided paper copy in unbound form, enclosed in an envelope or folder; and

One digital version submitted as an e-thesis at the MSpace website:

<https://mspace.lib.umanitoba.ca/index.jsp>

The e-thesis is the official copy. Students are encouraged to review the e-thesis submission requirements prior to creating a digital version. Electronic multimedia files or accompanying files that are part of an e-thesis should be posted to MSpace as separate files.

The paper copy will become a circulating copy. Where possible, the contents of the official electronic version must be replicated in the paper copy.

Both digital and paper copies of the thesis are required for the University Library and remain the property of the University of Manitoba.

5.2 Thesis Examination Procedures, Final Examination For The Ph.D. Degree

Once the thesis along with the "Ph.D. Thesis Title and Appointment of Examiners" form is submitted to the Faculty of Graduate Studies, the final examination for the Ph.D. degree proceeds in two stages:

1. Examination of the candidate's thesis. Prior to the examination of the thesis, the advisor shall furnish a written statement that, in his/her opinion, the thesis is (or is not) ready to be examined by completing the "Ph.D. Thesis Title and Appointment of Examiners" form.
2. Oral examination of the candidate on the subject of the thesis and any matters relating thereto.

Note: A candidate has the right to an examination of the thesis if he/she believes it is ready for examination.

A thesis may not be formally submitted for examination more than twice.

Formation of the Examining Committee

University of Manitoba (Internal) Examiners:

The advisory committee chair, in consultation with committee members, will recommend to the head of the major department the names of at least three internal thesis examiners, to be forwarded to the Dean of Graduate Studies for approval. These names shall include the student's advisor and two other persons, one of whom must hold a primary appointment within the major department and one of whom must hold a primary appointment outside the major department. All internal examiners must be members of the Faculty of Graduate Studies. In normal circumstances these internal examiners will be members of the student's advisory committee.

External examiner:

A distinguished scholar with particular experience in the field of the thesis research shall be chosen as the external examiner. The student's advisory committee shall make the selection, and the advisor should then make an informal inquiry as to the prospective external examiner's willingness to serve. If so, a nomination is then made by the head of the major department to the Dean of Graduate Studies. The external examiner must be from outside The University of Manitoba and the Dean of Graduate Studies makes the formal invitation to the external examiner.

Note: The external examiner should: hold a Ph.D.; hold an appointment with a recognized university or be a recognized scholar in their field; have no affiliation

with the student or the advisor. The external must be considered at arm's length to the department and the University of Manitoba. While the definition of "arm's length" is left to the discretion of the department, be advised that justification may be required by the Faculty of Graduate Studies for this selection.

Changes in the examining committee:

The Dean of the Faculty of Graduate Studies must also approve changes in the membership of the examining committee. No changes shall be made in the examining committee after the thesis is distributed by the Faculty of Graduate Studies to the committee for examination.

Note: Should the thesis not be submitted for examination within 12 months after the appointment of the examining committee, the committee appointment will lapse and a new appointment shall be necessary.

Distribution of the Thesis For Examination

Sufficient copies for distribution to each member of the examining committee must be submitted to the Faculty of Graduate Studies in unbound form, with each set enclosed in a separate envelope or folder. Each copy must be prefaced by an abstract of the thesis which includes the title, the author's name, and a brief summary of the results. It must be in a form acceptable to the student's advisor.

Note: It is the responsibility of the Faculty of Graduate Studies to distribute the thesis to all of the examiners.

Responsibilities of the Examiners

Internal Examiners:

Each internal examiner (except the candidate's advisor), within one month of the receipt of the thesis, shall submit to the Dean of the Faculty of Graduate Studies a written report giving an evaluation of the thesis, noting its merits, deficiencies (if any) and, if appropriate, revisions. The report shall contain a statement as to whether or not the student may now proceed to the oral examination. The thesis shall be placed into one of the following categories:

1. The thesis represents a distinct contribution to the candidate's field of research and it is acceptable as it stands (or with minor revisions to either content, structure, or writing style. (The thesis has **not** received final approval, but the candidate **may proceed** to their oral examination).
2. The thesis has merit since it makes a contribution to the candidate's field; however, there are research-related concerns that have the potential to be dispelled in the oral examination. The structure and writing are acceptable or require only minor revisions. (The thesis has **not** received final approval, but the candidate **may proceed** to their oral examination).
3. The thesis has some merit, but it is not acceptable in its current state since it requires major revisions to one or more of its core components, viz., research content, structure, and writing style. (The candidate has **failed** attempt and cannot proceed to the oral examination.)
4. The thesis is unacceptable with respect to its core components, viz., research content, structure, and writing style. (The candidate has **failed** attempt and cannot proceed to the oral examination.)

Note:

1. The placing of the thesis into category (1) or (2) above does not mean that the thesis has received final approval.
2. The placing of the thesis into either category (3) or (4) constitutes a failure.

External Examiners:

The Dean of the Faculty of Graduate Studies will request the external examiner to give a detailed report on the merits and deficiencies of the thesis as well as an overall evaluation. The external examiner shall be asked to report on his/her findings in the same categories as those used by the internal examiners. The advisor and the student must submit a declaration to the Faculty of Graduate Studies that neither party has performed collaborative research work with the external examiner within the last five years.

The external examiner is requested to present the report to the Dean of Graduate Studies within one month of the receipt of the thesis. Adequate time must be allowed for the transmission of the thesis and the receipt of the report.

The attendance of the external examiner at the candidate's oral examination is encouraged, but is not required.

Note: If the external examiner is not going to be present at the examination, the Dean of the Faculty of Graduate Studies will request him/her to submit questions and the expected answers to the questions to be posed to the candidate at the time of the examination. Normally, the Chair of the Examining Committee will pose the questions to the candidate and the candidate will not receive the questions prior to the examination.

Approval For Advancement to the Oral Examination

The Faculty of Graduate Studies must receive all examiners' reports (internal and external) at least two weeks prior to the intended date of the oral examination.

Guidelines For Advancement to the Oral Examination

When considering the candidate's advancement to the final oral examination, the committee of internal examiners shall use the following guidelines:

1. If all the reports place the thesis in category (1) or (2), advancement to the oral examination shall be automatic. The Dean of the Faculty of Graduate Studies shall send copies of all category (1) or (2) reports to each of the internal thesis examiners and the Department Head. Two copies of all the reports are sent to the Advisor who shall provide one copy to the student.
2. If one or more of the reports place the thesis in category (3) or (4), the Dean of Graduate Studies shall send copies of all the reports to each of the internal thesis examiners and the Department Head. Two copies of all the reports are sent to the Advisor who shall provide one copy to the student. The committee of internal examiners should strive to provide the advisor and the candidate with specific advice about the nature and scope of the revisions required and any other pertinent matters (such as the time that should elapse before the thesis will be accepted for reconsideration).
3. In the unlikely event that the internal examiners judge an unfavourable report by an external examiner to be unwarranted, they may recommend, through the head of the major department, that the Dean of Graduate Studies submit the thesis to a second external examiner.

Requirements Prior to Oral Examination

Scheduling

The examination will normally be held at either the University of Manitoba Fort Garry or Bannatyne Campus. Exceptions must have the unanimous agreement of all committee members. Normally, the oral examination shall be open to all members of The University of Manitoba community and shall be held at The University of Manitoba. In exceptional cases the final oral examination may be closed, for example when the results of the thesis research must be kept confidential for a period of time. In such cases, the advisory committee and Department head shall recommend such action to the Dean of Graduate Studies who may then approve that

the final oral examination be closed to all but the examining committee and the Dean of Graduate Studies (or designate).

Student Information

At least two weeks prior to the oral examination, the student must submit to the Faculty of Graduate Studies the following information:

Biographical Data – outstanding points in career, awards, etc.

List of degrees obtained – where and when

List of the student's publications

The exact title of the thesis

An abstract of the thesis (not more than 350 words)

Note: The above documentation should be submitted in electronic form.

Notice of Examination

Except in the case of a closed examination and provided the information is received in sufficient time to meet publication deadlines, a notice of the student's oral examination will be posted on The University of Manitoba website. In addition, memoranda will be distributed by the Faculty of Graduate Studies to the department concerned. Note that students and faculty members who are not members of the examining committee are invited and encouraged to attend oral examinations but are not permitted to participate in the formal questioning.

Oral Examination

A student must pass an oral examination on the subject of the thesis and matters relating thereto before he/she may obtain the Ph.D. degree. An oral examination committee consisting of not fewer than four persons shall conduct the examination. One of these shall be the Dean of Graduate Studies or his/her representative who shall be Chair. The other members shall normally be the thesis examiners. It is expected that all internal members of the examining committee be present at the defense.

Format of the Examination

The first part of the oral examination shall consist of an oral presentation by the candidate to include a summary of the salient points of the research within a time span of 25 to 30 minutes. This is followed by the questioning and examination of the candidate by the examination committee, that is normally about one and one-half hours but in no case longer than two hours.

The Chair may exercise discretion in inviting questions from guests.

Procedures For The Conduct of The Examination

Before the candidate and guests are admitted to the examination room, the Chair should discuss the examination procedures with the examiners.

The Chair will introduce the candidate and request him/her to give a concise (25 to 30 minutes) oral presentation of the thesis to include a summary of the problems studied, the results and the conclusions.

Following the presentation, the Chair will invite questions from each member of the examining committee, taking care to ensure that each examiner has approximately equal time for questions. Normally, the question period should not exceed one and one-half hours.

It is the responsibility of the Chair to pose questions raised by the external examiner (if not in attendance).

The Chair may exercise his/her discretion in allowing questions from guests following completion of the formal examination.

Note: Once assuming the role of Chair, s/he foregoes the right to comment on the merits of the thesis whether or not s/he is an expert in the field.

Decision of the committee:

Following completion of the formal examination, the candidate and spectators are required to withdraw from the examination room. The examiners will consider their report and will also determine the nature of and procedures for approval of any revisions that will be required prior to submission of the thesis. The committee may exercise its discretion on such matters as who must approve the required revisions, time limits for completion, the necessity for a second oral examination, and any other such matters. It shall be the responsibility of a designated member of the oral examination committee (normally the advisor) to ensure that all such revisions are completed before the copies of the thesis are submitted to the Faculty of Graduate Studies. The candidate will be recommended for the Ph.D. degree upon receipt by the Faculty of Graduate Studies of favourable results of the thesis examining committee and when the corrected copy of the electronic version of the thesis is submitted to MSpace and corrected copy of the paper version of the thesis is submitted to the Faculty of Graduate Studies, providing all other degree requirements have been satisfied.

Report of the committee:

The final judgement of the examiners on the thesis and the oral examination shall be reported to the Dean of the Faculty of Graduate Studies on the "Final Oral Examination of the Ph.D. Thesis" form. An approved verdict must be unanimous, and each examiner must indicate, by his/her signature, concurrence with the verdict. In the case of a failure for the thesis at the Ph.D. level a detailed written report will be prepared by the Chair and made available to the candidate and also submitted to the Faculty of Graduate Studies.

Note: A student will be required to withdraw when the Ph.D. thesis has been rejected twice at the stage where:

- a) The examining committee reports on the merits of the written thesis;
- b) The defense; or
- c) A combination of both stages.

5.3 Publication and Circulation of Thesis,

Every graduate student registering in a Ph.D. program at the University of Manitoba shall be advised that as a condition of being awarded the degree, he/she will be required:

1. To grant a license of partial copyright to the University and to the Library and Archives Canada for any thesis submitted as part of the degree program.

Note: This license makes the thesis available for further research only. Publication for commercial purposes remains the sole right of the author.

2. To provide a copy of the abstract for Dissertation Abstracts International and to authorize publication of the abstract in that publication. The forms and conditions pertaining to these license agreements are available at the Faculty of Graduate Studies Office. This and other related regulations may give rise to important questions of law and students may need additional legal advice on the copyright laws of Canada and/or other countries. Students who wish to obtain legal advice concerning their subsequent rights are advised to do so prior to signing the agreement. Signing the license agreements is normally done after the contents of the

thesis have been delineated and the importance of copyright and/or patents fully comprehended. Publication in the above manner does not preclude further publication of the thesis or any part of it in a journal or in a book. In this case, acknowledgement should be made that the work was originally part of a thesis at The University of Manitoba.

Note:

Copyright - Copyright in theses and practica is protected in international copyright law. A copyright symbol © or (c) is incorporated on a page containing statements of permission to microfilm and to lend copies of the thesis or practicum. After completion, this page should be inserted in the thesis/practicum immediately following the title page. Blank copies of this page are available from the Faculty of Graduate Studies Office.

Patents – Refer to the section “Policy of Withholding Theses Pending Patent Applications” in this Guide.

Restriction of theses for publication - In exceptional cases not covered by the regulation concerning patents, where adequate cause can be shown to delay publication, the student may request the Dean of Graduate Studies to restrict access, for a period up to one year after submission, of the digital and unbound paper versions of a thesis submitted to The University of Manitoba. The Dean, in consultation with the student’s advisor, shall determine for what period, if any, access will be so restricted.

Library and Archives Canada – A microfiche of the thesis is forwarded to the Library and Archives Canada and is listed in a monthly and annual national bibliography, ‘Canadiana’, which is published by the National Library.

SECTION 6: Policy of Withholding Thesis Pending a Patent Application
SECTION 6: Policy of Withholding Thesis Pending Patent Applications Content, In 1970 the Board of Governors and Senate approved a policy on accepting research grants from outside agencies. This policy defined the right of agencies to defer release of information and thus ensure freedom of publications for research findings of University personnel. Occasionally, the University may also wish to restrict the release of a thesis pending patent application. This policy statement parallels the previous one in that it defines the right of the University to defer the release of a thesis and thus ensures freedom of publication for the research findings of a graduate student.

This situation may arise in two circumstances which are defined below and both of which are governed by the same set of regulations.

When a research project is known to contain patentable items as defined in the research contract, then it is the responsibility of the advisor to give written information of the restrictions on publication to the student prior to the start of the thesis research. If the student agrees to carry out the research, then the regulations given below will apply.

Where a patentable item is found during the course of research, then the advisor and the student may make application for patent rights through the University Patent Committee, and the following regulations will apply concerning the release of the thesis.

Regulations Concerning Release of a Thesis During Application and Negotiation For Patents

The Dean of the Faculty of Graduate Studies will receive the approved thesis and copies of it as required by the Faculty regulations. On written joint request of the advisor and the student, the Dean will keep the thesis and copies of it in his/her office for a period up to one year.

For further information, reference should be made to the thesis copyright license.

SECTION 7: Extension of Time to Complete Program of Study

SECTION 7: Extension of Time to Complete Program of Study Content, All requests for extensions will normally be dealt with administratively and reported, in summary form, to the Executive Committee of Graduate Studies for information. Requests for an extension are reviewed by the Faculty of Graduate Studies on a case by case basis. The extension time requested must closely reflect the time required to complete the program. More than one extension period may be considered, but the total time for all extensions will not normally exceed two years. Requests for extension must be accompanied by a realistic timeline that has been agreed upon by the student and supervisor and endorsed by the Department Head. Students granted extensions may be asked to enrol full-time during the period of the extension and may also be required to meet contingencies or carry out remedial work to be associated with the extension. The student must complete the "Request for Extension" form and submit it to his/her major department for recommendation to the Faculty of Graduate Studies at least four months prior to the deadline date for completion of program requirements.

SECTION 8: Leave of Absence

SECTION 8: Leave of Absence Content, Regular Leave

A regular leave is intended to allow students to meet family, travel or employment responsibilities or plans and circumstances not covered by the parental or exceptional leaves. At the request of a graduate student, the head of the student’s department may recommend to the Dean of Graduate Studies that a student be granted a leave of absence for a period of time not to exceed one year. While on leave of absence, a student would not be expected to maintain study and/or thesis research work. Students on regular leave of absences will be required to maintain continuous registration and pay the appropriate continuing fee. If a student has program tuition fees (as opposed to continuing fees) owing at the time of the granting of the leave, the tuition fees will be deferred until the student returns from leave, however, the continuing fee will be levied.* A regular leave of absence status does not extend the time limits as outlined in the Faculty regulations.

***Program Fees:** The continuing fee in effect at the time of the granting of the leave will be levied. However, if the student returns from leave in January, the normal tuition fee will be levied less the continuing fee already paid.

Exceptional Leave

In exceptional circumstances for medical or compassionate reasons (e.g. the need to care for an ailing relative), at the request of the graduate student, the head of the student’s department may recommend to the Dean of the Faculty of Graduate Studies that a student be granted an exceptional leave of absence for a period of time not to exceed one year. While on leave of absence for exceptional reasons, a student is not permitted to maintain study and/or thesis research work, would not be required to maintain continuous registration, nor pay tuition fees. In addition, the leave period would not be included in the time period allowed for the completion of the degree. This leave is not intended to cover circumstances related to travel, employment or other financial concerns.

Fees: Students are not expected to pay fees for the term in which they have been granted an exceptional leave. Upon return from the exceptional leave students will be assessed fees as determined by the Registrar’s Office.

Parental Leave

A graduate student who is bearing a child or who has primary responsibility of the care of an infant or young child immediately following a birth or adoption of a child is eligible for parental leave. The request should be made through the student’s department, normally for a leave of four to twelve months. Leaves of other duration will be considered on an individual basis. Parental leaves must correspond with (an) academic term(s). While on leave of absence for parental reasons, a student is not permitted to maintain study and/or thesis research work. The leave period is not included in the time period allowed for completion of the degree.

Fees: Students are not expected to pay fees for the term in which they have been granted a parental leave. Upon return from the parental leave students will be assessed fees as determined by the Registrar's Office.

Note: At the time of approval of an application for leave, the procedures for the return of the student to the department at the completion of the leave must be stipulated.

Awards and Leave of Absence

Students granted exceptional or parental leave would retain the full value of a University of Manitoba Graduate Fellowship or other award whose terms and conditions are established by the Faculty of Graduate Studies. Such an award will be suspended at the onset of the leave and reinstated at the termination of the leave period (4 to 12 months) provided that the student returns to full time study at that time.

Note: Other awards will be paid according to the conditions established by the donor or granting agency.

Graduate Student Vacation Entitlement

Students are entitled to three weeks vacation throughout a 12-month period.

SECTION 9: Appeals – Procedures And Guidelines

SECTION 9: Appeals – Procedures And Guidelines Content, General

Students who disagree with a decision have access to the appeal routes as laid out by the various Faculty of Graduate Studies and University of Manitoba appeal processes.

There are several areas of appeal which are open to graduate students: academic; discipline; admission; and administration (e.g. Fee appeals). You may refer to this section of the Faculty of Graduate Studies Academic Guide and the University of Manitoba Governing Documents (http://umanitoba.ca/admin/governance/governing_documents/index.html).

The Executive Committee of the Faculty of Graduate Studies, through its Appeal Panel by delegation from the Faculty of Graduate Studies Council, is empowered to deal with student appeals from departmental recommendations or Faculty of Graduate Studies actions, provided the departmental appeal process has dealt with the matter. These student appeals should be directed to the Dean of Graduate Studies. A decision of the Faculty of Graduate Studies Appeal Panel is appealable only to the Senate Committee on Appeals.

For students registered in Joint Master's Programs (University of Manitoba and University of Winnipeg) there is a different process for handling appeals and academic dishonesty cases than for University of Manitoba students in regular programs (not Joint Programs). This process is outlined in the Joint Master's Program Governing Documents.

Academic Appeals

In terms of qualifying examinations, candidacy examinations, thesis examinations, and any other academic matters, departments make recommendations for action to the Faculty of Graduate Studies. In the first instance, any appeal of a department's recommended action should be handled through the departmental appeal process, which is outlined in the department's supplementary regulations. Appeals stemming from departmental actions on academic matters (e.g., failure in a course) will be heard by the Faculty of Graduate Studies Appeal Panel only after they have been dealt with by the appropriate departmental-level appeal process. The Appeal Panel will handle an appeal of Faculty of Graduate Studies actions.

These student appeals should be directed to the Dean of the Faculty of Graduate Studies within the appropriate timelines. A decision of the Appeal Panel is appealable only to the Senate Committee on Appeals (see University of Manitoba Governing Documents: Students: Policy: Academic Appeals Procedures and Guidelines).

Consideration of an Academic Appeal

The hearing panel shall consider an appeal:

Only if the grounds for the appeal stem from an examining committee or departmental action and only after an appeal has been heard by the body responsible for appeals in the department concerned (unless the action being appealed is one taken by the Faculty of Graduate Studies). This is understood to include decisions taken by individuals or committees acting in the name of a department of the Faculty of Graduate Studies and also to the supplementary regulations pertinent to a department's operation which have been approved by the Faculty of Graduate Studies;

If there is some evidence that a department or faculty regulation has been unfairly or improperly applied;

There is apparent conflict between Faculty of Graduate Studies' policy and a department regulation; and/or

Other circumstances that warrant special consideration.

Note: It shall be the responsibility of the appellant to indicate clearly and specifically the grounds warranting consideration of the appeal.

When a hearing panel determines that there are insufficient grounds to proceed with an appeal hearing it shall report its reasons to the Dean of Graduate Studies.

Academic Appeal Deadlines

General: An appeal of action taken by any department or administrative unit, committee, administrator or faculty member within the Faculty of Graduate Studies must be sent by the student to the Dean of Graduate Studies within 15 working days of the date when the student was informed in writing of the action to be appealed.

Appeal of Term Work: Students are encouraged to discuss matters relating to grading of term work with their instructor in the first instance. Further appeals of grades on academic term work shall be directed, by the appellant, to the department responsible for the course within 10 working days after the grades for term work have been communicated to students. Following receipt of the appropriate appeal form and evidence of payment of the refundable appeal fee, the department shall consider the appeal and provide a decision within 15 working days.

Appeals To Senate: As per the University of Manitoba Governing Documents: Students: Policy: Appeals Procedures and Guidelines (Procedures: 4.), "Appeals to the Senate Committee on Appeals shall be filed with the University Secretary within twenty (20) working days after the mailing of the notice of decision from which the appeal is made. The Chair of the Senate Committee on Appeals shall have discretion to extend this deadline if he/she determines that there are special circumstances which justify or excuse the delay."

Discipline Appeals

The specific jurisdiction of each of the Disciplinary Authorities is outlined in: University of Manitoba Governing Documents: Students: Bylaw: Student Discipline. See 2.3.3: Table 1: Jurisdiction of Disciplinary Authorities.

When the appeal is against a disciplinary decision made by the Faculty of Graduate Studies, the appeal routes and procedures as outlined in the following shall prevail: University of Manitoba Governing Documents: Students: Procedures: Student Discipline.

If the appeal is from a decision of the Dean of the Faculty of Graduate Studies the appeal statement shall be delivered to the Dean of the Faculty of Graduate Studies on behalf of the Local Discipline Committee (L.D.C.)

If the appeal is from a decision of the L.D.C., the official statement shall be delivered to the Secretary of the University Discipline Committee (U.D.C.) with a copy to the Dean of the Faculty of Graduate Studies.

Discipline Appeal Deadlines:

If a student wishes to appeal a decision to any group or body, the notice of appeal must be delivered in writing to the appropriate person(s) **within ten working days** of the student being notified of the decision from which the student intends to appeal.

Appeal of Violation/Penalty:

As per section 2.7.2 of the University of Manitoba Governing Documents: Students: Procedures: Student Discipline,

The Student shall clearly indicate in the notice of appeal whether they are appealing the decision on:

- (a) the finding of facts;
- (b) the disposition determined by the disciplinary authority; or
- (c) both (a) and (b).

Limitations on Appeal Rights

Students who disagree with a decision have access to the appeal routes as laid out by the various Faculty of Graduate Studies and University of Manitoba appeal procedures. Student appeals may be limited by the scope of the inquiry available at each level and category of appeal, as well as the time limitations for submission of appeals.

A further limitation is that the Faculty of Graduate Studies rules and regulations, established to uphold the academic rigour of the University of Manitoba, are generally not subject to appeal unless an appeal route is otherwise stipulated. In situations where no appeal route is available, a student may make a written request to the Dean.

Procedures

Academic:

All appeals shall be submitted in written form to the Dean of Graduate Studies. The Dean may, on consideration, attempt first to reach an informal solution. If that is judged by the Dean to be inappropriate or unfeasible, a hearing panel will be formed. Hearings shall be held in closed session unless at least one party requests an open hearing and all parties to the appeal agree to the request.

The Dean shall inform the appropriate Department head of the nature of the appeal, forward a copy of the student's written submission, and request a written response to the appeal **within ten working days**. A hearing panel will be struck and a meeting set by the Dean of Graduate Studies as soon as possible after receipt of the written response from the department.

The appellant shall receive, through the Dean of Graduate Studies, the response of the department at least one week prior to the date set for the hearing of the appeal. Notices of the hearing shall be sent by the Dean of Graduate Studies to the individuals affected, giving the specific time and place for a hearing.

All documentation that the hearing panel will consider shall be made available through the Dean of Graduate Studies Office to both the student and the Department Head in advance of the meeting. No additional materials may be presented at the time of the hearing. In the case where a request is made to submit additional materials, the Chair shall postpone the hearing and allow no more than **ten working days** for the other party to respond to the new materials.

Each petitioner and appropriate Department Head (and/or delegate) shall have the right to appear before the hearing panel and to call witnesses that he/she wishes to appear before the panel. It is the responsibility of the party calling witnesses to ensure that the witnesses are informed of the date and time of the hearing. The Dean of Graduate Studies shall be notified not less than four working days prior to the hearing of the names of all witnesses that are to be called.

The student shall be advised by the Dean of Graduate Studies of the right to appear in person or to be represented by the Student Advocate or a fellow student or other full-time member of the University community not receiving payment for appearing, or working for legal aid. In addition, if the student wishes, one member of his/her immediate family, and a lawyer, may be present, but only as observers who do not participate. At least four working days prior to the hearing, the Dean of Graduate Studies must be notified of any persons to be accompanying the appellant.

Both appellant (and/or representative) and Department Head (and/or representative) are entitled to cross-examination of any and all witnesses.

All members of a hearing panel shall participate in all of the deliberations essential for the determination of the matter in dispute. If, in the course of hearing an appeal, a member is not present at the commencement of the hearing or a member cannot continue, the panel may elect to proceed in the absence of that member. If more than one member is not present at the commencement or cannot continue, the hearing panel must adjourn.

As a first item of business in dealing with any appeal, the hearing panel shall consider (in closed session):

Whether there are sufficient grounds to proceed with the appeal hearing, any requests it has received to hold an open session, and if so, determine what parts of the hearing shall be open.

Normally the appellant and the Department Head and/or their representatives will be present during the presentation of the other's case. During the hearing, the appellant or the Department head may request a change in the open or closed nature of the hearing, at which time the hearing panel shall determine its procedures.

The hearing panel may request the appellant or any other parties to appear or provide additional information in a particular case before reaching a decision.

All parts of the meeting required to deliberate or determine resolution of the appeal shall be held in camera.

The Dean of Graduate Studies shall inform, in writing, the appellant and the Department Head concerned of the disposition of the appeal, the reasons for the decision, and of whatever action may result. The further right of appeal to the Senate Committee on Appeals should be indicated, along with any appropriate time limits.

Disqualification:

Any member of the Appeal Panel shall be disqualified from hearing an appeal who: Is a faculty member or a student in the department (school or faculty) in which the appellant is registered; or Was, as an individual, or as a member of a committee or board, responsible for making the decision being appealed.

Other Appeals

Discipline:

Please refer to University of Manitoba Governing Documents: Students: Procedures: Student Discipline

Admission Appeals:

Please refer to University of Manitoba Governing Documents: Students: Policy: Admission Appeals Procedures and Guidelines.

Fee Appeals:

Please refer to the Registrar's Office webpage on fee appeals: <http://umanitoba.ca/student/records/fees/830.htm>. To initiate the Fee Appeal procedure, the student completes a Fee Appeal form, available online or in the Registrar's Office, 400 University Centre.

Grade Appeals:

Please refer to the Registrar's Office webpage on grade appeals: http://umanitoba.ca/student/records/exams_grades_hub.html. To initiate the Grade Appeal procedure, the student completes a Grade Appeal form, available online or in the Registrar's Office, 400 University Centre.

Assistance with Appeals

The Office of Student Advocacy, 519 University Centre, provides information and assistance to students regarding all appeal processes. It is strongly recommended that students contact the Office of Student Advocacy to assist them.

Programs

Agribusiness and Agricultural Economics

Agribusiness and Agricultural Economics, Agribusiness Program Information, The Department of Agribusiness and Agricultural Economics offers graduate instruction leading to the M.Sc. degree. The Ph.D. program is offered through the Economics Department, with students electing an Agricultural Economics field of specialization. The purpose of graduate training in Agribusiness and Agricultural Economics is to develop competence in solving real world problems relating to food production, policy, risk management, marketing, finance, international trade, resources, international development, agribusiness management, and the environment.

Students undertaking graduate studies in Agribusiness and Agricultural Economics may specialize in one of the above areas of research.

Research Facilities

The department has excellent computer facilities, support staff and offices for graduate students.

M.Sc. in Agribusiness and Agricultural Economics,

Admission

Applicants must possess the equivalent of the B.Sc. degree in Agribusiness or a four-year degree from the University of Manitoba, or any other degree which provides an equally strong basis for a graduate program in the department. If the applicant has deficiencies of more than 12 credit hours, a requirement may be to successfully complete a pre-Master's program before being admitted to a regular graduate program. Please contact the Department for details.

The following courses, or their equivalents, are prerequisites to the graduate program and indicate the scope and level of training required for admission:

1) MATH 1310 Matrices for Management and Social Sciences (or any equivalent course in linear algebra, e.g. MATH 1300)

and

MATH 1520 Introductory Calculus for Management and Social Sciences (or any equivalent course in calculus, e.g. MATH 1500)

(or the former MATH 1680 Mathematics for Agriculture and Related Sciences)

2) Microeconomic Analysis 1 (ECON 2450 regular or ECON 2700 Honours)

3) Macroeconomic Analysis 1 (ECON 2470 regular or ECON 2800 Honours)

4) Introduction to Econometrics (e.g. ABIZ 3080)

The following courses are not a requirement, but may be recommended:

Microeconomic Analysis 2 (ECON 2460 regular or ECON 3700 Honours)

Macroeconomic Analysis 2 (ECON 2480 regular or ECON 3800 Honours)

Intermediate Econometrics (e.g. ABIZ 4120)

ECON 6040 Survey of Mathematical Topics for Economics is highly recommended, and will normally be taken in late summer/early fall at the beginning of the Graduate program.

Application Deadlines

The Department of Agribusiness and Agricultural Economics allows students to begin their M.Sc. program on either 1 September or 1 January. For admission to either of these start dates, Canadian and U.S. students should send their applications with complete supporting documents to the Faculty of Graduate Studies by June 1 or October 1 respectively. International students should send their applications with complete supporting documents to the Faculty of Graduate Studies by March 1 or July 1 respectively.

Program Requirements

Two programs of study are available:

Program 1:

The thesis option entails a minimum of 18 credit hours consisting of:

Courses	Credit Hours
Microeconomics, normally ECON 7722 (or the former ECON 7720), or	3-6
ABIZ 7950 (or the former ABIZ 7100) <i>plus</i> ABIZ 7940* Quantitative Methods, which could include approved courses in Econometrics, Management Science or Statistics	3
*Electives prescribed by major advisor in consultation with the student, normally at 7000 level	9-12
Total Credit Hours	18
*With the major advisor's permission, ECON 3700 may be used in conjunction with either ABIZ 7950 (or the former ABIZ 7100) or ABIZ 7940 to meet the Microeconomics requirement. Another 12 units of electives are required if just	

ECON 7722 is chosen (and 9 units of electives are required if one of the other combinations is chosen).

Every candidate must complete an acceptable thesis and pass an oral examination based primarily on the thesis.

All students in the M.Sc. thesis program are required to present two graduate seminars open to the public. The first presentation shall be on the thesis proposal paper. The second presentation will be on their completed research.

Program 2

The comprehensive option normally entails a minimum of 27 credit hours consisting of:

Courses	Credit Hours
Microeconomics, normally ECON 7722 (or the former ECON 7720), <i>or</i>	3-6
ABIZ 7950 (or the former ABIZ 7100) <i>plus</i> ABIZ 7940*	
Quantitative Methods, which could include approved courses in Econometrics, Management Science or Statistics	3
*Electives prescribed by major advisor in consultation with the student, normally at 7000 level	18-21
Total Credit Hours	27
*With the major advisor's permission, ECON 3700 may be used in conjunction with either ABIZ 7950 (or the former ABIZ 7100) or ABIZ 7940 to meet the Microeconomics requirement. Another 21 units of electives are required if just ECON 7722 is chosen (and 18 units of electives are required if one of the other combinations is chosen).	

In addition to the coursework for the comprehensive option, one research paper will be assigned, supervised, and evaluated by a committee of three, consisting of two members from the Department of Agribusiness and Agricultural Economics and one member from outside the Department, with the student's advisor acting as chair. Upon satisfactory completion of all the coursework and the research paper, the student must pass a comprehensive oral examination. The student will be held responsible in the comprehensive oral examination for knowledge and understanding of the questions relating to the student's program of study and the research paper.

Specialization in business management in agriculture is available under the comprehensive option for a selected number of qualified students. These students are required to take at least 12 units of courses within the Asper School of Business/Faculty of Management at the 6000 or 7000 level.

Second language reading requirement: none

Expected time to graduation: two years

Ph.D. in Economics with a research specialization in Agribusiness and Agricultural Economics*.

*A Ph.D. is offered by the Department of Economics with the cooperation of the Department of Agribusiness and Agricultural Economics, with students electing an Agricultural Economics field of specialization.

Admission

1) Except as provided in 2) below, applicants for admission to the Ph.D. program must have completed the entrance requirements and the program requirements of an M.A. degree in Economics or Agricultural Economics equivalent to that awarded by the University of Manitoba.

2) In exceptional cases, applications may be considered from students who have completed an Honours degree in Economics or Agricultural Economics equivalent

to that awarded by the University of Manitoba. In such cases, the applicant will be required to fulfil, in addition to the requirements below, all course work requirements for the M.A. degree by comprehensive examination option.

Application Deadlines

Students intending to begin a Ph.D. in Economics with a research specialization in Agricultural Economics will begin their program in the fall. Please note that the Department of Economics does not normally accept students in the January session, as the required Math and Theory courses start in the fall. Canadian and U.S. students should send their applications with complete supporting documents to the Faculty of Graduate Studies by May 1. International students should send their applications with complete supporting documents to the Faculty of Graduate Studies by January 15.

Field in Agricultural Economics

Students electing a research specialization in Agricultural Economics are required to complete the Agricultural Economics field examination, as one of the two required fields of concentration. Other students in Economics may also take this exam.

The following courses are recommended in preparing for this exam: Advanced Agricultural Demand Analysis (ABIZ 7950) - *or* the former Advanced Agricultural Marketing (ABIZ 7100) - *and* Production Economics (ABIZ 7940). Students are also advised to complete a graduate course in econometrics. In addition a set of extra readings (on seminal applications of marketing and production theory in agriculture) will be made available by the Department Graduate Advisory Committee (DGAC) in Agribusiness and Agricultural Economics to students intending to write this field.

If either of the recommended courses has not been offered during the student's Ph.D. program, then a brief directed studies course under Agricultural Economics (AE) supervision will be arranged to assist the student in the subject area. DGAC will choose members of AE to grade the examinations (both written and oral).

Second language reading requirement: none

Expected time to graduation: four years

Not all courses are offered every year. Please check the Aurora catalogue to find out when a course is offered.

https://aurora.umanitoba.ca/banprod/bwckctlg.p_disp_dyn_ctlg

<http://crscalprod1.cc.umanitoba.ca/AgribusinessandAgriculturalEconomics.catx>

Course Descriptions

ABIZ 7110 Attributes of Market Organization (Formerly 061.711) Analysis of agricultural market structure, conduct and performance of processing industries.

ABIZ 7140 Resource Efficiency and Allocation in Agriculture (Formerly 061.714) Seminar on research issues in production economics related to technological change, risk and uncertainty, management and firm growth.

ABIZ 7230 Agricultural Market Regulation (Formerly 061.723) A review of economic theories of regulation and their application in agricultural marketing. Analysis of specific regulation in agricultural markets.

ABIZ 7240 Research in Agricultural Marketing (Formerly 061.724) Advanced economic theory and quantitative techniques relevant to agricultural marketing. Topics include model building, market demand and

supply, market regulation, and review of literature on marketing research.

ABIZ 7250 Econometric Models and Methods
(Formerly 061.725) Logical foundation of econometrics, model building, econometric methods and problems encountered in specification, estimation, verification, and prediction.

ABIZ 7270 Research Methodology
(Formerly 061.727) Critical discussion of scientific methodology and the scientific status of agricultural economics. Discussion of methodological issues as they relate to the research process in agricultural economics.

ABIZ 7300 Topics in Agricultural Economics
(Formerly 061.730) Application of economic analysis to contemporary problems in agriculture.

ABIZ 7310 Agricultural Economic Development
(Formerly 061.731) Theory and policy of agricultural development in underdeveloped countries: problems of stimulating growth in agriculture and evaluation of alternative approaches to economic development of agriculture. Prerequisite: consent of instructor.

ABIZ 7330 Transportation Economics and Research
(Formerly 061.733) Rate determination and cost analysis for different modes of transportation; transportation issues in Canadian agriculture; and research techniques in transportation problems. Prerequisite: consent of instructor.

ABIZ 7350 Regional Development
(Formerly 061.735) Review policy, goals, theories, methods and applications relevant to analyzing Canadian and developing country rural development, regional economic growth and project evaluation.

ABIZ 7360 Current Issues in Policies Relating to Agriculture
(Formerly 061.736) Seminar dealing with current issues in policies relating to agriculture.

ABIZ 7370 Concepts of Agribusiness
(Formerly 061.737) Analysis of interrelationships within agricultural sector and between agricultural and nonagricultural sectors.

ABIZ 7380 Agricultural Policy
(Formerly 061.738) Bearing of economic theory on agricultural policy: relevance of allocative efficiency, distributive equity and other criteria, and economic evaluation of alternative policies.

ABIZ 7390 Applied Optimization
(Formerly 061.739) Application of linear and non-linear programming techniques to Agricultural Economics research. Emphasis on interpretation of conditions which ensure optimality for programming techniques. Prerequisites: ABIZ 2520 (or 061.252) or SCM 2150 (or 164.2150) or 027.215.

ABIZ 7400 Forecasting and Simulation Models
(Formerly 061.740) Application of simulation modelling to characterizing and predicting the behaviour of complex systems (ecological, engineering and economic). Foundations of simulation and statistical approaches to analysis are emphasized.

ABIZ 7410 Agricultural Finance
(Formerly 061.741) Analysis of financial structure and goal criteria of agricultural firms, analysis of financial markets and institutions, evaluation and application of techniques in risk analysis, investment analysis, financial analysis, and growth and evaluation models.

ABIZ 7430 Advanced Theory of Resource Economics
(Formerly 061.743) Economic theory of the development and management of natural resources. Application of capital theory, investment theory, the theory of externalities and decision-making theories to resource utilization and management. A strong background in microeconomics is required. Also offered as ECON 7430 by the Department of Economics.

ABIZ 7460 Research Management
(Formerly 061.746) Application of research management concepts in agriculture and the resource sectors. Research definitions and methodology; the macro environment
Graduate Studies

in relation to research (social and grantor priorities, economic and institutional constraints, institution and project (micro) level (priorities, objectives, budgeting, time and personnel management, performance assessment): proposal and report writing; project evaluation.

ABIZ 7630 Theory of International Trade
(Formerly 061.763) Theories of trade flow; trade and income distribution; economic growth and changes in trade flows; instruments of trade intervention; international labour and capital movements; and economic integration. Also offered as ECON 7630 by the Department of Economics. Students may not hold with the former 061.728

ABIZ 7940 Production Economics
(Formerly 061.794) Development of static microeconomic theories of the firm, functional forms, aggregation issues, productivity analysis, risk and uncertainty, and an introduction to dynamics. The following are emphasized; a rigorous treatment of the models using duality; a critical understanding of the limitations and possibilities for generalizing the models; and relevance of the models for empirical research, especially in agriculture. Also offered as ECON 7940 by the Department of Economics. Students may not hold credit with the former 018.793 or 061.713.

ABIZ 7950 Advanced Agricultural Demand Analysis
Critical evaluation of economic theory as applied to agricultural demand. Topics include demand systems; equilibrium; product transformation over time, place and form; and price analysis. Also offered as ECON 7950 by the Department of Economics. Not to be held with ECON 7950 or the former ABIZ 7100 or the former ECON 7900.

Animal Science

Animal Science,
Program Info Animal Science,
The department offers graduate programs leading to the M.Sc. and Ph.D. degrees in behaviour, genetics, nutrition or physiology of farm animals. Research programs serve the animal industries by the application of basic sciences to current problems in the industry. Advanced training in the Department of Animal Science prepares M.Sc. and Ph.D. graduates for positions in animal industry organizations, government and academic institutions.

Graduate programs in the Department of Animal Science may encompass a range of activities, and students should expect to receive experience in laboratory analysis, experimental design and analysis, and work with animals, depending on the research project. Research programs will frequently involve collaborative work with other Departments at the University of Manitoba, or with industry or government partners. The Department also participates in the Inter-departmental Ph.D. program in Food and Nutritional Sciences. There is a strong international orientation to graduate studies in the Department of Animal Science since many students are from outside Canada.

Fields of Research

Research conducted in the Department of Animal Science includes: basic and applied nutrition, including functional feeds; gut microbiology; molecular biology; physiology, behaviour and health; functional foods; animal production systems; and genetics. Experimental species include cattle (beef and dairy), poultry (chickens, turkeys, duck, geese), sheep, swine, laboratory animals (mice, rats, rabbits) and wildlife animals. Studies may involve feed and food safety and toxicology. Research activities in the Department of Animal Science are supported with funds from a variety of government organizations including the National Sciences and Engineering Research Council (NSERC), national and international industry bodies, as well as Provincial commodity groups.

Research Facilities

Extensive facilities for all animal and poultry research are available. The Animal Science Building contains spacious and well-equipped laboratories, classrooms and graduate student offices. New animal research facilities are available on campus for all species. Research programs in dairy cattle, beef cattle and swine also utilize facilities at the 525 hectare Glenlea Research station, located 23 km from campus which includes the National Centre for Livestock and the Environment.

M.Sc. in Animal Science, Admission

Applicants normally require a Bachelor of Science in Agriculture degree with a major in Animal Science; however students with other degrees (e.g., B.Sc. Honours or General) may be accepted. In these latter instances students, depending on their academic background, may be required to complete a pre-Master's program or to register for courses additional to those normally required in the Master's program. Please contact the Department for details.

Application Deadlines

Students may begin their program on either September 1, January 1, May 1 or July 1. For admission on each of these start dates, Canadian and U.S. students should send their applications with complete supporting documentation to the Faculty of Graduate Studies no less than four (4) months before the intended start date. International students should send their applications with complete supporting documentation to the Faculty of Graduate Studies for screening so that the department may receive the application no less than seven (7) months before the intended start date.

Program Requirements

Program A:

Coursework and Thesis Requirements

- A minimum of 12 credit hours of coursework in addition to ANSC 7140.
- A minimum of 6 credit hours at 700/7000 level in the major subject.
- A minimum of 3 credit hours in an ancillary subject.
- Thesis and oral examination.

Program B:

Coursework and Comprehensive Examination Requirements

- A minimum of 30 credit hours in coursework, in addition to ANSC 7140.
- 12-18 credit hours in the major subject at the 700/7000 level.
- 6-12 credit hours in an ancillary subject(s).
- Comprehensive examination.

Second language requirement: none

Expected time to graduation: two years

Ph.D. in Animal Science, Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

Application Deadlines

Students may begin their program on either September 1, January 1, May 1 or July 1. For admission on each of these start dates, Canadian and U.S. students should send their applications with complete supporting documentation to the Faculty of Graduate Studies no less than four (4) months before the intended start date. International students should send their applications with complete supporting documentation to the Faculty of Graduate Studies for screening so that the department may receive the application no less than seven (7) months before the intended start date.

Program Requirements

Minimum Program requirements are outlined in the Graduate Studies Regulations Section of this Calendar.

In addition, Ph.D. students must take ANSC 7390 "Advanced Animal Science Seminar".

Interdepartmental Ph.D. Program

Requirements for the Interdepartmental Ph.D. program in Food and Nutritional Sciences are given in the section entitled "Interdisciplinary Programs and Courses" (Section 34.2).

Second language reading requirement: none

Expected time to graduation: three years if continuing from an M.Sc. program

Page URL,
<http://crscalprod1.cc.umanitoba.ca/AnimalScience.catx>

Course Descriptions

ANSC 7140 Animal Science Seminar
(Formerly 035.714) Reports and discussions on current problems and investigational work with mammals and poultry. This course is graded pass/fail.

ANSC 7220 Genetic Principles of Animal Improvement
(Formerly 035.722) Designed for the development of a framework of theory for the study of the genetics of populations. Changing gene frequency. Genetic and environmental subdivision of the phenotypic variance. Principles of selection. Prerequisite: ANSC 3500 (or 035.350) or the former 035.310 or equivalent.

ANSC 7360 Advanced Reproductive Physiology, Male
(Formerly 035.736) A lecture-seminar course on sexual function and testicular physiology in males of livestock species; environmental factors influencing reproductive efficiency; recent developments in semen preservation and artificial insemination. Offered in 2005-2006 and alternate years thereafter.

ANSC 7370 Advanced Reproductive Physiology, Female
(Formerly 035.737) A lecture-seminar on current topics related to female reproduction in the livestock species. Offered in 2006-2007 and alternate years thereafter.

ANSC 7380 Endocrine Control of Animal Metabolism
(Formerly 035.738) A lecture-seminar course on current topics concerning the control of physiological processes of -importance in domestic animal species. Offered in 2005-2006 and alternate years thereafter.

ANSC 7390 Advanced Animal Science Seminar
(Formerly 035.739) Ph.D. Candidates are expected to complete a grant application form, review and critique current literature, and present a seminar on current research topics. This course is graded pass/fail.

ANSC 7400 Quantitative Genetics in Animal Science
(Formerly 035.740) A study of advanced techniques used in animal breeding research, their theoretical basis, analysis and interpretation. Case studies in the student's area of interest will be examined. Prerequisite ANSC 7220 (or 035.722) or its equivalent.

ANSC 7440 Protein Nutrition and Metabolism
(Formerly 035.744) Lectures and critical reviews will be used to discuss recent/significant research advances in the fields of protein nutrition and metabolism, pertinent to mammalian physiology. Also offered as HNSC 7440 by the Department of Human Nutritional Sciences. Not to be held with the former 035.735.

Offered in 2007-2008 and alternate years thereafter.

ANSC 7450 Energy and Carbohydrate Nutrition and Metabolism (Formerly 035.745) Lectures and critical reviews will be used to discuss recent/significant research advances in the field of energy/carbohydrate nutrition and metabolism, pertinent to mammalian physiology. Also offered as HNSC 7450 by the Department of Human Nutritional Sciences. Not to be held with the former 035.717. Offered in 2007-2008 and alternate years thereafter.

ANSC 7460 Lipid Nutrition and Metabolism (Formerly 035.746) Lectures and critical reviews will be used to discuss recent/significant research advances in the field of lipid nutrition and metabolism, pertinent to mammalian physiology. Also offered as HNSC 7460 by the Department of Human Nutritional Sciences. Offered in 2006-2007 and alternate years thereafter.

ANSC 7470 Vitamin Nutrition and Metabolism (Formerly 035.747) Lectures and critical reviews will be used to discuss recent/significant research advances in the field of vitamin nutrition and metabolism, pertinent to mammalian physiology. Also offered as HNSC 7470 by the Department of Human Nutritional Sciences. Not to be held with the former 035.734. Offered in 2006-2007 and alternate years thereafter.

ANSC 7480 Mineral and Trace Element Nutrition and Metabolism (Formerly 035.748) Lectures and critical reviews will be used to discuss recent/significant research advances in the field of mineral nutrition and metabolism, pertinent to mammalian physiology. Also offered as HNSC 7480 by the Department of Human Nutritional Sciences. Not to be held with the former 035.734. Offered in 2006-2007 and alternate years thereafter.

ANSC 7490 Phytochemical Nutrition and Metabolism (Formerly 035.749) Lectures and critical reviews will be used to discuss recent/significant research advances in the field of phytochemical nutrition and metabolism, pertinent to mammalian physiology. Also offered as HNSC 7490 by the Department of Human Nutritional Sciences. Offered in 2007-2008 and alternate years thereafter.

ANSC 7500 Methodology in Agricultural and Food Sciences (Formerly 035.750) The application of experimental techniques and procedures to agricultural and food sciences research. Recording, processing, interpretation, and critical appraisal of experimental data.

ANSC 7510 Special Topics in Animal Nutrition (Formerly 035.751) Students will be required to investigate and report on a nutrition problem in a species other than that of their thesis research. Projects may be avian, bovine, ovine, swine or laboratory animal species.

ANSC 7520 Special Topics in Animal Improvement (Formerly 035.752) Assigned readings, papers and discussions specific problems in animal genetics. Analysis of original data may be required.

ANSC 7530 Special Topics in Animal Physiology (Formerly 035.753) Students will investigate a minor research problem in an area of physiology other than that in which the major is being taken. Problems areas may include: digestion, environment, renal function or reproduction.

ANSC 7540 Advanced Applied Animal Nutrition (Formerly 035.754) An advanced study of the theoretical and applied aspects of monogastric and ruminant nutrition. A laboratory component will provide training in current techniques in feed analyses and computer modeling. Offered in 2005-2006 and alternate years thereafter.

ANSC 7550 Special Topics in Animal Behaviour and Welfare (Formerly 035.755) Assigned readings, papers and discussions on specific issues in animal behaviour. A short behavioural experiment may be required.

ANSC 7560 Mathematical Modeling of Agricultural Systems Lectures and computer based laboratory exercises will be used to discuss various aspects of model development focusing on mechanistic (compartmental analysis), growth functions and an introduction to linear programming. Construction of a simulation model may be required. Not to be held with ANSC. 4240 Mathematical Modeling of Biological Systems. Prerequisite: MATH 1500 or MATH 1520

Anthropology

Anthropology ,
Anthropology Grad Program Info,
The department offers programs leading to the Master of Arts and the Doctor of Philosophy degrees. There are 40-50 graduate students in the department.

Graduates work in universities and colleges as professors or specialists, in the Foreign Service, in health related institutions, in museums, in education, in government heritage positions, for the International Development Research Centre, and in counselling for Native municipal boards. Others have chosen to be free-lance anthropologists; some have incorporated their own successful companies.

Fields of Research

The department's research focus, and consequent graduate training and undergraduate teaching emphasis, lies in the following:

Sociocultural Anthropology: Culture and political economy, cultural production, ecology, migration, global political economy, gender and development, symbolic anthropology, media, tourism, kinship, nationalism, education, youth culture, conflict, sexuality, and applied anthropology. Aboriginal Canada, Canada, India, South America, West Africa, China, Eastern Europe and the former Soviet Union.

Archaeology: Theory, analytic methods, environmental archaeology, zooarchaeology, lithics, settlement patterns, domestication, hunter/fisher/gatherers, historic and fur trade archaeology. Western and Northern Canada, Eastern Europe, South Africa, Near East.

Biological Anthropology: Skeletal biology, medical anthropology, demography, palaeodemography, historical epidemiology, palaeopathology, growth and development, infectious disease, reproductive behaviour, 3D imaging, gender and health, colonialism and health.

Research Facilities

The Department of Anthropology is located in the Arts Faculty Complex. Laboratory facilities for archaeology and physical anthropology, the C. Thomas Shay Archaeobotanical Collection and the Bioanthropology Digital Image Analysis Laboratory, housed in the Duff Roblin Building, permit advanced study and research. Computer facilities are housed in the department and the Anthropology Laboratory. The University Library system has a collection of anthropological material, including the Human Relations Area Files. The department has a specialized publication series (UMAP). Faculty and students also use the Provincial Archives, the Hudson's Bay Company Archives, and the Manitoba Museum.

M.A. in Anthropology ,
Admission

In addition to the minimum admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar, an advanced (four year) degree in Anthropology is the normal preparation for the M.A. program. Students with a different background will normally take a year of pre-M.A. studies consisting of up to 18 hours of courses from the undergraduate, and especially the Advanced, curriculum.

Admission Deadlines

Canadian/U.S. and international students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 9 months prior to their intended start date.

Program Requirements

In addition to the minimum course requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, students must

complete a minimum number of 18 credit hours of graduate coursework, including at least 12 credit hours of Anthropology courses at the 700/7000 level. Finally students must submit an acceptable thesis and pass a thesis oral examination.

Second Language Reading Requirement: None

Expected Time to Graduate: 2 Years

Ph.D. in Anthropology, Admission

All requirements for the M.A. degree must be completed. Preference will be given to applicants who have demonstrated independent research competence at the Master of Arts level.

Admission Deadlines

Canadian/U.S. and international students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 9 months prior to their intended start date.

Program Requirements

In addition to the minimum course requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar, students must complete 18 credit hours above the M.A. level, including at least 15 credit hours of Anthropology courses at the 700/7000 level.

Second language requirement: yes

Expected time to graduation: 4 years

Page URL,
<http://crscalprod1.cc.umanitoba.ca/Anthropology.catx>

Anthropology Course Descriptions

ANTH 7040 Seminar in Ethnography of Power Systems
(Formerly 076.704) Comparative study of a particular theme or problem in political anthropology.

ANTH 7050 Seminar in the Anthropology of Religion
(Formerly 076.705) An intensive analysis of religion as a cultural subsystem, dealing comparatively with ideologies, rituals, and ceremonies and the various anthropological theories put forward to explain religious behaviour.

ANTH 7070 Seminar in the Anthropology of Illness
(Formerly 076.707) Selected topics in the study of cultural factors involved in health/illness, with emphasis upon a particular cultural system. As the course content will vary from year to year, students may take this course more than once for credit.

ANTH 7130 Cultural Ecology
(Formerly 076.713) An examination of the systematic nature of culture and its interrelationships with natural environmental factors.

ANTH 7140 Ethnographic Research Methods
(Formerly 076.714) Approaches and techniques in field research.

ANTH 7350 Prehistoric Human Ecology
(Formerly 076.735) Data and techniques involved in the reconstruction of past environments, with special emphasis on the influences of environment on prehistoric cultural development.

ANTH 7380 Archaeological Laboratory Techniques
(Formerly 076.738) Laboratory techniques for analysis and presentation of archaeological data.

ANTH 7400 Seminar in the Archaeology of a Selected Area
(Formerly 076.740) An intensive survey of the archaeology of a major region or culture area of the world. Content will vary according to the interests of the instructor. As the course content will vary from year to year, students may take this course more than once for credit.

ANTH 7410 Seminar in Selected Topics in Archaeology
(Formerly 076.741) The seminars will consist of an intensive examination of major methodological, analytical and interpretive issues in current archaeological research. Content will vary according to the interests of the instructor. As the course content will vary from year to year, students may take this course more than once for credit.

ANTH 7430 Archaeological Interpretive Methods
(Formerly 076.743) This course is an intensive seminar on major methodological issues in archaeological analysis and interpretation.

ANTH 7440 Archaeological Theory
(Formerly 076.744) Archaeological theory as seen from historical and contemporary perspectives.

ANTH 7450 Cultural Resource Management
(Formerly 076.745) An intensive examination of archaeological cultural resource management. Emphasis will be placed on current Canadian CRM issues and on practical applications of concepts and methods.

ANTH 7460 Advanced Faunal Analysis in Archaeology
(Formerly 076.746) The course will cover the major theoretical, methodological, and practical issues in the analysis of archaeological faunal remains. Topics are addressed through lectures, demonstrations, and laboratory exercises. Prerequisite: ANTH 3990 (or 076.399) or written consent of instructor.

ANTH 7630 History of Anthropological Theory
(Formerly 076.763) A broad overview of the history of anthropological theory and method from the 18th century to World War II. Focus on British and American developments in the context of the rise of industrialization and imperialism.

ANTH 7640 Contemporary Anthropological Theory
(Formerly 076.764) Investigation, comparison and evaluation of contemporary approaches to culture theory in the areas of symbolism, social organization and ecology.

ANTH 7650 Applied Anthropology
(Formerly 076.765) Investigation of major case studies, research methodologies, intervention strategies, and substantive areas of application in applied anthropology. Topical emphases such as economic development, health care delivery, resettlement schemes, will reflect the interests of the instructor.

ANTH 7720 Seminar in Human Adaptability
(Formerly 076.772) An intensive study of human population biology in diverse environments inhabited by human populations. Emphasis on selected examples of cultural adaptability as a specifically human mechanism for dissipating stress on the biological system.

ANTH 7790 Advanced Topics in Human Skeletal Biology
(Formerly 076.779) Analysis of metric and nonmetric morphological skeletal variation in human populations, with emphasis on the cultural and physical environment. Exemplary problems are drawn from the literature as well as from current research.

ANTH 7820 Ethnology of a Selected Area
(Formerly 076.782) Comparative and theoretical investigation of the social and cultural institutions of a particular cultural region. The area selected will depend upon the interests of the instructor. As the course content will vary from year to year, students may take this course more than once for credit.

ANTH 7830 Social Organization
(Formerly 076.783) Selected theories of social organization in cross cultural perspective. Subject matter may include kinship, age grading, territorial groupings,

social stratification or ethnicity.

ANTH 7900 Problems in Ethnological Research
(Formerly 076.790) Problems in ethnological research. As the course content will vary from year to year, students may take this course more than once for credit.

ANTH 7930 Special Problems in Human Biology
(Formerly 076.793) Special problems in Human Biology. As the course content will vary from year to year, students may take this course more than once for credit.

ANTH 7940 Graduate Reading and Research 1
(Formerly 076.794) Reading and research. As the course content will vary from year to year, students may take this course more than once for credit.

ANTH 7950 Graduate Reading and Research 2
(Formerly 076.795) Reading and research. As the course content will vary from year to year, students may take this course more than once for credit.

Applied Health Sciences

Applied Health Sciences Multi-unit Ph.D. ,
Program Description Applied Health Sciences,
This program is a multi-unit, research-based Ph.D. in Applied Health Sciences. The four participating academic units are: Human Ecology, Kinesiology and Recreation Management, Nursing, and Medical Rehabilitation. The program offered is a unique and timely Ph.D. program, which includes the treatment and discussion at a graduate level of applied health science as a multi-dimensional entity, while at the same time allows for individualized high-quality health science research with an individual researcher, or small group of researchers. The program combines the strengths of the in-depth discipline specific learning needed to prepare Ph.D. graduates, with the benefits of collaborative learning with students and faculty in other disciplines. In particular, knowledge commonly used by several disciplines can be explored and critiqued as sources of theoretical and practical knowledge. The participation of faculty and students from several disciplines in the exploration and use of knowledge will enhance students' capacity for critical appraisal of the sources and uses of knowledge.

Admission

Applicants must meet the University of Manitoba Graduate Studies general regulations for admission.

Applicants must possess a research-based Master's degree in a discipline or profession consistent with Applied Health Sciences. Applications from other disciplines will be considered on a case-by-case basis.

Prior to admission to the Ph.D. program, applicants will be required to specify his/her area of research interest, and to have corresponded with (an) eligible Ph.D. advisor(s) (member of the Faculty of Graduate Studies), who is (are) a faculty member of one of the four participating units, and who is (are) willing to accept them into the program.

Elements taken into consideration in determining the acceptance of the applicant into the program: grade-point average in Master's courses, previous courses taken, specific research interest of the applicant, student's rationale for choosing to apply to this program as opposed to a uni-discipline degree, current profile of students in the program, research funding and facilities availability through the proposed advisor(s) for the proposed research, and financial support for the applicant.

No admission tests are required for this program.

Application Procedures

Applications (and all required documentation) must be submitted directly to the Faculty of Graduate Studies, University of Manitoba, 500 University Centre, Winnipeg, MB R3T 2N2.

A completed application will include:

(a) a completed Faculty of Graduate Studies official application for admission form, together with the application fee and supporting documentation.

(b) a list of academic awards, publications and/or any research or other relevant experience.

(c) at least two letters of recommendation, including one from the student's intended Ph.D. advisor, attesting to the suitability of the candidate for Ph.D. studies in this program, and agreeing to accept them should they be admitted into the program; and one from the student's Master's degree advisor. One additional letter of recommendation may also be appended.

(d) a letter explaining the student's rationale for choosing to apply to this program.

In addition:

(e) a Supervisor Data form to be completed by the intended Ph.D. advisor providing information such as grant support, supervisory record, publication record, etc. This form should be submitted directly to the AHS PhD Program. Contact the AHS program assistant for information ahs_phd@umanitoba.ca.

It is the applicant's responsibility to ensure that all required documentation is received by the department in advance of the deadline.

Incomplete applications will not be considered.

Application Deadlines

Applications (Canadian/US/International) will be accepted up to and including March 1 of each year. Applications will normally be accepted for the regular session only (September start-date). Applications for a January start-date will be considered on a case-by-case basis.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar.

The course-work requirement will consist of a minimum of twelve credits of 7000-level course-work consisting of at least three credits from any two of the four partners (6 credits).

Students will also be required to take the course "AHS 7000: Research and Practice in Applied Health Sciences", a lecture/seminar course in which faculty members from the four academic partners will participate (3 credits). Regular attendance is expected of all students.

The remaining three credit hours can be chosen from a combination of graduate courses from the four partners or from other faculties outside the four participating Faculties/Schools that offer graduate courses related to applied health sciences (3 credits).

Students in the program will also be required to take part in a monthly seminar in Applied Health Sciences with mandatory attendance for two years (Year 1: AHS 7002 Seminar I in Applied Health Sciences; Year 2: AHS 7004 Seminar II in Applied Health Sciences) and is a requirement for graduation. Students will also be required to take part in yearly research-related activities (poster day, oral presentation day, etc.) involving student presentations. The monthly seminars will consist of an admixture of presenters from the University of Manitoba and from outside, with the focus on applied health science issues. Poster and oral presentations will involve directed research projects, research proposals, and applied health sciences issues.

Students will be expected to complete a candidacy exam, consisting of an oral and written component, normally before the end of the second year of their program.

The student must pass the written and oral phases of the exam to be considered a candidate for the Ph.D. degree.

The student's thesis research proposal must be approved by the Advisory Committee normally before the end of the 2nd year after admission to the program. The research proposal, in the form of a document outlining the rationale and background for the study, specific objectives, and methods and procedures will be presented by the candidate in an oral format. Following the oral presentation, the candidate will defend their proposal.

The research program, culminating in the preparation and defense of a doctoral thesis, will be conducted according to the regulations of the Faculty of Graduate Studies of the University of Manitoba.

Second language reading requirement: None

Expected time to graduation: Four years

<http://crscalprod1.cc.umanitoba.ca/AppliedHealthSciences.catx>

Applied Health Sciences Course Descriptions

AHS 7000 Research and Practice in Applied Health Sciences

The objective is to promote in students advanced knowledge, skills, and abilities needed to evaluate and conduct multidisciplinary, applied health research. This course is theoretical in nature and will require a high level of independence and participation by students.

AHS 7002 Seminar I Applied Health Sciences

A monthly interdisciplinary seminar on current issues in applied health sciences, involving presentation by students, faculty, and invited speakers from inside and outside the University of Manitoba. Attendance and participation are required for AHS students during the first year of their doctoral program.

AHS 7004 Seminar II Applied Health Sciences

A monthly interdisciplinary seminar on current issues in applied health sciences, involving presentation by students, faculty, and invited speakers from inside and outside the University of Manitoba. Attendance and participation are required for AHS students during the second year of their doctoral program.

Architecture ,

Architecture Grad Program Information,

Application Deadline

January 15 for all Canadian/US and International applicants.

September admissions only.

Introduction

Architecture deals with a complex intertwining of artistic, social, cultural and practical concerns. The M.Arch. program provides students with the opportunity to learn the tools to synthesize these issues and develop the conceptual, practical and formal skills to take command of the subject. Much of the study is research based with an emphasis on structured learning through finding out, rather than prescriptive instruction. The program offers a diverse range of research areas and offers a choice of studios and seminars for M.Arch. students. All of our highly motivated professors are engaged in active research and/or practice. Rather than having an emphasis on either the conceptual or practical side of architecture, our program concentrates on the relationship between the two, with many studios undertaking various forms of critical making as part of their teaching. Many of the studios run study trips abroad.

The department offers a lively environment to study the subject with diverse studios, history and theory seminars as well as innovative and engaging technology courses. An international array of lecturers augments the internal lecture program. The series combines world famous architects, artists and designers with emerging young talents. The Faculty of Architecture also runs an exceptional exhibition program.

Program Information

There are different ways to become eligible to apply for the graduate Master of Architecture Program.

1. Master of Architecture Direct Entry

All applicants must meet the general admission and entrance requirements of the Faculty of Graduate Studies. The entry level into the program will be determined by the Department of Architecture Admission Committee's evaluation of the individual's application and supporting documents. Direct admissions to the graduate Master's degree program requires applicants to have a minimum of an honours four-year undergraduate degree in one of the following: Architecture, Architectural Design, Architectural Science, Environmental Design/Architecture option, or the equivalent, from a recognized college or university, with minimum GPA of 3.0 or equivalent B in the last two full years (60 credit hours) of study.

For those applying from the undergraduate University of Manitoba Bachelor of Environmental Design degree a minimum of "C+" in courses [EVAR 4002](#), [EVAR 4004](#), [EVAR 4008](#), [EVAR 4010](#) with a minimum GPA of 3.0 in the last two full years (60 credit hours) of study is required.

Please refer to the following for **Master Information and Application Package**:

http://umanitoba.ca/faculties/architecture/media/AR_2010sep27_MastersAdmissionGuidelines.pdf

2. Architecture Master's Preparation (AMP 1 & AMP 2) Undergraduate Program

This program is for applicants who have a recognized three or four year undergraduate degree in either a non-design discipline (such as Fine Art, Engineering, Science, Philosophy, Theatre, Psychology, Music, Film, English, History, Art History, Urban Studies, Geography, Commerce, etc

OR

a design-related discipline (such as Interior Design, Landscape Architecture, Industrial Design, etc.) and wish to eventually apply to the graduate Master of Architecture Program.

General Eligibility: All applicants must meet the general admission and entrance requirements set by the Department of Architecture. The entry level into the program will be determined by the Department of Architecture Admissions

Committee's evaluation of the individual's application and supporting documents.

Architecture Masters Preparation One (AMP 1): (For those with a background in one of the following: Fine Art, Industrial Design, Engineering, Science, Philosophy, Theatre, Psychology, Music, Film, English, History, Art History, Urban Studies, Geography, Commerce, etc.) For applicants who have little or no formal design education with a minimum three-year undergraduate bachelors degree in any disciplinary field from a recognized college or university. A minimum GPA of 3.0 or equivalent B in the last two full years (60 credit hours) of study is required. Upon successful completion of this two-year program students will be eligible to receive an Environmental Design undergraduate degree.

Architecture Masters Preparation Two (AMP 2): (For those with a background in one of the following: Interior Design, Interior Architecture or Landscape Architecture) For applicants who already have a three or four-year undergraduate bachelors degree in a design- of-the-environment related field from a recognized college or university. A minimum GPA of 3.0 or equivalent B in the last two full years (60 credit hours) of study is required. These applicants are considered on a case-by-case basis for placement into the second and final year of the undergraduate Architecture Masters Preparation undergraduate Program but will be ineligible to receive the Environmental Design degree.

NOTE: Upon successful completion of the Architecture Master's Preparation undergraduate Program (AMP 1 & AMP 2), students who wish to continue into the Master of Architecture Program must officially apply for graduate admissions. Evaluation is based on the student's progress in either the one or two-year Architecture Masters Preparation Program, as evidenced in a portfolio submission, GPA and a Faculty of Graduate Studies application.

Please refer to the following for Architecture Master's Preparation (AMP) Information and Application Package:

http://www.umanitoba.ca/faculties/architecture/media/AR_2010sep27_AMP_AppPkgInfoBulletin.pdf

Research Facility

The Centre for Architectural Structures and Technology is an architectural research laboratory that embraces both the poetic and technical dimensions of architectural design. The work of C.A.S.T. seeks new boundaries for creative thought, design, and building technology. We do this work through physical explorations of materials, tools and building methods, the study of natural law, and the free play of imagination.

<http://umanitoba.ca/faculties/architecture/cast/>

Ph.D.

A Ph.D. in Design and Planning is offered.

<http://umanitoba.ca/faculties/architecture/programs/Phd/index.html>

Accreditation

Our graduate program received a full six-year accreditation in 2009.

In Canada, all provincial associations recommend a degree from an accredited professional degree program as a prerequisite for licensure. The Canadian Architectural Certification Board (CACB), which is the sole agency authorized to accredit Canadian professional degree programmes in architecture, recognizes two types of accredited degrees: the Bachelor of Architecture and the Master of Architecture. A programme may be granted a six-year, three-year, or two-year term of accreditation, depending on its degree of conformance with established educational standards. Masters degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree, which, when earned sequentially, comprise an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

Architecture Course Descriptions

ARCH 7000 Advanced Technology Topics I

One five-week seminar and/or project-based topics offering in-depth study of advanced building systems, technology, and methods. Options are grounded in faculty research and build upon foundation technology courses. Some topics may be deemed mandatory at the department's discretion. Topics may be taken in the fall and/or winter terms.

ARCH 7010 Advanced Technology Topics 2

One five-week seminar and/or project-based topics offering in-depth study of advanced building systems, technology, and methods. Options are grounded in faculty research and build upon foundation technology courses. Some topics may be deemed mandatory at the department's discretion. Topics may be taken in the fall and/or winter terms.

ARCH 7020 Research Topics: History and Theory 1

One five-week lecture, seminar and/or project-based topics offering an in-depth study of an historical and/or theoretical subject. Options are grounded in faculty research and build upon foundation history/theory courses. Some topics may be deemed mandatory at the department's discretion. Topics may be taken in the fall and/or winter terms.

ARCH 7030 Research Topics: History and Theor 2

One five-week lecture, seminar and/or project-based topics offering an in-depth study of an historical and/or theoretical subject. Options are grounded in faculty research and build upon foundation history/theory courses. Some topics may be deemed mandatory at the department's discretion. Topics may be taken in the fall and/or winter terms.

ARCH 7040 Professional Practice

Is concerned with the duties and responsibilities of an architectural practice; its divisions, office organization and administration, in Manitoba and Canada. The lectures relate in scope and standard to current models of practice and their requirements, including issues of building economics and construction cost control.

ARCH 7050 Arch Studio 5 and Comprehensive Program Report

Develop design explorations and seek to clarify relations between architectural criteria and the urban/natural environments in national or international contexts. Conceptual, programmatic, material, technological, economic, and political principles and systems employed are to be evident in the Comp. Prog Report.

ARCH 7060 Arch Studio 6

The previous term's investigations are further developed into a comprehensive architectural design proposal. The thorough integration of design and programming criteria, with building and environmental systems and assemblies are examined.

ARCH 7070 Design Research Studio

This final design studio involves concerted research and design explorations of an individually defined subject of inquiry, within a selected studio thematic focus. These investigations are intended to prepare students for their final Design Thesis.

ARCH 7080 Technology Thesis Report

Technology Thesis Report is an advanced project-based course done in conjunction with the Design Thesis project. The report is related to an individual student's design thesis topic, focusing on specific aspects of technology and applied tech. research. Advisor supervision and external engineering consultancy or agreed equivalent are required.

ARCH 7350 Legal Aspects of Architectural Practice

(Formerly 050.735) discusses the importance of the knowledge of law as it relates to professional practice of architecture, including a discussion of the historical development of legal responsibilities of a practicing professional generally and of architects specifically. There is also discussion of trends in the development of professional responsibility and liability.

Biochemistry and Medical Genetics

Biochemistry and Medical Genetics, Biochem and Medical Genetics Program Info, The Department of Biochemistry and Medical Genetics is the result of a merger of the Department of Human Genetics and the Department of Biochemistry and Molecular Biology in June 1999.

Fields of Research

Work undertaken by faculty members and their trainees is frequently multidisciplinary and crosses many pillars of health research including basic and clinical sciences and population health. Various aspects of the molecular and biochemical basis of Alzheimer's disease, breast cancer, cancer biology, lysosomal storage diseases, cystic fibrosis, diabetes, neuromuscular and cardiovascular diseases are being investigated. Model systems are being created in mouse, *C. elegans*, and *S. cerevisiae*. Areas of research include development, signal transduction, steroid hormone receptor action, chromatin structure, transcription and gene regulation, biosynthesis and transport of membrane proteins, membrane lipid metabolism, arachidonate metabolism. Other areas of research include dysmorphology, the molecular basis of genetic disease, prenatal diagnosis and screening, as well as community genetics. For specifics, please click on our [Faculty info](#) page.

Research facilities

The administrative office and some faculty are housed on the 3rd floor (24,000 square feet) of the Basic Medical Sciences Building located at the Bannatyne Campus of the University. Research resources include preparative and ultracentrifuges, visible and ultraviolet spectrophotometers, spectrofluorometers, luminometers, liquid and gamma scintillation spectrophotometers, high pressure liquid chromatography, radiochromatogram scanners, instruments for gas, liquid, paper and thin-layer chromatography and electrophoresis, phosphoimagers and a variety of modern instruments for molecular biology. The department is well-equipped with bacteria/cell/tissue culture facilities and coldrooms and has access to state-of-the-art transgenic mouse modeling facilities.

Biochemistry & Medical Genetics,
Pre-M.Sc. in Biochemistry and Medical Genetics,

Entrance Requirements

A minimum three-year bachelor's degree with a 3.5 GPA (4.5 scale), or equivalent, in the previous 60 credit hours of university study, or equivalent (normally 2 years). In addition, during this period there should be no grade less than C+ in any biochemistry, genetics, or life science course deemed relevant to the proposed course of study.

M.Sc. in Biochemistry and Medical Genetics,
Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

Entrance Requirements

The applicant must have an appropriate background in biochemistry, genetics, or a closely related subject area, with a minimum 3.5 GPA (4.5 scale), or equivalent, in the previous 60 credit hours of university study, or equivalent (normally 2 years). In addition, during this period there should be no grade less than C+ in any biochemistry, genetics, or life science course deemed relevant to the proposed course of study.

Admission will depend upon the availability of a Faculty Member to supervise the student and resources to support the student's research.

In rare cases, applicants with GPA's lower than 3.5 may be admitted to this department, based upon individual circumstances and the support of their prospective advisors. Students in this situation should consult with their prospective advisor and the Chair of the Graduate Student Admissions Committee.

Program Requirements

Program Requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

Second language reading requirement: none

Expected time to graduate: 2 – 3 years

Ph.D. in Biochemistry and Medical Genetics,
Admission

1) A thesis-based Master's degree (of at least 2 years in duration), or equivalent, in biochemistry, genetics, or a closely related field, from a Canadian university is required for direct admission to the Ph.D. program. In addition, a cumulative GPA of 3.5 (4.5 scale), or equivalent, in the courses taken during the Master's program is required.

Generally, there is no direct entry into the Ph.D. program for students with Master's degrees from non-Canadian universities. Applications will be assessed by the admissions committee on an individual basis; in most cases students with Master's degrees from international universities are admitted into the Master's program in this department. They may subsequently request for a transfer into the Ph.D. program, if eligible, based on the procedures outlined in Section 59.

2) Admission will also depend upon the availability and willingness of a Faculty Member to supervise the student and resources to support the student's research

Program Requirements

Program requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

Second language requirement: none

Expected time to graduation: 4 – 5 years

Direct entry from the Bachelor's degree to the Ph.D. degree in this department would only occur in exceptional circumstances. Prospective students would be expected to have extensive research experience, in addition to an outstanding academic background, to be considered for this route. Once admitted, these students must complete at least 18 credit hours of course work in addition to their thesis research.

Transfer to a Ph.D. program:

Students registered for a Master's degree who has made excellent progress over the first ~20 months in their program may be considered for transfer to the Ph.D. program. The transfer process, as outlined in the BMG Graduate Student Academic Guide, must be completed within 24 months of the student's commencement in the Master's program.

Such transfer will be considered only when:

1. Both the student and the advisor request, in writing, that the student transfers to the Ph.D. program. This request should be made to the Chair of the Graduate Student Affairs Committee.

2. At least 12 credit hours of course work, exclusive of the mandatory 'Research Seminar' course, have been successfully completed (GPA >3.5).

3. The student is able to demonstrate a high potential for success in the Ph.D. program. This will be shown by their research and course work accomplishments to date, as well as their ability to communicate and defend their findings and future plans in both a written and an oral format, as outlined in the BMG Graduate Student Academic Guide.

The Transfer to Ph.D. examining committee will consist of the student's advisory committee and the Chair of the Graduate Student Affairs Committee, or his/her designate, as Chair.

A student can request transfer from the Master's to the Ph.D. program only once. Students who do not transfer may apply to the Ph.D. program after completing their Master's program.

NOTE: Admissions are considered on a case-by-case basis by the Graduate Student Admissions Committee and are based upon transcripts, English proficiency (if required), letters of recommendation, and evidence that the applicant's Master's program was thesis based. Prospective students must have a thesis advisor before they will be considered for admission to the department.

Page URL,
<http://crscalprod1.cc.umanitoba.ca/BiochemistryandMedicalGenetics.catx>

Biochemistry and Medical Genetics Course Descriptions-7000 Level

BGEN 7000 Research Seminar M.Sc.

Consists of presentations of the student's current research. For Masters students only.

BGEN 7020 Proteins

(Formerly 137.702) Three hours per week, one term. Purification, bioinformatics, characterization, expression, structure, folding and engineering of proteins.

BGEN 7030 Enzymology

(Formerly 137.703) Two hours per week, one term. Kinetics and mechanisms of action of enzymes.

BGEN 7040 Seminars in Human Genetics

(Formerly 137.704) Current research topics in human genetics. A term paper and oral presentation will be required of each student.

BGEN 7070 Special Topics in Human Genetics

(Formerly 137.707) An assignment, tutorial and discussions course taken only through consultation with the head of the department. The topics will vary depending upon students' needs and interests, and may include specialized topics not available in regular course offerings.

BGEN 7090 Principles and Practice of Human Genetics

(Formerly 137.709) Lectures, tutorials and assignments designed to review major topics in human genetics and give practical experience in the analysis and interpretation of human genetics data and critical review of published work.

BGEN 7120 Laboratory Methods in Human and Medical Genetics

(Formerly 137.712) A seminar and assignment course covering an outline of the methods currently in use in human and medical genetic diagnostic and research laboratories. The principles of cell culture, cytogenetic, molecular and biochemical genetic techniques that are used in the diagnosis of human genetic disease and the study of human variation will be reviewed. Students will undertake a practical assignment and write a report. Prerequisite: 125.709 or consent of instructor.

BGEN 7130 Genetic Epidemiology of Human Populations

(Formerly 137.713) Lectures, tutorials and assignments to evaluate the etiology, distribution and control of disease in groups of relatives and inherited causes of disease in population. Prerequisite: 125.709 or consent of instructor.

BGEN 7140 Clinical Genetics

(Formerly 137.714) Focus is on clinical application and principles of single gene, multifactorial and teratogenic causes of disease. Students will learn by use of reading assignments, tutorials, computer-assisted diagnostic tools and first hand experience in genetics clinics. Major term paper required. One term. Prerequisite: 125.709 or consent of instructor.

BGEN 7160 Theory and Practice of Genetic Counselling

(Formerly 137.716) Review of general theoretical and practical aspects of genetic counselling. Students will be instructed in interviewing techniques. Case presentations will be reviewed and opportunities to observe and partake in genetic counselling will be provided. Term paper. Prerequisite: 125.709 or consent of instructor.

BGEN 7180 Clinical and Molecular Cytogenetics

(Formerly 137.718) Cytogenetic methodology; chromosome architecture; karyotype interpretation; indications for referral; chromosome syndromes and anomalies; prenatal diagnosis; chromosomal basis of oncogenesis; flow cytometry; immunogenetics; fluorescent in situ hybridization; the application of molecular technology to chromosome analysis. Prerequisite: 125.709 or consent of instructor.

BGEN 7200 Topics in Biochemistry 1

(Formerly 137.720) Advanced study and reading on two topics chosen by the course director in consultation with the student's supervisor. Topics include but are not limited to Neurochemistry, Lipids, Carbohydrates, Biomembranes, Inborn Errors, Cytoskeleton Proteins.

BGEN 7210 Topics in Biochemistry 2

(Formerly 137.721) Advanced study and reading on two topics chosen by the course director in consultation with the student's supervisor. Topics include but are not limited to Neurochemistry, Lipids, Carbohydrates, Biomembranes, Inborn Errors, Cytoskeleton Proteins.

BGEN 7220 Research Seminar

(Formerly 137.722) A one credit pass/fail course. Consists of presentations of the student's current research.

BGEN 7250 Gene Expression

(Formerly 137.725) Three hours per week, one term. Chromatin structure. Structure and function of sequence-specified DNA-binding proteins. Control of transcription.

BGEN 7260 Cellular and Molecular Biochemistry

(Formerly 137.726) Three hours per week, one term. Recent research advances on the study of cellular components, assembly and organization of plasma membrane components, cell signalling, and cell cycle.

Biochemistry and Medical Genetics Course Descriptions-8000 Level

BGEN 8000 Research Seminar Ph.D.

Consists of presentations of the student's current research. For Ph.D. students only.

Biological Sciences

Biological Sciences ,
Biological Sciences Program Information,
BIOLOGICAL SCIENCES

The department offers graduate training leading to Master of Science (M.Sc.) and Doctor of Philosophy (Ph.D.) degrees in a broad range of biological disciplines in both field and laboratory research. Programs in the biological sciences represent a unique concentration of expertise in whole-organisms, and a wide range of research in ecological, environmental, evolutionary, physiological, cellular and molecular sciences.

Expertise in the major plant, animal, and fungal groups in grassland and boreal forest ecosystems are represented in the department: cell and developmental biology, biotechnology, molecular biology and genetics, ecology and conservation biology, vascular and nonvascular plants, fungal and algal biology, physiology, systematics, evolutionary and coevolutionary biology, animal modelling, aquatic biology and aquatic organisms, fisheries, behavioural ecology, parasitology, and muscle biology.

Graduates are equipped to embark on a career in botany, zoology and related fields, including environmental science, natural resource management, agriculture and forestry, fisheries and wildlife management, and biomedical sciences. Former students are successfully employed in research, teaching or administrative positions in academic, industrial or governmental settings, as biological consultants and in biomedical agencies in Canada and around the world.

The department is able to foster an informal atmosphere with good interaction between faculty and graduate students. Students are often successful in Commonwealth, NSERC, CIHR, Faculty of Science, and University of Manitoba Graduate Fellowship and Scholarship competitions.

Fields of Research

Ecology, Evolution and Fisheries:

Fleet dynamics, fisheries management, fish population dynamics, interaction between behaviour and population processes; emphasis on quantitative analysis, mathematical and simulation modelling based upon historical data and field work when appropriate.

Wetland foodweb structure and dynamics, invertebrate grazer-algal interactions; Cladocera ecology, palaeoecology of communities in the littoral zone of lakes, systematics and evolution.

Collaborative multi-species, multi-scale ecosystem examination of search strategies of seabirds for fish; spawning habitat selection by a keystone forage fish.

Molecular systematics, biogeography, and conservation genetics of fish (particularly lampreys and salmonids) and other aquatic organisms (microsporean parasites and dreissenid mussels).

Circumpolar Aboriginal peoples and their domestic economies, hunting and trapping, land use, land claims, and impacts of northern development on their lifestyles.

Evolution of hemoglobin oxygen affinity in mammals in relation to exploitation of aquatic, northern, and subterranean habitats; molecular evolution of beta-globin gene cluster in eutherian mammals; mammalian molecular phylogenetics.

Ecosystem structure and function in freshwater wetlands: ecophysiology and ecotoxicology of benthic and planktonic algae, and aquatic macrophytes; paleolimnology.

Fungal ecology in aquatic and terrestrial ecosystems: saprotrophs and nutrient release, fungi in forest ecosystems.

Economic botany: native plant products and special (non-timber) forest products, and the role of fungal secondary compounds in nature.

Conservation ecology: habitat fragmentation, plant dispersal, effects of disturbance on biodiversity, ecological knowledge and ecosystem management, restoration of plant communities.

Evolutionary biology of plants and fungi: pollination biology, plant-plant interactions and plant-fungal interactions, co-evolution, phylogeny and molecular evolution.

Systematics: molecular, morphological, and phytogeographic studies of flowering plants, conifers, ferns and allies, bryophytes, algae, and fungi.

Applied and theoretical population and community ecology of forest and grassland ecosystems: mathematical and statistical ecology, ecological modelling.

Behavioural Ecology:

Graduate Studies

Comparative and experimental studies addressing factors that contribute to the evolution and maintenance of sociality, and the roles that communication and cognitive abilities play in social species (particularly ground-dwelling squirrels and slave-making ants).

Behavioural and evolutionary interactions between the parasitic cowbirds and their passerine hosts. Cowbird selection of host nests; host quality; nest defence/defense; host tolerance of parasitism; nest placement; consequences of parasitism.

Physiology:

Metabolic, thermal and respiratory physiology of moles and shrews.

Thermal biology, diving physiology and bioenergetics of northern semiaquatic mammals, mainly muskrat and beaver; physiological problems encountered during swimming and diving in cold water; seasonal bioenergetics and nutritional studies of these species.

Endocrine regulation of salt and water balance in fish, particularly the physiological actions of the rennin-angiotensin system, natriuretic peptides and neurohypophysial peptides on cardiovascular, renal and extra-renal function.

Stress physiology in forest ecosystems: plant adaptation to salts, pollutants and anthropogenic disturbance (mining, forestry).

Neurophysiology; regulation of ion channel proteins and electrical activity in neurons of the mammalian central nervous system; neurobiological control of food intake.

Transport physiology; mechanisms of osmoregulatory NaCl transports (salt and water balance) and nitrogen excretion in invertebrates and lower vertebrates; physiologic and molecular responses to ammonia stress.

Parasitology:

Comparative immunology of fish and mammals, particularly mucosal immunity. Host-parasite interactions, including transmission of fish parasites and the role of host immune responses in protection and regulation of parasite populations.

Host-parasite relationships of metazoan parasites of invertebrates. Life history strategies of free-living triclad flatworms. Zoogeography and community ecology of Unionidae.

Cell and Developmental Biology:

Oogenesis, early development and cell differentiation in invertebrates. Origin and fate of germ cells. Cellular mechanisms that regulate oogenesis and the establishment of polarity.

The roles of the cytoskeleton, bioelectrical properties and ions in oogenesis and development using an array of microscopical and electrophysiological techniques.

Early development in zebrafish, specifically the genes and gene interactions involved in early developmental decision-making processes. Genetic control of vertebrate (mainly zebrafish) embryonic development. Gap junction mediated intercellular communication: structure and post-translational modifications of the constituent connexin proteins, the role of specific connexins in the embryonic development of zebrafish, control of connexin gene expression.

Cellular mechanisms directing the formation of tissues and organs, using molecular, cellular, morphological and physiological techniques.

Molecular genetic control of reproduction in insects, with emphasis on mosquitoes; molecular basis of sex determination and sexual differentiation in invertebrates.

Role of RNA interference and microRNAs in regulating gene expression and development. Role of transposable elements as sources of genetic variation and mutation.

Cellular mechanisms directing the normal and pathological physiology of muscular dystrophy and age-related atrophy, muscle satellite cell activation, and impact of disease and regeneration on tissue and animal structure and function including testing of potential treatment modalities, using molecular, cellular, biochemical, morphological, and functional assays.

Plant biotechnology: applied bioremediation, genetic signaling and development, molecular techniques and ecology, plant structural imaging and analysis, proteomics, systematics and genomics, ultrastructural microscopy and microtechniques.

Developmental anatomy and cytology of plant reproductive systems: cytochemistry and ultrastructure

Research facilities

The Department has facilities in the Buller Building, the Duff Roblin Building, and a new "Biological Sciences Building" which was the former Pharmacy Building, on the Fort Garry Campus including an extensive, modern, nationally and internationally recognized herbarium collection (WIN) consisting of a vascular plant collection and a cryptogamic collection. The Department also has special facilities for animal sciences research including a large animal colony for small terrestrial and aquatic animals. Both animal housing and plant growth facilities are operated by trained technical staff with experience and expertise to support research and teaching.

Facilities include greenhouses and growth chambers; a scanning-transmission electron microscope; plant tissue, fungal and algal culturing facilities; research areas fully equipped for study of plant development, ecophysiology and plant interactions; modern instrumentation for molecular, genetics and evolutionary biology studies; interference, fluorescence and transmission electron microscopes; tissue culture; cellular biology investigations; patch-clamping facilities; digital image analysis equipment; quantitative biology; and ecological analysis computerized facilities.

Field station facilities are provided at the Delta Marsh Field Station which provides year-round research facilities and accommodation for biological research in the 17,000 hectare Delta Marsh on the southern shore of Lake Manitoba. Other field station facilities are available to faculty members and their graduate students at Star Lake (Whiteshell Provincial Park), the Experimental Lakes Area (NW Ontario) and the Churchill Northern Studies Centre. The location of the facilities permits work on a variety of prairie, marsh and woodland habitats and on a wide spectrum of inland lakes and rivers, as well as Arctic tundra and marine habitat along the coast of Hudson Bay. The University Field Station, fully equipped with living accommodations and laboratory space, is 80 km away at Delta Marsh on the south shore of Lake Manitoba. Additional field studies are conducted from the Experimental Lakes Area near Kenora, Ontario, in conjunction with the Freshwater Institute, Winnipeg. Broad collaborations with other scientists within and external to the University of Manitoba further enrich the access to training facilities for faculty and graduate students.

M.Sc. Biological Sciences, Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. If a student applies with a three-year general B.Sc. degree or equivalent, a pre-Master's program must be taken which will be individually prescribed. Students with a four-year major or honours degree apply for direct entry into the M.Sc. program. If a student applies with a three-year general B.Sc. degree or equivalent, additional courses and/or a pre-Master's program must be taken to be equivalent to the required four-year degree. Application Deadlines: Applications must be received in the Faculty of Graduate Studies by the following dates.

Session Start Date Canadian/US International Regular September June 1 March 1 Winter January October 1 July 1 Spring May February 1 November 1 Summer July April 1 January 1

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. The program requires completion of a research thesis and course work consisting of a minimum of one core course and one additional BIOL 7000 course. Study and research will extend to a minimum of twelve months. All students must submit a research-based thesis and defend it orally. Please see the department website for supplementary regulations for each of the former departments and for those of the new department the Department of Biological Sciences.

Second language reading requirement: none

Expected time to graduate: two years

Ph.D. Biological Sciences, Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Candidates normally have completed a M.Sc. degree before entering the Ph.D. program; however under certain circumstances transfer from a M.Sc. to Ph.D. program and entry into the Ph.D. without a M.Sc. is possible. Individual qualifications other than these will be considered.

Applications must be received in the Faculty of Graduate Studies by the following dates:

Session Start Date Canadian/US International Regular September June 1 March 1 Winter January October 1 July 1 Spring May February 1 November 1 Summer July April 1 January 1

Program Requirements

Program requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Please see the department website for supplementary regulations for each of the former departments and for those of the new department Department of Biological Sciences.

Second language requirement: none

Expected time to graduation: three four years

Page URL,
<http://crscalprod1.cc.umanitoba.ca/BiologicalSciences.catx>

Course Descriptions Biological Sciences

BIOL 7100 Core Skills in Biological Sciences Research
Learning skills for a career in scientific research in Biological Sciences including: using the scientific method, applying for NSERC funding, maintaining a CV, abstract writing, ethics in research, research protocols and biosafety and biohazards, statistical designs and their assumptions, literature searching, critical thinking, critiquing the scientific literature, making teaching and research presentations. Not to be held with Methodology of Research ANAT 7090.

BIOL 7140 Advanced Physiology
(Formerly ZOO 7140, 022.714) A in-depth study of topics related to how changing internal and external environments influence life sustaining physiological processes.

Topics include plant and animal stress, endocrine & electrophysiology, metabolism and molecular biology of solute transport.

BIOL 7142 Advanced Physiology

An in-depth study of topics selected from physiological research of the department including plant, animal, stress physiology, ecophysiology, electrophysiology, endocrine or neurophysiology and others. Topics will be focused on the research area of each student to acquire specialized knowledge in a particular topic.

BIOL 7202 Evolutionary Biology

An in-depth study of topics selected from research interests within the department that may cover an evolutionary theme. This course will allow students to acquire or expand on specialized knowledge in a particular evolutionary topic through a series of readings or a combination of readings and lectures.

BIOL 7220 Critical Thinking in Biological Sciences

A core graduate level course within the Ph.D. program designed to stimulate discussion and thought in key areas applicable to the student's research discipline.

BIOL 7240 Wetland Ecology

(Formerly BOTN 7240, 001.724) A study of marsh, bog, and fen communities, with emphasis on their history, soil-plant relationships, and species distribution. Field work at the University Field Station (Delta Marsh) and nearby bog and fen sites will be an integral part of the course.

BIOL 7250 Advanced Evolution and Systematics

This course will first consider theoretical and practical aspects of systematics, and then consider how systematic and population-level studies have illuminated our understanding of evolutionary processes.

BIOL 7302 Environmental Biology and Ecology

An in-depth study of topics selected from environment and ecology interests of the department, including population ecology, fisheries biology, plant/animal interactions, animal behaviour, ecosystem dynamics and restoration. Topics will be chosen to acquire specialized knowledge in a particular topic.

BIOL 7352 Aquatic Biology

An in-depth study of topics covering all aspects of aquatic biological interests in the department including wetland ecology, limnology, oceanography, toxicology, conservation, and others. Topics will focus on the research interests of students so they may acquire specialized knowledge in particular areas.

BIOL 7360 Problems in Biological Statistics

(Formerly ZOO 7360, 022.736) The course discusses statistical problems and techniques which specifically apply to biological research. Laboratory exercises will be based primarily on examples from field research. Prerequisite: STAT 3130 (or 005.313 or 005.333) or the consent of the instructor.

BIOL 7370 Special Topics in Algal Ecology

(Formerly BOTN 7370, 001.737) Directed study and project(s) in selected aspects of the ecology of freshwater phytoplankton, periphyton and metaphyton.

BIOL 7440 Methods and Approaches to the Analysis of Biological Data Part 1

(Formerly BOTN 7440, 001.744) Methods for handling biological data arising from field surveys; planning and undertaking biological studies. Theory of experimental design, vegetation sampling, multivariate analysis, techniques of remote sensing, spatial analysis and modeling. Offered in alternate years.

BIOL 7450 Methods and Approaches to the Analysis of Biological Data Part 2

(Formerly BOTN 7450, 001.745) Analysis of complex biological data sets arising from field surveys, vegetation sampling and remote sensing using techniques from Part 1 (BIOL 7440 or BOTN 7440). Offered in alternate years.

BIOL 7502 Cell and Developmental Biology

An advanced topics course which will be an in-depth study of current research topics in cellular and developmental biology. An undergraduate background in cell and developmental biology or related areas is required.

BIOL 7530 Molecular Biology Techniques for Eukaryotes

A techniques-intensive course focusing on the understanding of molecular biology techniques, trouble-shooting problems, writing reproducible Materials and Methods Graduate Studies

for publications, accurate recording of procedures in lab journals, and bioinformatics exercises. Not to be held with the former 001.742 or 001.746 or BOTN 7460.

BIOL 7540 Methods for Analysing Biological Data

A survey of methods and approaches for analysing biological data containing many variables, suitable for graduate students. Offered in alternate years. Not to be held with BIOL 4312 or the former BOTN 7440 or BOTN 4650.

BIOL 7580 Topics in Plant Pathology

(Formerly BOTN 7380, 001.738) Current and specialized aspects of plant pathology studied through lectures, seminars, prescribed readings and laboratory projects. Offered in alternate years. Prerequisite: BIOL 4250 or the former BOTN 4210 or 001.421 or equivalent, or consent of department head.

BIOL 7590 Pathology of Trees and Shrubs

(Formerly BOTN 7390, 001.739) Lectures, seminars and readings focussing on special problems relating to the pathology of woody plants. Emphasis on ornamental shrub, shade tree, and forest tree species of local importance. Offered in alternate years. Prerequisite: BIOL 4250 or the former BOTN 4210 or 001.421 or equivalent, or consent of department head.

BIOL 7600 Topics in Biological Sciences

A general topics course to reflect an in-depth study of current interest topics to extend or acquire specialized knowledge in a particular area of biological interest. A subtitle may be added to the current title to reflect specialized interests.

BIOL 7602 Directed Studies in Biological Sciences

A course to provide a broad knowledge of different topics within Biological Sciences peripheral to the specific topic of the student's thesis and will not become the introductory chapter of the thesis. Students will complete assignments by themselves but will participate and be evaluated as a group.

BIOL 7880 Ecology Project Course

(Formerly BOTN 7880, 001.788, ZOO 7880, 022.788) This course provides experience in the organization and execution of team research into current ecological issues. Teams consist of a graduate student team leader, 3-6 undergraduates, and a faculty advisor. Each project team identifies a specific research question, creates a proposal for answering it, and presents their results in a public forum.

Biosystems Engineering

Biosystems Engineering

Biosystems Engineering Program Information,

The Department of Biosystems Engineering offers graduate programs leading to M.Sc., M.Eng., and Ph.D. degrees. The graduate programs in the department focus on applications of engineering in biological systems. Strong emphasis is placed on assisting graduate students to gain a broad range of skills and experience in conducting interdisciplinary research, in understanding the interrelationships among physical and biological factors, and in written and oral communication.

Fields of Research

Environmental Engineering: Environmental impact assessments of agricultural and food production; biological reduction of wastewater; membrane bioreactor technology; management and utilization of agricultural and food processing wastes; management of livestock manure; biofiltration; environmental odours; protection and remediation of contaminated soil and groundwater; site preparation and selection.

Bio-Processing: Infrared processing of food; superheated steam drying; extraction technologies for complex oil/juice crops; modified atmosphere storage of meat, fruits, and vegetables; fast freezing of fruits; mathematical modelling of food systems; physical, thermal, and rheological properties of foods; water activities of foods; shelf-life, flow of bulk solids; bulk properties of grains and powders.

Biofuels: bioengineering for biofuels; bioreactors; anaerobic digestion of waste for biogas.

Biosensors: bioengineering of methods to detect and monitor biological materials (nucleic acids, proteins, lipids) and/or microorganisms (viruses, bacteria).

Post-Harvest Preservation of Grains: Grain storing and drying systems; computer simulation of stored-grain ecosystems; physical methods of controlling insects and micro-organisms; machine vision for automated handling and classification of grain; properties of grains and oilseeds; expert systems for managing stored products.

Bio-Imaging: Computer analysis of images for grading, orientation, and automation; near-infrared (NIR) spectroscopy; development and application of neural networks.

Power and Machinery: Harvesting and processing of new crops such as hemp; precision agriculture; guidance systems for agricultural machinery; ergonomics of agricultural machinery; assistive technologies for farmers with disabilities; tillage and seeding; soil-machine interaction; equipment for manure handling.

Soil and Water Engineering: Irrigation and drainage systems; flow and contaminant transport in porous media; soil-plant-water relations.

Light-Frame Structures: Structural aspects of light-frame buildings; use of wood and other structural materials; bulk solids storage structures (bins and silos).

Bio-Environment: Animal production environment; plant growth environment; energy conservation in animal and plant production; environments in buildings designed for biological processes.

Research Facilities

Alternative Village: The Alternative Village is an outdoor laboratory that is dedicated to research, testing, and training related to alternative energy technologies and building envelope systems. The centerpiece of the Alternative Village is the Straw-Bale Building, however, there are numerous other small structures including a greenhouse with a heat storage wall. Other equipment includes: universal testing machines; loading frames for structural testing of wood beams, columns, and trusses.

Agricultural Ergonomics Lab: The Agricultural Ergonomics Lab has been developed to research the ergonomic and safety issues associated with agricultural machines. The lab includes: faceLAB eye-tracking system; tractor-driving simulator; pto entanglement test apparatus; sound level meter.

Biofuels, Biotechnology and Fermentation Lab: The research activity within this lab is dedicated to the production of biofuels (ethanol, biodiesel, hydrogen) using various sources of biomass. Current research focuses on understanding genetics of bacteria in order to develop strategies to increase biofuel production. Research equipment includes: bioreactors; ion chromatography system; gas chromatograph, gel electrophoresis apparatus; quantitative PCR system; centrifuges; electroporation equipment.

Bioprocessing Engineering Lab: Processing and drying of food using superheated steam has several advantages over conventional hot-air drying. Mathematical modeling and computer simulation are used to predict and compare the performance of various systems. The lab includes: superheated steam processing drier; texture analyzer; supercritical fluid extraction system; instron machine; satake milling unit; colorimeter, scanning differential calorimeter; aspirator.

Computational Optimization and Geometric Modeling Lab: Computational methods are used to research topics related to biomedical/biological imaging, pattern recognition, spectroscopy, and hyperspectral imaging. The lab includes: Fourier transformed infrared (mid IR) microscope with ATR imaging; chemometric analysis software; finite element modeling (ABACUS).

Grain Storage Research Lab: The Canadian Wheat Board Centre for Grain Storage Research is a 1400 m² state-of-the-art laboratory dedicated to research on grain storage and handling. The facility includes: machine vision equipment; a soft x-ray unit; near-ambient, high temperature, infrared and microwave driers; a fan-testing unit; instrumentation for measuring loads in grain storage structures; equipment to

measure physical, thermal, biological, and quality characteristics of grain and oilseeds; thermal disinfestation systems; environmental chambers; grain handling and cleaning equipment; and several grain bins.

Imaging and Food Quality Assessment Lab: Research conducted in this lab focuses on providing safe and healthy food to humans and livestock. The lab includes: Raman microscope; near-mid infrared hyperspectral imaging system; IR microscope; soxtec fat extractor.

Odour Research Lab: The Odour Research Lab is used to quantify and analyze odour samples, and to evaluate various odour-reduction technologies. Equipment available in the lab includes: olfactometer; electronic nose; Jerome meter; air sampling devices.

Soil Dynamics & Machinery Lab: The Soil Dynamics & Machinery Lab is used to research soil-tool-material interactions associated with tillage machines and processing of agricultural fibres. The lab includes: soil bin; particle flow software.

Soil & Water Engineering Lab: The Soil and Water Engineering Lab is dedicated to the areas of irrigation, drainage, remediation of contaminated soils and groundwater, and instrumentation for soil and water monitoring. The lab includes: Rhizotron for measuring water and nutrient status within the root zone; permeameters; suction cup lysimeters; electrical conductivity meters; electromagnetic field survey instruments; water flow and level sensors; TDR and miniprobos.

Waste Management Lab: The Waste Management Lab is dedicated to research involving livestock waste and municipal wastewater, including movement of nutrients within the environment. The lab includes: pilot-scale portable membrane bioreactor; three complete fermentation systems; water waste sample analysis capacity. A pilot-scale anaerobic digestion facility is located at the Glenlea Research Station.

M.Sc. in Biosystems Engineering, Admission

For admission into the M.Sc. program, applicants are normally required to hold a Bachelor's degree in Biosystems Engineering or equivalent from a recognized university. Applicants with degrees in related areas will be accepted at the discretion of the department head.

Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 3 months prior to their intended start date. International students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 7 months prior to their intended start date.

Program Requirements

Minimum Program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. A minimum of 18 credit hours of coursework is required, which should include: BIOE 7290; other courses in the 7000 series of Biosystems Engineering of not less than three hours of credit; and approved ancillary courses. In addition, a thesis must be submitted based on original research conducted by the student.

Master of Science students are required to spend at least one academic session in full-time resident graduate study. On recommendation of the department head, the residence requirement may be waived in special cases.

Second language reading requirement: none

Expected time to graduate: 18-24 months

**M.Eng. in Biosystems Engineering ,
Admission**

For admission into the M.Eng. program, applicants are normally required to hold a B.Sc.(Eng.) degree. Candidates with degrees in related areas will be accepted at the discretion of the department head.

Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 3 months prior to their intended start date. International students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 7 months prior to their intended start date.

Program Requirements

Minimum Program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. A minimum of 30 credit hours of coursework is required, which should include: a seminar course (BIOE 7290), six hours assigned to an approved project and report; and at least 12 credit hours of 7000 level courses offered by the Faculty of Engineering. An oral presentation of the project to a department examining committee is required.

Second language requirement: none

Expected time to graduate: 12-18 months

**Ph.D. in Biosystems Engineering,
Admission**

Admission to the Ph.D. program normally requires a M.Sc. degree in an area of Engineering, although applicants with degrees in related areas may be accepted at the discretion of the department head. Students making exceptional progress while enrolled in the M.Sc. program may be transferred to the Ph.D. program upon the consent of the department head and based on a recommendation from the student's advisory committee and the Biosystems Engineering Graduate Studies Committee which investigates the student's qualifications and suitability for Ph.D. study. In such cases, the program credit hour requirements shall be decided at the time of the transfer by the student's advisory committee.

Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 3 months prior to their intended start date. International students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 7 months prior to their intended start date.

Program Requirements

Minimum Program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Students are normally required to take a seminar course (BIOE 7270) and expected to meet a requirement of teaching and learning in post-secondary education. The teaching and learning requirement may be met by: completing the CHET program; or completing the teaching workshops in Teaching Techniques, and Course Construction and Organization (15 h each) plus other teaching workshops of at least 15 h duration; or completing teaching workshops of 45 h duration. Teaching workshops are offered each year by the University of Manitoba. The advisory committee for the student must approve the process which will be followed by the student to meet the teaching and learning requirement.

Second language requirement: none

Expected time to graduate: 3 - 4 years

Page URL,

Course Descriptions Biosystems Engineering

BIOE 7040 Fluid Mechanics of Unsaturated Porous Solids (Formerly 034.704) Statics and dynamics of two immiscible fluid phases occupying the voids of porous solids. Concepts include capillary pressure, bubbling pressure, saturation, intrinsic and relative permeability, pore-size distribution indices. Prerequisite: consent of instructor.

BIOE 7110 Grain Storage (Formerly 034.711) A synthesis of major aspects of the storage of grain including: abiotic and biotic characteristics of stored grain bulks, regional variables, grain pressure theories, methods of controlling deterioration, and health hazards. Prerequisite: consent of instructor.

BIOE 7140 Advanced Irrigation and Drainage (Formerly 034.714) Selected advanced problems and new developments in irrigation and drainage. Interrelationships between irrigation and drainage and the environment. Prerequisite: consent of instructor.

BIOE 7160 Instrumentation and Controls (Formerly 034.716) For the non-engineering student. Transducers, circuits and instruments for measuring and recording physical quantities such as temperature, humidity, force, pressure, strain, sound, flow and nuclear radiation. Presentation and interpretation of data. Prerequisite: consent of instructor.

BIOE 7180 Bioprocessing This course allows students with a background in either biological sciences or engineering to gain an understanding of biochemical engineering processes. Topics include production of biofuels, bioplastics, biopharmaceuticals, and processing technologies. This course is also offered in the Department of Microbiology as MBIO 7180. BIOE 7180 is not to be held with MBIO 7180.

BIOE 7200 Bulk Solids Storage and Handling (Formerly 034.720) Fundamental characteristics of bulk solids, bulk solids flow during storage and handling, loads in bulk solids storage and handling systems, mechanical, pneumatic and hydraulic conveying of bulk solids, safety in storage and handling of bulk solids. Prerequisite: consent of instructor.

BIOE 7210 Numerical Modelling of Biosystems (Formerly 034.721) Applications of numerical methods to the solution of problems dealing with biological systems: structure analysis, mechanical behaviour of biological materials, moisture sorption and desorption, cooling and heating of biological materials, and flow through saturated and unsaturated porous media. Solution of transient and non-linear problems. Use of commercial finite element packages for problem solving. Prerequisite: consent of instructor.

BIOE 7220 Advanced Machine Design Analysis for Biosystems (Formerly 034.722) Analysis of machines for use in biosystems with respect to design and functional performance, in-field traction, operator safety and comfort, and energy source, transmission and application. Engineering analyses will be used to study biosystems machinery problems of current and future interest. Prerequisite: consent of instructor.

BIOE 7230 Advanced Topics on Light-Frame Buildings (Formerly 034.723) Structural and environmental design and analysis of light-frame buildings. Topics include: loads in light-frame buildings; frame design; construction management; environmental control in light-frame buildings; and structure-environment interactions. Prerequisite: consent of instructor.

BIOE 7240 Special Problems in Biosystems Engineering (Formerly 034.724) Advanced work in a specialized field involving engineering applications to biological systems. Prerequisite: consent of instructor.

BIOE 7250 Mechanical Behavior of Biological Materials (Formerly 034.725) Elastic and inelastic behavior of biological materials under applied load. Emphasis on unprocessed and semi-processed food products. Use of mechanical behavior properties in the design of handling, storage, processing and sensing systems for food products. Prerequisite: consent of instructor.

BIOE 7260 Research Methods for Biosystems Engineers (Formerly 034.726) Introduction to various research methods, including data acquisition and transmission, control systems, dimensional analysis, random signal analysis, experimental design, error analysis, stochastic modelling, fuzzy mathematics and expert systems. Prerequisite: consent of instructor.

BIOE 7270 Advanced Seminar in Biosystems Engineering (Formerly 034.727) A series of seminars to be given by Ph.D. candidates on research topics of current interest in Biosystems Engineering. Prerequisite: consent of instructor.

BIOE 7280 Advanced Topics in Biosystems Engineering (Formerly 034.728) An opportunity to extend, update or acquire specialized knowledge in particular area of interest. Prerequisite: consent of instructor.

BIOE 7290 Biosystems Engineering Seminar 1 (Formerly 034.729) Oral and written presentation of engineering research is discussed. Students are expected to actively participate in weekly seminars and to present two seminars both orally and written.

BIOE 7300 Food Process Engineering (Formerly 034.730) Food engineering concepts are presented using quantitative relationships that define the process. Various advanced methods of heating and processing foods are discussed and their mathematical and physical relationships described. Descriptive information of typical equipment assists students in utilizing engineering principles in design. Prerequisite: consent of instructor.

BIOE 7310 Materials Incorporation into Soil (Formerly 034.731) Types and characteristics of agricultural materials; solid and liquid waste (including manure) incorporation; crop residue incorporations, seed placement; chemical incorporation; methods and equipment; performance evaluation; measurement technique.

BIOE 7320 Membrane Processes for Water and Waste Treatment (Formerly 034.732) Principles of membrane filtration, classification, design and manufacture. Principle mechanisms of mass transport to the membrane surface and particle/solute rejection. Investigation of membrane bio-fouling and bio-film control strategies. Fundamentals of reverse osmosis, nano-, ultra-, and micro-filtration process design and operation. Practical applications of membranes in the area of water and wastewater treatment. Innovative and novel bio-reactor designs utilizing membrane filtration for environmental reclamation.

Canadian Studies - Collège universitaire de Saint-Boniface

Maîtrise ès Arts, études canadiennes,
Maîtrise ès Arts, études canadiennes Program Information,
The Maîtrise ès Arts, études canadiennes is offered by the Collège universitaire de Saint-Boniface, an affiliated college of the University of Manitoba, **in French only**, and **only via the Internet**. There are currently 5 students enrolled in the program. Several have recently completed their MA in études canadiennes, while a few have withdrawn from the program. Students are generally mid-career and are enrolled in the programme on a part-time basis, out of personal interest or for career enhancement. Graduates can pursue careers in the federal or provincial public service, in journalism, in the Foreign Service, or in the private sector; in addition, graduates of the programme may be admitted to doctoral programs, subject to program requirements.

Graduates of this program will receive a Maîtrise ès Arts en études canadiennes

Admission

In addition to the minimum admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar, students must have taken four (4) years of studies at the university level. A pre-M.A. program is not available at this time.

Graduate Studies

Admission Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 6 months prior to their intended start date. International students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 9 months prior to their intended start date.

Program Requirements

In addition to the minimum course requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this *Calendar*, students must complete a minimum number of 18 credit hours of graduate coursework. In addition, students must submit an acceptable thesis and pass a thesis oral examination.

Language requirement: Reading and comprehension skills in both French and English; course work and the thesis may be written in either French or English, subject to availability of a bilingual instructor.

Expected time to graduate: 2 - 3 Years

Cancer Control

Cancer Control ,
Cancer Control Program Info,
The Ph.D. in Cancer Control is offered by the Faculty of Nursing and the Department of Community Health Sciences, Faculty of Medicine. The goal of cancer control is to prevent cancer, cure cancer, and increase survival and quality of life for those who develop cancer, by converting the knowledge gained through research and evaluation into clinical and community interventions. This program addresses the pressing need in Canada for clinical and community health scientists in cancer control.

Fields of Research

Cancer care of individuals and families is an area of research excellence in the Faculty of Nursing. Current areas of research include: patient-health professional communication, clinical decision making, symptom management, family care giving, sleep and cancer, and several dimensions of palliative care and cancer prevention. Methodological expertise includes scaling of psychosocial variables and conducting randomized clinical trials of nursing and psychosocial interventions. Previous work has focused on breast, prostate, and lung cancer patients as well as children with cancer.

The cancer control focus in the Faculty of Nursing is complemented by the strong methodological expertise (biostatistics, clinical trials, meta-analysis) of faculty members in the Department of Community Health Sciences, as well as their substantive expertise in the fields of cancer epidemiology, palliative care, aboriginal health, child health and aging. Knowledge translation is a strong emphasis of the program. Significant community partners in delivering this Ph.D. program are the Winnipeg Regional Health Authority, CancerCare Manitoba, and the St. Boniface Hospital Research Foundation. International research partnerships exist with the Mayo Clinic in Rochester, Minnesota; the Karolinska Institute in Stockholm, Sweden; and the University of Manchester, England.

Student Funding

A stipend is available on application and acceptance from a multidisciplinary training program in which the Faculty of Nursing is participating: Psychosocial Oncology Research Training (PORT) Program (McGill University) (www.port.mcgill.ca/indextext.htm). Students are encouraged to obtain the PORT program details well in advance of application to the Ph.D. in Cancer Control to

facilitate funding of their first year of studies. Students are expected to apply for national funding in the form of doctoral studentships/fellowships from the National Cancer Institute of Canada and the Canadian Institutes of Health Research.

Ph.D. in Cancer Control,
Admission

Admission requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar.

Applicants must possess:

- High academic standing in previous university work;
- A Master's degree in nursing or a health-related discipline. The degree must be thesis-based, although evidence of an extensive publication and research background as an alternative to a thesis is acceptable; and
- An area of research interest in palliative care, cancer care, or cancer prevention which is supported by a Faculty of Nursing or a Department of Community Health Sciences advisor.

Application Deadlines

Students in the Faculty of Nursing normally begin their program on 1 September. Applications with complete supporting documentation are due in the Faculty of Graduate Studies by January 15th.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. The program normally consists of twenty-one credit hours of coursework (fifteen from required courses, six credit hours from electives), a candidacy examination and a thesis. (In addition, fifteen credit hours of pre- or co-required courses or equivalent must have been completed before entering the program or in the first year).

Second language reading requirement: none

Maximum time to graduate: six years

Page URL,
<http://crscalprod1.cc.umanitoba.ca/CancerControl.catx>

Course Descriptions-Nursing

NURS 7030 Foundations, Issues and Trends in Nursing
(Formerly 049.703) Explores how social forces have influenced the evolution of nursing, its place in society, and the health care system today. Examines issues and trends affecting present and future development of nursing.

NURS 7040 Curriculum Development in Nursing
(Formerly 049.704) The course is designed to explore the developmental phases of curriculum design in a variety of educational settings and types of programs. Students will have the opportunity to engage in the planning and the structuring of educational programs. Course in abeyance.

NURS 7050 Restorative Nursing
(Formerly 049.705) Advanced study of the scientific foundations of human functioning as it applies to individuals and families in the context of altered health status. Nursing theories and therapeutic interventions will be applied to the restoration of the health status of individuals and families. Practice is an integral part of the course. Offered on a rotating basis.

NURS 7080 Special Topics in Nursing Research II
(Formerly 049.708) Seminar discussion of topics related to current issues and problems in the development, implementation, and evaluation of knowledge utilization programs in nursing practice. Required of all practicum students. Offered when student demand warrants and on a rotating basis.

NURS 7082 Evidence Informed Practice
This course will provide a foundation for students to evaluate the theory of evidence informed practice and its relationship to health care delivery. Students will be exposed to the principles of evidenced informed practice, basic epidemiological statistics, systematic reviews, critical appraisal techniques, application of implementation science, and health care intervention evaluation in order to acquire the analytical and questioning skills necessary to review their own work and other literature relevant to health care practices. Asking the right clinical question, searching the literature, critically appraising primary studies, making recommendations(s) for changing clinical practice, and evaluation of the effects of a practice innovation or newly developed program are essential components of evidenced informed practice.

NURS 7084 Role development in Advanced Nursing Practice
The purpose of this course is to understand the role of advanced nursing practice. The context, complexity, and scope of the roles within professional nursing practice will be explored. Particular emphasis will be placed on the knowledge base and skill set required to be an effective leader in a variety of advanced practice nursing roles. In this course, nursing graduate students for all streams will come together to discuss and debate issues related to advanced nursing practice on a local, regional, national and international level.

NURS 7086 Integrative Focus
The purpose of this course is to allow the student to focus in-depth in a substantive area of nursing practice: clinical practice, education or administration. Students will engage in practice in the area of focus, and be guided by the faculty adviser with respect to the goals and direction of the practicum and associated readings. Students will participate in seminars facilitated by the faculty at designated times throughout the practicum.

NURS 7090 Science and Theory in Nursing
The course includes an exploration of nursing's theoretical evolution. Issues related to the development and application of theory in a practice discipline will be discussed with a focus on the role of research. Particular emphasis will be placed upon analysis and evaluation of nursing's conceptual and theoretical systems.

NURS 7100 Administration in Nursing
(Formerly 049.710) Exploration and analysis of the roles and responsibilities of the nursing administrator in today's health care system. Examination of the organizational structure and culture of nursing services in relation to conflict resolution, interdisciplinary relationships and union negotiation. Includes preceptorship experience. Offered on a rotating basis and currently under review.

NURS 7110 Readings in Selected Topics
(Formerly 049.711) An intensive readings course for graduate students in nursing. Topics may be selected within the general field of nursing to suit the special needs and research interests of students, for example, transcultural nursing, women's health, or palliative care. Students must have a faculty member agree to advise them before registering.

NURS 7140 The Older Adult: Advanced Nursing Assessment
(Formerly 049.714) Advanced study and practice integrating theory, concepts, research and skills related to nursing assessment of the strengths and vulnerabilities of older adults and their families. Emphasis is on health promotion for the elderly. Clinical practice in the community and/or the institution is a component of the course. Offered on a rotating basis.

NURS 7150 The Older Adult: Clinical Decision-Making and Intervention in Nursing
(Formerly 049.715) Emphasis is on advanced study and practice in evaluation of clinical data and subsequent selection of appropriate nursing interventions to promote health of older adults and their families. Development of skills related to consultation and supervision is integral to the course. Clinical practice settings include the community and institutions. Offered on a rotating basis.

NURS 7160 Cancer Nursing Research
(Formerly 049.716) Focuses on recent advances in cancer nursing research with an

emphasis on research methodologies, ethical concerns, and design issues pertinent to research with cancer populations. Approaches to utilization of research findings in clinical practice will be addressed. Offered on a rotating basis.

NURS 7170 Community Health Nursing: Assessment of Aggregate Needs

(Formerly 049.717) Furthers theoretical and practical knowledge of key components of community health nursing within the primary health care model. Focus is on community health nursing systems and their relationship to the total health care system. Factors influencing past, current, and future community health nursing practice are examined. Emphasis is on assessing aggregate needs and developing advanced skills in working with a target group in the community. Practice in the community is an integral part of the course. Offered on a rotating basis.

NURS 7180 Community Health Nursing: Community Level Interventions

(Formerly 049.718) Furthers theoretical and practical knowledge in community wide interventions that promote health. Focus is on the community health nurse's role in program development and evaluation for targeted groups in the community, and the role of influencing health policy through lobby efforts. Practice in the community is an integral part of the course. Prerequisite: NURS 7170 (or 049.717) or permission of instructor. Offered on a rotating basis.

NURS 7200 Human Responses to Illness

(Formerly 049.720) Consists of a series of seminars, case studies and clinical practica on human responses common to ill individuals across the lifespan. The emphasis of the course is on synthesis and application of relevant principles of the Human Response to Illness Model, on the development of proficiency in advanced assessment and decision-making, and on initiating, planning and evaluation of nursing interventions. Clinical practice is a course component. Offered on a rotating basis.

NURS 7210 Qualitative Research Methods in Nursing

The purpose of this course is to advance knowledge of qualitative methodology and understanding of the ways in which qualitative methodology can be used to understand phenomena of interest in nursing and health care. This course is designed to provide opportunities for developing specific qualitative research skills, while gaining familiarity with theories, issues, and challenges in qualitative research. Students are exposed to the philosophical assumptions of the qualitative paradigm, ethical issues specific to qualitative research, qualitative sampling strategies, qualitative data collection techniques, and processes associated with the analysis, interpretation, and knowledge translation and utilization of qualitative data.

NURS 7220 Quantitative Research Methods in Nursing

The purpose of this course is to advance understanding of the ways in which quantitative approaches can be applied to solve nursing problems. The quantitative research process will be described including literature review, conceptual frameworks in nursing sampling, data collection strategies, analysis of research data, and communication of results. Included are exploration of the status and development on nursing knowledge through quantitative research methods.

NURS 7250 Foundations of Advanced Practice Nursing

(Formerly 049.725) A study of the theoretical underpinnings surrounding the development of a variety of advanced practice nursing roles. The focus will be on the issues shaping role development in Manitoba and Canada including economic, political and sociologic factors determining health care policy and delivery will be examined.

NURS 7260 Health Care in Advanced Practice Nursing 1

An examination of the assessment and intervention strategies for individuals from birth to adolescence, including sexuality and reproductive health. Designed to provide the necessary knowledge and experience to assist individuals and their families with the most common health problems. Concepts of health promotion and health maintenance are integrated throughout the course. Integrated clinical practicum (12 hrs/week). Prerequisites: NURS 7250 (or 049.725), NURS 7370, NURS 7380 and NURS 7390.

NURS 7270 Health Care in Advanced Practice Nursing 2

(Formerly 049.727) A study of assessment and intervention strategies for individuals from young adult through older adult. The course is designed to provide the necessary knowledge and experience to assist individuals and their families with the most common health problems. Concepts of health promotion and health maintenance are integrated throughout the course. Integrated clinical practicum (12

hrs/week). Prerequisites: PHAC 2100 (or 089.210), PHGY 7240 (or 090.724), 036.725, NURS 7230 (or 049.723), NURS 7250 (or 049.725).

NURS 7280 Applied Physiology and Pathophysiology for Nurses (Formerly 049.728) This is a clinically-applicable systems approach to normal and altered physiological regulation, and is of specific application to advanced nursing practice. Lectures in physiology and pathophysiology as well as student-led case studies will be used to provide synthesis and application of concepts to common health care problems seen in clinical practice.

NURS 7290 Woman, Child and Family Health: Nursing Perspectives

(Formerly 049.729) Detailed study of the theory, concepts, current research and nursing care related to the health needs of women, children and their families. Students will focus their theoretical learning and clinical practice within selected areas of woman, child or family health. Clinical management of selected clients is an integral part of the course. Offered in 2003 and alternate years thereafter.

NURS 7300 Advanced Health Assessment and Diagnostic Reasoning

Designed to develop health assessment and critical thinking skills appropriate for clinical practice at an advanced level. The collection and in-depth analysis of subjective and objective health information and the use of diagnostic reasoning are emphasized. All students engage in practice with fellow students, clinical teaching associates and consenting patients. Required for students in the APN major.

NURS 7310 Health Care Policy: Implications for Nursing Practice

(Formerly 049.731) Examines the inter-relationships of knowledge development, research utilization, policy formation, health services decision-making, and nursing systems. The selected topics are based on current nursing practice issues in community and institutional settings and their impact in individuals, families and aggregates. A major focus is the analysis of the process of knowledge development and application to health care and nursing systems. Not to be held with the former 049.719 and or NURS 7240 (or 049.724).

NURS 7320 Philosophy of Nursing Science

(Formerly 049.732) Advanced seminar to explore philosophies of science which have influenced the development of nursing knowledge. Nursing epistemological traditions are analysed and criticized as they relate to nursing theory development and research. The relationship between nursing science and practice is emphasized.

NURS 7330 Clinical Consolidation

Provides an opportunity to consolidate clinical skills, apply theoretical knowledge and research, and synthesize theory and practice in the final year of the Nurse Practitioner stream (10 weeks of 400 clinical hours). Preparation of a final paper that illustrates scholarly endeavour suitable for publication is required.

NURS 7340 Evidence Informed Practice

(Formerly NURS 7080) This course will provide a foundation for students to evaluate the theory of evidence informed practice and its relationship to health care delivery. Students will be exposed to the principles of evidenced informed practice, basic epidemiological statistics, systematic reviews; critical appraisal techniques, application of implementation science, and health care intervention evaluation in order to acquire the analytical and questioning skills necessary to review their own work and other literature relevant to health care practices.

NURS 7350 Role Development in Advanced Nursing Practice

The purpose of this course is to understand the role of advanced nursing practice. The context, complexity, and scope of the roles within professional nursing practice will be explored. Particular emphasis will be placed on the knowledge base and skill set required to be an effective leader in a variety of advanced practice nursing roles. In this course, nursing graduate students from all streams will come together to discuss and debate issues related to advanced nursing practice on a local, regional, national, and international level.

NURS 7360 Integrative Focus

The purpose of this course is to allow the student to focus in-depth in a substantive area of nursing practice: clinical practice, education or administration. Students will engage in practice in the area of focus, and be guided by the faculty adviser with respect to the goals and direction of the practicum and associated readings. Students will participate in seminars facilitated by the faculty at designated times throughout the practicum. Prerequisite: NURS 7090, NURS 7210, NURS 7220, and NURS

7340.

NURS 7370 Pathophysiologic Concepts & Therapeutics I

Introducing principles of cell signaling, physiological feedback systems, adaptive and non-adaptive cellular responses, receptor-ligand interactions, drug kinetics, dynamics and therapeutics. Pathophysiology and treatment of disorders of immunity and inflammation, including hypersensitivity reactions, will also be covered in this course.

NURS 7380 Pathophysiologic Concepts & Therapeutics II

This course entails a systems-based analysis of disease states commonly seen in primary care, including cardiovascular, hematological, respiratory, neurologic and renal disorders and their treatment. Problem- and case-based scenarios will be used to encourage critical thinking and integration of pathophysiologic and management principles.

NURS 7390 Pathophysiologic Concepts & Therapeutics III

This covers pathophysiology and management of disorders of the musculoskeletal, gastrointestinal, dermatologic, reproductive and urogenital systems. One module will focus on disorders of the head, eyes, ears, nose and throat. A case study approach to instruction will be used almost exclusively in this course, which culminates in a mock 'grand rounds' presentation.

Course Descriptions-Community Health Sciences

CHSC 7130 Methods in Health Services Research and Evaluation

(Formerly 093.713) Examines the process of planning and conducting research and evaluation to assess health services with an emphasis on the methods by which a question may be translated into a testable hypothesis, and the specification of a research plan that will produce results of maximum internal and external validity.

CHSC 7200 Health and Health Care in Developing Countries

(Formerly 093.720) The course will focus on the patterns of mortality and morbidity in developing countries and the organization of health care services. Social, cultural, and economic development will be related to health and health services.

CHSC 7210 Epidemiology of Women's Health

(Formerly 093.721) This course will deal with problems and concerns particular to women's health. The topics will be approached from an epidemiological perspective but use will be made of materials from health economics, evaluation research, medical sociology and anthropology.

CHSC 7220 Health and Health Services of Native People

(Formerly 093.722) This course provides a detailed review of the health status and the determinants of health of Canada's native people.

CHSC 7270 Epidemiology of Chronic (Non-Cancer) Diseases

(Formerly 093.727) The objective is to study the natural history of chronic diseases including the distribution of diseases, risk and prognostic factors, rationale and strategies for prevention. The methodological issues concerning the investigation of severe disease are also discussed. Prerequisite: a minimum grade of "B" in CHSC 7520 (or 093.752).

CHSC 7290 Economic Evaluation of Health Care

(Formerly 093.729) The objectives of this course are to enable students to understand economic evaluation methodologies (cost-effectiveness, cost-benefit, cost-utility analysis) as applied to health care and to familiarize them with the applied literature on economic evaluation of health care. Prerequisite: permission of instructor.

CHSC 7300 Health Policy and Planning

(Formerly 093.730) This course defines health policy and describes the planning and decision-making process. Case studies will be used to illustrate and critique the substance, process and outcome of policy papers that address contemporary policy issues. Prerequisite: permission of instructor.

CHSC 7310 Epidemiology of Health Care

(Formerly 093.731) This course will discuss the advantages and disadvantages of using large administrative data bases for research purposes. Substantive topics dealt with include: regional variations in provision and utilization of health care, short- and long-term outcomestudies, individual physician behaviour, and technology assessment. Policy implications are considered. Prerequisite: a minimum grade of

"B" in CHSC 7520 (or 093.752) or equivalent and permission of instructor.

