

How to Access Naloxone Kits in the Community

1. Any person is able to purchase a naloxone kit and receive training, without a prescription, through select pharmacies in the province. The College of Pharmacists of Manitoba keeps an updated list of participating pharmacies on their website: <http://www.cphm.ca/>

Costs and availability may vary, so it is best to call ahead for more information.

2. If you are concerned about the drug use of another University of Manitoba student (e.g., friend, family member, or roommate), encourage them to connect with us. With their permission you are welcome to attend the naloxone kit training with them, where you will also receive the training yourself, although they will be the only one to receive a free kit.

3. If you are concerned about a friend, family member, or roommate who is NOT a University of Manitoba student encourage them to connect with the Winnipeg Regional Health Authority Street Connections program for a free kit: <http://www.streetconnections.ca>

A few other locations within the city provide free kits to drug users and those are all listed on the Street Connections website above.

4. If you want to learn more about naloxone or fentanyl the following sources are helpful:

www.streetconnections.ca

<http://towardtheheart.com>

Naloxone Saves Lives video: <https://vimeo.com/164669763>

If you have any other questions, concerns or would like more information on resources for yourself or others, please contact me.

Sincerely,

Katie Kutryk RN BN, Health & Wellness Educator