CHSC 7320 Organization and Financing of the Canadian Health Care System

(Formerly 093.732) Students will study the historical development and current structure of the Canadian health care system and relate its development to changes in social and political factors. The course provides an economic perspective on current policy issues in the organization, financing, and delivery of health care in Canada.

CHSC 7330 Cultural Perspectives on Illness and Medical Practice

(Formerly 093.733) The objective of this course is to make students aware of the ways in which disease, illness, and medical practice are socially and culturally mediated. The course will examine cultural influences on the experience and expression of illness and consider the medical practitioner's role in the development and provision of culturally responsive health care. Prerequisite: permission of instructor.

CHSC 7360 Clinical Trials

(Formerly 093.736) The Randomized Clinical Trial is the only true experiment in clinical research. This course is intended to give students a detailed knowledge of the design and implementation of RCTs. Students will participate in a qualitative review of RCTs. Prerequisites: a minimum grade of "B" in CHSC 7520 (or 093.752), CHSC 7470 (or 093.747), CHSC 7480 (or 093.748) or equivalents.

CHSC 7380 Prevention and Health

(Formerly 093.738) The course will cover frameworks used in -formulating preventive strategies. Topics will include risk factor assessment, screening, health education, legislation, litigation, lifestyle and prevention. Actual case studies will be used. Prerequisite: CHSC 7520 (or 093.752) and CHSC 7530 (or 093.753).

CHSC 7390 Health Promotion

(Formerly 093.739) An examination of theories, principles, practices and settings for health promotion. Prerequisite: permission of instructor.

CHSC 7400 Directed Readings I: In Epidemiologic Methods

(Formerly 093.740) An opportunity for advanced students to acquire knowledge in a defined and specific area of interest. Prerequisites: permission of instructor and Graduate Program Director.

CHSC 7410 Directed Readings: II - In Epidemiology

(Formerly 093.741) An opportunity for advanced students to acquire knowledge in a defined and specific area of interest. Prerequisite: permission of instructor and Graduate Program Director.

CHSC 7430 Seminars on Advanced Topics: II - In Methods of Health Care

(Formerly 093.743) Sem-inars dealing with current research issues, emerging methodologies and analytical techniques will be offered for advanced students. Prerequisite: permission of instructor.

CHSC 7450 Epidemiology of Communicable Diseases

(Formerly 093.745) Overview of epidemiological principles in communicable disease investigation and prevention and specific issues in controls of certain specific communicable diseases of public health importance in Canada will be introduced. Prerequisite: permission of instructor. Prerequisite: a minimum grade of "B" om CHSC 7520 (or 093.752).

CHSC 7460 Environmental and Occupational Health

(Formerly 093.746) The aim of the course is to acquaint the student with the role of the environment (general and specifically working) as the determinant of health. The content of the course will be presented in the form of lectures, seminars, and field visits. Prerequisite: permission of instructor.

CHSC 7490 Empirical Perspectives on Social Organization and Health

(Formerly 093.749) This course will focus on a selected review of the epidemiological literature which has integrated social factors in the investigation of the distribution of health and illness in society. The course will review a selection of important empirical studiesinvestigating the roles played by social, psychological and economic status factors in determining health and illness. Emphasis will be placed on identifying the central theoretical and methodological approaches to defining and measuring socioeconomic status in this literature. Prerequisite:

permission of instructor.

CHSC 7510 Current Topics in Community Health

(Formerly 093.751) Focus on current issues and topics in community health, particularly as they relate to Manitoba and to Canada. Emphasis will be placed on current literature and ongoing research to examine emerging policies and programs within health care and social development. Prerequisite: basic courses in Epidemiology and Statistics. Prerequisites: a minimum grade of "B" in CHSC 7520 (or 093.752) and CHSC 7470 (or 093.747) and CHSC 7320 (or 093.732).

CHSC 7520 Principles of Epidemiology 1

(Formerly 093.752) This course will introduce the basic concepts and methods of epidemiology, including the definition and measurement of health status and health determinants in populations, assessing health risks and inferring causation, and issues in the design and analysis of population health studies.

CHSC 7530 Principles in Epidemiology II

(Formerly 093.753) This course follows the Principles of Epidemiology I and discusses the applications of epidemiologic principles in public health practice, including the investigations of epidemics, disease surveillance, clinical applications, evaluation of health programs, and the planning of preventive programs. Students will also receive instruction in microcomputer applications and use of EPI-INFO software for data entry, analysis and presentation. Corequisite: CHSC 7480. Prerequisite: a minimum grade of "B" in CHSC 7520 (or 093.752) and in CHSC 7470 (or 093.747)..

CHSC 7540 Advanced Epidemiology

(Formerly 093.754) Advanced epidemiologic research methods focusing on selected epidemiological issues (bias, confounding, matching, etc.). Discussion will be directed to both epidemiological and statistical considerations to find the optimal solution to a research problem. Prerequisites: a minimum grade of "B" in CHSC 7520 (or 093.752), CHSC 7530 (or 093.753), CHSC 7280 (or 093.728).

CHSC 7550 Observational Epidemiology

(Formerly 093.755) Intermediate epidemiologic research methods focusing on case-control and cohort studies, with discussion on issues relating to planning and design, implementation, and data analysis. Prerequisite: a minimum grade of "B" in CHSC 7520 (or 093.752) and CHSC 7530 (or 093.753) and CHSC 7470 (or 093.747) and CHSC 7480 (or 093.748)..

CHSC 7560 Epidemiology of Cancer

(Formerly 093.756) This course introduces the magnitudes, risk factors and prevention strategies of cancer. It focuses on current knowledge related to the etiology of cancer, medical interventions and potential for prevention. Prerequisite: a minimum grade of "B" in CHSC 7520 (or 093.752).

CHSC 7610 Advanced Topics in Community Health 1

Special advanced research topics in Community Health Sciences.

CHSC 7620 Advanced Topics in Community Health 2

Special advanced research topics in Community Health Sciences.

CHSC 7710 Social Aspects of Aging

This course is an advanced seminar designed to examine current social issues in aging. The course is organized around selected topics related to aging. Where possible, the Canadian experience will be compared to international trends and diversity will be highlighted. The first section is a review of the field of gerontology, ageism, demographic trends, theoretical perspectives and methods and the second section explores contemporary social issues. This course is a required course for the Graduate Specialization in Aging Certificate.

CHSC 7720 Health and Aging

This course is an advanced seminar designed to examine health and health care issues in aging. Where possible, the Canadian (or Manitoban) experience will be highlighted. Key topics in the health domain will be covered, such as frailty, mental health, and dementia. The provision of care for older adults will also be covered, focusing on both the formal care system, as well as informal care providers. This course is a requirement for the Graduate Specialization in Aging.

CHSC 7730 Topics in Health Services Research

This course will expose students to select health services research topics that are particularly relevant in Manitoba and Canada. Students are expected to actively engage in seminars led by health services researchers and decision-makers, and also

provide informative presentations in their own area of research. Students will also gain knowledge about various communication and knowledge translation strategies.

CHSC 7740 Advanced Qualitative Methods

The purpose of this course is to provide students with fundamental aspects related to qualitative research methods and analysis. By the end of the course, students should have an understanding of the principles and practices involved in: the application of different social theories to qualitative methods; designing a qualitative research study; various ways of collecting qualitative data and analyzing written texts; ways of integrating qualitative methods in a mixed methods design; developing different products for knowledge exchange activities; and 'hands-on' experience in doing qualitative analysis using qualitative software.

CHSC 7810 Biostatistics for the Health and Human Sciences 1

An introduction to statistical ideas and techniques for health sciences and human research. Describing data, patterns in data, the Normal distribution. Principles of estimation and principles of hypothesis testing. Principles and practice of the major statistical tests (t tests, analysis of variance, Chi squared tests, correlation and regression). Nonparametric statistical techniques. The use of statistical software to carry out statistical analyses. Analytic decision strategies.

CHSC 7820 Biostatistics for Community Health Sciences 1

The course will cover techniques of research design and analysis for community health researchers. Topics include: principles of experimental design, study size determination, statistical software as an analytical tool, techniques for the analysis of continuous outcomes, analysis of variance for multi-way, factorial and split-unit experiments, and multiple regression and general linear models. Introduction to more advanced statistical methods including logistic regression and survival models. Prerequisite: Undergraduate course in statistics.

CHSC 7830 Biostatistics for Community Health Sciences 2

This course will cover techniques for the analysis of complex data sets involving continuous, categorical and time-related outcome variables. Principles of statistical modeling. The behaviour of non-continuous variables. Categorical outcome variables and logistic regression. Poisson outcome variables and Poisson regression. Time-dependent outcomes, survival analysis and proportional hazards regression. Prerequisite: CHSC 7820 with a grade of B+ or better.

CHSC 7860 Methods and Concepts for Community Health Sciences

This course is designed to provide both a practical and theoretical introduction to qualitative, quantitative, and multi-method approaches used in health research. The emphasis in the course will be on applied research, consistent with the characteristics of the Department of Community Health Sciences as a whole.

CHSC 7870 Health Survey Research Methods

Students critically examine the use of health survey methodology within epidemiology. They also learn to apply survey methodology, as a means to gain a strong appreciation of the reflective, theoretical and analytical thinking required to successfully design and implement epidemiological health surveys. Prerequisites: CHSC 7820 and CHSC 7520.

Course Descriptions-General Management

GMGT 7010 Business Policy Seminar

This course entails the study of general management. Students shall integrate the concepts from the various functional areas of the organization covered in the program with the different environments: social, political, economic and technological. Students will analyze general management problems, shall formulate policies, and display ability to implement policies. Must be taken in final term in the program.

GMGT 7040 Systems Analysis for Management

(Formerly 027.704) The concepts of systems analysis used to provide an analytical framework for study of management as the integrative process which cuts across functional divisions and operational activities.

GMGT 7060 Readings in Business Administration

(Formerly 027.706) Supervised readings in one of the areas of business administration including human resource management, industrial relations, organizational behaviour, policy and environment.

GMGT 7070 Administrative Studies Research Project
(Formerly 027.707) Research in any one of the areas of administrative studies.

GMGT 7080 Research Methods
(Formerly 027.708) Principles of research design and data collection with examples drawn across the areas of marketing management, industrial relations, policy analysis, etc. Both cases and computer-based exercises are used. Prerequisite: MSCI 5010 (or 164.501 or 027.501).

GMGT 7090 Organizational Decision-Making
(Formerly 027.709) A study of the goal-setting and decision-making processes in organizations and the implications for the growth and survival of such organizations.

GMGT 7100 Interpersonal Processes
(Formerly 027.710) An examination of theories of interpersonal behaviour and processes as they apply to managerial situations. Emphasis upon individual behaviour and change, group dynamics, leadership behaviour, and communications.

GMGT 7110 Business and Its Environment
(Formerly 027.711) Analysis of the environmental factors within which a business operates.

GMGT 7120 Organizational Power and Politics
(Formerly 027.712) An examination of personal, interpersonal and organizational power in the context of organizational politics. Topics covered include rational versus political models of organizations, the accumulation and management of personal power, the politics of decision-making, the politics of managerial succession, the politics of budgets, authority, intergroup conflict, and bargaining and negotiation processes.

GMGT 7350 Administration: Selected Topics
(Formerly 027.735) Topics in one of the areas of business administration including human resource management, industrial relations, organizational theory and behaviour, and business policy and strategic management.

GMGT 7360 Organizational Behaviour and Self Development
(Formerly 027.736) This course will operate in a seminar format with two goals. The first goal is to provide an environment in which the student can develop and manage to successful conclusion a project in which they have significant intrinsic interest. The second goal is to improve the student's understanding of the inner life of an organization by increasing his/her ability to discriminate between the organizational "ropes to skip and the ropes to know."

GMGT 7370 Managing Innovation
(Formerly 027.737) An examination of organizational design characteristics in the context of a competitive international perspective. Emphasis is on organizational and technological innovation to facilitate the development of new products or processes or to implement change in existing products or processes. Topics covered include Canadian experience and policy, facilitators and inhibitors in the creative process, diffusion of innovations, and the aims of the patent process.

GMGT 7400 Readings in Organizational Behaviour (Ph.D.)
(Formerly 027.740) An examination of theory and research from the social and administrative sciences that focuses on the interaction between organizations and their environments. The evaluation and synthesis of theoretical and empirical work in this area will be emphasized. Prerequisite: admission to the Ph.D. program in Management (Organizational Behaviour) or approval by instructor.

GMGT 7410 Doctoral Seminar in Organizational Behaviour (Ph.D.)
(Formerly 027.741) An examination of theory and research from the social and administrative sciences that is relevant to the behaviour of individuals and groups within organizations. Emphasis will be placed on evaluation and synthesis of theoretical and empirical work in this area. Prerequisite: admission to the Ph.D. program in Management (Organizational Behaviour) or approval by instructor.

GMGT 7440 Doctoral Seminar in Organizational Theory (Ph.D.)
(Formerly 027.744) The major goal of this course is to familiarize students with central schools of thought within organization theory. As with other theories in the social sciences, these schools of thought tend to be based on differing assumptions about the nature of the organizational world, the operation of causality, epistemology, and the role of human actors. Prerequisite: admission to the Ph.D. program in Management (Organizational Behaviour) or approval by instructor.

GMGT 7470 The Fundamentals of Public Policy Analysis
(Formerly 027.747) Introduction to the basic concepts and objectives of public policy analysis. Analytic tools and techniques of policy analysis: cost-benefit analysis, forecasting, design and application of program evaluations, implementation of evaluation results. Case studies in policy analysis.

GMGT 7490 Regulatory Processes and Policies
(Formerly 027.749) Analysis of the processes of regulation of private sector conduct and performance. Methods and effects of regulation. Purpose of regulatory statutes. Sources of initiative in the regulatory process. The effects of regulation. Formulation of general empirical rules for the behaviour of regulatory agencies. Politics and economics of regulatory reform.

GMGT 7510 Strategic Leadership and Managing Change
(Formerly 027.751) An examination of the role of the manager as a change agent and processes associated with strategic vision and change. Analysis of factors affecting strategic decisions and how organizations adapt to their environment. Emphasis is upon the role of leaders: transformational leadership, charisma, organizational design and managing organizational culture change.

GMGT 7520 Issues in Managerial Communication
(Formerly 027.752) An examination of strategies and development of skills for effective oral, written, non-verbal, interpersonal, group, cross-cultural, and ethical communication in management.

GMGT 7530 Selected Topics
(Formerly 027.753) An examination of current issues in areas which could, for example, include: organizational behaviour, organizational theory, strategy, human resource management, and industrial relations. Prerequisite: consent of instructor.

GMGT 7540 Doctoral Seminar in Research Methods (Ph.D.)
(Formerly 027.754) Principles of research design and data collection appropriate for the areas of marketing, management, industrial relations, policy analysis, finance, management science, etc. Research problems and issues will be discussed from a number of perspectives. Conceptual material, statistical analyses, theoretical material and the utilization of statistical application software are used as the bases for seminar discussion. Prerequisite: admission to the Ph.D. program in Management or approval by instructor.

GMGT 7670 Business Decision Analysis
(Formerly 027.767) Development and applications of quantitative methods to solve decision-making problems under uncertainty. Topics include the structuring of complex decision problems, utility theory, subjective probability, value of information, risk sharing, and group decisions. Prerequisite: MSCI 6070 (or 164.607 or 027.607).

GMGT 7710 Managerial Communication
(Formerly 027.771) Focus is on the interpersonal, intergroup, and intraorganizational communication skills required for effective leadership, and the objectives are to assist the participants in the following: increasing the clarity, correctness, and effectiveness of written and oral communication; recognizing and analysing communication dynamics at work in personal, group, and organizational interactions; increasing combination flexibility and proficiency in times of corporate challenge, change, and crisis.

GMGT 7720 Business Conditions Analysis
(Formerly 027.772) To provide an awareness of key components of the economic/business environment. Identifies critical indicators that affect decision-making and suggests strategies for forecasting future conditions. Topics covered include critical demographic trends, the change technological frontier, international trade, finance, and investment trends, and trends in interest rates and exchange rates. A theoretical overview will precede the discussion of business conditions indicators.

GMGT 7740 Business/Government Relations
(Formerly 027.774) Focuses on the logic of political-economic-business relations. The point of view is that of the manager. Specific tools of analysis are discussed that assist managers in understanding and working with aspects of public policy which interface with their private sector decisions.

Chemistry
Chemistry ,

Chemistry Grad Program Info,

A M.Sc. or Ph.D. in the chemical sciences provides a gateway to an exciting, challenging and frequently high-paying career. M.Sc. and Ph.D. chemists work in areas such as industrial research and development (particularly the pharmaceutical, energy, advanced materials and biotechnology sectors), medical research, environmental and pollution monitoring, and technical consulting. Ph.D. chemists and biochemists in academia have the opportunity both to teach and to pursue independent basic and applied research.

Graduate students work in close cooperation with faculty as they pursue their own thesis research projects. There are fascinating project opportunities available in the research groups within the department. Graduate courses are typically informal, and encourage small groups of students to discuss topics of current interest, in a supportive environment. The Department of Chemistry also hosts seminars throughout the year, bringing researchers from university and industrial laboratories in Winnipeg, across Canada, and abroad, to share their latest discoveries with students and faculty. The Armes Lectureship and Betts Lectureship programs provide for extended lecture series by world-renowned chemists, who are able to interact with faculty and graduate students during their visit to the department.

Graduates of the Chemistry M.Sc. and Ph.D. programs are currently employed in chemical companies, research institutes, government laboratories and agencies, and tenured academic positions. Some have even founded their own chemical companies! Alumni of the department's graduate program now work for companies such as Apotex Fermentation, Medicago, Novopharm Biotech, Philips Paints and Border Chemicals in Winnipeg, Biovail (Steinbach), Anormed (Richmond, BC), Allelix (Mississauga), Uniroyal (Guelph), and Genzyme (Cambridge MA). Several have undertaken additional training with prominent scientists at such places as the Scripps Institute, MIT, the Howard Hughes Medical Institute, and the universities of Alberta, British Columbia, Calgary, Montréal, Sherbrooke, and Toronto. Some have gone on to academic careers, at such universities as Alberta, Calgary, Cornell, Dalhousie, Guelph, Northern British Columbia, Queen's, Toronto, York, as well as Manitoba.

Fields of Research

Analytical Chemistry, Asymmetric Organic Synthesis, Biochemistry, Cell Biology, Chromatography, Environmental Chemistry, Inorganic Chemistry, Mass Spectrometry, Macromolecular Chemistry, Materials Science, Medicinal Chemistry, Natural Products Chemistry, NMR Spectroscopy, Organometallic Chemistry, Protein Structure and Dynamics, Synthetic Carbohydrate Chemistry, Theoretical Chemistry, Solid State Chemistry.

Research Facilities

The department has modern instrumentation and technical support for research and teaching. There is a full-time glassblower in the department who can produce specialized glassware as required. The University Libraries provide excellent on-line connections to scientific and medical databases and full-text access to major journals.

Computer facilities: campus-wide UNIX and NOVELL servers; Sunfire 6800 20-CPU high-performance computing installation; access to the Westgrid high-performance computing facilities; PC, Mac, UNIX and LINUX workstations in the department; a 14-node and 24-node Beowulf cluster constructed from 12 dual processor 2.8 GHz Xeon computers have been installed in the department.

NMR facilities: Bruker Avance300 and AMX 500 instruments, and a Varian INOVA 600 system; all are multi-nuclear and have pulsed field gradient capabilities; the AMX 500 and INOVA 600 are equipped for both liquid and solid-state work.

Mass Spectrometry: a two-sector high-resolution spectrometer with EI, CI and FAB sources, operational in positive and negative ion modes; a Quattro-LC triple quadrupole instrument equipped for electrospray ionization (ESI); a Bruker Biflex IV MALDI-TOF instrument for the analysis of large biomolecules; through the Physics department, Chemistry researchers have access to advanced experimental time-of-flight instruments.

Advanced Synthesis: A high throughput HPLC-MS-UV autopurification system (Waters) and a parallel organic synthesizer (quest).

The Ultra-Clean Trace Elements Laboratory (UCTEL): a metal-free class-1000 to Class 100 environment equipped with a PE Elan DRC II ICP-MS, a Waters non-metallic HPLC a CEM Mars V Microwave Digestion System, and a Tekran 2600 Mercury Analyzer.

Crystallography facilities: a high-resolution powder X-ray diffractometer with a high-temperature furnace. In addition the Department has access to single crystal diffractometers and cameras.

Thermal Analysis: a high-temperature thermal gravimetric/differential thermal analyzer (TGA/DTA) is available.

Spectroscopy facilities: a 15W argon laser with a 14018 double monochromator for Raman spectroscopy; a Fourier transform microwave spectrometer equipped with ion sources, Helmholtz coils and Stark plates.; an UV-Vis-NIR spectrophotometer (Varian Cary 5000), a coherent dye laser for intracavity photoacoustic spectroscopy; a Nicolet FT-IR system; a second Nicolet interferometer is equipped for solid-state FT-IR studies, and is also set up for Raman spectroscopy; a UV-vis diode array spectrophotometer; routine FT-IR and stopped flow equipment is also available.

Circular Dichroism Spectropolarimeter-Fluorometer: Our Jasco J-810 instrument is equipped with a computer-controlled Peltier device and circulating water bath for temperature control using both cylindrical and rectangular cells. The fluorescence accessory permits concurrent circular dichroism and fluorescence measurements between 163 and 900 nm.

Electrochemical facilities: a BAS 100A electrochemical workstation with rotating disk and controlled growth mercury drop electrode attachments; a CH Instruments 660 electrochemical workstation with a picoamp booster attachment for ultramicroelectrode measurements; a CH Instruments 400 electrochemical workstation with quartz crystal microbalance (QCM); a Solartron 1287 electrochemical interface and a 1255B frequency response analyzer for impedance measurements; and a Lecroy 9310A 400 MHz dual channel oscilloscope, a Stanford Research Systems SR560 amplifier and a Wavetek 182A function generator for fast scan cyclic voltammetry.

Surface and interfacial science facilities: a Kratos Axis Ultra high performance imaging x-ray photoelectron spectroscopy (XPS) instrument; a JEOL JAMP-9500F field emission Auger microprobe/scanning electron microscope (SEM); a JOEL JEM-2100F advanced field emission transmission electron microscope (TEM); a CAMECA IMS 7f magnetic sector secondary ion mass spectrometer (SIMS); a Digital Instruments Nanoscope IV with a Dimension 3100 SPM, a closed-loop SPM, a MultiMode SPM with multiple heads, a universal bipotentiostat, and an EnviroScope AFM; a ThermoNicolet Nexus 870 FT-IR with a polarization modulated infrared reflectance absorbance spectroscopy (PM-IRRAS) and attenuated total reflectance spectroscopy (ATR) modules; a Sentech SE400 ellipsometer; and a Ramè-Hart computerized contact angle goniometer.

Chromatography facilities: numerous HPLC systems; a preparative HPLC/MS system; a GPC system with light-scattering, refractive index, diode-array and electrochemical detectors.

Other equipment: A Differential Scanning Calorimeter with Intracooler and Ultramicrobalance (Perkin-Elmer DSC Diamond); a Spin Coater (Laurell Technologies); a Polarized Light Optical Microscope System with Heating/Cooling stage (Olympus/Linkam); a Dynamic Light Scattering Instrument for Particle Sizing (Microtrac Inc.); a Liquid Crystal Test-bed for testing electro-optical properties of LC-mixtures (LC Vision); a Pure-Water System; a Laminar Flow Clean-air workbench and an Ultrasonic Processor (Sonics).

Manitoba Chemical Analysis Lab (MCAL) A "state of art" chemical analysis facility (MCAL) is available in the Department of Chemistry. The laboratory offers a wide range of instrumentation for the analysis of biological, environmental and industrial samples. The facility is used for undergraduate used for undergraduate

teaching laboratories and can be accessed by University researchers, graduate students and industry.

M.Sc. in Chemistry,
Admission

Admission requirements are those of the Faculty of Graduate Studies found in the [Graduate Studies Regulations Section](#) of this Calendar.

Application Deadlines

Potential M.Sc. students should explore the Chemistry Department website, prior to making formal application to the department of Chemistry. They are encouraged to submit the on-line information form found on the website. The following deadlines for receipt of complete application materials apply to potential students holding bachelors' degrees from Canadian and Non-Canadian universities.

Start Date Canadian/U.S. Non-Canadian

Regular (September)	June 1	March 1
Winter (January)	October 1	July 1
Spring (May)	February 1	November 1
Summer (July)	April 1	January 1

Program Requirements

Program requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

Colloquium: A weekly colloquium is given by members of staff, post-doctoral fellows, or invited lecturers. All graduate students and fourth-year Honours students are expected to attend the colloquia.

Second language reading requirement: none

Expected time to graduate: 2 years

Ph.D. in Chemistry,
Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Only students holding M.Sc. degrees from Canadian universities will be admitted directly into the Ph.D. program. Other students will be admitted as M.Sc. candidates, with the option to transfer into the Ph.D. program after 1 year of satisfactory studies.

Application Deadlines

Potential Ph.D. students should explore the Chemistry Department website, prior to making formal application to the department of Chemistry. They are encouraged to submit the on-line information form found on the website. The following deadlines for receipt of complete application materials apply to potential students holding bachelors' degrees from Canadian and Non-Canadian universities.

Start Date Canadian Non-Canadian

Regular (September)	June 1	March 1
Winter (January)	October 1	July 1
Spring (May)	February 1	November 1
Summer (July)	April 1	January 1

Program Requirements

In addition to the minimum course requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, a minimum of three years (including the year spent in M.Sc. work) is required for the Ph.D. degree. Actual time spent is usually somewhat longer.

Colloquium: A weekly colloquium is given by members of staff, post-doctoral fellows, or invited lecturers. All graduate students and fourth-year Honours students are expected to attend the colloquia.

Second language requirement: none

Expected time to graduation: 4-5 years (from 4 year B.Sc.); 3 years (from M.Sc.)

Chemistry Course Descriptions

CHEM 7400 Topics in Biochemistry

(Formerly 002.740) A lecture and seminar course dealing with selected topics of current interest in biochemistry and molecular biology.

CHEM 7410 Spectroscopy and Molecular Structure

(Formerly 002.741) Applications of spectroscopic methods to chemical problems with emphasis on mass spectrometry and related techniques.

CHEM 7450 Topics in Organic Chemistry

(Formerly 002.745) A discussion of current and general topics related to novel and interesting areas of organic chemistry appearing in the current literature.

CHEM 7460 Topics in Synthetic Organic Chemistry

(Formerly 002.746) A course designed to acquaint students with specific methods of synthesis.

CHEM 7520 Topics in Physical Chemistry

(Formerly 002.752) The topics will vary, depending on student needs and interests; they may include, but will not be limited to the following: electrochemistry, surface chemistry, electrochemical kinetics, or other specialized topics not available in regular course offerings.

CHEM 7550 Design of Organic Synthesis

(Formerly 002.755) Conceptual methodology in the design of synthesis will be discussed with inclusion of computer-aided approaches. Examples from the current literature will be used to emphasize the conceptual aspects.

CHEM 7560 Organometallic Chemistry

(Formerly 002.756) Recent advances in synthetic and structural organometallic chemistry.

CHEM 7570 Recent Advances in Molecular Biochemistry

(Formerly 002.757) Selected topics from the recent literature on the structure and function of proteins and nucleic acids and their interactions.

CHEM 7580 Chemical Crystallography

(Formerly 002.758) Theory and practice of crystal structure analysis with emphasis on single crystal x-ray diffractometry; structure-activity relationships in small organic and inorganic compounds; introduction to protein and nucleic acid crystal structure analysis.

CHEM 7600 Topics in Inorganic Chemistry

(Formerly 002.760) Topics of current research interest in the area of inorganic chemistry including, but not limited to synthesis, structures, catalysis and reaction mechanisms.

CHEM 7700 Topics in Analytical Chemistry

(Formerly 002.770) Topics of current research interest in analytical chemistry including, but not limited to, mass spectrometry of large molecules, separation techniques, analysis of metals, surface analytical techniques, analysis of environmental samples, analysis of 'real' samples, and sampling techniques. Prerequisites: CHEM 4590 (or 002.347) or permission of instructor.

CHEM 7800 Topics in Theoretical Chemistry

(Formerly 002.780) Topics of current research interest in theoretical and

computational chemistry from such areas as ab initio quantum chemistry, molecular simulations, nonlinear reaction dynamics, spectroscopy and statistical mechanics.

CHEM 7900 Seminar in Current Research Issues in Chemistry
Student-led seminars covering areas of interest to the faculty and students in the graduate Chemistry program, and current research issues in the field of Chemistry (including biochemistry, spectroscopy, organic chemistry, physical chemistry, organic synthesis, organometallic chemistry, inorganic chemistry, analytical chemistry and theoretical chemistry).

City Planning ,

City Planning Program Info,

The department of City Planning is the oldest continuing planning school in Canada offering a program of studies leading to the Master of City Planning degree. The program provides opportunities to develop and enhance skills, often in service learning situations involving local clients. Students come from varied academic backgrounds and the curriculum is structured to satisfy the requirements of professional accreditation and to foster expertise in selected fields of study. In collaboration with the Manitoba Professional Planners Institute (MPPI), the program includes an internship of planning work. An optional mentoring program links the student with a volunteer from MPPI for discussions on career strategies or other matters.

The program is directed by four principles. The first, and the focus of the program, is the enhancement of the built and natural environments of cities and regions. The second principle, professionalism, is based on the understanding that students enter the program with the expectation of finding professional employment and of making their careers in planning or closely related fields. It leads to a focus on professional practice and responsibilities, and on the skills necessary to translate knowledge into effective action. The third principle is that planning is a multidimensional and multidisciplinary activity requiring highly transactive and collaborative outlooks and practices to advance strategies that are socially just and environmentally sustainable. The fourth principle is that scholarship constitutes a fundamental and lasting value for a planning career, and consequently there is emphasis on historical and theoretical aspects of development, research methods, clarity of critical thought and expression, and the relationships between planning thought and practice.

Fields of Research

- Community development; community design and participatory methods
- Gender issues in planning and design
- Housing studies; homelessness; low-cost housing strategies
- Planning practice; planning methods; integral praxis; placemaking
- Planning with Aboriginal communities
- Regional planning; city-regions; bioregionalism
- Transportation planning
- Urban ecology; sustainable planning; case studies of ecological innovation

Research Facilities

Graduate Studies

The Computer Aided Design Laboratory (CADLAB) is a major centre of research and hands on training offering cutting edge digital resources and an experienced complement of teaching and support staff. Extensive data bases provided by governmental and non-governmental sources are linked to GIS applications. The Architecture and Fine Arts Library, housed in the Russell Building, holds some 61,000 volumes dedicated to the planning, art and design disciplines represented in the University, including over 400 current periodicals. Over 100,000 35mm slides are available and electronic resources include networked bibliographic and full text resources. Studio space is provided in the Russell Building and Architecture 2, as well as occasionally on or near a study site.

Master of City Planning (M.C.P.),

Admission

Applicants must meet the entrance requirements of the Faculty of Graduate Studies as well as the City Planning admission requirements found on the City Planning website.

The department of City Planning allows students to begin their MCP program on either September 1st or, at the Department's discretion, January 1st.

For admission on these start dates, applications - with complete supporting documentation, should be sent to the Faculty of Graduate Studies by the following deadlines:

Start Date Canadian/US International

Regular - September/January 15th December 1st

Winter - January September 15th/a

Late applications may be considered if spaces become available after the main allocations.

Program Requirements

Applicants must meet the minimum program requirements of the Faculty of Graduate Studies. Additional detailed program requirements for City Planning are found on the City Planning website.

Degree Requirements:

Degree requirements: 45 credit hours total

Second language reading requirement: none

Expected time to graduation: two years

City Planning Course Descriptions

CITY 7020 Planning Methods and Techniques II

(Formerly 073.702) A survey of quantitative and qualitative methods and techniques used in planning analysis and decision making including sampling survey, case study, contingency and spatial analysis as well as phenomenological and simulation techniques and methodologies.

CITY 7030 Planning Theory 1

(Formerly 073.703) The principal ideas and ideals influencing planning thought and practice, ranging from rational comprehensive planning to theories of societal guidance, ethics and the human-environment interface.

CITY 7040 Planning Theory II

(Formerly 073.704) Dominant influences in urban and regional planning thought in Canada. Topics covered include the Commission of Conservation, Public Health Legislation and the Urban Reform Movement.

CITY 7070 Housing and Urban Revitalization

(Formerly 073.707) Housing and urban revitalization in the Canadian context. Housing demand and supply, structure of the housing market, Canadian housing policy, affordability and other selected housing issues; processes and strategies related to urban decline and revitalization.

CITY 7080 Landscape and Conservation

(Formerly 073.708) Applications of current theories in landscape ecology and conservation biology in the planning and management of public lands in urban and regional land use planning.

CITY 7160 Land Development

(Formerly 073.716) Application of theories and techniques of urban land development, formulation of industrial policies and financial and political implications of land development.

CITY 7170 Transportation

(Formerly 073.717) Transportation modes and systems: land, water, air. Traffic studies, planning principles, public issues and governmental policies.

CITY 7200 Urban Analysis

(Formerly 073.720) Theoretical framework for the dominant theories of urban structure, property and land-use relevant to city planning.

CITY 7270 Seminar in Regional Planning

(Formerly 073.727) An exploration of eco-regional planning drawing on concepts of city-states (or city-regions) and bioregionalism; including contemporary theme research, and a region-specific analysis to inform an understanding of regional planning's past, present and future.

CITY 7300 Urban Society

(Formerly 073.730) An interdisciplinary seminar on social policy and social planning in the contemporary urban setting. National, provincial and local contexts shaping the provision of welfare and well-being. Demonstration of selected social planning techniques. Application to current issues.

CITY 7310 Law and Local Government

(Formerly 073.731) Topics of common law, torts, real property, land use planning and control, expropriation, and local government, including some recent cases.

CITY 7340 Urban Development

(Formerly 073.734) The mechanics of urban development and its socio-economic implications and underlying political forces. Practical field experience is involved in the form of an internship.

CITY 7350 Thesis/Practicum Preparation

(Formerly 073.735) A preparatory course for students registered in thesis or practicum. Methods of constructing problems, formulating hypotheses, methods of investigation, sources of information, and appropriate form and content of thesis and/or practicum. This course is graded pass/fail.

CITY 7360 Development Process for Design Professions

(Formerly 073.736) Introduction to the development process and method. Site selection and planning. Feasibility and case studies. The dynamics of development teams, including marketing strategies and management of completed projects. Joint public and private enterprises.

CITY 7370 Urban Design

(Formerly 073.737) Theory and concepts of urban design from historical and contemporary perspectives. Urban design seen as (a) a multidisciplinary activity, (b) conscious three-dimensional design, and (c) process and public policy. Implementation and control techniques of urban design. Case studies.

CITY 7410 Planning Design 1

(Formerly 073.741) Studio/workshop developing problemsolving techniques and design skills in an area subject to environmental, social and economic change. Preparation of a planning report comprising of research and analysis, evaluation of feasible alternative strategies and designs, synthesis and recommendations for Graduate Studies

implementation. Case studies from planning journals and planning practice in cities and regions.

CITY 7420 Planning Design 2

(Formerly 073.742) Studio/workshop building upon CITY 7410 (or 073.741) as applied to an area of greater complexity, requiring the evaluation and integration of contributions from several planning-related disciplines. Selected projects emphasize both the multidisciplinary and interdisciplinary nature of planning, and in the resolutions of the problems posed. Case studies from planning journals and planning practice in cities and regions.

CITY 7430 Planning Design 3 (Urban Design)

(Formerly 073.743) The application of urban design theories and techniques to a large scale urban area of complex land uses and community development issues. The studio is also open to advanced students in architecture, landscape architecture and interior design and develops a broad approach to multi-disciplinary problemsolving design solutions.

CITY 7440 Planning Design 4

(Formerly 073.744) Advanced planning design studio/workshop, experimental and innovative in approach and content, involving special techniques and skills. Studio may also be off-campus and/or focussed on a special topic centred around a distinguished guest expert.

CITY 7450 Concepts in Sustainable Planning and Design

(Formerly 073.745) Examination of the concepts and theories involved in the development of sustainability as a force in socio-economic and environmental decision-making. Explores the implications of sustainability for contemporary design and planning thought and practice.

CITY 7460 Urban Ecology and Environmental Management

(Formerly 073.746) Theoretical frameworks and theories in urban ecology and environmental management as they apply to municipal institutional frameworks and the role of environmental planning in urban and regional government.

CITY 7470 Professional Planning Practice

(Formerly 073.747) An examination of the professional practice and praxis of planning, presented in collaboration with the Manitoba Association of the Canadian Institute of Planners, emphasizing the practice aspects of planning processes, and the political, institutional and legal systems that direct and/or inform planning.

Civil Engineering

Civil Engineering ,

Civil Engineering Program Info,

The Department of Civil Engineering offers programs of coursework and research leading to the Master of Science, Master of Engineering and Doctor of Philosophy in: environmental engineering; geotechnical engineering; structural engineering; transportation engineering and water resources engineering.

Research Facilities

Environmental Engineering Equipment and Facilities: The environmental engineering program and laboratory offer the latest in instruction and facilities for studying the physico-chemical and biological transformation of pollutants in water, wastewater and solid waste. In particular, the program aims at developing the principles of reactor and process engineering for the treatment of water, industrial and municipal wastewater and solid waste. State-of-the-art analytical equipment includes high performance liquid chromatographs with a variety of detectors, gas chromatographs, automated ion analyzers, atomic absorption spectrophotometer, carbon analyzer, microbial toxicity analyzer and others. Spacious laboratories allow for bench scale testing of various process conditions in four controlled temperature environmental chambers. Present research interests include biological nutrient removal, volatile acids fermentation, solid stream processing through aerobic and anaerobic digestion, co-digestion and co-composting of municipal and industrial solid waste, biodegradation of hazardous pollutants, treatment in cold climates, pesticide waste treatment; surface and groundwater treatment processes, and upgrading of municipal and industrial treatment plants.

Geotechnical, Hydrogeology and Geoenvironmental Engineering Equipment and Facilities: Equipment in the geotechnical laboratories reflects the research interests

of the department's staff in the engineering behaviour of a wide range of naturally occurring materials. In addition to the normal range of consolidation, direct shear and triaxial shear test facilities, specialized facilities have been provided for studies on swelling clays, at high pressures and temperatures, granular soils, and hard crystalline rocks.

The clay testing program involves stress-controlled tests to investigate the distinction between yielding and rupture in carefully sampled natural clays, and the effects of load duration and temperature on soil behaviour. Applications include estimating settlements of foundations, embankments, and tanks and the stability of slopes and excavation. Additional work involves the development of appropriate constitutive models for soil behaviour, and the measurement of hydraulic conductivities for retention structures.

An environmental chamber permits testing of soil samples under freezing conditions. A well-equipped geotechnical computing laboratory provides support for numerical analysis in soil mechanics, rock mechanics and hydrogeology. It also supports data presentation and report preparation in experimental programs. In rock mechanics, equipment is available for performing tests for Brazilian tension, flexure, uniaxial compression, triaxial compression, static fatigue, creep in both tension and compression, and the double torsion test used in fracture mechanics. Present research interests concentrate on the relationship between crack growth, stress level and time, with special emphasis on microstructural processes in the rock.

The geoenvironmental engineering laboratory has the equipment to characterize landfill construction materials, leachates, and hazardous wastes. Current research focuses on hazardous waste containment, soil bioremediation, and aerobic composting.

The focus of the hydrogeology research efforts is directed towards modelling and simulation of groundwater and contaminant transport. Resources are also directed at sustainable aquifer development within the Manitoba environs.

With current developments in computer technology and its associated impacts on geotechnical engineering, the University of Manitoba has kept up by providing graduate students in geotechnical engineering with state-of-the-art computer facilities. The geotechnology computer facility at the University of Manitoba has 8 personal computers, 3 SPARC workstations, all connected on a local area network with T1 Internet access 24 hours a day.

Structural Engineering Equipment and Facilities: The research facilities include concrete, structural, and materials laboratories covering approximately 7500 sq. ft. A Structural Engineering and Construction Research and Development Facility adds 2500 sq. ft. and includes a 23-ton overhead crane, as well as a 1,200,000-lb.-capacity MTS servo-controlled loading system. The new facilities enable the testing of full-scale specimens. Also in the structural laboratory are a 600,000-lb. Baldwin testing machine, a 60,000-lb. Riehle testing machine and a 30,000-lb. Baldwin testing machine. A number of jacks and loading frames are also available which can be attached to two strong floors and allow a wide range of loading assemblages to be set up easily. The laboratory also houses an MTS servo-controlled loading system, with a 220,000-lb. test frame and one fixed and one portable actuator, which can be used for programmed cyclic and fatigue testing. The materials laboratory contains an environmental cabinet and a freeze/thaw cabinet which are used to study the behaviour of materials under a wide range of temperatures and humidity. Three high-speed computer-controlled data acquisition systems are available for both laboratory and field testing.

Theoretical and Applied Mechanics Equipment and Facilities: Research Facilities in Theoretical and Applied Mechanics include several workstations and a variety of engineering analysis software. Current research is directed toward investigation of non-destructive evaluation of flaws in plate and shell structures, dynamics of electrical transmission lines and communication towers; finite and boundary element analysis, and mechanics of piezo ceramics, shape memory alloys and smart structures.

Water Resources Engineering Equipment and Facilities: The Hydraulics Research and Testing Facility (HRTF) has an area of 780 sq m and supports both physical and numerical modelling in hydraulics. The physical modelling laboratory houses a constant-head tank (500 l/s capacity), a 15 m variable slope flume, a 14 m hydraulic

model flume, and a 34 m random wave flume. Floor space is available for the study of hydraulic structures and river models. The facility is also equipped with a range of modern instrumentation including acoustic Doppler velocimeters (3 component), hot-wire probes, servo-motor positioning systems, electronic discharge monitoring with inline volumetric tanks for calibration, and high speed data acquisition equipment. All of the computers in the physical modelling laboratory are networked to the facility's computer lab. A counter-rotating flume and cold room (to -30 C) are used to study hydraulics of frazil and anchor ice. A digital image acquisition and processing system complement the facility's ice research equipment. The HRTF computer laboratory has a number of high-end Pentium based PCs for numerical modelling. Software is available for 2D finite-element modelling of rivers and lakes, sediment transport modelling, and 2D modelling of wind generated wave fields.

The Hydrologic Processes Laboratory (HPL) supports research dealing with the management and analysis of spatially distributed in situ and remotely sensed data, for solving complex, large-scale problems of hydrology. The facility has several PC machines linked to a main UNIX workstation. A wide variety of software is available within HPL, including ARC/INFO, Arcview and other GIS, as well as ENVI software for processing remotely sensed data. The emphasis of research carried out in the facility is in distributed hydrological modelling, operational hydrology, and environmental monitoring using remotely sensed data.

M.Sc. in Civil Engineering, Admission

For admission into the Master of Science program, applicants are required to hold a bachelor's degree in Civil Engineering from a recognized university. Applicants with other engineering degrees or with honours degrees in related areas may also be accepted at the discretion of the department head and the dean of the Faculty of Graduate Studies. In certain cases acceptance may initially be limited to pre-Master's study. Please contact the Department for details.

Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 4 months prior to their intended start date. International students should submit their application and supporting documentation to the Department of Civil Engineering at least 7 months prior to their intended start date.

Program Requirements

The Master of Science degree is attainable only through coursework and thesis. Minimum Program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this calendar. M.Sc. students are required to spend at least one academic session in full-time resident graduate study. On recommendation of the department and the Faculty Graduate Committee, the residence requirement may be waived in special cases.

A minimum of 18 credit hours of coursework is required with at least 12 credit hours at the 7000 level. The coursework program would normally include 6 credit hours of ancillary courses from other than the candidate's discipline. These ancillary courses could include courses from the department or courses from another department, normally at the 4000 level. Depending upon the student's background, the student's advisor may require the student to take 3000 level or additional 4000 level (and in exceptional circumstances, 2000 level) courses in major or ancillary fields of study which would not count towards the minimum 18-credit hour requirement. The candidate is required to make an oral presentation on the completed M.Sc. thesis to the Examining Committee, and to pass an oral examination.

The maximum time allowed for the completion of the Master's degree is 5 years.

Second language reading requirement: none

Expected time to graduate: two years

M.Eng. in Civil Engineering

The Master of Engineering (M.Eng.) program provides an industrially oriented program for practicing engineers who wish to continue their studies on a broad base. The program also facilitates continuing education for credit.

Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Department of Civil Engineering at least 4 months prior to their intended start date. International students should submit their application and supporting documentation to the Department of Civil Engineering at least 7 months prior to their intended start date.

Program Requirements

It is desirable that full-time students have one or two years of engineering experience. The minimum requirement for the award of the Master of Engineering degree is 30 credit hours. The degree can be obtained through two different options:

Option 1

Coursework Alone/Comprehensive Examination

The minimum requirement of 30 credit hours can be met by coursework alone with at least 18 credit hours at the 7000 level. The program should include 6 credit hours of ancillary coursework from other than the candidate's discipline. These ancillary courses could include courses from the department or courses from another department, normally at the 4000 level. Depending upon the student's background, the student's advisor may require the student to take 3000 level or additional 4000 level (and in exceptional circumstances, 2000 level) courses in his/her major or ancillary field of study which would not count towards the minimum 30-credit-hour requirement.

Students must pass a Comprehensive Examination (GRAD 7010).

Option 2

Coursework and Project and Report

The minimum requirement of 30 credit hours can be met by a combination of coursework and an engineering report, with at least 12 credit hours at the 7000 level. Of the 30 credit hours, 6 credit hours will be assigned to an approved project and report. The program should include 6 credit hours of ancillary coursework from other than the candidate's discipline.

These ancillary courses could include courses at the 4000 level from the Department of Civil Engineering or from another department, normally at the 4000 level. Depending upon the student's background, the student's advisor may require the student to take 3000-level or additional 4000 level (and in exceptional circumstances, 2000 level) courses in the major or ancillary field of study which would not count towards the minimum 30- credit-hour course requirement.

The candidate is required to give an oral presentation on the project at about the time the report is submitted.

Second language requirement: none

Expected time to graduation: Two years

Graduate Studies

Ph.D. in Civil Engineering, Admission

Admission to the Ph.D. program is normally from the Master's degree level, i.e., M.Eng. or M.Sc. Students making exceptional progress while enrolled in either the M.Eng. or M.Sc. program may be transferred to the Ph.D. program by the dean of the Faculty of Graduate Studies upon the recommendation of the department head based on recommendations from the student's advisor and an appointed Selection Committee. In such cases, the program credit-hour requirements shall be decided in conjunction with the transfer.

Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 4 months prior to their intended start date. International students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 7 months prior to their intended start date.

Program Requirements

Minimum Program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this calendar. The Ph.D. program consists of coursework, original research and thesis. Normally, 12 credit hours of coursework (all at the 700/7000 level) are required beyond the Master's degree or its equivalent. The minimum time requirement is two calendar years of full-time study and research, of which at least one academic year must be spent on campus. For research projects conducted off-campus, the student must be geographically proximate to the campus and visit it regularly.

Second language requirement: none

Expected time to graduation: Four years

<http://crscalprod1.cc.umanitoba.ca/CivilEngineering.catx>

Civil Engineering Course Descriptions

CIVL 7010 Modern Railway Engineering

(Formerly 023.701) A course in aspects of the design, construction, and operation of modern railways, examining main lines, branch lines, and terminals.

CIVL 7040 Analysis and Design of Freight Transport Systems

(Formerly 023.704) Overview of the structure and organization of Canada's freight transport system; measurement, analysis and forecasting of freight movements; transportation system performance; operating, service and cost characteristics of freight transport systems; design considerations for freight handling facilities; case studies in analysis and design of freight transport systems. Prerequisite: CIVL 4840 (or 023.484) or permission of the instructor for non-engineering students specializing in transport studies.

CIVL 7050 Transportation Engineering in Developing Regions

(Formerly 023.705) Aspects of transportation in developing regions that differ significantly from those of conventional North American practice. Factors and assumptions in developing region context; analysis and design of surface transportation systems and components in developing regions; special aspects of professional practice; case studies from Third World and northern Canada.

CIVL 7060 Analysis and Design of Passenger Transport Systems

(Formerly 023.706) Passenger travel forecasting principles and techniques; demand models; passenger transportation system performance; vehicle cycles; cost functions; congestion; evaluation; examination of case studies.

CIVL 7090 Water Resources Systems

(Formerly 023.709) The application of operations research/systems analysis techniques to water resources and urban and environmental systems. Prerequisite: permission of instructor.

CIVL 7100 Prestressed Concrete

(Formerly 023.710) A study of the analysis and design of prestressed concrete structures; pre-tensioning; post-tensioning; importance of material properties; modern design specifications.

CIVL 7140 Structural Masonry

(Formerly 023.714) Masonry materials, properties and behaviour. Plain and reinforced masonry, axial load, flexure, combined loading. Design methods, building code developments, building design.

CIVL 7150 Deformation and Fracture of Rocks

(Formerly 023.715) Physical properties of rock and rock masses. Mechanism of deformation and fracture at the microscopic, laboratory and field scales of investigation. The measurements of strength and deformation in the laboratory and the field. Time dependent deformation: creep and static fatigue.

CIVL 7170 Modelling of Surface Water Quality Development

(Formerly 023.717) Application of water quality models for lakes, rivers, estuaries and reservoirs. Derivation of differential equations of pollutant transport; kinetic relationships for physical and chemical transformation of substances; numerical and analytical solutions to transport equations; and calibration and verification of models.

CIVL 7190 Solid Mechanics

(Formerly 023.719) Cartesian Tensors, analysis of stress and strain, constitutive relations, formulation and solution of problems in 2-D and 3-D elasticity, Hankel integral transforms, plasticity; yield surface and criteria, flow rule, plastic potential, hardening, viscoelasticity; creep, relaxation, basic viscoelastic models, stress-strain relations, correspondence principle.

CIVL 7200 Topics in Environmental Engineering

(Formerly 023.720) Includes topics such as energy and the environment, solid waste management, and environmental problems in transport. Topics are studied through case histories of contemporary issues.

CIVL 7210 Solid Waste Composting and Disposal

(Formerly 023.721) Advanced engineering principles related to resource recovery and solid waste disposal. Biological conversion technologies and the disposal of solid wastes are discussed in detail.

CIVL 7260 Behaviour of Reinforced Concrete Members

(Formerly 023.726) Study of the actual behaviour and strength of reinforced concrete members; examination of recent significant publications, correlation to research with current design specifications and codes.

CIVL 7270 Boundary Element Method

(Formerly 023.727) Review of approximate methods, direct boundary element formulations, fundamental solutions, computer implementation of fictitious stress and displacement discontinuity methods, applications in stress analysis, geomechanics, fracture mechanics and fluid mechanics.

CIVL 7280 Intelligent Decision Support in Water Resources

(Formerly 023.728) Decision support systems; basic concepts of artificial intelligence and expert systems in water resources; theory, software and testing examples for intelligent decision support systems in water resources. Prerequisite: CIVL 2780 (or 023.278), CIVL 7090 (or 023.709) and/or permission of instructor.

CIVL 7300 Use of Fibre-Reinforced Polymers (FRP) in Structural Design

Fibre-reinforced polymers (FRP) constituents and properties; design of concrete structures internally reinforced with FRP, concrete members prestressed with FRP, externally bonded FRP laminates for strengthening and rehabilitation of structures; construction details and case studies of projects using FRP reinforcement.

CIVL 7320 Topics in Groundwater Hydrology

(Formerly 023.732) A review of pertinent literature; current issues in groundwater hydrology.

CIVL 7350 Topics in Advanced Structural Engineering

(Formerly 023.735) Lectures and seminars on selected advanced topics in structural engineering; current problems; implications on current research.

CIVL 7360 Landslides and Slope Failures: Identification, Causes, and Control

(Formerly 023.736) Slope movement types and processes in soil and rock masses; recognition and identification: factors influencing stability; field investigation and instrumentation; strength properties and their measurement; stability analysis; assessment of hazard and risk analysis; stability in open pit mining; remedial measures including stabilization, protection, and warning.

CIVL 7380 Case Studies in Soils Engineering

(Formerly 023.738) Geomorphic regions and soil types in Canada related to engineering performance; case studies of foundations, excavations, tunnels, earth and rockfill dams; retaining structures, and geoenvironmental projects using a seminar approach; cold regions engineering geosynthetics. Examples will be taken from published records of the performance of construction projects in Canada.

CIVL 7400 Finite Element Method in Engineering Mechanics

(Formerly 023.740) Review of flexibility and stiffness methods; concept of finite elements and energy formulations; various shape functions; solutions of planar and three-dimensional elasticity problems; beams, plates and shells; special problems, e.g., seepage, non-linear material.

CIVL 7420 Advanced Methods of Structural Analysis

(Formerly 023.742) Review of matrix algebra; efficient solution of large sets of equations; vector and matrix transformations; force-displacement relationships; the direct stiffness method; the flexibility method; non-linear structural analysis; special topics.

CIVL 7430 Special Topics in Geotechnical Engineering

(Formerly 023.743) A tutorial approach to the study of topics in soil, rock and ice engineering not covered in the formal coursework.

CIVL 7450 Soil Properties and Behaviour

(Formerly 023.745) Testing methods for strength, compressibility and hydraulic conductivity of engineering soils; traditional models for soil characterization; introduction to hypoelastic and elastic plastic modelling; extension of models to account for strain-rate, temperature, and unsaturation; influence of soil chemistry; relationship between laboratory results and computational needs.

CIVL 7460 Geotechnical Design with Geosynthetics

(Formerly 023.746) Properties and test methods of geosynthetics (i.e., geotextiles, geogrids, geomembranes, geonets and geocomposites); functions of geosynthetics (separation, reinforcement, filtration, drainage and containment); design of reinforced soil structures (retaining walls, slopes, embankments and unpaved roads); design of filtration and drainage works; design of lined waste containment facilities; case histories.

CIVL 7480 Soils Engineering

(Formerly 023.748) Analysis and design for construction in engineering soils: review of soil strength and compressibility, site characterization, stability and settlements of shallow foundations, deep foundations, earth retaining structures, slope design and remediation, earth dams. Emphasis will be placed on published records comparing predictions with field performance.

CIVL 7490 Rock Engineering

(Formerly 023.749) Review of strength of intact and discontinuous rock masses; energy changes due to excavation; weathering and residual materials; site investigations; rock mass classifications; blasting; rock slopes, surface subsidence due to underground excavation or natural phenomena; rock cuts and support; structural foundations on rock; field instrumentation.

CIVL 7530 Environmental Geotechnology

(Formerly 023.753) Application of geotechnical engineering solutions to environmental problems. Physical-chemical principles of clays, clay mineralogy; influence of pore fluid chemistry; engineering behaviour of compacted clay soils; coupled fluid flow; geotechnical aspects of waste disposal/storage; design, construction and maintenance of tailing dams, ponds, sewage lagoons and landfills.

CIVL 7600 Water Quality Management

(Formerly 023.760) Water quality modelling; management options for water quality

planning; treatment options and management schemes.

CIVL 7610 Special Topics in Theoretical and Applied Mechanics (Formerly 023.761) Lectures and seminar on selected advanced topics in the field of mechanics; current problems and research.

CIVL 7650 Selected Topics in Water-Resources Development (Formerly 023.765) Lectures and seminars on selected advanced topics in water-resources engineering.

CIVL 7660 River Engineering (Formerly 023.766) Classification of rivers; regime of river channels; channel patterns, sediment transport; design of stable channels; engineering interference (diversions, dams, dredging); river training works; hydraulic-model studies of rivers.

CIVL 7680 Soil/Ground Improvement Techniques (Formerly 023.768) Analysis and design of mechanical and chemical treatment techniques commonly applied to problem foundation soils for civil engineering structures. Mechanical modification; hydraulic modification; modification by admixtures; modification by reinforcement and confinement; in-situ evaluation of soil improvement and monitoring.

CIVL 7700 Water Resources Planning (Formerly 023.770) Principles and methodologies of planning water resources development projects. An evaluation of a major multi-purpose project from interdisciplinary viewpoints, incorporating those of designers, planners, critics and political decision makers. Offered in alternate years.

CIVL 7710 Coastal Hydraulics (Formerly 023.771) Mechanics of wave motion; wave and water level predictions; types and design of coastal protection; littoral processes.

CIVL 7720 Groundwater and Solute Transport Modelling (Formerly 023.772) The physics and numerical solution of mathematical models of steady-state and transient groundwater flow and mass transport in the saturated and unsaturated zones; introduction to the finite difference and finite element methods; popular software; other modelling techniques, including random-walk particle methods; modelling groundwater contamination; non-linear problems; applications to regional groundwater flow and groundwater recharge, aquifer resource evaluations, contamination prediction.

CIVL 7730 Groundwater Engineering (Formerly 023.773) The role of geology and hydrogeology in the siting, design of engineering structures; synthesis of groundwater mechanics in various geologic environments; case studies in construction dewatering, groundwater resource evaluation, subsidence, seepage in dams and foundations and slope stability; basic review of analytic solutions and numerical methods.

CIVL 7740 Special Topics in Hydrology (Formerly 023.774) Selected topics examining the statistical aspects of hydrology. Time series analysis; disaggregation processes; flood frequency analysis; analysis of extremes.

CIVL 7750 Advanced Civil Engineering Systems (Formerly 023.775) Optimization of Civil Engineering Systems. Use of linear and dynamic programming and network theory in all aspects of civil engineering. Introduction to the use of stochastic processes in operations research. Particular emphasis is given to water resources and environmental and transportation engineering.

CIVL 7760 Recent Developments in Bridge Engineering and Structural Health Monitoring Introduction to Intelligent Sensing for Innovative Structures (ISIS); Introduction to Civionics and Structural Health Monitoring; Sensors and Data Acquisition Systems; Theoretical Evaluation of Bridge Decks; Theoretical Evaluation of Cantilever Slabs; Theoretical Evaluation of Girders; Theoretical Evaluation of Columns; Bridge Inspections and Maintenance; Conceptual Design and Aesthetic Design of Bridges.

CIVL 7770 Hydrological Processes (Formerly 023.777) Runoff generation and runoff modelling; scale effects in hydrology; ramifications of distributed and lumped approaches; computer models of watershed modelling; optimization schemes and minimization functions; special

concerns dealing with digital elevation models.

CIVL 7780 Advanced Behaviour and Design of Steel Structures (Formerly 023.778) Behaviour and design of welded thin-walled members; plate girders, composite construction, beam-columns, and connections. Special topics such as stability of metal structures and bracing requirements are also covered.

CIVL 7790 Pavement Evaluation and Performance (Formerly 023.779) Pavement classification, pavement management, performance measures, condition surveys, sensor technology, material sampling, test methods on asphalt binders and unbound layers, non-destructive testing, sources of variability, pavement maintenance, rehabilitation, long-term performance.

CIVL 7800 Design of Light Industrial Steel Buildings (Formerly 023.780) Design criteria for metal building systems; behaviour and design of tapered and prismatic built-up columns and girders; design of gable frames; behaviour and design of cold-formed members; bracing requirements for metal buildings and design of connections.

CIVL 7820 Operational Hydrology (Formerly 023.782) Hydrographic analysis; relation between the physical processes and the hydrograph; estimation and prediction. Floods; statistical analysis; maximum probable floods. Water supply; estimates of dependable flow, simulation, synthetic flow series, statistical analysis.

CIVL 7840 Traffic Systems Analysis (Formerly 023.784) Mathematical theories of traffic flow, introductory queueing theory with application to traffic performance at intersections; travel forecasting principles and techniques; the use of simulation in traffic engineering design.

CIVL 7850 Advanced Structural Dynamics Responses of single-degree-of-freedom and multi-degree-of-freedom systems, damped and undamped systems, linear and inelastic systems to dynamic excitations; free vibration, forced vibrations. Special emphasis on responses of civil structures to seismic and blast loadings.

CIVL 7860 Structural Stability (Formerly 023.786) Elastic and inelastic stability of columns and frames; equilibrium, energy and dynamic methods of analysis, approximate solutions; beam-columns; torsional instability of thin plates.

CIVL 7870 Advanced Engineering Analysis (Formerly 023.787) Analytical techniques used in engineering, including such topics as the application of complex variables, partial differential equations, generated Fourier series, integral transforms, and special functions, to advanced problems in civil engineering.

CIVL 7880 Continuum Mechanics (Formerly 023.788) Selected topics in non-linear mechanics (e.g., generalized tensors, viscoelastic constitutive equation, strain gradient, micropolar theories of elasticity; coupled mechanical and thermal or electromagnetic phenomena, continuum thermodynamics, waves, surfaces of discontinuities.

CIVL 7910 Sanitary Chemistry (Formerly 023.791) Physical, inorganic, and organic chemistry topics as related to water and waste handling and treating.

CIVL 7920 Theory of Water Treatment (Formerly 023.792) Physical and chemical characteristics of water; water treatment processes including coagulation/flocculation, sedimentation, filtration, softening, adsorption, ion exchange, disinfection, and membrane processes.

CIVL 7930 Theory of Waste Treatment (Formerly 023.793) Characteristics of waste-specific and generic determinations; unit operations and unit process for physical, chemical and biological treatment and transformation of particulate and dissolved contaminants. Biochemical transformations and degradation of hazardous pollutants; unit processes for enhanced nutrient removal and hazardous waste treatment. Full treatment trains for industrial and municipal waste treatment, including solids handling. Prerequisite: CIVL 3700 (or 023.370) and CIVL 3690 (or 023.369) or permission of instructor.

CIVL 7950 Environmental Engineering Laboratory (Formerly 023.795) Laboratory work in water and wastewater analysis and

treatment processes related to water quality management. Prerequisites: CIVL 7930 (or 023.793) and CIVL 7920 (or 023.792).

CIVL 7960 Environmental Engineering Design
(Formerly 023.796) Design of unit operations. Planning, cost effectiveness analysis, and conceptual design of a whole wastewater treatment plant. Prerequisites: CIVL 7930 (or 023.793).

CIVL 7970 Water Resources Project Design
(Formerly 023.797) Planning and studies and preliminary design of a number of hydraulic structures such as large storage dams with appurtenant works, river diversion works for flood control, hydroelectrical plants, conveyance canals, and irrigation distribution works.

CIVL 7990 Special Topics in Transportation
(Formerly 023.799) Lectures and seminars on selected topics in transportation not covered in the formal coursework.

Classics

Classics ,
Classics Grad Program Info,

The department provides programs of study leading to the degree of Master of Arts in several areas of classical studies that include Greek and Roman art and archaeology, Greek and Roman history and historiography, and Greek and Latin languages and literatures. The department attempts, within the range of expertise of its personnel, to tailor the M.A. program to the particular interests and needs of the individual student. In many instances the M.A. is planned as a preparation for admission to a Ph.D. program in another university. In the past students have had good success in proceeding to doctoral programs in leading North American and British universities.

Fields of Research

- Greek and Roman art history and archaeology, with particular strengths in Roman North Africa, Greek ceramics and Late Antique sculpture
- Greek literature, especially lyric and dramatic poetry, philosophical literature and Hellenistic poetry and prose
- Greek language: history and lexicology
- Latin literature, especially epic and dramatic poetry
- Greek and Roman historiography
- Greek and Roman economic history
- Greek thought and intellectual history

Research Facilities

The university library's holdings are supplemented locally by those of the University of Winnipeg. Both institutions have collected classical monographs and periodicals for over a century. Together they maintain subscriptions to a respectable number of current periodicals representing all fields of classical studies. Through the library, students have electronic access to an ever-increasing list of materials such as the Patrologia Latina. The department holds licenses for the Thesaurus Linguae Graecae data-base and the Packard Humanities Institute's data-bases for Latin literature and for documentary papyri and inscriptions.

The department holds an institutional membership in the American School of Classical Studies in Athens and the Canadian Institute in Greece. The American School makes course and field-work opportunities available to students and also gives them access to various research resources including its excellent library. Field archaeologists in the department occasionally offers credit courses and opportunities for field-experience at their overseas excavations or surveys in such places as Greece, Ukraine and North Africa.

M.A. in Classics,

Admission

In addition to the minimum admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar,
Graduate Studies

demonstrated proficiency in ancient Greek and Latin and an honours B.A. or its equivalent in Greek, Latin or Classics is a prerequisite for admission to the M.A. Program.

Application Deadlines

The deadline for students to submit their application and supporting documentation to the Faculty of Graduate Studies is March 1 prior to the intended start date. However, students who wish to be considered for financial assistance from the University of Manitoba must submit their application and supporting documentation no later than January 15 prior to the intended start date.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this calendar. Course work will normally include 12 credit hours at the 7000 level, but students may be required to complete further courses. Students are required to pass one Greek reading exam and one Latin reading exam on prescribed texts, normally at the end of the first year of their programs. A knowledge of French and/or German is not required but is desirable.

Language Reading Requirements: Latin and Greek

Expected Time to Graduate: Two years.

Ph.D. in Classics,
There is no Ph.D. program in the Department of Classics.

Page URL,
<http://crscalprod1.cc.umanitoba.ca/Classics.catx>

Classics-Course Descriptions-Greek

GRK 7100 Greek Literature 1

A reading course involving a selected Greek author or authors, or a set of related works.

GRK 7102 Greek Literature 2

A reading course involving a selected Greek author or authors, or a set of related works.

GRK 7110 Greek History

This course will investigate aspects of Greek history, emphasizing different topics, sources, and theoretical approaches. Possible focuses for the course include a period of Greek history, or a particular region of the Greek world.

Classics Course Descriptions-Latin

LATN 7200 Latin Literature 1

A reading course involving a selected Latin author or authors, or a set of related works.

LATN 7202 Latin Literature 2

A reading course involving a selected Latin author or authors, or a set of related works.

LATN 7210 Roman History

This course will investigate aspects of Roman history, emphasizing different topics, sources, and theoretical approaches. Possible focuses for the course include a period of Roman history, or a particular region or province of the Roman Empire.

Classics Course Descriptions-Classics

CLAS 7300 Topics in Greek Art and Archaeology

This course will investigate aspects of Greek art, archaeology, and material culture, emphasizing different topics, methods, genres, or theoretical approaches. Possible focuses for the course include vase painting and other ceramic artifacts, sculpture, architecture, the archaeology of particular regions, and archaeological approaches to the economy and other issues in social history.

CLAS 7302 Topics in Roman Art and Archaeology

This course will investigate aspects of Roman art, archaeology, and material culture, emphasizing different topics, methods, genres, or theoretical approaches. Possible focuses for the course include sculpture, architecture, mosaics, wall painting, the archaeology of particular regions, and archaeological approaches to the economy and other issues in social history.

CLAS 7310 Readings in Selected Topics 1

Intensive study of one or more authors in Greek or Latin literature or of a special topic in ancient history.

CLAS 7320 Readings in Selected Topics 2

Intensive study of one or more authors in Greek or Latin literature or of a special topic in ancient history.

Community Health Sciences

Community Health Sciences ,

Community Health Sciences Program Info,

CHS offers broad, multidisciplinary, graduate training at the Diploma, Master and Doctoral levels in the concepts and methods of the population-based health sciences and their application in the practice of public health and preventive medicine. In addition to training in the core areas of epidemiology, biostatistics and the social sciences as applied to health (anthropology, economics, sociology and political science), students have an opportunity to obtain advanced training in internationally recognized research programs conducted by specialized units within the department such as the Manitoba Centre for Health Policy, the Centre on Aging, the Section of First Nations, Metis and Inuit Health and the Centre for Global Public Health. As a result graduate students have the opportunity to access both internationally regarded researchers and award winning teachers.

The Doctoral (Ph.D.) program is designed to produce individuals who will teach in the community health sciences; train other researchers, design and execute major research projects; and serve as senior advisors and consultants in the area of health care policy and planning.

In contrast, our two Master's programs, the Master of Science (M.Sc.) and Master of Public Health (M.P.H.) degrees, are intended to satisfy the demand of local, regional, provincial and federal health departments for trained community health professionals. Both Master's level programs provide core training in epidemiology, public health, health policy planning, and health administration. The M.Sc. program has a research focus requiring completion of a thesis while the M.P.H. program has a field-placement / practicum integrating applied public health concepts.

The Diploma in Population Health (Dip.P.H.) program is intended to provide senior clinicians in teaching hospitals and managers in provincial and regional health authorities with a set of core knowledge and skills in the population health sciences which will allow them to become more effective consumers and utilizers of health research data.

Program graduates currently occupy faculty positions in medical, dental, nursing and medical rehabilitation schools in Canada, the United States and overseas. Others work in government at the provincial and federal levels as medical officers of health, and as directors of research and planning programs. Some graduates have returned to primarily clinical positions in a variety of health disciplines while others have become independent consultants in health services planning and evaluation.

Fields of Research

Researchers in the department are involved in a wide range of research activities in community health. Many have achieved national, and in some cases, international

reputation in their fields. Particular areas of strength are health services research, health policy planning, northern and aboriginal health, occupational and environmental health, women's health, disability issues, aging and health, the epidemiology of infectious diseases and the epidemiology of chronic diseases.

Researchers are also actively working in areas such as health promotion, HIV/AIDS prevention, medical anthropology, health education and socioeconomic factors in health. In addition, several researchers in the department have active interests in Global Health with projects currently running in India and Kenya.

The department has researchers with high levels of expertise in both qualitative and quantitative research methodologies. The opportunity for graduate students to work with researchers in both research paradigms represents a major strength of the program.

Research Facilities

The ability to seamlessly interact with internationally regarded research groups within the department creates an extremely rich graduate research environment. Through the Manitoba Centre for Health Policy graduate students have potential access to administrative health databases which are unique in Canada.

The department maintains a graduate student computer resource centre supporting a broad range of statistical, graphical and information processing software. The department also maintains a suite of carrels that provide a dedicated study centre for its graduate students.

Ph.D. in Community Health Sciences,

Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. The Ph.D. program is open to individuals with thesis-based M.A. and M.Sc. degrees.

The deadline for receipt of the application form and supporting documents is early January.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this calendar. Eighteen credit hours of coursework from 7000-level courses (six from required courses, twelve from electives), candidacy examination and thesis. (In addition, eighteen credit hours of prerequisite courses, or their equivalents, must have been completed before entering the program or in the first year).

Second language requirement: none

Expected time to graduation: three years full-time, five years part-time

M.Sc. in Community Health Sciences,

Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. The M.Sc. program is open to individuals with four year degrees in the health sciences or professions or with honours degrees in the biological or social sciences.

The deadline for receipt of the departmental application form and supporting documents is early January.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this calendar. Thirty credit hours of course work from 7000-level courses (eighteen from required courses, twelve from electives) and thesis.

Second language reading requirement: none

Expected time to graduate: two years full-time, four years part-time

M.P.H. in Community Health Sciences, Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. The M.P.H. program is open to individuals with four-year degrees in the health sciences or allied health professions or with honours degrees in the biological or social sciences, and a minimum of three years experience working in a field of health.

The deadline for receipt of the departmental application form and supporting documents is early January.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this calendar. The M.P.H. program consists of completion of core courses, elective courses and a supervised field placement component. Thirty credit-hours from 7000-level courses will be required for completion of the degree: twelve credit hours from core courses and eighteen credit hours from elective courses. The field placement is a zero credit hour component.

Second language reading requirement: none

Expected time to graduate: two years full-time, four years part-time

Diploma in Population Health, Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. The Dip.P.H. program is open to individuals with four year degrees in the health sciences or professions or with honours degrees in the biological or social sciences.

The deadline for receipt of the departmental application form and supporting documents is early January.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Eighteen credit hours of course work from 7000-level courses (nine from required courses, nine from electives),

Second language requirement: none

Expected time to graduation: one year full-time

Page URL,
<http://crscalprod1.cc.umanitoba.ca/CommunityHealthSciences.catx>

Community Health Sciences Course Descriptions

CHSC 7130 Methods in Health Services Research and Evaluation (Formerly 093.713) Examines the process of planning and conducting research and evaluation to assess health services with an emphasis on the methods by which a question may be translated into a testable hypothesis, and the specification of a research plan that will produce results of maximum internal and external validity.

CHSC 7200 Health and Health Care in Developing Countries (Formerly 093.720) The course will focus on the patterns of mortality and morbidity in developing countries and the organization of health care services. Social, cultural, and economic development will be related to health and health services.

CHSC 7210 Epidemiology of Women's Health (Formerly 093.721) This course will deal with problems and concerns particular to women's health. The topics will be approached from an epidemiological perspective but use will be made of materials from health economics, evaluation research, medical sociology and anthropology.

CHSC 7220 Health and Health Services of Native People (Formerly 093.722) This course provides a detailed review of the health status and the determinants of health of Canada's native people.

CHSC 7270 Epidemiology of Chronic (Non-Cancer) Diseases (Formerly 093.727) The objective is to study the natural history of chronic diseases including the distribution of diseases, risk and prognostic factors, rationale and strategies for prevention. The methodological issues concerning the investigation of severe disease are also discussed. Prerequisite: a minimum grade of "B" in CHSC 7520 (or 093.752).

CHSC 7290 Economic Evaluation of Health Care (Formerly 093.729) The objectives of this course are to enable students to understand economic evaluation methodologies (cost-effectiveness, cost-benefit, cost-utility analysis) as applied to health care and to familiarize them with the applied literature on economic evaluation of health care. Prerequisite: permission of instructor.

CHSC 7300 Health Policy and Planning (Formerly 093.730) This course defines health policy and describes the planning and decision-making process. Case studies will be used to illustrate and critique the substance, process and outcome of policy papers that address contemporary policy issues. Prerequisite: permission of instructor.

CHSC 7310 Epidemiology of Health Care (Formerly 093.731) This course will discuss the advantages and disadvantages of using large administrative data bases for research purposes. Substantive topics dealt with include: regional variations in provision and utilization of health care, short- and long-term outcomestudies, individual physician behaviour, and technology assessment. Policy implications are considered. Prerequisite: a minimum grade of "B" in CHSC 7520 (or 093.752) or equivalent and permission of instructor.

CHSC 7320 Organization and Financing of the Canadian Health Care System (Formerly 093.732) Students will study the historical development and current structure of the Canadian health care system and relate its development to changes in social and political factors. The course provides an economic perspective on current policy issues in the organization, financing, and delivery of health care in Canada.

CHSC 7330 Cultural Perspectives on Illness and Medical Practice (Formerly 093.733) The objective of this course is to make students aware of the ways in which disease, illness, and medical practice are socially and culturally mediated. The course will examine cultural influences on the experience and expression of illness and consider the medical practitioner's role in the development and provision of culturally responsive health care. Prerequisite: permission of instructor.

CHSC 7360 Clinical Trials (Formerly 093.736) The Randomized Clinical Trial is the only true experiment in clinical research. This course is intended to give students a detailed knowledge of the design and implementation of RCTs. Students will participate in a qualitative review of RCTs. Prerequisites: a minimum grade of "B" in CHSC 7520 (or 093.752), CHSC 7470 (or 093.747), CHSC 7480 (or 093.748) or equivalents.

CHSC 7380 Prevention and Health

(Formerly 093.738) The course will cover frameworks used in -formulating preventive strategies. Topics will include risk factor assessment, screening, health education, legislation, litigation, lifestyle and prevention. Actual case studies will be used. Prerequisite: CHSC 7520 (or 093.752) and CHSC 7530 (or 093.753).

CHSC 7390 Health Promotion

(Formerly 093.739) An examination of theories, principles, practices and settings for health promotion. Prerequisite: permission of instructor.

CHSC 7400 Directed Readings I: In Epidemiologic Methods

(Formerly 093.740) An opportunity for advanced students to acquire knowledge in a defined and specific area of interest. Prerequisites: permission of instructor and Graduate Program Director.

CHSC 7410 Directed Readings: II - In Epidemiology

(Formerly 093.741) An opportunity for advanced students to acquire knowledge in a defined and specific area of interest. Prerequisite: permission of instructor and Graduate Program Director.

CHSC 7430 Seminars on Advanced Topics: II - In Methods of Health Care

(Formerly 093.743) Sem-inars dealing with current research issues, emerging methodologies and analytical techniques will be offered for advanced students. Prerequisite: permission of instructor.

CHSC 7450 Epidemiology of Communicable Diseases

(Formerly 093.745) Overview of epidemiological principles in communicable disease investigation and prevention and specific issues in controls of certain specific communicable diseases of public health importance in Canada will be introduced. Prerequisite: permission of instructor. Prerequisite: a minimum grade of "B" om CHSC 7520 (or 093.752).

CHSC 7460 Environmental and Occupational Health

(Formerly 093.746) The aim of the course is to acquaint the student with the role of the environment (general and specifically working) as the determinant of health. The content of the course will be presented in the form of lectures, seminars, and field visits. Prerequisite: permission of instructor.

CHSC 7490 Empirical Perspectives on Social Organization and Health

(Formerly 093.749) This course will focus on a selected review of the epidemiological literature which has integrated social factors in the investigation of the distribution of health and illness in society. The course will review a selection of important empirical studies investigating the roles played by social, psychological and economic status factors in determining health and illness. Emphasis will be placed on identifying the central theoretical and methodological approaches to defining and measuring socioeconomic status in this literature. Prerequisite: permission of instructor.

CHSC 7510 Current Topics in Community Health

(Formerly 093.751) Focus on current issues and topics in community health, particularly as they relate to Manitoba and to Canada. Emphasis will be placed on current literature and ongoing research to examine emerging policies and programs within health care and social development. Prerequisite: basic courses in Epidemiology and Statistics. Prerequisites: a minimum grade of "B" in CHSC 7520 (or 093.752) and CHSC 7470 (or 093.747) and CHSC 7320 (or 093.732).

CHSC 7520 Principles of Epidemiology 1

(Formerly 093.752) This course will introduce the basic concepts and methods of epidemiology, including the definition and measurement of health status and health determinants in populations, assessing health risks and inferring causation, and issues in the design and analysis of population health studies.

CHSC 7530 Principles in Epidemiology II

(Formerly 093.753) This course follows the Principles of Epidemiology I and discusses the applications of epidemiologic principles in public health practice, including the investigations of epidemics, disease surveillance, clinical applications, evaluation of health programs, and the planning of preventive programs. Students will also receive instruction in microcomputer applications and use of EPI-INFO software for data entry, analysis and presentation. Corequisite: CHSC 7480. Prerequisite: a minimum grade of "B" in CHSC 7520 (or 093.752) and in CHSC

7470 (or 093.747)..

CHSC 7540 Advanced Epidemiology

(Formerly 093.754) Advanced epidemiologic research methods focusing on selected epidemiological issues (bias, confounding, matching, etc.). Discussion will be directed to both epidemiological and statistical considerations to find the optimal solution to a research problem. Prerequisites: a minimum grade of "B" in CHSC 7520 (or 093.752), CHSC 7530 (or 093.753), CHSC 7280 (or 093.728).

CHSC 7550 Observational Epidemiology

(Formerly 093.755) Intermediate epidemiologic research methods focusing on case-control and cohort studies, with discussion on issues relating to planning and design, implementation, and data analysis. Prerequisite: a minimum grade of "B" in CHSC 7520 (or 093.752) and CHSC 7530 (or 093.753) and CHSC 7470 (or 093.747) and CHSC 7480 (or 093.748)..

CHSC 7560 Epidemiology of Cancer

(Formerly 093.756) This course introduces the magnitudes, risk factors and prevention strategies of cancer. It focuses on current knowledge related to the etiology of cancer, medical interventions and potential for prevention. Prerequisite: a minimum grade of "B" in CHSC 7520 (or 093.752).

CHSC 7610 Advanced Topics in Community Health 1

Special advanced research topics in Community Health Sciences.

CHSC 7620 Advanced Topics in Community Health 2

Special advanced research topics in Community Health Sciences.

CHSC 7710 Social Aspects of Aging

This course is an advanced seminar designed to examine current social issues in aging. The course is organized around selected topics related to aging. Where possible, the Canadian experience will be compared to international trends and diversity will be highlighted. The first section is a review of the field of gerontology, ageism, demographic trends, theoretical perspectives and methods and the second section explores contemporary social issues. This course is a required course for the Graduate Specialization in Aging Certificate.

CHSC 7720 Health and Aging

This course is an advanced seminar designed to examine health and health care issues in aging. Where possible, the Canadian (or Manitoban) experience will be highlighted. Key topics in the health domain will be covered, such as frailty, mental health, and dementia. The provision of care for older adults will also be covered, focusing on both the formal care system, as well as informal care providers. This course is a requirement for the Graduate Specialization in Aging.

CHSC 7730 Topics in Health Services Research

This course will expose students to select health services research topics that are particularly relevant in Manitoba and Canada. Students are expected to actively engage in seminars led by health services researchers and decision-makers, and also provide informative presentations in their own area of research. Students will also gain knowledge about various communication and knowledge translation strategies.

CHSC 7740 Advanced Qualitative Methods

The purpose of this course is to provide students with fundamental aspects related to qualitative research methods and analysis. By the end of the course, students should have an understanding of the principles and practices involved in: the application of different social theories to qualitative methods; designing a qualitative research study; various ways of collecting qualitative data and analyzing written texts; ways of integrating qualitative methods in a mixed methods design; developing different products for knowledge exchange activities; and 'hands-on' experience in doing qualitative analysis using qualitative software.

CHSC 7810 Biostatistics for the Health and Human Sciences 1

An introduction to statistical ideas and techniques for health sciences and human research. Describing data, patterns in data, the Normal distribution. Principles of estimation and principles of hypothesis testing. Principles and practice of the major statistical tests (t tests, analysis of variance, Chi squared tests, correlation and regression). Nonparametric statistical techniques. The use of statistical software to carry out statistical analyses. Analytic decision strategies.

CHSC 7820 Biostatistics for Community Health Sciences 1

The course will cover techniques of research design and analysis for community health researchers. Topics include: principles of experimental design, study size

determination, statistical software as an analytical tool, techniques for the analysis of continuous outcomes, analysis of variance for multi-way, factorial and split-unit experiments, and multiple regression and general linear models. Introduction to more advanced statistical methods including logistic regression and survival models. Prerequisite: Undergraduate course in statistics.

CHSC 7830 Biostatistics for Community Health Sciences 2

This course will cover techniques for the analysis of complex data sets involving continuous, categorical and time-related outcome variables. Principles of statistical modeling. The behaviour of non-continuous variables. Categorical outcome variables and logistic regression. Poisson outcome variables and Poisson regression. Time-dependent outcomes, survival analysis and proportional hazards regression. Prerequisite: CHSC 7820 with a grade of B+ or better.

CHSC 7860 Methods and Concepts for Community Health Sciences

This course is designed to provide both a practical and theoretical introduction to qualitative, quantitative, and multi-method approaches used in health research. The emphasis in the course will be on applied research, consistent with the characteristics of the Department of Community Health Sciences as a whole.

CHSC 7870 Health Survey Research Methods

Students critically examine the use of health survey methodology within epidemiology. They also learn to apply survey methodology, as a means to gain a strong appreciation of the reflective, theoretical and analytical thinking required to successfully design and implement epidemiological health surveys. Prerequisites: CHSC 7820 and CHSC 7520.

Computer Science

Computer Science ,
Computer Science Grad Program Info,

The department offers Master's and Ph.D. programs at the graduate level, which cover many areas of computer science. The department also participates in the Master's of Mathematical, Computational and Statistical Sciences program offered through the Institute of Industrial Mathematical Sciences. Graduates find employment in industry and academia.

Fields of Research

The department has people working in the areas of robotics, computer vision, intelligent agents, multi-agent systems, multimedia and hypermedia, bioinformatics, biomedical and health informatics, self-organizing systems, medical information systems, software engineering and integration, human-computer interaction, networks, parallel and distributed systems, databases, data mining, networks, multiplayer online games, data structures, algorithms, combinatorics and combinatorial designs, graph theory, artificial intelligence, computer graphics and curve design, computer-aided geometric design, computational finance, grid computing, wireless sensor networks, and pervasive computing. More information about specific individuals and their current research work can be found on the department's web site.

Research Facilities

Each graduate student will have a personal study space in an appropriate departmental research laboratory, and access to laser printers, mail, photocopying, a fax machine, and a graduate student lounge.

Computing facilities for research include a large variety of desktop computers as well as access to large clusters within the department, at the University of Manitoba, and across Western Canada via the WestGrid II network.

M.Sc. in Computer Science,
Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Students may be admitted to the Master's program if they hold an Honours Bachelor's degree in Computer

Graduate Studies

Science and if they present a suitable selection of courses. Admission is not guaranteed and each application will be individually considered by the department's Graduate Studies Committee.

Students can also be admitted to the Master's program upon successful completion of their pre-Master's program.

Application Deadlines

The Department of Computer Science allows students to begin their program in September or January. For admission for each of these start dates, Canadian/U.S. students should send their applications with complete supporting documentation to the Department of Computer Science no less than three (3) months before the intended start date. All other students should have their applications with complete supporting documentation received by the Department of Computer Science no later than eight (8) months before the intended start date.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Students must complete 12 credit hours of coursework and a thesis. All credit hours must be at the 7000 level and must include the 0-credit-hour Research Methodologies course. See the departmental Graduate Supplemental Regulations (available on the department's web site). Students must consult with their departmental advisor prior to deciding on courses. The courses listed below will not all be offered in any one particular year.

Second language reading requirement: none

Expected time to graduate: two years

Ph.D. in Computer Science,
Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. A candidate must normally complete an M.Sc. degree before entering the Ph.D. program. Individual qualifications other than this will be considered.

Application Deadlines

The Department of Computer Science allows students to begin their program in September or January. For admission for each of these start dates, Canadian/U.S. students should send their applications with complete supporting documentation to the Faculty of Graduate Studies no less than three (3) months before the intended start date. All other students should have their applications with complete supporting documentation received by the Faculty of Graduate Studies no later than eight (8) months before the intended start date.

Computer Science Course Descriptions

COMP 7220 Research Methodologies

(Formerly 074.722) This course explores the research process in general and the resources for research in computer science. Traditional research approaches and use of emerging technology will be discussed. Attendance at department seminars and classes is required. The course is evaluated on a pass/fail basis.

COMP 7570 Advanced Topics in Computer Science 1

(Formerly 074.757) Topics of current research interest in areas of computer science, available on an occasional basis, subject to the interests and availability of faculty. Prerequisite: written consent of instructor.

COMP 7700 Advanced Design and Analysis of Algorithms

COMP 7700 Advanced Design and Analysis of Algorithms Cr.Hrs.3 (Formerly 074.770) An advanced course covering models of computation, advanced analysis techniques, lower bounds, NP-completeness (from an algorithmic viewpoint), with applications of these techniques to various areas. Prerequisites: COMP 3170 (or 074.317) or equivalent or written consent of instructor.

COMP 7710 Group Algorithms and Graph Isomorphisms

(Formerly 074.771) Techniques for representing and manipulating permutation groups by computer; Schreier's algorithm, stabiliser towers, orbits, block systems, graph isomorphism, coset enumeration in permutation groups, the Butler-Sims base change algorithm. Not to be held with the former 074.727 or COMP 7280 (or 074.728). Prerequisites: COMP 4340 (or 074.434) or equivalent or written consent of instructor.

COMP 7720 Advanced Topics in Algorithms

(Formerly 074.772) Topics of current research interest in advanced algorithms. Possible topics include string matching, data compression, computational geometry, probabilistic algorithms; subject to the interests and availability of faculty. Prerequisites: COMP 3170 (or 074.317) or equivalent or written consent of instructor.

COMP 7730 Theory of Computation and Complexity

(Formerly 074.773) Study of the nature and complexity of computations. Formal theory of computability and decidability. Complexity on Turing machines, RAM's and circuits. Non-deterministic computation and NP-completeness. New developments on topics including randomized algorithms, parallel computation, counting problems, and approximation. Prerequisites: COMP 3170 (or 074.317) and COMP 3030 (or 074.303) or equivalents or written consent of instructor.

COMP 7740 Symbolic and Algebraic Computation

(Formerly 074.774) Problems in both the theory and practice of symbolic and computational algebra. Possible topics include implementation issues in Computer Algebra Systems, polynomial factoring, symbolic solution of systems of equations, Grobner bases, probabilistic techniques, algebraic complexity theory. Applications to cryptography, error correcting codes, robot motion planning, and others. Prerequisite: written consent of instructor.

COMP 7750 Advanced Topics in Computation Theory

(Formerly 074.775) Topics of current research interest in computation and complexity theory. Possible topics include decidability and complexity theoretic issues in parallel computation, cryptography, graph theory, or number theory, subject to the interests and availability of faculty. Prerequisite: written consent of instructor.

COMP 7760 Algorithmic Methods in Number Theory and Combinatorics

(Formerly 074.776) Large scale problems arising in combinatorics and number theory; practicable algorithms for solution of such problems. Computer implementation of these algorithms. Prerequisite: written consent of instructor.

COMP 7770 Coding Theory

(Formerly 074.777) Algebraic background of coding theory. Theory of linear codes. Hamming, Golay, Reed-Miller, Macdonald, and Hadamard codes. Structure of finite fields. Application to cyclic and Bose Chaudhuri codes. Decoding algorithms and

error-correcting bounds. Specialized topics. Prerequisite: written consent of instructor. COMP 7780 Queuing Theory and Performance Evaluation Cr.Hrs.3 (Formerly 074.778) Theory and application of queuing systems applied to problems of computer systems performance. Investigation of deterministic and stochastic models of single and multiple queuing systems using analytical, numerical, and simulation techniques. Performance evaluation methods for computer systems and communications networks. Prerequisites: STAT 1000 (or 005.100) or equivalent or written consent of instructor.

COMP 7780 Queuing Theory and Performance Evaluation

(Formerly 074.778) Theory and application of queuing systems applied to problems of computer systems performance. Investigation of deterministic and stochastic models of single and multiple queuing systems using analytical, numerical, and simulation techniques. Performance evaluation methods for computer systems and communications networks. Prerequisites: STAT 1000 (or 005.100) or equivalent or written consent of instructor.

COMP 7810 Computer Networks

(Formerly 074.781) A selection of current research topics from such areas as network modeling and analysis, packet switching, circuit switching, non-switched nets, frame relay, cell relay, ATM, integrated voice/video/data networks, B-ISDN, and emerging technologies. Prerequisites: STAT 1000 (or 005.100) and COMP 4300 (or 074.430) or equivalents or written consent of instructor.

COMP 7820 Advanced Topics in Computer Architecture

(Formerly 074.782) Topics of current research interest from such areas as computer design and architecture, distributed systems, multiprocessor and parallel systems, computer networks, specialized architectures, and VLSI; subject to the interests and availability of faculty. Prerequisites: written consent of instructor.

COMP 7830 Distributed Database Systems

(Formerly 074.783) Architecture and management of distributed database systems; distributed design, query processing, transaction management; traditional and object-oriented database systems; overview of existing systems. Prerequisites: COMP 4380 (or 074.438) or equivalent or written consent of instructor.

COMP 7840 Operating Systems Design and Implementation

(Formerly 074.784) A discussion of the current research issues in operating systems including, but not limited to: distributed operating systems, multiprocessor operating systems, and other application-specific operating systems such as those for mobile computing. Prerequisites: COMP 3430 (or 074.343) or equivalent or written consent of instructor.

COMP 7850 Advances in Parallel Computing

(Formerly 074.785) This course introduces advanced research topics in parallel architectures, parallel programming, parallelizing compilers, runtime systems, and parallel I/O. Prerequisite: written consent of instructor.

COMP 7860 Advanced Topics in Computer Systems

(Formerly 074.786) Topics of current research interest in database and operating systems. Possible topics include: operating systems, parallel systems, real-time systems, networks, and database systems; subject to the interests and availability of faculty. Prerequisite: written consent of instructor.

COMP 7870 Advanced Programming Language Design, Translation, and Implementation

(Formerly 074.787) A selection of topics taken from the following: formal methods for the description and translation of programming languages, parsing theory and methods, automatic translator writing systems, recent developments in programming language design and implementation. Prerequisites: COMP 4290 (or 074.429) or equivalent or written consent of instructor.

COMP 7880 Object-Oriented Software Development

(Formerly 074.788) Object-oriented principles; OO life cycle models; OO analysis and design; OO programming and testing; discussion on research topics in OO techniques. Prerequisites: COMP 3350 (or 074.335) or equivalent or written consent of instructor.

COMP 7890 Advanced Topics in Languages and Software

(Formerly 074.789) Topics of current research interest in the areas of programming languages or software engineering. Possible topics include program language design and implementation, visual programming languages, formal specification techniques, and software verification and validation; subject to the interests and availability of

faculty. Prerequisite: written consent of instructor.

COMP 7910 Advanced Graphics

(Formerly 074.791) This course will focus on two major advanced topics in computer graphics: the principles and properties of lighting models such as Phong shading, ray tracing and radiosity; and a selection of visualization and modelling techniques. Prerequisites: COMP 4490 (or 074.449) or equivalent or written consent of instructor.

COMP 7920 Advanced Topics in Graphics and Human Interfaces

(Formerly 074.792) Topics of current research interest in advanced graphics and human interfaces, chosen from such areas as intelligent user interfaces, user modelling, user interface design, visualization, computer animation, advanced multimedia, and computer-based training; subject to the interests and availability of faculty. Prerequisite: written consent of instructor.

COMP 7930 Natural Language and Speech Processing

(Formerly 074.793) Analysis and evaluation of computational models of language and speech understanding and generation including: syntactic analysis, semantic interpretation, statistical methods in speech and language understanding, applications of NLP such as machine translation, information extraction, and human-computer interfaces. Prerequisites: COMP 3190 (or 074.319) or equivalent or written consent of instructor.

COMP 7940 Machine Learning

(Formerly 074.794) This course examines topics in machine learning. Topics will be chosen from: statistical learning, symbolic learning, neural networks, and genetic algorithms. Prerequisites: COMP 3190 (or 074.319) or equivalent or written consent of instructor.

COMP 7950 Advanced Topics in Artificial Intelligence

(Formerly 074.795) Topics of current research interest in artificial intelligence chosen from such areas as: expert systems, knowledge representation, intelligent systems, planning systems, multi-agent systems, symbolic logic, knowledge engineering, and automated reasoning; subject to the interests and availability of faculty. Prerequisites: COMP 3190 (or 074.319) or equivalent or written consent of instructor.

COMP 7960 Image Processing

(Formerly 074.796) A detailed study of the methods used for image processing including: image quantization, transformations, enhancement, and analysis. Prerequisites: COMP 4490 (or 074.449) or equivalent or written consent of instructor.

COMP 7970 Curves and Surfaces in Computer Graphics

(Formerly 074.797) Algorithms and techniques for curve and surface generation, representation, and display in an interactive computer graphics environment. Discussion of applications to computer-aided design and computer-aided geometric design. Prerequisites: COMP 4490 (or 074.449) or equivalent or written consent of instructor.

COMP 7980 Advanced Topics in Scientific and Numerical Computing

(Formerly 074.798) Topics of current research interest in scientific and numerical computing chosen from areas such as geometric modelling, special splines, problems related to medical imaging, or other topics subject to the interests and availability of faculty. Prerequisites: COMP 7910 (or 074.791) or COMP 7920 (or 074.792) or written consent of instructor.

Curriculum, Teaching and Learning

Curriculum, Teaching and Learning ,

For information about graduate programs in the following units: [Collège universitaire de Saint-Boniface, Education \(Doctoral\)](#), or [Educational Administration, Foundations and Psychology](#) please follow the links above.

Curriculum, Teaching and Learning ,

Curriculum, Teaching and Learning Program Info,

The Department of Curriculum, Teaching and Learning offers the Master of Education Program with specializations in language and literacy; second language education; and studies in curriculum, teaching and learning (an area that includes

Graduate Studies

art, drama and music; curriculum studies; early years curriculum; educational technology; language and literacy curriculum; mathematics education; physical education/health; science education; social studies education; second language education; and technology education).

Fields of Research

Department members provide leadership in a variety of areas including curriculum development, curriculum reform and curriculum theorizing; teacher inquiry, professional development and teacher practice; teaching and learning within and across individual curriculum areas and streams (Early, Middle and Senior Years); language and literacy development; and second language education.

M.Ed. in Curriculum, Teaching and Learning,

Admission

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar, the Department of Curriculum, Teaching and Learning has the following admission application deadline dates and admission requirements:

For sessions starting	Canadian applicants	International applicants including US
January	October 1	none
May	None	none
July	February 1	none
September	May 1	January 15

Applicants must possess:

- *For specializations: Language & Literacy and Studies in Curriculum Teaching and Learning*, a four-year Bachelor of Education degree, or a two-year After Degree Bachelor of Education, or a three-year undergraduate degree which includes teacher training, plus a Post Baccalaureate Diploma in Education (PBDE) with 24-30 credit hours which includes at least 18 credit hours at the 5000 level or if taken outside of Education, 24-30 credit hours of upper level coursework which includes at least 12 credit hours but preferably 18 credit hours at the 4000 level. The total number of credit hours completed including the degree should be 120 credit hours, or an equivalent degree from an academic institution recognized by the Faculty of Graduate Studies; *For Second Language Education specialization*, an acceptable four-year equivalent undergraduate degree from an academic institution recognized by the Faculty of Graduate Studies, or a three-year undergraduate degree, plus a PBDE with 24-30 credit hours which includes at least 18 credit hours at the 5000 level or if taken outside of Education, 24-30 credit hours of upper level coursework which includes at least 12 credit hours but preferably 18 credit hours at the 4000 level. The total number of credit hours completed including the degree should be 120 credit hours, or an equivalent degree from an academic institution recognized by the Faculty of Graduate Studies.
- a grade point average of 3.0 or better in the last 60 credit hours of university coursework;
- normally, two years of relevant work experience; and
- appropriate academic and/or professional background for the program area and concentration. Consult with Department Head for further information.

For individuals who graduate from the Certificate in Adult and Continuing Education (CACE) , University of Manitoba complete the following courses:

EDUA 1560 Adult Learning and Development (3)

EDUA 1570 Foundations of Adult Education (3)

EDUA 1580 Program Planning in Adult Education (3)

EDUA 1590 Facilitating Adult Education (3)

and an additional 100 hours of elective credit through courses, seminars, and workshops. The Faculty of Graduate Studies recognizes a complete CACE program as 15 credit hours towards the admission requirements for the M.Ed.; that is, giving 12 credit hours for the four core courses completed with a grade of 'B' or better and 3 credit hours (non assessable) for the 100 hours of elective study.

Individuals with a three year undergraduate degree and the four CACE courses listed above must complete an additional 12 credit hours of senior level courses (i.e., 5000 level (Post-Baccalaureate Diploma in Education (PBDE) courses, 1000 or 2000 level B.Ed. courses, or courses at the 3000 level or above in other faculties) to have the 24 credit hours that are the minimal requirements for satisfying the "honours degree or equivalent" admission requirement. Those with the completed CACE would require an additional 9 credit hours of senior level courses.

Applicants should note that admission to the M.Ed. program is competitive. A number of factors are taken into account in arriving at an admissions decision: (1) the capacity of the department to provide the program of study requested by the applicant; (2) the applicant's previous academic background and achievement; (3) the referees' assessment of the applicant; (4) the capacity of the department to provide the applicant with an advisor in the program area; and (5) the applicant's Statement in Support of their application, including relevant professional experience.

Transfer of Credit

The granting of advanced credit is subject to the regulations of the Faculty of Graduate Studies and subject to approval of the advisor and department head.

Program Requirements

Minimum Program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this *Calendar*. The M.Ed. in Curriculum, Teaching and Learning has a thesis-based route and a course-based route with an oral defense. The M.Ed. comprehensive route at the University of Manitoba is typically a terminal degree. That is, it is insufficient, in number and of itself, as evidence of research capacity for admission into the Ph.D. program in Education at the University of Manitoba.

The following program requirements apply to all specializations in the Department of Curriculum, Teaching and Learning. Specific specialization requirements are listed under each specialization below.

M.Ed. programs have a maximum completion time of six years from the date of first registration. Not all courses are offered every year. The graduate course offering schedule is posted on the Faculty's website:

<http://umanitoba.ca/education/current/gradinfo.shtml>. Although we offer many courses yearly, most of our courses are offered in the evening and those wishing to study full-time should consult with the Department Head.

Second Language Reading Requirement: None

Expected Time to Graduate: full-time: 2 to 3 years; part-time: 4 to 5 years

Program by Coursework and Thesis

- A minimum of 18 credit hours of coursework. At least 12 credit hours must be at the 7000 level or equivalent. The remaining 6 credit hours may be at the 5000 level or above, in the Faculty of Education and/or at the 3000 level or above in other faculties.
- Students must take 3 credit hours of research methodology at the 7000 level in Education or 3000 level or above in other faculties.
- Upon entry into the program, a student will be assigned a program advisor who is not necessarily the thesis advisor. Students who have chosen to follow the thesis-based route should contact the head of

department to identify a faculty member with expertise in the proposed specialization and who is available to supervise their thesis.

Program by Coursework and Comprehensive Option (either Examination or Project) (Course-based)

- A minimum of 30 credit hours of coursework. At least 18 credit hours must be at the 7000 level, which may include EDUB 7540, or equivalent. The remaining 12 credit hours may be at the 5000 level or above in the Faculty of Education and/or at the 3000 level or above in other faculties.
- All coursework plus comprehensive option programs require a culminating activity and an oral defense. This culminating requirement may be met through taking a comprehensive examination or carrying out a research project. The research project may take a variety of forms including a research review, a small-scale study, or a curriculum/instruction application project. In some cases, the research project may include the student taking EDUB 7540 Final Seminar in Curriculum, Teaching and Learning to facilitate the development of the project. Students should contact and discuss with their advisors the specific requirements of both the examination and the research project activities.

Studies in Curriculum, Teaching and Learning Specialization, The Master of Education in Studies in Curriculum, Teaching and Learning includes a range of potential concentrations: art, drama, music; curriculum studies; early years curriculum; educational technology; language and literacy curriculum; mathematics education; physical education/health; science education; social studies education; second language education; and technology education. In consultation with their faculty advisors, students will be encouraged to create a program of study that addresses their own interests in a particular curricular field and which enhances the students' understanding of curriculum and its intents and effects. The aim of the program is to develop individuals who are informed, critical, and reflective about curriculum theory and practice in their particular area of concentration. In order to support this aim, courses are designed to provide graduate students with the requisite skills to conduct and to understand research in a variety of formats and paradigms.

Admission and Program requirements are those listed above. Specific course requirements are as follows:

- Required courses: EDUA 5800, EDUB 7550
- Thesis-based students select 3 credit hours from: EDUB 7560, EDUB 7420. Course-based students are required to take both courses.

Language and Literacy Specialization

Language and Literacy is a broad field encompassing a number of major sub-fields from pre-school to post-secondary levels. The sub-fields include developmental reading, clinical reading, composition studies, rhetoric, oral language development, children's and adolescent literature, response to literature, the language arts associated with listening, representing, viewing, spelling, and handwriting instruction, along with instruction in comprehension. The purpose of the program is to strengthen practitioners' theoretical understanding of one or more of these sub-fields, and to develop skills that will enable them to conduct independent research into language and literacy practices in their chosen area of concentration. Students in the program can anticipate experiences that range from general courses in curriculum development and implementation to specialized courses specific to their own needs and interests.

Admission and Program requirements are listed above. Specific course requirements are as follows:

- Required courses: EDUB 7530 and EDUA 5800
- Thesis-based students will select 3 credit hours and course-based students will select 6 credit hours from: EDUB 7070, EDUB 7100, EDUB 7180

- In addition, thesis-based students will select 6 credit hours and course-based students will select 18 credit hours from: EDUB 7060, EDUB 7070, EDUB 7090, EDUB 7100, EDUB 7110, EDUB 7150, EDUB 7180, EDUB 7190, EDUB 7290, EDUB 7420, EDUB 7550, EDUB 7560. Course-based students may also select from: EDUB 7330, EDUB 7540.

Second Language Education Specialization

The purpose of the Master's in Second Language Education (SLE) Program is to further the knowledge of experienced ESL teachers. Courses are designed to enable teachers to reflect on their teaching practices in light of influential and relevant research in second language acquisition/learning, curriculum theory and development, and SLE pedagogy. Students accepted into the program will be introduced to the research methodologies employed in educational research and in SLE, and will have the opportunity to develop expertise in one or more research methodologies.

Admission and Program requirements are those listed above. Specific course requirements are as follows:

Required courses: EDUB 7210, EDUB 7220, EDUB 7580, EDUA 5800.

In addition, thesis-based students will select 3 credit hours at the 7000 level from e.g., EDUB 7550, EDUB 7420, EDUB 7270, EDUA 7270, EDUA 7280; EDUA 7420, and course-based students will select 18 credit hours with a minimum of 9 credit hours at the 7000 level from e.g.: EDUB 5510, EDUB 5520, EDUB 5530, EDUB 5540, EDUB 5580, EDUB 7070, EDUB 7180, EDUB 7330, EDUB 7420, EDUB 7540, EDUB 7550, EDUB 7560, EDUA 7270/7280, EDUA 7420, or courses from the Faculties of Education or Arts of the University of Manitoba or other universities, in particular those within the Western Deans Agreement, and approved by the program advisor and the department head.

Curriculum, Teaching and Learning-Research and Evaluation

EDUA 7010 Educational Administration as a Field of Study and Practice

(Formerly 129.701) An overview of educational administration, focusing on a review of some of the main intellectual traditions in the study of educational administration and on an analysis of some of the forces which shape administrative practice. Not to be held with EDUA 7011 (or 129.701) or the former 116.731.

EDUA 7011 Administration scolaire en tnt que champ d'étude et d'application

(l'ancien 129.701) Aperçu de l'administration scolaire. Importance particulière accordée à quelques-unes des grandes traditions intellectuelles du domaine de l'administration scolaire et analyse de certaines forces qui influencent la pratique de l'administration. On ne peut se faire créditer le EDUA 7011 (ancien 129.701) et l'ancien 116.731.

EDUA 7020 Politics of Education

(Formerly 129.702) A review of the political features of educational organizations, with emphasis on value systems, community power structures, local government, and political change. Not to be held with EDUA 7021 (or 129.702) or the former 116.702.

EDUA 7021 La Politique en Education

(Ancien 129.702) Etude des caractéristiques politiques des organismes scolaires: répartition des pouvoirs dans la communauté, gouvernement local, changements politiques et rôle des divers systèmes de valeurs en éducation. On ne peut se faire créditer le EDUA 7021 (ancien 129.702) et l'ancien 116.702.

EDUA 7030 Educational Finance

(Formerly 129.703) Study of economic and financial aspects of education, with

emphasis on costs and analysis of expenditures; sources and types of revenue; productivity and efficiency, planning and budgeting. Not to be held with EDUA 7031 (or 129.703) or the former 116.703.

EDUA 7031 Le financement scolaire

(Ancien 129.703) Étude des dimensions économiques et financières de l'éducation. Analyse des coûts et des dépenses, des sources et des types de revenus, de la productivité et de l'efficacité, de la planification et du budget. On ne peut se faire créditer le EDUA 7031 et l'ancien 116.703.

EDUA 7040 Legal Aspects of Education

(Formerly 129.704) Studies of legal issues in education. Not to be held with EDUA 7041 (or 129.704) or the former 116.704.

EDUA 7041 Aspects légaux en éducation

(Ancien 129.704) Étude des questions légales dans le monde de l'éducation. On ne peut se faire créditer le EDUA 7041 (ancien 129.704) et l'ancien 116.704.

EDUA 7050 Theoretical Perspectives on Educational Administration

(Formerly 129.705) A study of the main currents of organization theory and administrative thought and their implications for the study and administration of educational organizations. Not to be held with EDUA 7051 (or 129.705) or the former 116.705.

EDUA 7051 Perspectives théoriques de l'administration scolaire

(Ancien 129.705) Étude des tendances en matière de théorie organisationnelle et de pensée administrative ainsi que de la portée de celles-ci sur l'étude et l'administration d'organisations scolaires. On ne peut se faire créditer le EDUA 7051 (ancien 129.705) et l'ancien 116.705.

EDUA 7060 Organizational Planning and Development in Education

(Formerly 129.706) A review of approaches to planning and development in education. Major emphasis is placed on the systematic development of educational organizations. Not to be held with EDUA 7061 (or 129.706) or the former 116.709.

EDUA 7061 Planification organisationnelle et développement éducationnel

Revue des diverses approches à la planification et au développement éducationnel. Importance particulière accordée au développement systématique des organismes d'enseignement. On ne peut se faire créditer les EDUA 7061 et l'ancien 116.709 ou 129.706.

EDUA 7070 The Analysis of Educational Organizations

(Formerly 129.707) The application of methods of organizational analysis to educational institutions. Not to be held with EDUA 7071 (or 129.707) or the former 116.710.

EDUA 7071 Analyse des Organismes D'Enseignement

(Ancien 129.707) Application de méthodes d'analyse organisationnelle aux établissements d'enseignement. On ne peut se faire créditer le EDUA 7-071 et l'ancien 129.707 ou 116.710.

EDUA 7081 Principes d'organisation et de mise en application du curriculum

Revue des approches de modification et d'application du curriculum. Importance particulière accordée aux approches systématiques de modification des programmes en éducation. On ne peut se faire créditer le EDUA 7081 et l'ancien 116.706.

EDUA 7090 Seminar in Administrative Problems in Education

(Formerly 129.709) Application of theoretical concepts in field situations. Not to be held with EDUA 7091 (or 129.709) or the former 116.706.

EDUA 7091 Séminaire - Problèmes Administratifs en Education

(Ancien 129.709) Application de concepts théoriques à des situations concrètes. On ne peut se faire créditer le EDUA 7091 et l'ancien 116.706 ou 129.709.

EDUA 7100 Topics in Educational Administration (Readings) 1

(Formerly 129.710) A readings course in topics of significance to educational administration.

EDUA 7101 Sujets Particuliers en Administration Scolaire 1
(Ancien 129.710) Lecture sur des sujets d'importance en administration scolaire.

EDUA 7110 Topics in Educational Administration (Field) 2
(Formerly 129.711) A projects and field study course in topics of significance to educational administration.

EDUA 7111
(Ancien 129.711) Recherche-action sur des sujets d'importances en administration scolaire.

EDUA 7200 Philosophy of Education
(Formerly 129.720) A study of the philosophic foundations of education. Emphasis will be given to various schools of philosophic inquiry as they relate to education and to contemporary philosophy of education issues. Students may not hold credit for both EDUA 7200 (or 129.720) and the former 116.735.

EDUA 7210 Educational Sociology
(Formerly 129.721) An examination of the relationship between education and society, with particular attention to ethnicity, family, and socio-economic status and to the role of the school in the socialization process in the Canadian context. Not to be held with EDUA 7211 (or 129.721) or the former 116.736.

EDUA 7211 Éducation et société
(Ancien 129.721) Étude du rapport qui existe entre l'éducation et la société. Regard particulier sur l'apprentissage ethnique, la famille, le statut socioéconomique et le rôle que joue l'école en tant qu'agent de socialisation dans un contexte canadien. On ne peut se faire créditer le EDUA 7211 et l'ancien 116.736

EDUA 7220 History of Education in Manitoba
(Formerly 129.722) A study of the themes underlying the historical development of education in Manitoba. Students may not hold credit for both EDUA 7220 (or 129.722) and the former 116.737.

EDUA 7230 Social Criticism in Education
(Formerly 129.723) A critical examination of education, giving special attention to various perspectives which challenge conventional interpretation of education and schooling. Students may not hold credit for both EDUA 7230 (or 129.723) and the former 116.738.

EDUA 7240 Values in Education
(Formerly 129.724) Examines the place of values in education. It explores the notion of values, its pervasiveness in education, the approaches to values in education, and the trends and issues related to values in education. Not to be held with EDUA 7241 (or 129.724) or the former 116.732.

EDUA 7241 Valeurs en éducation
(Ancien 129.724) Étude de la place occupée par les valeurs en éducation. Approfondissement de la notion de valeur et de son omniprésence dans le domaine de l'éducation, ainsi que des approches, des tendances et des questions relatives aux valeurs en éducation. On ne peut se faire créditer EDUA 7241 et l'ancien 116.732.

EDUA 7250 Comparative Education
(Formerly 129.725) An analysis of educational systems and problems in selected environments in terms of social, political, economic, cultural and other contexts. Students may not hold credit for both EDUA 7250 (or 129.725) and the former 116.714.

EDUA 7270 Seminar in Cross-Cultural Education 1
(Formerly 129.727) A critical analysis of the social theories and research which form the basis of cross-cultural education. Not to be held with EDUA 7271 (or 129.727) or the former 116.724.

EDUA 7280 Seminar in Cross-Cultural Education 2
(Formerly 129.728) A critical analysis of the approaches and research in cross-cultural education. Not to be held with EDUA 7281 (or 129.728) or the former 116.725.

EDUA 7281 Séminaire sur l'éducation interculturelle 2
(Ancien 129.728) Analyse critique des approches et de la recherche en éducation interculturelle. On ne peut faire créditer EDUA 7281 (EDUA 7280) et l'ancien 116.725

EDUA 7300 History of Canadian Education from 1867
(Formerly 129.730) A study of the historical development of education in Canada from 1867 to the present. Students may not hold credit for both EDUA 7300 (or 129.730) and the former 116.723.

EDUA 7330 Topics in Educational Foundations (Readings) 1
(Formerly 129.733) A reading and research course in topics of significance to educational foundations.

EDUA 7340 Seminar in Educational Thought
(Formerly 129.734) Intensive studies of the works of selected educational theorists. Students may not hold credit for both EDUA 7340 (or 129.734) and the former 116.719.

EDUA 7400 Adult Education as a Field of Study and Practice
(Formerly 129.740) Description and analysis of adult education as a field of study and practice. Attention will be given to theory, particularly the philosophical and social bases of adult education. Consideration of contemporary practice will also be undertaken. Students may not hold credit for both EDUA 7400 (or 129.740) and the former 116.739.

EDUA 7402 Development of Adult Education and Post-Secondary Education

A survey structures, theory, philosophies, and curricula of educational systems for adults, as affected by cultural, political, religious, theological and institutional contexts both national and internationally. Not to be held with the former EDUA 7400 (29.740) or EDUA 5400 (129.540).

EDUA 7404 Lifelong Learning in Educational Settings
Explores recent issues, research, and theories about learning across the lifespan, with emphasis on adulthood, as learning is affected by cultural, political, and interpersonal contexts.

EDUA 7406 Topics in Adult and Post-Secondary Education
This course provides an opportunity for students to investigate methodologically, in depth, significant trends and topics from both the scholarly literature of adult and post-secondary education and internet resources.

EDUA 7408 Seminar in Adult and Post-Secondary Education
This course entails an examination of topical issues in adult education and post-secondary education with particular focus on scholarly developments in Canada and Manitoba, based on student interests and thesis or comprehensive examination foci, with learning process instructor facilitated.

EDUA 7410 Seminar in Adult Education
(Formerly 129.741) An examination of selected topics in adult education, with special reference to Canada. Students may not hold credit for both EDUA 7410 (or 129.741) and the former 116.720.

EDUA 7412 Governance of Post-Secondary Education
This course examines the history of the governance of post-secondary institutions, the roles of stakeholders in governance, and factors influencing governance in post-secondary institutions today.

EDUA 7414 Seminar in the Administration of Post-Secondary Education
This course has as its focus the application of theoretical concepts of field situations. It will explore administrative skills and their application to selected issues of post-secondary education.

EDUA 7420 Program Planning in Adult Education
(Formerly 129.742) Introduction to factors affecting the planning of programs for adults. Examination of various planning models in relation to principles of adult education. A consideration of theory with major emphasis on directions for planning a program for adults. Local examples will be used. Students may not hold credit for both EDUA 7420 (or 129.742) and the former 116.733.

EDUA 7430 Topics in Adult Education
(Formerly 129.743) The study of selected topics in adult education. Opportunity will be provided for students to investigate in depth, significant topics within the area of adult education which are of interest to students. Students may not hold credit for both EDUA 7430 (or 129.743) and the former 116.734.

EDUA 7440 Seminar in Post-Secondary Education

(Formerly 129.744) A consideration of the nature of post-secondary education and of fundamental issues in the development of systems of post-secondary education. Special attention will be given to issues of philosophy, curriculum, clientele, organization and governance. Students may not hold credit for both EDUA 7440 (or 129.744) and the former 116.721.

EDUA 7450 Seminar in Post-Secondary Instruction

(Formerly 129.745) Intensive study and research in selected topics in post-secondary instruction. Students may not hold credit for both EDUA 7450 (or 129.745) and the former 116.730.

EDUA 7510 Seminar in Current Issues in Counselling

(Formerly 129.751) Focus on research, theoretical and professional developments; critical contemporary issues; and specific social problems in counselling. Not to be held with EDUA 7511 (or 129.751) or the former 043.703.

EDUA 7511 Séminaire en counselling

(Ancien 129.751) Progrès d'ordre professionnel, théorique et scientifique. Questions actuelles importantes. Problèmes sociaux particuliers en counselling. On ne peut se faire créditer EDUA 7511 et l'ancien 043.703.

EDUA 7520 Practicum Seminar in Counselling

(Formerly 129.752) Supervised experience in both individual and group counselling. Attention is given to analysis of case studies using audio- and video-tapes. A minimum of 180 hours of counselling experience in placement situations is required. This course is graded pass/fail. Not to be held with EDUA 7521 (or 129.752) or the former 043.704. Prerequisite: EDUA 5480 or EDUA 5481 (or 129.548) or either former 129.556 or 043.516 and permission from the instructor.

EDUA 7521 Séminaire - Stage en counselling

(Ancien 129.752) Expérience supervisée en counselling individuel et de groupe. Analyse d'études de cas au moyen d'audiocassettes et de vidéocassettes. Exige un minimum de 180 heures de stage. On ne peut se faire créditer le EDUA 7521 ou l'ancien 043.704. Préalable : le EDUA 5481 (ancien 129.548), l'ancien 129.556 ou l'ancien 043.516.

EDUA 7530 Group Counselling: Theory and Practice

(Formerly 129.753) Study of theories, rationale, objectives, and research. Acquisition of an experiential understanding of group work through participation in class activities. Development of leadership skills in group counselling by conducting counselling groups under supervision. Not to be held with EDUA 7531 (or 129.753) or the former 043.718. Prerequisite: EDUA 5540 or EDUA 5541 (or 129.554) or 043.512 and EDUA 5480 or EDUA 5481 (or 129.548).

EDUA 7540 Programs in Career Development

(Formerly 129.754) A practical course designed for helpers wishing a wider knowledge of career development programs. Participants will investigate and evaluate a wide variety of career counselling techniques and programs and will develop specific, innovative programs to meet the needs of their future counselees. Not to be held with EDUA 7541 (or 129.754) or the former 043.719.

EDUA 7541 Programmes d'orientation de carrières

Un cours destiné aux conseillères et aux conseillers qui souhaitent approfondir leurs connaissances des programmes d'orientation de carrières. Examen et évaluation de programmes et de diverses techniques de counselling. Elaboration de programmes innovateurs qui répondent aux besoins de ceux et celles qui ont recours aux services de counselling. On ne peut se faire créditer le EDUA 7541 et l'ancien 132.754 ou 043.719.

EDUA 7550 Theories of Counselling

(Formerly 129.755) The objectives of counselling, assessment of counselling outcomes, theories of personality and counselling. Not to be held with EDUA 7551 (or 129.755) or the former 043.701 or 129.750.

EDUA 7551 Théories en counselling

Objectifs du counselling, évaluation des résultats du counselling, théories de la personnalité et du counselling. On ne peut se faire créditer le EDUA 7551 et l'ancien 129.755 ou 043.705.

EDUA 7600 Seminar in Inclusive Special Education

(Formerly 129.760) A forum for the discussion of topics related to disability issues. Opportunity will be provided for students to examine issues related to their Graduate Studies

particular professional and scholarly needs. Not to be held with EDUA 7601 (or 129.760) or the former 043.705. Pre- or corequisite: 18 credit hours in Special Education at 5000 level or equivalent.

EDUA 7601 SÉMINAIRE EN ÉDUCATION INCLUSIVE

(Ancien 129.760) Forum de discussions sur des sujets reliés à divers handicaps. Étude en profondeur de problèmes reliés aux besoins professionnels particuliers des étudiants et des étudiantes. On ne peut se faire créditer le EDUA 7601 (ancien 129.760) et l'ancien 043.705.

EDUA 7610 Behavioural Issues in Educational Settings

(Formerly 129.761) A study designed to give teachers and school counsellors the necessary theoretical background as well as the practical tools to implement programs for children in conflict. Not to be held with EDUA 7611 (or 129.761) or the former 043.707. Pre- or corequisite: EDUA 5600 or EDUA 5601 (or 129.560 or 043.518) or EDUA 5680 or EDUA 5681 (or 129.568 or 043.542).

EDUA 7611 Séminaire sur L'Éducation des Enfants aux Prises avec des Troubles de Comportement

(Ancien 129.761) Course à l'intention des enseignants et des enseignantes, et des conseillers et des conseillères scolaires. Études des connaissances théoriques et des outils nécessaires à l'élaboration et à la mise en oeuvre des programmes éducatifs pour les élèves aux prises avec des troubles de comportement. On ne peut se faire créditer le EDUA 7611 et l'ancien 043.707 ou 129.761. Préalable ou concomitant: le EDUA 5601 (ancien 129.560 ou 043.518) ou le EDUA 5681 (ancien 129.568 ou 043.542).

EDUA 7620 Seminar in Disability Studies

(Formerly 129.762) The aim of this course is to review research literature which is directly related to the problems of learning and instruction of the mentally retarded. Not to be held with EDUA 7621 (or 129.762) or the former 043.721. Prerequisite: a course in mental retardation (such as the former 043.531 or 043.534) or permission of instructor.

EDUA 7630 Advanced Assessment and Instruction in Inclusive Special Education

(Formerly 129.763) An advanced study of diagnostic/prescriptive techniques used to ameliorate learning and behavioural problems in special education. Emphasis is on the development and analysis of related instructional delivery systems. Students may not hold credit for both EDUA 7630 (or 129.763) and the former 043.722. Pre- or corequisite: EDUA 5630 (or 129.563) or 043.536 (C+).

EDUA 7650 Field Experience in Inclusive Special Education

(Formerly 129.765) A minimum of 200 hours of supervised placement in an inclusive special education setting. Scheduled seminars facilitate directed study and discussion. This course is graded pass/fail. Prerequisite: 18 credit hours at the 5000-level in Inclusive Special Education or its equivalent. Not to be held with EDUA 7651 (or 129.765) or the former 129.764 or 043.706.

EDUA 7700 Field Work in School Psychology

(Formerly 129.770) Students will engage in a minimum of one day a week of supervised experience in psychoeducational assessment and programming, counselling and consulting with teachers, students, parents and related others. This course is graded pass/fail. Students may not hold credit for both EDUA 7700 (or 129.770) and the former 043.723. Prerequisite: EDUA 7720 (or 129.772 or 043.725), EDUA 7870 (or 129.787 or 129.782 or 043.710), EDUA 7760 (or 129.776 or 043.717) (C+) and one of EDUA 7800 (or 129.780 or 043.709) or (129.783 or 043.711) (C+) and one of PSYC 8200 (or 017.820) or PSYC 8210 (or 017.821) (C+).

EDUA 7710 Development in Learning Environments

(Formerly 129.771) Explores recent advances in developmental psychology as they apply to learning in classrooms and other education-related settings. Emphasis will be given to cognitive change, but motivation and social skill development will also be considered as they relate to cognitive development. Students may not hold credit for both EDUA 7710 (or 129.771) and the former 043.724 or 043.708.

EDUA 7740 Topics in Educational Psychology 1

(Formerly 129.774) A reading and research course in topics of significance to educational psychology.

EDUA 7741 Sujets Particuliers en Psychologie de L'Éducation

(Ancien 129.774) Lecture et recherche sur des sujets d'importance en psychologie de

l'éducation.

EDUA 7750 Topics in Educational Psychology 2
(Formerly 129.775) A reading and research course in topics of significance to educational psychology.

EDUA 7760 Interview Techniques with Children and Adolescents
(Formerly 129.776) Focuses on the principles, processes and methods of interviewing and counselling individual children, adolescents, parents, school personnel and others. The course aims at integrating theory and practice involving diagnostic and therapeutic communication and observation of behaviour in natural situations with individual children. Not to be held with EDUA 7761 (or 129.776) or the former 043.717. Prerequisite: EDUA 5820 or EDUA 5821 (or 129.582 or 043.505), EDUA 5550 or EDUA 5551 (or 129.555 or 043.515), or EDUA 5480 or EDUA 5481 (or 129.548) and EDUA 5490 or EDUA 5491 (or 129.549 or 129.556 or 043.516).

EDUA 7761 Techniques d'entrevue avec les enfants & les adolescents et adolescentes
Étude des principes et des méthodes d'entrevue et de counselling auprès d'enfants, d'adolescents et d'adolescentes, de parents, d'enseignants et d'enseignantes, ou de toute autre personne intervenant auprès de l'enfant. Intégration de la théorie et de la pratique relatives au processus de communication et d'observation diagnostique et thérapeutique en situation naturelle auprès de l'enfant. On ne peut se faire créditer le EDUA 7761 et l'ancien 129.776 ou 043.717. Préalable: le EDUA 5821 (ancien 129.582 ou 043.505), le EDUA 5551 (ancien 129.555 ou 043.515), ou le EDUA 5481 (ancien 129.548) et le EDUA 5491 (ancien 129.549, 129.556 ou 043.516).

EDUA 7770 Advanced Computer Application in Educational Psychology
(Formerly 129.777) Explores the use of recent innovations in computer-assisted learning technology and will be set up to take into account the needs of the graduate level student in the Faculty of Education. Not to be held with EDUA 7771 (or 129.777) or the former 043.716. Prerequisite: any one of the following courses: EDUA 5850 or EDUA 5851 (or 129.585 or 043.306 or 043.526 or 081.412 or 081.528).

EDUA 7800 Methods of Educational Research
(Formerly 129.780) A study of design and data collection techniques for educational research in field settings. Topics covered include quasi-experimentation, survey and observational techniques, simulation, content analysis, and sociometry. Not to be held with EDUA 7801 (or 129.780) or the former 043.709. Prerequisite: EDUA 5800 or EDUA 5801 (or 129.580) or one of the former courses 129.680, 043.610 or consent of instructor.

EDUA 7801 Méthodes de Recherches en Education
(Ancien 129.780) Etude des devis expérimentaux et des techniques de collecte de données dans la recherche éducative dans le milieu: devis quasi expérimentaux, enquête et techniques d'observation, simulation, analyse du contenu et sociométrie. On ne peut se faire créditer le EDUA 7800 et l'ancien 043.709. Préalable: le EDUA 5801 (ancien 129.580) ou l'ancien EdUA 6801 (ancien 129.680) ou l'ancien 043.610 ou l'autorisation écrite de la professeure ou du professeur.

EDUA 7810 Evaluating Educational Programs
(Formerly 129.781) An introduction to current approaches to evaluating educational programs. A review of various evaluation methods/approaches, along with consideration of specific design, ethical, consulting and political issues will be the main focus of this course. Specific skills to be developed are the implementation of educational evaluations, data collection and analysis, and final report writing. Students may not hold credit both EDUA 7810 (or 129.781) and the former 043.726.

EDUA 7840 Qualitative Research Methods in Education
(Formerly 129.784) An introduction to qualitative research methods. While the theoretical underpinnings of qualitative research will be discussed, emphasis is placed on learning to conduct a study including design, collecting and analyzing data, and research ethics. Not to be held with EDUA 7841. Prerequisite: EDUA 5800 or EDUA 5801 (or 129.580) or 043.503 or equivalent.

EDUA 7841 Methodes de recherche qualitative en Éducation
(Ancien 129.784) Introduction aux méthodes de recherche qualitative. Discussion de l'éthique de la recherche et des théories qui sous-tendent la recherche qualitative. Cours axé sur les démarches à suivre pour effectuer une recherche, y compris la méthodologie et la collecte et l'analyse de données. Préalable: EDUA 5801 (ancien

129.580) ou l'ancien 043.503 ou l'équivalent.

EDUA 7850 Design and Analysis of Educational Research
(Quantitative)
(Formerly 129.785) A study of the use of quantitative methods of analyzing educational research data. Descriptive and inferential procedures commonly used in educational research will be discussed and students will learn to use statistical packages. The course will also address when it is appropriate to employ quantitative designs and present common designs and their associated analyses. Prerequisite: EDUA 5800 (or 129.580) (C+). Students may not hold credit for both EDUA 7850 (or 129.785) and the former 129.681 or the former 43.535 or 43.611.

EDUA 7860 Advanced Topics in Educational Research
(Formerly 129.786) An advanced study of special topics in educational research with an in-depth study of specific topics which will change from year to year. Prerequisite: EDUA 5800 (or 129.580) (C+) and permission of the instructor. Students may not hold credit for both EDUA 7860 (or 129.786) and the former courses 129.783 or 043.711

EDUA 7870 Measurement and Evaluation in Schools
(Formerly 129.787) An advanced study of the principles of measurement and evaluation and their application to teaching and learning in schools. Current issues in measurement and evaluation, including alternative forms of classroom assessment and standard setting, will be discussed. Prerequisite: EDUA 5810 (or 129.581) or 043.301 (C+) or equivalent, or consent of instructor.

Curriculum, Teaching and Learning: Course Descriptions

EDUB 7010 Seminar in Art Education 1
(Formerly 132.701) An examination of the major historical, philosophical, psychological and socio-cultural foundations of art education. The study of major developments in each of these areas will form a basis for understanding current theory and practice. Students may not hold credit for both EDUB 7010 (or 132.701) and the former 063.725.

EDUB 7020 Seminar in Art Education 2
(Formerly 132.702) The study of the methodology, content and problems of art education research, curriculum development and practice. Students will explore research methodology and curriculum design through individualized projects related to classroom practice. Students may not hold credit for both EDUB 7020 (or 132.702) and the former 063.726.

EDUB 7030 The Arts in Education
(Formerly 132.703) An examination of the role of the arts in general education. Emphasis will be placed on knowledge of the role of perception, aesthetic valuing and cognition in arts education, and application of this understanding and knowledge to educational practice. Students may not hold credit for both EDUB 7030 (or 132.703) and the former 063.750.

EDUB 7040 Seminar in Educational Drama
(Formerly 132.704) A critical examination of the literature and current research in educational drama. Consideration will be given to the philosophy, theory, and practice of drama in the classroom, and the evaluation of programs. Students may not hold credit for both EDUB 7040 (or 132.704) and the former 063.743.

EDUB 7050 Seminar in Educational Theatre
(Formerly 132.705) A critical examination of the literature and current research in educational theatre. Consideration will be given to the philosophy, theory, and practice of theatre in the school setting, and to the evaluation of programs. Students may not hold credit for both EDUB 7050 (or 132.705) and the former 063.744.

EDUB 7060 Seminar and Practicum in Clinical Diagnosis and Remediation
(Formerly 132.706) A thorough study of the etiology, diagnosis, and treatment of complex reading disabilities; practical experience under supervision in diagnosing reading problems and in prescribing, treating, interpreting, and reporting findings. Students may not hold credit for both EDUB 7060 (or 132.706) and the former 063.705. Prerequisite: EDUB 5400 (or 132.540) or 063.599 (C+).

EDUB 7070 Classical Research in Reading
(Formerly 132.707) A critical review, analysis, and synthesis of classical research studies in the psychology, psycholinguistics, sociology, and pedagogy of reading.

Students may not hold credit for both EDUB 7070 or EDUB 7071 (or 132.707) and the former 063.713.

EDUB 7071 Ouvrages marquants de recherche en lecture (Ancien 132.707) Examen, analyse et synthèse critiques des ouvrages marquants de recherche en lecture dans les domaines de la psychologie, de la psycholinguistique, de la sociologie et de la pédagogie de la lecture. On ne peut se faire créditer le EDUB 7071, EDUB 7070 et l'ancien 063.713.

EDUB 7080 Designing, Conducting, and Evaluating Reading Research (Formerly 132.708) A critical evaluation of current research in reading; emphasis on design, methodology, and statistical consideration for conducting reading research. Students may not hold credit for both EDUB 7080 (or 132.708) and the former 063.714. Prerequisite: EDUB 7070 (or 132.707) or 063.713 (C+).

EDUB 7090 Seminar in Reading Processes (Formerly 132.709) A critical examination of theories and models of reading; a thorough study of the reading processes in relation to language, vision, hearing, neurological development, cognition and motivation. Students may not hold credit for both EDUB 7090 (or 132.709) and the former 063.739.

EDUB 7100 Language and Literacy Curriculum Inquiry in the Early Years (Formerly 132.710) A study of language and literacy curriculum in the early years of schooling. Participants will identify and examine issues and problems arising out of theory, research, and curriculum practices in early years classrooms. Participants will have the opportunity to develop and pursue a curriculum project in accordance with their professional research interests. Students may not hold credit for both EDUB 7100 (or 132.710) and the former 063.755.

EDUB 7101 Recherches en langue et littérature à l'élémentaire (l'ancien 132.710) Étude du curriculum en langue et en littérature à l'élémentaire. Identification et examen des questions importantes découlant des pratiques par rapport à la théorie, à la recherche et au curriculum à l'élémentaire. Les participantes et participants auront l'occasion de réaliser un projet de curriculum portant sur un domaine de recherche qui les intéresse. On ne peut se faire créditer le EDUB 7101 (ou 132.710) et l'ancien 063.755.

EDUB 7110 Research in Language and Literacy Development (Formerly 132.711) An exploration of language and literacy development issues of professional interest to teachers. Participants will critically analyze language/literacy development theories, published research, and classroom observations. Opportunities will be created for participants to conduct their own language/literacy development inquiry in an educational setting. Students may not hold credit for both EDUB 7110, EDUB 7111 (or 132.711) and the former 063.756.

EDUB 7111 RECHERCHE SUR L'ACQUISITION DE LA LANGUE ET DE LA LITTÉRATIE (Ancien 132.711) Exploration des problématiques propres à l'acquisition de la langue et de la littérature susceptibles d'intéresser les enseignantes et enseignants sur le plan professionnel. Les participantes et participants feront une analyse critique des théories qui sous-tendent l'acquisition de la langue et de la littérature, de la recherche publiée et d'observations en salle de classe. Ils auront l'occasion d'effectuer leur propre recherche sur l'acquisition de la langue et de la littérature dans un milieu éducatif. On ne peut se faire créditer le EDUB 711 (ancien 132.711) et l'ancien 063.756.

EDUB 7120 Curricular Issues in English Language Arts Education (Formerly 132.712) This course will address a number of problematic issues in the development and implementation of school-based instruction in English language arts through critically considering the relationship of current theory, research and pedagogy. Students may not hold credit for both EDUB 7120 (or 132.712) and the former 063.757.

EDUB 7140 The Legacy of Theory and the Teaching of Literature (Formerly 132.714) This course provides an in-depth study of the writings of major theorists with a view to assessing critically the current and future influence of their theoretical legacy on the nature and direction of literacy instruction in the schools. Students may not hold credit for both EDUB 7140 (or 132.714) and the former 063.759.

EDUB 7150 Seminar in Reading and Response to Literature (Formerly 132.715) This course is designed to familiarize students with the historical and philosophical trends in reading and response to literature; it will survey major developmental reading and literary response trends, examine the epistemological assumptions associated with those developments and explore the developing thought in how students process written texts, in particular, literary tests. The course will also examine curricular implications in reading and literary response. Students may not hold credit for both EDUB 7150 (or 132.715) and the former 063.760.

EDUB 7160 Language Teacher as Researcher (Formerly 132.716) The purpose of this course is to investigate the characteristic parameters of teachers as researchers in the context of their own classroom. Three fundamental principles provide a curricular perspective to guide the participants: voice, conversation, and community. With this perspective, the language teacher engages in classroom inquiry with the goal of understanding language and teaching through the learners as curricular informants. Students may not hold credit for EDUB 7160 and EDUB 7161 (or 132.716) or the former 063.761.

EDUB 7161 L'enseignante et l'enseignement de langue en tant que chercheurs Examen de paramètres caractéristiques des enseignantes et des enseignants en tant que chercheurs dans le contexte de leur propre salle de classe. Trois principes fondamentaux guident les participantes et participants: voix, conversation et communauté. Sous cet angle particulier, les enseignantes et enseignants de langue effectuent une recherche en salle de classe dans le but de comprendre la langue et l'enseignement par l'entremise des élèves interrogés dans le domaine du curriculum. On ne peut se faire créditer le EDUB 7161 et l'ancien 132.716 ou 063.761.

EDUB 7170 Rhetoric in Education (Formerly 132.717) This course is intended to demonstrate how rhetorical theory can serve as a pattern for developing pedagogy in language, reading, and composition. The course will briefly cover classical models for rhetoric, but will focus on modern language and rhetorical theories and their relationships to developing curricula in language arts. Students may not hold credit for both EDUB 7170 (or 132.717) and the former 063.762.

EDUB 7180 Research in Written Composition (Formerly 132.718) A critical analysis of research and research methods in written composition process and pedagogy. Consideration will be given to classic studies, historical development, current trends and research, and evaluation procedures as they apply to the study and teaching of writing. Students may not hold credit for EDUB 7180 and EDUB 7181 (or 132.718 or 063.763).

EDUB 7181 La recherche en rédaction (Ancien 132.718) Analyse critique de la recherche et des méthodes de recherche en rédaction et en pédagogie. Regard particulier sur les études classiques, l'histoire, les courants actuels et la recherche ainsi que les méthodes d'évaluation en rapport avec l'étude et l'enseignement de la rédaction. On ne peut se faire créditer le EDUB 7181 ou EDUB 7180 (ou 132.718) et l'ancien 063.763.

EDUB 7190 Research in Language for Learning (Formerly 132.719) A critical study of the research literature in how language can support learning in all areas of schooling. The course will focus on the role of language in supporting learning in all subject areas and will specifically investigate the research about the role of talking, reading, and writing as tools for learning. Students may not hold credit for EDUB 7190 and EDUB 7191 (or 132.719 or 063.764).

EDUB 7191 Recherches sur le rôle de la langue dans l'apprentissage (Ancien 132.719) Analyse critique des résultats de la recherche afin de comprendre la façon dont la langue peut faciliter l'apprentissage dans tous les domaines scolaires. Regard sur le rôle que joue la langue pour faciliter l'apprentissage des matières. Examen particulier de la recherche portant sur l'expression orale, la lecture et l'écriture en tant qu'outils servant à l'apprentissage. On ne peut se faire créditer EDUB 7191 et l'ancien 063.764

EDUB 7200 Language Literacy and Policy Development (Formerly 132.720) A survey seminar in how policy has been developed in literacy and how these policies impact on our conceptualizations of a literary curriculum and our definitions of literacy. An emphasis will be on concepts of functionality in literacy and policy in literacy education. Students may not hold credit for both

EDUB 7200 (or 132.720) and the former 063.765.

EDUB 7201 LA LITTÉRATIE ET L'ÉLABORATION DE POLITIQUES
(Ancien 132.720) Un séminaire portant sur l'élaboration de politiques en littérature et leurs effets sur notre conceptualisation d'un curriculum littéraire et nos définitions de la littérature. Regard particulier sur le concept de fonctionnalité en littérature et les politiques sur l'enseignement de la littérature. On ne peut se faire créditer le EDUB 7201 (ancien 132.720) et l'ancien 063.765.

EDUB 7210 Seminar in E.S.L. Theory and Practice
(Formerly 132.721) Opportunity will be given to examine critically the major theories and methodologies used in E.S.L. instruction and research. Students may not hold credit for both EDUB 7210 (or 132.721) and the former 063.727.

EDUB 7212 Critical Applied Linguistics in a Global Context
We will examine the role of English comparatively and internationally in a variety of educational systems and regimes, relating the micro-relations of applied linguistics to the macro relations of society, exploring the roles of critical theory in language teaching and learning, and developing self-reflexivity as scholars in second language education.

EDUB 7220 Research Issues and Application in TESL (Teaching English as a Second Language)
(Formerly 132.722) This course focuses on a survey of ESL and language development research issues, procedures, and findings. This research review will serve as the basis for students to plan individual research and conduct a pilot study. Students may not hold credit for both EDUB 7220 (or 132.722) and the former 063.753.

EDUB 7250 Theoretical Foundations of the Social Studies
(Formerly 132.725) An examination of the development of social studies education, including the theories, research, ideas and ideologies that have and continue to shape social studies curriculum and pedagogy. Students may not hold credit for both EDUB 7250 (or 132.725) and the former 063.737.

EDUB 7260 Seminar in Social Science Education
(Formerly 132.726) An examination of current trends and developments in social science education as they affect the school curriculum at all grade levels, K-12. Particular attention will be paid to questions of curriculum contents, teaching strategies and student evaluation. Students may not hold credit for both EDUB 7260 (or 132.726) and the former 063.738.

EDUB 7270 Culture, Citizenship and Curriculum
(Formerly 132.727) An examination of the role of school curricula in preserving, transmitting and transforming conceptions and practices of culture and citizenship, with particular reference to social and political education in schools. Students may not hold credit for both EDUB 7270 (or 132.727) and the former 063.749.

EDUB 7280 Early Years Curriculum: Philosophical Traditions and Future Directions
(Formerly 132.728) An exploration and evaluation of models, issues, and priorities in Early Years curriculum (K-4). Participants will design curriculum which realizes and particularizes the theories, models, concepts and engagements being examined in the course. Students may not hold credit for EDUB 7280 and EDUB 7281 (or 132.728 or 063.747).

EDUB 7290 Curriculum Research in Early Years: Young Children and Social Semiotics
(Formerly 132.729) An investigation of the social nature of learning and children's use of semiotic systems (language, art, music, dance, drama, and mathematics) as ways of knowing in the Early Years (K-4) classroom. Participants will conceive, organize, and conduct a research project that allows them to develop an understanding of children's use of one or more semiotic systems within a curriculum context. Students may not hold credit for both EDUB 7290 and 132.729 or 063.748.

EDUB 7330 Inquiry in Curriculum and Instruction
An examination of the issues involved in critiquing and synthesizing inquiry in curriculum and instruction studies in the humanities and social sciences. The course will also introduce students to the variety of ways in which inquiry may be conducted in instructional settings and will focus on how the research on curriculum and instruction can be validly synthesized across studies. Students may not hold credit for both EDUB 7330 (or 132.733) and the former 063.754.

EDUB 7340 Topics in Curriculum: Humanities and Social Sciences
(Formerly 132.734) The study of selected topics in curriculum and instruction in the humanities and social sciences.

EDUB 7341 Sujets particuliers en curriculum : humanités et sciences humaines
(Ancien 132.734) Lecture et recherche sur des sujets d'importance dans le domaine du curriculum en humanités et en sciences humaines.

EDUB 7350 Independent Studies in Curriculum: Humanities and Social Sciences
(Formerly 132.735) Independent study of selected issues related to curriculum and instruction in the humanities and social sciences. This course may be used for field studies.

EDUB 7360 Topics in Curriculum: Mathematics and Natural Sciences 1
(Formerly 132.736) A reading and research course in topics of significance to curriculum development in the areas of specialization offered by the Department.

EDUB 7370 Topics in Curriculum: Mathematics and Natural Sciences 2
(Formerly 132.737) A continuation of EDUB 7360 for students engaging in readings and research too great in scope to be included within a three-credit program.

EDUB 7380 Field Seminar in Curriculum: Mathematics and Natural Sciences
(Formerly 132.738) An investigation of selected curricular programs in specific content fields as indicated by individuals and by educational institutions and systems. Project work will include visits and field investigations. Students may not hold credit for both EDUB 7380 (or 132.738) and the former 081.709.

EDUB 7390 Curriculum in Vocational Education
(Formerly 132.739) A review of the major curriculum changes in vocational education with reference to the public school, the community college and post-compulsory institutions. Emphasis will be on models, supportive research and curricular design strategies. Students may not hold credit for both EDUB 7390 (or 132.739) and the former 081.714.

EDUB 7416 Teaching and Learning in Post-Secondary Education
An in-depth study of teaching and learning in post-secondary education contexts grounded in current theoretical, research and pedagogical literatures.

EDUB 7420 Study of Teaching
(Formerly 132.742) Views of teaching, paradigms, and methodologies for studying teaching and carrying out inquiries into teaching. Students may not hold credit for EDUB 7420 and EDUB 7421 (or 132.742 or 081.722).

EDUB 7430 Trends in Vocational Education
(Formerly 132.743) An examination of the historical trends in vocational education as influenced by a changing society. Special emphasis will be placed on the contributions of individuals on the impact of federal and provincial legislation as it affects vocational education. Students may not hold credit for both EDUB 7430 (or 132.743) and the former 081.713.

EDUB 7440 Seminar in Home Economics Education
(Formerly 132.744) An application of current research to the design, implementation and evaluation of programs in home economics education. Students may not hold credit for both EDUB 7440 (or 132.744) and the former 081.716.

EDUB 7450 Seminar in Educational Technology
(Formerly 132.745) A review of current research in educational technology and a critical appraisal of recent technology in instructional development. Students may not hold credit for both EDUB 7450 (or 132.745) and the former 081.721.

EDUB 7460 Information Technology and Education
(Formerly 132.746) A theoretic study of information media and environments, their educational and societal impact, and their educational application. Students may not hold credit for both EDUB 7460 (or 132.746) and the former 081.723.

EDUB 7470 Seminar in Mathematics Education
(Formerly 132.747) An analysis of methods and materials in mathematics education,

a review of research, and a critical appraisal of current curriculum development. Students may not hold credit for both EDUB 7470 (or 132.747) and the former 081.720.

EDUB 7480 Advanced Seminar in Mathematical Diagnosis and Remedy
(Formerly 132.748) A close examination of the theory and practice of mathematical diagnosis and remedy across the school curriculum. Students may not hold credit for both EDUB 7480 (or 132.748) and the former 081.724. Prerequisite: permission of instructor.

EDUB 7490 Theories of Teaching Mathematics (Secondary)
(Formerly 132.749) An examination of the objectives of secondary school mathematics, mathematics curriculum organization and development, theories of learning and teaching secondary school mathematics, and mathematics assessment programs. Students may not hold credit for both EDUB 7490 (or 132.749) and the former 081.725.

EDUB 7500 Seminar in Science Education
(Formerly 132.750) A review of current research in science education, and a critical appraisal of current curriculum development in science. Students may not hold credit for both EDUB 7500 (or 132.750) and the former 081.719. Prerequisite: [STAT 1000 (or 005.100) and STAT 2000 (or 005.200)] or [EDUA 5800 (or 129.580 or 043.503 or 005.221)] (C+) or equivalent.

EDUB 7510 Educational Problems and Advanced Methods in Health and/or Physical Education
(Formerly 132.751) An examination of the relationship of research to educational practice in the teaching of health and/or physical education. Students may not hold credit for both EDUB 7510 (or 132.751) and the former 081.711.

EDUB 7520 Contemporary Curricula in Health and/or Physical Education
(Formerly 132.752) An examination of principles and content of health and/or physical education curricula and programs. Logistical and social-political factors associated with implementation will be examined. Students may not hold credit for both EDUB 7520 (or 132.752) and the former 081.712.

EDUB 7530 Curriculum Development and Implementation in Language and Literacy
(Formerly 132.753) A study of historical antecedents - issues, theory and research - in relation to both the reading and writing curriculum contrasted with current structuralist, poststructuralist and deconstructivist views of knowledge construction with emphasis on discourse synthesis, individual cognitive processes and social influences on literacy learning. Not to be held with EDUB 7531. Prerequisite: A minimum of 3 credit hours of reading courses.

EDUB 7540 Final Seminar in Curriculum, Teaching and Learning
(Formerly 132.754) Seminar and workshop on processes and products in writing and defending an M.Ed. final inquiry paper. Both qualitative and quantitative research models will be acknowledged. Not to be held with EDUB 7541. Prerequisite: Minimum 24 credit hours completed in a comprehensive M.Ed. Program.

EDUB 7550 Historical and Contemporary Approaches to Curriculum
(Formerly 132.755) Historical Developments of curriculum as a field of study and inquiry, including the philosophical, social, political, and cultural contexts of curriculum. Students may not hold credit for both EDUB 7550 (or 132.755) and either former 132.730 and 063.734.

EDUB 7560 Theory and Practice of Curriculum Design and Development
(Formerly 132.756) An examination of the theory and practice of the design, development, implementation and evaluation of curricula for K-12 and adult/post-secondary levels. Prerequisite: EDUB 7550 (or 132.755) or 036.734, 081.717, 081.718, EDUB 7300 (or 132.730) (C+) or written consent of instructor. Students may not hold credit for both EDUB 7560 and 132.756 or 132.731 or 063.735.

EDUB 7570 Contemporary Perspectives and Practices in Music Education
(Formerly 132.757) A study of current and emerging perspectives and practices in music education with emphasis on recent theory and research as it relates to music

teaching and learning at all levels.

EDUB 7580 Theory and Research in a Second Language Acquisition
(Formerly 132.758) Examination of the development of the field of second language acquisition study, including historical views, issues, theories and models in relation to language universals, cognitive development, language mastery, and second language acquisition and learning.

EDUB 7590 Internationalization of Technical and Vocational Education and Training
(Formerly 132.759) An exploration and critical evaluation of basic assumptions underlying the theories and values of globalization and the internationalization of technical and vocational education and training (TVET). Emphasis will be placed on the examination of how these theories and values influence institutions, programs, policies and practices in TVET.

EDUB 7600 Action Research in Education
The study of the theory and practice of action and participatory action research in education including models, principles and practices, criteria for assessing quality, ethics, and modes of representation. Prerequisite: EDUA 5800 (129.580) (C+).

EDUB 7990 Seminar in Environmental Education
(Formerly 132.799) Designed for students wishing to concentrate on science teaching and learning within the context of environmental education. Existing and projected programs and approaches to environmental education will be subjected to critical analysis. Students may not hold credit for both EDUB 7990 (or 132.799) and the former 081.710.

Dental Diagnostic and Surgical Sciences

Dental Diagnostic ,
For information about graduate programs in the following units: Oral Biology or Preventative Dental Science please refer to the table of contents for page numbers.

Dental Diagnostic ,
Master of Dentistry (Oral and Maxillofacial Surgery),
Program Information

The Master of Dentistry (Oral and Maxillofacial Surgery) which is four years in length includes a four-year hospital residency for which a Post-Graduate Training Certificate is awarded. Usually one student is accepted per year. The program has full accreditation from the Commission on Dental Accreditation of Canada. The primary objective of the program is to train dentists to become competent, ethical Oral and Maxillofacial surgeons for practice in Canada, and to provide them with a scientifically based curriculum which will prepare them for the challenges they will face in the development of their speciality, throughout their professional careers.

The clinical program provides comprehensive training in all the major areas generally included within the scope of practice of an Oral and Maxillofacial Surgeon. Students are provided with opportunities to attend and present papers at National and International conferences related to aspects of their speciality and an external elective rotation is permitted subject to approval of the Program Director.

Fields of Research

Faculty supervises every student in at least one research project during the training period and their interests provide for a wide spectrum of clinically related topics. Dental implants, maxillofacial trauma, temporomandibular disorders, cleft lip and palate, tissue regeneration and wound healing, cranio-facial deformity, surgical pathology, including head and neck oncology, oral medicine and therapeutics are examples of areas in which faculty have published and have a continuing interest. Collaborative research with other departments is encouraged and does occur.

Research Facilities

The research facilities in the Faculties of Dentistry and Medicine, the Health Sciences Centre and related institutions in the Winnipeg Regional Health Authority

are extensive, accessible, and provide opportunities for a wide range of research endeavours by graduate students in Oral and Maxillofacial Surgery.

Admission Requirements

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, applicants must be Canadian citizens or permanent residents of Canada and be in possession of a National Dental Examining Board of Canada Certificate. They must comply with provincial requirements for licensing of interns and residents. Some additional post-graduate experience is desirable.

Application Deadlines

Students must submit their application and supporting documentation to the Faculty of Graduate Studies by September 1st, prior to the year of admittance. The normal starting date is July 1st.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Students must complete: all clinical rotations and assignments as set out in the four years of hospital residency training; courses DDSS 7230, DDSS 7240, DDSS 7250, DDSS 7260, DDSS 7270, DDSS 7280 and DDSS 7290; ancillary course ANAT 7060, CHSC 7470 and other basic science courses as selected by the department. An essay/research project DDSS 7220 in a specified area selected in consultation with the department is required.

Second Language Reading Requirement: None

Expected Time to Graduate: Four years

Ph.D. in Dental Diagnostics,
There is no Ph.D. Program in Dental Diagnostic and Surgical Sciences.

Periodontics ,
Master of Dentistry (Periodontics),
Program Information

The three-year Master of Dentistry (Periodontics) Program is one of only four graduate periodontics programs in Canada. The program accepts two students every two of three years. At any given time there are four students in the program. The program entails clinical training, lectures, seminars in the clinical and related basic sciences and research. The program is certified and fully accredited by the Commission on Dental Accreditation of Canada and, as such, is also recognized by the American Dental Association.

The mission of the program is to educate dentists to be scientifically-based, clinically-competent, and community-concerned, ethical periodontists. The program provides periodontal consultation and treatment services, including dental implants, to patients attending the dental school and patients referred by dentists in Winnipeg and throughout Manitoba. Students are provided the opportunity to treat a full range of periodontal problems and to participate in on-going clinical and basic periodontal research. The Graduate Periodontics Clinic simulates a private periodontics practice and provides dental hygienist and dental assistant support to students. In addition, a clinic is held at the adjacent Health Sciences Centre where periodontal consultative and treatment procedures are provided for patients who have serious medical conditions.

Fields of Research

Research interests of faculty involved with the program include (a) clinical trials of therapeutic interventions in the treatment of periodontitis and peri-implantitis, (b)

diagnosis of periodontal diseases, and (c) the effect of tobacco on periodontal tissues and smoking cessation initiatives in Periodontics and (d) oral systemic relationships. In addition, collaborative research opportunities are available in such areas as saliva, calculus and plaque formation, the microbiology of periodontitis and cell signaling mechanisms, through the Department of Oral Biology.

Research Facilities

In addition to the clinical facilities, general laboratories, radiographic and darkroom facilities of the Faculty of Dentistry, there is access to equipment belonging to the Department of Oral Biology. Clinical facilities are also available at the adjacent Health Sciences Centre Hospital. The Grad Perio Clinic has high-tech instruments for research like Periotron and Florida Probe.

Admission Requirements

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, applicants must have a D.M.D. degree or its equivalent from an approved college or university.

Application Deadlines

Students must submit their application and supporting documentation to the Faculty of Graduate Studies by September 1, prior to the year of admittance. The normal starting date is August 1.

Program Requirements

In addition to the minimum course requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, students must complete: courses DDSS 7010, DDSS 7050, DDSS 7120, DDSS 7130, DDSS 7150, DDSS 7210, DDSS 7230 and DDSS 7300; ancillary courses ANAT 7060, CHSC 7470, ORLB 7090, ORBL 7110 and other basic sciences as selected by the department; An essay/ research project (DDSS 7220) in a specified area selected in consultation with the department.

Second Language Reading Requirement: None

Expected Time to Graduate: Three years

Ph.D. Periodontics,
There is no Ph.D. Program in Dental Diagnostic and Surgical Sciences.

Page URL,
<http://crscalprod1.cc.umanitoba.ca/DentalDiagnosticandSurgicalSciences.catx>

Dental Diagnostic and Surgical Sciences-Course Descriptions

DDSS 7010 Biology and Pathology of the Periodontium (Formerly 103.701) Selected topics in cell biology precedes a comprehensive and detailed survey of the periodontium, its constituent tissues and its function; the cell dynamics of inflammation and wound healing and the histopathology of the early and advanced periodontal lesion.

DDSS 7050 Oral Medicine and Oral Diagnosis (Formerly 103.705) This course provides the student, through clinical rotations, with the opportunity to enhance diagnostic and non-surgical management of oral pathologic conditions including mucosal and intrabony lesions, temporomandibular joint disorders, and oral manifestations of systemic disease in both otherwise healthy and medically compromised patients.

DDSS 7120 Advanced Clinical Periodontics (Formerly 103.712) This seminar course will review contemporary clinical

periodontics by considering assigned readings in current texts and review articles. This course is intended to assure that students have a comprehensive overview of conventional periodontal therapy early in their education.

DDSS 7130 Occlusion

(Formerly 103.713) A seminar series devoted to the diagnosis, treatment planning and management of patients with craniomandibular disorders.

DDSS 7150 Review of Periodontal Literature

(Formerly 103.715) This course will consider the concepts underlying the current practice of periodontics by reviewing assigned readings from the scientific literature. Students will be expected to apply principles of critical evaluation in order to identify and appreciate the limitations of these studies and thus the limitations of the current concepts derived from them.

DDSS 7210 Clinical Practice in Periodontics

(Formerly 103.721) Designed to provide the clinical experience which is essential for specialty practice in Periodontics (circa 1600 hours).

DDSS 7220 Essay/Research Project

(Formerly 103.722) An essay/research project is required for each student. It is selected in consultation with, and approved by the department head. This course is graded pass/fail.

DDSS 7230 Advanced Oral Pathology

(Formerly 103.723) The four major etiopathogenic categories of diseases affecting the oral and paraoral structures are discussed with emphasis on common conditions and entities significant to various dental specialties. Lectures cover epidemiology, clinical and laboratory features and management principles with supplementation by seminars or laboratories.

DDSS 7240 Advanced Oral and Maxillofacial Surgery Seminar 1

(Formerly 103.724) This course includes a thorough review of the applied scientific basis for the practice of oral and maxillofacial surgery and emphasizes surgical anatomy and pathology, diagnosis and technique. Instruction will be given by means of lectures, seminars, case presentations and a critical review of current literature. Year I.

DDSS 7250 Clinical Advanced Oral and Maxillofacial Surgery 1

(Formerly 103.725) The first year of hospital residency includes training in history taking and physical diagnosis; hospital protocols and ward procedure; minor oral surgery procedures and pain control techniques; operating room procedures and general in-patient care. Year I.

DDSS 7260 Advanced Oral and Maxillofacial Surgery Seminar 2

(Formerly 103.726) Lectures, seminars, case presentations and reviews of current literature will emphasize the state of current knowledge regarding the clinical practice of advanced oral and maxillofacial surgery. Year 2.

DDSS 7270 Clinical Advanced Oral and Maxillofacial Surgery 2

(Formerly 103.727) The second year of the hospital residency training program includes training in minor oral surgery, including dento-alveolar, pre-prosthetic surgery and implantology. It also provides an introduction to advanced oral and maxillofacial surgery and maxillofacial imaging. A rotation to Internal Medicine is included. Year II.

DDSS 7280 Clinical Advanced Oral and Maxillofacial Surgery 3

(Formerly 103.728) The third year of the hospital residency training program includes rotations in Anaesthesia, Internal Medicine, General and Plastic Surgery, Surgical Intensive Care and Emergency Room. It also includes training in advanced oral and maxillofacial surgery. An elective rotation may also be arranged. Year III.

DDSS 7290 Clinical Advanced Oral and Maxillofacial Surgery 4

(Formerly 103.729) The fourth year of the hospital residency training program is devoted to advanced oral and maxillofacial surgery. The student is designated chief resident and assumes a greater degree of responsibility in patient care and administrative activities. Year IV.

DDSS 7300 Dental Implantology

(Formerly 103.730) A seminar course devoted to providing an in-depth understanding of the basic and applied aspects of the placement of dental root form implants in humans. This course is a prerequisite to the actual surgical placement of

implants undertaken in DDSS 7210 (or 103.721).

Design and Planning

Design and Planning ,

Design and Planning ,

Design and Planning Program Info,

The Ph.D. in Design and Planning in the Faculty of Architecture is a Faculty based program that provides candidates with the opportunity to conduct advanced and focused research in any of the disciplines represented in the Faculty. Specifically, the Ph.D. program areas in the Faculty of Architecture: Design and Planning Technologies; Design and Planning Education; Design and Planning Practice; Design and Planning Theory; Sustainable Design Planning.

Under the general supervision of the Doctoral Studies Committee. The Doctoral Studies Committee is responsible for the general administration of the Program, in accordance with the policy guidelines approved by the Faculty of Architecture Council and, where applicable, the Faculty of Graduate Studies. In essence, the Doctoral Studies Committee exercises the responsibilities assigned to a Department Head by the Faculty of Graduate Studies in the case of department-based graduate programs. The Doctoral Studies Committee is composed of five members and is chaired by the Associate Dean (Research). The remaining members of the Doctoral Studies Committee, all of whom hold a doctorate or equivalent, are appointed by the Departmental Councils of the Faculty of Architecture.

In addition to the regulations, policies and procedures of the Faculty of Graduate Studies which govern Ph.D. programs (see the Graduate Calendar of the University of Manitoba), the Faculty of Architecture has adopted these supplemental regulations to govern the Faculty-based Ph.D. Program.

Admission

Admission to Ph.D. in Design and Planning program is competitive. A number of factors are taken into account in arriving at an admission decision: (1) the applicant's previous academic background, (2) the practice-based and/or academic experience of the applicant, (3) the referees' assessments of the applicant, (4) the ability of the Faculty to provide the program of studies and research requested by the applicant, (5) the funding support that the applicant has obtained and/or confirmed, and (6) the availability of a faculty member that has expertise in the research area and is willing to supervise the program of studies and research of the applicant.

Students who have a Master degree in a planning or design discipline (architecture, planning, interior design or landscape architecture or equivalent related degree [e.g., industrial design, urban design]) from a recognized institution and who have met the requirements of the Faculty of Graduate Studies will be eligible for consideration to the program.

Students who possess a Master degree in another field outside of the design and planning disciplines from a recognized institution may be considered if they have an undergraduate degree in planning or a design discipline from a recognized institution and have an accumulated grade point average of 3.75 in their Master degree.

Candidates must demonstrate that they have an established record in professional practice and/or professional education, and have demonstrated interdisciplinary experience and/or knowledge. It is recommended that candidates have a minimum of five years of professional practice experience and/or have taught at a recognized institution for a minimum of five years.

Candidates will declare a specialization in one of five following areas: Design and Planning Technologies; Design and Planning Education; Design and Planning Practice; Design and Planning Theory; Sustainable Design and Planning . Candidates to the program will provide: (a) a Problem Statement and Study/Research Rationale (i.e., a description of proposed study [minimum of 5 pages and maximum of 10 pages]); (b) a dossier of their work; (c) evidence of financial support; and (d) three letters of reference (at least one of whom will be an academic) from distinguished members of the planning and/or design profession(s) or equivalent institutions. All candidates to the program will be interviewed by at least three faculty members, two of whom will be from the Faculty of Architecture.

Application Deadlines

Due to funding opportunities, all completed applications must be received by the Faculty of Graduate Studies by the second Friday of October of the year preceding September registration. For updated information please visit the Faculty of Architecture website.

Program Requirements

Each student will be required to take a minimum of 12 credit hours of 700 level courses of which 6 credit hours must include Advanced Theory of Design and Planning (3) and Advanced Research Methods in Design and Planning (3). Students should complete their course work by the end of their first year.

All students will complete a Comprehensive Research Paper and a Comprehensive Design and Planning Theory Project by the end of their second year.

IMPORTANT NOTE:

Each student is responsible for ensuring that they have approval for and have registered in the courses appropriate for their area of study, as determined in consultation with their Advisor and their Advisory Committee.

Coursework:

Coursework is subject to the following regulations:

Each student will be required to take a minimum of 12 credit hours of 700 level courses of which 6 credit hours must include Advanced Theory of Design and Planning (3) and Advanced Research Methods in Design and Planning (3).

All candidates will complete a Comprehensive Research Paper, and a Comprehensive Design and Planning Theory Project.

A minimum of 6 credit hours of coursework at the 700 level must be in the student's program area and must include the program core coursework appropriate to the student's program area. The program area coursework is specific to the individual student and is defined by the Advisory Committee;

Where necessary, the student may be required to complete additional background coursework as identified by the Advisory Committee.

On the recommendation of the Advisory Committee and with the approval of the Doctoral Studies Committee, a maximum of 3 credit hours may be transferred into the program from other approved institutions.

Comprehensive Research Paper and Comprehensive Design and Planning Project:

Graduate Studies

The Comprehensive Research Paper is a literature review that examines potential research methods appropriate for the student's doctoral studies program. The student's advisor will be responsible for reviewing the Comprehensive Research Paper and determining if it is acceptable or not acceptable. If a Comprehensive Research Paper is deemed by the advisor to be unacceptable, the student will re-submit the paper to the advisor. If the advisor deems that the re-submitted Comprehensive Research Paper is still not acceptable, the advisor will submit the Comprehensive Research Paper to the Associate Dean: Research who will make the final determination of acceptability. The Associate Dean: Research's opinion will be final. Should a student fail to have their re-submitted Comprehensive Research Paper accepted, they will be asked to withdraw from the Ph.D. Program.

The Comprehensive Design and Planning Project is a project that will explore the student's area of research interest and identify preliminary considerations that will be explored in detail in the doctoral thesis. The Comprehensive Design and Planning Project will be a written and/or design based submission that is reviewed by the student's Advisory Committee. The Advisory Committee will determine by majority if the Comprehensive Design and Planning Project is acceptable or unacceptable. If the Comprehensive Design and Planning Project is deemed to be unacceptable, the student will be required to re-submit their work until the Advisory Committee deems the Comprehensive Design and Planning Project acceptable. The Advisory Committee may ask the student to withdraw from the Ph.D. program if the re-submitted Comprehensive design and Planning Project is deemed unacceptable.

IMPORTANT NOTE:

As soon as the student and advisor agree upon the program of studies, the program forms must be completed and submitted by the advisor to the Chair of the Doctoral Studies Committee for approval. These forms are available online:

http://umanitoba.ca/faculties/graduate_studies and <http://umanitoba.ca/architecture>

Minimum Program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section. The Ph.D. program consists of coursework, original research and thesis. Normally, 12 credit hours of coursework (all at the 700 level) are required beyond the Master degree or its equivalent. The minimum time requirement is two calendar years of full-time study and research, of which at least one academic year must be spent on campus.

Second language requirement: none

Expected time to graduation: two to four years

Page URL,

Design and Planning-Course Descriptions

ARCG 7100

This course is intended to promote critical thinking and provide opportunities to explore in detail key issues, ideas and theories about design and planning. Considerations may include: The relationship of design and planning theories to the evolution of design and planning practice; Ways in which design and planning theories have been understood to shape built form; Factors that have shaped design and planning theories, their commonalities and disjuncture; Theory discourse as a means of discovering design and planning meaning; The role of theory in practice, research and discovery; The relationship of design and planning theories to other discipline theories as a means of identifying commonalities of interest.

ARCG 7102 Studio Topics in Environmental Processes

A detailed studio study of some special topics in architecture, city planning, landscape architecture or interior design.

ARCG 7120

This course is intended to explore research methods pertinent to the study of design and planning. The considerations to be examined may include: Potential research

tools and techniques that are pertinent to the exploration of design and planning theory, practice and development; Exploration of emerging research processes and methodologies that inform minority and feminist discourse; Review of the evolution of design and planning methods; Analysis of the relationships between research methods in aligned disciplines as those research methods may inform design and planning understanding.

Disability Studies

Disability Studies ,
Disability Studies Program Info,

The focus of the program allows students to examine the policies and practices of all societies in order to understand the social, rather than the physical or psychological determinants, of the experience of disability. This focus shifts the emphasis from a prevention, treatment, remediation paradigm to a social, cultural, political one.

We offer an interdisciplinary Master's Degree Program in Disability Studies. We also offer a graduate level Option in Disability Studies that is available to both Master's and Doctoral students.

Students in the Master's Program will have the opportunity to apply their undergraduate degrees and work experience to pursue advanced interdisciplinary research and scholarship. Students taking the Option in Disability Studies will complement their major program area of study with course work which analyses the social construction of disability.

M.A./M.Sc. in Disability Studies,
Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Graduates of honours or equivalent programs at the University of Manitoba (or equivalent from other recognized universities) with a minimum Grade Point Average (GPA) of 3.0 in the last 60 credit hours, are eligible for direct admission to a course of study leading to the Master's degree. Students who have completed a University of Manitoba Pre-Master's program with a minimum GPA of 3.0 are also eligible for admission. Pre-Master's programs taken at other universities may be accepted.

Students who wish to pursue the M.Sc. are required to have an undergraduate degree in Science.

Students with undergraduate degrees from a wide range of disciplines – such as Architecture, Arts, Education, Human Ecology, Engineering, Law, Management, Medical Rehabilitation, Medicine, Nursing, Physical Education and Recreation Studies, Science, Social Work and Women's Studies - will be considered eligible to apply if they meet the above requirements.

Students who do not meet current admission requirements may contact Disability Studies for advice on appropriate options.

Application Deadlines

The deadline for receipt of the program application form and supporting documents in the department for a September admission is March 1 for International students and June 1 for Canadians and Americans as well as permanent residents. For January admission, the deadlines are July 2 for International applicants and October 1 for Canadian applicants. Students who wish to apply for scholarships and fellowships need to have their applications in by February 1 (for a September admission) or one month prior to the University's deadline for the scholarship application.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this calendar.

The Master's Degree in Disability Studies requirements are twenty-four credit hours; eighteen credit hours of required course work, six credit hours of elective course credit, plus a thesis. The six credit hours of elective courses can be taken from a list of approved courses at the 3000, 4000, 5000 or 7000 level.

M.Sc. students will be required to take at least six hours of elective credit hours at the 7000 level in science subjects in those Faculties participating in the M.Sc. The student's Advisory Committee or the Disability Studies Graduate Program Committee may require other additional science courses at the 3000 or 4000 level. It should be noted that students will normally be required to fulfil 7000 level course prerequisites before enrolling in 7000 level courses.

All academic programs must be approved by the Disability Studies Graduate Program Committee. This is normally done on the recommendation from the student's advisor and/or Advisory Committee following consultation with the student.

Option in Disability Studies,
Admission

The Option in Disability Studies is offered to students in faculties and departments that currently have a graduate program. Upon completion of the requirements, a concentration in Disability Studies will be recorded on the student's transcript. For information concerning the option, interested students are directed to their student advisor or to the Director of Disability Studies.

Program Requirements

The Option in Disability Studies requirements are DS 7010 (6) Disability Studies and either DS 7020 (3) The History of Disability or DS 7030 (3) Evaluation and Application of Research Methods in Disability Studies.

Page URL,
<http://crscalprod1.cc.umanitoba.ca/DisabilityStudies.catx>

Disability Studies Course Descriptions

DS 7010 Disability Studies

(Formerly 162.701) Explores the key concepts and issues in disability studies. Includes a critical examination of models and theories of disability, Canadian and other national laws and international standards, social and economic policy, and professional and service responses.

DS 7020 History of Disability

(Formerly 162.702) Traces the historical development of responses to disability, by the medical/rehabilitation community, the governments, advocacy organizations and others. Canadian history will be the initial framework and the historical developments in other countries (including the UK, France, the USA, the Caribbean) will be used as a comparison. Pre- or co-requisite: DS 7010 (or 162.701)

DS 7030 Evaluation and Application of Research Methods in Disability Studies

(Formerly 162.703) Provides a critical evaluation of quantitative and qualitative research methodologies used in disability studies. Methods to address disability used in different disciplines as well as transformative and empowerment methodologies such as participatory action and feminist disability research will be examined. Pre- or co-requisite: DS 7010 (or 162.701)

DS 7040 Selected Topics in Disability Studies

(Formerly 162.704) One key theme will be chosen for each year from the interests and availability of faculty. Topics could include women with disabilities, international dimensions of disability, disability policy and practice, disability organizing and other topics developed over time. Pre- or co-requisite: DS 7010 (or 162.701)

Economics

Economics ,

Economics Grad Program Info,

The Department of Economics offers graduate instruction leading to MA and PhD degrees, as well as a Pre-MA program. Enrolment is limited in order to sustain the flexibility and other advantages of a small graduate program and to tailor the program to individual needs. Students in the program come from Canada and around the world. Departmental funding policies are geared to the maintenance of a broad, international student base.

The Department of Economics at the University of Manitoba is both heterodox and policy-oriented. Faculty are heavily involved in shaping policy locally as well as at the national and international levels. Faculty have strong ties to economic research and forecasting organizations, international aid agencies and institutes for social policy research. Faculty members include neoclassicists, Keynesians, post-Keynesians, Marxists, institutionalists, empiricists, and econometricians. In addition to the standard economics curriculum, graduate students can choose from a variety of approaches and research areas, as well as take advantage of the department's openness to research topics that extend beyond the bounds of the department itself.

Fields of Research

Faculty interests span the areas of labour economics, macro and micro economics, public finance, development, international trade, econometrics, environmental and resource economics, sustainable development, institutional economics, economic history, history of economic thought, health economics, alternative economic theory, and agricultural economics. See below for PhD fields.

Research Facilities

The university has a Research Data Centre providing close access to Statistics Canada confidential data files. The department also maintains close links to other departments on campus in order to facilitate student learning in a wide range of areas. Graduate students are encouraged to do interdisciplinary research associated with the Transport Institute, the Natural Resources Institute, the Centre on Aging, and the Labour and Workplace Studies program. These centres offer academic expertise, facilities, grass roots connections, and, occasionally, funding opportunities. PhD fields in the department are classified as: agricultural economics, applied econometrics, applied microeconomics, development economics, and heterodox economics.

M.A. in Economics,
Admission

Applicants with a B.A. (Hons.) degree in Economics from the University of Manitoba, or its equivalent, may be admitted to the M.A. degree program. All M.A. students must successfully complete ECON 6040 as the first course of their program, which will be taken during a two-week period immediately preceding the first term of each academic year. However, applicants lacking the level of education normally required, i.e. B.A. (Hons.) in Economics or equivalent, for entry into the M.A. program or to the M.A. year of a Ph.D. program will be expected to acquire these qualifications in one or more pre-M.A. years.

Application Deadline Dates

September Admission

January 15 (International Students) May 1 (Canadian/Canadian permanent residents/US Students)

Please send application and all supporting documentation directly to the Faculty of Graduate Studies. Please note that students applying to the Department of Economics must submit 3 letters of reference with their application.

Please note that the Department of Economics does not normally accept students in the January session as the required Math and Theory courses start in the fall.

Graduate Studies

Page 623

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this calendar. Department requirements can be found in the Departmental Supplementary Regulations available from the department.

MA including thesis: Master's in Economics students must complete ECON 6040 and 15 credit hours of coursework. Courses will be at the 7000 level, with the following exceptions. If deemed necessary by the Graduate Studies committee, a maximum of six credit hours may be permitted at the 4000 level if the field is not offered at the 7000 level in Economics or at the 3000 level or above in an ancillary field. Students must also complete a suitable thesis.

MA, without a thesis: Alternatively, candidates may complete the M.A. degree by coursework and research paper. A minimum of 27 credit hours of coursework is required, including ECON 6040 and ECON 7000. Courses will normally be at the 7000 level. If deemed necessary by the Graduate Studies committee, a maximum of six credit hours may be permitted at the 4000 in Economics if the field is not offered at the 7000 level or at the 3000 level or above in an ancillary field.

A minimum of six credit hours of coursework in economic theory at the graduate level is normally required. The theory requirement consists of ECON 7650 and ECON 7722. On the recommendation of the student's advisor and with the approval of the Graduate Studies Committee, a student completing a thesis may be allowed to substitute an ancillary course for part of the theory requirement.

Ancillary courses are normally selected from disciplines related to Economics and to a candidate's thesis (e.g., political studies, sociology, history, statistics, mathematics).

Second Language Reading Requirement: none

Expected Time to Graduate: one year

Ph.D. in Economics,
Admission

1) Except as provided in 2) below, applicants for admission to the Ph.D. program must have completed the entrance requirements and the program requirements of an M.A. degree in Economics or in Agricultural Economics equivalent to that awarded by the University of Manitoba.

2) In exceptional cases, applications may be considered from students who have completed an Honours degree in Economics equivalent to that awarded by the University of Manitoba. In such cases, the applicant will be required to fulfill, in addition to the requirements below, all coursework requirements for the M.A. degree by comprehensive examination option.

Application Deadline Dates

September Admission

January 15 (International Students) May 1 (Canadian/Canadian permanent residents/US Students)

Please send application and all supporting documentation to the Faculty of Graduate Studies. Please note that students applying to the Department of Economics must submit 3 letters of reference with their application.

Please note that the Department of Economics does not normally accept students in the January session as the required Theory courses start in September.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this calendar. Ph.D. students in Economics must complete:

- A minimum of 24 credit hours of course work at the 7000 level. No more than 6 credit hours may be taken in a department other than Economics as part of this minimum course work requirement, if deemed necessary by the Graduate Studies committee in consultation with the student's supervisor.
- A minimum of 36 credit hours of 7000 level courses in their M.A. and Ph.D. programs. These 36 credit hours must include:
- A minimum of 12 credit hours in economic theory. The theory requirement will normally be ECON 7650, ECON 7660, ECON 7722, and ECON 7732. Upon the recommendation of a student's advisory committee, the Graduate Studies Committee may permit a student to substitute two of the following for ECON 7660 and ECON 7732: ECON 7670 and ECON 7740.
- 3 credit hours of Econometrics at the 7000 level, 3 credit hours of heterodox economics at the 7000 level and either 3 credit hours of History of Economic Thought or Economic History.

Fields of Concentration and Candidacy Examinations

Students must present themselves for one set of theory candidacy examinations. The theory examination consists of microeconomic and macroeconomic theory, which are assessed separately. Students must choose two fields of concentration and complete a research paper in one of the fields: Fields from which a student may select are:

Agricultural Economics Development Economics
Applied Econometrics Heterodox Economics
Applied Microeconomics

The Ph.D. in Agricultural Economics is offered with the cooperation with the Department of Agribusiness and Agricultural Economics. For information on faculty, course offerings and specialization, contact the department of Agribusiness and Agricultural Economics.

Second language requirement: none

Expected time to graduation: four years

Page URL,
<http://crscalprod1.cc.umanitoba.ca/Economics.catx>

Economics Course Descriptions-6000 Level

ECON 6020 Macroeconomic Theory: Survey and Applications (Formerly 018.602) A review of the principles of contemporary macroeconomic theory and of the application of that theory, in both closed and open economies.

ECON 6030 Microeconomic Theory: Survey and Applications (Formerly 018.603) A review of the principles of contemporary microeconomic theory and of the application of that theory, in both closed and open economies.

ECON 6040 Survey of Mathematical Topics for Economists (Formerly 018.604) A review of mathematical concepts used in economics, particularly at the graduate level. Topics include linear economic systems and matrix algebra, differentiation and optimisation, integration, economic dynamics and optimisation through time, and difference and differential equations. This course cannot be counted toward the minimum degree requirements for M.A. and Ph.D. degrees. This course is graded pass/fail.

Economics Course Descriptions-7000 Level

ECON 7000 M.A. Research Workshop
An examination of research methodology to assist students in understanding the

process of research in Economics. Students will complete a research project under direct supervision. This is a required course for students in the M.A. by course work. This course is graded pass/fail. Prerequisite: permission of department head.

ECON 7010 Econometrics I

An advanced course in estimation and hypothesis testing in various regression models. Topics may include: asymptotic distribution theory; ordinary least squares estimation; maximum likelihood estimation; generalized least squares estimation; generalized method of moment estimation; and seemingly unrelated regressions estimation.

ECON 7020 Econometrics II

An advanced applied course in cross-section and panel data econometrics. Topics may include logit, probit, heckman selection, and poisson; instrumental variables, difference-in-differences, regression discontinuity; fixed and random effects; dynamic panel models; quantile regression, nonparametric estimation; bootstrapping. Prerequisite: ECON 7010.

ECON 7032 Econometrics III

Theory and applications of time-series analysis. Topics may include stationary univariate process; maximum likelihood estimation; Markov-switching models; state-space models; unit root process; vector autoregressive models; spurious regression; cointegration; and vector error correction models. Prerequisite ECON 7010.

ECON 7040 Topics in Applied Microeconomics I

Advanced study in a selected topic in applied microeconomics. Topics covered in rotation include, but are not limited to labour economics, health economics, public finance, industrial organization, international trade, environmental economics, evaluation of public policy, production economics and applied game theory. Prerequisite: A grade of C+ or better in ECON 7722 or former ECON 7720 (018.772).

ECON 7050 Topics in Applied Microeconomics II

Advanced study in a selected topic in applied microeconomics. Topics to be covered in rotation include, but are not limited to labour economics, health economics, public finance, industrial organization, international trade, environmental economics, evaluation of public policy, production economics and applied game theory. Prerequisite: ECON 7722 or former ECON 7720 (018.772).

ECON 7060 Advanced Heterodox Theory

This course is a review and examination of heterodox economic theory. Core topics include the theory of capitalist production, effective demand and economic fluctuations, growth and accumulation, crisis theory, and the state and economic policy.

ECON 7130 Advanced Development Economics

Introduction to development economics at the graduate level. A core objective is to provide breadth in terms of the coverage of salient topics in economic development and rigor in terms of the level of analysis. The course presumes a substantive background in the basic tools of economic analysis. This is a required course for doctoral students who intend to make development economics one of their field specializations.

ECON 7140 Topics in Development Economics

A generic course title intended to accommodate various topics in development economics. The specific topic will be chosen by the instructor.

ECON 7170 Topics in Heterodox Economics I

Selected study of advanced work in a selected field of heterodox economics.

ECON 7180 Topics in Heterodox Economics II

Selected study of advanced work in a selected field of heterodox economics.

ECON 7202 Industrial Organization

The emphasis will be on market structures and strategic interaction among firms. Topics such as oligopoly pricing, price discrimination, strategic entry deterrence, product differentiation, advertisement, research and development, auction design, regulation, and anti-competitive behavior will be covered. Students may not hold credit for both ECOBN 7202 and the former ECON 7200 (018.720).

ECON 7230 Directed Special Studies in Economics

(Formerly 018.723) Intensive study of advanced work in a selected field of

economics. As the course content will vary from year to year, students may take this course more than once for credit.

ECON 7300 Directed Special Studies in Economics (Formerly 018.730) First term of ECON 7230 (or 018.723). As the course content will vary from year to year, students may take this course more than once for credit.

ECON 7350 Public Finance: Public Expenditures (Formerly 018.735) The role of government expenditures and criteria for their evaluation. Public goods theory. Externality problems. Public choice. Benefit-cost analysis. Public enterprising pricing.

ECON 7360 Public Finance: Taxation (Formerly 018.736) Examination of income, profits, sales, property and other taxes, their allocational and distributional effects. Canadian tax policy. Tax incentives. Resource taxation. Intergovernmental fiscal relations in Canada and elsewhere. Public debt.

ECON 7430 Advanced Theory of Resource Economics (Formerly 018.743) Economic theory of the development and management of natural resources. Application of capital theory, investment theory, the theory of externalities and decision-making theory to resource utilization and management. A strong background in microeconomics is required. Also offered as ABIZ 7430 by the Department of Agribusiness and Agricultural Economics.

ECON 7500 Monetary and Financial Theory (Formerly 018.750) The microeconomics of money and other financial assets, in partial and general equilibrium frameworks. Explanation of financial market structure and behaviour with and without costless information. Students may not hold credit for both ECON 7500 (or 018.750) and the former 018.704.

ECON 7510 Advanced Monetary Macroeconomics (Formerly 018.751) Mainstream and other theories of how money matters to macroeconomics, theory and practice of policy rules for both monetary and other stabilization policy tools. Students may not hold credit for both ECON 7510 (or 018.751) and the former 018.704.

ECON 7540 Advanced History of Economic Thought (Formerly 018.754) Not currently offered.

ECON 7610 Approaches, Methodologies and Techniques in Economic History (Formerly 018.761) A review of methodologies, approaches, techniques, and contemporary controversies in economic history.

ECON 7620 Selected Studies in Economic History (Formerly 018.762) Not currently offered.

ECON 7630 Theory of International Trade (Formerly 018.763) Theories of trade flow; trade and income distribution; economic growth and changes in trade flows; instruments of trade intervention; international labour and capital movements; and economic integration.

ECON 7640 International Money and Finance (Formerly 018.764) Analysis of the theory of international money and finance. Assessment of existing international institutions dealing with money and finance. Theory, rationale and evaluation of structural adjustment policies. Prerequisite: ECON 7630 (or 018.763), or both ECON 7500 (or 018.750) and ECON 7510 (or 018.752) (or the former 018.704), or permission of instructor.

ECON 7650 Advanced Macroeconomic Theory 1 (Formerly 018.765) A review of contemporary macroeconomic theories and their applications; analysis of static equilibrium and disequilibrium models; exploration of such models' implications for cyclical behaviour and for policymaking. Prerequisite: ECON 6040 (or 018.604) which may be waived on demonstration of equivalent mathematical competence.

ECON 7660 Advanced Macroeconomic Theory 2 (Formerly 018.766) Analysis of cyclical models and of equilibrium growth models, and a review of contemporary theories of stabilization policy. Prerequisite: ECON 7650 (or 018.765).

ECON 7670 Advanced Macroeconomic Topics (Formerly 018.767) Not currently offered.

ECON 7690 Structuralist Theories of Development (Formerly 018.769) Study of structuralist classical Marxist and Neo-Marxist theories of development and underdevelopment. Appraisal of the development strategies which follow from the various theories.

ECON 7722 Advanced Microeconomic Theory I This course will cover topics in theories of consumer demand, production and cost, distribution, market equilibrium, market organization, general equilibrium and welfare. Students may not hold credit for both ECON 7722 and the former ECON 7720 (018.772). Prerequisite: ECON 6040 (018.604) which may be waived on demonstration of equivalent mathematical competence.

ECON 7732 Advanced Microeconomic Theory II This course will cover topics in game theory. Static and dynamic games with complete or incomplete information will be studied. Topics such as market failure arising from asymmetric information, firm behavior in oligopolistic markets, auctions, signaling, free riding, externalities, and public goods will be discussed. Students may not hold credit for both ECON 7732 and the former ECON 7730 (018.773). Prerequisite: ECON 7722.

ECON 7770 Economics of Marx (Formerly 018.777) An intensive study of Marx's mature theory and especially of 'Capital'. Theories of Surplus Value, and 'the Grundrisse'.

ECON 7780 Debates in Marxian Economics (Formerly 018.778) An analysis of the major theoretical debates within the Marxian paradigm.

ECON 7790 Advanced Labour Economics (Formerly 018.779) A review of the theoretical and empirical foundations of modern labour economics.

ECON 7800 Labour Problems and Policies (Formerly 018.780) A course dealing with various contemporary problems and controversies in labour economics. Prerequisite: ECON 7790 (or 018.779).

ECON 7940 Production Economics (Formerly 018.794) Development of static microeconomic theories of the firm, functional forms, aggregation issues, productivity analysis, risk and uncertainty and in introduction to dynamics. The following are emphasized: a rigorous treatment of the models using duality; a critical understanding of the limitations and possibilities for generalizing the models; and relevance of the models for empirical research, especially in agriculture. Also offered as ABIZ 7940 by the Department of Agribusiness and Agricultural Economics. May not be held with ABIZ 7940 (or 061.794) or 018.793 or ABIZ 7130 (or 061.713).

ECON 7950 Advanced Agricultural Demand Analysis Critical evaluation of economic theory as applied to agricultural demand. Topics include demand systems; equilibrium; product transformation over time, place and form; and price analysis. Also offered as ABIZ 7950 in the Department of Agribusiness and Agricultural Economics. Students may not hold credit for ECON 7950 and any of: ABIZ 7950 or the former ECON 7900 (018.790) or the former ABIZ 7100 (061.710).

Education - Collège universitaire de Saint-Boniface

Education -Collège universitaire de Saint-Boniface,
Education -St Boniface Program Info,
The Department offers the following specializations: Inclusive Special Education; Educational Administration; Guidance and Counselling; Language, Literacy and Curriculum. Some courses are the French equivalent of the courses offered at the Faculty of Education, University of Manitoba. Many courses are specific to French education in the Province of Manitoba.

Contact the department for information on this program of study.

Page URL,

<http://crscalprod1.cc.umanitoba.ca/Education-CollègeuniversitairedeSaint-Boniface.catx>

Education - Ph.D.

Education-Ph.D.,

Education PhD,

For information about graduate programs in the following units: Collège universitaire de Saint-Boniface, Curriculum, Teaching and Learning, or Educational Administration, Foundations and Psychology please refer to the table of contents for page numbers.

Education PhD Program Offerings,

Each year, the Faculty offers a cohort in a specified area of study. The Faculty also considers applications through an individualized, or "ad hoc" route. For more information, see our website <http://umanitoba.ca/education/>

Ph.D. in Education, Admission

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this *Calendar*, successful applicants must possess:

- an earned Master's degree from a recognized institution (The M.Ed. comprehensive route at the University of Manitoba is typically a terminal degree. That is, it is insufficient, in number and of itself, as evidence of research capacity for admission into the Ph.D. program in Education at the University of Manitoba);
- a minimum Grade Point Average of 3.0 in the last 60 credit hours;
- an appropriate academic background as defined by the program area to which admission is being sought; and
- appropriate research capability as evidenced by: a thesis from a recognized institution; a major research paper equivalent to a thesis from a recognized institution; an independently completed research article published in a refereed journal; or a research product equivalent to one of the categories above; and appropriate occupational experience such as: teaching in schools or non-school settings; post-secondary teaching; practice in school counselling; psychology, or a similar helping profession; educational administration; administrative experience in a government department; or experience equivalent to one of the five categories above.

Admission to the Ph.D. in Education program is competitive. A combination of factors are taken into account in arriving at an admission decision: the applicant's previous academic background; the referees' assessments of the applicant; the ability of the faculty to provide the program of studies and research requested by the applicant; and the availability of a faculty member competent and willing to supervise the program of studies and research of the applicant.

The application deadline date for the Ph.D. in Education program is January 15, for admission in the following September.

Program Requirements

In addition to the minimum course requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this *Calendar*, students must complete a minimum of 24 credit hours of coursework. The minimum coursework is comprised of a minimum of 12 credit hours in the program area; a minimum of six credit hours in a cognate area; and a minimum of six credit hours of research methods/analysis. A minimum of 18 credit hours must be at the 7000 level. All courses taken in the Faculty of Education must be at the 7000 level or above.

Courses taken outside the Faculty of Education must be at the 3000 level or above. A minimum of 12 credit hours of coursework must be taken in the Faculty of Education. Where relevant to the student's area of research and study, students are encouraged to take courses outside of the Faculty of Education of the University of Manitoba.

Residence Requirement: Ph.D. students must devote two terms at the University of Manitoba to full-time study. One term is Fall (September to December), Winter (January to April), or Summer (May to August). Students may not be employed full-time during their residency.

Second Language Reading Requirement: None

Expected Time to Graduate: 3 to 4 years for full-time studies

<http://crscalprod1.cc.umanitoba.ca/Education-Ph.D.catx>

Education-Ph.D.-Course Descriptions

EDUC 7030 Doctoral Tutorial in Education

(Formerly 124.703) A course of directed independent study relevant to a student's area of doctoral specialization. Prerequisite: GRAD 8010 (or 069.801) Candidacy Examination

EDUC 7040 Current Issues in Mathematics Education

(Formerly 124.704) An investigation of topics of current theoretical and practical significance in mathematics education. Students will be required to complete a series of explorations, typically involving observation or experimentation in the field, which will be the focus of discussion.

EDUC 7050 Doctoral Study in Education

(Formerly 124.705) Directed study of contemporary research and theory in selected areas within the field of education. The content of this course will vary from year to year and will depend upon students' research interests.

EDUC 7060 Advanced Seminar in Educational Administration 1

(Formerly 124.706) A study of alternative conceptions of educational administration, from its origins as a field to the present. Attention will be given both to historical and contemporary theories of administration. Limited to Ph.D. students and compulsory for Ph.D. students with a focus in educational administration.

EDUC 7070 Advanced Seminar in Educational Administration 2

(Formerly 124.707) A consideration of some of the central problems of contemporary social theory and their relationship to the study and practice of educational administration. The course is limited to Ph.D. students and is compulsory for Ph.D. students with a focus in educational administration. Pre- or corequisite: EDUC 7060 (or 124.706) (C+).

EDUC 7080 Language and Rhetoric Education

(Formerly 124.708) Current theories of language with a particular emphasis on concepts of education as discourse and instruction as a rhetorical activity. Prerequisite: admission into the Ph.D. program in Language and Literacy Education.

EDUC 7090 Language Arts Curriculum

(Formerly 124.709) How current research, scholarship and theorizing in the areas of language, literature and curriculum studies can assist in developing fresh approaches to reconceiving the nature and purpose of the language arts curriculum as a linguistic, political and cultural enterprise. Prerequisite: admission into the Ph.D. program in Language and Literacy Education.

EDUC 7100 Reading Education

(Formerly 124.710) Current trends, curricular issues and new concerns in reading education including the continuing tension between traditional and progressive ideologies. Identifies, from a historical perspective, what has changed, what has not and why; reflects on what is known and what to study; and sets a research agenda for the study of literacy. Prerequisite: admission into the Ph.D. program in Language

and Literacy Education.

EDUC 7110 Doctoral Seminar in Science Education

(Formerly 124.711) An exploration of current research, scholarship and thinking in science education as exemplified by key themes and current issues related to science and science education. Prerequisite: admission into the Ph.D. program in Science Education.

EDUC 7120 Current Issues in Science Education

(Formerly 124.712) An examination of current issues in science education by way of selected topics tailored to individual students' programs and interests. Prerequisite: admission into the Ph.D. program in Science Education.

EDUC 7130 Language and Identity in Second Language Contexts

(Formerly 124.713) An exploration of linguistic and cultural issues arising from the internationalization of English as a second language (ESL) teaching and learning, including current research of linguistic imperialism, linguistic human rights, cultural hybridization, sexual politics, and the feminization of speech. Prerequisite: EDUB 7210 (or 132.721) (C+) or permission of instructor.

Educational Administration, Foundations and Psychology

Educational Administration ,

For information about graduate programs in the following units: Collège universitaire de Saint-Boniface, Curriculum, Teaching and Learning, or Education (Doctoral) please refer to the table of contents for page numbers.

Educational Administration ,

Educational Administration Program Info,

The Department of Educational Administration, Foundations, and Psychology offers specializations in the areas of adult and post-secondary education, educational administration, guidance and counselling, inclusive special education, and the social foundations of education.

Fields of Research

The department is a leader in research in a variety of areas including: Equity and Education (race, gender, disabilities); school reform and school improvement; citizenship education; counselling; cross-cultural education; disability studies; and adult & post-secondary/vocational education.

M.Ed. in Educational Administration, Foundations and Psychology,

Admission

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this *Calendar*, the Department of Educational Administration, Foundations and Psychology has the following admission application deadline dates (see below for the Guidance and Counselling specialization) and admission requirements:

For sessions starting Canadian applicants International applicants including US

January	October 1	none
May	none	none
July	February 1	none
September	February 1	January 15

Guidance and Counselling has only one set of admission dates:

July/September	February 1	November 1
----------------	------------	------------

Applicants must possess:

a four-year Bachelor of Education degree, or two-year After Degree Bachelor of Education, or a four-year bachelor's degree (or academically equivalent degree/program) from an academic institution recognized by the Faculty of Graduate Studies, or a three-year undergraduate degree, plus a Post Baccalaureate Diploma in Education (PBDE) with 24-30 credit hours which includes at least 18 credit hours at the 5000 level or if taken outside of Education, 24-30 credit hours of upper level coursework which includes at least 12 credit hours but preferably 18

credit hours at the 4000 level. The total number of credit hours completed including the degree should be 120 credit hours;

a grade point average of 3.0 or better in the last 60 credit hours of university coursework;

normally, two years of relevant work experience; and

appropriate academic and/or professional background for the program area and concentration.

The Guidance and Counselling and Inclusive Special Education specializations require specific prerequisite coursework that must be completed prior to admission.

For individuals who graduate from the Certificate in Adult and Continuing Education (CACE) , University of Manitoba complete the following courses:

EDUA 1560 Adult Learning and Development (3)

EDUA 1570 Foundations of Adult Education (3)

EDUA 1580 Program Planning in Adult Education (3)

EDUA 1590 Facilitating Adult Education (3)

and an additional 100 hours of elective credit through courses, seminars, and workshops. The Faculty of Graduate Studies recognizes a complete CACE program as 15 credit hours towards the admission requirements for the M.Ed.; that is, giving 12 credit hours for the four core courses completed with a grade of 'B' or better and 3 credit hours (non assessable) for the 100 hours of elective study.

Individuals with a three year undergraduate degree and the four courses listed above must complete an additional 12 credit hours of senior level courses (i.e., 5000 level PBDE courses, 1000 or 2000 level B.Ed. courses, or courses at the 3000 level or above in other faculties) to have the 24 credit hours that are the minimal requirements for satisfying the "honours degree or equivalent" admission requirement. Those with the completed CACE would require an additional 9 credit hours of senior level courses.

Applicants should note that admission to the M.Ed. program is competitive. A number of factors are taken into account in arriving at an admission decision: (1) the capacity of the department to provide the program of study requested by the applicant; (2) the applicant's previous academic background and achievement; (3) the referees' assessment of the applicant; (4) the capacity of the department to provide the applicant with an advisor in the program area; and (5) the applicant's Statement in Support of their application, including relevant professional experience.

Transfer of Credit

The granting of advanced credit is subject to the regulations of the Faculty of Graduate Studies and subject to approval of the advisor and department head.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this *Calendar*. The M.Ed. in Educational Administration, Foundations and Psychology has a thesis-based route and a course-based route. The M.Ed. comprehensive route at the University of Manitoba is typically a terminal degree. That is, it is insufficient, in number and of itself, as evidence of research capacity for admission into the Ph.D. program in Education at the University of Manitoba.

The following program requirements apply to all specializations in the Department of Educational Administration, Foundations and Psychology. Specific specialization requirements are listed under each specialization below.

M.Ed. programs have a maximum completion time of six years from the date of first registration. Not all courses are offered every year. The graduate course offering schedule is posted on the Faculty's website: <http://umanitoba.ca/education/current/gradinfo.shtml>. Although we offer many courses yearly, most of our courses are offered in the evening and those wishing to study full-time should consult with the Department Head.

Second Language Reading Requirement: None

Expected Time to Graduate: full-time: 2 - 3 years; part time: 4 - 5 years

Program by Coursework and Thesis

- A minimum of 18 credit hours of coursework. At least 12 credit hours must be at the 7000 level or equivalent. The remaining 6 credit hours may be at the 5000 level or above, in the Faculty of Education and/or at the 3000 level or above in other faculties.

- As part of their coursework, students must take 3 credit hours of research methodology at the 7000 level in Education or 3000 level or above in other faculties.

Program by Coursework and Comprehensive Examination (Course-based)

- A minimum of 30 credit hours of coursework. At least 18 credit hours must be at the 7000 level or equivalent. The remaining 12 credit hours may be at the 5000 level, or above, in the Faculty of Education and/or at the 3000 level or above in other faculties.

Adult and Post-Secondary Education Specialization

The specialization is designed to serve the professional needs of a diverse group of students in continuing, workplace and professional education development; college teaching, administration and student services; university teaching, student services, and administrative management; local and international community development, program delivery, and administration.

Admission and Program Requirements are listed above. Specific course requirements are as follows:

- Required courses: EDUA 7402, EDUA 7404 and EDUA 5800. Course-based students must also take EDUA 7408.

Thesis-based students will select 6 credit hours and course-based students will select 9 credit hours from: EDUA 7406, EDUA 7412, EDUA 7414, EDUB 7416, EDUA 7420, EDUA 7810, EDUB 7390, EDUB 7420, EDUB 7430, EDUB 7450, EDUB 7460, EDUB 7560 or other courses approved by the advisor and department head.

Course-based students will also require 9 credit hours of electives to pursue their specific interests such as TESL, Nursing Education, Medical Education, etc.

Educational Administration Specialization

The Master's Program in Educational Administration is designed to develop leadership for the province's school systems and to provide students with an in-depth and theoretical understanding of educational administration as both a moral and a technical endeavour.

Students in this program will benefit from their prior experiences as teachers or administrators in an educational organization. This experience need not be restricted to public schools. Experience is important because the program takes seriously the relationship between theory and practice in education.

Graduate Studies

Provincial Certification

It is expected that all candidates in the Master's Program with a specialization in Educational Administration will attain provincial certification in Educational Administration (Level 2) by the time they complete their Master's degree. In some instances, this may require additional coursework. Certification is granted by Manitoba Education and not by the Faculty of Education or the University of Manitoba.

Admission and Program requirements are listed above. Specific course requirements are as follows:

- Required courses: EDUA 7010, EDUA 7050 and EDUA 5800. Course-based students must also take 3 credit hours from: EDUA 7200, EDUA 7210, EDUA 7270.
- Thesis-based students will select 6 credit hours, course-based students will select 12 credit hours from: EDUA 5040, EDUA 5100, EDUA 7020, EDUA 7030, EDUA 7040, EDUA 7060, EDUA 7070 or other courses approved by the program advisor and department head.

Guidance and Counselling Specialization

The purpose of the Master's Program in Guidance and Counselling is to prepare counselling graduates who are able to integrate critical knowledge and understanding of the theoretical bases of counselling, the counselling process and outcome research, and current professional issues in counselling, with competent ongoing development of counselling skills. The model of training is scientist-practitioner with an emphasis on reflective practice.

Specifically, the graduate program is designed to help students with the development of generic skills of individual and group counselling; the capacity to conduct research and to interpret current research; a knowledge of the latest developments in counselling and literature in the field; education/training in group leadership and communication skills; a knowledge of career development, career information and job search skills; the principles, processes and methods of interviewing children, adolescents and adults; and the skills of measurement and evaluation.

The program provides an array of supervised practicum placements that support a more specialized experience to meet individual needs and interests. Graduates find employment in a wide range of settings, including schools, community agencies, clinics, hospitals, business and industry, rehabilitation centres, government service and private practice.

In addition to the admission and program requirements listed above, admission to the Guidance and Counselling specialization requires the following prerequisite coursework, which must be completed prior to beginning the M.Ed. program:

- A minimum of 9 credit hours of university coursework at the 5000 level or equivalent consisting of:
- EDUA 5480 Counselling Skills (3)
- EDUA 5500 Theories and Issues in School Counselling (3)
- EDUA 5540 Groups in Guidance (3)

For applicants who have attended the University of Manitoba, the prerequisite coursework can be fulfilled by taking the above courses. Applicants who have attended other universities can fulfil the prerequisite requirements by taking courses equivalent to the ones listed above; the alternate courses, however, will need to be approved by the Guidance and Counselling Area Group.

Specific course requirements for the Master's are as follows:

- Required courses: EDUA 7520*, EDUA 7550 and EDUA 5800.

Thesis-based students will select 3 credit hours and course-based students will select 18 credit hours from: EDUA 7510, EDUA 7530, EDUA 7540, EDUA 7750, EDUA

7760. Course-based students may also select approved electives at the 5000 level. (NOTE: EDUA 7750 requires advisor approval.)

EDUA 5570, EDUA 5590, EDUA 5730, EDUA 5740, EDUA 5810, EDUA 5930, EDUA 7710, EDUA 7720, EDUB 5400, EDUB 5770, EDUB 7060, EDUB 7480

*A three hour weekly seminar offered over fall and winter terms taken concurrently with a minimum of 180 hours of supervised practicum experience in a selected placement. Students are required to be available September to April during the day for a minimum of one to one-and-a-half days per week for the practicum component.

Inclusive Special Education Specialization

The Master's Program in Inclusive Special Education (ISE) is designed not only to develop skills needed to serve students with special needs directly, but also to develop leadership and research skills for assisting educators and other professionals working on behalf of persons with disabilities. To this end, the graduate courses are designed to enable graduate students to conduct research in a variety of formats and paradigms, to lead in the professional development of their colleagues, to foster program development at their workplaces, and to provide clinical or consultant services to classroom teachers. Courses in the program are focused on topics in inclusive special education as a profession, on applied learning theories and assessment of learning, on critical thinking, and on research methods and findings in this field. Graduates from the program work in a variety of callings: as administrators, clinicians, consultants, program leaders, resource and special education teachers. Many graduates also are active in research, educational program development, advocacy groups, teacher education and professional development.

In addition to the admission and program requirements listed above, admission to the Inclusive Special Education Specialization requires the following prerequisite coursework, which must be completed prior to beginning the M.Ed. program:

A minimum of 18 credit hours of university level coursework at the 5000 level or equivalent with a Grade Point Average of 3.0 (B) consisting of:

- EDUA 5600 Introduction to Inclusive Special Education (6)
- EDUA 5630 Assessment and Instruction in Inclusive Special Education (6); and

6 credit hours from:

- EDUA 5610 Field Experience in Inclusive Special Education (6)
- EDUA 5620 Teaching Children through Alternative and Augmented Communication (3)
- EDUA 5640 Inclusive Special Education: Early and Middle Years (3)
- EDUA 5650 Inclusive Special Education: High School and Transition to Adult Life (3)
- EDUA 5660 Organization and Delivery of Resource Program and Support Services (3)
- EDUA 5670 Strategies for Organizing Inclusive Classrooms and Schools (3)
- EDUA 5680 Promoting Responsible Behaviour in Educational Settings (3)

Specific course requirements for the Master's are as follows:

- Required courses: EDUA 7600 and EDUA 5800
- Thesis-based students will select a minimum of 3 credit hours and course-based students will select a minimum of 6 credit hours from: EDUA 7610, EDUA 7630, EDUA 7650, EDUA 7740, EDUA 7750. (NOTE: EDUA 7740 and EDUA 7750 require advisor approval)
- In addition, thesis-based students will select a maximum of 3 credit hours and course based students will select a maximum of 15 credit hours from: EDUA 5610, EDUA 5620, EDUA 5640, EDUA 5650, EDUA 5660, EDUA 5670, EDUA 5680.
- Students may also choose from a variety of courses not directly related to special education, depending on their interests and career goals. Students should consult the *Undergraduate and Graduate Calendars* for course titles and brief descriptions: EDUA 5070, EDUA 5500, EDUA 5550,

Certification in Special Education

This provision may not apply to applicants with certification requirements in an allied non-teaching field or who are pursuing a M.Ed. in Inclusive Special Education after undergraduate work in an allied non-teaching field. It is expected that most students in the M.Ed. Program with specialization in Inclusive Special Education will attain provincial certification in special education by the time they complete their Master's degree. Students who already have provincial certification at the time of entry into the program will therefore not need to take any prerequisite coursework for this purpose. Those who do not already have provincial certification, however, should expect to take additional credit hours of coursework to fulfil this requirement. The precise number and nature of the additional work will depend on the prior academic background of the student, as well as on the specific courses taken to complete the M.Ed. degree. To assess the additional work needed informally, it is recommended that students consult with their Faculty Advisor early in their program, and also obtain and read a copy of the special education certification guidelines published by Manitoba Education. Official assessment of required coursework, however, can only be done by providing Manitoba Education with a complete set of academic transcripts and requesting a formal assessment from them. Certification is granted by Manitoba Education not by the Faculty of Education or the University of Manitoba.

Social Foundations of Education Specialization

The aim of Social Foundations of Education is to develop educational researchers who are critical and reflective about educational theory and practice. Theories from the humanities and the social sciences will guide students as they examine, criticize, and explain the meanings, intents and the effects of education in both its institutional and non-institutional forms.

The Master's Program in Social Foundations is designed to promote the understanding of normative educational thought and practice and to probe assumptions about education and schooling. The analysis is multi-dimensional and interdisciplinary.

Admission and Program requirements are those listed above. Specific course requirements are as follows:

- Required course: EDUA 5800
- Thesis-based students will select 6 credit hours and course-based students will select 9 credit hours from: EDUA 7200, EDUA 7210, EDUA 7270.
- Thesis-based students will also select 6 credit hours and course-based students will also select 18 credit hours from: EDUA 7230, EDUA 7240, EDUA 7250, EDUA 7270/7280, EDUA 7300, EDUA 7340; or
- All students may select courses chosen from the Faculty of Arts of the University of Manitoba or from other universities, in particular those within the Western Dean's agreement approved by the program advisor and department head.

Page URL,

<http://crscalprod1.cc.umanitoba.ca/EducationalAdministration,FoundationsandPsychology.catx>

Educational Administration, Foundations and Psychology-Course Descriptions EDUA 7010 Educational Administration as a Field of Study and Practice

(Formerly 129.701) An overview of educational administration, focusing on a review of some of the main intellectual traditions in the study of educational administration and on an analysis of some of the forces which shape administrative

practice. Not to be held with EDUA 7011 (or 129.701) or the former 116.731.

EDUA 7011 Administration scolaire en tant que champ d'étude et d'application

(l'ancien 129.701) Aperçu de l'administration scolaire. Importance particulière accordée à quelques-unes des grandes traditions intellectuelles du domaine de l'administration scolaire et analyse de certaines forces qui influencent la pratique de l'administration. On ne peut se faire créditer le EDUA 7011 (ancien 129.701) et l'ancien 116.731.

EDUA 7020 Politics of Education

(Formerly 129.702) A review of the political features of educational organizations, with emphasis on value systems, community power structures, local government, and political change. Not to be held with EDUA 7021 (or 129.702) or the former 116.702.

EDUA 7021 La Politique en Education

(Ancien 129.702) Étude des caractéristiques politiques des organismes scolaires: répartition des pouvoirs dans la communauté, gouvernement local, changements politiques et rôle des divers systèmes de valeurs en éducation. On ne peut se faire créditer le EDUA 7021 (ancien 129.702) et l'ancien 116.702.

EDUA 7030 Educational Finance

(Formerly 129.703) Study of economic and financial aspects of education, with emphasis on costs and analysis of expenditures; sources and types of revenue; productivity and efficiency, planning and budgeting. Not to be held with EDUA 7031 (or 129.703) or the former 116.703.

EDUA 7031 Le financement scolaire

(Ancien 129.703) Étude des dimensions économiques et financières de l'éducation. Analyse des coûts et des dépenses, des sources et des types de revenus, de la productivité et de l'efficacité, de la planification et du budget. On ne peut se faire créditer le EDUA 7031 et l'ancien 116.703.

EDUA 7040 Legal Aspects of Education

(Formerly 129.704) Studies of legal issues in education. Not to be held with EDUA 7041 (or 129.704) or the former 116.704.

EDUA 7041 Aspects légaux en éducation

(Ancien 129.704) Étude des questions légales dans le monde de l'éducation. On ne peut se faire créditer le EDUA 7041 (ancien 129.704) et l'ancien 116.704.

EDUA 7050 Theoretical Perspectives on Educational Administration

(Formerly 129.705) A study of the main currents of organization theory and administrative thought and their implications for the study and administration of educational organizations. Not to be held with EDUA 7051 (or 129.705) or the former 116.705.

EDUA 7051 Perspectives théoriques de l'administration scolaire

(Ancien 129.705) Étude des tendances en matière de théorie organisationnelle et de pensée administrative ainsi que de la portée de celles-ci sur l'étude et l'administration d'organisations scolaires. On ne peut se faire créditer le EDUA 7051 (ancien 129.705) et l'ancien 116.705.

EDUA 7060 Organizational Planning and Development in Education

(Formerly 129.706) A review of approaches to planning and development in education. Major emphasis is placed on the systematic development of educational organizations. Not to be held with EDUA 7061 (or 129.706) or the former 116.709.

EDUA 7061 Planification organisationnelle et développement éducationnel

Revue des diverses approches à la planification et au développement éducationnel. Importance particulière accordée au développement systématique des organismes d'enseignement. On ne peut se faire créditer les EDUA 7061 et l'ancien 116.709 ou 129.706.

EDUA 7070 The Analysis of Educational Organizations

(Formerly 129.707) The application of methods of organizational analysis to educational institutions. Not to be held with EDUA 7071 (or 129.707) or the former 116.710.

EDUA 7071 Analyse des Organismes D'Enseignement

(Ancien 129.707) Application de méthodes d'analyse organisationnelle aux établissements d'enseignement. On ne peut se faire créditer le EDUA 7-071 et l'ancien 129.707 ou 116.710.

EDUA 7081 Principes d'organisation et de mise en application du curriculum

Revue des approches de modification et d'application du curriculum. Importance particulière accordée aux approches systématiques de modification des programmes en éducation. On ne peut se faire créditer le EDUA 7081 et l'ancien 116.706.

EDUA 7090 Seminar in Administrative Problems in Education

(Formerly 129.709) Application of theoretical concepts in field situations. Not to be held with EDUA 7091 (or 129.709) or the former 116.706.

EDUA 7091 Séminaire - Problèmes Administratifs en Education

(Ancien 129.709) Application de concepts théoriques à des situations concrètes. On ne peut se faire créditer le EDUA 7091 et l'ancien 116.706 ou 129.709.

EDUA 7100 Topics in Educational Administration (Readings) 1

(Formerly 129.710) A readings course in topics of significance to educational administration.

EDUA 7101 Sujets Particuliers en Administration Scolaire 1

(Ancien 129.710) Lecture sur des sujets d'importance en administration scolaire.

EDUA 7110 Topics in Educational Administration (Field) 2

(Formerly 129.711) A projects and field study course in topics of significance to educational administration.

EDUA 7111

(Ancien 129.711) Recherche-action sur des sujets d'importances en administration scolaire.

EDUA 7200 Philosophy of Education

(Formerly 129.720) A study of the philosophic foundations of education. Emphasis will be given to various schools of philosophic inquiry as they relate to education and to contemporary philosophy of education issues. Students may not hold credit for both EDUA 7200 (or 129.720) and the former 116.735.

EDUA 7210 Educational Sociology

(Formerly 129.721) An examination of the relationship between education and society, with particular attention to ethnicity, family, and socio-economic status and to the role of the school in the socialization process in the Canadian context. Not to be held with EDUA 7211 (or 129.721) or the former 116.736.

EDUA 7211 Éducation et société

(Ancien 129.721) Étude du rapport qui existe entre l'éducation et la société. Regard particulier sur l'appartenance ethnique, la famille, le statut socioéconomique et le rôle que joue l'école en tant qu'agent de socialisation dans un contexte canadien. On ne peut se faire créditer le EDUA 7211 et l'ancien 116.736

EDUA 7220 History of Education in Manitoba

(Formerly 129.722) A study of the themes underlying the historical development of education in Manitoba. Students may not hold credit for both EDUA 7220 (or 129.722) and the former 116.737.

EDUA 7230 Social Criticism in Education

(Formerly 129.723) A critical examination of education, giving special attention to various perspectives which challenge conventional interpretation of education and schooling. Students may not hold credit for both EDUA 7230 (or 129.723) and the former 116.738.

EDUA 7240 Values in Education

(Formerly 129.724) Examines the place of values in education. It explores the notion of values, its pervasiveness in education, the approaches to values in education, and the trends and issues related to values in education. Not to be held with EDUA 7241 (or 129.724) or the former 116.732.

EDUA 7241 Valeurs en éducation

(Ancien 129.724) Étude de la place occupée par les valeurs en éducation. Approfondissement de la notion de valeur et de son omniprésence dans le domaine de l'éducation, ainsi que des approches, des tendances et des questions relatives aux

valeurs en éducation. On ne peut se faire créditer EDUA 7241 et l'ancien 116.732.

EDUA 7250 Comparative Education

(Formerly 129.725) An analysis of educational systems and problems in selected environments in terms of social, political, economic, cultural and other contexts. Students may not hold credit for both EDUA 7250 (or 129.725) and the former 116.714.

EDUA 7270 Seminar in Cross-Cultural Education 1

(Formerly 129.727) A critical analysis of the social theories and research which form the basis of cross-cultural education. Not to be held with EDUA 7271 (or 129.727) or the former 116.724.

EDUA 7280 Seminar in Cross-Cultural Education 2

(Formerly 129.728) A critical analysis of the approaches and research in cross-cultural education. Not to be held with EDUA 7281 (or 129.728) or the former 116.725.

EDUA 7281 Séminaire sur l'éducation interculturelle 2

(Ancien 129.728) Analyse critique des approches et de la recherche en éducation interculturelle. On ne peut faire créditer EDUA 7281 (EDUA 7280) et l'ancien 116.725

EDUA 7300 History of Canadian Education from 1867

(Formerly 129.730) A study of the historical development of education in Canada from 1867 to the present. Students may not hold credit for both EDUA 7300 (or 129.730) and the former 116.723.

EDUA 7330 Topics in Educational Foundations (Readings) 1

(Formerly 129.733) A reading and research course in topics of significance to educational foundations.

EDUA 7340 Seminar in Educational Thought

(Formerly 129.734) Intensive studies of the works of selected educational theorists. Students may not hold credit for both EDUA 7340 (or 129.734) and the former 116.719.

EDUA 7400 Adult Education as a Field of Study and Practice

(Formerly 129.740) Description and analysis of adult education as a field of study and practice. Attention will be given to theory, particularly the philosophical and social bases of adult education. Consideration of contemporary practice will also be undertaken. Students may not hold credit for both EDUA 7400 (or 129.740) and the former 116.739.

EDUA 7402 Development of Adult Education and Post-Secondary Education

A survey structures, theory, philosophies, and curricula of educational systems for adults, as affected by cultural, political, religious, theological and institutional contexts both national and internationally. Not to be held with the former EDUA 7400 (29.740) or EDUA 5400 (129.540).

EDUA 7404 Lifelong Learning in Educational Settings

Explores recent issues, research, and theories about learning across the lifespan, with emphasis on adulthood, as learning is affected by cultural, political, and interpersonal contexts.

EDUA 7406 Topics in Adult and Post-Secondary Education

This course provides an opportunity for students to investigate methodologically, in depth, significant trends and topics from both the scholarly literature of adult and post-secondary education and internet resources.

EDUA 7408 Seminar in Adult and Post-Secondary Education

This course entails an examination of topical issues in adult education and post-secondary education with particular focus on scholarly developments in Canada and Manitoba, based on student interests and thesis or comprehensive examination foci, with learning process instructor facilitated.

EDUA 7410 Seminar in Adult Education

(Formerly 129.741) An examination of selected topics in adult education, with special reference to Canada. Students may not hold credit for both EDUA 7410 (or 129.741) and the former 116.720.

EDUA 7412 Governance of Post-Secondary Education

This course examines the history of the governance of post-secondary institutions, the roles of stakeholders in governance, and factors influencing governance in post-secondary institutions today.

EDUA 7414 Seminar in the Administration of Post-Secondary Education

This course has as its focus the application of theoretical concepts of field situations. It will explore administrative skills and their application to selected issues of post-secondary education.

EDUA 7420 Program Planning in Adult Education

(Formerly 129.742) Introduction to factors affecting the planning of programs for adults. Examination of various planning models in relation to principles of adult education. A consideration of theory with major emphasis on directions for planning a program for adults. Local examples will be used. Students may not hold credit for both EDUA 7420 (or 129.742) and the former 116.733.

EDUA 7430 Topics in Adult Education

(Formerly 129.743) The study of selected topics in adult education. Opportunity will be provided for students to investigate in depth, significant topics within the area of adult education which are of interest to students. Students may not hold credit for both EDUA 7430 (or 129.743) and the former 116.734.

EDUA 7440 Seminar in Post-Secondary Education

(Formerly 129.744) A consideration of the nature of post-secondary education and of fundamental issues in the development of systems of post-secondary education. Special attention will be given to issues of philosophy, curriculum, clientele, organization and governance. Students may not hold credit for both EDUA 7440 (or 129.744) and the former 116.721.

EDUA 7450 Seminar in Post-Secondary Instruction

(Formerly 129.745) Intensive study and research in selected topics in post-secondary instruction. Students may not hold credit for both EDUA 7450 (or 129.745) and the former 116.730.

EDUA 7510 Seminar in Current Issues in Counselling

(Formerly 129.751) Focus on research, theoretical and professional developments; critical contemporary issues; and specific social problems in counselling. Not to be held with EDUA 7511 (or 129.751) or the former 043.703.

EDUA 7511 Séminaire en counselling

(Ancien 129.751) Progrès d'ordre professionnel, théorique et scientifique. Questions acutelles importantes. Problèmes sociaux particuliers en counselling. On ne peut se faire créditer EDUA 7511 et l'ancien 043.703.

EDUA 7520 Practicum Seminar in Counselling

(Formerly 129.752) Supervised experience in both individual and group counselling. Attention is given to analysis of case studies using audio- and video-tapes. A minimum of 180 hours of counselling experience in placement situations is required. This course is graded pass/fail. Not to be held with EDUA 7521 (or 129.752) or the former 043.704. Prerequisite: EDUA 5480 or EDUA 5481 (or 129.548) or either former 129.556 or 043.516 and permission from the instructor.

EDUA 7521 Séminaire - Stage en counselling

(Ancien 129.752) Expérience supervisée en counselling individuel et de groupe. Analyse d'études de cas au moyen d'audiocassettes et de vidéocassettes. Exige un minimum de 180 heures de stage. On ne peut se faire créditer le EDUA 7521 ou l'ancien 043.704. Préalable : le EDUA 5481 (ancien 129.548), l'ancien 129.556 ou l'ancien 043.516.

EDUA 7530 Group Counselling: Theory and Practice

(Formerly 129.753) Study of theories, rationale, objectives, and research. Acquisition of an experiential understanding of group work through participation in class activities. Development of leadership skills in group counselling by conducting counselling groups under supervision. Not to be held with EDUA 7531 (or 129.753) or the former 043.718. Prerequisite: EDUA 5540 or EDUA 5541 (or 129.554) or 043.512 and EDUA 5480 or EDUA 5481 (or 129.548).

EDUA 7540 Programs in Career Development

(Formerly 129.754) A practical course designed for helpers wishing a wider knowledge of career development programs. Participants will investigate and evaluate a wide variety of career counselling techniques and programs and will

develop specific, innovative programs to meet the needs of their future counsellors. Not to be held with EDUA 7541 (or 129.754) or the former 043.719.

EDUA 7541 Programmes d'orientation de carrières

Un cours destiné aux conseillères et aux conseillers qui souhaitent approfondir leurs connaissances des programmes d'orientation de carrières. Examen et évaluation de programmes et de diverses techniques de counselling. Elaboration de programmes innovateurs qui répondent aux besoins de ceux et celles qui ont recours aux services de counselling. On ne peut se faire créditer le EDUA 7541 et l'ancien 132.754 ou 043.719.

EDUA 7550 Theories of Counselling

(Formerly 129.755) The objectives of counselling, assessment of counselling outcomes, theories of personality and counselling. Not to be held with EDUA 7551 (or 129.755) or the former 043.701 or 129.750.

EDUA 7551 Théories en counselling

Objectifs du counselling, évaluation des résultats du counselling, théories de la personnalité et du counselling. On ne peut se faire créditer le EDUA 7551 et l'ancien 129.755 ou 043.705.

EDUA 7600 Seminar in Inclusive Special Education

(Formerly 129.760) A forum for the discussion of topics related to disability issues. Opportunity will be provided for students to examine issues related to their particular professional and scholarly needs. Not to be held with EDUA 7601 (or 129.760) or the former 043.705. Pre- or corequisite: 18 credit hours in Special Education at 5000 level or equivalent.

EDUA 7601 SÉMINAIRE EN ÉDUCATION INCLUSIVE

(Ancien 129.760) Forum de discussions sur des sujets reliés à divers handicaps. Étude en profondeur de problèmes reliés aux besoins professionnels particuliers des étudiants et des étudiantes. On ne peut se faire créditer le EDUA 7601 (ancien 129.760) et l'ancien 043.705.

EDUA 7610 Behavioural Issues in Educational Settings

(Formerly 129.761) A study designed to give teachers and school counsellors the necessary theoretical background as well as the practical tools to implement programs for children in conflict. Not to be held with EDUA 7611 (or 129.761) or the former 043.707. Pre- or corequisite: EDUA 5600 or EDUA 5601 (or 129.560 or 043.518) or EDUA 5680 or EDUA 5681 (or 129.568 or 043.542).

EDUA 7611 Séminaire sur L'Éducation des Enfants aux Prises avec des Troubles de Comportement

(Ancien 129.761) Course à l'intention des enseignants et des enseignantes, et des conseillers et des conseillères scolaires. Études des connaissances théoriques et des outils nécessaires à l'élaboration et à la mise en oeuvre des programmes éducatifs pour les élèves aux prises avec des troubles de comportement. On ne peut se faire créditer le EDUA 7611 et l'ancien 043.707 ou 129.761. Préalable ou concomitant: le EDUA 5601 (ancien 129.560 ou 043.518) ou le EDUA 5681 (ancien 129.568 ou 043.542).

EDUA 7620 Seminar in Disability Studies

(Formerly 129.762) The aim of this course is to review research literature which is directly related to the problems of learning and instruction of the mentally retarded. Not to be held with EDUA 7621 (or 129.762) or the former 043.721. Prerequisite: a course in mental retardation (such as the former 043.531 or 043.534) or permission of instructor.

EDUA 7630 Advanced Assessment and Instruction in Inclusive Special Education

(Formerly 129.763) An advanced study of diagnostic/prescriptive techniques used to ameliorate learning and behavioural problems in special education. Emphasis is on the development and analysis of related instructional delivery systems. Students may not hold credit for both EDUA 7630 (or 129.763) and the former 043.722. Pre- or corequisite: EDUA 5630 (or 129.563) or 043.536 (C+).

EDUA 7650 Field Experience in Inclusive Special Education

(Formerly 129.765) A minimum of 200 hours of supervised placement in an inclusive special education setting. Scheduled seminars facilitate directed study and discussion. This course is graded pass/fail. Prerequisite: 18 credit hours at the 5000-level in Inclusive Special Education or its equivalent. Not to be held with EDUA 7651 (or 129.765) or the former 129.764 or 043.706.

EDUA 7700 Field Work in School Psychology

(Formerly 129.770) Students will engage in a minimum of one day a week of supervised experience in psychoeducational assessment and programming, counselling and consulting with teachers, students, parents and related others. This course is graded pass/fail. Students may not hold credit for both EDUA 7700 (or 129.770) and the former 043.723. Prerequisite: EDUA 7720 (or 129.772 or 043.725), EDUA 7870 (or 129.787 or 129.782 or 043.710), EDUA 7760 (or 129.776 or 043.717) (C+) and one of EDUA 7800 (or 129.780 or 043.709) or (129.783 or 043.711) (C+) and one of PSYC 8200 (or 017.820) or PSYC 8210 (or 017.821) (C+).

EDUA 7710 Development in Learning Environments

(Formerly 129.771) Explores recent advances in developmental psychology as they apply to learning in classrooms and other education-related settings. Emphasis will be given to cognitive change, but motivation and social skill development will also be considered as they relate to cognitive development. Students may not hold credit for both EDUA 7710 (or 129.771) and the former 043.724 or 043.708.

EDUA 7740 Topics in Educational Psychology 1

(Formerly 129.774) A reading and research course in topics of significance to educational psychology.

EDUA 7741 Sujets Particuliers en Psychologie de L'Éducation

(Ancien 129.774) Lecture et recherche sur des sujets d'importance en psychologie de l'éducation.

EDUA 7750 Topics in Educational Psychology 2

(Formerly 129.775) A reading and research course in topics of significance to educational psychology.

EDUA 7760 Interview Techniques with Children and Adolescents

(Formerly 129.776) Focuses on the principles, processes and methods of interviewing and counselling individual children, adolescents, parents, school personnel and others. The course aims at integrating theory and practice involving diagnostic and therapeutic communication and observation of behaviour in natural situations with individual children. Not to be held with EDUA 7761 (or 129.776) or the former 043.717. Prerequisite: EDUA 5820 or EDUA 5821 (or 129.582 or 043.505), EDUA 5550 or EDUA 5551 (or 129.555 or 043.515), or EDUA 5480 or EDUA 5481 (or 129.548) and EDUA 5490 or EDUA 5491 (or 129.549 or 129.556 or 043.516).

EDUA 7761 Techniques d'entrevue avec les enfants & les adolescents et adolescentes

Étude des principes et des méthodes d'entrevue et de counselling auprès d'enfants, d'adolescents et d'adolescentes, de parents, d'enseignants et d'enseignantes, ou de toute autre personne intervenant auprès de l'enfant. Intégration de la théorie et de la pratique relatives au processus de communication et d'observation diagnostique et thérapeutique en situation naturelle auprès de l'enfant. On ne peut se faire créditer le EDUA 7761 et l'ancien 129.776 ou 043.717. Préalable: le EDUA 5821 (ancien 129.582 ou 043.505), le EDUA 5551 (ancien 129.555 ou 043.515), ou le EDUA 5481 (ancien 129.548) et le EDUA 5491 (ancien 129.549, 129.556 ou 043.516).

EDUA 7770 Advanced Computer Application in Educational Psychology

(Formerly 129.777) Explores the use of recent innovations in computer-assisted learning technology and will be set up to take into account the needs of the graduate level student in the Faculty of Education. Not to be held with EDUA 7771 (or 129.777) or the former 043.716. Prerequisite: any one of the following courses: EDUA 5850 or EDUA 5851 (or 129.585 or 043.306 or 043.526 or 081.412 or 081.528).

EDUA 7800 Methods of Educational Research

(Formerly 129.780) A study of design and data collection techniques for educational research in field settings. Topics covered include quasi-experimentation, survey and observational techniques, simulation, content analysis, and sociometry. Not to be held with EDUA 7801 (or 129.780) or the former 043.709. Prerequisite: EDUA 5800 or EDUA 5801 (or 129.580) or one of the former courses 129.680, 043.610 or consent of instructor.

EDUA 7801 Méthodes de Recherches en Education

(Ancien 129.780) Étude des devis expérimentaux et des techniques de collecte de données dans la recherche éducative dans le milieu: devis quasi expérimentaux, enquête et techniques d'observation, simulation, analyse du contenu et sociométrie.

On ne peut se faire créditer le EDUA 7800 et l'ancien 043.709. Préalable: le EDUA 5801 (ancien 129.580) ou l'ancien EdUA 6801 (ancien 129.680) ou l'ancien 043.610 ou l'autorisation écrite de la professeure ou du professeur.

EDUA 7810 Evaluating Educational Programs

(Formerly 129.781) An introduction to current approaches to evaluating educational programs. A review of various evaluation methods/approaches, along with consideration of specific design, ethical, consulting and political issues will be the main focus of this course. Specific skills to be developed are the implementation of educational evaluations, data collection and analysis, and final report writing. Students may not hold credit both EDUA 7810 (or 129.781) and the former 043.726.

EDUA 7840 Qualitative Research Methods in Education

(Formerly 129.784) An introduction to qualitative research methods. While the theoretical underpinnings of qualitative research will be discussed, emphasis is placed on learning to conduct a study including design, collecting and analyzing data, and research ethics. Not to be held with EDUA 7841. Prerequisite: EDUA 5800 or EDUA 5801 (or 129.580) or 043.503 or equivalent.

EDUA 7841 Methodes de recherche qualitative en Éducation

(Ancien 129.784) Introduction aux méthodes de recherche qualitative. Discussion de l'éthique de la recherche et des théories qui sous-tendent la recherche qualitative. Cours axé sur les démarches à suivre pour effectuer une recherche, y compris la méthodologie et la collecte et l'analyse de données. Préalable: EDUA 5801 (ancien 129.580) ou l'ancien 043.503 ou l'équivalent.

EDUA 7850 Design and Analysis of Educational Research

(Quantitative)
(Formerly 129.785) A study of the use of quantitative methods of analyzing educational research data. Descriptive and inferential procedures commonly used in educational research will be discussed and students will learn to use statistical packages. The course will also address when it is appropriate to employ quantitative designs and present common designs and their associated analyses. Prerequisite: EDUA 5800 (or 129.580) (C+). Students may not hold credit for both EDUA 7850 (or 129.785) and the former 129.681 or the former 43.535 or 43.611.

EDUA 7860 Advanced Topics in Educational Research

(Formerly 129.786) An advanced study of special topics in educational research with an in-depth study of specific topics which will change from year to year. Prerequisite: EDUA 5800 (or 129.580) (C+) and permission of the instructor. Students may not hold credit for both EDUA 7860 (or 129.786) and the former courses 129.783 or 043.711

EDUA 7870 Measurement and Evaluation in Schools

(Formerly 129.787) An advanced study of the principles of measurement and evaluation and their application to teaching and learning in schools. Current issues in measurement and evaluation, including alternative forms of classroom assessment and standard setting, will be discussed. Prerequisite: EDUA 5810 (or 129.581) or 043.301 (C+) or equivalent, or consent of instructor.

Electrical and Computer Engineering

Electrical and Computer Engineering ,
Electrical & Computer Engineering (ECE) Program Info,
The department offers programs leading to the Master of Engineering, Master of Science, and Doctor of Philosophy. The department has well equipped research and teaching laboratories. Students may select either a specialized research-oriented activity, an interdisciplinary program, or collaboration with industry or research centres in Canada.

Fields of Research

The areas of research in the department which are internationally recognized include: applied electromagnetics; atmospheric optics; biomedical engineering; communications engineering; computer architecture and software systems; microelectronics; power apparatus and systems engineering; signal and image processing.

Research Facilities

The Applied Electromagnetics Laboratories are far the most comprehensive and modern antenna measurement facility of any university nationally and internationally. It consists of eight different test systems housed in three different anechoic chambers. The unique feature of this facility is in its ability to test small and very large antennas in a controlled indoor environment, from 500 MHz to 110 GHz, using conventional Far-Field system, the Compact-Test Range and Near-Field to Far-Field transformation. The test systems include: A large 16ft Compact-Range for testing antennas as large as 6ft and up to 50 GHz, A high precision millimetre wave Compact-Range up to 110 GHz, A conventional Far-Field Range up to 50 GHz, A triple linear-cylindrical-spherical Near-Field Range, A 16-probe Starlab Range for rapid measurements, A 110 GHz Network Analyzer for network characterization, and a small Far-Field range for educational tests.

The merger of biology with engineering sciences and the creation of biomedical engineering has brought innovation to the practice of medicine that could only be dreamed about a decade ago. By many accounts, we are now at the outset of the Biomedical Century and the need for engineers trained in biomedicine is greater than ever. Biomedical Engineering research is interdisciplinary by nature and therefore involves close collaboration with other departments and faculties in the University of Manitoba and associated hospitals. The centre of our activity, however, is the Biomedical Acoustic and Motor Control Laboratory and Biomedical Photonics Laboratory within the Electrical and Computer Engineering department. The Acoustic and Motor Control Laboratory is equipped with biological instrumentation amplifiers/filter, different sensors, acoustic chamber as well as a 2DOF robotic arm, an EEG recording system, and a large network of computers. The Biomedical Photonics Laboratory houses optical test and measurement equipment, various laser sources as well as advanced setups for high-resolution nonlinear microscopy, spectroscopy and optical coherence tomography of biological samples.

Software Systems is an area that represents a strong research program in the Department. The VLSI laboratory is an important component of the research program in Computer Engineering, as well as supporting research areas in Electrical Engineering such as electronics, signal processing and communications. The laboratory includes a network of Sparc workstations for research and education. The laboratory has access to the fabrication of chip designs, via the Canadian Microelectronics Corporation. The current implementation technologies are full-custom CMOS, FPGAs, and integrated sensors. Software CAD packages available include CADENCE, simulators for Neural Networks and many standard university programs such as circuit and logic simulators. There are also facilities for experimental work with mobile robots.

The Computational Intelligence (CI) Laboratory has a collection of robots (a number of individual hexapod, crawling and tractor robots). In addition, the CI Laboratory has seven Intel core 2 PCs, 9 large LCD displays, 7 UPS surge protection power supplies, Wii game controller, two Bamboo tablets, one MacPro laptop, one Lenovo X200 tablet, one HP non-colour printer and one HP 3-way printer. This equipment is used in the design of intelligent systems (both hardware and software) using a number of technologies associated with computational intelligence, namely, Cantor sets, fuzzy sets, near sets, rough sets, neural networks, and evolutionary computing. This research laboratory has its own web page at <http://wren.ee.umanitoba.ca>, that includes access to various research registries and downloadable reports, publications as well as software systems designed in this Laboratory.

The Power Systems and Machine Laboratories are well equipped with several workstations, a real time digital power system simulator (developed at the HVDC Research Centre), a large variable frequency supply, and several well instrumented machine sets. Facilities for developing DSP-based controllers and protection devices are available. The McMath High Voltage Power Transmission Research Laboratory is the largest of its kind amongst Canadian universities and is equipped with generating and measuring apparatus, including digital data acquisition systems for research on insulation, HV phenomena and diagnostics.

The Data and Signal Compression Laboratory has dedicated and network computers, a high resolution scanner, a video capture facility, a digital camera, a CD-ROM mastering system, and an FPGA development facility. It also has access to a large ATM facility for research.

The Microprobe and Microfabrication Laboratory is a well-equipped laboratory with three faculty members. Topics of interest include scanning probe microscopy,

micromachining and microfabrication, semiconductor manufacturing, and high frequency microelectronics and microwave circuit testing. Probe microscopy systems include tunnelling (STM), ultra high vacuum STM, atomic force (AFM), resistive (SRM), capacitive (SCM), and dynamic electrostatic force microscopes used for in situ IC testing. CAD platforms include a number of workstations. CAD tools used are Cadence, L-EDIT and MEMSPro for IC design, and Libra, Spice, Ensemble and HFSS for high frequency modelling. RF test equipment includes 50 GHz sampling scopes, a 6 GHz Network Analyser and on-wafer probing facilities. Microfabrication capabilities include a cleanroom, thermal evaporation, 3 inch mask aligner, wet etching, oxidation furnaces, electroplating, UHV system, and an inspection microscope. A 1000 sq. foot cleanroom, 6 inch two-sided mask aligner, ICP plasma etching, XeF₂ etching, RF sputtering, E-beam evaporation, Alpha-Step surface profiler, 50 GHz millimetre wave probe station, and a wafer saw.

M.Sc. in Electrical and Computer Engineering, Admission

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar, a student must normally hold a B.Sc. degree in Electrical or Computer Engineering (or its equivalent) from a recognized university or related fields of study approved by the Department and prospective advisor, from a recognized university. The University minimum GPA requirement for entrance is 3.0; the Department minimum GPA requirement for entrance is 3.5.

Application Deadlines

Potential M.Sc. students should complete the online Student Information Form for Potential Graduate Students (<http://www.ece.umanitoba.ca/node/add/gs-preapplication>) prior to making a formal application to the department.

- Canadian/U.S. students, if invited to submit a formal application by the Department, should submit their application and supporting documentation to the Faculty of Graduate Studies at least four(4) months prior to their intended start date.
- International students, if invited to submit a formal application by the Department, should submit their application and supporting documentation to the Faculty of Graduate Studies at least eight(8) months prior to their intended start date.

Program Requirements

In keeping with the minimum course requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar, the M.Sc. program in Electrical and Computer Engineering requires a minimum of 18 credit hours of advisor-approved course work as follows:

- REQUIREMENT: 12-credit hours at, or above the 7000 level
 - At least 12 of the 18 credit hours must be from the ECE Department
- ELECTIVES: 6-credit hours (your elective) must be at or above the
 - 300/3000 Level -- if taken from a Department Other than ECE (computer science, physics, math, mechanical engineering, etc.)
 - 400/4000 Level -- if taken in ECE Department
- THESIS: An M.Sc. thesis, which is based on research work normally carried out at this university, is required.
- GRADCON: All full-time M.Sc. students are also required to present a paper, at least once during their program, at the Department's annual graduate student conference, as outlined at the website

<http://www.ee.umanitoba.ca/~gradcon/>.

For complete supplemental regulations on the M.Sc. program in Electrical and Computer Engineering, see website: <http://www.ece.umanitoba.ca/msc>.

Graduate Record Examination: Not Required

Second language reading requirement: NONE

Expected time to graduation: Two Years

M.Eng. in Electrical and Computer Engineering, Admission

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar, a student must normally hold a B.Sc. degree in Electrical or Computer Engineering (or its equivalent) or related fields of study approved by the Department and prospective advisor, from a recognized university. The University minimum GPA requirement for entrance is 3.0; the Department minimum GPA requirement for entrance is 3.5.

Application Deadlines

Potential M.Eng. students should complete the online Student Information Form for Potential Graduate Students (<http://www.ece.umanitoba.ca/node/add/gs-preapplication>) prior to making a formal application to the department.

- Canadian/U.S. students, if invited to submit a formal application by the Department, should submit their application and supporting documentation to the Faculty of Graduate Studies at least four(4) months prior to their intended start date.
- International students, if invited to submit a formal application by the Department, should submit their application and supporting documentation to the Faculty of Graduate Studies at least eight(8) months prior to their intended start date.

Program Requirements

This program is meant to satisfy the particular needs of students and practicing engineers wishing to extend their studies on a broad basis of coursework and an engineering project.

Minimum Program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. The M.Eng. program in Electrical and Computer Engineering requires a minimum of 24 credit hours of advisor-approved course work as follows:

- MINIMUM: Nine(9) credit hours at or above the 700/7000 level from the ECE department
- MAXIMUM: Nime(9) credit hours of elective courses from
 - the ECE department at or above the 400/4000 level **AND** a maximum of 12 credit hours from other departments at or above the 300/3000 level
 - In exceptional cases, the student may be allowed to take 200/2000 level courses from other departments if pre-approved by the student's advisor
- PROJECT: In addition, the student is required to complete an advisor-approved engineering project and proposal. The effort involved in this project should be at least the equivalent of six(6) credit hours of coursework.

For complete supplemental regulations on the M.Eng. program in Electrical and Computer Engineering, refer to the website <http://www.ece.umanitoba.ca/meng>

Graduate Record Exam (GRE): Not Required

Second language reading requirement: NONE

- 8 credit hours MUST be at or above the 7000 level
- 6 credit hours may be

Expected time to graduation: Two Years

Ph.D. in Electrical and Computer Engineering,
Admission

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar, a student must normally hold a Master of Science degree in Electrical or Computer Engineering, or related fields of study approved by the Department and prospective advisor, from a recognized university. The University minimum GPA requirement for entrance is 3.0; the Department minimum GPA requirement for entrance is 3.5.

- Other Dept: at or above the 3000 level from OR
- ECE Dept: 4000 level elective courses from the ECE department
- 15 of the 24 credit hours MUST be from the ECE Dept.
- Credit may be given for approved course work completed at the M.Sc. level
- **Transferred from the M.Sc program**
 - Please see info at

Provisional acceptance of students nearing completion of the M.Sc. degree in Electrical or Computer Engineering may be considered with a minimum University of Manitoba equivalent GPA of 3.0.

http://www.ece.umanitoba.ca/phd_transfer -- This method offers 3 additional methods of entrance and record keeping

Application Deadlines

Potential Ph.D. students should complete the online Student Information Form for Potential Graduate Students (<http://www.ece.umanitoba.ca/node/add/gs-preapplication>) prior to making a formal application to the department.

- With an M.Sc. degree and declared on Admissions form
- With an M.Sc. degree, but not declared on Admissions form
- Without an M.Sc. -- transferring to the ECE Ph.D. program from the ECE M.Sc. program

- Canadian/U.S. students, if invited to submit a formal application by the Department, should submit their application and supporting documentation to the Faculty of Graduate Studies at least four(4) months prior to their intended start date.
- International students, if invited to submit a formal application by the Department, should submit their application and supporting documentation to the Faculty of Graduate Studies at least eight(8) months prior to their intended start date.

In exceptional cases, a transfer into the Ph.D. program from the M.Sc. program may be recommended for students holding a B.Sc. degree in Electrical or Computer Engineering or related field approved by the advisor and department, provided the following conditions are met: http://www.ece.umanitoba.ca/phd_transfer

For all other categories of students

- a minimum of 18 credit hours of advisory committee-approved course work is required
 - of which 12 credit hours must be at or above the 700/7000 level
 - the balance of 6 credit hours must be at or above the 300/3000 level from other departments or 400/4000 level elective courses from the ECE department
 - **at least 12 of the 18 credit hours must be from this Department.**

OTHER REQUIREMENT OF THE PH.D. PROGRAM INCLUDE:

- If preliminary admission into a Master's program is being recommended by the advisor with the intention of reviewing the student's status for possible upgrading to a Ph.D. admission; transfer must be indicated on the student's application form at the time of admission otherwise, the student will be required to pay both M.Sc. and Ph.D. program fees.

- **A Ph.D. thesis, which is based on research work normally carried out at this university, is required.**
- All full-time Ph.D. students are also required to present a paper AND poster every year at the department's annual graduate student conference, as outlined at the website:

<http://www.ece.umanitoba.ca/gradcon>

Program Requirements

Minimum Program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this calendar. The Ph.D. program in Electrical and Computer Engineering depends on student classification as follows:

For complete supplemental regulations on the Ph.D. program in Electrical and Computer Engineering, refer to the website <http://www.ece.umanitoba.ca/phd>

Graduate Record Exam (GRE): Not Required

- **M.Sc.** degree in Electrical or Computer engineering and who have been admitted directly into the Ph.D. program
 - minimum of 12 credit hours of Advisory Committee-approved course work is required
 - 700/7000 level or higher
 - at least 9 of the 12 credit hours must be from the ECE Department
- **B.Sc.** degree in Electrical or Computer Engineering and who are
 - recommended for transfer into the Ph.D. program from the ECE M.Sc. program at this university
 - minimum of 24 credit hours of Advisory Committee-approved course work is required

Second language reading requirement: NONE

Expected time to graduation: 3.5 Years

Page URL,
<http://crscalprod1.cc.umanitoba.ca/ElectricalandComputerEngineering.catx>

Electrical and Computer Engineering Course Descriptions-7000 Level
ECE 7010 High Voltage Techniques and Insulation Design Criteria (Formerly 024.701) Laboratory generation and measurement techniques related to ac and dc high voltages, conventional and steep front high voltage pulses, composite

voltages and pulsed currents. Charge measurements. Test techniques for assessing insulation quality and life.

ECE 7020 Power Transmission Lines: Phenomenon and Insulation Design

(Formerly 024.702) High voltage dc, ac and hybrid transmission line corona modes, electrostatic and ionized field calculations, field effects of overhead transmission lines. Surge propagation including corona effect. Transmission line insulation design to withstand normal/abnormal voltages and conditions. Modern and conventional arresters. Principles and practice of insulation coordination.

ECE 7030 Advanced Electrical Machines

Magnetically-coupled circuits, energy conversion principles, field generation in ac machines, windings and inductances, reference frame theory, dc machine and dc drives, scalar control of induction machines, vector control of induction machines, drives for special machines.

ECE 7040 Signal and Data Compression

(Formerly 024.704) The course presents the theory of signal and data compression with their applications in engineering, including lossless compression (Shannon-Fano, Huffman, arithmetic and dictionary) and lossy compression, including scalar and vector quantization. References to sub-band and transform coding (wavelets and fractal) and analysis-synthesis coding will be made.

ECE 7050 Switching and Automata Theory

(Formerly 024.705) The course presents basic material in discrete mathematics and the theory of switching circuits. It provides electrical and computer engineering students with a firm basis in the modern theory of logic design, and illustrates some applications through formal characterization of combinational functions and sequential machines, using contemporary techniques for the automatic synthesis and diagnosis of digital systems.

ECE 7060 Power system Protection

(Formerly 024.706) History and philosophy of power system protection; typical protection schemes; instrument transformers; protection hardware and application; hardware testing techniques; software models and their use in simulation studies.

ECE 7070 Power System Analysis

(Formerly 024.707) Power system operation; load flow analysis; transient stability modeling and simulation using the classical model; detailed machine models for transient stability analysis, modeling of exciters, governors, and FACTS devices for transient stability analysis; methods of transient stability analysis; voltage stability concepts and assessment.

ECE 7072 Advanced Power Electronics

AC/DC and DC/DC converters, switching functions, voltage source converters, advanced PWM techniques, analytical modeling and simulation, control system design, applications of power electronics in motor drives and power systems, additional topics of current interest.

ECE 7074 Biomedical Signal Processing

Presents an overview of different methods used in biomedical signal processing with particular emphasis on problems in biomedical research and clinical medicine. Different types of biomedical signals considering their sources are defined and suitable analysis methods are discussed.

ECE 7076 Advanced Electric Machines and Drives

Magnetically-coupled circuits, energy conversion principles, field generation in ac machines, windings and inductances, reference frame theory, dc machine and dc drives, scalar control of induction machines, vector control of induction machines, drives for special machines.

ECE 7170 Queueing Systems for Telecommunications

Applied stochastic models for queuing systems; analysis of queueing models using matrix-analytic methods and also traditional transform based approaches. Course will focus on applications; how to develop models that represent real communication network problems and how to analyze them.

ECE 7180 Embedded Systems Engineering

(Formerly 024.718) A Structured approach to the design of modern digital systems is presented with specific emphasis on embedding computer applications. Topics will include the formal methodology of digital design together with selected topics

from the current research literature

ECE 7190 Micromachining and MEMS Technology

(Formerly 024.719) The course focuses on micromachining and micro-electro-mechanical systems (MEMS). Topics include microfabrication technologies, microactuators, and microsensors. Applications to optical, electrical, mechanical, chemical, and biological systems are discussed.

ECE 7200 Advanced Wireless Communication

(Formerly 024.720) The course covers several advanced issues in wireless communication networks. Topics of study will include trends and future of mobile computing, advanced wireless technologies, multimedia wireless LANs, wireless ad hoc networks, energy mgmt, channel coding, privacy issues in wireless networking. Prerequisite: Either ECE 4250 (or 024.425) or ECE 4700 (or 024.470)

ECE 7202 Cognitive Wireless Networks

The course will address both the theoretical concepts and system-level implementation issues for cognitive wireless networks. The topics covered will include information-theoretic analysis of cognitive radio systems, challenges and issues in designing cognitive radio systems, architectures and protocols for cognitive wireless networks, distributed adaptation and optimization methods, channel allocation cognitive machine learning techniques, interoperability issues, cross-layer optimization of cognitive radio systems, and applications of cognitive radio networks.

ECE 7204 Queueing Systems for Telecommunications

Applied stochastic models for queueing systems; analysis of queueing models using matrix-analytic methods and also traditional transform-based approaches. Course will focus on applications; how to develop models that represent real communication network problems and how to analyze them.

ECE 7210 Fractal and Chaos Engineering

(Formerly 024.721) This course presents the general theory of fractals and their applications in engineering, including fractal modelling of complex phenomena, such as dielectric discharges, and fractal image compression. It also relates fractals to chaos and dynamics.

ECE 7220 Topics in VLSI Test and Fault Tolerance

(Formerly 024.722) Faults and fault models for VLSI. Test generation algorithms. Design for testability: scan design for sequential circuits; built-in test; testable PLA design. Totally self-checking logic. Fault tolerance in VLSI: yield and performance enhancement through redundancy. System level diagnosis: applications to VLSI processor arrays.

ECE 7230 Artificial Neural Circuits and Networks

(Formerly 024.723) Examination of electronic neural networks and related computational systems, both from a circuit theory and from a system-theory perspective. Digital and analog VLSI implementations of neural systems are presented and compared. Connections with other systems from physics, biology and computer science are made.

ECE 7240 Signal Theory

(Formerly 024.724) Representation and analysis of deterministic signals: Continuous and Discrete; Random processes and spectral analysis; Bandlimited signals and systems.

ECE 7250 Information Theory and Applications

(Formerly 024.725) Development of information theory and the engineering implications for the design of communication systems and other information handling systems.

ECE 7260 Broadband Communication Networks

This course provides fundamentals for designing and analyzing broadband communication networks. The major content includes: structure and organization of broadband communication networks, typical protocols and technologies applied in broadband communication networks mathematical network modeling, and performance analysis. Prerequisite: Undergraduate level Probability Theory & Random Processes.

ECE 7270 Scattering and Diffraction of Electromagnetic Waves

(Formerly 024.727) Formulation and analysis of scattering problems by classical methods. Radar cross section of smooth bodies by geometrical and physical optics.

Diffraction by edges. Impedance and Leontovich boundary conditions.

ECE 7280 Static Compensation in Power Systems

(Formerly 024.728) Requirements for Static Compensation in Power Systems. The thyristor controlled reactor (TCR) and thyristor switched capacitor (TSC). Advanced GTO thyristor compensators. Operation and control of compensators. Load Compensation, filter design and specifications.

ECE 7310 Power System Transient Simulation

(Formerly 024.731) Methods of Network Equation Formulation; Modeling of network nonlinearities and transmission lines; Modeling of electrical machines and controls.

ECE 7320 Sampled-Data Control Systems

(Formerly 024.732) Analysis and design of discrete-time systems, compensation to improve stability and performance, introduction to digital logic control.

ECE 7330 Experimental Methods for Electronic Materials

(Formerly 024.733) Methods for growing and analyzing electronic materials. Growth will include chemical vapour deposition, diffusion, and plasma processing. Analysis will include capacitance, voltage and current voltage techniques.

ECE 7370 Memory Devices and Systems

(Formerly 024.737) Review of computing system architectures. Memory structures and implementations: static, dynamic, synchronous, asynchronous, single and multiport. Testability of memories. Smart memories. Memories for VLSI: configurable and reconfigurable. Case study of a CMOS self-synchronizing RAM.

ECE 7400 Neural Nets and Neurocomputing

(Formerly 024.740) Foundations of neural networks. Basic architecture and different structures. Associative networks. Mapping networks. Spatio-temporal networks. Learning and adaptability. Supervised and unsupervised learning. Stability. Adaptive resonance networks. Self-organization. Examples of existing systems. Applications.

ECE 7410 Phased Array Antennas

(Formerly 024.741) Linear and Planar Arrays Theory; Pattern Synthesis Techniques, Analysis and Design of Radiating elements, Phase Shifters and Beam-Forming Network; Scanning Techniques; Effect of phase, amplitude and mechanical errors on Array Performance.

ECE 7430 Experimental Methods of Microwave Engineering

(Formerly 024.743) Methods for determining: scattering parameters; insertion, mismatch and return loss; cavity parameters. Detector and mixer performance characteristics. Power measurement. System noise determination. Antenna radiation pattern and gain measurements.

ECE 7440 Current Research Issues in Electrical Engineering

(Formerly 024.744) Presentation of important research developments in the area of Electrical Engineering, selected to complement other established graduate courses. Approval of the head of the department is required to register for this course.

ECE 7450 High Frequency Integrated Circuit Design and Analysis

(Formerly 024.745) Monolithic microwave integrated circuit fabrication and circuit design techniques. Analysis and modeling of microwave passive components and GaAs active devices. High frequency circuit simulation techniques. Basic circuit examples.

ECE 7460 Real time Process Engineering

(Formerly 024.746) Identification, description, and analysis of the behaviour of systems of real-time communicating processes, and the application of real-time process algebras in the design of hardware and software systems. Prerequisite: COMP 3430 (or 074.343).

ECE 7490 Verification Tools

(Formerly 024.749) Study of automated reasoning systems useful in describing and reasoning about properties of hardware and software systems. Investigate mechanizations of process algebras, representations of communicating processes, time-critical process constructors, time-outs, communication constructs, sequential and parallel computation. Prerequisite: COMP 3430 (or 074.343).

ECE 7540 Selected Topics of Solid State Electronics

(Formerly 024.754) Homojunction and heterojunction phenomena; Gunn effect, Graduate Studies

organic semiconductors, properties of thin films, quantum electronic devices, space charge limited current devices, and newly developed solid state electronic devices.

ECE 7560 Topics in Signal Compression and Coding

This course covers selected topics in signal compression with emphasis on recent advances: theory and practice of quantization, introduction to rate distortion theory, principles of predictive coding, transform coding and trellis coding, applications, emerging topics including joint source-channel coding, multiple description coding and distributed source coding.

ECE 7590 Telecommunication Networking

(Formerly 024.759) This course will cover issues in the design and analysis of telecommunication networks and systems in terms of physical implementation, protocols, routing algorithms, management, software interfaces, and applications. Focus will be on high speed LAN, WAN and Telecommunication networks using a systems engineering perspective. Prerequisites: although no prerequisites are required, either course ECE 4250 (or 024.425) or COMP 4300 (or 074.430) would be recommended.

ECE 7650 Current Research in Computer Engineering

(Formerly 024.765) Presentation of important research developments in the area of Computer Engineering, selected to complement other established graduate courses in this area.

ECE 7660 Logic Problem Solving

(Formerly 024.766) Introduction to declarative techniques in symbolic problem solving with emphasis on relational representations, query construction, and recursive formulations of knowledge structures in engineering.

ECE 7670 Optimization Methods for Computer-aided Design

(Formerly 024.767) Constrained optimization of functions of several variables. Optimization methods suitable for the solution of engineering problems by modern digital computers. Both gradient and direct search methods are included.

ECE 7680 Dielectric Properties and Phenomena

(Formerly 024.768) Elementary structure of matter, polarization, response of dielectrics to static and periodic fields, ionization and decay processes, electrical breakdown of gases, liquids, and solids.

ECE 7700 Nonlinear Systems Analysis 1

(Formerly 024.770) Introduction to nonlinear phenomena; linearization; state-space methods - quantitative and qualitative; introduction to the principal methods of determining stability.

ECE 7720 Optimal Control 1

(Formerly 024.772) Introduction to optimal control systems; topics will include statement of the control problem, controllability, calculus of variations, Pontryagin's Maximum Principle, and design of optimal controls.

ECE 7740 Physical Electronics 1

(Formerly 024.774) Fundamental principles. Wave mechanics, statistical mechanics, structure of matter, free electron theory and electron emission, band theory of solids, electrical conduction, and transport phenomena. Prerequisite: ECE 3600 (or 024.360) or equivalent.

ECE 7750 Physical Electronics 2

(Formerly 024.775) Properties of materials. Semiconductors, junction phenomena; ferroelectrics, magnetic materials, superconductivity, optical processes, effects of radiation. Prerequisite: ECE 3600 (or 024.360) and ECE 4190 (or 024.419) or equivalent.

ECE 7780 Microwave Circuits

(Formerly 024.778) Circuit properties of microwave transmission systems. Matrix representation and analysis of microwave networks, microwave junctions, resonators, and impedance matching networks.

ECE 7810 Solution of Fields by Numerical Methods 1

(Formerly 024.781) Numerical integration, differentiation. Finite-difference solutions of the Poisson, Laplace and Helmholtz equations. Initial-value problems. The eigen problem. Examples chosen from electromagnetic, thermal, fluid-flow, stress, and other fields.

ECE 7880 Distributed Energy Generation

Rationale for distributed generations (DG); Distributed electricity generation technologies (Thermal and Renewable); Availability of renewable energy resources; Technical and economic evaluation of DG projects; DG grid integration and protection issues; Interconnection standards Microgrids. Prerequisite: Energy Systems I or equivalent course.

ECE 7890 Power System Control

(Formerly 024.789) The application of modern systems engineering methods to power system problems.

ECE 7920 Human Physiology for Engineers

(Formerly 024.792) The analysis and measurements of human physiological systems. Anatomical descriptions are limited to those required to support the functional analysis. Mathematical modeling is reinforced by analog and digital computer models.

ECE 7990 HVDC Transmission 1

(Formerly 024.799) Rectifier-inverter fundamentals. Compounding and regulation. Grid firing control systems. Reactive power requirements. Ground return and electrode design. Transmission lines. Economics and efficiency.

Electrical and Computer Engineering Course Descriptions-8000 Level

ECE 8000 HVDC Transmission 2

(Formerly 024.800) Protection. Harmonics: telephone interference. Corona: radio and television interference. Analytical methods. Conversion equipment, the use of solid devices. Selected topics from current literature. Prerequisite: ECE 7990 (or 024.799).

ECE 8010 Advanced Network Synthesis

(Formerly 024.801) Mathematical treatment of various approximation techniques, matrix transformation methods applied to equivalent networks of minimum sensitivity or other criteria, theory of multivariable functions, lumped-distributed network synthesis.

ECE 8050 Topics in Microelectronics

(Formerly 024.805) Equilibrium and non-equilibrium processes in semiconductors, properties of junctions and thin films, carrier transport phenomena, effects of traps, and selected topics pertinent to recent literature in microelectronics.

ECE 8110 Digital Systems Design

(Formerly 024.811) Fixed-instruction-set microprocessor design; microprogramming, bit-slice based design; parallel processing and multiprocessing; applications to data acquisition, data logging, and data communications.

ECE 8130 Statistical Communication Theory

(Formerly 024.813) Representations of random processes; signal detection and estimation techniques.

ECE 8140 Digital Communications and Coding

(Formerly 024.814) Fundamentals of information theory; source and channel coding; digital modulation techniques.

ECE 8150 Digital Signal Processing

(Formerly 024.815) Discrete-time linear system theory, digital filter design techniques, discrete Fourier transforms including FFT, discrete Hilbert transform, Walsh-Hadamard transforms high-speed convolution and correlation techniques.

ECE 8160 Digital Filters

(Formerly 024.816) Theories, techniques and procedures used to analyze, design and implement digital filters in both software and hardware.

ECE 8190 Topics in Antenna Theory and Design

(Formerly 024.819) Antennas as a boundary value problem, antenna parameters, analysis and synthesis methods, antenna measurements.

ECE 8200 Advanced Engineering Electromagnetics

(Formerly 024.820) Solution of wave equation; special theorems and concepts, computer aided analysis.

ECE 8210 Power Electronic Circuits

(Formerly 024.821) Thyristor properties, ac controllers, controlled rectifiers, dc to dc converters (choppers), and inverters. Permission of instructor required. Credit not to be held with ECE 4370 (or 024.437).

ECE 8220 Digital Image Processing

(Formerly 024.822) Digital representation of images. Two-dimensional operations and transforms. Image enhancement, restoration, and coding. Reconstruction from projections. Prerequisite: ECE 3580 (or 024.358) or equivalent desirable.

ECE 8230 Pattern Recognition and Scene Analysis

(Formerly 024.823) Supervised and unsupervised learning techniques. Linear discriminant analysis. Scene analysis methods.

ECE 8240 Parallel Processing Architecture

(Formerly 024.824) Abstract parallel processing system (APPS), Flynn's classification, pipelining, crossbar switches, associative parallel processors, Bene's network, multistage interconnection networks (MIN), alternating -sequential parallel processing.

ECE 8270 Computer Communication Networks

(Formerly 024.827) Overview of existing computer networks. Elements of queueing theory. Error, delay, cost and capacity analysis. Fixed assignment schemes. Packet and switched networks. Random access. Satellite networks. Hybrid protocols.

ECE 8280 Electromagnetic Field Modelling

(Formerly 024.828) Coulombian and amperian models for polarized media and magnetized media; uniqueness theorems, formulation and classical methods of analysis of static, stationary and quasistationary field problems; modelling of electromagnetic fields in the presence of moving solid conductors; elements of relativistic electrodynamics.

ECE 8300 Computer Vision

(Formerly 024.830) This course is an extension of ECE 8220 (or 024.822) "Digital Image Processing." Techniques of image modelling, segmentation, texture analysis, matching and inference will be studied.

ECE 8310 Computer-Aided Design in Biomedical Engineering

(Formerly 024.831) Representation of surfaces in space. 3D display methods and hardware. 3D boundary tracing and texture. Biosterometry and stereophotogrammetry in biomedicine. Some aspects of computer-aided manufacturing of prostheses and other topics. Prerequisites: an introductory course in computing or equivalent experience and one year of any physical, engineering or biological science.

ECE 8320 Advanced Topics in Power Systems

(Formerly 024.832) Study of selected topics of recent advances in electrical power systems.

ECE 8360 VLSI Design Methodology

(Formerly 024.836) Design of custom and semi custom Very Large Scale Integrated (VLSI) circuits and systems including design for testability. Static and dynamic VLSI circuits; software design tools, layout, logic and timing simulation. Prerequisites: ECE 2220 (or 024.222), ECE 4240 (or 024.424), or equivalent.

ECE 8370 Topics in Biomedical Engineering

(Formerly 024.837) A discussion of current topics in biomedical engineering. The latest in instrumentation, procedures and practices relevant both to clinical engineering and ongoing research are covered. Prerequisite: ECE 4400 (or 024.440) or consent of instructor.

ECE 8380 Reflector Antennas

(Formerly 024.838) Mathematical analysis of common reflector antennas including effects of various types of feed structures.

ECE 8400 Intelligent Systems

(Formerly 024.840) Continuation of ECE 7660 (or 024.766) "Resolution Problem Solving," plan formation, default and temporal reasoning as applicable to engineering.

English, Film, and Theatre

English, Film, and Theatre,
English Program Info,

As a moderate-sized department, English is able to offer M.A. and Ph.D. programs covering a wide range of periods, genres, media, and theoretical approaches. Both scholarly and creative thesis options are offered for the M.A. In addition to teaching (at all levels), publishing, writing, editing, advertising, arts management, acting and entertainment, English graduates have worked in small businesses, corporations, government, the foreign service, research and development, public relations, fundraising, filmmaking, the National Film Board, and many other areas.

One of the major strengths of the faculty is its commitment to teaching excellence, with three of its current members having been honoured with the University's highest teaching award, and several others having been honoured with Merit Awards, Graduate Teaching Awards, and UMSU Certificates of Teaching Excellence. In keeping with this record, graduate student teachers have also won a number of the Teaching Excellence Awards offered by the Faculty of Arts since 1994.

Fields of Research

Students are welcome to consider all areas of literary specialization: Canadian literature, American literature, prairie literature, 20th-century literature, 19th-century literature, 18th-century literature, Milton, medieval literature, film, drama, theatre, post-colonial literature and theory, modern and post-modern literature, literary and critical theory, cultural and media studies, women's writing, and creative writing.

Research Facilities

University of Manitoba Libraries have extensive holdings in literature, film studies, and theatre. The Libraries provide access to both local and remote databases. Of note are the University of Manitoba Department of Archives and Special Collections and St. John's College Library. The Department of Archives and Special Collections has an extensive holding in Canadian literature. It is particularly good in Canadian prairie literature, the Archives' holdings including a large and growing collection of prairie literary manuscripts.

Our department benefits from close affiliations with the University of Manitoba Institute for the Humanities, the Centre for Globalization and Cultural Studies, and the Centre for Creative Writing and Oral Culture.

The Canadian Literature Archive, a project of the Department of English, Film, and Theatre, is an internet site which serves as a repository for information about Canadian writers, novelists, poets, playwrights, essayists, Canadian literary organizations, magazines, publications, texts, and library archives. The Archive has been online since 1994.

Students are invited to join the Association of Graduate English Students (AGES). The association, which has recently been dramatically reanimated, organizes student publications, graduate colloquia, and other events. The department also operates a media lab and provides a reading room for student and faculty use.

M.A. in English,
Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Students with other degrees or backgrounds may be eligible for admission to a pre-Master's program to the satisfaction of the department. Contact the English, Film, and Theatre Department for further information.

Application Deadlines

Applications of Canadian/U.S. students are to be received in the Faculty of Graduate Studies, complete with all supporting documentation, by January 5th. International

students should submit their applications to the Faculty of Graduate Studies, complete with all supporting documentation, by November 1st.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this calendar. Requirements for the M.A. degree in English can be met in one of two ways; **either** a thesis (critical or creative) and 18 credit hours of course work, of which 12 credit hours will normally be graduate English seminars; **or** a major paper and 30 credit hours of course work.

Second language reading requirement: Yes

Expected time to graduate: 2 years

Ph.D. in English,
Admission

In addition to the minimum admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar, applicants must normally hold an M.A. degree in English with a GPA of at least 3.5 in their work at the M.A. level.

Application Deadlines

Applications of Canadian/U.S. students are to be received in the Faculty of Graduate Studies, complete with all supporting documentation, by January 5th. International students should submit their applications to the Faculty of Graduate Studies, complete with all supporting documentation, by November 1st.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this calendar. The first year of full-time Ph.D. study will normally include 18 credit hours, at least 12 credit hours of which should be graduate seminars in English literature. This program of studies will be arranged in consultation with the student's advisory committee at a meeting that will take place no later than one week before the start of classes.

Candidacy examinations, consisting of a paper on the student's period of specialization and a paper on the research area, will normally be written in the second year of Ph.D. study. Each paper will be followed by a one-hour oral examination.

Second language requirement: yes

Expected time to graduation: 4 years

English, Film, and Theatre-Course Descriptions

ENGL 7030 Studies in American Literature
(Formerly 004.703) A detailed study of an aspect of American Literature. Topics will vary from year to year. Not to be held with the former ENGL 7020 (004.702). As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7050 Studies in Canadian Literature
(Formerly 004.705) A detailed study of an aspect of Canadian Literature. Topics will vary from year to year. Not to be held with the former ENGL 7040 (004.704) or

the former ENGL 746. As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7070 Studies in British Literature since 1900
(Formerly 004.707) A detailed study of an aspect of post-1900 British Literature. Topics will vary from year to year. Not to be held with the former ENGL 7060 (004.706). As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7090 Studies in Contemporary Literature
(Formerly 004.709) A detailed study of an aspect of contemporary literature in English. Topics will vary from year to year. Not to be held with the former ENGL 7080 (004.708). As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7140 Studies in International Literature
(Formerly 004.714) A detailed study of an aspect of international literature in English. Topics will vary from year to year. Not to be held with the former ENGL 7100 (004.710). As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7160 Studies in Modernism
(Formerly 004.716) A detailed study of an aspect of Modernism. Topics will vary from year to year. Not to be held with the former ENGL 7150 (004.715). As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7170 Studies in Media
(Formerly 004.717) A detailed study of an aspect of media and literature. Topics will vary from year to year. Not to be held with the former ENGL 7250 (004.725). As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7180 Studies in Old English Poetry
(Formerly 004.718) Studies in Old English poetry. As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7190 Special Topics in Literary Figures
(Formerly 004.719) Focuses on the works of an individual author. Subjects will vary from year to year. As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7300 Creative Writing
This seminar will foster advanced craft in a variety of literary genres and will include an analytic and a workshop component. Admission will be at the instructor's discretion, based on the submission of a creative portfolio.

ENGL 7590 Teaching Literature at University
(Formerly 004.759) Description not available for this course.

ENGL 7600 Bibliography
(Formerly 004.760) Description not available for this course.

ENGL 7690 Special Topics in Literary Periods 1
(Formerly 004.769) Description not available for this course. As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7710 Special Topics in Literary Genres 1
(Formerly 004.771) No description available. As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7750 Directed Reading 1
(Formerly 004.775) Directed Reading 1. As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7800 Studies in Drama/Theatre
(Formerly 004.780) Focuses on drama possibly using some consideration of theatrical practice and performance. Topics will vary from year to year. Not to be held with the former ENGL 7790 (004.779). As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7840 Studies in Critical Theory
(Formerly 004.784) Explores literary theory. Topics will vary from year to year. Not to be held with the former ENGL 7830 (004.783). As the course content will vary from year to year, students may take this course more than once for credit.

to be held with the former ENGL 7830 (004.783). As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7860 Topics in Cultural Studies
(Formerly 004.786) Provides an overview of the theory and practice of cultural studies. Topics will vary from year to year. Not to be held with the former ENGL 7850 (004.785). As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7880 Studies in Literature and Film
(Formerly 004.788) Brings together literature and film. Topics will vary from year to year. Not to be held with the former ENGL 7870 (004.787). As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7900 Studies in Medieval Literature
(Formerly 004.790) A detailed study of an aspect of Middle English literature. Topics will vary from year to year. Not to be held with the former ENGL 7890 (004.789). As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7920 Studies in Early Modern Literature
(Formerly 004.792) A detailed study of an aspect of Early Modern literature. Topics will vary from year to year. Not to be held with the former ENGL 7910 (004.791) or the former 004.723. As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7940 Studies in Eighteenth-Century Literature
(Formerly 004.794) A detailed study of an aspect of eighteenth-century literature. Topics will vary from year to year. Not to be held with the former ENGL 7930 (004.793). As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7960 Studies in Romanticism
(Formerly 004.796) A detailed study of an aspect of romanticism. Topics will vary from year to year. Not to be held with the former ENGL 7950 (004.795). As the course content will vary from year to year, students may take this course more than once for credit.

ENGL 7980 Studies in Nineteenth-Century British Literature
(Formerly 004.798) A detailed study of an aspect of Nineteenth-Century British Literature. Topics will vary from year to year. Not to be held with the former ENGL 7970 (004.797). As the course content will vary from year to year, students may take this course more than once for credit.

Entomology

Entomology ,
Entomology Program Info,
The Department of Entomology is the only such in Canada. The Department has strong links with agricultural and environmental research organizations in Winnipeg and across Canada, and is uniquely positioned to provide comprehensive graduate training in entomological research. The Department offers M.Sc. and Ph.D. degrees. In both M.Sc. and Ph.D. programs, students must achieve a high standard in a research project and in a thesis reporting their results. Students must also take some course work, including a course intended to develop written and oral communication skills, to promote critical thinking and to provide exposure to diverse fields of entomology and related sciences.

Graduates of the Ph.D. programme from the Department of Entomology occupy academic positions in a number of universities in Canada and elsewhere; others occupy senior scientist positions with Agriculture and Agri-Food Canada, Environment Canada, or other government research and regulatory agencies. Graduates of the M.Sc. programme have proceeded to Ph.D. programs elsewhere, while others have entered the workforce following their M.Sc. degree. A high proportion of insect extension specialists in provincial governments in western Canada are graduates of the department's M.Sc. program. Other recent graduates have positions as forest and prairie management ecologists, careers in agribusiness, producer organizations or pesticide companies, or technical positions in research organizations.

Fields of Research

The research of the Department is about equally divided between basic and applied studies. The Department has faculty in the areas of apiculture and pollination biology; physiological, population and community ecology of insects; insect systematics; insect-vertebrate interactions and aquatic entomology. Particular areas of focus include honey bee parasite management, insects as agents of biological control, crop and livestock entomology, arthropod ectoparasites of mammals and birds, and the study of insect biodiversity in response to forest and prairie management. Adjunct professors associated with the department provide additional depth and breadth in the areas of forest entomology, pheromone chemistry, crop protection entomology, stored product entomology, medical entomology, and the role of insects in aquatic ecosystems.

Research Facilities

Departmental research facilities include the J.B. Wallis Museum of Entomology, controlled environment chambers and an apiary. Other accessible facilities include a scanning electron microscope, pesticide analysis laboratories, livestock, field plots and commercial scale fields, and greenhouse space.

M.Sc. in Entomology, Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

Application Deadlines

The Department of Entomology allows students to begin their program on either 1 September, 1 January or 1 May. For admission for each of these start dates, Canadian and U.S. students should send their applications with complete supporting documentation to arrive in the Faculty of Graduate Studies at least three (3) months before the intended start date. International students should send their applications with complete supporting documentation to arrive in the Faculty of Graduate Studies at least seven (7) months before the intended start date. Before making a formal application, students should contact the Department of Entomology to determine what documentation should accompany the application.

Program Requirements

The minimum course requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this calendar. As part of their academic program, students are required to take ENTM 7150 Advanced Entomology 1.

Second language reading requirement: none

Expected time to graduation: 2 - 3 years

Ph.D. in Entomology, Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

Application Deadlines

The Department of Entomology allows students to begin their program on either 1 September, 1 January or 1 May. For admission for each of these start dates, Canadian and U.S. students should send their applications with complete supporting documentation to arrive in the Faculty of Graduate Studies at least three (3) months before the intended start date. International students should send their applications with complete supporting documentation to arrive in the Faculty of Graduate Studies at least seven (7) months before the intended start date. Before making a formal application, students should contact the Department of Entomology to determine what documentation should accompany the application.

Graduate Studies

Program Requirements

Minimum Program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. As part of their academic program, students are required to take ENTM 7220 Advanced Entomology.

Second language reading requirement: yes, although this may be waived.

Expected time to graduation: approximately 3 - 5 years

Page URL,
<http://crscalprod1.cc.umanitoba.ca/Entomology.catx>

Entomology Course Descriptions

ENTM 7120 Insect Population Management (Formerly 038.712) Term papers, tutorials and workshops to study systems of managing populations of injurious and useful insects based upon models of the processes of insect population dynamics. Prerequisite: consent of instructor. Not all courses are offered every year. Please contact the department regarding course availability.

ENTM 7150 Advanced Entomology 1 (Formerly 038.715) A required course for M.Sc. students in Entomology. Students must submit essays and seminars in areas chosen to fit the requirements of their program. They are required to prepare for and participate actively in discussion sessions and other class meetings. Not available for credit in a Ph.D. program.

ENTM 7200 Advanced Insect Taxonomy (Formerly 038.720) Tutorials, laboratory periods and discussion of classification and evolution of insects. Offered 2005-2006. Not all courses are offered every year. Please contact the department regarding course availability.

ENTM 7210 Special Topics in Entomology (Formerly 038.721) The content of this course will deal with specific topics of entomology at the advanced level.

ENTM 7220 Advanced Entomology (Formerly 038.722) A required course for Ph.D. students in Entomology. Students must submit essays and present seminars in areas chosen to fit the requirements of their program. They are required to prepare for and participate actively in discussion sessions and other class meetings. Not available for credit in a M.Sc. program.

ENTM 7230 Advanced Pollination Biology (Formerly 038.723) Tutorials, assignments and discussion periods of current topics relating to the physiology and life history of insect pollinators and their ecological interactions with entomophilous plants. Subjects studied may be selected to fit the interests of individual students. Prerequisite: Consent of instructor.

ENTM 7240 Advances in Physiological Ecology of Insects (Formerly 038.724) The effect of environmental factors such as temperature, moisture, light and other organisms on the physiology and ecology of insects. Prerequisite: ENTM 2050 (or 038.205) or consent of instructor. Not to be held for credit with ENTM 4520 (or 038.452). Not all courses are offered every year. Please contact the department regarding course availability.

Environment and Geography

Environment & Geography

Environment & Geography,
Environment & Geography Program Info,
The Department of Environment and Geography is one of the most dynamic and eclectic research units at the University of Manitoba. The focus of the graduate program is innovative scholarship that contributes meaningfully to our understanding of how we interact with and can influence the world around us. As a

department, we strive to be recognized regionally, nationally, and internationally as a centre for excellence in teaching, research and outreach and in integrating physical, biological and human environmental knowledge. This is reflected in our commitment to graduate students and the successes they continue to achieve.

Fields of Research

Department research activities span a wide range of disciplinary and interdisciplinary activities, including: the evolution of the cultural landscape; aging; maritime shipbuilding and seaports; homelessness; global (and China's) energy supplies; global food and agriculture; alternative energy sources; replacement of petroleum feedstock in petrochemical industry; speciation, cycling, and bioavailability of trace elements across environmental interfaces; stress ecology and risk assessment in aquatic systems from chemical contaminants, ecosystem functioning and biodiversity impacts of nutrients in riparian and aquatic systems and the ecophysiology of invasive species, animal geographies; applied meteorology; severe weather including precipitation and drought analyses; microclimatology, greenhouse gas source-sink analysis; geographies of health, caregiving and care work in urban and rural settings; human-animal relations; the changing role of zoos and zoo maps; prairie and forest restoration; traditional Aboriginal knowledge; sustainable rural and urban agriculture; risk analysis of GM crops and disease; plant, wildlife and landscape ecology; environmental conservation and ecological restoration; gender and development; environmental health; arctic climate change and system-science studies in polar marine ecosystems.

Researchers in the Department collaborate with a wide variety of other academic, governmental and private institutions, non-governmental and grassroots organizations, and community groups. These include: Networks of Centres of Excellence (NCE – ArcticNet, PrionNET), IPY, NSERC and CFCAS national research networks (e.g. BIOCAP, CASES, IPY-CFL, MITE-RN, COMERN, DRI, ArcticStorms); national climate-related research centres (e.g. HAL, PSPC, MRB and CRB) within the Meteorological Services of Canada (MSC); Department of Fisheries and Oceans facilities (including the Canadian Ocean Climate Chemistry Centre, IOS, FWI); numerous zoos both in Canada, and abroad; Clearwater and Erikson rural communities, Hollow Water and Grassy Narrows First Nations; Spence and Furby urban community gardens; NGOs that include Boreal Forest Network and Council of Canadians, Manitoba Conservation; Parks Canada; Manitoba Hydro; Ducks Unlimited and many others. In addition, the department is a forerunner in research outreach activities, including Schools on Board, a national initiative to engage schools and communities in Arctic science research by interacting with international CASES research teams on board the Canadian Research Icebreaker. Other important collaborations include action research and education with rural communities, farm groups and First Nations across the country, especially the Harvest Moon Society, and environmental NGOs including Council of Canadians, Boreal Forest Network, Saskatchewan Organic Directorate, Status of Women Canada, Manitoba Centre for Health Policy and the Delta Waterfowl Foundation.

Meteorological and marine research involves collaboration with international research networks and agencies (e.g. Universities of Miami (RSMAS), Wisconsin, the Radiometrics Corp., Quebec Oceans, International Polynya Program, IPY-Pan-Arctic Ecosystem Cluster). Other international research involves major ion chemistry with scientists in China; trace element behaviour research in the Himalaya, Nepal and India; energy and food supply in China; agriculture for the Eastern Caribbean; grasslands conservation strategy in North America; international zoo visitor views of conservation; ports and regional development in East Asia; and community-located environmental conservation in Ecuador, Peru, as well as India and Bangladesh.

Research Facilities

The Department enjoys close collaboration with the Centre for Earth Observation Science (CEOS). CEOS is structured as an interdisciplinary centre through the partnering arrangements with the Departments of Statistics, Botany, Biological Sciences, Soil Science, Civil Engineering, Physics and Applied Mathematics. External partners include Manitoba Natural Resources, the Canadian Wheat Board, Parks Canada, Fisheries and Oceans Canada, MB Hydro as well as those with national and international affiliations such as the Canadian Ice Services, Environment Canada, Canada Centre for Remote Sensing, Canadian Space Agency, National Air and Space Administration, and the Canadian International

Development Agency. Because of this extensive network, it is possible to access facilities and equipment far beyond the holdings of the University. Three fully equipped computer laboratories and data-sharing agreements with CEOS partners provide the infrastructure support for research and teaching programs. Students have access to a research laboratory with fully integrated PC and UNIX (IBM RS/6000 and DEC Alpha) work stations, with two calcomp digitizers, slide-output device and plotter. Another laboratory is Pentium based with 15 workstations and a server. Available software includes Arc/Info, PCI Ease/Pace, ER Mapper, Idrisi, ArcView, IDL, Adobe Illustrator and Photoshop.

Faculty within the Department have acquired a vast array of field and laboratory research equipment. A partial list includes a GPS base station, handheld units and a satellite receiving station; radiometers, spectrometers, scatterometers for monitoring of electromagnetic radiation in the solar, terrestrial and microwave wavelengths, atmospheric boundary layer profiling equipment, surface meteorological and energy and CO₂ flux monitoring facilities, infrastructure for gas chromatography (DMS, CO₂, CH₄), state of the art calibration facilities, research moorings and buoys, and support craft for sampling on water (jet boats, air boats, zodiaks, etc.,) and land (snowmobiles, trucks, ATV's). Laboratory facilities include a cold laboratory for snow and sea ice microstructure analysis.

A CFI award has enabled the acquisition and operation of (i) the Ultra-Clean Trace Element Laboratory (UCTEL; home.cc.umanitoba.ca/~wangf/uctel), which is one of the most advanced ultra-trace analytical facilities in the world. NSERC grants have led to the purchase of atmospheric boundary layer profiling equipment and surface heat and mass flux facilities for energy budget and greenhouse gas studies, (ii) the Riparian and Littoral Process Laboratory, which is equipped with stand alone growth facilities and ecotoxicity and field bioassay instrumentation to support research into stress ecology, ecology and ecophysiology, and (iii) the Sea-Ice Environmental Facility (SERF), which is Canada's only experimental sea - ice facility that houses interdisciplinary studies on sea ice in a laboratory setting..

The Environmental Conservation Lab (<http://umanitoba.ca/environment/ec1>) focuses on the interface between biological and social sciences, and conducts community-entered research, education, and outreach across North America and in the Global South. Research incorporates extensive fieldwork, spatial analyses at multiple scales of organization, and participatory video making. Several researchers in the Department use the field stations of Delta Marsh, Clearwater, the Experimental Lakes Area (ELA), Oak Hammock Marsh, and the Manitoba Zero Till Research Association (MZTRA).

Master of Environment (M.Env.), Admission

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar, students must have a minimum GPA of 3.25 in the last 60 CH of course work and should be accepted for study by an academic advisor prior to being accepted into the program.

Admission Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 3 1/2 months prior to their intended start date. International students should submit their application and supporting documentation at least 7 months prior to their intended start date. Please see the application deadline chart below.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Master of Environment students are required to complete at least 12 credit hours as follows: 6 credit hours from the 7000 level, including GEOG 7360 (53.736) and 6 credit hours of any other course at the 3000-level or higher. Students must attend and present their original research at a department seminar. Students are also encouraged to attend and present at an academic or professional conference or seminar as approved by their advisory committee. In addition, a thesis is required. An oral defence of the thesis is an integral part of the M.Env. examination. Complete supplementary regulations of the

program can be found and should be consulted on the Faculty of Graduate Studies website: (http://umanitoba.ca/faculties/graduate_studies/admin/532.html). It is the students' responsibility to read and follow these regulations.

Second Language Reading Requirement: none

Expected Time to Graduate: two years

M.Sc. in Environment and Geography,
Admission

Students with an honours degree or equivalent (including a 4-year advanced degree) in Geography (physical geography specialization) or from a program in the Earth or environmental sciences will be considered. The requirement for admission is a minimum GPA of 3.25 in the last 60CH of course work. Students must be accepted for study by an academic advisor prior to being accepted into the program.

Admission Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 3 1/2 months prior to their intended start date. International students should submit their application and supporting documentation at least 7 months prior to their intended start date. Please see the application deadline chart below.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. M.Sc. students are required to complete a minimum of 12CH of approved course work plus a thesis. Courses typically include 6CH of 7000-level Departmental courses and 6CH selected from graduate or upper level undergraduate courses from either within the Department or from other departments. Students must attend and present their original research at a department seminar. Students are also encouraged to attend and present at an academic or professional conference or seminar as approved by their advisory committee. All students must complete and defend a thesis that makes a distinctive contribution to the fields of environment and/or geography. Complete supplementary regulations of the program can be found and should be consulted on the Faculty of Graduate Studies website: (http://umanitoba.ca/faculties/graduate_studies/admin/532.html). It is the students' responsibility to read and follow the regulations.

Second Language Reading Requirement: none

Expected Time to Graduate: two years

M.A. in Geography,
Admission

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar, students must have a minimum GPA of 3.25 in the last 60 CH and be accepted for study by an academic advisor prior to being accepted into the program.

Admission Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 3 1/2 months prior to their intended start date. International students should submit their application and supporting documentation at least 7 months prior to their intended start date. Please see the application deadline chart below.

Program Requirements

Graduate Studies

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. M.A. students are required to complete at least 12 credit hours as follows: 6 credit hours from the 7000 level and 6 credit hours of any other course at the 3000-level or higher. Students must attend and present their original research at a seminar offered and advertised at the department level prior to their defence. Students are also encouraged to attend and present at an academic or professional conference or seminar as approved by their advisory committee. In addition, a thesis is required. An oral defence of the thesis is an integral part of the M.A. examination. Complete supplementary regulations of the program can be found and should be consulted on the Faculty of Graduate Studies website: (http://umanitoba.ca/faculties/graduate_studies/admin/532.html). It is the students' responsibility to read and follow these regulations.

Second Language Reading Requirement: none

Expected Time to Graduate: two years

Ph.D. in Geography,
Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Students must be accepted by an advisor prior to submitting an application to enter the program. A 3.5 GPA (or equivalent) in their previous 60 credit hours of course work is normally required.

Admission Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 3 1/2 months prior to their intended start date. International students should submit their application and supporting documentation at least 7 months prior to their intended start date. Please see the application deadline chart below.

Program Requirements

In addition to the minimum 12 credit hour course requirement of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar, students are required to attend and present their original research at two department seminars. Students are also encouraged to attend and present at an academic and/or professional conference or seminar as approved by their supervisor. These minimum course requirements may be increased on the recommendation of the student's advisory committee or the departmental Graduate Studies Committee. Students are also required to pass a candidacy exam, and complete and successfully defend a dissertation. The dissertation is to be a distinctive contribution to the field of geography and must be of publishable quality.

Second language requirement: none

Expected time to graduation: four years

Application Deadline Dates

Session Start Date	Canadian/US	International
Regular (September)	May 15	February 1
Winter (January)	September 15	June 1
Spring (May)	January 15	October 1

Environment & Geography-Course Descriptions
GEOG 7010 Selected Topics in Geography
Advanced study of a selected topic from any one of the department's fields of

specialization.

GEOG 7030 Regional Analysis

A seminar course reviewing theories of regional development which have planning applications. Further, it assesses government policy aimed at regional intervention and notes procedures of evaluation.

GEOG 7040 Seminar in Population Geography

Examination of the spatial and temporal character of demographic controls. Special emphasis will be placed upon the problems faced by developing areas in their attempts to deal with population growth.

GEOG 7050 Seminar in Land Settlement

Three hours per week, one term. The emphasis of this course is on research methods and techniques that are applicable to the study of settlement.

GEOG 7060 Urban Land Use

An analytical study of the location patterns of various city land uses, in terms of their geographic, economic, social, and political determinants. Includes field research in Winnipeg.

GEOG 7080 Quantitative Methods

A discussion of analysis and model construction in the study of urban and rural systems; analysis of socioeconomic and demographic data, construction of measures, and testing of models.

GEOG 7140 Historical Geography

The course is designed to provide a critical understanding of the development, philosophy, and methodology of historical geography.

GEOG 7180 Methodology of Agricultural Geography

The course first provides an understanding of social and economic concepts in agricultural geography, and then examines methods of data collection, sampling techniques, and analysis with relevance to specific research topics.

GEOG 7200 Environment, Resources, and Population

This course discusses the contemporary imbalance between population and resources. The consequences of resource exploitation upon the natural environment are also examined.

GEOG 7240 Industrial Location and Analysis

The course will critically examine theories that help to explain the location of industrial activity. Consideration will be given to normative, behavioural, and predictive methodologies.

GEOG 7250 Geomorphology

A study of field, laboratory, and other analytical techniques in selected aspects of geomorphology.

GEOG 7260 Selected Regional Issues in Geography

Advanced study of specific issues and problems in selected world regions.

GEOG 7270 Physical and Synoptic Climatology

A survey of advances in climatology providing a foundation for climatic research. An examination is made of principles and problems in physical and synoptic climatology. Two hour lectures and three hour laboratory per week both terms.

GEOG 7290 Energy Analysis

A survey of origins, methods and applications of energy analysis, a new technique of system energetics designed to provide information for a more efficient use of scarce natural resources.

GEOG 7300 Urban Transportation Geography

Current issues and problems in urban transportation are analyzed within several geographic contexts (e.g., spatial, environmental, economic, social, political). Students are encouraged to focus research on Winnipeg.

GEOG 7310 Geographic Theory and Methodology

A discussion of the meaning of explanation in human geography, the status of geography as a science and the construction of theory.

GEOG 7332 Concepts in Atmospheric Modelling

This course will primarily focus on numerical modelling applications and techniques
Graduate Studies

of the Earth's atmosphere with an emphasis on weather prediction. This includes understanding basic modelling terminology, numerical schemes, structure of models, types of models, what is required to run a model, and an introduction to data assimilation and ensemble techniques to weather prediction. Prerequisite: Permission of Instructor.

GEOG 7350 Techniques in Cognitive-Behavioral Geography

An examination of the methods used to elicit and analyze the human's cognitive-behavioural responses to geographic phenomena.

GEOG 7360 Interdisciplinary Perspectives on Issues in the Environment

An intensive examination of research relating to various issues in the environment, this course will challenge students to consider crosscutting themes found in the literature and from their own learning experiences, and apply them to environmental problems.

GEOG 7380 Advanced Ecotoxicology: Understanding Stress Ecology

Ecotoxicology characterizes how organisms interact with anthropogenic and natural stressors in an ecological context. This course is an examination of the fundamental science, approaches and issues being addressed in the field. Students should have a four-year science-based undergraduate degree and be registered in a graduate program. Prerequisite: permission of instructor.

GEOG 7400 Field Topics in Arctic Systems

Field and practical experience in selected topics of multidisciplinary research in Arctic System Science from science theory to field sampling, to modeling and remote measurements. Focuses on the ocean-sea ice-atmosphere interface and its relationship with the biological and geochemical processes operating in the cryosphere.

GEOG 7410 Spatial Analysis in Geography

The theory and techniques of spatial statistical data exploration, inference and hypothesis testing as they pertain to geographic analysis is explored. The role of spatial analytical techniques in field investigations, GIS and remote sensing applications are discussed. Prerequisites: (GEOG 3680 or 053.368) (C), and (MATH 1300 or MATH 1301 (136.130) (C), or MATH 1500 or MATH 1501 (136.150) (C)), or permission of instructor.

GEOG 7420 Synoptic Meteorology and Weather Analysis

The course covers applied aspects of meteorology in terms of weather analysis and forecasting techniques for synoptic-scales and meso-scales using various meteorological tools. An introduction to severe weather forecasting techniques will also be described. Familiarity with computers is essential. Prerequisite: Permission of instructor.

GEOG 7440 Climate Change

The course will provide an overview of General Circulation Models (GCMs) and how these models are used to study various aspects of global climate change. More specifically the course will deal with the coupling between the atmosphere, hydrosphere, lithosphere and biosphere from the perspective of Earth System Science.

GEOG 7450 Boundary-Layer Climatology and Micrometeorology

A seminar-based course devoted to the study of advanced topics in microclimatology and micrometeorology. Prerequisite: Permission of instructor.

GEOG 7460 Advanced Methods in Geographic Information Systems

Weekly two-hour lab. This course focuses on practical application of techniques used in Geographic Information Systems (GIS) and the development of GIS models. The development, testing and presentation of GIS data, models and results are studied. Prerequisite: GEOG 3730 (053.373) (C), or permission of instructor.

GEOG 7470 Techniques in Climatology

This course overviews the theoretical basis that underpins the measurement and application of climate elements in micrometeorological and microclimatological research. Prerequisite: Permission of instructor.

GEOG 7480 Advanced Methods in Remote Sensing

This course provides instruction in the current theory and application of remote sensing technology to Earth System Science. Emphasis will be placed on the

processing and interpretation of remote sensing imagery and the integration of remote sensing data with other spatial data. Prerequisite: GEOG 3200 (053.320) (C), or permission of instructor .

GEOG 7500 Biogeography

The course will emphasize principles and approaches to understanding biogeography on a worldwide scale with specific examples from Canadian and Manitoban research. Topics discussed include the physical environment and biological interactions, effects of disturbance and climate change, the geography of biological diversity, evolution and extinction.

Family Social Sciences

Family Social Sciences Program Info,

Focusing on issues that influence health, well being and family relations, the Master of Science (M.Sc.) in Family Social Sciences provides a strong research foundation in family psychosocial health. We study family issues from a multidisciplinary perspective that integrates psychological, sociological and economic theory and research.

A Master's degree in Family Social Sciences prepares graduates for positions in fields such as health promotion, policy analysis, community development, health research, human services administration, program development, and victim services.

Areas of Study

The graduate program is organized around four major areas of study. Each student selects one area in which to focus both course work and a research thesis.

Developmental Health is concerned with the determinants of healthy development throughout life and the implications for prevention and health promotion. Health is broadly defined as social, psychological and physical. The determinants of health are considered in the context of families as they interact with communities and societies.

Family Resource Management is focused on the interface between families and their resources - time, energy and money. The interaction of families with societal systems in the economy is emphasized, as are issues that affect family well-being, such as managing stress, making decisions and resolving problems.

Family Violence and Conflict Resolution surveys the prevalence, incidence, etiology, and consequences of conflict and violence in family relationships across the life span. Risk and protective factors at the individual, family, community, and societal levels are studied, with an emphasis on violence prevention and conflict mediation.

Inner City Families and Communities is designed to increase student knowledge of issues, perspectives and dynamics of individuals and their interactions in families and communities within the inner city.

Fields of Research

Faculty in the Department of Family Social Sciences use a variety of research methodologies, both quantitative and qualitative. We support observational, interview and survey research, as well as analysis of large data sets and case studies. Through our network of community partnerships, we support community-based research. We have well-equipped observational and computer facilities.

Research interests of the faculty reflect the four major areas of study in Family Social Sciences.

- **Developmental Health:** parent-child relations, parenting and public policy, social and emotional development, developmental psychopathology, sibling relations, aging, death and dying
- **Family Resource Management:** work and family, bankruptcy, gambling, home-based business, consumer economics, financial

counselling, time use, economic value of household production, family problem solving, managerial decision making

- **Family Violence and Conflict Resolution:** domestic violence, child maltreatment and exploitation, abuse and neglect of the elderly, children's exposure to conflict and violence, conflict management
- **Inner City Families and Communities:** healthy communities, housing policy, homelessness, street-involved youth, community development, neighbourhoods

Ph.D. in Family Social Sciences,

The Department of Family Social Sciences does not offer a Ph.D. program.

Family Social Sciences Course Descriptions

FMLY 7002 Family Social Sciences Seminar I

A monthly interdisciplinary seminar on current issues in Family Social Sciences, involving presentations by faculty and invited speakers from inside and outside the University of Manitoba. Attendance and participation is required for Family Social Sciences students during their first year of their master's program. Course graded Pass/Fail.

FMLY 7004 Family Social Sciences Seminar II

A monthly interdisciplinary seminar on current issues in Family Social Sciences, involving presentations by faculty and invited speakers from inside and outside the University of Manitoba. Attendance and participation is required for Family Social Sciences students during their first year of their master's program. Course graded Pass/Fail.

FMLY 7010 Seminar in Family Finance

(Formerly 062.701) Advanced study on topics related to family financial management. As well as a review of theory and literature in the field, contemporary family issues such as financial abuse, financial addictions, and financial literacy are discussed. A micro-economic perspective and Canadian data sources are used where possible.

FMLY 7220 Management of Family Stress

(Formerly 062.722) Investigates specific stressor events of contemporary families and suggests ways in which families can meet and manage their responses to these events. Applies theories of family stress and of family resource management to frame and evaluate current research and professional practice.

FMLY 7230 Work and Family Interrelationships

(Formerly 062.723) Advanced study of the earning and caring activities of families and how these activities interrelate at the community, provincial, national, and global levels. Emphasis on relating current research to relevant theoretical perspectives and professional practice.

FMLY 7500 Evaluation of Family, Health and Social Development Programs

This course teaches the theory and practice of program evaluation with a focus on family, health, and social development programs. It will emphasize a utilization-focused evaluation approach from a "real world" perspective, including the political and ethical issues related to evaluation. The course will provide a strong theoretical and practical foundation to evaluation common to family, health, and social development programs. Students will choose a particular field on which to develop an actual evaluation plan with an existing agency, and will produce an evaluation report related to a particular program in their field of interest.

FMLY 7600 Parent-Child Relationships

(Formerly 062.760) Advanced study of the nature of parenting and its influence on developmental health. Focus is on theory and research concerned with parenting and parent-child relationships, changes across time, the influence of the context in which parenting occurs, and the effect of the parent-child relationship on developmental health.

FMLY 7610 Aging and Families

(Formerly 062.761) An examination of contemporary issues confronting families with aging family members. Emphasis is on a review of selected empirical studies in specific topic areas. Relevant theoretical perspectives are reviewed and related to the empirical studies.

FMLY 7620 Children and Violence

(Formerly 062.762) An examination of children's experiences of violence at the levels of families, communities and societies. Relevant theoretical and measurement issues are addressed, as well as the developmental outcomes of various forms of violence. The incidence and prevalence of violence in children's lives is examined. Models of prevention, intervention and policy are explored.

FMLY 7700 Independent Study

(Formerly 062.770) Opportunity to pursue a topic independently. Student works with an individual professor on a topic of mutual choice. May include written, oral and field work. See Family Social Sciences Graduate Handbook for regulations.

FMLY 7710 Special Topics in Family Social Sciences

(Formerly 062.771) Opportunity to investigate an area of family social sciences not usually covered in the curriculum. May be repeated by a student if the topic changes.

FMLY 7800 Family Violence

(Formerly 062.780) Advanced study of current topics in family violence over the life course. Topics may include child abuse, sibling abuse, parent abuse, courtship violence, partner violence, and elder abuse. Emphasis is on understanding and critiquing current theory and research.

FMLY 7810 Conflict and Mediation in Families

(Formerly 062.781) Examination of conflict origin and manifestation in family relationships throughout the lifespan. Includes a review of spouse/partner, parent-child and sibling interaction patterns and current family mediation models.

FMLY 7920 Globalization, Families and Communities

This course examines the effects of globalization on families and communities from an interdisciplinary perspective. It has been implicated as one cause of inequality, indebtedness, marginalization, unemployment and homelessness. This course examines how responses to the challenges and opportunities of globalization affect the well-being of families and communities.

FMLY 7930 Social Development in Theory and Practice

This advanced seminar examines the concepts and practices of social development in the real world. Specifically, it examines the interplay between theory and practice and the epistemological underpinnings of social development research, programs, and policies as applied to families and communities. Case studies are assessed and critiqued.

Fine Arts

Fine Arts ,
Fine Arts Program Info,

The School of Art, established in 1913, is Western Canada's oldest art institution. Originally known as the Winnipeg School of Art, it has occupied a key role in the development of Canadian artists during the twentieth century. In 1950 it affiliated with the University of Manitoba and since has been known simply as the School of Art.

Its location in the city of Winnipeg, at the geographical centre of Canada, provides a culturally diverse environment that encourages an outward looking engagement with the global community. The School emphasizes traditional grounding in skills-based visualization and art historical knowledge connected to contemporary research in creative practices in art, design and scholarly activities. Undergraduate programs include Bachelor of Fine Arts, Bachelor of Fine Arts Honours, Bachelor of Fine Arts, Art History, Bachelor of Fine Arts Honours, Art History, and Diploma of Art.

The School of Art graduates energetic artists, scholars and designers who travel beyond the region to establish successful careers and make significant contributions to local, national and international cultural communities. The

School of Art is committed to advancing excellence in creativity, research, critical thinking and knowledge in the service of the Winnipeg community and, through its alumni, the local and national contexts and the global cultural community.

Fields of Creative Work and Research

The School of Art offers a newly established Master of Fine Arts (M.F.A.) in studio practice, a two-year, fulltime program. The M.F.A. program provides facilities, instruction and time for concentrated work in diverse studio practices. Within traditional and emergent materials, modes of technology and expression, our studio culture promotes and supports individual research and imagination. Additionally, students may find opportunities to collaborate with researchers in other faculties at the University.

Research Facilities

The studios and lab spaces at the School of Art are equipped with specialized equipment for the various disciplines of the school. Our new principal facility, ART Lab, slated for occupation in the 2011-12 school year, also offers students and faculty access to digital technologies and upgraded space for collaboration, experimentation and research, including animation and advanced computer-aided expression. Additional studios located at the Art Barn and the Ceramics/Sculpture building augment those in ART Lab.

The School of Art funds and houses Gallery One One One, a professional exhibition space which presents work of historical and contemporary importance at a national level. Gallery One One One houses the School of Art Permanent Collection and the FitzGerald Study Collection.

Master of Fine Art Program,

Admission:

Admission requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar.

Persons with a minimum of a Bachelor of Fine Arts Honours degree (or equivalent) or a Bachelor of Arts Honours with studio major from a recognized university, with a minimum G.P.A. of 3.0 out of 4.0 in the last 60 credit hours of study may apply for admission to the M.F.A. program. Graduates of the University of Manitoba Bachelor of Fine Arts Honours program are encouraged to have at least three years of post-degree professional studio experience. Admission decisions are based on the qualifications of the applicant as well as the ability of the School of Art and The University of Manitoba to serve the applicant's intended program of study and area of specialization.

Application Deadlines:

Applications should be sent to the Faculty of Graduate Studies. Applications for admission are considered for a September program start.

The deadline by which all required materials must be submitted is January 15 for all applicants. The Graduate Admissions Sub-Committee will consider only those applications that are complete and properly documented by the deadline. Late applications may be considered from Canadian/US applicants if space permits. Due to the time required to obtain requisite visas and permits, this opportunity cannot be extended to international applicants.

In addition to the admission requirements of the Faculty of Graduate Studies, the following materials are required: an artist's portfolio, a curriculum vitae, a statement of purpose, three letters of recommendation and, if necessary, an interview.

Program Requirements

The program is to be completed in two years of full-time study and students must register for summer session as well as the fall and winter terms. Graduate students are required to complete 21 credit hours of required coursework and 6 credit hours of electives as well as the Master of Fine Arts Thesis/Studio Exhibition.

STDO 7010 Studio Concentration 1 Cr. Hrs. 3

STDO 7020 Studio Concentration 2 Cr. Hrs. 3

STDO 7030 Studio Concentration 3 Cr. Hrs. 3

STDO 7040 Studio Concentration 4 Cr. Hrs. 3

STDO 7110 Graduate Seminar 1 Cr. Hrs. 3

STDO 7120 Graduate Seminar 2 Cr. Hrs. 3

STDO 7130 Graduate Seminar 3 Cr. Hrs. 3

GRAD 7200 M.F.A. Thesis/Studio Exhibition

Elective Course offerings: 6 credit hours required

Approved graduate level elective courses can be taken in the School of Art, or with written permission, in another faculty at the University of Manitoba.

Page URL,
<http://crscalprod1.cc.umanitoba.ca/FineArts.catx>

Fine Arts Course Descriptions

STDO 7010 Studio Concentration 1

Advanced individual instruction and critique in the student's chosen studio area by faculty and visiting artists.

STDO 7020 Studio Concentration 2

A continuation of Studio Concentration 1. Advanced individual instruction and critique in the student's chosen studio area by faculty and visiting artists.

STDO 7030 Studio Concentration 3

A continuation of Studio Concentration 2. Advanced individual instruction and critique in the student's chosen studio area by faculty and visiting artists.

STDO 7040 Studio Concentration 4

A continuation of Studio Concentration 3. Advanced individual instruction in the student's chosen studio area, culminating in the thesis exhibition.

STDO 7110 Graduate Seminar 1

An investigation of contemporary art concepts in the context of the studio program of work.

STDO 7120 Graduate Seminar 2

A continuation of Graduate Seminar 1. An investigation of contemporary art concepts in the context of the studio program of work.

STDO 7130 Graduate Seminar 3

A continuation of Graduate Seminar 2. A further investigation of contemporary art

concepts in the context of the studio program of work.

STDO 7210 Themes in Contemporary Art Studio
Individual pursuit of studio investigations under a specific theme.

STDO 7230 Contemporary Art Theory
An examination of art theory from structuralism, post-structuralism, semiotic, sociological and psychoanalytic methods.

STDO 7300 Special Topics in Fine Art
Varying from offering to offering, this course will cover significant topics in Fine Art.

Fine Arts Course Descriptions-Graduate Studies

GRAD 7000 Master's Thesis

(Formerly 069.700) Should show in general, that the student has mastery of the field and is fully conversant with relevant literature. The process, schedule, format, and style must meet the requirements of the Faculty of Graduate Studies. After approval of the thesis by the thesis examining committee and the completion of any revisions required by that committee, two copies of the thesis must be submitted to the Graduate Studies general office. Thesis students must pass an oral examination on the subject of the thesis and matters relating thereto as prescribed by the department. This course is graded pass/fail.

GRAD 7010 Comprehensive Examination

(Formerly 069.701) Takes the form of an exercise in the practical application of knowledge and skills, involving the careful definition of a problem and a report on the results in a manner suitable for evaluation by an examining committee. The comprehensive examination is an independent work, for an architectural project selected to demonstrate professional knowledge and skills, culminating in a public presentation. A faculty member serves as an advisor. Consultation, advice, and criticism will be provided by other members of the Faculty and specialized professionals in the various technical and related fields. This course is graded pass/fail.

GRAD 7020 Master's Re-registration
(Formerly 069.702)

GRAD 7022 Master's Re-registration

MBA and MPA students who are not registering for any courses in Fall and/or Winter terms must register for GRAD 7022 in order to retain status.

GRAD 7030 Master's Practicum

(Formerly 069.703) Takes the form of an exercise in the practical application of knowledge and skills, involving the careful definition of a problem and a report on the results in a manner suitable for evaluation by an examining committee. This course is graded pass/fail.

GRAD 7050 M.Eng. Project and Report
(Formerly 069.705)

GRAD 7060 Diploma Re-registration
(Formerly 069.706)

GRAD 7090 Design Thesis

The Design Thesis is an independently driven creative work developed within a focused subject of inquiry and directed by architectural questions. It is carried out through intensive research, study, and design explorations that culminate in a thoroughly developed architectural proposition. It is to be fully recorded in a final document.

GRAD 7200 MFA Thesis/Studio Exhibition

The MFA Thesis is comprised of a written statement and visual thesis that must show that the student has developed an original contribution to knowledge in visual art. The process, schedule, format, and style must meet the requirements of the Faculty of Graduate Studies. Thesis students must pass an oral examination on the subject of the written statement and visual thesis. This course is graded pass/fail.

GRAD 7300 Ethics Tutorial (online) - Human Research Protection Program (CHRPP)
Applicable to all disciplines of research involving humans. Offers a review of the

principles of human research participant protection. Online tutorial with no pre- or co-requisites. Certificate available to print upon completion. Course graded pass/fail.

Food Science

Food Science ,
Food Science Program Info,

The Department of Food Science offers graduate degrees at the masters and doctorate levels. The general program in Food Science involves studies of the physical, chemical or biological characteristics of food during all phases of manufacturing and processing - starting with the raw materials and ending in consumer products. Uniquely positioned in the Faculty of Agricultural and Food Sciences, the Department of Food Science develops and evaluates value-added opportunities for agricultural food products. New product development and food process improvement are important national and international priorities and the Department will continue its commitment to the training of highly qualified personnel in these areas.

Students graduating with an M.Sc. or Ph.D. in Food Science are readily employable in industry, government or in academic positions. Most students have acquired jobs prior to completion of their graduate degree requirements. Recent graduates have gone on to key research positions in major corporations or taken administrative or management positions (e.g., quality assurance and product development technologists). Food is a universal necessity and the study of its various properties will continue to flourish.

Fields of Research

Expertise in the Department of Food Science is established in four major areas of study: cereal and pulse chemistry (including chemistry of proteins, carbohydrates and antioxidants), food processing, and food microbiology/safety. Chemistry projects investigate the functional roles played by major food constituents, how these properties translate into final food characteristics, quality and potential new uses. Key projects examine proteins in cereal and pulse fractions as well as carbohydrates and antioxidants in a variety of crops. Considerable emphasis is placed on the functional relationships among components in raw and processed foods, including the structure and organization of air cells ("bubbles"), hydration mechanisms, and distribution of soluble and insoluble fibres, among other properties. Many projects in the Department are multidisciplinary and interdepartmental, involving partners in the Richardson Centre for Functional Foods and Nutraceuticals, Departments of Physics & Astronomy, Animal Science, Human Nutritional Sciences, and Soil Science, to name only a few. Processes have also been developed to assist local producers and manufacturers of dairy, cereal, and pulse products as well as a number of emerging prairie products. Microbiological studies examine food safety issues (survival of bacterial pathogens like *Listeria*, *E.coli* 0157:H7, *Salmonella*) as well as food preservation technology to inhibit spoilage organisms in fresh and cured meat products.

Research Facilities

The Food Science Department houses up-to-date laboratory facilities for chemical, textural and microbiological analyses of raw foods (agricultural materials) and/or food products (e.g., dairy, bakery, extruded or meat products). In addition, the Department has two pilot plants, one being used primarily for vegetable, fruit, cereal, pulse and meat studies, while the other is dedicated to dairy product development and research.

M.Sc. in Food Science,
Admission

In addition to the admission requirements of the Faculty of Graduate Studies (found in the Academic Guide section of this Calendar), entrance into the M.Sc. programs requires a bachelor's degree from a recognized food science department or the equivalent. Applicants with a four-year bachelor's degree from a non-food science department or the equivalent may be required to complete a pre-M.Sc. program in the Food Science Department (usually of one academic year) or take additional food science courses in the M.Sc. program in order to develop suitable knowledge in food science.

Graduate Studies

Admission Deadlines

The Department recommends that Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 3 months prior to their intended start date. International students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 7 months prior to their intended start date.

Program Requirements

There are two types of Master's programs in the Department of Food Science:

Thesis

Thesis projects may be of a basic research type or of an applied or practical nature relating to the chemistry, physics and/or microbiology of food raw materials, processes and/or products.

The thesis program requires a minimum of 12 credit hours of coursework, this to include at least 6 credit hours in Food Science 7000 level courses, an additional 3 credit hours at the 7000 level, and at least three credit hours in ancillary courses at the 7000, 6000, 4000 or 3000 levels. The thesis research topic shall be assigned within an area of interest to the student and pertinent to departmental research objectives. All M.Sc. students are required to take FOOD 7130 Food Science Seminar.

Non-thesis

Additional coursework plus practical work terms and a comprehensive examination are substituted for a research project and written thesis.

The non-thesis program requires a minimum of 30 credit hours of coursework. Of this total, a minimum of 15 credit hours must be at the 7000 level in Food Science with the remaining courses to be approved by the student's advisory committee.

Second language reading requirement: none
Expected time to graduation: two years

Ph.D. in Food Science ,
Admission

In addition to the admission requirements of the Faculty of Graduate Studies (found in the Graduate Studies Regulations Section of this Calendar), the student must normally hold a research-based Master of Science degree in the general areas of food or nutritional sciences from a recognized university. The student must attain a minimum University of Manitoba equivalent GPA of 3.5 in Masters' coursework. Students with a Master of Science in a different scientific discipline will be considered by the Food Science Graduate Studies Committee on a case by case basis. Students with an honours degree from the University of Manitoba or equivalent may be accepted directly into the PhD program.

Admission Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Department at least 4 months prior to their intended start date. International students should submit their application and supporting documentation to the Department at least 7 months prior to their intended start date.

Program Requirements

All students are required to take 12 credit hours of courses at the 7000 level. Of these 12 credit hours, 6 credit hours are expected to be selected from the 7000 level courses offered by the Department of Food Science.

Second language reading requirement: none
Expected time to graduation: 3.5 years

Page URL,

<http://crscalprod1.cc.umanitoba.ca/FoodScience.catx>

Food Science Course Descriptions

FOOD 7090 Unit Process Operations

(Formerly 078.709) A study of unit operations which are commonly utilized in the food industry with emphasis on separation processes, particle size reduction and heat transfers. Prerequisite or co-requisite: BIOE 3530 (or 034.353 or 034.329) or equivalent. Offered in 2005-2006 and alternate years.

FOOD 7130 Food Science Seminar

(Formerly 078.713) Verbal and written presentation of selected topics in Food Science. This is a required course for all M.Sc. candidates in the Food Science Department.

FOOD 7150 Food Proteins

(Formerly 078.715) An examination of the structural and functional properties of proteins in foods. Laboratory sessions will emphasize experimental approaches to study proteins in foods, including topics such as surface characterization, thermal properties, rheological behaviour, and chemical modification. Offered in 2005-2006 and alternate years.

FOOD 7160 Food Carbohydrates

(Formerly 078.716) A study of the physico-chemical properties and functionality of food carbohydrates. Laboratory sessions will focus on quantitation, structural characterization, thermal properties and rheological behaviour of carbohydrates. Offered in 2006-2007 and alternate years.

FOOD 7180 Food Science of Cereal Grains

(Formerly 078.718) The course deals with cereal grains used for human food, the structure of constituents, and the relationship of constituent structure to functionality in the processing of the grains into food products. Emphasis will be on constituents and properties that contribute to optimum processing of wheat. Prerequisites: CHEM 2360 (or 002.236) or CHEM 2770 (or 002.277) or MBIO 2360 (or 060.236) or MBIO 2770 (or 060.277), or permission of instructor. Offered in 2006-2007 and alternate years.

FOOD 7200 Advanced Food Microbiology

(Formerly 078.720) Detection and quantitation of foodborne microorganisms and related toxins using developing methodology, including rapid microbiological assays with a comprehensive account of basic principles and advanced techniques. Prerequisites: MBIO 2100 (or 060.210), FOOD 4150 (or 078.415) or consent of instructor. Offered in 2006-2007 and alternate years.

FOOD 7240 Topics in Food Science

(Formerly 078.724) An in-depth study of selected topics of current relevance in Food Science. Available to students in the M.Sc. programs and in the Interdepartmental Ph.D. in Food and Nutritional Sciences. Prerequisite: written consent of Department Head.

FOOD 7260 Advanced Meat Science

(Formerly 078.726) Builds on fundamental aspects of muscle biochemistry and function to explain how pre- and post-harvest technology affect meat quality and safety. Issues of current concern, their resolution as well as recent advances will be discussed. Prerequisite: Consent of instructor. Offered in 2005-2006 and alternate years thereafter.

FOOD 7270 Food Rheology

(Formerly 078.727) Evaluation of the textural properties of foods provides critical information in the development of quality food products. This course deals with the principles and methodologies in food rheology and includes an examination of the rheological properties of selected food systems.

French, Spanish and Italian

French, Spanish and Italian ,
French, Spanish and Italian Program Info,

For over 50 years the Department of French, Spanish and Italian has offered M.A. and Ph.D. programs in French. Graduates have become department heads and professors in Canadian and American universities. They have also become entrepreneurs, administrators, teachers, and translators. Their success in post-graduate endeavours is a testimony to the quality of the programs.

Fields of Research

Research interests of faculty members include Canadian francophone literature, French literature (17th -21st centuries), critical and feminist theory, French and Québécois cinema, computer assisted research and second-language acquisition.

Research Facilities

The University of Manitoba subscribes to the ARTFL database (Project for American and French Research on the Treasury of the French Language, University of Chicago). The Faculty of Arts boasts a multi-media language laboratory, one of the most modern in the country.

Research

The department also regularly organizes information and/or skill development sessions with the Electronic Media Department, and the Elizabeth Dafoe Library.

M.A. in French,

Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Students with other degrees or backgrounds may be eligible for admission to a pre-Master's program to the satisfaction of the department. Contact Department for further information.

Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 4 months prior to their intended start date (normally by May 1 for a start date of September 1). International students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 7 months prior to their intended start date (normally by February 1 for a start date of September 1).

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Students are required to complete 12 credit hours of coursework at the 700/ 7000 level and a thesis. Part of the required coursework includes three credit hours of literary theory.

Second language reading requirement: No

Expected time to graduation: One to two years

Ph.D. in French,

Admission

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, applicants to the Ph.D. program must normally hold an M.A. degree in French with a GPA of at least 3.5 in their M.A. courses.

Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Department at least 4 months prior to their intended start date (normally by May 1 for a start date of September 1). International students should submit their application and supporting documentation to the Department at least 7 months prior to their intended start date (normally by February 1 for a start date of September 1).

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Candidates must complete 12 credit hours of coursework at the 700/7000 level, including a compulsory component of three credit hours of literary theory.

Candidacy examinations consist of two research papers in two distinct areas related to the thesis topic, followed by an oral examination. These examinations will normally be completed in the second year of study.

Second language requirement: No

Expected time to graduation: Four Years

French, Spanish and Italian Course Descriptions-6000 Level

FREN 6000 French Reading Knowledge
(Formerly 044.600) For graduate students in other departments which require a reading knowledge of French. This course is graded pass/fail.

FREN 6010 Spanish Reading Test
(Formerly 044.601) No description available.

FREN 6030 Italian Reading Test
(Formerly 044.603) No description available.

French, Spanish and Italian Course Descriptions-7000 Level

FREN 7520 Topics in Literary Periods 1
(Formerly 044.752) Topics in Literary Periods 1. As the course content will vary from year to year, students may take this course more than once for credit.

FREN 7540 Topics in Literary Genres 1
(Formerly 044.754) Topics in Literary Genres 1. As the course content will vary from year to year, students may take this course more than once for credit.

FREN 7560 Topics in Critical Theory and Practice 1
(Formerly 044.756) Topics in Critical Theory and Practice 1. As the course content will vary from year to year, students may take this course more than once for credit.

FREN 7580 Special Topics 1
(Formerly 044.758) Special Topics 1. As the course content will vary from year to year, students may take this course more than once for credit.

FREN 7590 Special Topics 2
(Formerly 044.759) Special Topics 2. As the course content will vary from year to year, students may take this course more than once for credit.

FREN 7660 Études sur Diderot
(Formerly 044.766) Ce cours comprendra une étude d'aspects choisis de l'oeuvre et de la pensée de Diderot.

FREN 7740 Études sur Beauvoir
(Formerly 044.774) Une sélection d'oeuvres de Simone de Beauvoir étudiées selon la perspective de la critique féministe contemporaine.

FREN 7760 La Critique littéraire féministe
(Formerly 044.776) Une sélection de textes littéraires et théoriques analysés selon la perspective de la critique féministe contemporaine.

FREN 7770 Tendances nouvelles du roman
(Formerly 044.777) Une étude de romans publiés depuis vingt ans selon la perspective de la critique contemporaine.

FREN 7780 Révolution et roman québécois
(Formerly 044.778) La Révolution tranquille a transformé la société québécoise. Cette transformation fut en grande partie disséminée par des romanciers comme Hubert Aquin et Jacques Godbout, et par des précurseurs, comme Albert Memmi et Gaston Miron, qui ont jeté les bases d'une psychologie et d'une esthétique de la révolution.

FREN 7820 Le Roman de l'après-guerre en France
(Formerly 044.782) Période de l'essor, et de la mort de l'existentialisme, et des expériences formalistes communément désignées collectivement par l'étiquette "nouveau roman", les années après 1945 sont particulièrement importantes pour la compréhension des formes contemporaines du genre romanesque. Ce cours examinera au moins un auteur de chaque tendance.

Geological Sciences

Geological Sciences ,
Geological Sciences Program Info,
With the expertise of faculty members and technical staff and instrumental facilities capable of producing seminal research on the physical, chemical and biological characteristics of Earth materials, the Department of Geological Sciences is contributing to the understanding of Earth history, current and past Earth processes, and environmental change. Our research is proving to have important applications in resource extraction and mineral processing and in addressing environmental issues.

Research programs have a significant component of international collaboration and a substantial partnership with industry. To support these research efforts, the department maintains well-equipped state-of-the-art analytical facilities and has ready access to other regional and national facilities outside the department.

The department offers a wide variety of research programs leading to degrees of Master of Science (M.Sc.) and Doctor of Philosophy (Ph.D.). Support for research projects is typically received from NSERC, the Geological Survey of Canada, the Province of Manitoba, the University of Manitoba, and a wide variety of industry sources such as energy resources exploration and production companies, and mining companies.

Fields of Research

Research areas are broadly defined as: Mineralogy and Crystallography; Environmental Mineralogy and Geochemistry; Sedimentary and Quaternary Studies; Invertebrate Paleontology; Crustal and Mantle Geophysics; Applied/Environmental Geophysics; Petrology and Tectonics; Mineral Deposits.

Research Facilities

The department is equipped for a wide variety of field and lab-based research projects. For detailed information on the scope of the department's research facilities and activities, see the Geological Sciences Graduate Brochure, available as a link from <http://www.umanitoba.ca/geoscience/program/gradstudies/gradstudies.html>

The following is a summary listing of research labs. Access to these facilities is coordinated through the student's thesis advisor:

- X-Ray Diffraction Laboratories
- Spectroscopy Laboratories
- Geochemistry Laboratory
- Stable Isotope Mass Spectrometry Facilities
- Microbeam and Image Analysis Laboratory

- Sedimentological, Petroleum Geology, and Quaternary Studies Laboratories
- Invertebrate Paleontology Laboratory
- Geophysical Laboratories

Other Equipment and Facilities

- R.B. Ferguson Museum of Mineralogy
- Ed Leith Cretaceous Menagerie

M.Sc. in Geological Sciences,

Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. An Honours B.Sc. degree in geological sciences (or equivalent) is the normal prerequisite for entering a program leading to the graduate degrees. Students with backgrounds in chemistry, physics, mathematics, engineering physics, or electrical engineering may also be eligible and should contact a prospective supervisor and the department for a more detailed assessment.

Application Deadlines

The Department of Geological Sciences allows students to begin the program on September 1, January 1, or May 1. Canadian/U.S. students should send their applications with complete supporting documentation to the Faculty of Graduate Studies no less than three (3) months before the intended start date. International students should send their applications with complete supporting documentation to the Faculty of Graduate Studies no less than seven (7) months before the intended start date.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. GEOL 7760 plus a minimum of 12 credit hours must be selected to fulfil the course requirements of the M.Sc. thesis in Geological Sciences.

The M.Sc. (Comprehensive) requires GEOL 7760 plus a minimum of 24 credit hours to fulfil the course requirements, plus a comprehensive examination.

Reports (proposals, results and timetable of thesis work) in writing must be submitted to the Head on or before February 1 annually.

Second language reading requirement: none

Expected time to graduate: two years

Ph.D. in Geological Sciences,

Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

Geological Sciences Course Descriptions

GEOL 7230 Geophysics of the Earth's Crust and Mantle Processes in crust-mantle evolution and geophysical methods used to study this region of the earth. Prerequisites: (GEOL 4320 (007.432)), and (GEOL 4330 (007.433)).

GEOL 7260 Geophysical Information The application of the Fourier approach in geophysics and information theory to geophysical interpretation. Prerequisites: (GEOL 4320 (007.432)), and (GEOL 4330 (007.433)), and (third-year standing in Mathematics).

GEOL 7310 Quaternary Geology Seminars and lectures on sedimentary aspects of the Quaternary Epoch with emphasis on glaciation. The glacial and interglacial stratigraphic record on the continents and in the ocean basins. Three-day field trip in mid-September. Prerequisites: (GEOL 3490 (007.349)), and (GEOL 3900 (007.390)).

GEOL 7350 Remote Sensing in the Earth and Planetary Sciences Selected topics in remote sensing with emphasis on geophysical and geologic problems. Prerequisite: B.Sc. (Honours Geology, Geophysics, or Geological Engineering), or permission of instructor for graduates of other disciplines.

GEOL 7440 Principles of Paleoclimatic Reconstruction An interdisciplinary course which examines the sedimentological, biological, and human response to climatic change; the history of Quaternary climate and its stratigraphic expression. Prerequisite: Permission of instructor.

GEOL 7470 Advanced Petroleum Geology and Geochemistry Lectures and seminars examining the four major components of petroleum geology: source and migration, reservoir, trap, and economics. Major emphasis on the origin and generation of petroleum and source rock geology. Field trip and core logging required.

GEOL 7480 Advanced Seismology 1 Theory of wave propagation; source mechanisms; other selected topics. Prerequisite: GEOL 7260.

GEOL 7490 Advanced Seismology 2 Seismic surface waves and normal modes of Earth, Earth tides and dynamic evolution. Prerequisite: GEOL 7480 or equivalent.

GEOL 7520 Advanced X-Ray Crystallography Seminar and laboratory course covering symmetry theory, point groups and space groups, x-ray diffraction theory, the powder method, single-crystal precession photography, derivation of unit cell dimensions and space group. Prerequisite: GEOL 4280 (007.428).

GEOL 7530 Structural Crystallography

Seminar and laboratory course covering course data collection and reduction methods, crystal structure solution by Patterson and Fournier synthesis, and by direct methods, crystal structure refinement, analysis of errors, and crystal-chemical topics of interest to the participants. Prerequisite: GEOL 7520.

GEOL 7540 Isotope Geology and Geochronology

The principles and methods of isotopic age determination and the measurement of geological rate processes using certain radioactive nuclides and the variations of the isotopic compositions of their daughter products. The evolution of the earth's mantle, continental and oceanic crust. The application of light, stable isotope fractionation to understanding geological processes.

GEOL 7550 Hydrothermal Petrochemistry

The chemistry, mineralogy, and petrology of mineral deposits and alteration zones of the hydrothermal type, and their association with igneous and tectonic events. Theory and experimental data on metasomatic processes.

GEOL 7570 Advanced Mineralogy 1

Detailed seminar study of important rock-forming and ore minerals based on current research publications, covering crystal structure and chemistry, origin and paragenesis. Lab introduction to principal chemical and physical methods of analyzing minerals.

GEOL 7580 Advanced Mineralogy 2

Detailed seminar study of selected minerals related to students' interests based on current research publications, covering crystal structure and chemistry, origin and paragenesis. Lab assignments to examine diverse properties of the discussed species.

GEOL 7590 Advanced Paleontology 1

Topics in paleobiology of the invertebrates, and principles of paleontology. Upon request, course may be adapted to individual requirements of students in other disciplines (for example, specific groups of invertebrates, paleoecology, trace fossils, etc.). Prerequisites: (GEOL 3310 (007.331)), and (GEOL 4310 (007.431)), or permission of instructor.

GEOL 7600 Advanced Paleontology 2

Topics in paleobiology of the invertebrates, and principles of paleontology. Upon request, course may be adapted to individual requirements of students in other disciplines (for example, specific groups of invertebrates, paleoecology, trace fossils, etc.). Prerequisite: GEOL 3310 (007.331), or GEOL 4310 (007.431), or permission of instructor.

GEOL 7610 Advanced Igneous Petrology

The origin of magmas, and their association with tectonic regimes, and earth structure. Crystallization and differentiation of magmas, and the distribution of elements and isotopes.

GEOL 7620 Advanced Metamorphic Petrology

Natural mineral assemblages and their association with igneous and tectonic events. Theory of variable physchem regimes, heterogeneous equilibrium, and reaction processes.

GEOL 7630 Ductile Strain in Geologic Minerals

The theory, mechanics and interpretation of naturally occurring ductile strain in consolidated and semi-consolidated rocks. Applications of analysis to engineering geology and structural geology.

GEOL 7640 Folding of Rocks

Ideal fold theory and mechanisms; experimental folding; fold geometry and styles; fold families; interference folding; interpretation of areas that have undergone folding.

GEOL 7650 Fracturing of Rocks

Experiments on, theory and properties of, fractures ranging in scale from micro-rocks to large scale fault zones; mechanisms of fracturing; interpretation of stress conditions leading to fracturing.

GEOL 7680 Physical Volcanology

Forms and environments of lava extrusion and flow; mechanics of pyroclastic eruptions and transport; nature of pyroclastic deposits; magma chambers; volcano development and destruction.

GEOL 7690 Precambrian Geology

Examination of the major lithologic components of the Precambrian Shields of Canada, Australia, and South Africa. Emphasis will be on the origin of these components, discussion of early crustal development, and similarities and differences of Precambrian and younger processes.

GEOL 7700 Advanced Clastic Sedimentology

Lectures and seminars on clastic depositional environments. Critical evaluation of accepted facies models followed in each case by examination of the ancient record. One week field trip and core logging required. Prerequisite: GEOL 3900 (007.390), or permission of instructor.

GEOL 7720 Geophysical Imaging and Data Processing

Advanced frequency filter design; deconvolution methods for seismogram; velocity and wavefield stacking; various digital methods for potential field data; principles of tomography and geophysical imaging techniques. Prerequisites: (GEOL 3740 (007.374)), and GEOL 7260, or permission of instructor.

GEOL 7740 Workshop in the Geological Sciences 1

Critical, in-depth group study of problems and new concepts in the geological sciences; discussion of current research by staff and visiting scientists; students will pursue individual research interests and will work with staff on specific topics.

GEOL 7750 Workshop in the Geological Sciences 2

Critical, in-depth group study of problems and new concepts in the geological sciences; discussion of current research by staff and visiting scientists; students will pursue individual research interests and will work with staff on specific topics.

GEOL 7760 Seminar in Geological Sciences

A discussion of topics of current interest from the whole spectrum of geological sciences to inform students on research work outside their specialty. Required of all graduate students. For ancillary credit only. Geological Sciences Colloquium. Weekly discussion of topics of current interest. Presentation of recent research from geological literature, the department, and visitors. Required of all graduate students who have received credit for GEOL 7760.

GEOL 7770 Distribution of Ores: Metallogeny

Distribution of geological metal accumulations in space and time. Brief introduction to existing organizational frameworks, followed by a systematic review of metalliferous environments and associations. Prerequisite: GEOL 4300 (007.430), or permission of instructor.

GEOL 7780 Advanced Carbonate Sedimentology

Lectures and seminars on selected topics of carbonate sedimentology, including depositional environments, lithofacies sequences and diagenesis. Prerequisite: GEOL 3900 (007.390), or permission of instructor.

GEOL 7790 Advanced Instrumental Techniques in Geology

Lectures and laboratory course covering the application of microbeam, mass spectrometer, diffraction and wet geochemical analytical techniques in mineralogy and geochemistry. Includes coverage of ICP, PIXE, powder and single crystal diffraction and electron microprobe analysis.

GEOL 7800 Evaporite Sedimentology

Lectures and seminars on evaporite sedimentology, including depositional environments, diagenesis and stratigraphy of evaporitic sequences. One week field trip immediately before or during fall term required.

GEOL 7810 Electromagnetic Methods in Geophysics

Examination of the theory and application of electromagnetic methods in geophysics. Topics include: electrical properties of earth materials, review of EM methods, EM theory for layered media, EM responses of simple structures and case studies.

GEOL 7820 Environmental Geophysics

Examination of the application of geophysics to environmental targets. Topics will vary according to student interest and may include aspects of new-surface geophysics, engineering geophysics, geophysics of global climate change and geophysical risk assessment.

German and Slavic Studies

German and Slavic Studies ,
German and Slavic Studies Program Info,
The department offers programs of study leading to the Master of Arts degree in the fields of German Language and Literature and Slavic Languages and Literatures. Programs must be arranged in consultation with the Graduate Chair of the department.

Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulation Section of this Calendar. Students with other degrees or backgrounds may be eligible for admission to a pre-Master's program to the satisfaction of the department. Please contact the department for further information.

Pre-Master's Year

Students without a four-year degree or without an undergraduate major in the discipline to be studied must complete a pre-Master's year as approved by the chair of the appropriate graduate studies committee or his/her delegate before they can enter the Master's program. This year is intended to bring the student's standing to approximately the level of a four-year degree with a major in the appropriate discipline. It will normally consist of 24 credit hours of coursework, of which at least 12 are in the major discipline. At most, one grade of "C+" in a course of six credit hours, or two grades of "C+" in courses of three credit hours, will be permitted.

Master of Arts

Students fulfil the requirements for the Master's degree by doing a combination of coursework and thesis. A minimum of 15 credit hours of course-work is required, including GRMN 7200 / SLAV 7200, GRMN 7210 / SLAV 7210, and 3 other credit hours at the 7000 level in the student's major discipline. The remaining 6 credit hours, designated as ancillary credit, may be taken at the 7000, 4000, 3000 (or in exceptional circumstances the 2000) level and may be in courses in the student's major discipline, or in another program or department, at the discretion of the chair of the Graduate Studies Committee. A thesis prospectus must be submitted to the candidate's M.A. advisor a minimum of two months before the thesis is submitted to the M.A. Committee.

Students for the M.A. in German who received credit for the course GRMN 4200 have already fulfilled the requirement for GRMN 7200; they replace GRMN 7200 with 3 other credit hours on the 7000 level. Students for the M.A. in German who received credit for the course GRMN 4210 have already fulfilled the requirement for GRMN 7210; they replace GRMN 7210 with 3 other credit hours on the 7000 level.

Expected time to graduation: Two Years; all requirements for the Degree of M.A. must be fulfilled within five years of the original date of entry into the program. Time extensions for completion of the program may be permitted on an individual basis.

Application Deadlines

The Department of German and Slavic Studies allows students to begin their program on either 1 September or 1 January. For admission for each of these start dates, Canadian/U.S. students should send their applications with complete supporting documentation to Faculty of Graduate Studies no less than four (4) months prior to their intended start date. International students should send their applications with complete supporting documentation to arrive no later than seven (7) months prior to their intended start date.

Page URL,
<http://crscalprod1.cc.umanitoba.ca/GermanandSlavicStudies.catx>

German and Slavic Studies Course Descriptions-6000 Level

GRMN 6000 Reading Language Test
(Formerly 008.600)

German and Slavic Studies Course Descriptions-7000 Level

GRMN 7200 Literary and Cultural Theory
A survey of the major theoretical approaches to German and Slavic literature and cultures. Discusses the aesthetics of Enlightenment and Idealism, Nietzsche, Freud, Russian Formalism, Prague Structuralism, hermeneutics, semiotics, dialogism (Bakhtin), the Frankfurt School, collective memory, gender studies, post-colonialism, and multi-culturalism.

GRMN 7210 Introduction to Second Language Acquisition and Methods of Language Teaching
This course provides a general introduction to theories and approaches in second language acquisition (SLA) and methods of language teaching specifically designed for MA students of German and Slavic languages.

GRMN 7240 Colloquium in German Studies 1
A detailed study of theoretical and methodological questions in German literature and culture. Course contents will vary from year to year depending on the needs and interests of students and staff.

GRMN 7242 Colloquium in German Studies 2
A detailed study of German stylistics, German as a Second Language, or the structure of the German language. Course contents will vary from year to year depending on the needs and interests of students and staff.

GRMN 7300 Special Topics in German Literature and Culture 1750-1945 1
Topics dealing with German literature and culture focusing on an author, a systematic topic or period between 1750 and 1945. Contents will vary from year to year depending on the needs of students and staff. As the course content will vary from year to year, students may take this course more than once for credit.

GRMN 7330 Seminar in Contemporary German Literature and Culture
Topics dealing with German literature and culture in the second half of the 20th and in the 21st century. Contents will vary from year to year depending on the needs of students and staff.

GRMN 7340 Seminar in German Film and Media Studies
Studies a variety of German media theories and sources, including newspaper, television and film in the 20th and in the 21st centuries.

GRMN 7350 Seminar in German and European Literature and Culture
Topics dealing with German literature and culture within a European comparative context. Contents will vary from year to year depending on the needs of students and staff.

GRMN 7360 Independent Studies in German
Each student will work with an instructor to prepare a reading program in an appropriate area, depending on the needs of students and staff. The student will present written assignments as required. As the course content will vary from year to year, students may take this course more than once for credit.

German and Slavic Studies Course Descriptions-Slavic Studies

SLAV 7200 Literary and Cultural Theory
A survey of major theoretical approaches to German and Slavic literatures and cultures. Discusses the aesthetics of Enlightenment and Idealism, Nietzsche, Freud, Russian Formalism, Prague Structuralism, hermeneutics, semiotics, dialogism (Bakhtin), the Frankfurt School, collective memory, gender studies, post-colonialism, and multi-culturalism.

SLAV 7210 Introduction to Second Language Acquisition and Methods of Language Teaching
This course provides a general introduction to theories and approaches in second language acquisition (SLA) and methods of language teaching specifically designed

for MA students of German and Slavic languages.

SLAV 7400 Selected Topics in Slavic Literatures

Seminar discussions of various problems in Slavic literatures as related to the students' field of research. As the course content will vary from year to year, students may take this course more than once for credit.

SLAV 7410 Seminar in Contemporary Slavic Literatures

Selected problems in contemporary Slavic literatures as related to the students' field of research.

SLAV 7420 Studies in Modernism

A study of the representative works of modernism in Slavic countries with a focus on the years 1890-1930. The styles and movements that characterized the period will be examined. References will be made to the art of the period.

SLAV 7430 Special Topics in Slavic Studies

An independent study course in Slavic literatures, cultures, or folklore. Topics will be selected to meet students' research or study interests. As the course content will vary from year to year, students may take this course more than once for credit.

History

History ,
History Program Info,

The department offers programs leading to both the Master of Arts and Doctor of Philosophy Degrees. The MA program (referred to as the Joint Master's Program or JMP) is a joint degree program offered by the History departments of the University of Manitoba and the University of Winnipeg. Students have available the educational and financial resources of both institutions.

Fields of Research

Research interests of faculty are reflected in the fields offered for graduate study in the department. These include: The Americas, Britain including the Commonwealth and Empire, Canada, Medieval Europe, Modern Europe, Asia, Africa, as well as in Social History, Modern World, History of Science and Archival Studies.

Research Facilities

There are excellent archival and library facilities in Winnipeg. The most important research libraries are located at The University of Manitoba and the Manitoba Legislative Library, both of which are official repositories for Canadian publications and which support original research in most areas of Canadian history. The Hudson Bay Company Archives is a world-renowned institution for the study of imperialism, first nations and western and northern North America. Other major archival facilities include: The Provincial Archives of Manitoba, The University of Manitoba Archives and Special Collections, The Manitoba Office of the National Archives, United Church Archives, Western Canada Pictorial Index, the Centre du Patrimoine and the City of Winnipeg Archives.

M.A. in History ,
Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

Application Deadlines

The application deadline is January 15. Please refer to the History Department website for application requirements.

Program Requirements

Minimum Program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Students may choose among

Graduate Studies

three versions of the program: first, a course-based M.A.; second, a thesis-based M.A.; and third, an M.A. in Archival Studies. The course-based M.A. requires four courses, three of which should be 7000-level History courses. In addition, the student is required to select a major field, and must pass both a written and oral comprehensive examination in that field. The thesis-based M.A. requires two 7000-level courses and the presentation of a thesis. The Archival Studies M.A. requires three graduate courses, an Internship and a thesis.

Second Language Reading Requirement: All graduate students in History are required to demonstrate a reading knowledge of a second language. Candidates who specialize in Canadian History must display a reading knowledge of French and English. Texts for translations are chosen by the History department. Examinations are conducted by faculty in the language departments at the University of Manitoba.

Expected Time to Graduate: All requirements for the degree of M.A. in History must be fulfilled within five years of the original date of entry to the Program.

Ph.D. in History,
Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

Application Deadlines

The application deadline is January 15. Please refer to the History Department website for application requirements.

Program Requirements

The minimum course requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Doctoral candidates are required to complete at least three 7000-level courses, take candidacy exams in three fields of historical inquiry, and present an original dissertation which makes a distinct contribution to historical knowledge, based on primary sources.

Second Language Requirement: All graduate students in History are required to demonstrate a reading knowledge of a second language. Candidates who specialize in Canadian History must display a reading knowledge of French and English. Texts for translations are chosen by the History department. Examinations are conducted by faculty in the language departments at the University of Manitoba.

Expected time to graduation: All requirements for the degree of Ph.D. in History must be completed within seven years of the original date of entry to the program.

page URL,
<http://crscalprod1.cc.umanitoba.ca/History.catx>

History Course Descriptions

HIST 7190 Studies in American History since 1877
(Formerly 011.719) An examination of selected topics in American history from Reconstruction to the present. Particular topics will be announced each year. As the course content will vary from year to year, students may take this course more than once for credit.

HIST 7220 Selected Topics in British History
A detailed examination of selected topics and problems in British history. Topics and content will vary from year to year. As the course content will vary from year to year, students may take this course more than once for credit.

HIST 7230 Nineteenth-Century Britain
(Formerly 011.723) A study of British culture, politics, and diplomacy, 1830-1900.

HIST 7240 State and Society in Latin American History

Readings focused on state/society relations in the history of Latin America since colonial times. After considering different theoretical approaches, the course will analyze recent works that cover different historical periods, countries, issues, and social factors.

HIST 7270 Special Studies in Social History

(Formerly 011.727) A seminar course, the content of which will vary from year to year. As the course content will vary from year to year, students may take this course more than once for credit.

HIST 7290 Reading Seminar in Canadian History, 1860 to the Present

(Formerly 011.729) While the specific content may vary from year to year, the general approach shall be to ensure a broad sampling of the secondary literature in Canadian history. Political, social and economic themes will be emphasized and particular concern shall be taken with historiographical controversy. As the course content will vary from year to year, students may take this course more than once for credit.

HIST 7330 History of Western Canada

(Formerly 011.733) A research course in western Canadian history. The range of subjects will vary from year to year depending on the interests of the students. The subjects range from the fur trade to modern political, social, and economic issues.

HIST 7370 History of Recorded Communication

(Formerly 011.737) An examination of aspects of the history of recorded communication from antiquity to the present. The aim of the course is better understanding of the nature of archival records. Emphasis is placed on Canadian examples from the 19th and 20th centuries.

HIST 7380 Selected Problems in Archival Studies

(Formerly 011.738) An examination of selected problems in archival theory and administration. The aim of the course is better understanding of the administration of records in archival institutes. Archival theory and administration are studied in relation to the history of recorded communication and records keeping. Emphasis is placed on Canadian examples from the 19th and 20th centuries.

HIST 7390 Internship in Archival Studies

(Formerly 011.739) The internship provides an introductory work experience in a Canadian archives to students who have successfully completed the first year of archival studies. The internship will be no less than three months in duration. It is done in the summer after the first year of study.

HIST 7470 The Later Middle Ages

(Formerly 011.747) Selected topics in economics, social, cultural, art and religious history of the later medieval world. Students may not hold credit for both HIST 7470 (or 011.747) and the former 011.743.

HIST 7500 Jewish and European History and Historiography

This seminar examines issues relating to Jewish history and historiography in the context of European history and historiography.

HIST 7510 Early Modern European History

(Formerly 011.751) A seminar which studies early modern Europe from the perspective of new approaches to historiography.

HIST 7520 The Age of Enlightenment

(Formerly 011.752) Emphasis on 18th century French intellectual history and its relationship to the origins and course of the French Revolution. Some reading knowledge of French is almost essential.

HIST 7560 The Russian Revolution

(Formerly 011.756) The events constituting the Revolution proper (1917-21) will be studied in relation to their historical background and in the light of their subsequent impact both nationally and globally.

HIST 7600 Northern Historical Studies

(Formerly 011.760) This course is based upon a number of studies of various aspects of the North. Particular emphasis is given to the North in relation to the fur trade, exploration, and Canadian development.

HIST 7630 History of Health and Disease

An introduction to principal issues and approaches in the history of health and disease. It is not meant to be a strictly chronological survey. Topics and themes may include the development of nursing and medical professions; the transformation of the hospital; mental health; alternative therapies; colonization, infectious disease and aboriginal health; and health and the state.

HIST 7640 Social History of Health and Disease in Modern Canada

This course explores the history of health and health care in Canada, with a focus on the late 19th and 20th century. Topics will include colonization, infectious disease, and Aboriginal health; the evolution of medical and nursing professions and the modern hospital; mental health; cancer; alternative therapies; childbirth; and old age. Analytical categories of gender, race, ethnicity, class, and sexuality will run throughout the material.

HIST 7670 Studies in Canadian History, 1870-1919

(Formerly 011.767) This seminar will focus on social, intellectual, political, and economic themes, with particular emphasis on the western experience. Specific topics will vary from year to year depending upon the interests of students and instructors. As the course content will vary from year to year, students may take this course more than once for credit.

HIST 7700 Historical Method

(Formerly 011.770) A seminar and workshop in historical method. The topics covered will encompass conventional research, analysis and writing, as well as the application of social science techniques to the analysis of historical problems, the fundamentals of data processing, and computer applications.

HIST 7710 History and Cultural Studies

(Formerly 011.771) A working guide to interdisciplinary approaches of the new field of Cultural Studies, examining its principal theoretical bases and existing and potential applications for the historian.

HIST 7730 Modern Latin America

(Formerly 011.773) An examination of selected themes such as economic and social change, political modernization, and external influences and intervention in Latin America during the 19th and 20th centuries.

HIST 7740 England in the Long Eighteenth Century

(Formerly 011.774) Selected themes in the history of England's long eighteenth century from 1660-1840. Specific topics will vary from year to year but will generally include the transformation of political culture, the consequences of war, the question of national identities, the emergence of commercial society and the changes to social structure.

HIST 7750 Gender History in Canada

(Formerly 011.775) Explores the roles, images and experiences of masculinity and femininity in the past. Will familiarize students with the changing theoretical and historiographical terrain of gender history. It will draw on the international literature but focus on the history of gender in Canada, examining how historians analyse masculinity, femininity, the family, sexuality, politics, race/ethnicity, moral regulation, class, nation, and colonialism.

HIST 7760 History of Aboriginal Rights

(Formerly 011.776) A study of Aboriginal rights from early contact to the present with a particular emphasis on treaties, the courts, and Aboriginal efforts to enforce specific forms of rights.

HIST 7770 Selected Topics

(Formerly 011.777) A program of independent reading and/or research on selected topics, undertaken and arranged by a student in consultation with his prospective instructor, upon the approval of the Graduate Chair. As the course content will vary from year to year, students may take this course more than once for credit.

HIST 7772 Selected Topics

The content of this course varies. Courses offered under this number will be advanced graduate seminars investigating topics that are not part of an existing seminar course. As the course content will vary from year to year, students may take this course more than once for credit.

HIST 7774 Independent Study/Reading

The content of this course will vary. It will be an advanced, independent

reading/study course for graduate students, on a topic of particular interest to the student. Normally the topic will be one that the student cannot study in an existing seminar course. As the course content will vary from year to year, students may take this course more than once for credit.

HIST 7820 Issues in Modern Asian History: Selected Topics (Formerly 011.782) Content will vary. Emphasis will be on the analyses of important issues and recent developments in the history and historiography of modern Asia. Consult the History Department for particulars. As the course content will vary from year to year, students may take this course more than once for credit.

HIST 7910 Studies in Modern World History (Formerly 011.791) A seminar emphasizing the period since 1945. With the agreement of the instructor and depending on the needs of their degree programs, students may select a reading or research option.

HIST 7920 Popular Radicalism in the Modern World (Formerly 011.792) Selected topics in the history of popular movements of social and political protest in the modern world. The course considers problems such as the conditions and motivations that give rise to social movements, the development of radical theory and political practice, and the culture of dissent. Students may not hold credit for both HIST 7920 (or 011.792) and the former 011.726 .

HIST 7930 Imperialism, Decolonization and Neo-Colonialism 1700-Present
An exploration of theoretically informed literature that has attempted to engage with and understand Imperialism and Colonialism, Anti-colonial nationalism, National liberation movements and Neo-Colonialism. Prerequisite: permission of instructor.

Human Anatomy and Cell Science

Human Anatomy .

Human Anatomy Program Info,

The Department of Human Anatomy and Cell Science offers graduate training at both the M.Sc. and Ph.D. levels. The purpose is to prepare students for careers in biomedical research, for teaching in selective areas of anatomy and admission to clinical programs. It is the only department to offer basic and advanced courses in gross, microscopic and developmental anatomy. It also offers courses in neuroscience, cell biology, electron microscopy and cardiac lipids. These have now become particularly important tools in assessing outcomes associated with use of transgenic and gene knockout animals as models of human disease. Graduate students are also provided with opportunities to teach in various sub-disciplines of anatomy. In addition to transmitting knowledge, they must also generate new knowledge by undertaking meaningful research. The department also provides a fine milieu for cross-fertilization of ideas, and more personalized attention; benefits of a smaller department. The department offers a multidisciplinary program in biomedical applications of imaging and spectroscopy in conjunction with Institute for Biodiagnostics – National Research Council. Various members of the department are affiliated with the Faculty of Dentistry, School of Medical Rehabilitation, and St. Boniface General Hospital Research Centre. The department also provides continuing medical education to the allied health science community.

Fields of Research

The Department consists of a number of faculty, each of which are experts in one or more sub-disciplines of anatomy. Quality teaching programs are enriched by scholarly pursuits of department members who are engaged in research of the highest quality in the following areas: muscle repair, developmental anatomy and biology, cardiology, neuroendocrinology, cell and molecular biology and neuroscience. Graduate students are provided with the opportunity to use a variety of contemporary techniques such as autoradiography, light and electron microscopy, morphometrics, tissue culture and transplantation, high performance liquid chromatography, immunocytochemistry, in situ hybridization, radioimmunoassay, electrophoresis, transgenics, molecular biology, magnetic resonance imaging and spectroscopy.

Research Facilities

The department is spacious, has excellent facilities and is well equipped for research. The department houses an electron microscopy suite equipped with

scanning and electron microscopes, a communal tissue culture, histology, and autoradiography facility, and a satellite animal facility. Individual research laboratories are equipped with microscopes (fluorescence, transmitted light, dissecting), photomicrography apparatus, high performance liquid chromatography, and radioimmunoassay capabilities, polymerase chain reaction (PCR), DNA sequencing, genomic cloning and other molecular biology facilities. Personnel also have access to magnetic resonance imaging and MR spectroscopy facilities.

M.Sc. in Human Anatomy and Cell Science,

Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. The following categories of students may be accepted for graduate study in this department:

- 4-year undergraduate Science degree with a minimum GPA of 3.0.
- Students who have completed a 3-year general undergraduate degree may be admitted following completion of the required pre-Master's courses. Contact the Department for details.
- Graduates in medicine or dentistry holding M.D., D.M.D. (D.D.S.), or equivalent degrees.
- Other suitable graduates will be considered.

Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 3 months prior to their intended start date. International students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 7 months prior to their intended start date.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Students are required to take Methodology of Research (ANAT 7090) and one of Cell Biology (IMED 7090), Human Microscopic (Histology) Anatomy (ANAT 7360); Human Macroscopic (Gross) Anatomy (ANAT 7370); Neuroscience 1 (ANAT 7270) or Human Developmental (Embryology) Anatomy (ANAT 7380) plus an appropriate course in statistics (Biostatistics 1, CHSC 7470) or equivalent. Students must then complete a thesis.

For supplementary regulations and other information please contact the Department of Human Anatomy and Cell Science.

Second language reading requirement: none

Expected time to graduate: three years

Ph.D. in Human Anatomy and Cell Science,

Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Department at least 3 months prior to their intended start date. International students should submit their application and supporting documentation to the Department at least 7 months prior to their intended start date.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Students are required to take Readings in Anatomy (ANAT 7330) and one of Cell Biology (IMED 7090), Human Microscopic (Histology) Anatomy (ANAT 7360); Human Macroscopic (Gross) Anatomy (ANAT 7370); Neuroscience I (ANAT 7270) or Human Developmental (Embryology) Anatomy (ANAT 7380) not already completed at the Master's level. Before receiving the Ph.D. degree, students must have taken an appropriate statistics course (Biostatistics 1 CHSC 7470 or equivalent) if not already completed.

For supplementary regulations and other information please contact the Department of Human Anatomy and Cell Science.

Second language requirement: none

Expected time to graduation: five years

Page URL,
<http://crsclpord1.cc.umanitoba.ca/HumanAnatomyandCellScience.catx>

Human Anatomy and Cell Science Course Descriptions

ANAT 7060 Advanced Human Macroscopic (Gross) Anatomy (Formerly 080.706) Dissection, with special emphasis on regions relative to the research projects and interests of students concerned. Both terms. Prerequisite: ANAT 7370 or equivalent; consent of instructor.

ANAT 7090 Methodology of Research (Formerly 080.709) Theoretical and practical instruction in scientific investigation, research design, data analysis and presentation, and writing research proposals.

ANAT 7250 Experimental Teratology (Formerly 080.725) Basic principles of experimental teratology in lectures, seminars, and practical work. The causes, embryological basis, and mechanisms of developmental defects will be covered.

ANAT 7262 Human Neuroscience
A comprehensive neuroanatomical study of the human brain and spinal cord. The structure and function of the nervous system will be covered through lectures complemented by laboratory sessions with dissection of the brain and examination of models.

ANAT 7280 Neuroscience II (Formerly 080.728) Application of basic neurological sciences to the -general practice of medicine. Lectures, seminars, clinics. Prerequisite: ANAT 7270 (or 080.727).

ANAT 7320 Introduction to Scanning and Transmission Electron Microscopy (Formerly 080.732) Designed to provide general theoretical aspects of electron microscopy and practical knowledge of electron microscopic laboratory procedures. 3 hours lecture/lab per week, one term. Minimum enrollment: 5 students. Prerequisite: written consent of instructors.

ANAT 7330 Readings in Anatomy (Formerly 080.733) Regular tutorials on selected topics in Anatomy and research related to student's research work. The tutorials will be incorporated into the Department's seminar program.

ANAT 7350 Cardiac Lipids and Membrane Function (Formerly 080.735) Provides detailed account of the role of cardiac bioactive lipids on membrane properties and functions. Two hour tutorials per week, one term. Prerequisite: written consent of instructor.

ANAT 7360 Human Microscopic Anatomy (Histology) (Formerly 080.736) Microscopic structure correlated to function, of tissues and organs of the human body. Lecture and laboratory course.

ANAT 7380 Human Developmental Anatomy (Embryology) (Formerly 080.738) Human development as it is of practical application to medical subjects.

ANAT 7390 Structural Organization in Human Anatomy (Formerly 080.739) A course for students participating in physics, chemistry, computer science, engineering, architecture, and mathematics (non-biological areas). A conceptual approach to Human Anatomy, for direct application to information obtained with current and developing techniques for detection, diagnosis, treatment and management of human lifestyle and disease. Prerequisite: consent of instructor(s). Minimum enrollment: 3

ANAT 7392 Human Neuroanatomy (Laboratory required). The objective of this course is to provide an introduction to the structure and function of the nervous system from an anatomical perspective. It is intended primarily for graduate students registered in the Department of Human Anatomy and Cell Science. The course consists of a combination of lectures and laboratory sessions. The lectures will provide an introduction to the basic structure and function of the nervous system. Disorders of the nervous system will be discussed to highlight the function of different components of the nervous system. Laboratory sessions will be scheduled at regular intervals to provide students the opportunity to examine the three-dimensional structure of the nervous system.

ANAT 7400 Morphological Techniques (Formerly 080.740) Designed to develop advanced morphological techniques such as immunohistochemistry, in situ hybridization, immunogold, in situ PCR, cell culture, autoradiography, antero- and retro-grade tracing techniques.

ANAT 7470 GRADUATE GROSS ANATOMY
A comprehensive Human Gross Anatomy study of the structures of the whole human body. The structure and function of the body systems will be covered through lectures (such as anatomical, clinical, radiological, cross sectional) and complemented by laboratory sessions with cadaver dissection of whole cadavers, including review and reading sessions.

Human Nutritional Sciences

Human Nutritional Sciences ,
Human Nutritional Sciences Program Info,
The Department of Human Nutritional Sciences is one of the largest in Canada and the University of Manitoba is the only university in the province to offer graduate programs leading to the MSc. and Ph.D. degrees in the area of nutrition and food sciences. Graduate programs in Human Nutritional Sciences integrate concepts in metabolism, food and community nutrition. Research in experimental nutrition explores the role of nutrients and food components in basic biological processes from the whole organism to the molecular level. Community and clinical nutrition research focuses on policy development, food choice behaviour and novel approaches to disease management. Research related to foods includes investigations of the quality and stability of ingredients, development of functional and nutraceutical components from grains, oilseeds and legumes, and consumer preference and sensory characteristics of foods.

A multidisciplinary approach to research is common, with linkages to university departments such as medicine, agricultural and food sciences, management, dentistry, nursing and physical education and recreation studies, as well as with the Richardson Centre for Functional Foods and Nutraceuticals and the Canadian Centre for Agri-food Research in Health and Medicine. Collaborations outside the University also exist with organizations such as the Canadian International Grains Institute, the Grain Research Laboratory, Agriculture and Agri-Food Canada, Manitoba Health, the Winnipeg Regional Health Authority and the Manitoba Institute of Child Health.

Courses offered in nutrition and metabolism address topics in phytochemicals, proteins, energy and carbohydrates, lipids, vitamins, minerals and trace elements. Community nutrition courses include topics in qualitative research, epidemiology, public policy, nutrition education and theoretical approaches to dietary change interventions. Topics related to food research include nutraceuticals, functional foods, lipids, flavour chemistry and sensory properties of foods.

An informal atmosphere exists with free interaction between faculty and graduate students. The department attracts local, national and international students, many of

them holders of prestigious scholarships. Graduate student training in the Department of Human Nutritional Sciences has led to careers as: research scientists in academic, public and private sectors, technical specialists and research supervisors in food and pharmaceutical industries, food and nutrition policy analysts, food service managers, health and wellness specialists and educators, nutrition consultants, university and government employees, food quality assessment and research supervisors in government and agricultural laboratories.

Graduates of the M.Sc. program are qualified to meet the demands of the public, industry and government for food and nutrition specialists skilled in planning, administering and evaluating programs. The program also includes training in biochemical and analytical methods.

Training at the doctoral level is offered as a PhD in Human Nutritional Sciences or as a Ph.D. in Applied Health Sciences. It is designed for individuals who design and execute major research projects, train other researchers, serve as senior advisors consultants in health, social or economic policy and planning, and teach in nutrition or foods areas.

Fields of Research

Specific areas of research interests include the following: role of diet in health and disease, community nutrition, including nutritional assessment, the study of consumer perceptions and food choices, and evaluation of nutrition education and programs; identification and development of functional foods and nutraceuticals, and evaluation of their health benefits; effect of nutrients on body defence and immune systems including those involved in cell damage and repair and detoxification of environmental pollutants; nutritional biochemistry and nutrient-gene interactions; functional and health aspects of nutrients and foods in pediatric and geriatric populations; application of the knowledge of functional foods and nutraceuticals in the design of food products for the general population and specific groups of individuals; effects of modification and processing of oilseeds and oils on quality, stability and performance of foods; relationship of sensory and chemical flavour properties of foods; food security and policy development, cultural and social aspects of food choice behaviours.

Research Facilities

Human Nutritional Sciences houses laboratories for basic as well as applied research. Laboratories such as the Canada Foundation for Innovation Nutritional Sciences Research Facility and the Richardson Centre for Functional Foods and Nutraceuticals are equipped with the tools to carry out research at the level of the whole human, animal, cell, and molecule. Facilities for diet preparation for human and animal dietary intervention studies are available as well as modern analytical instrumentation and cell culture facilities. The George Weston Ltd. Sensory and Food Research Laboratory, with controlled ventilation and lighting and a computerized sensory analysis system, provides a controlled setting for testing of food products. This facility is used to evaluate the effects of food ingredients and nutraceuticals, storage conditions and preservation on food quality and consumer acceptance as well as on the commercial viability of a food or food products.

M.Sc. in Human Nutritional Sciences,
Admission

To be admitted to the M.Sc. program, a candidate must have a GPA of at least 3.0/4.5. A 4-year undergraduate degree from the Department OR another undergraduate degree with three credits of Physiology, three credits of Biochemistry and six credits in upper level foods or nutrition courses are required for unconditional admittance.

Students with a 3-year undergraduate degree enter at the Pre-Master's level, in which at least 18 credit hours of course work are required. Pre-Master's students are not eligible for graduate student stipends and do not carry out a research project.

Students applying to a Ph.D. program should hold a thesis-based Master's degree in nutrition or a related field. Alternatively, evidence of an extensive publication and research background also may be considered.

Application Deadlines

Canadian and U.S. students should send their application and all supporting documentation to the Faculty of Graduate Studies, **at least three months** prior to their intended start date. International students should send their application and all supporting documentation to the Faculty of Graduate Studies, **at least six months** prior to their intended start date.

Program Requirements

As part of the minimum 12 credit hrs required in the program, all students are required to take HNSC 7200 as well as 6 credit hours in Human Nutritional Sciences at the 700/7000 level. These 6 credit hours must comprise courses from at least two of the following three general subject areas: Foods (Flavour Chemistry and Sensory Properties of Food, Chemistry and Function of Food Lipids, Nutraceuticals in Human Health, Advanced Problems in Foods), Community Nutrition (Qualitative Research in Nutrition, Nutrition in Public Policy, Theoretical Approaches to Dietary Change Interventions, Nutritional Epidemiology, Advanced Problems in Nutrition) and Metabolic Nutrition (Vitamin Nutrition and Metabolism, Mineral and Trace Element Nutrition and Metabolism, Lipid Nutrition and Metabolism, Protein Nutrition and Metabolism, Phytochemical Nutrition and Metabolism, Energy and Carbohydrate Nutrition and Metabolism).

Note that in addition to the required courses in the M.Sc. program, if a student's background is weak in specific areas related to his/her area of research, additional courses may be required. Any additional course requirements beyond the minimum stated above and subject to the Faculty of Graduate Studies' maximum of 24 credit hrs will be determined by the student's thesis advisory committee and may include courses in statistics, communications, research methods or specialized courses in foods or nutrition. Students must also complete a thesis project in food and/or nutrition research.

Second language reading requirement: none, unless specified in program of study.

Expected time to graduate: two years.

PhD in Human Nutritional Sciences,
PhD in Human Nutritional Sciences

Admission

Applicants must meet the University of Manitoba Graduate Studies general regulations. A complete application will include at least one letter of recommendation from the student's intended advisor(s), attesting to the suitability of the candidate for Ph.D. studies in this program and when applicable another letter from the student's Master's degree advisor or equivalent.

The candidate will also provide a reference letter from someone who can provide general information on the ability of the candidate's ability to complete a graduate program.

Application Deadlines

Canadian and U.S. students should send their application and all supporting documentation to the Faculty of Graduate Studies, **at least three months** prior to their intended start date. International students should send their application and all supporting documentation to the Faculty of Graduate Studies, **at least six months** prior to their intended start date.

Program Requirements

For students entering the program with an MSc in another discipline or from another university, the course-work requirement will be determined by the Human Nutritional Sciences Graduate Studies Committee (HNSGSC). In considering the course-work requirement, the HNSGSC will be guided by the principle that the total

number of courses taken in both the MSc and PhD will be the equivalent of 18 credit hours, of which 15 credit hours must be in nutrition at the 7000 level. A second guiding principle will be that at least three credit hours of the nutrition courses taken (not including HNSC 7200.) will be from areas not directly related to the research area of the student and supervisor. All PhD students will be required to take HNSC 7200.

For students entering the program with an MSc in HNS from The University of Manitoba, the course-work requirement will consist of a minimum of 6 credit hours in HNS courses, all at the 7000 level. Of these 6 credit hours, three will consist of the seminar course: HNSC 7200. This will result in a total of 18 credit hours being taken in the MSc and PhD programs, if both degrees are taken at The University of Manitoba. Of these 18 credit hours, 15 will be HNS courses.

Page URL,

<http://crscalprod1.cc.umanitoba.ca/HuamnNutritionalSciences.catx>

Human Nutritional Sciences Course Descriptions

HNSC 7070 Advanced Problems in Foods

(Formerly 030.707) Selected topics related to consumer acceptability of foods.

HNSC 7110 Advanced Problems in Nutrition

(Formerly 030.711) Studies of selected problems and programs in community nutrition emphasizing program planning and evaluation. Offered 1999-2000 and alternate years.

HNSC 7200 Seminar in Food and Nutrition Research

(Formerly 030.720) A critical study of selected topics in food and nutrition research involving oral presentations and discussions. This is a required course for all M.Sc. students in the department of Foods and Nutrition.

HNSC 7440 Protein Nutrition and Metabolism

(Formerly 030.744) Lectures and critical reviews will be used to discuss recent/significant research advances in the fields of protein nutrition and metabolism, pertinent to mammalian physiology. Also offered as ANSC 7440 by the Department of Animal Science. Offered in 2007-08 and alternate years thereafter.

HNSC 7450 Energy and Carbohydrate Nutrition and Metabolism

(Formerly 030.745) Lectures and critical reviews will be used to discuss recent/significant research advances in the field of energy/carbohydrate nutrition and metabolism, pertinent to mammalian physiology. Also offered as ANSC 7450 by the Department of Animal Science. Offered in 2007-08 and alternate years thereafter.

HNSC 7460 Lipid Nutrition and Metabolism

(Formerly 030.746) Lectures and critical reviews will be used to discuss recent/significant research advances in the field of lipid nutrition and metabolism, pertinent to mammalian physiology. Also offered as ANSC 7460 by the Department of Animal Science. Offered in 2006-07 and alternate years thereafter.

HNSC 7470 Vitamin Nutrition and Metabolism

(Formerly 030.747) Lectures and critical reviews will be used to discuss recent/significant research advances in the field of vitamin nutrition and metabolism, pertinent to mammalian physiology. Also offered as ANSC 7470 by the Department of Animal Science. Offered in 2006-07 and alternate years thereafter.

HNSC 7480 Mineral and Trace Element Nutrition and Metabolism

(Formerly 030.748) Lectures and critical reviews will be used to discuss recent/significant research advances in the field of mineral nutrition and metabolism, pertinent to mammalian physiology. Also offered as ANSC 7480 by the Department of Animal Science. Offered in 2006-07 and alternate years there-after.

HNSC 7490 Phytochemical Nutrition and Metabolism

(Formerly 030.749) Lectures and critical reviews will be used to discuss recent/significant research advances in the field of phytochemical nutrition and metabolism, pertinent to mammalian physiology. Also offered as ANSC 7490 by the Department of Animal Science. Offered in 2007-08 and alternate years there-after.

HNSC 7500 Chemistry and Function of Food Lipids

(Formerly 030.750) Lectures and critical reviews will be used to discuss recent/significant research advances in the field of food lipid development, processing, analysis and function. Offered in 2002-03 and alternate years thereafter.

HNSC 7510 Flavour Chemistry and Sensory Properties of Foods

(Formerly 030.751) Lectures and critical reviews will be used to discuss recent/significant research advances in the field of food flavour and off-flavour chemistry and in the mechanics of sensory assessment. Offered in 2002-03 and alternate years thereafter.

HNSC 7520 Nutraceuticals in Human Health

(Formerly 030.752) Lectures and critical reviews will be used to discuss recent/significant research advances in the field of nutraceuticals and the impact of food and raw materials on nutrition and human health. Offered in 2003-04 and alternate years thereafter.

HNSC 7530 Nutrition in Public Policy

(Formerly 030.753) Focus on public policy related to the nutrition and health status of Canadians, including food and nutrition policies, health public policy, influence of trade regulations, context of health systems, social and economic environments. Offered in 2002-03 and alternate years thereafter. Prerequisite: permission of instructor

HNSC 7540 Nutritional Epidemiology

(Formerly 030.754) Focus on epidemiology principles and survey techniques for assessing and predicting individual nutritional status, assessing relevant community resources and reporting results to granting agencies and decision makers. Offered in 2003-04 and alternate years thereafter. Prerequisite: permission of instructor

HNSC 7550 Qualitative Research in Nutrition

(Formerly 030.755) A critical examination of methodological, analytical and interpretive issues in qualitative research as applied to nutrition and food-related issues. Offered in 2003-04 and alternate years thereafter. Prerequisite: permission of instructor

HNSC 7560 Current Topics in Human Nutrition

(Formerly 030.756) Lectures and critical reviews will be used to discuss recent/significant research advances in nutrition and foods research.

HNSC 7570 Theoretical Approaches to Dietary Change Intervention

(Formerly 030.757) Theoretical approaches to dietary behaviour change and critical analysis of their application in nutrition intervention programs for individuals and populations. Offered in 2003-04 and alternate years thereafter. Prerequisite: permission of instructor

HNSC 7580 Applied Nutrition

(Formerly 030.758) Experience in the application of nutrition theory to the management of nutrition related disease in a clinical setting supervised by registered dietitians. Prerequisites: Undergraduate coursework which meets the requirements for admission to Dietitians of Canada. An application is required for limited enrolment. Not to be used toward the fulfillment of the minimum 12 credit hours required in the program. Not to be held with the former 030.719.

Icelandic

Icelandic ,

Icelandic Program Info,

The Department of Icelandic offers innovative and challenging programs of study leading up to the M.A. degree. The aim of the program is to develop student knowledge of Icelandic language, literature and culture and to train students in the methods of scholarship. Graduate courses are offered on demand and can often be tailored to particular interests. Courses in the Icelandic language and literature allow students access to the fascinating world of medieval Icelandic culture, and constitute an important addition to the study of medieval, religious, literary and linguistic history of Western Europe. Iceland's size, geographical isolation, relatively homogeneous population, and history of documentation has made it a popular area for comparative research in a wide range of disciplines. Modern Icelandic provides access to the wealth of sources recorded in Iceland and North America relating to the realms of religion, law and politics, geology and culture, that allow for such comparative studies. Courses which focus on North American-Icelandic history,

culture, literature, film and translation provide unique insights into Canadian culture and history, and allow access to sources which enable students to do comparative research in the context of Trans-Atlantic culture.

Fields of Research

The department actively pursues and promotes the study of the Icelandic language and literature as well as North American-Icelandic culture. Research activities in the department have served to examine the role of North American Icelanders as a cultural group in Canada and to highlight the contribution of Icelandic Canadians to Canadian and Icelandic culture and literature through publications, translations and conferences. Scholarship in the department has also focused on the history of aesthetics in Icelandic writings, the challenge of the saga heritage and the poetics of immigration. The department supports a strong program of scholarly publications, of which the Icelandic Studies Series of the University of Manitoba Press is an example. Publications include: *The Book of Settlements: Landnámabók* (1972); *A History of the Old Icelandic Commonwealth* (1974); *Edda: A Collection of Essays* (1983); and *Laws of Early Iceland: Grágás I & II* (1980, 2000).

Research Facilities

The Department of Icelandic is complemented by the Libraries Icelandic Collection, founded in 1936. It has been designated a selective depository by the Government of Iceland, receiving a limited number of the more important publications to come out in Iceland each year. This collection is the largest of its kind in North America excepting the Fiske collection at Cornell University, and includes books, periodicals, newspapers, manuscripts, microfilms and audio-visual materials. It is the main research facility for research on Icelanders in North America.

M.A. in Icelandic , Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Students with other degrees or backgrounds may be eligible for admission to a pre-Master's program to the satisfaction of the department. Contact the Icelandic Department for further information.

Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 3 months prior to their intended start date. International students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 7 months prior to their intended start date.

Program Requirements

In addition to the minimum course requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, requirements for the M.A. degree include a thesis and three courses (18 credit hours) at the 700/7000 level in the Icelandic Department.

Second Language Reading Requirement: Yes

Expected Time to Graduate: Two years

Ph.D. in Icelandic,
There is no Ph.D. Program in Icelandic.

Page URL,
<http://crscalprod1.cc.umanitoba.ca/Icelandic.catx>

Icelandic Course Descriptions

ICEL 7040 Advanced Icelandic
(Formerly 012.704) Advanced modern Icelandic usage through translation (English-Icelandic/Icelandic-English), practical exercises, and free composition. Study of fictional and non-fictional texts.

ICEL 7050 Individual Modern Authors
(Formerly 012.705) Icelandic literature in the 20th century. Study of modern and contemporary Icelandic literature focusing on a major author.

ICEL 7060 Old Icelandic Prose: Seminar
(Formerly 012.706) Study of Old Norse-Icelandic sagas focusing on a specific genre or theme.

ICEL 7070 Old Icelandic Poetry: Seminar
(Formerly 012.707) Study of Old Norse-Icelandic poetry focusing on a specific genre or theme.

Immunology

Immunology Program Info,

The Department was established at the University of Manitoba in 1969 as the first Department of Immunology in Canada. Today it is known and respected internationally as a centre for Immunology research and teaching. A major strength of the program is the excellent research environment, reflected in the strong research faculty, award-winning students, high levels of external research funding and availability of leading-edge research equipment. The Department offers a diverse program of graduate studies and research in Immunology, leading to M.Sc. and Ph.D. degrees. The main objectives of the Program are to: 1) facilitate development of a solid academic base and critical thinking skills in the field of immunology; 2) develop expertise in modern techniques of immunologic research, through a strong laboratory research training component; 3) provide students with exposure to a wide range of biomedical research areas to foster development of a broad scientific perspective and multi-disciplinary outlook; 4) provide opportunities for students to develop essential professional skills, such as oral and written scientific communications, grant-writing, mentorship, communicating science to the media and public, job searches, interpersonal skills and intellectual property. Traditional coursework is kept to a minimum, and alternative assessment approaches are used to reduce in-class exams, such as student debates, student-led "mini-teaching" sessions or take-home exams based on experimental design and problem-solving. Our weekly seminar series brings in an excellent array of local, national and international speakers to provide students with exposure to a wide range of research topics and foster multi-disciplinary thinking. Our Department hosts a number of activities in which our students participate in teaching what they do to undergraduates or high school students. In addition to the academic program components, the laboratory research component of the program features an excellent range of unique technical resources and expertise. A culture of collaborative sharing of resources and expertise further facilitates development of students' research. Unique funding opportunities available to Immunology students include the Mindel and Tom Olenick Research Award in Immunology (administered by the Health Sciences Centre Foundation), the Mindel and Tom Olenick Research Award in Immunology Entrance Scholarship (administered by the University of Manitoba) and the Viventia Research in Immunology Travel Award. For more information consult our webpage: <http://umanitoba.ca/faculties/medicine/units/immunology/>.

Fields of Research

The research program of the over 20 Faculty members who participate in the Program in Immunology is strongly supported by peer-reviewed external funding from international, national and local sources. Immunology researchers at the University of Manitoba have as their main research interests: Allergy and asthma, antibody production, autoimmunity, including arthritis and colitis, cancers of the immune system, including leukemia and lymphoma, cancer stem cells, immune responses to vaccination, gene therapy of immune cells, immune regulation and immune memory, immune response to viral, bacterial and parasitic diseases, leukocyte cell biology and signal transduction, leukocyte receptors and adhesion molecules, molecular genetics of the immune system, proteomics and systems biology, and transplantation immunology. Numerous collaborations between those

interested in fundamental and clinical immunology are in place, providing opportunities for translational research.

Research Facilities

The Department recently moved to new state of the art, open-concept laboratories in the Apotex Centre on the University's Bannatyne Campus. The Program offers extensive instrumentation for research in contemporary immunology. These include basic and clinical immunology research laboratories, core equipment for a broad range of molecular and cellular immunology techniques, housing for small animals (both conventional SPF and for creation of transgenic mice), instrumentation for flow cytometry analysis and high speed sorting, confocal microscopy, a proteomics centre, a student computer laboratory and access to departmental and University wide libraries. Strong scientific links exist with the Manitoba Institute of Child Health, Manitoba Institute of Cell Biology, Manitoba Centre for Proteomics, National Microbiology Laboratory, Health Sciences Centre, Children's Hospital and Canadian Blood Services, all in Winnipeg.

M.Sc. in Immunology,
Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

Application Deadlines

For sessions beginning: International Canadian

September	February 1	July 1
January	August 1	November 1
May	December 1	March 1
July	February 1	May 1

Program Requirements

Program requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. IMMU 7110 and IMMU 7020 are the required core courses.

Students whose first language is not English must contact the University of Manitoba English Language Centre to register for the Canadian Test of English for Scholars and Trainees (CanTEST). This test must be taken while the student is in the first year of his/her graduate program.

Second language reading requirement: none

Expected time to graduate: typically 2 - 3 years.

The Department of Immunology Supplemental Regulations may be printed from their website:

http://www.umanitoba.ca/faculties/medicine/units/immunology/media/Immunology_Sup_Regs_May_2010.pdf

Ph.D. in Immunology,
Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

Application Deadlines

For sessions starting: International Canadian

Graduate Studies

September	February 1	July 1
January	August 1	November 1
May	December 1	March 1
July	February 1	May 1

Program Requirements

Program requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. The candidacy examination required of all students in the Ph.D. program will be in the form of a research proposal. Details on this examination can be obtained from the department web site.

Students whose first language is not English must contact the University of Manitoba English Language Centre to register for the Canadian Test of English for Scholars and Trainees (CanTEST). This test must be taken while the student is in the first year of his/her graduate program.

Second language requirement: none

Expected time to graduation: 4 - 5 years

The Department of Immunology Supplemental Regulations may be printed from website:

<http://www.umanitoba.ca/faculties/medicine/units/immunology/gradprog.html>
http://www.umanitoba.ca/faculties/medicine/units/immunology/media/Immunology_Sup_Regs_May_2010.pdf

Page URL,
<http://crscalprod1.cc.umanitoba.ca/Immunology.catx>

Immunology Course Descriptions

IMMU 7020 Immunobiology

(Formerly 072.702) This course provides a broad perspective of the evolving concepts of the mechanisms underlying the regulation of the immune response. Students admitted to this course will be expected to have sufficient background knowledge of general biology. Prerequisites: IMMU 7070 (or 072.707) plus cognate courses in molecular biology, or by consent of instructors.

IMMU 7030 Seminars in Immunology

(Formerly 072.703) Presented by senior graduate students on advanced research topics not directly related to the student's thesis subject. The purpose of this course is to test the student's ability to evaluate critically a specialized topic both orally and in an essay form. This course is graded pass/fail. Prerequisites: IMMU 7110 (or 072.711) or IMMU 7020 (or 072.702), or by consent of instructors.

IMMU 7040 Immunological Methodology

(Formerly 072.704) This lecture course is designed to provide an understanding of modern methods used for basic research in Immunology or other biomedical disciplines utilizing immunological techniques. Prerequisite: IMMU 7070 (or 072.707), or by consent of instructors.

IMMU 7070 Introductory Immunology

(Formerly 072.707) This course provides a broad survey of modern immunology, covering such topics as molecular concepts of antigenic specificity, chemistry of antibodies and their interactions with antigens and cells, regulation of the immune response, transplantation and tumor immunology. Prerequisites: general courses in chemistry, biochemistry and biology, or by consent of instructors.

IMMU 7080 Immunological Methodology (Laboratory)

(Formerly 072.708) This laboratory course is designed to provide familiarity with a variety of modern techniques used for basic research in immunology or other biomedical disciplines. Prerequisites: IMMU 7040 (or 072.704) or by consent of instructors.

IMMU 7090 Selected Topics in Immunology
(Formerly 072.709) Lectures, tutorials and assigned reading on topics not normally covered in other courses such as IMMU 7110 (or 072.711) and IMMU 7020 (or 072.702) or 036.719. Course content will vary depending on the advances in the field and research interests of the Department. Prerequisites: Consent of instructors.

IMMU 7100 Advanced Topics in Immunology
(Formerly 072.710) Lectures, tutorials and assigned reading at an advanced level on topics which may have been covered in other courses offered by the Department and which require treatment at a higher level either due to advances in the field or changes in the research interests of the Department. Prerequisites: IMMU 7110 (or 072.711) and/or IMMU 7020 (or 072.702), or by consent of instructors. This course is graded on a pass/fail basis.

IMMU 7110 Molecular Immunology
(Formerly 072.711) This course covers in depth the structure, molecular biology and function of immunoglobulins, histocompatibility antigens, regulatory factors receptors and adhesion molecules on cells of the immune system; mechanisms of immunochemical reactions and the immunogenicity of antigens. Prerequisites: IMMU 7070 (or 072.707) plus undergraduate courses in organic chemistry, physical chemistry and biochemistry, or by consent of instructors. Not to be held with the former 072.701.

Website: http://umanitoba.ca/afs/food_science

Academic Staff

See the academic staff lists in departments of Animal Science, Food Science and Human Nutritional Sciences.

Program Information

Programs at the doctorate level are administered through the Interdepartmental Ph.D. program in Food and Nutritional Sciences involving the departments of Human Nutritional Sciences, Food Science, and Animal Science. Admission usually

requires a research Master's degree in an appropriate discipline (food science, human nutrition, biochemistry, microbiology, etc.)

Fields of Research and Research Facilities

See information in this Calendar under the three participating departments

Admission

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, a research Master's degree in the general areas of food or nutritional sciences is required.

Application Deadlines

Students may begin their program on either September 1, January 1, May 1 or July 1. For admission on each of these start dates, Canadian/U.S. students should send their application forms with complete supporting documentation to Faculty of Graduate Studies no less than six (6) months before the intended start date. Non-Canadian/US students should send their applications with complete supporting documentation to the Faculty of Graduate Studies no less than 7 months before the intended start date.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. All students are required to take a minimum of 15 credit hours of courses at the 700/7000 level which will include FDNT 7120 Advanced Seminar in Food and Nutritional Sciences and at least one 700/7000 level course from each of the two participating food departments and complete a thesis research program. For additional information, candidates should contact the head of any of the three participating departments.

Second language reading requirement: none

Expected time to graduate: four years.

Further course descriptions are available in the Calendar under Animal Science, Human Nutritional Science and Food Science. For additional information, candidates should contact the head of any of these participating departments.

Interdepartmental Graduate Program in Genetics,
Graduate Co-Chairs: Dan Gietz, Biochemistry and Medical Genetics, and Brian Fristensky, Plant Science

Telephone: (204) 789 3593

Fax: (204) 789 3900

E-mail: ggp@umanitoba.ca

Website: <http://umanitoba.ca/medicine/units/biochem/gradprogram.html>

Academic Staff

See academic staff lists in the departments of: Animal Science, Plant Science, Biochemistry and Medical Genetics, Microbiology and Zoology.

Program Information

A broad knowledge in the field of genetics requires a study program of an interdisciplinary nature. Courses in genetics and directly related fields are currently offered in many different departments, and although the term "genetics" may not always appear as such in the course title, the subject matter is largely genetic in content.

To accommodate students wishing to do graduate work in genetics and in recognition of the multidisciplinary nature of genetics, an interfaculty graduate program in genetics has been established which is organized by the Genetics Program Committee comprising representatives from the faculties of Agricultural and Food Sciences, Medicine, and Science. The broad base of the Genetics Program Committee will provide the student with the best possible advice on program selection for a career in genetics. The Department of Biochemistry and Medical Genetics is administratively responsible for students registered in the human genetics component of the Genetics Graduate Program. Students wishing to undertake graduate studies in human genetics should seek advice directly from the chair of the graduate studies committee of the Department of Biochemistry and Medical Genetics.

Admission

The first step in the application process is for the applicant to contact directly the professor with whom he or she wishes to study. If a professor can be identified who is willing to supervise the student's research, and if funding for the student is available, a formal application should be submitted. Students wishing to undertake studies in human genetics should apply directly to the Department of Biochemistry and Medical Genetics. Students wishing to enter the Graduate Genetics Program in areas other than human genetics should apply to the chair of the Genetics Program Committee. Admission will be competitive and acceptance will be based on academic credentials and subject to availability of space and resources. The normal entrance requirements will be an Honours B.Sc. with emphasis on genetics. Students not fulfilling the entrance requirements will be required to undertake a pre-Master's program designed specifically to fulfil deficiencies in their background.

Application Deadlines

The Genetics Graduate Program allows students to begin their program on either 1 September, 1 January or 1 May. For admission for each of these start dates, Canadian students should send their applications with complete supporting documentation to the Faculty of Graduate Studies no less than four (4) months before the intended start date. Non-Canadian students should send their applications with complete supporting documentation to arrive no later than seven months (7) before the intended start date.

Interdepartmental M.Sc. in Genetics, Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. A minimum of 12 credit hours exclusive to IMED 7130 Graduate Seminar in Genetics 1, will be required. A minimum of six credit hours must be obtained in courses listed in the Genetics course list. A thesis demonstrating proficiency in the field of study chosen by the student will be required.

Interdepartmental Ph.D. in Genetics, Program Requirements

Minimum Program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. A minimum of 12 credit hours of coursework at the 700/7000 level, exclusive of IMED 7140 Graduate Seminar in Genetics 2, beyond the Master's level will be required. At least six of the 12 credit hours must be obtained for courses in the Genetics course list.

A qualifying examination may be held upon the recommendation of the selection committee and/or supervisor and the advisory committee. The format of the

examination will be determined by the examining committee and the student notified no less than three months before the date of the examination.

A candidacy examination will be required of all students registered for a Ph.D. examination as specified by the Faculty of Graduate Studies. The majority of members of the examination committee will be members of the Genetics Program Committee.

Individual Interdisciplinary Programs,

The Faculty of Graduate Studies provides the special opportunity to students, with a proven track record, of registering in an Individual Interdisciplinary Program¹. Such a program combines substantial aspects of the existing programs of at least two departments into a unique syllabus which lies outside of established department boundaries. Since the Individual Interdisciplinary Program places additional demands and responsibilities upon the student to assemble a committee, to formulate a research proposal in advance of admission and, to negotiate a program of studies with his/ her committee, the eligibility requirements are more stringent than those for discipline based graduate programs. The regulations presented below and all general regulations of the Faculty of Graduate Studies (e.g., admission requirements, registration procedures, thesis regulations, minimum course requirements, advance and transfer credit, time limits, requirements for graduation, oral examinations, academic performance and the like) apply to Individual Interdisciplinary Programs. These regulations can be accessed from the Faculty of Graduate Studies web site: http://umanitoba.ca/graduate_studies/programs/masters/iip/regulations.htm. Each department currently offering a discipline-based graduate level program is eligible to offer an individual interdisciplinary stream² in which the subject area of that department is the major focus³ of the Individual Interdisciplinary Program⁴. The department is thus considered the "home" department of the IIP student⁵. (Note: the department should be contacted ahead of time to ensure their participation in the IIP) Because of the individuality of each program and the need for special guidance, an Advisory Committee is required for all IIP students.

The "home" Department Head (or designate) will ensure that the student and the advisor receive information regarding scholarship and relevant Faculty procedures and the like (i.e., information that would normally be distributed to Department heads and/or Chairs of graduate programs).

Eligibility for Admission Interdiscipline Grad,

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar, applicants for an Individual Interdisciplinary Program are required to have a superior academic record (3.5 GPA or equivalent) with a substantial grounding in at least one of the disciplines⁶ of the proposed Individual Interdisciplinary Program. The application procedures and regulations, as determined by the Faculty of Graduate Studies, can be found on the Faculty of Graduate Studies web site:

http://umanitoba.ca/graduate_studies/programs/masters/iip/regulations.htm Please be aware that the home department may have additional application requirements and procedures and should be contacted directly for further information.

Application Deadlines Interdiscipline Grad,

Contact the home department for applicable deadlines for submission of application materials.

Master's Individual Interdisciplinary Programs, Admission

Students should normally have an Honours Bachelor degree or equivalent in one of the disciplines of the proposed IIP.

Program Requirements

In addition to the minimum program requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, please consult the Faculty of Graduate Studies web site: http://umanitoba.ca/graduate_studies/programs/masters/iip/degree_req.htm

Ph.D. Individual Interdisciplinary Programs, Admission

Students should normally⁷ have a Master degree or equivalent in one of the disciplines of the proposed IIP.

Program Requirements

In addition to the minimum program requirements of the Faculty of Graduate Studies that are found in the Graduate Studies Regulations Section of this *Calendar*, please consult the web: http://umanitoba.ca/graduate_studies/programs/phd/iip/degree_req.htm

¹ Where the word department appears, the word Faculty or Institute is to be assumed where appropriate.

² A department's eligibility to offer an Individual Interdisciplinary Program is limited to the level of the degree currently being offered by the department. For example, if only a Master's level program is offered by the department, then that department is eligible to be the home department for students in a Master's level Individual Interdisciplinary Program, only. Although this particular department may participate as a minor department in a Ph.D. IIP, it is not eligible to be the home department of a Ph.D. IIP student. A Faculty member in a department without a graduate program at the level he/she wishes to supervise an IIP student may do so providing that the Faculty member is a member of the Faculty of Graduate Studies and has the approval to supervise from the "Home" department. Note: the supervisor may or may not need to be appointed as an adjunct to the home department.

³ "Major Focus" refers to the subject area/discipline of a department in which the credit hours of instruction to be taken are more than or equal to those to be taken in any other participating department. In a two-department combination, assuming a 15 credit hour program, 9 credit hours of course work would be taken in the major focus area, with a minimum of 6 to be at the 700/7000 level.

⁴ The intent of an IIP is to bring together existing discipline-based programs in such a way as to form a unique program tailored to an individual research project and/or study aim that cannot otherwise be accommodated by existing programs. Masters programs are used to construct a Masters level IIP and Ph.D. programs are the building blocks for a Ph.D. level IIP. While there is some flexibility in the actual programs used to construct an IIP, it is imperative that a Masters level IIP contain mostly existing Masters level programs, and Ph.D. programs must make up the majority if not all the component programs in a Ph.D. IIP.

⁵ The "home" department counts this student as part of their complement for statistics purposes and would indicate them as "IIP Stream" students.

⁶ It is anticipated that substantial grounding will be in the major focus area; if not, then justification must be given for consideration.

⁷ Students who have completed an IIP Masters, may be considered for entry into an IIP PhD, provided that their proposed course work and research in the PhD program is a clear extension or follow up of the Masters program. The determination of the appropriateness of the masters work as a prerequisite to the proposed PhD study will be made by the PhD Selection (Admission) Committee. The Dean of Graduate Studies (or delegate) must be present at such meetings.

Ph.D. Studies for Aboriginal Scholars,
Contact: Dr. Deo H. Poonwassie

General Office: 500 University Centre

Telephone: (204) 474 7070

Fax: (204) 474 7553

E-mail: poonwass@ms.umanitoba.ca

The University of Manitoba takes pride in providing world-class education to many of Canada's best and brightest students. By recognizing the potential in all who have a desire to learn and by offering students an exceptional education in a supportive environment, the university is proud to open its doors to a cohort of Aboriginal students at the Ph.D. level. The University of Manitoba is committed to recruiting and graduating Aboriginal students at all levels and areas of studies.

The University recognizes that the province has a large Aboriginal population. While strides are being made at the undergraduate level with a significant number of teachers, social workers, lawyers and medical doctors as evidence, there is an urgent need for expertise at the graduate level. This opportunity for those holding Masters degrees or honours Bachelor's degrees will fill a major void that currently exists in areas including university and college leadership positions in an environment of perpetual change. This is the university's contribution to growing our own expertise.

Who Is Eligible

The University of Manitoba invites applications for Ph.D. studies from First Nations, Inuit and Metis scholars. Priority will be given to Manitobans.

The Cohort

The Faculty of Graduate Studies is committed to facilitating the admission of a cohort of 15 Aboriginal students for doctoral studies. The cohort model of delivery will serve Aboriginal Ph.D. students to focus on common critical issues that deserve in-depth research and investigation. Though not a homogeneous group, students will have enough common experiences and goals to meld into a viable learning community. The Aboriginal context is important as a glue that will allow for peer cooperation and support. It will be possible to offer students common courses (if needed) such as indigenous research methodologies, critical paper writing and analysis; and spiritual guidance. The intent is to create a firm foundation that will work for success. With this heightened confidence and awareness, Aboriginal students will be able to contribute to the education of other persons in academia as well. Interdisciplinary and interpersonal communications will promote cohort cohesion for Aboriginal Leadership in a changing globalized community.

Admission Requirements

The minimum requirement for admission to the Ph.D. program is normally a Master's degree or equivalent from a recognized university and a cumulative GPA of 3.0 or equivalent in the last two years of full time study (60 credit hours). With special recommendation of the department concerned, applicants with an honours Bachelor's degree may be considered for entry to Ph.D. studies. Applicants must meet the specified requirements of a department or faculty. Some departments may require admission tests such as the Graduate Record Examination (GRE), the Graduate Management Aptitude Test (GMAT) or a qualifying research paper.

For further information applicants may contact the faculty or department in which they wish to study. Students may apply to any department or faculty that offers a Ph.D. program of studies.

***There will be no admissions for the Fall 2011 term.

Program Requirements

For students admitted with a Master's degree the normal minimum requirement is 12 cr.hr at the 7000 level or higher plus a thesis. A maximum of 24 cr.hr. is allowed toward the Ph.D. program. Note: some departments may require more or less credit hours.

After initial registration, the student is expected to complete the program within 7 years.

A residency requirement, consisting of two academic terms at the University of Manitoba, is required as part of the requirements of a Ph.D. program. Please consult specific department/faculty requirements. The student shall be geographically available to visit the campus regularly during this residence period.

Advance and Transfer Credit

- Students may apply for advance credit for up to half the number of credit hours in their approved programs. These courses will have been taken before the student is admitted into the Ph.D. program.
- Students may receive transfer credit by taking courses at another institution while studying at the University of Manitoba.
- In both of the above cases the student must follow the procedures and regulations as outlined in the current U of M Graduate Calendar.

Financial Assistance

A fundraising effort is in place to ensure that all students may receive up to \$20,000 in financial assistance. Those who qualify may apply for regular Ph.D. assistance on a competitive basis (see the Faculty of Graduate Studies website for more information). Students are encouraged to explore other sources of funding.

If you wish to obtain funding, please provide a statement of needs with your application.

Page URL,

<http://crscalprod1.cc.umanitoba.ca/InterdisciplinaryGraduateProgramsandCourses.c.atx>

Architecture Interdisciplinary Course Descriptions-6000 Level

ARCG 6102 Topics in Environmental Processes

A detailed study of some special topics in architecture, city planning, landscape architecture or interior design.

Architecture Interdisciplinary Course Descriptions-7000 Level

ARCG 7100

This course is intended to promote critical thinking and provide opportunities to explore in detail key issues, ideas and theories about design and planning. Considerations may include: The relationship of design and planning theories to the evolution of design and planning practice; Ways in which design and planning theories have been understood to shape built form; Factors that have shaped design and planning theories, their commonalities and disjuncture; Theory discourse as a means of discovering design and planning meaning; The role of theory in practice, research and discovery; The relationship of design and planning theories to other discipline theories as a means of identifying commonalities of interest.

ARCG 7102 Studio Topics in Environmental Processes

A detailed studio study of some special topics in architecture, city planning, landscape architecture or interior design.

ARCG 7120

This course is intended to explore research methods pertinent to the study of design and planning. The considerations to be examined may include: Potential research tools and techniques that are pertinent to the exploration of design and planning theory, practice and development; Exploration of emerging research processes and methodologies that inform minority and feminist discourse; Review of the evolution of design and planning methods; Analysis of the relationships between research methods in aligned disciplines as those research methods may inform design and planning understanding.

Engineering Interdisciplinary Course Description

ENG 7010 The Engineering Design Process

(Formerly 130.701) Consideration of the Engineering Design process and the logic upon which it is based. Explores both the history and possible future directions of the process from technical, social and environmental points of view.

Medicine Interdisciplinary Course Descriptions

IMED 7090 Cell Biology

(Formerly 165.709) Comprehensive introduction to the structure and function of cells. Prerequisite: consent of instructor.

IMED 7100 Fundamentals of Neuroscience

(Formerly 165.710) An interdepartmental multidisciplinary course providing a comprehensive overview of cellular, molecular, developmental and systems neuroscience, as well as the neurobiology of disease. Emphasis will be placed on the application of the fundamental principles of neuroscience to contemporary lab research. ANAT 7270 (or 080.727) (offered in alternate years) will provide instruction in neuroanatomy and structure-function in the nervous system. Prerequisite: Permission of instructor.

IMED 7150 M.Sc. Seminar in Genetics

(Formerly 165.715) M.Sc. students are required to present their current research. All students are required to attend and participate in one or more journal clubs. The satisfactory progress of the student will depend (in part) on the seminar attendance. Graded as P/F.

IMED 7160 Ph.D. Seminar in Genetics

(Formerly 165.716) Ph.D. students are required to present their current research. All students are required to attend and participate in one or more journal clubs. The satisfactory progress of the student will depend (in part) on the seminar attendance. Graded as P/F.

IMED 7180 Molecular Approaches in Medical Research

(Formerly 165.718) For students who wish to understand advances made in medicine/biology through molecular and developmental approaches. Topics for discussion will be selected from the recent literature in consultation with participating students. The course will consist of lectures and discussions as well as written and oral presentation of papers by the students. Prerequisite: consent of instructor. Offered 2000-2001 and alternate years.

IMED 7190 Medical Immunology

(Formerly 165.719) This interdisciplinary courses deals with the molecular and cellular mechanisms underlying immunologically mediated human diseases. Prerequisites: IMMU 7070 (or 072.707) plus cognate courses in human biology or by consent of instructors.

IMED 7200 Cancer Biology

(Formerly 165.720) One hour per week on the basic (cellular and molecular) and clinical (diagnostic and treatment) aspects of cancer. Students will give one seminar and submit an essay on an assigned topic. Prerequisite: consent of instructor.

IMED 7240 Nucleic Acids: Manipulation, Structure and Function

(Formerly 165.724) DNA technology; nucleic acid metabolism, including DNA replication, DNA repair, transcription, and RNA processing; gene/chromosome structure and rearrangement; mutation detection; gene therapy; positional cloning.

IMED 7290 Developmental Biology

(Formerly 165.729) Emphasizes current principles of organ system development and its application to transgenic approaches to gene function in the context of a whole, developing organism. Prerequisites: IMED 7090 (or 165.709) or ZOOL 2150 (or 022.215) and/or ZOOL 3070 (or 022.307) or consent of instructor. Offered in January 2003 and in alternate years thereafter.

IMED 7300 Microscopy, Optics, Imaging and Analysis in Health Research

Theory and practice of modern microscopy, optics, molecular imaging, and analyses used in health research. Participants will gain in depth knowledge through seminars by local and external experts in the field and by hands-on laboratory work in preparing samples for imaging and analyses. Images will be acquired using equipment at the Genomic Centre for Cancer Research and Diagnosis at the Manitoba Institute of Cell Biology. Students will also participate in interactive tutorials and journal club.

IMED 7302 Advanced Molecular Imaging

Seminar course in which students will learn about innovative methods and advanced analyses of molecular imaging in biomedical research including 2-dimensional and 3-dimensional fluorescent in situ hybridization, live-cell imaging, spectral imaging, and multi-colour imaging. Students will participate in hands-on laboratory exercises,

interactive tutorials and journal club.

IMED 7304 Functional Genomics and Whole Genome Analyses

Seminar course in which students will learn about functional genomics and approaches to whole genome analyses using array technologies. Course content will be delivered by local and external experts in the field. Students will participate in hands-on laboratory exercises with micro-array platforms and computer-based data analyses, interactive tutorials and journal club.

Women's Studies Interdisciplinary Course Descriptions

WOMN 7170 Directed Readings in Women's Studies

(Formerly 156.726) Advanced study of selected topics in Women's Studies from an interdisciplinary perspective. The content of the course may vary from year to year and will be arranged by the coordinator of the Women's and Gender Studies Program in consultation with the appropriate representatives of departments. Prerequisite: consent of the Women's and Gender Studies coordinator and the instructor. Students must complete a Reading Course Application Form available from the Women's and Gender Studies office. As the course content will vary from year to year, students may take this course more than once for credit.

WOMN 7270 Advanced Topics in Women's Studies

(Formerly 156.727) Advanced study of selected topics in Women's Studies from an interdisciplinary perspective. The content of the course may vary from year to year and will be arranged by the coordinator of the Women's and Gender Studies Program in consultation with the appropriate representatives of departments. Interdisciplinary analysis of contemporary issues, debates and theories in Women's Studies. Topics will vary from year to year and may include, for example, gender theory, sexualities, or feminist pedagogy. Prerequisite: consent of the Women's and Gender Studies coordinator and course instructor. As the course content will vary from year to year, students may take this course more than once for credit.

Interior Design ,

Interior Design Program Info,

The department of Interior Design at the University of Manitoba has a long-established reputation for excellence and leads Canada in the development of the first Master of Interior Design program.

The Department offers two streams within the Master of Interior Design:

- The *first-professional program* is directed towards those interested in pursuing a career in Interior Design practice. The program emphasizes the creation of human-centred and context-based design solutions that respond to the needs of contemporary life. The course of studies consists of the design studio and support courses that develop the methods, processes, technical and theoretical foundations of interior design. There are opportunities for international and cross-cultural study through exchange programs and intersession studios. The program requires a minimum of two full years of study to complete.
- The *post-professional program* is directed to those who already hold a first-professional qualification in Interior Design. The program has a research orientation and is intended to further the knowledge base in

specific areas of the discipline. The program requires a minimum of one and one half years of full-time study to complete. For additional information on delivery options and length of study requirements contact the department of Interior Design.

The first-professional program is accredited by the Council for Interior Design Accreditation. Graduates normally proceed to certification from the National Council of Interior Design Qualification (N.C.I.D.Q.) and membership in a professional interior design association. Master of Interior Design graduates are qualified to work nationally and internationally at the forefront of their profession, with a skill-set that includes strategic thinking, entrepreneurship, a research orientation and an ethical and environmentally responsible frame of reference.

Research expertise and individual interests of the faculty include the following: workplace environments, universal design, lighting and colour, aesthetics and ethical theory, design education and profession-based research.

Facilities

The Faculty of Architecture is housed in two main buildings on the Fort Garry campus; John A. Russell Architecture Building (JAR) and the Architecture 2 Building. The Faculty of Architecture has one open area computer lab (CADlab) along with a new media research area. A fully staffed and equipped woodshop and assembly room is available for student and faculty use. The Product Catalogue Collection provides current product information on interior and architectural materials. The Architecture and Fine Arts Library serves both the Faculty of Architecture and the School of Art. The library contains an extensive collection of books, journals, periodicals, maps and plans and videos and slides.

Admission

Applicants must meet the entrance requirements of the Faculty of Graduate Studies as well as the Interior Design admissions requirements found on the Interior Design website.

First-Professional Masters Program:

Applicants with an undergraduate degree in Interior Design or an undergraduate degree in Environmental Design (Interior Environment Option) from the Faculty of Architecture are eligible for direct admission. Applicants with degrees in other fields of study are assessed on a case-by-case basis and may be eligible for admission to a pre-master program of study. For additional information contact the department of Interior Design.

Post-Professional Masters Program:

A first-professional degree in Interior Design is required for admission.

Application Deadlines:

Applicants from outside Canada and the United States: December 1

Canadian citizens and American citizens: January 15

For further information contact the graduate student advisor, department of Interior Design.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section. Detailed requirements for Interior Design programs are found on the Interior Design website.

Post-Professional Stream - 21 Credit Hours

Professional Stream - 48 Credit Hours

Second language reading requirement: none

Expected time to graduation in full-time study: Post-Professional Stream, 1.5 years; Professional Stream, 2 years.

PhD Interior Design,
A Ph.D. in Design and Planning is offered.

Page URL,

<http://crscalprod1.cc.umanitoba.ca/InteriorDesign.catx>

Interior Design Course Descriptions

IDES 7000 Graduate Seminar in Interior Design

A seminar course for students registered in thesis or practicum designed to assist in the determination of a relevant topic; formulation of a hypothesis, academic writing sources of information and the appropriate form and content of the thesis practicum.

IDES 7170 Design Research Methods

(Formerly 051.717) Building on EVIE 3640 (or 079.364) Design Inquiry, this course addresses the role of quantitative and qualitative research methods in interior design. The subject will address the principles of quantitative and qualitative research methodologies; focusing on the relationship between research and interior design. Specifically identifying gaps in existing research; critical analysis and interpretation of existing research; representation of research intentions, methodologies, and results.

IDES 7180 Theory Seminar 1 - Contemporary Issues in Design

(Formerly 051.718) A theoretical exploration of contemporary design issues as they apply to Interior Design, supporting the work of design studio. Historical precedent in relation to human activity, sensory stimulus, technological and social change, ecological awareness, and aesthetic judgment forms the context for discussion and debate. Prerequisite: EVIE 3650 and EVIE 3660 or equivalent.

IDES 7190 Theory Seminar 2 - Critical Perspectives

(Formerly 051.719) An examination of theoretical and philosophical approaches to design. Examines the practice of interior design through a variety of critical and historical perspectives. Different modes of thought and manners of questioning will be used to debate issues. Prerequisite: EDES 7180 (or 051.718).

IDES 7200 Masters Studio 1 - Strategic Issues

(Formerly 051.720) Master Studio 1 focuses on developing strategic approaches to design, which address complex contextual issues and adaptive reuse of large-scale public space. Studio explorations responding to a range of complex contextual design issues. The studio focuses on methods of strategic analysis such as mapping and scenario planning to inform the configuration and resolution of new interior spatial forms. Large scale public space and the changing nature of contemporary culture will form the basis for the design projects.

IDES 7210 Masters Studio 2 - Events and Making

(Formerly 051.721) Master Studio 2 is focused on the Event: exploring the nature of temporary inhabitation through the creation of a unique place/installation as the site for cultural/community celebration. Design/build studio explorations focussed upon issues of temporality, technology, and design intention. Small-scale public places and cultural context will form the basis for design studio projects.

IDES 7220 Masters Studio 3

(Formerly 051.722) Focuses on the creation of specialized interior environments informed by traditional and emerging forms of research. Research into Practice: a research-focused, problem based, studio bridging Studio 3 will examine specialized interior professional design issues and diverse research sources. Master projects in areas such as: work environments, healthcare, education or hospitality, through precedent and research. The studio may be run as a collaborative program and may be delivered as an International studio experience.

IDES 7230 Sensory Technology 4

(Formerly 051.723) Examination of the influences and effects of emerging communication systems and building technologies; building and furniture systems; in the context of human well being and environmental concerns. The study of the design consequences and environmental impact of interior services and systems; communication technologies; building regulations, codes and infrastructure; detailing and specification of projects drawn from design studio.

IDES 7240 Sensory Technology 5

(Formerly 051.724) A self-directed exploration of new and/or divergent technologies, with significance to the design of interior environments. Students will propose a self-directed design or research project, nominating a full time staff advisor; for the subject instructors' approval. The proposal will clearly establish learning objectives and outcomes, and assessment criteria.

IDES 7250 Professionalism and Practice

(Formerly 051.725) Introduction to the profession and practice of Interior Design; types of practice; regulating bodies; education; career development; professional and social responsibilities; examination and critique of practice, projects and design issues.

IDES 7260 The Business of Interior Design

(Formerly 051.726) Management principles, administration, communication strategies and practice structures in the design process; development of skills in communication and procedures. The interior design business environment; ethics, responsibilities; related industries; job search techniques.

IDES 7270 Travelling Concepts in Photography

This course is a graduate level photography elective that combines the practice, theory and history of photography. The outcome is to stimulate the use of photography as a visionary and hands-on tool. The final outcome will be an exhibition of student work.

Kinesiology and Recreation Management

Kinesiology and Recreation Management,
M.Sc. (Kinesiology and Recreation),

Fields of Research

The Master of Science (Kinesiology and Recreation) or Master of Arts (Kinesiology and Recreation) provides advanced education and research training within sub-disciplines including kinesiology, physical education, health, human performance, recreation, leisure, and tourism studies.

Research Facilities

Resources and supports for M.Sc. related research are jointly provided by the Faculty of Kinesiology and Recreation Management and the Health, Leisure and Human Performance Research Institute.

Admission

Admission requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. In addition, students require:

The completion of a four-year Kinesiology (BKIN)/Physical Education (BPE) or Recreation Management and Community Development (BRMCD) degree, or equivalent,

Or

Completion of a four-year undergraduate degree other than a BKIN/BPE or BRMCD, or equivalent, with a suitable academic background in the area of study,

Or

Completion of a Pre-Masters program at the University of Manitoba, or equivalent.

Application Deadlines

Students seeking fall (September) admission should submit their applications, with complete supporting documentation, directly to the Faculty of Graduate Studies by February 1. Applications received after this deadline will be considered on a case-by-case basis. Applications from students interested in commencing their program in January or May will also be considered on a case-by-case basis. Please contact the FCRM Graduate Program Office for further information.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar.

Students must:

- Complete a minimum of 12 credit hours of course work approved by the faculty advisor. Of these 12 credit hours, a minimum of nine credit hours must be at or above the 7000 level; a minimum of six credit hours must be selected from the 7000 level course offerings in Kinesiology and Recreation Management with PERS 7000 Research in Kinesiology and Recreation Studies (3) being compulsory; and
- Enter the program with, or complete as part of the approved program of study, a minimum of six credit hours in research methods and/or statistics. The required course, PERS 7000 Research in Kinesiology and Recreation Studies, may be considered for credit towards this requirement.
- Within their program of study, students may complete a maximum of two PERS 7080 Directed Studies (different topics) for a total of six credit hours; however, only three credit hours will count towards the minimum 12 credit hour course work requirement

In addition to course work requirements, a student must engage in research and scholarship leading to the completion of a thesis, and attend a minimum of eight research seminars sponsored by the Health, Leisure and Human Performance Research Institute within the first two years of their program. NOTE: Seminar attendance is a supplementary regulation.

Second language reading requirement: None

Expected time to graduate: Two years

M.A. (Kinesiology and Recreation),

Fields of Research

The Master of Arts (Kinesiology and Recreation) or Master of Science (Kinesiology and Recreation) provides advanced education and research training within sub-disciplines including kinesiology, physical education, health, human performance, recreation, leisure, and tourism studies.

Research Facilities

Resources and supports for M.A. related research are jointly provided by the Faculty of Kinesiology and Recreation Management and the Health, Leisure and Human Performance Research Institute.

Admission

Admission requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. In addition, students require:

The completion of a four-year Kinesiology (BKIN)/Physical Education (BPE) or Recreation Management and Community Development (BRMCD) degree, or equivalent,

Or

Completion of a four-year undergraduate degree other than a BKIN/BPE or BRMCD, or equivalent, with a suitable academic background in the area of study,

Or

Completion of a Pre-Masters program at the University of Manitoba, or equivalent.

Application Deadlines

Students seeking fall (September) admission should submit their applications, with complete supporting documentation, directly to the Faculty of Graduate Studies by February 1. Applications received after this deadline will be considered on a case-by-case basis. Applications from students interested in commencing their programs in January or May will also be considered on a case-by-case basis. Please contact the FCRM Graduate Program Office for further information.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar.

Students must:

- Complete a minimum of 12 credit hours of course work approved by the faculty advisor. Of these 12 credit hours, nine credit hours must be at or above the 7000 level; a minimum of six credit hours must be taken from the 7000 level course offerings in Kinesiology and Recreation Management with PERS 7000 Research in Kinesiology and Recreation Studies (3) being compulsory; and,
- Enter the program with, or complete as part of the approved program of study, a minimum of six credit hours in research methods and/or statistics. The required course, PERS 7000 Research in Kinesiology and Recreation Studies, may be considered for credit towards this requirement.
- Within their program of study, students may complete a maximum of two PERS 7080 Directed Studies (different topics) for a total of six credit hours; however, only three credit hours will count towards the minimum 12 credit hour course work requirement.

In addition to the course work requirements, a student must engage in research and scholarship leading to the completion of a thesis, and attend a minimum of eight research seminars sponsored by the Health, Leisure and Human Performance Research Institute within the first two years of their program. NOTE: Seminar attendance is a supplementary regulation.

Second language reading requirement: None

Expected time to graduate: Two years

Ph.D. in Applied Health Sciences, The Faculty of Kinesiology and Recreation Management, along with the Faculty of Nursing, Faculty of Human Ecology, and School of Medical Rehabilitation, offers a multi-unit Ph.D. in Applied Health Sciences. Information on this program may be found in another section of this calendar.

Page URL,
<http://crscalprod1.cc.umanitoba.ca/KinesiologyandRecreationManagement.catx>

Kinesiology and Recreation Management Course Descriptions-Phys Ed & Rec Studies General

PERS 7000 Research in Kinesiology and Recreation Studies
Concepts and issues in designing, implementing, and disseminating research in areas broadly related to kinesiology and leisure. It is recommended that students complete this compulsory course within their first year of enrolment in the Master's program.

PERS 7002 Community Development: Qualitative Methods
Students will be introduced to the traditions in the qualitative field, explore the theoretical foundations that underpin qualitative inquiries, and develop their capacity to think critically about ethical issues involved in the research process (e.g. working with marginalized groups and conducting community-based research.

PERS 7004 Current Research in Physical Activity, Health and Leisure: Physical Aspects
This course will include the presentation of research evidence-based current thought on physical activity, health and leisure. Pre-requisites: courses in anatomy, physiology/exercise physiology, and biomechanics, or permission of course coordinator.

PERS 7080 Directed Study in Kinesiology and Recreation
Provides opportunities for in-depth individualized study within a specific area of interest. Can be completed twice (different topics) for a maximum of 6 credits. Only 3 credits may count toward the minimum requirement of 12 credits.

Physical Education Course Descriptions

PHED 7050 Motor Development and Characteristics of Atypical Children
(Formerly 057.705) Motor development and motor characteristics of various groups of atypical children. Program design and activity prescription for atypical children. Prerequisite: PHED 3390 or 057.339.

PHED 7060 Social and Psychological Components of Sports and Physical Education
(Formerly 057.706) The socio-psychological components of movement and the role of physical activity in the socio-psychological development of children. Prerequisite: PHED 3460 or 057.346 plus consent of instructor.

PHED 7080 Individual Study in Selected Area
(Formerly 057.708) Provides opportunities for in-depth individualized study within a specific area of interest. Can be completed twice (different topic) for a maximum of 6 credits.

PHED 7100 Developmental Human Kinetics
(Formerly 057.710) The development of human movement from conception to adulthood with particular reference to the effects of development on activity and the effects of activity on development. Prerequisites: PHED 2550 or 057.255 plus additional 3 credit hours of approved coursework in human development.

PHED 7110 Biomechanical Analysis of Movement
(Formerly 057.711) The theory and techniques of biomechanical analysis of movement and application of the techniques to movement analysis. Prerequisites: PHED 4360 or 057.436.

PHED 7120 Sociological Perspectives of Children's Physical Activity
(Formerly 057.712) Sociological factors which influence children's physical activity. Prerequisite: PHED 3460 or 057.346 plus consent of instructor.

PHED 7130 Anatomical Biomechanics
(Formerly 057.713) A study of the biomechanical aspects of muscle and joint forces during human movements as they relate to the mechanics of athletic injuries and injury prevention. Prerequisite: PHED 3060 or 057.306 plus consent of instructor.

PHED 7140 Mechanisms of Athletic Injuries
(Formerly 057.714) The study and analysis of the causes and mechanisms of injuries in sports and exercise situations, including methods of prevention and rehabilitation. Prerequisite: PHED 7130 or 057.713.

PHED 7150 Current Topics in Exercise Physiology
(Formerly 057.715) Current research pertaining to factors that affect exercise

performance, as well as the physiological adaptations which occur with acute and chronic exercise. Prerequisite: PHED 4410 or 057.441. May not be held for credit with former 57.703.

PHED 7160 Special Topics

(Formerly 057.716) The study of the contemporary research and theory in a selected area. Topics will vary, depending on faculty expertise and student need.

Recreation Studies Course Descriptions

REC 7010 Leisure and Recreation: Concepts and Theories

(Formerly 123.701) Critical analysis of the dominant concepts, theories, and research associated with the development of basic and applied knowledge in recreation and leisure studies. Prerequisite: instructor's permission.

REC 7030 Issues in Leisure and Recreation Management

(Formerly 123.703) Current trends and issues in the management of leisure and recreation resources and services. Prerequisite: instructor's permission.

REC 7040 Issues in Leisure for Persons with Disabilities

(Formerly 123.704) Contemporary issues and research in recreation and leisure services for individuals with disabilities across the lifespan. Prerequisite: instructor's permission.

REC 7050 Issues in Outdoor Recreation

(Formerly 123.705) Current trends and research related to the social and physical implications of leisure behaviour in the natural environment. Prerequisite: instructor's permission.

REC 7060 Issues in Tourism

(Formerly 123.706) Contemporary issues and research related to travel behaviour and sustainable tourism. Prerequisite: instructor's permission.

REC 7070 Leisure Across the Lifespan

(Formerly 123.707) Dominant concepts, theories, and research associated with the study of recreation and leisure across the lifespan. Prerequisite: instructor's permission.

REC 7080 Directed Study in Recreation and Leisure Studies

(Formerly 123.708) This course, which can be completed twice for a maximum of 6 credits, provides opportunities for in-depth individualized study within a specific area of interest.

REC 7090 Special Topics in Recreation and Leisure Studies

(Formerly 123.709) Contemporary research and theory in selected areas of recreation and leisure studies, the topics addressed in this course will vary depending on faculty expertise and student need. Prerequisite: instructor's permission.

Landscape Architecture

Landscape Architecture ,

For information regarding programs offered by the following units:

[Architecture](#)

[City Planning](#)

[Design and Planning Ph.D.](#)

[Interior Design](#)

Please click on the links above for more information.

Landscape Architecture ,

Landscape Architecture Program Info,

The program leading to the Master of Landscape Architecture degree at the University of Manitoba was the first graduate program in Canada. It is accredited by Graduate Studies

the Canadian Society of Landscape Architects, and the department is a member in good standing of the International Council of Educators in Landscape Architecture. Approximately 55-65 full-time students are enrolled in the program, representing all regions of Canada and other countries of the world.

Study is directed towards the analysis, planning and design of exterior spaces, both urban and rural. The program emphasizes the development and testing of physical forms intended to positively affect the quality of the designed environment; forms which are responsive to societal needs, while remaining expressive of the physiographic conditions associated with specific geographic locations.

The general objectives of the program are:

- the articulation of a theoretical basis for the design of the built environment
- the development of a practical design methodology
- the exploration of societal, technical and natural processes as form determinants
- regional resources analysis and activity allocation
- the investigation of issues associated with landscape architectural practice.

The department attempts to provide a sense of need and purpose for each student, through the investigation of contemporary urban and rural environmental problems from micro to regional scales.

Fields of Research

Faculty in the Department have a variety of research interests including:

- urban design
- landscape aesthetics
- ecological design
- design philosophy
- cultural theory and design
- public urban space
- urban typology
- design education
- landscape memorials
- landscape urbanism
- regional planning and design
- landscape art
- community design
- prairie landscapes
- landscape perception

Research Facilities

The Faculty of Architecture has an excellent library, a slide library, a products catalogue library, a workshop, and a comprehensive CADLAB. The Department uses the Delta Marsh and Star Lake Field Stations for field ecology work.

Master of Landscape Architecture (M.Land.Arch.),

Admission

Candidates for a Master degree in Landscape Architecture must possess a degree from a recognized degree granting university.

See the department of Landscape Architecture website for additional application requirements.

Application Deadlines

The application deadline for September start is December 1 for all International applicants and January 15 for all Canadian/US applicants.

Applications received after January 15 will be considered if places are still available, but early application is strongly recommended.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this calendar.

Degree Requirements: 42-111 credit hours

Second language reading requirement: none

Expected time to graduation: 3 years full-time study.

Page URL,

<http://crscalprod1.cc.umanitoba.ca/LandscapeArchitecture.cax>

Landscape Architecture Course Descriptions-6000 Level

LARC 6150 Landscape Architecture Communication

(Formerly 031.615) The objectives of this course are to promote an awareness of the diversity of graphic expression and to encourage experimentation. Students are given the opportunity to practice drawing and graphic communication skills and techniques through studio exercises.

Landscape Architecture Course Descriptions-7000 Level

LARC 7002 Land Construction and Professional Practice

Introduction, investigation and fundamental exercises in landscape design and construction documentation, and construction administration for landscape construction projects.

LARC 7020 Field Studies

A one- or two-week field study block course at the start of winter term or during mid-term break, co-requisite with winter term studios.

LARC 7040 Design Research

The focus is on critical review of the literature, the formulation of research methods appropriate to securing, analyzing, and interpreting of research in Landscape Architecture, and the examination of approaches to design as a mode of enquiry and research.

LARC 7110 Landscape Architecture Studio 1

An introductory study of structure and order within nature and the built environment. Instruction in the principles of design, the basic elements of graphic and spatial composition, and the vocabulary and methods of approach to landscape architectural design within a variety of contexts.

LARC 7120 Special Topics in Landscape Architecture

(Formerly 031.712) An assignment and conference course. A detailed study of some special topics in landscape architecture, including environmental sustainability, urban landscape technology, and housing form.

LARC 7160 Landscape Architectural Field Ecology

(Formerly 031.716) Field study of plant taxonomy and ecology. Approximately two weeks duration immediately prior to the beginning of fall term. For Landscape Architecture students or with consent of department head.

LARC 7222 Landscape Architecture Studio 2

An exploration of analytical, conceptual, and developmental aspects of urban public places in an experimental studio setting. An emphasis is placed on design as mediation between competing demands. The studio incorporates the application of

three-dimensional simulation technologies in design.

LARC 7250 Landscape Architecture Theory

(Formerly 031.725) Investigation of the theoretical foundations of landscape architecture in order to understand the complex nature of its practice, to identify its disciplinary boundaries, understand its multidisciplinary nature and to investigate assumptions and myths that permeate its limited discourse.

LARC 7300 Landscape Topics

A critical examination of an individual topical study of relevance to contemporary landscape architecture. This course will lead to the completion of a practicum or thesis proposal.

LARC 7310 Landscape Design Seminar 1

A cross-cultural overview of significant discourses with an emphasis on the influence of critical design inquiry upon specific landscape interventions.

LARC 7320 Landscape Design Seminar 2

An examination of the means by which ideas are expressed in and through design with a focus on modes of communication, representation and engagement.

LARC 7330 Landscape Architecture Studio 3

The study of design application of highly complex problem domains of the urban, suburban, townsite, or rural landscape.

LARC 7340 Landscape Architecture Studio 4

Comprehensive design studio involving transition between larger scale planning/design proposals for an urban/regional area and site design; includes principles of spatial modeling.

Law

Law ,

Law Program Info,

The Faculty offers a structured and personal LL.M. experience designed for successful completion within one calendar year, beginning in September. In addition to course work, the student must complete a thesis of 90 to 120 pages. Each student is assigned a faculty advisor with expertise in the chosen area of study, who will direct thesis research and design and assist the student in course selection. Each student is also assigned an external reader who will review and evaluate the thesis. Early and regular contact with the advisor is advised.

In the first term, the student will complete a required seminar course entitled Legal Research and Theory. The seminar's focus on various theoretical approaches to legal scholarship and alternative approaches to legal study, legal research, and writing is designed to assist the student in approaching the thesis work, provide unity to the program, and facilitate the collegial exchange of ideas. The seminar is a privileged forum in which the student can discuss his or her research and legal experience. In addition to the graduate seminar course, the student will successfully complete a minimum of two courses, to be taken in either term, and selected with the approval of the advisor. One course may be taken in a faculty other than Law. The student will also take part in academic seminars and functions.

The Master of Laws degree enhances career prospects. This is evidenced by the fact that our international and Canadian graduates have secured positions in academia, international corporations, legal practice, and highly competitive doctoral programs.

Fields of Research

The Faculty of Law has many research interests and strengths. In addition to basic areas of common law — property, contract, tort, criminal, constitutional, evidence, administrative, tax, and family — faculty expertise includes Aboriginal law, ADR, administrative law, Charter, children and the law, corporate/commercial, legal history, human rights, intellectual property, international law, international trade, law and literature, law and film, money laundering, and prisoners' rights. The Faculty is home to the Asper Chair in International Business and Trade Law; the Marcel A. Desautels Centre for Private Enterprise and the Law; and the Centre for Human Rights Research.

Research Facilities

The E.K. Williams Law Library offers full time support and facilities for research, including state-of-the-art computer access. Graduate students have their own dedicated graduate research room, with individual desks, storage, and a private lounge. (International students should bring with them country-specific materials including statutes, codes, judgments and reference books needed for their thesis research).

Winnipeg is home to archival collections of materials relevant to legal studies. Collections include the Provincial Archives of Manitoba and its Government Records Centre, the Manitoba Legal-Judicial Archives, and the Legislative Library. The Provincial Archives house the Hudson's Bay Company Archive, which contains millions of mainly pre-1900 documents. This is a unique and important resource for law and society studies related to the fur trade, the Hudson's Bay Company, First Nations, Métis and Inuit cultures, and Canadian and English legal history.

Master of Laws (LL.M.),

Admission

In addition to the requirements of the Faculty of Graduate Studies set out in the Graduate Studies Regulations Section of this Calendar, candidates must show that they are equipped intellectually to engage in advanced legal study and research. The Faculty of Law anticipates that the prospective LL.M. student will have earned the LL.B. or equivalent degree in law with a first or high upper second (A or B+) standing. Applicants ordinarily hold a common law or Canadian civil law degree but applications from those whose legal education has been in another legal system will be given full consideration.

Please see our website: <http://umanitoba.ca/law> or contact the Faculty of Law at: lawgrad@ms.umanitoba.ca for additional information and application procedures.

Applicants from non-English speaking countries must have an English language proficiency of 600-plus TOEFL score (paper based) and may be required by the Faculty of Law to demonstrate proficiency based on other tests accepted by the Faculty of Graduate Studies. Some international students have arrived six to twelve months in advance of applying for admission to the LL.M. program in order to enrol in English as a Second Language courses at the University of Manitoba.

The Faculty of Law offers the Dickson, Freedman, Kristjansson, Sgayias, Asper, and Desautels Graduate Fellowships. In partnership with the Faculty of Graduate Studies, the Faculty of Law may make additional awards. Applicants may wish to research other educational funding opportunities including support from the legal profession and awards, scholarships, and bursaries available from or tenable at the University of Manitoba. Canadian embassies offer basic information services and should be contacted early. Similarly, visa applications should be made early. Criteria for admission, awards and fellowships are found on the Graduate Studies and Law web sites.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Students must attend the university full-time for a minimum of one academic year (normally September to May). Students are expected to complete the LL.M. program in one calendar year (normally, September to August for October convocation), although two years is permitted. Students must complete a satisfactory thesis on a subject approved by the advisor, to be submitted not later than eight weeks before the anticipated date of graduation. The student must successfully complete two courses in addition to the graduate Legal Research and Theory course. Courses will be chosen in consultation with the advisor.

Subjects of Graduate Study

A candidate's subject of study shall be approved by the Graduate Studies Committee of the Faculty of Law. Thesis design, refinement and research will be supervised by a member of the Law Faculty/the student's advisor.

Second language reading requirement: none
Graduate Studies

Expected time to graduate: one year, although two years is permitted.

Ph.D./S.J.D. in Law,
The Faculty of Law does not offer a Ph.D./S.J.D. Program.

Page URL,

<http://crscalprod1.cc.umanitoba.ca/Law.catx>

Law Course Descriptions

LAW 7110 Graduate Legal Research and Theory (Formerly 045.711) Begins with visits to the Law Library and to the Provincial Archives of Manitoba, Government Records Centre, then epistemological problems are studied to define each student's research questions for the thesis; and thereafter weekly seminars explore doctrinal, interdisciplinary, comparative, and theoretical research perspectives (natural law to legal positivism, critical legal studies and post-modernism).

Linguistics

Linguistics,

Linguistics Program Info,

The Department of Linguistics offers individualized and flexible graduate programs leading to both the Master of Arts and the Doctor of Philosophy degrees. For students who want to pursue in-depth and especially field-based research on language, the University of Manitoba, which is situated in a linguistically diverse region, is an ideal location. The research programs of most past and current graduate students in the department involve original fieldwork, either with the local indigenous languages or in such places as China and the South Pacific.

Fields of Research

The department has research strengths in both formal and functional/typological approaches to the core areas of linguistics (phonetics, phonology, morphology, and syntax), as well as historical linguistics, language planning and policy, text-based analysis and computational linguistics. The department's research draws on a wide range of languages, such as Hebrew, Persian, Tswana and American Sign Language, and the department is also a world centre for the study of the Algonquian family of languages. In addition to journal articles and monographs, department members produce reference grammars, dictionaries, and text collections for local languages.

Research Facilities

In addition to professional audio recorders (analogue, DAT and solid-state) available for fieldwork, the department maintains the Experimental Linguistics Laboratory, which features an anechoic audio recording chamber, professional audio and video recording equipment, and workstations for editing and analysis of recorded data.

M.A. in Linguistics,

Admission

Admission requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. The M.A. program in linguistics is strongly research-oriented; admission decisions are, therefore, based only in part on the applicant's academic record; the department's resources and interests also play an important role. A four-year B.A. in linguistics is the normal preparation for the M.A. program. Students without such preparation may be required to complete the pre-Master's year first. The department has additional application procedures beyond those of the Faculty of Graduate Studies. Contact the Linguistics department for information.

Application Deadlines

The M.A. program in linguistics starts September 1. Other start dates are possible only under exceptional circumstances. The deadline for applications to be received in the Faculty of Graduate Studies from International students is January 15. For Canadian/U.S. students, applications should be submitted to the Faculty of Graduate Studies by March 15th.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. The Master of Arts program in Linguistics requires 18 credit hours of coursework at the graduate level, including Field Methods (LING 7590), Phonology (LING 7550), and Syntax (LING 7630). The remaining courses (6 credit hours) may be taken in either linguistics or related disciplines, subject to approval by the department's graduate committee. In certain cases the graduate committee may require the student to take additional courses. Students are encouraged to complete their coursework by the end of the first year of the program. M.A. candidates must demonstrate proficiency in a second language. In addition to coursework and the language reading requirement, students must complete and successfully defend a thesis.

Second Language Reading Requirement: Yes

Expected time to Graduation: Two years

Ph.D. in Linguistics, Admission

Admission requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. The Ph.D. program in linguistics is strongly research-oriented; admission decisions are, therefore, based only in part on the applicant's academic record; the department's resources and interests also play an important role. Students with a Master's degree in linguistics from the University of Manitoba or with an equivalent degree from elsewhere may be admitted into the Ph.D. program. Students who have a Master's degree but lack the specific course background for admission to the Ph.D. program may be admitted into the M.A. program. After completion of the M.A. course requirements with an average of B+ such students may apply to transfer directly to the Ph.D. program without completing the M.A. The department has additional application procedures beyond those of the Faculty of Graduate Studies. Contact the Linguistics department for further information.

Application Deadlines

The Ph.D. program in linguistics starts September 1. Other start dates are possible only under exceptional circumstances. The deadline for applications to be received in the Faculty of Graduate Studies from International students is January 15. For Canadian/U.S. students, applications should be submitted to the Faculty of Graduate Studies by March 15th.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Ph.D. students will normally complete 18 credit hours coursework at the graduate level. Courses are to be chosen in consultation with the advisor and students are encouraged to complete them by the end of the first year of the program.

Candidacy Exams

Candidacy Exams are normally written in the second year of the Program. These exams consist of two original research papers of publishable quality in distinct areas of linguistics. Students must pass an oral exam based on each of the two papers.

Ph.D. candidates must demonstrate proficiency in a second language. This will at the same time satisfy the language reading requirement of the Faculty of Graduate

Studies. Students who have satisfied this requirement at the M.A. level will be deemed to have met this requirement at the Ph.D. level.

Students must complete and successfully defend a dissertation. In preparation for this step, a written dissertation proposal must be presented and defended orally, normally in the third year.

Second language requirement: yes

Expected time to graduation: four years

Page URL,
<http://crscalprod1.cc.umanitoba.ca/Linguistics.catx>

Linguistics Course Descriptions

LING 7500 Linguistic Variation and Change
(Formerly 126.750) Focuses on sources, causes and patterns of linguistic change, spread of changes and the resulting relationships among languages.

LING 7510 Linguistic Typology
(Formerly 126.751) Highlights universals and differences in phonological, morphological and/or syntactic structures drawn from data from a wide variety of languages.

LING 7550 Phonology
(Formerly 126.755) Presents a theoretical approach to current issues in phonological analysis, building and testing hypotheses about phonological data.

LING 7570 Semantic Theory
(Formerly 126.757) A theoretical approach to current issues in semantics focusing on formal and logical aspects of meaning.

LING 7580 Computational Linguistics
(Formerly 126.758) Computational modelling of language and the use of computational tools in linguistic research.

LING 7590 Field Methods
(Formerly 126.759) Provides practical experience in techniques for data collection, analysis and interpretation of original data, through guided work with a speaker of a language unfamiliar to students. As the course content will vary from year to year, students may take this course more than once for credit.

LING 7620 Seminar in North American Indian Languages
(Formerly 126.762) The linguistic structure of a North American language or group of languages. As the course content will vary from year to year, students may take this course more than once for credit.

LING 7630 Syntax
(Formerly 126.763) Presents a theoretical approach to current issues in syntactic analysis, building and testing hypotheses about syntactic data.

LING 7920 Special Problems in Linguistic Research
(Formerly 126.792) Specialized topics in linguistics. As the course content will vary from year to year, students may take this course more than once for credit.

LING 7940 Graduate Reading and Research 1
(Formerly 126.794) Independent reading and/or research on a selected topic. As the course content will vary from year to year, students may take this course more than once for credit.

LING 7950 Graduate Reading and Research 2
(Formerly 126.795) Independent reading and/or research on a selected topic. As the course content will vary from year to year, students may take this course more than once for credit.

Management/Business Administration

Management/ Business Administration

Management/ Business Administration,
Management Program Info,

The University of Manitoba's Asper School of Business offers three graduate degrees for those interested in furthering their business and management understandings and skills. The AACSB accredited programs are:

- **Asper MBA;**
- **M.Sc. in Management;** and
- **Ph.D. in Management.**

The Asper MBA is a tightly integrated 60 credit hour program, led by internationally-recognized academics and professionals, and conducted in an interactive and dynamic face-to-face learning environment. The core of the program provides a common business leadership and managerial base for all students. Beyond the core exists a host of management electives and concentrations for individuals to choose from. All core courses are required, unless exemption, advance standing, transfer or course substitution is granted. The program can be taken either full- or part-time.

The M.Sc. Program in Management is designed to produce graduates who have an academically more in-depth, rigorous training in their chosen management field than is normally the case either for the B.Comm (Hons.) graduates or MBA graduates. In addition, the program seeks to develop strong research skills for the graduates in order to meet the needs of employers as well as to more effectively prepare Master's students for doctoral work within various areas of concentration in the departments of supply chain management, marketing, and business administration.

The Ph.D. Program in Management is designed to prepare individuals for teaching and research careers in universities, or for applied research positions in either the private or public sector. The program is based upon the premise that contemporary managerial problems are typically multi-faceted and need to be examined from a perspective that is not restricted by the boundaries of any single discipline. The inter-disciplinary nature of the program extends beyond the Asper School of Business to related disciplines across the University of Manitoba. Areas of concentration include: finance, marketing, organizational behaviour, organizational theory, human resource management, strategy and entrepreneurship.

Fields of Research

The Asper School of Business is one of the best equipped management schools in Canada for research in managerial issues of national and international interest.

Researchers in business administration are examining a wide range of issues including organizational change and conflict management, job stress, work role socialization, compensation structures, goal setting, employment equity and discrimination.

Researchers in marketing and entrepreneurship are studying issues of national loyalty in international air travel, the role of affect in consumer behaviour, the effect of body image portrayals on consumers, international marketing and country of origin issues, information processing and sales person behaviours, the nature of effective small firm niche strategies and a variety of social marketing issues, how the age of the consumer affects the impact of advertising, and the nature of effective small firm niche strategy.

In the accounting and finance area, research programs span issues in accounting standards, asset pricing, national, and international capital markets and international corporate finance.

In the supply chain management area, researchers are examining issues such as efficiency of transportation and logistics, production and operations.

Research Facilities

The Asper School of Business occupies the Drake Centre for Management Studies. The centre houses case rooms, lecture theatres, computer laboratories, a graduate study area, and research space.

The Albert D. Cohen Management Library holds approximately 40,000 volumes and subscribes to some 3000 current online and print periodicals. It maintains an annual report collection, specialized trade directories, and financial investment services. The Library subscribes to the major online services including ProQuest, Business Source Premier, Canadian Business and Current Affairs Complete, JSTOR, Mergent, Emerald, the Economist Intelligence Unit, and FinancialPost.infomart.ca. In addition, as a unit of the University of Manitoba Libraries, management students have access to some 200 additional online database services.

Academic and applied research is conducted in the Transport Institute, the Stu Clark Centre for Entrepreneurship, and the Centre for Accounting Research and Education which subscribes to the following databases: S & P Compustat, CRSP, TSX CMFRC, and NYSE TAQ.

ASPER MBA,

The Asper MBA, operating year-round and welcoming to full and part-time study, is a face-to-face on-campus 60 credit hour program composed of three powerfully crafted and complementary program elements

- **Executive Leadership**—a mandatory series of three courses (9.0 credit hours) designed to have you explore the challenges, responsibilities, and everyday realities of leading an enterprise in today's ever demanding global context.
- **Business Management Essentials**—a balanced set of mandatory courses (39.0 credit hours) in marketing, accounting, finance, human resources and supply chain management designed to equip you with the latest business management understandings and practices.
- **Advanced Elective Concentrations**—a variety of four-course (12.0 credit hours) elective packages in Finance, Management Accounting, Marketing, Human Resource Management, Supply Chain Management, Business-Government Relations, and Health Administration designed to allow the opportunity to heighten your expertise in a specific management field or to further develop your own interdisciplinary interests.

An individual can complete the program in as short as one year or one can take up to six years on a part-time basis (three years being the average). If a student's circumstances change, he or she can adjust the pace to maintain a personal balance. Courses are offered once or twice per year, and are scheduled to optimize course progression.

Students can start the program in August or January. The academic year is composed of three terms—fall (August-December), winter (January-March), and summer (April-July). Depending on academic background, students may qualify for up to 30 credit hours of course exemptions, which can reduce one's program length and cost (exemption requests are reviewed on a case-by-case basis).

Admission

Admission decisions are made carefully. Not only is one's academic ability considered, but also one's professional and leadership experience. Admission is granted on a competitive basis with all selection criteria considered equally. With applicants normally exceeding the customary minimums, the Asper MBA admission criteria are:

- **Previous Academic Achievement**—a minimum of a baccalaureate degree or its equivalent from an accredited university, having attained in the most recent 60 credit hours of university-level work, a competitive grade point average (our average at admission is 3.4 on a 4.5 grading scale, or approximately equivalent to a "B+" or 75%). That said, the program is annually permitted to admit a small number of highly experienced and gifted individuals who do not hold the required baccalaureate, but who have demonstrated both the potential for

leadership and an ability to meet the academic demands of an MBA. Such individuals must have meaningful work experience, outstanding performance in an alternate program of study such as a professional designation or certificate program, and have a strong GMAT score;

- **Professional & Leadership Experience**—a minimum of three years of work experience is preferred, preferably in a professional or managerial role;
- **Graduate Study Readiness**—a competitive score on the Graduate Management Admissions Test (our average is 580). For further GMAT details, please visit www.mba.com; and, for students whose first language is not English,
- **English Language Proficiency**—a minimum score of 80 (internet-based) or 550 (paper-based) on the TOEFL, or comparable CanTEST, AEPUCE, IELTS, MELAB results.

Admission Deadline

One can apply at anytime through the year, and completed applications will be reviewed at a monthly admission meeting by the Asper MBA Admissions Committee. However, deadlines do exist for August and January program commencement purposes, and applications received after the deadline dates will be considered for the following entry gate:

- **For August start**—January 15th for International applicants and May 1st for North American/Permanent Resident applicants; and
- **For January start**—June 15th for International applicants and October 1st for North American/Permanent Resident applicants.

Program Requirements

The Asper MBA's 48 credit hours of mandatory courses are:

Required Core Courses

Course Title	Credit Hours
ACC 6050 Accounting 1*	3
ACC 6060 Accounting 2*	3
FIN 6072 Corporate Finance*	3
MIS 6150 Management of Information Systems & Technology*	3
GMGT 6030 Organization Theory and Behaviour*	3
GMGT 7010 Business Policy Seminar**	3
GMGT 7080 Research Methods	3
HRIR 7450 Industrial Relations/Human Resource Management*	3
IDM 7510 Strategic Leadership and Managing Change	1.5
GMGT 7710 Managerial Communications	1.5
IDM 7720 Business Conditions Analysis	1.5
INTB 7730 International Business*	1.5
GMGT 7740 Business/Government Relations*	1.5
IDM 7060 Professional Seminar	6
MKT 6080 Marketing*	3
ENTR 7240 Entrepreneurship and New Venture Formation*	1.5
MSCI 5010 Mathematics for Management***	3 Aux
MSCI 6070 Quantitative Analysis for Management*	3
OPM 6090 Production Management*	3
Total	48 (plus 3 Aux)

NOTES:

* Eligible for exemption.

** GMGT 7010 Business Policy Seminar constitutes the comprehensive examination. The course must be completed at the University of Manitoba normally in the final term (last 15 credit hours) of a student's program.

***GMGT 5010 is an auxiliary or additional course required for those who don't have the requisite level of mathematical background at program start. Please contact Asper MBA office for details.

Elective Courses

Graduate Studies

In addition to the mandatory leadership and business courses, students are required to take 12 credit hours of graduate-level coursework from the I.H. Asper School of Business or, where approved, from other Faculties. Students will be able to choose a General Management option — completion of any 12 hours of MBA program electives in different areas — or to undertake an Individual Interdisciplinary concentration consisting of graduate courses in another faculty (with a management focus). As well, students can choose to concentrate all 12 credit hours of electives in a focused area.

These concentrations are currently offered in:

Finance

Marketing

Human Resource Management and Organizational Behaviour

Supply Chain Management

Business Government Relations (with some courses from the MPA program)

Management Accounting (partnership with CMA Manitoba)

Health Administration (through select courses at the Faculty of Medicine)

Courses required for each area of concentration are listed below (please note that not all electives are available each year):

Finance

Four courses from:

FIN 7070	Theory of Financial Management	3
FIN 7080	International Finance	3
FIN 7152	Investment Policy	3
FIN 7220	Advanced Seminar in Finance	3
FIN 7232	Seminar in Financial Intermediaries and Capital Markets	3
FIN 7260	Selected Topics in Finance	3
FIN 7240	Readings in Accounting and Finance	3

Management Accounting

In partnership with CMA Manitoba, a student can earn a "Management Accounting" concentration on successful completion of CMA's **Accelerated Program and CMA's National Entrance Exam**.

The Accelerated Program is a ten month intermediate and advanced accounting program that is offered annually by by CMA Manitoba. For details, please contact the Asper MBA Office.

Marketing

Four courses from:

MKT 7080	Selected Topics in Marketing	3
MKT 7200	Decisions and Concepts in Marketing	3
MKT 7210	Marketing and Competitive Behaviour	3
MKT 7220	Seminar in Marketing	3
MKT 7230	Seminar in Consumer Behaviour	3
MKT 7100	Readings in Marketing	3
MKT 7300	International Marketing	3

Human Resource Management and Organizational Behaviour

Two of the following are required:

HRIR 7162	Staffing	3
HRIR 7164	Training and Development	3
HRIR 7168	Management of Labour and Employee Relations	3
HRIR 7166	Compensation	3

Plus two courses from:

HRIR 7162	Staffing	3
HRIR 7164	Training and Development	3
HRIR 7168	Management of Labour and Employee Relations	3
HRIR 7166	Compensation	3

HRIR 7460	Collective Bargaining	3
GMGT 7090	Organizational Decision-Making	3
GMGT 7100	Interpersonal Processes	3
INTB 7032	Comparative Industrial Relations and Human Resource Management	3
INTB 7040	International Organizational Behaviour	3
GMGT 7350	Administration: Selected Topics	3
Supply Chain Management		
Each of:		
SCM 7010	Advanced Supply Chain Management (mandatory)	3
OPM 7300	Topics in Advanced Production and Operations Management (mandatory)	3
Plus two from:		
GMGT 7370	Managing Innovation	3
IDM 7010	Industry Project	3
Other SCM or OPM electives		
Business Government Relations		
Each of:		
POLS 7370	Seminar in Theory and Practice of Public Administration	6
MKT 7080	Business, Markets and Public Policy	3
Plus one of:		
POLS 7300	Public Finance	3
POLS 7340	Canadian Government	3
POLS 7550	Contemporary Issues in Canadian Politics	3
POLS 7300	Directed Readings in Public Administration	3
Health Administration		
Four courses from:		
CHSC 7130	Methods in Health Services Research and Evaluation	3
CHSC 7290	Economic Evaluation of Health Care	3
CHSC 7300	Health Policy and Planning	3
CHSC 7310	Epidemiology of Health Care	3
CHSC 7320	Organization and Financing of the Canadian Health Care System*	3
CHSC 7510	Current Topics in Community Health	3
CHSC 7520	Principles of Epidemiology 1*	3
IDM 7010	Industry Project**	3

The MBA program curriculum and concentrations are subject to change upon appropriate approval.

Faculty Based M.Sc. in Management, Admission

Students admitted to the M.Sc. in Management degree program will pursue a research-focused degree in one of the departments of Marketing, Business Administration or Supply Chain Management. In addition to satisfying the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar, applicants must possess at least a 4-year honours (or equivalent) degree from a recognized university in either a) management/business with a major in the same area or a similar area to be pursued in the M.Sc. or b) a degree from another Faculty with a closely related major. Applicants must provide the following prior to admission:

- A statement of goals and interests;
- An official transcript of academic record with a minimum grade point average of 3.0 on a 4.5 scale (approximately 70% or a "B") in the last 60 credit hours;
- A score on a graduate aptitude test, preferably the GMAT, with a minimum score of 550 (GRE will be accepted with a mean percentile score across the three areas similar to the current acceptable percentile level of the GMAT);
- Three letters of recommendation two of which are from persons who know the candidate's academic ability.

Admission Deadline

The deadline to apply is January 10 for International applicants and March 10 for North American/Permanent Resident applicants (for early consideration, all applicants are encouraged to apply by January 10). Applications received after the deadline date will be considered if space permits.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. The basic program design assumes that students have completed an honours degree or its equivalent. Additional courses may be required subject to the discretion of the I.H. Asper School of Business Graduate Committee if it is deemed that the candidate's preparation is not sufficient in his/her area of specialization. The student's advisory committee will make recommendations regarding deficient background, and the final program will be approved by the Graduate Research Program Committee.

All students must complete the following course requirements:

A minimum of 18 credit hours plus a thesis/practicum. This minimum will include:

- a) at least 6 credit hours of required graduate level courses in the student's area of specialization; b) up to 12 credit hours of optional courses (subject to the approval of the Graduate Committee); c) a thesis or a practicum.

Business Administration (Industrial Relations/Human Resource Management/Management of Organizations/Organizational Behaviour) Option

One of: GMGT 7440 Organizational Theory or GMGT 7410 Organizational Behaviour

One of: GMGT 7540 or GMGT 7080 Research Methods, or an equivalent graduate level course in quantitative methods from another Faculty*

Four additional optional courses but, among them, students are encouraged to take: 1) an additional research methods course (quantitative or qualitative) and either a statistics or econometrics course and 2) a philosophy of science course.*

NOTES:

* Required for Health Administration concentration.

** Can be used as a 3 credit hour elective course for field placements in health care organizations upon approval of the MBA Program Committee. Placements and supervision of the placements will be the responsibility of the Department of Community Health Sciences.

Health Administration courses are scheduled by the Department of Community Health Sciences and may not fit within the normal MBA elective schedule.

Readings/Research Option

With the approval of the MBA Program Committee and the academic area involved, a student can choose to undertake an industry project or a readings course. The industry projects and readings courses count as three credit hours of elective coursework. A student is allowed up to two readings courses or one readings course and one industry project during the program. An industry or readings proposal must be submitted to a faculty supervisor and the MBA Program Committee for approval prior to registration for the course. Projects and reading courses can normally only be taken within the Asper School of Business, and normally cannot be counted towards a concentration.

No thesis option available

Second language reading requirement: none

Expected time to graduate: 1 - 6 years

Master's thesis or research practicum

*Students are advised to check with the Graduate Program Office at the I.H. Asper School of Business for a list of suggested courses.

- Three letters of recommendation from persons who know the candidate's academic ability;
- Evidence of research and teaching ability.

Marketing Option

Any six credit hours from:

MKT 7100 Readings in Marketing

MKT 7110 Doctoral Seminar in Marketing

MKT 7120 Seminar in Buyer Behaviour or MKT 7230 Seminar in Consumer Behaviour

Six credit hours of approved research methods coursework at the graduate level.*

Additional six credit hours of approved coursework relevant to the chosen area of study.

*Students are advised to check with the Graduate Program Office at the I.H. Asper School of Business for a list of suggested courses.

Supply Chain Management Option

Nine credit hours in:

SCM 7010 Advanced Supply Chain Management

GMGT 7080 Research Methods

OPM 6090 Production Management

Nine credit hours of additional courses relevant to the area of specialization.

Second language requirement: none

Expected time to graduate: 1-3 years

Faculty Based Ph.D. in Management,
Admission

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar, an earned Master's degree (MBA preferred), and in exceptional cases, a Bachelor's degree in a management or business discipline from a recognized institution, or a discipline sharing a common origin or a parallel discipline to the applicant's chosen area of concentration, is required.

Prior to admission, the candidate is to provide the following:

- A statement of goals and interests;
- An official transcript of academic record with a minimum grade point average of 3.0 on a 4.5 scale (3.5 preferred), (approximately 70% or a "B") in the last 60 credit hours;
- A score on a graduate aptitude test, preferably the GMAT, with a minimum score of 600 (GRE will be accepted with a mean percentile score across the three areas similar to the current acceptable percentile level of the GMAT);

Admission Deadline

The deadline to apply is January 10 for all applicants.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. The basic program design assumes that students have completed an MBA degree or its equivalent. The MBA degree constitutes the "core" of knowledge that is prerequisite to proceeding to Ph.D. study since it provides the breadth of knowledge necessary for Ph.D.'s in Management. Students who are deficient in this "core" may be required to take additional MBA-level courses. Decisions regarding deficient background will be made by the student's advisory committee, subject to the approval of the Graduate Research Program Committee.

All students must complete the following course requirements:

A minimum of 12 hours of study in the chosen area of specialization, as approved by the advisory committee. (See specific specialization requirements that follow).

Faculty-Based Doctoral Courses

PHDM 7110 Doctoral Seminar in Management (3)

PHDM 7120 Management Research Project I (3)

PHDM 7130 Management Research Project II (3)

Research Methods

A minimum of 6 hours of research methods courses, as approved by the advisory committee.

Support Area

A minimum of 9 hours of study in a chosen support area, as approved by the advisory committee. A minimum of 3 of these hours must be taken outside the Asper School of Business.

Minimum total Credit Hours: 36

NOTE: The student's advisory committee may require additional coursework.

Area of Specialization Required Coursework:

Finance

FIN 7500	Financial Theory and Corporate Policy	3
FIN 7510	Finance 1: Capital Markets	3
FIN 7520	Finance 2: Corporate Finance	3
FIN 7530	Advanced Topics in Finance	

Marketing

MKT 7100	Readings in Marketing	3
MKT 7110	Doctoral Seminar in Marketing	3
	Plus a minimum of 6 hours within the Marketing area	

Organizational Behaviour or Organizational Theory/Strategy/ Human Resource Management/ Entrepreneurship

GMGT 7410	Doctoral Seminar in Organizational Behaviour	3
GMGT 7440	Doctoral Seminar in Organizational Theory	3
	Plus a minimum of 6 hours within Business Administration area of concentration.	
	Second language requirement: none	

Expected time to graduate: 4 - 5 years

<http://crscalprod1.cc.umanitoba.ca/Management/BusinessAdministration.catx>

Accounting and Finance Course Descriptions-ACC 6000 Level

ACC 6050 Accounting 1

(Formerly 009.605) Principles and concepts of accounting underlying the measurement of business income and evaluation of performance.

ACC 6060 Accounting 2

(Formerly 009.606) The uses, limitation, and interpretation of financial statements; accounting details and reports used in planning, control, and decision-making. Prerequisite: ACC 6050 (or 009.605) or IDM 7720.

Accounting and Finance Course Descriptions-FIN 6000 Level

FIN 6072 Corporate Finance

The financial management of businesses including agency problems, valuation, capital budgeting, risk/return relationships, the term structure of interest rates, market efficiency, long-term financing, capital structure, and the use of options and futures for risk management. Not to be held with either of the former 009.607 or FIN 6070. Prerequisite: ACC 6050 or 009.605) or IDM 7720.

Accounting and Finance Course Descriptions-MIS 6000 Level

MIS 6150 Management of Information Systems and Technology

(Formerly 009.615) This course covers the frameworks and concepts of managing information systems and knowledge management, decision support, electronic commerce, systems development, management information systems strategy and strategic information systems. Not to be held with 009.613 or 009.614

Accounting and Finance Course Descriptions-FIN 7000 Level

FIN 7070 Theory of Financial Management

(Formerly 009.707) Study of selected topics in the various fields of financial management; emphasis on trends, current problems, and research in the fields. Prerequisite: FIN 6072 (or FIN 6070 or 009.607).

FIN 7080 International Finance

(Formerly 009.708) The theory and practice of financial management in an international context. Includes foreign currency markets, exchange rates, measurement and management of foreign currency risk, international financing, and foreign direct investment. Prerequisite: FIN 6072 (or FIN 6070 or 009.607)

FIN 7150 Investment Policy

(Formerly 009.715) Topics will include the structure of rates in the financial markets, the problem of investment timing and selection, and principles of financial analysis. Prerequisite: FIN 6072 (or FIN 6070 or 009.607).

FIN 7152 Investment Policy

The theory and practice of investment management. Topics include: portfolio theory and management, market efficiency, options and futures. This course cannot be held with FIN 7150. Prerequisite: FIN 6072 (C+) [or FIN 6070 (C+) or 009.607 (C+)].

FIN 7220 Advanced Seminar in Finance

(Formerly 009.722) A case-oriented course that will require extensive preparation and presentation of selected cases in corporate financial management; emphasis on the application of theoretical models of finance to real problems. Prerequisite: FIN 6072 (or FIN 6070 or 009.607) or consent of instructor.

FIN 7230 Seminar in Financial Intermediaries and Capital Markets

(Formerly 009.723) Topics will include the major participants in the capital markets and their functions; the demand and supply of money and the structure of interest rates; recent developments and international factors in the capital markets. Prerequisite: FIN 6072 (or FIN 6070 or 009.607).

FIN 7232 Financial Intermediaries and Capital Markets

Topics include: the major participants in the capital markets and their functions, the demand and supply of money and the structure of interest rates, non money financial instruments, recent developments and international factors in the capital markets and capital market risk issues. This course cannot be held with FIN 7230. Prerequisite or concurrent requirement: FIN 6072 (C+) [or FIN 6070 (C+) or 009.607 (C+)].

FIN 7240 Readings in Accounting and Finance

(Formerly 009.724) Supervised readings in one of the areas of accounting and finance.

FIN 7260 Selected Topics in Finance

(Formerly 009.726) A study of selected topics in finance relating to advanced issues in theory or practice. Topics considered will depend on the interests and needs of the participants. Prerequisite: FIN 6072 (or FIN 6070 or 009.607) plus others if specified by the professor.

FIN 7500 Financial Theory and Corporate Policy

(Formerly 009.750) Explores the conceptual and theoretical foundations of finance and their applications to corporate financial policy. Prerequisite: admission to the Ph.D. program in Management (Finance) or approval by instructor.

FIN 7510 Finance 1: Capital Markets (Ph.D)

(Formerly 009.751) An understanding of the theory and empirical research in capital markets including theories and tests of financial asset valuation, portfolio analysis and market efficiency. Prerequisite: admission to the Ph.D. program in Management (Finance) or approval by instructor.

FIN 7520 Finance 2: Corporate Finance (Ph.D)

(Formerly 009.752) Theoretical issues in corporation finance. Issues covered will include investment choice and shareholder unanimity, capital structure, dividend irrelevancy, corporate and personal taxes, bankruptcy costs, agency cost, asymmetric information and signalling models, theory of the firm, and corporate takeovers. Prerequisite: admission to the Ph.D. program in Management (Finance) or approval by instructor.

FIN 7530 Advanced Topics in Finance (Ph.D)

(Formerly 009.753) Seminar emphasizing the mathematical tools necessary for financial decision making including an introduction to stochastic processes, stochastic dominance, and separation theorems. Applications in derivative markets, investment theory, and corporate finance. Prerequisite: admission to the Ph.D. program in Management (Finance) or approval by instructor.

Accounting and Finance Course Descriptions-IDM 7000 Level

IDM 7010 Industry Project

(Formerly 098.701) Supervised study and research of a problem opportunity in business or management. Specific course requirements determined by the faculty member assigned to be the course coordinator. In addition, each project will be supervised by a faculty member expert in the area. Projects consist of written report(s) containing substantive, practical evidence and analytically structured comments, academic materials, and bibliographical references. Pass/Fail basis only. Prerequisite: completion of all 600-level MBA courses (or equivalent experience) and consent of MBA program director.

IDM 7020 Managing for Sustainable Development

(Formerly 098.702) Strategic issues related to the manager's role in sustainable development, including enterprises in the renewable and non-renewable resource sectors, life-cycle analysis, and full cost accounting. Emphasis is placed on environmental management control systems, environmental performance measurement, reporting, and the impact of environmental management on strategic management decisions.

IDM 7030 Social and Community Awareness Project

(Formerly 098.703) An experiential project examining issues related to economically and/or socially disadvantaged individuals and groups with emphasis on corporate social responsibility. This course is graded pass/fail.

IDM 7040 Leadership and Personal Development Seminar

(Formerly 098.704) Preparation in computer, technical, interpersonal, and team-building skills for MBA MANITOBA program. This course is graded pass/fail.

IDM 7050 International Study Trip

(Formerly 098.705) A supervised international experience to examine the relationship between corporations, senior managers, and social institutions in selected countries. Examination of the interplay between culture, economic development, management systems and strategies in other countries. Emphasis upon establishment of business networks on an international basis.

IDM 7060 Professional Seminar

(Formerly 098.706) A series of modules on executive leadership and professional management topics.

IDM 7070 Fundamental Professional & Leadership Seminar

(Formerly 098.707) Series of seminars covering fundamental topics essential for modern management including business ethics and managing diversity.

IDM 7080 Professional and Leadership Seminar

(Formerly 098.708) Series of seminars covering fundamental topics essential for modern management including such topics as: aboriginal business, managerial law, situational leadership, creating shareholder value, developing a business plan, and career management.

IDM 7510 Strategic Leadership and Managing Change

(Formerly 027.751) An examination of the role of the manager as a change agent and processes associated with strategic vision and change. Analysis of factors affecting strategic decisions and how organizations adapt to their environment. Emphasis is upon the role of leaders: transformational leadership, charisma, organizational design and managing organizational culture change.

IDM 7720 Business Conditions Analysis

(Formerly 027.772) This course provides an awareness and understanding of key components of the economic and business environment. It explores critical forces that affect daily business decision-making including market supply and demand, the time value of money, and a firm's profitability and valuation. As well, the course introduces the concept of financial reporting.

Business Administration Course Descriptions-GMGT 6000 Level

GMGT 6030 Organization Theory and Behaviour

(Formerly 027.603) An examination of current theories of structure and behaviour as they apply to organizations in the public and private sector. Emphasis upon research findings and their application in management situations.

Business Administration Course Descriptions-GMGT 7000 Level

GMGT 7010 Business Policy Seminar

This course entails the study of general management. Students shall integrate the concepts from the various functional areas of the organization covered in the program with the different environments: social, political, economic and technological. Students will analyze general management problems, shall formulate policies, and display ability to implement policies. Must be taken in final term in the program.

GMGT 7040 Systems Analysis for Management

(Formerly 027.704) The concepts of systems analysis used to provide an analytical framework for study of management as the integrative process which cuts across functional divisions and operational activities.

GMGT 7060 Readings in Business Administration

(Formerly 027.706) Supervised readings in one of the areas of business administration including human resource management, industrial relations, organizational behaviour, policy and environment.

GMGT 7070 Administrative Studies Research Project

(Formerly 027.707) Research in any one of the areas of administrative studies.

GMGT 7080 Research Methods

(Formerly 027.708) Principles of research design and data collection with examples drawn across the areas of marketing management, industrial relations, policy analysis, etc. Both cases and computer-based exercises are used. Prerequisite: MSCI 5010 (or 164.501 or 027.501).

GMGT 7090 Organizational Decision-Making

(Formerly 027.709) A study of the goal-setting and decision-making processes in organizations and the implications for the growth and survival of such organizations.

GMGT 7100 Interpersonal Processes

(Formerly 027.710) An examination of theories of interpersonal behaviour and processes as they apply to managerial situations. Emphasis upon individual behaviour and change, group dynamics, leadership behaviour, and communications.

GMGT 7110 Business and Its Environment

(Formerly 027.711) Analysis of the environmental factors within which a business operates.

GMGT 7120 Organizational Power and Politics

(Formerly 027.712) An examination of personal, interpersonal and organizational power in the context of organizational politics. Topics covered include rational versus political models of organizations, the accumulation and management of personal power, the politics of decision-making, the politics of managerial succession, the politics of budgets, authority, intergroup conflict, and bargaining and negotiation processes.

GMGT 7350 Administration: Selected Topics

(Formerly 027.735) Topics in one of the areas of business administration including human resource management, industrial relations, organizational theory and behaviour, and business policy and strategic management.

GMGT 7360 Organizational Behaviour and Self Development

(Formerly 027.736) This course will operate in a seminar format with two goals. The first goal is to provide an environment in which the student can develop and manage to successful conclusion a project in which they have significant intrinsic interest. The second goal is to improve the student's understanding of the inner life of an organization by increasing his/her ability to discriminate between the organizational "ropes to skip and the ropes to know."

GMGT 7370 Managing Innovation

(Formerly 027.737) An examination of organizational design characteristics in the context of a competitive international perspective. Emphasis is on organizational and technological innovation to facilitate the development of new products or processes or to implement change in existing products or processes. Topics covered include Canadian experience and policy, facilitators and inhibitors in the creative process, diffusion of innovations, and the aims of the patent process.

GMGT 7400 Readings in Organizational Behaviour (Ph.D.)

(Formerly 027.740) An examination of theory and research from the social and administrative sciences that focuses on the interaction between organizations and their environments. The evaluation and synthesis of theoretical and empirical work in this area will be emphasized. Prerequisite: admission to the Ph.D. program in Management (Organizational Behaviour) or approval by instructor.

GMGT 7410 Doctoral Seminar in Organizational Behaviour (Ph.D.)

(Formerly 027.741) An examination of theory and research from the social and administrative sciences that is relevant to the behaviour of individuals and groups within organizations. Emphasis will be placed on evaluation and synthesis of theoretical and empirical work in this area. Prerequisite: admission to the Ph.D. program in Management (Organizational Behaviour) or approval by instructor.

GMGT 7440 Doctoral Seminar in Organizational Theory (Ph.D.)

(Formerly 027.744) The major goal of this course is to familiarize students with central schools of thought within organization theory. As with other theories in the social sciences, these schools of thought tend to be based on differing assumptions about the nature of the organizational world, the operation of causality, epistemology, and the role of human actors. Prerequisite: admission to the Ph.D. program in Management (Organizational Behaviour) or approval by instructor.

GMGT 7470 The Fundamentals of Public Policy Analysis

(Formerly 027.747) Introduction to the basic concepts and objectives of public policy analysis. Analytic tools and techniques of policy analysis: cost-benefit analysis, forecasting, design and application of program evaluations, implementation of evaluation results. Case studies in policy analysis.

GMGT 7490 Regulatory Processes and Policies

(Formerly 027.749) Analysis of the processes of regulation of private sector conduct and performance. Methods and effects of regulation. Purpose of regulatory statutes.

Sources of initiative in the regulatory process. The effects of regulation. Formulation of general empirical rules for the behaviour of regulatory agencies. Politics and economics of regulatory reform.

GMGT 7510 Strategic Leadership and Managing Change
(Formerly 027.751) An examination of the role of the manager as a change agent and processes associated with strategic vision and change. Analysis of factors affecting strategic decisions and how organizations adapt to their environment. Emphasis is upon the role of leaders: transformational leadership, charisma, organizational design and managing organizational culture change.

GMGT 7520 Issues in Managerial Communication
(Formerly 027.752) An examination of strategies and development of skills for effective oral, written, non-verbal, interpersonal, group, cross-cultural, and ethical communication in management.

GMGT 7530 Selected Topics
(Formerly 027.753) An examination of current issues in areas which could, for example, include: organizational behaviour, organizational theory, strategy, human resource management, and industrial relations. Prerequisite: consent of instructor.

GMGT 7540 Doctoral Seminar in Research Methods (Ph.D.)
(Formerly 027.754) Principles of research design and data collection appropriate for the areas of marketing, management, industrial relations, policy analysis, finance, management science, etc. Research problems and issues will be discussed from a number of perspectives. Conceptual material, statistical analyses, theoretical material and the utilization of statistical application software are used as the bases for seminar discussion. Prerequisite: admission to the Ph.D. program in Management or approval by instructor.

GMGT 7670 Business Decision Analysis
(Formerly 027.767) Development and applications of quantitative methods to solve decision-making problems under uncertainty. Topics include the structuring of complex decision problems, utility theory, subjective probability, value of information, risk sharing, and group decisions. Prerequisite: MSCI 6070 (or 164.607 or 027.607).

GMGT 7710 Managerial Communication
(Formerly 027.771) Focus is on the interpersonal, intergroup, and intraorganizational communication skills required for effective leadership, and the objectives are to assist the participants in the following: increasing the clarity, correctness, and effectiveness of written and oral communication; recognizing and analysing communication dynamics at work in personal, group, and organizational interactions; increasing combination flexibility and proficiency in times of corporate challenge, change, and crisis.

GMGT 7720 Business Conditions Analysis
(Formerly 027.772) To provide an awareness of key components of the economic/business environment. Identifies critical indicators that affect decision-making and suggests strategies for forecasting future conditions. Topics covered include critical demographic trends, the change technological frontier, international trade, finance, and investment trends, and trends in interest rates and exchange rates. A theoretical overview will precede the discussion of business conditions indicators.

GMGT 7740 Business/Government Relations
(Formerly 027.774) Focuses on the logic of political-economic-business relations. The point of view is that of the manager. Specific tools of analysis are discussed that assist managers in understanding and working with aspects of public policy which interface with their private sector decisions.

Business Administration Course Descriptions-INTB 7000 Level

INTB 7030 Comparative Management
(Formerly 027.703) Comparative study and evaluation of management philosophy and practices in cross-cultural setting; the cultural, economic, and political environment which influence management decision-making. Not taught every year.

INTB 7040 International Organizational Behaviour
The examination of dilemmas and opportunities that managers face when they work in a cross-cultural setting. The purpose of this course is to develop the necessary understandings and skills to effectively manage problems arising from the interaction of people from different cultures in work settings. Not to be held with

INTB 7030 (or 027.703).

INTB 7730 International Business
(Formerly 027.773) Develop an appreciation of business decision-making in an international/global context. Learning activities are focused towards developing intellectual and interpersonal skills in order for managers to function more effectively in international markets.

Business Administration Course Descriptions-HRIR 7000 Level

HRIR 7140 Topics in Industrial Relations/Human Resource Management
(Formerly 027.714) An in-depth analysis of various topics in industrial relations and human resource management. Prerequisite or corequisite: HRIR 7450 (or 027.745).

HRIR 7162 Staffing
This advanced graduate seminar provides an understanding of the staffing function of Human Resources Management. The course focuses on how recruitment, selection, performance management, and retention management function within an organization to gain a competitive advantage through the management of work and people.

HRIR 7164 Training and Development
This advanced graduate seminar provides an understanding of the training and development functions of Human Resources Management. The course focuses on how to design, implement, and evaluate a training program, and employee development and career management.

HRIR 7166 Compensation
A review of the major concepts and design of compensation systems including: strategy, internal equity, external competitiveness, rewarding individual contributions, performance incentives, employee benefits, government regulations, union role in compensation, budgets and administration.

HRIR 7168 The Management of Labour and Employee Relations
An examination of the systems of labour and employee relations in Canada as it compares with the systems of other countries. Emphasis upon understanding and managing labour and employee relations in a changing economy. Not to be held with HRIR 7500 (or 027.750).

HRIR 7450 Industrial Relations/Human Resource Management
(Formerly 027.745) The process of valuing, employing, developing, motivating and maintaining human resources in an industrial society. An introduction to the study of labour relations in the social technical systems of the Federal Government, the Provincial Government and profit and non-profit organizations.

HRIR 7460 Collective Bargaining
(Formerly 027.746) The labour management relations in the negotiation and administration of the collective agreement. The analysis of conflict and the application of bargaining theories. Pre- or corequisite: HRIR 7450 (or 027.745).

Business Administration Course Descriptions-ENTR 7000 Level

ENTR 7240 Entrepreneurship and New Venture Formation
(Formerly 118.724) Entrepreneurship and enterprising behaviour with an emphasis on the identification and evaluation of viable new venture concepts and their development into successful enterprises.

Ph.D. Program Course Descriptions-PHDM 7000 Level

PHDM 7110 Doctoral Seminar in Management (Ph.D.)
(Formerly 119.711) Examination of the philosophy of science in management and overview of management research typologies, methods, and the role of research in the practice of management. Prerequisite: admission to the Ph.D. program in Management or approval by instructor.

PHDM 7120 Management Research Project 1 (Ph.D.)
(Formerly 119.712) Examination of research designs and preparation of theoretical paper in management. Prerequisite: admission to the Ph.D. program in Management or approval by instructor.

PHDM 7130 Management Research Project 2 (Ph.D.) (Formerly 119.713) Departments in the faculty offer two types of graduate programs, those leading to Master of Science and Doctor of Philosophy degrees and those leading to specialization and certification in a clinical discipline. Combinations of such programs can be arranged on an individual basis for students wishing both clinical and basic science research experience. Prerequisite: admission to the Ph.D. program in Management or approval by instructor.

Interdepartmental Course Descriptions-IDM 7000 Level

IDM 7010 Industry Project

(Formerly 098.701) Supervised study and research of a problem opportunity in business or management. Specific course requirements determined by the faculty member assigned to be the course coordinator. In addition, each project will be supervised by a faculty member expert in the area. Projects consist of written report(s) containing substantive, practical evidence and analytically structured comments, academic materials, and bibliographical references. Pass/Fail basis only. Prerequisite: completion of all 600-level MBA courses (or equivalent experience) and consent of MBA program director.

IDM 7020 Managing for Sustainable Development

(Formerly 098.702) Strategic issues related to the manager's role in sustainable development, including enterprises in the renewable and non-renewable resource sectors, life-cycle analysis, and full cost accounting. Emphasis is placed on environmental management control systems, environmental performance measurement, reporting, and the impact of environmental management on strategic management decisions.

IDM 7030 Social and Community Awareness Project

(Formerly 098.703) An experiential project examining issues related to economically and/or socially disadvantaged individuals and groups with emphasis on corporate social responsibility. This course is graded pass/fail.

IDM 7040 Leadership and Personal Development Seminar

(Formerly 098.704) Preparation in computer, technical, interpersonal, and team-building skills for MBA MANITOBA program. This course is graded pass/fail.

IDM 7050 International Study Trip

(Formerly 098.705) A supervised international experience to examine the relationship between corporations, senior managers, and social institutions in selected countries. Examination of the interplay between culture, economic development, management systems and strategies in other countries. Emphasis upon establishment of business networks on an international basis.

IDM 7060 Professional Seminar

(Formerly 098.706) A series of modules on executive leadership and professional management topics.

IDM 7070 Fundamental Professional & Leadership Seminar

(Formerly 098.707) Series of seminars covering fundamental topics essential for modern management including business ethics and managing diversity.

IDM 7080 Professional and Leadership Seminar

(Formerly 098.708) Series of seminars covering fundamental topics essential for modern management including such topics as: aboriginal business, managerial law, situational leadership, creating shareholder value, developing a business plan, and career management.

IDM 7510 Strategic Leadership and Managing Change

(Formerly 027.751) An examination of the role of the manager as a change agent and processes associated with strategic vision and change. Analysis of factors affecting strategic decisions and how organizations adapt to their environment. Emphasis is upon the role of leaders: transformational leadership, charisma, organizational design and managing organizational culture change.

IDM 7720 Business Conditions Analysis

(Formerly 027.772) This course provides an awareness and understanding of key components of the economic and business environment. It explores critical forces that affect daily business decision-making including market supply and demand, the time value of money, and a firm's profitability and valuation. As well, the course introduces the concept of financial reporting.

Marketing Course Descriptions-MKT 6000 Level

MKT 6080 Marketing

(Formerly 118.608) Analysis of the evolution and characteristics of marketing systems; the various types of consumers and their behaviour; marketing activities of the firm; legislation at all levels which affect marketing decisions.

Marketing Course Descriptions-MKT 7000 Level

MKT 7080 Selected Topics in Marketing

(Formerly 118.708) A study of selected areas of recent development in the field of marketing. Topics may include the marketing of services, market research, business to business marketing, marketing channel systems, personal selling or sales management, and physical distribution. Prerequisite: MKT 6080 (or 118.608)

MKT 7100 Readings in Marketing (Ph.D.)

(Formerly 118.710) A survey of current literature in the major areas of marketing and marketing research. Emphasis upon empirical developments as they affect the application of marketing concepts.

MKT 7110 Doctoral Seminar in Marketing (Ph.D.)

(Formerly 118.711) Advanced study of marketing thought integrating the functional areas of marketing. Seminars on selected research topics and recent developments in the field.

MKT 7120 Ph.D. Seminar in Buyer Behavior (Ph.D.)

(Formerly 118.712) Concepts and literature relating psychological and sociological perspectives to buyer behaviour in Marketing. Prerequisite: consent of instructor.

MKT 7200 Decisions and Concepts in Marketing

(Formerly 118.720) Application of the principles of marketing from a managerial viewpoint; emphasis on marketing planning, strategy, and control; and appraisal of the effectiveness of marketing activities. Prerequisite: MKT 6080 (or 118.608).

MKT 7210 Marketing and Competitive Behaviour

(Formerly 118.721) Designed to give the student a deeper understanding of the dynamics of marketing behaviour. Oriented towards theoretical conceptualizations of the problems and practices in marketing areas. Prerequisite: MKT 6080 (or 118.608).

MKT 7220 Seminar in Marketing

(Formerly 118.722) Study of selected topics in marketing with emphasis on recent theoretical developments and their application. Prerequisite: MKT 6080 (or 118.608).

MKT 7230 Seminar in Consumer Behaviour

(Formerly 118.723) Intensive study of consumer behaviour as it relates to the marketing function. Prerequisite or concurrent requirement: MKT 6080 (or 118.608).

MKT 7300 International Marketing

(Formerly 118.730) A study of problems and opportunities of marketing in foreign environments. It will focus on the cultural, economic and geographical problems encountered in managing the marketing function from a Canadian manager's perspective. Prerequisite: MKT 6080 (or 118.608).

MKT 7500 Readings in Marketing

(Formerly 118.750) Supervised readings in one of the areas of Marketing. Prerequisite: MKT 6080 (or 118.608) and at least one other graduate marketing course.

Supply Chain Management Course Descriptions-MSCI 5000 Level

MSCI 5010 Mathematics for Management

(Formerly 164.501) A remedial course in linear and matrix algebra and calculus; with applications to elementary management problems. Note: this course will not be included in the calculation of the Grade Point Average. Pass/Fail. Not to be held with 027.501.

Supply Chain Management Course Descriptions-MSCI 6000 Level

MSCI 6060 Quantitative Methods

(Formerly 164.606) Topics to be selected from quantitative aspects of business

problem formulation. Sampling, time series analysis, linear regression and correlation; application to problems in business and government. Pre- or corequisite: satisfactory completion of MSCI 5010 (or 164.501 or 027.501). Not to be held with 027.606.

MSCI 6070 Quantitative Analysis for Management
(Formerly 164.607) Introduction to the use of quantitative techniques, and computers to solve management problems. Mathematical optimization models, network analysis, and probability models. Prerequisite: MSCI 5010 (OR 164.501). Not to be held with 027.607 OR 164.607.

Supply Chain Management Course Descriptions-MSCI 7000 Level

MSCI 7550 Readings in Management Science (Ph.D.)
(Formerly 027.755) A study of recent literature in the Management Sciences and their applications, with emphasis on new developments.

MSCI 7560 Doctoral Seminar in Management Science (Ph.D.)
(Formerly 027.756) Seminars on the selected research topics of recent advances in the field of Management Science covering areas of current interests.

MSCI 7680 Mathematical Optimization Models
(Formerly 164.768) A specialized course in mathematical optimization. Linear programming, integer programming, Fritz John and Kuhn-Tucker theorems, quadratic programming, nonlinear programming, duality, network analysis. Prerequisite: OPM 6090 (or 164.609 or 027.609).

MSCI 7690 Probability Models and Games
(Formerly 164.769) A specialized course in probabilistic models. Topics include Markov chains, queues, inventories, simulation, games, search problems. Prerequisite: MSCI 6070 (or 164.607 or 027.607) or consent of instructor.

MSCI 7700 Mathematical Control Models
(Formerly 164.770) Quantitative aspects of large-scale systems models. Design, implementation, maintenance, and use of such systems, including mathematical models of the firm, and information requirements; systems tests and evaluations. Prerequisite: MSCI 6070 (or 164.607 or 027.607).

Supply Chain Management Course Descriptions-OPM 6000 Level

OPM 6090 Production Management
(Formerly 164.609) Analysis of the basic concepts of production systems, and operation and control of such systems. Not to be held with 027.609.

Supply Chain Management Course Descriptions-OPM 7000 Level

OPM 7300 Topics in Advanced Production and Operations Management
(Formerly 164.730) A study of recent developments in production systems and management. Topics include systems design, plant location and layout, inventory systems planning and control. Prerequisite: OPM 6090 (or 164.609 or 027.609)

Supply Chain Management Course Descriptions-SCM 7000 Level

SCM 7010 Advanced Supply Chain Management
(Formerly 164.701) Provides students at the graduate level with an in-depth examination of the major issues associated with the management of supply chains. The course content includes both managerial and technical matters, and addresses issues such as the importance of supply chain management in meeting global competition, internet and e-business application, supply chain integration and relationships, sharing risks and rewards, and the reduction of variance in supply chain performance. Prerequisite: A degree in business or discipline related to supply chain management or approval by instructor.

SCM 7690 Probability Models and Games
A specialized course in probabilistic models. Topics include Markov chains, queues, inventories, simulation, games, search problems.

Health Administration Course Descriptions

CHSC 7130 Methods in Health Services Research and Evaluation
(Formerly 093.713) Examines the process of planning and conducting research and evaluation to assess health services with an emphasis on the methods by which a question may be translated into a testable hypothesis, and the specification of a research plan that will produce results of maximum internal and external validity.

CHSC 7200 Health and Health Care in Developing Countries
(Formerly 093.720) The course will focus on the patterns of mortality and morbidity in developing countries and the organization of health care services. Social, cultural, and economic development will be related to health and health services.

CHSC 7210 Epidemiology of Women's Health
(Formerly 093.721) This course will deal with problems and concerns particular to women's health. The topics will be approached from an epidemiological perspective but use will be made of materials from health economics, evaluation research, medical sociology and anthropology.

CHSC 7220 Health and Health Services of Native People
(Formerly 093.722) This course provides a detailed review of the health status and the determinants of health of Canada's native people.

CHSC 7270 Epidemiology of Chronic (Non-Cancer) Diseases
(Formerly 093.727) The objective is to study the natural history of chronic diseases including the distribution of diseases, risk and prognostic factors, rationale and strategies for prevention. The methodological issues concerning the investigation of severe disease are also discussed. Prerequisite: a minimum grade of "B" in CHSC 7520 (or 093.752).

CHSC 7290 Economic Evaluation of Health Care
(Formerly 093.729) The objectives of this course are to enable students to understand economic evaluation methodologies (cost-effectiveness, cost-benefit, cost-utility analysis) as applied to health care and to familiarize them with the applied literature on economic evaluation of health care. Prerequisite: permission of instructor.

CHSC 7300 Health Policy and Planning
(Formerly 093.730) This course defines health policy and describes the planning and decision-making process. Case studies will be used to illustrate and critique the substance, process and outcome of policy papers that address contemporary policy issues. Prerequisite: permission of instructor.

CHSC 7310 Epidemiology of Health Care
(Formerly 093.731) This course will discuss the advantages and disadvantages of using large administrative data bases for research purposes. Substantive topics dealt with include: regional variations in provision and utilization of health care, short- and long-term outcomestudies, individual physician behaviour, and technology assessment. Policy implications are considered. Prerequisite: a minimum grade of "B" in CHSC 7520 (or 093.752) or equivalent and permission of instructor.

CHSC 7320 Organization and Financing of the Canadian Health Care System
(Formerly 093.732) Students will study the historical development and current structure of the Canadian health care system and relate its development to changes in social and political factors. The course provides an economic perspective on current policy issues in the organization, financing, and delivery of health care in Canada.

CHSC 7330 Cultural Perspectives on Illness and Medical Practice
(Formerly 093.733) The objective of this course is to make students aware of the ways in which disease, illness, and medical practice are socially and culturally mediated. The course will examine cultural influences on the experience and expression of illness and consider the medical practitioner's role in the development and provision of culturally responsive health care. Prerequisite: permission of instructor.

CHSC 7360 Clinical Trials
(Formerly 093.736) The Randomized Clinical Trial is the only true experiment in clinical research. This course is intended to give students a detailed knowledge of the design and implementation of RCTs. Students will participate in a qualitative review of RCTs. Prerequisites: a minimum grade of "B" in CHSC 7520 (or 093.752) , CHSC 7470 (or 093.747), CHSC 7480 (or 093.748) or equivalents.

CHSC 7380 Prevention and Health

(Formerly 093.738) The course will cover frameworks used in -formulating preventive strategies. Topics will include risk factor assessment, screening, health education, legislation, litigation, lifestyle and prevention. Actual case studies will be used. Prerequisite: CHSC 7520 (or 093.752) and CHSC 7530 (or 093.753).

CHSC 7390 Health Promotion

(Formerly 093.739) An examination of theories, principles, practices and settings for health promotion. Prerequisite: permission of instructor.

CHSC 7400 Directed Readings I: In Epidemiologic Methods

(Formerly 093.740) An opportunity for advanced students to acquire knowledge in a defined and specific area of interest. Prerequisites: permission of instructor and Graduate Program Director.

CHSC 7410 Directed Readings: II - In Epidemiology

(Formerly 093.741) An opportunity for advanced students to acquire knowledge in a defined and specific area of interest. Prerequisite: permission of instructor and Graduate Program Director.

CHSC 7430 Seminars on Advanced Topics: II - In Methods of Health Care

(Formerly 093.743) Sem-inars dealing with current research issues, emerging methodologies and analytical techniques will be offered for advanced students. Prerequisite: permission of instructor.

CHSC 7450 Epidemiology of Communicable Diseases

(Formerly 093.745) Overview of epidemiological principles in communicable disease investigation and prevention and specific issues in controls of certain specific communicable diseases of public health importance in Canada will be introduced. Prerequisite: permission of instructor. Prerequisite: a minimum grade of "B" om CHSC 7520 (or 093.752).

CHSC 7460 Environmental and Occupational Health

(Formerly 093.746) The aim of the course is to acquaint the student with the role of the environment (general and specifically working) as the determinant of health. The content of the course will be presented in the form of lectures, seminars, and field visits. Prerequisite: permission of instructor.

CHSC 7490 Empirical Perspectives on Social Organization and Health

(Formerly 093.749) This course will focus on a selected review of the epidemiological literature which has integrated social factors in the investigation of the distribution of health and illness in society. The course will review a selection of important empirical studies investigating the roles played by social, psychological and economic status factors in determining health and illness. Emphasis will be placed on identifying the central theoretical and methodological approaches to defining and measuring socioeconomic status in this literature. Prerequisite: permission of instructor.

CHSC 7510 Current Topics in Community Health

(Formerly 093.751) Focus on current issues and topics in community health, particularly as they relate to Manitoba and to Canada. Emphasis will be placed on current literature and ongoing research to examine emerging policies and programs within health care and social development. Prerequisite: basic courses in Epidemiology and Statistics. Prerequisites: a minimum grade of "B" in CHSC 7520 (or 093.752) and CHSC 7470 (or 093.747) and CHSC 7320 (or 093.732).

CHSC 7520 Principles of Epidemiology 1

(Formerly 093.752) This course will introduce the basic concepts and methods of epidemiology, including the definition and measurement of health status and health determinants in populations, assessing health risks and inferring causation, and issues in the design and analysis of population health studies.

CHSC 7530 Principles in Epidemiology II

(Formerly 093.753) This course follows the Principles of Epidemiology I and discusses the applications of epidemiologic principles in public health practice, including the investigations of epidemics, disease surveillance, clinical applications, evaluation of health programs, and the planning of preventive programs. Students will also receive instruction in microcomputer applications and use of EPI-INFO software for data entry, analysis and presentation. Corequisite: CHSC 7480. Prerequisite: a minimum grade of "B" in CHSC 7520 (or 093.752) and in CHSC

7470 (or 093.747)..

CHSC 7540 Advanced Epidemiology

(Formerly 093.754) Advanced epidemiologic research methods focusing on selected epidemiological issues (bias, confounding, matching, etc.). Discussion will be directed to both epidemiological and statistical considerations to find the optimal solution to a research problem. Prerequisites: a minimum grade of "B" in CHSC 7520 (or 093.752), CHSC 7530 (or 093.753), CHSC 7280 (or 093.728).

CHSC 7550 Observational Epidemiology

(Formerly 093.755) Intermediate epidemiologic research methods focusing on case-control and cohort studies, with discussion on issues relating to planning and design, implementation, and data analysis. Prerequisite: a minimum grade of "B" in CHSC 7520 (or 093.752) and CHSC 7530 (or 093.753) and CHSC 7470 (or 093.747) and CHSC 7480 (or 093.748)..

CHSC 7560 Epidemiology of Cancer

(Formerly 093.756) This course introduces the magnitudes, risk factors and prevention strategies of cancer. It focuses on current knowledge related to the etiology of cancer, medical interventions and potential for prevention. Prerequisite: a minimum grade of "B" in CHSC 7520 (or 093.752).

CHSC 7610 Advanced Topics in Community Health 1

Special advanced research topics in Community Health Sciences.

CHSC 7620 Advanced Topics in Community Health 2

Special advanced research topics in Community Health Sciences.

CHSC 7710 Social Aspects of Aging

This course is an advanced seminar designed to examine current social issues in aging. The course is organized around selected topics related to aging. Where possible, the Canadian experience will be compared to international trends and diversity will be highlighted. The first section is a review of the field of gerontology, ageism, demographic trends, theoretical perspectives and methods and the second section explores contemporary social issues. This course is a required course for the Graduate Specialization in Aging Certificate.

CHSC 7720 Health and Aging

This course is an advanced seminar designed to examine health and health care issues in aging. Where possible, the Canadian (or Manitoban) experience will be highlighted. Key topics in the health domain will be covered, such as frailty, mental health, and dementia. The provision of care for older adults will also be covered, focusing on both the formal care system, as well as informal care providers. This course is a requirement for the Graduate Specialization in Aging.

CHSC 7730 Topics in Health Services Research

This course will expose students to select health services research topics that are particularly relevant in Manitoba and Canada. Students are expected to actively engage in seminars led by health services researchers and decision-makers, and also provide informative presentations in their own area of research. Students will also gain knowledge about various communication and knowledge translation strategies.

CHSC 7740 Advanced Qualitative Methods

The purpose of this course is to provide students with fundamental aspects related to qualitative research methods and analysis. By the end of the course, students should have an understanding of the principles and practices involved in: the application of different social theories to qualitative methods; designing a qualitative research study; various ways of collecting qualitative data and analyzing written texts; ways of integrating qualitative methods in a mixed methods design; developing different products for knowledge exchange activities; and 'hands-on' experience in doing qualitative analysis using qualitative software.

CHSC 7810 Biostatistics for the Health and Human Sciences 1

An introduction to statistical ideas and techniques for health sciences and human research. Describing data, patterns in data, the Normal distribution. Principles of estimation and principles of hypothesis testing. Principles and practice of the major statistical tests (t tests, analysis of variance, Chi squared tests, correlation and regression). Nonparametric statistical techniques. The use of statistical software to carry out statistical analyses. Analytic decision strategies.

CHSC 7820 Biostatistics for Community Health Sciences 1

The course will cover techniques of research design and analysis for community health researchers. Topics include: principles of experimental design, study size

determination, statistical software as an analytical tool, techniques for the analysis of continuous outcomes, analysis of variance for multi-way, factorial and split-unit experiments, and multiple regression and general linear models. Introduction to more advanced statistical methods including logistic regression and survival models. Prerequisite: Undergraduate course in statistics.

CHSC 7830 Biostatistics for Community Health Sciences 2

This course will cover techniques for the analysis of complex data sets involving continuous, categorical and time-related outcome variables. Principles of statistical modeling. The behaviour of non-continuous variables. Categorical outcome variables and logistic regression. Poisson outcome variables and Poisson regression. Time-dependent outcomes, survival analysis and proportional hazards regression. Prerequisite: CHSC 7820 with a grade of B+ or better.

CHSC 7860 Methods and Concepts for Community Health Sciences

This course is designed to provide both a practical and theoretical introduction to qualitative, quantitative, and multi-method approaches used in health research. The emphasis in the course will be on applied research, consistent with the characteristics of the Department of Community Health Sciences as a whole.

CHSC 7870 Health Survey Research Methods

Students critically examine the use of health survey methodology within epidemiology. They also learn to apply survey methodology, as a means to gain a strong appreciation of the reflective, theoretical and analytical thinking required to successfully design and implement epidemiological health surveys. Prerequisites: CHSC 7820 and CHSC 7520.

Business Government Relations Course Descriptions

POLS 7280 Directed Readings in Politics

(Formerly 019.728) An independent reading and/or research course on a selected topic in political studies, undertaken and arranged in consultation with the prospective instructor, upon the approval of the Graduate Committee. As the course content will vary from year to year, students may take this course more than once for credit.

POLS 7290 Directed Readings in Politics 2

(Formerly 019.729) An independent reading and/or research course on a selected topic undertaken and arranged in consultation with the prospective instructor, upon approval of the Graduate Committee. As the course content will vary from year to year, students may take this course more than once for credit.

POLS 7300 Directed Readings in Public Administration

(Formerly 019.730) An independent reading and/or research course on a selected topic undertaken and arranged in consultation with the prospective instructor, upon approval of the Graduate Committee. As the course content will vary from year to year, students may take this course more than once for credit.

POLS 7340 Canadian Government

(Formerly 019.734) Examines the core institutions of Canadian Government and politics including parliamentary government, federalism, the Constitution and the Charter of Rights and Freedoms. Students may not hold credit for both POLS 7340 (or 019.734) and the former 019.776.

POLS 7350 Canadian Democracy

(Formerly 019.735) Examines the core institutions and processes of Canadian democracy including political parties, elections, voting, social movements, interest groups and public opinion. Students may not hold credit for both POLS 7350 (or 019.735) and the former 019.776.

POLS 7370 Seminar in the Theory and Practice of Public Administration

(Formerly 019.737) The intent of this course is to provide insight into the exigencies of actual public administration. The course will be conducted on a topical basis within the framework of certain trends facing Canadian governments today. (The course will attempt to utilize, to the fullest extent possible, the particular expertise of students in the program, faculty members, and of both elected and appointed public officials.) Students may not hold credit for both POLS 7370 (or 019.737) and the former 019.731.

POLS 7410 Selected Topics in Political Behaviour 1

(Formerly 019.741) A systematic examination of empirical research in the area of political socialization and political culture. Students may not hold credit for both POLS 7410 (or 019.741) and the former 019.725.

POLS 7470 Strategic Human Resource Management in Government

A study of the human resource management functions, including planning, staffing, training, performance management, compensation and labour relations, in ways that optimize organizational performance. This course will also address contemporary challenges including recruitment and retention, managing change, demographic shifts, and information technology.

POLS 7520 The Political Classics

(Formerly 019.752) A thorough study of selected works with special attention to methodology, historical content, theoretical position and universal significance. Students may not hold credit for both POLS 7520 (or 019.752) and the former 019.771.

POLS 7530 International Political Economy

(Formerly 019.753) An examination of the systematic study of international political economy. Particular attention is paid to the foreign economic policies of advanced industrialized states and the various issues surrounding the redistribution of wealth and influence in the contemporary international system.

POLS 7550 Contemporary Issues in Canadian Politics

(Formerly 019.755) A seminar series examining a contemporary debate in Canadian politics and government. The specific topic will vary from year to year depending on faculty interest and specialization.

POLS 7610 Political Theory and Contemporary Issues

(Formerly 019.761) An examination of recent theoretical perspectives on contemporary political institutions, problems and values. Students may not hold credit for both POLS 7610 (or 019.761) and the former 019.771.

POLS 7710 Liberalism and Its Critics

An advanced study of liberalism and various theoretical challenges to its ethical and political claims.

POLS 7720 Comparative Government

(Formerly 019.772) Three hours a week, both terms. The primary focus of this course will be on the major Western "democracies" (e.g., United Kingdom, United States, and Western Europe). Phenomena to be examined include political participation and the problems of social change in industrial societies.

POLS 7790 International Relations Theory

(Formerly 019.779) A critical assessment of basic theories and models used in International Relations, emphasizing theoretical approaches and research. Students may not hold credit for both POLS 7790 (or 019.779) and the former 019.773.

POLS 7850 Contemporary Strategic and Security Studies

(Formerly 019.785) An advanced course in strategic studies. The evolution of strategic thought in the modern period will be examined, and particular emphasis will be placed on the role of armed force in relation to the problem of international security. Students may not hold credit for both POLS 7850 (or 019.785) and the former 019.783. Normally students will be expected to have taken POLS 4730 (or 019.473) or its equivalent as prerequisite.

POLS 7910 Multivariate Research Methods

(Formerly 019.791) Introduction to the theory and application of multivariate regression models in political analysis. Students may not hold credit for POLS 7910 (or 019.791) and either the former 019.732 or 019.788.

Mathematical, Computational and Statistical Sciences

Mathematical, Computational and Statistical Sciences, Mathematical Sciences Program Info, The Master of Mathematical, Computational and Statistical Sciences is a joint program of the Departments of Mathematics, Computer Science and Statistics. The program is interdisciplinary both in concept and structure, and furthers the mission of the University of Manitoba in its intent to enhance contacts and partnerships with outside organizations.

Students enrolled in the program are employees of industry, business or government. A major component of a student's program is a practicum, which is intended to make an important contribution to a project at the student's place of employment. While working on the practicum the student will be jointly supervised by an Industry Advisor (from the student's workplace) and an Academic Advisor (from the University).

Fields of Research

All applied areas of mathematics, computer science and statistics are potential fields of research under this program.

Research Facilities

The Institute of Industrial Mathematical Sciences is a research institute within the Faculty of Science. The IIMS has the mandate to conduct applied research in the mathematical, computational or statistical sciences -- either in collaboration with industry, or on problems motivated by industrial applications. The IIMS also facilitates collaboration between mathematical scientists and industrial partners, and among mathematical scientists in different disciplines. The director of the IIMS is the coordinator of the Master of Mathematical, Computational and Statistical Sciences program.

Master of Mathematical, Computational and Statistical Sciences,

Admission

All applications will be reviewed on an individual basis, using the criteria for admission of the Faculty of Graduate Studies. Students are normally expected to have completed a four-year Bachelor's degree in Engineering, Management, Science or other related areas for entrance. In exceptional cases, industrial experience together with appropriate university courses may be considered to be equivalent to the completion of a four-year degree.

Application Deadlines

The following are the deadlines for submission of applications to the IIMS:

Start Date	Canadian/U.S.	Non-Canadian
Regular (September)	June 1	March 1
Winter (January)	October 1	July 1
Spring (May)	February 1	November 1
Summer (July)	April 1	January 1

Program Requirements

Minimum Program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this calendar. A minimum of 18 credit hours of approved course work, and a practicum. The specific courses to be taken will depend upon the student's background and area of concentration. Normally, the courses to be taken will be selected from the three participating departments, although appropriate courses from the faculties of Engineering and Management may also be permitted. A required course of all students is a graduate level Industrial Modelling course. This course is currently under development, and will be team taught by members of the three departments.

Second language reading requirement: none

Expected time to graduate: 18 months

Course Descriptions

Courses listed under the departments of Mathematics, Computer Science and Statistics are potential courses in this program.

<http://crscalprod1.cc.umanitoba.ca/Mathematical,ComputationalandStatisticalSciences.catx>

Mathematics

Mathematics ,

Mathematics Program Info,

The department offers Master's and Ph.D. programs at the graduate level, which cover many areas of mathematics. Graduates find work in industry or in academia.

Fields of Research

The department has people working in the areas of algebra, analysis, computational mechanics, computer graphics, differential equations, discrete mathematics, finite-element methods, foundations, geometry, matrix computations, numerical analysis and topology. More information about specific individuals and their current graduate students can be found on the department web pages.

The department operates several seminars in addition to graduate courses. Faculty, graduate students and visitors from all over the world participate in such research seminars. Regular seminars are held in discrete mathematics, functional analysis, rings and modules, mathematical biology, topology and universal algebra/lattice theory. There is also a weekly graduate student seminar in which graduate students give talks on topics of their choice.

Research Facilities

The department provides each graduate student with an office (shared) and access to computers, laser printers, mail, photocopier, fax machine, mathematical journals, a reading room and a lounge.

The computer room has several Macintosh and Windows computers running the operating systems - Mac O/S, Windows. Software programs include Maple, Mathematica, MathCad, Matlab, Scientific Workplace, word processing/spreadsheet programs, web access and network access to UNIX servers.

M.Sc. in Mathematics,

Admission

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, students should generally have a strong background in Mathematics with courses leading to an Honours or four-year Major in Mathematics in a B.Sc., B.A., or equivalent degree. The department's Graduate Studies Committee will evaluate the student's background. Admission to the program will be based on this evaluation. Students with other degrees or backgrounds may be eligible for admission to a pre-Master's program to the satisfaction of the department. Courses will be prescribed on an individual basis to help the student qualify for graduate work in Mathematics. Contact the department for information.

Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 4 months prior to their intended start date. International students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 9 months prior to their intended start date.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. The program consists of approved coursework and a thesis or practicum. Students are required to take 15 credit hours of coursework, of which at least 6 hours must be at the graduate level in

Mathematics and at least 6 hours in an area of Mathematics clearly different from the area of specialization of the thesis or practicum. Particular programs of study within Mathematics may require courses outside the Department of Mathematics.

Second language reading requirement: none

Expected time to graduate: two years

Ph.D. in Mathematics,
Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Students entering the Ph.D. program must have either an Honours degree or a M.Sc. degree in Mathematics.

Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 4 months prior to their intended start date. International students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 9 months prior to their intended start date.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Particular programs of study within mathematics may require courses outside the Department of Mathematics. In addition to the course work, the student is required to take a candidacy examination, which will consist of three comprehensive exams from the following areas: Algebra, Analysis, Combinatorics, Differential Equations, Geometry, Computational Mathematics, Topology, at least one of which must be Algebra or Analysis. The candidate's supervisor must approve the choice of subjects. To proceed to a Ph.D. degree a student must have a grade of "A" on each of the three parts.

Second language requirement: yes

Expected time to graduation: 3-5 years

Mathematics Course Descriptions

MATH 8010 Advanced Matrix Computations
(Formerly 136.801) Matrix computation, decomposition of matrices, iterative methods, sparse matrices, eigenvalue problems. Prerequisites: linear algebra, computing, numerical analysis, and consent of instructor.

MATH 8110 Applied Finite Element Analysis
(Formerly 136.811) Theory and practice of the finite element method of the solution of partial differential equations and its application to engineering and scientific problems. It includes the h, p and h-p versions, a priori and a posteriori error estimates, adaptability and the structure of finite element software. Prerequisite: numerical analysis and partial differential equations or consent of the instructor.

MATH 8150 Numerical Solution of Partial Differential Equations
(Formerly 136.815) Finite-difference and finite-element methods for parabolic, elliptic and hyperbolic partial differential equations. Prerequisites: partial differential equations, numerical analysis, and consent of instructor.

MATH 8210 Topics in Combinatorics 1
(Formerly 136.821) Topics will be chosen from the areas of algebraic combinatorics, coding theory, design theory, enumerative combinatorics, graph
Graduate Studies

theory, Prerequisite: approval of department.

MATH 8220 Topics in Combinatorics 2
(Formerly 136.822) Topics will be chosen from the areas of algebraic combinatorics, coding theory, design theory, enumerative combinatorics, graph theory. Prerequisite: approval of department.

MATH 8310 Partial Differential Equations of Applied Mathematics
(Formerly 136.831) Complex-variable methods, perturbation methods, variational methods, discontinuities. Prerequisites: partial differential equations, complex variables, and consent of instructor.

MATH 8410 Seminar in Applied and Computational Mathematics 1
(Formerly 136.841) Designed to accommodate special topics in applied or computational areas of mathematics not included in other course offerings. Students are advised to consult the department as to availability.

MATH 8420 Seminar in Applied and Computational Mathematics 2
(Formerly 136.842) Designed to accommodate special topics in applied or computational areas of mathematics not included in other course offerings. Students are advised to consult the department as to availability.

MATH 8430 Seminar in Mathematics 1
(Formerly 136.843) Designed to accommodate special topics not included in topics courses. Prerequisite: approval of department.

MATH 8440 Seminar in Mathematics 2
(Formerly 136.844) Designed to accommodate special topics not included in topics courses. Prerequisite: approval of department.

MATH 8510 Topics in Algebra 1
(Formerly 136.844) Designed to accommodate special topics not included in topics courses. Prerequisite: approval of department.

MATH 8520 Topics in Algebra 2
(Formerly 136.852) Topics will be chosen from the areas of associative and non-associative algebras, Boolean algebra and lattice theory, category theory, group theory, ring theory and universal algebra. Prerequisite: approval of department.

MATH 8610 Topics in Analysis 1
(Formerly 136.861) Topics will be chosen from the areas of asymptotics, functional analysis, operator theory, real and complex variables, summability theory, topological vector spaces. Prerequisite: approval of department.

MATH 8620 Topics in Analysis 2
(Formerly 136.862) Topics will be chosen from the areas of asymptotics, functional analysis, operator theory, real and complex variables, summability theory, topological vector spaces. Prerequisite: approval of department.

MATH 8710 Topics in Foundations 1
(Formerly 136.871) Topics will be chosen from the areas of logic, model theory, recursive functions, set theory. Prerequisite: approval by department.

MATH 8720 Topics in Foundations 2
(Formerly 136.872) Topics will be chosen from the areas of logic, model theory, recursive functions, set theory. Prerequisite: approval by department

MATH 8810 Topics in Geometry 1
(Formerly 136.881) Topics will be chosen from the areas of algebraic curves, combinatorial geometry, Euclidean geometry, fractal geometry, groups and geometrics, projective geometry. Prerequisite: approval of department.

MATH 8820 Topics in Geometry 2
(Formerly 136.882) Topics will be chosen from the areas of algebraic curves, combinatorial geometry, Euclidean geometry, fractal geometry, groups and geometrics, projective geometry. Prerequisite: approval of department.

MATH 8910 Topics in Topology 1
(Formerly 136.891) Topics will be chosen from the areas of compactifications and related extensions, covering properties, rings of continuous functions, set-theoretic topology, topological groups, uniformities and related structures. Prerequisite: approval of department.

MATH 8920 Topics in Topology 2

(Formerly 136.892) Topics will be chosen from the areas of compactifications and related extensions, covering properties, rings of continuous functions, set-theoretic topology, topological groups, uniformities and related structures. Prerequisite: approval of department.

Mechanical and Manufacturing Engineering

Mechanical and Manufacturing Engineering ,
Mechanical and Manufacturing Engineering Program Info,
The graduate program in the Department of Mechanical and Manufacturing Engineering at the University of Manitoba is well-recognized amongst Mechanical Engineering Departments across and outside Canada. We are proud to deliver a world-class graduate experience leading to degrees in Doctor of Philosophy (Ph.D.), Master of Science (M.Sc.) and Master of Engineering (M.Eng.). All programs are led by well-established professors and adjunct professors engaged with local industry or hospitals with interlocking specializations and the professors are actively engaged in fundamental and cutting edge research in various fields. Our graduate students have access to state-of-the-art research facilities and we value the importance of challenging and relevant course work, effective supervision and high quality meaningful research.

Field of Research

Fluid Mechanics: Active research in this area is performed in turbulence, computational fluid dynamics, multiphase flow with droplets and engineering calculations of fluid flow. Droplets vaporization and burning, premixed and non-premixed swirling and non swirling turbulent flames, liquid-fuel -jet break-up and atomization, turbulent measurement and modelling, underwater kinetic turbines.

Thermal Sciences: Concerned with the application of heat and work to engineering problems. Active research is performed in two phase flow, pool boiling simulation, enhanced heat transfer, solid-liquid phase change, entropy analysis/optimization, combined heat transfer and heat transfer in porous media, acoustic wave propagation and supercritical flow stability, ocean hydrothermal energy and minerals research, super-critical properties of ocean hydrothermal fluids, runout table cooling in the steel processing industries.

Material Science and Engineering: Concerned with the behaviour of engineering materials. Active research is focused on deformation studies, joining of aerospace materials, acoustic emission, solidification and diffusion in microgravity, phase transformation in solids, wear and wear protection, processing of polymer composites, durability and interfaces in polymer composites.

Applied Mechanics and Design: Concerned with the analysis and conception of machine and structural components. Active research is performed in biomechanics, solid mechanics, fracture mechanics, fatigue analysis, experimental and finite element analysis of stresses, stress analysis, vibrations and acoustics, kinematics and dynamics of linkage and mechanisms and computer aided design.

Manufacturing and Production: Concerned with analysis, design and operation of automated and feedback control systems. Active research is conducted in robotics, sensor technology, system integration, automatic controls, information systems, human-machine control systems, fluid power systems, teleoperation, virtual design and manufacturing, web-based manufacturing systems. Planning, design and operation of production using queuing theory, networks, scheduling, facilities planning and inventory planning models are also other areas of research.

Research Facilities

Typical research facilities are: Fully equipped facility for turbulence measurements; apparatus to study porosity and multiphase flow in porous media; laser-induced fluorescence capabilities; Unix workstations and several high resolution graphics terminals; apparatus for measurement of pressure drop and heat transfer; two-phase flow regimes during condensation and many more; computer controlled x-ray diffractometer, TEM, SEMs, optical image analyzer, mechanical testing systems, constant stress creep machines, Hopkinson bar high-strain rate deformation systems; corrosion testing and research facilities; photo stress plus system facilities related to processing and manufacture of polymeric composites; laser optics laboratory

Graduate Studies
Page 687

comprising a vibration-free optical bench; a 10 ton high frequency resonant fatigue machine; analog-digital facilities for the analysis of acoustic and vibration signals; advanced manufacturing cells under full control of personal computers; a rapid prototyping system with a SLA3500 Stereolithography machine; a teleoperated hydraulic MK-II Unimate manipulator; a hydraulic test station for force/motion control studies; a measurement system for human dynamics including a Qualysis motion measurement system with 4-CCD infra red cameras and 3 Kistler Force Plates, in-house designed and built bipedal walking robots and Electromyography (EMG) systems; high speed computer workstations for computational simulations, water and spray/wind tunnels with Particle Image Velocimetry and flow visualization, pulsed and continuous wave laser systems, high-pressure combustion test facility, subsonic wind-tunnel facility, 2D laser Doppler velocimetry (LDV) system, high-speed imaging system.

Mechanical and Manufacturing Engineering Degrees, M.Eng.

The M.Eng. program mainly provides working engineers and internationally trained engineers an opportunity to continue their studies and specialize in an area of interest. Applicants must have a minimum of B.Sc. degree in Engineering. In exceptional cases, based on the candidate's professional experience, this requirement may be waived by the department.

The minimum requirement for the award of the M.Eng. degree is 30 credit hours of coursework with at least nine credit hours at the 700/7000 level. Of the 30 credit hours, six credit hours will be assigned to an approved project and report (069.705 M.Eng. Project and Report). The maximum time allowed for completion of the degree requirements is six years.

M.Sc.

Applicants are normally required to hold a Bachelor's degree in Mechanical Engineering or related field from a recognized university. Applicants with other engineering degrees or with honours degrees in related areas may also be accepted at the discretion of the department. In certain cases (e.g., non-engineering graduates), acceptance may be subject to satisfying certain requirements. Contact the department for more information.

A minimum of 18 credit hours of coursework will be required with at least nine credit hours at the 700/7000 level as approved by the student's advisor. The minimum time is one calendar year of full-time study and research and must be spent on campus. The maximum time limit is five years. All candidates for the M.Sc. degree are required to register in MECG 7890, M.Sc. Graduate Research Seminar. The M.Sc. degree will not be awarded without a passing grade in MECG 7890.

Ph.D.

Admission to the Ph.D. program is normally from the Master's degree level. Master's students making exceptional progress while enrolled in their program may be transferred to the Ph.D. program upon the consent of the department head based on recommendations from the student's advisor and an appointed selection committee who investigate the student's qualifications and suitability for Ph.D. study.

Minimum Program requirements set by the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of the Calendar. All candidates of the Ph.D. are required to register in MECG 7900, Ph.D. Graduate Research Seminar. The Ph.D. will not be awarded without a passing grade in MECG 7900. In addition, the department has supplementary regulations and students should consult with the department regarding Supplementary Regulations.

Application Deadlines

The Department of Mechanical and Manufacturing Engineering allows graduate students to begin their program in January, May, July or September of each year. Canadian and US students should send their applications with supporting

documentation directly to the Faculty of Graduate Studies no less than three (3) months before the intended start date. International students should send their applications no later than seven months (7) before the intended start date.

Page URL,
<http://crscalprod1.cc.umanitoba.ca/MechanicalandManufacturingEngineering.catx>

Mechanical and Manufacturing Engineering Course Descriptions

MECG 7150 Conduction Heat Transfer

(Formerly 025.715) Steady and unsteady state heat transfer by conduction, single and multidimensional systems. Conduction with moving boundaries and computer uses of finite difference techniques.

MECG 7160 Convective Heat Transfer

(Formerly 025.716) Conservation principles and flux laws. Differential and integral equations of the boundary layer. Momentum and heat transfer for laminar and turbulent flow inside tubes and over external surfaces.

MECG 7170 Radiation

(Formerly 025.717) Thermal radiation properties, blackbody radiation, heat exchange by radiation among surfaces in the presence or absence of participating media. Theory and measurement techniques, network methods, solar energy utilization.

MECG 7190 Classical Fluid Mechanics 1

(Formerly 025.719) Bernoulli's equation, equations of motion, two-dimensional motion, streaming motions, aerofoils, sources and sinks, moving cylinders, theorem of Schwartz and Christoffel, jets and currents.

MECG 7200 Classical Fluid Mechanics 2

(Formerly 025.720) Helmholtz motions, right linear vortices, waves. Stokes stream function, spheres and ellipsoids, solid moving through a fluid, vortex motion, viscosity.

MECG 7220 Boundary Layer Theory

(Formerly 025.722) Basic concepts of boundary layer and separation. Navier-Stokes equations, exact solutions. Momentum and energy equations, approximate solutions; boundary layer control, and thermal boundary layers.

MECG 7240 Turbomachinery

(Formerly 025.724) Generalized flow relations in rotating machinery, velocity triangles, limitation on work done per stage and Mach number effects, vortex flow, flow in cascades, blade temperatures and stresses, performance of turbomachines.

MECG 7260 Theory of Vibrations

(Formerly 025.726) The formulation of vibration problems using variational principles; matrix formulation of the free and forced vibrations of discrete and continuous systems; the effect of damping; approximate methods for solving the equations of motion; numerical techniques.

MECG 7270 Advanced Vibrations

(Formerly 025.727) The finite element method; random vibrations. Prerequisite: MECG 7260 (or 025.726).

MECG 7280 Advanced Structural Metallurgy

(Formerly 025.728) Electronic structure of the elements and the periodic table, binding energy and atom arrangements in crystals, solid solution and intermediate phases (valency, electron and size factor compounds). Electron theories of metals, Brillouin Zones and Fermi Surface.

MECG 7290 Diffusion in Solids

(Formerly 025.729) Diffusion equations, atomic theory of diffusion, diffusion in dilute alloys, diffusion in a concentration gradient, diffusion in non-metals, high diffusivity paths, thermal diffusion, and electrolysis in solids.

MECG 7320 Defects in Crystals and Their Relation to Mechanical Properties of Metals

(Formerly 025.732) Dislocations and point defects in crystals and their role in the

anelastic behaviour, plastic yielding, strain and alloy hardening, ductile and brittle fracture, recovery and recrystallization creep, fatigue, and radiation damage in metals.

MECG 7330 Phase Transformation in Solids

(Formerly 025.733) Advanced treatment of phase transformations in solids such as precipitation, eutectoid decomposition, and martensitic reactions.

MECG 7340 Corrosion and Oxidation of Metallic Materials

(Formerly 025.734) Topics include the electromechanical basis of corrosion, corrosion prevention by inhibitors, alloying and heat treatment passivity, stress corrosion cracking and fatigue, crack initiation and propagation, solid state chemistry including ionic and electronic conduction, and oxidation of metals and alloys.

MECG 7350 Research Topics in Physical Metallurgy and Metal Physics

(Formerly 025.735) Topics selected from recent researches in physical metallurgy and metal physics.

MECG 7360 Instrumentation

(Formerly 025.736) A seminar course to provide students in departments other than Electrical Engineering with background knowledge necessary to make effective use of electronic instrumentation in research.

MECG 7370 Modern Research Techniques

(Formerly 025.737) Laboratory course designed to introduce the research student to a wide variety of equipment and techniques useful in metallurgical research, discussion, and laboratory.

MECG 7380 Electron Microscopy of Materials

(Formerly 025.738) Theory and practice of electron microscopy, with emphasis on the application of transmission technique to materials research.

MECG 7390 Dislocation Theory

(Formerly 025.739) Description of a dislocation; the stress field around a dislocation; forces on a dislocation; dislocation reactions in crystals, dislocation multiplication, pole mechanisms, twinning, stacking fault tetrahedron. Peierls force and related topics; image forces, interactions with point defects and other topics.

MECG 7400 Solidification of Metals and Alloys

(Formerly 025.740) The theory of solidification with respect to microstructure and solute distribution. Practical applications such as casting semiconductors and zone refining.

MECG 7410 Theory of Turbulence

(Formerly 025.741) Development and application of statistical theories to isotropic, nonisotropic, and homogeneous turbulent fluid motion.

MECG 7420 Selected Topics in Turbulence

(Formerly 025.742) An extension of MECG 7410 (or 025.741) to investigate the specialized problems of turbulence such as space-time correlation functions and spectral transfer in constrained and unconstrained fluid flows.

MECG 7430 Stability of Flow

(Formerly 025.743) Methods of solution of the Orr-Sommerfeld Equation by analytic and computer techniques. Application to jets, wakes, and boundary layers, including nonlinear effects.

MECG 7450 Biomechanics

(Formerly 025.745) Topics in kinematics related to normal gait and prosthetic devices; properties of materials used for prostheses; arterial, bone, and composite materials, including design and manufacturing methods. Prerequisite: the former courses 025.213 or ECE 2090 (or 024.209) or consent of instructor.

MECG 7460 Topics in Heat Transfer 1

(Formerly 025.746) Selected topics in heat transfer based on MECG 7150 (025.715), MECG 7160 (025.716), and MECH 7170 (025.717). Topics will be chosen from the following: conduction with and without internal heat generation, combined mode heat transfer problems, boiling and condensation heat transfer, heat exchanger design, propulsion systems heat transfer problems, special problems in forced, free and mixed convection, and two-phase flow.

MECG 7470 Topics in Heat Transfer 2

(Formerly 025.747) A continuation of certain topics of MECG 7460 (025.746) to include the most recent advances in these areas.

MECG 7500 Topics in Aerodynamics

(Formerly 025.750) Topics in Aerodynamics.

MECG 7510 Industrial Engineering Systems

(Formerly 025.751) Production engineering, equipment procurement decisions, plant layout and materials handling, optimization methods, models and simulation, control of engineering operations, data processing. Prerequisites: MECG 7520 (or 025.752) or 013.361.

MECG 7520 Industrial Engineering

(Formerly 025.752) Industrial engineering topics, such as value engineering, work measurement, quality control, inventory control scheduling. Prerequisite: MECH 4480 (or 025.448).

MECG 7590 Design of Motor Vehicles to Reduce Accident Severity

(Formerly 025.759) Application of principles of mechanics to the analysis of vehicle accidents; design and performance of tires, brakes, steering, suspension, and bodies; study of passenger injuries; designing of vehicles to minimize passenger injury; human factors in vehicle accidents.

MECG 7600 Selected Topics in Engineering Design

(Formerly 025.760) Lectures and seminars on selected advanced topics in the field of mechanical engineering design.

MECG 7610 Engineering Properties of Polymers

(Formerly 025.761) A survey of the physics of crystalline and amorphous polymers, including molecular weight distribution measurements, physics of rubber elasticity, theories of the glass transition, crystallinity measurements, crystallization kinetics, mechanical properties of crystalline and amorphous polymers.

MECG 7620 Fracture of Materials and Structures

(Formerly 025.762) Griffith criterion for crack propagation, stress intensity factors, plasticity effects, experimental methods for evaluation of criteria, J-integral, crack opening displacement. Microscopic aspects, dislocations at the crack tip, cleavage fracture, nil ductility temperature. Fatigue, creep, stress corrosion cracking.

MECG 7630 Metal Forming Theory and Practice

(Formerly 025.763) Study of the mechanics of different metal forming processes and general equipment design considerations.

MECG 7660 Measurement Systems - Application and Design

(Formerly 025.766) A sufficiently broad coverage will be provided in both the use and the design of instruments in mechanical engineering and related fields. Analytical treatment of measurement methods and systems will also be covered. Analog-digital processing of measurements with special reference to modern computer-based instruments and computer-aided manufacturing will be provided. Prerequisite: MECH 3430 (or 025.343) Measurements and Control.

MECG 7670 Industrial Engineering Research Methods 1

(Formerly 025.767) The course consists of assigned, appropriate Industrial Engineering R and D projects of applied nature, targeted to the needs of local industry, an in-depth review of the state of the art in the problem area under consideration. Close supervision is provided by the advisor and the representative of the industry involved. A detailed analysis and report will be presented.

MECG 7680 Advanced Operations Research

(Formerly 025.768) Formulations and algorithms for the following problems, set partitioning, set covering, clustering, location, layout, order picking, vehicle routing, vehicle scheduling. Applications of these problems to planning of manufacturing systems, scheduling of production, systems, materials handling systems and planning for warehouse and storage systems. Prerequisite: MECH 4760 (or 025.476) or consent of instructor.

MECG 7690 Computer Integrated Manufacturing

(Formerly 025.769) Basic concepts of microcomputer hardware and software with special emphasis on different manufacturing applications. These include data acquisition and analysis, machine monitoring and diagnostics, process control, robotics, machine tool control, automatic testing and quality control.

MECG 7700 Analysis and Design of Industrial Information Systems

(Formerly 025.770) Analysis of information flow for selected systems: production planning, engineering, warehouse operation, flight scheduling and garment industry. Analysis of user interface for information and decision support systems. Design of selected information and decision support systems. Integrating optimization models with information systems. Analysis and design of modern material requirements planning systems. Prerequisite: consent of instructor.

MECG 7710 Modelling and Design of Flexible Manufacturing Systems

(Formerly 025.771) Components of Flexible Manufacturing Systems (FMS), formulating and solving FMS design and operational problems. Interfacing FMS components and software design. Management of FMS project planning, design and implementation. Stochastic approach to FMS design and operation.

MECG 7720 Industrial Applications of Artificial Intelligence

(Formerly 025.772) Overview of artificial intelligence components and techniques. Analysis and design of intelligent systems for fabrication, machining, assembly and handling systems. Prerequisite: consent of instructor.

MECG 7730 Sequencing and Scheduling

(Formerly 025.773) Single and multiple machine unconstrained scheduling problems. Constructive algorithms for flow shops and job shop problems. Scheduling problems with due dates, start times and precedence constraints. Optimal and heuristic algorithms for solving scheduling problems. Application of scheduling and sequencing theory for solving a number of practical problems. Prerequisite: MECH 4760 (or 025.476).

MECG 7740 Selected Topics in Robot Technology

(Formerly 025.774) The role of digital computers and digital interface equipment in the control and operation of robots. Fundamentals of robot kinematics and coordinate systems. Various robotic sensing systems such as vision, tactile, proximity, ultrasonic. The selection of topics may change from time to time depending on student interest and advances in the field of robotic technology. Prerequisite: MECH 4840 (or 025.484) or consent of instructor.

MECG 7760 Advanced Solid Mechanics

(Formerly 025.776) Selected advanced topics in solid mechanics; e.g., relationship between solid physics and solid mechanics, mechanical properties for static, low- and high-cycle fatigue, failure theories and mechanisms, theory of shell structures, numerical methods, applications.

MECG 7770 Computer-Aided Engineering

(Formerly 025.777) Principles and mathematical formulation of computer-aided design, manufacturing and database management systems; related topics pertinent to computer integrated design and manufacturing systems.

MECG 7780 Selected Topics in Engineering Mechanics

(Formerly 025.778) Lectures and seminars on selected advanced topics in engineering mechanics such as space dynamics, orbital mechanics and kineto-elastodynamics, current problems, implications in current research.

MECG 7790 Transport Phenomena in Porous Media

(Formerly 025.779) Single and multiphase flow in porous media. Porosity, permeability, capillary pressure, relative permeability, electrical properties.

MECG 7800 Topics in Porous Media

(Formerly 025.780) An extension of MECG 7790 (or 025.779) to allow investigation of special topics; e.g., computational methods, experimental techniques, mixed transport phenomena (diffusion/dispersion, conductive/convective heat transfer), advanced concepts, etc.

MECG 7810 Computational Thermofluids

(Formerly 025.781) An introduction to the solution of thermofluids problems. Computational techniques (finite difference, finite element, boundary element). Modelling of turbulent flow. Spectral methods.

MECG 7820 Queueing Systems in Engineering

(Formerly 025.782) Markov Process, renewal theory, birth-death process. Birth-death queueing systems in equilibrium; Markovian queues in equilibrium; the M/G/1 queue; Jackson networks; numerical methods in queueing; applications of

queueing models to production, service, communication and traffic systems.

MECG 7830 Computational Mechanics
(Formerly 025.783) Continuum Mechanics, Hyperelasticity, Theory of Plasticity, Finite element modelling of nonlinear problems and time-dependent material representation. Prerequisites: consent of instructor.

MECG 7840 Systems Modelling and Simulation
(Formerly 025.784) Topics may include: Models and Model Building. Mathematical Models: analytical solutions, numerical solutions, steady-state solutions. Modeling techniques: state models, linear graphs, bond graphs, transfer functions, large-scale models, linear vs nonlinear models. Simulation of Systems (discrete/continuous) on digital computers; numerical operations and algorithms. Simulation Languages (discrete/continuous) applied to analysis and design of dynamic and control systems, or, services and manufacturing systems. Prerequisite: consent of instructor.

MECG 7850 Applied Finite Element Method
(Formerly 025.785) Weighted Residuals, Boundary versus Finite Element Method, Conventional and Special elements, Equality and Inequality Constraints, Error Estimates, Self-adaptive Techniques and Mixed Formulations. Prerequisites: CIVL 4240 (or 023.424) or instructor approval.

MECG 7870 Human Factors: Theory, Dynamics and Design
(Formerly 025.787) Dynamics in Human Factors, Theoretical Fundamentals of Ergodynamics, Law of Transformations, Dynamics of Cognitive strategies, Information Systems: Ergonomic Analysis and Design, Transformation and Main Ergonomic Problems in Dynamic Manufacturing Technologies. Prerequisite: instructor's approval.

MECG 7880 Network Flow Problems in Engineering
(Formerly 025.788) Notations and Definitions, Network Representations and Transformations, Algorithm Design and Analysis, Shortest Paths, Maximum Flows, Minimum Cost Flows, Assignment and Matchings, Minimum Spanning Trees, Lagrangian Relaxation and Network Optimization, Multi-Commodity Flows, computational Testing of Algorithms, Applications. Prerequisites: MECH 3410 (or 025.341) and MECH 4760 (or 025.476).

MECG 7890 M.Sc. Graduate Research Seminar
(Formerly 025.789) Seminar presentation and discussion of current research topics in mechanical, industrial and materials engineering research.

MECG 7900 Ph.D. Graduate Research Seminar
(Formerly 025.790) Seminar presentation and discussion of current research topics in mechanical, industrial and materials engineering research.

MECG 7910 System Design for Robots and Teleoperators
(Formerly 025.791) Definitions and classification. Kinematics: transformations, forward and inverse kinematic solution methods, differential kinematic equations, motion trajectories. Dynamics: energy method vs. Newton-Euler formulation. Actuators; electric, hydraulics and pneumatics. Control: requirement and methods for control of robots and teleoperators. Prerequisites: MECH 3430 (or 025.343), MECH 3480 (or 025.348) or equivalent.

MECG 7920 Engineering Mechanics of Composite Materials
(Formerly 025.792) Brief overview of composites; constituents; properties; processing and application; micro-mechanics of reinforcement; elastic behaviour of unidirectional lamina; strength of unidirectional lamina; elastic behaviour of multi-directional laminates; stress and failure analysis of multidirectional laminates; hygrothermal effects and durability; introduction to textile composites.

MECG 7930 Advanced Non-Linear Systems Analysis
(Formerly 025.793) Topics may include (i) Modelling of Constrained Dynamic Systems, including derivation of dynamic equations for constrained systems using Lagrangian equations and/or Newton-Euler equations; (ii) Advanced Stability Theories, including construction of Lyapunov functions and Lyapunov's stability control; and (iii) Introduction to Analysis of Non-smooth Systems, including Filippov's solution analysis and extended Lyapunov's stability theory to non-smooth systems. Applications to computer modelling of bipedal locomotion, analysis of robotic contact tasks and stability analysis of power systems will be addressed.

MECG 7940 Experimental Methods in Fluid Mechanics
(Formerly 025.794) Topics will be chosen from: Review of fluid mechanics, combustion and turbulence theory; role of experiments; conventional measurement

methods for temperature, pressure and velocity; laser-based techniques for local and global velocity measurements (Laser Doppler Anemometry (LDA), Phase-Doppler Anemometry (PDA), Particle Image Velocimetry (PIV)); other laser-based techniques for imaging and concentration measurements in reacting and non-reacting single and two-phase flows.

MECG 7950 Selected Topics for Productivity Improvement in Manufacturing
(Formerly 025.795) Will address techniques that can assist North American manufacturing and improve productivity in the global market place in the 21st century. Topics include: productivity techniques, quality, cost, manufacturing control and other pertinent issues.

Medical Microbiology

Medical Microbiology ,
Medical Microbiology Program Info,
The Department of Medical Microbiology offers programs of studies leading to the MSc and PhD degrees with research and academic experience suitable for a career in Basic Microbiology or Infectious Diseases.

The department has nationally recognized strengths in several areas, particularly epidemiology. It also enjoys extensive collaborative projects with both the University of Kenya in Nairobi, Kenya, and with the new federal laboratories for disease research. The Nairobi project uses epidemiologic, biologic, and molecular biologic studies to better understand sexually-transmitted diseases in the African population. Similar studies are being instituted in India. Numerous opportunities for collaborative work with members of other departments as well as with various affiliated research organizations (including the Clinical Microbiology Laboratories of the Health Sciences Centre, the Infectious Diseases programs of the Health Sciences Centre, the Cadham Provincial Laboratory, the federal laboratories, and St. Boniface Hospital) exist.

Recent graduates of the program have been highly successful in academia, industrial, medical, and veterinary careers.

Fields of Research

Scientific interests of the Department are broad and research projects range from the basic understanding of gene regulation and molecular basis of cellular functions to the development of vaccines and diagnostics for human health and veterinary diseases. The Department has active research programs in cell and molecular biology, immunology, virology, bacterial genetics, microbial pathogenicity, Chlamydial biology, and clinical microbiology. Many research projects are oriented to human diseases and many are carried out in collaboration with physicians who have access to patients.

Research Facilities

Medical Microbiology occupies the 5th Floor of the Basic Medical Sciences Building on the Bannatyne Campus of the university and includes modern research laboratories. Teaching and research are also conducted within the Clinical Microbiology Laboratories of the Health Sciences Centre and within the infectious diseases programs of the Health Sciences Centre, National Research Council, Cadham Provincial Laboratory, St. Boniface Hospital, and the Canadian Science Centre for Human and Animal Health. The department's equipment, much of which is shared, supports research ranging from molecular biology to clinical microbiology. It includes ample biohazard containment facilities, controlled environment equipment, ultracentrifugation, spectrophotometric, chromatographic and electrophoretic equipment, a transmission electron microscope, fluorescent microscopes, liquid scintillation counters, personal computers and computer terminals for direct access to the main frame computer. A library and a number of other ancillary facilities are available.

M.Sc. in Medical Microbiology,
Admission

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, graduates in Medicine, Dentistry, Veterinary Medicine, or general Science may apply for entry into this graduate program. The department requires that an incoming student have a minimum Grade Point Average of 3.0, or its equivalent, in the two years immediately preceding first registration. Students with a three-year B.Sc. degree must normally enrol in a pre-Master's course arranged in consultation with the Graduate Studies Committee and the head of the department.

Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the **Faculty of Graduate Studies** as follows:

Session Start Date	Canadian/US	International
Regular (September)	June 1	March 1
Winter (January)	October 1	July 1
Spring (May)	February 1	November 1
Summer (July)	April 1	January 1

Please note that the department is not responsible for finding supervisors for potential students. Applicants should visit the [department web page](#) for the list of faculty members and contact those with research areas of interest regarding availability of student positions.

Program Requirements

Program requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

Second language reading requirement: none

Expected time to graduate: 2 - 3 years

Ph.D. in Medical Microbiology,
Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

Application Deadlines

As listed above in Master's Program section.

Program Requirements

Program requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

Second language requirement: none

Expected time to graduation: 5 to 6 years

page URL,
<http://crscalprod1.cc.umanitoba.ca/MedicalMicrobiology.catx>

Medical Microbiology Course Descriptions-MMIC 6000 Level

MMIC 6010 Biological Safety
(Formerly 097.601) Critical Analysis of biological safety in the research, diagnostic and hospital environment; assessment of the underlying causes of laboratory acquired infections and the administrative, engineering and personal protective

control measures available; analysis of current and new bio-containment technologies, risk assessment tools, the need for scientific based decision making and the public perception versus real risk.

Medical Microbiology Course Descriptions-MMIC 7000 Level

MMIC 7010 Virology
(Formerly 097.701) Fundamental properties of viruses of bacteria, animals and plants. Prerequisite: permission of instructor.

MMIC 7020 Medical Mycology
(Formerly 097.702) Characteristics of pathogenic fungi of humanity. Relevant laboratory work.

MMIC 7040 Clinical Bacteriology
(Formerly 097.704) Scientific basis of routine laboratory methods used in the diagnosis of bacterial infection: specimen handling techniques; laboratory organization.

MMIC 7050 Microbial Pathogenicity
(Formerly 097.705) Comparative structure of virulent and avirulent bacteria, biochemical basis of virulence; host defenses.

MMIC 7140 Clinical Parasitology
(Formerly 097.714) The course will consist of a series of lectures on the epidemiology, molecular pathogenesis, clinical features, diagnosis (clinical and laboratory), treatment and prevention of human disease; each class is followed by a laboratory period in which the student obtains some practical experience.

MMIC 7160 The Molecular Basis of Antibiotic Action
(Formerly 097.716) Historical development, mechanism of action, principles of antimicrobial susceptibility testing and molecular and genetic basis for antibiotic resistance transfer. Prerequisite courses include Microbial Physiology or Biochemistry and at least an introductory course in Genetics and the consent of instructor.

MMIC 7170 Molecular Biology of Animal Viruses
(Formerly 097.717) Lecture and conference course. Recent advances in molecular aspects of virus structure, replication, genetics, and spectrum of virus-host cell interaction. Prerequisites: MMIC 7010 (or 097.701), or consent of instructor.

MMIC 7200 Host Defence Responses
(Formerly 097.720) Aspects of the cellular responses during inflammation and infection. Topics will include inflammatory cell function, mechanisms of cell accumulation and activation, roles of cytokines in these processes. Selected examples will be discussed in detail. The course will involve some student presentations.

MMIC 7210 Clinical Virology
(Formerly 097.721) Overview of the association between viruses and human diseases; biology of host and virus interaction and role of immune system to control infection; understanding the role of laboratory services and patient management; create appreciation for role of molecular-based diagnostic methods in the detection of new human pathogens. Lecture/laboratory components.

MMIC 7220 The Ecology of Infectious Diseases
(Formerly 097.722) Explores the study of infectious diseases in a global context from the perspective of biomedical, clinical, health systems/services and social, cultural and environmental determinants of health and disease. The course features didactic, self-directed reading and interactive small group sessions.

Medical Rehabilitation

Medical Rehabilitation,
Medical Rehabilitation Program Info,
The School of Medical Rehabilitation currently offers an M.Sc. (Rehabilitation) degree program. The purpose of this program is to conduct and promote basic and clinical research in the prevention and rehabilitation fields. The research conducted at the School of Medical Rehabilitation can be framed within the International Classification of Function. This framework emphasizes the interactions between body structures and functions, the ability to perform various activities, and participation in society.

The diverse research programs and facilities of the School offer opportunities for graduate education in the areas of neuroscience, cardiorespiratory function, exercise physiology, musculoskeletal function, and human occupation. Through proximity to a range of clinical settings and strong collaborative links the program offers particular opportunities to engage in clinically relevant research. Graduates of this program have gone on to advanced clinical practice and administrative positions within the health care system. In addition, graduates have also pursued research careers through various doctoral programs including the PhD in Applied Health Sciences program.

Fields of Research

The School has several diverse but complimentary programs of research in the areas listed above which are directed to: assessing outcomes of therapeutic interventions by single centre clinical trials; furthering understanding of the physiological basis of current rehabilitation clinical practice; developing new strategies to restore function or to substitute for functional losses, as well as to improve mobility and enhance physical adaptation to functional losses; developing new strategies to manage functional impairment; developing rehabilitation-related interventions to minimize secondary impairments and promote life long health; developing innovative rehabilitation interventions, including novel physical therapies and rehabilitation engineering products; and understanding the mechanisms of workplace injury, developing strategies to prevent injury and decrease morbidity consequent to work-related injury developing interventions for primary prevention of disease related to physical inactivity.

Research Facilities

The School of Medical Rehabilitation is located at the Bannatyne Campus in downtown Winnipeg. This campus is adjacent to the Health Sciences Centre, a major teaching hospital complex, with rehabilitation-related facilities for pediatric, adult and geriatric patients including physiotherapy, occupational therapy, rehabilitation engineering, prosthetics and orthotics. The school has a number of world-class research laboratories conveniently located in the Rehabilitation Hospital of the Health Sciences Centre and the Bannatyne Campus of the University of Manitoba.

M.Sc. (Rehabilitation),

Admission

In addition to the minimum course requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, admission requirements include a baccalaureate degree in Physical Therapy, or Occupational Therapy, or Respiratory Therapy, or a baccalaureate degree in an area related to rehabilitation, and an academic record which meets the entrance requirements of the Faculty of Graduate Studies.

Application Deadlines

The School of Medical Rehabilitation allows students to begin their program on either September 1 or January 1. For admission for each of these start dates, Canadian/U.S. students should send their applications with complete supporting documentation to the Faculty of Graduate Studies no less than three (3) months before the intended start date. Non-Canadian students should send their applications with complete supporting documentation to the Faculty of Graduate Studies to arrive no later than six months (6) before the intended start date.

Program Requirements

Program requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

Second language reading requirement: None

Expected time to graduate: Two years

Ph.D. (Applied Health Sciences),

The School of Medical Rehabilitation, along with the Faculty of Physical Education and Recreation Studies, Faculty of Human Ecology, and Faculty of Nursing, offers a multi-faculty Ph.D. in Applied Health Sciences. Information on this program may be found in another section of this calendar.

Page URL,

<http://crscalprod1.cc.umanitoba.ca/MedicalRehabilitation.catx>

Medical Rehabilitation Course Descriptions

REHB 7010 Neurosciences

(Formerly 068.701) To provide the student with a comprehensive understanding of the neurophysiological basis of motor behaviour including: motor control mechanisms, pathophysiological correlates, and clinical manifestations of central nervous system lesions involving motorcentres.

REHB 7050 Ergonomics

(Formerly 068.705) This course shall examine the basic tenet of ergonomics, "the modification of the environment to meet the needs of the individual," and contrasted to "the adaptation of the individual to meet the constraints of the environment."

REHB 7060 Gerontology

(Formerly 068.706) Designed to increase knowledge and understanding of geriatric/gerontology research related to the biological, physical, psychological and sociological health and function of older adults in society. A particular focus will be on social cognition and the role of perceived control in the rehabilitation of older adults.

REHB 7070 Exercise Rehabilitation for Persons with Disabilities

(Formerly 068.707) The student shall acquire a better understanding and increased knowledge of: the application of endurance exercise testing and training principles with disabled individuals; and the practical application of these skills.

REHB 7080 Pediatrics: Neuro-Development

(Formerly 068.708) To increase the student's understanding of the developmental factors important in planning interventions with the pediatric neurological patient.

REHB 7130 Advanced Ergonomics

(Formerly 068.713) This course is designed to enhance the student's understanding and application of ergonomic principles in the clinical setting. The student will choose from a selected list of current ergonomic topics and will research this topic under the guidance of the supervisor. The research will be formally presented at the end of the course.

REHB 7160 Rehabilitation Research Techniques

(Formerly 068.716) Introduction to techniques used in rehabilitation research including bioelectrical signal recording such as electro-myography, strength assessment using isovelocity dynamometry, acquisition, processing and storage of experimental data.

REHB 7170 Topics in Rehabilitation

(Formerly 068.717) A readings, tutorial and practical course designed to enhance the student's knowledge of basic science and clinical investigations and to provide experience in the logical development of approach to a problem.

REHB 7180 Readings in Rehabilitation

(Formerly 068.718) Readings course covering recent advances in an area of rehabilitation related to a student's field of research.

REHB 7190 Structure and Function of the Musculoskeletal System

(Formerly 068.719) Tutorial and laboratory course providing in-depth study of the structure and function of a specific musculoskeletal region pertinent to rehabilitation. Synthesis of subject material in anatomy, physiology, biomechanics, pathology and rehabilitation. Prerequisites: REHB 1450 (or 068.145), REHB 1460 (or 068.146), REHB 1530 (or 068.153) or REHB 2890 (or 068.289), and REHB 3470 (or 068.347) or equivalent courses.

REHB 7200 Dynamometry

(Formerly 068.720) A comprehensive study of dynamometry and the use of dynamometers for the assessment of strength, endurance and passive properties of soft tissues.

REHB 7210 Dynamics I

(Formerly 068.721) To understand the relationship between neuro-physiological and biomechanical factors in the production of functional multi-segmented motion in clinical motor disorders encountered in medical rehabilitation.

REHB 7220 Dynamics II

(Formerly 068.722) This course is designed to enhance the student's understanding and application of biomechanical principles to the clinical setting. The student will choose from a selected list of current kinesiological topics and will research this topic under the guidance of the supervisor. The research will be formally presented at the end of the course. Prerequisite: REHB 7210 (or 068.721).

REHB 7230 Independent Study

(Formerly 068.723) Students complete an in-depth study of evidence for practice in an area of interest. Students will work with an assigned faculty advisor to define and evaluate a particular area of interest in rehabilitation practice, particularly in occupational or physical therapy.

REHB 7240 Theoretical Foundations of Occupational Therapy

(Formerly 068.724) An in-depth study of the theory base in Occupational Therapy. The focus of the course is models of occupation and their impact on occupational therapy practice. Prerequisite: Previous degree in Occupational Therapy.

REHB 7250 Facilitating Client-Centred Processes

(Formerly 068.725) Theory and practical course designed to develop an advanced understanding of the principles of client-centered practice. The course will focus on the development of the requisite knowledge, skills and attitudes to evaluate and implement client-centered approaches and facilitate environments conducive to client-centered practice. Prerequisite: Consent of instructor

REHB 7260 Assistive Technology

(Formerly 068.726) A theory and practice course designed to develop an advanced understanding of the application of technology for individuals with disabilities as a means to occupation. Particular emphasis will be on evaluating the impact and understanding the theory guiding the use of assistive technology, and developing an understanding of the contexts in which assistive technologies are used.

REHB 7270 Pain and Rehabilitation

(Formerly 068.727) Designed to enhance the student's knowledge of basic science and clinical investigations related to pain, as well as the clinical relevance of pain transmission and modulation in rehabilitation. The course is delivered in small group tutorial format to facilitate student interaction and exchange of information.

Microbiology

Microbiology ,

Microbiology Program Info,

Microbiological research is one of the most dynamic areas of scientific endeavour. Concern over the impact of society's activities on the environment is increasing and there is a strong need for research in environmental microbiology. Biotechnology, molecular genetics, and biochemistry show tremendous promise in many areas of medicine, agriculture, industry and basic microbiological research. Technological advances are continually expanding in these areas of research. They all depend heavily on basic research and a supply of highly trained individuals. Graduates from the microbiology department take up positions in industry, universities, and the public sector. The demand for these graduates continues to be high.

Fields of Research

The department offers M.Sc. and Ph.D. programs of study. The research interests of the faculty and students are concentrated in several main areas: microbial ecology and geochemistry; molecular biology/genetics; metabolism of autotrophic bacteria; microbial biotechnology and biochemistry; microbial pathogenicity.

Research Facilities

Microbiology program faculty members are engaged in active research projects. The department has all the facilities needed to conduct research in areas of specialization and the inventory of modern equipment is one that would be expected in any active research unit. In addition, close ties with other departments allow for the use of their facilities.

M.Sc. in Microbiology, Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

Application Deadlines

Application and supporting documentation are submitted to the Faculty of Graduate Studies. International students must submit this material at least 5 months before their intended starting date, i.e. April 1st for September start, August 1 for January start; December 1 for May start and February 1 for July start. Canadian and U.S. students should submit two months in advance.

Program Requirements

Program requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar and the departmental supplementary regulations.

Second language reading requirement: none

Expected time to graduate: 2 - 3 years

Ph.D. in Microbiology, Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

Application Deadlines

Application and supporting documentation are submitted to the Faculty of Graduate Studies. International students must submit this material at least 5 months before their intended starting date, i.e. April 1st for September start, August 1 for January start; December 1 for May start and February 1 for July start. Canadian and U.S. students should submit two months in advance.

Program Requirements

Program requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar and the departmental supplementary regulations.

Second language requirement: none

Expected time to graduation: 4 - 6 years

Microbiology Course Descriptions

MBIO 7010 Graduate Seminar in Microbiology 1

(Formerly 060.701) Seminars covering areas of interest to the faculty and students in the graduate Microbiology programme, and current developments in the broad field of microbiology (including microbial physiology, environmental microbiology, virology, pathogenicity, genetics, molecular biology, biochemistry, biotechnology, and cell culture). Open to all qualified students by permission of the Microbiology department head.

MBIO 7020 Graduate Seminar in Microbiology 2

(Formerly 060.702) Seminars covering areas of interest to the faculty and students in the graduate Microbiology program, and current developments in the broad field of microbiology (including microbial physiology, environmental microbiology, virology, pathogenicity, genetics, molecular biology, biochemistry, biotechnology, and cell culture). Open to all qualified students by permission of the Microbiology department head.

MBIO 7030 Graduate Seminar in Microbiology 3

(Formerly 060.703) Seminars covering areas of interest to the faculty and students in the graduate Microbiology programme, and current developments in the broad field of microbiology (including microbial physiology, environmental microbiology, virology, pathogenicity, genetics, molecular biology, biochemistry, biotechnology, and cell culture). Open to all qualified students by permission of the Microbiology department head.

MBIO 7040 Graduate Microbiology

Topics and current developments in the field of microbiology will be covered. A combined discussion, seminar and written exam format may be used. Inquire at the department for availability.

MBIO 7050 Environmental Microbiology

Topics and current developments in the field of environmental microbiology will be covered. A combined lecture, discussion, assignment and seminar format may be used. Inquire at the department for availability.

MBIO 7060 Microbial Interactions

Topics and current developments in the field of microbial interactions will be covered. A combined discussion, seminar and written exam format may be used. Inquire at the department for availability.

MBIO 7070 Bioprocessing

This course allows students with a background in either biological sciences or engineering to gain an understanding of biochemical engineering processes used to enable important chemical conversions by biological systems. Topics include bioprocessing for production of biofuels, bioplastics, and biopharmaceuticals, upstream processing technologies, fermentation and bioreactor systems, and downstream processing for product recovery. These will be related to present or potential industrial applications. This course is also offered in the Department of Biosystems Engineering as BIOE 7180. MBIO 7070 cannot be held with BIOE 7180.

MBIO 7080 Biochemical Mechanisms

(Formerly 060.708) A treatment of current concepts of biochemical mechanisms in selected areas of investigation, including multifunctional enzyme complexes and membrane-associated systems. Prerequisite: consent of instructor. Inquire at the department for availability.

MBIO 7090 Biological Oxidations and Bioenergetics

(Formerly 060.709) A treatment of current concepts of biological oxidations, and bioenergetics in microorganisms including autotrophic bacteria. Inquire at the department for availability.

MBIO 7100 Advanced Concepts in Molecular Biology

(Formerly 060.710) Recent advances in the molecular basis and control of gene activity; information transfer and molecular evolution. Inquire at the department for availability.

MBIO 7110 Advances in Microbial Genetics

(Formerly 060.711) Developmental genetics; recombination; bacteriophages; fine structure analysis; biochemical genetics and specialized genetic systems. Inquire at the department for availability.

MBIO 7120 Enzymology

(Formerly 060.712) Lectures and reading assignments on the structure and function of enzymes and on enzyme kinetics. Each student will isolate, purify, and study the kinetics of a particular enzyme reaction. Inquire at the department for availability.

MBIO 7130 Advanced Physiology of Bacteria

(Formerly 060.713) An assignment and conference course. Selected topics covering recent advances in the energy relationships of bacteria and the growth and death of bacteria. Inquire at the department for availability.

MBIO 7160 Special Problems in Microbiology

(Formerly 060.716) An assignment and conference course to be taken only through consultation with the head of the department. The topics will vary, depending upon student needs and interests, and will include specialized topics not available in regular course offerings.

MBIO 7170 Current Topics in Mammalian Cell Culture

(Formerly 060.717) A lecture and discussion course based on current research problems involving mammalian cells in culture. Prerequisite: consent of instructor. Inquire at the department for availability.

MBIO 7180

m

MBIO 7190 Microbial Ecology

(Formerly 060.719) Topics and current developments in the field of microbial ecology will be covered with emphasis on aquatic ecosystems. A combined lecture, discussion, and seminar format will be used. Inquire at the department for availability.

MBIO 7200 Macromolecular Structure Analysis

This course introduces the principles of X-ray crystallography as applied to the study of protein and nucleic acid structure. Protein crystallization and practical aspects of X-ray diffraction, structure determination and analysis are covered. This course is suitable for students with a background in microbiology, biochemistry or chemistry. Inquire at the department for availability.

Music

Music ,

Music Program Info,

The Marcel A. Desautels Faculty of Music offers a Master of Music (M.Mus.) in three major areas: performance, composition and conducting. The emphasis is upon full professional preparation in a strong academic context. Students in the string component of the program are eligible for adjunct training by a special agreement with the Winnipeg Symphony Orchestra. Students in the voice component are eligible to be considered for training and solo professional activities with Winnipeg operatic companies, choral organizations and chamber groups. Students in the collaborative piano component are eligible to be considered for training with Winnipeg operatic companies and choral organizations or with professional chamber ensembles.

Fields of Creative Work and Research

The Faculty fosters an active, integrated performance environment which provides the broadest possible professional training. This is complemented by a program of research in musicology, ethnomusicology, jazz, music theory and related fields. Students with interests outside of the M.Mus. have the option of pursuing advanced studies in music via the Individual Interdisciplinary Program (IIP) of the Faculty of Graduate Studies.

Research Facilities

Of particular interest to students in the M.Mus. (composition) is our Electroacoustic Music Studio. Our library resources support a wide variety of performance studies in various historical eras.

Master of Music program,
Admission

Admission requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Persons who have completed (1) a four-year undergraduate degree program in music with a minimum 3.0 GPA in the last two full years or (2) a conservatory diploma which is offered in residence, may apply for admission to the M.Mus. program.

Application Deadlines

All applications should be sent to the Faculty of Graduate Studies on or before December 10th to begin study in September, or June 15th for a January start date.

Application procedures vary, according to the area of desired study: please see our website for detailed information

<http://umanitoba.ca/music> under "Future Music Students".

- Performance applicants will perform an audition and will submit a curriculum vitae which includes details of performance experience and repertoire. Except in special circumstances, the audition will be in person, at the Marcel A. Desautels Faculty of Music. String players wishing to apply for the Winnipeg Symphony Orchestra partnership will be required to perform a separate audition according to the standard procedures of the W.S.O.
- Composition applicants will present a portfolio of works and will submit a curriculum vitae detailing experience in both the areas of composition and in the field, in general. Instrumental submissions should include both scores and recordings.
- Conducting applicants will present a current curriculum vitae, a preliminary DVD, a list of repertoire they have conducted and an analysis of a specified piece of music.

Diagnostics

Students admitted to the Master of Music program at the University of Manitoba are expected to possess a certain breadth and depth of knowledge of music history and music theory. To help ensure this, all incoming graduate students will be given diagnostic examinations to evaluate their knowledge of music history and the theoretical aspects of tonal and post-tonal music. These diagnostic examinations will normally be given during the week preceding the first week of classes in the Fall. The material on these examinations will correspond to that studied in our undergraduate courses in music history and music theory. Details of suitable review materials will be mailed to all incoming graduate students, and are also available on our website or by request from the music office.

Incoming graduate students who do not achieve satisfactory results on any portion of these tests may be required to do remedial work as a co-requisite or pre-requisite to their graduate program; such work, in the form of course or other requirements, will not count for credit toward the Master of Music degree. Since remedial coursework may be specified as a pre-requisite to a required graduate course, incoming graduate students will not be permitted to register for courses in the Faculty of Music until these diagnostics exams have been taken.

Program Requirements

The Faculty offers three program areas leading to the M.Mus. As part of each program, all M.Mus. students are required to take: MUSC 7000, MUSC 7050, MUSC 7110, MUSC 7180, MUSC 7400, MUSC 7410 and complete program requirements for areas of study, as follows:

Second Language Reading Requirement:

Reading knowledge of one language other than English is required. The language required will normally be French, German or Italian. Other languages will be accepted if more appropriate to the student's program. The specific requirement will be determined in consultation with the student's committee. This requirement may be met through one of the following:

- Evidence of the completion of an undergraduate language course at the 1000 level or above in the five years preceding acceptance into the program.
- The translation, using a dictionary, of a passage in the major area of study.
- Completion of a course at the 0900 or higher level after registration in the Masters Degree program.
- Determination by the student's committee that the requirement has been met through previous education and/or experience.

M.Mus. in Performance,
Electives: 6 credit hours

(String students participating in the Winnipeg Symphony Orchestra will take one Topics in Music course (3CH) in Orchestral Performance.)

Total: 24 credit hours

The Performance thesis/practicum requires either: (a) one recital, normally consisting of solo repertoire, accompanied by a paper which provides historical or analytical program annotation; or (b) two recitals, one of which is solo repertoire and the other of which may include solo and ensemble repertoire. No paper is required under option (b).

A proposal for this project will be developed by the student in consultation with the Major Practical Study instructor and must be approved by the student's committee. The committee will consider the stylistic and technical appropriateness of the program in its adjudication.

M. Mus. in Conducting,
Electives: 6 credit hours

Total: 24 credit hours

The Conducting thesis/practicum requires a significant repertoire of performance which is chosen, rehearsed, scheduled and conducted by the student. The performance of this body of work will be accompanied by historical or analytical program annotation.

A proposal for this project will be developed by the student in consultation with the conducting instructor and must be approved by the student's committee. The committee will consider the stylistic and technical appropriateness of the repertoire in its adjudication.

Expected Time to Graduate: Two years.

M. Mus. in Composition,
Electives: 3 credit hours

Total: 24 credit hours

The Composition thesis/practicum requires the production of a substantial body of work accompanied by a significant analytical paper which explains the structure of the piece(s) and the compositional processes. Normally, a performance of the piece(s) is required.

A proposal for this project will be developed by the student in consultation with the composition instructor and must be approved by the student's committee. The committee will consider the extent of the performance forces, the proposed length and the technical requirements of the body of work in adjudicating appropriateness.

Ph.D. in Music,
The Faculty of Music does not offer a Ph.D. Program at this time.

Page URL,
<http://crscalprod1.cc.umanitoba.ca/Music.catx>

Music Course Descriptions

MUSC 7000 Music History Seminar
(Formerly 033.700) The study of the nature of past and current concepts and practices in the discipline of music history

MUSC 7050 Bibliography and Research Methods
(Formerly 033.705) The techniques of bibliography and research methods in music are studied through research projects in selected areas relevant to each student's major field of study. Skill is developed in the use of primary and secondary sources, expository writing and documentation

MUSC 7060 Advanced Diction 1
(Formerly 033.706) Advanced training in rules of pronunciation, language use and translations skills in Italian and German. Lab Required.

MUSC 7070 Advanced Diction 2
(Formerly 033.707) Advanced training in rules of pronunciation, language use and translations skills in French and English. Lab Required.

MUSC 7110 Music Theory Seminar
(Formerly 033.711) A comprehensive survey of 20th century analytical methodologies of tonal and post-tonal music.

MUSC 7180 Ensemble
(Formerly 033.718) Studio instruction and monitored pre-professional training activities in chamber music leading to the presentation of ensemble performance.

MUSC 7380 Piano Repertoire Seminar
(Formerly 033.738) Advanced study of the repertoire for solo piano up to the early 20th century.

MUSC 7390 Piano Chamber Music Literature Seminar
(Formerly 033.739) Advanced survey of piano chamber music.

MUSC 7400 Major Practical Study 1
(Formerly 033.740) Private studio instruction and monitored pre-professional training activities in one of the following: composition, conducting, or any one of the standard instruments or voice.

MUSC 7410 Major Practical Study 2
(Formerly 033.741) A continuation of Major Practical Study 1.

MUSC 7490 Advanced Piano Pedagogy
(Formerly 033.749) Consideration of advanced approaches to the teaching of styles and techniques through an examination of piano repertoire.

MUSC 7520 Coaching Skills
(Formerly 033.752) Advanced training in philosophies and techniques of vocal coaching including both song and operatic repertoire.

MUSC 7530 Operatic Piano
(Formerly 033.753) Development of skills required of an operatic pianist, including standard Arias, operatic scores, working with conductors and developing orchestral sound. May include participation in community opera events (by audition only).

MUSC 7600 Advanced Orchestration
(Formerly 033.760) Advanced practical work in orchestration for various-sized large ensembles up to and including full orchestra. Detailed study of selected scores and work on individual orchestration projects.

MUSC 7630 20th to 21st Century Piano Repertoire
(Formerly 033.763) Advanced study of piano repertoire since 1900.

MUSC 7810 Electroacoustic Music
(Formerly 033.781) A study of the techniques of electroacoustic music.

MUSC 7860 Topics in Music
(Formerly 033.786) Course orientation will vary according to the needs and interests of students. A specific topic will be chosen for each offering of the course.

Native Studies

Native Studies ,
Native Studies Program Info,
The graduate program in Native Studies offers students the opportunity to complete the advanced study (M.A.) of issues relating to Aboriginal peoples in a manner that reflects their commitment to the Aboriginal community and sensitivity to Aboriginal perspectives. The core nature of the Master's of Arts in the Native Studies program at the University of Manitoba is based on a notion of the inherent interdisciplinary nature of the field of Native Studies. This program is rooted in a unique position between Aboriginal and Western worldviews; it fosters a broad understanding of Aboriginal issues in the university community and beyond. The graduate program in Native Studies is committed to the principles of academic excellence, inclusivity, creativity, and leadership in the field of Native Studies.

A high degree of interaction occurs between faculty members and graduate students because of the small size of the program. While in the program, graduate students have opportunities such as: presenting their research at conferences; publishing in refereed journals; celebrating Aboriginal scholarship; and competing for awards, bursaries, scholarships and fellowships. Graduates from this program work at a wide range of jobs in private industry, government agencies, Aboriginal organizations, education, health, environment, management, and other related fields.

Fields of Research

Areas of expertise in Native Studies at the University of Manitoba which are readily available to graduate students include: Indigenous literatures, urban issues, women's issues, culture (history, material culture, contemporary issues), self-government and land claims, economic development (including sustainable formal and informal economies), the environment, Métis studies, Inuit studies, Aboriginal identity, resource management, wildlife management, political science, law, education, Aboriginal wisdom and Aboriginal ways of knowing, traditional ecological knowledge, critical theory, colonization, ethics, and other related fields.

Research Facilities

Students access research facilities including: Churchill Northern Studies Centre, Hudson's Bay Company Archives, St. Boniface Métis Museum collection, Museum of Man and Nature collection, and facilities in First Nations, Inuit, and Métis communities.

Master's of Arts in Native Studies,
Admission

For students to be admitted directly into the Master's program, they are required to have the equivalent of an advanced/honours degree with a major in Native studies. Students with majors in other fields may apply if they have 30 credit hours in courses relating to Indigenous/Aboriginal/Native studies. Students who do not meet this equivalency will be required to take additional courses to meet the requirement for 30 credit hours of Native Studies courses.

Application Deadlines

The department accepts applications for the Winter (January) and Regular (September) Terms only. The deadlines for submission of an application and supporting documentation to the Faculty of Graduate Studies are as follows:

Winter (January) September 15
Regular (September) March 15 – Canadian citizens
January 15 – International students

Program Requirements

The program requirements include twelve credit hours of required and six credit hours of additional course work at the 4000 level or above for a total of 18 credit hours. A thesis is also required. Students should consult the Supplementary Regulations, available through the Native Studies Graduate Office, for more details regarding requirements.

Twelve credit hours must include NATV 7230 Methodology and Research Issues in Native Studies; NATV 7240 Issues in Colonization; NATV 7250 Culture: Theory and Praxis; and NATV 7280 Native Studies Colloquia (3 terms). NATV 7220 Selected Topics in Native Studies may be taken more than once.

Second Language Reading Requirement: none

Expected Time to Graduate: two years

Ph.D. in Native Studies,
Students in the field of Native Studies prepare individual interdisciplinary program proposals and may apply for admission into the Individual Interdisciplinary PhD programs. It is anticipated that the Native Studies Department will have received approval for its own Ph.D. program shortly.

Second Language Requirement: 6 credit hours P/F in any Indigenous language

Expected Time to Graduate:

Page URL,
<http://crscalprod1.cc.umanitoba.ca/NativeStudies.catx>

Native Studies Course Descriptions

NATV 7220 Selected Topics in Native Studies
(Formerly 032.722) A critical examination of issues in selected areas of Native Studies designed to meet the special needs of graduate students interested in exploring interdisciplinary perspectives in Native Studies. Prerequisite: consent of instructor. As the course content will vary from year to year, students may take this course more than once for credit.

NATV 7230 Methodology and Research Issues in Native Studies
(Formerly 032.723) A review of research methods, such as oral histories, and research issues, such as ethics and intellectual property rights, within the context of Native Studies. Prerequisite: consent of instructor.

NATV 7240 Issues in Colonization
(Formerly 032.724) An examination of the factors influencing colonization, assimilation and indigenization. Explores the colonization and decolonization processes, theories of colonization and ways of promoting indigenization without assimilation.

NATV 7250 Culture: Theory and Praxis
A study of selected material in Métis, Aboriginal, or Inuit studies, designed to meet the special needs of graduate students interested in exploring interdisciplinary perspectives in Native Studies. Prerequisite: consent of instructor.

NATV 7280 Native Studies Colloquia
(Formerly 032.728) Theoretical, methodological, ethical and contextual issues in Native Studies are explored from the perspectives of formally and informally trained experts using a colloquia format. Students are required to attend regularly. This course is taken more than once to fulfil program requirements. Time slots to be determined the first week of September (Pass/Fail). As the course content will vary

from year to year, students may take this course more than once for credit.

NATV 7290 Seminar in Aboriginal Economy
This seminar deals with a variety of specific topics in Aboriginal Economy. As the course content will vary from year to year, students may take this course more than once for credit.

NATV 7310 Critical Theory and Native Studies
This course will assess the relevance of the concepts produced by recent social theory to the situation of Aboriginal peoples and the contribution made by "fourth world" contexts to social theory. Marxism, feminism, post-structuralism, post-colonial theory, and cultural theory will be among the perspectives examined.

NATV 7320 Trauma Theory in Indigenous Writing in Canada and Australia
This course will compare selected texts by Indigenous authors from Canada and Australia as trauma literature. The respective texts will be analyzed with the help of trauma theories as developed in relation to the Holocaust. Prerequisite: written consent of instructor.

Natural Resources Management

Natural Resources Management ,
Natural Resources Management Program Info,
The Natural Resources Institute (NRI) is one of the pioneering academic units in Canada active in natural resources and environmental management research and teaching. As such, it has contributed to the training of over 800 academics, professionals, administrators, and practitioners who are now active in the natural resources and environment fields in Manitoba and throughout the world, in both the public and private sectors.

The institute's academic activities are interdisciplinary and are focused upon local and global problem solving linked to the strength and expertise of faculty members and the interests of students. Full-time faculty work closely with an outstanding cadre of adjunct professors from other university disciplines, from the universities of Brandon and Winnipeg, from several government departments (such as the Canadian Department of Fisheries and Oceans and the Manitoba Department of Conservation), as well as from non-governmental agencies and the private sector.

Natural resources and environmental policy and decision-making provide the context for most academic activities. NRI is noted for the identification of novel approaches to establish the necessary linkages between the environment, economy, and the social well being of people. Thus, the institute uses a three-dimensional approach to natural resources and environmental policy and decision-making as it continues to search for innovative solutions that will be good for the environment as well as for poverty alleviation.

This holistic interdisciplinary approach is pursued in teaching, research and outreach. The institute's strength and expertise cut across a number of resource fields; human dimensions of natural resources management; natural resources policy; institutions, decision-making processes; water resource management; environmental governance; environmental hazards and risk assessment; climate change impact and adaptation; community based resource management; traditional ecological knowledge; habitat, wildlife, and ecological management and multi-stakeholder processes/public involvement; and conservation of biodiversity.

Institute faculty and students continue to make contributions to resources management locally, nationally and internationally. Locally: City of Winnipeg waste management; province of Manitoba water strategic plan; province of Manitoba sustainable development (SD) initiatives; wildlife habitat with Ducks Unlimited and Delta Waterfowl. Nationally: First Canadian national hazards research assessment; coastal zone management work, monitoring of project impacts; review of Canadian Environmental Assessment Act (CEAA). International: impacts of urban development in high mountains in northern India; co-management of resources in Costa Rica, Bangladesh, Turkey, Stewardship initiatives in the EU, in particular, in Germany; building environmental governance capacity in Bangladesh; international disaster prevention and mitigation; sustainable floodplain management in Bangladesh and Canada. The institute is the focal point at the University of Manitoba for interdisciplinary education, research, and outreach in resources and environmental issues. In the latter context the institute sees itself as having a major

responsibility to the University of Manitoba, the City of Winnipeg and to the Province of Manitoba in the solution of problems involving natural resources and the environment. Institute staff takes their obligation to assist in the solution of global problems just as seriously.

The master's program in natural resources management combines a broad commitment to sustainability with development of well-focused, practical expertise in natural resources management. The program recognizes that pursuit of sustainability requires attention to ecological, economic, and social issues at all levels -from the local to the global. But it also expects that most gains are made through specific practical management application. Therefore, the program is designed around two main elements: an interdisciplinary examination of sustainability concerns and defined management project examinations undertaken in this broader context.

The doctoral program is aimed at developing independent researchers in the areas of natural resources and the environment. Students enter the program from a variety of academic backgrounds and disciplines.

Fields of Research

NRI's graduate programs are interdisciplinary, responding to the need to educate professionals in integrative thinking and problem solving. The programs cut across conventional disciplinary lines to emphasize linkages between social and natural systems, environmental policy and decision-making. The research is focused on integrating the environment with the economy and the well being of people. Research areas include resource and environmental sustainability; environmental governance; environmental hazards and risk assessment; water resource management; climate change impact and adaptation; community-based resource management; wildlife habitat and landscape ecology; northern resources and development, ecosystem management, conservation of biodiversity, and multi-stakeholder planning and decision-making.

Research Facilities

Facilities on site include a fully equipped computer laboratory with appropriate software. Many of the NRI's interdisciplinary research projects are carried out jointly with a variety of agencies in various locations. Recent projects include those with Manitoba Conservation, Manitoba Hydro, Manitoba Model Forest, the City of Winnipeg, Fisheries and Oceans Canada—Central and Arctic Region, Parks Canada, Ducks Unlimited, and the International Institute for Sustainable Development. A significant number of NRI projects are carried out cooperatively with First Nations and many are completed overseas with a variety of international agencies. For those research projects requiring physical facilities, students and faculty have access to the Delta Marsh Field Station, the Fort Whyte Centre and the Experimental Lakes Area of Fisheries and Oceans Canada.

Master of Natural Resources Management , Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

Application Deadlines

Session Start Date	Canadian/U.S.	International
Regular (September)	June 1	February 1
Winter (January)	October 1	July 1
Summer(May)	February 1	November 1

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Students in the Master's program follow an individual study plan that includes 12 credit-hours of required courses, a minimum of 15 credit-hours of elective courses and a Master's thesis.

The central academic agenda of the required set of courses includes: Assessment of the theoretical foundations and practical applications of progress toward sustainable management of natural resources; understanding of ecosystems as self-organizing and responding systems; examination of conventional and alternative social arrangements, including institutions and tools of governance, as a means of improving human well-being and environmental responsibility; and exposure to theories of resource and environmental management processes and tools.

Second language reading requirement: none

Expected time to graduate: two years

Ph.D. in Natural Resources and Environmental Management.

This program provides studies in the environment and natural resources through a holistic and interdisciplinary approach. Students' programs and research will prepare them to pursue independent research aimed at solving the complex issues facing the world environment learning about varied approaches and using a variety of tool and methods.

A hallmark of the program is the collaboration with other University of Manitoba academic units and other Manitoba universities through an extensive cadre of adjunct professors and cross-appointments. This cadre is further strengthened by the appointment of adjunct professors from a variety of agencies external to the University of Manitoba, including the Freshwater Institute, the International Institute for Sustainable Development, Delta Waterfowl, and Ducks Unlimited, to name a few.

Admission

Admission to the program is as in the Faculty of Graduate Studies Regulations Section of this Calendar. An applicant should have a high academic standing in previous university work, a Master's degree in a related discipline, as determined by the NRI Selection Committee, and an area of research interest that may be supported by an NRI faculty member. Students must be accepted by an advisor prior to submitting an application to enter the program. A 3.5GPA (or equivalent) in their most recent 60 credit hours of course work and evidence of scholarly ability are required.

Application Deadlines:

Session Start Date	Canadian/U.S.	International
Regular (September)	June 1	February 1
Winter (January)	October 1	July 1
Summer(May)	February 1	November 1

Program Requirements

All Ph.D. students will be required to complete a minimum of 12 and a maximum of 21 credit hours of course work at the 700/7000-level or above, beyond the Master's degree (or its equivalent). A minimum of 6 credit hours of courses must be completed within the Natural Resources Institute and must include NRI 7310 Ph.D. Thesis Research Seminar (3).

Individual programs of study will vary from student to student depending on each student's research interest and the recommendations of each student's advisor and Ph.D. advisory committee. Students will be encouraged to use the pool of Natural Resources Institute required and elective courses as well as appropriate graduate courses available outside of the Natural Resources Institute in order to select the best set of courses to complement their programs.

Student academic progress will be reported annually to the Faculty of Graduate Studies. A minimum Grade Point Average of 3.0, with no grade below C+, must be maintained in order to continue in the program.

Second language reading requirement: required only in special circumstances determined at the time of admission.

Expected time to graduate: three years

Page URL,

<http://crscalprod1.cc.umanitoba.ca/NaturalResourcesManagement.catx>

Natural Resources Management Course Descriptions

NRI 7070 Readings in Natural Resources Management 1

Student planned research in an area of interest. Course syllabus designed by student and approved by NRI faculty. Additional information on the program may be found in the NRI Information Bulletin, available through the general office of the institute.

NRI 7080 Readings in Natural Resources Management 2

Student planned research in an area of interest. Course syllabus designed by student and approved by NRI faculty. Additional information on the program may be found in the NRI Information Bulletin, available through the general office of the institute.

NRI 7110 Field Seminar

Exploration of selected issues in resource and environmental studies in field settings, arranged for groups of students. This course is subject to a field trip fee. Additional information on the program may be found in the NRI Information Bulletin, available through the general office of the institute.

NRI 7120 Mineral Resources Management and Policy

This course provides an interface between managers and mineral resources, focusing on a selection of practical topics related to minerals and mining. Role of mining activities in the development process; global, national, and provincial distribution of resources; policy issues relating to environmental, economic, and political consequences of non-renewable resource exploitation. Additional information on the program may be found in the NRI Information Bulletin, available through the general office of the institute.

NRI 7130 Energy Resources Management and Policy

This course covers global energy issues, objectives, strategies, and policies, and the environmental impacts of alternative energy sources; Canadian energy issues, objectives, strategies, and policies. The course stresses the need for a sound understanding of energy issues of fundamental importance, ability to assess alternatives, appreciation of policy strategies and instruments, and the ability to formulate an energy policy for a region. Additional information on the program may be found in the NRI Information Bulletin, available through the general office of the institute.

NRI 7160 Projects in Natural Resources Management 1

Team research project in an area of interest. Application of problem-solving skills to current issues in natural resources management. Additional information on the program may be found in the NRI Information Bulletin, available through the general office of the institute.

NRI 7170 Projects in Natural Resources Management 2

Team research project in an area of interest. Application of problem-solving skills to current issues in natural resources management. Additional information on the program may be found in the NRI Information Bulletin, available through the general office of the institute.

NRI 7180 Sustainable Development and Natural Resources

An examination of the context, concepts, principles, and applications of sustainable development and natural resources at the international, national, and regional levels. Sustainable development is considered from three perspectives - environment, economy, and peoples' well-being. Particular attention is focused upon the implications of sustainable development for natural resources and environmental management. Permission of the instructor required. Students are advised to consult with Institute faculty prior to admission. Additional information on the program may be found in the NRI Information Bulletin, available through the general office of the institute.

NRI 7182 Sustainability, Economics, and Natural Resources

Economic aspects of sustainability are a critical component of sustainable development. The relationship between environment, economy, and the human dimensions of natural resources comprise the primary focus of the course. Specific topics include environmental/ecological economics, externalities, project
Graduate Studies

assessment, benefit cost analysis, the economics of renewable and non-renewable resource management and economic aspects of globalization.

NRI 7190 Natural Resources Administration and Law

The objective of this course is to explore the legal frameworks and processes in Canada related to natural resource management. After a general review of the Canadian legal system with a particular focus on administrative law, national and international regulatory frameworks related to the ownership and disposition of specific natural resources are explored. Through class discussion, case studies and presentation, the law governing the use and development of natural resources is examined and critiqued. This course is cross-listed with LAW 3980 "Natural Resources Law."

NRI 7200 The Role of Information Management in Sustainable Resource Use

This course reviews some of the key concepts of spatial analysis including geographic information systems, remote sensing, image processing, and cartography. The second part of the course is based on the application of these concepts to a resource management issue using a case study approach. Students will gain familiarity with the following software: Idrisi for GIS; Adobe Photoshop for image processing; and Adobe Illustrator for cartography. Classes will have three components, discussion/presentation; lecture; and lab. Additional information on the program may be found in the NRI Information Bulletin, available through the general office of the institute.

NRI 7222 Human Dimensions of Natural Resources and Environmental Management

The human dimensions of Natural Resources and Environmental Management will be considered through the following thematic units: definitions, history, and paradigms of management; intersection of science with politics, actors, groups and participatory processes; Traditional Ecological Knowledge (TEK), communications and environmental perception; institutions, common theory and adaptive co-management.

NRI 7232 Ecological Dimensions of Resource and Environmental Management

Current concepts and theories in landscape ecology, plant and animal ecology, life-history strategies, food webs, and population and community ecology are discussed as they relate to management. Common themes throughout the course include the importance of scale, the influence of science on management, adaptive management, and critical thinking.

NRI 7242 Resource and Environmental Management Policy

The complexity of natural resources and environmental policy formulation, implementation, and analysis is the primary focus. Specific topics include: modern state, government and policy development processes; policy community and stakeholders, and role of pressure and interest groups; policy analysis, research and evaluation are examined from a variety of perspectives. Theory and practice are linked in addressing course objectives.

NRI 7252 Environmental Management Practice

Environmental Management systems (e.g. 14001 and Natural step), best management practices and project management. Tools: Awareness (Environmental Policy, Environmental Impacts, Risk Assessment, Life Cycle Assessment), Action (Objectives, Targets, Risk Reduction, Indicators, Monitoring, Activities), Advance (Sustainability Report, Triple Bottom Line, Environmental Audit).

NRI 7262 Master's Thesis Research Seminar

This course will provide a practical introduction to thesis research. The core objective is to assist students in designing their research, including such tasks as considering an appropriate research paradigm, establishing researchable problems, setting goals and objectives, choosing appropriate methods, analyzing data, preparing research proposals, project administration, among other topics. Special attention will be paid to conducting interdisciplinary research in the field of natural resources management.

NRI 7280 Regional Development in Northern Manitoba

A comprehensive examination of natural resources, socio-economic conditions, and institutional structures forms the basis for an evaluation of long-term sustainability and developmental strategies for Manitoba's North. Permission of the instructor required. Students are advised to consult with Institute faculty prior to admission. Additional information on the program may be found in the NRI Information

Bulletin, available through the general office of the institute.

NRI 7290 Environmental Impact Assessment

Course is a fundamental tool of decision making regarding natural resources and the environment and will provide students with an understanding of how environmental assessment is designed, administered and operates in the field. Additional information on the program may be found in the NRI Information Bulletin, available through the general office of the institute.

NRI 7302 Conservation Biology and Biodiversity Management

The course explores management and conservation of biodiversity at the genetic, species, and ecosystem levels of biological organization, and from local to global scales. Emphasis is placed on understanding human impacts on biodiversity, critically evaluating the importance of biodiversity conservation, and political, economic, ecological, and philosophical implications and drivers of conservation.

NRI 7310 Ph.D. Thesis Research Seminar

Designing research and methodology specific to a project; reviewing the philosophy of interdisciplinary approaches to Natural Resources and environmental management and trends in the field; analyzing appropriateness of a project with trends and directions in interdisciplinary research; conducting and administering research; communicating and disseminating results of research.

NRI 7320 Environmental Risk and Hazards

Environmental risk and hazards are viewed in terms of complex processes of natural systems and social formation. Analysis of processes and events is assisted by theoretical formulation, development of models and examination of site- or type-specific empirical cases.

NRI 7330 Water Resources: Analysis, Planning and Management

Considering fresh water as a resource, this course initially examines theoretical models and management approaches and practices; water supply requirement, measurements, and management; demand management; and environmental sustainability. The second part encompasses selected aspects of watershed hydrology and management; water and ecosystem health; and river basin management strategies and policies. The final part evaluates institutional arrangements and jurisdictional responsibilities; transboundary issues, opportunities and implications

NRI 7340 Environmental Justice and Ecosystem Health

Explores Ecosystem health and environmental justice issues to realize both the possibilities and barriers to sustainability. Risk, resource distribution and power/decision-making are analyzed across race, gender and class differences. Diverse views, theories and methods on community health consider well-being, quality of life, vulnerability and ecological integrity.

NRI 7350 Study Design and Quantitative Methods for Resource and Environmental Management

This course addresses the quantitative analysis of environmental and natural resources data, emphasizing strong study design to prevent analytical difficulties. Focus is on preparing graduate students in environmental and resources management for dealing with the typical characteristics of environmental data, and for analyses specific to resources data.

NRI 7360 Qualitative Field Methods for Community-based Resource and Environmental Management

The purpose of this course is to provide students with the knowledge and skills necessary to undertake qualitative research relevant to CBRM. The course will be offered in a studio format with an emphasis on student participation in a research team and the practical application of data collection procedures in field setting.

NRI 7370 Sustainable Livelihoods, Food Resources and Community Food Security

About one third of a household's total environmental impact is related to food considering all the effects of livestock, agriculture and the food industry on water, soil and air, the overuse of fish resources, transport and packaging waste. This course analyzes sustainable livelihoods and food security/sovereignty in the food system (production, processing, marketing, etc.).

Nursing

Nursing ,

Graduate Studies

Nursing Program Info,

The Faculty of Nursing currently offers programs leading to the Master of Nursing (MN) degree and a Ph.D. in Cancer Control offered by the Faculty of Nursing and the Department of Community Health Sciences, Faculty of Medicine. The MN program streams are Education, Administration, Clinical, and Nurse Practitioner. The MN program provides students with expertise which enables them to respond in an ever-changing, dynamic, and fluid practice setting, as well as prepares students for possible doctoral study.

Graduates of the program over the past 10 years work in many areas: for example, middle and senior managers, clinical nurse specialists, nurse practitioners, government health policy bureaucrats, nursing educators, and directors of research in institutions. Over 20 percent of graduates pursued doctoral education following their master's program.

Fields of Research

The Faculty of Nursing has areas of established research excellence and emerging research specialties. Nursing is an 'applied' profession and the nursing research conducted at the University of Manitoba emphasizes the development of nursing knowledge as a basis for evidence-based practice.

The research area of cancer care of individuals and families has gained international recognition with the establishment of the Research Chair in the 'Development of Evidence-Based Nursing Practice in Cancer Care, Palliative Care, and Cancer Prevention'. The awarding of this Research Chair to the Faculty of Nursing facilitated the creation of the joint Ph.D. in Cancer Control with the Faculty of Medicine and acted as the stimulus for the growth of research and scholarship by faculty members and students.

The Canadian Institutes of Health Research (CIHR) Chair in Gender and Health is a program of research that is specifically aimed at examination of inequities and disparities in women's prenatal health; access to prenatal care, and quality of care; exploration of how these disparities intersect with other health determinants such as income, ethnicity, migration, and geography; and study of the association of disparities in women's prenatal health and inequities in access to prenatal care and quality of care with adverse pregnancy outcomes. This Chair award includes funding to support and train full-time graduate students. For further information: http://umanitoba.ca/faculties/nursing/research/heaman_chair.html

The Manitoba Research Chair from the Manitoba Health Research Council (MHRC) was awarded from 07/2010 to 06/2015 for the program of research entitled, Advancing our Understanding of Children's and Youth's Health and Illness Experiences. For further information: http://umanitoba.ca/faculties/nursing/research/woodgate_chair.html

The research foci represent the research programs nationally funded, as well as new and emerging research initiatives of faculty members. These foci occur within the context of population and public health to improve client care and health outcomes through knowledge translation.

- **Interventions:** includes innovations in the care of individuals and families with cancer, disabilities and acute and chronic illnesses; promotion of health with vulnerable populations in the community.
- **Professional Foundations:** includes theoretical and applied research on nursing and interprofessional education and practice.
- **Health Services/Policy:** includes research on the delivery, effectiveness, and safety of health services at the individual, community, and population levels; health policy; health administration; and organizational health behaviour.

The Faculty of Nursing has formal linkages with the University of Manchester. Collaborate research is conducted with the Mayo Clinic in Rochester, Minnesota. In addition, other consultation and research occurs at many health facilities in the province. These relationships provide graduate students with many possibilities and opportunities to pursue their areas of interest and expand their understanding of health and health care.

Research Facilities

The Manitoba Centre for Nursing and Health Research (MCNHR) is located within the Faculty of Nursing. The MCNHR supports and advances the research and scholarly activities of its members who include faculty and affiliated nursing and health researchers within the community. Available supports to graduate students include methodological and statistical consultation, qualitative and quantitative data analysis programs, and information on research grant initiatives. Opportunities are available for graduate students to work with MCNHR members as research assistants.

Master of Nursing , Admission

In addition to the minimum admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, applicants must possess:

A baccalaureate degree in nursing, mental health nursing or psychiatric nursing or its equivalent from an approved or accredited university. In exceptional circumstances, applicants with a degree in another discipline may be considered on a case by case basis. RPN applicants are not eligible for the Nurse Practitioner stream;

Completion of a Research Methods course and an Introductory Statistics course with a minimum grade of C+ in each course. The content of specific courses may be reviewed to determine whether these criteria are met; and

Proof of active practicing nurse registration in Canada. Applicants from other countries may apply provided they have active practicing nurse status in their home country. After admission, the following is required:

- Canadian Students – Students must maintain Active Practicing Status with the College of Registered Nurses of Manitoba while enrolled in the MN Program.
- Foreign Students – Students in the Graduate Program from outside Canada must provide proof of active practicing nurse status in their home country. Students who do not interact with clients/patients in their clinical practice (i.e., administration and education foci) will not be required to obtain registration in Manitoba. Students who interact with clients/patients (clinical practice and nurse practitioner) will be required to obtain active practicing membership with the College of Registered Nurses of Manitoba (approved by the Graduate Studies Committee, November 20, 2008).

The Faculty of Nursing has additional application requirements and procedures. Check the Faculty of Nursing website for details and the link to the application form on the Faculty of Graduate Studies website: <http://umanitoba.ca/faculties/nursing/programs/graduate/admission.html>. Completed applications must be received in the Faculty of Graduate Studies by April 1st for the year in which admission is sought.

Students admitted to the Master of Nursing program must be fully immunized as prescribed by the Faculty of Nursing Immunization Policy and submit a completed Immunization Record.

Application Deadlines

Students in the Faculty of Nursing normally begin their program on September 1st. For admission for this start date, Canadian and International students should send their applications with complete supporting documentation to the Faculty of Graduate Studies by April 1st.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. The Master's Program in Graduate Studies

Nursing includes 21 credit hours for students completing a thesis, and 27 credit hours for students completing comprehensive exams. The Nurse Practitioner stream consists of 36 credit hours plus the Clinical Consolidation course.

Second language reading requirement: none

Maximum time to graduate: six years

Ph.D. in Cancer Control,
The Faculty of Nursing offers a [Ph.D. in Cancer Control](#). Information on this program may be found in another section of this calendar.

Ph.D. in Applied Health Sciences,
The Faculty of Nursing, in collaboration with the Faculty of Physical Education and Recreation Studies, Faculty of Human Ecology, and School of Medical Rehabilitation, now offers a multi-faculty [Ph.D. in Applied Health Sciences](#). Information on this program may be found in another section of this calendar.

Page URL,
<http://crscalprod1.cc.umanitoba.ca/Nursing.catx>

Nursing Course Descriptions

NURS 7030 Foundations, Issues and Trends in Nursing (Formerly 049.703) Explores how social forces have influenced the evolution of nursing, its place in society, and the health care system today. Examines issues and trends affecting present and future development of nursing.

NURS 7040 Curriculum Development in Nursing (Formerly 049.704) The course is designed to explore the developmental phases of curriculum design in a variety of educational settings and types of programs. Students will have the opportunity to engage in the planning and the structuring of educational programs. Course in abeyance.

NURS 7050 Restorative Nursing (Formerly 049.705) Advanced study of the scientific foundations of human functioning as it applies to individuals and families in the context of altered health status. Nursing theories and therapeutic interventions will be applied to the restoration of the health status of individuals and families. Practice is an integral part of the course. Offered on a rotating basis.

NURS 7080 Special Topics in Nursing Research II (Formerly 049.708) Seminar discussion of topics related to current issues and problems in the development, implementation, and evaluation of knowledge utilization programs in nursing practice. Required of all practicum students. Offered when student demand warrants and on a rotating basis.

NURS 7082 Evidence Informed Practice
This course will provide a foundation for students to evaluate the theory of evidence informed practice and its relationship to health care delivery. Students will be exposed to the principles of evidenced informed practice, basic epidemiological statistics, systematic reviews, critical appraisal techniques, application of implementation science, and health care intervention evaluation in order to acquire the analytical and questioning skills necessary to review their own work and other literature relevant to health care practices. Asking the right clinical question, searching the literature, critically appraising primary studies, making recommendations(s) for changing clinical practice, and evaluation the effects of a practice innovation or newly developed program are essential components of evidenced informed practice.

NURS 7084 Role development in Advanced Nursing Practice
The purpose of this course is to understand the role of advanced nursing practice. The context, complexity, and scope of the roles within professional nursing practice will be explored. Particular emphasis will be placed on the knowledge base and skill set required to be an effective leader in a variety of advanced practice nursing roles. In this course, nursing graduate students for all streams will come together to

discuss and debate issues related to advanced nursing practice on a local, regional, national and international level.

NURS 7086 Integrative Focus

The purpose of this course is to allow the student to focus in-depth in a substantive area of nursing practice: clinical practice, education or administration. Students will engage in practice in the area of focus, and be guided by the faculty adviser with respect to the goals and direction of the practicum and associated readings. Students will participate in seminars facilitate by the faculty at designated times throughout the practicum.

NURS 7090 Science and Theory in Nursing

The course includes an exploration of nursing's theoretical evolution. Issues related to the development and application of theory in a practice discipline will be discussed with a focus on the role of research. Particular emphasis will be placed upon analysis and evaluation of nursing's conceptual and theoretical systems.

NURS 7100 Administration in Nursing

(Formerly 049.710) Exploration and analysis of the roles and responsibilities of the nursing administrator in today's health care system. Examination of the organizational structure and culture of nursing services in relation to conflict resolution, interdisciplinary relationships and union negotiation. Includes preceptorship experience. Offered on a rotating basis and currently under review.

NURS 7110 Readings in Selected Topics

(Formerly 049.711) An intensive readings course for graduate students in nursing. Topics may be selected within the general field of nursing to suit the special needs and research interests of students, for example, transcultural nursing, women's health, or palliative care. Students must have a faculty member agree to advise them before registering.

NURS 7140 The Older Adult: Advanced Nursing Assessment

(Formerly 049.714) Advanced study and practice integrating theory, concepts, research and skills related to nursing assessment of the strengths and vulnerabilities of older adults and their families. Emphasis is on health promotion for the elderly. Clinical practice in the community and/or the institution is a component of the course. Offered on a rotating basis.

NURS 7150 The Older Adult: Clinical Decision-Making and Intervention in Nursing

(Formerly 049.715) Emphasis is on advanced study and practice in evaluation of clinical data and subsequent selection of appropriate nursing interventions to promote health of older adults and their families. Development of skills related to consultation and supervision is integral to the course. Clinical practice settings include the community and institutions. Offered on a rotating basis.

NURS 7160 Cancer Nursing Research

(Formerly 049.716) Focuses on recent advances in cancer nursing research with an emphasis on research methodologies, ethical concerns, and design issues pertinent to research with cancer populations. Approaches to utilization of research findings in clinical practice will be addressed. Offered on a rotating basis.

NURS 7170 Community Health Nursing: Assessment of Aggregate Needs

(Formerly 049.717) Furthers theoretical and practical knowledge of key components of community health nursing within the primary health care model. Focus is on community health nursing systems and their relationship to the total health care system. Factors influencing past, current, and future community health nursing practice are examined. Emphasis is on assessing aggregate needs and developing advanced skills in working with a target group in the community. Practice in the community is an integral part of the course. Offered on a rotating basis.

NURS 7180 Community Health Nursing: Community Level Interventions

(Formerly 049.718) Furthers theoretical and practical knowledge in community wide interventions that promote health. Focus is on the community health nurse's role in program development and evaluation for targeted groups in the community, and the role of influencing health policy through lobby efforts. Practice in the community is an integral part of the course. Prerequisite: NURS 7170 (or 049.717) or permission of instructor. Offered on a rotating basis.

NURS 7200 Human Responses to Illness

(Formerly 049.720) Consists of a series of seminars, case studies and clinical Graduate Studies

practica on human responses common to ill individuals across the lifespan. The emphasis of the course is on synthesis and application of relevant principles of the Human Response to Illness Model, on the development of proficiency in advanced assessment and decision-making, and on initiating, planning and evaluation of nursing interventions. Clinical practice is a course component. Offered on a rotating basis.

NURS 7210 Qualitative Research Methods in Nursing

The purpose of this course is to advance knowledge of qualitative methodology and understanding of the ways in which qualitative methodology can be used to understand phenomena of interest in nursing and health care. This course is designed to provide opportunities for developing specific qualitative research skills, while gaining familiarity with theories, issues, and challenges in qualitative research. Students are exposed to the philosophical assumptions of the qualitative paradigm, ethical issues specific to qualitative research, qualitative sampling strategies, qualitative data collection techniques, and processes associated with the analysis, interpretation, and knowledge translation and utilization of qualitative data.

NURS 7220 Quantitative Research Methods in Nursing

The purpose of this course is to advance understanding of the ways in which quantitative approaches can be applied to solve nursing problems. The quantitative research process will be described including literature review, conceptual frameworks in nursing sampling, data collection strategies, analysis of research data, and communication of results. Included are exploration of the status and development on nursing knowledge through quantitative research methods.

NURS 7250 Foundations of Advanced Practice Nursing

(Formerly 049.725) A study of the theoretical underpinnings surrounding the development of a variety of advanced practice nursing roles. The focus will be on the issues shaping role development in Manitoba and Canada including economic, political and sociologic factors determining health care policy and delivery will be examined.

NURS 7260 Health Care in Advanced Practice Nursing 1

An examination of the assessment and intervention strategies for individuals from birth to adolescence, including sexuality and reproductive health. Designed to provide the necessary knowledge and experience to assist individuals and their families with the most common health problems. Concepts of health promotion and health maintenance are integrated throughout the course. Integrated clinical practicum (12 hrs/week). Prerequisites: NURS 7250 (or 049.725), NURS 7370, NURS 7380 and NURS 7390.

NURS 7270 Health Care in Advanced Practice Nursing 2

(Formerly 049.727) A study of assessment and intervention strategies for individuals from young adult through older adult. The course is designed to provide the necessary knowledge and experience to assist individuals and their families with the most common health problems. Concepts of health promotion and health maintenance are integrated throughout the course. Integrated clinical practicum (12 hrs/week). Prerequisites: PHAC 2100 (or 089.210), PHGY 7240 (or 090.724), 036.725, NURS 7230 (or 049.723), NURS 7250 (or 049.725).

NURS 7280 Applied Physiology and Pathophysiology for Nurses

(Formerly 049.728) This is a clinically-applicable systems approach to normal and altered physiological regulation, and is of specific application to advanced nursing practice. Lectures in physiology and pathophysiology as well as student-led case studies will be used to provide synthesis and application of concepts to common health care problems seen in clinical practice.

NURS 7290 Woman, Child and Family Health: Nursing Perspectives

(Formerly 049.729) Detailed study of the theory, concepts, current research and nursing care related to the health needs of women, children and their families. Students will focus their theoretical learning and clinical practice within selected areas of woman, child or family health. Clinical management of selected clients is an integral part of the course. Offered in 2003 and alternate years thereafter.

NURS 7300 Advanced Health Assessment and Diagnostic Reasoning

Designed to develop health assessment and critical thinking skills appropriate for clinical practice at an advanced level. The collection and in-depth analysis of subjective and objective health information and the use of diagnostic reasoning are emphasized. All students engage in practice with fellow students, clinical teaching

associates and consenting patients. Required for students in the APN major.

NURS 7310 Health Care Policy: Implications for Nursing Practice (Formerly 049.731) Examines the inter-relationships of knowledge development, research utilization, policy formation, health services decision-making, and nursing systems. The selected topics are based on current nursing practice issues in community and institutional settings and their impact in individuals, families and aggregates. A major focus is the analysis of the process of knowledge development and application to health care and nursing systems. Not to be held with the former 049.719 and or NURS 7240 (or 049.724).

NURS 7320 Philosophy of Nursing Science (Formerly 049.732) Advanced seminar to explore philosophies of science which have influenced the development of nursing knowledge. Nursing epistemological traditions are analysed and criticized as they relate to nursing theory development and research. The relationship between nursing science and practice is emphasized.

NURS 7330 Clinical Consolidation
Provides an opportunity to consolidate clinical skills, apply theoretical knowledge and research, and synthesize theory and practice in the final year of the Nurse Practitioner stream (10 weeks of 400 clinical hours). Preparation of a final paper that illustrates scholarly endeavour suitable for publication is required.

NURS 7340 Evidence Informed Practice (Formerly NURS 7080) This course will provide a foundation for students to evaluate the theory of evidence informed practice and its relationship to health care delivery. Students will be exposed to the principles of evidenced informed practice, basic epidemiological statistics, systematic reviews; critical appraisal techniques, application of implementation science, and health care intervention evaluation in order to acquire the analytical and questioning skills necessary to review their own work and other literature relevant to health care practices.

NURS 7350 Role Development in Advanced Nursing Practice
The purpose of this course is to understand the role of advanced nursing practice. The context, complexity, and scope of the roles within professional nursing practice will be explored. Particular emphasis will be placed on the knowledge base and skill set required to be an effective leader in a variety of advanced practice nursing roles. In this course, nursing graduate students from all streams will come together to discuss and debate issues related to advanced nursing practice on a local, regional, national, and international level.

NURS 7360 Integrative Focus
The purpose of this course is to allow the student to focus in-depth in a substantive area of nursing practice: clinical practice, education or administration. Students will engage in practice in the area of focus, and be guided by the faculty adviser with respect to the goals and direction of the practicum and associated readings. Students will participate in seminars facilitated by the faculty at designated times throughout the practicum. Prerequisite: NURS 7090, NURS 7210, NURS 7220, and NURS 7340.

NURS 7370 Pathophysiologic Concepts & Therapeutics I
Introducing principles of cell signaling, physiological feedback systems, adaptive and non-adaptive cellular responses, receptor-ligand interactions, drug kinetics, dynamics and therapeutics. Pathophysiology and treatment of disorders of immunity and inflammation, including hypersensitivity reactions, will also be covered in this course.

NURS 7380 Pathophysiologic Concepts & Therapeutics II
This course entails a systems-based analysis of disease states commonly seen in primary care, including cardiovascular, hematological, respiratory, neurologic and renal disorders and their treatment. Problem- and case-based scenarios will be used to encourage critical thinking and integration of pathophysiologic and management principles.

NURS 7390 Pathophysiologic Concepts & Therapeutics III
This covers pathophysiology and management of disorders of the musculoskeletal, gastrointestinal, dermatologic, reproductive and urogenital systems. One module will focus on disorders of the head, eyes, ears, nose and throat. A case study approach to instruction will be used almost exclusively in this course, which culminates in a mock 'grand rounds' presentation.

Occupational Therapy

Occupational Therapy .
Occupational Therapy Program Info,
The Master of Occupational Therapy (M.O.T.) is a professional practice degree that can be obtained through participation in either a Regular program or an Accelerated program option. The Regular program is for individuals who do not have a previous degree in occupational therapy. The Accelerated program is for occupational therapists who have a B.M.R.(O.T.) degree or equivalent.

The Occupational Therapy program maintains accreditation through the Canadian Association of Occupational Therapists and a 7-year accreditation was received in 2005.

Admission

The following is a summary of the admission requirements. Equivalent academic courses completed at the University of Manitoba or recognized universities elsewhere will be considered. All admission requirements, as well as application deadline dates and forms, are included in applicant information packages that are available from the School of Medical Rehabilitation General Office, R106-771 McDermot Ave., Bannatyne Campus. This information is also posted on the School of Medical Rehabilitation's website (<http://umanitoba.ca/medrehab/ot>).

Regular Program

Completion of a previous undergraduate degree, minimum B average in last 60 credit hours of study, completion of all program prerequisite courses or approved alternates with no grade in prerequisites below a B. Prerequisite courses include all of the courses listed below or equivalents* approved by the M.O.T. Admissions Committee:

Basic Statistical Analysis

Anatomy of the Human Body

Physiology of the Human Body

Minimum 3 credit hours in Behavioural Sciences

Minimum 3 credit hours in Social Sciences

* A list of prerequisite courses and equivalents is available at www.umanitoba.ca/medrehab/ot/ot_prerequisite.html

Accelerated Program

Completion of a B.M.R.(O.T.) degree or equivalent, minimum B average in the last 60 credit hours of the degree, completion of an additional 42 credit hours of non-O.T. degree credits, and evidence of having passed the Canadian Association of Occupational Therapists (CAOT) certification examination and/or eligibility for registration in Manitoba by the College of Occupational Therapists of Manitoba (COTM).

Application Deadlines

Regular Program: The final date for receipt of applications for admission is **March 1 for Canadian applicants**; January 15 for non-Canadian applicants.

Accelerated Program: Students may begin their program on either September 1 or January 1. For admission for each of these start dates, Canadian students should send their applications with complete supporting documentation to arrive no less than three (3) months before the intended start date. Non-Canadian students should send their applications with complete supporting documentation to arrive no less than seven (7) months before the intended start date.

Program Requirements

Program requirements are those of the Faculty of Graduate Studies, found in the Graduate Studies Regulations section of this Calendar. M.O.T. program Supplemental Regulations are available on the School of Medical Rehabilitation's website (www.umanitoba.ca/medrehab/media/supplementary_regulations.pdf).

Second language reading requirement: None

Expected time to graduate: Regular program - 2 years; Accelerated program - 1 year.

Students in the M.O.T. **Regular program** must complete 107 credit hours of course work. All academic and fieldwork courses and a professional portfolio must be successfully completed in order to graduate.

Students in the M.O.T. **Accelerated program** will be required to take 12 credit hours of academic course work from the M.O.T. program or equivalent. Six of these credit hours are to be OT 7750 Independent Study or equivalent.

Fieldwork education is an integral part of the M.O.T. Regular program. Field placement experiences are integrated throughout the program and include 1 four-week, 2 eight-week and 1 six-week experience. Field placements normally occur in Manitoba and Saskatchewan. All students should be prepared to travel out of Winnipeg for a minimum of one placement during the course of the program.

Occupational Therapy students are required to provide a health history and immunization record. A student will not be permitted to attend fieldwork placements until all health, immunization, CPR, mask fit and records check requirements are met.

Health Requirements: Standard Health Record Form Packages are sent to new occupational therapy students upon acceptance into the program. New students in Occupational Therapy are required to return forms to their department by dates published yearly in the Health Record Form Packages. Second year students are required annually to review and update immunizations as necessary.

Cardiopulmonary Resuscitation Certification: All students of the Department of Occupational Therapy are required to obtain certification in cardiopulmonary resuscitation. Certification must be at the Basic Rescuer Level. New students in the program must provide proof of certification within the first 2 weeks of classes of the academic year in which they commence classes. This certification must have an issue date on or after July 1 of the year the student commences classes in the program. Second year students must provide proof of re-certification by October 1 of their second year in the program. This certification must have an issue date during or after the last week of August of the current year. Certification must remain current for all fieldwork experiences.

Mask Fit Certification: Clinical/fieldwork education sites require students to maintain mask fit certification. Information on acquiring this certification is provided to new students with the Health Record Form Packages. All students are required to maintain mask fit certification throughout the program.

Criminal Record Check and Child Abuse Registry Check: Students are advised that clinical/fieldwork education sites require that students complete a Criminal Record Check and a Child Abuse Registry Check. New students in the Master of Occupational Therapy program must provide results of a Child Abuse Registry Check and a Criminal Record Check within the first 2 weeks of classes of the academic year in which they commence classes. Both checks must have an issue date after July 1 of the year the student commences classes in the program. Second year students must provide updated results by October 1 of their second year in the program. Both checks must have an issue date during or after the last week of August of the current year.

Page URL,
<http://csrcalprod1.cc.umanitoba.ca/OccupationalTherapy.catx>

Occupational Therapy Course Descriptions-6000 Level

OT 6100 Human Determinants of Occupational Performance (Formerly 168.610) Students study the anatomical, physiological, biomechanical, and psychosocial factors that underlie the physical, cognitive and affective components of human capacities. Content is presented in the context of understanding the relationship between human capacities and occupational performance, the ability to carry out activities and tasks of self-care, productivity and leisure throughout the lifespan.

OT 6110 Theoretical and Philosophical Foundations of Occupational Therapy (Formerly 168.611) Students study the theoretical and philosophical foundations of occupational therapy and the relationship between occupation and health and well-being. A case based introduction to the processes and approaches that guide practice with clients of various ages and in a variety of practice settings.

OT 6120 Health and Disability (Formerly 168.612) Students study definitions of health, factors influencing health, and systems that relate to health in populations. Students are also introduced to classification of diseases and disorders and impairments and the disablement process.

OT 6130 Occupational Therapy Practice Skills 1 (Formerly 168.613) Through instruction, case illustration and practice laboratory sessions students are introduced to practice skills related to the occupational therapy process. Occupational therapy skills and approaches used to identify occupational performance issues are introduced and practiced. Basic assessment of physical, cognitive, and affective performance components are taught. Students participate in problem solving and basic interventions around issues of occupational performance.

OT 6140 Enabling and Professional Development Skills (Formerly 168.614) An introduction to the development of personal knowledge, skills and attitudes related to enabling occupation in clients, and to promoting professional behaviours for safe, reliable and ethical practice. Emphasis will be placed on the development of a variety of verbal and written communications skills, and clinical/professional reasoning.

OT 6190 Fieldwork Preparation
This course provides foundational knowledge and skills required to participate effectively in the fieldwork component of the Occupational Therapy Program. Course evaluated on a pass/fail basis.

OT 6200 Basic Fieldwork (Formerly 168.620) Students are placed in practice settings for four weeks of field experience under the supervision of a registered Occupational Therapist. Experiences are offered in a wide variety of Field sites in Manitoba, Saskatchewan and northwestern Ontario. Evaluated at an introductory level. Course evaluated on a pass/fail basis. Prerequisite: OT 6190.

OT 6300 Occupational Analysis and Adaptation (Formerly 168.630) An in-depth examination of the relationship between components of human performance and engagement in occupations throughout the lifespan. Students analyze self-care, productivity and leisure occupations to identify physical, cognitive and affective components required for function. Principles and methods of adaptation and grading of occupation, task, activity, equipment and environment will be introduced.

OT 6310 The Environment and Occupational Performance (Formerly 168.631) An examination of physical, social, cultural and institutional aspects of the environment and their relationship to occupational performance throughout the life span. Students will begin to identify the environment in terms of enablers and obstacles to function for individuals with variable capacities.

OT 6320 Health Conditions and Occupational Performance (Formerly 168.632) An introduction to diseases, disorders and impairments as barriers to human occupational performance including an introduction to occupational therapy management approaches to enabling function.

OT 6330 Occupational Therapy Practice Skills 2 (Formerly 168.633) This course builds on OT Practice Skills 1. With a focus on

practice skills related to the occupational therapy process, students gain further practice in assessment of occupational performance issues and physical, cognitive, and affective performance components. Students are introduced to assessment of environmental factors that influence occupational performance and participate in problem solving and interventions around occupational performance issues.

OT 6350 Research Methods for Evidence-Based Practice
(Formerly 168.635) This course is a theory and practical course designed to provide a basic understanding of research principles and methods, evidence-based practice, outcome measures, program evaluation and their applications in occupational therapy.

OT 6400 Intermediate Fieldwork 1
Students are placed in practice settings for eight weeks of field experience under the supervision of a registered occupational therapist. Experiences are offered in a wide variety of field sites in Manitoba, Saskatchewan and northwestern Ontario. Evaluated at an intermediate 1 level (pass/fail grade).

Occupational Therapy Course Descriptions-7000 Level

OT 7540 Advanced Enabling and Professional Development Skills 1
(Formerly 168.754) Builds on Enabling and Professional Development 1&2. Emphasis is placed on the integration and consolidation of professional practice knowledge, skills and attitudes.

OT 7560 Occupational Therapy Process Across the Lifespan 1
(Formerly 168.756) Using problem-based learning methods, students study and apply the occupational therapy process as it relates to selected learning scenarios involving children, adolescents, adults and older adults. Students work in small group tutorials exploring and discussing a variety of issues frequently faced by individuals who may benefit from occupational therapy services.

OT 7570 Advanced Practice in OT 1
(Formerly 168.757) Building on knowledge and skills learning in Practice Skills 1 and 2, students are introduced to advanced concepts, theories and models that guide client-centered occupational therapy evaluation and intervention. Students learn to apply theory to practice and continue developing required skills for the evaluation and intervention of occupational performance issues across the lifespan.

OT 7600 Intermediate Fieldwork 2
(Formerly 168.760) Students are placed in practice settings for eight weeks of field experience under the supervision of a registered occupational therapist. Experiences are offered in a wide variety of field sites. Evaluated at an intermediate 2 level (pass/fail grade).

OT 7740 Advanced Enabling and Professional Development Skills 2
(Formerly 168.774) Builds on previous Enabling and Professional Development courses. Emphasis is placed on leadership skills and preparation for entry into the professional community.

OT 7750 Independent Study
(Formerly 168.775) Students complete an in-depth study of evidence for practice in an area of interest. Students will work with an assigned faculty advisor or clinical research consultant to define and evaluate a particular area of interest in occupational therapy practice.

OT 7760 Occupational Therapy Process Across the Lifespan 2
(Formerly 168.776) Using problem-based learning methods and self-directed learning, students study and apply the occupational therapy process as it relates to selected learning scenarios involving children, adolescents, adults and older adults. Students work in small group tutorials exploring and discussing a variety of issues frequently faced by individuals, groups and communities who may benefit from occupational therapy services.

OT 7770 Advanced Practice in OT 2
Building on knowledge, skills and attitudes learned in Advanced Practice in OT 1, students employ and evaluate concepts, theories and models of client-centred occupational therapy. Students develop skills that enable them to select, justify, and interpret appropriate evaluation methods and interventions to address occupational

performance issues across the lifespan.

OT 7800 Advanced Fieldwork
(Formerly 168.780) Students are placed in practice settings for a six week period which can occur in a flexible time frame (i.e. students may initiate this placement at different points in time from July 1 to mid August depending upon availability of placements. Students may participate in part-time experiences over a longer period or other types of flexible arrangements as may arise and are determined to be appropriate learning experiences to meet educational standards). Experiences are offered in a wide variety of field sites. Evaluated at an advanced level (pass/fail grade).

Oral Biology

Oral Biology,
For information about graduate programs in the following units: [Dental Diagnostic and Surgical Sciences](#), or [Preventive Dental Science](#) please click on the links provided.

Oral Biology ,
Oral Biology Program Info,
The Department of Oral Biology was the first of its kind in North America and reflects the longstanding philosophy that dental education should include a strong science base provided by academic staff with major commitments to undergraduate dentistry and basic dental/medical research. This approach fosters not only the teaching of material relevant to dentistry, but serves to integrate the sciences into the various clinical programs. Associated with this philosophy is the concept that such committed faculty would also foster Faculty research supporting a graduate program in Oral Biology, as well as providing research and teaching expertise for the clinical graduate and postgraduate programs. Today, Oral Biology at Manitoba is recognised nationally and internationally as an outstanding basic science research department.

The Department of Oral Biology offers graduate instruction and research leading to MSc and PhD degrees in a unique environment. Because of the size of the department, individual instruction and direction in research is a cornerstone of the graduate experience. The graduate programme is designed to accommodate students seeking career opportunities in oral biology or in related basic dental and medical science disciplines. At the heart of the Oral Biology program is the requirement in both degrees for the completion of a substantial and original research project in the laboratory of a faculty member. In most cases, the research undertaken will fall within the area of expertise of the faculty member and will employ the most up-to-date techniques available in the field. In addition students are required to complete a number of formally instructed courses in oral biology and/or related disciplines. The diversity of scientific areas within the Department of Oral Biology allows students to be accepted with either an appropriate professional degree or a B.Sc. (Hons.) with satisfactory background in the biological sciences. In addition, the Department of Oral Biology offers a Pre-Master's Program for selected students with general undergraduate degrees.

The Department of Oral Biology, as a leader in oral biology research, has established connections with numerous researchers and institutes all over the world. Ongoing research collaborations include those with universities in the United States, Sweden, and the United Kingdom. The Faculty of Dentistry consistently ranks among the top three dental faculties in Canada for basic science research. Basic science and clinical/basic science research has received high levels of funding from the Medical Research Council of Canada for more than 30 years.

Recipients of higher degrees from the Department of Oral Biology have been extremely successful following graduation. Recent graduates have either secured positions, or are completing further training, at the universities of Toronto, Dalhousie, British Columbia, Florida, Harvard, Laval and with the federal government.

Fields of Research

Cell biologists are studying the molecular/genetic mechanisms involved in the development and function of orofacial tissues in the healthy and disease states. Studies are also proceeding on the effects of tobacco smoke components on the structure and function of fetal lung cells and lung surfactant. Researchers in the

department are investigating interactions in the brain that regulate neurotransmitter molecules in the progression of such disorders as depression and schizophrenia. Others, with an interest in natural medicine, are examining the effects of plant extracts in countering ear infections and hearing loss. Cell signaling/regulation studies continue on a number of fronts, including the role of the calcium-activated protease, calpain, in cell proliferation; the generation and action of membrane phospholipid-associated second messengers in exocrine secretion; and the central role/mechanisms of GTP-binding regulatory proteins and protein kinases in platelet function. The use of nanobiotechnology in diagnosis and therapy is also being explored. A study on gene expression in enamel formation in normal and abnormal teeth is being carried out.

Research Facilities

The faculty has modern laboratories with state-of-the-art equipment for research in microbiology, physiology, biochemistry and molecular biology. Excellent tissue and cell culturing facilities are present as is unique equipment for such specialities as atomic absorption spectroscopy, chemostat bacterial culture and Fourier transform infrared spectroscopy through collaborations with NRC. Excellent clinical facilities also provide opportunities for graduate students to carry out orthodontic and periodontal work. These facilities, when combined with basic science and biomaterials laboratories, allow for the effective integration of research and clinical practice.

M.Sc. in Oral Biology,

Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Students should possess an appropriate professional degree or B.Sc. (Hons.) degree with a satisfactory background in biological sciences or satisfactory completion of a pre-master's program in the Department of Oral Biology. The qualifications of all students applying for admission to the M.Sc. programs in Oral Biology will be assessed by the Department of Oral Biology Committee on Graduate Studies and Research and a recommendation made to the head of the department. Students with other degrees or backgrounds may be eligible for admission to a pre-Master's program to the satisfaction of the department. Contact the department for information.

Application Deadlines

Applications should be received in the Faculty of Graduate Studies by the dates indicated below:

Start Date	Canadian	U.S.	Non-Canadian
Regular (September)	June 1	March 1	
Winter (January)	October 1	July 1	
Spring (May)	February 1	November 1	
Summer (July)	April 1	January 1	

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. The M.Sc. program requires satisfactory completion of course requirements as specified by each student's supervisory committee and a thesis based on original research. Minimum course requirements are 12 credit hours **which must include** course ORLB 7190 Communication Skills in Dental Research (unless students have previous credit for this or an equivalent course). **Courses taken during the pre-Master's program cannot be transferred as credits towards the Master's program.** M.Sc. students are expected to attend all departmental seminars. Students shall present one seminar on their research to the department each year, updating it each year. In addition, students must pass an oral examination on the subject of the thesis and matters relating thereto. The examination shall be open to all members of the university community who wish to attend. The form of the oral examination shall be the same as that for the Ph.D. thesis oral examination described in the Faculty of Graduate Studies Regulations governing the Ph.D. program.

Second Language Reading Requirement: none

Expected Time to Graduate: dependent on progress

Ph.D. in Oral Biology,

Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. A M.Sc. degree is required, although students of exceptional or proven ability holding an appropriate professional degree or a B.Sc. (Hons.) degree may be admitted. The qualification of all students applying for admission to the Ph.D. program will be assessed by the Department of Oral Biology Committee on Graduate Studies and Research and a recommendation made to the head of the department.

A student whose knowledge of the field of Oral Biology is in doubt, after first registration for the degree, may be required to take a qualifying examination within the first 12 months of study at the discretion of the advisory committee. It is the responsibility of the committee to organize this examination.

The qualifying examination, which will consist of a written and an oral component, will be administered as in the candidacy examination. The result will be indicated as "pass" or "fail." A student who fails will be required to withdraw.

Application Deadlines

Applications should be received in the Faculty of Graduate Studies by the dates indicated below:

Start Date	Canadian	U.S.	Non-Canadian
Regular (September)	June 1	March 1	
Winter (January)	October 1	July 1	
Spring (May)	February 1	November 1	
Summer (July)	April 1	January 1	

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. The Ph.D. program requires satisfactory completion of course requirements as determined by each student's advisory committee and a thesis based on original research. Minimum course requirements shall be 12 credit hours at the 7000 level beyond the Master's degree, **and must include** course ORLB 7190 Communication Skills in Dental Research (unless students have previous credit for this or an equivalent course). **Courses taken during the pre-Master's and Master's programs cannot be transferred as credits towards the Ph.D. program.** Ph.D. students are expected to attend all departmental seminars. Students shall present at least one seminar on their own research to the department each year.

Second language requirement: none

Expected time to graduation: dependent on progress

page URL,

<http://crscalprod1.cc.umanitoba.ca/OralBiology.catx>

Oral Biology Course Descriptions-7000 level

ORLB 7030 Glandular Metabolism and Secretion (Formerly 100.703) Lectures and seminars dealing with all aspects of membrane transport and processes associated with transport within the cell.

ORLB 7090 Pharmacology and Therapeutics (Formerly 100.709) A combined lecture and seminar course on the pharmacological basis of therapeutics. Special attention will be paid to drugs used commonly in the practice of dentistry, their side effects and their interaction.

ORLB 7100 Oral Microbial Ecology

(Formerly 100.710) Study of principles of ecology in relation to the various ecosystems in the oral cavity. In depth examination of the taxonomic relationships of oral bacterial species. Emphasis will be placed on the growth and metabolic activities of oral bacteria which lead to successful colonization of the mouth.

ORLB 7110 Infectious Diseases and the Oral Cavity

(Formerly 100.711) The description of the aetiology of microbial infections in the mouth and infections elsewhere in the body which involve oral bacteria. The control of such infections by vaccines, antibiotics and antimicrobial drugs. Treatment of infections in the immuno-suppressed, post operative infections and nosocomial infections. The relationships of host immune system to the oral flora.

ORLB 7120 Special Problems in Oral Biology

(Formerly 100.712) Each student will be required to carry out a minor research project in an area of oral biology other than that of their thesis work. The results of this project will be presented in a seminar and submitted as a written report.

ORLB 7130 Macromolecular Interactions of Connective Tissue in Health and Disease

(Formerly 100.713) A comprehensive study of the macromolecular constituents of connective tissue, of their synthesis, metabolism, macromolecular interaction in health and disease, and of their regulatory mechanisms.

ORLB 7140 Cell Membrane and Cell Signaling

This course will cover the structure and function of cell membrane receptors. The mechanisms and regulation of membrane coupled signal transduction pathways including those stimulated by oral tastants and drugs will also be covered.

ORLB 7150

This course deals with the molecular pathology of the oral cavity and maxillofacial complex.

ORLB 7162 Neurophysiology of Pain

This course examines the peripheral and central mechanisms associated with pain. Endogenous pain control systems and the pharmacological treatment of pain will also be covered.

ORLB 7180 Recent Advances in Oral Biology

(Formerly 100.718) This course is given by staff in the form of lectures and tutorials. Additional lectures may be given by visiting scientists. Students are expected to familiarize themselves with the relevant literature and are examined for an in-depth appreciation of the topics covered.

ORLB 7190 Communication Skills in Dental Research

(Formerly 100.719) A course to develop written, visual and oral communication skills in scientific and clinical disciplines related to dentistry.

Pathology

Pathology ,
Pathology Program Info,

The Department of Pathology offers two programs leading to a M.Sc. degree. Honours Science graduates with a strong background in biology can carry out course work plus either a) a research based program and thesis, or b) a practicum leading to a paramedical qualification as a Pathologist's assistant.

Fields of Research

Primary research interests of the faculty include developmental neuropathology, the immunobiology of graft versus host disease, breast cancer, renal transplantation, and cutaneous autoimmunity.

Research Facilities

Research laboratories of pathology faculty members are found in multiple locations. The core laboratories of the department are situated in the Brodie Centre, John Buhler Research Centre and the Rehab Medical Building at the Bannatyne Campus, University of Manitoba.

M.Sc. in Pathology,

Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Department deadlines for Regular Session (September Start Date) are June 15 (May 15 for international students) to the practicum program and June 15 for the research based program.

Program Requirements

Program requirements are those of the Faculty of Graduate Studies as found in the Graduate Studies Regulations Section of this Calendar. Second language reading requirement: none

Ph.D. in Pathology,

The Department of Pathology does not offer a Ph.D. Program. Students interested in further research may continue in the same laboratory but register in the Ph.D. program of another department, or in the interdisciplinary Ph.D. program.

page URL,

<http://crscalprod1.cc.umanitoba.ca/Pathology.catx>

Pathology Course Descriptions

PATH 7000 Pathologist Assistant Field Practicum

The Field Practicum is extensive hands-on training in Anatomic Pathology as it relates to the methods and theory of surgical and Autopsy Pathology. Emphasis is on examination, specimen preparation, dissection techniques and tissue selection as it relates to accurate diagnosis, prognosis, and patient management. The Field Practicum extends over three terms in year one and two terms in year two with an equivalent of four credit hours per term.

PATH 7010 Investigative Pathology

(Formerly 088.701) The student will complete a supervised project in the field of anatomic and/or clinical pathology, the results to be submitted in an acceptable report. The student will be examined on his/her knowledge in the field relating to his project. Prerequisite: PATH 7020 (or 088.702) or departmental consent.

PATH 7020 Introduction to Pathology

(Formerly 088.702) The course introduces the student to the basic principles of disease processes, using case models to illustrate mechanisms. Assigned reading or seminar presentation will form part of the course.

PATH 7030 Pathologist Assistant Field Practicum

The Field Practicum is extensive hands-on training in Anatomic Pathology as it relates to the methods and theory of Surgical and Autopsy Pathology. Emphasis is on examination, specimen preparation, dissection techniques and tissue selection as it relates to accurate diagnosis, prognosis, and patient management. The Field Practicum extends over three terms in Year 1 and two terms in Year 2 with an equivalent of 4 credit hours per term.

Peace and Conflict Studies

Peace and Conflict Studies Programs

Peace and Conflict Studies ,
Peace and Conflict Studies Joint M.A. Program,

The Joint M.A. Program in Peace and Conflict Studies (JMP-PACS) encompasses the analysis and resolution of social conflicts; peace research that examines the structural roots of social conflicts, divisions, and social inequalities; and strategies for building community and promoting social justice. The Program is intended to be

rigorous as the significance of research and intervention for conflict resolution, peace-building, and creating a culture of human rights demands a high standard of commitment, scholarship, and professionalism.

The Joint M.A. Program is supervised by the [Joint Discipline Committee \(JDC\)](#) consisting of members of the faculty of the University of Manitoba and the University of Winnipeg. The program is governed by the general procedures and regulations devised by the two universities for Joint Master's Programs.

Courses and thesis direction are offered at both institutions, and students completing the program may elect to receive their degree from both of the participating universities. Students may choose between a course/practicum option and a thesis option.

Chair | The University of Manitoba

Chair, Joint Discipline Committee (Jul/01/2010–Jun/30/2012)
Sean Byrne, Professor of Peace and Conflict Studies

Chair | The University of Winnipeg

Associate Chair, Joint Discipline Committee (Jul/01/2010–Jun/30/2012)

Marilou McPhedran, Principal, [Global College](#)

For More Information on our M.A. program please visit: [Joint M.A Program in Peace and Conflict Studies](#)

Admission

Admission requirements are those of the Faculty of Graduate Studies found in the [Graduate Studies Master's Regulations section](#) of this calendar. Graduates of a four-year honors or four-year baccalaureate degree, either: (a) earned in peace and conflict studies, or conflict analysis and resolution; or (b) earned in another related discipline, such as education, law, social work, native studies, political studies, human ecology, human rights, women's studies, and sociology, among others. A high academic standing in previous university work with a minimum Grade Point Average (GPA) of 3.0 in the last 60 credit hours are eligible for admission to a course of study leading to the Master's degree. Appropriate research capability, typically demonstrated by authorship of a major research paper, for example, a senior undergraduate term paper, or thesis, or an article in a refereed publication. Applicants will also have a proficiency in the English language at levels required by the Faculty of Graduate Studies.

International students, please refer to the [International Equivalency Criteria](#).

For more information on admission requirements please visit: [Joint M.A Program Admission Requirements](#).

Admission Deadline

The deadline for receipt of the Joint M.A. program application form and supporting documents for a September admission is **January 15** for all students. Students who wish to apply for a University of Manitoba Graduate Fellowship (UMGF) need to have their applications in before **January 15** (for a September admission).

Program Requirements

Minimum requirements of the Faculty of Graduate Studies are found in the [Graduate Studies Master's Regulations section](#) of this calendar. The Joint M.A. Program in Peace and Conflict Studies has the following requirements:

Thesis Option: requirements are twelve credit hours of core courses*; three credit hours in research methods; three credit hours in an elective of practicum; a thesis proposal and defence, and a thesis examination. The research methods and electives can be taken from a list of approved courses at the 500 or 700 level.

Comprehensive Exam Option: requirements are twelve credit hours of core courses*; three credit hours in research methods; three credit hours in practicum; twelve credit hours of PACS electives; and a comprehensive examination. The research methods, and PACS electives can be taken from a list of approved courses at the 500 or 700 level.

After the completion of 9 credit hours of coursework within the Program, the student should work with their Advisor and the Department Head to determine their intention to pursue either (a) the comprehensive exam option, or (b) the thesis option.

*Core courses are:

PEAC 7010 Interpersonal Communication, Problem-Solving and Trust-Building

PEAC 7020 Theories of Conflict and Conflict Resolution

PEAC 7110 International Human Rights and Human Security

PEAC 7120 Peace-building and Social Justice

The Peace and Conflict Studies Joint M.A. Program Committee must approve all academic programs. This is normally done on the recommendation of the student's Advisor and/or Advisory Committee following consultation with the student.

For more information on the Joint M.A. program requirements please visit: [Joint M.A. Program Requirements](#).

Peace and Conflict Studies Ph.D. Program.

The Ph.D. Program in Peace and Conflict Studies provides an interdisciplinary approach to analyze and resolve social conflicts through innovative peace research that examines the structural roots of social conflicts, divisions, and inequalities, and strategies for building community and promoting social justice. The focus of the program allows students to examine theory building, skills, and techniques of nonviolent practice and conflict resolution.

The objective of the Ph.D. program is to prepare educators, researchers, professionals, and public intellectuals to face some of the most challenging problems and tasks of our time by analyzing and resolving the complex issues facing the global milieu of peace and conflict using a variety of tools, processes, and methods common to conflict analysis and resolution, social justice and peace studies. World societies are increasingly aware that they must work together to face shared problems relating to, for example, economic development, environmental issues, health issues, and catastrophes such as famine. Graduates will have demonstrated the ability to analyze conflict, work collaboratively to resolve conflicts, and forge pathways to peace. These analytic and practical skills are important in numerous professional contexts and are increasingly in demand as international governmental and nongovernmental organizations play an increasing role in world affairs.

For More information on our Ph.D. program please visit our website: [PhD Program in Peace and Conflict Studies](#)

Admission

Admission requirements are those of the Faculty of Graduate Studies found in the [Graduate Studies Regulations section](#) of this calendar. Graduates of master's degree in Peace and Conflict Studies (or equivalent from other recognized universities) with a minimum Grade Point Average (GPA) of 3.0 in the last 60 credit hours are eligible for direct admission to a course of study leading to the doctoral degree. Graduates of master's degree in diverse disciplines at the University of Manitoba (or equivalent from other recognized universities) are also eligible for direct admission to the program pending successful completion of prerequisite courses to ground them in the field. Applicants will have a thesis-based master's degree, either earned in peace and conflict studies or a related discipline such as social work, education, or sociology, among others. In the event a master's degree is not thesis-based, research capability may be demonstrated by a major research paper from a recognized

institution, or an independently completed research article published in a refereed journal. Applicants will also have a proficiency in the English language at levels required by the Faculty of Graduate Studies.

International students, please refer to the [International Equivalency Criteria](#).

For more information on Ph.D. admission requirements please visit: [PhD Program Admission Requirements](#).

Admission Deadline

The deadline for receipt of the PhD Program application form and supporting documents for a September admission is **December 15** for all students. Students who wish to apply for University of Manitoba Graduate Fellowships (UMGF) need to have their applications in before **December 15** (for a September admission).

Program Requirements

Minimum requirements of the Faculty of Graduate Studies are found in the [Graduate Studies Ph.D. Regulations section](#) of this calendar. The Ph.D. Degree in Peace and Conflict Studies requirements are 24 credit hours; twelve credits of required course work at the 700 level; six credit hours in a cognate area and 6 credits in research methodology, plus a candidacy examination, a thesis proposal, and a thesis. The six credit hours of cognate and methodology courses can be taken from a list of approved courses at the 500 or 700 level.

Students whose master's degree is not in Peace and Conflict Studies will normally be required to take some prerequisite courses in the field as occasional students in order to be admitted to the Program.

The Peace and Conflict Studies Graduate Program Committee must approve all academic programs. This is normally done on the recommendation of the student's Advisor and/or Advisory Committee following consultation with the student.

For more information on Ph.D. program requirements please visit: [PhD Program Requirements](#).

Page URL,
<http://crscalprod1.cc.umanitoba.ca/PeaceandConflictStudies.catx>

Peace and Conflict Studies Course Descriptions

PEAC 7010 Interpersonal Communication, Problem-Solving, and Trust-building

Examines the role of language and communication in conflict and conflict resolution. These theoretical and practice perspectives are fundamental to the field of conflict analysis and resolution/peace studies. The role of power, gender, and culture in communication and conflict are reviewed. Theories and practical skills for successful communication, collaborative problem-solving, and trust-building are explored. This class is relevant for addressing conflicts within diverse settings.

PEAC 7020 Theories of Conflict and Conflict Resolution

Provides an overview of the theoretical foundations of the interdisciplinary field of conflict analysis and resolution, examining macro and micro theories regarding the causes of conflicts and approaches to their resolution. Conflicts are complex and take shape on multiple, interlocking planes. The course focuses on theory and the implications of these theories for practice.

PEAC 7030 International Conflict Resolution and Peace-building

Examines international conflict resolution and post-accord peace-building. Theories

regarding the causes of international conflict are reviewed. Approaches for just and enduring resolution to international conflicts, building peace, and the promotion of a global civil society are explored.

PEAC 7040 Violence Intervention and Prevention

Examines different definitions and types of violence from the interpersonal to the global levels (e.g., family violence, youth and gang violence, violence in the workplace, hate crimes, and war). Theories of human aggression and causes of violence, as well as approaches for violence intervention and prevention are reviewed. Theories of nonviolence are explored.

PEAC 7050 Intercultural Conflict Resolution and Peace-Building

Examines the role of socially constructed identities and meaning in intergroup conflicts in a variety of contexts. Culture is broadly conceived to encompass a variety of identities, including differences along racial, ethnic, religious, gender, and class lines. Various models for resolution are reviewed. The nature of and ethics of intervention in cultures other than one's own are explored.

PEAC 7060 Special Topics in Peace and Conflict Studies 1

The topics addressed in this course will vary depending on faculty expertise and student need. Topics could include but will not be restricted to: "Gender and Conflict;" "Storytelling: Identity, Power and Transformation;" "Ethnic Conflict Analysis and Resolution;" "Children and War;" "Peace Education;" "Transformational Conflict Resolution;" "Role of Religion in Conflict and Peace."

PEAC 7070 Special Topics in Peace and Conflict Studies 2

The topics addressed in this course will vary depending on faculty expertise and student need. Topics could include but will not be restricted to: "Gender and Conflict;" "Storytelling: Identity, Power and Transformation;" "Ethnic Conflict Analysis and Resolution;" "Children and War;" "Peace Education;" "Transformational Conflict Resolution;" "Role of Religion in Conflict and Peace."

PEAC 7110 International Human Rights and Human Security

This course examines the shift in focus from state security to people. Human security is a bridge between the inter-related fields of development, human rights and conflict resolution. The course explores how these efforts at exploring the human condition can best be understood and applied.

PEAC 7120 Peacebuilding and Social Justice

This course examines the role of peacebuilding in short term crisis intervention and longer term conflict transformation processes. Social justice is addressed at the systems level as it impacts the achievement of sustainable reconciliation. Crisis management in conflict settings, the root causes of conflict and its prevention are explored.

PEAC 7122 Dispute Systems Design

Examines the role of conflict resolution within organizations and diverse settings (workplace, schools, communities, multiparty conflicts, international conflicts). The course focuses on analyzing how conflict is built into organizational structures and systems, and redesigning the system to produce effective human relations.

PEAC 7124 Gender, Conflict and Peacemaking

Examines the role of gender in conflict and peacemaking in areas of armed conflict. Women tend to be impacted and respond to conflict in ways different from men. The course explores the theoretical and practical contributions of women activists, peace researchers and educators have made toward understanding the role of gender

PEAC 7126 Ethnic Conflict Analysis and Resolution

Examines theories of ethnic conflict and the intervention methods used by states, international organizations and conflict resolution and peace practitioners to analyze, manage and resolve ethnic conflicts. Case studies are used to explain conflict analysis and resolution and peacebuilding.

PEAC 7128 Storytelling: Identity, Power and Transformation

Examines the role of narrative and storytelling in conflict resolution, theory, research and practice. The relationship between language and power and destructive or constructive relationships is explored. The use of storytelling-based projects as a means of peacebuilding and community building are explored.

PEAC 7240 Indigenous World Views and Approaches to Peacebuilding

Examines indigenous models of peacebuilding from community level to national level. Emphasis is placed on restorative processes fundamental to cohesive

relationships with others. This is achieved through ceremony, empathy, compassion, conflict resolution and restoration part of the peacebuilding models of indigenous peoples.

PEAC 7250 Restorative and Social Justice

Examines the principles of restorative justice, the theoretical foundations of the restorative justice movement, and the development of new restorative justice programs. Restorative justice healing, re-integration and reconciliation are explored in a variety of contexts, including colonized and postcolonial indigenous communities.

PEAC 7260 Peace Education

Examines the role of peace education as students seek to make sense of complicated and perilous events in their society. The course provides students with a background in the area of social justice, peace studies and conflict resolution.

PEAC 7300 Special Topics 1: Children and War

Examines the impact of international war, civil war and genocide on children. Today's children are tomorrow's world citizens, and their events will shape the future in unforeseeable ways. Young people are socio-economic and political agents, expressive through violence, peace work and other creative forms.

PEAC 7400 Special Topics 2: Directed Readings in Peace and Conflict Studies

This course is designed for MA students in Peace and Conflict Studies. Course requirements including readings and assignments will be selected and developed by the Professor in conjunction with the students' interests.

Pharmacology and Therapeutics

Pharmacology and Therapeutics ,
Pharmacology and Therapeutics Program Info,

Pharmacology is a key medical discipline dealing with the mode of action of therapeutic and recreational drugs and how the body metabolizes these drugs. The department offers both M.Sc. and Ph.D. degrees. A joint M.D.-Ph.D. program is available to students in Medicine.

Fields of Research

Research and facilities are provided in several overlapping areas in which the department specializes. Current research interests include cardiovascular pharmacology, clinical pharmacology, hepatic pharmacology, neuropharmacology and renal pharmacology. The department is among very few pharmacology departments in North America that provide expertise and training in whole animal pharmacology.

Research Facilities

The main research laboratories are located at two sites: the Bannatyne Campus (2nd, 3rd and 4th floors of the Chown Building) and the St. Boniface Research Centre (4th floor). These locations are modern, well equipped facilities with equipment for experimentation in areas ranging from whole animal to molecular biology.

M.Sc. in Pharmacology and Therapeutics,

Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Qualified students holding B.Sc., M.Sc., B.Pharm., D.V.M. or M.D. degrees may apply for entry into Graduate Programs. Ancillary work in Pharmacology may be arranged for students pursuing their major studies in related departments.

Application Deadlines

The Department of Pharmacology and Therapeutics allows students to begin their program on either 1 September or 1 January. For consideration of admission for each of these start dates, Canadian students should send in their applications with

complete supporting documentation to the Faculty of Graduate Studies no later than four (4) months before the intended start date. Non-Canadian students should send in their applications with complete supporting documentation to the Faculty of Graduate Studies to arrive no later than seven (7) months before the intended start date.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Normally, a student will have a prospective advisor identified as a requirement for admission. Unique to our department, some students may enter into the research rotation program of the department in which the student spends two terms of three months in separate laboratories in order to gain experience in multiple techniques/areas. An advisor would be identified following these rotations. Course requirements will depend on prior degree held and research experience. Year 1 courses may include Drugs and human disease (PHAC 4030/4040 (6 credit hours), Cell Biology IMED 7090 (6 credit hours), Physiology PHGY 7240 (6 credit hours) and Fundamentals of Neuroscience IMED 7100 (6 credit hours). Year 2 courses include Pharmacology PHAC 7130 (6 credit hours). Normally, one Statistics Course (3 credit hours) and at least one Seminar Course 1 (3 credit hours) are required. These may be taken at anytime in the program. In each year of the program students are expected to attend weekly seminars and present an oral research presentation on their work. At the end of each year, for the first two years, students take an oral exam which encompasses the year's course activities. Seminar courses include Cardiovascular Regulation and Drug Action PHAC 7040, Drug Distribution, Metabolism and Excretion PHAC 7060, Neuropharmacology PHAC 7160, Recent Advances in Pharmacology PHAC 7180, Pharmacokinetics of Drug Disposition PHAC 7190, Liver Pharmacology PHAC 7200, Clinical Trial Design PHAC 7210 and Molecular Pharmacology PHAC 7220.

Second language reading requirement: none

Expected time to graduate: 2 – 3 years

Ph.D. in Pharmacology and Therapeutics,
Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. A joint M.D.-Ph.D. program is available for students enrolled in Medicine.

Application Deadlines

The Department of Pharmacology and Therapeutics allows students to begin their program on either 1 September or 1 January. For admission for each of these start dates, Canadian students should send in their applications with complete supporting documentation to the Department of Pharmacology and Therapeutics no later than four (4) months before the intended start date. Non-Canadian students should send in their applications with complete supporting documentation to the Department of Pharmacology and Therapeutics to arrive no later than seven (7) months before the intended start date.

Program Requirements

Program requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Course requirements will depend on prior degree held and research experience. Entry with a B.Sc. (Hon) degree (or 4 year equivalent) may require a course schedule similar to that described for the M.Sc. degree above. Normally at least 3 seminar courses are required. Students entering with a graduate degree (M.Sc.) will have a course schedule which is dependent on previous course work.

Second language requirement: none

Expected time to graduation: 3 – 5 years

Page URL,
<http://crscalprod1.cc.umanitoba.ca/PharmacologyandTherapeutics.catx>

Pharmacology and Therapeutics Course Descriptions-Respiratory Therapy-1000 Level

RESP 1270 Respiratory Anatomy and Physiology

(Formerly 169.127) Principles of pulmonary mechanics, ventilation, diffusion, perfusion, ventilation-perfusion relationships, gas transport, control of ventilation, and acid-base physiology. 60 hours.

RESP 1280 Medical Microbiology and Disease Transmission
(Formerly 169.128) Introduction to Medical Microbiology with emphasis on common pathogens, disease transmission, principles of asepsis, isolation sterilization and disinfection procedures. 32 hours.

RESP 1290 Cardiopulmonary Pharmacology
(Formerly 169.129) Pharmacology principles, phases of drug events, factors modifying drug effect, drug preparation, individual pharmacologic agents including: ANS drugs, CNS drugs, cardiac medications, respiratory medications, antibiotics. 36 hours.

RESP 1320 Applied Sciences for Respiratory Therapy
(Formerly 169.132) Gas laws, unique behaviour of specialty gases, fluid dynamics, fundamental principles of electricity, electronics and electrical safety, concepts of basic and advanced chemistry not treated in REHB 1200 (or 068.120). 53 hours.

RESP 1330 Technical Aspects of Respiratory Therapy
(Formerly 169.133) Medical gas and supply systems, flowmetering devices, regulators, medical gas outlets, vacuum systems, regulatory authorities on the supply, production and distribution of medical gases. 45 hours.

RESP 1360 Treatment Administration in Respiratory Care
(Formerly 169.136) Administration of medical gases, humidity and aerosol therapy, environmental therapy, positive pressure breathing devices, respiratory exercises, incentive spirometries and bedside spirometry. 50 hours.

RESP 1370 Ventilatory Support Principles
(Formerly 169.137) Physical principles of continuous ventilatory support including: physics of ventilator operation and physiological aspects of ventilatory support. Provides a framework for RESP 2310 (or 169.231) and RESP 2320 (or 169.232). 120 hours.

RESP 1380 Basic Fieldwork 1
A seminar based preparatory period, followed by 80 hours of clinical fieldwork experiences in respiratory therapy, delivered with concurrent tutorial and laboratory based learning opportunities. The field work portion will be provided under the supervision of registered respiratory therapists at one or more approved clinical sites. Course is evaluated on a pass/fail basis.

Pharmacology and Therapeutics Course Descriptions-PHAC 2000 Level

PHAC 2100 Pharmacology

(Formerly 089.210) General principles of pharmacology including consideration of the pharmacodynamics of important drugs and control and modification of drug action.

Pharmacology and Therapeutics Course Descriptions-PHAC 4000 Level

PHAC 4020 Pharmacology Basics

General mechanism of action of the important groups of drugs and factors which control and modify their effects. Overview of the use and side effects of drugs. Not to be held with the former 089.210.

PHAC 4030 Drugs in Human Disease I

Foundation physiological principles underlying human disease intergrated with drug disposition and effects of important drug groups on disorders of the autonomic and central nervous systems, and the cardiovascular system. May not be held with

PHAC 4020. Prerequisites: ZOOL 2530 (Or 022.253) and ZOOL (or 022.245).

PHAC 4040 Drugs in Human Disease II

Foundation physiological principles underlying human disease integrated with effects of important drug groups on endocrine and organ system disorders, allergy and inflammation, infection, and cancer. The course also offers an introduction to basic clinical pharmacology as well as several current specialized topics in pharmacology. May not be held with PHAC 4020. Prerequisites: ZOOL 2530 (or 022.253) and ZOOL 2540 (or 022.245).

Pharmacology and Therapeutics Course Descriptions-PHAC 7000 Level

PHAC 7040 Cardiovascular Regulation and Drug Action

(Formerly 089.704) The normal homeostatic regulation of the cardiovascular system, its modification by drugs, and the sites and characteristics of drug actions affecting the cardiovascular system.

PHAC 7060 Drug, Distribution, Metabolism, and Excretion

(Formerly 089.706) The mechanisms by which the body handles foreign chemicals and their effects on the characteristics of drug action.

PHAC 7110 Topics in Pharmacology

(Formerly 089.711) Short research projects on various properties and effects of newer drugs. Presentation of oral and written reports by graduate students on research conducted. Open only to graduate students in Pharmacology.

PHAC 7130 Pharmacology

(Formerly 089.713) Three hours a week both terms. Pharmacodynamics of the more important groups of drugs, the factors which control and modify their effects, and the basis for rational selection and administration of drugs in the treatment of disease. Prerequisite: permission of the department.

PHAC 7160 Neuropharmacology

(Formerly 089.716) Seminars, tutorials and selected readings on topics concerning the mechanisms whereby drugs alter central and peripheral nervous activity. These will include drug modification of cellular excitability, neurotransmission and brain function.

PHAC 7180 Recent Advances in Pharmacology

(Formerly 089.718) Lectures given by staff, followed by group discussions on current research, new developments in drugs and re-evaluation of currently employed drugs, their mechanism of action, etc. Three hours per week both terms. Open only to graduate students in Pharmacology.

PHAC 7190 Pharmacokinetics of Drug Disposition

(Formerly 089.719) Lectures and problem-solving sessions directed at appropriate modelling of the disposition of drugs in the body.

PHAC 7200 Pharmacology of the Liver

(Formerly 089.720) Seminars, tutorials and selected readings on topics related to hepatic functions emphasizing the integrative role of the liver in homeostasis including vascular, autonomic and metabolic functions, toxicology and therapeutic aspects.

PHAC 7210 Clinical Trial Design

(Formerly 089.721) Course designed to evaluate the essential elements of clinical trials as the basis for determining the potential value of interventions advocated for the treatment of diseases in humans. The format will include assigned readings, lectures, discussion and assignment preparation. Prerequisite: Undergraduate degree in the health sciences - previous related experience or relevant course credits will be considered as surrogate qualification to an undergraduate health sciences degree.

PHAC 7220 Molecular Pharmacology

(Formerly 089.722) Lectures, seminars and selected readings on the mechanism of action of therapeutic and recreational drugs. Topics will include several categories of drug receptors and associated signal transducers in the context of drug action.

Pharmacy

Pharmacy ,
Pharmacy Program Info,

Programs are offered leading to the degrees of Master of Science and Doctor of Philosophy. Thesis based research projects may be undertaken in the following fields of pharmaceutical sciences: pharmaceutics, biopharmaceutics, pharmacokinetics, pharmaceutical and medicinal chemistry, pharmaceutical microbiology, toxicology, pharmacognosy and in the clinically related areas of pharmacoeconomics, pharmacoepidemiology, and pharmaceutical policy.

Fields of Research

There are three established research groups: drug discovery and development, drug policy, and antibiotic resistance. Expertise in these areas include dosage form development, geriatrics, medicinal chemistry, natural health products, toxicology, photochemistry, pharmacokinetics and pharmacodynamics, antibiotics, nephrology, pharmacoeconomics, epidemiology, health policy, and clinical pharmacy practice. Two teaching hospitals, the Health Sciences Centre and St. Boniface General Hospital, are involved with pharmacy research in the faculty.

Collaborative research programs are conducted among other university departments including Anatomy, Community Health Sciences, Pharmacology, Physiology, Medical Microbiology, Pediatrics and Child Health, Internal Medicine, Cell Biology, and Canadian Centre for Agri-Food Research in Health and Medicine (CCARM). Funding sources include the Canadian Institute of Health Research, health related research grants, and pharmaceutical industry.

Research Facilities

State-of-the-art equipment is available, including a wide range of biological, biochemical, chemical and microbiological instrumentation and computerization. Relevant pharmaceutical, chemical and medical publications are available in The Neal John Maclean Health Sciences and the Sciences and Technology Libraries; online search facilities are available through the University e-Library system.

M.Sc. in Pharmacy, Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Students who do not possess the requirements for entry directly into the graduate program must take a pre Master's program of courses which will be individually prescribed. Please contact the Faculty for further information.

To enter the Master's program directly a student must have a B.Sc. degree in Pharmacy from the University of Manitoba or equivalent. Students from another faculty with a degree in a subject relevant to their research area will also be considered for graduate research.

Admission to the M.Sc program depends upon the availability and willingness of a Faculty of Pharmacy faculty member to supervise the student, and resources to support the student's research. Thus, applicants should negotiate a tentative position with a Faculty of Pharmacy professor/researcher, prior to submitting a formal application to the Faculty of Graduate Studies.

Application Deadlines

Start Date	Canadian/U.S.	International
Regular (September)	June 1	March 1
Winter (January)	October 1	July 1
Spring (May)	February 1	November 1
Summer (July)	April 1	January 1

Program Requirements

Minimum Program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this calendar. All programs are established on an individual basis; the following general principles apply:

- Course work and original thesis are required.

- All students are required to complete the Pharmacy Seminar 1 and 2 courses (PHRM 7160 is a prerequisite for PHRM 7170).
- Seminar presentations by graduate students, post-doctoral fellows, research associates, staff or invited lecturers are considered part of the program and must be attended by all graduate students.
- Students are expected to enroll on a 12-month basis and conduct research during the summer months.
- The minimum period of time necessary for the completion of the program is two years.

Second language reading requirement: none

Expected time to graduate: 2-3 years

Ph.D. in Pharmacy, Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. The normal procedure for a candidate is to complete a M.Sc. degree first. However, after one year of study towards the M.Sc. degree, if excellent performance is evident, a student may request a transfer to the doctoral program.

Admission to the Ph.D. program depends upon the availability and willingness of a Faculty of Pharmacy faculty member to supervise the student, and resources to support the student's research. Thus, applicants should negotiate a tentative position with a Faculty of Pharmacy professor/researcher, prior to submitting a formal application to the Faculty of Graduate Studies.

Application Deadlines – as per the M.Sc. program in Pharmacy.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. A minimum of three years is required for the Ph.D. degree. The minimum number of courses required for the Ph.D. is 24 credit hours (18 at the 700/7000 level) beyond the B.Sc. (Hons.) or 12 credit hours at the 700/7000 level beyond the M.Sc. All Ph.D. students are required to present a research seminar annually.

Second language requirement: none

Expected time to graduation: 3 - 5 years

Page URL,
<http://crscalprod1.cc.umanitoba.ca/Pharmacy.catx>

Pharmacy Course Descriptions

PHRM 7080 Biopharmaceutics and Relevant Pharmacokinetics (Formerly 046.708) Lecture course on biopharmaceutics with particular emphasis on the application of pharmacokinetic principles in the design of conventional and sustained-release drug dosage forms, assessment of drug bioavailability, and selection of dosage regimens.

PHRM 7100 Analytical Forensic Toxicology (Formerly 046.710) A study of the analytical and chemical procedures for the detection of chemicals and medications in body fluids and the identification of drugs of abuse. Some techniques will be emphasized through a practical project.

PHRM 7120 Medical and Scientific Writing (Formerly 046.712) Lectures and exercises on the preparation of medical and scientific manuscripts, including papers for publication or oral presentation, progress

reports, reviews, short papers, grant applications and similar projects.

PHRM 7130 Novel Drug Delivery Systems

(Formerly 046.713) Advanced course dealing with the role of drugs and drug products in the treatment of disease with emphasis on pharmaceuticals and physical pharmacy. Current and future status of drug delivery systems, their design and evaluation will also be examined.

PHRM 7140 Pharmaceutical Implications of Free Radical Medicinal Chemistry

(Formerly 046.714) Persistent and stable organic free radicals found in medicinal compounds, unstable and reactive free radicals found in vivo, natural defence mechanisms designed to remove free radicals in vivo, antioxidants as medicinal compounds, important applications of electron paramagnetic spectroscopy of free radicals, spin-trapping of very reactive free radicals, spin label oximetry

PHRM 7160 Pharmacy Seminar 1

(Formerly 046.716) Seminars and lectures on selected topics in pharmacy. Students are required to present both oral and written reports on research topics.

PHRM 7170 Pharmacy Seminar 2

(Formerly 046.717) Lectures and group discussions on recent developments in pharmaceutical fields. Students are required to give an oral presentation. (Prerequisite: PHRM 7160)

PHRM 7180 Pharmaceutical Implications of Biotechnology

(Formerly 046.718) Introduction to biotechnology in pharmaceutical sciences and pharmacy. Students will be introduced to concepts from molecular biology, immunology, biotechnology and pharmacogenomics. Implications of biotechnology in pharmaceutical biopharmaceutical research.

Philosophy

Philosophy ,
Philosophy Program Info,

At the present time, the University of Manitoba offers only the M.A. degree in philosophy. Graduates of this program have been successful in gaining entry to some of the leading doctoral programs in philosophy in Canada, the USA and other continents. Approximately 40 Manitoba graduates are now in tenure-track faculty positions in philosophy in universities across North America. Other graduates have pursued careers in law, management and other fields.

Fields of Research

The Department of Philosophy offers courses in all the major areas of philosophy: the history of philosophy (including twentieth-century European philosophy), logic, epistemology, metaphysics, ethics, philosophy of religion, philosophy of law, philosophy of science, philosophy of language, social philosophy, political philosophy, aesthetics, and the philosophy of mind. The dominant orientation of the Department is analytic. Areas of greatest strength are: metaphysics, history and philosophy of science, history of philosophy, ethics, epistemology, social and political philosophy.

M.A. in Philosophy,

Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Contact the Department of Philosophy for further information.

Application Deadlines

The Department of Philosophy allows students entering the M.A. program to commence their studies on either 1 September or 1 January. Students entering the Pre-Master's program will usually find it necessary to commence their studies on 1 September. Canadian/U.S. students should send applications for admission, with complete supporting documentation, to the Faculty of Graduate Studies, not later than four (4) months prior to the intended start date of their program of study.

International students should send applications, with complete supporting documentation, to the Faculty of Graduate Studies, not later than nine (9) months prior to their intended start date.

Those applying for major financial awards offered to entering students should apply directly to the Department of Philosophy, using the application form for the University of Manitoba Graduate Fellowship and including a sample of their recent philosophical writing, not later than January 15 for programs of study commencing in September.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Students have three options available to them:

- 15 credit hours in Philosophy, and a major thesis; or
- 18 credit hours in Philosophy, and two research papers; or
- 24 credit hours in Philosophy.

Second Language Reading Requirement: A reading knowledge of one foreign language will be required if the thesis topic requires it.

Expected Time to Graduate: Students with undergraduate concentration in Philosophy equivalent to approximately nine full courses (54 credit hours) can complete the M.A. degree in one year. Students with a lesser degree of undergraduate concentration will need more than one year to complete the degree.

Ph.D. in Philosophy,
The Department of Philosophy does not currently offer a Ph.D. Program.

Page URL,
http://crscalprod1.cc.umanitoba.ca/Philosophy_catx

Philosophy Course Descriptions

PHIL 7110 Graduate Seminar
(Formerly 015.711) Not currently offered.

PHIL 7120 Graduate Reading 1
(Formerly 015.712) A reading course for graduate students in philosophy. Subject matter may be arranged to suit the special needs and interests of students; the course might, for example, be devoted to modal logic, or the free will problem, the ontological argument, phenomenology, the philosophy of W.V. Quine, etc. As the course content will vary from year to year, students may take this course more than once for credit.

PHIL 7130 Graduate Reading 2
(Formerly 015.713) A reading course for graduate students in philosophy, similar to PHIL 7120 (or 015.712). As the course content will vary from year to year, students may take this course more than once for credit.

PHIL 7140 Epistemology 1
(Formerly 015.714) A study of selected topics in epistemology.

PHIL 7150 Epistemology 2
(Formerly 015.715) A study of selected problems in epistemology.

PHIL 7160 Metaphysics 1
(Formerly 015.716) A study of selected topics in metaphysics.

PHIL 7170 Metaphysics 2
(Formerly 015.717) A study of selected problems in metaphysics.

PHIL 7180 Graduate Reading 3

(Formerly 015.718) A reading course for graduate students in philosophy, similar to PHIL 7120 (or 015.712). As the course content will vary from year to year, students may take this course more than once for credit.

PHIL 7190 Graduate Reading 4

(Formerly 015.719) A reading course for graduate students in philosophy, similar to PHIL 7120 (or 015.712). As the course content will vary from year to year, students may take this course more than once for credit.

PHIL 7200 Topics in Ethics 1

(Formerly 015.720) Basic topics in moral theory. Readings will include contemporary articles and books. As the course content will vary from year to year, students may take this course more than once for credit.

PHIL 7210 Topics in Ethics 2

(Formerly 015.721) Basic topics in moral theory. Readings will include contemporary articles and books. As the course content will vary from year to year, students may take this course more than once for credit.

PHIL 7220 Topics in Logic and the Philosophy of Logic 1

(Formerly 015.722) Selected topics in mathematical logic, inductive logic, the philosophy of logic, and the methodology of the natural and formal sciences. Students may not hold credit for both PHIL 7220 (or 015.722) and the former 015.705. Prerequisite: written consent of department head or M.A. program chair. As the course content will vary from year to year, students may take this course more than once for credit.

PHIL 7230 Topics in Logic and the Philosophy of Logic 2

(Formerly 015.723) Selected topics in mathematical logic, inductive logic, the philosophy of logic, and the methodology of the natural and formal sciences. Students may not hold credit for both PHIL 7230 (or 015.723) and the former 015.705. As the course content will vary from year to year, students may take this course more than once for credit.

PHIL 7310 Topics in the Philosophy of Science

(Formerly 015.731) An historical study of the interaction between science and philosophy since the time of Newton. As the course content will vary from year to year, students may take this course more than once for credit.

PHIL 7400 Independent Research Paper 1

This course is for students taking Option B in the M.A. program in Philosophy. The student will supply a paper with original research under the guidance of the research paper advisor. Course graded Pass/Fail.

PHIL 7410 Independent Research Paper 2

This course is for students taking Option B in the M.A. program in Philosophy. The student will supply a paper with original research under the guidance of the research paper advisor. Course graded Pass/Fail.

Physician Assistant Program

Physician Assistant Education Program

Physician Assistant Education Program ,
Physician Assistant Program Info,

The PAEP offers coursework leading to the Master of Physician Assistant Studies (MPAS) degree. The Program currently accepts 12 students per year. Graduates are eligible for registration with the College of Physicians and Surgeons of Manitoba as physician assistants. Graduates are also eligible to sit for the Physician Assistant Certification Council of Canada national certification exam. Physician assistants currently work in the province of Manitoba in a variety of medical and surgical specialties. Physician assistants are also employed in the provinces of Ontario, Alberta, New Brunswick, as well as in the Canadian Forces.

Housed within the Faculties of Medicine and Graduate Studies the PAEP incorporates the concepts of student centred learning, adult learning principles, and professional education with the clinical competencies necessary for effective physician assistant practice.

Fields of Research

Graduate Studies

The Program faculty's research focus lies in the area of physician assistant education and PA-related health policy. Students in the PAEP are required to complete a research project and are encouraged to cultivate research interests in a range of clinical and quality improvement areas.

Research Facilities

The PAEP is housed at the Bannatyne Health Sciences campus. Students have access to the resources of the Neil John MacLean Health Sciences Library.

Master of Physician Assistant Studies , Admission

The PAEP admission requirements are those outlined as the minimum admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar.

This Program is open to graduates of a four year Bachelor's degree, preferably in a health sciences field, from a college or university recognized by the University of Manitoba, with a minimum GPA of 3.0 in the last two full years (60 credit hours) of study. Undergraduate courses in Human Anatomy, Physiology and Biochemistry are required if they were not taken in the Bachelor's degree. Microbiology and Psychology are asset courses.

Technical Standards Requirement

(Essential Skills and Abilities for Admission, Promotion and Graduation)

Please be advised that the Faculty of Medicine has adopted a Technical Standards Policy Document that describes the requisite skills and abilities that must be met in order to participate in the PAEP. The policy may be obtained from the PAEP office.

All applicants are required to submit 3 Application Forms: Faculty of Graduate Studies Application, PAEP Supplementary Application and Adult Criminal Records and Child Abuse Registry Self Declaration Form. All applicants must be eligible for registration with the College of Physicians and Surgeons of Manitoba on the PA Education register.

Admission Deadlines

There is only one intake per year, at the beginning of September. Application deadline is the last working day in November each year, for admission the following September. Please visit the PAEP website for exact dates each year at

http://umanitoba.ca/faculties/medicine/education/paep/pros_students/index.html.

Program Requirements

The PAEP is a two year program. The first year consists of 56 credit hours of coursework, delivered in 3 semesters from September - July as a combination of lecture, clinical skills training, and seminars. The second year includes 34.5 credit hours (48 weeks) of core clinical rotations. All courses in the PAEP are required major courses, and students must maintain full-time registration throughout the Program.

Second language requirement: none

Expected time to graduation: 26 months

Page URL,

<http://crscalprod1.cc.umanitoba.ca/PhysicianAssistantEducationProgram.catx>

Physician Assistant Education Program Course Descriptions

PAEP 7000 Physiology and Pathophysiology for Physician Assistants

This brief introduction is designed to impart an understanding of normal physiological functioning of the human body. This basic science course builds upon the entry knowledge of the Physician Assistant student, by presenting the pathophysiology of disease by organ systems. The emphasis is on the homeostatic mechanisms for all the major organ systems. Evaluation will be by successful completion of exercises, class participation and written examination, demonstrating to faculty proficiency in course principles.

PAEP 7002 Physiology and Pathophysiology for Physician Assistants II

A continuation of the material presented in Physiology and Pathophysiology for Physician Assistants. A basic science course which builds upon the entry knowledge of the PAEP learner by presenting normal physiology and the pathophysiology for disease by organ systems. Prerequisite: Admission to PAEP Year I

PAEP 7010 Human Anatomy for Physician Assistants

This brief comprehensive introduction is designed to impart an understanding of gross functional anatomy of the human body. This basic science course builds upon the entry knowledge of the student by presenting clinical human anatomy, correlated to clinical applications, assessment and pathology of disease. Evaluation will be by successful completion of exercises, class participation and written examination, demonstrating to faculty proficiency in course principles.

PAEP 7030 Professional Studies of Physician Assistants

This course is designed to provide the student with an understanding of the role the Physician Assistant plays within the structure of the Canadian Health Care System. This introduction is designed to impart an understanding of the interaction between the various stakeholders. Ethical considerations in health care and the legal aspects of the PA role in Canada will be addressed. Evaluation will be by successful completion of a presentation (evaluated by classmates), participation in ethical problem solving exercises and written examination, demonstrating to faculty proficiency in course principles. Students are expected to submit a research paper on an ethics topic of choice and write a short-answer examination at the end of the course.

PAEP 7040 Basic Medical Sciences for Physician Assistants

This brief introductory course is designed to provide the student with an understanding of medical terminology, biostatistics, epidemiology and public health. Students will acquire knowledge enabling them to become critical consumers of medicine; thus developing their ability to assess, evaluate and improve patient care practices. Evaluation will be by successful completion of problem solving exercises, class participation and written examination, demonstrating to faculty proficiency in course principles. A research methodology exercise, in the form of a research proposal will also be completed with the student under the guidance of a mentor. The student will develop a brief research proposal, utilizing the knowledge gained in the didactic lectures, which will count for 25% of the course grade.

PAEP 7042 Biochemistry for Physician Assistants

A brief introduction to medical biochemistry.

PAEP 7044 Statistics for Physician Assistants

A brief introduction to biostatistics, epidemiology, and public health.

PAEP 7046 Genetics for Physician Assistants

A brief introduction to medical genetics.

PAEP 7048 Pediatrics for Physician Assistants

A brief, comprehensive didactic introduction to the field of obstetrics and gynecology designed to prepare the physician assistant to diagnose and treat, within his or her scope of practice, common obstetrics and gynecology conditions as would be encountered in a primary care setting. Pre-requisite: Successful completion of MPAS year 1.

PAEP 7050 Obstetrics and Gynecology for Physician Assistants

A brief, comprehensive didactic introduction to the field of obstetrics and gynecology designed to prepare the physician assistant to diagnose and treat, within his or her scope of practice, common obstetrics and gynecology conditions as would be encountered in a primary care setting. Pre-requisite: Successful completion of MPAS year 1.

PAEP 7052 Patient Assessment for Physician Assistants I

A comprehensive introduction to the clinical assessment of a patient, delivered as a group of three courses. Part I introduces basic history-taking and physical exam skills. Patient Assessment II and Patient Assessment III extend these skills to other clinical settings.

PAEP 7054 Patient Assessment for Physician Assistants II

Continues developing the skills in history taking and physical examination introduced in patient Assessment for Pas I. Learners are introduced to the Standardized Patient Program. Prerequisite: Admissions to PAEP Year I.

PAEP 7056 Patient Assessment for Physician Assistants III

A brief, comprehensive introduction to diagnostic imaging techniques and interpretation of diagnostic images designed to enable Physician Assistants, within their scope of practice, to diagnose and treat medical, surgical, and infectious disease. Prerequisite: Admission to PAEP Year I.

PAEP 7068 Adult Medicine for Physician Assistants 1

A comprehensive, system-based introduction to the clinical disciplines of medicine. Adult Medicine I is the first part of a two-course sequence; content areas include endocrinological, gastrointestinal and neurological, medicine, ophthalmology, and hematology/oncology.

PAEP 7072 Maternal and Child Health for Physician Assistants I

A brief, comprehensive introduction to obstetrics and pediatrics designed to impart an understanding of normal pregnancy and development and to allow the Physician Assistant, within his or her scope of practice, to diagnose and treat medical, surgical, infectious and developmental conditions within the fields of obstetrics and pediatrics. Prerequisite: Admissions to PAEP Year 1

PAEP 7074 Maternal and Child Health for Physician Assistants II

A brief, comprehensive introduction to obstetrics and pediatrics designed to impart an understanding of normal pregnancy and development and to allow the Physician Assistant, within his or her scope of practice, to diagnose and treat medical, surgical, infectious, and development conditions within the fields of obstetrics and pediatrics. Prerequisite: Admission to PAEP Year 1

PAEP 7076 Maternal and Child Health for Physician Assistants III

A brief, comprehensive introduction to obstetrics and paediatrics designed to impart an understanding of normal pregnancy and development and to allow the Physician Assistant, within his or her scope of practice, to diagnose and treat medical, surgical, infectious, and developmental conditions within the fields of obstetrics and paediatrics. Prerequisite: Admission to PAEP Year 1

PAEP 7078 Adult Medicine for Physician Assistants II

A comprehensive, system-based introduction to the clinical disciplines of medicine. Adult Medicine II is the second part of a two-course sequence; content areas include cardiovascular, musculoskeletal, renal, dermatologic and respiratory medicine, and otolaryngology.

PAEP 7082 Diagnostic Imaging for Physician Assistants

A brief, comprehensive introduction to diagnostic imaging techniques and interpretation of diagnostic images designed to enable Physician Assistants, within their scope of practice, to diagnose and treat medical, surgical and infectious disease. Prerequisite: Admissions to PAEP Year 1

PAEP 7084 Microbiology for Physician Assistants

A brief introduction to Medical Microbiology. Prerequisite: Admissions to PAEP Year 1.

PAEP 7090 Principles of Psychiatry for Physician Assistants

A brief, comprehensive introduction designed to impart an understanding of mental and behavioral health. Based on the special needs of a patient populations, the patient's presentation and unique contributing factors, the PA will be able to evaluate and analyze the patient's needs, providing the required specialty assessment for the psychiatric patient. Evaluation will be by successful completion of a practical and written evaluation, demonstrating the faculty proficiency in the course material.

PAEP 7100 Principles of Surgery for Physician Assistants

A brief, comprehensive introduction designed to impart an understanding of surgical diseases. Upon completion, the Physical Assistant student, with their scope of practice, will be able to diagnose, refer and treat the medical, surgical and infectious diseases from a surgical perspective. Evaluation will be by successful completion of

a practical and written evaluation, demonstrating to faculty proficiency in the principals of surgery and application of surgical skills.

PAEP 7110 Emergency and Critical Care for Physician Assistants

A brief, systems-based comprehensive introduction designed to impart an understanding of emergency and intensive care medicine. This course will equip the Physician Assistant student with the skills necessary to diagnose, refer and treat medical, surgical and infectious disease emergencies and life threatening conditions. The Advanced Cardiac Life Support (ACLS) course is a mandatory component of the Emergency and Critical Care course. It is organized by the Department of Emergency Medicine and is designed to provide the student with advanced knowledge and experience on how to handle a cardiac arrest. Most Physician Assistant students find the course invaluable regardless of what specialty they enter. Evaluation is based on successful completion of a practical evaluation, problem solving exercises, displaying proficiency in clinical skills and a written examination, demonstrating to faculty proficiency in course principles.

PAEP 7150 Year 1 Comprehensive Examination

A pass/fail, multiple choice examination designed to assess students' knowledge of clinically relevant Year 1 material prior to entry into the clinical year.

PAEP 7200 Family Medicine for Physician Assistants

A brief, clinical rotation designed to impart a practical understanding of family medicine. Upon completion the Physician Assistant student will, within their scope of practice, be able to diagnose, refer and treat the medical, surgical and infectious disease conditions related to the field of family medicine.

PAEP 7202 Family Medicine for Physician Assistants

A clinical rotation designed to impart a practical understanding of Family Medicine, to prepare the physician assistant, within his or her scope of practice, to diagnose and manage conditions and issues related to primary care medicine and general practice.

PAEP 7204 Clinical Elective for Physician Assistants I

This course consists of two weeks of clinical time, offering an introduction to the clinical discipline of the Physician Assistant learner's choice. Course objectives will be developed by the learner in collaboration with PAEP faculty members.

PAEP 7206 Clinical Elective for Physician Assistants II

This course consists of two weeks of clinical time, offering an introduction to the clinical discipline of the Physician Assistant learner's choice. Course objectives will be developed by the learner in collaboration with PAEP faculty members.

PAEP 7210 Clinical Internal Medicine for Physician Assistants

A brief, clinical rotation designed to impart a practical understanding in the area of internal medicine. There will be an internal medicine speciality focus in this rotation versus the general exposure seen in Family Medicine. Upon completion, the Physician Assistant student will, within their scope of practice, be able to diagnose, refer and treat the medical, surgical and infectious conditions related to the field of internal medicine.

PAEP 7212 External Electives for Physician Assistant Students

A clinical rotation of varying length designed to provide a physician assistant student not from the University of Manitoba with clinical education and training in a medical discipline of the student's choice at a University of Manitoba clinical teaching unit. Course credit is assigned by the student's home institution.

PAEP 7220 Clinical Surgery for Physician Assistants

A brief, clinical rotation designed to impart a practical understanding of surgical diseases and surgical procedures. Upon completion, the Physician Assistant student will, within their scope of practice, be able to diagnose, refer and treat the medical, surgical and infectious conditions related to the field of clinical surgery.

PAEP 7230 Clinical Orthopedics and Sports Medicine for Physician Assistants

A brief, clinical rotation designed to impart a practical understanding of orthopedics and sports medicine practiced within this specialty. Upon completion, the Physician Assistant student will, within their scope of practice, be able to diagnose, refer and treat the medical, surgical and infectious conditions related to this field. The Physician Assistant student will become familiar with and perform commonly practiced procedures such as casting and splinting extremities, closed reduction, cast removal, joint injection, joint aspiration and surgical assisting.

PAEP 7240 Clinical Pediatrics for Physician Assistants

A brief, clinical rotation designed to impart a practical understanding of health and diseases in the field of pediatrics. Upon completion, the Physician Assistant student, within their scope of practice, will be able to diagnose, refer and treat the medical, surgical and infectious conditions related to the field of pediatric medicine.

PAEP 7250 Clinical Psychiatry for Physician Assistants

A brief, clinical rotation designed to impart a practical understanding of mental health and psychiatric disease to the Physician Assistant. Upon completion, the Physician Assistant student, within their scope of practice, will be able to diagnose, refer and treat the medical, surgical and infectious conditions related to psychiatric medicine.

PAEP 7270 Clinical Emergency Medicine for Physician Assistants

A brief, clinical rotation designed to impart a practical understanding of emergency medicine and intensive care. Upon completion, the Physician Assistant student, within their scope of practice, will be able to diagnose, refer and treat the medical, surgical and infectious conditions related to emergency medicine and critical intensive care medicine. Students with extensive emergency medical service backgrounds will be allowed to focus on a critical care rotation.

PAEP 7280 Clinical Obstetrics and Gynecology for Physician Assistants

A brief, clinical rotation in obstetrics and gynecology designed to impart a practical understanding of reproductive health. Upon completion, the Physician Assistant student, within their scope of practice, will be able to diagnose, refer and treat the medical, surgical and infectious conditions related to the field of reproductive, obstetrical and gynecologic health.

PAEP 7290 Clinical Anesthesia for Physician Assistants

A brief, clinical rotation designed to impart a practical understanding of anesthesia. Upon completion, the Physician Assistant student, within their scope of practice, will be able to undertake airway management, ventilation and understand the principles of regional and general anesthesia. Students with extensive respiratory backgrounds are required to complete this rotation and display understanding and application of the Physician Assistant role in anesthesia.

PAEP 7300 Comprehensive Assessment of Clinical Skills

The Comprehensive Assessment of Clinical Skills is a comprehensive summary of clinical performance using information from PA-ITRES, mini-CEX evaluations, and observed histories/physical exams. This assessment will be graded on a pass/fail basis.

PAEP 7350 PAEP Final Project

A capstone project that may take a variety of formats as dictated by Program faculty. Students will, in consultation with a faculty mentor, develop and research a topic for presentation to faculty and peers.

Physics and Astronomy

Physics and Astronomy ,
 Physics and Astronomy Program Info,
 The department offers opportunities for graduate study in several experimental and theoretical fields of contemporary interest, leading to the Master of Science and Doctor of Philosophy degrees.

Fields of Research

Astronomy and Astrophysics: The Formation, Evolution, and Structure of Galaxies; The Late Stages of Stellar Evolution (Neutron Stars, Magnetars, Black Holes); Supernova Remnants and our Milky Way Galaxy; Advanced genetic algorithms for astrophysical data modeling (magnetic fields in molecular clouds; HI galaxy disks; gravitational lens systems).

Atomic, Molecular and Optical Physics: Study of atomic and molecular interactions in dense fluids by laser light scattering and far infrared absorption; atomic collision dynamics studied using electron energy-loss spectroscopy, laser excitation techniques and time-correlated particle detection.

Condensed Matter Physics: Magnetic properties of materials, including their dependence on crystal structure and morphology; surface magnetism of fine particles or thin films; crystalline transformations of amorphous magnetic materials; phase transitions and critical phenomena in ferromagnetics, spin-glasses and site-disordered systems; high T_c superconductors; mesoscopic wave physics of complex materials, including ultrasonic wave transport in strongly scattering media, Anderson localization of ultrasound, phononic crystals, field fluctuation spectroscopy, dynamic imaging in complex media, and ultrasonic characterization of soft food biomaterials; nanomagnetism, biological applications of magnetic nanoparticles, nanoparticle magnetism, magnetism in thin film systems, neutron scattering; theoretical studies of inhomogeneous soft matter; the structure and phase behaviour of block copolymers and polymer brushes; structure, phase behaviour, and order-disorder transitions in lipid bilayers and lipid mixtures.

Mass Spectrometry: Precise atomic mass determinations of stable and unstable nuclides; time-of-flight mass spectrometry of large molecules (particularly biomolecules) and molecular clusters.

Physics of Nanoscale Systems: Electronic and Optical Properties of Low-dimensional Electron Systems and Nanostructures, such as systems exhibiting quantum hall effects, quantum dots and quantum rings; physics of graphene nanostructures and related carbon systems, electronic and magnetic properties of DNA, DNA mispairs, spin dynamics and Rashba effects in quantum dots.

Subatomic Physics: Properties of nuclei far from stability (decay energies, atomic masses, nuclear structure); nucleon-nucleon systems (spin observables, particle production); tests of symmetry principles (charge symmetry, parity); strange quark structure of the proton; Laser and Ion Trapping; measurements of parity-violation in electron scattering and extraction of the weak mixing angle and fundamental physics with cold and ultracold neutrons.

Theoretical Physics: Low temperature excitations in ordered crystalline magnets; investigations of reduced dimensionality on the magnetic and electronic properties of solids; the effects of disorder on the physical properties of solids as studied using renormalization group methods, fractal geometry and random matrix theory; phase transitions and critical phenomena; theory and computer simulation of defect processes in crystalline materials; relativistic dynamics of composite system; Kaluza-Klein theory and string dynamics; evolution problems in quantum, classical and semi-classical mechanics using the rigorous methods of mathematical physics; few-body scattering theory; electromagnetic interactions in both few-body systems and complex nuclei; relativistic approaches to the nuclear many-body problem; Non-Archimedean Analysis (study of field extensions of the real numbers that also contain infinitely small and infinitely large numbers) and applications in physics; black holes and quantum gravity, quantum computation, information theory and non-linear dynamics.

Medical Physics: Research is also carried out at CancerCare Manitoba, the Health Sciences Centre and at the National Research Council Institute for Biodiagnostics. Functional imaging and the development of advanced imaging modalities and reconstruction algorithms, in-vivo portal dosimetry of radiation therapy; the development of low dose breast imaging systems; image guide adaptive radiotherapy and multi-objective optimization techniques; quality control for diagnostic imaging and radiation therapy; high speed dose and image reconstruction and simulation; biomedical Magnetic Resonance Imaging and instrumentation; development of new technologies and methods for positron emission tomography (PET) imaging.

Biophysics: Biophysical and bioengineering approaches for studying immune cell trafficking; development of microfluidic devices for biological and medical applications; the facilities we have include cell culture, imaging, microfabrication for soft – lithography.

Research Facilities

As an integral part of the research programs outlined above, a variety of major research facilities exist within the Department of Physics and Astronomy. These include an HP RX5670 ITANIUM2 quad CPU computer server with 96 Gb RAM, HP Smart Array 5304 controller, 28x146 Gb U320 disk subsystem, Group members access the server through a high speed, switched network, we also have a HP ZX200

ITANIUM2 development server with a 9Gb RAM, and several PCs for code development and testing. As well, the department has several ultrasonic spectrometers, including a TEMPO laser ultrasound interferometer, a high resolution mass spectrometer, four time-of-flight mass spectrometers for large ions and biomolecules with masses up to approximately 10,000 u, a S.H.E. dilution refrigerator for the production of millikelvin temperatures, a Philips X-ray diffraction, a Quantum Design PPMS 6000 magnetometer/susceptometer and a custom-designed SQUID-based magnetometer, and a local network of computers connected to the university's central computer facilities. A good machine shop and electronics shop are located in the Physics Department. Both liquid nitrogen and helium are available locally for low temperature research.

Research facilities at various national and international laboratories, including Argonne National Laboratory (Chicago), TRIUMF (Vancouver, we are now a full member of the TRIUMF consortium), Los Alamos National Laboratory (Los Alamos, N.M.), the Thomas Jefferson National Accelerator Laboratory (Newport News, VA), and the Max Planck Institute for Nuclear Physics (Heidelberg, Germany) are extensively used by members of the subatomic physics research group.

Research in Astronomy and Astrophysics makes use of data obtained with various telescopes including NASA's Chandra X-ray Observatory and the Hubble Space Telescope, and with the International Galactic Plane Survey.

Students also have access to various pieces of clinical and research related equipment at CancerCare Manitoba, the Health Sciences Centre and at the National Research Council of Canada Institute for Biodiagnostics. These include clinical linear accelerators, CT, MRI, Ultrasound, PET, and other imaging systems as well as various sources of radiation and dosimetry equipment. High performance GPU based computer and software for the simulation of radiation transport are also available.

Research in Condensed Matter Physics is undertaken at the nuclear reactors NRU (Chalk River), OPAL (Sydney) and ILL (Grenoble).

The University of Manitoba is a major institution in the Western Canada Research Computing Grid (WestGrid) and is the location of a large high performance computing cluster accessible to all researchers across Canada through Compute/Calcul Canada.

M.Sc. in Physics, Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. To enter the Master's program directly, a student must have an Honours B.Sc. degree in Physics and Astronomy, Mathematics and Physics, or Engineering Physics from the University of Manitoba or the equivalent. Students without the degree entrance requirements will have their undergraduate program evaluated and may be required to complete a pre-Master's program of selected University of Manitoba undergraduate courses.

Application Deadlines

The Department of Physics and Astronomy allows students to begin their program on 1 September, 1 January, 1 May, or 1 July. For admission for each of these start dates, Canadian/U.S. students should send their applications with complete supporting documentation to the Faculty of Graduate Studies no less than three and a half (3.5) months before the intended start date. Non-Canadian students should send their applications with complete supporting documentation to the Faculty of Graduate Studies to arrive no later than six and a half (6.5) months before the intended start date.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. The Department of Physics and Astronomy has certain supplementary regulations. Information about these

regulations as well as a description of research programs in Physics is available at: physics.umanitoba.ca

A Master's degree in physics normally consists of both coursework and a thesis. For students in the Comprehensive Medical Physics M.Sc. program, the course load is increased and the thesis requirement is replaced by research project.

The Master's program with thesis consists of two or three courses from the 700/7000 series offered by the department or from another department offering courses suitable for the candidate's program. In special cases, courses may be drawn from the 400 series as listed. The program of study extends through a minimum period of twelve months. Frequently two summers of research work plus one winter of research and coursework are required to complete the program. In addition to coursework, these students must submit a thesis and defend it orally.

The Comprehensive M.Sc. program in medical physics is a two-year (18-month, course work, 6-month research project) program which requires 36 credits. A clinical research project in an approved laboratory and the submission of a research report is also required. On completion of the coursework and research project, the student will be required to pass a comprehensive oral examination.

Second language reading requirement: none

Expected time to graduate: 2 years

Ph.D. in Physics,
Admission

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, the normal procedure to be a candidate for a Ph.D. degree is to complete an M.Sc. degree first. However, students with an honours degree from the University of Manitoba or equivalent may be accepted directly into the PhD program.

Application Deadlines

The Department of Physics and Astronomy allows students to begin their program on either 1 September, 1 January, 1 May, or 1 July. For admission for each of these start dates, Canadian/U.S. students should send their applications with complete supporting documentation to the Faculty of Graduate Studies no less than three and a half (3.5) months before the intended start date. Non-Canadian students should send their applications with complete supporting documentation to the Faculty of Graduate Studies to arrive no later than six and a half (6.5) months before the intended start date.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. The Department of Physics and Astronomy has certain supplementary regulations. Information about these regulations as well as a description of Research Programs in Physics is available on the web: www.physics.umanitoba.ca

International students entering the Ph.D. program are strongly encouraged to write and obtain minimum grade of 650 on the GRE physics subject examination prior to applying for the Ph.D. program.

The main program of studies is selected from one of the major fields of research listed above in Section 2.2, and is supplemented by an ancillary program which takes into account the student's interests and breadth of experience.

Ancillary subjects must be chosen from a field of physics distinct from the major area of study or from other departments (e.g., Mathematics) offering suitable courses. In consultation with the student, a program of study is decided by a committee with the student's advisor as chair.

Students must pass a candidacy exam and submit a thesis which describes their research work and which will be examined according to the general regulations.

Second language requirement: none

Expected time to graduation: 4 years

Physics and Astronomy Course Descriptions

PHYS 7250 Seminar course in Advanced Physics (Formerly 016.725) Selected topics in advanced physics may be offered from time to time by the faculty or visiting lecturers. Credit for this course will be determined by the head of the department of Physics. Prerequisite: consent of instructor.

PHYS 7260 Mass Spectroscopy (Formerly 016.726) Two lectures per week for one term. The course covers the techniques and applications of mass spectroscopy. Special emphasis is given to the general principles of ion optics for use in the design of modern instruments.

PHYS 7360 Medical Radiation Physics (Formerly 016.736) The relevant physics of the production and interaction of radiation beams used in both diagnostic and therapeutic medicine will be covered. Such beams included X- and g-rays, particle beams, visible and I.R. radiation, microwaves, and ultrasound. Prerequisite: PHYS 4560 (or 016.456) or consent of instructor.

PHYS 7370 Radiotherapy Physics (Formerly 016.737) The calculations and measurements necessary to determine the radiation dose distribution in patients receiving radiotherapy will be presented. Newer treatment modalities, e.g., pion therapy and hyperthermia will be discussed. Prerequisites: PHYS 4510 (or 016.451), PHYS 4560 (or 016.456), or consent of instructor.

PHYS 7380 Radiation Biology (Formerly 016.738) The interaction of ionizing and non-ionizing radiations with living systems. The relevance to Radiotherapy. Nuclear medicine and diagnostic radiology. Prerequisite: PHYS 1020 (or 016.102)/016.103 (or 016.121) or consent of instructor.

PHYS 7390 Radiation Protection (Formerly 016.739) Ionizing radiation including X-ray, g-ray, neutrons, alpha-, beta-, and heavy ion-particle sources, bioeffects, and protection principles are covered. Non-ionizing radiation, including laser light, radio- frequency waves, ultraviolet and infrared light, and ultrasound, sources, bioeffects, and exposure protection guidelines are studied. Prerequisites: PHYS 7360 (or 016.736) and PHYS 7380 (or 016.738) or consent of instructor.

PHYS 7400 Medical Imaging (Formerly 016.740) Fundamental principles of image formation, analysis of the characteristics of medical images, parametric description of image quality; application to transmission radiography. Prerequisite: consent of instructor.

PHYS 7410 Diagnostic Methods (Formerly 016.741) Medical imaging in terms of signal acquisition, data processing, image reconstruction, special techniques; applications in fluoroscopy, computed tomography, radionuclide imaging, ultrasound, nuclear magnetic resonance imaging. Prerequisite: PHYS 7400 (or 016.740).

PHYS 7440 Advanced Topics in Physics (Formerly 016.744) Selected topics in advanced physics. This course may be offered from time to time by the faculty or visiting lecturers. Prerequisites: consent of instructor.

PHYS 7460 Methods in Medical and Health Physics 1 - (Medical Imaging and Radiation Protection)

(Formerly 016.746) This practical course is designed to give students hands-on experience with equipment, clinical techniques and methods of analysis in medical imaging and health physics. Topics such as: dosimetry of unsealed sources, radiation shielding design and surveys, meter calibration, decontamination and plume dispersal, CT, Ultrasound, X-ray and Nuclear Medicine imaging techniques, mammography and quality assurance in medical and health physics will be covered. Students are required to take both PHYS 7460 (or 016.746) and PHYS 7470 (or 016.747) which will be offered in consecutive years. Note: only students accepted to the Medical Physics Program will be allowed to register for this course

PHYS 7470 Methods in Medical and Health Physics 2 - (Radiotherapy and Radiation Biology)

(Formerly 016.747) This practical course is designed to give students hands-on experience with equipment, clinical techniques and methods of analysis in radiotherapy and radiation biology. Topics such as: error analysis and data reduction, dosimetry of ionizing radiation, radiotherapy treatment planning, calibration, HDR brachytherapy, micro-dosimetry and quality assurance in medical physics, will be covered. Students are required to take both PHYS 7460 (or 016.746) and PHYS 7470 (or 016.747) which will be offered in consecutive years. Note: only students accepted to the Medical Physics Program will be allowed to register for this course.

PHYS 7500 Condensed Matter Physics 1

(Formerly 016.750) The principles of electrical and vibrational properties of primarily crystalline structures. Topics include free electron theory, electron-electron interactions, screening, phonons, electron-phonon coupling and transport properties. Not to be held with the former 016.712.

PHYS 7510 Condensed Matter Physics 2

(Formerly 016.751) A comprehensive survey of advanced topics in condensed matter physics. The topics may change from year to year but include collective excitations, defects, localized states, superconductivity, Josephson effect, superfluids, quantum Hall effect. Not to be held with the former 016.712. Prerequisite: PHYS 7500 (or 016.750) or consent of instructor.

PHYS 7530 Physics of Magnetism

(Formerly 016.753) A comprehensive survey of magnetism and magnetic materials. Topics include the origins of magnetic interactions, types of magnetic order, domain structures, magnetization processes, dynamics, thin films, applications. Not to be held with the former 016.721. Prerequisite: PHYS 7500 (or 016.750) or consent of instructor.

PHYS 7540 Statistical Mechanics

(Formerly 016.754) The principles of statistical mechanics. Topics include statistical ensembles, entropy, Fermi gas, Bose-Einstein condensation, superfluidity, phase transitions and equilibria, fluctuations, Fluctuation-Dissipation and Wiener-Khinchin theorems, liquids and dense gases. Not to be held with the former 016.719. Prerequisite: PHYS 4370 (or 016.437) or consent of instructor.

PHYS 7550 Advanced Statistical Mechanics

(Formerly 016.755) An advanced treatment of phase transitions and critical phenomena in a variety of systems. Topics include solvable models, mean field theory, Landau theory, scaling laws, series methods, renormalization group methods, linear response theory, generalized rigidity. Not to be held with the former 016.719. Prerequisite: PHYS 7540 (or 016.754) or consent of instructor.

PHYS 7560 Relativistic Quantum Mechanics

(Formerly 016.756) Relativistic single particle equations for bosons and fermions, quantization of fields, interacting fields, elementary quantum electrodynamics, covariant perturbation theory and Feynman diagrams. Not to be held with the former 016.743. Prerequisite: PHYS 7420 (or 016.742) or consent of instructor.

PHYS 7570 Nuclear Physics

(Formerly 016.757) Hadron and lepton scattering, the nucleon-nucleon interaction, nuclear structure, nuclear shell model, nuclear excitations and decay, hadronic interactions and decays, the quark model. Not to be held with the former 016.705. Prerequisite: PHYS 4510 (or 016.451) or consent of instructor.

PHYS 7580 Advanced Topics in Nuclear Physics

(Formerly 016.758) A selection of advanced topics in nuclear and intermediate energy physics. Not to be held with the former 016.706. Prerequisite: PHYS 7570 (or 016.757) or consent of instructor.

PHYS 7590 Electromagnetic Theory

(Formerly 016.759) Maxwell's equations, electromagnetic potentials, gauge conditions, conservation laws, Green function methods, diffraction theory, simple radiating systems, Lagrangian derivation of Maxwell's equations and the covariant structure of electromagnetism. Not to be held with the former 016.715.

PHYS 7600 Applied Electromagnetism

(Formerly 016.760) Wave guides and resonant cavities, charged particles collision theory, Bremsstrahlung, radiation of moving charged particles, multipole radiation. Not to be held with the former 016.715. Prerequisite: PHYS 7590 (or 016.759) or consent of instructor.

PHYS 7630 Particle Physics

(Formerly 016.763) Basic particles and interactions, symmetries and conservation laws, the quark model, deep inelastic scattering, electroweak theory, introduction to QCD. Not to be held with the former 016.730. Prerequisite: PHYS 7420 (or 016.742) or consent of instructor.

PHYS 7660 Astronomy 1: The Phenomenology of Galaxies

(Formerly 016.766) Describes astronomical standards such as intensity magnitudes, colour and metallicity; the properties of stars and the interstellar medium; galactic structure, kinematics, and the evolution of galactic components.

PHYS 7670 Astronomy 2: Galactic Dynamics

(Formerly 016.767) A continuation of PHYS 7660, this course provides mathematical descriptions of potential theory, disk dynamics and spiral structure, collisions between galaxies, and dark matter. Additional topics are galaxy evolution, large-scale structure of the universe and cosmology. Prerequisite: PHYS 7660 (or 016.766)

PHYS 7680 Astrophysics 1: Stars

(Formerly 016.768) Covers the basic physical concepts required to extract qualitative estimates of astrophysical parameters, describes several aspects of observational astronomy, and it emphasizes in a more mathematical way the astrophysics of stellar structure and evolution.

PHYS 7690 Astrophysics 2: Interstellar Matter and Galaxies

(Formerly 016.769) Emphasizes the physics of interstellar matter and dust grains, gaseous nebulae, basic hydrodynamics, shock waves, and supernova remnants. Prerequisite: PHYS 7680 (or 016.768)

PHYS 7700 Research Project in Medical Health Physics

(Formerly 016.770) Students undertake a relevant research project in an approved laboratory. At least six months of full-time research is expected. The research project report shall be submitted in a style and length as specified by the department. A comprehensive oral examination will follow the submission of the project report.

PHYS 7710 Quantum Optics

(Formerly 016.771) Matter-radiation interaction, spectral line broadening, quantization of the radiation field, degree of coherence of light; number, coherent, chaotic and squeezed states of light, quantum theory of detection, laser theory, resonance fluorescence, light scattering, non-linear quantum optics. Not to be held with the former 016.708 Prerequisite: permission of instructor

PHYS 7720 QUANT MECH 1

Topics include the concepts and foundations of quantum mechanics, continuous and discrete symmetries, time dependent perturbation theory including interaction with electromagnetic fields and scattering theory. Prerequisite: PHYS 4380 (C+). Not to be held with the former PHYS 7420 or 016.772.

Physiology

M.Sc. in Physiology,
Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 3 months prior to their intended start date. International students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 7 months prior to their intended start date.

Program Requirements

A minimum of fifteen (15) credit hours in 700/7000 level courses in Physiology. In most cases, students will be required to complete PHGY 7240 Medical Physiology (6 cr. Hrs.)

Second language reading requirement: none

Expected time to graduate: 2 - 5 years

Ph.D. in Physiology, Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Department at least 3 months prior to their intended start date. International students should submit their application and supporting documentation to the Department at least 7 months prior to their intended start date.

Program Requirements

Nine (9) credit hours beyond the requirements for the M.Sc. degree. Additional courses as deemed appropriate by the Student's Advisory Committee, with the approval of the Physiology Graduate program Committee. Advanced Topics in Physiology (PHGY 7180) (3) is a required course for Ph.D. students.

Second language requirement: none

Expected time to graduation: 3 - 7 years

Page URL,
<http://crscalprod1.cc.umanitoba.ca/Physiology.catx>

Physiology Course Descriptions

PHGY 7010 Readings in Physiology
(Formerly 090.701) Tutorial course covering recent contributions in an area of physiology related to a student's research interests.

PHGY 7030 Special Physiology
(Formerly 090.703) Seminar and reading course on physiology of particular systems.

PHGY 7150 Cardiac Physiology
(Formerly 090.715) Tutorial and reading course on cardiac physiology; emphasis on the energetics of cardiac contraction and its relationship to ultrastructural and biochemical properties of the heart.

PHGY 7160 Vascular Physiology
(Formerly 090.716) Lectures and seminars on physiology of blood vessels including hemodynamics, rheology of blood, and the function and structure of smooth muscle.

PHGY 7170 Endocrine and Metabolic Physiology
(Formerly 090.717) Special topics in endocrine and metabolic physiology emphasizing current concepts.

PHGY 7180 Advanced Topics in Physiology
(Formerly 090.718) Advances in selected areas of physiology, research proposals related to the students's area of interest, procedures for grant writing and refereeing grant proposals, evaluation of citations and impact factors.

PHGY 7190 Research Topics in Physiology
(Formerly 090.719) Seminars on research presentations by staff and senior students in physiology.

PHGY 7230 Molecular and Cellular Aspects of Organ Physiology
(Formerly 090.723) Tutorial course: Function of various organs in the light of current concepts regarding structure and function at the molecular and cellular level.

PHGY 7240 Medical Physiology
(Formerly 090.724) Lecture, seminar, tutorial, and demonstration course dealing with fundamental biophysical processes, function of major organ systems, and physiological control mechanisms. Pathophysiological functions and their relation to disease will be discussed where appropriate.

PHGY 7260 Advanced Neurological Sciences
(Formerly 090.726) Seminar, readings and lecture course covering original research papers leading to the most significant advances in the neurological sciences. Emphasis is placed on student comprehension of major research directions in the broad field of neurological sciences. Prerequisite: PHGY 7240 (or 090.724) or equivalent and consent of instructor.

PHGY 7270 Physiology of Striated Muscle
(Formerly 090.727) A lecture and seminar course dealing with the physiology and biophysics of skeletal and cardiac muscle.

PHGY 7290 Physiology of the Airways
(Formerly 090.729) A lecture and seminar course dealing with the physiology of the airways in the intact animal and with the role of smooth muscle in controlling airway function. The fundamental properties of airway smooth muscle in controlling airway function will be emphasized. Prerequisite: PHGY 7240 (or 090.724) or equivalent and consent of instructor.

PHGY 7300 Molecular Endocrinology
(Formerly 090.730) A lecture and seminar course on advances in molecular and cellular aspects of endocrinology and other systems. The course is taught by members of the Gene Technology Group and topics will reflect current research interests. These include the roles of hormones/growth factors in cancer, growth and development, and reproduction, and the regulation of hormone gene families. This course is designed for individuals with knowledge in the areas of molecular and/or cell biology. Prerequisite: consent of instructor.

PHGY 7310 Principles of Electronics for Life Sciences
(Formerly 090.731) Lectures on basic principles of electricity and electronics of particular application to electrophysiology.

PHGY 7320 Instrumentation for Electrophysiology
(Formerly 090.732) Lectures on the application of principles of electricity and electronics to electrophysiology. Prerequisite: PHGY 7310 (or 090.731).

PHGY 7330 Physiology of Smooth Muscle
(Formerly 090.733) A lecture and seminar course dealing with the biophysics, electrophysiology, pharmacology and biochemistry of the smooth muscle in the major organ systems.

PHGY 7340 Cardiovascular Electrophysiology
(Formerly 090.734) A comprehensive lecture and seminar course on the electrical activity of the cardiovascular system. The fundamental electrical properties of cardiac and vascular muscle cell membranes, currents and channels as studied by intracellular microelectrodes, voltage clamp and patch clamp techniques will be stressed.

PHGY 7350 Cardiovascular Pathophysiology
(Formerly 090.735) A comprehensive lecture course on disease in the cardiovascular system. Topics to be covered include methods of analysis of cardiac viability, heart

failure, arrhythmias, heart diseases (congenital, valvular, pericardial, cardiomyopathy), hypertension, stroke, atherosclerosis and myocardial infarction. Prerequisite: PHGY 7240 (or 090.724).

PHGY 7360 Trends in Cardiovascular Sciences

(Formerly 090.736) A comprehensive seminar-based course dealing with recent advances in cardiovascular research given by local fellows and prominent scientists. Students will be expected to participate in the series and present their own research data seminar. Prerequisite: PHGY 7240 (or 090.724).

PHGY 7370 Cardiovascular Molecular Biology

(Formerly 090.737) A lecture course dealing with the structure and regulation of genes responsible for normal cardiac muscle and vascular system fluctuations as well as a survey of the genetic contribution to cardio-vascular disease (atherosclerosis, hypertension, heart failure). Prerequisite: PHGY 7240 (or 090.724).

PHGY 7380 Cardiovascular Cell Biology

(Formerly 090.738) A comprehensive lecture course on morphology, biochemical composition and function of the cardiac and smooth muscle cell, with particular emphasis on developmental and injury-related issues. Topics include the description of various cardiac cells and their immediate extracellular environment, intercellular communication, cardiac development, control of cell cycle, hyperplasia and hypertrophy, cardiac growth factors, mechanism of injury and cell death, regeneration, heat shock proteins and cardioprotection.

PHGY 7390 Gene Therapy

(Formerly 090.739) Advanced course detailing new frontiers in the application of gene therapy and technological protocols currently utilized in treating cardiovascular diseases such as cardiomyopathy, hypertension, congenital birth defects and restenosis. Prerequisites: PHGY 7370 (or 090.737), PHGY 7380 (or 090.738) or 082.724 or permission of the course coordinator.

PHGY 7400 Cellular and Molecular Biology of the Vascular System

(Formerly 090.740) This course provides current concepts in vascular biology at the molecular level as well as the pathogenesis and treatment of vascular diseases for the purpose of graduate studies. Students may also learn up-to-date techniques in research of vascular cell biology and the diagnosis of vascular diseases through laboratory demonstrations.

Plant Science

Plant Science ,
Plant Science Program Info,

The Department of Plant Science is one of seven departments in the Faculty of Agricultural and Food Sciences and draws together expertise in both the applied and basic sciences. Since its origin in 1937, the Department has maintained a leading role in agricultural research in Canada. Its achievements in rapeseed and canola breeding and in cereal breeding and cytogenetics are known world-wide. Faculty members have major research programs in agronomy and plant protection, plant breeding and genetics, and plant physiology-biochemistry (elaborated below). The graduate program of coursework offers considerable choice to the student and is based mainly on the student's primary interests and previous scholarly training. In general, a series of graduate courses in the student's chosen field offered by the Department of Plant Science is required for the major credit. A wide range of courses in ancillary fields (e.g., biological sciences, chemistry, statistics, soils, etc.) may be chosen to complete the graduate coursework.

Fields of Research

Programs of study and research are offered in the following areas, leading to the M.Sc. and Ph.D. degrees.

Agronomy and Plant Protection: Cropping systems research; annual and perennial crop agronomy including rotational benefits of traditional and novel legumes; self-regenerating cover crops; long term organic vs conventional crop production systems; pasture water use efficiency. Agronomy and cropping systems research with a special emphasis on cover crops and the management of plants and soils to address agricultural and environmental challenges. Weed biology, ecology and eco-physiology; integrated weed management; the impact of management techniques on weed community assembly; crop/weed competition. Canola and wheat pathology; breeding for disease resistance; applied and molecular approaches to understanding

the epidemiology of plant pathogens; biological control and mode of action by antagonists on plant pathogens; isolation, identification and characterization of microbial genes involved in pest control; proteomics in host-pathogen resistance; IPM in sustainable agricultural systems. Biochemical and molecular mechanisms of plant-microbe interactions, with an emphasis on plant defense reactions and the mechanisms of their suppression by pathogens; mechanisms of biological control of plant diseases; role of secondary metabolites (i.e., phenolics, terpenes) in defense and defense signalling and role of inducers and suppressors in induced resistance.

Plant Breeding and Genetics: Wheat breeding and genetics; modelling crop development and yield; genetics of resistance to leaf spotting diseases; development and evaluation of breeding methodologies; genetics of herbicide resistance; development of Fusarium Head Blight resistant germplasm; development of wheat for fuel and feed. Perennial grain breeding including grains and oilseeds; companion crop development; plant growth and development and its utilization for selection in perennial crop breeding programs. Open pollinated population and hybrid canola/rapeseed breeding; open pollinated population and hybrid herbicide tolerant canola/rapeseed breeding; agronomy and genetic studies in canola/rapeseed; bio-products and bio-fuels research and development. Plant genomics and molecular biology; genetic and transcriptome mapping, gene profiling and cloning; construction of high density SRAP maps and molecular marker development; cloning of genes involved in the pathways of glucosinolates and fatty acids, and for disease resistance, seed coat colour, and male sterility in Brassica crops. Improvement of oil content and oil quality in canola rapeseed through traditional and molecular breeding with special emphasis on development of Brassicas suitable as feed stock for biodiesel; plant genomics to isolate, clone and study the expression of economically important genes for use in breeding programs. Gene expression in plants during resistant or susceptible interactions with fungal or bacterial pathogens; genetic engineering of disease resistance; bioinformatics.

Plant Physiology-Biochemistry: Physiology and molecular biology of embryo development *in-vivo* and *in-vitro*; improvement of embryo quality and plant regeneration of both angiosperm and gymnosperm species through tissue culture techniques. Physiology and molecular biology of biofuel crops with the aim of understanding and manipulating the major plant physiological processes including starch biosynthesis, sucrose metabolism and transport; study on plant hormones with emphasis on gibberellin metabolism (biosynthesis and inactivation), its role in regulating crop development and mediating crop-environment interaction.

There is a wide range of employment opportunities for M.Sc. and Ph.D. graduates from the Department of Plant Science, including research and teaching positions at universities throughout the world, research and extension positions with the federal and provincial governments and positions in private industry.

Research Facilities

The Department of Plant Science has excellent research facilities including well-equipped laboratories, ample greenhouse space and controlled-environment chambers, and a horticultural-research storage building. A 60 hectare field research station is situated on campus within walking distance of the Plant Science Building. As well the Department has a 165 hectare field-research station located at Carman, Manitoba on prime agricultural soil.

M.Sc. in Plant Science,
Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this *Calendar*.

Admission Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 4 months prior to their intended start date. International students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 7 months prior to their intended start date.

Program Requirements

Research and thesis

A minimum of 15 credit hours of coursework (including PLNT 7250 Plant Science Seminar) of which at least 6 credit hours will be courses at the 700/7000 level. The 6 credit hours at the 700/7000 level cannot include PLNT 7250 Plant Science Seminar or ANSC 7500 Methodology in Agricultural and Food Sciences.

Second language reading requirement: none

Expected time to graduation: two years

Ph.D. in Plant Science,
Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this *Calendar*.

Admission Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 4 months prior to their intended start date. International students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 7 months prior to their intended start date.

Program Requirements

Minimum Program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. In addition, students must take PLNT 7420 Advanced Plant Science Seminar for which they must register each year of their Ph.D. program. The 12 credit hours at the 700/7000 level cannot include ANSC 7500 Methodology in Agricultural and Food Sciences.

Second language reading requirement: none

Expected time to graduation: three years

Page URL,
<http://crscalprod1.cc.umanitoba.ca/PlantScience.catx>

Plant Science Course Descriptions

PLNT 7120 Special Problems in Plant Science

Reading or assignment or research on specific aspects of crop development, crop production, weed science, plant pathology, plant biochemistry or plant physiology. Prerequisite: written consent of department head.

PLNT 7130 Topics in Plant Breeding and Genetics

An in-depth study of selected topics of current interest in the fields of plant breeding and genetics. Prerequisite: written consent of department head.

PLNT 7160 Advanced Genetics

Procedures and designs in genetic experimentation, the fundamentals of gene action, mutation and mutagens, linkage and recombination, extranuclear inheritance. Prerequisite: PLNT 4330 or consent of instructor.

PLNT 7162 Plant Genomics

Detailed analysis of advanced genomic techniques, experimental approaches, and progress in current plant genomic projects.

PLNT 7170 Advanced Plant Breeding

Advanced training in modern methods of plant breeding. Prerequisite: PLNT 3520 or consent of instructor.

PLNT 7250 Plant Science Seminar

Principles of oral and poster presentations, visual aid design and organization are discussed and then applied by students in presentations of their current research, and agricultural issues. Course evaluated on a pass/fail basis.

PLNT 7340 Advanced Weed Science

Weed biology and ecology in the context of weed management, covering theory, current information, investigative approaches and experimental techniques. Topics explored include: weed population biology, modelling, weed community ecology, herbicide efficacy and herbicide resistant weeds. Prerequisite: PLNT 3540 or equivalent or consent of instructor.

PLNT 7420 Advanced Plant Science Seminar

The development of a research proposal, instruction and practice in scientific writing and presentation of a seminar. For Ph.D. students only. Course evaluated on a pass/fail basis.

PLNT 7480 Epidemiology of Plant Disease

Lectures, seminars and discussions relating epidemiological principles to plant disease development and control. The course examines in-depth the interrelationships of host, pathogen and environment. Measurement of epidemiological parameters is stressed in relation to disease assessment, disease forecasting and disease management.

PLNT 7490 Storage of Horticultural Crops

Types of storage available for fruits, vegetables and ornamentals will be discussed in relation to their effects on post-harvest physiology and stored crop quality.

PLNT 7610 Topics in Crop Physiology

An in-depth study of selected topics of current interest in the field of Crop Physiology. Prerequisite: written consent of department head.

PLNT 7612 Advanced Plant Physiology

Examination of current concepts of regulation and limitations of photosynthesis, nitrogen metabolism, and assimilate partitioning in field and horticultural crops. Content will include the mode of action of plant growth regulators and herbicides in these processes. Not to be held with the former 039.764. Prerequisites: PLNT 3500, PLNT 4590 or the former 039.452 or consent of instructor.

PLNT 7620 Topics in Agronomy

An in-depth study of selected topics of current interest in the field of Agronomy. Prerequisite: written consent of department head.

PLNT 7630 Topics in Plant Pathology

An in-depth study of selected topics of current interest in the field of Plant Pathology. Prerequisite: written consent of department head.

PLNT 7650 Specialized Plant Pathology

A laboratory course permitting the student to work directly under one of the plant pathology specialists of the Agriculture and Agri-Food Canada Research Centre. It includes the study of assigned literature and preparation of seminars in specialized fields. Prerequisite: written consent of department head.

PLNT 7660 Advanced Crop Production

A lecture-seminar course to investigate environmental, crop management and genetic limitations to growth, yield formation, yield, water use efficiency and quality of field, forage and horticultural crops. Interactions will be stressed and emphasis will be placed on sustainable crop production systems. Simple and complex relationships will be demonstrated using models. Prerequisite: consent of instructor.

PLNT 7670 Quantitative Genetics and Plant Breeding

The theoretical basis of quantitative genetic variation. The genetic structure of plant breeding populations. Estimation, interpretation and use of genetic parameters in cross-pollinated and self-pollinated plant species. Variance components, genotype x environment interaction, inbreeding, heterosis, selection, heritability and combining ability. Prerequisites: PLNT 3520 and PLNT 4330 or consent of instructor.

PLNT 7680 Plant Molecular Genetics

(Formerly 039.768) A synthesis of the knowledge gained from the application of molecular and classical genetics to the study of plant biology, and its impact on biotechnology. Areas of emphasis include development and physiology, transgenic plants, molecular markers, and molecular plant pathology, transposition and structure and evolution of plant genomes. Prerequisites: PLNT 2530 or the former 039.450 or PLNT 3140 or PLNT 4330 or equivalent or consent of instructor.

PLNT 7690 Bioinformatics

An introduction to the theory, strategies, and practice of data management, analysis and utilization in molecular biology. Topics include DNA and protein sequence analysis, biological databases, genomic mapping and analysis of gene expression data. This course will include problem-solving exercises using Unix server-based software. Not to be held with PLNT 4610 (or the former 039.769). Prerequisite: PLNT 2530 (or 039.253) or the former 039.450 or PLNT 3140 (or 039.314) or PLNT 4310 or the former PLNT 4540 (or 039.454) or MBIO 3410 (or 060.341) or consent of instructor.

Political Studies

Political Studies ,

Political Studies Program Info,

The Department of Political Studies offers students a Pre-Master's year, a Master of Arts degree program, as well as a Masters in Public Administration program jointly offered with the University of Winnipeg. The program provides a solid basis for those wishing to go to doctoral studies, or for those interested in careers in law, government, the private and voluntary sectors and international organizations.

With twelve full-time [faculty members](#) and approximately thirty graduate students per year, the low student to faculty ratio provides an excellent opportunity for students to work closely with faculty in the department and for flexibility in the design of programs of study. A further attraction lies in the department's links with the [Centre for Defence and Security Studies](#), a research institute focused on the area of security, strategic and defence studies. Since 1985, graduate students in the department have organized the annual Political Studies Students' Conference in association with the Centre for Defence and Security Studies with invited speakers including distinguished academics and specialists from across Canada and from abroad. The Duff Roblin Professor of Government and the Duff Roblin Political Studies Fellowship (established in 1998) advance the study of Canadian politics within the department and amongst its students.

Fields of Research

The department offers courses at the pre-Master's and Master's levels in five areas of concentration: Canadian politics, international relations, public administration, political theory and comparative politics.

- Canadian Politics, including government institutions, public policy, the Charter of Rights and Freedoms and anti-discrimination legislation, indigenous politics & governance; and political parties;
- International Relations including defence and security studies, foreign and defence policy; international political economy; globalization and international organizations and policy, and colonization and decolonization;
- Comparative Politics including parties and politics, political economy, women in politics, middle east politics, politics in India, politics in Britain and politics of development, indigenous politics & indigenist theory;
- Public Administration including comparative public administration, human resources development, provincial and local administration, government reform, accountability, and performance measurement;
- Political Theory including contemporary and early modern political thought, feminist political thought, autobiography and the political philosophy of Jean-Jacques Rousseau and Simone de Beauvoir.

Research Facilities

As a provincial capital, Winnipeg offers important advantages for undertaking research in politics. Key research libraries are housed at the University of Manitoba

and the Manitoba Legislative Library, both official repositories for Canadian publications. The University of Manitoba Archives and Special Collections, and Provincial Archives provide a wealth of material on Manitoba, Prairie and Canadian politics. Additionally, the university's data library and the Inter-University Consortium for Political and Social Research provide access to electronic data sources, including Statistics Canada and census data, as well as public opinion and election surveys. The University of Manitoba is also a member of the Shastri Indo-Canadian Institute which enhances the Library collection on India and supports graduate research. Finally, the Centre for Defence and Security Studies supports an extensive library of journals, periodicals, and texts in the fields of international relations, security studies, and foreign policy.

[Manitoba Institute for Policy Research \(MIPR\):](#)

The MIPR was established in 2010, and is supported by the Province of Manitoba and the University of Manitoba. The MIPR was created to pursue collaborative and interdisciplinary research in the areas of public policy, administration, and governance and to engage academics, government, the private and non-profit sectors, and citizens of Manitoba on a wide variety of policy issues concerning Manitoba, Western Canada, and Canada in general. Part of its mandate is to develop education programs, advisory committees, seminars, conferences, and workshops, and will work towards a new post-vaccalaureate professional development certificate in public service.

M.A. in Political Studies,

Admission

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, admission to the [Master's program in Political Studies](#) is through successful completion of the pre-M.A. year, as outlined below, or by completion of a B.A.(Honours) program in Political Studies. Applicants possessing a B.A.(Honours) are expected to have maintained a grade point average of 3.5 (B+) in their last 36 credit hours in Political Studies courses, to have completed a course in Political Theory, and to have maintained a cumulative grade point average of 3.0 (B). Students who have a B.A.(Adv.) with a course selection pattern and performance comparable in quality to that of a B.A.(Hons.) student will also be considered. Applicants possessing a B.A. (Honours) in another discipline with a cumulative grade point average of 3.5 (B+) will be considered for direct entry into the program, primarily on the basis of their completion of Political Studies or directly related courses.

The pre-Master's year is designed for students who do not meet the requirements for admission to the Master's program. To be eligible for pre-Master's study, applicants will normally possess a general Bachelor's degree with a major in Political Studies (30 credit hours including one course in Political Theory), with a minimum cumulative grade point average of 3.0 (B). Applicants possessing a general B.A. in another discipline with a cumulative grade point average of 3.5 (B+) will also be considered for direct entry into the pre-Master's program, primarily on the basis of their completion of Political Studies or directly related courses.

Admission to the pre-Master's year does not guarantee future admission to a MA program in Political Studies; students in the pre-Master's program are required to follow the normal application procedures for entry into the Master's program.

Application Deadline

Department deadline for applications for Regular Session (September) for International students is January 15 and for Canadian/U.S. students June 1.

Program Requirements

In addition to the minimum course requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, students in the Master's program must complete either: 12 credit hours of 7000-level courses in Political Studies and a thesis requiring some original research in primary sources; or 24 credit hours of 7000-level courses, a research paper demonstrating familiarity with secondary sources, two written comprehensive exams, and an oral examination.

All students must maintain an overall average of "B+" with no grade below a "B" in their coursework to remain in the program.

A student in the pre-Master's year will normally be required to successfully complete 24 credit hours at the 4000 level in Political Studies. Under special circumstances, the substitution of 6 credit hours at the 4000 level in an ancillary subject or at the 3000 level in Political Studies may be allowed. Decisions regarding the substitution of courses for the fulfilment of the program requirements rest with the Department's Graduate Committee and must be obtained in writing.

Students in the pre-Master's year must achieve a cumulative grade point average of 3.5 (B+) with no grade lower than a B (3.0 grade points) in course work to be eligible for admission into the Master's program.

More information may be found in the Supplementary Regulations pertaining to the Master of Arts and pre-Master's Programs in Political Studies.

Second Language Reading Requirement: No

Expected Time to Graduate: Two years

Ph.D. in Political Studies,
The Department of Political Studies does not offer a Ph.D. Program.

Page URL,
<http://crscalprod1.cc.umanitoba.ca/PoliticalStudies.catx>

Political Studies Course Descriptions-6000 Level

POLS 6010 The Manitoba Legislative Internship Seminar (Formerly 019.601) This credit is granted to six individuals who annually complete the assignment as Legislative Interns within the Manitoba Legislative Assembly.

POLS 6500 Co-operative Education Work 1 (Formerly 019.650) This credit is granted to full time registered students in the Master of Public Administration who have registered in the co-op option of the program. Eligible candidates must have attended two mandatory workshops and completed a minimum 24 credit hours of course work prior to the first work term placement. Work terms are paid positions by employers primarily in the public sector. Work terms are a minimum of 13 weeks.

POLS 6510 Co-operative Education Work 2 (Formerly 019.651) This credit is granted to full time registered students in the Master of Public Administration who have registered in the co-op option of the program. Eligible candidates must maintain full time status and have attended two mandatory workshops, completed a minimum 24 to a maximum of 48 credit hours of course work, and successfully completed a first work term prior to the second work term placement. Work terms are paid positions by employers primarily in the public sector. Work terms are a minimum of 13 weeks.

Political Studies Course Descriptions -7000 Level

POLS 7280 Directed Readings in Politics (Formerly 019.728) An independent reading and/or research course on a selected topic in political studies, undertaken and arranged in consultation with the prospective instructor, upon the approval of the Graduate Committee. As the course content will vary from year to year, students may take this course more than once for credit.

POLS 7290 Directed Readings in Politics 2 (Formerly 019.729) An independent reading and/or research course on a selected topic undertaken and arranged in consultation with the prospective instructor, upon approval of the Graduate Committee. As the course content will vary from year to year, students may take this course more than once for credit.

POLS 7300 Directed Readings in Public Administration (Formerly 019.730) An independent reading and/or research course on a selected topic undertaken and arranged in consultation with the prospective instructor, upon approval of the Graduate Committee. As the course content will vary from year to year, students may take this course more than once for credit.

POLS 7340 Canadian Government (Formerly 019.734) Examines the core institutions of Canadian Government and politics including parliamentary government, federalism, the Constitution and the Charter of Rights and Freedoms. Students may not hold credit for both POLS 7340 (or 019.734) and the former 019.776.

POLS 7350 Canadian Democracy (Formerly 019.735) Examines the core institutions and processes of Canadian democracy including political parties, elections, voting, social movements, interest groups and public opinion. Students may not hold credit for both POLS 7350 (or 019.735) and the former 019.776.

POLS 7370 Seminar in the Theory and Practice of Public Administration (Formerly 019.737) The intent of this course is to provide insight into the exigencies of actual public administration. The course will be conducted on a topical basis within the framework of certain trends facing Canadian governments today. (The course will attempt to utilize, to the fullest extent possible, the particular expertise of students in the program, faculty members, and of both elected and appointed public officials.) Students may not hold credit for both POLS 7370 (or 019.737) and the former 019.731.

POLS 7410 Selected Topics in Political Behaviour 1 (Formerly 019.741) A systematic examination of empirical research in the area of political socialization and political culture. Students may not hold credit for both POLS 7410 (or 019.741) and the former 019.725.

POLS 7470 Strategic Human Resource Management in Government
A study of the human resource management functions, including planning, staffing, training, performance management, compensation and labour relations, in ways that optimize organizational performance. This course will also address contemporary challenges including recruitment and retention, managing change, demographic shifts, and information technology.

POLS 7520 The Political Classics (Formerly 019.752) A thorough study of selected works with special attention to methodology, historical content, theoretical position and universal significance. Students may not hold credit for both POLS 7520 (or 019.752) and the former 019.771.

POLS 7530 International Political Economy (Formerly 019.753) An examination of the systematic study of international political economy. Particular attention is paid to the foreign economic policies of advanced industrialized states and the various issues surrounding the redistribution of wealth and influence in the contemporary international system.

POLS 7550 Contemporary Issues in Canadian Politics (Formerly 019.755) A seminar series examining a contemporary debate in Canadian politics and government. The specific topic will vary from year to year depending on faculty interest and specialization.

POLS 7610 Political Theory and Contemporary Issues (Formerly 019.761) An examination of recent theoretical perspectives on contemporary political institutions, problems and values. Students may not hold credit for both POLS 7610 (or 019.761) and the former 019.771.

POLS 7710 Liberalism and Its Critics
An advanced study of liberalism and various theoretical challenges to its ethical and political claims.

POLS 7720 Comparative Government (Formerly 019.772) Three hours a week, both terms. The primary focus of this course will be on the major Western "democracies" (e.g., United Kingdom, United States, and Western Europe). Phenomena to be examined include political participation and the problems of social change in industrial societies.

POLS 7790 International Relations Theory
(Formerly 019.779) A critical assessment of basic theories and models used in International Relations, emphasizing theoretical approaches and research. Students may not hold credit for both POLS 7790 (or 019.779) and the former 019.773.

POLS 7850 Contemporary Strategic and Security Studies
(Formerly 019.785) An advanced course in strategic studies. The evolution of strategic thought in the modern period will be examined, and particular emphasis will be placed on the role of armed force in relation to the problem of international security. Students may not hold credit for both POLS 7850 (or 019.785) and the former 019.783. Normally students will be expected to have taken POLS 4730 (or 019.473) or its equivalent as prerequisite.

POLS 7910 Multivariate Research Methods
(Formerly 019.791) Introduction to the theory and application of multivariate regression models in political analysis. Students may not hold credit for POLS 7910 (or 019.791) and either the former 019.732 or 019.788.

Political Studies Course Descriptions-9000 Level

POLS 9010 UW POL 4301 Administrative Theory
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9020 UW POL 4400 Seminar in Canadian Politics
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9030 UW POL 4415 State and Economy
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9090 UW POL 7331 Directed Readings in Public Administration
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9120 UW POL 4220 Liberty and Community in Modern Canadian Political Thought
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9230 UW POL 4410 Seminar in Women in Politics
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9240 UW 4505 Politics of Urban Planning
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9340 UW POL 7300 Seminar in Theory and Practice of Public Administration I
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9350 UW POL 7305 Seminar in Theory and Practice of Public Administration II
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9370 UW POL 7320 Seminar in the Public Policy Process
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9380 UW POL 7325 Seminar in Public Policy Issues
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9390 UW POL 4200 Feminist Political Thought
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9460 UW POL 7505 Politics of Urban Planning
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9470 UW POL 7335 Directed Readings in Public Administration
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9480 UW POL 4305 Administrative Law
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9490 UW POL 4600 Directed Readings
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9500 UW POL 4605 Directed Readings
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9540 UW POL 4515 Inner City Seminar
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9550 UW POL 4320 Strategic Planning in Organizations II
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9570 UW POL 4100 Seminar in Global Politics
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9602 UW POL 7380 Special Topics Seminar in Public Administration
University of Winnipeg Course: Special Topics Seminar in Public Administration.

POLS 9604 UW POL 4385 Special Topics in Public Administration
University of Winnipeg Course: Special Topics in Public Administration.

POLS 9606 UW POL 7385 Special Topics in Public Administration
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9608 UW POL 4121 Special Topics in Global Politics
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

Preventive Dental Science

Preventive Dental Science ,
For information about graduate programs (1) Oral and Maxillofacial Surgery and (2) Periodontics, click on this link: [Dental Diagnostic and Surgical Sciences](#). For information on the graduate programs in Oral Biology, click on [Oral Biology](#).

Preventive Dental Science ,
Preventive Dental Science Program Info,
The department offers a 3-year (minimum 36 months) Master's program in orthodontics, fully accredited by the Commission on Dental Accreditation of Canada. This program provides eligibility to sit the examination of the Royal College of Dentists of Canada (RCDC) and the American Board Exams in Orthodontics (ABO). The program is intended to provide a background in the basic sciences underlying orthodontic treatment and develop a critical, independent, problem-solving approach toward clinical practice.

Graduate orthodontic students have the opportunity to treat approximately 65 new patient starts and a similar number of transfer and retention patients using a wide variety of orthodontic techniques. The strength of the clinical program is a wide range of diversity in instructor philosophies of treatment and the opportunity to learn several techniques such as full fixed modified edgewise type mechanics, sectional

arch mechanics, early treatment philosophies and functional orthopaedics. In addition, a variety of surgical and cleft palate combination orthodontic surgical cases.

Graduate students also are expected to do some limited teaching in the undergraduate orthodontic clinic, present their research at an international congress, submit an article for peer-reviewed publication based on their research and orally defend their research project.

Graduates of the program over the past years have gone on to establish successful practices world-wide in such countries as Canada, U.S.A., Australia, Ireland, Columbia, Taiwan, Finland and the United Arab Emirates, amongst others.

Fields of Research

The current foci of research are in orthodontic biomaterials, adhesivity, anticariogenicity, allergenicity, fluoride release, epidemiology of malocclusion, public health orthodontics, preventive and interceptive orthodontics, clinical research in temporomandibular joint dysfunction, and the biology of tooth movement.

Research Facilities

The graduate orthodontic program offers a state-of-the-art 14 chair clinic with modern computerized diagnostic equipment and an on-site dedicated orthodontic technician. The latest addition to the research facilities is a state-of-the-art Zwick materials testing machine, in addition to the general research laboratories of the Faculty of Dentistry.

M.Sc. in Orthodontics Speciality,
Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

Application deadline

All application materials should be submitted to the Faculty of Graduate Studies by September 1.

Program Requirements

Minimum Program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this calendar. Students must successfully complete all courses offered by the department as well as ANAT 7060, CHSC 7470, RSTD 7150, DDSS 7230. A thesis based on original research and acceptable to the Faculty of Graduate Studies and successful oral defence is also required, as well as submission of a peer-reviewed paper suitable for publication to the satisfaction of the program director.

Clinical Requirements

Students are required to treat approximately 65 new cases, a number of active transfer cases, plus approximately 80 retention cases including cleft palate and combined orthodontic-surgical patients to the satisfaction of the clinical faculty and an external examiner. The minimum full-time requirement to complete the total program is 35 months.

Second Language Reading Requirement: None

Expected Time to Graduate: minimum 36 months

Ph.D. in Preventive Dentistry,
Graduate Studies

There is no Ph.D. Program offered in the Department of Preventive Dentistry.

<http://crscalprod1.cc.umanitoba.ca/PreventiveDentalScience.catx>

Preventive Dental Science Course Descriptions-PDSD 7000 Level

PDSD 7000 Neural Basis of Oropharyngeal Function (Formerly 101.700) A program of problem-oriented seminars on the sensory and reflex mechanisms affecting the respiratory and alimentary functions of the mouth and pharynx, mandibular posture and movement and respective application to oropharyngeal dysfunction and orthodontic therapy. One seminar per week for one term.

PDSD 7020 The Mechanics of Orthodontic Therapy (Formerly 101.702) The mathematics of three dimensional space, force and moment systems are given as the basis for considering the mechanics of orthodontic treatment. The mechanical properties of some orthodontic materials are studied as a background for appliance design. The quantitative aspects of tooth movement are discussed in terms of patient treatment planning. Seminar and laboratory sessions.

PDSD 7030 Biological Basis of Craniofacial Growth and Development (Formerly 101.703) A program of student-based seminars on the biophysical, biochemical and histological basis of growth and development of craniofacial structures.

PDSD 7040 Clinical Craniofacial Growth and Development (Formerly 101.704) A program of student-based seminars on the morphogenesis of craniofacial structures and their significance to clinical problems.

PDSD 7060 Cephalometric Analysis (Formerly 101.706) A seminar program on the application of cephalometric radiography to craniofacial morphological research, orthodontic diagnosis and case analysis.

PDSD 7070 Biology of Orthodontics and Facial Orthopedics (Formerly 101.707) A program of student-based seminars and lectures on the biological basis of orthodontic and facial orthopedic diagnosis and therapeutic technique.

PDSD 7101 Preventive Programs in Pediatric Dentistry This course will be offered during the second year (term III). The prerequisite for this course will be the completion of the required courses in the first year of the program. In clinical terms this course will be taught with the following courses: Management and Restorative Treatment of Pediatric Patients II. Course is evaluated on a pass/fail basis.

PDSD 7102 Hospital Pediatric Dentistry I This course will be offered during the first year (term I and II). The prerequisite for this course will be the dental degree obtained prior to applying to the program. In clinical terms this course will be taught with the following courses: Management and Restorative Treatment of Pediatric Patients I and Special Needs and Emergency care in Pediatric Patients. Course is evaluated on a pass/fail basis.

PDSD 7103 Hospital Pediatric Dentistry II This course will be offered during the first year (term III and IV). The prerequisite for this course will be completion of the required courses in the first year of the program. In clinical terms this course will be taught with the following courses: Management and Restorative Treatment of Pediatric Patients II and Preventive Programs in Pediatric Dentistry. Course is evaluated on a pass/fail basis.

PDSD 7104 Management and Restorative Treatment of Pediatric Patients I This course will be offered during the first year (term I and II). The prerequisite for this course will be the dental degree obtained prior to applying to the program. In clinical terms this course will be taught with the following courses: Hospital Pediatric Dentistry I and Preventive and Community Pediatric Dentistry. Course is

evaluated on a pass/fail basis.

PDSD 7105 Management and Restorative Treatment of Pediatric Patients II

This course will be offered during the second year (term III and IV). The prerequisite for this course will be the completion of the required courses in the first year of the program. In clinical terms this course will be taught with the following courses: Hospital Pediatric Dentistry II and Preventive Programs in Pediatric Dentistry. Course is evaluated on a pass/fail basis.

PDSD 7106 Preventive and Community Pediatric Dentistry

This course will be offered during the first year (term I). The prerequisite for this course will be the dental degree obtained prior to applying to the program. In clinical terms this course will be taught with the following courses: Management and Restorative Treatment of Pediatric Patients I. Course is evaluated on a pass/fail basis.

PDSD 7107 Special Needs and Emergency Care in Pediatric Patients

This course will be offered during the first year (term I). The prerequisite for this course will be the dental degree obtained prior to applying to the program. In clinical terms this course will be taught with the following courses: Management and Restorative Treatment of Pediatric Patients I and Hospital Pediatric Dentistry I. Course is evaluated on a pass/fail basis.

Preventive Dental Science Course Descriptions-RSTD 7000 Level

RSTD 7100 Dental Materials

(Formerly 102.710) This course consists of lecture, seminar and laboratory periods. The student will examine the current literature relevant to the program and will gain experience in the testing procedures used to evaluate dental materials. A project involving the evaluation of a dental material will be required of each student.

RSTD 7150 Orthodontic Materials

(Formerly 102.715) Students will examine in depth through lectures, seminars and research of the current literature, those materials used by orthodontists in their clinical practice. The relationship between materials properties and clinical performance will be emphasized.

Psychology

Psychology .

Psychology Program Info,

Graduate study in the Department of Psychology is offered at both the M.A. and the Ph.D. levels. The primary purpose of the program is to provide training in several specialized areas of psychology for individuals desiring to advance their level of knowledge, their research skills, and their applied capabilities. The M.A. program is designed to provide a broad foundation in the scientific approach to psychology, as well as specialized skills. The Ph.D. program provides a higher degree of specialization coupled with more intensive training in research and application. With their advanced training graduates make careers in a variety of work settings such as self-employment, universities and colleges, government, private for-profit companies, schools, and private not-for-profit organizations.

An on-line brochure entitled Graduate Study in Psychology, which details staff interests, the areas in which students may study, and the offerings and requirements in each area, is available at: <http://umanitoba.ca/psychology>

Fields of Research

Research areas include: Applied Behaviour Analysis, Brain and Cognitive Sciences, Clinical, Developmental, Methodology, School, Social and Personality.

Research Facilities

The department has a variety of research facilities in virtually all areas of psychology. These facilities are housed in over 100 different research rooms that include: A microcomputer laboratory and local area network; a biofeedback laboratory; operating and histological rooms and equipment; animal laboratories for

research with ducks, rats, pigeons, fish, rabbits, mice, and parakeets; one way vision rooms for small group research; closed circuit television systems; a laboratory for studying college teaching; vision laboratories; the Avian Behaviour Laboratory, a field station/laboratory complex to study the behaviour of mallard ducks and Canada geese; the Psychological Services Centre, a training clinic for clinical psychology graduate students, social work students, and psychiatric residents; specialized electronics shop.

M.A. in Psychology,

Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Additional requirements are detailed in the brochure entitled Graduate Study in Psychology, which is available on-line at <http://umanitoba.ca/psychology>

Application Deadline

All applicants should send their applications with complete supporting documentation to the Faculty of Graduate Studies, no later than January 15.

The normal requirement for admission is an Honours B.A. or B.Sc. in Psychology or its equivalent. Students seeking admission with other degrees will usually be required to complete a pre-Master's year to the satisfaction of the department.

Program Requirements

The basic requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Additional requirements are detailed in the brochure entitled Graduate Study in Psychology, which is available on-line at <http://umanitoba.ca/psychology>

Second Language Reading Requirement: Not required

Expected Time to Graduate: Two years

Ph.D. in Psychology,

Admission

Students may be admitted to the doctoral program if they have the equivalent of an M.A. degree in Psychology from the University of Manitoba. Additional requirements are detailed in the brochure entitled Graduate Study in Psychology, which is available on-line at <http://umanitoba.ca/arts/psychology>

Application Deadline

All applicants should send their application with complete supporting documentation to the Faculty of Graduate Studies no later than January 15.

Program Requirements

The basic requirements are those of the Faculty of Graduate Studies. Additional requirements are detailed in the brochure entitled Graduate Study in Psychology. Students in the clinical training program have a more extensive program of study, including clinical practice at the Psychological Service Centre, and must complete an internship year at an accredited training site. A formal candidacy exam is set by the advisory committee. Following successful completion of the candidacy examinations, the student completes a Ph.D. thesis.

Second language requirement: Not required

Expected time to graduation: Non-Clinical Programs, three years; Clinical Program, four years.

M.A. in School Psychology, Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Additional requirements are detailed in the brochure entitled Graduate Study in Psychology, which is available on-line at <http://umanitoba.ca/psychology>

Application Deadline

Psychology Course Descriptions-7000 Level

PSYC 7012 Ethics, History and Profession of School Psychology 1

An overview of the fundamental concepts and issues of professional School Psychology. Ethical, professional, regulatory and legal issues pertaining to the practice of school psychology are examined. Also examined are the history of school psychology and the organization of educational systems. Students may not hold credit for both PSYC 7012 and the former PSYC 7010 (017.701). Prerequisite: permission of instructor.

PSYC 7014 Ethics, History and Profession of School Psychology 2

A continuation of the examination of fundamental concepts and issues of professional School Psychology. Ethical, professional, regulatory and legal issues pertaining to the practice of school psychology are examined. Also examined are the history of school psychology and the organization of educational systems. Students may not hold credit for both PSYC 7014 and the former PSYC 7010 (017.701). Prerequisite: permission of instructor.

PSYC 7022 Psycho-educational Assessment and Measurement 1

Designed to provide students with training in the basic principles of psychological assessment and related measurement concepts, highlighting the process of data-based decision making. Emphasis will be placed on how information from a variety of psycho-educational sources is used to identify profiles for planning intervention programs. Students may not hold credit for both PSYC 7022 and the former PSYC 7020 (017.702). Prerequisite: permission of instructor.

PSYC 7024 Psycho-educational Assessment and Measurement 2

A continuation of training in the basic principles of psychological assessment and related measurement concepts, highlighting the process of data-based decision making. Emphasis will be placed on how information from a variety of psycho-educational sources is used to identify profiles for planning intervention programs. Students may not hold credit for both PSYC 7024 and the former PSYC 7020 (017.702). Prerequisite: permission of instructor.

PSYC 7030 Learning and Cognitive Impairment

(Formerly 017.703) An examination of cognitive and medical disorders that have a direct impact on learning, including disabilities, reading failure, mental retardation, Attention Deficit Hyperactivity Disorder, pervasive development disorders (e.g. autism), fetal alcohol syndrome, and co-occurring conditions. Effective compensatory interventions and social, behavioural and affective consequences will be emphasized.

PSYC 7040 Teaching Strategies, Learning Styles, and Academic Remediation

(Formerly 017.704) Provides an overview of basic theories of learning as applied to effective classroom instruction. Knowledge of individual differences in learning and principles of best practices in classroom instruction will be applied to the development of effective and curriculum adaptations for students with specific academic problems.

PSYC 7050 Junior Practicum in School Psychology

(Formerly 017.705) Supervised practice with school children in a field setting. Emphasis on development of skills in assessing intelligence, academic skills and social-emotional difficulties, and on communication of findings to parents, teachers, and school administrators through written and verbal reports. Pass/Fail course. Prerequisite: permission of instructor.

PSYC 7060 Senior Practicum in School Psychology

(Formerly 017.706) Supervised practice in a school setting. The focus is on development of skills relevant to case conceptualization, intervention, and supervision of junior practicum students. Pass/Fail course. Prerequisites: PSYC 7050 (or 017.705), permission of instructor.

PSYC 7070 Social, Emotional, and Personality Assessment of Children/Youth

(Formerly 017.707) An overview of theory, research, and the educational implications of social, emotional, and personality assessment of children and adolescents. A variety of methods are examined with an emphasis on empirically-supported practices in the assessment of psychopathology and socio-emotional functions. Prerequisite: permission of instructor.

PSYC 7080 Child/Youth Psychopathology

(Formerly 017.708) Examines mental health conditions, covering a range of internalizing and externalizing disorders in children and youth. Biopsychosocial and ecological models, risk and resiliency, and developmental and cultural issues are examined. Structured and semi-structured diagnostic interviews are reviewed.

PSYC 7090 Behavioural Assessment and Intervention in School Settings

(Formerly 017.709) Behavioural management strategies and techniques for children and adolescents who present with serious disruptive and/or emotional and behavioural disorders in schools. A wide range of techniques and strategies are considered. Prerequisite: permission of instructor.

PSYC 7100 Intervention in the Early/Middle Years

(Formerly 017.710) Examines interventions directed at individuals, groups, and families, as well as classroom- and school-based intervention and prevention programs to promote a range of adaptive outcomes and intervene in a range of maladaptive pathways. Prerequisite: PSYC 7080 (or 017.708), permission of instructor.

PSYC 7110 Intervention in Adolescence

(Formerly 017.711) Examines interventions directed at individuals, groups, and families, as well as classroom- and school-based intervention and prevention programs to promote a range of adaptive outcomes and intervene in a range of maladaptive pathways. Prerequisite: PSYC 7080 (or 017.708), permission of instructor.

PSYC 7120 Consultation and Supervision

(Formerly 017.712) An examination of theories and models of school-based consultation and collaboration. Practice with techniques and procedures associated with effective consultation with teachers, school administrators, and parents. Prerequisite: permission of instructor.

PSYC 7130 School Psychology Research Design and Program Evaluation

(Formerly 017.713) Provides students with knowledge and skills needed to

understand, design, and conduct evaluations of intervention programs for individuals experiencing academic or behaviour difficulties in school. Addresses the aims, theories and methods of program evaluation, including relevant research design and statistical methods. Prerequisite: permission of instructor.

PSYC 7140 Clinical Research Design

This course addresses issues of research design relevant to clinical research. Topics include reliability and validity of measurement, correlational, quasi-experimental, and experimental designs, clinical significance, and power analysis. Students complete a research proposal relevant to their thesis interests.

PSYC 7150 Readings in Autism Spectrum Disorders

Students will read recent research in Autism Spectrum Disorders, acquire skills to critically evaluate empirical evidence, and examine implications for practice. Among the topics covered will be assessment, diagnosis, epidemiology, and applied behaviour analysis early intervention. Prerequisite: permission of instructor.

PSYC 7160 Cross-Cultural Social Psychology

Cross-cultural psychology is the critical and comparative study of the linkages between cultural norms and thoughts, feeling and behaviour. This course focuses on Cross-cultural Social Psychology. Therefore, the assigned readings deal with topics that Social Psychology in general examines.

PSYC 7170 Theories of Close Relationships

Students will be exposed to the theories that apply to the initiation, development, maintenance, and dissolution of relationships. The primary focus will be on evolutionary theory, attachment styles, communal and exchange relationships, equity theory, interdependence theory and the investment model, attributional theories, and theories of love.

PSYC 7180 Self-Regulation and Health

This course examines how self-regulatory processes such as goal-setting and self-awareness can affect behaviours that promote or undermine human health. A wide range of health-related behaviours is considered such as smoking, exercise, safe-sex practices, and eating.

PSYC 7190 Social Psychology and Health

This course considers health from a social psychological perspective. Weekly readings and discussion will focus on social cognitive processes and social influence processes that may mediate between stress and illness or may direct people's judgments of their health and choices of health-related behaviours.

PSYC 7192 Psychology of Health and Aging

This course considers how adults adapt to the challenges of aging and the accompanying health problems. Seminar discussions will focus on selected psychological theories and related empirical literature regarding belief systems that operate in the face of health- and age-related challenges. Students may not hold credit for both PSYC 7192 and PSYC 7310 (017.731) with the topic "Health and Aging."

PSYC 7200 Quantitative Methods in Psychology 1

An introduction to descriptive and inferential statistics as it relates to the analysis of psychological data. Topics such as shapes of distributions, measures of central tendency and variability, hypothesis testing, and interval estimation, single and multifactor analyses, classical and robust methods of analysis will be discussed.

PSYC 7210 Quantitative Methods in Psychology 2

Applied statistics for psychologists, with a focus on regression analysis, linear models, and generalized linear models. Emphasis will be placed on the application of statistical methods and computer software in psychological research. Not to be held with the former PSYC 8420 (017.842). Prerequisite: PSYC 7200 or permission of instructor.

PSYC 7220 Autism Practicum 1

Graduate students will be taught to provide applied behavior analysis training for children with autism. Students will be taught many of the skills expected of tutors and senior tutors in the St. Amant Applied Behavior Analysis Program for Children with Autism. Prerequisite: permission of instructor.

PSYC 7230 Autism Practicum 2

Graduate students will learn to supervise tutors and parents providing applied behavior analysis training for children with autism. Students will be taught many of the skills expected of a clinical consultant in the St. Amant Applied Behavior

Analysis Program for Children with Autism. Prerequisite: PSYC 7220 and permission of instructor.

PSYC 7240 Developmental Disabilities Practicum 1

Students will work closely with behavior analysts in the Psychology Department at St. Amant to assess problems, design and execute appropriate interventions, and conduct follow-ups for persons with developmental disabilities. Prerequisite: permission of instructor.

PSYC 7250 Developmental Disabilities Practicum 2

Graduate students will work closely with behavior analysts in the Psychology Department at St. Amant in the provision of applied behavior analysis consultation services for front line staff caring for persons with developmental disabilities. Prerequisite: PSYC 7240 and permission of instructor.

PSYC 7260 Case Conceptualization and Communication 1

In this course students will be exposed to the theory and practice of case conceptualization and communication. Students are required to be present for presentations of clinical cases and participate in discussions of them. Grading is Pass/Fail. Prerequisite: permission of instructor.

PSYC 7270 Case Conceptualization and Communication 2

In this course students will be exposed to the theory and practice of case conceptualization and communication. Students are required to be present for presentations of clinical cases and participate in discussions of them. Grading is Pass/Fail. Prerequisite: permission of instructor.

PSYC 7280 History and Systems of Psychology

A survey of the major contemporary systems of psychology and their history.

PSYC 7290 Psychopathology and Diagnosis

Advanced study of abnormal behaviour, diagnostic approaches, and related research. Not to be held with the former PSYC 7870 (017.787). Prerequisite: permission of instructor.

PSYC 7300 Applied Behavior Analysis in Developmental Disabilities

Students will read recent applied behavior analytic research in behavioral assessments and interventions for people with developmental disabilities, acquire skills to critically evaluate empirical evidence, and examine implications for practice. Students may not hold credit for both PSYC 7300 and PSYC 7310 (017.731) with the topic "Research in Developmental Disabilities." Prerequisite: permission of instructor.

PSYC 7310 Current Topics 1

(Formerly 017.731) An intensive study of the contemporary research and theory in a selected field of psychology. As the course content will vary from year to year, students may take this course more than once for credit.

PSYC 7320 Foundations of Evidence-Based Treatment

This course is designed to provide students with both a knowledge/evidence base for the foundations of psychotherapy and practical skills that will prepare them for more advanced learning via supervised work with clients. Not to be held with the former PSYC 8410 (017.841). Prerequisite: permission of instructor.

PSYC 7330 Cognitive Development

You will gain an advanced understanding of core theories and fundamental issues in cognitive development research. You will also gain an in-depth understanding of a particular cognitive developmental research issue of your choice. Prerequisite: consent of instructor.

PSYC 7340 Sensory Processes 1

(Formerly 017.734) An intensive review of current research and theories in visual processes. Both behavioural and physiological aspects of vision will be considered.

PSYC 7350 Sensory Processes 2

(Formerly 017.735) An intensive review of current theories and research in audition, smell, taste, and the cutaneous senses.

PSYC 7360 Perception

(Formerly 017.736) A survey of theories of perception.

PSYC 7370 Cognitive Processes

(Formerly 017.737) A study of thinking and related areas.

PSYC 7380 Advanced Research Design

(Formerly 017.738) The use of randomized subjects, block, factorial, latin square, and repeated measures designs in psychological research is discussed. Ancillary topics considered are unbalanced designs, multiple linear regression, magnitude estimation and simultaneous inference. Students will also use statistical packages to analyze data from psychological experiments. Prerequisite: PSYC 8420 (or 017.842) or permission of instructor.

PSYC 7390 Scaling

(Formerly 017.739) Methods and theory of scaling. Scaling models and issues in current psychophysical research. Prerequisite: PSYC 8420 (or 017.842) or permission of instructor.

PSYC 7400 Measurement and Scaling Theory

(Formerly 017.740) Discussion of measurement theory, data theory, and scaling models. Prerequisite: PSYC 7390 (017.739) or permission of instructor.

PSYC 7410 Advanced Psychometric Theory

(Formerly 017.741) Current theory and research in psychometrics. Prerequisite: PSYC 7400 (017.740) or permission of instructor.

PSYC 7420 Multivariate Methods in Psychology

(Formerly 017.742) Designing and analyzing behavioural science experiments containing multiple dependent (criterion) and independent (predictor) variables is discussed. The use of statistical packages is illustrated. Prerequisite: PSYC 8420 (or 017.842) or permission of instructor.

PSYC 7430 Advanced Physiological Psychology

(Formerly 017.743) The physiological correlates of sensation, perception, learning, motivation, and complex behaviour.

PSYC 7450 Psychology of Group Behaviour

(Formerly 017.745) An examination of the methodology, results, and interpretations of studies of the structural properties of groups, group formation, leadership, communication, problem-solving, and other group processes.

PSYC 7460 Attitude Development and Change

(Formerly 017.746) A critical review of research involving attitude measurement, with emphasis on the experimental analysis of variables influencing the formation and modification of attitudes.

PSYC 7470 Advanced Developmental Psychology

(Formerly 017.747) Theory and research in contemporary developmental psychology.

PSYC 7480 Advanced Learning

(Formerly 017.748) Current research and literature in selected areas of learning.

PSYC 7500 Bases of Behaviour 1

This course will provide students with broad and general knowledge of theory and research in social/multicultural bases of behaviour, lifespan development, and individual differences (including personality and diversity). Preference will be given to clinical students. If space permits, non-clinical psychology students may enroll. Prerequisite: permission of instructor.

PSYC 7510 Bases of Behaviour 2

This course will provide students with broad and general knowledge of theory and research in biological, and cognitive/affective bases of behaviour, as well as the history and systems of psychology. Preference will be given to clinical students. If space permits, non-clinical psychology students may enroll. Prerequisite: permission of instructor.

PSYC 7520 Ethics and Professional Issues in Clinical Psychology

Study of professional issues in clinical psychology. Historical development and present status of clinical psychology; what defines a profession; ethics codes, standards of practice, and legal requirements; training, internships, and accreditation; professional organizations, registration, and advocacy; employment in public and private sectors. Grading is Pass/Fail. Not to be held with the former PSYC 8070 (017.807). Prerequisite: permission of instructor.

PSYC 7530 Research in Psychopathology

(Formerly 017.753) A survey of the literature and a critical examination of methodological problems arising from studies of psychiatric milieu, psychotherapy, and the epidemiology of mental illness.

PSYC 7540 Theories in Psychotherapy

(Formerly 017.754) An introduction to current approaches to psychotherapy and their underlying theories.

PSYC 7550 Intellectual and Cognitive Assessment

This course will provide clinical students with a thorough overview of key issues and clinical knowledge related to intellectual and cognitive assessment of children and adults. Learning will take place through a combination of lectures, course readings, discussion, group exercises, student presentations, and hands-on practical experience with cognitive tests. Not to be held with the former PSYC 8150 (017.815). This course is normally restricted to students in the clinical psychology program although non-clinical students may enroll with permission of the instructor.

PSYC 7560 Personality and Psychological Assessment

This course will provide clinical students with a thorough overview of key issues and clinical knowledge related to personality and psychological assessment of youth and adults. Learning will take place through a combination of lectures, course readings, discussions, group exercises, student presentations, and hands-on practical experience with personality and psychological tests. Not to be held with the former PSYC 8160 (017.816). This course is normally restricted to students in the clinical psychology program although non-clinical students may enroll with permission of the instructor.

PSYC 7580 Advanced Motivation

(Formerly 017.758) Theory and methodology in contemporary studies of motivation.

PSYC 7590 Instrumentation in Psychology

(Formerly 017.759) Construction and use of psychological laboratory equipment.

PSYC 7610 Psychopharmacology

(Formerly 017.761) The concepts of neuropharmacology as they explicate drug effects on behaviour. Sedatives, stimulants, tranquilizers, anti-depressants, autonomic drugs will be considered. Prerequisite: one course in neuro-anatomy, physiology, or zoology. Some organic chemistry knowledge preferred.

PSYC 7620 Person X Situation Interactionism

We will first explore research demonstrating the impact of personality and situations, separately, on behavior. We will then examine the debate that arose about whether understanding the person or the situation would have the most scientific merit. We spend the remainder (and majority) of the course discussing the theories and research that arose from that debate. The majority of this research has an interactionist perspective, taking both the person and his/her situation into account. Students may not hold credit for both PSYC 7620 and PSYC 7310 (017.731) with the topic "Person X Situation Interactionism."

PSYC 7630 Seminar in Social Psychology

(Formerly 017.763) An examination of current methods, research, and theory in selected topics in the area of experimental social psychology.

PSYC 7640 Seminar in Social Psychology

(Formerly 017.764) An examination of current methods, research, and theory in selected topics in the area of experimental social psychology.

PSYC 7650 Theory and Research in Personality

(Formerly 017.765) A lecture and reading course designed to familiarize the student with the concepts and operations associated with various approaches to the study of individual differences and patterns of difference in behaviour; emphasis is placed on research and that function of theory which generates research.

PSYC 7670 Seminar in Personality 1

(Formerly 017.767) An intensive examination of the current methods and research arising from the classical theories of personality.

PSYC 7680 Seminar in Personality 2

(Formerly 017.768) An examination of individual difference variables suggested by the various personality theories. Particular emphasis will be given to current

research and theory.

PSYC 7700 Problems in Psychological Research (Formerly 017.770) No description available for this course.

PSYC 7710 Problems in Psychological Research (Formerly 017.771) No description available for this course.

PSYC 7720 Problems in Psychological Research (Formerly 017.772) No description available for this course.

PSYC 7730 Problems in Psychological Research (Formerly 017.773) No description available for this course.

PSYC 7740 Problems in Psychological Research (Formerly 017.774) No description available for this course.

PSYC 7750 Problems in Psychological Research (Formerly 017.775) No description available for this course.

PSYC 7760 Problems in Psychological Research (Formerly 017.776) No description available for this course.

PSYC 7770 Problems in Psychological Research (Formerly 017.777) No description available for this course.

PSYC 7780 M.A. Thesis Proposal Development
Students registering for this course will work under the supervision of their advisor to prepare a complete draft of the M.A. Thesis Research Proposal. Students enrolled in a thesis-based M.A. program in Psychology must register for this course in one of their first four (4) terms of full-time study. The course must culminate in submission of a complete draft of the M.A. Thesis Research Proposal to all members of the thesis advisory committee. This course will be graded on a pass/fail basis as determined by majority opinion of the thesis advisory committee.

PSYC 7790 Ph.D. Dissertation Proposal Development
Students registering for this course will work under the supervision of their advisor to prepare a complete draft of the Ph.D. Dissertation Research Proposal. Ph.D. students must register for this course in one of their first eight (8) terms of full-time study. The course must culminate in submission of a complete draft of the Ph.D. Dissertation Research Proposal to all members of the thesis advisory committee. This course will be graded on a pass/fail basis as determined by majority opinion of the thesis advisory committee.

PSYC 7800 Seminar in Quantitative Methods in Psychology 1 (Formerly 017.780) Special topics and recent advances in the design and analysis of behavioural science data will be discussed. Prerequisite: PSYC 7760 (or 017.776) or permission of instructor.

PSYC 7810 Seminar in Quantitative Methods in Psychology 2 (Formerly 017.781) An extension of the material covered in PSYC 7800 (or 017.780) with particular emphasis on quantitative techniques typically employed in such areas as discrimination learning, personality, etc. Prerequisite: PSYC 7760 (or 017.776) or permission of instructor.

PSYC 7880 Seminar in Clinical Problems (Formerly 017.788) Discussion and consideration of current problems associated with clinical service, teaching, research, and administration. Prerequisite: PSYC 7540 (or 017.754).

PSYC 7890 Seminar in Clinical Problems (Formerly 017.789) Discussion and consideration of current problems associated with clinical service, teaching, research, and administration. Prerequisite: PSYC 7540 (or 017.754).

PSYC 7900 Foundations of Health Psychology
For advanced students in psychology seeking specialized expertise in health, this course will review major topics such as the human body, the mind/brain connection, research methods, psychology and health care, terminal illness, pain and chronic disease, stress/coping, and health-related behaviours.

PSYC 7910 Clerkship-Practicum in Clinical Psychology (Formerly 017.791) Supervised practice in a clinical service facility operated by the Graduate Studies

university or approved by the clinical training program. Direct client contact to provide experience in assessment and therapy, based on case conceptualization and supervision by clinical faculty. Enrollment normally restricted to students in Clinical Psychology. Pass/Fail course. Prerequisite: consent of instructor.

PSYC 7920 Clerkship-Practicum in Clinical Psychology (Formerly 017.792) Supervised practice in a clinical service facility operated by the university or approved by the clinical training program. Direct client contact to provide experience in assessment and therapy, based on case conceptualization and supervision by clinical faculty. Enrollment normally restricted to students in Clinical Psychology. Pass/Fail course. Prerequisite: consent of instructor.

PSYC 7930 Clerkship-Practicum in Clinical Psychology (Formerly 017.793) Supervised practice in a clinical service facility operated by the university or approved by the clinical training program. Direct client contact to provide experience in assessment and therapy, based on case conceptualization and supervision by clinical faculty. Enrollment normally restricted to students in Clinical Psychology. Pass/Fail course. Prerequisite: consent of instructor.

PSYC 7940 Clerkship-Practicum in Clinical Psychology (Formerly 017.794) Supervised practice in a clinical service facility operated by the university or approved by the clinical training program. Direct client contact to provide experience in assessment and therapy, based on case conceptualization and supervision by clinical faculty. Enrollment normally restricted to students in Clinical Psychology. Pass/Fail course. Prerequisite: consent of instructor.

PSYC 7950 Clerkship-Practicum in Clinical Psychology (Formerly 017.795) Supervised practice in a clinical service facility operated by the university or approved by the clinical training program. Direct client contact to provide experience in assessment and therapy, based on case conceptualization and supervision by clinical faculty. Enrollment normally restricted to students in Clinical Psychology. Pass/Fail course. Prerequisite: consent of instructor.

PSYC 7952 Clerkship-Practicum in Clinical Psychology
Supervised practice in a clinical service facility operated by the university or approved by the clinical training program. Direct client contact to provide experience in assessment and therapy, based on case conceptualization and supervision by clinical faculty. Enrollment normally restricted to students in Clinical Psychology. Pass/Fail course. Prerequisite: consent of instructor.

PSYC 7954 Clerkship-Practicum in Clinical Psychology
Supervised practice in a clinical service facility operated by the university or approved by the clinical training program. Direct client contact to provide experience in assessment and therapy, based on case conceptualization and supervision by clinical faculty. Enrollment normally restricted to students in Clinical Psychology. Pass/Fail course. Prerequisite: consent of instructor.

PSYC 7956 Clerkship-Practicum in Clinical Psychology
Supervised practice in a clinical service facility operated by the university or approved by the clinical training program. Direct client contact to provide experience in assessment and therapy, based on case conceptualization and supervision by clinical faculty. Enrollment normally restricted to students in Clinical Psychology. Pass/Fail course. Prerequisite: consent of instructor.

PSYC 7970 Internship in Clinical Psychology (Formerly 017.797) Supervised practice in a clinical setting outside the university involving more responsible, more autonomous, and more professional work than is present in either clerkship or practicum. Prerequisite: four terms of PSYC 7910 (or 017.791) - PSYC 7950 (or 017.795).

PSYC 7980 Internship in Clinical Psychology (Formerly 017.798) Supervised practice in a clinical setting outside the university involving more responsible, more autonomous, and more professional work than is present in either clerkship or practicum. Prerequisite: four terms of PSYC 7910 (or 017.791) - PSYC 7950 (or 017.795).

PSYC 7990 The Psychology of Language (Formerly 017.799) Examination of recent advances in the study of human language use. Topics such as memory for meaning, language development and language comprehension will emphasize the interactions between modern cognitive psychology and linguistics.

Psychology Course Descriptions-8000 Level

PSYC 8010 Intergroup Behaviour

(Formerly 017.801) An investigation of intergroup processes, with particular emphasis on intergroup conflicts and the role of leadership in affecting these processes. Large social movements will receive particular attention.

PSYC 8020 Theory and Methods in Social Psychology

(Formerly 017.802) The presentation of a number of broad theoretical overviews in social psychology and an introduction on the graduate level to the particular methodological problems encountered in social psychological research.

PSYC 8030 Organizational Psychology

(Formerly 017.803) Group and individual factors as related to understanding complex organizations.

PSYC 8040 Psychology of Aging

(Formerly 017.804) An intensive review of current research and theory. Biological, psychological, and social aspects of aging are related to each other.

PSYC 8050 Human Brain Functions

(Formerly 017.805) The physiological basis of human cognitive processes is discussed from various perspectives. Different theories and different research strategies are discussed critically.

PSYC 8080 Case Conceptualization and Communication 3

In this course students will learn the theory and practice of case conceptualization and communication. Students will prepare and present clinical cases using well-defined models of treatment and case formulation strategies. Prerequisite: permission of instructor.

PSYC 8090 Clinical Supervision in Psychology

This course will review the major models, ethical issues, and recommended strategies and practices of clinical supervision. Learning modalities will include discussion of readings, role-playing, and supervised supervision of student clinicians. Pass/Fail course. Prerequisite: permission of instructor.

PSYC 8100 Social and Community Intervention

A general introduction to community psychology and community mental health. Historical, conceptual, and philosophical underpinnings of community psychology and community mental health; community assessment and intervention; alternative approaches to contemporary social problems; understanding social policy and the role of the public sector; community research methods. Not to be held with the former PSYC 8170 (017.817). Prerequisite: permission of instructor.

PSYC 8110 Program Evaluation and Consultation

An overview of program evaluation and consultation as major areas of applied psychological practice; analysis of contemporary social and health problems; development, implementation, and evaluation of human service programs; understanding human service organizations; the role of consultant and common types of consultation; ethical issues in program evaluation and consultation. Not to be held with the former PSYC 8180 (017.818). Prerequisite: permission of instructor.

PSYC 8120 Current Topics 2

(Formerly 017.812) An intensive survey of the contemporary research and theory in a selected field of psychology. As the course content will vary from year to year, students may take this course more than once for credit.

PSYC 8130 Principles of Ethology

(Formerly 017.813) A critical examination of the principles and the current research in ethology. The methods used by ethologists to study organisms will be reviewed. Discussion of the behaviour of organisms in zoological parks. An ethogram on an animal of the student's choice located at Assiniboine Park Zoo will be required.

PSYC 8140 Seminar in Ethology

(Formerly 017.814) An intensive examination of the research relating to various topics of ethology. Articles relating to the schools of thought, conflicting viewpoints, synthesis of thought, and present orientation of these topics will be discussed.

PSYC 8200 Development and Its Deviations 1

(Formerly 017.820) Developmental deviations will be related to such factors as genetic influences, physiological development, early experiences, language, Graduate Studies

intellectual and mental abilities, social and ethnic influences, parent-child interactions, and peer group interactions. Methods of special treatment will be considered.

PSYC 8210 Development and Its Deviations 2

(Formerly 017.821) A continuation of PSYC 8200 (or 017.820). It will focus on developmental processes during later childhood and adolescence emphasizing concurrently the range and significance of deviations from normal behaviour and conditions contributing to these problems. Methods of special treatment will also be considered. Prerequisite: PSYC 8200 (or 017.820).

PSYC 8220 Topics in Abnormal Psychology

(Formerly 017.822) An in-depth study of various areas in the field of psychopathology.

PSYC 8230 Clinical Neuropsychology

(Formerly 017.823) The understanding and evaluation of cognitive, sensory, and motor functions as they relate to cerebral dysfunction.

PSYC 8240 Seminar in Behaviour Modification

(Formerly 017.824) This seminar deals with a variety of specific topics in behaviour modification.

PSYC 8250 Practical Applications of Behaviour Modification

(Formerly 017.825) This course deals with the design, implementation, and evaluation of program packages, based on behaviour modification, to different population and problem areas.

PSYC 8260 Individual Organism Research Methodology

(Formerly 017.826) An extensive coverage of the methods by which behaviour can be studied in individual organisms, including the rationale for the use of such methods as opposed to methods involving the averaging of group data.

PSYC 8270 Seminar in Basic Operant Research

(Formerly 017.827) This seminar deals with selected topics in basic operant research.

PSYC 8280 Supervised Field Study in Behaviour Modification 1

(Formerly 017.828) Supervised training will take place in a service facility typically located off the University campus. Students will work closely with a supervisor in assessing a problem, designing and executing an intervention program and conducting a followup. Prerequisite: permission of the instructor.

PSYC 8290 Supervised Field Study in Behaviour Modification 2

(Formerly 017.829) Supervised training will take place in a service facility typically located off the University campus. Students will work closely with a supervisor in assessing a problem, designing and executing an appropriate intervention program and conducting a follow up. Prerequisite: permission of the instructor.

PSYC 8300 Behavioural Assessment

(Formerly 017.830) This course teaches students how to conduct behavioural assessment as a necessary feature of the three interrelated processes of problem identification, program design and outcome evaluation in the application of behaviour modification techniques. Prerequisite: permission of the instructor.

PSYC 8330 Family Therapy Seminar

(Formerly 017.833) This course deals with both family theory and practice by reviewing the current literature on family systems and providing case discussions, peer supervision and small group simulated tasks. Corequisite: current enrollment in PSYC 7910 (or 017.791) - PSYC 7950 (or 017.795) or GRAD 7030 (or 069.703) or permission of the instructor.

PSYC 8340 Cognitive Behaviour Modification

(Formerly 017.834) An overview of the empirical and theoretical status of cognitive events and their role in behaviour change will be undertaken. The techniques of cognitive behaviour modification as applied to various problem behaviours will be surveyed and evaluated. Prerequisite: written consent of the instructor.

PSYC 8360 Research Methods in Developmental Psychology

(Formerly 017.836) A survey of concepts, strategies, and methods in the study of behavioural development, with emphasis on the problems encountered in the measurement of age-related change in humans.

PSYC 8370 Logic of Research Design

(Formerly 017.837) A survey of nonstatistical issues in research design, focusing on precise formulation of research questions and implication for research design. Design problems from various psychological areas are solved by students in the laboratory the purpose being to strengthen critical ability and to identify commonalities across areas in methodological approach. Broader philosophical issues relevant to research design, such as the meaning of causality, are also addressed. Prerequisite: PSYC 8420 (or 017.842) or permission of instructor.

PSYC 8380 History and Theory in Developmental Psychology

(Formerly 017.838) A history of fundamental concepts in developmental psychology with consideration of important philosophical, theoretical, and empirical influences on the contemporary field.

PSYC 8400 Behaviour Therapy

(Formerly 017.840) The theory and practice of utilizing learning principles in behaviour change will be explained and exemplified. Goals of the class are for students to recognize that behaviour therapy is dynamic and to learn the mechanics of including behaviour therapy in work with patients. Students may not hold credit for PSYC 8400 (or 017.840) and the former 017.782, 017.783 and 017.784.

Public Administration

Public Administration ,

Public Administration Program Info,

This master's program is offered jointly by the [Department of Political Studies](#) of the University of Manitoba and the [Department of Politics](#) at the University of Winnipeg. Unless otherwise specified by particular agreements attached to its own creation, it is governed by the general procedures and regulations devised by the two universities for joint master's programs.

The objective of the program is to provide students, both full and part-time, with a sound knowledge of public administration. The approach is interdisciplinary; although courses in Politics/Political Studies are emphasized. The core exposes all students to a common set of courses designed to encourage both innovative and integrative perspectives. The public administration emphasis allows those interested students to obtain knowledge of both the theory and the practice of government organizations, including knowledge of the political, economic, social and other contexts in which they operate.

MPA-MBA stream:

Jointly offered by the Department of Political Studies and the [Asper School of Business](#), this MPA-MBA 12 credit-hour specialization in Business-Government Relations provides participating MPA and MBA students reciprocal opportunities to understand each others management environments, and to develop joint understandings such as how to maximize business-government cooperation and synergies. In addition to their own program requirements, students enrolled in the stream take 9 c.h. of courses in the other discipline as well as a capstone 3 c.h. course in Business-Government Relations. (limited space)

MPA Defence Administration stream:

A specialized stream offered to MPA students who are members of the Canadian Forces who are enrolled in, or who have completed, the [Aerospace Systems Course](#) (ASC) through the Canadian Forces School of Aerospace Studies (CFSAS) at 17 Wing Winnipeg. Successful completion of the ASC program reduces the MPA degree requirement to 24 c.h. In addition to the core requirements of the MPA degree, Defence Administration stream students take 6 c.h. of specially designed courses in the field of defence administration.

Master of Public Administration ,
Admission

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar, applicants for admission to the program must be one of the following:

Persons holding a recognized three-or four-year General or Advanced Bachelors degree (B.A., B.Sc., B.E.S., etc.)

or

Persons holding a recognized four-year honours Bachelor's degree (or equivalent)

or

Persons who do not hold an undergraduate degree, but have attained positions of marked responsibility in either public or private sector management, and who have a demonstrated record of outstanding performance in their career. Admissions in this category will normally be restricted to one or two students per academic year.

It is preferred, but not required, that applicants have some formal course background in public administration, political science or economics. Students from other disciplines are also encouraged to apply.

Application Deadline

Department deadline for applications for Regular Session is January 15

Contact the department for additional application procedures.

Program Requirements

Two-Year MPA Program

Students who are admitted as graduates of a general bachelor's degree program or who are admitted as exceptional candidates not holding an undergraduate degree are required to satisfactorily complete an academic program consisting of a minimum of 48 credit hours. Within the 48 credit hours, 27 hours of credit must be taken from among the Core Courses and a further 21 hours of credit from among the approved options. All students must complete up to 18 hours of credit at the 700/7000 level, including the 700/7000 level core courses. A student may elect, with permission, to write a Master's thesis in lieu of 12 credit hours of 700/7000 level option coursework.

One-Year MPA Program

Students who are admitted as graduates of an Honours bachelor's degree (or equivalent) are required to satisfactorily complete an academic program consisting of a minimum of 24 credit hours. Students who, prior to admission, have not completed 24 credit hours in courses equivalent to those designated as 400/4000 level Core Courses, or have not completed appropriate option course equivalents, will normally be required to complete the appropriate course(s) in addition to the 24 credit hour program minimum. All students must complete up to 18 hours of credit at the 700/ 7000 level, including the 700/7000 level core courses. A student may elect, with permission, to write a Master's thesis in lieu of 12 credit hours of 700/7000 level option course work.

Co-op Education Option in Public Administration

The Co-operative Education Option in the Master of Public Administration program combines full-time academic study with the benefits of practical work experience, largely in the public sector. A full-time student who has completed one academic year in good academic standing will be eligible to engage in full-time employment. The program requires the successful completion of two work-terms of 13 weeks each. The work terms provide students with practical experience, enriched knowledge in an area of policy specialization, industry-standard remuneration, and guidance in career choices.

Students engaged in full-time study in the M.P.A. program are eligible to apply for the full-time co-operative education option on satisfactory completion of their first year of full-time M.P.A. studies (24 credit hours). The co-op option consists of two

13-week work terms which can be taken consecutively or separately. Each work term carries three hours of course credit and each must be satisfactorily completed as part of the co-op option. Co-op credits do not replace academic credits, thus students in the two-year M.P.A. program with a co-op option must therefore complete a minimum of 54 credit hours as part of their degree requirements. Students in the one-year M.P.A. program with a co-op option must complete a minimum of 30 credit hours as part of their degree requirements. Students intending to apply for the M.P.A. co-op option should read the detailed option description below.

Application and Eligibility

Application for the Co-operative Education Option in the Master of Public Administration (M.P.A.) program is part of the normal application process for the M.P.A. program as a whole. The Co-operative Education Option is restricted to those who apply for full-time study in the M.P.A. Students who are accepted into the M.P.A. with a co-operative option must, in their first academic year, successfully complete required non-credit courses in addition to their full-time academic course load.

Work Terms and Continuance

On entry to the M.P.A. program, applicants accepted for the co-op option must arrange their program with the director of co-operative education in the MPA program and take part in a competitive job-matching process conducted in an Employers' Forum. Students who are eligible for co-op, but who are not matched with a co-op work term, will be able to continue in the regular M.P.A. program. Co-op students who have successfully completed one full academic year of coursework, and the required non-credit courses, and who have satisfied the M.P.A. requirements for continuation in the program, will be eligible to engage in their first work term placement. They must also complete relevant workshops, etc. to maintain co-op eligibility.

Each work term is 13 weeks duration and each work term carries three hours of course credit for which registration is required. Co-op students are considered to have full-time student status while engaged in a work term placement. Co-op students must successfully complete two work terms in addition to their academic program. Work terms are evaluated in terms for job performance and assigned written work (project or practicum). The final grade for each work term will employ the GPA scale which is used by the M.P.A. program. The course and grade requirements (B average overall and no course less than C+) for the co-operative education option are those which govern the M.P.A. program as a whole. If a co-op student fails to maintain these requirements, s/he will be permitted one make-up work term attempt. If a student fails to meet the requirements on the make-up attempt, s/he will be required to withdraw from the M.P.A. program.

Ph.D. in Public Admin,
Public Administration does not offer a Ph.D. Program.

Public Administration Course Descriptions- ECON 3000 Level

ECON 3170 Introduction to Quantitative Methods in Economics (Formerly 018.317) Quantification of economic models; organization and presentation of economic data; probability; statistical estimation and testing of hypotheses with economic applications; simple regression. Prerequisite: [a grade of "C" or better in six credit hours of 1000 level Economics] or written consent of instructor.

ECON 3180 Introduction to Econometrics (Formerly 018.318) The application of statistical tools, especially regression analysis for estimating economic relationship and testing economic hypotheses. Also offered as ABIZ 3080 by Agricultural Economics. May not be held with ABIZ 3080 (061.308). Prerequisite: [a grade of "C" or better in ECON 3170 (018.317)] or Graduate Studies

[a grade of "C" or better in each of STAT 2000 (005.200) and six credit hours of 1000 level economics].

ECON 3300 Canadian Economic History (Formerly 018.330) A study of Canada's economic growth with emphasis on the influence of Europe and the United States. Students may not hold credit for both ECON 3300 (018.330) and ECON 3301 (018.330). Prerequisite: none.

ECON 3301 Histoire économique du Canada (L'ancien 018.330) Étude de la croissance économique du Canada en soulignant l'influence de l'Europe et des États-Unis. L'étudiant(e) ne peut se faire créditer à la fois le ECON 3301 (018.330) et le ECON 3300 (018.330). Préalable: aucun. Donné au Collège universitaire de Saint-Boniface.

ECON 3362 Labour Economics 1 An introduction to labour economics, including labour supply, labour demand and the determination of wages and employment. Students may not hold credit for both ECON 3362 and the former ECON 3360 (018.336). Prerequisite: a grade of "C" or better in ECON 2450 (018.245) or ECON 2451 (018.245) or ECON 2700 (018.270).

ECON 3364 Labour Economics 2 Analysis of topics in labour economics such as unemployment, immigration, gender discrimination and the impact of unions. Students may not hold credit for both ECON 3364 and the former ECON 3360 (018.366). Prerequisite: a grade of "C" or better in ECON 3362.

ECON 3374 Public Expenditure Analysis and Policy Evaluation The study of the role of government in the economy, government budget and expenditure evaluation issues, benefit-cost analysis, as well as government intervention regulation, public pricing, and ownership issues. Students may not hold credit for both ECON 3374 and the former ECON 3370 (018.337). Prerequisite: a grade of "C" or better in ECON 2450 (018.245) or ECON 2451 (018.245) or ECON 2700 (018.270).

ECON 3376 Taxation, Tax Policy and Inter-government Public Finance Issues A study of the principles of taxation, tax policy in Canada and elsewhere, government deficit and debt issues and fiscal federalism with emphasis on inter-governmental finance issues. Students may not hold credit for both ECON 3376 and the former ECON 3370 (018.337). Prerequisite: a grade of "C" or better in ECON 2450 (018.245) or ECON 2451 (018.245) or ECON 2700 (018.270).

ECON 3392 An Introduction to Development Economics The definition and major challenges of development and an introduction to theories of growth and development. Students may not hold credit for both ECON 3392 and the former ECON 3390 (018.339). Prerequisite: [a grade of "C" or better in ECON 2450 (018.245) or ECON 2451 (018.245) or ECON 2700 (018.270)] and [a grade of "C" or better in ECON 2470 (018.247) or ECON 2471 (018.247) or ECON 2800 (018.280)] or written consent of instructor.

ECON 3394 Development Economics: Problems and Policies Processes and problems of development policies to accelerate change. Economic relations between developed and developing regions. Students may not hold credit for both ECON 3394 and the former ECON 3390 (018.339). Prerequisite: [a grade of "C" or better in ECON 2450 (018.245) or ECON 2451 (018.245) or ECON 2700 (018.270)] and [a grade of "C" or better in ECON 2470 (018.247) or ECON 2471 (018.247) or ECON 2800 (018.280)] and [a grade of "C" or better in ECON 3392 or ECON 2630 (018.263)] or written consent of instructor.

ECON 3510 Industrial Relations (Formerly 018.351) A study of comparative employer-employee relationships in Canada and other selected countries as affected by market forces, social traditions, and government action. Students may not hold credit for both ECON 3510 (018.351) and LABR 3510 (153.351). Prerequisite: [a grade of "C" or better in six credit hours of 1000 level Economics] or [a grade of "C" or better in both LABR 1260 (the former LABR 1270 or 153.127) and LABR 1290 (153.129)].

ECON 3610 Special Studies (Formerly 018.361) This reading course will vary from year to year depending on the needs of students and the interests of instructors. Prerequisite: written consent of instructor. As the course content will vary from year to year, students may take this course more than once for credit.

ECON 3620 Special Studies

(Formerly 018.362) This reading course will vary from year to year depending on the needs of students and the interests of instructors. Prerequisite: written consent of instructor. As the course content will vary from year to year, students may take this course more than once for credit.

ECON 3640 Economics of the Financial System

(Formerly 018.364) Flows of funds through the financial system; savings and investment and asset choices of households and firms; intermediation by financial institutions; arbitrage between and within countries, government financial policy, with special reference to Canada. Students may not hold credit for ECON 3640 (018.364) and any of: ECON 3641 (018.364) or FIN 3460 (009.346). Prerequisite: a grade of "C" or better in one of: ECON 2450 (018.245) or ECON 2451 (018.245) or ECON 2460 (018.246) or ECON 2461 (018.246) or ECON 2700 (018.270) or ECON 3700 (018.370).

ECON 3641 L'économie et le système financier

(L'ancien 018.364) Les flux des fonds prêtables et le système financier. L'épargne et l'investissement: l'offre et la demande d'actifs financiers des ménages et des entreprises. Théorie bancaire et intermédiaires financiers. L'arbitrage parmi les marchés financiers et les pays; politiques gouvernementales avec attention particulière au contexte canadien. L'étudiant(e) qui détient le crédits du ECON 3641 (018.364) ne peut se faire créditer aucun des cours ECON 3640 (018.364) ou FIN 3460 (009.346). Préalable: une note minimale de C dans un des cours suivants: ECON 2450 (018.245) ou ECON 2451 (018.245) ou ECON 2460 (018.246) ou ECON 2461 (018.246) ou ECON 2700 (018.270) ou ECON 3700 (018.370). Donné au Collège universitaire de Saint-Boniface.

ECON 3650 Monetary Macroeconomics and Policy

(Formerly 018.365) Demand for and supply of money; term structure of interest rates; tools of central banking; design and conduct of monetary policy. Students may not hold credit for both ECON 3650 (018.365) and ECON 3651 (018.365). Prerequisite: a grade of "C" or better in one of: ECON 2470 (018.247) or ECON 2471 (018.247) or ECON 2480 (018.248) or ECON 2481 (018.248) or ECON 2800 (018.280) or ECON 3800 (018.380).

ECON 3651 Théorie et politique monétaires

(L'ancien 018.365) La demande et l'offre de monnaie. La structure des taux d'intérêts. Les outils de la politique monétaire. La gestion monétaire par la banque centrale et le gouvernement. L'étudiant(e) ne peut se faire créditer à la fois le ECON 3651 (018.365) et le ECON 3650 (018.365). Préalables: une note minimale de C dans un des suivants: ECON 2470 (018.247) ou ECON 2471 (018.247) ou ECON 2480 (018.248) ou ECON 2481 (018.248) ou ECON 2800 (018.280) ou ECON 3800 (018.380). Donné au Collège universitaire de Saint-Boniface.

ECON 3660 Economic Ideas and Social Institutions

(Formerly 018.366) A study of the nature and development of economic ideas: how they influence and are influenced by changing material and intellectual conditions and how they interact with evolving institutions in society. Students may not hold credit for both ECON 3660 (018.366) and ECON 3661 (018.366). Prerequisite: [a grade of "C" or better in six credit hours of 1000 level Economics] or written consent of instructor.

ECON 3661 La pensée économique et les institutions sociales

(L'ancien 018.366) L'évolution de la pensée économique dans son interaction avec l'évolution des institutions sociales et les conditions matérielles et intellectuelles des diverses époques. L'étudiant(e) ne peut se faire créditer à la fois le ECON 3661 (018.366) et le ECON 3660 (018.366). Préalable: [une note minimale de C dans six heures-crédits au niveau 1000 en sciences économiques] ou autorisation écrite du professeur. Donné au Collège universitaire de Saint-Boniface.

ECON 3670 International Trade

(Formerly 018.367) A study of the theory of international trade and modern trade issues including the effect of economic integration on growth, distribution, national policy and the environment. Prerequisite: a grade of "C" or better in one of: ECON 2450 (018.245) or ECON 2451 (018.245) or ECON 2700 (018.270). ECON 2460 (018.246) or ECON 2461 (018.246) is recommended.

ECON 3680 International Finance

(Formerly 018.368) A study of the theory of international financial markets and issues in open economy macroeconomics focusing on the balance of payments, exchange rates and the effects of international financial integration on national economies. Prerequisite: a grade of "C" or better in one of: ECON 2470 (018.247) or

ECON 2471 (018.247) or ECON 2800 (018.280). ECON 2480 (018.248) or ECON 2481 (018.248) is recommended.

ECON 3690 Economic Issues of Health Policy

(Formerly 018.369) The structure, functioning and financing of the Canadian health care delivery system and the demand for health care in Canada. Prerequisite: a grade of "C" or better in six credit hours of 1000 level Economics.

ECON 3700 Microeconomic Analysis 2

(Formerly 018.370) An intensive study of the principles and techniques of microeconomic analysis including consumer theory, theory of the firm, market structures, factor markets and externalities. Students may not hold credit for ECON 3700 (018.370) and any of: ECON 2450 (018.245) or ECON 2451 (018.245) or ECON 2460 (018.246) or ECON 2461 (018.246). Prerequisite: written consent of department head.

ECON 3710 Sustainable Development: Issues and Policy

(Formerly 018.371) An examination of the theory and practice of economic sustainability, ecological sustainability, and social sustainability, with emphasis on analysing current issues and designing policies to achieve sustainable development. Prerequisite: a grade of "C" or better in six credit hours of 1000 level Economics.

ECON 3720 Urban and Regional Economics and Policies

(Formerly 018.372) An introduction to the study of the determinants of the spatial distribution of economic activity among urban centres and regions. Particular attention will be paid to such contemporary Canadian problems as regional disparities, urban and environmental decay, and urban renewal, and the policy issues involved in dealing with these problems. Prerequisite: a grade of "C" or better in ECON 2450 (018.245) or ECON 2451 (018.245) or ECON 2700 (018.270).

ECON 3730 Topics in Mathematical Economics

(Formerly 018.373) Mathematical methods used in economic analysis. Topics will vary from year to year depending on the interests of instructors and students. Prerequisite: [a grade of "C" or better in ECON 2530 (018.253)] or written consent of instructor.

ECON 3742 Industrial Organization and Firm Strategy

Market structure and firms' strategic decisions will be analyzed. Topics may cover monopoly pricing strategies such as price discrimination; non-pricing strategies such as advertising, quality decisions and differentiated products; dynamic oligopoly models; mergers; anti-competitive behaviour; and auctions. This course assumes students have a sound background in economic theory, as well as single-variable calculus and basic statistics. Students may not hold credit for both ECON 3742 and the former ECON 3740 (018.374). Prerequisite: [a grade of "C" or better in ECON 2450 (018.245) or ECON 2451 (018.245) or ECON 2700 (018.270)] or consent of the instructor.

ECON 3800 Macroeconomic Analysis 2

(Formerly 018.380) An intensive study of the mainstream approaches to explaining output and inflation, including their mathematical structure and empirical implications. Students may not hold credit for ECON 3800 (018.380) and any of: ECON 2470 (018.247) or ECON 2471 (018.247) or ECON 2480 (018.248) or ECON 2481 (018.248). Prerequisite: written consent of department head.

ECON 3810 Alternative Approaches to Macroeconomic Analysis

(Formerly 018.381) A survey of Post-Keynesian, Cambridge, Marxian, and institutionalist approaches to macroeconomic fluctuations, contrasting their theoretical and policy frameworks with those of mainstream macroeconomics. Prerequisite: written consent of department head.

Public Administration Course Descriptions-POLS 3000 Level

POLS 3100 Gender and Politics in Canada

(Formerly 019.310) This course introduces the principal themes in the study of gender and politics in Canada. Topics may include women's political organizing and activism, representation in political institutions, the gendered division of labour in the private and public spheres, gender and public policy, and the gendered nature of political behaviour. Prerequisite: [a grade of "C" or better in POLS 2070 (019.207) or POLS 2071 (019.207)] or written consent of instructor or department head.

POLS 3140 Selected Topics in Politics 1

(Formerly 019.314) The content of this course will vary. Contact the department for a course description. Prerequisite: written consent of instructor or department head.

As the course content will vary from year to year, students may take this course more than once for credit.

POLS 3141 Sujets particuliers en politique 1

(L'ancien 019.314) Le contenu du cours variera. Contacter le secteur pour une description de cours. Préalable: consentement écrit du professeur ou chef de département. Le contenu variera d'année en année alors l'étudiant(e) peut se faire créditer ce cours plus d'une fois. Donné au Collège universitaire de Saint-Boniface.

POLS 3150 Selected Topics in Politics 2

(Formerly 019.315) The content of this course will vary. Contact department for a course description. Prerequisite: written consent of instructor or department head. As the course content will vary from year to year, students may take this course more than once for credit.

POLS 3151 Sujets particuliers en politique 2

(L'ancien 019.315) Le contenu du cours variera. Contacter le secteur pour une description de cours. Préalable: consentement écrit du professeur ou chef de département. Le contenu variera d'année en année alors l'étudiant(e) peut se faire créditer ce cours plus d'une fois. Donné au Collège universitaire de Saint-Boniface.

POLS 3160 Human Rights and Civil Liberties

(Formerly 019.316) An examination of the foundations of modern human rights systems in liberal democracies. Topics addressed include the main philosophical arguments on human rights, dominant legal theories of rights, and international conventions and systems of human rights protection. Prerequisite: [a grade of "C" or better in one of: POLS 2510 (019.251) or POLS 2511 (019.251)] or written consent of instructor or department head.

POLS 3170 The Canadian Charter of Rights and Freedoms

(Formerly 019.317) A systematic examination of the rights and freedoms contained in the Charter through Supreme Court decisions. Additional topics addressed include the historical, political and intellectual sources of rights protection in Canada and a review of Canadian human rights legislation. Prerequisite: [a grade of "C" or better in one of: POLS 2070 (019.207) or POLS 2071 (019.207)] or written consent of instructor or department head.

POLS 3200 International Security and Conflict Management

(Formerly 019.320) A study of contemporary world conflict, conflict management, and issues of global security. Prerequisite: [a grade of "C" or better in POLS 2040 (019.204) or POLS 2041 (019.204)] or written consent of instructor or department head.

POLS 3220 Globalization and the World Economy

(Formerly 019.322) An exploration of issues relating to globalization, including regionalism, economic structures and regimes, multinational corporations, global debt, problems in the developing world, and the future for leadership in the international system. Prerequisite: [a grade of "C" or better in POLS 2040 (019.204) or POLS 2041 (019.204)] or written consent of instructor or department head.

POLS 3240 Feminist Political Theory

(Formerly 019.324) An examination of feminist approaches to the status and participation of women in political life. The course also includes feminist discourse on ethical issues and state policy.

POLS 3250 International Political Economy

(Formerly 019.325) A survey of the relationship between political authority and the production and distribution of global wealth. Emphasis is placed on the historical development of international political economy, its fundamentals, as well as major theoretical perspectives. Students may not hold credit for both POLS 3250 (019.325) and POLS 3251 (019.325). Prerequisite: [a grade of "C" or better in POLS 2040 (019.204) or POLS 2041 (019.204)] or written consent of instructor or department head.

POLS 3251 Économie politique internationale

Le cours examine les interrelations entre processus politiques, production et distribution de la richesse dans l'environnement international. L'accent est mis autant sur le développement historique, les perspectives théoriques majeures que sur les enjeux fondamentaux en économie politique internationale. L'étudiant(e) qui détient les crédits du POLS 3251 ne peut se faire créditer aucun des cours POLS 3250 (019.325) ou l'ancien 019.383. Préalable: [une note minimale de C dans un des cours suivants: POLS 2040 (019.204) ou POLS 2041 (019.204) ou l'ancien 019.153] ou le consentement écrit de l'enseignant ou du chef de département. Donné au Collège

universitaire de Saint-Boniface.

POLS 3330 Politics of the European Union

A study of the creation and evolution of the "European movement" which began after World War II as well as the various stages of European integration to the present day. Topics include institutional development; economic, monetary, and political union; and the global relations of the modern EU. Students may not hold credit for both POLS 3330 and the former POLS 2430 (019.243). Prerequisite: [a grade of "C" or better in one of: POLS 2000 (019.200) or POLS 2040 (019.204) or POLS 2041 (019.204)] or written consent of instructor or department head.

POLS 3340 Middle East Politics

An examination of the Middle East as a region of global strategic significance, with an emphasis on the major issues related to war and peace in selected Middle Eastern conflicts. Students may not hold credit for both POLS 3340 and POLS 3140 (019.314) when offered with the topic "Arab Israeli Conflict."

POLS 3470 Canadian Public Management

An introduction to the internal and external factors affecting contemporary public sector management in Canada. The course will examine the primary values, policies, processes, and structures within the civil service. Prerequisite: [a grade of "C" or better in one of: POLS 2070 (019.207) or POLS 2071 (019.207) or POLS 2571 (019.257) or the former POLS 2570 (019.257)] or written consent of instructor or department head.

POLS 3510 Political Doctrines of the Twentieth Century

(Formerly 019.351) A survey of major contemporary systems of ideas which seek to explain or justify political behaviour.

POLS 3520 Canadian Foreign and Defence Policy

(Formerly 019.352) An examination of Canadian foreign and defence policy, with attention to contemporary events and issues. The course is designed to examine both foreign and defence policies as interdependent issues for Canadian interests. The course will assess the evolution and changing priorities of Canadian foreign and defence issues, with particular attention to Canada's relations with the United States, Europe, Asia and the Third World. Students may not hold credit for both POLS 3520 (019.352) and POLS 3561 (019.356). Prerequisite: [a grade of "C" or better in POLS 2040 (019.204) or POLS 2041 (019.204)] or written consent of instructor or department head.

POLS 3561 Politique étrangère canadienne

(L'ancien 019.356) Une analyse de la tradition canadienne en politique étrangère, le développement de la politique étrangère pendant la Guerre Froide et les perspectives pour l'avenir en ce qui a trait à l'Alliance Atlantique, les Etats-Unis et le Tiers-Monde. L'étudiant(e) qui détient les crédits du POLS 3561 (019.356) ne peut se faire créditer aucun des cours POLS 3520 (019.352) ou l'ancien 019.368. Préalable: [une note minimale de C dans un des cours suivants: POLS 1500 (019.150) ou POLS 1501 (019.150)] ou l'autorisation écrite du professeur. Donné au Collège universitaire de Saint-Boniface.

POLS 3570 Administrative Theory in the Public Sector

A study of the fundamental principles with which to understand human behaviour inside public organizations. The course addresses a diverse but comprehensive set of historical and current theories, concepts and approaches in the field of public administration. Prerequisite: [a grade of "C" or better in one of: POLS 2000 (019.200) or POLS 2070 (019.207) or POLS 2571 (019.257) or POLS 3470 or the former POLS 2570 (019.257)] or written consent of instructor or department head.

POLS 3600 Political Concepts

(Formerly 019.360) An exposition and analysis of the role and meaning of terms central to political discourse. Among concepts to be studied are power, community, justice, freedom, equality and obligation. Prerequisite: [a grade of "C" or better in POLS 2510 (019.251) or POLS 2511 (019.251)] or written consent of instructor or department head.

POLS 3640 Comparative Defence Policy

(Formerly 019.364) The examination within a comparative framework of the factors determining the making and implementation of the defence policies of a number of representative and significant countries. Prerequisite: [a grade of "C" or better in POLS 2040 (019.204) or POLS 2041 (019.204)] or written consent of instructor or department head.

POLS 3670 Canadian Political Parties

(Formerly 019.367) This course provides students with an understanding of the origins, evolution, operation and programmes of Canadian political parties. Topics addressed include party types, party systems, party organization and financing, electoral activities and party leadership. Prerequisite: [a grade of "C" or better in one of: POLS 2070 (019.207) or POLS 2071 (019.207)] or written consent of instructor or department head.

POLS 3710 Distributive Justice

A study of the question of whether, and to what extent, inequalities of various kinds are compatible with the demands of both justice and community. This course examines contending answers to the question by investigating classical and/or contemporary theories of distributive justice. Prerequisite: a grade of "C" or better in POLS 2510 (019.251) or POLS 2511 (019.251).

POLS 3720 Politics, Government and Society in Ukraine

An analysis of political transition and development in Ukraine. Ukraine's international relations will also be examined. Students may not hold credit for both POLS 3720 and POLS 3140 (019.314) when offered with the topic "Government Politics in Ukraine" or the former POLS 2920 (019.292). Prerequisite: [a grade of "C" or better in one of: POLS 2000 (019.200) or POLS 2040 (019.204) or POLS 2041 (019.204)] or written consent of instructor or department head.

POLS 3810 Introduction to Marxism

An overview of the thought of Karl Marx and Fredrick Engels, focusing on its philosophical origins, key concepts and ideas of their historical materialism, critique of political economy, political theory and philosophy. The development of Marxism after Marx and Engels, particularly in the tradition of Western Marxism, will be traced in the case of each concept and idea. Students may not hold credit for both POLS 3810 and the former POLS 4810 (019.481).

POLS 3840 Approaches to the Study of International Relations

(Formerly 019.384) An overview of the various competing theoretical approaches used in the analysis of international relations, as well as the methodologies used by international politics analysts. Students may not hold credit for both POLS 3840 (019.384) and POLS 3841. Prerequisite: [a grade of "C" or better in POLS 2040 (019.204) or POLS 2041 (019.204)] or written consent of instructor or department head.

POLS 3841 Les approches théoriques en relations internationales

Études des différentes approches théoriques utilisées dans l'analyse des relations internationales, ainsi que les méthodologies utilisées par les analystes de la politique internationale. L'étudiant(e) ne peut se faire créditer à la fois le POLS 3841 et le POLS 3840 (019.384). Préalable: [une note minimale de C dans un des cours suivants: POLS 2040 (019.204) ou POLS 2041 (019.204) ou l'ancien 019.153] ou le consentement écrit de l'enseignant ou du chef de département. Donné au Collège universitaire de Saint-Boniface.

POLS 3860 Canadian Federalism

(Formerly 019.386) An examination of Canadian federal structures and processes with emphasis on constitutional influences, the evolution of jurisdictions, province-building and contemporary federal issues.

POLS 3880 Comparative Foreign Policy

(Formerly 019.388) A comparative study of the factors affecting foreign policy in selected countries including, but not limited to, Canada, the United States, Russia, China, Japan, Great Britain, France, and Germany. The course also includes an examination of international, regional, and domestic factors affecting the creation of foreign policy by states. Prerequisite: [a grade of "C" or better in POLS 2040 (019.204) or POLS 2041 (019.204)] or written consent of instructor or department head.

POLS 3920 American Politics

(Formerly 019.392) An examination of institutions, processes, public policies, and current public affairs in the United States. Prerequisite: [a grade of "C" or better in POLS 2000 (019.200)] or written consent of instructor or department head.

POLS 3930 Foreign Policy Decision-Making

(Formerly 019.393) The analysis and construction of selected theoretical models of the foreign policy decision-making process. The case studies examined will refer primarily, but not exclusively, to U.S. foreign policy decision-making. Students may not hold credit for both POLS 3930 (019.393) and POLS 3931 (019.393).

POLS 3931 La prise de décisions en politique étrangère

(L'ancien 019.393) Analyse et construction d'un certain nombre de modèles théoriques. Les études de cas font surtout référence à la politique étrangère américaine (mais pas exclusivement). L'étudiant(e) ne peut se faire créditer à la fois le POLS 3931 (019.393) et le POLS 3930 (019.393). Donné au Collège universitaire de Saint-Boniface.

POLS 3950 Research Methods in the Study of Politics

(Formerly 019.395) An introduction to the major quantitative and qualitative research strategies employed in the study of politics. The topics addressed include interviewing, content analysis, comparative studies, survey design, sampling, research ethics and basic statistical analysis. Prerequisite: [a grade of "C" or better in six credit hours of Political Studies at the 2000 level] or written consent of instructor or department head.

POLS 3960 Canadian Politics

(Formerly 019.396) An examination of recurrent issues and problems in the Canadian political culture including the evolution of parties and ideologies, and issues such as regionalism, dualism, continentalism, civil liberties and the interventionist state. Prerequisite: [a grade of "C" or better in POLS 2070 (019.207) or POLS 2071 (019.207)] or written consent of instructor or department head.

Public Administration Course Descriptions-POLS 4000 Level

POLS 4140 Canadian Political Ideas

An examination of the ideas that underlie Canadian politics. What are the values at the centre of political movements in Canada and where do they come from? How have these values changed over time and why? We will attempt to answer these questions by exploring the development of Canadian political ideas as well as our current ideological context in Canada. Effort will be made to reflect on ideological debate on contemporary issues of the day. Prerequisite: written consent of instructor or department head.

POLS 4150 Indigenous Governance

An examination of Indigenous governance before and since the 'European invasion' which introduces key themes, debates and controversies pertaining to Indigenous governance and its study. Students may not hold credit for both POLS 4150 and POLS 4160 (019.416) when offered with the topic "Indigenous Governance." Prerequisite: written consent of instructor or department head.

POLS 4160 Selected Topics in Politics 3

(Formerly 019.416) The content of this course will vary. Contact department for a course description. Prerequisite: written consent of instructor or department head. As the course content will vary from year to year, students may take this course more than once for credit.

POLS 4170 Selected Topics in Politics 4

(Formerly 019.417) The content of this course will vary. Contact department for a course description. Prerequisite: written consent of instructor or department head. As the course content will vary from year to year, students may take this course more than once for credit.

POLS 4180 Provincial Politics in Canada

(Formerly 019.418) The course focuses on politics at the provincial level in Canada and on the politics of the regions: Atlantic, Quebec, Ontario, the West and BC. Emphasis is on a comparison of political cultures, governments, budgets, parties, elections, and political change across the regions. Prerequisite: written consent of instructor or department head.

POLS 4190 Manitoba Politics and Government

(Formerly 019.419) An examination of politics and government in modern Manitoba. Topics addressed include federal-provincial relations, parties and elections, political culture, the legislative process and public policy. Prerequisite: written consent of instructor or department head.

POLS 4370 Comparative Public Administration

A study of the systems, processes, and values of public administration in an international comparative context. Topics include public sector organization and reform, international standards of policy and practice, and the role of international institutions in promoting public sector modernization. The course covers countries from several geographic zones and places domestic issues in the larger, global political economy. Prerequisite: written consent of instructor or department head.

POLS 4470 Managing Modern Government

A study of the skills required to effectively manage in the public sector. Topics covered include: managerial effectiveness, written and interpersonal communication, gaining power and influence, working with political staff and politicians, conflict management, risk management, performance management, creating and working through teams, decision-making, motivation, and empowerment. Students may not hold credit for both POLS 4470 and the former POLS 4570 (019.457). Prerequisite: written consent of instructor or department head.

POLS 4510 Advanced History of Political Ideas

(Formerly 019.451) An in-depth analysis of selected texts in the history of political theory with a focus on ideas and concerns relevant to contemporary political life. Prerequisite: written consent of instructor or department head.

POLS 4530 Regionalism in International Relations

(Formerly 019.453) This course examines the nature and substance of political relations among states in the international system to institutionalize relations for economic, political, or security reasons. Emphasis is given to post-1945 and contemporary regional relationships. Regional arrangements studied in the course include, but are not necessarily limited to, North America, Europe, the Asia-Pacific rim, the Middle East, Latin America, and Africa. Students may not hold credit for both POLS 4530 (019.453) and POLS 4830 (019.483). Prerequisite: written consent of instructor or department head.

POLS 4610 Contemporary Political Theory

(Formerly 019.461) An examination of recent developments in the analysis of political ideas, institutions, and behaviour. Prerequisite: written consent of instructor or department head.

POLS 4660 The State in the Economy

(Formerly 019.466) Drawing from literature in Canadian political economy, this course will examine historical and contemporary patterns and forms of Canadian state involvement in the economy. Both federal and provincial contexts will be studied and selected areas of current interest, such as the role of crown corporations and industrial policy, will be emphasized. Prerequisite: written consent of instructor or department head.

POLS 4710 Political Theory and the Family

An examination of the normative aspects of the relations between children, families and the state. Prerequisite: written consent of instructor or department head.

POLS 4730 Strategic Studies

(Formerly 019.473) An examination of the role, management, and politics of organized force in the international system. Prerequisite: written consent of instructor or department head.

POLS 4860 The Canadian Policy Process

(Formerly 019.486) This course will examine a number of conceptual frameworks for the analysis of the policy process, will analyze the role of different institutions and actors in the policy process, and will appraise current government responses to problems within Canadian society. Prerequisite: written consent of instructor or department head.

POLS 4940 American Foreign Policy

(Formerly 019.494) An analysis of the foreign policy of the United States from 1945 to the present, focusing on the explanation of the foreign policy decisions taken and the policy-making process giving rise to them. Prerequisite: written consent of instructor or department head.

Public Administration Course Descriptions-POLS 6000 Level

POLS 6010 The Manitoba Legislative Internship Seminar

(Formerly 019.601) This credit is granted to six individuals who annually complete the assignment as Legislative Interns within the Manitoba Legislative Assembly.

POLS 6500 Co-operative Education Work 1

(Formerly 019.650) This credit is granted to full time registered students in the Master of Public Administration who have registered in the co-op option of the program. Eligible candidates must have attended two mandatory workshops and completed a minimum 24 credit hours of course work prior to the first work term placement. Work terms are paid positions by employers primarily in the public

sector. Work terms are a minimum of 13 weeks.

POLS 6510 Co-operative Education Work 2

(Formerly 019.651) This credit is granted to full time registered students in the Master of Public Administration who have registered in the co-op option of the program. Eligible candidates must maintain full time status and have attended two mandatory workshops, completed a minimum 24 to a maximum of 48 credit hours of course work, and successfully completed a first work term prior to the second work term placement. Work terms are paid positions by employers primarily in the public sector. Work terms are a minimum of 13 weeks.

Public Administration Course Descriptions-POLS 7000 Level

POLS 7280 Directed Readings in Politics

(Formerly 019.728) An independent reading and/or research course on a selected topic in political studies, undertaken and arranged in consultation with the prospective instructor, upon the approval of the Graduate Committee. As the course content will vary from year to year, students may take this course more than once for credit.

POLS 7290 Directed Readings in Politics 2

(Formerly 019.729) An independent reading and/or research course on a selected topic undertaken and arranged in consultation with the prospective instructor, upon approval of the Graduate Committee. As the course content will vary from year to year, students may take this course more than once for credit.

POLS 7300 Directed Readings in Public Administration

(Formerly 019.730) An independent reading and/or research course on a selected topic undertaken and arranged in consultation with the prospective instructor, upon approval of the Graduate Committee. As the course content will vary from year to year, students may take this course more than once for credit.

POLS 7340 Canadian Government

(Formerly 019.734) Examines the core institutions of Canadian Government and politics including parliamentary government, federalism, the Constitution and the Charter of Rights and Freedoms. Students may not hold credit for both POLS 7340 (or 019.734) and the former 019.776.

POLS 7350 Canadian Democracy

(Formerly 019.735) Examines the core institutions and processes of Canadian democracy including political parties, elections, voting, social movements, interest groups and public opinion. Students may not hold credit for both POLS 7350 (or 019.735) and the former 019.776.

POLS 7370 Seminar in the Theory and Practice of Public Administration

(Formerly 019.737) The intent of this course is to provide insight into the exigencies of actual public administration. The course will be conducted on a topical basis within the framework of certain trends facing Canadian governments today. (The course will attempt to utilize, to the fullest extent possible, the particular expertise of students in the program, faculty members, and of both elected and appointed public officials.) Students may not hold credit for both POLS 7370 (or 019.737) and the former 019.731.

POLS 7410 Selected Topics in Political Behaviour 1

(Formerly 019.741) A systematic examination of empirical research in the area of political socialization and political culture. Students may not hold credit for both POLS 7410 (or 019.741) and the former 019.725.

POLS 7470 Strategic Human Resource Management in Government

A study of the human resource management functions, including planning, staffing, training, performance management, compensation and labour relations, in ways that optimize organizational performance. This course will also address contemporary challenges including recruitment and retention, managing change, demographic shifts, and information technology.

POLS 7520 The Political Classics

(Formerly 019.752) A thorough study of selected works with special attention to methodology, historical content, theoretical position and universal significance. Students may not hold credit for both POLS 7520 (or 019.752) and the former

019.771.

POLS 7530 International Political Economy
(Formerly 019.753) An examination of the systematic study of international political economy. Particular attention is paid to the foreign economic policies of advanced industrialized states and the various issues surrounding the redistribution of wealth and influence in the contemporary international system.

POLS 7550 Contemporary Issues in Canadian Politics
(Formerly 019.755) A seminar series examining a contemporary debate in Canadian politics and government. The specific topic will vary from year to year depending on faculty interest and specialization.

POLS 7610 Political Theory and Contemporary Issues
(Formerly 019.761) An examination of recent theoretical perspectives on contemporary political institutions, problems and values. Students may not hold credit for both POLS 7610 (or 019.761) and the former 019.771.

POLS 7710 Liberalism and Its Critics
An advanced study of liberalism and various theoretical challenges to its ethical and political claims.

POLS 7720 Comparative Government
(Formerly 019.772) Three hours a week, both terms. The primary focus of this course will be on the major Western "democracies" (e.g., United Kingdom, United States, and Western Europe). Phenomena to be examined include political participation and the problems of social change in industrial societies.

POLS 7790 International Relations Theory
(Formerly 019.779) A critical assessment of basic theories and models used in International Relations, emphasizing theoretical approaches and research. Students may not hold credit for both POLS 7790 (or 019.779) and the former 019.773.

POLS 7850 Contemporary Strategic and Security Studies
(Formerly 019.785) An advanced course in strategic studies. The evolution of strategic thought in the modern period will be examined, and particular emphasis will be placed on the role of armed force in relation to the problem of international security. Students may not hold credit for both POLS 7850 (or 019.785) and the former 019.783. Normally students will be expected to have taken POLS 4730 (or 019.473) or its equivalent as prerequisite.

POLS 7910 Multivariate Research Methods
(Formerly 019.791) Introduction to the theory and application of multivariate regression models in political analysis. Students may not hold credit for POLS 7910 (or 019.791) and either the former 019.732 or 019.788.

Public Administration Course Descriptions-POLS 9000 Level

POLS 9010 UW POL 4301 Administrative Theory
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9020 UW POL 4400 Seminar in Canadian Politics
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9030 UW POL 4415 State and Economy
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9090 UW POL 7331 Directed Readings in Public Administration
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9120 UW POL 4220 Liberty and Community in Modern Canadian Political Thought
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9230 UW POL 4410 Seminar in Women in Politics
Course may be taken as part of a Master of Public Administration program offered

jointly with the University of Winnipeg.

POLS 9240 UW 4505 Politics of Urban Planning
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9340 UW POL 7300 Seminar in Theory and Practice of Public Administration I
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9350 UW POL 7305 Seminar in Theory and Practice of Public Administration II
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9370 UW POL 7320 Seminar in the Public Policy Process
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9380 UW POL 7325 Seminar in Public Policy Issues
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9390 UW POL 4200 Feminist Political Thought
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9460 UW POL 7505 Politics of Urban Planning
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9470 UW POL 7335 Directed Readings in Public Administration
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9480 UW POL 4305 Administrative Law
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9490 UW POL 4600 Directed Readings
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9500 UW POL 4605 Directed Readings
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9540 UW POL 4515 Inner City Seminar
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9550 UW POL 4320 Strategic Planning in Organizations II
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9570 UW POL 4100 Seminar in Global Politics
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9602 UW POL 7380 Special Topics Seminar in Public Administration
University of Winnipeg Course: Special Topics Seminar in Public Administration.

POLS 9604 UW POL 4385 Special Topics in Public Administration
University of Winnipeg Course: Special Topics in Public Administration.

POLS 9606 UW POL 7385 Special Topics in Public Administration
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

POLS 9608 UW POL 4121 Special Topics in Global Politics
Course may be taken as part of a Master of Public Administration program offered jointly with the University of Winnipeg.

Religion

Religion ,
Religion Program Info,
Introduction

The Department of Religion began offering M.A. courses in 1976, and was authorized in 1992 to offer a Ph.D. Program. The M.A. is offered as a Joint Program in co-operation with the Department of Religion and Culture (formerly Religious Studies) at the University of Winnipeg. The Ph.D. in Religion is offered solely at the University of Manitoba.

These highly successful programs have graduated students in Biblical studies, history of Christianity, world religions, Asian religions, Islam, women and religion, hermeneutics, critical theory and other religion and culture fields.

Fields of Research

Research specialization in the department include world religions, studies in Hebrew and New Testament Scriptures, Christianity, Judaism; Islam, Buddhism, Hinduism, religion and cultures of western antiquity, ethics, methodology, body history, hermeneutics, critical theory and gender and sexuality.

Research Facilities

Department programs are supported by substantial library holdings. Required research languages are offered either through the department or through affiliated units. Students have access to the computer lab that also serves as a meeting and study space.

M.A. in Religion, Admission

The Department of Religion at the University of Manitoba and the Department of Religion and Culture (formerly Religious Studies) at the University of Winnipeg offer a joint Master of Arts program. Eligible for admission are graduates of the University of Manitoba holding a B. A. (Honours) degree in Religion; graduates of the University of Winnipeg holding a B.A. (four-year) in Religion and Culture; students who hold degrees equivalent to the B.A. (Honours) in Religion from other recognized universities or colleges; students who have completed a recognized pre-Master's program in Religion. Students who have courses with equivalent content or cognate courses in recognized departments or faculties other than Religion or Religious Studies may be given credit for up to 12 credit hours towards admission. To be eligible for admission, applicants must have achieved a cumulative grade point average of at least 3.0 (on a 4.0 point scale) in their last 60 credit hours of study and they must have completed a total of 60 credit hours in Religion. Breadth in preparation is expected as indicated by the description of the B.A. (Honours) in Religion in the *University of Manitoba Undergraduate Calendar*, or the four-year B.A. in Religious Studies in the *University of Winnipeg Calendar*. Applications will be considered from B.A. (Honours) graduates in other disciplines with a strong background in Religion. Such students may be admitted at the pre-Master's level and required to complete a program of study as specified by the department. Applicants are also to submit a representative sample of written academic work, and two letters of references. Contact the Department of Religion for further information.

Application Deadlines

The Department of Religion accepts applications for September admission. (January admission will be considered only in exceptional circumstances.) Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 3 months prior to their intended start date. International students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 7 months prior to their intended start date. **NOTE:** Applicants who wish to be considered for Graduate Studies

funding are to submit their application for admission to the Faculty of Graduate Studies **by January 15** for admission to the JMP for the following September.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. All JMP students must have obtained **6 credit hours in Methodology** (3 credit hours in methodology for the study of Eastern Religions **and** 3 credit hours in methodology for the study of Western Religions) from a recognized university or college. Students entering the program who do not have 6 credit hours in methodology must satisfy this requirement in addition to the required credit hours of coursework needed for completion of MA program. Two types of program are available:

Thesis Option: minimum of 12 credit hours of coursework including:

- Major courses: a minimum of six credit hours at the 7000 level;
- Ancillary courses: a minimum of six credit hours at the 7000, 4000(UM)/5000(UW), or in special cases, at the 3000(UM)/ 3000(UW) level;
- Demonstrated competence in a research language relevant to their area of study (typically satisfied by successfully completing language translation examinations);
- Oral defense of thesis.

Course and Comprehensive Option:

Students who choose this route must complete a minimum of 24 credit hours of graduate courses from one or both of the two departments involved in the JMP in Religion, with at least 18 credit hours to be taken at the 7000 (UM) / 7000 (UW) level, and at least 18 credit hours to be in Religion. Students may take 6 credit hours at the 4000 (UM) / 5000 (UW) level, and this is usually chosen from an extra-departmental field or ancillary. Students can, however, elect to take all 24 credit hours from within the two departments of the JMP in Religion.

Second Language Reading Requirement: Yes

Expected Time to Graduate: two years

Ph.D. in Religion, Admission

Applications for admission to the Ph.D. program in Religion are accepted based on the availability of faculty and research resources. Students applying to the PhD program must have maintained at least a 3.5 average in their work at the MA level.

Admission requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Normally a thesis based M.A. in Religion (with a minimum cumulative GPA of 3.5) or its equivalent will be required for entry into the Ph.D. program. Applicants must have previously obtained at least 6 credit hours of training in methodology (3 credit hours in methodology for the study of Eastern Religions and 3 credit hours in methodology for the study of Western Religions). Applications should include a research proposal (typical length is 8-10 pages including bibliography), a representative sample of written academic work, and two letters of references. Contact the Department of Religion for further information.

Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the department at least 3 months prior to their intended start date. International students should submit their application and supporting documentation to the department at least 7 months prior to their intended start date. **NOTE:** The

Department of Religion accepts applications for admission to the Ph.D. program for September entry only.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Students accepted into the program are required to complete a minimum of 18 credit hours of coursework at the 7000 level. In addition, students must have at least 6 credit hours of current training in methodology (3 credit hours in methodology for the study of Eastern Religions and 3 credit hours in methodology for the study of Western Religions). Students must maintain a minimum grade point average (GPA) of 3.0 with no grade below C+ for continuance in the program.

Students in the Ph. D. program must demonstrate competence in two research languages relevant to the proposed doctoral thesis. The research languages are determined on an individual basis by the student's advisory committee. Language requirements are normally satisfied by students successfully completing language translation examinations.

Second language requirement: yes

Expected time to graduation: approximately 4 years

Religion Course Descriptions-7000 Level

RLGN 7020 Special Topics 1
(Formerly 020.702) Description not available for this course. As the course content will vary from year to year, students may take this course more than once for credit.

RLGN 7030 Special Topics 2
(Formerly 020.703) Description not available for this course. As the course content will vary from year to year, students may take this course more than once for credit.

RLGN 7080 Seminar in Research Methods and Theory
(Formerly 020.708) Description not available for this course. For doctoral students only.

RLGN 7130 Seminar in Hinduism
An advanced study of select aspects of the Hindu tradition.

RLGN 7140 Seminar in Buddhism
An advanced study of select aspects of the Buddhist tradition.

RLGN 7150 Seminar in Islam
An advanced seminar in the study of Islam.

RLGN 7160 Seminar in Judaism
An advanced seminar in the study of Judaism.

RLGN 7170 Seminar in Formative Christianity
Advanced studies in selected aspects of formative Christianity.

RLGN 7180 Seminar in Early Modern, Modern and Contemporary Christianity
Advanced studies in developments of Western Christianity since 1500.

RLGN 7190 Seminar in Religion and Philosophy
Examination of the relation between religion and philosophy through selected figures and themes.

RLGN 7200 Seminar in Religion and Psychology
Examination of selected developments in psychology and religion and religion

and/or in psychoanalysis and the study of religion.

RLGN 7210 Studies in Religious Concepts and Practices
Advanced study of selected religious concepts and practices topics.

RLGN 7220 Seminar in Religions and Historiography
Advanced studies in the interactions among specific religious traditions, ideologies and historiography.

RLGN 7230 Thesis Seminar
Exploration of a range of academic writing techniques and of their theoretical aspects.

RLGN 7240 Textual Studies in Original Languages
Close study of primary texts in their original languages.

RLGN 7250 Research Seminar
Study of selected theoretical and methodological issues in the study of religion.

RLGN 7270 Seminar in Christianity
Critical study or selected historical and/or theoretical issues in selected periods of Christianity.

RLGN 7300 Seminar in Religion and Culture
Study of selected religion-and-culture figures, issues, or themes.

Religion Course Descriptions-8000 Level

RLGN 8260 Seminar in Hinduism
Critical study of selected aspects of the Hindu tradition.

RLGN 8280 Seminar in Islam
Selected issues in the study of Islam.

RLGN 8290 Seminar in Buddhism
Study of selected issues, traditions, and texts in the development of Buddhism.

RLGN 8310 Seminar in Judaism
Selected issues in the study of Judaism.

Religion Course Descriptions-9000 Level

RLGN 9190 UW REL 3999 Languages for Religious Studies
Course may be taken as part of a Master of Religion program offered jointly with the University of Winnipeg.

RLGN 9290 UW REL 3030 Intermediate Chinese
Course may be taken as part of a Master of Religion program offered jointly with the University of Winnipeg.

Social Work

Social Work ,
Master of Social Work,
Program Information

The Faculty has operated since 1943 and there are two different concentrations available through which students may receive M.S.W. degrees. They are addressed to the differing interests that are common within advanced social work practice and are identified in this curriculum as Social Services Administration and Social Clinical. The M.S.W. degree is fully accredited and recognized internationally as both a professional and academic qualification.

Social Services Administration Stream

The stream's aim is to educate progressive social work managers, program evaluators, and policy analysts within the public, voluntary, and private sectors. A critical approach is used for examination of power, oppression, and resistance. Organizational theories, strategies, analyses of social service administration practice are examined. Students acquire strong analytical and practice skills in policy

analysis and social service administration. Through critical review of theories, techniques, and case study applications, students learn to develop and apply different models of social service administration, planning, implementation, and the evaluation of social policies and programs.

Social Clinical Stream

This stream is based on an eco-systemic perspective, while also incorporating anti-oppressive and anti-colonial perspectives. This view provides a broad context for social work practice by emphasizing the interrelatedness of individuals, families, groups, and communities and their relationships with social institutions and cultural forces. The family unit, broadly defined, is given particular focus.

Social Work Program Description,

Graduates of this program currently occupy a wide range of positions within the human services in Canada and throughout the world. While the majority of graduates work within the social service sector others have become active as politicians, scholars, senior civil servants, private consultants and are also active in a wide range of fields such as international development work and the creation of information systems.

While the program covers the core material which is essential to social work practice there has been particular attention given to issues relevant to women and the Aboriginal communities. Many graduates are Aboriginal persons and are actively involved in the creation and operation of the Aboriginal human services organizations.

Considerable attention is given to issues of educational equity. In addition to treating these matters as course content, every effort is made to ensure that people from disadvantaged groups have access to the M.S.W. program. The purpose of this initiative is to achieve equality in professional education so that no person shall be denied educational opportunities or benefits for reasons unrelated to ability. In the fulfillment of this goal the aim is to correct the conditions of disadvantage in professional education experienced by Aboriginal peoples, persons with disabilities, immigrants and refugees to Canada, Gender and Sexual Minorities' group members and persons who are members of a visible minority in Canada. Educational equity means more than treating persons in the same way, it also requires special measures and the accommodation of difference.

Fields of Research

The faculty are involved with research in virtually all areas of the human services covering clinical, administrative and planning issues. A partial list of current research includes questions regarding gender, international social development, ethnicity, the justice system, services for Aboriginal people, rural and northern development, family violence, day care, issues concerning disabled persons, the immigrant experience, the development of clinical services, the political economy of the welfare state, the nature and treatment of pain, and services in child welfare.

Admission

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar, the deadline for submission of applications to the program is January 15th for Canadian citizens and permanent residents and December 1st for International applicants.

M.S.W. Admissions Criteria

- Possession of a B.S.W. degree (by June 30th of the application year) from an accredited university which is recognized by the University of Manitoba.
- A Minimum Grade Point average of 3.0 (B) is required in the last 60 credit hours of university study.
- If courses have been taken subsequent to the degree as a Special Student and/or Occasional Student and/or in a subsequent degree or a Pre-Master

program, they will be calculated into the Grade Point Average as part of the last 60 credit hours.

- Applicants who self-identify as members of one or more of the Educational Equity priority groups and who possess a Grade Point Average between 2.5 and 2.99 will be reviewed for special consideration. Applicants with Adjusted Grade Point Averages below 2.5 will not be considered.

Pre-M.S.W. Admissions Criteria

- Possession of, or eligible for the granting of, a degree other than Social Work at point of application from an accredited university which is recognized by the University of Manitoba. Persons who plan to graduate in May of the year of application are not eligible for admission.
- One year (1680 hours) of relevant social work experience, paid or volunteer (see application package for details).
- A minimum Grade Point Average of 3.0 (B) is required in the last 60 credit hours of the university study.
- If courses have been taken subsequent to the degree as a Special Student and/or Occasional Student and/or in a subsequent degree or a Pre-Master program, they will be calculated into the Grade Point Average as part of the last 60 credit hours.
- Applicants who self-identify as members of one or more of the Educational Equity priority groups and who possess a Grade Point Average between 2.5 and 2.99 will be reviewed for special consideration. Applicants with adjusted grade point averages below 2.5 will not be considered.

Occasional Students

An Occasional Student in Social Work is one who wishes to take graduate courses with no intention of proceeding to the Pre-M.S.W. program or the Master degree in social work at the present time. Pre-M.S.W. program courses available to Occasional Students holding a previous 4 year degree in a discipline other than social work (e.g., B.A., B.Ed.):

SWRK 3100 Systematic Inquiry in Social Work	3
SWRK 6030 Canadian Social Welfare Policy	6
SWRK 6040 Anti-Oppressive Social Work Practice3	
SWRK 6060 Social Work and Aboriginal People	3
The maximum number of credit hours permitted is six credit hours, plus SWRK 3100 (3 credit hours).	

M.S.W. program courses available to Occasional Students holding a previous degree in social work and non-social work students currently registered in another graduate program:

SWRK 6010 Data Analysis for Social Work Research	3
or	
SWRK 6070 Qualitative Research in Social Work	3
SWRK 7290 Family-Focused Social Work Practice	6
SWRK 7300 Clinical Evaluation of Social Work Interventions	3
SWRK 7310 Social Service Administration Practice	6
SWRK 7400 Theoretical Foundations of Social Service Administration	3
SWRK 7420 Theoretical Foundations of Social Policy Analysis, Planning and Evaluation	3
SWRK 7230 Problem Seminar (Several topics are offered each year.	3

Consult timetable for current titles being offered)

SWRK 7390 Advanced Social Work Practice Seminar	3
SWRK 7430* Evaluation Research in Social Work Practice	3
SWRK 7440 Policy Analysis in Social Work Practice	3
The maximum number of credit hours permitted is 6 credit hours plus SWRK 6010 (3 credit hours) or SWRK 6070 (3 credit hours).	

All Occasional and non-social work students are required to abide by the same pre/co-requisite policy that applies to Social Work students.

*Pre/co-requisite SWRK 6010 or SWRK 6070

Educational Equity Initiative

For the purpose of identification the definitions for the Educational Equity priority groups are:

Aboriginal Peoples: All indigenous peoples of Canada including: First Nations, Metis, Denè and Inuit.

Visible Minorities: Persons other than Aboriginal peoples who, because of their colour, are a visible minority in Canada.

Immigrants: Immigrants are those who do not record Canadian citizenship by birth, and whose native tongue is NOT English.

Refugees: A Refugee is an individual who has left his/her country of residence because of persecution for belonging to a particular social, cultural, religious and/or national group, and/or for holding political beliefs and has been accepted for residence in Canada.

Persons with Disabilities: Persons with disabilities are those who would consider themselves disadvantaged by reason of any physical, intellectual, mental, sensory or learning impairment.

Gender and Sexual Minorities' group members: Persons who identify as Gay, Lesbian, Bi-Sexual, Trans-Gendered, Two-Spirited, Queer, Questioning, and /or Intersex.

These definitions are subject to change.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar.

Students may take the Pre-M.S.W. program on a part-time basis and the M.S.W. program on a full-time or part-time basis. There is a three year time limit to complete the Pre-M.S.W. program and a six year time limit to complete the M.S.W. program. There is no second language requirement.

The Pre-M.S.W. Program

The Pre-M.S.W. program is designed to prepare students who do not have a B.S.W. degree from an accredited university, or its equivalent, for entry to the M.S.W. program. It is intended to build on the existing background and experience of students by providing them with an opportunity for focused study on Canadian social welfare policy, generalist social work practice, the philosophy and values of the profession of social work, including content on diversity and anti-oppression, and supervised practice in the field of social work.

Program Requirements

SWRK 3100	Systematic Inquiry in Social Work	3
SWRK 4200	Field/Focus	6
SWRK 6020	Social Work Practice Seminar	6
SWRK 6030	Canadian Social Welfare Policy Analysis	6
SWRK 6040	Anti-Oppressive Social Work Practice	3
SWRK 6050	Field Practice	6
SWRK 6060	Social Work and Aboriginal People	3
	Maximum credit hours load	33

Program Requirements

The M.S.W. Program

Graduate Studies

The Social-Clinical Intervention Stream

Students must complete 24 or 27 credit hours of seminar and tutorial work (Students opting for the "Course-Based Specialization Option" must complete 27 credit hours during their M.S.W. Program. All other students require 24 credit hours). The program requires at least 12-18 months of full-time study. Students may elect to take the program on a part-time basis.

The program includes 15 credit hours of core material (which must be completed within 24 months from date of admission) and 9 credit hours of electives. In addition to the course work, students are required to complete a thesis, practicum or the course-based specialization option. Students admitted prior to 2004 may complete Option 1 (thesis); Option 2 (practicum) or Option 3 (course-based specialization). Those students admitted in 2004 or later may complete Option 1 (thesis) or Option 3 (course-based specialization).

In addition to the one Advanced Social Work Practice Seminar required, students take nine hours of electives (up to six hours may be taken outside of the Social Work faculty).

Course SWRK 7290 is pre- or co-requisite to final approval of the proposal of the thesis, practicum or specialization course-based option.

Social-Clinical Intervention Stream

Core Courses and Electives

SWRK 6010	Data Analysis for Social Work Research	3
	or	
SWRK 6070	Qualitative Research in Social Work	3

Field Practice

NOTE:

* Students should take their elective course in Social Work or another department. Part-time students should take SWRK 7310 and SWRK 7400 together and SWRK 7420/ SWRK 7430/ SWRK 7440 in the same academic year.

** Available only to students admitted prior to 2004.

**Ph.D. in Social Work ,
Admission**

In addition to the admission requirements of the Faculty of Graduate Studies, admission requirements to the doctoral program in Social Work include:

Master of Social Work degree, or equivalent, from an accredited degree-granting university, with a minimum 3.0 grade point average (as defined by the University of Manitoba). Equivalency to a M.S.W. degree from the University of Manitoba is defined as: possession of a M.S.W. degree from an accredited program at another accredited university OR possession of a Master's level degree other than a M.S.W. delivered by an academic unit with the mandate of preparing social workers for professional practice, accredited by the relevant social work education authority, and which would render its holders eligible for registration with the Manitoba Institute of Registered Social Workers.

Applicants who possess a B.S.W. degree and a non-social work Master's degree may be admitted to a qualifying year during which the student may be required to complete all or selected core courses of the M.S.W. stream consistent with the applicant's Ph.D. focus of study. Equivalency standing of prior courses will be assessed by a committee that includes representatives from the Ph.D. Admissions Committee and the M.S.W. stream consistent with the applicant's Ph.D. focus of study. Applicants holding a B.S.W. degree and a non-social work Master's degree are encouraged to apply at least one year prior to when they intend to enter the Ph.D. program.

Minimum research competency in qualitative or quantitative methods equivalent to the level required for the Master of Social Work degree from the University of Manitoba, with a minimum grade of 3.0 (B). Although the minimum requirement is

for one course, applicants will be expected to have basic competency in both qualitative and quantitative methods.

Evidence of scholarly ability, through publications in refereed journals, other scholarly work of equivalent standard, or courses taught in accredited university programs must be provided.

A minimum of two years of professional practice experience in social work.

Admission is subject to the availability of an advisor with demonstrated scholarship in the applicant's proposed area of research.

Advising

Each student is assigned an advisor on admission. An advisory committee that includes the advisor, one additional member from Social Work and one from another faculty will be appointed to assist the student in developing a study plan and to supervise the student's research. All members of the advisory committee must be members of the Faculty of Graduate Studies.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. A minimum of TWO YEARS of study (the fall and winter terms of the first and second year following admission) is required.

The program consists of: (a) 27 credit hours of coursework, (b) a candidacy examination, and (c) a Ph.D. thesis.

Course Requirements

Students must complete 27 credit hours of approved course work beyond the M.S.W. degree and will include:

Social Work core courses (6 credit hours): • SWRK 8010 - Perspectives on Knowledge for Social Work (3 credit hours) • SWRK 8020 - Development of the Social Work Profession (3 credit hours)

Research Courses (12 credit hours): • SWRK 8030 - Advanced Qualitative Research in Social Work (6 credit hours) • SWRK 8040 - Advanced Quantitative Research in Social Work (6 credit hours)

Teaching Requirement (3 credit hours): • Seminar in Post-Secondary Instruction (EDUB 7416) (3 credit hours) OR • an alternative requirement that addresses teaching (3 credit hours)

Electives (6 credit hours): • One elective in the student's area of specialization (3 credit hours) • One additional elective (3 credit hours)

Candidacy

A candidacy examination committee will also be appointed when the student begins to prepare for the candidacy examination. This three-person committee, which includes the advisor, is responsible for administering the candidacy examination. The candidacy examination will normally be taken after completing all course work but in no case later than one year prior to expected graduation. The candidacy examination consists of a major paper on a topic within the student's general area of study and an oral examination of the topic covered in the paper.

Dissertation Research

The student's Ph.D. advisory committee, chaired by a thesis advisor, provides advice and guidance in the development of the proposal for the dissertation, and

during the ongoing research phase. Normally, advisory committee members become members of the examining committee for the dissertation during the final examination for the Ph.D. degree.

Second language requirement: none

Maximum time to graduation: seven years

Page URL,
<http://crscalprod1.cc.umanitoba.ca/SocialWork.cats>

Social Work Course Descriptions-6000 Level

SWRK 6010 Data Analysis for Social Work Research

(Formerly 047.601) An intermediate course in the analysis of social work data. Course will emphasize application and interpretation of analytical techniques useful in the practice of social work. A course in elementary statistics such as STAT 2200 (or 005.220) is strongly recommended prior to taking this course. Prerequisite: SWRK 3100 (or 047.310) or equivalent. May not hold with SWRK 4110 (or 047.411).

SWRK 6020 Social Work Practice Seminar

(Formerly 047.602) Introduces students to ecological and other generalist practice models in the provision of social services. Attention is given to key contextual aspects of social work practice such as gender, poverty, and culture in the study of professional roles and ethics. Intervention modalities considered range from direct practice with individuals to strategies of community change.

SWRK 6030 Canadian Social Welfare Policy

(Formerly 047.603) An examination of the elements of ideology, and the application of competing ideological systems in the study of social welfare policy. This course also examines the history of Canadian social welfare from European contact to contemporary developments.

SWRK 6040 Anti-Oppressive Social Work Practice

(Formerly 047.604) An Overview of Anti-Oppressive social work practice. Focuses on application of this approach to a wide variety of service participants and the connections between policy and practice. Implications for the profession are explored.

SWRK 6050 Field Practice

(Formerly 047.605) An educationally focused practice experience where the student carries a sustained professional role as a beginning practitioner. Requires 450 hours of time including an orientation program, engagement in practicum activities under supervision, educational contact time with the field instructor and evaluation of performance. For Pre-MSW students only. Subject to satisfactory completion and reports, students will be graded on a pass/fail basis. Pre / Co requisite 47.602 Co-requisite 47.420

SWRK 6060 Social Work and Aboriginal People

(Formerly 047.606) Focuses on the analysis of social welfare policy and social work practice from an Aboriginal perspective. The influence of colonization as an attribute of oppression is examined along with an exploration of developments oriented to the goal of decolonization and empowerment.

SWRK 6070 Qualitative Research in Social Work

An intermediate course in qualitative approaches for research on social work practice and social welfare issues. It will include some of the main approaches to the design and analysis of qualitative social work research.

Social Work Course Descriptions-7000 Level

SWRK 7180 Advanced Field Practice

(Formerly 047.718) A student directed specialized practice experience where the focus is on the integration of theory, research and practice. Requires 450 hours of supervised, advanced practice following approval of a proposal developed by the student. Students will be graded on a pass/fail basis. Pre/Co Requisite SWRK 7190

(or 047.719)

SWRK 7190 Integrating Theory and Research in Advanced Field Practice

(Formerly 047.719) Requires application of theory and research to analysis of selected activities undertaken in Advanced Field Practice (47.718) Pre/Co requisite SWRK 7180 (or 047.718)

SWRK 7220 Selected Topics in Social Work

(Formerly 047.722) A tutorial approach which permits the graduate student to develop an area of concentration independently but with assistance and mutual work with a faculty member. Prerequisite: written permission of instructor.

SWRK 7230 Problem Seminar

(Formerly 047.723) Students focus on the theory, social policy and social work practice implications of a given social problem area.

SWRK 7280 Readings in Social Work and Social Welfare Research

A tutorial in specialized research methodology to be offered only to students who have highly specialized research interests which are not commonly offered in other courses. Prerequisite: an introductory research course and consent of the instructor.

SWRK 7290 Change and Stability: Implications for Direct Intervention

(Formerly 047.729) Theories of human behaviour are considered from an ecological perspective as they relate to family focused social work practice. Intervention methods are studied with special attention given to developmental issues and social contextual factors in the assessment and treatment of distressed human systems.

SWRK 7300 Clinical Evaluation of Social Work Interventions

(Formerly 047.730) Methods of evaluating clinical social work intervention with individuals, couples, families, and other small groups. Prerequisite: SWRK 3100 (or 047.310) or SWRK 4110 (or 047.411) or their equivalents.

SWRK 7310 Social Service Administration Practice

(Formerly 047.731) This course will focus on the development of skills in the analysis and implementation of organizational models for social service delivery, and administration methods for the effective delivery of social services. Students may not hold credit for SWRK 7310 (or 047.731) and the former 047.735 or SWRK 7360 (or 047.736).

SWRK 7390 Advanced Social Work Practice Seminars

(Formerly 047.739) Study of social work practice organized by size of client system. Students must select one seminar from several which are offered. Remaining seminars may fulfill elective requirements. For clinical students only Pre-corequisite: SWRK 7290 (or 047.729).

SWRK 7400 Theoretical Foundations of Social Service Administration

(Formerly 047.740) An examination of organizational theories and strategies and evaluation of their relevance for the administration of social services agencies.

SWRK 7420 Theoretical Foundations of Social Policy Analysis, Planning and Evaluation

(Formerly 047.742) An advanced course in the welfare state in Canada - the relationship between ideology, economics and the existing structure of the welfare state in Canada, with a focus on the attempts to roll it back and the consequent tasks of social work in the preservation and advancement of social security. Students may not hold credit for 047.737 and SWRK 7420 (or 047.742).

SWRK 7430 Evaluation Research in Social Work Practice

(Formerly 047.743) Presentation of the knowledge and skills necessary in the application of models and methods of planning and evaluating social policy and social programs. Analytical and practice skills are developed through a critical review of a variety of theories and techniques and case study applications. Pre-corequisite: SWRK 6010 (or 047.601). Applicable to students admitted subsequent to 1997-1998. May not hold with the former 047.741.

SWRK 7440 Policy Analysis in Social Work Practice

(Formerly 047.744) Presentation of the knowledge and skills necessary in the application of models and methods of planning social policy and social programs. Analytical and practice skills are developed through a critical review of a variety of theories and techniques and case study applications. Applicable to students admitted

subsequent to 1997-1998. May not hold with SWRK 7410 (or 047.741).

SWRK 7450 Advanced Research Methods 1
(Formerly 047.745) An overview of design and methodology options in quantitative and qualitative social work research, with special emphasis on practice in community settings.

SWRK 7460 Advanced Research Methods 2
(Formerly 047.746) Advanced quantitative analysis of social work policy and practice, with emphasis on multivariate analysis techniques.

SWRK 7470 Advanced Research Methods 3
(Formerly 047.747) Advanced qualitative analysis of social work policy and practice, with emphasis on analyzing appropriate case studies, and interview and documentary information.

SWRK 7480 Advanced Family-Focused Practice
(Formerly 047.748) Study of the family as a client system, using theoretical approaches within an ecological paradigm.

SWRK 7490 Advanced Family-Focused Practice with Special Populations
(Formerly 047.749) Special issues in family-focused practice, including supervision of practice.

SWRK 7520 Dissertation Seminar
(Formerly 047.752) A required non-credit course on special issues to support students in preparing their formal dissertation proposals. Topics include scholarly findings, research methodology, and data analysis. Graded as P/F.

SWRK 7530 Critical Issues in Social Work
(Formerly 047.753) An opportunity for students to engage in the study of a specific field or topic in social work. Taken as a course, tutorial or offered as a special Ph.D. seminar when numbers permit.

Social Work Course Descriptions-8000 Level

SWRK 8010 Perspectives on Knowledge for Social Work
A seminar focusing on the definition, development, legitimization, and transmission of knowledge for social work practice. A range of approaches will be discussed including scientific approaches (logical positivism), post-modern approaches, indigenous and culturally based approaches, and critical approaches.

SWRK 8020 Development of the Social Work Profession
A seminar focusing on the development of social work from mainstream and marginalized people's perspectives (including Aboriginal people and women), and its relationship; to current professional issues. Histories, ideological, economic, theoretical, and political factors will be considered in examining selected fields of practice.

SWRK 8030 Advanced Qualitative Research in Social Work
A seminar and laboratory course in the understanding and use of a wide range of epistemological and methodological approaches to research related to social work. This will include a focus on the views and practices of Aboriginal peoples, women, and other marginalized persons. Pre-requisite: A grade of "B" or better in a Master's level qualitative research course taken within five years or instructor approval.

SWRK 8040 Advanced Quantitative Research in Social Work
A seminar and laboratory course in the use of multivariate statistics in analyzing experimental, quasi-experimental, survey and administrative data related to social policy, social services, and social work practice. Pre-requisite: A grade of "B" or better in a Master's level quantitative research course taken within five years or instructor approval.

Sociology

Sociology ,
Sociology Program Info,
The Department of Sociology offers programs at the Master and Ph.D. levels. Both programs provide training in the core areas of the discipline (theory and research methods) as well as in the department's major areas of specialization: criminology; gender, sexuality and family/intimate relations; health and aging; and inequality.

Graduate Studies

The relatively low graduate student/faculty ratio creates an informal learning environment in which students receive considerable individual attention. Faculty members are actively involved in research, including some projects that readily lend themselves to the production of student theses/dissertations. Many students who have completed their Sociology degrees at the University of Manitoba have gone on to successful careers in the academic community, in the private sector, and in government service.

Fields of Research

The major areas of research of the Sociology faculty include criminology and criminal justice, health care, gender studies, inter-group (race/ethnic) relations, power and inequality, social change and development, and social psychology. Several department members have affiliations with research centres and institutes at the University of Manitoba, including the Centre on Aging, and RESOLVE (a centre for research and education for solutions to violence and abuse).

M.A. in Sociology,
Admission

Admission requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Students who have completed a University of Manitoba Honours B.A. (or equivalent) in Sociology may enter directly into the Master of Arts program. Students with other degrees or backgrounds may be eligible for admission to a pre-Master's program to the satisfaction of the department. Contact the Sociology Department for further information.

Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 3 months prior to their intended start date. International students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 7 months prior to their intended start date.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. The Master of Arts program in Sociology requires 12 credit hours of course-work (700/7000 level) beyond the pre-Master's requirements. Students must also complete and successfully defend a thesis.

Second Language Reading Requirement: None

Expected Time to Graduate: Two years

Ph.D. in Sociology,
Admission

Admission requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Students who wish to enter the Doctor of Philosophy program must have completed the equivalent of a University of Manitoba Master of Arts in Sociology.

Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Department at least 3 months prior to their intended start date. International students should submit their application and supporting documentation to the Department at least 7 months prior to their intended start date.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Students must complete:

- A minimum of 18 credit hours of coursework (including 3 credit hours in Theory and 6 credit hours in Research Methods);
- A passing grade in two comprehensive examinations in two different subject areas, chosen from the following: Classical Theory; Criminology; Gender, Sexuality and Family/Intimate Relations; Inequality and Social Transition; Research Methods; Social Psychology; Health.
- Successful defense of a dissertation proposal; and
- Successful defense of the completed dissertation.

Second language requirement: no

Expected time to graduate: four years

Sociology Course Descriptions

SOC 7110 Seminar in Sociology of Religion

(Formerly 077.711) A comparative and analytical study of religion with particular reference to such areas as integration, change, ideology, value orientation, normative structures, social class, intergroup relations, personality systems.

SOC 7120 Seminar in Sociology of Education

(Formerly 077.712) An analytical treatment of the influence of education, as a basic social institution, on society its functions in socialization, change, control, social mobility, social progress, etc. and the influence of society on the organization, content, and goals of education.

SOC 7160 Selected Topics

(Formerly 077.716) An intensive study of the contemporary research and theory in a selected field of sociology. As the course content will vary from year to year, students may take this course more than once for credit.

SOC 7190 Seminar in Selected Topics in Sociological Theory

(Formerly 077.719) The content of this course may vary from year to year, depending on interest and need. As the course content will vary from year to year, students may take this course more than once for credit.

SOC 7240 Seminar in Selected Topics in Research and Methods

(Formerly 077.724) The content of this course may vary from year to year, depending on interest and need. As the course content will vary from year to year, students may take this course more than once for credit.

SOC 7280 Seminar in Theories of Criminal Behaviour

(Formerly 077.728) An advanced course dealing with theory and research in the field of criminology with emphasis placed on an evaluation of existing theories of crime and criminal behaviour.

SOC 7300 Seminar in the Sociology of Law and Social Control

(Formerly 077.730) A critical examination of classical and contemporary sociological theories of law and social control and their import for understanding substantive issues relating to the law-society relationship.

SOC 7310 Seminar in Intergroup Relations

(Formerly 077.731) This seminar will provide an opportunity for detailed study of intergroup (religious, racial, and ethnic) relations in contemporary Canadian society. As the course content will vary from year to year, students may take this course more than once for credit.

SOC 7320 Seminar in Political Sociology

(Formerly 077.732) A critical examination of classical and contemporary sociological theories and current empirical research concerned with the relationship between politics and society. Particular emphasis is placed upon the origin,

development, nature and future of the welfare state from a comparative perspective.

SOC 7340 Seminar in the Sociology of the Family

(Formerly 077.734) This seminar investigates various conceptual frameworks which are developing in the study of the family today, including research problems and procedures unique to such study. Various approaches will be examined.

SOC 7350 Advanced Reading and Research 1

(Formerly 077.735) Directed study of a selected area within the general field of sociology.

SOC 7360 Advanced Reading and Research 2

(Formerly 077.736) Directed study of a selected area within the general field of sociology.

SOC 7370 Issues in Health Care Seminar

(Formerly 077.737) An advanced seminar designed to examine current issues in health care. The content of this course may vary from year to year depending on interest and need. Prerequisite: a grade of "C+" or better in SOC 4540 (or 077.454) or written consent of the department head.

SOC 7390 Survey Research Methods

(Formerly 077.739) Through the use of secondary electronic data sources, students learn all aspects of survey research. Topics covered include: sampling, question and questionnaire construction, index construction and scaling methods, techniques of establishing validity and reliability, order effects, conducting interviews, coding, data analysis, and budgeting. Previous experience with multivariate data analysis at the undergraduate level is strongly encouraged.

SOC 7400 Advanced Quantitative Research Methods

(Formerly 077.740) This course emphasizes the understanding and application of advanced quantitative data analysis techniques to sociological research problems. Issues in regression decomposition, path analysis, log-linear analysis, discriminant function analysis, principal components and factor analysis, as well as non-parametric statistical tests are covered as they relate to sociological research concerns. Statistical packages are used to illustrate sociological examples. Prerequisite: SOC 4480 (or 077.448) or written consent of the department head.

SOC 7410 Selected Topics in Quantitative Research Methods

(Formerly 077.741) This course emphasizes the understanding and application of selected quantitative data analysis procedures as they apply to sociological research concerns. Statistical packages are used to illustrate sociological applications. Topics covered will vary but may include logistic regression, multiple classification analysis, multivariate analysis of variance and covariance, canonical correlation, recursive and nonrecursive models, and LISREL. The course emphasizes issues related to the sociological use of these techniques. Prerequisite: SOC 4480 (or 077.448) or written consent of the department head. As the course content will vary from year to year, students may take this course more than once for credit.

SOC 7420 Qualitative Research Methods

(Formerly 077.742) This course provides an overview of the methods of qualitative research. Discussion focuses on the philosophical foundations of qualitative methods, the variety of techniques available within interpretive and conflict paradigms, issues of sampling, analysis, validity, and report writing.

SOC 7430 Seminar in Classical Sociological Theory

(Formerly 077.743) A critical examination of certain central aspects of the sociological tradition. The content of this course may vary from year to year depending on interest and need.

SOC 7440 Seminar in Contemporary Sociological Theory

(Formerly 077.744) An examination of current trends in sociological theory. The content of this course may vary from year to year depending on interest and need.

SOC 7450 Selected Topics in Criminology

(Formerly 077.745) An advanced seminar in a selected area of criminology. As the course content will vary from year to year, students may take this course more than once for credit.

SOC 7470 Evaluating Social Programs

(Formerly 077.747) Designed as a course in applied sociology, students will review the models and methodologies used for evaluating social programs. The course will introduce the necessary conceptual and analytic tools to design and carry out

program evaluations. Students may not hold credit for both SOC 7470 (or 077.747) and the former 077.733.

SOC 7480 Social Inequality

(Formerly 077.748) A critical examination of classical and contemporary theories and current empirical research concerned with various dimensions of social inequality (such as class, gender and race) and social stratification from a comparative perspective.

SOC 7490 Globalization

(Formerly 077.749) A sociological examination of the globalization of trade, production and finance, including the creation of multilateral trading blocs (e.g., APEC, EU, NAFTA) and international organizations (e.g., WTO, IMF, the World Bank) and their impact upon social inequality, the welfare state and the environment in developed and developing nations.

Soil Science

Soil Science,
Soil Science Program Info,
The Department of Soil Science offers graduate instruction leading to M.Sc. and Ph.D. degrees. Students will select one of the following four programs:

- Environmental Science
- Fundamental Soil Science
- Agricultural Science
- Agrometeorology

Studies related to these four programs include fundamental and applied studies on the management of soil resources for crop and animal production, soil fertility and nutrient management, pest control management, chemical use in agriculture and food quality, effects of weather and climate on agricultural production, soil erosion, tillage practices, precision agriculture, pesticide fate in the environment, environmental monitoring, manure and waste management, remediation of contaminated or degraded soils, land use suitability assessment, soil genesis and classification, soil mineralogy, soil microbiology and biochemistry, soil and pesticide chemistry, soil physics and agrometeorology.

Graduate students are required to obtain a comprehensive knowledge of soil science, but the department permits considerable variation in the selection of courses depending on the background of the student and the particular area of specialization. Graduates with knowledge or a major in soil science have had excellent career opportunities with agribusiness, environmental land use agencies or firms, and regulatory agencies. M.Sc. and Ph.D. graduates are employed in land inventory activities, research in the various areas of fundamental and applied soil science, environmental consulting and extension.

Fields of Research

Research interests of academic staff in the Department of Soil Science includes transport and transformation of organic and inorganic chemicals in soil, agrometeorological modelling of crop and agricultural processes, impacts of climate change, soil ecology and biochemistry, agricultural pesticides and sustainable agriculture, soil fertility, soil chemistry and mineralogy, landscape ecology and land resource management, land remediation, manure management, greenhouse gas dynamics, forest fires, nutrient dynamics and chemistry of soil fertility.

Research Facilities

The Department of Soil Science and its research facilities are located in the Ellis Building. Facilities within the department include excellent instrumentation to measure soil physical, chemical and biological characteristics, and to quantify soil nutrient and pesticide residue levels in soil extracts and water samples. The department conducts field-based research at a number of locations, both in the province and beyond, in collaboration with scientists from other universities and federal and provincial organizations. Within the department, full-time technicians add quality assurance and quality control to the research programs, and provide a positive effect on the training of students. In addition, the department has the

opportunity to share research facilities with other departments within the university and at several locations throughout the province.

M.Sc. in Soil Science, Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

Application Deadlines

Start Date	Canadian/U.S.	Non-Canadian/U.S.
September	June 1	March 1
January	October 1	July 1
May	February 1	November 1
July	April 1	January 1

Program Requirements

In addition to the minimum course requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar, a "B" is the minimum passing grade in the major subject area.

Second language reading requirement: none

Expected time to graduation: two years

Ph.D. in Soil Science, Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar.

Application Deadlines

Start Date	Canadian/U.S.	Non-Canadian/U.S.
September	June 1	March 1
January	October 1	July 1
May	February 1	November 1
July	April 1	January 1

Program Requirements

In addition to the minimum course requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, a "B" is the minimum passing grade in the major subject area.

Second language reading requirement: none

Expected time to graduation: three years

Page URL,
<http://crscalprod1.cc.umanitoba.ca/SoilScience.catx>

Soil Science Course Descriptions

SOIL 7100 Soil Physical Chemistry
(Formerly 040.710) Topics of discussion: ionic equilibria, ion exchange and ionic transport including soil-plant relationships. Offered in 2005-2006 and alternate years.

SOIL 7110 Soil Physics I - General
(Formerly 040.711) First and second laws of thermodynamics, Darcy's law,

saturated and unsaturated flow, simulation modeling of moisture movement, soil aeration, water availability to seeds, strength properties of unsaturated soils. Offered in 2006-2007 and alternate years.

SOIL 7120 Soil Physics II Special Problems

(Formerly 040.712) Each student will be required to prepare a comprehensive review of literature on an assigned topic and present a seminar. In addition, each student will conduct a minor research project and submit a written report on the project. Currently not offered.

SOIL 7130 Soil Chemistry

(Formerly 040.713) Chemical equilibria and soil solution chemistry; surface chemistry and solid-solution reactions; mineral structure, colloid chemistry and analytical techniques; fate of nutrients and pollutants; reactions of fertilizers. Offered in 2005-2006 and alternate years.

SOIL 7140 Soil Nitrogen

(Formerly 040.714) Discussion of organic and inorganic nitrogen in soils, nitrogen fixation, mineralization, nitrification, denitrification, and plant availability of soil nitrogen. Students will be required to review literature on assigned topics. Offered in 2005-2006 and alternate years.

SOIL 7170 Agricultural Micrometeorology

(Formerly 040.717) Discussion of mass and energy transport in the boundary layer, evaporation and transpiration of water, light absorption and transmission of carbon dioxide in plant canopies and climate change impacts on micrometeorological processes. Prerequisite: SOIL 3060 (or 040.306) and/or consent of instructor. Offered in 2006-2007 and alternate years.

SOIL 7180 Environmental Chemistry of Pesticides and Related Compounds

(Formerly 040.718) Pesticide chemodynamics, biological and non-biological transformations of pesticides in water, soil and biota, bioaccumulation and food chain distribution of pesticides and related xenobiotics and environmental fate models will be discussed. Prerequisite: SOIL 7150 (or 040.715) or consent of instructor. Not offered in 2005-2006.

SOIL 7200 Advanced Soil Microbiology

(Formerly 040.720) Examines the role of the microbial community in decomposition, nutrient cycling, and pathogen/pest suppression. Methods of studying biochemical activity and microbial composition of soil are discussed. The soil environment and agricultural management are considered and to their role in regulating the composition and activity of microbial communities. Prerequisite: SOIL 4120 (or 040.412) or consent of instructor. Offered in 2005-2006 and alternate years.

SOIL 7202 Advanced Soil Ecology

Examine the role of soil organisms and their communities in decomposition, elemental cycling, and pathogen/pest suppression in managed and natural soil systems. Understand methods of studying biochemical activity and communities in soil. Take a specific research topic of choice and develop an understanding of the organisms and communities, environmental controls of key biological processes involved and apply your knowledge to resolving a specific research issue.

SOIL 7210 Topics in Soil Fertility

(Formerly 040.721) Advanced study of behaviour and crop requirements for selected nutrients (except for nitrogen, as covered in SOIL 7140 (or 040.714)). Students will be required to review literature and prepare seminars on assigned topics. Prerequisites: SOIL 4520 (or 040.452) or consent of instructor. Offered in 2006-2007 and alternate years.

SOIL 7220 Principles of Scientific Research and Communication

(Formerly 040.722) Principles of scientific research; management skills; writing skills; oral and poster presentation; preparation of research proposal and thesis (pass/fail). These topics will focus on aspects of soil science and will give students experience in writing and presenting scientific material to increase their professionalism as soil scientists. Prerequisite: Consent of instructor.

SOIL 7230 Topics in Landscape and Processes I

(Formerly 040.723) An examination of methods of landscape characterization and of landscape processes, their impacts, interactions and modelling. Prerequisite: Consent of instructor. Not offered in 2005-2006.

SOIL 7240 Topics in Landscape Processes II

(Formerly 040.724) A continuation of SOIL 7230 (or 040.723). Prerequisite: Consent of instructor. Not offered in 2005-2006.

SOIL 7250 Topics in Soil Science

(Formerly 040.725) Several courses in soil science are sectioned into modules. Modules of one credit hour on special topics are also available. Students may select three modules from the various courses or from special topics for SOIL 7250.

SOIL 7260 Pesticide Residues in Food, Water and Soil

(Formerly 040.726) Discussion and application of research protocols for examining pesticide fate in the environment and for quantifying pesticide residues in food, water and soil. Prerequisite: consent of instructor. Currently not offered.

SOIL 7270 Advanced Soil Ecology

Examine the role of soil organisms and their communities in decomposition, elemental cycling, and pathogen/pest suppression in managed and natural soil systems. Understand methods of studying biochemical activity and communities in soil. Take a specific research topic of choice and develop an understanding of the organisms and communities, environmental controls of key biological processes involved and apply your knowledge to resolving a specific research issue.

Statistics

Statistics ,
Statistics Program Info,

The University of Manitoba offers graduate programs in statistics leading to the M.Sc. and Ph.D. degrees as well as a B.Sc. in Statistics degree. Applications are encouraged from students with strong interest in statistics, mathematics or related fields.

Fields of Research

Areas of research interest in the department include: Bayesian statistics; biostatistics; clinical trials; computational statistics; decision theory; distribution theory of runs and patterns; econometrics; environmental statistics; errors-in-variables models; experimental design; image processing; nonparametric statistics; order statistics; probability; quality control; reliability theory; statistical inference; stochastic processes; survival analysis; and time series.

Research Facilities

In addition to the vast network of computing facilities maintained by Computer Services at the University of Manitoba, the Department of Statistics maintains two smaller networks for use by their students. The graduate computing laboratory consists of iMac computers which are capable of running both OS X and Windows, and one IMB Intellistation running Ubuntu Linux. All of the computers in both the undergraduate and graduate labs are also available as a clustered computing resource with an aggregate 180 GHz processing speed and over 150 Gb of RAM.

M.Sc. in Statistics,

Admission

For September admission, the Department of Statistics begins the application review process in early February. To be considered in the initial review process, all application materials, including letters of reference and transcripts, should be received before February 1st. Applications received after this date will still be considered for admission depending on the number of spaces available for the Fall term. While applications after February 1st will still be considered for admission, they may not be considered for funding.

Students should also be aware of deadlines imposed by the Faculty of Graduate Studies. The Faculty of Graduate Studies requires that Canadian/U.S. submit their application and supporting documentation to the Faculty of Graduate Studies at least 3 months prior to their intended start date. International students should submit their application and supporting documentation to the Department at least 7 months prior to their intended start date.

Application Deadlines

Canadian/U.S. students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 3 months prior to their intended start date. International students should submit their application and supporting documentation to the Faculty of Graduate Studies at least 7 months prior to their intended start date.

Program Requirements

The Master's degree may be earned in one of three ways:

- Submission of a thesis; at least nine credit hours of approved work at the 7000 level in statistics, which must include STAT 7080, STAT 7140 and the zero credit hour STAT 7310; and six credit hours of approved coursework at the 4000 or 7000 level in Statistics.
- Submission of a practicum; at least nine credit hours of coursework at the 7000 level, which must include STAT 7080, STAT 7140, STAT 7290 and the zero credit hour STAT 7310; and six credit hours of approved work at the 4000 or 7000 level in Statistics.
- Eighteen credit hours of course work at the 7000 level, which must include STAT 7080, STAT 7140, the zero credit hour STAT 7310 and the research project course STAT 7320; and six credit hours of approved coursework at the 4000 or 7000 level in Statistics.

Students are also expected to take part in laboratory instruction.

Second language reading requirement: none

Expected time to graduate: one to two years depending on the option selected

Ph.D. in Statistics, Admission

Admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar. Completion of a Master's degree in Statistics is usually required for admission to the Ph.D. program.

Application Deadlines

For September admission, the Department of Statistics begins the application review process in early February. To be considered in the initial review process, all application materials, including letters of reference and transcripts, should be received before February 1st. Applications received after this date will still be considered for admission depending on the number of spaces available for the Fall term. While applications after February 1st will still be considered for admission, they may not be considered for funding.

Students should also be aware of deadlines imposed by the Faculty of Graduate Studies. The Faculty of Graduate Studies requires that Canadian/U.S. submit their application and supporting documentation to the Faculty of Graduate Studies at least 3 months prior to their intended start date. International students should submit their application and supporting documentation to the Department at least 7 months prior to their intended start date.

Program Requirements

Minimum program requirements of the Faculty of Graduate Studies are found in the Graduate Studies Regulations Section of this Calendar. Students are required to satisfy the following requirements:

- Candidates are required to attempt and successfully complete at least twelve credit hours at the 7000 level. These courses will normally be

taken from the Department of Statistics. Courses will normally be recommended by the candidate's supervisor.

- Candidates are required to pass the Ph.D. qualifying examination within eighteen months of first registration.
- Candidates are required to pass a candidacy examination, which will normally be administered twelve months prior to the completion of all degree requirements. The candidacy examination will be set and administered by the candidate's Ph.D. advisory committee. The format may vary.

Second language requirement: none

Thesis: required

Expected time to graduation: five years

Statistics Course Descriptions

STAT 7050

S

STAT 7060 Advanced Theory of Probability (Formerly 005.706) Probability as measure, convolutions, limit laws, conditional probability and expectation, law of large numbers and other selected topics. Prerequisite: consent of instructor.

STAT 7070

s

STAT 7080 Advanced Statistical Inference (Formerly 005.708) Selected topics from recent developments in parametric and/or non-parametric statistical inference. Prerequisite: consent of instructor.

STAT 7090 Advanced Statistical Analysis (Formerly 005.709) Construction of regression models, response surfaces, nonlinear model ANOVA as regression model, variance components, and selected topics. Prerequisite: consent of instructor.

STAT 7100 Analysis of Discrete Data (Formerly 005.710) Inference concerning discrete distributions, analysis of categorical data, and other selected topics. Prerequisite: consent of instructor.

STAT 7120 Nonparametric Inference (Formerly 005.712) Order statistics, Kolmogorov-Smirnov tests, Wilcoxin-Mann-Whitney tests, and other selected topics. Prerequisite: consent of instructor.

STAT 7140 Linear Models (Formerly 005.714) Theory of linear models, regression analysis, and analysis of variance. Prerequisite: consent of instructor.

STAT 7180 Selected Topics in Advanced Sampling Theory (Formerly 005.718) Selected topics from recent and current literature. Prerequisite: STAT 4520 (or 005.452) or consent of instructor.

STAT 7190

s

STAT 7200 Multivariate Analysis 1 (Formerly 005.720) Multivariate normal distribution, Hotelling's T², Classification methods, principal components and canonical correlations. Prerequisite: consent of instructor.

STAT 7210 Multivariate Analysis 2 (Formerly 005.721) Advanced topics in multivariate analysis. Prerequisite: STAT

7200 (or 005.720) or consent of instructor.

STAT 7220 Seminar in Statistics 1
(Formerly 005.722) A seminar course on new development in statistics.

STAT 7230 Seminar in Statistics 2
(Formerly 005.723) A seminar course on current research topics in statistics.

STAT 7240 Advanced Topics in Statistics 1
(Formerly 005.724) Special advanced research topics in statistics.

STAT 7250 Advanced Topics in Statistics 2
(Formerly 005.725) Special advanced research topics in statistics.

STAT 7260 Time Series
(Formerly 005.726) The auto-correlation function and spectrum, various processes, model identification, estimation and forecasting. Prerequisite: consent of instructor.

STAT 7270 Bayesian Inference
(Formerly 005.727) Bayesian decision problems, priors, Jeffrey's Rule, robustness of posteriors, Bayesian justification of ANOVA. Prerequisite: consent of instructor.

STAT 7280 Reliability Analysis and Risk Assessment
(Formerly 005.728) Fault tree, event tree, common-mode failure analyses, cut set, path set, estimation of system reliability, quantitative evaluation of the consequences of disastrous accidents, risk-benefit analysis. Prerequisite: consent of instructor.

STAT 7290 Statistical Consulting
(Formerly 005.729) The role of a statistics consultant. Practical consulting experience. Prerequisite: consent of department.

STAT 7310 Research Tools for Statistics
This course provides instruction in the use of a number of tools required for graduate level research in statistics. Topics include instruction in various software, such as LaTeX, R, SAS, etc. as well as Library usage, presentation and communication skills.

STAT 7320 Research Project in Statistics
This course will provide the student with practical experience in doing research in the statistical sciences. Students will be matched with a faculty advisor and carry out a research project. Deliverables include a final research report and a presentation to the department.

STAT 7350 Advanced Topics in Statistics 3
Special advanced research topics in statistics.

STAT 7360 Advanced Topics in Statistics 4
Special advanced research topics in statistics.

Surgery

Surgery ,
Surgery Program Info,
Program Information

Through the Thesis Stream, the program is designed to grant surgical residents a year free of clinical duties to work on a research project of their own design or undertake the investigative role in a laboratory setting under the advisement of a senior investigator / thesis advisor.

The purpose of the program is to encourage the development of surgical clinician scientists, who will become the academic leaders of Surgery in the future. Many recent MSc recipients have gone on to careers in academic surgery or are still undertaking fellowship training with plans to assume an academic career in Surgery.

Fields of Research

The research interests of the Department reflect the diversity of the clinical specialties contained therein. These specialties comprise of: Cardiac Surgery,

General Surgery, Neurosurgery, Orthopedic Surgery, Plastic Surgery, Thoracic Surgery, Urology and Vascular Surgery.

Research Facilities

Research occurs within facilities provided by the advisor. Such individuals are University of Manitoba faculty and generally have research facilities located at the Health Sciences Centre, University of Manitoba - Bannatyne Campus or the St. Boniface General Hospital Research Centre.

M.Sc. in Surgery,
Admission

In addition to the admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this *Calendar*, this program is **only** open to holders of an M.D. degree who are currently enrolled in a postgraduate residency program in the Faculty of Medicine at the University of Manitoba or holders of a D.M.D degree who are currently enrolled in the Faculty of Dentistry at the University of Manitoba. Applicants must include a copy of their current CV; research project proposal and a letter from their Thesis Advisor. An appointment with the Department of Surgery Research Chair to review the application and required documentation must be made prior to approval to proceed with an admissions application to the Faculty of Graduate Studies.

Candidates incorporate this program as part of their residency training, qualifying for both.

Program Requirements

In addition to the minimum course requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this *Calendar*, students must complete:

Twelve months' work of research, under the supervision of the senior investigator or thesis advisor and the Research Chair for the Department of Surgery;

Submission of a major thesis on the research project;

Demonstration to an examining committee of satisfactory theses and an adequate knowledge of the subject involved.

Two fields of study must be chosen for the M.Sc. degree: one as a major and the other as an ancillary study. Major studies must be taken in any surgical problem, while the ancillary study should be selected from some related field (e.g., pathology, physiology, biochemistry).

Second language reading requirement: none

Expected time to graduate: one year

Ph.D. in Surgery,
Surgery does not offer a Ph.D. program.

Page URL,
<http://crscalprod1.cc.umanitoba.ca/Surgery.catx>

Surgery Course Descriptions

SURG 7010 Surgery: Major course in Surgical Problems (Formerly 094.701) Description not available for this course.

SURG 7020 Surgery

(Formerly 094.702) Description not available for this course.

SURG 7030 Advanced Surgery

(Formerly 094.703) Description not available for this course.

SURG 7040 Surgical Epidemiology and Biostatistics

(Formerly 094.704) Prepare students to design studies suitable for a wide variety of research questions including diagnostic, etiologic and prognostic, and treatment outcomes, with focus on surgical issues. It should also provide the students with the essential biostatistical and epidemiologic tools to critique medical literature. The evaluation will be based on submission of a complete proposal to answer a research question of each student's choice.

Textile Sciences

Textile Sciences ,
Textile Sciences Program Info,

The Textile Sciences graduate program offers opportunities for in-depth study and technical and social dimensions of textile product development. The technical dimension includes research in the physical and chemical properties of textiles, and polymer science. The social dimension includes research in consumer behaviour toward textiles or textile products and marketing of textiles or textile products. The program comprises course work and a thesis.

Graduates from the program have found challenging careers in diverse fields. These include: technical product developer for medical/healthcare, industrial, and exercise and sports end uses, textile testing in industry or government research laboratories, post-secondary education, quality assurance, or a stepping stone to a Ph.D. degree.

Fields of Research

Faculty members are currently involved in research projects in many areas of the field. Research interests of faculty include: attitudes, values and interests of selected groups toward clothing, organizational and consumer decision-making for textile products, application of theories in consumer behaviour, marketing and economics to clothing-related phenomena, clothing for older adults, communication of apparel information to older consumers, textile product development, bio-protective textiles, sensory, physical, and chemical attributes related to the selection and performance of textile products, and skin/fabric interactions and their impact on clothing comfort and skin lesions.

Research Facilities

The department has well equipped laboratories for the study of textiles and textile products. Space and equipment are available for chemical, physical, microscopic and sensory investigations of textiles, for polymer synthesis and textile surface modification, for textile product development research, and for the study of consumer behaviour toward textile products. Special equipment includes an Instron tensile tester, an Atlas Fade-Ometer, a Nicolet iS10 FTIR spectroscopy, a Hunterlab colorimeter, a KES-SE Frictional Analyzer, a Porosimeter, a Tensiometer, a Electrospinner and a range of flammability, thermal comfort testers. A computer-aided design laboratory houses computers equipped with an industry-standard software system for textile product development. Campus facilities contribute to a quality environment for research. Students in the department have access to the special facilities and equipment of both the Departments of Family Social Sciences and Human Nutritional Sciences. The University of Manitoba libraries system holds major volumes of English-language periodicals in textile sciences and ancillary areas. Internet access is available throughout the Human Ecology Building. The University has numerous research institutes of potential relevance to the textile sciences graduate students. The Department of Textile Sciences maintains close relationships with the textile and related industries in Manitoba. Faculty are members of national or international organizations such as the Institute of Textile Science, the American Association of Textile Chemists and Colorists, the American Society for Testing and Materials, the American Chemical Society, the Administrative Sciences Association of Canada, The Academy of Marketing Science and The Association for Consumer Research.

Ph.D. in Textile Sciences,

The Department of Textile Sciences does not offer a Ph.D. program.

Page URL,

<http://crscalprod1.cc.umanitoba.ca/TextileSciences.catx>

Textile Sciences Course Descriptions

TXSC 7042 Preparations for Research in Textile Sciences

The course helps students develop the essential skill set to complete an academic research proposal. By integrating literature review and research methods, students will know how to seek, retrieve, critically assess and use information to develop a research topic, to formulate questions, and to make defensible methodological and data analysis decisions.

TXSC 7120 Topics in Textile and Apparel Marketing

(Formerly 064.712) A critical examination of practices in the production, distribution, and consumption of textiles and apparel.

TXSC 7162 Topics in Textile Sciences - Physical Properties

An in-depth study of the properties of fibers, yarns, fabrics, finishes and fabric assemblies using quantitative physical and sensory laboratory techniques.

TXSC 7164 Topics in Textile Sciences - Chemical Properties

An in-depth study of the properties of textiles of modern and historic origin using qualitative and quantitative chemical and microscopic laboratory techniques.

TXSC 7166 Seminar in Textile Sciences

Critical study of development in selective areas of textiles and/or clothing with emphasis on recent research findings.

TXSC 7168 Problems in Textile Sciences

this course covers advanced problems in one or more of the following areas: chemical, physical, or biological properties and/or structure of textile materials; physiological aspects of textiles; consumer behaviour or marketing.

Registration Information

SECTION 1: Information for All Graduate Students

Important Notice Regarding Graduate Fees,

Registration is not complete until fee payment or fee payment arrangements are made with the Financial Services Office in writing. Do not wait for a fee statement to be mailed to you. Students are urged to check the section: "Fees, Payments and Refunds" found in this *Guide* and/or the graduate fee information which can be accessed at the following website: <http://umanitoba.ca/student/records/fees>

Registration Reminders

Have you:

- Submitted your Progress Report form?
- Met with your advisor or department for program approvals?
- Accessed Aurora Student to check for any timetable updates?
- Accessed Aurora Student to register for your courses?
- Accessed Aurora Student for a fee assessment?
- Paid your fees?

Welcome to the Faculty of Graduate Studies,

Whether you are a new or returning graduate student, we hope you will familiarize yourself, not only with the information contained in this publication. Remember you are registering in a professional program leading to or supporting your career choice. Registering for courses that meet your department or your advisor's approval is your responsibility. However, your department office will be able to help you if you encounter difficulties in selecting or registering for courses.

Re-Registration Deadline

• All returning graduate students who intend to continue in their programs *must* re-register and pay fees before September 8.

• Any student whose program of study extends over more than one year *must* re-register for September and January of each succeeding year of their program until a degree is obtained.

Students who do not re-register in time will be subject to being “Discontinued” from their graduate programs. Students who have registered but have not paid in time will be subject to late fee payment or cancellation and discontinuation after this date.

Returning Students Progress Report

The Progress Report for graduate students in thesis/practicum project programs *must* be submitted to the Faculty of Graduate Studies at least prior to registration. Failure to submit this report will result in registration access being denied.

Initial Access Times

Access to registration times can be found in your Aurora Student account. Simply log in to Aurora Student, select Enrolment & Academic Records, select Registration, and then Registration Time and Status in order to view your access times for a given term.

1.1 Admission and Registration,

Admission and registration in the Faculty of Graduate Studies is by recommendation from a unit/department offering graduate programs. Students are admitted and register in the following categories: Occasional, pre-Master’s, Diploma, Master’s or Ph.D. and normally may commence study in September, January or Summer Session.

Students are responsible for meeting the requirements of the program and ensuring they have the prerequisites for the individual courses for which they register. Reference should be made to the current *Graduate Calendar* for detailed regulations and procedures of the Faculty.

Students whose program of study extends over more than one year must re-register each year until the degree is awarded. Students who fail to re-register do not retain the status of graduate student and must apply for readmission. See above for re-registration deadline.

Undergraduate students are not allowed to register in graduate courses; that is, admission to the Faculty of Graduate Studies is a condition for registration in courses at the 6000 level and above.

Students wishing to register for courses that are offered by a department/unit outside their major department/unit must get the approval of the offering department.

1.2 Student Status,

A student is considered to be full-time if the student is planning to carry the normal academic load of the department during the registration period. Graduate students who do not meet the criteria specified for full-time students should complete the form “Request for Part Time Status.”

This form must be approved by the department head and advisor and submitted to the Faculty of Graduate Studies prior to registration.

1.3 Course Numbers for Graduate Studies,

Registration for Thesis/Practicum or Comprehensive Examinations:

Students who intend to graduate in the coming year (February, May or October) must register for their thesis, practicum or comprehensive examination requirement. Therefore, you *may* need to register for one of the following:

GRAD 6000 Summer Research

Only for those students commencing their programs in May or July when courses may not be available.

GRAD 6100 Visiting Canadian Student Research Course

To formalize the status of visiting Canadian Graduate Student Researchers. Students must meet the terms of the Canadian Graduate Student Research Mobility Agreement (CGSRMA), and submit the Visiting Graduate Student Research Authorization form to be eligible to register.

GRAD 7000 Master’s Thesis

- fall term
(graduation in February or working on thesis during fall term only)

- fall & winter terms
(graduation in May or working on thesis during fall & winter terms)

- winter term
(graduation in May or working on of thesis during winter term only)

GRAD 7010 Master’s Comprehensive Examination

- fall term (graduation in February or preparing for comprehensive exam during fall term only)

- fall & winter terms (graduation in May or preparing for comprehensive exam during fall & winter terms)

- winter term (graduation in May or preparing for comprehensive exam in winter term only)

GRAD 7020 Master’s Re-registration**

GRAD 7022 Master’s Re-registration

MBA and MPA students who are not registering for any courses in Fall and/or Winter terms must register in this course to retain status.

GRAD 7030 Master’s Practicum

-fall term
(graduation in February or working on practicum during fall term only)

-fall & winter terms
(graduation in May or working on practicum during fall & winter terms)

-winter term (graduation in May or working on practicum during winter term only)

GRAD 7040 M.Eng. Project and Report (3)

GRAD 7050 M.Eng. Project and Report (6)

GRAD 7060 Diploma Re-registration**

GRAD 7090 Design Thesis

- fall term
(graduation in February or working on thesis during fall term only)

- fall & winter terms
(graduation in May or working on thesis during fall & winter terms)

- winter term
(graduation in May or working on of thesis during winter term only)

GRAD 7200 MFA Thesis/Studio Exhibition

GRAD 8000 Ph.D. Thesis

- fall term
(graduation in February or working on thesis during fall term only)

- fall & winter terms
(graduation in May or working on thesis during fall & winter terms)

- winter term
(graduation in May or working on of thesis during winter term only)

GRAD 8010 Ph.D. Candidacy Examination

GRAD 8020 Ph.D. Re-registration **

NOTE:

** The most efficient way to ensure that you are registered in order to retain status is to register for the "Re-Registration" course. Re-registration numbers are used by those students who are re-registering to retain status only - when not taking any courses or working on thesis/ practicum or comprehensive examination.

"Master's re-registration"

GRAD 7020 A02 (spanned course – both Fall and Winter term)

or

"Ph.D. re-registration"

GRAD 8020 A02 (spanned course – both Fall and Winter term)

Language Reading Tests

FREN 6000 French FREN 6010 Spanish
FREN 6030 Italian LATN 6000
GRMN 6000 German
RUSN 6000 Russian

1.4 Course Classifications,

Students are responsible for determining the correct course classifications, sections and slots in consultation with their Department. Courses with the X, A, or O status must be added to a student's registration by the department, i.e., this cannot be achieved through Aurora Student.

O Occasional Course is not part of the program and not included in the GPA
(Additional fees will be assessed)

X Auxiliary Course is not major requirement of the program but specified as necessary and required by the student's advisor or advisory committee

and not included in the GPA.

AAudit Course is not part of program, credit is not granted and grade will not be assigned. (Additional fees will be assessed)

1.5 Voluntary Withdrawal Dates,

Graduate Students are not allowed to withdraw from courses without permission from their department head or recommendation from their advisor/advisory committee giving approval to the program change.

For further information, contact your home Department or the Faculty of Graduate Studies
(204) 474 9377, 500 University Centre.

Website: http://umanitoba.ca/graduate_studies

E-Mail: graduate_studies@umanitoba.ca

SECTION 2: Departmental Information for Aurora Student

Aurora Grad General Info,

For general information on Aurora Student, refer to the Registration Information section of this Guide. Graduate Students in the **following programs/units** must contact their respective units to register: **Law, I.A. Asper School of Business, Individual Interdisciplinary Programs, St. Boniface College (Education and Canadian Studies), Ph.D. in Foods & Nutritional Sciences**. (Note: registration forms will not be mailed to students. The form can be accessed at the following Graduate Studies website:

http://umanitoba.ca/graduate_studies/forms/

2.1 Faculty of Agricultural and Food Sciences

2.1 Faculty of Agricultural and Food Sciences Content,
Agribusiness and Agricultural Economics

New and returning students must meet with their program advisor to determine courses prior to registration. Courses must be listed on the departmental approval form available from the Graduate Studies Assistant, 352 Agriculture, and written approval granted from both the advisor and the department head or designate. Students may only register for courses listed and approved at that time. Any course revisions (additions and/or withdrawals) must be approved in the same manner. The signed form must be submitted to Judy Powell, who will then complete the registration process.

Not all courses are offered each year.

Registration and program enquiries:

Judy Powell, 352 Agriculture Building; **Phone** (204) 474-9259;

E-mail: judy_powell@umanitoba.ca

Animal Science

All students in the graduate program must meet with their advisor/advisory committee to determine courses. Courses must be listed on the departmental approval form (available from the Animal Science General Office) and written approval granted from both the advisor and the department head or designate. Registration revisions are to be dealt with and approved in a like manner.

Not all courses are offered each year.

Registration and program enquiries:

Cathy Plouffe, 201 Animal Science Building; phone: (204) 474-6028;
Fax: (204) 474-7628
E-mail: animal_science@umanitoba.ca

Entomology

Prior to registration, students must consult with their advisor and then present a completed registration approval form to the department head. Any changes after the initial registration must also be approved by both advisor and department head.

Registration approvals contact N.J. Holliday, phone (204) 474-6020,
email: Neil_Holliday@UManitoba.CA

Registration assistance contact K. Graham, phone (204) 474-8077,
email: grahamk@Ms.UManitoba.CA

Food Science

Prior to registration, students must consult with their advisor and then present a completed registration approval form to the department head. Any changes after the initial registration must also be approved by both advisor and department head.

Courses are subject to cancellation if there is insufficient enrolment. Courses with insufficient enrolment will be cancelled the first week of classes.

Registration enquiries: Allison Cranmer, 250 Ellis Building;
phone (204) 474-9621

Registration approvals: Dr. Gary Fulcher, phone (204) 474-9065;
gary_fulcher@umanitoba.ca

Plant Science

All students in the graduate program must meet with their advisor/advisory committee to determine courses. Courses must be listed on the departmental approval form (available from the Plant Science General Office) and written approval granted from both the advisor and the department head or designate. Registration revisions are to be dealt with and approved in like manner. Not all courses are offered each year.

Registration and program enquiries:

Martha Blouw, 226 Agriculture Building; phone: (204) 474-8223;
Fax: (204) 474-7528
E-mail: plantscience_gradstudies@umanitoba.ca

Soil Science

Registration inquiries: Lynda Closson (Lynda_Closson@umanitoba.ca),
phone: (204) 474-8153.

Program information: Dr. David Lobb (lobbda@ms.umanitoba.ca), Chair, Graduate Studies Committee.

2.2 Faculty of Architecture

2.2 Faculty of Architecture Content,

Continuing Courses (CO'S): Students who are unable to complete a course may receive a mark classification of CO until such time as a final grade can be established. The deadline for completion is normally not later than one year from the end of the term in which the course was originally registered.

If the course is not completed by the next September and the students intend completing the course(s), they must *re-register* for the course(s).

If you have any questions regarding registration that are NOT answered in

the Registration Guide, please contact one of the Graduate Student Advisors as noted below.

Architecture

Please refer to the information communicated to you on course selection and requirements.

<http://umanitoba.ca/faculties/architecture/programs/113.htm>

Graduate Student Advisor: Gloria Baudry (204) 474-9286; fax (204) 474-7532;

baudrygj@cc.umanitoba.ca; 201 Russell Building.

Graduate Student Advisor: Jodena Baertsoen (204) 474-8763; fax (204) 474-7532;

baertsoe@cc.umanitoba.ca; 201 Russell Building.

City Planning

Please refer to the information communicated to you on course selection and requirements. All new students must meet with their faculty advisor within the first month of classes. Students with registration issues should meet with City Planning Graduate Student advisor during the last two weeks in August or first week in September.

<http://umanitoba.ca/cityplanning>

Graduate Student Advisor: Yvonne Halden (204) 474-8769; fax (204) 474-7532

haldenyl@cc.umanitoba.ca; 201 Russell Building.

Interior Design

Prior to registration, all new students must contact the Graduate Student Advisor, between mid-August and commencement of classes, who will determine whether a meeting with the Department Head is required. Timetable changes may occur throughout the summer. Department course list offerings and elective offerings are posted on the architecture website at <http://umanitoba.ca/interiordesign>

Graduate Student Advisor: Yvonne Halden (204) 474-8769; fax (204) 474-7532

haldenyl@cc.umanitoba.ca; 201 Russell Building.

Landscape Architecture

All new students should meet with the Department Head and must meet with the Graduate Student Advisor before registering. Returning students with registration issues should make an appointment with the Graduate Student Advisor prior to the first week in September. Courses may be cancelled if there is insufficient enrolment. Department course offerings and elective offerings will be mailed out and are also posted on the department website:

<http://umanitoba.ca/landscapearchitecture>

Graduate Student Advisor: Yvonne Halden (204) 474-8769; fax (204) 474-7532

haldenyl@cc.umanitoba.ca; 201 Russell Building

Design and Planning

Graduate Student Advisor: Yvonne Halden (204) 474-8769; fax (204) 474-7532

haldenyl@cc.umanitoba.ca; 201 Russell Building

2.3 Faculty of Arts

2.3 Faculty of Arts Content, Anthropology

All students in the graduate program must meet with their advisor to determine their course load. Courses must be listed on the departmental approval form (available from the Anthropology general office) and written approval granted from both the Advisor and the department head or designate. Registration revisions are to be dealt with and approved in like manner.

Registration and program enquiries:

General Office, 435 Fletcher Argue Building; phone: (204) 474 9361;
Fax: (204) 474 7600
Email: um-anthro@cc.umanitoba.ca

Economics

Prior to registering, all students must meet with a member of the Economics Department Graduate Studies Committee to determine their course load. The course load resulting from this meeting must be listed on the Departmental Course Approval Form (available from, 504 Fletcher Argue), and the form must be signed by a Graduate Studies committee member. The signed form must be submitted to Betty McGregor, 504 Fletcher Argue, who will then complete the registration process.

All course additions and withdrawals (registration revisions) must be approved in the same manner.

Registration and program enquiries:

Betty McGregor, 504 Fletcher Argue Building; **Phone** (204) 474 6240

E-Mail: Betty_McGregor@umanitoba.ca

English

All students (new and returning) must have their courses approved by the graduate chair prior to registering. Any courses added/dropped/changed must be at all times approved by the graduate chair. Only those courses that have been approved will be credited to your program. Courses are subject to cancellation if there is insufficient enrolment.

Students are reminded that they must satisfy the language requirement prior to scheduling their thesis defence.

Registration Enquiries: English Graduate Program Assistant;

623 Fletcher Argue Building; phone (204) 474-7365, 8:30 a.m. to 4:30 p.m.

French, Spanish and Italian

All returning and newly admitted students must consult with the graduate chair or the department head prior to registration. Students must fill out a pre-registration form which must be signed by the graduate chair or department head and submitted to Vonne Bannavong, 430 Fletcher Argue, who will then complete the registration process.

Registration enquiries: Vonne Bannavong, 430 Fletcher Argue;

phone: (204) 474 9313; E-mail: Vonne_Bannavong@umanitoba.ca

German and Slavic Studies

Prior to registration in German or Slavic Studies, students must consult with the graduate chair or the department head. Departmental office: 328 Fletcher Argue; phone: (204) 474-9370; fax: (204) 474-7601.

History

All new and returning students are required to see the chair or department head prior to attempting to register.

Students may only register for courses listed and approved on the Departmental Graduate Student Registration Form, available at the time of your meeting with the graduate chair. Any course registration revisions (addition and/or withdrawals) must be approved in the same manner. Your program, including the registration of the right courses, is your responsibility.

Students are reminded that they must satisfy the language requirement prior to graduation (French for Canadian History students).

Pre-Master's, Joint Master's and Ph.D. students may take 4000- and 7000- level courses offered by the Department of History at the University of Winnipeg. Consult the History Department, University of Manitoba for information on course offerings and registration.

Registration Inquires: Carol Adam, 403 Fletcher Argue Building;
Phone: (204) 474 8401
E-mail: carol_adam@umanitoba.ca

Icelandic Studies

Prior to registration for graduate courses in Icelandic, students must consult with the department head: Dr. Birna Bjarnad—ttir, 372 University College;
Phone: (204) 474 9551

Linguistics

Students must meet with their program advisor/thesis supervisor to determine course load. These courses must be approved by the department's Graduate Committee. All course additions and withdrawals (registration revisions) must be approved in the same manner.

For registration and program enquiries:

Debbie Spindler, 534 Fletcher Argue Building; **Phone:** (204) 474 9596.

E-mail: spindlr@cc.umanitoba.ca

Native Studies

All students must meet with the Graduate Program Chair to determine their course load. Prior to registering, students must have written approval from the Graduate Program Chair to take selected courses. All course additions and withdrawals (registration revisions) must be approved in the same manner.

For registration and program enquiries: Shirley McFaren, Graduate Program Assistant, 204E Isbister Building, phone (204) 474 9899.
E-mail: mcfaren@cc.umanitoba.ca

Further assistance is available from: Dr. Renate Eigenbrod, Graduate Program Chair, 204D Isbister Building, phone (204) 474 7026
E-mail: eigenbro@ms.umanitoba.ca

Philosophy

All students (new and returning) in the Master's and pre-Master's programs of the Department of Philosophy must have their courses approved by the graduate chair prior to registering. Students may only register for, and will only receive credit for, those courses approved by the graduate chair.

Graduate Chair: Rhonda Martens, 456 University College;

phone: (204) 474 9104; fax: (204) 474 7586.
Email: martensr@cc.umanitoba.ca

Registration Enquiries: Sandi Mazur, 453 University College;
phone (204) 474 6878.

Political Studies/Public Administration (MPA)

All new and returning students are required to have their registration pre-approved by the Chair or designate prior to attempting to register (appointments must be held prior to July 1).

Students may only register for courses listed and approved on the Departmental Graduate Student Registration Form, available at the time of your meeting with the graduate chair. Registration revisions (addition and/or deletion) must be approved in the same manner.

Students may need to register for POLS 6010 Manitoba Legislative Internship.

Registration Inquiries: Erika Ing, 532 Fletcher Argue Building; phone (204) 474 9733; Email: inge@cc.umanitoba.ca

POLS 6010 Manitoba Legislative Internship

Registration Inquiries: Erika Ing, 532 Fletcher Argue Building; phone (204) 474 9733; Email: inge@cc.umanitoba.ca

Psychology

Prior to registration, all students (new and returning) must meet with their advisor to determine their program of study. Courses must be listed on a Departmental Program Registration Form (available on the web at <http://umanitoba.ca/arts/psychology/graduate/forms.html>). The form must be signed by the advisor and the graduate programs coordinator. Clinical Program students must obtain the director of clinical training's signature prior to that of the graduate programs coordinator. Only those courses that have been approved by the graduate office will be credited to a student's program. See the Registration Information section of this Guide for registration procedures.

All course additions and withdrawals (registration revisions) must be approved in the same manner.

Contact registration and program enquiries: e-mail:
psych_grad_office@umanitoba.ca

Religion

Graduate Studies

To obtain written approval for courses before registration, all students in the Religion Joint Master's Program must meet either the chair of the Joint Discipline Committee, Religion, or with the department head or designate. All Ph.D. students must meet first with the head, Department of Religion. Course additions and withdrawals must be approved in the same way.

Sociology

All new and returning Pre-Masters, M.A., and Ph.D. students must meet with the Chair of Graduate Studies in Sociology to discuss their program of study (usually in late August). The Graduate Program Assistant will then register the student. All course additions and withdrawals must be arranged in a similar fashion.

For registration and program inquiries: Margaret Currie, Sociology Graduate Program Assistant, 320B Isbister Building, phone: (204) 474-9260. Email: Margaret_Currie@umanitoba.ca

2.4 Clayton H. Riddell Faculty of Environment, Earth, and Resources

2.4 Clayton H. Riddell Faculty of Environment, Earth, and Resources Content, Environment, Earth, and Resources and Geography

All students must meet with their program advisor/thesis supervisor to determine their course selections. Courses must be listed on the Departmental Registration Approval Form (available from the departmental office) and written approval from the advisor and department head or designate must be obtained. Students are also responsible for obtaining any instructor or special permission which may be required for certain courses.

All course additions and withdrawals (registration revisions) must be approved in the same manner.

Registration and program enquiries: Pat Gutoski
210 Isbister Building; phone (204) 474 7065.
E-mail: gutoski@cc.umanitoba.ca

Geological Sciences

All students must consult with their advisor prior to registration and present a completed Program Form to the administrative assistant. The selection of courses and changes in a student's program must be approved by their advisor in the case of Masters students or their advisory committee in the case of doctoral students.

Students should consult the administrative assistant regarding the schedule of graduate course offerings in the department. Please note that some courses require a field component to be run before lectures begin in the fall. Courses with insufficient enrolment may be cancelled well in advance of the first week of lectures.

Registration inquiries: Brenda Miller
phone (204) 474-6777; E-mail: brenda_miller@Umanitoba.ca

Natural Resources Institute

All returning and newly admitted students to the Natural Resources Institute are required to see their faculty advisor to complete their Degree Requirement Form prior to attempting to register. Appointments can be made by calling (204) 474 8373. Only courses that have been approved by the faculty advisor will be credited to a student's program.

Registration Inquiries: Dalia Naguib, 303 Sinnott Building;
phone (204) 474 8373.

2.5 Faculty of Dentistry

2.5 Faculty of Dentistry Content,
Oral Biology

All new or returning graduate students must have identified a faculty member willing to act as thesis supervisor. This must be done through personal interviews prior to registration. All programs of study must be approved by the department head or chair of the Graduate Studies and Research Committee.

Not all departmental graduate level courses are offered each year. Consult with appropriate faculty members.

Consult the department office for a list of courses offered.

Enquiries may be made: Chair, Graduate Studies and Research Committee; phone (204) 789 3705.

Oral and Maxillofacial Surgery

Graduate students in Oral and Maxillofacial Surgery will be registered by the office assistant in Dental Diagnostic and Surgical Sciences. Prior to registration, a personal interview will be held with the head of the program to approve all programs of study.

Consult the department office for a list of courses offered.

Enquiries: phone: (204) 789 3633 or e-mail: Oral_Surgery@umanitoba.ca

Periodontics

Graduate students in Periodontics will be registered by the office assistant in Dental Diagnostic and Surgical Sciences. Prior to registration, a personal interview will be held with the head of the program to approve all programs of study.

Consult the department office for a list of courses offered.

Enquiries: Periodontics, phone: (204) 789 3633 or
e-mail: Periodontics@umanitoba.ca

Preventive Dental Sciences (Orthodontics)

All new and returning students are required to have their registration processed by the Program Assistant.

Registration and program enquiries: Cathy Watt, Program Assistant, Orthodontics at (204) 789-3628 or e-mail: Cathy_Watt@umanitoba.ca

2.6 Disability Studies

2.6 Disability Studies Content,

Students must meet with their program advisor to select and receive approval for courses to be taken, prior to registration. Any course revisions (additions and/or withdrawals) must be approved in the same manner.

Continuing Courses (CO's)

Students who are unable to complete a 7000 level course may receive a mark classification of CO until such time as a final grade can be established. The deadline for completion is normally not later than one year from the end of the term in which the course was originally registered. If the course is not completed by August 31, students must re-register for the course for the next academic session in order to receive a grade.

Enquiries: Disability Studies Office (Room 128 Education Building)
phone (204) 474 7017.

2.7 Faculty of Education

2.7 Faculty of Education Content,

It is recommended that students read the registration information relevant to graduate students before attempting to register.

2.7.1 Initial Access Times

Students are referred to the Chapter, Registration Information: Aurora Student.

Students must ensure that courses to be taken have been approved and entered on their program approval form. If not approved, students should meet with their program advisor to select and approve the courses to be taken.

2.7.2 Registration Assistance

Graduate Programs and Research Office

227 Education Building

Office Hours: 8:30 a.m. to 4:30 p.m. Monday to Friday

Telephone: (204) 474 7886 or Toll Free in Manitoba 1 800 432 1960

Fax: (204) 474 7551

E-mail: edgradpr@ms.umanitoba.ca

Website: <http://umanitoba.ca/education>

2.7.3 Continuing Courses (CO'S)

Students who are unable to complete a 7000 level course may receive a mark classification of CO until such time as a final grade can be established. The deadline for completion is normally not later than one year from the end of the term in which the course was originally registered. If the course is not completed by August 31, students must re-register for the course(s) for the next academic session in order to receive a grade.

2.7.4 Occasional Students

Prior to registration, students must obtain written permission from the department head for 7000 level Education courses. This permission must be submitted to the Graduate Programs and Research Office prior to attempting to register.

2.7.4 Registration for student initiated courses

Prior to registration for student initiated courses, students must have the Student Initiated Form approved by their instructor and the department head and submitted to the Graduate Programs and Research Office. Upon receipt of the form, a Faculty of Education staff will activate the course and contact the student with further instructions.

2.7.5 Registering for courses offered in other faculties

Education graduate students wanting to register for graduate courses outside the Faculty of Education are encouraged to contact the department concerned for registration procedures. In some cases, written approval may be required from the instructor and department head of the course requested. The written approval must

be presented to the Graduate Programs and Research Office prior to attempting to register.

2.7.6 Students Registered in Other Faculties or Schools

Students registered in other faculties or schools see Chapter The Registration System: Aurora Student, for registration access dates to Education courses.

2.7.7 Visiting Students

Students who are working on a graduate program at another institution and wish to register for a graduate course at the University of Manitoba with the express purpose of having credit transferred to their home university must apply for admission to the Faculty of Graduate Studies by the published application deadline dates. Also, a letter of permission from their home university must be submitted to the Graduate Programs and Research Office, Faculty of Education prior to registration. For registration dates see Chapter The Registration System: Aurora Student.

2.8 Faculty of Engineering

2.8 Faculty of Engineering Content,

Courses are subject to cancellation if there is insufficient enrolment. Courses with insufficient enrolment may be cancelled the first week of classes. Not all courses will be offered each year — contact the department for courses that will not be offered. All returning and newly admitted students must see an academic advisor or the department head prior to attempting to register.

Biosystems Engineering

Registration inquiries: Debby Watson, E2-376 EITC;
phone (204) 474 6033; email: debby_watson@umanitoba.ca

Civil Engineering

Registration Inquiries: Connie Wenzoski, E3-386 EITC;
phone (204) 474 8596; email: wenzoski@ms.umanitoba.ca

Electrical and Computer Engineering

Registration Enquiries: Karin Kroeker; Room E2-390 EITC
phone (204) 474 9603; email: karin_kroeker@umanitoba.ca

Mechanical and Manufacturing Engineering

Registration inquiries: Kusum Vyas, E2-327 EITC;
phone (204) 474 6540; email: vyas@cc.umanitoba.ca

2.9 Faculty of Human Ecology

2.9 Faculty of Human Ecology Content,

Textile Sciences

All returning, newly admitted and occasional students must have their course selections and withdrawals approved by their advisor prior to registration.

Registration Inquiries: please see your advisor.

Application Inquiries: Dr. Wen Zhong, H517 Duff Roblin Bldg., phone: (204) 474-9913

Email: zhong@cc.umanitoba.ca

Family Social Science

Prior to registration students must get approval for courses from their advisor.

Readings course: Prior to registering for a Readings course, students must arrange for a faculty member to direct in the course and get approval from the Family Social Sciences department head.

Registration inquiries:

Secretary, Family Social Sciences Department;
phone (204) 474 9225; email: family_social_sciences@umanitoba.ca

Human Nutritional Sciences

All returning or newly admitted graduate and occasional students must see a faculty advisor or the department head, and submit their course plan, prior to registering.

Registration enquiries: Pat Parish, Office Assistant; phone (204) 474 9901.

For program information contact Dr. Rotimi Aluko, Chair, Graduate Studies Committee; phone (204) 474-9555

2.10 Faculty of Kinesiology and Recreation Management

2.10 Faculty of Kinesiology and Recreation Management Content,

Program Approval Form

All new students must complete a Graduate Program Approval Form, in consultation with their advisor, and submitted to the Graduate Program Chair, prior to registering for courses. Only courses that are included on the Program Approval Form will be credited to the student's program of study. The Advisor and Graduate Program Chair must approve any changes made to the Program of Study.

Directed Study

Students may complete a maximum of two directed study courses (different topics) for a total of six credit hours; however, only one directed study (three credits) will count towards the minimum 12 credit hour course degree requirements. Students, in conjunction with the advisor for the course, must complete a Directed/Individual Study form. This form must include a description of the course work to be completed and an outline of how the final grade will be determined. This form must be approved by the Graduate Program Chair and filed with the Graduate Program Assistant who will register the student for the course.

Registration and Program Assistance

Graduate Program Assistant, HLHP Research Institute General Office; phone 474 7493; fax: 261 4802;
e-mail: kinrecgrad@umanitoba.ca

2.11 Faculty of Management

2.11 Faculty of Management Content,

For information regarding the Asper MBA program, contact the Asper Graduate Program Office at:

Phone: (204) 474-8448

Email: aspermba@umanitoba.ca

For information regarding the Asper Ph.D. and M.Sc. programs, contact the Asper Graduate Program Office at:

Phone: (204) 474-8448

Email: asper_phd_msc@umanitoba.ca

2.12 Faculty of Medicine

2.12 Faculty of Medicine Content, Biochemistry and Medical Genetics

All new and returning graduate students in the department of Biochemistry and Medical Genetics are required to complete a Course Approval Form available on the website:

<http://umanitoba.ca/faculties/medicine/units/biochem/student/2784.htm>

http://umanitoba.ca/faculties/medicine/biochem/programs/registration_steps.html

or in the general office, in consultation with their supervisor **prior** to registering for courses and making program changes. The Course Approval Form must be signed by the student, supervisor, graduate chair or the department head and submitted to the graduate program coordinator. Only courses that are included on the Course Approval Form will be credited to the student's program. All course additions and withdrawals (registration revision) must be approved in the same manner by completing or filling out the Registration Revision Form available on the website:

http://umanitoba.ca/faculties/graduate_studies/media/registration_revision.pdf

Consult the department office or browse the web for a list of course offerings.

<http://umanitoba.ca/faculties/medicine/units/biochem/student/graduate.html>

<http://umanitoba.ca/faculties/medicine/units/biochem/programs/graduate>

It should be noted that not all courses are offered every year and some courses will be held only with a minimum enrolment. Please check the Aurora catalog to find out when a course is offered

(https://aurora.umanitoba.ca/banprod/bwckctlg.p_disp_dyn_ctlg)

Registration enquiries: Mrs. Tuntun Sarkar

Email: sarkar@cc.umanitoba.ca

Phone: (204) 789-3399

Community Health Sciences

Prior to registration, all students must have obtained permission from the relevant course instructor and both their academic/thesis advisor and the graduate director (or designate). The program approval form is available from the Graduate Program office and on our website. Only courses that are listed on the Program Approval Form may be credited towards the student's program of study. All course additions and withdrawals are to be handled in like manner.

Not all courses are offered each year. Contact the Graduate office for a list of current course offerings.

Registration enquiries: Theresa Kennedy, S111, Medical Services Building,
Phone: (204) 789-3655

Human Anatomy and Cell Science

Prior to registration, all new and returning students must meet with their advisor or the Chair, Graduate Studies Committee in the Department to determine their program of study. All course additions and withdrawals (registration revisions) must be approved in the same manner. The Program Approval Form must also be signed by the Chair, Graduate Studies Committee or Department Head.

Consult the department office for a list of courses offered.

Registration and program enquiries: phone (204) 789 3411;
(204) 789 3652 or email: anatomycellsci@umanitoba.ca

Immunology

All new and returning students must meet with their advisor to determine their program of study prior to registration. Once the student has met with their advisor and subsequently receives approval from the Department Head, they must contact the Administrative Assistant, who will register the student in their courses.

All course additions and withdrawals (registration revisions) must be approved in the same manner.

Consult the department office for a list of courses offered in 2006-07.

Registration and program enquiries:

Karen Morrow, Administrative Assistant phone (204) 789 3509;
email: kmorrow@cc.umanitoba.ca

Medical Microbiology

Prior to registration, all new and returning students must meet with their advisor to determine their program of study. Students should register themselves by signing up for the Aurora Student service on the University of Manitoba website. If difficulties are incurred students may contact the Graduate Studies Committee Office Assistant as per the information below.

All course additions and withdrawals (registration revisions) must be approved in the same manner.

Not all courses are offered each year. Contact the department for a list of course offerings.

Registration and program enquiries, phone (204) 789 3444;
email: nelsonak@ms.umanitoba.ca

Medical Rehabilitation

Prior to registration, all new and returning students must meet with their advisor to determine their program of study.

All course additions and withdrawals (registration revisions) must be approved in the same manner.

Not all courses will be offered each year. Please check the Aurora catalog to find out when a course is offered
(https://aurora.umanitoba.ca/banprod/bwckctlg.p_disp_dyn_ctlg).

Registration and program enquiries, phone (204) 272 3159;
email: msc_med_rehab@umanitoba.ca

Occupational Therapy

Master of Occupational Therapy (M.O.T.) students are required to register themselves through Aurora Student. Aurora Student is available 7 days per week, 24 hours per day (subject to minor scheduled and unscheduled outages in off-peak hours), thus providing students with greater access/flexibility regarding the registration process.

To begin registration, go to the University of Manitoba home page (www.umanitoba.ca) and click on the 'Current Students' tab. Under 'Online services', select 'Aurora Student'. Click on 'Enter Secure Area'. Read and follow the instructions given on the computer screen.

1. Register for the courses that pertain to the respective year that you are entering into. Note that you will only be required to enter the course reference number (CRN) that pertains to each of the courses listed in that specific year of the program; each year, new CRNs are assigned to courses. CRNs appear on each department's facesheet at the School of Medical Rehabilitation. As soon as the CRNs become available, students will have that info e-mailed to them using their umanitoba address listed in Aurora.

2. You must enter a registration term before being allowed to move on to the Add or Drop Classes screen (if you aren't sure what term you are in, the top right corner of the screen will have it listed under your name and student number).

3. You must register in both Fall (Fall 20XX) and Winter (Winter 20XX) terms separately. Ensure that you have chosen the correct term where the course is being offered; if the incorrect term is entered, the CRN for the course that you want to register for will not appear. An e-mail will be sent by Doris Weigel to advise students when the Aurora Student system is available to accept Summer registrations, i.e. listed as Summer 20XX.

4. Students are required to "Submit Changes" after completing any Add/Drop transactions. If encountering registration errors when trying to register for several courses during one transaction, please register for one course at a time (saving after each entry). In most cases, this will rectify the problem. To log out of the system, it is important that you click on the 'Exit' button.

5. When you add Part A of a spanned course in the Fall term, the system will automatically add Part B in the Winter Term.

After you have registered in all of the courses pertaining to the year in which you will be entering, use Aurora Student to obtain a fee assessment. Pay all fees by the fee payment deadlines published.

Registration Exceptions

Students who have a failing grade(s) registered against them and/or have other outstanding academic matters (i.e. deferred or supplemental examinations, modified program, etc.) in regards to the previous academic session will not be allowed to register using Aurora Student until instructed to do so. Students falling into this category should initially contact Donna Collins at (204) 789-3422 or dcollin@cc.umanitoba.ca for further information.

First Year M.O.T. Student Information

Courses in the first year of the program are as follows:

Fall 20XX	Dept. Name	Dept. Code	Course No.	Credit Hrs.
Occupational Therapy	OT		6100	6
Occupational Therapy	OT		6110	3
Occupational Therapy	OT		6120	3
Occupational Therapy	OT		6130	3
Occupational Therapy	OT		6140	7
Occupational Therapy	OT		6190	1
Occupational Therapy	OT		6200	4

Winter 20XX

Dept. Name	Dept. Code	Course No.	Credit Hrs.
Occupational Therapy	OT	6300	4
Occupational Therapy	OT	6310	4
Occupational Therapy	OT	6320	4
Occupational Therapy	OT	6330	4
Occupational Therapy	OT	6350	4

Summer 20XX*

Dept. Name	Dept. Code	Course No.	Credit Hrs.
Occupational Therapy	OT	6400	8

* Students will be advised when the Aurora Student system is available to accept Summer 20XX registrations.

Total credit hours for First Year: 55

Second Year M.O.T. Student Information

Courses in the second year of the program are as follows:

Fall 20XX

Dept. Name	Dept. Code	Course No.	Credit Hrs.
Occupational Therapy	OT	7540	4
Occupational Therapy	OT	7560	6
Occupational Therapy	OT	7570	6
Occupational Therapy	OT	7750	6

Winter 20XX

Occupational Therapy	OT	7600	8
Occupational Therapy	OT	7740	4
Occupational Therapy	OT	7760	6
Occupational Therapy	OT	7770	6

Summer 20XX*

Dept. Name	Dept. Code	Course No.	Credit Hrs.
Occupational Therapy	OT	7800	6

* Students will be advised when the Aurora Student system is available to accept Summer 20XX registrations.

Total credit hours for Second Year: 52

Total program credit hours: 107

Registration Assistance

When registering for courses, if problems are encountered that you cannot resolve on your own, contact Doris Weigel at (204) 789-3248 or dweigel@cc.umanitoba.ca. When Doris is on holidays (only), please contact Julia Blonski at 977-5638 or blonski@cc.umanitoba.ca for assistance. Your queries will be addressed as soon as possible.

Students on Hold

If your records are on "Hold", you are prevented from any registration transaction until you have cleared this status.

Applying to Graduate

The O.T. Department will notify the Department of Graduate Studies about your eligibility to graduate. All graduation and convocation communication from the Registrar's Office (Convocation) will be e-mailed to your umanitoba account. Check for Convocation information regularly on the Convocation website.

Change of Address

You are responsible for updating your phone number and home/permanent addresses using Aurora Student (make corrections right on-line). So as to keep your School of Medical Rehabilitation personnel file up to date, also provide your phone

number and address changes to the General Office of School of Medical Rehabilitation.

E-mail Accounts

All students should have an e-mail account with the University of Manitoba. As a student in the School of Medical Rehabilitation, you are expected to enter your University of Manitoba e-mail address in Aurora. Check e-mails regularly.

Pathology

All programs of study must be approved by the Chair of Graduate Studies or by the Department Head.

Not all courses are offered each year. Please consult with the department office or appropriate faculty members.

Enquiries: Dr. Y. Myal, Chair, Graduate Studies, phone (204) 789 3538.

Pharmacology

Prior to registration, all new and returning students must meet with their advisor and Pharmacology Director of Graduate Studies to determine their program of study.

All course additions and withdrawals (registration revisions) must be approved in the same manner. Consult the department office for a list of courses offered.

Registration and program enquiries, phone (204) 789 3553;
email: pharmacology@umanitoba.ca

Physiology

Prior to registration, all new and returning students must meet with their advisor to determine their program of study.

All course additions and withdrawals (registration revisions) must be approved in the same manner.

Not all courses are offered every year and some courses will be held only with a minimum enrolment. Consult the department office for a list of courses offered.

Registration and program enquiries, phone (204) 789 3764;
email: mcindle@ms.umanitoba.ca

Surgery

All new or returning graduate students must contact the Department: phone (204) 787 7277; email: mbrychka@hsc.mb.ca.

2.13 Marcel A. Desautels Faculty of Music

2.13 Marcel A. Desautels Faculty of Music Content,

All graduate students must meet with the Faculty's Registrar to obtain and complete a course approval form: this form will list the student's proposed course schedule. Students must receive written approval from both their advisor and the Chair of the Grad Studies program before registering. Registration revisions are to be approved in a like manner.

Not all courses are offered each year: please check with the Faculty's Registrar for current and upcoming offerings.

Registration and program enquiries: Registrar, 206 Music Building; phone: (204) 474-9133; Fax: (204) 474-7546; email: sleeson@cc.umanitoba.ca

New Supplemental Regulations governing the Marcel A. Desautels Faculty of Music graduate programs came into effect July 2008. Supplemental Regulations may be found on the Faculty of Graduate Studies website or at <http://umanitoba.ca/music>, Future Music Students, Graduate Studies.

2.14 Peace and Conflict Studies

2.14 Peace and Conflict Studies Content,

Prior to registering, all students (new and returning) must meet with their program advisor to select and receive approval for courses to be taken. Any course revisions (additions and/or withdrawals) must be approved in the same manner.

Registration and program enquiries:

Mauro Centre, 252 St. Paul's College

Phone: (204) 474 6052

Fax: (204) 474 8828

Email: mauro_centre@umanitoba.ca

2.15 Faculty of Pharmacy

2.15 Faculty of Pharmacy Content,

All students in the graduate program must meet with their advisor/advisory committee to determine courses. Courses must be listed on the Faculty Approval Form (available from the Pharmacy General Office) and written approval granted from both the advisor and the graduate chair. Any registration revisions (withdrawals or additions) are to be dealt with and approved in a like manner. Graduate students who register in any course that is not approved by the advisor will be withdrawn from the course.

Not all courses are offered each year. Registration inquiries: Phone (204)474-6008.

2.16 Faculty of Science

2.16 Faculty of Science Content,

Chemistry

All returning and new graduate students in the Department of Chemistry must complete a Graduate Program Approval form and consult with the Academic Programs Administrator. The selection of courses and changes in a student's program must be initiated by their graduate advisor in the case of Masters students or their advisory committee in the case of doctoral students. Students should consult the Academic Programs Administrator.

Registration assistance: Heather Paterson; phone 474 6243;
e-mail heather_paterson@umanitoba.ca

General inquiries should be directed to the general office, 360 Parker;
phone 474 9321, e-mail chemistry_dept@umanitoba.ca

Computer Science

All students must consult with their advisor prior to registration and hand in a completed registration form for approval to E2-445 EITC. Any changes, after the initial registration, must also be approved by the advisor.

See the sections, Registering for Thesis and Practicum, and Graduate Studies Course Numbers.

A listing of available courses can be picked up at the departmental general office, E2-445 EITC. Courses are subject to cancellation if there is insufficient enrolment.
